ANNUAL REPORT ON THE POST OFFICE OF INDIA FOR THE YEAR 1887-88.

No. 185, dated Calcutta, the 10th January, 1889.

RESOLUTION—By the Government of India, Department of Finance and Commerce.

Read—

The Annual Report on the Post Office of India for the year 1887-88.

RESOLUTION.—The year 1887-88 has been one of general progress in postal business, and the Report for that year, which was received in print on 15th December, illustrates how closely the work of the Post Office touches, at many points, the commercial life of the country. In Burma a marked advance has been made in placing the postal administration on a proper footing.

2. The new contract with the Peninsular and Oriental Steam Navigation Company for the mail service between the United Kingdom and India and China came into force from the beginning of February 1888. A saving of £95,000 has been effected in the total cost of this service, of which India will receive its appropriate share, probably about £18,000, and the contribution required to make up the deficiency in the cost of the European mail service was reduced from £68,000, the sum paid in the two preceding years, to £65,000 for 1887-88.

3. There was an increase of 14 millions in the number of articles issued for delivery. Newspapers and parcels have not actually fallen off in number, but show a tendency towards decrease; letters maintain their ordinary rate of increase, while postcards are constantly gaining a more important place in the correspondence of the country. The greatest increase was in the number of book-packets, but this, no doubt, was connected, to some extent, with the improper use of the value-payable post described in paragraph 42 of the Report. Nearly five million letters were registered, so that in seven years, since the registration fee was reduced, the number has nearly doubled, notwithstanding the fact that the progress of the money order system constantly tends to lessen the practice of sending remittances by registered letters, which formerly was one of the main reasons for the use of registration.

4. The funds of the District Post have been spent of late years largely on rural delivery, and the propriety of this policy, which has been approved in the past, can hardly be questioned when these funds are derived from cesses. It is clearly right that the provision of postal services for the agricultural population should be one of the objects on which money directly contributed by them should be spent.

5. More than 5½ million money orders were issued during the year, and the constant growth of the popularity of this branch of postal business is attended with evidence that the system is being used for the legitimate purpose of a Post Office money order system. The average value of each money order was ₹21-7-9, the lowest figure yet reached, and it is stated that more than half the money orders issued were for sums not in excess of ₹10. In the North-Western Provinces nearly 18 lakhs of revenue were paid by means of the special Revenue money orders, while in the Lower Provinces, to the whole of which the system was extended for the first time during the year, 2½ lakhs of revenue were paid by these orders. The Rent money order system has also commanded a large measure of success during the year, the first year of its general adoption, in the North-Western Provinces, and is to be introduced into the Lower Provinces. The reduction in the rates for telegraphic money orders led to an increase of business, and has evidently been appreciated in Burma. There was an increase in the sale of British Postal Notes, and it may be hoped that the measures now proposed to be taken will lead to a larger demand for them.

6. The business of the Post Office Savings Bank shows a considerable increase, but the amount at present invested in Government securities bears a very small proportion to the total balance at the credit of depositors' accounts.

7. As regards general matters, it is satisfactory to find that the result of calling public attention last year to the insecure and careless way of sending newspapers and packets through the post has been an improvement in this respect, and the whole section of the Report dealing with the work of Dead Letter Offices has been read with interest. The complaints regarding defective gum on postage stamps have received the attention of Government, and it is hoped that the representations made on the subject will lead to the removal of the defect in future supplies. The matter is one in which a good deal of public inconvenience in a small way has been caused.

8. The revenue and expenditure of the Post Office stand as under :—

	1886-87.	1887-88.
	₹	₹
Revenue	1,15,43,070	1,21,41,962
Expenditure	1,35,02,920	1,37,52,017
Deficit . .	19,59,850	16,10,055

To this deficit should be added indirect expenditure connected with the Post Office which appears in the Finance and Revenue Accounts under other heads, while the charge on account of District Post establishments which is met from local cesses and contributions by Local Governments has to be excluded. The financial position, therefore, of the Post Office may be shown as follows, and it will be seen that the deficit has been reduced by a lakh and three quarters :—

	1886-87.	1887-88.
	₹	₹
Deficit according to statement XI of the Report (purely postal transactions including exchange)	19,59,850	16,10,055
Add—Indirect expenditure . . .	6,52,417	8,24,929
	26,12,267	24,34,984
Deduct—District post charges . . .	11,09,172	11,09,819
Resulting deficit .	15,03,095	13,25,165

This deficit includes the cost of maintaining the Post Office Savings Banks, but with regard to service postage it has to be said that there are good reasons why ordinary postage rates should not be charged on official correspondence in India, while the matter is not important financially, as no real question of revenue is involved. From a departmental point of view, however, it is natural and reasonable that full credit should be claimed for the services rendered to Government, if the results of the administration of the Post Office are to be compared on equal terms with the results of Post Office administration elsewhere.

9. The thanks of Government are due to Sir F. R. Hogg for the continued success of his administration of the Post Office, to Mr. Hynes, Deputy Postmaster General, Burma, and to the other officers whose special services have been brought to notice in paragraph 60 of the Report.

ORDER.—Ordered, that a copy of the foregoing Resolution be communicated to the Director General of the Post Office of India.

Ordered, also, that the Report and the Resolution be published in the *Gazette of India*.

A. U. FANSHAWE,
Offg. Secy. to the Govt. of India.

FOR THE YEAR

1887-88.

No. 6492, dated 27th November 1888.

From—A. U. FANSHAWE, ESQ., *Offg. Director General of the Post Office of India,*
To—*The Secretary to the Government of India, Department of Finance and Commerce.*

I have the honour to submit the Annual Report on the Post Office of India for the official year 1887-88.

Principal events, Inland Post.

2. The year was one of steady progress, on the whole, in all branches of Post Office business, and was specially marked by a large development of postal communications, chiefly in connection with Burma. As regards steam services,* the contract with the Asiatic Steam Navigation Company for the Port Blair service was renewed for five years with effect from the 1st January 1888, and the British India Steam Navigation Company doubled its steamers between Calcutta and Rangoon and the Coromandel coast and Rangoon. Arrangements have been made with the Company for the conveyance of mails by these subsidiary steamers with effect from the 1st February 1888, previous to which date the mails were carried free as a temporary measure, with the result that a regular semi-weekly mail service has been established between Calcutta and Rangoon, and a regular weekly mail service between Madras, the ports of the Northern Circars and Burma. In Burma itself there has been a marked advance in the postal administration with the more complete establishment of civil control over the upper portion of the province, though mail lines have still in some parts to be managed by the civil officers, and there were ten mail robberies during the year. In Bengal and the North-West Provinces the revenue and rent money order schemes made substantial progress, and a system of extending the hours of business at post offices was introduced with success, and is now being generally adopted. It may be mentioned as a special event that towards the close of the year a Field Post Office was organized for the Sikkim expedition, and a special mail line was opened through the Teesta Valley and across the Sikkim frontier.

Principal events, Foreign Post.

3. The principal events of the year, affecting the external relations of the Post Office, were shortly as follows:—The new contract with the Peninsular and Oriental Company came into force from the beginning of February 1888, and the first steamer under the new contract reached Bombay on the 20th February. The change in mail arrangements, to which it has given rise, will more properly fall within the scope of next year's report, but it may be mentioned that the most important of these will probably be the introduction of sea-sorting between Aden and Bombay, instead of between Port Said and Bombay. A saving of £95,000

* A list of the principal steam services is given in a schedule at the end of the Report.

has been effected on the total cost of the India and China mail services, of which India will obtain its proportionate share, and the contract time between London and Bombay has been reduced from 17 days 15 hours 45 minutes to 16 days 16 hours. A reduction in the transit rates charged by France and Italy for the conveyance of the overland mails by special train service between Calais and Brindisi was negotiated during the year by the British Post Office, and came into force from the 1st January 1888, but will not lead to any change in the present postage rates from India to the United Kingdom, as, even after making allowance for India's share of the saving in the subsidy to the Peninsular and Oriental Company, there will be a serious deficiency on the overland mail service to be made good. It was stated in last year's report that the rates of postage between India and Ceylon by what is known as the land route and by Indian mail packets, had been reduced to ordinary inland rates. This change was introduced in Ceylon from 1st January 1887, but in India from the beginning of the official year now under report. As a small matter, a direct exchange of mails was arranged between part of Burma and Chiengmai in Siam in recognition of an informal exchange that had grown up, the ordinary route for correspondence for Siam being *vid* Singapore. Under the head of the foreign parcel post there were no changes, but it may be mentioned that the entire parcel mail for the United Kingdom from India and Aden, consisting of 788 parcels of the aggregate declared value of £2,466-10-10, was lost in the wreck of the *Tasmania* off the coast of Corsica on the 17th April 1887. Some of the parcel boxes were subsequently got up from the wreck, and the parcels that had not been ruined by the sea-water were delivered, but 450 parcels were never recovered. The money-order exchange that had been established between India and Labuan in October 1885 was discontinued at the request of the Government of that Island.

Working of the P. and O. Contract.

4. For the first ten months of the year the old contract with the Peninsular and Oriental Company remained in force, according to which the outward mail steamer was due in Bombay on Tuesday of each week; and it was only for the last six mails of the year that a Monday arrival was obligatory under the new contract. But on no less than 44 occasions the steamer actually reached Bombay on Monday or earlier, and the Peninsular and Oriental Company has to be thanked for providing a substantially better service than required by the terms of their contract. Further details as to the working of the contract will be gathered from the following extract from the report of the Post Master General, Bombay:—

"The contract steamers of the Peninsular and Oriental Company arrived in Bombay behind contract time on four occasions. The *S.S. Nizam*, due on the 14th June 1887, did not arrive until Thursday, the 16th June, at 8-30 A.M., the delay being 1 day 20 hours 30 minutes. The vessel encountered a severe cyclone between Aden and Bombay and had to lie to out of the range of the cyclone. The same steamer was 3 hours 59 minutes behind contract time on the 29th November 1887, the delay on this occasion being due to the fact that the *S.S. Pekin* bringing the parcel mails from London was late. The *S.S. Mongolia*, due on Tuesday, the 24th January 1888, was 9 hours and 50 minutes behind contract time, owing to the detention of the steamer at Brindisi on account of the late arrival there of the mail train. The *S.S. Siam*, **due on Monday the 5th March at 12 noon under the new contract, did not arrive until 4 P.M. the same day, this again being due to the late arrival of the mail train** at Brindisi. On the other hand, the mail steamers arrived 37 times on Monday, although not due until Tuesday, except for the last six weeks of the year, six times on Sunday and once on Saturday. The average time occupied by the mails between London and Bombay was 16 days 15 hours outwards and 16 days 18 hours homewards.

It may be added here that the sum actually contributed by the Post Office during the year towards the annual deficiency that has to be made up by the United Kingdom and India was £65,000, as compared with £68,000 the sum paid in each of the two preceding years. This reduction is due to the fact that the new contract with the P. and O. Company, with the reduced subsidy, was in force for

the last two months of the year. The full reduction on account of the saving in the Company's subsidy will have effect from next year.

Charge of Post Office.

5. The administration of the department throughout the year under report was in the hands of Mr. Hogg, now Sir F. R. Hogg, K.C.IE., the permanent Director General of the Post Office.

Section I.—Post Offices, Letter Boxes and Village Postmen.

Post Office receptacles and rural delivery.

6. Appendix I, of which an abstract is given in the margin, contains comparative statistics for the last two years regarding the number of post offices, letter boxes and village postmen. There has been a material increase on the whole, though less than during some years of late. The number of post offices has increased by 166, of which 17 were new offices of some little importance in Burma, while the rest were chiefly branch or village offices in the charge of schoolmasters, or other persons not regular servants of the post office. There is now a keen perception abroad in many parts of the country of the advantages of village post offices, and applications for their establishment are constantly received from the villagers themselves, many of which are the genuine expression of their wishes, although in some cases the local schoolmaster may be the moving spirit in the matter, with a view to obtain incidentally an addition to his own income. A special check on the revenue of these offices, even after they have been made permanent, has been in force for some years past, and it hardly ever happens that an office opened experimentally fails to pay its way. The chief increases in the number of these branch offices were as follows: 39 in Bombay, 33 in Bengal, 26 in the North-Western Provinces and in the Central Provinces, and 21 in Madras. As regards placing letter boxes much remains to be done, and in many parts of the country facilities for posting letters have not yet been extended to the rural population, the difficulty being to provide the agency for clearing letter boxes without a material addition to Post Office expenditure. In the same way there is still ample room for the further extension of rural delivery, if the necessary funds were available. In Madras and the North-Western Provinces the work of village postmen has received special attention during the year, and it is in this direction that the more immediate development of the Post Office is now required. It may be added, however, that during the last ten years the number of village postmen has been doubled.

	Number at the close of 1886-87.	Number at the close of 1887-88.	Increase.
Post Offices	7,097	7,263	166
Letter Boxes	9,386	9,704	318
Village Postmen	4,455	4,725	270

Section II.—Postal Lines.

Postal communications.

7. Appendix II contains statistics according to postal circles regarding the length of lines over which mails are conveyed by the various agencies used by the Post Office for this purpose. There has been an increase under every head as the marginal abstract will show, for which the extension of

Year.	Railway.	Mail cart, horse, and camel lines.	Runners or boats.	Steamer service, sea and river.	Total.
	Miles.	Miles.	Miles.	Miles.	Miles.
1886-87	12,710	3,933	35,729	11,683	64,055
1887-88	14,043	3,963	36,471	12,483	66,960
Increase	1,333	30	742	800	2,905

postal communications in Burma is chiefly responsible. The increase in the railway mileage was due to the opening of a number of new sections of railway in various parts of the country, or to the utilization for the conveyance of mails of sections previously opened. The most important of these were the sections of the Southern Mahratta Railway from Dharwar to Belgaum, and from Koregaon to Belgaum, and the Portuguese Guaranteed Railway to Marmagoa in the Bombay Presidency; the line from Rindli to Quetta in Baluchistan; the section from Chaunra to Jhansi of the Indian Midland Railway in the North-Western Provinces; the section from Malakwal to Bhakkar of the North-Western Railway in the Punjab, and the sections from Guntakul to Nundyal of the Bellary-Kistna Railway, and from Nellore to Tirupati of the Cuddapah-Nellore Railway in Madras. This increase in the railway mileage led to the closing of the Satara to Belgaum section of the old Poona and Belgaum tonga service, and to the discontinuance of the horse post between Rindli and Quetta, but the introduction of horse services on the marginally-named lines in Burma more than counterbalances this, and accounts for the total increase under the second head in the abstract. The large increase under "Runners or boats" is also due chiefly to new lines in Burma, and the same thing is true of the increase under steamer mileage. Most of the steamer lines in Burma which have contributed to the increased mileage under this head, are not subsidized lines, but convey mails free of cost through the courtesy of the Irrawaddy Flotilla Company to which they belong.

Section III.—Correspondence and Parcels.

General Results.

8. The estimated number of articles of all kinds including parcels that were issued for delivery during the year was 14 millions in excess of the number issued during the previous year. Statistics according to postal circles will be found in Appendix III, and a summary of the general results is given in the margin. The increase in all classes of correspondence, taken together, was common to every part of the Empire with the single exception of the postal circle comprising Sind and Baluchistan. In this circle a decrease on the whole of 7½ per cent. is shown, and has been attributed to the completion during the year of various parts of the Sind-Pishin section of the North-Western Railway and the consequent diminution of the railway construction staff in Baluchistan. On the other hand, there was an extraordinary increase of 29½ per cent. in the correspondence and parcels for Burma, which was chiefly due to the large number of troops in the country in August 1887, when the first week's enumeration of articles was made. The results, however, of the second week's enumeration made in February 1888, when most of the troops had been withdrawn, furnish evidence that, apart from this special cause of increase, a material development of correspondence is to be expected in Burma. Newspapers show an increase of one per cent. only. For several years after the introduction, in 1881, of the quarter-anna

Percentage of increase.	5·70	1·05	2·63	17·17	5·55

postage rate for light newspapers the percentage of increase in the number of newspapers posted was very marked, but last year it fell suddenly, and during the year now under report it has diminished to one per cent. The discontinuance of two papers which had a very large circulation in Bengal is the immediate reason for this. The increase in the parcel traffic of the Post Office is also becoming more and more attenuated. Last year it stood at 7 per cent. and has now fallen to 2½ per cent. There was an actual decrease in the number of ordinary parcels and of insured parcels, and the increase of 2½ per cent., on the whole, was entirely due to an expansion of the value-payable parcel business. Book and pattern packets go on increasing in number, and in no other class of correspondence has the proportion of increase been so consistently high of late years. There was an increase of nearly a million in the total number of packets during the year, and the highest percentage of increase was under the head of value payable unregistered books.

9. Further details regarding letters and post-cards will be found in the table given in the margin. Nearly 76 million post-cards were issued for delivery during the year, being an increase of eight millions or 11·95 per cent. over the number of the previous year. Since post-cards were first introduced in 1881-82, the yearly increase has been regularly from eight to ten millions, and the proportion of post-cards to letters is already much higher in India than in the United Kingdom. At the same time there has been an increase of 3·16 per cent. in the number of letters on which postage was prepaid, which was about the normal rate of increase in letters before the introduction of post-cards. There has also been an increase of nearly two per cent. in the number of unpaid letters, though the tendency of late years has been generally towards a decrease, partly owing to the growing use of post-cards and embossed envelopes, and partly to the increasing confidence of the Native public in the Post Office. The total number of letters on which postage is not prepaid is still very large, and, notwithstanding the tendency already referred to, has for the last seven years never been much below 28 millions except in 1884-85. The proportion of such letters to the letters on which postage is prepaid varies very much, as might be expected, in different parts of the Empire, and stands highest in the provinces which have a large emigrant population or are still backward. In Behar and Oudh the unpaid letters are nearly half as many as the paid letters, while in Burma they are in the proportion of two-thirds to the paid letters. The percentage of increase in the number of registered letters is less than last year but about the same as in 1885-86. The registration fee was reduced from 4 annas to 2 annas in August 1881, and the reduction was followed by an increase of 19 per cent. in the registration work of 1881-82 over the results of the previous year. Since then the percentage of increase has varied between 9 and 5 per cent., and the total number of registered letters has now, after seven years, nearly reached five millions as compared with a total of two millions seven hundred thousand in the year preceding the reduction of the fee.

10. The figures given in Appendix III include the foreign correspondence received in India for delivery, and a special table is given below showing separately the amount of correspondence in both directions between India and the United

Kingdom, and between India and foreign countries. It will be seen that there has been an increase of about 4½ per cent. in the letters and post-cards received from and sent to the United Kingdom, and that the totals on each side curiously approximate each other. In 1886-87 there was an unusual increase of 20 per cent. in the number of book packets received from the United Kingdom, and now a decrease of 6 per cent. has to be recorded, but the figures are still largely in excess of those of 1885-86. Enormous numbers of trade circulars are sent from the United Kingdom as book packets, and the discontinuance of this practice by a few firms, or the sudden resort to India as a new field for advertising, is sufficient to make a material difference in the figures under this head. As regards foreign correspondence with other countries, a very marked increase is shewn under every head in both directions. This is due to the fact that the statistics on which these returns are founded are only recorded at intervals of three years. The figures in the report for 1886-87 were those of May 1885, while the present figures are those of November 1887.

	Class.	Estimated aggregate number. 1886-87.	1887-88.	Percentage of Increase.	Decrease.	Remarks.
Despatched from India to the United Kingdom.	Letters including post-cards	3,099,565	3,238,779	4·49		These figures are based on the monthly accounts between India and the United Kingdom.

	Books, &c.	3,270,415	3,091,124	...	5·48	
Despatched from India to Foreign Countries other than United Kingdom.	Letters including post-cards	715,390	1,227,641	71·60		The corresponding figures shown in the report for the year 1886-87 were based on statistics taken according to Union rules in May 1885, the figures now given are calculated from similar statistics taken in November 1887.
	Other articles	293,867	397,861	35·38		
Received in India from Foreign Countries other than United Kingdom.	Letters including post-cards	744,244	1,344,639	80·67		
	Other articles	558,117	1,055,292	89·08		
Grand total of correspondence exchanged with Foreign Countries other than United Kingdom.	Letters including post-cards	1,459,634	2,572,280	76·22		
	Other articles	851,984	1,453,153	70·56		

Note.—The heavy increase under Foreign Countries is partly due to the fact that there is a long interval between last and present statistics, but it is also caused in part by the inclusion for the first time of correspondence conveyed by non-contract steamers in the East.

Foreign Parcels.

11. The parcels received from the United Kingdom and abroad are also included in the total number of parcels issued for delivery as shown in Appendix III, and a summary of the transactions for the year as regards this class of parcels is given in the table at the end of this paragraph, while the increase, on the whole, in comparison with the results of former years will be seen from the figures in the margin. The parcel post with the British Post Office continues to increase in popularity, the total number of parcels sent and received showing an advance of more than 10,000 over the figures for the previous year. The limit of weight for parcels exchanged direct with the British Post Office is 11lb, but the majority of the parcels are very light. The average weight of parcels received in India was rather over two pounds, and of parcels sent from India not quite two pounds. A reduction in the present rate of charge, 1s. per pound in the United Kingdom and 8 annas per pound in India, is under negotiation and will probably lead to increased traffic. Side by side with the parcel exchange with the British Post Office the old parcel

Year.	Number of parcels.
1873-74	21,923
1874-75	25,563
1875-76	35,819
1876-77	45,357
1877-78	59,183
1878-79	69,763
1879-80	73,211
1880-81	80,257
1881-82	88,840
1882-83	88,684
1883-84	98,296
1884-85	110,590

1886-87	141,453
1887-88	158,792

agreement with the Peninsular and Oriental Steam Navigation Company has hitherto been allowed to remain in force, the limit of weight in this case being 50lb. Very few parcels are now sent from India by the special P. and O. agency, but a very large number are received by it from the United Kingdom. The average weight of these parcels is shown to have been rather less than six pounds, and the reason why this agency is still used, in preference to the British Post Office, for light parcels from the United Kingdom, is that the advantages of insurance and of sending parcels unpaid are available when the P. and O. Company is the carrier on its own account. In addition to this, under a special arrangement made by the Indian Post Office some years ago, parcels of books are carried by the Company at the reduced rate of six pence per pound, and these book parcels have very largely increased in number during the year. The agents of a patent medicine sent out during the year an enormous number of book parcels containing thousands of notices in English and various vernaculars of the country to the address of postal officials all over India in the hope that the notices might be distributed by postmen; no less than three thousand of these book parcels arrived at Bombay by one mail in November 1887. This accounts for the fact that, although the total number of parcels received through the P. and O. agency is larger than last year, the revenue under this head has fallen off. Special statistics recorded at Bombay shew that out of the total number of 45,592 parcels received in Bombay by the P. and O. agency, 29,682 were book parcels, and that 10,038 were parcels not exceeding 11lb in weight; of which number 7,724 were either insured or forwarded without the charges having been prepaid. Only 5,872 were parcels exceeding 11lb in weight.

* Net revenue is calculated after deduction of customs duty and sums due to the Peninsular and Oriental Company and London Post Office.

Delivery work of year.

12. The figures given in paragraph 8 of this report show the total number of letters, post-cards, newspapers, packets, and parcels received by the Post Office for delivery, as calculated from the results of an actual enumeration of articles made for a week in February and for a week in August. But in order to ascertain the entire delivery work of the year, it is necessary to add to the figures of that paragraph the number of money orders issued during the year,

which is the actual number as ascertained from the money order accounts. The entire delivery work of the year can then be judged from the figures below:—

Sent out for delivery (including 5,512,395 money orders) .	274,398,622
Received back undelivered	8,614,274
Balance actually delivered	265,784,348
Sent to Dead Letter Offices	2,866,545
	268,650,893

These figures show that the proportion of articles delivered to the whole number sent out for delivery was 96·86 per cent. which is about the usual average.

Returned letters, &c.

13. As shown above, the number of letters, post-cards and other articles, exclusive, of course, of money orders, that reached the various Dead Letter Offices was 2,866,545 or 104,343 less than the number which they had to deal with in the preceding year. The distribution of this work between the Dead Letter Offices and the disposal of the work will be found in Appendix IV, while a summary of the general results is given in the statement at the end of this paragraph. The decrease in the total number—and the tendency of late years has been constantly towards a decrease—is due in part, no doubt, to the spread of education, and more directly and more largely to the growing use by Natives of India of post-cards and embossed envelopes, which at any rate provide sufficient space for a legible address, and are gradually leading in many parts of the country to the extinction of the old native letter folded up into a narrow slip of paper with the address running round both sides of it. Of the total number of articles, 309,935 were successfully disposed of by being redirected and so delivered to the persons for whom they were intended, 1,578,715 were returned to the senders, and 707,362 were unreturnable. As in the preceding year, there were eleven Dead Letter Offices, but, with effect from the 1st January 1888, the Dead Letter Office, Rangoon, which had previously only disposed of letters and other articles addressed in Burmese, was constituted a regular Dead Letter Office for the disposal of all returned articles from the post offices of the province of Burma.

Insecure manner of closing packets.

14. Special attention was directed in last year's report to the remarks of the Postmaster General, Bombay, on the careless and insecure manner in which certain classes of newspapers and packets from the United Kingdom were sent through the post by the public, and the following extract from his report for the year now under review will again be found of interest:—

"In my last year's report I purposely drew attention to the want of care which unnecessarily consigned many newspapers and packets to an untimely grave in the Dead Letter Office. The matter was specially referred to in the Annual Report on the operations of the Post Office, attracted general attention in the public press, and at the express wish of the Government of India was made the subject of a postal notice, which was distributed throughout India to all European residents in March 1888. A number of references have since been received from all parts of India, and though no change could have been expected before the close of the official year under report, it may be stated that an undoubted improvement has now (August 1888) been found as the result of the public attention that has been directed to the matter. For the first time during the year under report actual statistics of the newspapers and packets received in the Foreign Mail without covers or wrappers have been recorded, and it was found that there were 6,158 cases of the kind from 1st April 1887 to 31st March 1888. Although there is no doubt that greater care can be taken, of which we already have evidence, it must be remembered that after all the percentage of such articles that suffer in transit is very small out of the enormous mass of newspapers and packets sent out to India. This part of the mail alone from Brindisi is estimated to amount to 80,000 or 100,000 articles by each mail steamer."

The same want of care on the part of the public in India is frequently remarked, and is the reason why many packets for the loss of which the Post Office is blamed find their only possible destination in a Dead Letter Office. The Postmaster General of the North-Western Provinces mentions particularly the number of photographs noticed by him during the year in the Dead Letter Office of those provinces owing to their having become detached from their coverings, or to the label bearing the address having disappeared from the packet. So long as carelessness remains a human failing, its effects must, of course, be reflected in the annals of the Post Office, which enters into the daily life of persons of all classes and all ages. But something, perhaps, may be done in the way of minimizing the results of this carelessness by constantly inviting public attention to the lessons to be learnt in our Dead Letter Offices. It would be something, for instance, if the senders of photographs among the educated classes would realize that, by the simple expedient of writing their name and address on the back of the photographs, they can ensure that they shall receive their packets back, should the Post Office be unable, for any reason, to deliver them to the persons for whom they were intended.

Letters without addresses, &c.

15. An instance of still greater carelessness on the part of the public is to be found in the fact that every year large numbers of letters reach the various Dead Letter Offices with no addresses whatever upon them. This point was also referred to last year, and the Postmaster General, Bombay, has had special statistics recorded regarding the letters of this kind that reached the Bombay Dead Letter Office. He writes as follows on the subject:—

"In my last year's report, I also referred to the number of letters which reached the Bombay Dead Letter Office without addresses. Statistics have also been recorded regarding these letters, and it was found that no less than 3,414 letters with absolutely no address of any kind found their way into the Dead Letter Office during the year. Only one or two of these envelopes with blank faces contained English letters, the writers in these cases being ladies. The great bulk of them held Gujarathi and Marathi correspondence, the Gujarathi letters being in the proportion of three to one to the Marathi letters. Most of the Gujarathi letters contained railway receipts, accounts and business communications, and appeared to have been posted in a hurry, frequently at railway stations; and it is a curious fact that the shrewd Gujarathi should be so careless about his business correspondence."

Statistics have not been kept in other postal circles, but the Postmaster General, Bengal, estimates that some 3,000 letters and postcards with absolutely no address were received in the Calcutta Dead Letter Office during the year, and there is no doubt that at the other nine Dead Letter Offices a very large aggregate of similar letters had to be dealt with. Carelessness of this nature is not, of course, peculiar to India. Similar results, though less in proportion to the number of letters passing through the post, are familiar to the Post Offices of other countries, and it is stated in the Postmaster General's 34th Report on the British Post Office that more than 25,000 letters without any address had to be disposed of during the official year 1887-88 by the Dead Letter Offices in the United Kingdom. The number of letters, however, passing through the British Post Office is nine times as great as the number dealt with in India.

Valuables and other articles found in returned letters.

16. The valuable property found during the year was rather less in amount than in the previous year. In the Madras Dead Letter Office it amounted to ₹12,250, and in the Bengal Dead Letter Office to ₹20,673, the greater part of which consisted of cheques, currency notes, and bills of exchange. In the Bombay Dead Letter Office property of the value of ₹1,46,057-3-1 was taken out of letters that had to be opened, and is described as under :—

"The Dead Letter Office had to deal with valuable securities and other property of the total value of ₹1,46,057-3-1 found in articles which were opened in the course of its business as compared with the property of the total value of ₹1,86,727-2-11 dealt with in the preceding year. Of the value of ₹1,46,057-3-1 cheques and hundies were the principal items, their value being ₹1,38,523-2-9 and the balance was made up as below :—

	₹	a.	p.
Bills of exchange	5,307	10	6
Currency notes	425	0	0
Postage labels	92	8	11
Coins, &c.	1,708	12	11
	7,534	0	4

Of the total, property of the value of ₹1,37,386-15-6 was disposed of during the year, leaving a balance of ₹8,670-3-7 principally under the head of cheques and hundies as undisposed of at the close of the year."

It may be added, as an illustration of a curious and childish practice on the part of a class of Marwari traders, that a number of very heavy letters, which had been refused because postage was due upon them, were found, on being opened in the Bombay Dead Letter Office, to contain old pieces of iron or brickbats. These had been sent from Bombay itself or from places in the Bombay Presidency to the address of Marwaris in Bikanir and Marwar, and enquiries made in Rajputana and Bombay showed that it is a custom with certain Marwari traders to send letters of this kind to members of their firm who, having gone on leave to their homes, fail to return at the proper time. The intention of the senders is apparently that the absentee should pay the postage, and in this way be fined for his absence from work, and so reminded of the necessity for his return, but as the persons addressed almost invariably refuse to pay the postage, the practice can hardly be efficacious even in the way intended.

Sale of postage stamps.

17. The sales of post-cards, postage stamps and embossed envelopes are shown according to postal circles in Appendix V, while similar information regarding the sales of service post-cards, service postage stamps, and soldiers' embossed envelopes, is given in Appendix VI. A statement compiled from these appendices to show the total sales of each class of post-card, stamp or envelope, is given on the next page, and it will be understood that the figures represent the quantities obtained from the treasuries by postmasters and stamp-vendors for retail to the public. The inland ¼-anna post-card maintains its great popularity, the sales during the year showing an increase of more than 7½ millions over the sales of 1886-87. Nearly two millions of the increase belong to the Bombay circle, and one million to each of the circles of Bengal, Madras, and the Punjab, and it may be noted that the total sales in the Bombay circle of the ¼-anna post-card were 4½ millions in advance of the sales in any other circle. The small ½-anna envelope, which is sold for the denominated value of the stamp, also continues to be in great demand, the number sold during the year being nearly two millions in excess of the number sold during the previous year. This envelope like the ¼-anna post-card is more used in the Bombay circle than elsewhere; the total number sold there was more than 3 millions in excess of the number sold in the Madras circle, which stands second. There was an increase in the sales of postage stamps of all denominations, with the exception of the 4-anna and 6-anna stamps, and the net result of the sales of ordinary post-cards, embossed envelopes, and postage stamps, was an increase of ₹4,89,300 in the revenue realized over the sales of last year. In the sales of service post-cards and stamps there was an increase under every head, though it will be noted that the value of soldiers' special envelopes sold during the year was slightly less than in 1886-87.

Special results of year's sales.

18. The year's sales, however, have shown that no great demand can be expected for embossed envelopes when a special charge is made on account of the cost of material and manufacture in addition to the denominated value of the stamp. In May 1886, square envelopes with embossed stamps of ½-anna and 1-anna were offered to the public, and during the year closing with March 1887 a fairly large number of both descriptions were sold or obtained for sale by postmasters and stamp-vendors. But the returns of the year ending with March 1888 show a decrease of 216,322 in the sales of the square ½-anna envelopes, and of more than 50,000 in the sale of the square 1-anna envelopes. A registration envelope of a small size was introduced in May 1886, and of this class of envelope 38,280 more have been sold during the year under report than were sold during 1886-87. A registration envelope of a larger size was introduced in November 1886, and 4,622 more of these have also been sold during the year under report, but they were only available for four months of the preceding year. The total number, however, of both kinds only amounted to 212,838, while the number of registered letters sent through the post was 4,884,560. It is a remarkable fact that embossed envelopes seem to command a sale in Madras that they command nowhere else. Out of the total of 199,816 small registration envelopes sold during the year, no less than 68,700, or rather more than a third, were sold in Madras; out of the total of 55,848 square 1-anna envelopes sold during the year, 10,648 were sold in Madras; while even of the ordinary 1-anna envelopes 40,224 were sold there, when the highest number sold in any other circle was 26,920. As regards the square ½-anna envelopes, the sales in the North-Western Provinces, in the Punjab, and in Madras, were about the same, and in each case largely in excess of the sales either in Bengal or Bombay. In connection with the sale of postage stamps, it may be mentioned that 1-anna revenue or receipt stamps of the aggregate value of ₹1,41,036 were sold during the year through the agency of the Post Office, and that in Burma postmasters sold on behalf of Government general stamps of the total value of ₹10,477. A number of complaints were received at the end of the year regarding the deficiency of gum on certain classes of postage stamps, and the matter has been specially represented to the manufacturers through the Secretary of State.

(a) A difference of R119 occurs between the gross value shown in this statement and that exhibited in Appendix V. R88 of this difference is accounted for by the application of wholesale rates of sale in this statement, while the retail rates at which the sales in some cases were effected, appear in Appendix V. The balance of the difference or R29 is due to a deficiency in the Minbu Treasury, which subsequently was adjusted in cash.

(b) The difference of one rupee between the figures in this statement and those given in Appendix VI is due to a short credit in the Pyinmana Treasury.

(c) This is exclusive of R9,800, the value of stamps sold in Burma, of which the different denominations sold have not been stated.

(d) This is exclusive of R:08 the value of stamps sold in Burma, of which the different denominations sold have not been stated.

Proportion of Post Office revenue derived from stamps.

19. Below is given the usual table showing the proportion in which postal revenue is derived from postage stamps, whether ordinary or service, including, of course, post-cards and embossed envelopes, and from cash payments. There is no very material variation from the figures of last year :—

Section IV.—District Post.

Scope and management of District Post.

20. The District Post funds are derived from a cess supplemented by grants from provincial revenues in some provinces, and in the Madras and Bombay Presidencies consist entirely of provincial grants. The original object of the District Post was to provide postal communications between the headquarters of districts and revenue and police stations in the interior, but with the extension of the Imperial Post this has gradually been modified, and for many years past a large portion of the District Post income has been spent on improving the rural delivery of the country, except in Bengal where the Zemindari Dâk fund has still to be spent, in accordance with the terms of the Act under which it is raised, on postal establishments required for police purposes. There are now 2,632 postmen in all paid from District Post funds, the great majority of whom are village postmen or rural messengers, with, in many cases, very extensive beats; and by their agency postal facilities are brought, to some extent, to the backward parts of the country, though there is still much to be done in this direction. The extension of the Imperial Post is limited to cases in which there is reason to believe that the correspondence to be brought into existence by new lines or new village postmen will cover their cost; but as District Post lines and postmen prove remunerative they can be transferred to the Imperial establishment, and in this way funds are set free for a still further advance of rural delivery. The District Post thus acts as a pioneer, in some measure, of the Imperial Post. That this falls within the legitimate scope of the District Post has been recognized by Government for some time past, but during the year under report a view has been expressed by the Madras Government that the provincial grant in that Presidency, where rural delivery is probably more backward, as was stated last year, than in any part of India, should be limited to the original objects of the District Post, and should not be used for rural delivery. The matter, however, is still, it is understood, under consideration. The management of the District Post funds is practically everywhere in the hands of the heads of postal circles, though some small sums are still administered by district officers. During the year under report the postal lines in the Upper Sind Frontier district were, at the request of the Commissioner, Sind, transferred from the control of the Deputy Commissioner to that of the Deputy Post-Master General.

(a) Includes contributions from Tributary Mehals, Chota Nagpur, Orissa and Khond.
(b) Includes the amount of annual subsidy for the Dera Ismail Khan and Chichawatni hill cart line.
(c) These are dry season distances: during the rains these lines are increased in length.
(d) Includes contributions from Frontier Police Fund, ₹3,936 in 1886-87 and ₹2,928 in 1887-88, contributions by the Maharajah of Agartala, ₹288 in 1886-87 and the same amount in 1887-88, and contributions from Chittagong Hill Tracts ₹189 in 1887-88.
(e) Includes lines paid from the revenues of Feudatory States, 642 miles in length, in 1886-87, and 604 miles in length in 1887-88.
(f) Grant made available from Bombay District Post Funds.

General results of year.

21. On the opposite page is given a comparative statement showing, for the last two years, the income, expenditure, establishment, and operations of the District Post. The total income amounted to ₹9,99,608, and the total expenditure to ₹10,32,275, but this income and expenditure does not, as it has been usual to point out, correspond with the receipts and charges under this head as shown in the Finance and Revenue Accounts. There was a decrease of 12 in the total number of District Post offices, which was due to the reduction of the number of these offices in the Bombay circle from 37 to 4. This is merely the result of a change in classification. A number of village postmen in the Bombay circle, who were originally stationary at the villages where they were posted, had previously been classified as village officers, but are now shown as village postmen. There was an increase of 29 in the total number of postmen and village postmen mainly due to the inclusion of these men; of 197 in the number of letter-boxes cleared by village postmen which was due to the placing of new boxes in Madras and Burma, and of 582 miles in the length of postal lines which occurred chiefly in Burma. In the number of articles, including money orders, received for delivery or posted for despatch, there was an increase of 817,310, and the percentage of articles returned as undeliverable, fell from 4·81 to 4·70. The largest extension of the District Post was in the Central Provinces, where 24 post offices were taken over to the Imperial establishment, and the funds set free utilized for extending postal facilities in the interior of districts.

Rural delivery as judged by District Post returns.

22. The delivery work of district village postmen will be found in detail according to postal circles, in Appendix VII. The number of money orders delivered or paid by them was more than 50,000 in excess of the number delivered or paid in 1886-87, and the chief increase occurred in the North-West Provinces and Oudh where it was, no doubt, connected with the special revenue and rent money order systems. In the number of packets and newspapers there was a decrease on the whole, but in the Bombay circle a very marked increase of 27,667 over the figures of the previous year was recorded. Both in this circle and in the Bengal and Madras circles the proportion of packets and newspapers to the number of letters delivered in the interior of districts stands very high, and it has been noticed in Bombay that there are few villages of any size, regularly served by postmen, which do not receive some newspaper or periodical publication, while trade circulars and advertisements are frequently posted to the address of village accountants, schoolmasters and others as a class. The total number of articles of all kinds delivered by district postmen was 278,268 in excess of the number delivered in the previous year, but it has to be remembered, both as regards this relatively small increase, and as the probable reason why the number of packets and newspapers has fallen off, that the most successful district postmen, whose work would go to swell the returns most, are those who are taken over to the Imperial establishment.

Section V.—Money-Orders.

Inland Money-Orders: General results.

23. The money-order business of the Post Office continues to increase in popularity, and there is probably still much room for the further development of the system in the interior of districts. The total number of money-order offices at the close of the year was 7,422, as compared with 7,214 at the end of the previous year, and the payment of orders by village postmen at the houses of payees was extended during the year in a number of circles. The number of orders actually issued was in excess of five and a half million, representing

an aggregate value of more than 11¾ crores of rupees, and a commission of nearly 15 lakhs. In the margin is given the usual table showing the yearly progress of the money-order business since it was taken over by the Post Office in 1880, from which it will be seen that the increase in the number of money-orders issued was 14·34 per cent., as compared with the results of the previous year, while the increase in the commission was 11·70 per cent. Year by year with the increase in business the average value of each money-order has declined, and the results of the present year are in accordance with previous experience. The average value is now ₹21-7-9 as compared with ₹22-2-7 last year, while more than half the entire money-order work is in connection with orders not exceeding ₹10 in amount.

Incidence of Money-order work according to provinces.

24. The following statement shows the distribution of the money-order business according to postal circles. About a third of the entire business was transacted in the Lower Provinces of Bengal, and Calcutta alone was responsible for a very large and important share of this, as the following extract from the report of the Postmaster General, Bengal, will show:—

"Of the total number of money-orders issued in this circle, 368,248 or 28 per cent. were issued by the Calcutta General Post Office and its sub-offices, the aggregate value of the money-orders being ₹64,46,107 or nearly 28 per cent. of the total value of the money-orders issued in the circle. The money-orders paid by the General Post Office and its sub-offices were 619,613 for ₹1,14,86,893, or more than 45 per cent. of the total number and more than 46 per cent. of the total value of the money-orders paid in the circle. As has been noticed in previous years, the money-orders paid in Calcutta far exceed those issued, in both number and total value, owing to the very large number of V. P. money-orders paid to merchants and tradesmen in Calcutta. Of the 619,613 money-orders paid by the General Post Office and its sub-offices, about 374,000 or more than 60 per cent. were V. P. money-orders."

Note.—The figures relating to the Madras postal circle include transactions with the Native State of Mysore; the figures relating to the Bombay postal circle include transactions with the Portuguese Settlements of Goa and Daman; the figures relating to the Punjab postal circle include transactions with the Native States of Patiala, Nabha, Jhind, Chamba and Faridkot; and the figures relating to the Central India postal circle include transactions with the Native State of Gwalior.

Revenue Money-order system.

25. The special adaptation of the money-order system as an authorized means of remitting revenue to tashils was extended last year to the whole of the North-Western Provinces and Oudh with the exception of the Kumaon district, and the year now under report is, therefore, the second year during which the adapted system has had a full trial in those provinces. The year's results show that there has been a steadily increasing resort to this means of paying revenue; the number of revenue orders increased from 57,888 to 87,076, and the amount of revenue remitted from ₹10,87,093 to ₹17,94,356; while the Post Office received ₹24,912 as commission as compared with ₹15,284 in the preceding year. In the Lower Provinces of Bengal the system was also in force throughout the year, and met with a large measure of success. The Postmaster General of those Provinces writes as under on the subject:—

"The system for the payment of land revenue and cesses by a special form of money-order, which was first introduced experimentally in the ten districts of the Burdwan and Dacca Revenue Divisions, was from the 1st May 1887 extended to the whole of the Lower Provinces of Bengal, the restrictions still being maintained that no revenue money-order should be issued for more than ₹50 and that the system should only apply to estates the annual land revenue of which did not exceed ₹50. Notwithstanding these restrictions 51,611 revenue money-orders were issued during the year, the total value of the money-orders being ₹2,44,230. As no difficulties were experienced in working the rules, and the usefulness and popularity of the system were established by numerous applications for its extension, as well as by the rapid increase in the number of orders, the Lieutenant-Governor was pleased at the close of the past year to withdraw the restrictions mentioned above, and to authorise the application of the system from the beginning of the current year to all remittances of land revenue irrespective of the amount annually due from the estate. From the same date also, the system has been extended to remittances of zemindari dâk-cess as well as to remittances of land revenue, road-cess, and public works cess to which it previously applied. One of the principal features of the revenue money-order system is, that all payments of revenue orders by the Post Office to the Collectorate are made by book transfer, so that there is no handling of cash by the subordinates of either office, and the risk of fraud and embezzlement is reduced to a minimum. The Government expressed a wish during the year that a somewhat similar system of book transfer should be adopted for the payment of all other remittances by money-order in favour of District Officers and District Boards, and a special set of rules has been prepared and approved to give effect to this wish without adopting the somewhat elaborate procedure considered necessary for remittances of land revenue on account of the stringency of the sunset law. Under the rules for miscellaneous remittances in favour of District Officers and District Boards, any Government dues and sums payable to District Boards may be remitted by money-order, and all the money-orders received in one day by each Sudder Post Office on account of such remittances will be paid by a single Treasury Voucher, the amount of which will be debited in one sum against the Post Office. These rules will take effect from the 1st July 1888."

The further extension of the system is being carried out, but for the Madras and Bombay Presidencies it does not offer the same advantages as for other parts of India, as the revenue there is generally paid by the ryots to the headman of the village and sent into the nearest tahsil by village servants.

Special Rent Money-orders.

26. It was stated in last year's report that a further step had been taken in the North-Western Provinces and Oudh to render the money-order system useful to the agricultural population by providing a special form of order for the remittances of small sums due on account of rent by tenants to land-owners. The results of the year under report are the first complete year's results available, and they show that 30,165 rent money-orders were issued, representing an aggregate sum of ₹3,55,283. The Postmaster General, North-Western Provinces, reports that some little opposition to the use of these orders has been manifested by land-owners, but there is sufficient evidence to show that the scheme meets a want, and its more complete adoption may safely be left to the growing recognition of its advantages by tenants, and the general good sense of the land-owners. It has already been arranged that the system should be introduced into the Lower Provinces of Bengal.

Money-order business with Native States, &c.

27. The money-order transactions with the Native States of India and with the Portuguese Possessions are shewn in the statement below:—

State or Settlement.	Issues.		Payments.	
	Number.	Value.	Number.	Value.
		₹		₹
Gwalior	24,474	6,19,989	9,615	3 03,373
Patiala	6,401	1,73,504	9,441	2,87,390
Portuguese Settlements	5,215	1,93,433	1,812	56,925
Mysore	3,132	73,908	3,068	98,034
Jhind	1,234	60,609	2,298	72,708
Nabha	1,288	45,043	1,952	60,022
Chamba	704	21,890	144	5,600
Faridkot	1,121	19,706	222	5,841
Total	43,569	12,08,082	28,552	8,89,893

Note.—These figures are included in the general statement of inland Money-orders.

On the whole there has been an increase of 34 per cent. in the number of orders exchanged and of 25 per cent. in their value. The business with Gwalior is much larger than the business with any other State, and the issues on Portuguese India represent the remittances to their homes made by a large class of Goanese who are in employment in British India, chiefly as domestic servants.

Telegraphic Money-orders.

28. In January 1887 revised rules for the telegraphic money-order business came into operation, the main features of which were that the telegraph charge was reduced from ₹2 to ₹1 in all cases, while the Post Office agreed to make no charge on account of commission on orders not exceeding ₹10, and only to take the ordinary fee for commission on orders in excess of that sum. This reduction in charges has led to a very large increase in business, the total number of telegraphic orders having risen from 18,540 in 1886-87 to 45,417 during the year under report. More than half of these orders were sent from Burma, notwithstanding the introduction during the year of a semi-weekly service between that province and the continent of India, and the great majority of these were for payment in the Madras Presidency. It is noted by the Postmaster General, Bombay, as an instance of the new development of telegraphic money-order caused by the cheaper rates, that orders of the aggregate value of ₹5,000 were paid during the year at a small office in Cutch where there had never been any telegraphic money-order work before. The whole of these orders were also sent from Burma. Details are given in the table below:—

Use of Telegraphic Money-order system for purposes of fraud.

29. There were four cases of fraud by false personation in connection with the telegraph money-order system as compared with eleven last year, and it may be hoped, therefore, that the constant vigilance, that is now being everywhere exercised in making payments of such orders, is tending to put a stop to these cases. But the readiness with which travellers in this country confide particulars regarding their life and movements to chance acquaintances, and the credulity with which new-comers at a place are accepted as being what they give themselves out, are favourable conditions for the commission of frauds of this description. Of the four cases, one occurred at Sharigh in Baluchistan, and in this a postal signaller was implicated in the fraud; one at Cawnpore, one at Mandalay, and one at Kolhapur in the Bombay Presidency. In the Cawnpore case a sum of ₹200 was obtained from a baniya in Bombay by a swindler, who had assumed the name of the remitter's brother who was at the time actually in Calcutta. The swindler asked that the money should be telegraphed to him in the care of a well known firm of Marwaris at Cawnpore, and he was identified by one of the members of the firm, who, as it turned out afterwards, only knew the man as having come to his shop on various occasions under his assumed name, and as having been in company with a relative of his own. The case at Kolhapur is a further instance of the difficulties with which postal officials have to contend in ascertaining whether persons for whom telegraphic money-orders are received are really known to residents of the place, and is described as follows by the Postmaster-General, Bombay:

"A man called Hari Ganesh Cholkar telegraphed from Kolhapur in the name of Balwant Ganesh Phadke to a brother of the person whom he personated asking for ₹50. The brother, who is a schoolmaster at Gwalior, could not send so large a sum, but remitted ₹15 by telegram a day or two after he received the request. The swindler was acquainted with Balwant Ganesh Phadke, who was residing at the time at Jamkhandi in the southern Mahratta Country at no great distance from Kolhapur, and had, before sending the telegram asking for money, given out that he had been robbed on his way to Kolhapur and had received assistance and sympathy from the Chief of Inchal Karanji, at whose bungalow at Kolhapur he was staying. The money-order from Gwalior came to Balwant Ganesh Phadke in the care of the Telegraph Master. Enquiries were made from the latter, who said that he knew nothing about the payee beyond the fact that he had sent several telegrams in that name. The payee was then sent for and told his story, but the postmaster declined to pay the money without further reference and sent to the bungalow of the Chief of Inchal Karanji. Information was there obtained that the man was Balwant Ganesh and had been assisted by the Chief, but was then putting up at a temple of Ganpati in the city. Enquiries were then made at the temple, and as it was found that the man was also known there as Balwant Ganesh Phadke, the money was paid to him. Subsequently a letter was received by the Telegraph Master from the real Balwant Ganesh Phadke, and the case was at once placed in the hands of the police. The swindler who was still in Kolhapur was arrested and sentenced to two years' rigorous imprisonment for cheating by personation."

Foreign Money-orders in Sterling.

30. Foreign money-orders on the United Kingdom and Colonies, and on European countries and Egypt, are issued in sterling, payment being made in India by remitters at rates of exchange which are fixed from time to time by the Post Office. The most important, of course, of the sterling money-order exchanges is the exchange with the United Kingdom, and the results of the year show an increase in the number of transactions, although the total value of the remittances from India was less than last year. The falling off in money-order business with New South Wales, never of much importance, is attributed, as were similar results last year, "to the cessation of subscriptions from India for tickets in race lotteries;" and the following remarks by the Postmaster General, Bombay, as to the increase in the money-orders received from Italy will be found of interest: "Almost the whole of these were remittances made by Natives of India at Massowah to payees in Bombay, the remittances being sent through Italy. The actual

number of orders from Massowah was 712, of the aggregate value of R1,61,169-15-0." Details are given in the statement below:—

Foreign Money-orders in Indian Currency.

31. Money-order exchanges in Indian currency exist with Ceylon, the Straits Settlements, China and Japan, and Mauritius. The business is not large with any of these countries, though with Ceylon it is steadily growing, and is mainly confined to Natives of India. The transactions with Mauritius are chiefly between that Colony and Aden, and the postmaster of the latter place reports that the reason for the falling off in the year's business is that the Oriental Bank is now giving special facilities for small remittances between Aden and Mauritius at low rates. The actual results of the year will be found in the following table:—

Countries of Exchange.	1886-87. Orders issued by India. No.	1886-87. Orders issued by India. Amount.	1886-87. Orders paid in India. No.	1886-87. Orders paid in India. Amount.	1887-88. British Postal Orders.

34. There has been an improvement in the sales of British postal orders, the number sold during the year being 1,830 in excess of the number sold in the previous year. The total value of the orders sold was £10,803-2-7½, including the commission or poundage of the British Post Office, while the Indian Post Office realized a sum of R506-2-6 on the transactions. The marginal abstract of the year's results shows that, as in preceding years, the chief demand has been for orders of the value of 5s. and upwards, and that the very small orders are practically not required. The largest sales were in the Punjab, where 3,422 orders representing a value of £2,596 were disposed of, while in each of the Bombay and Madras Circles about 2,200 orders of the value of about £1,400 were sold. In reviewing last year's report, Government expressed a wish that a further trial should still be given to the sale of these orders, and fresh endeavours will now be made to bring their existence prominently before the public. There is some reason for believing that, notwithstanding all that has been done in the past in the way of special notices, the fact that these orders are available at our post

offices, is not so widely known as it ought to be. Experience is constantly showing that the proportion even of educated persons who read postal notices or look at the *Postal Guide*, is exceedingly small.

Section VI.—Savings Banks.

General results of year.

35. On the opposite page will be found a statement showing in detail, according to postal circles, the Savings Banks transactions of the year in comparison with those of the previous year. The number of Savings Banks offices at the close of the year was 5,966 as compared with 6,048 at the close of the previous year, the decrease being due to the conversion of a number of sub-offices into branch offices, and the consequent withdrawal from them of Savings Banks work. There were four new head office banks opened, and the reduction in the total number of Savings Banks offices does not mean any real diminution of the facilities of the public for depositing money. The amount deposited during the year was 377 lakhs as compared with 444⅜ lakhs in 1886-87; the amount withdrawn was 314 lakhs as compared with 258¼ lakhs in 1886-87; and the interest paid was 16¾ lakhs as compared with 14½ lakhs in 1886-87. There were 261,157 accounts open at the close of the year as compared with 219,010 at the close of the preceding year, and the total amount standing at the credit of depositors was nearly 505 lakhs, or an increase of nearly 80 lakhs. The apparent decrease in the amount deposited is due to the fact that the District Savings Banks accounts were transferred to the Post Office in 1886-87, and very largely increased the total deposits of that year. If the amount transferred in this way be left out of consideration, the deposits of the year under report show an increase of 57 lakhs over the actual deposits of 1886-87. Bombay has the largest number of accounts, 58,918, and the highest total balance at the credit of depositors; and the average amount of each account was highest in Sind, as in previous years, and lowest in Madras.

Statement shewing the Post Office Savings Bank Transactions during 1887-88 compared with 1886-87.

Depositors, Europeans and Natives of India.

36. The statement below shows the number of accounts held by Europeans and Eurasians as compared with the number of accounts held by Natives of India. The proportion of the latter to the total number of accounts tends to increase, and is now more than 87 per cent. of the whole. It will be noticed that Bombay and Madras have by far the largest number of European and Eurasian accounts.

Depositors according to occupation.

37. The statement given below shows the number of depositors in each circle classified according to certain broad classes of occupation. Nearly half the depositors in the Post Office Banks belong to the professional class, in which are included Government and municipal servants of all kinds, but the large numbers under the head of Class VI.—Indefinite, especially in Bombay and Bengal, would seem to show that the classification might with advantage be made more accurate. The percentages of increase vary so much from year to year in the different classes that no trustworthy conclusions can be founded on them. The greatest proportional increase, however, during the year was in the domestic class, and this was chiefly due to an unusual increase under this head in Burma. There is no sign as yet of any of the agricultural classes making use of the opportunities for thrift supplied by the Post Office Banks.

Goverment Security investment business.

38. From the 1st April 1886 the power of purchasing Government Securities through the Post Office was limited to *bonâ-fide* depositors in the Post Office Savings Banks, and certain restrictions as to the amount of purchases were also introduced. These changes did not affect transactions during the first year they were in force, but have led to a reduction during the year under report. The total amount invested by depositors was ₹3,33,300 as compared with ₹4,40,600 during 1886-87, but the balance in the hands of the Comptroller General at the end of the year was ₹4,06,700 as compared with ₹3,78,800 at the close of the preceding year. The total number of transactions was 459, of which 432 were purchases and 27 sales of Government Securities. The great majority of these transactions, 277, related to Securities not exceeding ₹1,000 in value, and only 27 were for amounts in excess of ₹2,000. The Comptroller, Post Office, remarks on the year's figures that: "whenever Government 4 per cent. paper reaches par, depositors prefer not to run the risk of investing therein, but choose the safer way of lodging their money in the Post Office Savings Bank. Whenever Government paper goes down, investors come forward to obtain a higher rate of interest."

Section VII.—Insurance and Value-payable System.

Isurance business. General results.

39. The progress of the insurance business of the Post Office since the year it was first undertaken is shown in the marginal statement. The system has now been in force for ten complete years, and the results of the year under review only show an increase of ₹60,000 in revenue over the first complete year. During the last two years the business in insured letters has increased, and the value on which insurance fees were paid during the year under report is the highest yet reached. In several postal circles, however, there has been a regular tendency towards decrease in the number of insured letters. The great majority of these letters still contain currency notes,

Year.	Value Insured.			Insurance fees.
	Letters.	Parcels.	Total.	
	₹	₹	₹	₹
1877-78, last quarter, being the commencement of the system .	6,66,320	18,60,191	25,26,511	13,230

Percentage of increase as compared with 1886-87 . .	3·47	0·73	1·58	1·79

Note.—The average value of insurance effected on each article was ₹320 in the case of letters, and ₹355½ in the case of parcels.

and the practice of making remittances in this way through the post is one that may be expected to fall more and more into disuse with the progress of the money-order system. There was a small increase in the parcel insurance business as compared with the results of 1886-87, but the total value on which insurance fees were paid is still much less than when the insurance system was allowed to be applicable to the Indian Post Offices at Baghdad and in Basra. The largest amount of insurance business on the whole was done in the Bombay Circle where property of the value of ₹2,29,03,110 was insured, then in the Madras Circle where property of the value of ₹1,59,46,024 was insured, and then in the Bengal Circle where property of the value of ₹1,41,48,644 was insured. It may be added that 42 per cent. of the insured letters and 75 per cent. of the insured parcels in the Bengal Circle were posted at the Calcutta General Post Office and its sub-offices.

Claims for compensation.

40. There were 28 claims for compensation made during the year as compared with 43 in 1886-87 in connection with insured articles, and in 19 cases liability was admitted. In 18 of these cases there had been fraud or grave neglect on the part of servants of the Post Office, while the nineteenth was due to a serious mail robbery in Kathiawar, an account of which will be found further on. A summary of the year's results in comparison with those of the previous year is given in the margin, from which it will be seen that the amount paid as compensation was ₹20,285-2-4 or ₹3,534-11-7 in excess of the amount paid in 1886-87, although the number of claims was smaller. But the compensation on account of the highway robbery in Kathiawar will be repaid under Government rules by the Native State or States adjudged to be in fault. The insurance fees during the year amounted to ₹1,83,494, and the compensation actually paid by the Post Office was, therefore, 11·05 per cent. of this total. The nine cases in which liability was not admitted were all cases of partial abstraction of contents of insured letters or parcels. In two cases complaints were made on imperfect information and subsequently withdrawn, and in the remaining seven cases the abstraction either occurred before the articles were posted, or the contents declared to be missing were never enclosed.

Loss under the Insurance system.	1886-87.	1887-88.
	₹ a. p.	₹ a. p.
Loss by accident or by departmental neglect or fraud	20,608 0 0	14,002 10 0
Losses by highway robbery in British territory	.....	.....
Losses by highway robbery in Native States	.....	11,221 0 0
	20,608 0 0	25,223 10 0
Value of property recovered	3,747 9 3	4,938 7 8
	16,860 6 9	20,285 2 4
Claims not preferred or not entertained	110 0 0	.....
TOTAL	16,750 6 9	20,285 2 4

The sum paid as compensation amounted in all to ₹20,285-2-4 or 11·05 per cent. of the total amount realized as insurance fees, *viz.*, ₹1,83,494.

Value-payable business.

41. The value-payable system, like the insurance system, has now been in force for ten complete years, and the progress made in this class of business during this decade will be seen from the marginal table. During the year under report there was again a very marked advance in the use of the value-payable post: the number of articles increased by 30·12 per cent., the value declared for realization by 29·34

Value-payable system year.	Number of articles sent under the value-payable system.	Value declared for realisation.	Commission.
		₹	₹
1877-78 (from the commencement of the system in December 1877)—4 months	413	6,721	195
1878-79	7,408	1,32,109	3,942
1879-80	25,589	3,49,857	11,498
1880-81	49,389	5,76,574	13,413

1886-87	5,96,296	58,78,016	1,17,247
1887-88	7,75,928	76,02,734	1,50,708
Increase per cent. in 1887-88	30·12	29·34	28·53

per cent., and the amount of commission by 20 per cent. Calcutta stands out pre-eminent for the extent to which it utilizes the system. Out of the total number of value-payable articles, 775,920, posted throughout India, no less than 374,589 were posted in the Calcutta General Post Office and its sub-offices, while out of the total declared value of these articles, 76 lakhs, a sum of 38¼ lakhs was paid to tradesmen in Calcutta. The posting of railway receipts as value-payable articles has not yet become general, and is chiefly confined to the East Indian Railway.

Different classes of value-payable business.

42. The statement given in the margin shows the different classes of value-payable business during the year. The increase in the total number of articles mainly occurred under the head of unregistered packets, which rose from 196,288 in 1886-87 to 311,120 during the year under report, an increase of 58·50 per cent. The increase in number has been accompanied by a decrease in the average value of each book packet, which was ₹4-10-9 in 1885-86, ₹4-0-11 in 1886-87, and is now less than ₹4. On the other hand, there is a tendency to a decrease in the number of registered letters sent by the value-payable post, and to an increase in their average value. The total number of registered letters and packets has fallen from 114,420 in 1886-87 to 109,575, while the value has risen from ₹17-3-4 to ₹20-6-8. The increase in the use of the cheap book packet post for sending value-payable articles occurred chiefly in Bengal, and advantage has there been taken of the system by some obscure booksellers and publishers for the purpose of sending pamphlets, on which a fictitious value is placed, to large numbers of persons who had not ordered them. A certain number of these are accepted and paid for, owing to carelessness on the part of the persons addressed, or because delivery is taken by their friends or relatives who believe them to have been ordered, and this has apparently been sufficient to make the system profitable to the senders. The result has been that, apart from the annoyance caused to the persons addressed, the Post Office has had to carry back to the senders, without remuneration, large numbers of these book packets on which only a very low rate of postage had been paid. Special measures have been under consideration to put an end to this abuse of the value-payable post, but the steps taken will come within the scope of next year's report.

Section VIII.—Miscellaneous.

Post Office Security Fund.

43. The usual statements regarding the position of the special security fund of the Post Office are given below. On the creation of the new fund in January 1883, it was decided that all sums decreed against the security fund, under the rules governing its treatment, should be taken against the old fund until the balance should be exhausted. The balance at the credit of the fund in that year was ₹2,16,913, and this has now been reduced to ₹1,00,073. The balance at the credit of the new fund has increased from ₹1,58,565 at the end of 1886-87 to ₹2,06,860 at the close of the year under report.

Complaints by the public.

44. The number of complaints made by the public, which came to the knowledge of the heads of postal circles was 8,095, as compared with 8,476 in 1886-87. The decrease is due to the exclusion from the returns of cases which, although couched as complaints, are in reality mere enquiries. Cases of this character are enquiries whether registered letters, which the person addressed has never acknowledged, have reached their destination, or whether parcels, which are believed to have been despatched from the United Kingdom, have arrived. On the whole, the number of complaints is exceedingly small in relation to the vast amount of business of every kind which the Post Office transacts, and hardly a third of those actually made prove to be well-founded. The Postmaster General of the North-Western Provinces reports, among other cases, that a lady made a serious complaint that one of her newspapers was being regularly stolen in the Post Office, while it turned out on enquiry that the paper had been discontinued because her subscription had not been renewed. Instances

of this kind are common in the experience of the heads of all circles, and are well illustrated in the following extract from the Bengal Report:—

"Many complaints are made with absolute recklessness, as in the recent instance, when the Manager of a Calcutta Newspaper, both publicly and by formal representation to the department, charged the Post Office with abstracting valuable papers from a registered letter and not returning the acknowledgment, while at the very time the charge was made, the acknowledgment was on file in the Newspaper office, and the letter itself had a fortnight before been duly delivered at Hyderabad in perfect condition and with its contents intact. Numerous similar cases of recklessness in preferring complaints and other cases involving fraud on the part of the complainant or his correspondent occurred during the year under report. A complaint was received from Singapore that a registered letter had not been received by the addressee in Calcutta, but it was found on enquiry that the letter was duly delivered to the addressee in the North-Western Provinces. The addressee of an insured registered letter complained that instead of ten notes for ₹100 he had found in the cover a packet of valueless papers; it turned out on enquiry that the sender had put the wrong enclosures in the letter. In another case, a registered cover containing a note for ₹100 was said not to have been received, but it was admitted after a long enquiry that the addressee had credited the money to another correspondent of the same name. Of complaints involving fraud, I may mention one in which the complainant, the sender of a registered letter said to contain some currency notes, ultimately admitted that he had not really enclosed the notes, but advised their despatch with the intention of afterwards putting pressure on the addressee to repay him the amount or give him an equivalent. In another case, three registered covers posted in Mauritius and said to contain cheques for large amounts, were found to contain on arrival only pieces of blank paper; but it turned out that the cheques had been removed before the covers were posted. The enquiry into another complaint showed that a currency note said to have been abstracted from a registered cover, while in transit, was never issued by the Currency Office at all.

* * * * *

A gentleman attached to one of the Government offices complained that he had not received a book sent to him from Bombay, but two months later he wrote from Simla that the book had been addressed to him there instead of to Calcutta, and had been duly delivered. A lady complained that a piece of music sent to her from England had reached her several weeks too late, but enquiry showed that it had not been posted until three weeks after its despatch was advised. A packet containing three large official books was reported to have been lost in transit, but it was found to have been duly delivered and then mislaid by one of the office clerks. A lady at Bombay complained that an important letter posted by her husband in Calcutta had not been received, but it was eventually ascertained that the letter and money to pay the postage had been entrusted to a servant who had kept the money and destroyed the letter. In India it rarely happens that even the most important letters are posted by the senders themselves, or persons whose honesty, care and punctuality can be implicitly relied upon; and the cases mentioned above—a few out of many—are only noticed in order to shew the difficulties with which the Post Office has to contend in enquiring into complaints even when they are made in perfect faith and on apparently good foundation."

What the Post Office is anxious to receive are complaints founded on well-ascertained facts, as these are a most valuable check on the working of the Department. There is perhaps a tendency on the part of some of the subordinate officials of the Department to treat complaints too much as a matter of routine, and in the case of loss of ordinary letters it is exceedingly difficult, if not impossible, to make any satisfactory enquiry; but complaints are one of the few means by which defective procedure can be brought to light, and frequently enable the heads of circles to fix responsibility for neglect or misconduct.

Complaints regarding special classes of articles.

45. The statement given below shows the number of complaints received during the year regarding parcels, and registered, insured, and value payable articles. There were 264 complaints, as compared with 289 in 1886-87, regarding registered letters and ordinary parcels, not a large number, it may be said, when there were 4,884,560 registered letters alone sent through the post. But half of these complaints were found on enquiry to have no real justification as

complaints against the Post Office. Registered letters are still largely used as a means of sending currency notes through the post, and there is a prevalent belief among certain classes of the Native public that to send a registered letter said to contain notes, but without any enclosures, is a successful way of paying debts, or perhaps of obtaining a respite from their creditors. A number of such cases are reported every year from most circles. Sometimes there is an ulterior motive. The Post Master General, Madras, states that within a short period no less than seven complaints were received that currency notes had been abstracted from registered or insured letters, posted at a post office in a suburb of Nellore, in every one of which the police enquiry and the Post Office enquiry led to the same conclusion that the notes had never been enclosed; and all these cases were believed to have been got up by the traders of this suburb with a view to bring the local post office into trouble, because a request on their part for the change of business hours had had to be refused.

Offences by servants of Post Office.

46. The offences punishable by law committed by servants of the Post Office during the year are shown according to postal circles in Appendix VIII, and an abstract of the results is given in the margin. The greatest number of offences were committed in Madras and Bengal, but there was no serious case of fraud in any circle. Out of the total number of offences, 70 were cases of misappropriation in connection with the money order business of the Post Office, as compared with 97 in 1886-87. The total amount of money involved, after deducting recoveries, was ₹4,863-11-5, of which ₹2,843-4 were charged against the security fund, while the balance had not been adjusted at the close of the year. In 37 of these cases postmen or village postmen misappropriated sums of money which had been entrusted to them for payment of money orders, amounting in all to ₹2,628-12, but as the delivery staff of the Post Office numbers more than 11,000 men, it may be claimed for them, as a body, that they are discharging this responsible work with signal honesty. There was only one case in the Bombay circle, and only one case in the Punjab circle in which a postman or village postman proved dishonest, and the amount misappropriated in Bombay was ₹42, and in the Punjab ₹22 only. There were seven instances of fraud in connection with Savings Banks business, in one of which a branch postmaster, who was not a regular servant of the Post Office, was concerned. The amount involved was ₹1,365-12, of which ₹272 was recovered, and ₹1,066-12 written of against the security fund, while ₹27 was pending adjustment at the end of the year. At Shewegyin, in Burma, a sum of ₹683-4 and at Tipperah, in Bengal, a sum of ₹450 was misappropriated, and in each case

	1886-87.	1887-88.
Number of legal convictions	160	150
Number of cases punished departmentally	85	92
Total	245	242

the opportunity for the misappropiation was given by the apathy of the depositors who had never applied for new pass books since their accounts had been transferred from the District Saving Banks. In five of these cases convictions were obtained, and the offenders sentenced to terms of imprisonment. The majority of the rest of the offences, whether punished criminally or departmentally, were of a petty character.

High-way robberies of mail.

47. There were twenty-three high-way robberies of the mail during the year as compared with eighteen in 1886-87, and the marginal abstract shows how these were distributed between the various postal circles. Thirteen of these occurred in British territory, and ten in Native States or Foreign territory. Ten out of the 13 high-way robberies in British territory were committed in Burma, where the transit of mails in the still unsettled condition of parts of the province is necessarily attended with danger, and, in fact, in two of these cases the guards sent to protect the mail were either killed or wounded. The case in the Bombay circle was only a constructive case of high-way mail robbery. A village postman of the Poona District was attacked, while on his round in company with four travellers, by a gang of dacoits in December 1887. He and his companions were severely beaten and robbed, and the dacoits carried away his belt, badge and visit book, but left the letters he had with him in his possession. The cases, however, in the North-Western Provinces and Central Provinces were deliberate robberies of the mail, though the latter was not premeditated. The large number of cases in Foreign territory was due to the occurrence of three high-way robberies in Rajputana, none of which were serious, and of four robberies in Kathiawar which are described in the next paragraph. It may be added that in only three of the whole twenty-three cases were convictions secured, and the offenders in most of the robberies were never traced. The statements below show the districts or place where the mail robbery took place:—

Character of the mail robberies during year.

48. Notwithstanding the large number of mail robberies, there was only one serious loss of mails. In almost all the other cases there was no property of any great value in the mail, and the contents were almost invariably recovered. In three instances there is reason to believe that the mails were not the real object of attack. In the Meiktila case in Burma an Indian trader was travelling for safety with the two mail riders, and the party was stopped by dacoits who killed and robbed the trader and hardly concerned themselves with the mail bags. In the Myingyan case, also in Burma, the runners carrying the English mail ran into a gang of dacoits who were robbing some carts, and immediately made for the jungle leaving their mails on the road which were seized by the dacoits. A similar thing occurred in the case of the robbery in the Betul district in the Central Provinces. A runner carrying the parcel mail at night disturbed a party of men who were robbing a baniya's cart, and they then turned upon him. There were one or two cases of cowardice on the part of the servants of the Post Office engaged in carrying the mail, but on the whole they behaved with great bravery. One mail runner was killed and another severely wounded while defending his mails, and in eight or ten cases mail riders or runners or the drivers of mail tongas were more or less seriously wounded. The following extract from the report of the Postmaster General, Bombay, describes shortly the mail robberies that occurred in Kathiawar, including the case in which insured parcels

of the value of ₹11,221 were carried away, in each of which, as it happened, a different class of mail carrier was attacked:—

"All the four cases in Native States occurred in Kathiawar,—the first in the Morvi State, the second in the Dhrangadra State, the third in the Vankaneer State, and the fourth in the small State of Pal just beyond Rajkot. The first case was not a very serious one. The rider carrying the mail from Morvi towards Cutch on the night of the 9th May 1887 was frightened on being accosted by several men standing under some trees close by a broken bridge on the road to Vananya, and at once turned his horse's head and rode back to Morvi. He was pursued by a horseman, who got in front of him, and he then dropped the mail wallet and made his escape in the direction of the first stage out of Morvi. The wallet was cut open by the robbers and the mail scattered about, but there was nothing valuable in it and the whole contents were recovered the next day in a field near the scene of the mail rider's flight. The robbers were not traced, and the mail rider, a servant of the horse contractor, was dismissed for cowardice. In the second case, a mail runner accompanied by an escort on foot belonging to the Dhrangadra State was attacked by a band of robbers on the night of the 5th November 1887, while on his way to Wadhwan. Both the runner and the escort offered a stout resistance, and the runner was killed on the spot while the escort was badly wounded. The mail wallet was cut open by the robbers, but here again there was nothing valuable among the contents, and the entire mail was recovered the next day. The robbers could not be traced, but the Dhrangadra State behaved with great liberality to the widow and relations of the unfortunate runner. The third case was a very serious one. The mail tonga travelling between Dolia and Rajkot was stopped on the night of the 5th January 1888 by a band of armed dacoits, who fired a volley at it as it came up to the place where they were lying in ambush behind some bushes at the side of the road. There were two passengers in the tonga at the time and an armed police guard. The latter and one of the passengers was wounded by the first volley, and the mail driver, who did his best to get the tonga away, was disabled by a sword-cut. The robbers then carried away the whole of the mail bags, and divested the passengers of all the property they had with them. Most of the letter mail was afterwards found strewn about a field at some little distance from the place of attack, but the parcel mail was successfully carried away, and a sum of ₹11,221 had to be paid on account of the insured parcels in the mail. A number of persons were arrested as being implicated in this dacoity, but the principal offender was allowed to escape from jail and only one of the others has been convicted by the Judicial Assistant, Kathiawar. In the fourth case the parcel mail was seized at 7 o'clock in the morning of the day after the previous robbery, a few miles out of Rajkot. The parcel mails are carried by camels from Rajkot to Jamnagar, and a single robber, armed with a double-barrelled rifle and dagger, took possession of the camel, and rode off with it. He stopped the camel rider by threatening to shoot him, then pulled the camel on to its knees by seizing the nose-string, upset the rider, got up in his place and rode away in triumph. A hue and cry was at once raised and the robber was pursued and captured. Some of the articles of the mail had been thrown away by him and three small parcels of no value could not be recovered. The robber, who was believed to be a Cabuli, was sentenced to ten years' imprisonment."

Casualties during year.

49. Fortunately the annals of the year were not marked by such a series of deeds of violence and accidents as had to be recorded last year. On the 16th October 1887, the mail tonga running between Belgaum and Dharwar in the Bombay Presidency was swept away by a flood caused by the sudden rising of a stream, and the ponies, the horse-keeper, and a passenger were drowned. Some of the mail bags were carried to a great distance but were subsequently recovered on the subsidence of the flood. On the 28th March 1888, the Hlainbgwe Village in the Moulmein District, Burma, was attacked and burnt by dacoits, and the post office was destroyed in the conflagration. Nothing, however, was lost beyond the books and equipment of the office and postage stamps of the value of nine annas. Railway communication was interrupted in various parts of the country by floods which led to delays in the mail service. The most serious of these was caused by the destruction of part of the Bolan Railway on the 1st August 1887, and by breaks on the North-Western Railway, on the 10th September 1887, between Rajpura and Sirhind, a distance of 15 miles, and also between Sirhind and Sarái-Banjara. The country round for more than 20

miles along the railway was entirely submerged; the grand trunk road was destroyed; and it was only with the greatest difficulty that an ekka and cooly service was organized to carry the mails over the distance, 18 miles in all, for which railway communication was stopped. The line was not fully restored until the 2nd October 1887.

Post Office staff.

50. The Post Office establishment of all grades is shown according to postal circles in Appendix IX, and an abstract of this appendix, excluding heads of circles, is given in the margin. The total numerical strength of the Post Office staff has increased by more than a thousand during the year, and now stands at 40,691. The increase in the supervising staff of Superintendents and Inspectors occurred mainly in Burma and Madras, and Burma is also chiefly responsible for the increase in the road establishment. The increase in the other classes is due to general development of the work of the Post Office.

Postal Officials.	1886-87.	1887-88.
Superintendents and Inspectors of Post Offices	352	380
Postmasters, Deputy and Sub-Postmasters including Branch Postmasters	4,901	4,915
Extraneous Agencies, such as School-masters, &c.	2,214	2,376
Clerks	5,342	5,603
Postmen and other Servants	9,566	9,851
Road Establishment	12,098	12,171
Village Postmen	4,455	4,725
Signallers, Clerks and other servants employed in combined offices	642	670
TOTAL	39,570	40,691

Cost of printing by private presses.

51. The charges incurred during the year on account of printing work done by private presses amounted to ₹79,703 as compared with ₹53,797 during the preceding year. The increase occurred mainly in the charges of the Railway Mail Service, and this was due to revisions of sorting and mail lists consequent on a change in the system of work made with the object of reducing establishment and the cost of Railway haulage.

Section IX.—Non-Postal Branches of the Post Office.

Telegraph work done by Post Office.

52. During the year under review, 52 new telegraph offices were opened in charge of the Post Office, while it was found necessary to give up telegraph work at 6 offices that had previously been combined post and telegraph offices. There was, therefore, an increase of 46 in the number of combined offices, and as only 13 of these were at places where there had been separate telegraph offices, the year's results show a substantial extension of telegraph facilities. The largest number of new offices, 11, was opened in the Bombay circle, 6 of which were in Kathiawar, and Burma stands next with 9 new offices, 7 of which were in the upper part of the province. The total number of telegraph offices open throughout the Empire at the close of the year was 745, and out of this total, 486 were combined offices. During the year 137 servants of the Post Office qualified as signallers, and there were 72 still under training on the 31st March 1888. There is, therefore, a large staff of qualified men in the ranks of the Post Office; and, in fact, it has become necessary to limit the number of those who are allowed to go through the special course of training. It may be mentioned that the experiment of employing boys as telegraph messengers, with a view to effect a small economy, was extended, during the year, to several combined offices in Calcutta and its suburbs, and has so far been attended with success.

Telegraph Traffic at combined Offices.

53. The statement given below shows the traffic statistics of the year separately for each postal circle. It will be seen that Madras stands quite at the head of the list as regards the amount of work done and the revenue realized, and

it may be added that out of the 83 offices in existence at the close of the year, 58 are offices that have been opened at new stations, so that the use of the telegraph has been very largely extended in that Presidency owing to the amalgamation of telegraph and post offices. As compared with the figures of last year, the total number of messages sent has increased by 25·12 per cent., and the revenue by 25·83 per cent., while the total realizations of the year exceed the expenditure by ₹4,87,413.

Postal Circles.	Number of combined offices on 31st March 1888.	Total cost of Postal Establishments debitable to the Telegraph Department for working combined offices during the year. Percentage of Increase	10·45	14·40	25·12	21·77	24·19	25·83	

Telegraph Receiving Offices.

54. The Post Office also acts as an auxiliary of the Telegraph Department by receiving telegrams, at all post offices where this can be done with advantage, which are sent by post to the nearest telegraph office to be placed on the wires. This work naturally tends to decrease with the extension of direct telegraph facilities, and during the year under report the number of receiving offices fell from 1,720 in 1886-87 to 1,670, the decrease being mainly due to the opening of the new combined offices. The total number of messages received was 32,819 as compared with 31,578 in 1886-87, but the income realized has fallen from ₹32,942-10-0 to ₹30,698-2-0. Mention was made in last year's report of the extension to the Indo-European Telegraph Department of the reciprocity, as regards the free transmission of service letters and telegrams, which exists between the Post Office and the Government Telegraph Department. The number of messages collected by the post offices in the Persian Gulf, on account of the Indo-European Department, was 305, with fees amounting to ₹2,667, as compared with 117 with fees amounting to ₹1,116-5-0 in the preceding year. Towards the close of the year under report, the management of the Indo-European Telegraph lines was taken over by the Government Telegraph Department.

Post Office carrying agency and passenger service.

55. The other branch of non-postal work that has to be dealt with here is the Government carrying agency and passenger service. The only carrying agency now in existence is the bullock train between Umballa and Simla with branch lines to the hill stations of Kasauli, Dagshai, Solon and Subathu; and the only passenger service directly managed by the Post Office is the line between Umballa and Simla. There was no change during the year in the mileage or in the conditions under which the service is worked.

Section X.—Financial Results.

Receipts and Expenditure on account of Postal Service proper and non-postal branches.

56. The receipts and charges of the year, so far as the regular accounts of the Post Office are concerned, are shown in comparison with those of the previous year, according to postal circles in Appendix X, and a summary of the results is given in the statement below. Under the head of Postal Service proper the receipts for the year were ₹5,88,996 in excess of the receipts in 1886-87. There was an increase of ₹1,56,041 in the amount of postage realized in cash and commission, taken together, of which ₹51,592 occurred in Burma; an increase of ₹3,94,935 in the revenue derived from the sale of ordinary postage stamps, and of ₹61,906 in the revenue derived from Service postage stamps. The total charges were ₹2,37,414 in excess of the charges in 1886-87, a large part of this excess being due to the development of posts in Burma, and the net revenue was ₹17,07,271, or ₹3,51,582 in excess of the net revenue of 1886-87, as compared with an excess of ₹1,76,751 in that year over the returns of the preceding year. Under the head of Non-Postal Branches of Post Office business the deficit on the Bullock-train transactions of the year has risen to ₹48,011 from a deficit of ₹13,538 in 1886-87. This deficit was mainly due to a necessary increase of the rolling-stock and to the entertainment of additional cattle to meet special pressure of traffic. The figures, however, given in the statement below do not fairly represent the year's transactions in comparison with those of the preceding year. The receipts in 1886-87 included the share of the income realized on through booking on behalf of the North-Western Railway, and this sum was also included in the disbursements, while for the year under report this share has been excluded, in accordance with the accounts of the Comptroller General, from both sides of the accounts. The actual net receipts of the year were ₹1,04,161 as compared with ₹1,01,635 in 1886-87.

	1886-87.	1887-88.
POSTAL SERVICE PROPER.	₹	₹
Receipts including sale of service postage stamps	1,11,88,319	1,17,77,315
,, excluding ,, ,, ,, ,,	94,39,167	99,66,257

Passenger Service on Mail Cart Lines.		
Receipts and disbursements	2,05,698	2,11,120
Contract subsidies paid through the Post Office, but employed also largely on general and military considerations.		
Disbursements	5,38,143	5,31,906

Financial position of the Post Office.

57. A comparative abstract of the receipts and charges of the Post Office during the year under report and the preceding year is given in Appendix XI, and this appendix includes, in addition to the two heads of Postal Service and Non-Postal Branches of the Post Office, the results of which have been dealt with in the preceding para., a third head of account comprising the items of receipt and expenditure given in the margin, which, although not shown in the Post Office Departmental Accounts, are included in the Finance and Revenue Accounts of the Empire. The total receipts for the year under the whole of these heads were ₹1,21,41,962, while the charges amounted to ₹1,37,52,151. The deficit, therefore, on the year's transactions was ₹16,10,189 as compared with a deficit of ₹19,59,989 in 1886-87. If, however, the receipts and charges under the District Post, over which the Imperial Post Office has no direct control, be omitted, the deficit will be reduced to ₹5,05,036. There are then several considerations to be taken into account, as was specially pointed out last year, before the position of the Indian Post Office can be properly judged. In Upper Burma service articles were still carried during the year under report entirely free of charge, owing to the difficulties in the way of providing regular supplies of service postage stamps, and it is estimated that, even at the special service rates, this correspondence represented postage of the amount of ₹43,994. The Post Office may then justly claim to be allowed to take credit for an agency charge on account of the Savings Bank work which it performs for Government. The commission on the year's business, calculated at the rates which the Presidency Banks are allowed to charge on the same class of work, amounts to ₹2,68,952-8 as shown in the margin. If, therefore, these two amounts, making an aggregate sum of ₹3,12,946, be deducted from the deficiency shown above, the net deficit at which the Post Office was administered will be reduced to ₹1,92,090.

REVENUE, 1887-88.	₹	CHARGES, 1887-88.	₹
District post collections, including zemindary dâk receipts in Bengal	48,666	District post establishment, including zemindary dâks in Bengal	11,53,819
		Stores from England	4,99,400
		Payments under postal arrangements with Lords of the Treasury	6,50,000
		Exchange on charges in England	4,82,990
TOTAL	48,666	TOTAL	27,86,209

	₹	a.
½ per cent. on a balance of ₹4,25,19,344	1,59,447	8
A charge of 8 annas on each of ₹2,19,010 active accounts	1,09,505	0
TOTAL	2,68,952	8

It may, then, again be fairly claimed that if the Post Office of India is to be judged by a strict standard of profit and loss, allowance must be made for the fact that official correspondence is carried, for special reasons, at lower rates of postage than ordinary correspondence, whereas no such distinction is made by the Post Office of the United Kingdom. Although no change in this respect is advocated, and the revenues of the Empire would be in no way affected by it, yet when the cost of the Post Office in relation to its work is compared with that of other Departments of Government, or with the results of Post Office administration elsewhere, it is only right that this should be taken into consideration. It was stated in last year's report that if the charges for official correspondence were reckoned at ordinary rates, assuming for the moment that they would be fair rates for the service rendered, the revenue derived from this source would, at a low computation, be doubled, and the Post Office instead of showing a deficit in its accounts would rank among the revenue-yielding departments of the State. With a view to obtain data by which the correctness of this view might be tested, special statistics were recorded during the year now under report. The number

of official articles of all kinds, and the actual weight of letters, packets, including newspapers, and parcels, was recorded during a week in August 1887 at every post office in India. The total number of official articles of all kinds for the year, calculated on the results of this enumeration, was over 25 millions, and the revenue at ordinary postage rates is estimated to amount to R58,72,423, while the actual amount of postage paid at official rates during the year, so far as this can be judged by the sales of Service postage stamps, as shown in Appendix VI, was R18,11,058. The result of this calculation must be regarded as approximate only, but it is sufficient to establish the substantial correctness of the view expressed last year.

Specially excluded items of expenditure.

58. There are certain other items of charge, not included in the departmental accounts of the Post Office or in the Finance and Revenue Accounts which, it has been ruled, need not be added to the expenditure of the Post Office. These items are shown, for purposes of reference, in the table in the margin in accordance with the practice of late years.

	1886-87.	1887-88.
	R	R
Cost of stationery supplied by the Superintendent of Stationery	1,18,743	2,28,935

	6,52,417	8,24,929

Section XI.—General Review of Progress.

Proportionate increase in revenue and expenditure.

59. It has been usual for some years past to give a table showing the proportion of increase in correspondence, revenue, and expenditure since the year 1854, in which cheap postage rates were first introduced. The information in the accepted form has been prepared and will be found in the table in the margin, but is not of much value; and may, I think, in future be discontinued.

	Comparison of number of letters and newspapers (those of 1855-56 being represented by 100).	Comparison of revenue from private correspondence (that of 1855-56 being represented by 100).	Comparison of expenditure (that of 1855-56 being represented by 100.)
1855-56, first complete year of new rates.	100	100	100
1867-68, thirteenth ditto	207	237	161
1868-69, fourteenth ditto	228	258	182
1869-70, fifteenth ditto	253	246	190
1870-71, sixteenth ditto	257	235	175
1871-72, seventeenth ditto	269	272	173
1872-73, eighteenth ditto	279	279	177
1873-74, nineteenth ditto	328	284	184
1874-75, twentieth ditto	348	305	189
1875-76, twenty-first ditto	352	326	191
1876-77, twenty-second ditto	368	345	196
1877-78, twenty-third ditto	387	378	206

1885-86, thirty-first ditto	711	559	320
1886-87, thirty-second ditto	758	586	330
1887-88, thirty-third ditto	798	618	338

Section XII.—Notice of Post Office Officials.

Mention of Special Services.

60. The services of Mr. G. J. Hynes, Deputy Postmaster General, Burma, during the year under report, deserve special recognition. In the face of many difficulties, by the exercise of good judgment, tact, and unflagging industry, he has improved, in a marked degree, the postal administration of that province. Among the officers, whose names have been brought to notice

by the heads of circles, the following deserve mention: Mr. J. Owens, who is now acting as a Deputy Postmaster General, on account of special work in connection with the extension of business hours at post offices and money arrangements for sub-offices in Bengal; Babu Purna Chandra Mustafi, for success in introducing and maintaining an unprecedented rate of speed on the important mail lines to Serajganj and Pabna, also in Bengal; Mr. Henry Smith, Postal Superintendent, Cocanada, and Mr. A. Wilson, Postal Superintendent, Vizagapatam, for similar success in improving the working of the main post line through the Northern Circars,—an improvement that has been attended with a saving of money to Government; Mr. Manekji Jamsetji, Manager, Dead-Letter Office, Bombay, for the special ability and care with which he has conducted his work, the results of which have been seen in the section dealing with Dead-Letter Offices; Mr. McCrea, Postal Superintendent, Pyinmana division for organizing and maintaining runners' lines in the Eastern division, Burma, and Babu Surya Kumar Mukerji, for exceptionally good work under difficult circumstances also in the Eastern division, Burma.

SCHEDULE OF PRINCIPAL STEAM SERVICES.

By the British India Steam Navigation Company.

(1) Weekly communication between Calcutta, Rangoon, and Moulmein.
(2) Weekly communication between Calcutta and Rangoon *viâ* Chittagong, Akyab, Kyouk-Phyo, and Sandoway.
(3) Weekly communication between Rangoon and Mergui *viâ* Tavoy.
(4) Fortnightly communication between Madras and Rangoon, touching at certain intermediate ports on the north-east coast of Madras.
(5) Weekly direct communication between Bombay and Karachi.
(6) Weekly communication between Bombay and Karachi *viâ* the coast ports.
(7) Weekly communication between Karachi and Busrah *viâ* the Persian Gulf ports.

Under contract with the Post Office for ten years, from 1st May 1884, on an annual subsidy of ₹4,39,000.

(8) Fortnightly communication between Madras and Bimlipatam *viâ* Masulipatam, Coconada and Vizagapatam.
(9) Weekly communication between Tuticorin and Colombo.

Under supplementary contract with the Post Office, from 6th May 1886 to 30th April 1894, on an annual subsidy of ₹15,000.

(10) Weekly communication between Kyouk-Phyo, Ramree and Cheduba.

Under contract for ten years, from November 1884, with the Local Administration, on a monthly subsidy of ₹1,500 for the first five years and ₹1,200 for the second period of five years, subject to other arrangements if intermediately made.

By the Asiatic Steam Navigation Company.

(11) Four-weekly communication between Calcutta and Port Blair, with extensions to Nancowry and Rangoon.

Under the control of the Military Department, the consideration given being not in the form of subsidy, but of guaranteed rates for the transport of Government stores. Began to work for five years from 1st January 1888, and terminable thereafter by a notice of six months.

By the Irrawaddy Flotilla Company.

(12) Weekly communication between Rangoon and Mandalay and intermediate ports, with a monthly extension between Bhamo and Mandalay.

Under contract for five years from the 1st January 1886, the subsidy being ₹3,500 per month.

(13) Semi-weekly communication between Rangoon and Bassein, and Bassein and Henzada.

Under contract with the Local Administration for five years, from 1st July 1880, and to continue in force thereafter, unless determined by six months' notice. The monthly subsidy is ₹2,500, towards which the Post Office contributes ₹500 per mensem.

By the Euphrates and Tigris Steam Navigation Company.

(14) Weekly communication on the river Tigris between Busrah and Bagdad.

Under contract for ten years, from the 1st May 1884, with Her Majesty's Secretary of State for India. Subsidy ₹36,000 per annum: steamers run in connection with line No. 7.

By Messrs. Apcar & Co., Calcutta, and Jardine, Mathewson & Co., Hong-Kong.

(15) Monthly communication between Calcutta and Straits and Hong-Kong, the dates of departure being regulated primarily with reference to the Calcutta opium sales.

No subsidy.

By the Peninsular and Oriental Steam Navigation Company.

(16) Fortnightly communication between Calcutta and Colombo, touching at Madras. Fortnightly communication between Bombay and Colombo.

Non-contract lines maintained by the Company on its own account in connection with the China and Australian mail services. The Post Office pays by weight for the conveyance of mails sent by these non-contract steamers.

By other Agencies.

(17) By the River Steam Navigation Company. Daily communication between Dhubri and Dibrugarh on the Brahmaputra river.

Under contract with the Local Administration from the 7th October 1883 to the 1st May 1893. Annual subsidy ₹1,00,000, towards which the Post Office contributes ₹30,000.

(18) By India General Steam Navigation Company. Daily communication between Narainganj and Silchar.

Under contract with the Local Administration, from 1st January 1887 to 31st December 1891. Annual subsidy ₹40,000 during the 1st two years, and ₹30,000 during the succeeding three years, towards which the Post Office contributes ₹10,000.

(19) By Shepherd and Company's Steamers. Daily communication between Bombay and Goa.

Under contract with the Local Government from 1st October 1886 to 31st May 1887. The monthly subsidy is ₹2,880, towards which the Post Office contributes ₹780, the Portuguese Government ₹200.

(20) By Bengal Central Flotilla Company. Daily communication between Khulna and Barisal.

Under contract with the Post Office from 1st July 1884 to 30th June 1889. Monthly postal subsidy ₹350, of which the Imperial Post Office contributes ₹183, terminable by six months' notice.

NOTE.—A service by sea worked by native boats is maintained by the Government of Ceylon between Point Calimere on the Indian side and Kankesanturai on the Ceylon side.

Appendix No. I.

Statement showing the number of Post Offices, Letter Boxes, and Village Postmen entertained during the year 1887-88, and the total number that stood at the end of the official years 1886-87 and 1887-88.

Column 2.—These figures represent the net proceeds of the sale of ordinary postage stamps after deducting the sale discount.

Column 3.—The great differences observable in this column are due mainly to changes of system in the treatment of official correspondence, which was charged at full letter rates up to 1865-66, at the same rates as ordinary correspondence (letters and newspapers, &c.), from that year on to 1872-73, after which a low privileged rate of 1 anna for each letter not exceeding 10 tolas (about 4 oz.) was conceded, thus reducing immensely the postage income.

Column 8.—The figures in this column are useful, as shewing the revenue undisturbed by the changes of system in respect of official correspondence explained in the note referring to column 3.

Column 12.—The figures in this column show the proportion of the cash collections in column 4 to the total postal revenue of columns 2, 3, and 4. The cases in which this proportion commences with the year 1872-73, when the official postage rate was reduced (see note on column 3) and the whole collected in stamps.

Columns 21 to 26.—Three digits are omitted from the figures in these columns.

Columns 27 and 28.—These figures cannot be given prior to 1873-74, owing to a difference in the system of statistical record.

Column 29.—The registration of newspapers only commenced in the year 1871-72 and ended in 1877-78.

(a) Revised so as to include letters to Gibraltar, Malta and places east of Suez.

* Including post-cards from 1879-80.

† 1,712 miles of lines under this head have in 1884-85 been included in column 19.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

RAILWAY TRAFFIC.

No. XXXVII OF 1888-89.

APPROXIMATE STATEMENT OF GROSS RECEIPTS AND EXPENSES OF INDIAN RAILWAYS.

N.B.—As regards the figures in column *Total Receipts from 1st April to date*, audited figures have been used, as far as possible.

Latest Return received.	Railways.	Total mean length open.	Receipts for week ending 17th December, 1887. Total.	Per mile open.	Total mean length open.	Receipts for week ending 15th December, 1888. (*b*) Includes the Katni-Umaria State Railway.
(*c*) Includes the Bellary-Kistna State Railway.
(*d*) Return not received.
(*e*) Total receipts from 1st April to 10th December, 1887.
(*f*) Total receipts from 1st April to 8th December, 1888.
(*g*) Includes the Amritsar-Pathankot and Rajpura-Patiala State Railways.
(*h*) Includes the Northern Bengal, Dacca, Kaunia-Dharlla and Assam-Behar State Railways.

CALCUTTA,
The 10th January, 1889.

M. C. BRACKENBURY, *Major, R.E.*,
Under-Secretary.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and prospects of the Crops.

Madras.—*For week ending 5th January, 1889.*—Rainfall slight in North Arcot, none elsewhere. More rain wanted in parts of Ganjam, Vizagapatam, Kurnool, Salem, and Coimbatore. Standing crops generally good. Damaged by insects, disease or excessive rain in parts of South Arcot, Chingleput, Tinnevelly and Coimbatore, withering in Ganjam, Kurnool, and three taluks of Coimbatore. Pasture generally sufficient, except in parts of Salem and Coimbatore. Agricultural operations progressing. No material fluctuations in prices. General prospects favourable, except in Ganjam and Coimbatore. Over 21,300 labourers last week on Rushikulya works, Ganjam.

Bombay.—*For week ending 9th January, 1889.*—Late crops in Khandesh, in parts of Nasik, Ahmednagar, and Upper Sind Frontier, in one taluka of Poona and five of Sholapur, and *jowari* in four talukas of Bijapur, suffering for want of moisture. Cotton in four talukas of Bijapur, *jowari* in two talukas of Belgaum, exotic cotton in seven, and wheat in two talukas of Dharwar, and late crops generally in two talukas of Satara, blighted. Standing crops otherwise good, except those in two talukas of Surat, and wheat in Broach. Opium crop in Baroda good. Cotton-picking continues in Guzerat. Fodder scarce in parts of Broach, Khandesh, Nasik, Bijapur, Katthiawar, and Baroda. Agricultural stock poor in three talukas of Nasik and Ahmednagar, and in parts of Katthiawar. Scarcity of drinking-water in parts of Khandesh, Nasik, and Baroda. Prices rising in Nasik.

Bengal.—*For week ending 8th January, 1889.*—No rain has fallen throughout the Province during the week. The winter rice harvest is almost over, and nowhere, except in limited portions of the Patna, Bhagalpore, and Rajshahye Divisions, is the outturn reported to be less than eight annas of an average crop. In the extreme north of Durbhanga and Mozufferpore and in the Dhaka thana of Chumparun, the failure of the rice crop has been complete. Prospects of the *rabi* crops are generally fair and promising, except in the affected tracts in the Patna Division, in parts of Chota Nagpore, and also in the Pubna district. A fall of rain now would do much good in Behar and Chota Nagpore. Sugarcane is a good crop. Poppy and tobacco crops are progressing satisfactorily, the weather being very favourable. Spring rice is doing well. Latest report regarding affected tracts in the Patna Division shows that the grain supply is everywhere sufficient, but that prices have risen in Mozufferpore, Durbhanga, and Chumparun; that attendance on relief works in Chumparun and Mozufferpore is increasing; and that there is as yet no necessity for giving charitable relief.

N. W. P. and Oudh.—*For week ending 9th January, 1889.*—Weather clear. Rain much wanted. *Rabi* being irrigated. Poppy promises well. Sugarcane-pressing in progress. Supplies ample. Prices on the whole steady, but rising in places. Condition of cattle satisfactory.

Punjab.—*For week ending 9th January, 1889.*—No rain during the week. Prices are unsettled in Peshawar, rising in Rawalpindi, stationary in other districts. *Rabi* sowings completed. Watering of crops in progress in Lahore. Rain is now wanted throughout the Province for the *rabi* crops, but most urgently in the Delhi Division. Crops are reported as suffering for want of rain in parts of Umballa and Amritsar. Stock cattle healthy. Fodder sufficient, except in Sialkot, Dera Ismail Khan, and in parts of Mooltan and Rawalpindi. The opium crops are in good condition in Amritsar.

Central Provinces.—*For week ending 9th January, 1889.*—Weather clear. Prospects unchanged. Winter crops below average in northern districts owing

to insufficient rain. Prospects elsewhere favourable. Linseed injured by insects in Bilaspur. Cattle in fair condition. Fodder sufficient.

Burma.—*For week ending 5th January, 1889.*—No rain fell during the week. Crop prospects remain generally favourable, but in Thayetmyo the rice crop is very short. The price of paddy has fallen in the Pegu, Thayetmyo, Amherst, Tavoy, Sagaing, Lower Chindwin, and Minbu Districts, and has risen in Tharrawaddy. Elsewhere prices are stationary.

Assam.—*For week ending 9th January, 1889*—Weather cold. Rianfall *Nil.* Reaping of cold-weather rice still continues. Mustard being gathered in some districts. Prospects of other crops good.

Mysore and Coorg.—*For week ending 9th January, 1889.*—In Mysore no rain. Standing crops in good condition. Harvesting nearly completed and sowing operations commenced in parts. Prospects and outturn favourable. Prices slightly risen in parts.

Weather favourable for paddy harvest in Coorg. Rainfall slight.

Berar and Hyderabad.—*For week ending 9th January, 1889.*—Picking of cotton and cutting of other *kharif* crops completed in some districts. *Rabi* crops thriving. Agricultural stock good. Fodder insufficient in some districts. No marked change in the price of food grains.

No rain in Hyderabad. *Rabi* crops thriving. Sowing of *tabi* crops continues. Scarcity of fodder still felt. Prices stationary.

Central India.—*For week ending 9th January, 1889.*—Unfavourable report regarding condition of standing crops and probable outturn in Western Malwa, but agricultural prospects are entered as fair instead of good. No other changes of importance.

Rajputana.—*For week ending 9th January, 1889.*—Agricultural operations satisfactory. Standing crops thriving. Prospects of harvest good. Agricultural stock good. Pasturage or fodder sufficient, except in Kherwara and parts of Jeypore. Prices steady generally. Opium and cotton satisfactory.

Nepal.—*For week ending 3rd January, 1889.*—No rain. Weather chilly and foggy. Wheat progressing.

E. C. BUCK,
Secretary to the Government of India.

Director General of Railways' No. 316 (Statistical), dated the 27th November 1888, forwarding the Abstract Returns of Accidents to Trains, &c., on the open lines of Railways in India for the quarter ending 31st March 1888, together with Reports of the Inspecting Officers upon certain accidents which were enquired into.

OBSERVATIONS.—As compared with the average of the five corresponding previous quarters, the number of accidents to trains, rolling-stock, permanent-way, &c., shows an increase of 92, or 14·67 per cent., with an increase of 2,741 miles, or 23·74 per cent., in the mean mileage open, and of 1,776,755 miles, or 16·02 per cent. in the train mileage. The following are the railways on which the more important fluctuations occurred :—

Railways.	Accidents.					Train Mileage.	
	No. of accidents.	Increase.	Decrease.	Percentage of increase.	Percentage of decrease.	Percentage of increase	Percentage of decrease.
Rajputana-Malwa	63	...	11	...	14·86	9·51	...
Southern Mahratta	72	61	...	554·54	...	343·50	...
North-Western	113	...	16	...	12·40	22·16	...
Eastern Bengal	109	24	...	28·24	...	29·58	...
Madras	55	15	...	37·50	...	12·31	...
Great Indian Peninsula	18	...	43	...	70·49	4·57	...
Oudh and Rohilkhand	31	18	...	138·46	...	29·12	...

2. On the Rajputana-Malwa Railway the number of accidents from "Trains running over cattle on the line" decreased from 29 to 22, while under "Collisions between goods trains, or parts of goods trains" there were 6 accidents against *nil*.

3. On the Southern Mahratta Railway there were increases under most of the heads, but there was an increased train mileage run in consequence of the increase in the open mileage. The number of accidents was larger by 61, having risen from 11 to 72, an increase of 554·54 per cent. against an increase of 304·64 per cent. in the open mileage, and of 343·50 per cent. in the train mileage. Out of this total of 72 accidents, 35 are recorded under "Trains running over cattle on the line" and 15 under "Fire in trains."

4. On the North-Western Railway fluctuations are noticed chiefly under "Goods trains, or parts of goods trains, engines, &c., leaving the rails" 17 against 9; "Trains running over cattle on the line" 14 against 27; and "Fire in trains" 6 against 23.

5. On the Eastern Bengal Railway, the increase in the number of accidents was nearly in the same ratio as the increase in the train mileage. Of the total increase, *viz.*, 24, 12 cases occurred under "Trains running over cattle on the line" and 5 under "Goods trains, or parts of good trains, engines, &c., leaving the rails."

6. On the Madras Railway the number of "Goods trains, or parts of goods trains, engines, &c., leaving the rails" was exceptionally large, being 24 against 4.

7. On the Great Indian Peninsula Railway there was a decrease of 43 accidents. Of these, 11 were under "Goods trains, or parts of goods trains, engines, &c., leaving the rails," and 14 under "Fire in trains," the rest being distributed over the other classes.

8. On the Oudh and Rohilkhand Railway, where the total number of accidents rose from 13 to 31, the difference was pretty evenly distributed over all heads.

9. The casualties resulting from accidents to trains, &c., were among passengers and others, 1 killed and 10 injured, against 1 killed and 17 injured, and among servants, 3 killed and 15 injured, against 2 killed and 8 injured. Of the total casualties, 10 passengers and 1 servant were injured in a collision which took place between a down train and an up train on the Eastern Section of the Eastern Bengal State Railway. On the Northern Section of the same Railway on the 26th January 1888, one Railway servant was killed and 3 others injured in an accident which occurred to a down goods train while running across the Bowrah Bridge, where a rail had been removed for repairs. The engine, tender, and 5 trucks fell from the bridge to the ground, a distance of about 15 feet. On the 24-25th March 1888 an accident occurred on the Bengal-Nagpur line, causing the death of a Railway servant and extensive injury to the rolling stock and permanent-way; in spite of a careful enquiry, the cause of this accident has not been conclusively cleared up. A detailed report of both these accidents is appended to the returns.

10. On the Rajputana-Malwa Railway 3 servants were injured by a collision which took place between two goods trains on the 13th February 1888 at Charkhi Dádri, 34½ miles from Rewari, owing to the carelessness of the driver of the up goods, who ran through the station disregarding the signals against him.

11. The following table exhibits the number of accidents under the different classes, and the number of persons killed and injured thereby.

		Average of corresponding quarters of 5 previous years.	First-quarter, 1888.					Total all classes.	
			No.	Number of passengers and others.		Number of servants.			
				Killed.	Injured.	Killed.	Injured.	Killed.	Injured.
1	Collisions between passenger trains, or parts of passenger trains	2	1	...	...	...	...	...	...

	Total: Average of corresponding quarters of 5 previous years	...	627	1	17	2	8	3	25

12. The principal variations occurred under "Passenger trains, or parts of passenger trains leaving the rails," 28 against 18; "Goods trains, or parts of goods trains, engines, &c., leaving the rails," 92 against 59; "Trains running over cattle," 245 against 210; and "Fire in trains," 39 against 67.

13. The increase under "Passenger trains, or parts of passenger trains, leaving the rails" was chiefly due to the number of accidents recorded on the Southern Mahratta Railway being 4 against *nil;* on the North-Western Railway, 7 against 2; and on the Dibru-Sadiya Railway, 5 against 2.

14. Of the 92 cases of "Goods trains, or parts of goods trains, engines, &c., leaving the rails," 17 occurred on the North-Western Railway; 11 on the Eastern Bengal; 24 on the Madras; and 8 on the Dibru-Sadiya.

15. The cattle accidents were very numerous on the Eastern Bengal and Southern Mahratta Railways, being 54 and 35, respectively. The South Indian Railway comes next, with 24 accidents of the same class.

16. The number of cases of "The burstimg of tubes, &c., of engines" and "The failure of machinery, springs, &c., of engines," was the largest on the North-Western Railway, being 14 and 16, or 70·00 and 31·37 per cent. of the totals, respectively.

17. The number of cases of "Fire in trains" shows a decrease from 67 to 39, of which 15 occurred on the Southern Mahratta Railway; 6 on the North-Western; and 5 on the Great Indian Peninsula. The two last-mentioned Railways show decreases of 17 and 14 accidents under this head, respectively.

18. Out of 60 accidents, classed as "Other accidents," 22 were recorded on the Bombay, Baroda and Central India Railway.

19. The casualties to passengers from causes other than accidents to trains, &c., were :—

Cause of accident.	1st Quarter, 1888.		Average of corresponding quarters of 5 previous years.	
	Killed.	Injured.	Killed.	Injured.
From falling between carriages and platforms	1	1	1	2
Falling on to the platform, ballast, &c., when getting into or out of trains.	5	6	2	3
Whilst crossing the line at stations	1	...	1	...
By closing of carriage doors	...	1	...	...
Falling out of carriages during the travelling of trains	1	19	3	13
Other accidents	1	6	3	5
Total	9	33	10	23

20. The accidents to servants in the employ of Railways, or of Contractors, whilst performing duties connected directly with the transit of passengers and goods from causes other than accidents to trains, &c., were as follows :—

Cause of accident.	1st Quarter, 1888.		Average of corresponding quarters of 5 previous years.	
	Killed.	Injued.	Killed.	Injured.
During shunting operations	15	12	4	11
Falling off engines, vans, wagons, &c.	5	17	2	8
Coming in contact with overbridges, &c., during the travelling of trains	...	1	...	1
Coming in contact, while shunting, with vehicles, &c., standing in adjoining lines	2	2	...	1
Getting on or off trains, engines, &c.	2	9	4	10
Whilst loading, unloading or sheeting	...	16	2	15
Whilst braking, spragging, or choking wheels	...	1	...	2
Whilst working at cranes or capstans	...	3	...	3
Whilst working on the permanent-way or in sidings	9	13	1	4
Whilst walking along the line on the way home, or to work	1	...	...	1
Whilst walking, crossing, or standing on the line	6	6	7	6
Whilst passing between vehicles	...	3	2	1
Whilst attending to the machinery of engines, cleaning them, &c.	...	7	1	3
Whilst attending to gates at level-crossings	1	3	1	1
Falling, or being caught between vehicles and platforms	2	...	1	...
Falling off ladders, scaffolds, platforms, &c.	2	6	...	2
By falling of lamps, wagon doors, timber, weights, &c.	1	3	1	6
Whilst coupling or uncoupling wagons	1	4	2	7
Miscellaneous	5	34	4	22
Total	52	140	32	104

21. Of other persons killed and injured by running trains, &c., 4 were killed and 2 injured whilst passing over the line at level-crossings; 32 were killed and 18 injured whilst trespassing on the line; 4 committed suicide, and 1 was injured in attempting to commit suicide; and 8 were killed and 2 injured from miscellaneous causes.

R.

22. The following table shows the total number of persons killed and injured from causes connected with the working of trains, as compared with the average of the corresponding quarters of five previous years:—

	1st Quarter, 1888.		Average of corresponding quarters of 5 previous years.	
	Killed.	Injured.	Killed.	Injured.
Passengers.				
From causes beyond their own control	...	17	1	17
From misconduct or want of caution	9	26	10	22
Servants.				
From causes beyond their own control	13	29	3	12
From misconduct or want of caution	42	126	32	101
Others.				
Whilst passing at level-crossings	4	2	4	2
Trespassers, including suicides	36	19	33	7
Other persons	8	2	1	4
Total	112	221	84	165
Total open mileage	14,285¾		11,544¾	
Total train mileage	12,864,966		11,088,211	

23. In addition to the above, 18 persons are reported to have been killed and 33 injured in station yards, workshops, &c., and 157 persons to have died in carriages and at stations from causes unconnected with the working of trains.

24. A tabulated statement has been added to the returns, comparing the accidents on Indian Railways with those on English Railways. It will be observed that the number of minor accidents in 1887 was greater on Indian Railways, but that the casualties amongst passengers compare favourably with those recorded against English lines.

25. In Public Works Department Circular No. IV Railway, dated the 24th April 1888, the Government of India decided to publish for general information, in addition to the quarterly returns of accidents, a complete report, similar to that rendered by the Inspecting Officers to the Board of Trade, of any important accident which might occur. In accordance with this order, detailed reports of two serious accidents are appended to the present returns.

Resolution.—It is satisfactory to notice that the increase in the number of accidents to trains, rolling-stock, permanent-way, &c., generally compares favourably with the increase of mileage open and of train-mileage, as contrasted with the average of the five corresponding preceding quarters.

The Governments of Madras, Bombay, Bengal, the North-Western Provinces and Oudh, and the Punjab.
The Chief Commissioner of the Central Provinces, Burma and Assam.
The Resident at Hyderabad.
The Agents to the Governor General for Central India, Rajputana and Baluchistan.
The Director General of Railways.
The Consulting Engineers to the Government of India for Railways, Calcutta, Lucknow and Central Division.

Order.—Ordered that this Resolution be communicated, for information, to the Local Governments, Administrations and Officers noted on the margin.

Ordered also that copies be forwarded for the information of Her Majesty's Government.

Ordered further, that this Resolution, with the Abstract Returns, be published in the Supplement to the *Gazette of India*.

By order,

M. C. BRACKENBURY, *Major, R.E.*,
Under Secretary.

Documents accompanying.

Abstract Returns of Accidents on Indian Railways for the first quarter of 1888, together with Reports of the Inspecting Officers upon certain accidents which were enquired into.

TABLE No. 1.

GENERAL TOTAL.

NUMBER of PERSONS reported during the First Quarter of 1888 as KILLED or INJURED on the several RAILWAYS open for Traffic in INDIA, distinguishing between PASSENGERS, RAILWAY SERVANTS, and OTHER PERSONS; and distinguishing also, in the case of the two former Classes, between ACCIDENTS happening from Causes beyond their own Control, and ACCIDENTS happening otherwise.

Mean mileage open.	RAILWAYS.		PASSENGERS.						RAILWAY SERVANTS, OR SERVANTS OF CONTRACTORS.						OTHER PERSONS.								TOTAL ALL CLASSES.

Letter from the Consulting Engineer to Government of India for Railways, Calcutta, to Government of India, dated 28th January 1888.

I HAVE the honor to report, for the information of the Government of India, the result of the inquiry into the cause of an accident which occurred on the 26th instant, at mile 12, on the northern section of the Eastern Bengal State Railway.

No. 14 Down Goods of the 26th instant, consisting of one F class metre-gauge engine, 40 loaded goods wagons, and one brake-van, crossed over, against signals, a girder bridge during repairs, at a time when a rail had been taken up by the permanent-way inspector. The engine, tender, and five trucks fell from the top of the bridge to the ground, a distance of about 15 feet; the sixth wagon remained on the bridge but off the rails.

One of the permanent-way gangs on the bridge at the time was hurt, and died about an hour afterwards. The jack, fireman, and another of the permanent-way gangs working on the bridge were slightly hurt.

The damage to the engine was slight; two six-wheeled iron wagons were damaged beyond repair; two wooden and two six-wheeled iron wagons have their lower frames intact, but their bodies damaged beyond repair; all the wheels of the wagons are intact. A pair of 40 feet plate girders was slid forward and twisted beyond repair.

Description.

The bridge where the accident occurred consists of 16 spans of 40 feet plate girders resting on brick masonry piers. The rails over the bridge are carried on transverse wooden sleepers, resting on the top flanges of the girders, and attached to them by four hook-bolts in each sleeper. There are spaces of about 5 inches between the ends of the girders throughout the bridge, which had not been fitted up with timber to prevent the girders sliding forward in case of an accident of this kind.

The line is straight for several miles to the north of the bridge, and level for two miles in the same direction. The driver coming from Málánchi has a clear and unobstructed view for several miles.

Wooden signals kept at caution are placed at 1,100 feet on each side of the bridge, and two lamps at each signal, one on each side of the line, to show a green light at night to caution drivers to go slowly over the bridge.

Men with red and green flags are placed at the wooden signal-posts, to show red or green flag as the permanent-way inspector may order.

Also at 150 feet from the north abutment of the bridge, between the bridge and the wooden signal-post, is a lodge for the bridge watchman, who was also provided with red and green flags.

The station-masters at the stations on each side of the bridge had received orders to endorse on all line-clear massages that the speed over this bridge at mile 12 was to be 4 miles an hour, and this was endorsed on the line-clear message received at Málánchi station by the driver of No. 14 Down Goods of the 26th instant.

The first rail joint on the bridge from north abutment was 11 feet from the face of the ballast wall on No. 1 span; the second was 29 feet. At this point there was only one rail in, *viz.*, that on the east side; this was fish-plated, but not spiked. The west rail had not been put in. All the sleepers except two from the second joint were carried away by the accident. The two girders of No. 2 span from the north abutment were pushed forward off the top of No. 1 pier, and were supported on No. 2 pier, and against the side of No. 1 pier. The engine being derailed on No. 1 span, got on to the transverse sleepers of No. 2 span, and the sleepers being attached to the girders by four hook-bolts in each sleeper, the wheels of the engine caught the sleepers, and carried them, and with them the girders of 4 spans, until sufficient space had been gained by the accumulation of 5 inches (the space over piers between the ends of the girders of two contiguous spans) from each of the piers to allow of the north end of the girders of No. 2 span to drop off No. 1 pier.

Evidence.

Herbert De Garnier stated.—I am permanent-way inspector in charge of this section in which repairs to the bridge are being executed; have been in charge since October last; was formerly on the Dacca Section, and was transferred from there owing to illness; have been 4 years on the Eastern Bengal State Railway. I had passed No. 4 Down Goods of the 26th instant over the bridge about 11-30 A.M. The No. 14 Down Goods came at 12-45. I had two danger signals out. The flags are about 18 inches square, and have standards about 2 feet long. The danger signal flag nearest the bridge was about 150 feet, and the farthest one about 1,100 feet, from the north end of the bridge towards Málánchi.

The red flags were held by men, and I saw them at their posts; it is a straight line, and nothing to obstruct my view.

I had one 24 feet length of rail in on the east side, only fish-plated, not spiked. The 18 feet rails previously put in were sufficiently spiked to pass No. 4 Down Goods train at the speed of 4 miles an hour.

I was changing and re-spacing the timbers, and had 31 men working at the repairs.

I did not hear the train till the man with the danger signal called to me that the train was coming. I was working with my head down, and not looking in the direction of the coming train.

I jumped up; and held up my hands and yelled out. Some of the men jumped; others ran back along the girder to the abutment, and some got in between the girders. One of my gangmen was on the pier. I afterwards found him on the ground on the north side of first pier from the north abutment.

I gave orders to the two signal-men who were at the hut close to the bridge, to go off with their danger signal flags; this was when I saw the smoke of the engine about Málánchi. They had ample time to go to their posts before the train arrived. I did not order Dunnu, Khalassi, to hold up a red flag, nor did I see him.

I pulled up No. 4 Down Goods under exactly the same precautions.

The driver of No. 14 Down Goods did not whistle.

C. A. McRae stated.—I was the driver of No. 14 Down Goods on the 26th instant; have been 8½ years on this line, of which 7 have been driving. I have driven both mail and goods trains. At Málánchi station I was 50 minutes late. I left Málánchi at 12-20, and got to the bridge, mile 12, at 12-45; this was the time when I looked at my watch after the accident.

The station-master, Málánchi, gave the guard line-clear, which the guard handed to me. It was endorsed to go 4 miles an hour over bridge at mile 12.

The bridge where the accident occurred is about 4 miles from Málánchi.

On coming up to the wooden caution signal, I saw a green signal flag about 6 feet high on the east side of the line, *i.e.*, on my left hand coming from Málánchi; the signal was stuck in the ground close to the wooden caution signal.

Shortly after passing this caution signal, I saw a man with a red flag.

[Position noted and measured, and found to be 430 feet from the north abutment of the bridge.]

I was going about 7 to 8 miles an hour. I did not notice the red flag till almost close up to it. I saw the men working on the bridge. When I got on the bridge I was going about 3 miles an hour. My engine left the rail at the end of the second rails in the first span. There was no rail on my right-hand side. I am certain of the left or east rail being in.

I have crossed over this bridge 3 or 4 times since the permanent-way inspector began repairs. It was a cloudy day. Have never been stopped at this bridge, but have been stopped at others.

I shut off steam north of the caution signal, and on seeing the red flag, I whistled for brakes, put on the tender-brake myself, then my steam-brake, reversed my engine, and put on steam.

I was about 50 yards inside caution signal when I saw the red flag. A second red flag was about 50 yards from north of the bridge. I reversed my engine when about opposite this red flag. When I was at Atrai, No. 4 Down Goods was at the next station, Madhnagar, which is about 6 miles from Atrai. I left Atrai station at 10-37.

Alfred Duncan stated.—I was guard of No. 14 Down Goods on the 26th instant. Have been 8 months as guard on this line. Previous to joining this railway I was on the Darjeeling line for 16 months.

I was on the look-out all the way from Málánchi. I saw the wooden caution signal, but did not see a green flag or any flag near it.

I was looking out of the right-hand side of my brake-van. I saw a man quite close to the bridge with a red flag; he was about 35 yards from the bridge, and was coming from the bridge towards the train. The train was going about 4 miles an hour past the caution signal-post when my brake passed it. I put on my brake when the driver whistled.

I was about 40 feet inside caution signal-post when I heard the whistle, and when I saw the red flag.

I have been several times over this bridge since the permanent-way inspector began repairs. I did not see the men working on the bridge. I looked at my watch when I got out of my brake. The train had come to a standstill. My watch shewed between 44 and 45 minutes past 12.

Almost immediately after the whistle I felt a jerk; then looked out and saw the engine had gone over the bridge. It took me about half a minute to put on my brake. I had papers on my brake, as there is no arrangement in my brake-van to place my way-bills and other papers in. Taking off these papers caused delay in my putting on the brake.

The brake-vans are in my opinion too light to be of any use in stopping a heavy goods train like that I was guard of.

Heera Singh stated.—I have been watchman at this bridge (Bourah) for the past two months. I shew a red signal flag when ordered by the permanent-way inspector. The engine was at the distant house about a mile off when I put up my red flag. I received the order from the permanent-way inspector to shew a red flag about an hour before the arrival of the train. When the train was at Málánchi the permanent-way inspector told me to put up my red flag.

I saw the distant signal-man with a red flag standing between the rails, and when the train came up to him he crossed over to the west side of the line. The engine never whistled. The man Dunnu was not present with a red flag.

I ran towards the approaching train with my red flag up.

Awar Deen stated.—I was ordered to hold a red flag at the caution signal-post. I look after the lamps by night, and the flags by day. The lamps shew only a green light. I have got a hand signal lamp as well. I was called by the permanent-way inspector, I came to the bridge where the permanent-way inspector was at work; he told me to go and put up my red flag at the caution signal-post. I was standing between the rails with my red flag, and went to the west side when the train came up to me. The train was coming faster than usual and did not whistle. I have been in this post since the repairs to the bridge were commenced. I saw a flag stuck up between me and the house near the bridge.

Dunnu, Khalassi, stated.—I held a red flag midway between the distant signal and the hut near the bridge. I stood between the rails. I placed the red flag in the ground after the No. 4 Down Goods had passed. On arrival of the No. 14 Down Goods I rushed forward and held up the red flag. I saw the man at the caution signal-post, also Heera Singh, holding red flags.

Bal Kundi stated.—I am telegraph lineman. Was a passenger in the brake-van by the No. 14 Down Goods of the 26th instant; was looking out on the left-hand side of the brake-van. I saw a red flag beside the caution signal-post. I called to the guard that there was a red signal flag, and that it meant the train to stop. I saw this red flag from the gateman's hut at the level-crossing, which is about ¾ of a mile from the bridge.

The guard put on his brake, when I told him about the red flag.

The driver did not whistle.

The brake-van stopped about 80 yards inside the caution signal-post.

Shaik Nasib stated.—I was fireman of No. 14 Down Goods of the 26th instant, I saw a green hand signal flag tied to the caution signal-post, and saw a red signal flag at the house near the bridge. I noticed the red flag when about 200 feet inside the caution signal-post. I applied the tender-brake, and not the driver; the driver applied the steam-brake.

Mr. Fouracres, Assistant Locomotive Superintendent stated—that the driver of No. 14 Down Goods of the 26th instant, told him, on the evening of the 26th instant, that he saw the red flag at the caution signal-post, but could not stop his train in time.

Mr Chabrel, Executive Engineer in charge of Northern Section of the Eastern Bengal State Railway, stated.—Similar repairs to bridges in this section had been going on for the past three months under the same conditions as regards the distances of the fixed caution signals from the work, and of exhibiting red or green hand signal flags as occasion required.

Conclusion.

This accident was due to carelessness on the part of the driver in not keeping a proper look-out for signals.

He was evidently running at his usual speed till he got up to the caution signal-post; when he suddenly noticed the red flag at the caution signal-post, he shut off steam, applied his brakes, and reversed his engine, but too late to stop his train before reaching the bridge. The reversing lever of the engine, when examined, was back, and had been found in this state by the Assistant Locomotive Superintendent (Mr. Chase).

From the statements of the permanent-way inspector and his two signal-men, and also that of the telegraph lineman, it appears that the two danger signals were exhibited, one at 1,100 feet, the other about 200 feet from the north end of the bridge.

The driver stated that he saw a green flag stuck in the ground at the caution signal-post. A green flag at this point would be unnecessary, as the caution signal-post (its arm at 45°) served the same purpose, so that the driver's statement to Mr. Fouracres on the evening of the accident may be believed as the correct one, but he may not have noticed the red flag at the caution signal-post until he was close up to it, and this heavy train, going at even 8 miles an hour, could not be pulled up in 1,100 feet.

If the driver had been keeping a proper look-out, he would have noticed the red flag some time before coming up to it, and thus have sufficient length in which to bring his train to a halt before reaching the bridge.

The guard, if his statement is to be believed, is also to blame in not keeping a better look-out, knowing that the bridge was undergoing repairs, having passed over this bridge several times since the repairs commenced.

The statement of the guard is hardly reliable, and I believe he had his brake on before arriving at the caution signal-post as stated by the lineman, notwithstanding the guard's statement to the contrary. The guard brought prominently to my notice that the brake-vans on the northern section (metre-gauge) were much too light for

these heavy goods trains; in this case there was only one brake-van on a goods train of 40 loaded wagons.

This point should be inquired into.

The permanent-way inspector is to blame in not having his danger signals at the proper distance from his work, as laid down in Rule No. 277 of General Rules for Indian Railways, *viz.*, half a mile on a flatter grade than 1 in 250, or level, instead of which they were only 1,100 feet away from his work. Neither had he detonators placed on the line as required by the same rule.

The line at this place is straight for several miles, and level for a distance of two miles north of the bridge in the direction of Málánchi.

The wooden signal-posts which were placed at 1,100 feet instead of half a mile on each side of the bridge were fixed permanently at caution, the arm being at an angle of about 45 degrees, instead of which they should have been moveable and kept at danger, and only lowered to caution when the line over the bridge was ready for the passage of a train.

The statement of Dunnu, Khalassi, is not reliable.

It appears similar repairs to bridges on this length have been in progress for the last three months, and under the same conditions as regards the distances of signals from the work, and I presume without detonators being placed on the line, even at this short distance of 1,100 feet. As the operation of re-sleepering the bridge necessitated the removal of rails, and thus involved danger to trains, and as from Mr. Chabrel's statement similar repairs had been going on for three months, it appears that the conditions laid down in Rule No. 277 of the General Rules for Indian Railways, and the subsidiary rules framed by the Manager of the Eastern Bengal State Railway were not attended to.

Letter from the Consulting Engineer to Government of India for Railways, Central Division, to Government of India, dated 23rd June 1888.

In compliance with Public Works Department Circular No. IVR. of 24th April 1888, I have the honor to report the result of the inquiry into the causes of the serious accident to a Goods Train near Darekasa Station on the Bengal-Nágpur Railway on the night of 24th-25th March 1888, in which 24 Goods Wagons were greatly injured and a native brakesman was killed, and the permanent-way under the train was torn up.

In this case the No. 18 Up Goods train from Ráj Nándgaon to Nágpur, being a double train consisting of two engines and 51 goods vehicles, was suddenly wrecked when close to Darekasa Station, without any of the train staff being able to assign the cause.

The information prescribed in the above circular is attached.

Description.

The train was composed of—

Two Engines, small, F class, running chimney first.
19 Covered goods wagons loaded.
1 Brake-van in which the brakesman Nawab Ali was killed.
2 Timber Trucks empty.
28 Covered goods wagons loaded.
1 Brake-van loaded.

51 Total.

The thirty-third vehicle from the engines was fitted with screw brake gear but was not manned, and the brake was not in use on the occasion.

The first twenty-seven were all derailed. The first three were not much damaged; the following twenty-four were wrecked or greatly damaged. No damage was found done to wheels or axles. The draw bar of the eighteenth wagon from the engines was found broken with a bad flaw in it. The engines were not derailed and the second engine had its leading buffer casing broken.

The leading wagon was found 672 feet east of the Darekasa East Distant Signal.

The accident occurred on a descending gradient of 1 in 166·66 on a straight line. The permanent-way was in good order.

This gradient extends 4,200 feet backwards. Behind it is another of 1 in 300 for 1,800 feet, then 1,400 feet of level, and then a temporary diversion with gradients of 1 in 80 and curves of 800 feet radius. A plan and section of the line* are attached, and a sketch* showing the relative positions of the wrecked wagons and of the place where the broken buffer head was found.

Evidence.

Murphy, W., Driver.—I was driver of the above train and had charge of the front engine. Driver Dunjeebhoy being in charge of the 2nd engine. We left Bortaláo 5 minutes late owing to 2 engines taking water. I do not remember having crossed any diversion between Bortaláo and Darekasa. When near Darekasa driver of 2nd engine whistled for the signal, the signals were given; at this time we were running at about 8 miles an hour. I am prepared to take my oath that the speed was not greater than 8 miles per hour. I first put on my brake about a mile from scene of accident. The first intimation I received of the accident was through a sudden shock, the first shock was a violent shove forward, followed by a jerk towards the rear. I noticed that the fireman Peters fell down on the foot plate and then jumped off the engine. I did not leave the engine until after it had stopped.

In my opinion the accident occurred through parting of the train, my reasons for thinking so being that the two men who travelled in the middle brake-van informed me that immediately before the accident they heard a rumbling noise, and that Brakesman Nawabally, who was in the same compartment with these two men, left them and proceeded towards his brake compartment.

I felt nothing wrong with the road and nothing was damaged on my engine. The moon, at the time of the accident was obscured by clouds and the night was foggy.

My hand signal lamp glass was broken and small oil can was dinged by the accident. I was appointed as a driver on 17th of February 1888.

Dhunjeebhoy, Driver.—I was the driver of the second engine of the train in question.

We left Dongargarh at 10-5 P.M., arrived at Bortaláo at 11-5 P.M., left Bortaláo at 11-15 P.M., 4 minutes late, owing to the two engines having taken water. On our arrival at mileage 111, post 11, at 11-30 P.M., I whistled for the signal, both the signals were lowered for us to go into the station. I felt a sudden shock which threw me back, I happened to look behind and I saw the wagons were mounting each other, thus causing the 28 loaded wagons from the second engine to be derailed and telescope causing serious damage to the rolling-stock and permanent-way and also causing the death of Brakesman, Nawab Ali. The damage done to my engine was one tender buffer and coupling broken, and engine buffer casting broken, the coupling between the tender and first vehicle of the train was that broken probably causing both engines to separate themselves from the train. The volute spring casing of the front buffer of my engine was the one broken. The train consisted of 46 loaded, 2 empties, and 3 brakes, total 51 vehicles.

In the rear brake-van there was the Head Guard of the train and in the centre brake-van there was a Brakesman Nawab Ali and two other passengers, the brakesman got killed, and in the brake wagon which was loaded there was no one. From the time I was whistling till my engine came to a stand, the time occupied was only two minutes.

My engine moved about 15 to 20 yards after I first saw the wagons were mounting each other.

Lutchmon, Carriage Examiner.—I was in the same compartment with Francis. I was awake. I heard a great noise. The train mounted and I got out through the window. The hind portion of the body of my brake-van was severed from the under-frame and slipped down to the ground. I think I got out through the window. The train was running slowly. I do not know what was the cause of the accident. There was no one with Nawab Ali.

Raghoo Nursoo, Fireman.—I was the Augwallah (fireman) on 18 Up Goods on 24th instant with Driver Dhunjeebhoy. The driver shut off steam on the other side of the diversion. The driver whistled for the guard's brake, because it was on a slope.† When we arrived near the signal I felt a shock. My driver looked to see what was the matter and on looking out I found the wagons one on the other. I put on the brake after leaving the diversion. We were running slowly from the diversion up to the scene of the accident. The train pulled back and I fell forward. I fell on my face towards Darekasa in the direction of the engine.‡

I saw the rear portion of the train after passing the diversion. The line was all right. The driver's bottle and kettle fell in the direction of the tender. The front vehicle was separated from the engine about 5 yards. The tender buffer was bent and the engine buffer casing was broken. I cannot state the cause of accident.

Baily, L., Guard.—I was the Head Guard in charge of 18 Up Goods on 24th March, Dongargarh to Nágpur. My train consisted of 48 wagons and 3 brakes. Out of the 48 wagons 2 rail trucks were empty. I occupied the rear brake. Nawab Ali was my brakesman. He occupied a brake-van not a brake wagon. This brake-van, No. 3679, was the 20th vehicle from the rear engine. The 3rd brake was a brake wagon loaded, No. 321. This was the 33rd vehicle from the engine, and the rear brake which I occupied was No. 835. This was the 51st vehicle from the engine. My train was worked by two engines. Before starting from Dongargarh I examined the whole train and found that it was properly coupled up and that

* Not published in the Gazette.

† Down grade.

‡ This man contradicted himself as to how he was standing, and how he fell when the shock took place.

the bridle chains were secured. I left Dongargarh right time at 10-5 P.M. and arrived Bortaláo right time, *viz.*, 11-5 P.M. We left Bortaláo at 23-11. I exchanged the all right signal with the driver on passing the trailing points. There is a diversion between Bortaláo and Darekasa. We passed this diversion at a speed of 10 miles an hour. I put on my brake about 2 miles outside Darekasa, because there is an incline there. The driver whistled for signals about one mile outside Darekasa Station. They were lowered at once. I was standing on the left hand side of the brake at the door looking towards the engine. I felt a shock and I was thrown forward in the direction of the engine. From the time I felt a shock until the brake stopped. We ran about the length of this room at the time of the accident, the train was running slowly. On passing the diversion I could see that the whole train was intact. I am quite sure of this. Also I saw it on the 8,700 feet curve or 4,500 feet from scene of accident. I am quite certain that the train had not parted at this curve, because I could see the engine on the train length. After leaving the first curve I again saw the engine apparently connected with the train before the accident took place. I stood on the left-hand side of the brake on passing over the diversion and kept on that side up to the time of the accident. I cannot say how the accident took place.*

I was the sole occupant of the brake-van. I saw the train intact. I did not hear the driver whistle for brake.

Peters, J., Fireman.—I was the fireman on the front engine with driver Murphy. We left Bortaláo all right and crossed the diversion having shut off steam on the other side and put on the brake. The driver put on a little steam at the foot of the diversion and shut it off at the top where the brake was again applied. When about half mile off, we whistled for the distant signal. The signals were lowered at once, and I put on my brake harder and stood by it looking towards Darekasa until the shock threw me forward towards the boiler, I felt the engine being pulled back. The engine was just moving forward as I recovered myself, and on looking back I saw the wagons derailed.

The distance between tender of rear engine and first wagon was about 10 yards. I was stunned and think that the train derailed itself after the shock took place. The road was as usual. I don't know how the accident occurred. The last time I saw the rear of the train was before crossing the diversion. I cannot say whether the train parted. My engine was undamaged except that the draw-bar was slightly cracked. We were running very slowly when the accident took place. The oil cans fell in the direction of the engine tender when the accident took place.

Baboo Lall, Fitter.—I am a fitter who accompanied the material train and am employed in repairing bolsters of rail trucks. When the accident occurred the train was going at a moderate speed. I was in the passenger compartment of the rear brake and Ramkrishna Bhisaree was with me. I did not look out.

Francis, Train Inspector.—I was riding in the rear passenger compartment of the middle brake-van which was wrecked. I was sitting on the left-hand corner with my back towards the engine. I was asleep soon after I left Bortaláo. A bump on the head awoke me. I looked out towards the rear of the train and saw there was nothing wrong there. I then looked out of the window towards the front of the train, and all this time my brake was mounting up and twisting across the rails. The front portion in which was Nawab Ali was smashed by the wagon in rear mounting on it, whilst the hind portion of the body separated itself from the under-frame and slid off on the left of the truck clear off the rails, and I jumped out through the window. I had a slight bruise on my leg and arm.

Náraín Rao, Permanent-way Inspector.—I saw nothing of the accident, but I reached the spot at 3.30 A.M. The road was torn up and 9 lengths of rails had to be replaced. The road was in good order. The up mixed train passed over it about 2½ hours before the accident took place.†

The road was in good order and had not been touched as conversion work had not been begun on it. It consisted of metre-gauge rails and wooden sleepers.

Evidences taken by Railway Police Inspector, W. Sargon.

Baily, L., Guard.—I left Dongargarh on the 24th of March at 10-5 P.M. with the No. 18 up goods; arrived at Bortaláo at 11-5; left again at 11-11. I had two drivers. Murphy was the trainman and Dhunjeebhoy, pilotman. The load consisted of 51 vehicles, *viz.*, three brake-vans, two empty and forty-six loaded. About four telegraph posts from Darekasa distant signal I felt a sudden shock and was thrown forward in my brake, the train was going at the speed of eight or ten miles an hour, when this occurred the train stopped at once. I went out to see what was the matter and found 28 vehicles derailed from the engines; the brake-van in which my brakesman was by name Nawab Ali was smashed up, and several wagons were on top of the brake-van, the man was inside at the time of the accident and was killed; the time the accident occurred was 11-32 P.M. I cannot say how it occurred. There was great damage done to the wagons and grains.

Petere, Francis, Train Inspector.—I was travelling with the No. 18 up goods on the night of the accident from Dongargarh. I was asleep in the spare compartment of the brake-van. Nawab Ali, brakesman, was in the same brake. I heard a crashing sound which woke me. I looked out of the window (being moon-light night) to see what was the matter. I saw the wagons on front mounting one on top of the other. On seeing this I jumped out. I cannot say what speed the train was going at the time the accident occurred near Darekasa distant signal. I don't know the cause of the accident. Brakesman by name Nawab Ali was killed in the accident. This man was in the same brake as myself, but in the guard's compartment; the

* Mr. Rooper is of opinion that the guard looking out from the left-hand side of his rear brake-van would not be able to see the distant signal until the front engine was 500 feet from it.

† When asked his opinion he stated that the train probably parted, that on the driver slowing down the rear portion of the train run into the front.

brake-van was smashed up and some wagons on top of it, a number of wagons were derailed and broken.

Murphy, W., Driver.—On the 24th March I was driver of engine No. 274 on 18 up goods. My engine was in front of another driver by name Dhunjeebhoy who was also with the train. I left Dongargarh right time, at Bortaláo I arrived to time, both engines took water. I left 6 minutes late owing to this; on nearing the distant signal of Darekasa I felt as if my engine was pushed forward, and suddenly drawn back; the engine stopped immediately, I and the other driver Dhunjeebhoy shut off steam about 2½ miles back from the spot where the accident occurred; I was going 8 miles an hour or less at the time. Twenty-eight wagons were derailed and severely damaged. A brakesman by name Nawab Ali was killed. There were some wagons on top of the brake in which Nawab Ali was killed. I cannot say how many wagons were on top. I don't know how the accident occurred.

Dhunjeebhoy Jamseljee, Driver.—I was driver on 18 up goods on 24th March. I left Dongargarh at 10-5 P.M., 46 loaded, 2 empty, and 3 brakes. The driver was Murphy. I left Bortaláo at 11-15 P. M.; on nearing the distant semaphore of Darekasa I felt a sudden shock which threw me back. I was going at the rate of 8 or 10 miles an hour. I had shut off steam about 2 miles back from the spot where the accident occurred, the train driver also shut off steam from about the same spot as myself. After receiving the shock I turned round to see what was the matter (being moon-light night). I could see the wagons mounting on the top of each other. The engines stopped at once as I and the other driver had shut off steam; 28 wagons from my engine were derailed and the brake-van in which brakesman Nawab Ali was, was smashed up and he was killed. This is what I discovered after the accident. I cannot say what was the cause of the accident; the time the accident occurred was 11-32 P. M.

Peters James, Fireman.—I was fireman to driver Murphy who was trainman of 18 up goods on the 24th of March; Dhunjeebhoy was pilot driver on 18 up goods as well. The train left Dongargarh at 10-5 P.M.; on nearing the distant semaphore of Darekasa I felt a shock which threw me forward; the engines stopped at once; the train was going at the rate of 10 miles an hour; both engines had shut off steam as it is down hill; both engines went through the diversion with steam shut off after getting out of the diverson. My driver gave the engine a little steam and shut off again. 28 wagons were derailed in the accident from the engine, a brakesman by name Nawab Ali was killed, and his brake was smashed up and several wagons were on top of it. I don't know how the accident occurred.

Finding of the Departmental Committee of Enquiry.

The evidence is conflicting.

We are of opinion that the train must have parted behind the 17th vehicle on account of the flawed leading drawbar of the 18th vehicle. The parting probably took place on the ascending grade of the diversion, and the rear portion on account of the falling grades must have acquired considerable velocity and run into the front portion, whose speed had been reduced to 8 or 10 miles an hour at the actual scene of the accident.

The extensive damage done was probably due to the awkward way in which the first wagons were derailed, causing the others to mount on or telescope into them.

Conclusion of Inspecting Officer.

The evidence in this case is conflicting, and leaves the immediate cause of the accident in some doubt.

The view adopted by the officers of the line is that, while the train was passing over the diversion, the steam which was given to the leading engine at the bottom of the diversion and shut off again after getting across jerked the train and fractured the drawbar of the 18th vehicle which was afterwards found broken 235 feet back from the wreck with a bad flaw in the iron extending through half its sectional area; that the detached buffer head was carried from the diversion to this point attached to the next wagon by means of the bridle chain; that the engines and 17 wagons ran on ahead, while the remainder of the train retarded by the curves and grades of the diversion was left behind, while the leading engine was steaming out of the diversion; and that on the leading portion of the train slowing down on approaching the station the rear portion ran into it and caused the derailment and wreck of the leading 17 vehicles and 7 of the following ones.

This is a consistent theory, but I think the weight of the evidence shows that, though the train was provided with sufficient total brake power, this was badly distributed. The total weight of the train was probably 390 tons, the weight of the 2 engines about 39 tons, and of the two brake-vans 12 tons, these being the 20th and the 51st or last vehicles. When the engine-brakes were put hard on near the distant signal, the great inertia of such a heavy train probably caused the derailment of one or more of the leading wagons, and when these became too far displaced to run any longer on the ballast they upset.

The difficulty is to account for the distance from the place where the broken buffer head was picked up to the place where the wagon it belonged to lay.

This is greater than would be accounted for by the shortening up of the length occupied by the wrecked wagons before the accident, added to the distance said to have been run by the engines after the first shock before coming to a stop. This would seem to have been underestimated.

The Head Guard states positively that he observed that the train had not parted either on the diversion or after it had cleared the diversion, and had got on to the descending gradients. It is true this man had an interest in showing that he was on the look-out and had not allowed such an occurrence as the parting of his train to escape his notice. It is also true that his evidence generally is somewhat vitiated by his statement that he saw the signals lowered while looking out of the left of his brake about a mile from the station. He could not have seen the signals on account of the curve extending from 5,865 to 5,876 chains. But his statement that the train had not parted after it got clear of the diversion where he could see its whole length from the left of his brake is confirmed by Dunjeebhoy, the driver of the second engine, who states he looked back and saw the brake-van lights at about half a mile or a distance which he estimated to be that of the train's length. To this it may be objected that he underestimated the distance, but it was within three days of being full-moon and he could scarcely have failed to notice the parting of the train had it occurred.

Before the Police he stated that it was a moon-light night. The statement of driver Murphy that the night was cloudy and foggy was not confirmed by the other witnesses. Driver Murphy also stated that the first shock was a violent shove forward followed by a jerk back. This would support the theory of collision. His evidence was taken on 31st March, the day after the departmental enquiry, in the Locomotive Superintendent's Office. He had probably heard of the theory as to the parting of the train. Driver Dunjeebhoy stated he was quite sure the first shock pulled his engine back, and was very clear in his evidence that the train did not part. His fireman Raghoo Nursoo confirms this in stating the train pulled his engine back and he fell forward on his face towards Darekasa.

Before the Police Inspector driver Dunjeebhoy stated he felt a sudden shock and was thrown *back*. This appears to conflict with his evidence before the Committee. Fireman Peters of the leading engine stated before the Police that the shock threw him *forward*, and gave the same evidence before the Committee stating that he felt his engine being pulled back. The damage to the rear draw-gear and to the forward buffer casing of the second engine is consistent with this view.

The evidence as to the way small articles on the engines fell at the moment of shock is of a very weak and inconclusive character. I think loose articles on the boiler inside the cab would be more likely to fall on the footplate (that is backwards) than anywhere else, no matter what the direction of the impulse throwing them down.

The fireman of the leading engine stated he put on his brake harder when near the distant signal, that is, just before the accident occurred.

I consider that this accident was caused by one or more of the leading vehicles of the train having been derailed by doubling up owing to the excessive weight of the train on a descending gradient having been too suddenly checked by the brakes of the engines. The Agent has since agreed to limit the loads of trains to 42 loaded or 52 empty. This is the limit on the Rajputana Railway, and its observance will, I think, obviate danger in future.

APPENDIX.

List showing the Damages done to Vehicles in the Darekasa Accident on 24th March.

Vehicles.		Nature of Damage.	Remarks.
Class.	No.		
Iron-covered Goods Wagon .	9219	Four axle guards bent, 4 axle boxes broken, 2 buffers bent, 2 volute springs broken, 2 guide plates broken, 2 volute spring washers broken, one underneath angle iron broken, middle bars bent, 2 flap door boards broken, 2 swing door frame pieces broken, one body angle iron broken, channel iron bent, door hinges bent.	
Ditto ditto .	589	Two pairs of wheels not in gauge, 4 bearing springs weak in camber, 2 axle guards broken, 2 axle guards bent, 4 axle boxes broken, both buffers broken, channel irons bent, 6 angle irons bent and broken, 4 iron plates torn, 4 flap door hinges bent, 2 head stock plates broken, brake lever broken, 6 flap door boards broken, 12 swing door frame pieces and 4 swing door boards broken, door hinges bent.	
Ditto ditto .	11524	One pair of wheels out of gauge, one buffer broken, one buffer bent, 4 axle guards bent, 4 bearing springs weak, 4 axle boxes broken, channel irons and middle bars bent, 5 body angle irons broken, 6 iron plates torn, 6 angle irons bent, head stock plates broken, door hinges bent.	
Ditto ditto .	562	Both buffers broken, 2 axle guards broken, 2 axle guards bent, 2 volute springs broken. 4 axle boxes broken, door hinges bent, 2 swing doors frame pieces damaged iron underframe bent, iron plates of body torn heavily, angle irons broken, head stock plate broken, floor plate damaged.	
Ditto ditto .	11532	Both buffers broken, 4 axle guards bent, 4 axle boxes broken, 2 angle irons bent, and 2 angle irons broken, 2 iron plates of body torn, middle bar slightly bent, swing doors frame broken, head stock bent, door hinges bent.	
Ditto ditto .	10379	Two buffers broken, 4 axle boxes broken, 2 axle guards bent, swing doors and flap door entirely damaged, middle bars and channel irons bent, head stock plate bent, 4 angle irons bent, 6 angle irons bent, 6 body iron plate torn and some plates bent, door hinges bent, floor plate damaged, both ends plates broken heavily and bulged in.	
Ditto ditto .	543	Two buffers broken, 3 axle boxes broken, one axle guard broken, 3 axle guards bent, 2 striking plates broken, brake lever bent, middle bars and channel irons bent, 3 iron plates of body torn, one head stock plate broken, flap doors and swing doors damaged, 4 angle irons bent and 4 angle irons broken, door hinges bent, brake lever rack broken, one end bulged in and plates damaged.	
Ditto ditto .	10409	Two pairs of wheels loose in axle, both buffers, 4 axle guards and axle boxes broken, 6 angle irons of body and roof broken, 4 iron plates of body and roof torn, one head stock plate broken, swing door frames and boards damaged, flap door hinges bent, brake lever rack broken, 2 bridle plates missing, middle bars and channel irons bent and damaged. Floor plate damaged.	
Ditto ditto .	615	Both buffers broken, 2 pairs of wheels not in gauge, 4 axle guards bent and broken, 4 axle boxes broken, middle bars and channel irons bent and damaged, head stock plates broken, 6 angle irons of body broken and remaining bent badly, swing doors damaged and missing, flap door hinges bent, 6 body iron plates torn and rest bent, flap door boards broken and missing, brake gear damaged, floor plates damaged, body iron work is entirely useless.	
Ditto ditto .	10387	Both buffers broken, 2 pairs of wheels not in gauge, 4 axle gaurds bent and broken, 4 axle boxes broken, middle bars and channel irons bent and damaged, head stock plates broken, 6 angle irons of body broken and remaining bent badly, swing doors damaged and missing, flap door hinges bent, 6 body iron plates torn and rest bent, flap door boards broken and missing, brake gear damaged, floor plates damaged, body iron work is entirely useless.	

Vehicles.		Nature of Damage.	Remarks.
Class.	No.		
Iron-covered Goods Wagons.	10423	Both buffers broken, 4 axle guards bent, brake gear damaged, 4 axle boxes broken, swing doors damaged, flap door hinges bent, 4 beards broken, middle bars and channel irons damaged, head stock plate broken, one end entirely broken and bulged inside, body angle irons broken and plates torn, floor plates broken.	
Ditto ditto .	10400	Both buffers bent, 4 axle boxes broken, 4 axle guards broken, brake gear damaged, 2 swing door frames broken and one missing, flap door hinges bent and 2 boards broken, middle bars and channel irons bent and damaged, 4 angle irons broken, some bent, body iron plates torn badly, floor plates damaged, both ends bulged in.	
Ditto ditto .	10424	Wheels not in gauge, both buffers broken, axle guards and axle boxes broken, whole body broken into pieces, underframe very badly bent and damaged.	
Ditto ditto .	716	Both buffers and 2 axle guards bent, 2 axle guards and 4 axle boxes broken, middle bars and channel irons damaged, 2 head stock plates broken, 6 body angle irons broken, 6 iron plates torn and damaged, swing doors damaged, flap door hinges bent, brake gear damaged.	
Ditto ditto .	10416	Two pairs of wheels not in gauge, both buffers broken, 4 axle guards bent, 4 axle boxes broken, swing doors damaged, flap door hinges 2 boards broken, middle bars and channel irons bent and damaged, 6 angle irons broken, 4 angle irons bent, 6 iron plates torn and damaged, floor plate damaged, head stock plates broken, roof plates torn and both ends bulged in, and plates damaged.	
Wooden Lowsided Wagon .	6855	Both buffers broken, 4 axle boxes broken, 4 axle guards bent and damaged, whole body broken into pieces, and underframe bent and damaged.	
Iron Lowsided Wagon .	247	Both buffers broken, 4 axle boxes broken, 4 axle guards bent and damaged, whole body broken into pieces, and underframe very badly damaged.	
Ditto ditto .	259	One buffer bent and one buffer broken, 4 axle guards bent, 4 axle boxes broken, 8 iron stanchions broken, 4 T. iron broken, whole end flap badly damaged, side flaps bent and side flap hinges some bent and some broken, middle bars and channel irons bent.	
Brake-van . . .	3679	Both buffers and 4 axle boxes broken, 4 axle guards bent, whole body damaged into pieces, underframe bent and damaged, roof corrugated sheet damaged.	
Wooden-covered Goods Wagon	426	One buffer bent and one buffer broken, 4 axle guards bent, 4 axle boxes broken, one volute spring broken, brake gear damaged, 6 side and end pillars broken, 4 door hinges bent, 2 head stocks damaged, 2 rocker bars broken, 3 flap doors, 2 swing door boards and 7 new end casing boards broken, one new underneath cross piece broken, one cant rail broken, 8 side casing boards broken, 5 corrugated sheets damaged.	
Ditto ditto .	477	Both buffers bent, 2 axle boxes broken, 4 axle guards bent, 4 flap door hinges bent, 2 end pillars broken, one arch rail broken, one head stock and 2 bottom boards broken, corrugated roof sheets damaged, brake gear damaged, 2 flap door boards and 4 swing door boards broken.	
Ditto ditto .	507	Both buffers bent, 2 axle boxes broken, 4 axle guards bent, 4 door hinges bent, 2 arch rails, 4 end corner pillars, one head stock, 2 rocker bars and 5 end casing boards broken, roof corrugated sheets damaged, 3 flap door boards and 4 swing door boards damaged, brake gear damaged.	
Ditto ditto .	6807	Both buffers, 4 axle boxes and 4 axle guards broken, whole body damaged into pieces, roof corrugated sheets damaged, underframe bent and damaged, wheels not in gauge.	
Ditto ditto .	501	Both buffers, 4 axle boxes and 4 axle guards broken, whole body damaged into pieces, roof corrugated sheets damaged, underframe bent and damaged, wheels not in gauge.	
Ditto ditto .	502	Both buffers, 4 axle boxes and 4 axle guards broken, whole body damaged into pieces, roof corrugated sheets damaged, underframe bent and damaged, wheels not in gauge.	
Ditto ditto .	482	Both buffers, 4 axle boxes and 4 axle guards broken, whole body damaged into pieces, roof corrugated sheets damaged, underframe bent and damaged, wheels not in gauge.	

Vehicles.		Nature of Damage.	Remarks.
Class.	No.		
Wooden-covered Goods Wagon	410	Both buffers, 4 axle boxes and 4 axle guards broken, whole body damaged into pieces, roof corrugated sheets damaged, underframe bent and damaged, wheels not in gauge.	
Ditto ditto	398	Both buffers, 4 axle boxes and 4 axle guards broken, whole body damaged into pieces, roof corrugated sheets damaged, underframe bent and damaged, wheels not in gauge.	

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Summary for December, 1888.

The month of December usually witnesses the final retreat of the south-west humid winds of the south-west monsoon circulation from the Bay of Bengal and Arabian Sea, and the establishment of the north-east monsoon circulation over the whole Indian area, including India and the adjacent seas north of the Equator. Hence, during the first fortnight of the month, rain continues to fall under the same conditions as in November in Southern India, but is generally confined to Travancore and the most southerly districts of Madras and Mysore. The final important burst of rain frequently accompanies the march of a small cyclonic storm which usually forms in the south-west of the Bay, advances in a westerly direction across the south Coromandel Coast, and breaks up shortly afterwards under the obstructive action of the Palni and other hills of Southern India. If what are termed the north-east monsoon rains (but which are really the concluding rains of the retreating south-west monsoon circulation) terminate with a cyclonic storm accompanied by a heavy cyclonic burst of rainfall, it usually occurs in the second or third week of December. It will be seen from the following remarks that the mode and time of termination of the north-east monsoon rains of the present season were normal in character.

The conclusion of these rains in Southern India immediately precedes the establishment of conditions in Upper India which favour the occasional occurrence of cold-weather storms and rainfall in Northern India and of frequent snowfall in the Himalayan mountain region. During the first three weeks of the month weather is usually fine and clear in Northern and Central India, and temperature decreases rather rapidly (especially the night temperature in Upper India). The barometer usually oscillates somewhat rapidly through small amounts, the period of a complete rise and fall varying from two to five days. The periods of falling barometer are usually associated with a tendency to the formation of cloud, and of rising barometer with its dissipation. During the last week or ten days of the month there is, on the other hand, a marked tendency to disturbed weather in Upper India indicated by barometric movements on a larger scale and the formation of cloud; when this occurs a depression appears or forms in Upper India, and extends its influence eastwards and gives more or less rain. This weather forms the so-called "Christmas rains" of Upper India. When they occur, they are due to and accompany a feeble cyclonic depression or storm, and are usually followed by a succession of similar storms during the months of January and February. These cold-weather storms are of great economic importance, and form the most important feature of the weather of the last fortnight of December and the months of January and February. Their formation is by no means thoroughly understood as yet, but they appear to originate in the upper return current of the north-east monsoon circulation, and generally drift from west to east or in an opposite direction to the cyclonic storms of the rains. As they originate in the upper atmosphere and their action

is chiefly confined to the upper strata, (although they modify to some extent the air movement near the Earth's surface), it is much more difficult to forecast their occurrence, line of march, and general character, than it is to forecast the storms of the rains.

The preceding remarks give the normal weather conditions and features of the month in the Indian area. In the adjacent seas the south-west humid winds retreat down to the Equator (and are probably finally absorbed in the Doldrums) and are replaced by north-east winds, so that before the end of the month, north-east monsoon winds usually prevail over the whole of the Arabian Sea and Bay of Bengal.

The following gives a brief account of the chief features of the weather during the past month.

Frequent showers fell from the 1st to the 6th in the southern districts of Madras, including Madura, Tanjore, Trichinopoly, Coimbatore, South Arcot, and Chingleput, and in South Mysore and Travancore. They were as usual heaviest in the coast districts, where very favourable rain was received on the 3rd and 4th. For example, on the morning of the 4th, Negapatam registered 4 inches and Madura 2 inches, and on the morning of the 5th Madras recorded 4 inches.

Rain ceased to fall in this area on the 7th and an interval of fine weather succeeded until the 12th. During the whole period from the 1st to the 12th fine clear weather prevailed over the whole of Northern and Central India and the North Deccan. The observations of the 12th indicated the commencement of two disturbances. The first was a shallow depression which gave much cloud and modified the temperature conditions on the north-west frontier. It marched rapidly eastwards and lay over the Punjab Himalayas on the morning of the 14th. It gave snow on the higher hills and a few light showers in the north of the Punjab. Fine clear weather was re-established in Upper India on the afternoon of the 13th. The second disturbance was of much greater importance, as it developed into a cyclonic storm, which gave the final heavy burst of north-east monsoon rain of the present season to Southern India. The observations of the 12th shewed that a low-pressure area was forming to the north-east of Ceylon. It increased rapidly in intensity during the next two days and marched westwards, and on the morning of the 14th, the centre was a little to the east of Negapatam. It crossed the coast on the afternoon or evening of the 14th, and was a little to the south-east of Madura on the morning of the 15th. It was, however, then filling up rapidly, and it disappeared as a cyclonic circulation and storm during the day. It gave moderately heavy rain to the same districts that had received rain on the first six days of the month. Weather cleared up in Southern India on the 16th and 17th, and fine weather prevailed until the end of the month. A small depression formed over the Punjab Himalayas on the 20th, which accompanied moderate snowfall on the higher elevations. It filled up during the day. On the morning of the 21st a shallow depression overlay Beluchistan and Upper Sind. It marched rapidly eastwards and gave overcast skies and light showers in the North and East Punjab during the day. It apparently filled up on approaching or passing over the Punjab Himalayas on the 22nd. Anti-cyclonic conditions prevailed in Upper and Central India until the morning of the 29th when a very shallow depression formed in the north-west frontier between Mooltan and Quetta. It advanced eastwards and died out during the next 24 hours after having given some light showers of rain and snow at Quetta and in the North Punjab and adjacent hills.

It will thus be seen that whilst the weather conditions have been normal in Southern India and have given favourable rain, the weather in Upper and Central India has been marked by the prevalence of strongly marked anti-cyclonic conditions and by the absence of the usual Christmas rains. Three shallow depressions have passed eastwards across Upper India, two of them during the last ten days of the month, but they failed to develop and gave very little rain. They were hence abortive attempts at cold-weather storms, and as such their history is interesting and instructive.

The chief features of the meteorology of the past month may be summarized as follows:—

(1) General excess of pressure accompanying large and important local anomalies.

(2) Diminished temperature (more especially night temperature) in Northern India, and increased temperature in Southern India, more especially in the west coast districts.

(3) Normal or decreased humidity in the plains and excessive dryness of the air at the hill-stations.

(4) The prevalence of unusually steady easterly winds in the west coast districts and the West Deccan and of northerly winds in Bengal.

The most important of these features is the first. The average pressure over the whole of India during the month was ·03″ above the normal. Relatively to this general condition, pressure was in moderate defect along the foot of the hills from Rawalpindi to Dhubri, and also in Bengal. The following table gives the anomalies at the chief stations in that area:—

Sealkot	—·050″	Burdwan	—·032″
Ludhiana	—·033	Dacca	—·035
Gorakhpur	—·027	Calcutta	—·028
Dhubri	—·043	Chittagong	—·023

The deficiency was as marked in the neighbouring hill districts. These anomalies hence shew that whilst pressure is at present relatively in defect over and near the hills in Northern India, the deficiency is most marked in the western and eastern districts and least marked in the central districts.

Pressure was also, relatively to the general state, in slight defect along the west coast. The following gives the local anomalies at four representative stations:—

Kurrachee	—·008″	Karwar	—·007″
Bombay	—·006	Cochin	—·007

Between these two areas of relatively deficient pressure lay an area of excessive pressure, stretching north and south between Upper Sind and the West Punjab to the South Deccan. The axis of this is defined by the following stations (the relative anomalies of which are added):—

Ajmere	+·065″	Poona	+·044″
Neemuch	+·057	Sholapur	+·042
Indore	+·051	Belgaum	+·032
Khandwa	+·047	Bangalore	+·023
Malegaon	+·041		

A small isolated area of excessive pressure overlay Jubbulpore (the anomaly of which for the month is +·037″) and Sutna (+·055″).

A reference to the weather reports of the two previous months show that the chief features of the pressure distribution of the month of December are similar to those of the two preceding months, the only difference being that they are more strongly marked. It is certain that these strongly marked pressure features will largely modify the distribution of rainfall during the next two months. So far as can be judged from the very imperfect investigations as yet made in this subject, they would appear to indicate the probability of more stormy weather than usual during the next two months in the Himalayan region (and perhaps the adjacent plain districts) and also perhaps less rainfall in Central India and the Central Provinces than usual.

One very remarkable feature during the past month has been the very great dryness of the air at the hill stations, where the average humidity was from 10 to 20 per cent. below the normal.

Rainfall of the month.—The preceding paragraphs have stated the conditions under which the rainfall of the month has occurred. The average rainfall of the month for the whole of India is little more than half of that of the month of November, and is very small in amount, as the month is the transition period from the south-west monsoon rains of Southern India to the cold-weather rains of Northern India. No rain fell during the month over by far the greater part of the country, including the whole of Northern and Central India and the Deccan (except some parts of the Punjab, North-Western Provinces and Khandesh). In the southern districts of the peninsula the rainfall of the month was normal or in moderate excess. Mysore and Bellary received their normal amounts, and the Carnatic an average of 4½ inches, or upwards of half an inch above the normal. Lower Burma and Malabar received a little rain, but less than half the small average of the month.

The following table shows the amount of rain and the difference from the average during the month of December 1888 in the twenty-one meteorological divisions into which India was divided by Mr. Blanford, so far as it is indicated by the comparatively small number of the Telegraphic returns of rainfall received from the observing stations.

Districts.	Number of stations.	Actual average rainfall.	Normal average rainfall in December.	Difference from the average in December 1888.

JOHN ELIOT,

SIMLA, *Offg. Meteorological Reporter to the Government of India.*

The 9th January 1889.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and prospects of the Crops.

Madras.—*For week ending 12th January, 1889.*—Rainfall slight in southern districts, little or none elsewhere. More rain wanted in Ganjam, Vizagapatam, and Coimbatore. Standing crops generally good, but damaged by insects, disease or excessive rain in parts of South Arcot, Chingleput, Madura, and Tinnevelly; withering in Coimbatore. Pasture generally sufficient, except in parts of Salem and Coimbatore. Agricultural operations progressing. Prices still high in Ganjam; no material fluctuations elsewhere. General prospects

favourable, except in Ganjam and Coimbatore. Over 24,400 labourers on Rashikulya works, Ganjam.

Bombay.—*For week ending 16th January, 1889.*—Slight rain in parts of Shikarpur. Late crops in parts of Khandesh, Nasik, Ahmednagar, and Sholapore, and in one taluka of Poona, and two of Surat suffering for want of moisture. Cotton in parts of Bijapore and exotic cotton and wheat in parts of Dharwar injured by blight, *jowari* in two talukas of Belgaum by blight and unfavourable winds, and late crops generally in two taluks of Satara by blight and insects. Standing crops otherwise good, except wheat in Broach. Opium crop in Baroda good. Harvesting of late crops progressing in parts of Kaira, Khandesh, and Bijapore, and cotton-picking in parts of Guzerat and Kathiawar. Fodder scarce in parts of Broach, Nasik, Belgaum, and Kathiawar. Agricultural stock poor in one taluka of Belgaum, and in parts of Kathiawar. Drinking-water scarce in two talukas of Nasik.

Bengal.—*For week ending 15th January, 1889.*—Weather unseasonably warm during the last few days. Beneficial showers fell on the 13th and 14th instant in Behar, Chota Nagpore, and Central and Northern Bengal. Prospects of all cold-weather crops, including poppy and tobacco, are promising. *Boro* or spring rice is coming on well, sugarcane is being cut and pressed in some districts, and is generally a fair crop. The winter rice harvest is practically over, with an average outturn of from eight to ten annas in the majority of districts, about twelve annas in the districts of Chota Nagpore and in Backergunge, and almost sixteen annas in Dacca, Furreedpore, Mymensingh, Tipperah, and Noakholly. The Collector of Chumparun reports that prices are gradually rising, and that the pressure upon the labouring classes in the affected area is consequently on the increase.

North-Western Provinces and Oudh.—*For week ending 16th January, 1889.*—Weather is cloudy but no rain. Rain much needed. Irrigation continues. *Rabi* prospects fair. Poppy thriving. Sugarcane being pressed. Markets well supplied. Prices steadier. Condition of agricultural stock generally satisfactory.

Punjab.—*For week ending 16th January, 1889.*—Slight rain in Rawalpindi. Prices rising in Rawalpindi, stationary in all other districts. *Rabi* sowings completed. Watering of crops in progress in Lahore. Rain is urgently wanted throughout the province for the *rabi* crops. Crops reported to be suffering for want of rain in parts of Umballa, Amritsar, and Sialkot. No serious damage has yet been done, but if rain holds off much longer large areas will be injured. Stock cattle healthy. Pasturage or fodder sufficient, except in Hissar, Dera Ismail Khan and in parts of Mooltan, Rawalpindi and Sialkot.

Central Provinces.—*For week ending 16th January, 1889.*—Weather clear. Rain required in northern and eastern districts for winter crops. Linseed injured by insects in Bilaspur. Cattle in fair condition. Prices rising in northern districts.

Burma.—*For week ending 12th January, 1889.*—No rainfall during last week. Crop prospects are good except in parts of Prome and Thayetmyo. The price of paddy has fallen in Akyab, Sandoway, Thôngwa, Amherst, Toungoo, Tavoy, Pakôkku, and Minbu, and risen slightly in Henzada.

Assam.—*For week ending 16th January, 1889.*—Weather seasonable. Slight rain in Assam Valley districts, Sylhet and Garo Hills. Reaping of winter rice almost over; gathering of pulses and mustard commenced in some districts. State of other crops generally good.

Mysore and Coorg.—*For week ending 16th January, 1889.*—Slight rain in parts of Mysore. Crops in good condition. Outturn of crops harvested fair. Water-supply deficient in one taluk of the Mysore district. Prices risen somewhat in the Tumkur district.

In Coorg the weather is favourable for harvesting paddy and the coffee crop.

Berar and Hyderabad.—*For week ending 16th January, 1889.*—In Berar picking of cotton and harvesting of other *kharif* crops still in progress in some parts; outturn of cotton estimated from 12 to 14 annas, *jowari* from 10 to 12 annas. *Rabi* crops promise well. Wheat in ear, linseed in flower, and gram in pod. Cattle healthy. Fodder insufficient in some districts. Prices, same as last week.

No rain during week at Hyderabad. *Rabi* crops thriving. Sowing of *tabi* continues. Scarcity of fodder still felt. Prices stationary.

Central India.—*For week ending 16th January, 1889.*—Bhopawar reports crops suffering from want of winter rain. Report regarding agricultural stock and prospects in Neemuch somewhat better than last week.

Rajputana.—*For week ending 16th January, 1889.*—Agricultural operations satisfactory. Standing crops thriving. Agricultural stock good. Pasturage or fodder sufficient except in Kherwara, Meywar, and parts of Marwar. Prices steady generally.

Nepal.—*For week ending 10th January, 1889.*—No rain. Weather dry; strong winds. Rain needed. Prospects of the crops fair in the valley.

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

HOME DEPARTMENT.

LEVY OF FEES AND TRAVELLING ALLOWANCE FOR THE ATTENDANCE OF REGISTRARS OF BIRTHS AND DEATHS UNDER ACT VI OF 1886 AT PRIVATE RESIDENCES.

No. 1. / 36—48.

Extract from the Proceedings of the Government of India in the Home Department (Judicial), under date, Calcutta, the 17th January 1889.

READ again:—

Home Department Notification No. 1173, dated 19th July 1888, promulgating rules framed under sections 26, 28 and 36 of the Births, Deaths and Marriages Registration Act, VI of 1886.

Read also:—

Letter from the Government of Madras, No. 903, dated the 15th September 1888.

RESOLUTION.

With its letter dated the 15th September last, cited in the preamble to this Resolution, the Government of Madras forwards a copy of a general order of that Government, in paragraph 11 of which it is suggested that, in cases in which a person is unable to attend at the office of the District Registrar and requires his presence at his private residence for the purposes of section 22 of the Births, Deaths and Marriages Registration Act, VI of 1886, the same fees should be charged for such attendance as are levied under section 78 of the Indian Registration Act, 1877. The Governor General in Council observes that, for the purpose of registering births and deaths, Act VI of 1886 contemplates the attendance of parties at a Registrar's Office. If, however, he is requested to attend at a private

residence, His Excellency in Council sees no objection to his doing so if he thinks that course necessary, on payment of a fee for such attendance and of such travelling allowances as may be prescribed under section 78 of the Indian Registration Act, 1877, for similar attendances under that Act. His Excellency in Council is accordingly pleased to direct that a fee of Rs. 10 shall be charged for every attendance at a private residence. In rule 20 of the rules promulgated by Home Department Notification No. 1173, dated the 19th July 1888, it is provided that a register (in the prescribed form) is to be kept of all fees realised under those rules, and that the fees should be credited to Government. The fees referred to in this Resolution should be treated in the same way, but the travelling allowances may be appropriated by the Registrar, who will receive no travelling allowance from Government.

ORDER.—Ordered that this Resolution be communicated to Local Governments and Administrations, to the Foreign Department and to the Department of Finance and Commerce, for information.

Ordered also that it be published in the Supplement to the *Gazette of India*.

(True Extract.)

A. P. MACDONNELL,

Secretary to the Government of India.

No. 4.] CALCUTTA, SATURDAY, JANUARY 26, 1889.

OFFICIAL PAPERS.

A SUPPLEMENT to the GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and prospects of the Crops.

Madras.—*For week ending 19th January, 1889.*—Rainfall very slight in Tanjore and Salem and none elsewhere; more rain wanted in Ganjam and Coimbatore. Standing crops generally good, but damaged by disease or excessive rain in parts of Chingleput, South Arcot and Tinnevelly and withering in Coimbatore. Pasturage generally sufficient, except in parts of Salem and Coimbatore. Agricultural operations progressing. Prices rising in Ganjam and six other districts, falling in eight and stationary elsewhere. General prospects favourable except in Ganjam and Coimbatore. 28,383 labourers on Rushikulya works, Ganjam.

Bombay.—*For week ending 23rd January, 1889.*—Slight rain in parts of Shikarpur. Late crops in Khandesh and Nasik, in one taluka of Poona, three of Surat and almost throughout Ahmednagar and Sholapur unsatisfactory; also cotton in parts of Sholapur and Bijapur, *jowari* in parts of Belgaum and exotic cotton and wheat in parts of Dharwar blighted; grain in one taluka of Ahmedabad injured by insects; *jowari* in two talukas of Ahmednagar by cloudy weather, and late crops in three talukas of Satara by blight and insects; standing crops, including opium in Baroda, otherwise good. Fodder scarce in Khandesh and Nasik and in parts of Hyderabad, Ahmednagar, Baroda, and Kathiawar. Prices rising in two talukas of Nasik.

Bengal.—*For week ending 22nd January, 1889.*—The rainfall reported last week, which extended to places in Western and Eastern Bengal, besides Behar, Chota Nagpore and Central Bengal, though slight and not general, has been useful, in spite of the hail, with which it was attended in Behar. The *rabi* crops are generally promising, but more rain is much needed throughout Chota Nagpore and in some districts in Central Bengal. Poppy and tobacco crops are reported on favourably. Sugarcane, which is being harvested in some districts, is expected to yield a good outturn. *Boro* rice is being transplanted, and is

doing well. Prices of rice and other grains continue to be very high as compared with the past year. No fresh report received concerning the affected tracts in North Behar, which are being personally inspected by His Honour the Lieutenant-Governor. The Collector of Chumparun, however, states that the pressure upon the people is not acute, but is increasing.

North-Western Provinces and Oudh.—*For week ending 23rd January, 1889.*—Weather cloudy. Light showers fell during the week in five districts. Rain is urgently needed everywhere to improve the prospects of the *rabi*. Poppy crop doing well. Irrigation continues. Sugarcane pressing in progress. Markets well supplied. Prices steady. Fodder becoming scarce and dear in places. Cattle healthy except in Kumaon.

Punjab.—*For week ending 23rd January, 1889.*—Slight rain in Rawalpindi and Peshawar. Prices unsettled in Delhi and Peshawar, stationary in all other districts. *Rabi* sowings completed. Watering of crops in progress in Lahore. Rain is urgently wanted throughout the Province. Crops on irrigated lands are reported to be in good condition, but those on unirrigated lands are already injured in many districts from want of rain, and will be much damaged if rain does not fall within the next week. Stock cattle are reported healthy. Fodder sufficient, except in Hissar, Dera Ismail Khan and in parts of Sialkot, Multan and Rawalpindi.

Central Provinces.—*For week ending 23rd January, 1889.*—Weather rather cloudy and warm. Light shower in Jubbulpore District. Wheat and other winter crops below average in Northern districts and in Bilaspur. Elsewhere prospects favourable. Cattle in fair condition.

Burma.—*For week ending 19th January, 1889.*—No rain has fallen during the past week. Crops are generally good, except in parts of Thayetmyo and Prome. The price of paddy has fallen in Akyab, Prome, Henzada, Sagaing, Kyaukse and Magwé and risen in Rangoon, Tharrawaddy, Thôngwa and Moulmein.

Assam.—*For week ending 23rd January, 1889.*—Weather cold. Slight rain in Upper Assam. Harvesting of winter rice nearly finished. Pulses and mustard are being gathered; sugarcane crushed and tea pruned.

Mysore and Coorg.—*For week ending 23rd January, 1889.*— No rain. Standing crops in good condition. Paddy and sugarcane sown in parts. Prospects generally favourable. Water-supply diminishing in parts of two taluks in the Mysore District. No material change in prices.

Rice crop harvested in Coorg. Coffee-picking in progress.

Berar and Hyderabad.—*For week ending 23rd January, 1889.*—Picking of cotton and harvesting of other *kharif* crops nearly over in Berar. *Rabi* crops are doing well. Prospects favourable. Cattle in fair condition. Fodder insufficient in some districts. Prices stationary.

No rain in Hyderabad. *Rabi* crops thriving; *tabi* sowings continue; scarcity of fodder still felt. Prices stationary.

Central India.—*For week ending 23rd January, 1889.*—The report from Bhopal this week shows rain wanted in the Bhilsa district. Standing crops and probable cutturn only fair. Prices of food-grains fallen in Dhar and risen elsewhere in Bhopawar agency.

Rajputana.—*For week ending 23rd January, 1889.*—Agricultural operations satisfactory. Standing crops thriving, but wheat withering in Kotah for want of rain. Agricultural stock good. Pasturage or fodder sufficient, except in Marwar, Kherwara, Meywar and Dholepore. Prices steady generally except in Marwar. Opium satisfactory. Cotton fair.

Nepal.—*For week ending 17th January, 1889.*—Showers fell during the week. Weather chilly and cloudy at times. Dry winds in the morning and evening. Prospects improved in the valley.

E. C. BUCK,
Secretary to the Government of India.

SUPPLEMENT TO

The Gazette of India.

No. 5.] CALCUTTA, SATURDAY, FEBRUARY 2, 1889.

OFFICIAL PAPERS.

A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.

Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.

PUBLIC WORKS DEPARTMENT.

ACCOUNT.

Establishment.

RECRUITMENT OF THE SUPERIOR AND SUBORDINATE DIVISIONS OF THE ACCOUNTS BRANCH OF THE PUBLIC WORKS DEPARTMENT.

No. 19 A.—E., Calcutta, the 25th January 1889.

RESOLUTION—By the Government of India, Public Works Department.

Read the following:—

Home Department Office Memorandum No. 633, dated 16th March 1888.
Report of the Public Service Commission, Chapter X, paras. 99 and 100.
Public Works Department Code, Volume I, Chapter II, paras. 52 to 62.
Report, dated 3rd October 1888, of a Committee appointed to revise the subjects of examination for entrance to the Superior and Subordinate Divisions of the Accounts Branch, Public Works Department.

OBSERVATIONS.—The Government of India has had under consideration the Report of the Public Service Commission on the Accounts Branch of the Public Works Department, in which the opinion is expressed that the present system of recruitment for this Branch of the service is unsatisfactory. The recruitment hitherto has generally been—

(1) by transfer of Officers (Military and Civil) from the Engineer Establishment of the Public Works Department;
(2) by promotion of selected Accountants from the Subordinate service; and
(3) by appointment of nominated candidates outside the service, who have passed a prescribed entrance examination.

The Public Service Commission considered that the number of Engineers and Military Officers already employed was excessive; and recommended certain alterations in the mode of recruitment of outside candidates.

2. The transfer of Military Officers to the Accounts Branch, except under special circumstances, has already been stopped; and it is expected that the transfer of Civil Engineers to that Branch will also become exceptional when the present surplus staff of Engineers has disappeared.

3. A Committee was appointed to work out the details of a revised scheme for the examinations qualifying for appointment to the Accounts Branch, both Superior and Subordinate, and, with certain modifications, the Government of India is pleased to accept its recommendations.

RESOLUTION.—The Government of India is now pleased to lay down the following general rules on the subject of the future recruitment for the Superior service of the Accounts Branch of the Department:—

I.—Appointments will be made mainly from successful candidates in a nominated (not open) competitive examination, and occasionally from senior Accountants as instanced in Public Works Department Code, Volume I, Chapter II, para. 59.

II.—Nominations to the competitive examination will, as now, rest with the Accountant General, on the conditions laid down in Public Works Code, Volume I, Appendix C, paras. 1 to 5, except that the maximum age in para. 4 will be increased to 23 years, and that the number of candidates nominated will be at least three for each vacancy.

III.—The Accountant General will submit annually to the Government of India, early in January, a report stating which, if any, of the Accountants in the Subordinate service he recommends for promotion, on approval, to the Superior service.

IV.—After orders have been passed on that report an advertisement will be issued in the *Gazette of India* about the beginning of February, stating the number of vacancies to be competed for at the next examination.

V.—The candidates who pass the examination will be appointed Apprentice Examiners, in order of merit, and to the extent of the number of vacancies announced for competition. With respect to confirmation and subsequent promotion, they will be subject to the conditions laid down in Public Works Code, Volume I, Chapter II, paras. 52 and 54.

2. The examination for appointment to the Superior Accounts Branch will, in future, be in two parts, preliminary and general, as detailed in the accompanying Appendix. The preliminary examination is meant to be a test of hand-writing and of knowledge of Arithmetic and Hindustani, and candidates failing to pass this test will be debarred from appearing at the general examination.

3. The examination will be held by the Principal of the Thomason Civil Engineering College, Rurki. Candidates whose names have already been registered for examination should, accordingly, be instructed to communicate with that Officer and to state what subjects in groups IV and V they propose to take up. An examination fee of Rs. 32 should, at the same time, be remitted by each candidate to the Principal.

4. A notification will issue subsequently prescribing the date and locality of the examinations.

5. The limitation of age to 23 years will not apply to any candidates whose names may have been registered before this date for the next examination, and who may be above the prescribed age when it is held.

6. The only modification considered necessary in the entrance examination for the Subordinate Division is to make it competitive. This is explained in the last paragraph of the Appendix to this Resolution. The examination will continue to be conducted as at present ordered.

7. The Government of India desires to acknowledge the promptness and completeness with which the Committee,* referred to in para. 3 of the preamble, have carried out the work entrusted to them.

* Mr. R. Logan, C.S
„ T. C. Lewis.
„ R. B. Buckley.
„ R. G. Macdonald.

ORDER.—Ordered, that this Resolution be forwarded to the Local Governments and Administrations and Officers noted on the margin, for information, and that it be published in the *Gazette of India*.

The Governments of Madras, Bombay, Bengal, the North-Western Provinces and Oudh, and the Punjab.
The Chief Commissioners, Central Provinces, Burma, Assam, and Coorg.
The Resident at Hyderabad.
The Resident at Mysore (through Foreign Department).
The Agents to the Governor General for Central India, Rajputana, and Biluchistan.
The Superintendent of Port Blair and Chief Commissioner, Andaman and Nicobar Islands.
The Director General of Telegraphs.
The Director General of Railways.
The Consulting Engineers to the Government of India for Railways, Calcutta, Lucknow, and Central Division.
The Comptroller General.
The Accountant General, Bengal.

Also to the Department of Finance and Commerce for information.

Also to the Accountant General, Public Works Department, for further necessary action.

R. C. B. PEMBERTON, *Colonel, R.E.*,
Secretary to the Govt. of India.

Document accompanying.
Appendix.

Appendix to Public Works Department Resolution No. 19 A.—E., dated 25th January 1889.

Entrance examinations for appointment to the Superior and Subordinate Accounts Branches of the Public Works Department.

SUPERIOR DIVISION.

Preliminary test.

Handwriting—

The candidate will be required to write a short passage of English from dictation, and also to copy two octavo pages of ordinary printed matter, the time allowed for the latter being 45 minutes, and for the whole examination 1 hour.
The tests will be clearness and rapidity.

Arithmetic—(to cover the whole subject).—One paper.

Text-books.—Lock's Arithmetic for schools, or Barnard Smith's Arithmetic.

Note.—Solutions by Algebraical methods will be accepted.

Mental Arithmetic.—One paper.

Hindustani—

(*a*) Translation into English of an easy Hindustani passage printed in Roman character.
(*b*) Translation into Hindustani of easy English sentences. If Persian or Nagri characters are not used the Hunterian system of spelling must be followed.
(*c*) Oral replies to grammatical questions given in English by the Examiner.
(*d*) Conversation in Hindustani with an educated native on ordinary subjects.

To pass in the preliminary test a candidate must obtain 75 per cent. of the total marks in each of the subjects.

General competitive test.

Groups of subjects.

I.—English.
II.—Mathematics.
III.—Book-keeping.
Also, not more than two subjects to be selected out of groups IV and V.
IV.—Latin, Sanskrit, Arabic, Persian, French and German.
V.—Physics or Chemistry.

The subjects and marks to be :—

Groups.	Subjects.	Particulars.	Marks.
I	English . . .	2 papers on the text-books—500 marks for each paper	1,000
		1 Essay paper	500
			1,500
II	Mathematics . .	Euclid, Algebra, and Plane Trigonometry—2 papers,—750 marks each . .	1,500
		Conic Sections, Statics, Dynamics and Hydrostatics—1 paper	750
			2,250
III	Book-keeping . .	1 paper on general subjects . . .	250
IV	Languages . . .	1 paper on the system of ordinary Public Works Accounts as prescribed in the Code	250
V	Physics and Chemistry	1 paper in each language,—500 marks each .	1,000
		1 paper on each subject,—500 marks each subject	
		TOTAL .	5,250

In the English papers half of the marks given to each question will be awarded for correct English used in answering it.

No candidate will be eligible for appointment who fails to get 40 per cent. of the marks in each of the subjects in groups I and papers 1 and 2 of group II, or be allowed to count marks in any subject in which he fails to get 25 per cent. of the maximum.

The standards and text-books will be as follows; the text-books being changed when necessary:

English text-books.

1. A recent History of England—Molesworth's History of England (1830-74).
2. A book about India—Sir W. W. Hunter's Indian Empire (Trübner's Oriental Series).
3. A. Marshall's Economics of Industry.
4. Huxley's Physiography.

English Essay.

Several subjects to be given, out of which the candidate must select one, such subjects being selected from the text-books.

Mathematics.

Paper I.—Euclid and Algebra.

Euclid—Books I to IV, VI, XI to proposition 21, with definitions of Book V, also easy deductions.

Algebra—including progressions, permutations and combinations, binomial, and exponential theorems, logarithms and logarithmic series.

Text-book—Todhunter's Algebra.

Paper II.—Plane Trigonometry—As far as solution of triangles, properties of triangles, and area of circle.

Text-book—Todhunter's Plane Trigonometry.

Elementary mensuration—No special text-book.

Paper III.—Geometrical Conic Sections (the Parabola and Ellipse).

Statics, Dynamics, and Hydrostatics, treated mathematically, but without the aid of the Differential and Integral Calculus.

Text-books—Drew's Geometrical Treatise on Conic Sections.
Wilson's Elementary Statics (or any other).
Garnett's Elementary Dynamics.
Besant's or Babu S. B. Mukerjee's Elementary Hydrostatics.

Book-keeping.

One paper to cover whole subject.

Text-books.—Ball and Hamilton, and W. Inglis.

One paper on ordinary Public Works accounts—
Public Works Department Code, Volume I, Chapter XII.

I.—Latin.

Horace—Odes I & II.
Cicero—De Oratore I.
Livy—XXI and XXII.
Gow's Companion to School Classics.
} Text-books.

II.—Sánskrit.

Bánabhatta—Kádambari Uttarbhága, page 85 to end, in Calcutta edition of Samvat 1919 . . . . .
Bháravi—Kirátárjuniya, Cantos I—III . . . .
Sakuntalá.
Also Sayce's Principles of Comparative Philology . . .
} Ditto.

III.—Arabic.

1. Arabic (B.A. Course of Punjab University).
2. Hamasa, 31 pages (Urdu Guide Press).

E. W. Lane's Arabian Society in Middle Ages [Studies of "Thousand and One Nights."] Publisher, Allen & Co.
} Ditto.

IV.—Persian.

1. Persian (B.A. Course of Punjab University).
2. Shah Namah, first 50 pages, Macan's Calcutta edition.
3. Firoz Shahi, first 50 pages, Asiatic Society's edition.

Geiger's Civilisation of Eastern Iranians in Ancient Times, Vol. I, Ethnography and Social Life (Translated). Clarendon Press.
} Ditto.

V and VI.

French and German.

If any candidates appear in these subjects, papers will be set containing passages in prose and verse by modern authors, and idiomatic phrases for translation into English, and similar English prose passages and idiomatic phrases for translation into French and German. Specimen papers showing the nature of the examination will be supplied on application.

***Physics*—2 papers.**

* Deschanel's Natural Philosophy . . . . . .
* S. P. Thompson's Elementary Lessons in Electricity and Magnetism.
Jevons' Principles of Science, 2nd edition, omitting Books I and II.
} Ditto.

Chemistry—2 papers.

Frankland and Japp's Inorganic Chemistry, edition 1884, omitting all the sections in small type, and the parts relating to the following elements :—Zirconium, Thorium, Niobium, Tantalum, Beryllium, Palladium, Iridium, Rhodium, Osmium, Ruthenium, Norwegium, Cerium, Didymium, Lanthanum, Yttrium, Erbium, Terbium, Scandium, Samarium, and Decipium.
Remsen's Organic Chemistry . . . . . .
Jevons' Principles of Science, 2nd edition, omitting Books I and II.
} Ditto.

SUBORDINATE DIVISION.

The examination prescribed in paragraph 18 of Appendix C, Volume I of the Public Works Department Code, will be continued, but, in future, this examination will be a competitive one, conducted by the Rurki, Seebpore, Madras and Poona Colleges, for a place on the Accountant General's list of selected candidates. This list will be circulated to Examiners by the Accountant General, and appointments will be made by Examiners only from persons whose names are on this register.

* NOTE.—It is probable that Daniell's Text Book of the Principles of Physics will be shortly substituted for these two books.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and prospects of the Crops.

Madras.—*For week ending 26th January, 1889.*—No rain. More rain wanted in Ganjam, Tinnevelly, Coimbatore, and Salem. Standing crops generally good, but withering in Coimbatore and parts of Bellary, and suffering from want of water in parts of Ganjam, Vizagapatam, Cuddapah, Chingleput, and from disease in South Arcot. Pasture generally sufficient except in parts of Salem and Coimbatore. Agricultural operations progressing. Prices rising in nine districts, including five northern, falling in six, and stationary elsewhere. General prospects favourable except in Ganjam and Coimbatore. Laborers on Gopalpore canal and Rushikulya works, Ganjam, 2,900 and 30,853, respectively.

Bombay.—*For week ending 30th January, 1889.*—Rain in parts of Sind. Late crops in three talukas of Surat, two of Poona, and in parts of Khandesh, Ahmednagar, and Sholapur unsatisfactory. Gram in one taluka of Ahmedabad damaged by insects, and late crops in three talukas of Satara by insects and blight. Cotton in parts of Sholapur and Bijapur. *Jowari* in parts of Belgaum and exotic cotton and wheat in parts of Dharwar blighted; standing crops including opium in Baroda otherwise good except wheat in Broach. Probable outturn of cotton in Broach from ten to twelve annas. Fodder scarce in parts of Khandesh and Kathiawar. Prices rising in three talukas of Nasik.

Bengal.—*For week ending 29th January, 1889.*—Slight rain fell on the 24th instant in Behar and North Bengal, and in a few places in Chota Nagpur and Central Bengal. Yesterday morning (30th) there was a smart shower, with high wind, in and around Calcutta. The *rabi* crops are generally reported to be fair, but in Chota Nagpur and parts of Central Bengal the prospects are not very hopeful on account of want of sufficient rain. Spring rice is still being transplanted and is doing well. Poppy and tobacco crops are reported on satisfactorily, and sugarcane, which is being harvested in some districts, is expected to yield a fair outturn on the whole. The latest report regarding the affected tracts in the Patna Division shows that the rain of the 24th instant has done some good to the scanty *rabi* crops; that grain stocks are everywhere sufficient and prices are fairly stationary; that the number of persons on relief works is steadily increasing; and that gratuitous relief has been given to a few persons only in the districts of Mozufferpore and Durbhanga.

North-Western Provinces and Oudh.—*For week ending 30th January, 1889.*—Rain has fallen in nearly all districts, greatly improving the prospects of the *rabi* crops, but more is still needed. Poppy is doing well. Sugarcane being pressed. Markets well stocked. Prices steady. Condition of cattle satisfactory.

Punjab.—*For week ending 30th January, 1889.*—Rainfall good and general throughout the province; though no rain is reported from Rawalpindi and Shahpur, it is believed that rain has fallen there. Prices rising in Sialkot and Rawalpindi, unsettled in Delhi, and stationary elsewhere. *Rabi* sowings completed. Watering of crops in Lahore. More rain is wanted in Hissar, Umballa, and Mooltan. The crops have been generally improved by the recent rain, but those on unirrigated lands are reported to be slightly damaged by previous want of rain. Stock cattle are reported healthy. Pasturage or fodder sufficient, except in Hissar, Mooltan, Dera Ismail Khan, and in parts of Rawalpindi.

Central Provinces.—*For week ending 30th January, 1889.*—Slight rain in northern districts, but not sufficient to benefit winter crops which are below average in Nagpur and Chattisgarh, elsewhere they are favourable. Cattle in fair condition.

Burma.—*For week ending 26th January, 1889.*—A little rain has fallen in Tavoy. Prospects are favourable on the whole. There is scarcely any alteration in the price of paddy since last week.

Assam.—*For week ending 30th January, 1889.*—Weather warm at Dibrugarh, normal elsewhere. Slight rain in most districts. Reaping of winter rice finished; pulses and mustard are still being gathered and sugarcane being pressed. Sowing of early rice begun. Potatoes being sown in the Khasi Hills.

Mysore and Coorg.—*For week ending 30th January, 1889.*—No rain. Crops in good condition. Outturn of crops harvested generally favourable. Water-supply ample except in one taluk of the Mysore District. Prices slightly risen in the Tumkur District.

Coffee-picking nearly completed in Coorg.

Berar and Hyderabad.—*For week ending 30th January, 1889.*—Picking of cotton and harvesting of other *kharif* crops almost completed. *Rabi* crops are thriving. Prospects unchanged. Agricultural stock good. Fodder insufficient in some districts. Prices steady.

No rain during the week in Hyderabad *Rabi* crops thriving. Sowing of *tabi* nearly finished. Scarcity of fodder still felt. Prices stationary.

Central India.—*For week ending 30th January, 1889.*—Slight rain in Gwalior, Bundelkhund, Baghelkhund, and Goona. Weather cloudy with high wind at Indore. Crops in Goona damaged by hail and want of rain. Prices of food-grains rising in Neemuch.

Rajputana.—*For week ending 30th January, 1889.*—Slight rain at many places. Agricultural operations satisfactory. Standing crops thriving. Agricultural stock good. Pasturage or fodder sufficient except in Marwar, Kherwara, Meywar, and Dholpur. Prices rising in Meywar, steady elsewhere. Opium and cotton fair.

Nepal.—*For week ending 24th January, 1889.*—Slight rain. Weather fair. Prospects good.

Telegraph.

ADMINISTRATION REPORT OF THE INDIAN TELEGRAPH DEPARTMENT FOR THE YEAR 1887-88.

No. 30 T., dated Calcutta, the 1st February 1889.

RESOLUTION—By the Government of India, Public Works Department.

Read—

Letter from the Director General of Telegraphs, No. 476 T., dated 12th November 1888, and its enclosure, the Administration Report of the Indian Telegraph Department for the year 1887-88.

OBSERVATIONS.—The Government of India notices with satisfaction that Colonel Mallock, the Officiating Director General of Telegraphs, submitted the Administration Report of the Telegraph Department for 1887-88 on the 12th November 1888; this is more than a month earlier than it was received last year, and is the earliest date on which the report has ever been submitted to Government.

2. The Telegraph Department of India had, up to the 15th February 1888, administered only the lines of telegraph situated within India itself, including Burma and Baluchistan; but on the date mentioned the Department undertook the administration of the telegraph lines and cables extending from Karachi to Teheran in Persia, which had formerly been administered by a Director-in-Chief whose head-quarters were in London. The accounts of this system are not, however, included in the present report.

3. The Capital expenditure of the year in the Indian Telegraph Department was Rs. 23,49,550, as given in the following statement :—

	Expenditure of the year.	
	1887-88.	Expenditure to end of the year 1887-88.
	Rs.	Rs.
Lines	17,16,626	3,22,63,581
Buildings	2,11,243	51,36,797
Tools and Plant	92,352	17,12,614
Stores, Exchange and suspense heads	3,29,929	36,64,591
Total	23,19,550	4,27,77,583

It is necessary to bear in mind with reference to this statement of the Capital Account of the Department that it is not an absolutely correct one from a purely financial point of view. The capital expenditure to date, Rs. 4,27,77,583, does not represent the total sum of money which has been actually expended on the construction of telegraph lines in India. The cost of experimental lines, abandoned lines, and of outlay incurred upon the lines and offices not now working, has been excluded from the capital sum of 428 lakhs.

4. The capital expenditure of the year was mainly incurred on new lines and wires for departmental purposes; 5,014 miles of wire and cable having been constructed. The principal works which fell under this head are enumerated in pages 21 to 23 of the report, the most important being an additional wire from Hyderabad (Deccan) to Bezwada, a wire from Multan *viâ* Sukkur and Sibi to Quetta, and a line connecting Assam *viâ* Manipur and the Kubo Valley with Upper Burma. In addition to purely departmental lines, 1,634 miles of wire and cable were constructed specially for Railways and were rented to them. The working of the last few years of the telegraph lines has shown that the trunk lines are now nearly taxed to their full power by the traffic which has been thrown upon them by the large number of branch telegraph lines and offices which have been established. Further capital expenditure will be devoted rather to strengthening these over-taxed lines than to opening new branches and feeders. A large demand for expenditure on strengthening the trunk lines has been already submitted by the Director General of Telegraphs to the Government of India.

5. The extensions made in the Telegraphic system of India in the year 1887-88 are expressed by the following figures :—

	At end of 1886-87.	At end of 1887-88.	Increase.
Miles of line	30,035	31,894	1,859
Miles of wire and cable	87,087	93,743	6,656
Number of Signal Offices	699	745	46

These extensions fall, on the whole, slightly below the average of the previous three years. A large proportion of the wires owned by the Telegraph Department are specially provided for State and Guaranteed Railways for their exclusive use ; 32,959 miles out of the total of 93,743 are special wires rented to the Railways. The extensions of the year were larger than usual in Departmental wires and smaller in Railway ones.

6. The following statement shows the working expenses of the year :—

	1886-87.	1887-88.	Increase.
	Rs.	Rs.	Rs.
Working expenses	41,21,873	42,92,248	1,70,375

7. The most noticeable increases are under the head of "Direction, Superintendence and Accounts," Rs. 89,714; under "Line Maintenance and Establishment," Rs. 42,163; under "Departmental signal offices," Rs. 1,19,953; and under "Stationery and Printed Forms," Rs. 41,085. The increase under the first head is not explained in the report, but is understood to be mainly due to the re-organisation of the Superior Establishment of the Telegraph Department, which was carried out with the object of ameliorating the position of those Officers in the Department who had suffered from the block in promotion. The increase under the second head is probably due to increase in the mileage to be maintained particularly in Burma. The increase under the third head is 5·5 per cent., while the number of signal offices increased by 6·6 per cent., and this rise is, therefore, moderate. Under the last head the increase is stated to be due partly to the increased number of printed forms used, and partly to a replenishment of the reserve stock of stationery and forms. It should be noted that the expenditure here shewn includes outlay incurred in the Public Works Department on the construction and repair of buildings which, as well as the cost of stationery, is not shewn against the Telegraph Department in the Finance Accounts.

There have, on the other hand, been decreases in the Working Expenses under the head of "Repairs to Lines." The expenditure under this head is subject to considerable fluctuation, mainly on account of the varying amount of damage done by floods and storms. The expenditure of 1887-88 was about 1¼ lakhs less than in 1886-87, but about 1½ lakhs more than in the previous year.

8. The following statement shews the receipts of the year under review, and differs sligthly from the Finance Accounts of the year, as being the earnings rather than the actual receipts of the Department :—

	Rs.
Receipts	66,28,660
Working expenses (see para. 6 above)	42,92,248
Net Revenue	23,36,412

9. In the year 1883-84 the net Revenue was Rs. 3,80,078, which was only 1·19 per cent. of the Capital at that time. The rapid improvement which has taken place in the last four years is due not merely to the increase in receipts (which has, however, been large), but also to the very small increase which has taken place in the working expenses. Thus—

	Receipts.	Working Expenses.	Net Revenue.
	Rs.	Rs.	Rs.
1883-84	41,24,264	37,44,186	3,80,078
1887-88	66,28,660	42,92,248	23,36,412

The receipts have increased by 25 lakhs, but the working expenses have only increased by 5½ lakhs. The working expenses of the Telegraph Department are primarily divided into the two main heads—"Line Maintenance"

and "Signalling." The following statement shews the expenditure under these heads for the years mentioned :—

Year.	Number of messages dealt with.	Number of miles of wire and cable, including Railway wires.	Working Expenses.		Cost of "Line Maintenance" per mile of wire.	Cost of "Signalling" per message dealt with.
			Line Maintenance.	Signalling.		
			Rs.	Rs.	Rs.	Rs.
1883-84 . .	1,818,886	68,829	11,70,128	25,74,058	17·0	1·4
1887-88 . .	2,804,485	93,743	12,08,480	30,83,768	12·89	1·1

The amounts expended both on "Line Maintenance" and on "Signalling" are largely composed of the cost of establishments which are permanently entertained. The figures in the above statement seem to shew that in 1888 it was possible to deal with a much larger message traffic without any sensible addition to the working expenses, or, in other words, that a considerable proportion of the establishments were formerly working below their real power.

The net Revenue of the year was 5·46 per cent. on the capital of Rs. 4,27,77,583. It is again the largest which has been recorded, and is more than fifty per cent. in excess of the average of the previous three years. It must, however, be remembered that the gross receipts of Rs. 66,28,660 include Rs. 17,07,657 for State messages, which are payments from the State back to itself, and Rs. 34,522, the amount which might have been charged for messages which were sent free of charge, such as reports of the arrival of Mail Steamers: if these receipts are excluded from the account the net revenue is reduced to Rs. 5,94,234 and the interest on capital to 1·39 per cent.

10. The receipts of the Department consist mainly in message revenue and in receipts from State Railways for wires rented; the figures of the two years which have been selected are shown below :—

	State messages.	Private messages.	Claims from State Railways.	Other sources of revenue, including credit taken for value of free messages.	Total.
	Rs.	Rs.	Rs.	Rs.	Rs.
1883-84	5,06,239	27,05,131	5,89,813	3,23,081	41,24,264
1887-88	17,07,657	34,60,339	11,47,983	3,12,681	66,28,660
Increase in four years .	12,01,418	7,55,208	5,58,170	—10,400	25,04,396

The number of messages sent during the year was a little over two million eight hundred thousand. This number is 11·55 per cent. larger than in the previous year. The number of State telegrams was again in excess of the unprecedented figures of the previous year, but it is satisfactory to notice that there was generally a more extended use of "Deferred" State telegrams and a reduction in their length in all parts of India except in Upper Burma, where the rather extravagant use of State telegrams was unchecked during 1887-88. On this point the Director General of Telegraphs writes :—

"It may be added that since the 1st April 1888, the number and value of State telegrams sent from Upper Burma have fallen considerably, due, no doubt, to a great extent to the enforcement from that date of the rule requiring all such telegrams to be prepaid. During the first three months of the current year the number of telegrams sent was at the rate of less than half the number sent in 1886-87, and the average value of each was only Rs. 2·4.

After making due allowance for the more settled state of the province, these results shew that the rule regarding prepayment of State telegrams by officials acts as a most salutary check on an undue use of the wires to the detriment of the paying public."

The Foreign State messages showed a slight decrease as compared with the previous year.

11. It is interesting to notice how largely political affairs influence the financial results of the Indian Telegraph Department. The following statement shows the number and value of Inland State messages in 1887-88 :—

Telegraph Division.	Number of messages.	Value of messages.
		Rs.
Upper Burma	169,084	8,18,776
Lower Burma	47,255	1,67,979
Punjab	80,326	1,97,445
Bengal	43,701	95,377
Thirteen other Divisions	196,827	3,66,220
Total Inland State Messages .	537,193	16,45,797

The location of the Government of India at Simla and Calcutta explains the excess of the State messages in the Punjab and Bengal as compared with all other provinces except Upper Burma. The figures which refer to Burma show the very free use which is made of the telegraph lines in that province. Considerably more than half the entire State message revenue of the whole of India is due to Burma alone. When a normal condition of affairs is established in Burma, the Inland State message revenue should fall to about seven or eight lakhs of rupees yearly, which is somewhat more than the average before the operations in Burma were undertaken. This change would at once reduce the net revenue of the Telegraph Department from 5½ to a little over 3 per cent. on the Capital invested.

12. The State messages from which a gross revenue of Rs. 17,07,657 was derived were divided between Inland and Foreign thus :—

	Number.	Value.
		Rs.
State, Inland	537,193	16,45,797
„ Foreign	6,286	64,268
Total State .	543,479	17,10,065

In order to make these figures agree with those given in para. 10 of this Resolution, it is necessary to deduct certain messages of which the receipts (Rs. 2,409) are credited to Provincial Revenues. State messages showed an increase under the head of "Deferred" messages as compared with "Urgent" ones, a larger proportion of the former class having been used.

Similarly, the Private messages from which a revenue of Rs. 34,60,339 was derived were divided thus—

	Number.	Value.
		Rs.
Private, Inland	1,860,890	19,81,814
„ Foreign	403,748	14,81,166
Total Private .	2,264,138	34,62,980

The messages included in these figures, which were credited to Provincial Revenues, were 2,385 in number and Rs. 2,640 in value. The proportion of "Private" messages sent as "Deferred," and the proportion of those sent "Urgent" both decreased during the year, with a corresponding increase in the proportion of "Ordinary" ones.

13. The average length of inland private telegrams in all classes remains very constant at a little over ten chargeable words, exclusive of the address which is not taken into account in India. The average charge is about Rs. 1·1 per message. The privilege of a free address is one which has been with-

drawn in England, and the principle that senders should be fully charged for the amount of work involved—that is that the address should be charged for—is now generally adopted in Europe. A free address was adopted in India in 1872, mainly because it was found that senders would not pay for a sufficient address. In comparing the India tariff with that of other countries, it is necessary to remember that the address, which is not paid for, is often longer than the body of the message itself.

14. The following statement shows the progress of private traffic as compared with the increased number of offices :—

	Departmental and Combined Signal Offices.		Inland Private Messages.			
	Number open.	Percentage of increase compared with previous year.	Number.	Percentage of increase in number compared with previous year.	Value.	Percentage of increase in value as compared with previous year.
					Rs.	
1883-84 . .	349	11·14	1,236,140	3·92	14,15,754	2·10
1884-85 . .	521	49·28	1,364,814	10·40	15,04,633	6·27
1885-86 . .	634	21·68	1,527,990	11·95	16,38,165	8·87
1886-87 . .	699	10·25	1,683,758	10·19	18,17,798	10·96
1887-88 . .	745	6·58	1,860,390	10·49	19,81,814	9·02

The facilities offered by the Telegraph system may be roughly gauged by the figures in the columns of the statement in paragraph 9, which shows the increase in the number of miles of wires, and by the figures in the second column of the table in this paragraph, which show the increase in the number of signal offices. The increase in the revenue derived from Private messages hardly keeps pace with the increase in those facilities, while the revenue from State messages increases in a much more rapid ratio. The number of Signal Offices has increased since 1883-84 by 113 per cent., the State message revenue by 240 per cent., and the Private message revenue by 40 per cent.

15. Although the progress made in the development of the Inland private message traffic has been rather slow in comparison with the facilities afforded, this class of traffic has steadily increased during the last six years. It is impossible to determine whether this increase is primarily due to the new tariff, which was introduced in 1882, or to the large increase in the mileage of wires and in the number of offices, or to progress on the part of the people. Probably all these causes have tended in different degrees to produce the effect. It is, however, a fact that previously to the introduction of the new tariff in 1882, Inland private messages had for five years shown a tendency to decrease in number, and had actually decreased largely in value, whereas since 1882 the increase, both in number and value, has been progressive. This fact seems to shew that the tariff has been successful, both financially and administratively, and has had its share, along with the other causes named, in producing the increase which has occurred.

16. During the year under review there was a large increase of nearly three lakhs of rupees, or about 40 per cent. in the revenue derived from State Railways; this was due partly to the extension of the wires routed to railways, but chiefly to the introduction of higher rates which it was found necessary to impose, the rates previously in force having been proved to be too low.

17. Private foreign messages increased 7·98 per cent. in number and 12·78 per cent. in value as compared with the previous year; this was a rather larger increase than is usual in this class of traffic. Foreign State messages showed a decrease of 8·87 per cent. in number and 18·12 per cent. in value. The revenue shewn in the Report as received on account of these messages is only about one-ninth of the total cost to the senders, the remainder being credited to the Administrations which carry the messages beyond Indian limits.

18. The speed of transmission of telegrams over all the main routes continues to improve considerably in spite of the increase in the number of messages sent. There was a material increase in speed in the year under review on all lines, except two, as compared with the speed in the previous year: "Ordinary" and "Urgent" messages are now transmitted in about two-thirds of the time which was taken in sending them five years ago. The actual average time in transmission of all foreign messages between Bombay and Madras for the six months ending 31st March last was a few seconds over nine minutes.

19. The rules for Telegraphic money orders were simplified, and the charges reduced from the 1st January 1887. The result has been a very large extension of remittances by this system. During the three months, January, February and March 1887, the number of advices was 2,379 in each month; during the year under review the number increased to an average of 3,868.

20. There were rather more interruptions than usual in the lines and offices, but the average duration of the interruptions was considerably smallar than in the previous year. In Bengal much damage was done to the lines by exceptional storms in May and June; the same cause produced similar results in the neighbourhood of Rangoon. Forty-four faults in Upper Burma were due to the lines being cut by dacoits. An abnormal rise in the Pudda River near Goalundo caused the destruction of two of the four cables in the Calcutta-Rangoon line which crossed the river at that place. The Superintendent of the Dacca Division and his staff deserve credit for the efficient work they performed in saving two of the four cables, and in making temporary arrangements for passing messages across the river.

21. A new line of communication between Upper Burma and India was established during the year by the completion of the line from Assam *viâ* Manipur, Tammu, Kendat, the Chindwin Valley, and Ava to Mandalay. The line is not at present much used as it is liable to interruption in parts; but in time this route will be a valuable alternative route to Upper Burma. It is also important in view of the possible connection of the Burmese Telegraph lines with those of China. There has been marked progress in the construction of telegraph lines in China during the year. The Northern line from Shanghai through the provinces of Hupé and Szechneu was completed to Yunnan, and three offices have been opened in that province which is partly conterminous with the British Frontier of Upper Burma. A comparatively short distance now intervenes between the Chinese lines and the extremity of the India Telegraph system at Bhamo.

22. The operations of the Telephone Companies at Bombay, Calcutta, Karachi, Madras, Moulmein and Rangoon shewed a small increase in revenue and in the number of private lines; but the number of subscribers and exchange connections decreased.

23. The Government of India desires again to acknowledge the excellent services which Sir A. J. Leppoc Cappel, the Director General of Telegraphs, has rendered to the Government during the past year.

Order.—Ordered, that a copy of this Resolution, and of the report, be forwarded to the Secretary of State and to the Local Governments and Administrations noted on the margin, and to the Government of Ceylon and the Commissioner in Sind.

The Governments of Madras, Bombay, Bengal, the North-Western Provinces and Oudh, and the Punjab.
The Chief Commissioners of the Central Provinces, Burma, and Assam.
The Resident at Hyderabad.
The Agents to the Governor General for Central India, Rajputana, and Baluchistan.

Also to the Foreign Department for communication to the Residents at Mysore and Coorg.

Also that a copy of this Resolution be forwarded to the Director General of Telegraphs for information.

Also that a copy of this Resolution and of the Report and Appendices A, B, and F be forwarded to the Home Department of the Government of India for information, and be published in the *Gazette of India*.

R. C. B. PEMBERTON, *Colonel, R.E.*,
Secretary to the Govt. of India.

ADMINISTRATION REPORT

OF THE

INDIAN TELEGRAPH DEPARTMENT

FOR

1887-88.

1.—GENERAL REVIEW.

The most important event of the year was the transfer, on the 15th February 1888, to the charge of the Director General of the Indian Telegraph Department, of the Indo-European Telegraph Department, which had hitherto been administered by a Director-in-Chief, whose head-quarters were in London.

2. In order to render the financial results of each department comparable with those of previous years, the Administration Reports must be written separately; and it is only here desirable to refer to the Indo-European Department so far as to show how the finances of the country are affected by the two combined.

The following summary exhibits the gross capital of the two Departments to the end of the year under review, and the receipts, expenditure, and profit for the year:—

Department.	Capital to the end of the year.	1887-88.			
		Revenue Receipts.	Revenue Expenditure.	Profit.	Profit per cent.
	₹	₹	₹	₹	₹
Indian	4,27,77,583	65,28,660	42,92,248	23,36,412	5·46
Indo-European	1,12,81,595	10,35,237	8,36,856	1,98,381	1·75
TOTAL	5,40,59,178	76,63,897	51,29,104	25,34,793	4·69

It should be here noted that the "Receipts" for both Departments include the value of Government Service telegrams.

3. The remainder of this Report deals with the Indian Department alone.

Appendix A. Para. 14.

4. Finance.—The Total Capital expenditure to the end of the year is ₹4,27,77,583. The Revenue of the year amounts to ₹66,28,660, and the expenditure was ₹42,92,248, leaving a surplus of ₹23,36,412, which is equal to 5·46 per cent. on the Capital.

Omitting the *pro formâ* revenue, and the value of the messages despatched on the service of Government, the surplus is reduced to ₹5,94,234 and the interest on Capital to ₹1·39.

Para. 16.

5. Message Traffic.—2,807,617 paid telegrams were despatched against 2,516,826 in 1886-87—an increase of 290,791; of which increase, 206,487 were private and 84,304 State. As is shewn in this report, a considerable amount of the increased traffic of late years is due to the large number of branch telegraph lines and offices which have been established. These feeders all bring work on to the main line wires, which are now taxed nearly to their full capacity; and a

Paras. 23 and 57.

considerable increase to the trunk wires will shortly be inevitable to enable the growing traffic to be satisfactorily dealt with.

6. Message Revenue.—This revenue amounted to ₹51,73,045 (including ₹5,049 credited to Provincial offices), showing an increase over 1886-87 of ₹3,42,806; of which ₹10,945 was for State, and ₹3,31,861 for Private telegrams. Para. 16.

The proportions of the total message revenue due to the several classes of traffic were—

State	Inland	31·81
	Foreign	1·25
Private	Inland	38·31
	Foreign	28·63

7. New Telegraph Stations.—190 new offices were opened during the year, raising the number open to the public on the 31st March 1888 to 2,579. Paras. 42-43.

Of these, 745 were departmental and combined offices, and the remainder licensed offices on railways and canals. The total number of public telegraph offices has increased 61 per cent. during the past five years (since 1882-83), and the increase in the same period in departmental offices has been 431, or 137 per cent. Paras. 42-44.

8. Extensions of lines.—The following figures show the extent of lines, wire and cable at the close of the year:— Paras. 62-64.

	Miles.
Posts	31,894
Wire	93,517
Cable	226

These figures represent an increase over the figures for the previous year of—

	Miles.
Posts	1,860
Wire	6,627
Cable	30

9. Upkeep of lines.—The interruptions to communication caused by faults on the lines during the year under review do not compare favourably in number with the previous year, but on the other hand those that occurred were removed with greater rapidity. Most of the faults are traceable to exceptional causes, and the fact that the average duration as compared with that of the previous year is less by 58 per cent. shows that the line establishment have been in no way remiss in the performance of their arduous duties. Excluding Upper Burma, where, owing to the disturbed state of the country and the necessity for the repair parties having to travel under escort, the duration of interruptions is exceptionally long, the average duration of faults becomes 19 hours as compared with 36 of the previous year. Paras. 76-81.

10. Licensed Telegraph Systems.—During the year the wire erected for railways and for canals respectively was 1,652 miles for the former, and 76 for the latter; and the number of new offices fitted up was 125. The extent of the system maintained by this Department for Railways and Canals at the close of the year is as follows:— Para. 63.

	Railways.	Canals.	TOTAL.
Miles of wire	33,043	597	33,640
,, ,, cable	9	...	9
Number of offices	1,472	32	1,504

The line along the Sone Canal, which was the property of the Irrigation Department, was transferred to the capital account of this Department and the offices are now all worked as combined offices.

11. Telephones.—The earnings of the Telephone Companies show a slight increase over those of the previous year, but the business done is still small. Para. 82.

The decrease shewn in para. 83 under private lines maintained by this Department is only apparent, and is due to those for Railways and Canals being

now included under licensed Telegraph Systems, uniform charges for all work done for such systems having been introduced.

Paras. 45 and 46.

12. Traffic efficiency.—It is satisfactory to record a substantial improvement in speed of transmission and some diminution in the number of complaints by the public.

II.—REVENUE AND EXPENDITURE.

13. Capital Account.—The Capital expenditure of the year amounted to ₹23,49,550, under the following heads:—

Lines and Buildings		19,18,347
Tools and plant		94,327
Workshop	Buildings	2,414
	Machinery and plant	*1,975
	Materials	*7,327
Store-houses		6,508
Stores		9,15,269
Charge for exchange on payments in England		*5,87,064
Suspense heads		9,051
TOTAL		23,49,550

In the above account the expenditure of ₹9,15,269 on stores and the credit of ₹5,87,064 to loss by exchange require explanation.

Hitherto all stores and workshop materials were brought on the books at a value of two shillings per rupee and the loss by exchange was debited in a lump sum. This plan caused the cost of stores locally purchased or locally manufactured to compare unfavourably with that of those imported; and in the case of instruments and other articles, manufactured partly from imported and partly from indigenous material, rendered it most difficult to calculate the real value. Consequently, the Government of India (in a letter, No. 11.A.T., dated the 28th February 1888) ordered that in future the imported stores should be brought on the books at a price to include loss by exchange, and those already in stock should be re-valued.

The actual value of stores imported or purchased during the year was ₹3,28,205.

14. Revenue Account.—The Revenue Account of 1887-88 compares as shewn below with that of 1886-87:—

	1886-87.	1887-88.		1886-87.	1887-88.
RECEIPTS.	₹	₹	EXPENDITURE.	₹	₹
Message revenue	†48,26,078	51,67,996	Repairs of lines	4,64,601	3,40,355
Receipts from Railways and canals for rent of lines and offices supplied and maintained for them	9,64,997	12,55,080	Direction	1,58,741	1,71,267
			Accounts	56,301	63,254
			Superintendence	7,40,473	8,10,708
			Line maintenance and establishment	2,41,467	2,83,630
			Check office	54,532	60,250
Rent of private lines and claims against guarantees	82,975	1,18,866	*Signal Offices.*		
			Departmental	21,68,586	22,88,539
Sale of books, Gazettes &c.	16,099	15,955	Non-departmental	1,41,502	1,37,085
Miscellaneous	51,767	36,241	Minor undertakings	6,427	6,503
News—free and other *pro-formâ* messages	34,215	34,522	Telegraph stamps	6,089	6,896
			Stationery and printed forms	68,767	1,09,852
			Other items	14,387	13,909
			Total Expenditure	41,21,873	42,92,248
			Surplus receipts	18,54,258	23,36,412
TOTAL	59,76,131	66,28,660	TOTAL	59,76,131	66,28,660

* Credits

† In para. 13 of last year's report the Imperial message revenue was shewn as ₹332 too much owing to this amount received from Provincial offices having been twice credited in the Revenue accounts.

15. It will be seen that against an increased outlay of ₹1,70,375, there was an increase of revenue of ₹6,52,529, making a net improvement of ₹4,82,154. Of the increased receipts ₹3,41,918 is due to message revenue and ₹2,90,083 to increased rent from Railways and Canals, due partly to additional mileage of wires supplied and partly to an alteration in rates. On the expenditure side of the account the cost of repairs has fallen from what it was in 1886-87, but is higher than in 1885-86. This item is liable to fluctuation and is necessarily largely dependent on floods, storms, &c.

There is a large increase in the cost of printed forms, which is partly due to the increased number used for message traffic and partly to a replenishment of the reserve stock.

III.—TRAFFIC.

16. The number and value of Paid telegrams of all kinds, under the two heads State and Private, including those collected in Provincial offices, are shewn below with the corresponding figures of the previous year:—

CLASS OF MESSAGE.	1887-88.		1886-87.	
	Number.	Value.	Number.	Value.
		₹		₹
State Inland	537,193	16,45,797	452,277	16,20,626
State Foreign	6,286	64,268	6,898	78,494
TOTAL STATE	543,479	17,10,065	459,175	16,99,120
Private Inland	1,860,300	19,81,814	1,683,758	18,17,798
Private Foreign	403,748	14,81,166	373,893	13,13,321
TOTAL PRIVATE	2,264,138	34,62,980	2,057,651	31,31,119
TOTAL STATE AND PRIVATE	2,807,617	51,73,045	2,516,826	48,30,239

The net increase in 1887-88 amounts to 290,791 in number, and ₹3,42,806 in value, or 11·55 and 7·09 per cent., respectively.

The Provincial revenue included above is shewn below. It is collected in only three offices working under special arrangements with Local Governments, *viz.*, False Point, Dhulia and Malegaon.

CLASS OF MESSAGE.	1887-88.		1886-87.	
	Number.	Value.	Number.	Value.
		₹		₹
State	1,680	2,409	1,481	1,755
Private	2,385	2,640	2,076	2,406
TOTAL	4,065	5,049	3,557	4,161

Deducting these amounts from those first given, the net Imperial message revenue of the year, as shewn in the Revenue account given in para. 14, is:—

	₹
State	17,07,656
Private	34,60,340
TOTAL	51,67,996

17. In Appendix B. will be found a statement of the message revenue collected in the various administrative divisions of the Department, contrasted with the figures of the previous year.

18. The proportion in which the traffic was contributed during the year by the four main heads, Inland State, Foreign State, Inland Private, Foreign Private are shewn in the following table:—

Class.	Inland.		Foreign.		Total.	
	Number.	Value.	Number.	Value.	Number.	Value.
State	19·14	31·81	0·22	1·25	19·36	33·06
Private	66·26	38·31	14·38	28·63	80·64	66·94
Total	85·40	70·12	14·60	29·88	100·00	100·00

19. The proportion of the value of State Inland traffic to the total message revenue was 33·55 per cent. in 1886-87, and though it has slightly fallen to 31·81 per cent. during 1887-88, it is still unduly high, the average of the four years previous to 1886-87 having been only 19·1 per cent. The causes are the same as those stated in last year's report, *viz.*, the military operations in Upper Burma and the general settlement of administration in that province.

Inland State Telegrams.

20. The number and value of these telegrams continued to rise above even the previously unprecedented figures attained in 1886-87. The net increases over 1886-87, were 84,916 in number, and ₹25,171 in value, making the total of the year 537,193 telegrams of the value of ₹16,45,797. The increase in number in the Upper Burma Division alone amounted to 81,544 telegrams and the increase in value to ₹1,29,329. Against this large increase in value in Burma, there was a very general falling off in other divisions owing to a greater use of the "Deferred" class and a reduction in the length of telegrams. "Urgent" telegrams formed only 32·71 per cent. of the whole number of Inland State telegrams in 1887-88, against 38·77 per cent. in the previous year, and the average cost of a State Inland telegram throughout the whole Department fell from ₹3·583 in 1886-87, to ₹3·069 in 1887-88. The fall in the Upper Burma Division alone was from ₹7·87 to ₹4·84, showing a satisfactory economy in the use of the wires, though the average cost of a telegram in Upper Burma was still 58 per cent. higher than the average of the whole Department.

21. It may be added that since the 1st April 1888, the number and value of State telegrams sent from Upper Burma have fallen considerably, due no doubt to a great extent to the enforcement from that date of the rule requiring all such telegrams to be prepaid. During the first three months of the current year, the number of telegrams sent was at the rate of less than half the number sent in 1886-87, and the average value of each was only ₹2·4. After making due allowance for the more settled state of the province, these results show that the rule regarding prepayment of State telegrams by officials acts as a most salutary check on an undue use of the wires to the detriment of the paying public.

Foreign State Telegrams.

22. This traffic fell slightly as compared with 1886-87, by 612 telegrams in number, and ₹14,226 in value, the total of the year being 6,286 telegrams of the value of ₹64,268 (Indian share only). The latter amount represents, in the case of telegrams to Europe, only about one-ninth of the actual cost of the telegrams, the remainder being the shares of the administrations which carry them beyond the limits of India. As these payments, which may be roughly stated at five lakhs of rupees during the year under review, are for the most part a final charge on the revenues of India, any diminution of this class of traffic is satisfactory from a financial point of view, and it is evidently desirable that the codification of phrases should be availed of as much as possible.

Inland Private Telegrams.

23. This class of telegrams increased 10·49 per cent. in number, and 9·02 per cent. in value over the figures of 1886-87. The actual increases were 176,632 in number, and ₹1,64,016 in value, making the total of the year 1,860,390 telegrams costing ₹19,81,814. The growth of the traffic during the past six years, and the number of offices open at the end of each year are exhibited in the statement given in paragraph 32. As was the case in the year 1886-87, nearly one-third of the increase, both in number and value, was collected in Upper Burma alone, and was to great extent due to the special circumstances of a large number of native troops serving in that province at a distance from their families. The remainder of the increase was very generally distributed, the Sind and Baluchistan Division being the only one that showed a decrease, due apparently to the contraction of operations on the frontier railways. More than one-quarter of the increased receipts, or ₹43,609, were collected in new offices, opened at the close of 1886-87, and during 1887-88. As the return traffic addressed to these new offices, and practically created by them in the old offices, must also have been very considerable, it is evident that but for these new offices, and for the exceptional traffic from Upper Burma, the ordinary increase of traffic in the older offices throughout the country generally would have been very small, thus indicating that the use of the telegraph by the public continues very stationary, except when developed by an expenditure of capital on extensions of lines and offices. This subject was fully dealt with in the report for 1886-87, and it is sufficient to repeat here that under the present tariff, which is very much cheaper than those that preceded it, the receipts from private Inland telegrams are steadily improving, but that the progress of 42·92 per cent comparing 1882-83 with 1887-88 has been mainly due to an increase during the same period of the number of offices from 314 to 745, or 137 per cent., and that the increased revenue has only been gained by considerable expenditure both for new lines and extra establishment.

24. The average length of an Inland private telegram in all classes remains remarkably constant at a little over 10 chargeable words, exclusive of the free address, which is often, especially in the case of messages to natives, very voluminous. The concession of a free address is one that has been withdrawn of recent years in the United Kingdom, and the general principle adopted there, and in Europe generally, is that senders should be charged for the work their telegrams involve, as measured by the number of words. This rule was formerly in force in India, but was abandoned in 1872 in favour of a free address in deference to public requirements, experience having shewn, not only the difficulty of delivering telegrams, insufficiently addressed in a country where there is so much similarity in names, but also the unwillingness of senders to give adequate addresses when it was necessary to pay for every word. In any comparison of the Indian tariff with those of other countries, it is therefore necessary to allow for the mass of matter which we carry free in the address, the latter being often very much longer than the body of the message itself, which alone is charged for.

Foreign Private Telegrams.

25. This traffic shows an increase over the previous year of 29,885 in number, and ₹1,67,845 in the receipts; being increases of 7·98 and 12·78 per cent. respectively. A part of the increase is due, not to increased traffic, but to the loss by exchange in settlement with other administrations having been ₹59,882 less than in the previous year, when the loss was exceptionally heavy owing to special circumstances, as explained in paragraph 26 of the Administration Report for 1886-87. The traffic between India and Europe was almost stationary both in number and amount, but there was an improvement in the traffic between India and Ceylon, between India and the countries to the eastward, and between Europe and China, Australia, &c.

26. As has been pointed out in previous reports, our foreign traffic is almost entirely of a mercantile character, and the factor which mainly controls its volume is the state of trade. The telegrams, with few exceptions, are in abbreviated code, the economy of the use of which is thoroughly appreciated.

27. Classification of Inland Telegrams.—The inland paid traffic of the year, both State and Private, was classed by senders in the following proportions:—Urgent 12·03 per cent., Ordinary 36·85 per cent., and Deferred 51·12 per cent., showing a slight increase of the deferred and reduction of the urgent class as compared with the previous year.

28. The statements below show the classification separately under the three heads of State, Private and Press, compared with the previous year, and with the average of the previous four years:—

Class.	1887-88.	1886-87.	Average of four years from 1883-84 to 1886-87.
State.			
Local*	...	0·21	0·97
Deferred	64·07	52·08	57·74
Ordinary	3·22	8·94	11·17
Urgent	32·71	38·77	30·12
TOTAL	100·00	100·00	100·00
Private.			
Local*	...	0·15	0·49
Deferred	47·34	49·25	46·94
Ordinary	46·65	43·81	46·06
Urgent	6·01	6·79	6·51
TOTAL	100·00	100·00	100·00
Press.			
Deferred	56·90	53·57	49·61
Ordinary	36·78	37·20	42·64
Urgent	6·32	9·23	7·75
TOTAL	100·00	100·00	100·00

Under the orders of Government, rescinded since the close of the year under review, State telegrams, except in a few specified cases, could hitherto only be classified Urgent or Deferred, thus affording no comparison in classification with private telegrams. The fall in the number of State telegrams classed Urgent as shown in the statement is, however, satisfactory.

It will be seen that the classification of telegrams by the public is very constant, the proportions for 1887-88 closely approaching the average of the previous four years, and as compared with 1886-87 showing a slight diminution in "Deferred" and increase in "Ordinary." In press telegrams there is a tendency towards an increase of the "Deferred" class.

During the year under review, a substantial concession was made in favour of Deferred telegrams by allowing greater recourse to delivery by hand in cases when such telegrams had suffered delay in transmission, or were likely to do so by the local postal delivery arrangements not fitting in well.

29. The numbers and values of the telegrams in each class are shewn in the statement given below:—

Class.	Urgent.		Ordinary.		Deferred.		Total.	
	No.	Value.	No.	Value.	No.	Value.	No.	Value.
		₹		₹		₹		₹
State	175,713	11,14,157	17,303	17,954	344,177	5,16,911	537,193	16,49,022
Private	110,865	2,87,609	860,381	10,43,986	873,104	5,89,993	1,844,350	19,21,588
Press	1,014	12,126	5,899	19,690	9,127	25,597	16,040	57,413
TOTAL	287,592	14,13,892	‡883,583	‡10,81,630	12,26,408	11,32,501	2,397,583	†36,28,023

* Discontinued from 1st July 1886.
† Exclusive of ₹12,055 on account of fees for abbreviated addresses, and a debit adjustment of ₹12,467.
‡ Includes 46,420 telegraphic money order advices, value ₹46,420.

30. Telegraphic money orders.—It was stated in last year's report that in communication with the Postal Department the rules for these orders had been simplified and the charges reduced from the 1st January 1887, with the result that the number of them had risen in the three months from January to March 1887, to 7,138 against 2,883 in the corresponding months of the previous year. Though the subject is one which mainly concerns the Postal Department, it is satisfactory to record that during 1887-88, the use of these orders has greatly extended, the Telegraph Department having transmitted in that year 46,420 advices or an average of 3,868 monthly against a monthly average of 2,379 in the first three months of the new system. This rapid means of remittance has proved a boon to sepoys, camp followers, servants, &c., absent from their homes, who, until the amount of the prepaid reply to a telegram was limited to Rupees two, used to send a considerable portion of their remittances under the guise of "reply paid" telegrams through the agency of the Telegraph Department. The Department now receives a fixed charge of one rupee from the Postal Department for each telegraphic money order advice, irrespective of the number of words it contains, the advice being transmitted and delivered, under special precautions, as a telegram of the "Ordinary" class.

31. Total number of Messages.—The figures given below show the actual signalling work done, being the total of all telegrams, paid and free, both sent and received, as well as of all repetitions made in transit. It will be noticed that the work has doubled since 1882-83.

1880-81	6,649,709	1884-85	9,776,896
1881-82	6,719,621	1885-86	12,177,387
1882-83	7,862,671	1886-87	14,096,713
1883-84	8,271,509	1887-88	15 929,199

32. Inland Traffic.—The following statement exhibits the growth of State and Private traffic for the past six years, during which the tariff has remained unchanged. State messages have more than doubled in number since 1882-83; while the increase in private traffic, comparing 1882-83 and 1887-88, has been 56·40 per cent. in number and 42·92 per cent. in value; and the increase in the number of offices has been from 314 to 745 or 137 per cent. The figures include Provincial revenue.

Year.	STATE.						PRIVATE.						TOTAL.						Number of Departmental Offices remaining open at the close of each year.

33. Foreign Traffic.—The rate of progress of this traffic shows an improvement in 1887-88 over that of previous years, but, as explained in paragraph 25, this is partly due to a reduced loss by exchange, and partly to increased traffic between Europe and countries to the East of India, including Australia. The traffic between Europe and India has been very stationary for the past three years.

34. Communication between India and Europe.—In Appendix C are given details of the distribution of the traffic between India and Europe by the Suez, Teheran and Turkish routes for the past seventeen years. Transit messages to and from the Far East are excluded from the Return, which refers to *numbers* of messages only. The figures for the last five years are reproduced below :—

Route.		1883-84.	1884-85.	1885-86.	1886-87.	1887-88.
Red Sea	*viâ* Suez	57·25	55·50	52·08	58·23	64·01
Indo-European	„ Teheran	41·06	43·03	46·55	40·67	34·50
	„ Turkey	1·69	1·47	1·37	1·10	1·49
	Total	100·00	100·00	100·00	100·00	100·00

It will be noticed that the Suez route carried more, and the Teheran route less, than the average during 1887-88; this is due to the Teheran route having been interrupted with Great Britain from the 13th to the 17th December 1887, and from the 1st February 1888 to the end of the official year, owing to the failure of the North Sea cables between Emden and Lowestoft. It is understood that bad weather mainly, though not altogether, prevented the more speedy repair of these cables by the Submarine Telegraph Company and the German Union Telegraph Company, to which they belonged. The interruption was a serious one from an Imperial point of view, as, in the event of a simultaneous failure of the Suez cables, both the Indian and Colonial Governments, and the East Indian, China and Australian trade, would have been put to great inconvenience. The Indo-European Telegraph Company did all in their power to expedite the repairs; and representations were made by this Department both to the British Postal Department and to the Government of India to use their good offices to the same end.*

The Eastern Company's route *viâ* Suez worked admirably throughout the year; and the only important interruption on the Turkish route was one between Bagdad and Mossul in April 1887, which lasted 16 days.

35. Communication with the Straits, China and Australia.—There was fortunately no simultaneous interruption of the Eastern Extension Company's cables between Madras and Penang, and between Rangoon (Elephant Point) and Penang, such as occurred during 1886-87, so that communication with the Straits was maintained throughout the year; as was also the case between Singapore and the Australian Continent.

Direct communication between India and China by cable was cut off, between the 30th July and the 7th August, by the failure of the single cable which connects Singapore and Saigon. But the Company in such cases divert the China traffic, from and to Europe, by the Great Northern Telegraph Company's line through Asiatic Russia. The Indo-Siam line to Saigon, see para. 36, did not prove a reliable alternative during the interruption of the Singapore-Saigon cable, as it was also out of order at the time.

The following is a list of the cable interruptions that occurred :—

Elephant Point to Penang	11th July to 3rd August.
Madras to Penang	18th October to 5th December.
Madras to Penang	9th to 17th April.
Singapore to Saigon	13th to 15th December (for repairs).
Singapore to Saigon	30th July to 7th August.

36. Indo-Siam Line.—There was very little improvement in the traffic of this line during the year, and as a through International route from India to Saigon, the line continued almost valueless. The total number of messages sent and received was 1,387, against 1,386 in the previous year; and the receipts of the Indian Department amounted to ₹7,365-4, against ₹6,903-15 in 1886-87.

The northern route from Moulmein to Bangkôk, *viâ* Raheng, remained almost constantly interrupted throughout the year, and the southern route, *viâ* Myitta and Kanburi, was also subject to long interruptions, mostly in Siamese territory, the duration of which aggregated over one hundred days; moreover between Bangkôk and Saigon the route suffered further interruption for about fifty-seven days. Owing to the care with which they were constructed and maintained, the lines within the British frontier, though traversing most difficult and unhealthy forest and mountainous country, were kept in good working order; but the defective working of the lines to the eastward, in foreign territory, prevented any adequate return in the shape of traffic being reaped from the expense and trouble bestowed on our lines. The inefficiency of the line from the frontier of India to Saigon *viâ* Bangkôk was made the subject of diplomatic representation to the Siam Government during the year under review, and a small section of the most difficult part of the Siamese line near the British frontier was, at the request of the Siam Government, inspected and reported on by an officer of this Department. There is reason to hope that these measures may result in an improvement in its maintenance.

* The British and German Governments now each own one of these cables, and will undertake their maintenance from January 1889. It is probable, therefore, that any future breaks will be speedily repaired.

37. Extensions in China.—The opening up of telegraphic communication in China made rapid strides during the year. The northern line from Shanghai *viâ* the provinces of Hupe and Szechuen was completed to Yunnan, and three offices have been opened in that province which is partly co-terminous with the British frontier in Upper Burma. A second line from Yunnan to the Coast ports *viâ* the provinces of Kwangsi and Kwantung to Canton was also under construction, and from recent official reports this line was expected to have been completed to Yunnan in March last, thus affording two routes from Yunnan to the the Pacific Ocean. These extensions are a matter of considerable interest to India, as there now remains but a short link to connect the wires of this Department and those of the Chinese Government in the neighbourhood of Bhamo. When this has been done, a comparatively cheap telegraphic tariff between India and China will, with the co-operation of the Chinese Government, probably be possible. The latest information received regarding the progress of the telegraph line in Western Yunnan, was that it had reached Momein, which is about 140 miles from Bhamo.

38. Other extensions of interest in Foreign countries.—During the year the Island of Formosa was connected with Foochow by a Submarine cable, and three offices were opened in the Island; telegraphic connection was established between Malacca and the States of Selangor and Sungie Ujong, and three offices were opened in each State; and a cable was laid from Gibraltar to Tangier, establishing communication with Morocco.

39. Traffic Statistics.—A graphic representation of the number and value of inland and foreign paid messages, year by year, as far back as the record is available, will be found in diagrams A and B.

40. Appendix D is an abstract of signal offices, classed in groups according to the amount of traffic originating at each, year by year, since 1877-78.

41. Appendix E shows the number of signal offices in each division, opened at the end of the year.

42. The total number of Departmental, including "combined," offices open at the end of the year was 745, and the department provided and supervised 1,504 Railway and canal offices, of which 1,243 were available to the public.

There were also 642 Railway offices not maintained by the Telegraph Department, of which 591 were available to the public.

43. The total number of Telegraph offices open to the public during the past five years is shewn below :—

	1883-84.	1884-85.	1885-86.	1886-87.	1887-88.
Departmental and Combined	349	521	634	699	745
Railway and other licensed offices	1,382	1,514	1,577	1,690	1,834
Total	1,731	2,035	2,211	2,389	2,579

44. Appendix M is a list, arranged by Provinces, of departmental offices opened during the year, *viz.* :—

Assam	6
Bengal	19
Bombay	4
Burma	36
Kathiawar	6
Madras	4
Mysore	4
North-Western Provinces and Oudh	6
Punjab	5
Sind and Baluchistan	1
Offices opened in connection with His Excellency the Viceroy's Tour	5
Offices opened in connection with His Excellency the Commander-in-Chief's Tour	2
TOTAL	98
The number closed* (permanently or temporarily)	52
Leaving a net increase of	46

or a percentage of 6·58. The offices were worked as shewn below :—

By the Post Office (*see* paragraphs 55 to 60)	486
„ a Clerk of a Public Office	1
„ „ Light-house keeper	1
„ Soldiers	64
Total worked by extra-Departmental Agency	552
„ „ „ purely Departmental Agency	193
TOTAL	745

45. Speed of transmission.—In the following table and in Diagram C are given the average time intervals occupied in the transmission† of telegrams (excluding deferred) over the principal main routes during the past five years :—

	1883-84.		1884-85.		1885-86.		1886-87.		1887-88.	
	H.	M.	H.	M.	H.	M.	H.	M.	H.	M.
Calcutta to Karachi	1	2	0	57	0	51	0	51	0	32
Karachi to Calcutta	0	36	0	35	0	36	0	35	0	20
Calcutta to Bombay	1	6	0	47	0	34	0	40	0	34
Bombay to Calcutta	1	10	0	48	0	36	0	43	0	31
Calcutta to Madras	1	7	1	1	0	50	0	54	0	34
Madras to Calcutta	1	4	0	59	0	46	0	59	0	45
Madras to Bombay	0	40	0	33	0	33	0	24	0	27
Bombay to Madras	0	38	0	28	0	36	0	32	0	31
Bombay to Karachi	0	35	0	35	0	31	0	28	0	24
Karachi to Bombay	0	30	0	24	0	21	0	14	0	17
Rangoon to Calcutta	2	50	2	10	1	22	3	17	2	22

It will be observed that there has been a very marked improvement in 1887-88 on all routes, in spite of the increase in traffic and the pressure on the lines between Calcutta and Rangoon—aggravated by the long interruption at the Pudda River referred to in para. 71. The results afford good evidence of the attention that has been devoted to increasing the means of communication where necessary, and maintaining the lines and offices in a state of efficiency.

The speed at which "Urgent" messages, including all Foreign messages, are carried is very much greater than that shewn in the table, in which all "Ordinary" messages are taken into account as well as "Urgent."† In illustration of this, it may be mentioned that the actual average time in transmission

* For particulars, *see* Appendix N.

† To save the labour of compiling the real average delay from the actual time occupied in transmission of *all* messages, the averages above referred to are calculated on the mean of the daily maximum and minimum delay on each route, and they are, as a fact, very much higher than the true averages.

of *all* foreign transit messages between Bombay and Madras for the six months ending 31st March 1888, was only a few seconds over nine minutes.

46. Complaints.—In Appendix F will be found two statements giving particulars of the complaints made by the public regarding telegrams during the past two years. While the traffic, including messages transferred for delivery from licensed administrations, increased 10·57 per cent. over that of 1886-87, the net increase in the number of admitted complaints in which the Department was concerned was only 1·46 per cent., the percentage of messages forming the subject of complaint falling from ·033 to ·029. There was therefore a slight improvement over the results of 1886-87.

News-Free and Concessional Telegrams.

47. The numbers of free news telegrams, such as Mail Steamer reports, transmitted during the last three years have been as follows :—

1885-86	788
1886-87	823
1887-88	933

These telegrams are transmitted to a large number of stations, and entail a very considerable amount of work on the Department. Their nominal value was ₹28,909-3.

In addition to the above, 1,253 telegrams of the nominal value of ₹5,612-14 were transmitted free on behalf of the French and Portuguese Governments and of His Highness the Khan of Kalât, under the special agreements existing with those governments.

Traffic with Licensed Telegraphs.

48. The statistics of this traffic for the past four years are given below :—

	1884-85.	1885-86.	1886-87.	1887-88.
Transferred to Railways	132,330	124,288	118,764	100,469
Received from Railways	*185,261	†201,264	‡236,152	§236,455
TOTAL	317,591	325,552	354,916	336,924

In addition to the telegrams shewn as transferred to Railways, all of which were booked at departmental or combined offices, a large number of telegrams were transferred, which originated in railway offices, and passed over the wires of the Department in transit to the offices of other railways.

Press Telegrams.

49. As will be seen from the statement below, Inland press telegrams continue almost stationary both in number and value. There has been a diminution both in number and value of urgent and ordinary press telegrams, compensated for by an increase in deferred. The total number of chargeable words transmitted in Inland press telegrams has been only 2,462,304 during the year, roughly 8,200 a day, excluding Sundays and holidays, and the concession of quarter ordinary rates represents a total reduction in charges to the "press" of ₹1,72,239. It is probable, however, that but for the reduced rates, the number and length of telegrams sent would have been much curtailed.

Foreign press traffic shows some growth. The press telegrams addressed to India, included in the statement, numbered 723, of the value (Indian share only) of ₹2,555—against 449 and ₹1,581, during the nine months of the previous year that the reduced rates for foreign press telegrams were in force. It may be use-

* Includes 857 Foreign messages originating on Railway lines and transferred to this Department.
† „ 716 „ „ „ „ „ „ „ „

§ „ 558 „ „ „ „ „ „ „ „

ful to mention here that these telegrams, which are not allowed to interfere with ordinary traffic, are carried at one-third rates.

Years.	Inland.		Foreign.		Total.		Remarks.
	No.	Value.	No.	Value.	No.	Value.	
		₹		₹		₹	
1883-84 . .	10,218	37,290	532	2,303	10,705	39,593	In the report for 1886-87, the foreign press message figures did not include 449 telegrams of the value of R1,581 addressed to stations in India under the reduced rates introduced in July 1886. These have been added and similar statistics will always be given in future years.
1884-85 . .	12,996	49,347	877	3,937	13,873	53,284	
1885-86 . .	15,175	57,985	975	11,442	16,150	69,427	
1886-87 . .	15,963	57,167	1,522	12,573	17,485	69,740	
1887-88 . .	16,040	57,413	1,824	15,125	17,864	72,538	

A statement showing month by month the number and value of press messages during the year will be found in Appendix G.

Undelivered Telegrams.

50. The results compared with the previous year are shewn below. The percentage of undelivered telegrams has somewhat increased, but the causes of non-delivery are almost entirely beyond the control of the telegraph service.

Cause of non-delivery.	1886-87.		1887-88.	
	No.	Percentage.	No.	Percentage.
1. Not found: address insufficient . .	2,168	·074	2,365	·073
2. Not found at address given . . .	3,583	·123	3,933	·122
3. Address changed in transmission . .	47	·002	51	·002
4. Left station: new address not known .	560	·019	597	·018
5. Left India	186	·007	208	·006
6. Left for original station	1,678	·057	1,950	·061
7. Returned by Dead Letter Office . .	2,019	·070	2,750	·085
8. Addressee, or address given, unknown .	511	·017	901	·028
9. Refused	141	·004	177	·005
10. Other reasons	183	·007	187	·006
Total .	11,076	·380	13,119	·406

Signalling Establishment.

51. At the close of the year, 1,345 Civil Telegraph Masters and Signallers, 11 Non-Commissioned Officers on the Unattached List, and 265 Military Signallers were employed; in addition, one clerk of a public office, 586 postal clerks, three light-house keepers, and six inspectors were more or less engaged on telegraph duties.

52. The number of soldiers trained in telegraphy during the year was 190, and at its close 226 were under instruction. These latter figures show a grea increase on the previous year, and are the result of the desire of the Government and of His Excellency the Commander-in-Chief to spread a knowledge of telegraphy in the Army, so as to provide trained signallers, in case of war, for employment in Field Telegraph Offices.

53. The number of casualties among the departmental Signalling Staff during the year was 58, a percentage of 4·27, due to the causes marginally noted.

Died	18
Dismissed	11
Invalided	11
Resigned	14
Retired	2
Transferred to clerical establishment, or to other departments	2
Total .	58

54. The list of efficient members of Volunteer Corps in the Telegraph Department at the close of the year 1887-88, showed a strength of 404 against 369 for the previous year.

55. Post Office Agency.—The utilization of the agency of the Post Office for working small telegraph offices of the main circuits continued to make steady progress.

56. Thirty-nine new combined offices were established, and thirteen departmental offices were transferred to postal agency; on the other hand, six combined offices were closed, making the net increase in the number of combined offices 46, as shewn in the statement below. In connection with the extensions to the new offices, 342 miles of line and 368 miles of wire were added during the year, and the total number of combined offices open at the end of the year, including 125 small departmental offices transferred, was 486.

Year.	Number of combined offices open on 31st March.		Mileage of line and wire added in connection with these extensions.	
	Transferred to Postal Agency.	New.	New wire on existing supports.	New supports and wire.
1883-84	24	31	612	405
1884-85	73	194	636	1,216
1885-86	92	296	1,662	2,150
1886-87	114	326	1,851	2,434
1887-88	125	361	2,193	2,802
Net additions during 1887-88 .	11	35	342	368

57. The total number of paid telegrams sent from combined offices during the year was 572,512, of the value of R6,63,708, representing one-eighth of the total message revenue of the Department, but though the number of these subsidiary offices largely exceeds the number of the main system, the signalling work done in them was less than one eleventh of that of the whole Department. The combined offices are almost entirely local feeders to the more important offices worked by the Telegraph Department on the trunk lines, all their traffic, in and out, having to be repeated at the latter. Under this arrangement they can be worked very economically, both as regards men and apparatus; but as this repetition, of necessity, adds largely to the work of the central or main line offices, the direct charges paid to the Postal Department for the establishments employed in combined offices only form a part of the expenses the latter entail, neither line charges nor establishment charges in the main line offices being included.

58. The number of telegrams handed in at Postal Receiving offices, *i.e.* post offices which are not also telegraph offices, was 32,819, and the value of the telegrams amounted to R30,698. These figures differ little from those of the previous two years, and the special record of these statistics will be discontinued. The telegrams and their value are both duly accounted for in the telegraph offices to which they are sent for transmission.

59. There were 273 Postal Signallers under training during the year, of whom 137 were granted certificates of qualification by the Department, 64 withdrew, and 72 were still under instruction at the close of the year.

60. In connection with the mutual working arrangements between the Postal and Telegraph Departments, it may be mentioned that a special small "telephone exchange" was established in order to connect the various departments of the Post Office in Calcutta, and was reported to be a great convenience in facilitating business (*see* paragraph 74).

Telegraphic Meteorological Service.

61. With a view to afford the Meteorological Department facilities for promptly warning the various ports of India and Burma of approaching bad weather, a special class of storm signal telegrams was introduced during the year, with the approval of Government, on the application of the Meteorological Reporter to the Government of India. These telegrams are given "precedence" over *ordinary* and *urgent* messages, and their use is resorted to by the Meteorological Reporter to the Government of Bengal and by the Observers at certain important stations, when there would be risk of delay in trusting to telegrams sent under the usual rules. The telegraphic service between the Meteorological Office and the Central Telegraphic Office, in Calcutta, was also improved to enable the Meteorological Reporter to get out his daily reports earlier than hitherto. A considerable number of the Meteorological observers throughout India are *employés* of this Department, and as the work of the two departments is so much connected, the arrangement is advantageous and saves much delay in the despatch of weather telegrams.

IV.—EXTENSION OF LINES AND LINE MAINTENANCE.

62. One thousand eight hundred and sixty miles of line, 6,627 miles of wire and 30 miles of cable, were added during the years.

63. The following figures show the system as it stood at the end of each year for the last 5 years :—

	Miles of Line.	Wire.	Cable.
1883-84	23,341	68,694	135
1884-85	25,387	74,973	142
1885-86	27,510	81,480	187
1886-87	30,034	86,890	196
1887-88	31,894	93,517	226

The wires and cables are maintained for the following purposes :—

	Miles of wire.	Miles of cable.
Imperial lines	58,862	215
Provincial lines	71	...
Native States	100	...
Railway systems	33,043*	9
Canal systems	597	...
Private lines	844	2
TOTAL	93,517	226

64. Appendix I is a statement of the lines, wire and cables maintained in each division, classified according to the purposes for which used. Appendix J gives the length of the lines, wire and cables supplied for each railway and canal system.

65. The following are some of the more important works undertaken for Railways :—

For the Bengal-Nagpur Railway.—On the Nagpur side the existing line from Kanhan Junction to Bilaspur, 244 miles, was completed throughout with three wires. From Bilaspur to Raighur, and on towards the Eeb River, 120 miles of line with one wire was supplied for Railway construction purposes. From the Bengal end, the line, of which 45 miles had been made from Assensol in 1886-87, was continued for Railway construction purposes to Chikardarpore, and on to the Konia River, a total distance from Assensol of 160 miles. On the Katni-Bilaspur branch, the line already up to Umaria, was extended to Sohagpur, 42 miles.

For the Indian Midland Railway.—A line was constructed with two wires from Kalpi to Jhansi, 43 miles; and a second wire was erected from Basoda to Jhansi, 124 miles.

* Exclusive of 6 miles of "crossings".

For the Southern Mahratta Railway.—The following works were in progress at the end of the year :—

	Miles.
An extra wire Poona to Londa	276
„ „ Hudgi to Gadag	174
Three wires Bellary to Guntakul	30

For the Bellary-Kistna State Railway.—An extra wire was put up from Guntakul to Nandyal, 89 miles.

For the Tirhoot State Railway.—A line of two wires was constructed in extension of the existing line from Baptiahi to Pertabganj, 14 miles.

For the Madras Railway.—An extra wire was erected on the extension from Beypore to Calicut, 9 miles.

For the Nizam's State Railway.—A line was constructed with two wires from Dornakul to Bezvada, 76 miles.

For the Toungoo-Mandalay Extension, Burma State Railway.—A line of two wires from Toungoo to Mandalay, 230 miles, was well on towards completion at the end of the year.

For the Junagad State Railway.—A line was constructed with two wires from Jetalsur to Verawal, 67 miles.

For the Morvi State Railway.—A line with one wire was constructed from Dholia to Morvi, 44 miles.

For the North-Western State Railway.—The erection of an extra wire from Sukkur to Quetta, *vid* Harnai, was in progress at the end of the year, and a wire was put up from Gulistan junction to Killa Abdulla and Shelabagh.

66. A line was constructed for the *Western Jumna Canal* from Tajawalla to Manak, 76 miles.

67. The following are the principal works carried out for departmental purposes :—

Additional wires.

	Miles.
From Broach to Ahmedabad	110
„ Rangoon to Poungde	129
„ Hyderabad (*Deccan*) to Bezvada	225
„ Raneegunge to Burhee	118
„ Bankipur to Chupra	36
„ Jalpaiguri to Silliguri	24
„ Lucknow to Sitapur	53
„ Multan to Sukkur	283
„ Sukkur to Sibi	297
„ Sibi to Quetta *vid* Harnai	154
„ Shahrig to Quetta	86
„ Quetta to Killa Abdulla	70

The temporary line from Toungoo to Yamethin was transferred to the permanent line along the Railway.

The line from Thayetmyo to Minbu was made permanent.

The second line from Lahore to Multan, 210 miles, was completed.

68. Among the works carried out in connection with combined offices the following are the more extensive :—

Assam Division.

	Miles.
From Alipur Duar to Baxa Duar	22
„ Gauhati to Palasbari	15
„ Silchar to Karimganj	33
„ Karimganj to Patharkandi	20

Beltary Division.

	Miles.
From Belgaum to Ashta Road, with branches to Miraj, Sangli and Tasgaon	114

Bombay Division.

	Miles.
From Ahmedabad to Dhandhuka	99
„ Bhavnagar to Veraval	184
„ Panchganni to Mahabaleshvar	11
„ Poona to Purandhar	22

Ganjam Division.

	Miles.
From Kendrapara to Alba	14
„ Bishnupur to Garbetta	18
„ Coconada to Pithapuram	16
„ Chicacole to Pandur	13
„ Ellore to Narsapur	77

Madras Division.

	Miles.
From Nidamangalam to Mannargudi, and from Tanjore to Trichinopoly	38
„ Ammayanayakanur to Periyakolam	52
„ Madras to Vellore	86

Punjab Division.

	Miles.
From Sardhana Railway Station to Sardhana Post Office	12
„ Baraut to Kandhla	19
„ Roorkee to Saharanpur	43

Burma Division.

	Miles.
From Myokwin to Lemyethna	14

Upper Burma Division.

	Miles.
From Pyintha to Maymyo	18

Special works.

69. The work in Upper Burma has mainly been in consolidating and strengthening the existing lines.

Communication between Upper Burma and Assam was established by the completion of the line commenced last year, from Manipur *vid* Tammu and the Chindwin Valley. The wire runs from Mandalay on existing posts to Ava, where a cable across the Irrawadi connects it with Sagain. From Sagain the line is taken across country *vid* Myinmu to Moniwa where it meets the Chindwin, the valley of which it follows up to the junction of the Yu River. It then follows the Yu River generally to Tammu. With the exception of the section from Kendat to Tammu, 60 miles, which is at present a temporary field line, the circuit has worked well, notwithstanding the great natural difficulties of the country through which it runs. Since the commencement of the monsoon, heavy floods and impassable roads have made it impossible to keep up communication on this section, but it is hoped that by the end of this year the whole section Manipur to Kendat will be completed in a reliable manner. The connection of Upper Burma with India by this route has been a work of considerable difficulty, and the staff employed have suffered much from hardships and exposure and the consequent fever and malaria.

The additional wire between Calcutta and Rangoon, the erection of which was carried as far as Narayanganj last year, was completed to Rangoon, a distance of 580 miles, of which 390 miles are on a separate line of posts. An alternative route has thus been partially secured over the most difficult sections for the important Calcutta-Rangoon traffic.

70. The trial of hard drawn copper wire, mentioned in last year's report, having proved encouraging, a wire of this metal was put up between Bombay and Madras, 800 miles, and between Bombay and Nagpur, 520 miles. It is in contemplation to extend this latter, by wire of a similar metal, to Calcutta, as soon as the line of posts along the Bengal-Nagpur Railway is completed. The results obtained on the new wire are highly satisfactory. Bombay and Madras are now able to work quadruplex without any intermediate translating station. The difficulties connected with the manipulation and erection of the "hard drawn copper wire," have in practice proved, with ordinary precautions, to be less than was anticipated. The use of this wire would have been much extended had it not been for an exceptional rise in the price of copper, which has rendered the purchase of it for the present almost prohibitive. It is, however, in contemplation to attempt its manufacture in the Telegraph Workshops in Calcutta, utilising old cable core and copper in stock.

71. The abnormal rise and change of course of the Pudda River, which resulted in the village of Goalundo being washed away in September, caused the loss of two valuable cables out of the four which crossed that river at this point. It was only by the exertions of the Superintendent of the Dacca Division and his staff that two of the cables were lengthened in time and so saved. Two cables not being sufficient to carry the traffic, bank offices had to be kept open until two new cables were laid in March. After much deliberation it was decided not to lay these new cables at Goalundo, where the limits of the river are so uncertain. Another crossing was selected—at Gopalpur—some miles lower down, and an alternative route established, leaving the old line at Rajbaree on one side of the river and meeting it again at Manickganj on the other. The Pudda River is always a source of danger and anxiety, and it is much to be feared that the two working cables that now remain at Goalundo will not much longer withstand the constant scour and shifting sandbanks to which they are exposed.

72. The completion of the Jubilee Bridge has admitted of the span which carried the wires across the Hooghly River at Barrackpur being dismantled. The wires now cross the river on brackets attached to the girders of the Bridge; and the 150 feet iron masts formerly used at Barrackpur have been taken down, and will be re-erected at the Kurnafuli River in Arakan.

73. In connection with the meteorological observations taken at Diamond Island, and the advantages which this place has for communicating with vessels passing between Rangoon and Calcutta, an improved service with Rangoon was called for by the Government. An expenditure amounting to ₹19,500 was sanctioned for moving a portion of the telegraph line to a safer position between Henzada and Bassein, and for insulating the line from Bassein towards the island; besides clearing the wires of heavy jungle for a considerable distance along the route.

74. *Telephone lines.*—An extensive telephone system was constructed for the Postal Department in Calcutta at an expense for lines and offices of ₹5,299.

A telephone system for the Police at Madras was in course of construction at the end of the year, and radical improvements were made to the Madras Government system by substituting copper for iron wire.

75. The following cables were added during the year—

	1	across the	Moulmein River	at	Moulmein,
	1	„	„ Irrawaddy	„	„ Prome,
	1	„	„ „	„	„ Ava,
	1	„	„ Ganges	„	„ Deegaghat,
	2	„	„ Pudda	„	„ Gopalpur,
and	1	„	„ Koladyne	„	near Akyab;

aggregating a total length of 22 miles.

Interruptions to communication.

76. The number, nature and duration of all faults on lines and in offices, which have in any way affected communication during the year, will be found in Appendix K.

Although the number of faults during the year is larger than that of the previous year, being 1,568 against 1,260, the average duration of each kind of fault is much less, being only 19 hours as against 29.

The increase in number is partly due to the numerous faults caused by the Burmans in Upper Burma, where it is likely the difficulties of maintenance will continue to be experienced until the country becomes more settled.

77. There was a large increase in the number of interruptions caused by carelessness or neglect in signal offices. Of 273 such faults, 206 were caused in combined offices, and 50 in departmental offices—chiefly those worked by military signallers. The offices in fault in the remaining 17 instances were not traced.

78. The following table shows the number of interruptions due to various causes, compared with last year:—

Cause.	Number of interruptions.	
	1886-87.	1887-88.
Storms	86	98
Wire breaking	47	83
Trees and branches	104	74
Insulators damaged by lightning	20	47
Supports breaking	11	30
Fires	17	12
Floods	34	20
Dacoits	...	44

The majority of interruptions is and always will be, due to trees, which are a source of danger to telegraph lines that it is impossible altogether to guard against. An immense amount of tree cutting and jungle clearing is done annually, but in many places the trees in the vicinity of the lines, either from their value as shade trees, or from their being private property, cannot be interfered with, and all that can be done is by constant patrolling and cutting off small branches to provide against the danger as far as possible.

In Bengal much damage was done to the lines by exceptional storms in May and June.

In the Bombay Division several interruptions were attributable to malicious tampering with the wires. All endeavours to trace the culprit or culprits have, however, been unsuccessful.

In the Burma Division much damage was done to the lines within 35 miles of Rangoon, both on the Prome and Toungoo sections, by a storm of unusual severity in the month of May. Some damage was done at the same time to the line from Rangoon to Elephant Point, the branch line to Kyauktan and the main line from Rangoon to the Siamese Frontier.

Of the faults on lines in Upper Burma, 44 were due to the wires being cut by dacoits, and many of the rest to the mischievous breaking of insulators by the Burmans.

In Dacca Division the loss of two out of the four cables which crossed the Pudda River at Goalundo, owing to the sudden rise and change of course of the river, referred to in paragraph 71, seriously interfered with the through communication between Calcutta and Rangoon.

In the Ganjam Division a cyclone in the month of May caused damage to the lines between Balasore and Midnapore that interrupted communication for 144 hours.

Unusually heavy floods in the Bolan which occurred in August, causing breaks in the railway, resulted in interruption to telegraphic communication aggregating 251 hours. Severe storms in the neighbourhood of Quetta caused interruptions that lasted for some 280 hours, the long duration being due to the fact of the heavy snow rendering rapid restoration impossible.

79. *Licensed systems.*—Appendix L is a statement showing all faults which have occurred on the lines and in the offices of licensed systems, their nature, number and duration, as well as the mileage of wire in use by each system at the close of the year.

80. The interruptions per mile of wire were the same as in the previous year, *viz.*, ·018, against ·023 and ·024 for 1885-86 and 1884-85 respectively.

81. The interruptions due to defects in offices show a decrease per office, being only ·065 as against ·08 for each of the two previous years.

V.—PRIVATE LINES AND TELEPHONE EXCHANGES.

82. The gross earnings of the Telephone Companies at Bombay, Calcutta, Karachi, Madras, Moulmein and Rangoon were ₹12,572 more than in the previous year.

The following table shows the extent of their operations for the past six years:—

Year.	Number of Subscribers on 31st December.	Number of Exchange connections.	Number of Private lines.	Amount of gross rentals.
				₹
1882	244	244	5	73,009
1883	411	392	34	1,19,165
1884	699	703	77	1,37,490
1885	822	837	100	1,51,349
1886	849	871	95	1,66,876
1887	808	842	104	1,79,448

83. The extent of the departmental operations in the same class of business is shewn in the following table:—

Year.	Number of Exchanges.	Number of Exchange connections.	Private lines.		Amount of Subscriptions.
			Number of circuits.	Number of offices.	
					₹
1881	4	24	37	67	19,808
1882	8	56	88	147	40,069
1883	12	92	89	148	47,131
1884	9	72	122	200	53,213
1885	8	71	160	257	61,443
1886	8	79	156	247	60,182
1887	11	105	124	195	58,118

VI.—ELECTRICAL.

84. Quadruplex working was introduced during the year on the line between Calcutta and Rangoon, a distance of over 1,000 miles, with Akyab as a half way station, where the signals are automatically repeated. The introduction of the same system was also arranged for on one of the wires between Calcutta and Agra, with Allahabad as the repetition station.

The number of circuits worked duplex has also increased, and there are now 23 main circuits, most of them of great length, worked on the quadruplex or duplex system.

85. The suspension of a copper wire between Madras and Bombay, which was completed early in the year 1888, has very much improved quadruplex working between those cities; and the important Australian and China traffic which mainly traverses India by this route is disposed of with great ease and rapidity.

86. The Electrician and his staff were busily engaged throughout the year in connection with the above work, and in their ordinary duties connected with the manufacture of new cables, the repair of cables already laid, line, instrument and insulator testing, &c. Several comprehensive technical pamphlets, illustrated by diagrams, were also prepared and issued.

The record of the year shows much useful work done, among which may be mentioned the following:—a series of experiments by which the system of Differential Duplex in use in the British Postal Telegraphs was modified and perfected so as to meet the special requirements of India, and the introduction of a universal relay adapted for ordinary, duplex or quadruplex working. Hitherto it had been necessary to obtain relays from England owing to the difficulty of manufacturing magnets which should retain their magnetism permanently. This difficulty was overcome in a series of experiments made the previous year, with the result that the relays, which form the most important part of the Morse instrument, can now be manufactured locally.

VII.—STORES AND WORKSHOPS.

87. The work of the Store Branch calls for little remark except that the numerous demands upon it were promptly met.

88. In consequence of the order of Government to revalue all stores in stock at a rate to include loss by exchange in the case of those received from England, a new Rate List was prepared which shows the real value of the stores instead of as heretofore their value in Rupees at par. This corrected valuation is of considerable importance in cases where stores are obtained sometimes locally and sometimes from England. The amount added to the value of stores on the books on 1st April 1888 to cover loss by exchange was ₹5,87,064.

89. The Workshops continued to be fully employed, and the cost of the various articles made was ₹4,72,172. A new range of sheds, designed as worksheds, with north lights, which was commenced in the year 1884-85, was completed, and some additions made to the machinery. Much satisfactory work was done in deciding on new patterns of Field Telegraph Stores. The local manufacture of Telegraph instruments was much extended; and, as regards instruments, the Department is now almost independent of London except for delicate testing apparatus and some component parts of Quadruplex sets. Large numbers of tools were also made, and the manufacture of iron tubular posts was much improved.

Appendix O gives a list of the principal articles manufactured. In addition to these, 2,583 instruments were repaired.

---

90. Sir Albert Cappel, K.C.I.E., the Director General, proceeded on furlough on the 9th March 1888.

H. MALLOCK, *Colonel,*
Offg. Director General of Telegraphs.

SIMLA,
The 2nd October 1888.

APPENDIX A.

Summary of Financial Results of the Indian Telegraph Department for the year 1887-88.

For *Director General.*

CALCUTTA,
The 1st February, 1889.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and prospects of the Crops.

Madras.—*For week ending 2nd February, 1889.*—No rain. More rain wanted in Ganjam, Vizagapatam, Cuddapah, Bellary, Trichinopoly, Tinnevelly, Salem and Coimbatore. Standing crops generally good, but withering in parts of Coimbatore, Bellary, Cuddapah and Tinnevelly; affected by disease or insects in parts of Coimbatore, South Arcot, Chingleput, Cuddapah and Bellary. Pasture deficient in Coimbatore and parts of Salem. Prices rising in ten districts including Ganjam, falling in five, and stationary in others. General prospects favourable except in Ganjam and Coimbatore. Coolies employed on Rushikulya works 33,572, and on Gopalpore Canal 32,413.

Bombay.—*For week ending 6th February, 1889.*—Rain throughout Sind and in parts of Broach and Surat. Late crops in Upper Sind Frontier benefited by it. Standing crops in three talukas of Surat and Poona and in parts of Ahmednagar unsatisfactory; *jowari* in one taluka of Ahmednagar, cotton and *kardi* in one of Sholapur, cotton in parts of Bijapur, exotic cotton and wheat in parts of Dharwar and late crops generally in one taluka of Kanara blighted; wheat in Broach poor; opium in Baroda good; and late crops good in most districts. Harvesting progressing generally; probable outturn of cotton in Kaira eight, and in Broach ten annas, and of wheat in Kaira eleven annas. Fodder scarce in Khandesh, Nasik, and in parts of Kathiawar.

Bengal.—*For week ending 5th February, 1889.*—General rain is reported to have fallen over the whole of the Province except Orissa and parts of East Bengal, the fall being rather heavy in Behar and North Bengal. The rain has been generally very useful, but the hail, which fell in places in Behar and North Bengal, has caused some injury to the standing crops. The prospects of the *rabi* crops are now more hopeful all round, and tobacco and poppy promise well. *Boro* or spring rice is also progressing satisfactorily. Ploughing for the autumn crops has begun, and *cheena* and other millets are being sown. The sugarcane and potato harvests are proceeding, and are expected to yield fair returns. No marked fluctuation in the price of rice has been reported during the past fort-

night. Regarding the afflicted tracts in North Behar no further accounts have been received during the week, but the rain is expected to have improved matters. Distress in consequence of the floods, which occurred during last rainy season, is reported from certain parts of the Midnapore District.

N.-W. P. & Oudh.—*For week ending 6th February, 1889.*—Good rain fell during the week in all districts with hail here and there. *Rabi* prospects much improved. Poppy doing well. Sugarcane-pressing continues. Markets well supplied. Prices steady, but slightly falling in places. Condition of cattle good.

Punjab.—*For week ending 6th February, 1889.*—Rainfall general throughout the province. Prices unsettled in Delhi and Peshawar, falling in Jullundur, Ferozepore and Sialkot, rising in Rawalpindi, and stationary elsewhere. *Rabi* sowing over. More rain wanted in Hissar. The *rabi* crops have been generally improved by the recent fall of rain ; prospects are now said to be good. Stock cattle are reported healthy. Fodder sufficient except in Hissar, Dera Ismail Khan and in parts of Rawalpindi. Poppy crops good in Amritsar.

Central Provinces.—*For week ending 6th February, 1889.*—Slight rain in Saugor. Prospects of winter crops continue unfavourable in northern districts. Wheat fading in Bilaspur for want of moisture and expected to yield eight annas in Raipur. Prospects elsewhere favourable. Cattle in fair condition.

Burma.—*For week ending 2nd February, 1889.*—Crop prospects continue favourable on the whole. The price of paddy has fallen in Tharrawaddy and Thôngwa, and has risen in Prome, Moulmein, Shwebo, Magwé and Pyinmana ; elsewhere there is no change.

Assam.—*For week ending 6th February, 1889.*—Weather cool. Moderate rainfall in all dis tricts has facilitated ploughing. Sowing of early rice, gathering of mustard and pressing of sugarcane are going on, and potatoes are being sown in the Khasi Hills.

Mysore and Coorg.—*For week ending 6th February, 1889.*—No rain in Mysore. Condition of crops and prospects good. Outturn of crops generally fair. Water-supply deficient in parts of the Mysore and Hassan districts. Prices risen in the Bangalore district, and fallen in the Tumkur district slightly.

Coffee crop for the most part picked in Coorg.

Berar and Hyderabad.—*For week ending 6th February, 1889.*—In Berar picking of cotton and harvesting of other *kharif* crops completed almost everywhere. Cutting of *rabi* crops now commenced. Cattle healthy. Fodder insufficient in some districts. Prices same as last week.

No rain in Hyderabad. *Rabi* crops thriving; transplanting of *tabi* crops begun; prices stationary.

Central India.—*For week ending 6th February, 1889.*—Slight rain in Bundelkund and hail in Jaora, which has damaged the crops there. Condition of standing crops in Bundelkund only average, but prices have fallen slightly during the week. Prices stationary in Neemuch.

Rajputana.—*For week ending 6th February, 1889.*—Good rain in Ajmere, Jeypore, and Ulwar. Slight in some other places. Agricultural operations and standing crops satisfactory. Agricultural stock good. Pasturage or fodder sufficient except in Marwar, Kherwara and Meywar. Prices steady except in Kherwára and Meywar. Opium satisfactory. Cotton fair.

Nepal.—*For week ending 31st January, 1889.*—Good rain fell during the week. Weather chilly. Prospects improved in the valley.

E. C. BUCK,
Secretary to the Government of India.

SUPPLEMENT TO

The Gazette of India.

No. 7.] CALCUTTA, SATURDAY, FEBRUARY 16, 1889.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

DEPARTMENT OF FINANCE AND COMMERCE.

REPORT ON THE OPERATIONS OF THE SAVINGS BANKS IN INDIA FOR THE YEAR 1887-88.

No. 730 Dated Calcutta, the 5th February 1889.

ORDER—By the Government of India, Department of Finance and Commerce.

Read—

Report by the Comptroller and Auditor General, on the operations of the Savings Banks in India for the year 1887-88, and annexed statements.

Ordered that the report and the statements be published in the *Gazette of India* for general information.

No. 131, dated Calcutta, the 10th January 1889.

From—E. GAY, Esq., Comptroller and Auditor General,

To—The Secretary to the Government of India, Department of Finance and Commerce.

I have the honour to submit my report for the year 1887-88 on the operations of the Savings Banks in India. Some of these Banks are open to the public, like the Presidency and Post Office Banks, and others have been established for the benefit of Government employés, like the Railway and Military Engineers' Provident Institutions. Separate Banks have been opened in each regiment for the European Army, but native soldiers are encouraged to deposit in the Post Office and Presidency Banks.

2. Nothing special has occurred during the year in connection with these Banks. I enclose the usual statements, marked I to VII, the principal facts in which may be summarised as follows :—On the 31st March 1888 there were 6,152 Government Savings Banks in India, and they contained 3,32,176 accounts, which received from Government ₹22,38,609 in the shape of interest, and possessed balances aggregating ₹6,67,63,315. In addition to these balances Government held on behalf of the depositors Government Securities amounting

to R4,55,800, not including the Government Promissory Notes for R3,73,200, which were purchased and made over to the depositors during the year. The following table distributes these figures among the several classes of Banks:—

Description of Banks.	Number of Banks.	Number of Depositors.	Interest earned.	Bank Balances.	Nominal value of Government Promissory Notes.
			₹	₹	₹
Presidency, Calcutta	1	10,881	97,732	27,58,527	16,600
Ditto, Madras	1	3,461	26,667	7,86,317	1,000
Ditto, Bombay	1	25,061	2,85,295	80,84,759	19,100
Railway	12	12,848	74,299	23,07,953	12,400
Civil Engineers'	1	465	25,032	7,96,063	...
Military	170	18,303	56,080	14,73,783	...
Post Office	5,966	2,61,157	16,73,504	5,05,55,913	4,06,700

3. The net result of the year's operations is shown in the subjoined statement, from which it will be seen that the number of Post Office Banks has diminished, though the number of accounts and amount of balances have largely increased. This is due to the closing of Sub-Post Office Banks. It will also be observed that the average balance held by each depositor is considerably larger than last year in all except the Military Banks. The large proportionate increase in the balances of the Railway and Civil Engineers' Banks is to be expected, as they have not been opened many years and are really of the nature of a cumulative Provident Fund—

Names of Banks.	Number of Banks.		Number of Accounts.		Bank Balances.		Government Promissory Notes.		Average of depositors' balance.	
	Increase.	Decrease.	Increase.	Decrease.	Increase.	Decrease.	Increase.	Decrease.	Increase.	Decrease.
					₹	₹	₹	₹	₹	₹
Presidency, Calcutta	...	...	...	274	82,562	...	500	...	23	...
Ditto Madras	...	...	...	252	...	21,407	1,000	...	6	...
Ditto Bombay	...	...	...	1,639	...	62,046	800	...	17	...
Railway	...	...	680	...	4,24,048	...	8,200	...	25	...

Post Office	...	82	42,147	...	79,84,153	...	27,900	...	39	...

4. The investments by depositors in Government Promissory Notes continue to rise as indicated in Statement VI; and from Statement VII, which gives particulars by Provinces of Presidency and Post Office Savings Banks combined, it will be observed that the general growth of depositors' balances is spread over all the Provinces.

5. My Savings Banks' Ledgers have been agreed with the accounts kept by the Accountant General, Public Works Department, and the Examiners of the Accounts of the several State Railways. In my last report I referred to the embezzlements in the late District Savings Bank at Chittagong, and now it only remains to record that the matter has been settled in accordance with the orders of the Government of India in the Financial Department, No. 1166, dated 1st March 1888.

Statement I.

Number of Working Banks and of the Depositors therein on 31st March 1887-88.

Director General of Railways' No. 334 (Statistical), dated the 26th December 1888, forwarding the Abstract Returns of Accidents to Trains, &c., on the open lines of Railways in India for the quarter ending 30th June 1888.

OBSERVATIONS.—As compared with the average of the five corresponding previous quarters, the number of accidents to trains, rolling-stock, permanent-way, &c., shows an increase of 125, or 12·65 per cent., with an increase of 2,685 miles, or 23·14 per cent., in the mean mileage open, and of 1,830,388 miles, or 14·74 per cent., in the train mileage. The following are the Railways on which the more important fluctuations occurred :—

Railways.	Accidents.					Train mileage.	
	Number of accidents.	Increase.	Decrease.	Percentage of Increase.	Percentage of Decrease.	Percentage of Increase.	Percentage of Decrease.
Rajputana-Malwa	140	...	15	...	9·68	13·79	...
Bengal Nagpur	40	22	...	122·22	...	37·94	..
Southern Mahratta	134	110	...	458·33	...	167·76	...
North-Western	120	...	76	...	38·78	26·06	...
South Indian	105	33	...	45·83	...	23·08	...
Great Indian Peninsula	37	...	69	...	65·09	12·09	...
Bombay, Baroda and Central India	51	12	...	30·77	...	0·37	...
Oudh and Rohilkhand	61	14	...	29·79	...	18·28	...
Bengal and North-Western	89	27	...	225·00	...	93·49	...
Dibru-Sadiya	36	...*	...	...*	...	...*	...
The Nizam's	23	12	...	109·09	...	14·73	...

* Returns not received prior to 1888.

2. On the Rajputana-Malwa Railway the number of accidents from "Trains running over cattle on the line" decreased from 100 to 71, while under "Failure of axles" there was an increase from 5 to 15.

3. The increase on the Bengal-Nagpur Railway mainly occurred under "Trains running over cattle on the line," "Trains running over obstructions on the line," and "Fire in trains," the number of accidents recorded under these heads being 18 against 7, 5 against *nil*, and 7 against 1, respectively.

4. On the Southern Mahratta Railway the total number of accidents rose from 24 to 134, due to increased train-mileage consequent on the opening since 1884 of the whole of the line and of the Bellary-Kistna Railway (849¾ miles in all), the line not having been open in 1883, and only 40½ miles in the corresponding quarter of 1884. Of the total number 91 appears under "Trains running over cattle, &c.," and 15 under "Fire in trains." With one or two exceptions, the cattle accidents occurred on the unfenced portions of the line.

5. Of the decrease of 76 accidents on the North-Western Railway, 14 took place under "Trains running over cattle, &c.," 11 under each of the heads "The bursting of tubes, &c., of engines" and "The failure of machinery, springs, &c., of engines," and 23 under "Fire in trains."

6. On the South Indian Railway fluctuations are noticed chiefly under "Trains running over cattle on the line," 60 against 51, and "Failure of machinery, springs, &c., of engines," 10 against 1. The increase was partly due to the working of the Cuddapah-Nellore State Railway.

7. On the Great Indian Peninsula Railway there was a decrease of 20 accidents under "Trains running over cattle on the line" and "Fires in trains," respectively. It is also satisfactory to notice that there was not a single case of "Goods trains, or parts of goods trains, engines, &c., leaving the rails," whereas 12 accidents of this description occurred on an average during the corresponding periods of five previous years.

8. On the Bombay, Baroda and Central India and Oudh and Rohilkhand Railways the increase mainly appears in the number of accidents classed as "Other accidents," which on the former was 40 against 21, and on the latter 7 against *nil*.

9. On the Nizam's Railway the number of cattle accidents rose from 2 to 15.

10. The total number of accidents on the East Indian Railway does not exhibit any noticeable variation, being 57 against 61; but under "Trains running over cattle on the line," there appears to have been a decrease of 15 accidents.

11. The increase on the Bengal and North-Western Railway was partly due to increased mileage worked. Under "Goods trains, or parts of goods trains, engines, &c., leaving the rails," and "Trains running over cattle on the line," the number of accidents mainly rose, being 19 against 4 and 14 against 5, respectively. The line was not fenced in those places where the cattle accidents occurred.

12. On the whole Indian Railway System, the casualties resulting from accidents to trains, &c., were as follows:—among passengers and others, 4 injured against 2 killed and 13 injured, and among servants, 2 killed and 7 injured against 3 killed and 10 injured. Of the casualties to servants, 1 gangman was killed and 3 injured on the Jodhpur Railway by a low-sided truck, blown away by a storm, striking against them whilst working on the line.

13. The following table exhibits the number of accidents under the different classes, due to accidents to trains, rolling stock, Permanent-way, &c., and the number of persons killed and injured thereby (*vide Table 4*):—

		Average of corresponding quarters of five previous years.	Second quarter, 1888.					Total all classes.	
			No.	Number of passengers and others.		Number of servants.			
				Killed.	Injured.	Killed.	Injured.	Killed.	Injured.
1	Collisions between passenger trains, or parts of passenger trains	1	2	...	...	...	...	...	...
2	Collisions between passenger trains and goods or mineral trains, engines and vehicles standing foul of the line	15	13	...	...	...	2	...	2
3	Collisions between goods trains, or parts of goods trains	24	15	...	2	1	1	1	3
4	Collisions between light engines	3	2	...	...	...	...	...	...
5	Passenger trains, or parts of passenger trains, leaving the rails	20	25	...	...	...	...	...	...
6	Goods trains, or parts of goods trains, engines, &c., leaving the rails	76	105	...	...	...	...	...	...
7	Trains or engines travelling in the wrong direction through points	14	10	...	...	..	...	..	...
8	Trains running into stations or sidings at too high a speed	4	4	...	...	...	...	...	...
9	Trains running over cattle on the line	454	518	...	...	...	...	...	...
10	Ditto over obstructions on the line	26	42	...	1	...	...	...	1
11	Ditto through gates at level crossings	16	13	...	...	...	1	...	1
12	The bursting of boilers of engines	21	1	...	...	...	...	...	...
12*a*	The bursting of tubes, &c., of engines		14	...	...	...	...	...	...
13	The failure of machinery, springs, &c, of engines	55	68	...	...	...	...	...	...
14	The failure of tyres	3	2	...	...	...	...	...	...
15	Ditto of wheels	7	...	...	...	...	...	...	...
16	Ditto of axles	12	24	...	1	...	...	...	1
17	Ditto of brake apparatus	...	1	...	...	...	...	...	...
18	Ditto of couplings	35	44	...	...	...	...	...	...
19	Ditto of tunnels, bridges, viaducts, culverts, &c.	...	1	...	...	...	...	...	...
20	Broken rails	5	9	...	...	...	...	...	...

22	Slips in cuttings or embankments	8	3	...	...	...	...	...	...
23	Fire in trains	98	71	...	...	...	...	...	...
24	Fire at stations, or involving injury to bridges or viaducts	16	21	...	...	...	...	...	...
25	Other accidents	67	87	...	...	1	3	1	3
	1888	...	1,113	...	4	2	7	2	11
	Total. Average of corresponding quarters of five previous years	...	988	2	13	3	16	5	29

14. The principal variations occurred under "Goods trains, or parts of goods trains, engines, &c., leaving the rails," 105 against 76; "Trains running over cattle on the line," 518 against 454; "Trains running over obstructions on the line," 42 against 26; "Failure of machinery, springs, &c., of engines," 68 against 55; "Failure of axles," 24 against 12; "Flooding of portions of permanent-way," 18 against 8; "Fire in trains," 71 against 98; and "Other accidents," 87 against 67.

15. The increase under "Goods trains, or parts of goods trains, engines, &c., leaving the rails," was principally due to the number of accidents returned by the Madras Railway being 16 against 5, and by the Bengal and North-Western Railway 19 against 4.

16. The cattle accidents were very numerous on the Southern Mahratta, Rajputana-Malwa, Eastern Bengal, South Indian, Oudh and Rohilkhand, and North Western Railways, being 91, 71, 68, 60, 40, and 39, respectively. As compared with the average of the corresponding quarters of five previous years, there was, as already noticed, a decrease of 29 accidents on the Rajputana-Malwa Railway, and of 14 on the North Western Railway.

17. Of the 68 cases of "Failure of machinery, springs, &c., of engines," 12 occurred on the North-Western Railway, 10 on the South Indian, and 8 on the Rajputana-Malwa.

18. The axles failed in 24 instances, of which 15 were on the Rajputana-Malwa Railway alone.

19. The cases of "Failure of couplings" chiefly occurred on the Rajputana-Malwa, North Western, and Dibru-Sadiya Railways, the number recorded being 12, 9 and 7, respectively, out of a total of 44.

20. The number of cases of "The flooding of permanent-way" was the largest on the Jodhpur Railway, *viz.*, 8 out of a total of 18.

21. The decrease under "Fire in trains" mainly took place on the North-Western and Great Indian Peninsula Railways, the former returning 14 against 37, and the latter 9 against 29 accidents.

22. Out of 87 accidents classified as "Other accidents," 40 were recorded on the Bombay, Baroda and Central India Railway.

23. The casualties to passengers from causes other than accidents to trains, &c., (*vide table 2*) were—

Cause of accident.	Second Quarter, 1888.		Average of corresponding quarters of five previous years.	
	Killed.	Injured.	Killed.	Injured.
From falling between carriages and platforms	1	2	2	2
Falling on to the platform, ballast, &c., when getting into or out of trains	2	1	1	3
Whilst crossing the line at stations	...	1	1	1
By closing of carriage doors	...	...	...	1
Falling out of carriages during the travelling of trains	2	16	4	22
Other accidents	4	1	...	6
Total	9	21	8	35

24. The accidents to servants in the employ of railways or of contractors whilst performing duties connected directly with the transit of passengers and

goods, from causes other than accidents to trains, &c., were as follows, *vide Table 2*:—

Cause of accident.	Second Quarter, 1888.		Average of corresponding quarters of five previous years.	
	Killed.	Injured.	Killed.	Injured.
During shunting operations	3	17	6	11
Falling of engines, vans, wagons, &c.	2	15	4	14
Coming in contact with overbridges, &c., during the travelling of trains	...	1	...	2
Coming in contact, while shunting, with vehicles, &c., standing in adjoining lines	1	1	...	...
Getting on or off trains, engines, &c.	3	9	3	14
Whilst loading, unloading, or sheeting	3	16	2	16
Whilst braking, spragging, or choking wheels	2	2	..	1
Whilst working at cranes or capstans	1	6	1	1
Whilst working on the permanent-way or in sidings	...	4	2	4
Whilst walking along the line on the way home, or to work	1	2	1	1
Whilst walking, crossing, or standing on the line	11	11	10	7
Whilst passing between vehicles	1	1	1	1
Whilst attending to the machinery of engines, cleaning them, &c.	1	2	...	3
Whilst attending to gates at level-crossings	3	2	1	1
Falling, or being caught, between vehicles and platforms	3	1	1	2
Falling off ladders, scaffolds, platforms, &c.	1	7	...	3
By the falling of lamps, wagon doors, timber, weights, &c.	2	13	...	3
Whilst coupling or uncoupling wagons	2	8	2	8
Miscellaneous	8	35	4	31
Total	48	153	38	123

25. Of other persons killed and injured by running trains, &c., 3 were killed and 2 injured whilst passing over the line at level crossings; 62 killed and 22 injured whilst trespassing on the line; 9 committed suicide; and 3 were killed and 4 injured from miscellaneous causes.

26. The following table shows the total number of persons killed and injured from all causes on the whole Indian Railway System as compared with the average of the corresponding quarters of five previous years, *vide Table 1*:—

Cause of accident.	Second Quarter, 1888.		Average of corresponding quarters of five previous years.	
	Killed.	Injured.	Killed.	Injured.
Passengers.				
From causes beyond their own control	...	3	1	14
From misconduct or want of caution	9	22	8	32
Servants.				
From causes beyond their own control	7	19	6	22
From misconduct or want of caution	43	141	36	116
Others.				
Whilst passing at level-crossings	3	2	1	2
Trespassers, including suicides	71	22	43	9
Other persons	3	4	5	3
Total	136	213	100	198
Total mean mileage open	14,287¾		11,602¾	
Total train mileage	14,243,047		12,412,659	

27. In addition to the above, 14 persons are reported to have been killed and 15 injured in station yards, workshops, &c., and 135 persons to have died in carriages and at stations from causes unconnected with the working of trains.

RESOLUTION.—It is noticed that in cases of "Goods trains, or parts of goods trains, engines, &c., leaving the rails," the increased number was due principally to the larger number of such accidents on the Madras Railway and on the Bengal and North-Western Railway, the number being, respectively, 16 and 19 against 5 and 4, the averages of the corresponding quarters of the five previous years. Of 24 cases of "Failure of axles" during the quarter, 15 occurred on the Rajputana-Malwa Railway; and out of a total of 44 cases of "Failure of couplings," 12 are recorded against that Railway. The attention of the officers concerned should be invited to these increases.

2. On the North-Western Railway it is satisfactory to observe that there was a decrease of 11 accidents in "Failure of machinery, springs, &c., of engines" as compared with the average of the five corresponding previous quarters, and that the total number of accidents for the quarter decreased by 38·78 per cent. with an increased train mileage of 26·06 per cent. The Government of India also notice with satisfaction the large decrease in the number of accidents on the Great Indian Peninsula Railway.

ORDER.—Ordered, that this Resolution, with the Abstract Returns, be communicated for information to the Local Governments, Administrations and Officers noted in the margin.

The Governments of Madras, Bombay, Bengal, the North-Western Provinces and Oudh, and the Punjab.
The Chief Commissioners of the Central Provinces, Burma, and Assam.
The Resident at Hyderabad.
The Agents to the Governor General for Rajputana, Central India, and Baluchistan.
The Director General of Railways.
The Consulting Engineers to the Government of India for Railways, Calcutta, Lucknow, and Central Division.

Ordered also, that copies be forwarded for the information of Her Majesty's Government.

Ordered further, that this Resolution, with the Abstract Returns, be published in the Supplement to the *Gazette of India*.

By order,

M. C. BRACKENBURY, *Major, R.E.*,
Under Secretary.

Documents accompanying.

Abstract Returns of Accidents on Indian Railways for the second quarter of 1888.

TABLE No. 1.

GENERAL TOTAL.

NUMBER of PERSONS reported during the SECOND QUARTER of 1888 as KILLED or INJURED on the several RAILWAYS open for Traffic in INDIA, distinguishing between PASSENGERS, RAILWAY SERVANTS, and OTHER PERSONS; and distinguishing also, in the case of the two former Classes, between ACCIDENTS happening from causes beyond their own control, and ACCIDENTS happening otherwise.

TABLE No. 4.

TABLE No. 4.

ACCIDENTS to TRAINS, ROLLING-STOCK, PERMANENT-WAY, &c., on the several RAILWAYS open for traffic in INDIA during the SECOND QUARTER of 1888, distinguishing the different Classes of ACCIDENTS, the Number of PASSENGERS and OTHERS and the Number of RAILWAY SERVANTS KILLED OR INJURED thereby.

Serial Number.	RAILWAYS.	1.—Collisions between passenger trains, or parts of passenger trains.	2.—Collisions between passenger trains and goods or mineral trains, engines, and vehicles standing foul of the line.	3.—Collisions between goods trains, or parts of goods trains.	4.—Collisions between light engines.	5.—Passenger trains, or parts of passenger trains, leaving the rails.	6.—Goods trains, or parts of goods trains, engines, &c., leaving the rails.	7.—Trains or engines travelling in the wrong direction through points.	8.—Trains running into stations or sidings at too high a speed.	9.—Trains running over cattle on the line.	10.—Trains running over obstructions on the line.	11.—Trains running through gates at level-crossings.	12.—The bursting of boilers of engines.	12(a).—The bursting of tubes, &c., of engines.	13.—The failure of machinery, springs, &c., of engines.	14.—The failure of tyres.	15.—The failure of wheels.	16.—The failure of axles.	17.—The failure of brake apparatus.	18.—The failure of couplings.	19.—The failure of tunnels, bridges, viaducts, culverts, &c.	20.—Broken rails.	Serial Number.

GOVERNMENT OF INDIA.

HOME DEPARTMENT.

REPORTS OF THE PROGRESS OF EDUCATION IN INDIA DURING THE YEAR 1887-88.

No. 2 / 79-89.

Extract from the Proceedings of the Government of India in the Home Department,—(Education), under date Calcutta, the 11th February 1889.

READ—

Despatch from Her Majesty's Secretary of State for India, No. 93, dated the 6th September 1888, approving of the suggestion of the Government of India that the general Report on Educational Progress asked for by the Secretary of State in 1885 should be submitted only once in five years, but that in its place an annual Summary of a statistical kind shall be prepared for his information.

Read also—

The several Reports on the Progress of Education in India during the year 1887-88 with the Resolutions and Orders thereon by Local Governments and Administrations.

RESOLUTION.

In Home Department Resolution No. 199, dated 18th June last, the Governor General in Council reviewed at length the Statistics regarding Education in India for 1885-86 and 1886-87 in connection with the general Report drawn up by Sir Alfred Croft, Director of Public Instruction, Bengal, on the Educational results for the former year. A similar review will be made and published every fifth year, Statistics only with a brief explanation being published for general information in the intermediate years. In publishing for general information the Statistics of Education for 1887-88, His Excellency in Council merely desires to call attention to the most prominent features presented by them without on this occasion further discussing their bearings or significance.

2. There has been an increase in the aggregate number of Public and Private Institutions to which the Educational Reports relate from 127,116 in 1886-87 to 133,125 in 1887-88. The Public Institutions numbered 94,288 in the former and 94,636 in the latter year, so that the augmentation was mainly due to the increased number of Private Institutions which have submitted statistics regarding their working to the Departments of Public Instruction.

3. The percentage of the total population of school-going age which actually attended school in 1887-88 was 11·8 as compared with 10·7 per cent. in 1886-87. On 31st March 1887 there were 3,343,544 pupils on the rolls of the different schools and colleges to which the statistics relate, while by the same date in 1888 the number had risen to 3,460,844. The numbers attending school in 1886-87 were composed of 2,970,859 at Public and of 372,685 at Private Institutions, in 1887-88 of 3,021,721 at Public and 439,123 at Private Institutions. The records of average attendance at Public Institutions show a corresponding improvement, such attendance having risen from 2,798,719 to 2,855,186. Statistics to show the average attendance at Private Institutions are not available. The number of pupils on the rolls of the Arts Colleges rose from 8,764 at the close of 1886-87 to 10,328 at the end of 1887-88, and there was a slight increase, from 2,737 to 2,861, in the

number attending the Professional Colleges. At Secondary Schools there were 441,876 pupils in 1887-88 as compared with 429,093 in 1886-87, while in Primary Schools the figures improved from 2,513,934 to 2,550,384. The Governor General in Council regrets to notice that the numbers at the Training Schools declined from 5,716 to 4,761, while the increase at the other Special Schools—from 11,215 to 11,511—was much slighter than could be desired.

4. Of the pupils under instruction the number engaged in studying English rose from 310,126 to 325,425, the chief increase being in Secondary Schools. The number engaged in studying a Classical language rose from 472,518 to 478,608, while the number studying a Vernacular language only was 3,122,291 as compared with 3,036,593 in 1886-87. Of these students 2,503,680 were attending Primary Schools in 1886-87, and 2,543,983 in 1887-88. The increase was numerically as well as proportionately highest at Private Institutions, where there were 162,593 pupils studying one of the Vernaculars in 1886-87, and 199,528 in 1887-88.

5. If attention be directed to the race and religion of the different pupils in 1887-88, it will be found that there were 2,365,794 Hindus as compared with 2,303,812 in 1886-87; 804,485 Muhammadans as compared with 752,441; 23,160 Europeans and Eurasians as compared with 23,185; 74,498 Native Christians as compared with 60,611, and 208,121 of other classes (including aborigines) as compared with 192,314. The most noticeable feature in the above figures is the sustained increase among Muhammadan pupils. It was distributed over every stage of education but was chiefly noticeable at the Private Schools which were attended by 240,472 pupils, as compared with 195,415 pupils in 1886-87.

6. Of the total number of pupils attending school there were in 1887-88 3,182,643 boys as compared with 3,115,808 in 1886-87. Assuming the number of boys of the school-going age to be 15 per cent. of the population, the percentage of male scholars to the male population of school-going age rose from 19·5 in 1886-87 to 20·0 in 1887-88. The increase during the same period in the number of institutions attended by girls was from 6,674 to 7,012. Of the latter number 4,870 were Public and 2,142 Private Institutions. The number of girls attending the schools rose from 227,736 in 1886-87 to 278,201 in 1887-88: those attending Public Institutions rose from 206,108 to 248,097, and those at Private Institutions from 21,628 to 30,104. The percentage of female pupils to females of a school-going age which was 1·4 in 1886-87 was 1·8 in 1887-88.

7. The total expenditure on Education, which was Rs. 2,52,42,414 in 1886-87, rose to Rs. 2,61,91,280 in 1887-88. Of these sums Rs. 1,98,31,316 in the former and Rs. 2,09,09,809 in the latter year were directly devoted towards Public Instruction. The expenditure on Arts Colleges rose from Rs. 16,48,595 to Rs. 18,02,488, that on Professional Colleges from Rs. 5,99,948 to Rs. 7,20,674, and that on Training Schools from Rs. 5,44,178 to Rs. 5,66,146. The chief expenditure is on the Secondary and Primary Schools, and the amount spent on the former rose from Rs. 80,95,296 in 1886-87 to Rs. 86,27,117 in 1887-88, and that on the latter from Rs. 81,24,481 to Rs. 83,88,897. There was a decline in the expenditure on Special Schools other than Training Schools, from Rs. 8,18,819 to Rs. 8,04,537. The indirect expenditure upon Education, in which are included charges on account of Direction, Inspection, Scholarships and Buildings, declined from Rs. 54,11,098 in 1886-87 to Rs. 52,81,471 in 1887-88. This decrease was mainly due to the reduction of the expenditure on buildings.

8. This expenditure was met from Provincial and Local funds, from Municipal revenues, from Fees and from miscellaneous sources

such as Endowments. Provincial revenues are shewn in the annexed statements to have contributed Rs. 72,93,575 towards Education in 1887-88 as compared with Rs. 85,61,249 in 1886-87. But besides the sum thus shown as directly contributed by Provincial revenues, a sum of Rs. 9,26,972 was transferred from Provincial to Local Board revenues in Bengal, while smaller transfers of the same kind were effected in other provinces. The contraction in Provincial expenditure is thus for the most part nominal, but some true economies were effected which is satisfactory. The expenditure from Local Funds which in 1886-87 amounted to Rs. 37,14,579 rose in 1887-88 to Rs. 46,41,551, the rise being chiefly noticeable in the expenditure on those forms of education on which Provincial expenditure was contracted. Thus Local Bodies increased their expenditure on Secondary Education from Rs. 5,44,012 to Rs. 7,45,002, and on Primary Education from Rs. 21,43,321 to Rs. 26,06,392. The expenditure on Special Schools from Local Funds fell from Rs. 1,61,093 to Rs. 1,45,823, of which Rs. 1,20,704 were expended on training schools for masters. The Governor General in Council trusts to see shortly a further development of the interest of Local Bodies in Special Schools. The expenditure of Municipal Funds on Education was Rs. 12,94,317 in 1887-88 as compared with Rs. 12,05,984 in 1886-87.

9. There remains the contribution towards expenditure on Education from the fees paid by scholars and miscellaneous sources, including endowments for expenditure on education. Fees which in 1886-87 aggregated Rs. 65,29,958 reached Rs. 72,94,093 in 1887-88. The amount of fees paid at the Arts and Professional Colleges rose from Rs. 4,73,268 to Rs. 6,20,457, those paid at Secondary Schools from Rs. 31,89,378 to Rs. 36,01,610, and those paid at Primary Schools from Rs. 23,86,832 to Rs. 25,03,381. The income from miscellaneous sources which in 1886-87 was Rs. 52,30,644 was in 1887-88 Rs. 56,67,744.

10. The Statistics summarized above exhibit, in the opinion of the Government of India, proof of satisfactory progress, and indicate that the business of the Departments of Public Instruction was during 1887-88 generally conducted in an efficient manner. The Governor General in Council notices with pleasure the attention that appears to have been paid to the promotion of Primary Education, and he trusts that in this direction the efforts of Local Governments will be steadily increased and sustained.

ORDER.—Ordered, that copy of the above Resolution be forwarded to the Local Governments and Administrations marginally noted, and to the Revenue and Agricultural Department for information.

Madras.	Central Provinces.
Bombay.	Burma.
Bengal.	Assam.
North-Western Provinces and Oudh.	Coorg.
Punjab.	Hyderabad.

Ordered also, that the Resolution be published in the Supplement to the *Gazette of India*.

* Figures incomplete.

a. Figures defective.

b. Exclusive of the figures for the Province of Coorg, which have been omitted, as the headings shewn in the Report do not correspond with those given in this table.

c. Includes 9 middle schools which sent up 25 candidates, of whom 22 passed.

d. Includes 2 lower primary girls' schools.

e. Includes 22 upper primary and 5 middle schools, which sent up 96 and 39 candidates, of whom 24 and 28 passed.

EDUCATION—GENERAL TABLE VII.

Return shewing the Distribution of Local Fund and Municipal Expenditure on Public Instruction in the several Provinces comprised in British India for the official year 1887-88.

Objects of Expenditure.	Expenditure of Local Fund Boards on Public Instruction.																Total Local Fund Expenditure on Public Instruction.	Expenditure of Municipal Boards on Public Instruction.																Total Municipal Expenditure on Public Instruction.	Total Expenditure of Local Fund and Municipal Board on Public Instruction.	Remarks.
	In Institutions maintained by Local Fund Boards.											In Institutions maintained by						In Institutions maintained by Municipal Boards.															In Institutions maintained by

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and prospects of the Crops.

Madras.—*For week ending 9th February, 1889.*—No rain; more rain wanted in Ganjam, Vizagapatam, Cuddapah, Bellary, Trichinopoly, Tinnevelly, Coimbatore and Salem. Standing crops generally good, but withering in parts of Coimbatore, Cuddapah and Tinnevelly; blighted in parts of Bellary, Chingleput and Coimbatore. Pasture deficient in Coimbatore and parts of Salem. Prices rising in six districts, falling in six, and stationary in others. General prospects favourable except in Ganjam and Coimbatore. Labourers employed on last day of week on Rushikulya works 4,957, Gopalpore Canal, 8,956.

Bombay.—*For week ending 13th February, 1889.*—Slight rain in parts of Karachi and Hyderabad, where standing crops are benefited; late crops in parts of Nasik, three talukas of Surat, four of Poona, two of Ahmednagar, and one of Kanara, and wheat in Broach unsatisfactory; safflower in one taluka of Sholapur, and exotic cotton and wheat in parts of Dharwar blighted. Opium in Baroda good. Harvesting progressing generally; probable outturn of late crops in Ahmednagar from four to ten annas. Fodder scarce, and agricultural stock poor in Khandesh, and parts of Nasik and Kathiawar. Prices rising in one taluka of Nasik.

Bengal.—*For week ending 12th February, 1889.*—More rain fell on the 11th instant throughout Behar, and in parts of South-west and North Bengal, and in Chota Nagpore. The prospects of the *rabi* crops have considerably improved and are now generally reported to be fair, though some damage has been done by the recent hail in places in Behar and North Bengal. In Chota Nagpore, however, the *rabi* crops have already suffered, chiefly from drought, and are not expected to yield more than eight annas on the whole. The poppy and tobacco crops are reported on favourably, and the condition of the spring rice is satisfactory. The ploughing for the autumn crops is steadily progressing, and *cheena* and *mung* are being sown extensively throughout Behar. The sugarcane and potato harvests are proceeding with fair results. The latest report regarding the affected tract in the Patna Division shows that the attendance on the relief works in Chumparun and Mozufferpore has fallen off, the labourers having resorted to the fields, and that the prices everywhere are stationary and the stocks of grain sufficient.

North-Western Provinces and Oudh.—*For week ending 13th February, 1889.*—Light rain fell in most districts during the week. *Rabi* crops promise well. Supplies sufficient. Slight fluctuations in prices. Condition of cattle good.

Punjab.—*For week ending 13th February, 1889.*—Slight rain in Delhi and Amballa Districts. Prices rising in Delhi, falling in Jullundur, Ferozepur, Sialkot, Lahore, and Shahpur, unsettled in Multan and Peshawar, stationary elsewhere. Ploughing for cotton commenced in Lahore. More rain wanted in Hissar and Multan. Prospects of *rabi* crops have been greatly improved by the recent rainfall and are very promising. Stock cattle are generally healthy. Fodder sufficient, except in Hissar, Sialkot, Dera Ismail Khan and in parts of Rawalpindi.

Central Provinces.—*For week ending 13th February, 1889.*—Prospects of winter crops improved in Jabalpur by recent slight rain, otherwise they remain unchanged. Cattle in fair condition.

Burma.—*For week ending 9th February, 1889.*—The crop prospect is generally good. Prices are generally stationary, but there has been a slight rise in

the price of paddy in Akyab, Henzada, Toungoo and Pyinmana, and a slight fall in Tavoy, Shwebo and Lower Chindwin districts.

Assam.—*For week ending 13th February, 1889.*—Slight rain in most districts. Sowing of early rice, gathering of mustard and pressing of sugarcane are in progress. Rain wanted for tea in Sibsagar. Potato sowing in the Khasi Hills continues.

Mysore and Coorg.—*For week ending 13th February, 1889.*—No rain. Standing crops in good condition. Spring paddy sown in parts. Outturn of crops harvested generally favourable. Prices slightly risen in the Shimoga district.

Coffee crop fully picked in Coorg.

Berar and Hyderabad.—*For week ending 13th February, 1889.*—Picking of cotton completed in Berar. Harvesting of other *kharif* crops nearly over. Cutting of *rabi* in progress. Prospects good. Agricultural stock in good condition. Fodder insufficient in some districts. Prices stationary.

No rain in Hyderabad. *Rabi* crops thriving; weeding of *tabi* crops continues; prices stationary.

Central India.—*For week ending 13th February, 1889.*—Rain during the week in Gwalior, Bundelkhand and Baghelkhand. Crops in southern half of Bhopal reported somewhat damaged. Crops in Goona partly damaged by hail. Prices of food grains risen in Neemuch and Barwani, fallen in Manpur. Drinking-water scarce in southern portion of Bhopawar.

Rajputana.—*For week ending 13th February, 1889.*—Favourable rain in Ajmere, Jeypore and Bhurtpore. Agricultural operations satisfactory. Standing crops good. Agricultural stock good, but sickly at some places in Meywar. Prices rising in Meywar.

Nepal.—*For week ending 7th February, 1889.*—Slight rain. Weather foggy. Sowing of potatoes is in progress.

E. C. BUCK,
Secretary to the Government of India.

Irrigation.

REVENUE REPORT OF IRRIGATION WORKS IN RAJPUTANA FOR THE YEAR 1887-88.

No. 261., dated Calcutta, the 18th February 1889.

RESOLUTION—By the Government of India, Public Works Department.

Read—

Revenue Report of Irrigation Works in Rajputana for the year 1887-88, forwarded with letter No. 3792 S., dated 21st September 1888, from the Secretary to the Agent to the Governor General and Chief Commissioner, Rajputana.

OBSERVATIONS.—The year 1887-88 was a favourable one for the crops in Rajputana, the rainfall was more general and rather heavier than that of the previous year. The results obtained from the Irrigation works were, nevertheless, satisfactory; there was an increase both in area irrigated and in assessments.

2. There was no Capital outlay during the year. The Capital expenditure on the three groups of tanks stood at Rs. 16,46,285 at the end of the year.

3. The following statement shews the actual financial results of the year under review as given in the Revenue Accounts:

TANKS IN	Capital to end of year, including indirect charges.	Gross Revenue.	Working Expenses.	Net Revenue.	Percentage of net Revenue on Capital at end of year.
	Rs.	Rs.	Rs.	Rs.	
Ajmere Sub-Collectorate . .	8,78,473	53,156	24,476	28,680	3·26
Meywar „ . .	6,31,668	41,108	13,540	27,568	4·36
Bhurtpore „ . .	1,36,144	23,940	10,945	12,995	9·54
	16,46,285	1,18,204	48,961	69,243	4·20

A

These results are less favourable than those of the previous year, the revenue being slightly less and the working expenses being about fifty per cent. higher. The percentage of net revenue on Capital was 5·5 in 1886-87. The decrease in revenue is due to the fact that the Rabi assessments are collected in the year following that of the crop, and the rabi of 1886-87 was not good. The working expenses for the last two years are shewn in the following statement :

	1886-87. Rs.	1887-88. Rs.	Increase. Rs.
Maintenance and extensions . .	14,903	24,281	9,378
Establishment	16,680	22,490	5,810
Tools and Plant	—289	138	427
Leave and pension allowances . .	1,163	2,052	889
Total .	32,457	48,961	16,504

The increase in working expenses is not fully explained in the report, but it has been ascertained that it is mainly due to the fact that the number of tanks repaired in 1887-88 was 110 as compared with 67 in the previous year. The expenditure is largely in excess of the average of the last three years. The cost of working expenses per acre benefited was Rs. 1·30 as compared with Rs. 1·07 per acre in the previous year.

4. The area benefited by the tanks, that is the area protected as well as that actually irrigated, was 37,625 acres as compared with 30,305 in the previous year. The area was also considerably in excess of the average of the last three years. The increase was both in kharif and rabi crops.

5. The following statement shews the incidence of Revenue and Working Expenses :—

Area actually irrigated	Gross Revenue.		Working Expenses.	
	Amount.	Rate per acre irrigated.	Amount.	Rate per acre irrgated.
	Rs.	Rs.	Rs.	Rs.
24,665	1,18,204	4·7	48,961	1·9

5. The assessments of the year amounted to Rs. 1,26,560 as compared with Rs. 1,14,973 in the previous year. The collections were promptly made ; a sum of Rs. 180 only stood as due at the end of the year.

6. The total estimated value of the crops irrigated in 1887-88 was Rs. 7,80,296 as compared with Rs. 4,43,834 in the previous year.

Order.—Ordered, that a copy of this Resolution be forwarded to the Agent, Governor General and Chief Commissioner, Rajputana, for information and guidance.

Also that a copy of the Resolution and of the Report be forwarded to the Governments of Madras, Bombay, Bengal, the North-Western Provinces and Oudh, and the Punjab, in the Public Works Department, for information.

Also that a copy of the Resolution and of the Report be forwarded to the Revenue and Agricultural Department, and to the Department of Finance and Commerce, for information.

Also that the Resolution with the statement of general financial results compiled by the Examiner of Public Works Accounts, be published in the Supplement to the *Gazette of India*.

Ordered further, that a copy of this Resolution and of the Report be forwarded to Her Majesty's Secretary of State for India for information.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and prospects of the Crops.

Madras.—*For week ending 16th February, 1889.*—No rain. More rain wanted in Ganjam, Vizagapatam, Tinnevelly, Coimbatore and Salem. Standing crops generally good, but withering in parts of Coimbatore, Cuddapah, Anantapur, Bellary and Tinnevelly. Pasture deficient in Coimbatore and parts of Salem. Prices rising in nine districts, including four northern, falling in four and stationary in others. General prospects favourable except in Ganjam and Coimbatore. Labourers employed on last day of week on Rushikulya works 5,246, Gopalpore canal 10,003.

Bombay.—*For week ending 20th February, 1889.*—Rain in parts of Sind and Panch Mahals, benefiting crops in Shikarpore and Upper Sind Frontier. Late crops in three talukas of Surat and Poona and one of Kanara and wheat in Broach unsatisfactory; exotic cotton in parts of Dharwar damaged by blight, and gram in parts of Kathiawar by insects. Opium in Baroda good. Harvesting progressing generally; probable outturn of cotton in parts of Kathiawar from eight to ten annas. Fodder scarce in Khandesh and Nasik and parts of Poona, Ahmednagar and Kathiawar.

Bengal.—*For week ending 19th February, 1889.*—More rain is reported to have fallen over the greater part of the Province during the week. None, however, in Orissa. In Calcutta and the neighbourhood a heavy shower fell early this morning (20th). The state of the *rabi* crops is generally reported to be fair, but in Chota Nagpore, where the crops suffered most from the previous drought, the outturn will not exceed eight annas. Some of the *rabi* crops, *viz.*, mustard and pulses, are being gathered. The sugarcane harvest is yielding a fair outturn. The poppy and tobacco crops are promising. The spring rice seedlings are still being transplanted, and are doing well. In Behar *cheena* and *mung* are being sown extensively, and the weather is very favourable for the cultivation of indigo lands. Ploughing for the autumn crops is in steady progress. No further information has been received regarding the afflicted tracts in the Patna Division.

N.-W. P. and Oudh.—*For week ending 20th February, 1889.*—Rain fell everywhere. Some injury to *rabi* crops by rust, but generally they are thriving. Crops ripening and no more rain required. Poppy flourishing. Supplies ample. Prices falling. Condition of cattle good.

Punjab.—*For week ending 20th February, 1889.*—Rainfall good and general throughout the Province. Prices falling in Delhi, Jullundur, Ferozepore, Sialkot and Shahpore; unsettled in Multan and Peshawar; stationary elsewhere. Ploughings for *kharif* commenced in Hissar, Lahore and Shahpur. The crops have been greatly improved by the recent fall of rain, and prospects are very promising. Stock cattle are reported healthy. Fodder sufficient except in Hissar, Dera Ismail Khan and in parts of Multan and Rawalpindi. Poppy weeding commenced in Jullundur.

Central Provinces.—*For week ending 20th February, 1889.*—Showers have fallen in Saugor, Jabalpore and Seoni, and hail in the two former districts. Crops somewhat benefited. Winter crops being harvested. Prospects favourable in southern, but poor in northern and eastern districts.

Burma.—*For week ending 16th February, 1889.*—No rain has fallen during the past week, and crop prospects remain good. The price of paddy has fluctuated a little, showing a rise in Rangoon, Prome, Upper Chindwin, Sagaing and Lower Chindwin, and a fall in Bassein, Thôngwa, Henzada, Moulmein and Toungoo.

Assam.—*For week ending 20th February, 1889.*—Weather seasonable. Slight rain in Brahmaputra Valley districts; sowing of summer rice progressing. Gathering of mustard and crushing of sugarcane continue. Potatoes are being sown in the Khasi Hills.

Mysore and Coorg.—*For week ending 20th February, 1889.*—No rain throughout the State of Mysore. Crops in good condition, except in parts of the Kolar district where they require rain. Sowing of spring paddy still continues. Prospects generally fair. Pasturage diminishing in parts of the Kolar and Mysore districts. No material change in prices.

No rain during the week in Coorg.

Berar and Hyderabad.—*For week ending 20th February, 1889.*—Slight hailstorm in Amraoti taluk in Berar. *Rabi* crops are being cut and harvested. Condition good. Prospects favourable. Water sufficient. Fodder insufficient in some districts. Prices risen slightly in some districts.

No rain during the week in Hyderabad. Harvesting of *rabi* crops commenced. Weeding of *tabi* and *paddy* crops continues. Prices stationary.

Central India.—*For week ending 20th February, 1889.*—Slight rain in most parts of Central India. Agricultural operations in Bundelkund reported finished. Prices of food-grains risen in Dhar and Burwani, and fallen in Jhabua and Manpur; steady elsewhere. Where high winds and cloudy weather prevailed, opium crops have been slightly damaged in Rutlam, Jaora and Neemuch. Price of opium high in Bhopal.

Rajputana.—*For week ending 20th February, 1889.*—Good rain at Abu, Kerowlee and Ulwar, and slight at other places. Agricultural operations satisfactory. Standing crops good. Agricultural stock good except in Meywar. Pasturage or fodder sufficient except in Marwar, Kherwara, Meywar and Dholepur. Prices rising in Meywar, falling slightly in Marwar, Jhallawar, Kotah, Kishengurh and Bhurtpore; steady elsewhere.

Nepal.—*For week ending 14th February, 1889.*—Fair rain. Prospects good.

E. C. BUCK,
Secretary to the Government of India.

SUPPLEMENT TO

The Gazette of India.

No. 9.] CALCUTTA, SATURDAY, MARCH 2, 1889.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

CIVIL WORKS.

Irrigation.

REVENUE REPORT OF IRRIGATION WORKS IN THE PUNJAB FOR 1887-88.

No. 291., dated Calcutta, 22nd February 1889.

RESOLUTION—By the Government of India, Public Works Department.

Read—

Letter No. 7049 I., dated 21st December 1888, from the Government of the Punjab, forwarding the Revenue Report of Irrigation Works in the Punjab for 1887-88, and Resolution by that Government reviewing the Report.

OBSERVATIONS.—Capital Accounts are kept for all the canals in the Province of the Punjab which are under the administration of Irrigation Officers, with the exception of the Mazaffargarh Canals, for which only Revenue Accounts are kept. The following statement shows the Capital expenditure :

	Number of works.	During the year 1887-88.			To end of the year 1887-88.		
		Direct.	Indirect.	Total.	Direct.	Indirect.	Total.
MAJOR WORKS.		₹	₹	₹	₹	₹	₹
Protective Works (Account head 35) . . .	1	82,072	3,309	85,381	33,32,501	1,22,702	34,55,203
Productive Works (Account head 49) . . .	6	18,97,223	80,953	19,78,176	5,17,25,650	24,44,970	5,41,70,620
Minor Works of which Capital and Revenue Accounts are kept (Account head 43) . .	4	—2,816	*Nil*	—2,816	17,80,862	80,289	18,61,151
GRAND TOTAL .	11	19,76,479	84,262	20,60,741	5,68,39,013	26,47,961	5,94,86,974

This expenditure of 20½ lakhs was mainly incurred on the Western Jumna Canal (three lakhs), the Sirhind (eight lakhs) and the Chenab (eight lakhs). On the Western Jumna the chief work done was the raising of the banks and the construction of new distributaries and of a main drain. On the Sirhind Canal 365 miles of main and 762 miles of minor distributary channels were completed in the year. The Chenab Canal is still far from complete, and considerable progress was made in the construction of the main channel, branches and distributaries. In addition to the amounts shown in the above table there was an expenditure during the year of R3,87,613 on that portion of the Sirhind Canal which has been constructed for Native States, which increased the total Capital invested by the contributing States to R1,32,39,497.

2. The sanctioned estimates of the eleven works, including the Native State portion of the Sirhind Canal, aggregate about 746 lakhs, of which more than 727 lakhs have been expended. The following statement shows the progress of construction on the different classes of works:

	Sanctioned.		Completed.	
	Miles of Canals.	Miles of Distributaries.	Miles of Canals.	Miles of Distributaries.
Major Works—				
Protective Works	22	116	22	116
Productive Works	1,285	4,558	1,232	4,327
Minor Works—				
Of which Capital and Revenue Accounts are kept	1,753	150	1,753	150

The main channels are completed except on the Chenab Canal; some of the distributaries on the Western Jumna, Bari Doab, Sirhind and Chenab Canals are still unfinished.

3. The actual financial results of the year on the twelve systems, excluding the Native State portion of the Sirhind Canal, were as follows:—

Canal.	Capital outlay.	Gross Revenue.			Working Expenses.			Net Revenue.	Percentage of net Revenue on Capital outlay.
		Direct.	Indirect.	Total.	Direct.	Indirect.	Total.		
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)

D.—*Works of which Capital and Revenue Accounts are not kept*—									
Mazaffargarh	...	1,06,822	2,47,949	3,54,271	1,66,081	6,289	1,72,320	1,81,591	...

Note.—These figures differ from the Finance Accounts in three respects; the indirect charges in column 7 (which are mainly a calculation of liability for Leave and Pension allowances) are not shewn in the Finance Accounts; of the indirect receipts in column 4 which are a share of Land Revenue credited to Canals only that portion which pertains to Major Works is shown in the Finance Accounts. In the figures against C—Minor Works, the sum of R2,61,907 is credited under column 3 and debited under columu 6 on account of statute labour and expenditure from Fine Funds, and this figure will not be found in the Finance Accounts. Against D—Minor Works, a figure of R1,04,741 is similarly debited and credited for the same reason.

The results displayed by this table are extremely satisfactory. The Protective Work—the Swat River Canal—has paid its working expenses, and its income will further increase when full water-rates are assessed. The Productive Works taken collectively are paying more than 4 per cent., although the majority of them have been less than five years in operation. The Sidhnai Canal, which has only been open two years, gave a return of 13·84 per cent. on its Capital; the Western Jumna, 7·47; and the Bari Doab, 6·84.

Of the Minor Works the returns from the Lower Sutlej and Chenab and from the Shahpur Canals were 171·43 and 60·34 per cent. respectively. The Upper Sutlej Series only just paid its way and the Indus Series was worked at a loss, but here the country is not very favourable for irrigation, the credit given on account of irrigated land is small, and maintenance is expensive.

4. Two of the seven Major works—the Western Jumna and the Sidhnai Canals—shew a clear profit to the State on the whole of the operations since they were opened, that is to say, the total net Revenue has exceeded the total interest charges to date. The excess on the Western Jumna Canal is very large. On the other five systems the interest charges to date are in excess of the net Revenue, but in the case of the Bari Doab Canal, the deficit will disappear in two or three years. The other works have only lately come into operation.

5. The figures in the foregoing paragraphs have been based on the actual receipts as given in the accounts. The following statement has been drawn up to show the revenue assessed on irrigated lands in 1887-88 (which differs from the collections mainly in this respect, that the Rabi assessment of 1887-88 is not due in that year and is not collected till 1888-89), as well as the different systems of assessment and heads under which it is credited.

	Water-rates.	Occupiers' rates.	Owners' rates.	Share of Land Revenue.	Water advantage rates.	Gross assessed Revenue excluding miscellaneous.	Rate per acre irrigated.

6. On the Swat River, Sirhind, Sidhnai, Chenab, Shahpur and part of the Lower Sohag and Para Canals, a single charge is made for water supplied to irrigated lands; this is shown in the second column. On most of the other canals occupiers rates are charged, which are supplemented by "owners" and "water advantage" rates, or by a share of land revenue. On part of the area irrigated by the Western Jumna Canal, credit is given for the share of land revenue which was assessed as irrigated in the old settlements; the rest of the tract commanded by this canal has since been re-assessed at dry rates, and an "owners" rate is charged on areas actually irrigated. The "water advantage" rate on the Bari Doab Canal, and on that part of the Upper Sutlej Canal which is situated in Lahore District is somewhat of the same nature as an "owners" rate,

from which it differs in being a fixed charge for each acre irrigated, instead of varying with the crop grown: this charge which was fixed at the last settlement, varies in different villages. On the remaining part of the tracts watered by the Upper Sutlej and Lower Sohag and Para Canals, which falls within the Montgomery District, the assessment is a fluctuating one, and a share of it is credited to irrigation, as shown in column 5. On the Indus and Mazaffargarh Canals, and with a very small exception on the Lower Sutlej and Chenab Canals, no separate charge is made for water, but a share of the Land Revenue is credited to irrigation; this share is generally the whole of the land revenue where there are no wells, and half of it where the canal water is supplemented by wells.

In the case of the two latter canals, the cultivators also give labour without payment for the maintenance of the canals. The cultivators on the Indus Canals also contribute in cash towards the cost of maintaining their canals.

7. The figures in column 8, "Rate per irrigated acre," vary considerably. The low rates shown for the Lower Sutlej and Chenab, Indus, and Mazaffargarh Canals are due to the value of the free labour and contributions, as described above, being omitted from the statement. The Upper Sutlej Canal rates will be reconsidered when the next settlement of the Montgomery District is made. Of the remaining canals, on the Western Jumna, Bari Doab and Shahpur Canals alone is water assessed at the full sanctioned rates; the rest have only lately come into operation, and, according to the usual custom, full rates on new irrigation are only gradually arrived at.

8. The actual outstandings of revenue due, but not collected, had increased from R57,187 at the end of 1886-87 to R73,132 at the end of 1887-88. The balances are mainly due from the Western Jumna and Sirhind Canals; in the former case it is attributed to distress in certain villages in the Dehli District, and in the latter to a large sum due by the Faridkote State. It was anticipated that the outstandings would be realized early in the ensuing year.

9. The areas irrigated by the different canals are compared in the following statement with those of previous years:

		1887-88.	1886-87.	1885-86.	1884-85.	1883-84.
	MAJOR WORKS.	Acres.	Acres.	Acres.	Acres.	Acres.

	11 Shahpore Inundations Canals . . .	16,812	13,858	15,727	14,553	5,485
	12 Mazaffargarh Canals .	280,327	275,412	252,260	258,035	226,499
	TOTAL .	2,250,081	1,950,640	1,787,567	1,614,288	1,652,068

The area irrigated is again the largest on record; it consisted of 1,121,246 acres of kharif and 1,128,835 acres of rabi. The increase is for the most

part due to the extension of irrigation on the new canals. The irrigation on the Sirhind Canal in its fifth year exceeds the forecast for the thirteenth year, and is 75 per cent. of the probable ultimate area. The Sidhnai Canal in the second year and Swat River Canal in the third year have irrigated more than the maximum ultimate areas which they were estimated to attain after eight and fifteen years respectively.

The Chenab Canal was first opened in July 1887 in the middle of the kharif; some crops were irrigated in that season, but could not be matured owing to accumulations of silt in the supply channel. The water rates on that crop were entirely remitted. In the rabi crop 5,982 acres were irrigated. This crop was fully matured.

There was a falling off in the irrigation on the Western Jumna Canal where the rabi crop was only 57,699 acres as compared with 182,602 in the previous year. The decrease was due to the particularly heavy rain-fall which occurred during the latter months of the kharif and to timely showers during the rabi crops.

10. The whole of the facts regarding the irrigation and working of the Native State Branches of the Sirhind Canal had not been received in time for incorporation in this report. It appears that the area of irrigation reached 96,541 acres in 1887-88, as compared with 63,807 acres in 1886-87, which was the first year of systematic irrigation. The ultimate area which was estimated to be irrigable by these branches is 278,375 acres, so that the irrigation of 1887-88 is 35 per cent. of the ultimate area, a result which must be regarded as decidedly satisfactory.

11. The value of the crops irrigated during the year aggregated R6,84,66,306, which is 117 lakhs of rupees in excess of the previous year. The wheat crop was, as usual, the largest and most valuable; 783,189 acres of this crop, estimated at more than 251 lakhs in value, were matured by canal irrigation. There was a considerable increase in the area under sugarcane, 83,691 acres, estimated at R83,69,079 in value, were irrigated, and the area is nearly 40 per cent. in excess of the average of the previous four years.

12. The duty of each cubic foot per second of water entering the Canals varied in the kharif crop from 90 acres on the Western Jumna to 57 acres on the Sirhind Canal. The rabi duty varied from 145 acres on the Swat River to 32 acres on the Western Jumna, where the supply was kept up more for navigation than for irrigation. A foot-note has been attached to form No. I. B. of the Report explaining the method of calculating the duties; it would be well if it were stated in the next report what number of days in each case forms the "base" to which the duties are calculated.

13. The working expenses, including indirect charges, are shewn in the following statement:

		1887-88.	1886-87.	1885-86.	1884-85.	1883-84.

	Works for which only Revenue Accounts are kept—					
	Mazaffargarh Canals	1,72,320	1,45,302	1,66,545	1,88,397	1,77,326
	TOTAL	27,62,931	23,77,640	21,85,744	21,13,615	21,47,654
	Per acre irrigated	1·22	1·22	1·22	1·31	1·30

The rate per acre of the working expenses of Major works was ₹1·28 and that of Minor works ₹1·14 as compared with ₹1·36 and ₹1·05 in the previous year.

The increase in working expenses on the Western Jumna Canal was due to repairs of works at Dadupur, which were seriously injured by floods in July 1887, and to the construction of masonry core walls in part of the banks of the Okla Navigation Canal. This increase in expenditure, coupled with a decreased area of irrigation, causes the rate per acre of the working expenses of this canal to exceed those of any other, with the exception of the newly-opened Chenab Canal, where the working expenses were peculiarly heavy owing to exceptional circumstances. Omitting the Chenab Chanal, which was not regularly in work, the highest rate was ₹2·48 on the Western Jumna Canal, and the lowest was ₹0·54 on the Sidhnai Canal. On three of the Inundation Canals, and on the Bari Doab, the rate exceeded ₹1 per acre, and on six canals it fell below ₹1.

14. The details of the working expenses shown in the preceding paragraph are as follows:

	1887-88.	1886-87.
	₹	₹
Establishment	10,05,002	8,38,568
Works and repairs	15,85,820	13,88,697
Tools and Plant	30,195	18,617
Indirect charges	1,41,914	1,17,401
TOTAL	27,62,931	23,63,283

The charge for establishment again is made up of the following items:

	1887-88.	1886-87.
	₹	₹
Share of direction	1,50,704	1,26,893
Executive Officers	5,31,046	4,51,024
Medical ,,	7,557	5,640
Collection and Police	1,95,479	1,72,389
Fees of Lumberdars and Patwaris	1,20,216	82,622
TOTAL	10,05,002	8,38,568

The cost of direction and of accounts is divided between the Irrigation Department and other branches, so that the figure shown against the first line is a calculated ratio, not an actual sum. The "Executive Officers" charge represents an actual, since the Irrigation Establishment of the Punjab is separate from the Roads and Buildings Branch, and its whole cost is charged against Irrigation: part, however, is debited to construction (₹3,60,468 in 1887-88, at 23 per cent. on the cost of works and repairs, but this figure again includes a

share of the cost of direction, &c.) and the rest to working expenses. The charge for Medical officers generally is the cost of the Medical staff employed on the canals, and in some cases it is a contribution on payment of medical attendance. The head "Collection and Police" indicates the pay of the special Revenue Establishments—Deputy Collectors, Daroghas, Zillahdars, Amins for measurement, Patwaris to prepare the record of charges and the bills on which canal rates are collected, and Patrols. The last head indicates the fees to Lumberdars who collect the water rates and pay them into the Civil Treasury, retaining a commission of 3 per cent.: and in some cases where special Canal Patwaris are not appointed, fees are paid to the village Patwaris. The Executive staff not only supervise works and repairs, but also watch over the distribution of the water, the measurement of the fields, the records of the crops, and the assessment of the water rates, and have also Magisterial powers for the enforcement of the provisions of the Canal Act.

15. The receipts from and expenditure on navigation on the Western Jumna and Sirhind Canals are shewn in the margin: the net receipts are larger than last year, and may be expected to increase, as on the Sirhind Canal communication with Ferozepore City has just been completed. On the Western Jumna Canal, also, through communication has been opened to Dehli and Hissar. The value of goods carried was 24½ lakhs as compared with 11½ lakhs in the previous year.

	Western Jumna Canal.		Sirhind Canal.	
	1886-87.	1887-88.	1886-87.	1887-88.
Receipts	19,473	47,497	8,789	12,105
Expenditure	5,216	9,101	21,803	18,803

The miscellaneous revenue from water-power, plantations, &c., increased to ₹3,13,700, and is about 32 per cent. above the average of the previous four years. The increase was chiefly in mill-rents.

16. The rainfall of the year was generally below the average in both the rabi and kharif seasons, except on the Western Jumna and on the upper portions of the Sirhind and Chenab Canals; the supplies in the Ravi and Sutlej rivers were at times unequal to the requirements of the Bari Doab and Sirhind Canals.

17. The Report, which is well arranged and illustrated by excellent maps, which is due on the 15th of November, was received by the Government of India on the 26th December 1888; the report for the previous year was received on the 30th of November 1887. The Government of India trusts that the Report will in future years be submitted on the date fixed.

18. In the concluding paragraph of the Resolution by the Punjab Government on the Chief Engineer's Report, His Honour the Lieutenant Governor congratulates the Officers of the Irrigation Department on the excellent progress made during the past year, and on the results which have been obtained. His Excellency the Governor General in Council has much satisfaction in endorsing the favourable opinion expressed by the Lieutenant Governor.

ORDER.—Ordered, that copies of this Resolution and of the Report, and of the Resolution by the Punjab Government, be forwarded to the Finance and Commerce and the Revenue and Agricultural Departments for information.

Ordered also, that copies of this Resolution be forwarded to the Government of the Punjab for information and guidance, and that copies of this Resolution and of the Report and Resolution by the Punjab Government be forwarded to the Local Governments and Administrations in the Public Works Department, noted in the margin, for information.

The Governments of Madras, Bombay, Bengal, and the North-Western Provinces and Oudh, in the Public Works Department.
The Chief Commissioners of the Central Provinces and Burma.
The Foreign Department, for communication to the Resident in Mysore and Coorg.
The Resident at Hyderabad.
The Agents to the Governor General in Central India and Rajputana.

Ordered further, that this Resolution and the Resolution by the Local Government, with a few selected tables, be published in the Supplement to the *Gazette of India*, and that copies of this Resolution be forwarded to Her Majesty's Secretary of State for India.

J. G. FORBES, *Colonel, R.E.*,
Offg. Deputy Secy. to the Govt. of India.

IRRIGATION BRANCH.

No. 6988 I., dated Lahore, the 17th December 1888.

RESOLUTION—By the Hon'ble the Lieutenant-Governor of the Punjab and its Dependencies.

READ—

Revenue Report of the Officiating Chief Engineer, Irrigation Works, Punjab, for the year ending 31st March 1888.

RESOLUTION.—The following table shows the outlay under Capital during, and to the end of, the year 1887-88:—

Budget Head.	Canal.	Capital outlay. During 1887-88.	Capital outlay. To the end of 1887-88.
		₹	₹
35 Protective Irrigation Works.	Swat River	85,381	34,55,203
49 Irrigation Works not charged against Revenue	Western Jumna	2,97,763	1,08,82,656

43 Minor Works and Navigation not classed as Productive.	Upper Sutlej	...	5,77,251
	Lower Sutlej and Chenáb	...	1,10,102
	Indus	—1,072	7,08,911
	Shahpur	...	40,739
	Mádhopur Workshops	—1,744	4,24,148
	Total	—2,816	18,61,151
	Total Imperial	20,60,741	5,94,86,974
Contributions	Sirhind Canal	3,87,613	1,32,39,497

Under item 43, the Capital outlay of R35,456 on Abdul Raman Khan's Canal has been struck off the books with the sanction of the Government of India. For the Muzaffargarh Canals only Revenue Accounts are kept up.

2. The figures of Assessments, Working Expenses, Profits and Interest charges, for the year 1887-88, are given in the following table for each Canal, and the totals compared with those of 1886-87:—

Item No.	Canal.	Assessments.	Working Expenses.	Profit.	Interest charges.
		₹	₹	₹	₹
35	Swát River	1,87,020	90,123	96,897	1,31,659
49	Western Jumna	11,02,415	5,91,745	5,10,670	4,07,993
	Bári Doáb	17,12,122	5,30,727	11,81,395	6,20,643
	Sirhind	10,41,209	3,62,187	6,79,022	8,66,706
	Lower Sohág and Pára	42,190	37,034	5,156	22,963
	Sidnai	1,64,120	41,009	1,23,111	28,156
	Chenáb	6,232	59,941	—53,709	84,621
	Total 49	40,68,288	16,22,643	24,45,645	20,31,082
	Total 35 and 49	42,55,308	17,12,766	25,42,542	21,62,741

Item No.	Canal.	Assessments.	Working Expenses.	Profit.	Interest charges.
		₹	₹	₹	₹
43	Upper Sutlej	1,82,220	1,59,689	22,531	...
	Lower Sutlej and Chenáb	5,89,888	4,01,137	1,88,751	...
	Indus	2,87,680	3,12,217	—24,537	...
	Shahpur	34,994	16,673	18,321	...
	Total	10,94,782	8,89,716	2,05,066	...
	Muzaffargarh	3,54,286	1,72,335	1,81,951	...
	Total 43	14,49,068	10,62,051	3,87,017	...
	Grand Total, 1887-88	57,04,376	27,74,817	29,29,559	21,62,741
	Grand Total, 1886-87	47,03,575	23,77,640	23,25,935	20,82,512

In round numbers the Assessments have improved by ten lakhs and the Profits by six lakhs of rupees.

Excluding the Muzaffargarh Canals, which have no Capital Account, the Profits amount to R27,47,608, and show a return of 4·62 per centum on R5,94,86,974, the total Capital outlay at the end of 1887-88.

In 1886-87 the percentage was 3·70 and in 1885-86, 3·61.

3. The Protective and Productive Works, on which alone interest is charged, show a profit of R25,42,542 against R19,11,025 in 1886-87; this is equivalent to a return of 4·41 per centum on the total Capital outlay of R5,76,25,823, the return having been 3·44 in 1886-87, and 3·29 in 1885-86. The Swat River Canal, a Protective Work, shows a return of 2·80 per centum and the Productive Works proper a return of 4·51 per centum.

4. The total Collections for 1887-88 under Protective and Productive Works amount to R40,17,441, and the Working Expenses to R17,12,766; there remains, therefore, a balance of R23,04,675 to meet the charges of R21,62,741 on account of interest, and the net result is a surplus of R1,41,934; in 1886-87 there was a deficit of R3,12,863.

The profits are equivalent to a return of R4·00 per centum on the Capital outlay; taking Productive Works alone the return is 4·23 per centum.

The returns from the several Canals for 1886-87 and 1887-88 will be seen from the following table:—

Nature of Project.	Canals.	Returns per centum. 1886-87.	Returns per centum. 1887-88.
Protective	Swát River Canal	—0·84	0·38
Productive	Western Jumna	3·52	7·47
	Bári Doáb	8·09	6·84
	Sirhind	0·51	1·45
	Lower Sohág and Pára	1·05	—1·04
	Sidhnai	—0·17	13·84
	Chenáb	...	—2·31
	Total Productive	3·57	4·23
	Total Protective and Productive	3·29	4·00

The high percentage on the Bári Doáb Canal in 1886-87 was due to adjustments; excluding adjustments the percentage was 6·84. The success of the Sidhnai Canal, which shows a return of 13·84 per centum in the second year of its working, is very gratifying.

5. Under Minor Works and Navigation, the profits based on Collections have fallen from R2,05,292 in 1886-87 to R1,88,956 in 1887-88, owing to the

profits from the Upper Sutlej and Lower Sutlej and Chenáb systems having been smaller. The profits from the Muzaffargarh Canals have also fallen from R2,00,025 to R1,81,951.

6. The following table shows the financial results of Protective and Productive Works up to the end of 1887-88 :—

Nature of Project.	Canals.	Total of net profits.	Total of interest charges.	Balance of	
				Net profits.	Interest charges.
		R	*R*	*R*	*R*
Protective.	Swát River . .	—39,946	8,63,525	...	9,03,471
Productive	Western Jumna . .	3,60,16,346	69,40,805	2,90,75,541	...
	Bári Doáb . .	1,46,80,739	1,52,14,318	...	5,63,588
	Sirhind . . .	2,36,508	84,35,133	...	81,98,625
	Lower Sohág and Pára	1,097	64,531	...	63,434
	Sidhnai . . .	1,00,581	81,647	18,934	...
	Chenáb . . .	—59,685	2,16,805	...	2,76,490
	Total Productive .	5,09,75,577	3,09,83,239	1,99,92,338	...
	Total, 1887-88 .	5,09,35,631	3,18,46,764	1,90,88,867	...
	Total, 1886-87 .	4,86,30,956	2,96,84,023	1,89,46,933	...

Within two years the Bári Doáb Canal will have cleared off its balance of interest charges, and by that time it is hoped that the Sirhind Canal will meet its interest charges, and commence to clear off the large balance against it. The state of the Sidhnai Canal account is very satisfactory.

7. The Working Expenses of Protective and Productive Works, as shown in the table which accompanies para. 2, amounted to R17,12,766 against R14,37,600 in 1886-87. The increase is spread over all the Canals, and is principally due to the change from construction to revenue management on the newly opened Canals; the Chenáb Canal commenced to incur maintenance charges during the year, having been opened in July 1887. The rate per acre irrigated has fallen from R1·36 in 1886-87 to R1·29 in 1887-88. The Working Expenses of Minor Works has risen from R9,40,040 in 1886-87 to R10,62,051 in 1887-88. This is due partly to new protective bunds on the Indus Canals and extensions of the tail Canals of the Muzaffargarh system, and partly to a revision of the system on which Establishment charges are distributed. The rate per acre is R1·15 against R1·05 in 1886-87.

8. The cost of Establishment per acre irrigated is shown in the following statement for each system of Canals for the last three years :—

Canal.	Cost of Establishment per acre.		
	1885-86.	1886-87.	1887-88.
Swát River Canal	0·21	0·25	0·47
Western Jumna Canal	1·22	0·81	1·09
Bári Doáb Canal	0·45	0·59	0·51
Sirhind Canal	0·35	0·29	0·30
Lower Sohág and Pára Canal	0·09	0·14	0·39
Sidhnai Canal	...	0·15	0·17
Chenáb Canal	...	...	1·72
Upper Sutlej Inundation Canals . . .	0·76	0·54	0·41
Lower Sutlej and Chenáb Inundation Canals .	0·21	0·27	0·34
Indus Inundation Canals	0·47	0·44	0·44
Muzaffargarh Inundation Canals . . .	0·15	0·13	0·16

As noticed in the Resolution in last year's Report, the high rate on the Western Jumna Canal is receiving attention, and the separate circle of superintendence for that Canal will also be abolished from the commencement of 1889-90.

9. The mileage of channels sanctioned and completed at the end of 1887-88 is shown in the following table :—

	Canals.	Mileage of Canals.		Mileage of Distributaries.		Mileage available for navigation.
		Sanctioned.	Completed.	Sanctioned.	Completed.	
		Miles.	Miles.	Miles.	Miles.	Miles.
Perennial.	Swát Kiver	22	22	116	116	...
	Western Jumna	366	366	858	795	243
	Bári Doáb	354	354	1,050	1,045	...
	Sirhind . British . .	319	319	2,299	2,206	140
	Sirhind . Native States .	223	223	1,958	1,957	46
Inundation.	Lower Sohág and Pára . .	94	94	37	37	...
	Sidhnai	37	37	112	112	...
	Chenáb Canal	115	62	202	132	...
	Upper Sutlej	220	220	108	108	...
	Lower Sutlej and Chenáb . .	741	741	19	19	...
	Indus	700	700	...	...	...
	Shahpur	92	92	23	23	...
	Muzaffargarh	725	723	393	368	...
	Total . British . .	3,785	3,730	5,217	4,961	383
	Total . Native States .	223	223	1,958	1,957	46

The mileage was revised and corrected during the year, which accounts for differences between this year's and last year's figures.

10. The following are the areas irrigated during the past five years :—

Year.	Perennial Canals.			Inundation Canals.			Total.		
	Kharif.	Rabi.	Total.	Kharif.	Rabi.	Total.	Kharif.	Rabi.	Total.
	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.
1883-84 .	366,567	501,749	868,316	434,262	349,490	783,752	800,829	851,239	1,652,068
1884-85 .	345,869	346,203	692,072	522,474	399,742	922,216	868,343	745,945	1,614,288
1885-86 .	368,574	557,034	925,608	501,939	360,020	861,959	870,513	917,054	1,787,567
1886-87 .	351,472	659 589	1,011,061	536,301	403,278	939,579	887,773	1,062,867	1,950,640
1887-88 .	543,030	655,907	1,198,937	578,216	472,928	1,051,144	1,121,246	1,128,835	2,250,081

The area irrigated by Perennial Canals in the Rabi of 1887-88 is slightly less than in 1886-87, owing to the area on the Western Jumna Canal being unusually small; with this exception all the figures for 1887-88 are the best on record, and the total area for that year is more than one-third larger than that for 1883-84. The development of irrigation on the new Canals continues to make rapid strides, and is far in advance of what was expected when the projects were prepared.

11. The following are the areas of the principal crops irrigated during the last five years :—

Crops.	1883-84.	1884-85.	1885-86.	1886-87.	1887-88.
	Acres.	Acres.	Acres.	Acres.	Acres.
Sugarcane	54,675	69,610	58,398	59,104	83,691
Rice	146,857	147,401	147,529	146,777	158,837
Jowár	128,473	159,041	152,756	151,525	189,839
Maize	32,259	18,606	39,994	36,961	80,876
Wheat	615,831	533,838	649,442	747,514	783,189
Cotton	177,308	186,549	196,851	212,779	223,470

The areas of 1887-88 are in every case the largest yet recorded.

12. The value of crops irrigated by Canals during 1887-88 is estimated at R6,84,66,306; in 1886-87 the estimate was R5,67,58,501.

The value of crops on Perennial Canals averaged R34·7 per acre, while the average water-rate, including owner's and water-advantage rates, was only R3·1 per acre, or one-eleventh.

13. The supplies in the rivers Rávi and Sutlej were unequal to the demand for Rabi crops on the Bári Doáb and Sirhind Canals. The head-works of all the Canals are in a satisfactory condition, but the Dádúpur Regulator on the Western Jumna Canal was severely damaged by unusually high floods in the Somb and Patrála torrents, which cross the Canal above the Regulator.

14. In the Kharíf season, the rains were late in commencing, and the rainfall was below the average on most of the Canals, the exceptions being the Western Jumna, upper portion of the Sirhind and Chenáb Canals. In the Rabi season the rainfall was generally below the average.

15. The following table shows the duty, or area irrigated per cubic foot of water entering the Canal, on the Perennial Canals for the last five years:—

Canals.	Area irrigated per cubic foot.									
	1883-84.		1884-85.		1885-86.		1886-87.		1887-88.	
	Kharíf.	Rabi.	Kharíf.	Rabi.	Kharíf.	Rabi.	Kharíf.	Rabi.	Kharíf.	Rabi.
Swát River	...	...	...	...	...	...	62	...	84	...
Western Jumna	...	...	...	...	...	152	...	188	...	145
	74	...	94	...	86	...	66	...	90	...
	...	121	..	81	...	70	...	110	...	32
Bári Doáb	53	...	48	...	59	...	69	...	61	...
	...	139	...	115	...	140	...	123	...	123
Sirhind	...	...	...	...	57	...	46	...	57	...
	...	...	...	...	...	126	...	88	...	107

The low Rabi duty on the Western Jumna Canal is due to there being very little demand for water, and to supplies having to be run for navigation purposes. The discharge tables have been revised where necessary, and the duty for 1887-88 is based on the revised tables.

16. The Miscellaneous Receipts for the last five years are given in the following table:—

Year.	Miscellaneous Receipts.
	R
1883-84	2,35,631
1884-85	2,08,141
1885-86	2,73,568
1886-87	2,28,470
1887-88	3,13,700

There has been a considerable rise in mill rents on the Bári Doáb and Sirhind Canals, in navigation receipts on the Western Jumna and Sirhind Canals, and in receipts from plantations on a number of the Canals.

17. The Chenáb Canal was opened for irrigation in July 1887, and water was readily taken, but as described in para. 198 of the Chief Engineer's Review, the low level of water in the river and the unexpectedly heavy deposits of silt at the head of the Canal were unfavorable to successful results, and it was considered necessary to remit the assessments on the whole of the Kharíf crop. At present the supply in the Canal fails at a time when water is urgently required both to mature the Kharíf crops and to prepare the land for Rabi sowings, and it appears that a command of supply, which can only be secured

by a weir across the river, is needed for the successful development of this project.

18. Complete statistics of the working of the Native States Branches of the Sirhind Canal have not yet been received, but the available information is contained in the following table:—

Areas irrigated.

	Patiala.			Nabha.			Jind.			Total.		
	Kharíf.	Rabi.	Total.	Kharíf.	Rabi.	Total.	Kharíf.	Rabi.	Total.	Kharíf.	Rabi.	Total.
	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.
Ultimate area .	109,379	123,343	232,722	11,514	12,983	24,497	9,943	11,213	21,156	130,836	147,539	278,375
Actual areas.												
1886-87 . .	5,651	42,269	47,920	704	5,895	6,599	1,892	7,396	9,288	8,247	55,560	63,807
1887-88 . .	27,032	50,949	77,981	3,828	5,105	8,933	3,756	5,871	9,627	34,616	61,925	96,541

As soon as complete figures are received, accounts showing the balances of revenue and charges will be prepared and kept up.

19. Projects were submitted during the year for the Sirsa Branch of the Western Jumna Canal and for a Perennial Canal from the left bank of the Jhelum River.

Surveys were also started for an Inundation Canal from the left bank of the Chenáb River near Chiniot to irrigate the low-level lands of the Jhang District.

20. His Honor the Lieutenant-Governor considers that the results shown by the report are eminently satisfactory. As has been shown, the estimated value of crops irrigated by the canals is higher by 117 lakhs than the estimate for the previous year; the profits have also improved by six lakhs, and are now equal to a return of 4 per cent on Capital outlay. The area irrigated, which has been gradually developing, is now more than a third larger than it was five years ago. Sir J. Lyall wishes to congratulate Colonel Home and the officers of the Irrigation Department generally on these excellent results, which are due, no doubt, in large part to their skill, activity and careful management.

By order of the Hon'ble the Lieutenant-Governor,

F. J. HOME, *Lieut.-Col., R.E.,*

Offg. Joint-Secretary to Government, Punjab,
Public Works Department, Irrigation Branch.

Statement showing the Financial Results of Irrigation Works in the Punjab up to and for the year 1887-88, the Revenue Account being based on the Collections for the year.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

CIVIL WORKS.

Irrigation.

REVENUE REPORT OF IRRIGATION WORKS IN THE BOMBAY PRESIDENCY (EXCLUDING SIND) FOR 1887-88.

No. 30 I., dated Calcutta, the 22nd February, 1889.

RESOLUTION—By the Government of India, Public Works Department.

Read—

Letter from the Government of Bombay, Public Works Department, No. 144 W.I.—2065, dated the 13th December 1888, forwarding the above Report, and the Resolution of the Local Government reviewing it.

OBSERVATIONS.—The Capital outlay which has been incurred on works in the Deccan and Guzerat, of which Capital Accounts are kept, is shewn in the following statement :—

		Number of Works.	Expenditure, 1887-88. Direct.	Indirect.	Total.	Total expenditure, direct and indirect, to end of 1887-88.
			₹	₹	₹	₹
MAJOR WORKS.						
Protective Works .	In operation	3	4,21,740	10,375	4,32,115	65,01,871
	In abeyance	2	975	18	993	1,00,315
TOTAL .		5	4,22,715	10,393	4,33,108	66,02,186
Productive Works . In operation .		7	92,688	3,886	96,574	1,03,70,773
MINOR WORKS.						
(Of which Capital and Revenue Accounts are kept.)	In operation	25	22,393	1,661	24,054	57,03,621
	Under construction.	1	19,419	534	19,953	1,39,589
	In abeyance	1	1,912	54	1,966	1,84,613
TOTAL .		27	43,724	2,249	45,973	60,27,823
GRAND TOTAL .		39	5,59,127	16,528	5,75,655	2,30,00,782

This expenditure took place principally on the Nira canal (₹4,06,847), which was nearly completed, and on the Mutha canal, on which ₹71,017 was expended.

2. The sanctioned estimates of the works included in the above statement aggregate about 233 lakhs of rupees, of which 230 lakhs have been expended.

The following statement shews the progress which has been made in the execution of the different classes of works :—

	Sanctioned. Miles of Canals.	Sanctioned. Miles of Distributaries.	Completed. Miles of Canals.	Completed. Miles of Distributaries.
MAJOR WORKS.				
Protective Works	145	169	113	160
Productive Works	269	172	263	169
MINOR WORKS.				
Of which Capital and Revenue Accounts are kept	191	136	184	136
TOTAL .	605	477	560	465

Exclusive of the Nilgund and Parsul Tanks, of which the statistics are not given in Tables I. A. and II. A.

3. The discrepancy in the number and nomenclature of the Minor Works, which was noticed in the Resolution of the Government of India in the previous year's report, has been removed. But the nomenclature adopted in Forms I. A. and II. A. and the order in Form I. C. are not uniform with that on pages i and ii. It will be more convenient if, in future years, the list of these works is kept in one uniform order in all statements and each work is known by a permanent number; the protective and not the productive works heading the list. It is also noticed that the working expenses which are given in the detailed reports (para. 12, page 12, for instance) often do not agree with the figures given in the statistical statements (Form I. C.).

4. The following statement shews the actual financial results of the year :—

	Number of works.	Gross Revenue of 1887-88. Direct.	Indirect.	Total.	Working Expenses of 1887-88. Direct.	Indirect.	Total.	Net Revenue.	Percentage of Net Revenue on Total Capital Outlay.
		₹	₹	₹	₹	₹	₹	₹	₹
Major Works—Protective .	3	17,912	...	17,912	36,771	1,582	38,353	—20,441	*Nil.*
„ „ Productive .	7	2,53,423	5,454	2,58,877	1,31,824	5,687	1,37,511	1,21,366	1·19
Minor Works of which Capital and Revenue Accounts are kept .	25	62,308	4,348	66,656	65,323	3,198	68,521	—1,865	*Nil.*
TOTAL .	35	3,33,643	9,802	3,43,445	2,33,918	10,467	2,44,385	99,060	0·43

N. B.—The indirect receipts represent a share in the Land Revenue; and of these only the portion which pertains to Major Works appears in the Finance Accounts. The indirect charges, which mainly represent a hypothetical liability for Leave and Pension Allowances, do not appear in the Finance Accounts. A debit is also made in the working expenses for collection charges by Civil Officers (₹12,778) of which ₹3,335, the portion pertaining to Minor Works, do not appear in the Finance Accounts.

These results cannot be considered satisfactory. A reference to Statement I. C., attached to the Report, shews that out of the ten Major Works which are now in operation, only four covered their working expenses of the year, and none of them covered the interest charges. The net earnings of the seven productive works were practically the net earnings of the Mutha Canal, ₹1,21,827; of the remaining six, two just earned enough to cover the loss on the four deficit canals. Among the Minor Works, thirteen covered their working expenses and the others worked at a loss; the losses being, on the whole, ₹1,865 greater than the profits.

5. The Irrigation Revenue actually collected within the year is composed of the following items :—

	No. of Works.	Water-rates.	Share of Land Revenue.	Total Irrigation Revenue, 1887-88.	Total Irrigation Revenue, 1886-87.	Plantations.	Water-power. (a)	Miscellaneous.	Total.	Deduct refunds.	Grand Total Revenue Collected. 1887-88.	1886-87.
		R	R	R	R	R	R	R	R	R	R	R
Protective	3	12,134	...	12,134	10,821	1,136	3,450	1,223	17,948	36	17,912	13,461
Productive	7	1,46,188	5,454	1,51,642	1,58,136	12,041	3,600	(b) 91,623	2,58,906	29	2,58,877	2,57,796
Minor	25	57,745	4,348	62,093	59,158	3,402	...	1,451	66,946	290	66,656	63,211
Total	35	2,16,067	9,802	2,25,869	2,28,115	16,579	7,050	94,302	3,43,800	355	3,43,445	3,34,468
Deduct—Refunds	...	...	...	355	1,114	...	...	...	...	...	...	...
Total	...	...	...	2,25,514	2,27,001	...	...	...	...	...	...	...
Area irrigated	...	...	...	46,187	42,628	...	...	...	...	...	...	...
Rate per acre	...	...	...	4·88	5·32	...	...	...	...	...	...	...

(a) On the Mutha and Gokak canals.
(b) Of this, R87,012 is collected on the Mutha Canal.

The amount collected under the head of Water-rates is slightly less in 1887-88 than in 1886-87, because a larger amount of arrears was collected in the previous year. The assessment on account of water-rates was R2,19,545, against R1,88,803 in 1886-87, an increase of R30,742.

6. The Minor Works, of which Capital and Revenue Accounts are not kept, gave the following financial results :—

	Gross Revenue.	Working Expenses.
	R	R
Direct	4,182	1,25,790
Indirect	5,19,271	52,299
Total	5,23,453	1,78,089
Net Revenue	3,45,364	

Here Indirect Receipts mean a share in Land Revenue, and Indirect Expenses mean a share in Civil Collection Charges. Neither figure appears in the Finance Accounts. The share of Land Revenue credited to Irrigation is about two-thirds of the whole.

The improvement in net Revenue, which has now reached R3,45,364, is considerable: the corresponding figure for the previous year was R2,69,140, and in 1885-86 R2,55,131.

7. The areas irrigated by the different classes of works are compared with those of the three preceding years in the following table :—

	1887-88.	1886-87.	1885-86.	1884-85.
Major Works.	Acres.	Acres.	Acres.	Acres.
Protective Public Works	11,471	7,625	16,135	2,677
Productive „ „	19,701	21,187	26,107	21,609
Minor Works.				
For which Capital and Revenue Accounts are kept	15,015	13,816	17,208	15,369
Total	46,187	42,628	59,450	39,655

With reference to the descriptions of crops that have been grown on irrigated land, it appears from the report that there has been a falling off in wheat, jowar and ground-nut which is attributed to seasonable rainfall; there has, on the other hand, been for some years past a steady increase in sugarcane which is satisfactory; the areas irrigated in 1885-86, 1886-87 and 1887-88 were 4,100, 5,239 and 7,032 acres respectively. The increase in this valuable crop has been the chief factor in raising the average rate per acre of the assessed water revenue, direct and indirect, from R4·65 last year to R4·96 in the year under review. On the Mutha Canal, where sugarcane cultivation has increased by about 1,000 acres, the rate has risen from R8·67 to R11·51. This is the highest rate paid, except on the Dambal tank, where 58 acres pay R17·84 per acre; on the other hand, the three protective canals pay only R1·45 per acre, water being given free on about one-seventh of the area irrigated, in order to encourage the practice of irrigation.

The areas irrigated by minor works, of which only Revenue Accounts are kept, were—

	Acres.
1887-88	143,926
1886-87	141,856
1885-86	124,221
1884-85	140,635

8. The following statement compares the Working Expenses of the year under review with those of the two previous years :—

	Number of Works.	1887-88. Establishment for Revenue Management.	Maintenance Establishment.	Civil Charges for collection.	Works and Repairs.	Miscellaneous, Plantations and Tools and Plant.	Indirect Charges.	Total.	1886-87. Total.	1885-86. Total.
		R	R	R	R	R	R	R	R	R

Total	35	38,872	35,901	12,778	1,34,610	11,757	10,467	2,44,385	2,39,417	2,10,686
Area irrigated	...	...	...	...	...	...	...	46,187	42,628	59,530
Per acre irrigated	...	...	...	...	...	...	...	5·29	5·61	3·54
Minor Works of which only Revenue Accounts are kept	...	82,495		52,299	42,177	1,118	...	1,78,089	2,47,601	2,54,841
Area irrigated	...	...	...	...	...	...	...	1,43,926	1,41,856	1,24,221
Rate per acre	...	...	...	...	...	...	...	1·23	1·74	2·05

Except for the last class of work, the rates shewn in the above table are extremely high, and compare very unfavourably with the similar rates in other provinces of India. The excessive rate is, perhaps, partly due to the comparatively smallness of the individual projects, but in the main, to the fact that the area actually irrigated is only a small fraction of the area irrigable by the works. The Protective Works in 1887-88 irrigated only five per cent. of the area irrigable, the Productive Works fifteen per cent. and the Minor Works about ten per cent. As long as only a small portion of the water available is utilised, while expenditure has to be incurred on keeping up works and distribu-

taries for the supply of a much larger quantity of water than the cultivators will take, so long the Bombay Irrigation Works must continue to be a source of loss to the Government.

9. The total charge for establishment paid for in the Public Works Department has been reduced from R3,52,765 in 1886-87 to R2,73,181 in the present year. This is a reduction of 22 per cent., which is explained by the Government of Bombay as being due to the amalgamation of duties and reductions effected by orders issued in August and September 1887. These orders were only in operation during a portion of the year, so that the results of the current year may be expected to be better than those of the past. This establishment is distributed among the three heads of expenditure in the manner shewn in the margin. The charge to Capital is regulated by a percentage on the outlay on works, together with some special establishment solely employed on construction. The distribution of the remainder between the 35 works on which Capital Accounts are kept and the minor works on which only Revenue Accounts are kept is apparently based on certain hypothetical ratios on the outlay on works and on the revenue collected, but the exact mode in which the calculation is made will be the subject of separate enquiry.

	1886-87.	1887-88.
	R	R
Capital . . .	1,53,143	1,16,213
Works for which Capital and Revenue Accounts are kept . . .	75,985	74,773
Works for which no Capital Accounts are kept . . .	1,23,637	82,495
TOTAL .	3,52,765	2,73,481

Besides this establishment, the Department is debited with a share of the cost of the Civil establishments employed in collecting the Revenue; this share is calculated at 5 per cent. on water-rate and 10 per cent. on the irrigation share of the Land Revenue. The debit amounts to R12,778 (as already shewn) on the 35 larger works, and R52,299 in the case of the minor works for which only Revenue Accounts are kept.

10. The Chief Engineer, in paras. 10 and 11 of his report, alludes to the causes which produce the present state of chronic deficit in the accounts of the Irrigation works, and comments briefly on the hopes of improvement arising from better organisation and more systematic working, and from a revision of the settlement which shall credit the Canal Department with a share of enhanced Revenue due to the irrigability of the land, even when the occupiers do not use the water. But he admits that the construction of many of the works is so faulty that they can never work at a profit, and that they must either be realigned or abandoned. It is noticed that the Government of Bombay has still under consideration the question of the revision of the water-rates which was referred to by the Government of India in the Resolution on the Report of 1886-87. In the opinion of the Government of India this is a matter that should receive immediate and earnest attention, and unless the Government of Bombay sees its way to securing a larger revenue, it should be prepared to consider whether a remedy may lie in closing or making over to the management of the District authorities such works as it may find impossible to maintain under the present system, with a fair prospect of satisfactory financial results.

11. The attention of the Government of Bombay is drawn to the desirability of illustrating the report in future by separate maps of the more important canals, and a general map shewing the locality of the different works. It would be convenient that each work should receive a definite number, which should be adhered to in all the statements submitted, and the order of which should be followed throughout in the arrangement of the Report.

12. The Report, with the review of the Government of Bombay, was received by the Government of India on the 17th December 1888. The Report of the previous year was not received until the 10th February 1888. This improvement in the date of submission is satisfactory, and it is hoped that in future years the Report may reach the Government of India by the 15th November, when it is due.

ORDER.—Ordered, that copies of this Resolution and of the Report be forwarded to the Finance and Commerce and the Revenue and Agricultural Departments for information.

Ordered also, that copies of this Resolution be forwarded to the Government of Bombay for information and guidance, and that copies of the Report and of the Resolution be forwarded to the Local Governments and Administrations in the Public Works Department, noted in the margin, for information.

The Governments of Madras, Bengal, the North-Western Provinces and Oudh, and the Punjab.
The Chief Commissioners, Central Provinces and Burma.
The Foreign Department, for communication to the Resident at Mysore and Coorg.
The Resident at Hyderabad.
The Agents to the Governor General for Central India and Rajputana.

Ordered further, that this Resolution, and the Resolution by the Local Government, be published in the Supplement to the *Gazette of India*, and that copies of this Resolution be forwarded to Her Majesty's Secretary of State for India.

J. G. FORBES, *Colonel, R.E.*,
Offg. Deputy Secy. to the Govt. of India.

Revenue Report of Irrigation Works in Deccan and Gujarat for 1887-8 — Review of the.

No. 144 W. I.—2065 OF 1888.

Public Works Department. BOMBAY CASTLE, *13th December 1888.*

Letter from the Chief Engineer, Central Division, No. 2765, dated 7th November 1888.

Submits the Revenue Report of Irrigation Works in the Deccan and Gujarat for 1887-88, Parts I and II, with the necessary statements.

RESOLUTION.—No additions were made to the number of works in operation during the year. The list has been re-arranged and now includes in all 35 projects of which* 23 are entirely new projects undertaken within the last 25 yaars: † 6 are restorations of old works: ‡ 5 are improvements to old tanks, and the remaining§ work is a storage tank to supplement the supply to an old irrigation system which has been further improved by extensions of branches and otherwise.

* Nos. 1, 3 to 11, 13 to 15, 17, 19, 20, 22, 23, 26 to 29 and 33.
† Nos. 12, 16, 18, 21, 25 and 32.
‡ Nos. 24, 30, 31, 34 and 35.
§ No. 2.

2. The gross area under command of these 35 works, for which Capital and Revenue Accounts are kept, is shown in Statement IV. E as 911,129 acres, of which 480,021 acres are shown as the net area irrigable at present, as compared with 456,816 acres in 1886-87.

3. The operations of the year may be briefly summarized as follows:—

Class I.—Works for which Capital and Revenue Accounts are kept:—

Capital expenditure		R 5,75,655
Area irrigated		Acres 46,187
Revenue	Assessments	R 3,49,512
	Realizations	„ 3,43,445
Working expenses		„ 2,44,385
Net revenue calculated on assessments		„ 1,05,127
Do. do. on realizations		„ 99,060

Class II.—Works for which only Revenue Accounts are kept :—

Area irrigated	Acres 1,43,926
Revenue receipts	R5,23,453
Expenditure	„ 1,78,089
Net revenue	„ 3,45,364

Total—

Area irrigated	Acres 1,90,113
Revenue receipts	R8,66,898
Working expenses	„ 4,22,474
Net revenue	„ 4,44,424

4. The Capital outlay was principally on Protective works, as will be seen from the following table which also shows the outlay to the end of the year :—

Major Works—	During year.	To end of year.
	R	*R*
Productive Works	96,574	1,03,70,773
Protective Works	4,33,108	66,02,186
TOTAL MAJOR WORKS	5,29,682	1,69,72,959
Minor Works	45,973	60,27,823
GRAND TOTAL	5,75,655	2,30,00,782

The outlay includes that on the Chankapur and Maladevi Tanks, and on the second section of the Gokak Canal, which are still in abeyance, and that on the Parsul Tank, a small storage scheme in progress, and as such not included in the list of projects in operation, referred to in para. 1.

5. The financial results of the year by main heads were as follows :—

	Area irrigated.	Revenue realized.			Working Expenses.	Net Revenue.
		Direct Receipts.	Share of Land Revenue.	Total.		
CLASS I.	Acres.	*R*	*R*	*R*	*R*	*R*
WORKS FOR WHICH CAPITAL AND REVENUE ACCOUNTS ARE KEPT.						
Productive Works	19,701	2,53,423	5,454	2,58,877	1,37,511	1,21,366
Protective Works	11,471	17,912	...	17,912	38,353	—20,441
Minor Works	15,015	62,308	4,348	66,656	68,521	—1,865
TOTAL	46,187	3,33,643	9,802	3,43,445	2,44,385	99,060
CLASS II.						
WORKS FOR WHICH REVENUE ACCOUNTS ONLY ARE KEPT.						
Minor Works	143,926	4,182	5,19,271	5,23,453	1,78,089	3,45,364
GRAND TOTAL	190,113	3,37,825	5,29,073	8,66,898	4,22,474	4,44,424

The total shows an increase in area irrigated of 5,629 acres, and in total revenue of R15,689. The working expenses show a decrease of R64,544, and the net revenue an increase of R80,233.

6. The most important feature in this comparison is the decrease in working expenses which amounts to 13 per cent. The details are as follows :—

	Class I.		Class II.	Total.
	Increase.	Decrease.	Decrease.	Decrease.
	R	*R*	*R*	*R*
Works	1,188	...	2,990	1,502
Repairs	3,559	...	24,888	21,329
Establishment	...	1,212	41,142	42,354
Tools	895	...	1,021	126
Refunds	...	...	224	224
Total in Public Works Department	4,730	...	70,265	65,535
Collection charges	429	...	—753	—1,182
Indirect charges	...	191	...	191
TOTAL	4,968	...	69,512	64,544

Two thirds of the decrease is thus due to reduction in establishment charges which effected a saving of R42,354, but to show correctly the extent of economies under this head affecting the finances of the works now under consideration, the debits to Capital should also be taken into account; these amounted to R1,16,213, as compared with R1,53,143 in the previous year, showing a reduction of R36,930 and raising the total saving in establishment charges to R79,284. This is due to the amalgamation of duties and reductions effected under the orders of Government, issued in August and September 1887, which were thus in operation for only a part of the year, so that still further reductions may be anticipated in the figures for the current year, which should have an important effect in improving the financial results of the works.

7. Taking all class I works together, there was an increase in area irrigated as compared with the previous year of 3,559 acres. The average rainfall was 26·35 inches as compared with 28·81 inches in the previous year. The increase in area was principally on the Mhaswad Tank (2,517 acres) and Nira Canal (1,066 acres), both Protective Works. The revenue *assessments* during the year show an increase of R46,037 and the realizations an increase of R8,977, as compared with 1886-87. The increase in assessments amounts to 15 per cent.

8. The working expenses show an increase of R4,968 or 2 per cent., as compared with the previous years. Details have already been given (para. 6). The explanation given in para. 10 of the Chief Engineer's report furnishes satisfactory reasons for this increase.

9. The unrealized balance of direct revenue at the close of the year was R29,851, as compared with R23,739 at the close of 1886-87. The outstandings are principally on the Mutha Canals (R16,775) and Krishna Canal (R7,219), and the attention of the Collectors of Poona and Satara respectively should be drawn to the matter.

10. The principal crop irrigated was wheat, 9,122 acres, or slightly less than in the previous year. Sugarcane shows a considerable increase, namely, 7,032 acres, as compared with 5,239 acres in 1886-87. Rice too shows a steady improvement in area, the figures for five years being—

	Acres.
1883-84	1,618
1884-85	2,304
1885-86	3,166
1886-87	4,294
1887-88	5,811

This crop is irrigated principally in the two works in Gujarat, the Hathmati Canal and Khari Cut. There was an increase in the area of bajri irrigated,

4,021 acres, as compared with 2,976 acres in 1886-87. The estimated value of the crops irrigated is shown at R29,16,633.

11. The details of the assessments were as follows:—

	Water rates.	Other receipts.	Total.
	R	R	R
Productive Works	1,48,066	1,15,053	2,63,119
Protective Works	16,691	5,912	22,603
Minor Works	54,788	9,002	63,790
Total	2,19,545	1,29,967	3,49,512

12. The average water-rates per acre irrigated were:—

	1887-88.	1886-87.
	R	R
Productive Works	7·52	6·16
Protective Works	1·15	1·34
Minor Works	3·65	3·47
Total	4·75	4·43

Water was given free for an area of 1,229 acres on the Mhaswad Tank, owing to the recent opening of the works.

The question of the revision of water rates referred to in para. 8 of the Chief Engineer's report is being separately dealt with.

13. The following is a detailed statement of the assessments under other receipts:—

	1887-88.	1886-87.
	R	R
Plantations	16,620	13,431
Water-power	7,050	...
Miscellaneous	96,195	91,690
Share of Land Revenue	9,802	9,551
Total	1,29,967	1,14,672

The receipts from plantations again show satisfactory improvement. The item 'water-power' is a new one. Of the increase under 'Miscellaneous,' R5,244 is in the item water-supply to Poona. The figures under this head for water-supply of Sholapur and Karad should be shown separately in future reports. The omission was noticed in the review of last year's report.

14. The interest account has been revised in accordance with the orders of the Government of India of July 1887, and now includes interest at 4 per cent. per annum on the outlay to the end of the previous year, *plus* half the outlay of the year itself. The charge on account of Productive works calculated on this basis amounted in 1887-88 to R3,94,332, against which the net revenue realized was R1,21,366; the loss was thus R2,72,966, whereby the interest account was increased to R54,49,930. No credit is afforded in this account for the saving effected by the Mutha Canal in former outlay for the supply of water to troops and Government Departments in Poona: during the year this saving amounted to R22,096.

The net revenue shows a decrease, as compared with the previous year, of R2,232, due principally to the outlay on special repairs to the Krishna Canal, which work shows in consequence a deficit of R2,223, instead of a credit of R8,965 as in 1886-87. The principal work of this class, the Mutha Canals, shows satisfactory improvement, the net revenue each year for the past four years having been—

	R
1884-85	66,349
1885-86	83,181
1886-87	1,07,329
1887-88	1,21,827

Under Protective Works the several projects in operation have not had time to develope, and the year's operations show a deficit of R20,441, and the total amount at charge in the interest account was thereby increased at the end of the year to R14,10,109.

15. Part II of the report dealing with Class II works, those for which only Revenue Accounts are kept, is meagre and affords little information. The figures of outlay from contribution and Patphála funds are not shown, nor is the decrease in expenditure on repairs commented upon. As shown in para. 6, that decrease amounted to R24,888, of which R3,073 was in Khandesh and R9,054 in Belgaum and Darwar—districts not affected by the orders amalgamating Irrigation and Public Works charges. In Ahmedabad, on the other hand, where the charges have been amalgamated, the outlay was larger than in the previous year, while in Kaira and Surat it was less. Attention should again be drawn to the especial instructions to Superintending Engineers to see that the maintenance of works of irrigation is as carefully supervised as formerly, and that there is no sacrifice of efficiency.

16. The most satisfactory features of the year's operations are—

(*a*). The increase of 8 per cent. in area irrigated by Class I works.

(*b*). The increase of 15 per cent. in the assessed revenue from works of that class, as compared with 7 per cent. in the previous year.

(*c*). The reduction in the establishment charges from R3,52,765 to R2,73,481, or by 22 per cent.

17. The report was submitted a fortnight earlier than last year. Copies, with copies of this Resolution, should be forwarded to the Government of India and the Secretary of State.

ADMINISTRATION REPORT OF IRRIGATION WORKS IN THE MADRAS PRESIDENCY FOR 1887-88.

No. 33 I., dated Calcutta, the 26th February 1889.

RESOLUTION—By the Government of India, Public Works Department.

Read—

Administration Report of Irrigation Works in the Madras Presidency for 1887-88.

OBSERVATIONS.—The irrigation works of Madras are divided into four classes. Among "Major Works" there is one Protective Work, the Rushikulya Canal, which is still under construction, and nine Productive Works, of which one, the Barur Tank, though not finished, has begun to bring in Revenue; and one, the Periyar Project, is only just commenced. The "Minor Works for which Capital and Revenue Accounts are kept" are seven in number: four of these supply irrigation; one, the Buckingham Canal, is purely for navigation purpose, and two are incomplete and almost in abeyance. The third class, "Minor Works, of which neither Capital nor Revenue Accounts are kept," and the fourth class, "Agricultural Works," are comparatively small and very numerous. It is with the first two classes that the Report for 1887-88 and this Resolution are mainly concerned: of the two latter classes, the most important statistics will be given at the close of the Resolution. The first class of works—the major works—are provided for out of Imperial Revenues with reference both to Capital and Revenue Expenditure. The other three classes of works are entirely provincialised.

2. The following statement shows the Capital Expenditure of the year 1887-88 for the construction of works of the first two classes mentioned in the preceding paragraph:

	Number of works.	Capital expenditure during the year.			Capital expenditure to end of the year.		
		Direct.	Indirect.	Total.	Direct.	Indirect.	Total.
		₹	₹	₹	₹	₹	₹
Major Works.							
Protective Works . . .	1	2,54,571	22,346	2,76,917	8,04,761	1,75,029	9,79,790
Productive Public Works . .	9	11,17,227	1,02,032	12,19,259	4,81,16,694	35,95,304	5,17,11,998
Minor Works and Navigation.							
Works for which complete Capital and Revenue Accounts are made up	5	3,54,543	14,698	3,69,241*	1,08,41,560	9,03,649	*1,17,45,209
Grand Total .	15	17,26,341	1,39,076	18,65,417	5,97,63,015	46,73,982	6,44,36,997

* The above figures (which are taken from Statement I. B.) exclude expenditure on some projects which are under investigation.

The expenditure was mainly incurred as follows:

On the Godaveri Canal two lakhs of rupees, and on the Kistna Canal nearly five lakhs, were spent on carrying out towards completion the drainage works and

distributaries; on the Sangam Anicut System a lakh and a half were spent on the extension of branch channels; the Periyar Project was commenced during the year, and 2¾ lakhs expended on it; the Buckingham Canal absorbed a little over three lakhs, of which Rs. 80,391 were a grant from Protective Funds, and 2¾ lakhs were spent on the Rushikulya Canal (the one protective work in the table above), which is not completed or opened for irrigation.

3. The following table shows the past year's receipts and expenditure (according to the Madras system of calculation, to be explained later on) on the eight Productive and five Minor Works which are in active work, though not yet quite completed to the full extent of which they are capable, the capital outlay up to date, the Net Revenue, and the return it gives on the capital expended:

Canal.	Capital outlay.	Gross Revenue received in 1887-88.			Working expenses.			Net Revenue.	Percentage of return.
		Direct.	Indirect.	Total.	Direct.	Indirect.	Total.		
	₹	₹	₹	₹	₹	₹	₹	₹

Madras Water-supply . .	17,54,045	9,446	9,114	18,560	16,347	616	16,963	1,597	0·09
Total .	1,17,45,209	77,967	1,75,085	2,53,052	2,25,839	6,599	2,32,438	20,614	0·17

In these figures (which are based on Statement I C) Refunds are deducted from Gross Revenue, and the 5 per cent. charge for Civil collection is included in working expenses. The indirect receipts are the share of Land Revenue credited to Canals and the indirect charges are the liabilities for pension, &c.

4. The return on the Capital laid out on Productive Works, 6·2 per cent., is very large, the profits on the Godaveri, Kistna and Cauvery Canals being more than sufficient to cover the loss on the one unsuccessful work of this class, the Karnul Canal. Among Minor Works the Pelandorai has suffered from a breach of the Anicut, but is expected to recover itself. The Buckingham Canal is not likely ever to be a remunerative work.

5. But though these returns are compiled from a commercial point of view, to shew the revenue receipts and charges which have reference to the capital invested by Government in the works, they do not pretend to show the real total receipts and expenditure. In the areas commanded by all these irrigation systems, except the Karnul and Buckingham Canals, irrigation was practised in a more or less imperfect manner before the time of the British rule, and the object of these accounts is to separate the old irrigation receipts and charges as they stood before the Irrigation Department took the works in hand, from those increased sums which have resulted from scientific treatment and the outlay of Imperial Funds.

6. The system under which the Irrigation Revenue in Madras is calculated is an intricate one. In the Godavery and Kistna Deltas, the land is assessed as if it were unirrigated, and a water-rate is added varying according to the crop sown. Elsewhere the land is assessed as irrigated, and a credit is given to Irrigation, being the difference between the actual Land Revenue and what

would have been paid if the land had been dry. To this figure is added a "share of enhanced Land Revenue," of which the following details are given in the separate Canal Reports:

	₹
Assessment on Waste Lands brought under irrigation	4,02,918
Increment to Land Assessment after lands were brought under irrigation (Kistna Canal only)	40,438
Miscellaneous	16,778
TOTAL	4,60,134

From the irrigation revenue is deducted the estimated amount of Revenue due to old irrigation before the works constructed by the British Government came into operation (Rs. 29,25,803); and a further charge of 5 per cent. is deducted from the balance, to represent the cost of collection which is borne by the Civil Department. The figures for the year drawn out on the above system are as follows:

	Productive Works (8).	Minor Works for which Capital Accounts are kept (4).
	₹	₹
Water-rates and share of Revenue due to Irrigation Revenue	66,96,378	3,11,683
Share of Enhanced Revenue	4,45,270	14,864
Less refunds	2,227	...
TOTAL REVENUE DUE TO IRRIGATION	71,39 421	3,26,547
Deduct share due to old Irrigation	27,74,341	1,51,462
Balance credited to Irrigation Department	43,65,080	1,75,085

7. In the following table are shewn the true irrigation receipts, calculated as above, derived from each canal, the area irrigated and the return per irrigated acre. The figure shewn in the third column is the area "effectively irrigated," both for first and second crops, *i. e.*, on which crops have been raised and on which no remission of Revenue has been allowed; not the area "occupied," as it is called in the Report, which is slightly larger and includes all the land reached, although imperfectly, by irrigation.

	Revenue derived from irrigated lands.		Area irrigated.		Rate per acre.	
	1887-88.	1886-87.	1887-88.	1886-87.	1887-88.	1886-87.
	₹	₹	Acres.	Acres.	₹	₹
Godaveri	20,59,064	19,97,781	608,696	598,236	3·3	3·3
Kistna	14,66,935	12,68,736	387,505	337,419	3·8	3·7
Cauvery	29,06,773	30,92,972	937,634	1,006,626	3·1	3·0
Penner	2,55,939	2,51,061	64,987	63,480	3·9	3·9
Srivaikuntham	1,86,791	1,90,929	40,632	40,078	4·5	4·7
Sangam	2,06,786	1,85,943	51,893	47,421	3·9	3·9
Karnul	55,028	53,432	21,927	22,676	2·5	2·3
Barur	2,105	...	492	...	4·2	...
TOTAL PRODUCTIVE WORKS	71,39,421	70,40,854	2,113,766	2,115,936	3·3	3·3
Chembrambakum	48,868	57,380	16,186	19,402	3·0	2·9
Palar	2,47,673	2,45,730	91,479	89,763	2·7	2·7
Pelandorai	9,741	9,271	3,763	3,632	2·5	2·5
Madras	20,265	20,788	9,235	9,684	2·1	2·1
TOTAL MINOR	3,26,547	3,33,169	120,663	122,481	2·7	2·7
GRAND TOTAL	74,65,968	73,74,023	2,234,429	2,238,417	3·3	3.2

The Godaveri and Kistna systems shew a steady increase. The only considerable decrease in area and revenue is in the case of the Cauvery Canal, and is due to the transfer of some irrigation works in the Trichinopoly District to the head of Minor Works.

8. The "Direct" Revenue is made up of the following items; the receipts are compared in the table below with those of the preceding year:

	1887-88.	1886-87.
	₹	₹
Navigation	2,04,546	1,77,694
Plantations	7,589	7,307
Miscellaneous	53,988	56,138
Less Refunds on the Buckingham Canal	—1,624	—68
TOTAL	2,64,499	2,41,071

Plantations bring in a Revenue only on three canals, the Godaveri, Kistna and Cauvery. Navigation is a source of Revenue on four canals, and the receipts and expenditure are compared in the table below:

	Length of navigable channel.	Receipts.		Expenditure.		Value of goods.	Ton-mileage.
		1887-88.	1886-87.	1887-88.	1886-87.	1887-88.	1887-88.
	Miles.	₹	₹	₹	₹	₹	
Godaveri	456	1,04,374	88,505	70,435	66,892	1,64,20,527	7,626,847
Kistna	281	31,798	26,909	58,246	91,406	1,90,84,039	11,981,285
Karnul	190	1,873	4,518	26,276	16,887	5,27,412	...
Buckingham	262	66,501	57,762	99,657	79,783	1,62,05,222	21,356,278
TOTAL	1,189	2,04,546	1,77,694	2,54,614	2,54,968	5,22,37,200	40,964,410
Corresponding figures of previous year	...	...	...	...	...	3,60,53,703	31,559,419

The receipts have increased, but navigation is still a very losing business on the Karnul and Buckingham canals.

9. The following table shows the details of the working expenses of the 13 chief canals, the totals of which have already been shewn in para. 8:

	Productive works.	Minor works.	TOTAL.	Productive.	Minor.	TOTAL.
	1887-88.		1887-88.	1886-87.		1886-87.
	₹	₹	₹	₹	₹	₹
Establishment, Public Works Department.	3,93,223	46,486	4,39,709	3,80,675	44,875	4,25,550
Establishment, collection charges by Civil Officers.	2,15,551	8,754	2,24,305	2,05,379	9,298	2,14,677
Works and Repairs	5,91,267	1,66,963	7,58,230	5,89,524	1,61,787	7,51,311
Tools and Plant and Miscellaneous.	79,256	3,636	82,892	77,478	3,714	81,192
Indirect	62,761	6,599	69,360	59,839	6,282	66,121
TOTAL	13,42,058	2,32,438	15,74,496	13,12,895	2,25,956	15,38,851

The outlay on Works and Repairs and on Tools and Plant and Miscellaneous is very nearly the same as in the preceding year. The other items are establishment charges, and are more or less hypothetical. The second item is the charge of 5 per cent. before referred to, calculated on the water-rates and Irrigation revenue collected by Civil Officers, after deducting the old Irrigation receipts.

The "Indirect" figures are a calculation of liability incurred for the furlough pay and pensions of the staff employed.

10. To obtain the real cost of working, however, it is necessary to add in the old "Maintenance charges" which correspond to the "old Irrigation receipts," and are an allowance made for the expenditure which used to be incurred on Irrigation before the present Government works were constructed.

These old maintenance charges are partly fixed and partly varying. The fixed charges are—

	₹
Extensions and improvements	10,039
Repairs	1,30,972
Establishment at 23 per cent. on works	32,433
Indirect charges for ditto	4,540
	1,77,984

The varying charges are—

	₹
Collection charges at 6 per cent. on indirect Revenue (on the Productive Works alone)	1,66,161
Indirect charges on above at 14 per cent.	23,305
Tools and Plant	2,115
	1,91,881
TOTAL* OF OLD MAINTENANCE CHARGES	3,69,865

Adding this figure to the total charge given in the preceding para., Rs. 15,74,496, the real sum total of the working expenses on these thirteen canals, including the old maintenance figures, amounted to Rs. 19,44,361.

11. Calculated in this way the working expenses of the irrigating Canals (the Buckingham Canal is here excluded) fall at the following rates per irrigated acre. The irrigated area is taken at the same figure as in para. 7.

	Total Working Expenses.	Irrigated area.	Rate per acre.
	₹	Acres.	₹
Godaveri	6,53,930	608,696	1·07
Kistna	4,17,779	387,505	1·07
Cauvery	3,44,805	937,634	0·36
Penner	42,982	64,987	0·66
Srivaikuntham	35,296	40,632	0·86
Sangam	57,987	51,893	1·11
Karnul	1,43,686	21,927	6·55
Barur	129	492	0·26
TOTAL PRODUCTIVE WORKS	16,96,094	2,113,766	0·80
Chembrambakum	4,359	16,186	0·26
Palar	71,495	91,479	0·78
Pelandorai	13,741	3,763	3·65
Madras	21,828	9,235	2·36
TOTAL MINOR	1,11,423	120,663	0·92
GRAND TOTAL	18,07,517	2,234,429	0·80
TOTAL FOR 1886-87	18,02,441	2,238,417	0·80

* On page 67 the total is given as Rs. 3,42,020, but the indirect charge s are omitted there.

12. The total sum charged as Public Works establishment during the last two years is shown below :

	1887-88. ₹	1886-87. ₹
Capital Account	2,74,668	2,89,869
Working Expenses of Major and Minor Canals of which Capital Accounts are kept	4,39,709	4,25,550
Minor works of which separate accounts are not kept	4,48,949	5,32,690
Agricultural works	73,091	68,083
	12,36,417	13,16,192

The system under which this charge is made is a complicated one. The Executive staff of the Public Works Department in Madras is for the most part employed indiscriminately on Irrigation works, on Military Works and on Imperial and Provincial Civil Works, and the cost is distributed according to certain rules between these different heads; the charges for Direction and Accounts are similarly divided. The only establishment which is solely engaged in Irrigation work is the staff employed in the survey and preparation of the Tank Restoration schemes and the Dowlaishwaram Workshops; the whole of its cost is charged against those works. Under the first head, Capital Account, a charge is made for establishment amounting to 23 per cent. on the outlay on works excluding cost of land. Under the second head the charge is the result obtained from the application of three ratios; 23 per cent. on expenditure, 10 per cent. on direct Revenue (*i.e.*, Navigation, Plantations and Miscellaneous) collected by Canal Officers themselves, and 6 per cent. on indirect Revenue (*i.e.*, the canal share of the Land Revenue deducting old Irrigation receipts and deducting what is shown as share of enhanced Land Revenue).

On the Minor Works (other than Tank Surveys) and Agricultural Works, it is calculated in the same way at 23 per cent. on expenditure and 10 per cent. on direct Revenue, but no charge is here made for indirect Revenue except in the case of old Maintenance Works, and there it is only made for the Major Productive Works, not for the indirect Revenue of the Minor Works.

13. The result of this method of calculation is that no conclusion can be drawn from the figures above, showing the increase or decrease of the charge for establishment, as to whether there has been any real rise or fall in the costliness of the staff. The charges debited to the Irrigation Department depend almost entirely on an arbitrary ratio calculated on the amount spent on Works and Repair, and on the direct and indirect payments made for the use of water. The cost of the whole Public Works Establishment of the Province must be known before it can be seen whether there has or has not been an increase in any particular year.

14. Turning now to the separate Canal reports, the following items are selected as of general interest :

Floods and Breaches.—One flood in the Cauvery River was of exceptional height. It rose to 13 feet above the crest of the weir in October 1887—a height which has only been exceeded by a few inches on two previous occasions. No injury resulted from this flood. In the other rivers the floods were generally moderate. Some damage was done in the central division of the Godaveri system by breaches in river embankments. There was also a breach in a flood bank near Lock 15 on the Karnul Canal.

Barur Tank.—This tank was opened for irrigation to a small extent in October 1887. The work is not complete. The area irrigated and the revenue derived were both insignificant.

Periyar.—Funds for the commencement of the Periyar Project were first allotted in August 1887. The work was commenced almost immediately, and ₹2,70,995 for direct charges was expended during the year. An officer was specially deputed to England to arrange for the purchase of the necessary plant. The estimates for the head works were revised without any increase in the total sum ;

the forecast statements of the project were also recast, with the result that the ultimate revenue is expected to give a return of 8·53 instead of 7·80 per cent., which was formerly estimated.

Karnul.—The financial position of this Canal is in the last degree unsatisfactory; not only did the Revenue fall off during the last year, and the irrigated area decrease, but at no time since the Canal was bought by Government has it been worked except at a heavy loss. There is a loss both in navigation and irrigation, and while the irrigation return is R2·5 per acre irrigated, the cost of working expenses falls at Rs. 6·5 per acre: and there is no prospect of any material improvement. The total estimated value of the crops raised under irrigation, Rs. 2,48,330, does not largely exceed the sum which it costs Government to supply the water. The revenue expenditure on works and repairs alone (Rs. 1,11,780) is nearly double the income earned by the Canal. It would appear that it might be economical to close the canal as an irrigating system, merely keeping it in repair so as to be ready to be put in working again if a season of drought should create a sudden demand for the water.

The Governor General in Council trusts that the Government of Madras will consider this question, and formulate such proposals as may seem to them expedient with a view to putting a stop to the constant drain on the Treasury which the maintenance of the Canal on its present footing entails.

15. The third class of works mentioned in para. 1—Minor Works of which neither Capital nor Revenue Accounts are kept are numerous and mostly small; their exact number is nowhere stated. They are divided into three classes; those of which a continuous record is kept individually, in nine Districts; those of which a continuous record is kept collectively, in 19 Districts; and those which are under Revenue Management, in 19 Districts.

Here again, as elsewhere, the accounts are kept in an intricate fashion. The statements on pages 72—3 and page 61 shew that the area irrigated by these works (both crops included) was 3,607,321 acres, the Irrigation Revenue Rs. 94,74,377, and the Expenditure Rs. 17,19,698, or, deducting the Tank Restoration scheme, referred to later on, Rs. 13,59,643. But this expenditure includes the old maintenance charges, Rs. 3,42,020, already dealt with as belonging to the Major and Minor Works, while it does not appear that the old irrigation receipts, Rs. 29,25,803, have been included in the Irrigation Revenue. Again, the expenditure as stated on pages 72—3 and page 61 does not include indirect charges (Rs. 35,008) nor the 5 per cent. charge for Civil collections, Rs. 4,73,719 (*vide* page 7, columns 13 and 8); and adding these the total amount of working expenses, as calculated on the Madras system, appears to be Rs. 15,26,350. Of this total, Rs. 4,80,678 is debitable to the works under Revenue Management and the balance, Rs. 10,45,672, to those under Public Works Department Management.

16. The true figures appear therefore to be as follows:

	Irrigated area.	Irrigation revenue.	Rate per acre.	Working expenses.	Rate per acre.
		R	R	R	R
Works managed by Public Works Department Officers	1,910,230	55,62,653	2·91	10,45,672	·54
Works managed by Revenue Officers	1,697,083	39,11,724	2·30	4,80,678	·28
TOTAL MINOR WORKS	3,607,321	94,74,377	2·62	15,26,350	·42

The total area irrigated was made up of 2,794,534 acres of first, and 812,757 acres of second crop. These figures shew an improvement of about five per cent. both in area and in revenue over those of the previous year. The receipts from these works were made up of R11,192 of direct, and R94,63,185 of indirect revenue.

17. The total area irrigated by all the works in Madras in 1887-88 may be thus stated:

	First crop.	Second crop.	TOTAL.
	Acres.	Acres.	Acres.
Major Works	1,985,739	128,027	2,113,766
Minor Works (of which Capital and Revenue Accounts are kept)	91,918	28,745	120,663
Minor Works (of which Capital and Revenue Accounts are not kept)	2,794,534	812,757	3,607,321
TOTAL	4,872,191	969,529	5,841,720
Corresponding figures of 1886-87	4,738,409	985,234	5,723,643

18. During the year under review the organization of the system of working under the Tank Restoration Scheme was remodelled. Five survey parties were organized during the year to work in the districts of Madura, Chingleput, Kurnul, Coimbatore and North Arcot, respectively. These parties, for an expenditure of R87,388, surveyed and prepared schemes for restoring 210 works at an estimated expenditure of R2,15,662; it was estimated that the area irrigated by the works in question would be increased from 26,645 to 29,680 acres, and the revenue from R1,10,824 to R1,36,376. On carrying out the schemes prepared in previous years, R2,72,667 were expended; for this sum about 200 tanks were restored and 25 anicuts and 100 sluices were completed, or nearly completed. The grant for this class of work in 1888-89 has been fixed at 6½ lakhs of rupees, and it has been arranged that the actual financial results obtained by the expenditure shall be recorded.

19. The fourth class of works, called "Agricultural" in Madras are mainly undertaken for the purpose of directing and controlling the rivers; during the year under review R4,04,598 was expended and R8,896 direct revenue received on account of these works. The former figures contained an adjustment of R2,193 on account of Imperial charges, so that the actual expenditure was R4,06,791 which was distributed as follows:

	R
River conservancy	1,06,464
River embankments	2,98,689
Drainages	718
Miscellaneous	920
TOTAL	4,06,791

These figures include Establishment and Tools and Plant. Rather more than one-third of the expenditure was on original works and the remainder on repairs.

20. The Report was received by the Government of India on the fourth of December 1888 or six days later than in the previous year. The general arrangement of the Report and its complete illustration by maps are excellent; but it would be convenient if each canal system had its formal number and if that number were adhered to throughout in the statements and in the order of the separate Reports. The Madras Government will be separately addressed regarding the complexity of the accounts which has been noticed in this Resolution, if on further consideration any mode of simplifying them suggests itself to the Government of India.

ORDER.—Ordered, that copies of this Resolution and of the Report be forwarded to the Finance and Commerce and Revenue and Agricultural Departments, for information.

Ordered also, that copies of this Resolution be forwarded to the Government of Madras for information and guidance, and that copies of the Resolution be forwarded to the Local Governments and Administrations in the Public Works Department, noted in the margin, for information.

The Governments of Bombay, Bengal, the North-Western Provinces and Oudh, and the Punjab, in the Public Works Department.
The Chief Commissioner of the Central Provinces.
The Agent to the Governor General for Rajputana.

Ordered further, that this Resolution be published in the Supplement to the *Gazette of India*, and that copies of this Resolution be forwarded to Her Majesty's Secretary of State for India.

J. G. FORBES, *Colonel, R.E.*,
Offg. Deputy Secretary to the Govt. of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Summary for January, 1889.

As pointed out in last month's report, January is usually an unsettled month in Northern India. This is due to the occasional occurrence of cold-weather storms, the chief characteristics of which were stated in last month's report. The great majority of these storms belong to two classes. The first class comprise those depressions which first show themselves in the north or north-west of the Punjab. They are frequently deep depressions, but are generally short-lived, and are either stationary or move slowly in a south-east direction along the Himalayas for a short period and then fill up. They give more or less heavy rain to the Punjab and snow to the adjacent mountains, but their effects are chiefly confined to Upper India. The second class of storms include the usually much shallower depressions, which appear on the north-west frontier in Upper Sind, and which probably, in the great majority of cases, advance from Beluchistan. As compared with the previous, they are frequently remarkably persistent and traverse the whole breadth of the Peninsula, passing sometimes into Upper Burma, where they fill up or disappear. Occasionally small depressions also form in Central India or the Central Provinces. These are generally very shallow and are less persistent than the previous, but usually march in the same general east-south-easterly or easterly direction, and disappear after an existence of one to three days. They sometimes give moderately heavy rain to Central India, the Central Provinces, and Behar. Several disturbances have occurred during the month, the majority of which were unusually feeble, and gave little rain in Upper India. The two last disturbances of the month were however large and gave fairly general rain to the greater part of Northern India, but were chiefly remarkable as being examples of double storms, that is, of the combination of a storm of the first and of the second class, originating separately and co-existing as independent disturbances for some days.

At the commencement of the month fine weather with normal anti-cyclonic conditions prevailed in Upper India. On the morning of the 4th a small and very shallow depression, similar to those of the preceding month, appeared in Sind. It moved eastwards during the day, filling up with its advance, but caused some disturbance in the Punjab Himalayas on the 5th, which gave light to moderate snow to the higher elevations. Anti-cyclonic conditions were again established in Upper India on the 6th and continued until the 8th. Weather was slightly unsettled during this period in Southern India, and many thunderstorms occurred in Southern India, which gave light to moderate rain in South Madras, Mysore and Ceylon, on the 6th, 7th and 8th. The barometer began to fall briskly on the

afternoon of the 8th in Upper Sind and Beluchistan, and a very shallow depression was formed on the 9th, which followed the same course as the previous disturbance and gave moderately heavy snow to the Punjab Himalayas on the 10th, and brought the snow line down to below 9,000 feet. The weather continued somewhat disturbed in Northern India for three days longer, and light showers fell at the hill stations on the 12th, and in Behar, Chutia Nagpore and Central Bengal on the 13th. Pressure increased steadily until the 17th, when very strongly marked anti-cyclonic conditions, with fine clear, cool weather and strong westerly or north-westerly winds, prevailed over the whole of Northern India. The highest pressures of the month were recorded on the morning of the 17th, the absolute maximum being 30·38″ at Peshawar. No change of importance occurred until the 22nd, when the barometer fell briskly in North-Western India. The disturbance then initiated differed considerably in character from the previous. There were two separate areas of disturbance in which the barometer fell rapidly, and more or less general rain was received. The first included the Punjab Himalayas and adjacent plains from Sealkot to Roorkee, and the second comprised the greater part of Rajputana and Indore. The disturbance in the Punjab passed away after giving moderate snow in the hills on the afternoon of the 23rd and light showers in the adjacent plains. That which originated in Rajputana drifted during the next two days eastward into East Bengal and Burma, and gave moderate general rain to the North-Western Provinces, Central India, and light local showers in Behar, Bengal, and Assam. A short interval of fine weather followed until the afternoon of the 27th, when the first large and important cold-weather storm of the present season was initiated. It was like the previous a double disturbance. It consisted in part of a shallow depression which passed into Sind from Beluchistan on the 28th and advanced in an east-south-east direction across the head of the Peninsula during the next three days into Upper Burma, to which it gave cloudy weather on the 1st February. It apparently filled up very slowly in that area and gave low pressure in Burma until the 5th. The appearance of this depression in Sind on the 28th was followed on that day by a very rapid fall of the barometer in the North Punjab and the formation of an independent deep depression, the centre of which was to the north of Rawalpindi and Peshawar on the morning of the 29th. It intensified considerably during the day and marched slowly to the south-east along the hills, to which it gave very stormy weather and heavy snowfall during the next forty-eight hours. A very rapid rise of the barometer set in on the 31st, and the depression filled up very rapidly. This deep depression very largely modified the distribution of pressure over the whole of North-Western and Central India, and obscured the shallow depression in Central India on the 29th and 30th; but with the disappearance of the former on the 31st, the latter again became clearly marked and formed the chief feature of the weather during the next two days. The double disturbance gave a large general and much needed supply of rain to the greater part of Northern India, including the Punjab, Rajputana, Central India, the North-Western Provinces and Behar, and showers in Bengal. A considerable portion of the rainfall due to the storms occurred on the 1st and 2nd in Bengal, and hence only a part of the rainfall due to the disturbance is included in the returns of the past month.

Pressure.—The mean pressure of the month for the whole of India was ·017 above the normal. The excess was greater at the hill stations than at the adjacent plain stations. Relatively to this general state pressure was in defect over the whole of Northern and Central India (with the exception of the North Punjab). The line of greatest relative depression was defined by the following stations :—

	Relative deficiency.
Deesa	·020″
Nowgong	·015″
Allahabad	·016″
Patna	·018″
Dhubri	·019″

A second axis of depression apparently ran along the Himalayas, being indicated by the negative anomalies at the following stations :—

Gorakhpur	·021″
Mooltan	·012″
Ludhiana	·027″

Pressure was relatively to the general state in excess over the whole of the Peninsula. The relative excess was greatest at the following stations, *viz* :—

Belgaum	+·022
Bellary	+·023
Salem	+·029
Trichinopoly	+·020
Madura	+·021
Cochin	+·025

A reference to last month's report will show that the more prominent features of the pressure variations of the month of January were identical in character with those of the previous month, but were smaller in amount. It will thus be seen that the larger pressure abnormal variations or anomalies have been remarkably persistent for some time, and the probable distribution of the cold-weather rains of the months of January and February, based on this strongly marked distribution of pressure given in last month's report, has been fully confirmed up to the present date.

Temperature.—In consequence of the unusual prevalence of anti-cyclonic conditions, and the absence of large cold-weather storms until the end of the month, the mean temperature was considerably in excess. The following table gives the variation of the mean maximum, minimum and daily temperatures from their normal values in different districts :—

	Maximum. °	Minimum. °	Mean. °
Burma	+1·8	+0·5	+1·1
Bengal	+1·7	+1·7	+1·7
North-Western Provinces	+2·3	+2·0	+2·1
Punjab	+1·0	+0·7	+0·8
Berars	+5·2	+2·2	+3·7
Central Provinces	+5·0	+3·0	+4·0
Central India and Guzerat	+3·4	+3·0	+3·1
Rajputana	+2·3	+1·5	+1·9
Bombay	+3·0	+0·1	+1·5
Madras	+0·5	—1·0	—0·2

Hence the figures have been most prominent in the Central Provinces and Central India, where the mean temperature of the month was four degrees above the normal.

One of the more remarkable feature of the month has been the frequent inversion of the normal temperature relations between the plains and hill stations. On about eleven nights of the month the lowest night or minimum temperatures of the hill stations were very considerably higher than those of the neighbouring stations in the Gangetic plains. It will suffice to give one example—

Hill Stations.	Minimum or lowest Temperature of night of 2nd January. °	Plain Stations.	Minimum or lowest Temperature of night of 2nd January. °
Murree	49·3	Rawalpindi	36·9
		Dera Ismail Khan	36·9
		Sealkot	41·1
Simla	48·4	Lahore	37·2
		Sirsa	39·2
Ranikhet	50·0	Delhi	40·1
		Roorkee	36·6
		Meerut	39·0
		Bareilly	39·8
		Agra	43·6
		Allahabad	42·7
		Benares	41·9
		Patna	46·9
		Calcutta	48·8
		Silchar	47·5

These figures show that not only was the night temperature of the hill stations from 8° to 13° higher than that of the adjacent plains, but that it was actually higher than over the whole Gangetic plain down almost to the sea in Bengal.

This, it may be added, is one of the most remarkable examples that have occurred during recent years of the peculiarity of the weather at the hill stations in the months of December and January, *before the occurrence of heavy snow.* The only satisfactory explanation appears to be that the high night temperatures are due to an indraught of comparatively warmer air to the hills from the strata above the plains at the level of the hills.

Rainfall.—The preceding remarks have stated the conditions under which the rainfall of the month has occurred. The cold-weather rainfall of the present season up to date has been abundant over the whole of Northern India, but the first heavy rainfall of the season occurred somewhat later than usual. The rainfall of the month has been especially abundant in the Punjab, North-Western Provinces, Behar and Northern Bengal, which areas have received at least double their normal amounts. The excess is relatively greatest in Behar and North Bengal. The Central Provinces, Berar, Khandesh, Guzerat and Orissa which usually receive some light showers were practically rainless during the month. No rain fell in Lower Burma and the Konkan. In the remaining districts, including Rajputana, Assam, Lower Bengal, Malabar, Mysore and Madras, the rainfall of the month was not large in amount, and was either normal or slightly in defect.

The following table shows the actual average rainfall and the normal rainfall of the month of the twenty-one districts into which the country is divided, so far as it is indicated by the telegraphic reports of a few stations in each district :—

Districts.	Number of Stations.	Normal average rainfall in January.	Actual average rainfall in January 1889.	Difference from the average in January 1889.
Punjab, West	7	1·48	3·04	+1·56

JOHN ELIOT,

Offg. Meteorological Reporter to the Government of India.

SIMLA,

The 13th February 1889.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and prospects of the Crops.

Madras.—*For week ending 23rd February, 1889.*—Rainfall very slight in Madura, Tinnevelly, Nilgiris, and Malabar, none elsewhere. More rain wanted in Ganjam, Vizagapatam, Trichinopoly, Tinnevelly, Coimbatore, and Salem. Standing crops generally good, but withering in parts of Coimbatore, Cuddapah, Trichinopoly, and Tinnevelly; affected by disease in parts of Salem and Bellary. Pasture deficient in Coimbatore, Salem, and Tinnevelly. Prices rising in eight districts, falling in six, and stationary in others. General prospects favourable except in Ganjam and Coimbatore. Labourers employed on last day of week on Rushikulya works 5,138, on Gopalpur Canal 8,593.

Bombay.—*For week ending 27th February, 1889.*—Slight rain in parts of Karachi and Shikarpur. Late crops in three taluks of Surat and Poona and one of Kanara unsatisfactory; exotic cotton and wheat in parts of Dharwar blighted and cotton in one taluka of Baroda damaged. Opium in Baroda good. Harvesting progressing generally. Probable outturn of wheat in Broach three annas and of early crops in Dharwar nearly eight annas on average. Fodder scarce in Khandesh and Nasik and in parts of Poona, Ahmednagar, and Kathiawar. Prices of food-grains rising in two talukas of Nasik.

Bengal.—*For week ending 26th February, 1889.*—Fairly general rain, accompanied by local thunderstorms, fell over the greater part of the province on the 19th and 20th instants. The condition of the *rabi* and poppy crops is generally satisfactory, although in Behar some damage has been done by rain and hail. In Sarun the hail at the end of January did considerable damage to poppy, the loss in the Sewan sub-division being estimated at 750 maunds and in the Sudder sub-division at 100 maunds. The *rabi* crops are ripening, and the earlier sorts are being harvested. Poppy is in flower, and the collection of opium has begun in some districts. The sugarcane harvest is proceeding with a fair outturn. Spring rice seedlings are growing well. Preparation of lands for the jute and autumn rice sowings is in active progress. In Behar *cheena* and *mung* are being sown and are germinating satisfactorily, and the cultivation of indigo lands is going on. The latest report regarding the affected tract in the Patna division shows that rain has done much good in providing employment in the fields for the working populaton; that it has not yet been found necessary to give gratuitous relief except upon a very limited scale; and that the grain-stocks continue to be sufficient and the prices stationary with a downward tendency.

North-Western Provinces and Oudh.—*For week ending 27th February, 1889.*—Rain fell during the week in most districts. Some injury to crops from rust; sunshine needed. Prospects fair. Sugarcane-pressing continues. Poppy in flower. Prices have fallen in several districts, but fodder scanty and dear in places.

Punjab.—*For week ending 27th February, 1889.*—Rainfall good and general throughout the Province. Prices unsettled in Peshawar, stationary in Hissar, Amballa, Jullundur, and Amritsar, falling elsewhere. Ploughing for *kharif* commenced in Hissar, Jullundur, Lahore, and Shahpur. The crops have been greatly improved by recent rain. Certain crops damaged in Amballa and Amritsar in consequence of heavy rains. Stock cattle are reported healthy. Fodder sufficient except in Hissar and in parts of Multan and Rawalpindi. Supply improving in Dera Ismail Khan. Poppy weeding in progress in Jullundur.

Central Provinces.—*For week ending 27th February, 1889.*—Weather cloudy and warm. Crops benefited by recent rain in Saugor. Hail has injured

gram crop in Hoshangabad, prospects otherwise unchanged. Reaping of winter crops commenced.

Burma.—*For week ending 23rd February, 1889.*—Slight rain fell in Moulmein and Amherst, Bhamo and Myadaung. Crop prospects remain good. The price of paddy shows very little fluctuation.

Assam.—*For week ending 27th February 1889.*—Weather warmer. Slight rain in almost all districts. Sowing of early rice continues. Mustard is still being gathered and sugarcane pressed. Tea doing well.

Mysore and Coorg.—*For week ending 27th February, 1889.*—No rain in Mysore. Standing crops in good condition, except in parts of Kolar district where want of rain is felt. Sugarcane being planted in parts. Outturn of crops harvested generally fair. Pasturage diminishing in parts of the Kolar and Mysore districts. Prices slightly fallen in the Kadur district.

No standing crops in Coorg.

Berar and Hyderabad.—*For week ending 27th February, 1889.*—Harvesting of *rabi* crops in progress in Berar. Prospects favourable. Agricultural stock in good condition. Fodder and water insufficient in some districts. Prices the same as last week.

No rain during the week in Hyderabad. Harvesting of *rabi* crops commenced. Weeding of *tabi* crops continues. Prices stationary.

Central India.—*For week ending 27th February, 1889.*—Baghelkund and West Malwa report this week that fall of rain is now sufficient. Crops in Bhopal somewhat damaged by heat. Condition of agricultural stock improved in Goona and Bundelkund. Prices of food-grains falling in Neemuch.

Rajputana.—*For week ending 27th February, 1889.*—Rainfall partial. Agricultural operations satisfactory. Standing crops good; slightly damaged in Kishengurh and Dholepur. Agricultural stock good. Pasturage or fodder sufficient, except in Marwar, Kherwara, Dholepur and parts of Jeypur. Prices steady generally.

Nepal.—*For week ending 21st February, 1889.*—Slight rain with hail during the week. Weather cloudy. Wheat progressing. Potatoes are being sown.

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

RAILWAY TRAFFIC.

No. XLIV of 1888-89.

APPROXIMATE STATEMENT OF GROSS RECEIPTS AND EXPENSES OF INDIAN RAILWAYS.

N.B.—As regards the figures in column *Total Receipts from 1st April to date*, audited figures have been used, as far as possible.

Latest Return received.	Railways.	Total mean length open.	Receipts for week ending 4th February, 1888. Total.	Per mile open.	Total mean length open.	Receipts for week ending 2nd February, 1889. Total.	Per mile open.	Total Receipts from 1st April, 1887, to 4th Feb., 1888. Total.	Per mile open per week.	Total Receipts from 1st April, 1888, to 2nd Feb., 1889. Total.	Per mile open per week.	Total Increase in 1888-89.	Total Decrease in 1888-89.

(*a*) Includes the Cawnpore-Achnera State Railway.
(*b*) Includes the Katni-Umaria State Railway.
(*c*) Includes the Bellary-Kistna State Railway.
(*d*) Includes Bhopal-Itarsi State Railway from 1st January, 1889.
(*e*) Total receipts from 15th September, 1887, to 4th February, 1888.
(*f*) Includes the Amritsar-Pathankot and Rajpura-Patiala State Railways.
(*g*) State from 1st January, 1889.
(*h*) Includes the Northern Bengal, Dacca, Kaunia-Dharlla and Assam-Behar State Railways.

M. C. BRACKENBURY, *Major, R.E.*,
Offg. Deputy Secretary.

CALCUTTA,
The 28th February, 1889.

Printed and published for the GOVERNMENT OF INDIA, *at the Office of the* SUPERINTENDENT OF GOVERNMENT PRINTING, INDIA, *No. 8, Hastings Street, Calcutta.*

SUPPLEMENT TO

The Gazette of India.

No. 10.] CALCUTTA, SATURDAY, MARCH 9, 1889.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and prospects of the Crops.

Madras.—*For week ending 2nd March, 1889.*—Rainfall slight in Tinnevelly, Chingleput, Madura, Coimbatore, Nilgiris, Salem, and Malabar; none elsewhere. More rain wanted in Ganjam, Vizagapatam, Cuddapah, Trichinopoly, Tinnevelly, Coimbatore and Salem. Standing crops generally good, but withering in parts of Cuddapah, Trichinopoly and Coimbatore; affected by disease in parts of Bellary. Pasture deficient in Coimbatore, Ganjam and Salem. Prices rising in ten districts, falling in two and stationary in others. General prospects favourable, except in Ganjam and Coimbatore. Labourers employed last day of week on Rushikulya works 5,591, on Gopalpur Canal 8,949.

Bombay.—*For week ending 6th March, 1889.*—Rain in parts of Upper Sind Frontier. Late crops in three talukas of Surat and one of Kanara unsatisfactory; exotic cotton in parts of Dharwar blighted. Opium in Baroda good. Harvesting progressing generally. Probable outturn of late crops in Satara from eight to twelve annas. Fodder scarce in Khandesh and Nasik and in parts of Poona and Kathiawar. Prices rising in two talukas of Nasik.

Bengal.—*For week ending 5th March, 1889.*—More rain is reported to have fallen in Behar, in Central and Western Bengal, and in Chota Nagpore. Prospects of the *rabi* harvest are generally fair, although in Behar some damage has been done by rain and hail. The damage to the poppy crop is considerable in the Gya, Sarun, and Monghyr districts. Ploughing and early sowings are proceeding satisfactorily. Spring rice is doing well. The latest report regarding the affected tract in the Patna division shows that the state of affairs in Chumparun and Mozufferpore is stationary, and that in Durbhunga distress in a few spots has become more intense.

North-Western Provinces and Oudh.—*For week ending 6th March, 1889.*—Weather generally clear and seasonable. *Rabi* crops ripening. Prospects fair. Poppy mostly in flower and promises well. Markets well stocked. Prices falling. Condition of cattle good. Fodder somewhat scanty.

Punjab.—*For week ending 6th March, 1889.*—Slight rain in Ferozepore, Rawalpindi, and Shahpur districts. Prices unsettled in Delhi, falling in Hissar, Ferozepur, Rawalpindi, and Shahpur, stationary elsewhere. Ploughing for *kharif* commenced. Crops are flourishing throughout the Province. Crops are reported to be greatly damaged in some villages of Lahore district by hail and floods and also in some places in Shahpur by floods. Stock cattle are healthy. Fodder sufficient except in Hissar. Poppy weeding in progress in Jullundur.

Central Provinces.—*For week ending 6th March, 1889.*—Slight rain in the northern districts. Winter crops being harvested. Outturn poor in northern and eastern districts. Good elsewhere. Cattle generally in fair condition. Prices rising in Saugor and steady in other districts.

Burma.—*For week ending 2nd March, 1889.*—Slight rain fell in Bhamo, none elsewhere. Crop prospects good. The price of paddy shows little fluctuation.

Assam.—*For week ending 6th March, 1889.*—Weather seasonable. Slight rain in Lakhimpur and Naga Hills. Sowing of early rice progressing. Pressing of sugarcane and gathering of mustard still continues. Rain wanted for tea.

Mysore and Coorg.—*For week ending 6th March, 1889.*—No rain in Mysore. Condition of crops good, though wet crops in parts of the Tumkur and Kolar districts are reported to have been slightly damaged by insects and want of rain, respectively. Sowing operations still continue, and outturn of crops harvested is favourable. Pasturage and water-supply diminishing in parts of the Mysore and Kolar districts. Prices slightly fallen in the Bangalore district.

Water-supply very scanty especially in South Coorg. No standing crops.

Berar and Hyderabad.—*For week ending 6th March, 1889.*—Harvesting of *rabi* continues. Prospects continue favourable. Cattle healthy. Fodder and water insufficient in some districts. Prices remain steady or show a slight fall.

No rain during the week in Hyderabad. Weeding of hot-weather crops continues. *Rabi* being harvested. Prices stationary.

Central India.—*For week ending 6th March, 1889.*—No change of importance reported this week in condition of crops and weather.

Rajputana.—*For week ending 6th March, 1889.*—Slight rain in Bickaneer. Agricultural operations good. Standing crops satisfactory, except in Kherwara and Kishengurh. Agricultural stock good. Pasturage or fodder sufficient, except in Kherwara, Meywar, Marwar, and parts of Jeypore and Sirohi. Prices rising in Meywar.

Nepal.—*For week ending 28th February, 1889.*—Slight rain during the week with hailstorm. Weather fair. Crops good.

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and prospects of the Crops.

Madras.—*For week ending 9th March, 1889.*—Rainfall slight in Vizagapatam, Tanjore, Trichinopoly, Madura, Tinnevelly, Coimbatore, Nilgiris and Salem; none elsewhere. More rain wanted in Ganjam, Vizagapatam, Cuddapah, Trichinopoly; Tinnevelly, Coimbatore and Salem. Standing crops generally good but withering in parts of Cuddapah, Trichinopoly, and Coimbatore; affected by disease in parts of Bellary. Pasture deficient in Coimbatore, Ganjam, Salem and Tinnevelly. Prices rising in seven districts, falling in five, and stationary in others. General prospects favourable except in Ganjam; improving in Coimbatore. Labourers employed last day of week on Rushikulya works 5,370, on Gopalpur Canal 8,694.

Bombay.—*For week ending 13th March, 1889.*—Slight rain in parts of Poona and Belgaum. Late crops in three talukas of Surat unsatisfactory; exotic cotton in parts of Dharwar blighted; opium in Baroda good, harvesting progressing generally. Probable outturn of cotton twelve annas and of wheat and gram sixteen annas in parts of Kathiawar, and of late crops in Karachi thirteen annas. Fodder scarce in Khandesh and Nasik and in parts of Poona, Ahmednagar, Ratnagiri and Baroda.

Bengal.—*For week ending 12th March, 1889.*—The hot weather has fairly set in, the mornings and evenings, however, being still cool. No rain during the week, but general agricultural prospects generally favourable. The *rabi* harvest is progressing satisfactorily and promises to yield fair results; but in Chota Nagpore, where the crops suffered most from drought, the average outturn will not much exceed eight annas. Opium collections are proceeding, the weather being favourable. Spring rice promising. *Mohua* crop in Chota Nagpore and

Sonthal Pergunnahs has suffered from recent rain and storms, but is still hopeful. Ploughing for early rice and jute is well forward. *Cheena* and other millets are being sown and are coming up well. Sugarcane cuttings are being planted. Distress is apprehended in parts of the Bhaugulpore and Sonthal Pergunnahs Districts. No further account regarding the distressed tracts in the Patna Division has been received.

North-Western Provinces and Oudh.—*For week ending 12th March, 1889.*—Weather clear and getting warm. *Rabi* harvest commenced. Sugarcane-crushing in progress. Poppy crop looks promising. Indigo sowings begun. Supplies sufficient. Prices falling. Fodder scarce in places. Condition of cattle fair.

Punjab.—*For week ending 13th March, 1889.*—No rain. Prices falling in Delhi, Jullundur, Rawalpindi, Shahpur and Peshawar, and stationary in other districts. Ploughing for *kharif* commenced. Prospects of *rabi* crops are generally most promising throughout the Province. The bright weather of the week has been most beneficial. Crops are reported to have been damaged by hot winds in parts of Hissar and by rust in one village of tahsil Chunián in Lahore district. Stock cattle are healthy. Fodder sufficient except in Hissar. Poppy crops progressing in Jullundur.

Central Provinces.—*For week ending 13th March, 1889.*—Winter crops being harvested. Probable outturn of wheat in Saugor and Jabalpur ten annas, in Hoshangabad six annas. Linseed average in Jabalpur. Crops also below average in Chattisgarh. Water scarce in Nimar. Cattle generally in fair condition.

Burma.—*For week ending 9th March, 1889.*—No rain fell during the week Crop prospects on the whole good, though dry-weather crops in Shwegyin want rain. The price of paddy remains much the same.

Assam.—*For week ending 13th March, 1889.*—Weather seasonable Rainfall *nil.* Sowing of summer rice in progress. Pressing of sugarcane still continues. Prospects of tea good.

Mysore and Coorg.—*For week ending 13th March, 1889.*—No rain in Mysore. Standing crops in good condition, except in parts of the Kolar and Tumkur districts, where want of rain is felt. Prospects generally favourable. No material change in prices.

No standing crops in Coorg. Prices of coffee and cardamom rising.

Berar and Hyderabad—*For week ending 13th March, 1889.*—Harvesting of *rabi* crops in Berar continues. Prospects unchanged. Ground is being prepared for the next crop. Agricultural stock generally good. Fodder and water insufficient in some districts. Prices easy.

No rain during the week in Hyderabad. Weeding of hot-weather and harvesting of *rabi* crops continue. Scarcity of water and fodder felt in some parts. Prices stationary.

Central India.—*For week ending 13th March, 1889.*—The following changes are reported this week. Prices of food grains somewhat lower in Bhopal and in West Malwa, but risen in Ali Rajpur in Bhopawar Agency. Condition of crops improved in Baghelkund and West Malwa Agencies.

Rajputana.—*For week ending 13th March, 1889.*—Slight rain in Bikaneer. Agricultural operations satisfactory. Standing crops ripening. Harvest poor in Kherwara. Agricultural stock good. Pasturage or fodder sufficient except in parts of Sirohi, Kherwara, Marwar and Meywar. Prices falling at many places.

Nepal.—*For week ending 7th March, 1889.*—No rain. Weather seasonable. Slight earthquake on the afternoon of the 3rd instant. Agricultural operations are in progress. Prospects of wheat, garlic and onions good.

APPROPRIATION REPORT ON THE ACCOUNTS OF 1887-88.

GENERAL REVIEW.

In the financial statement for this year the revenue was estimated at Rx. 77,460,200 and the expenditure at Rx. 77,443,500, leaving a surplus of Rx. 16,700. No addition was made to existing taxation, but the contracts with the Provincial Governments were revised on the lines recommended by the Finance Committee, and the Famine Insurance Grant was restricted to Famine Relief and the construction of Protective Irrigation Works. The rate of exchange for the year was estimated at $17\frac{1}{2}d.$, and the annual Public Works loan was fixed at $5\frac{1}{2}$ crores, of which $3\frac{1}{2}$ crores was obtained by the investment, at the desire of the Gwalior Council of Regency, of treasure hoarded by the late Maharaja, Scindiah. The situation was one of "unstable equilibrium," but for reasons explained in paragraph 6 of the financial statement, the Government did not consider that it could be avoided in the circumstances. This situation became more unfavourable as the year advanced, owing to a continuance of the military expenditure in Burma at a higher rate than was expected, to diminished proceeds from Opium, to a decline in Railway earnings and to a fall in Exchange. It was necessary to provide against these deficiencies, and the Government accordingly raised the Salt duty and adopted other minor measures. The final results of the year, as compared with 1886-87 as well as with the Budget and Revised Estimates, are explained in the following paragraphs.

2. Some minor changes in the classification of Civil receipts and expenditure that were introduced and partially effected in the Revised Estimate and Accounts of 1886-87 have been fully carried out in 1887-88. These changes relate principally to the adjustment of *malikana* allowances under *2—Assignments*, instead of under *3—Land Revenue*, the separation of *Hill Journey Charges* from other *Tour Charges* and the treatment of *Rents, Rates and Taxes* as a contingent charge of the Department which incurs them. The recoveries from Railways, of the cost of Police supplied to them, are now everywhere adjusted by deduction from expenditure, instead of being credited as revenue.

3. The following summary gives the Budget and Account figures of 1887-88 to be reviewed in this report, and the details will be found in the statements on pages 123 to 136. Throughout the report the figures are tens of rupees (Rx. 1 = ₹10) with the last two figures cut off for the sake of shortness, thus, 149,7 reads one hundred and forty-nine thousand seven hundred tens of rupees:—

Receipts.			Revenue and Expenditure.	Outgoings.	
Budget.	Accounts.			Budget.	Accounts.

Comparison with the year 1886-87.

4. The comparison in respect of revenues is as follows :—

Revenues.	1886-87.	1887-88.	Difference, 1887-88, greater (+) or less (—).
Principal Heads of Revenue	54,482,1	54,781,0	+298,9
Interest	670,5	746,6	+76,1
Post Office, Telegraph, and Mint	2,027,5	2,229,6	+202,1
Civil Departments	1,461,6	1,495,7	+34,1
Miscellaneous	848,3	1,606,1	+757,8
Railways	14,477,8	14,533,3	+55,5
Irrigation	1,656,7	1,714,3	+57,6
Buildings and Roads	727,6	592,3	—135,3
Army Services	985,0	1,060,8	+ 75,8
	77,337,1	78,759,7	+1,422,6

5. Under *Principal Heads of Revenue* the largest difference is in Opium which suffered a further fall during the year. The other heads were satisfactory as noticed in paragraph 12. The large receipts on account of *Interest* were obtained in England where the rate of interest was high and the Secretary of State's balance unusually large. The *Post Office and Telegraph* revenues continue to expand, and in the *Mint* the seignorage receipts were good. The excess under *Miscellaneous* is due chiefly to gain by exchange on transactions of the Subsidized Railway Companies, and in a minor degree to recoveries on account of Upper Burma and to certain unexpected receipts in Bengal. The *Railway* revenue has enlarged with the opening of new lines and the extension of old ones, and a similar improvement has taken place under *Irrigation*, owing to development and extensions chiefly in the Punjab. The decline in *Buildings and Roads* is more apparent than real, as the accounts of 1886-87 included 150,0 realised in connection with the rendition of the Gwalior Fort and Morar Cantonment. The larger sum entered as *Army Services* is the outcome of various causes, the chief being the additions made to the European force.

6. The comparison of the expenditure side is as follows :—

	1886-87.	1887-88.	Difference, 1887-88, greater (+) or less (—).
Direct Demands on the Revenue	9,746,2	9,438,2	— 308,0
Interest	4,310,4	5,441,8	+1,131,4
Post Office, Telegraph, and Mint	2,145,3	2,255,8	+ 110,5
Civil Departments	12,698,5	12,906,4	+ 207,9
Miscellaneous	4,701,1	4,761,1	+ 60,0
Famine	309,0	91,4	— 217,6
Construction of Railways	183,1	80,9	— 102,2
Railways	15,666,4	16,655,7	+ 989,3
Irrigation	2,310,7	2,461,6	+ 150,9
Buildings and Roads	5,201,7	5,451,1	+ 249,4
Army Services	19,525,0	20,417,9	+ 892,9
Special Defence Works	325,6	456,0	+ 130,4
	77,123,0	80,417,9	3,294,9

7. The principal difference in the head *Direct Demands on the Revenue* is in Opium, the expenditure being 304,5 less than last year consequent upon the smaller crop in Bengal. There was also a large saving in Salt caused partly by reduction of establishments and partly by the abolition of the agency system for the sale of Salt. The cost of collecting the Assessed Taxes was 21,5 less than in 1886-87, but Assignments and Compensations were higher by 22,1 and Land Revenue by 22,4. The *Famine* expenditure was small in consequence of the grant for Protective Railways having been withdrawn. The *Construction of Railways* was also small, as the works in progress did not require much expenditure. The charge for *Interest* was greater than in 1886-87, partly because of the additions made to the debt in India and England, but chiefly in consequence of the conversion in England of the 4 per cent. stock into $3\frac{1}{2}$ per cent., which involved the payment of an extra quarterly dividend and other charges. The rise in *Post Office, Telegraph, and Mint* has occurred mainly in the Telegraph Department, and consists largely of stores, the purchase of which was particularly small in 1886-87. The increase is also due to a revision of salaries in the higher grades of the Department and to Exchange. As regards *Civil Departments* the principal excess is in Police, 360,2 of the amount being composed of Upper Burma charges. Next, in point of importance, are the savings of 177,2 and 70,1 under Marine and Political resulting from smaller outlay in connection with Burma and the termination of the Afghan Delimitation Commission. The large sum spent on *Railways* is spread over many heads, but the principal items are the maintenance of the new Frontier lines opened in 1887-88, the fall in Exchange and the interest paid by the Secretary of State on new deposits received from the Bengal-Nagpur Railway Company. The excess under *Irrigation* is caused (1) by greater working expenses following on the additional lengths of canal opened for irrigation ; (2) by a larger charge for interest consequent upon additional capital outlay ; (3) by transfer of the Khusdil Khan Reservoir from Section N. of the accounts to this group ; and (4) by a higher scale of expenditure undertaken from Provincial funds in Bengal. In *Buildings and Roads* large sums have been spent in Upper Burma and on the frontier roads in the Punjab and Beluchistan. The excess in *Army Services* arises mainly in regimental pay, &c., in Commissariat charges, in stores, and in non-effective charges.

Comparison of Accounts with Budget Estimates, 1887-88.

8. The following figures exhibit the differences in the net accounts :—

	Better.	Worse.
Principal Heads of revenue	864,7	...
Interest	...	969,5
Post Office, Telegraph, and Mint	210,0	...
Civil Administration	343,7	...
Miscellaneous	524,2	...
Famine	3,1	...
Construction of Railways	...	5,9
Railways	...	533,0
Irrigation	6,0	...
Buildings and Roads	154,9	...
Army Services	...	1,057,5
Special Defence Works	...	456,0
	2,106,6	3,021,9
Combined Deficit, Imperial and Provincial	...	915,3

9. The difference of 864,7 in *Principal Heads of Revenue* is made up of 652,3 excess receipts and 212,4 saving in expenditure. As stated above in paragraph 5 there was a further decline in the price of Bengal Opium, but the effects were counteracted by improvement in other heads, especially Land Revenue, Stamps and Excise. Part of the increase in Land Revenue was obtained by a per contra charge under Assignments and Compensations, which has exceeded the Budget, but otherwise the expenditure has been kept down and has produced the saving noted above. The amount under *Interest* is largely due to the charges connected with the conversion of the 4 per cent. Stock into $3\frac{1}{2}$ per cents. for which the Budget did not provide. The *Post-Office* has kept very near the estimates, but the *Telegraph* Department shows a larger revenue and smaller expenditure by 125,3 and 24,3 respectively. The *Mint* receipts were good both as regards seignorage on silver and gain on copper coinage. In *Civil Administration* the revenue is better by 70,4 than was expected, and the improvement is spread over all the heads, except Law and Justice—Jails where there is a deficiency in sale-proceeds of Jail manufactures. On the expenditure side there is a net saving of 273,3. The satisfactory result under *Miscellaneous* is due to various causes. On the receipt side there is an excess of 429,1 of which 379,1 is contributed by exchange as explained in paragraph 100. On the expenditure side considerable savings have accrued from various causes. In Political pensions there is a large decrease from the death of the late King of Oudh, but the ordinary pension charges are growing. Under *Railways* the revenue was short by 359,2 owing largely to diminished traffic on some of the principal lines, while the expenditure exceeded the Budget by 173,8 partly on account of the fall in exchange and partly on account of the surplus profits of the Great Indian Peninsula Railway. In *Buildings and Roads* there is an excess of receipts over Budget amounting to 52,8 consisting of various small items. The expenditure account shows a saving of 102,1, but the estimate was too high. The *Army* receipts are better by 163,4 from larger sales of malt liquor, &c., and the charges are greater by 1,220,9. Of this sum 755,3 relates to operations in Burma and the rest to the ordinary military expenditure. The excess in *Special Defence Works* arises from the progress made in frontier roads and defences, but in the Budget these charges were taken as expenditure not chargeable to Revenue and were entered in Section N. of the Account.

10. The Budget estimated for an excess expenditure of 742,9 on the whole account, but this included charges amounting to 759,6 out of past accumulations of Provincial and Local balances, thereby making a surplus in the Imperial account of 759,6—742,9 or 16,7. The accounts, however, show a deficit of 2,028,8 in the Imperial account, and an increase in the Provincial and Local balances of 370,6 instead of a decrease of 759,6 as estimated. The net Imperial expenditure has, therefore, exceeded the estimate by 16,7+2,028,8 or 2,045,5, while the Provincial and Local balances show an improvement over the estimate of 759,6 + 370,6 or 1,130,2. The details of these differences are given below, the sign + meaning better and — worse than estimate:—

	Revenue Side.			Expenditure Side.		
	Imperial.	Provincial.	Total.	Imperial.	Provincial.	Total.
Principal Heads of Revenue	+161,0	+491,3	+652,3	+176,6	+35,8	+212,4
Interest	+60,8	−7	+60,1	−1,029,6	...	−1,029,6

Section A.—PRINCIPAL HEADS OF REVENUE.

1886-87. Accounts.		Budget.	1887-88, Revised.	Accounts.
54,482,1	RECEIPTS	54,128,7	54,555,7	54,781,0

12. The most prominent fact in this group is the continued decline in the *Opium* revenue, which has yielded 427,5 less than was received in 1886-87 and 377,8 less than was expected in the Budget. This is the only head which shows a deficiency. *Land Revenue* is better than last year and the Budget by 133,6 and 251,7, respectively, the principal improvements being in Madras from extended cultivation and favourable seasons, and in Bombay from new settlements and recovery of arrears. Part of the improvement in Bombay however is nominal since there is an equivalent increase under the charge head 2—Assignments and Compensations. The increase in the *Salt* duty has added to the collections under that head, and in *Stamps* there seems to be a general growth of the revenue. The proceeds from *Excise* were large in Burma from the restoration of order in that country, in Bengal from improvement in the condition of the people, in the Punjab from suppression of illicit sales, and in Madras and Bombay from the various causes explained in paragraph 19.

13. Under *Ordinary Revenue* the improvement in India as compared with 1886-87 occurs chiefly in Coorg, and is attributed to the extension of coffee assessments to bané lands on which the berry is produced. The budget was not reached chiefly in consequence of short collections in Ajmere and Beluchistan. The amount entered against the Central Provinces for 1886-87 included some arrears, but those for 1887-88 were nearly as large, owing to enhanced rates of assessments principally in the Chattisgarh Division. The rice crop in Lower Burma was poor as compared with 1886-87, but the receipts were better than expected on account of extended cultivation and assessments, resumption of grants and the restoration of order in the country. The Assam budget was made low, as the agricultural prospects

were not bright at the time. They improved, however, towards the end of the year, and in Sylhet the realizations were unexpectedly large. Special efforts were made in Bengal and the North-Western Provinces and Oudh in 1886-87 to collect all demands within the year, and hence there was little left in the form of arrears to be realised in 1887-88. Apart from this fact, the amounts receivable in 1887-88 do not appear to have been as fully recovered as the corresponding demands in 1886-87. The Punjab revenue was low in consequence of remissions and suspensions which became necessary towards the end of the year owing to the partial failure of the winter rains. In Madras, the land newly brought under cultivation during the year measured six and a half lakhs of acres, which raised the revenue demand by 150,0 and increased the collections. The improvement in that Presidency is also due to the favourable character of the season, the prompt collections in certain districts and advance collections in others, though these were counterbalanced to some extent by a falling-off in Tanjore, Ganjam, Salem and Madura. The increase in Bombay is largely the result of a change of classification, by which receipts formerly classed under the minor head Fisheries and Other Miscellaneous Revenue are now taken under ordinary revenue. A portion of the excess is also attributed to the unexpected recovery of certain arrears in the Broach District and to new settlements in other parts of the Presidency.

14. As regards the other headings, the Bombay budget for *Rent of Resumed Lands* was based on the old survey rates, but the collections in 1886-87 as well as in 1887-88 proceeded on the new scale. These collections are adjusted by *per contra* debit to 2—Allowances and Assignments, where a corresponding increase has occurred as stated in paragraph 29. The *capitation tax* in Burma improved with the increase of population and by assessments on immigrants whose term of exemption had expired. Some reforms were also introduced in the method of collecting the tax. The *sale of proprietary right*, &c., in Bengal during 1886-87 was unusually high, as it comprised some special items which were noticed in last year's report. The Bombay budget comprised items which really belonged to ordinary revenue and have been so classed in the accounts. The India Revised Estimate for the head *Fisheries and Other Miscellaneous Revenue* exceeded the budget, because it provided 11,1 on account of the revenues of the Borey Valley and Khettran country which have been brought into the public accounts for the first time. The actual collections amounted to 7,1. The large proceeds from *fisheries*, &c., in Burma in 1886-87 included heavy arrears which accumulated during the military operations in that country. From Assam it is reported that there was a good increase in the *miscellaneous revenue* partly from higher assessments and partly from advance payments, but the *fisheries* brought in less than was expected, chiefly in Sylhet, and the yield from elephant mahals was also short as half the number of mahals are now allowed rest annually. As explained in last year's report, the decline in Bengal is nominal being due to the recovery of copying fees in stamps. The Punjab revenue was enhanced by greatly increased mutation fees and other miscellaneous items. The mutation fees have accrued from extensive settlement operations in the Province and were not anticipated in the budget. The change of classification noticed above, by which collections formerly classed as miscellaneous are now treated as ordinary revenue, accounts for the variations under the former head in Madras and Bombay.

15. The following Statements A and B give the usual particulars respecting the distribution of the Land Revenue between the Imperial and Provincial Governments. In the case of the Punjab, this distribution is made according to the provincial contract of 1882 which is still in force in that Province, but as regards the other Provinces new contracts have been framed which came into operation on the 1st April 1887. It was explained in paragraph 54 of the report for 1882-83 that the distribution proceeded on the method "of adjusting the total amount of assigned provincial revenues to the total of assigned provincial expenditure by including in the former a calculated proportion of Land Revenue." In the new contracts a share of the land revenue is assigned to the Provincial Government in the same way as the shares from other heads of revenue and expenditure, and then the account is balanced either by making a grant to the Provincial Government should the assigned revenues be deficient, or by taking a contribution from it if the reverse happens. These grants or contributions, as the case may be, are entered in the following statements in the column headed "Contributions, &c.," together with such other amounts as the Imperial and Provincial Governments may have mutually agreed to treat as exceptional items to be withdrawn from the ordinary operation of the provincial contracts.

16. The decline in *Bengal* is due to the average price realised at the opium sales having been less by R41 than was estimated in the budget and in *Bombay* to the revenue from pass fees having been affected, it is understood, by the dealers holding back for higher prices. The Bombay receipts in 1886-87 were abnormally high, as explained in last year's report. The excise revenue was short in the *Central Provinces* owing to a failure of harvests and in *Assam* from decreasing consumption. In the *N.-W. Provinces and Oudh* the budget was too high, but the other provinces report a general improvement, which in the case of *Burma* may be attributed to the quieter state of the country whereby the revenue officers have been able to give more time to excise administration. The following table shows the sales and produce in Bengal and the exports from Bombay:—

Year.	Bengal. Balance in stock on 1st April, Chests.	Bengal. Produce of season, Chests.	Bengal. Chests sold.	Bengal. Average price per chest. ₹	Bengal. Total price.	Bombay. Chests.	Bombay. Rate.	Bombay. Amount.

17. In *India* the increased receipts in Customs and Excise duties are due to development of trade on the opening of the Jhelum Bridge, the Sindh-Sagar Railway, and the Salt Branch of the Jodhpore State line, as well as to the reduction in freight charges to the North-Western Provinces and Sindh markets, but these advantages were more than counterbalanced by a falling-off in the sale of Government salt which was caused partly by the increase in the rate of duty and partly by the abolition of the Agency system for the sale of Sambhar salt which has told most seriously on the collections on account of carriage and freight. The unsatisfactory results in the *Central Provinces* are due to the abolition of the Baragora Salt Agencies, and in *Bengal* to an over-estimate, but there was also in this province a short clearance from bond during the year owing to high prices prevailing at the time. In *Burma*, on the other hand, the realizations are more satisfactory, owing to the large importations which, though affecting the local manufacture, increased the duty. The fluctuations in *Madras* are attributable partly to the Orissa portion of the budget having been too high and partly to the extended substitution of the excise system in place of the Government monopoly, as well as to the introduction of the enhanced rate of duty. In *Bombay* the demand for Kharagoda salt declined in consequence of the abolition of the agencies beyond the Presidency and of the competition of the Pachbudra commodity. On the other hand, the increased rate of duty enlarged the revenue, and this was attended by greater exports by sea and land in consequence of the opening of the Western India Portuguese Railway. It is also reported that a large quantity of salt has been used for fish-curing purposes.

Section A.—PRINCIPAL HEADS OF REVENUE—*continued.*

18. The *India* budget was too low. In the *Central Provinces*, there has been a steady growth of the revenue, for which the budget did not allow as it was supposed that the receipts in 1886-87 were largely the result of special causes. The *Burma* budget for Court-fee Stamps was too sanguine and for Commercial and other Stamps too low. The budget for Upper Burma was necessarily rough. The report from *Assam* shews that the rise of Court-fee Stamps in that Province is largely due to process fees recovered in stamps with reference to arrears of land revenue realised in Sylhet. There has also been some increase in the Assam Valley. The decline in Commercial and other Stamps has also occurred in Sylhet from the impoverished condition of the people owing to floods and bad harvests. The *Bengal* figures indicate a steady development of revenue, although this year there was a specially large receipt on the probate of the will of a Zemindar in Monghyr. There is a progressive rise in the *North-Western Provinces and Oudh* for which neither the revised estimate nor the budget made sufficient allowance. The increase in the Punjab under Court-fee Stamps is ascribable to the institution of several suits for large sums, and in the other Stamps to bad harvests and expansion of trade, while in Madras it is partially accounted for by large sales to a New Bank opened during the year, and by the value of stamps taken in connection with the lease of a large Zemindary. But apart from these special items, there was a great increase in Madras both in judicial and non-judicial stamps, the former being attributable chiefly to greater litigation and the latter to activity in trade. The Bombay figures include a receipt of 8,3 on account of probate duty on the estate of a millionaire, independently of which trade was brisk in that Presidency and the revenue was benefited accordingly.

19. The large Revenue in *India* has accrued chiefly in Bangalore, to which a number of camp followers returned from Burma and where there was a rise in the wages of labourers and workmen generally. This increase of wages extended to Coorg and gave a lift to the excise revenue. There were also arrear collections in Ajmere, but the completion of the railway to Quetta reduced the number of workmen there and so diminished the sale of exciseable articles. The budget omitted to provide for the recovery from the Mysore State of the amount due from it towards the Toddy revenue of the assigned tracts. In the *Central Provinces* bad harvests ruled throughout the year. In *Burma* the more settled state of the country, the high price of paddy, the introduction of revised rules for the sale of liquor, and a better excise administration contributed largely to the increase. In *Assam* the vendors of Country-spirits in the Sibsagar District formed a combination not to sell country-spirits, and no licenses for the sale of country-spirits were therefore put up for sale, rum-shops being substituted. The fall under opium is attributed to a decrease in the use of the drug by the Assamese. The *Bengal* revenue suffered in 1885-86 from the bad agricultural season of that year, but revived in 1886-87. The budget was framed on the experience of 1885-86, but was raised in the Revised according to the facts then available. The Revised however was not reached, as some advance payments were made in 1886-87 and included in the accounts of that year. The *North-Western Provinces and Oudh* had a bad year as regards excise revenue owing to high price of food grains. In the *Punjab* a large number of illicit shops were suppressed and the bids for licenses rose. The budget was too low. The improved receipts in *Madras* under *License and Distillery fees*, &c., have accrued chiefly from an increase in the rates of excise duty on Country-spirits in certain districts, from higher rents for the lease of Toddy and Country-spirits farms, and from better

Section A.—PRINCIPAL HEADS OF REVENUE—*continued.*

administration and preventive arrangements generally. The fall in *Opium* is due to a reaction from excessive bids for opium farms in the previous year. In *Bombay* agreements have been concluded by which the excise arrangements in certain Native States, such as Cambay, Bhandaria, Umeta, &c., have been brought under British management, and toddy was tapped throughout the year, while in 1886-87 the tappers were on strike for the first six months. It is also reported as regards opium that the farmers in Gujarát imported the Doongarpur drug largely for home consumption, owing to a rise in the price of Málwa opium. The budget for other receipts was too high.

20. These rates being raised from the land are affected more or less by the causes which influence the collection of land revenue. In *Burma* the collections last year included large arrears. During the present year a change has been made in *Bengal* in bringing to account the Road-cess Collections which are now partly shown under the minor head Miscellaneous instead of wholly under Road-cess. In the *Punjab* there were arrear realizations and some additional revenue was also obtained from the assessment of land watered by the Sidhnai canal in the Mooltan district. In *Madras* the bulk of the increase appertains to the Village Service Fund, the receipts of which show a general improvement in nearly all districts. The newly imposed house-tax in that Presidency under Local Funds Act V of 1884 also shows considerable improvement as compared with the previous year. Moreover, an item of about 6,2 being the sale-proceeds of Service Inams has been shown here instead of under XXV.—Miscellaneous.

21. The *import duties* have yielded more than was anticipated in the Budget, owing to a general improvement in trade, as well as to the changes introduced by the Tariff Act of 1887, and to the new tax on mineral oils. The Bengal Revised expected too much from this new tax, and made no allowance for the falling-off in revenue on the imports of wines and spirits. The high receipts in Madras are mainly in consequence of large importations of Colombo arrack into the town of Madras, owing to the temporary closing of toddy shops on the introduction of the free tapping system.

22. The *export duties*, on the whole, have also produced more than was expected, although the collections were short in Burma, where the demand for rice in Upper Burma diminished the exports of that article, and in Madras from which Ceylon took less than in 1886-87. These deficiencies, however, were more than covered by larger exports from Bengal and Bombay.

23. The amounts entered above against Civil Departments represent assessments on both official and non-official incomes, while those entered against other departments consist almost entirely of collections from Government Officers. Hence as regards the latter the accounts approach the estimates very closely. With respect to the recoveries in the Civil Departments, it was difficult to frame an accurate estimate as the Income Tax was only introduced in the preceding year. The total result, however, is satisfactory being in excess of the estimates as well as of the accounts of 1886-87.

24. In contrasting the figures of 1886-87 with those of 1887-88, it is to be noted that in the former year the revenue in the Andamans was not included in this head, but was taken to XVIA.—Law and Justice—Courts of Law, with the other receipts of that penal settlement. In 1886-87, moreover, the demand for timber was weak in the Central Provinces, Bengal, and Madras, while the state of Burma interfered with forest operations in that country. During 1887-88 the *India* revenue was unexpectedly increased by the sale-proceeds of 600 tons of *Padouk* sent to Europe, and which, it was supposed, would not come so soon into the accounts. There was also a good demand for timber and other forest produce in *India* and the *Central Provinces*, while the more settled condition of *Burma* led to large sales and higher prices were obtained than were expected. The budget for *Upper Burma receipts* was in the circumstances very rough. The collections in *Assam* suffered from the extraordinary difficulties encountered in bringing the timber of the Garo Hills to sale depôts, but this was more than covered by recovery of the export trade in sál timber from Lower Assam to Bengal, by large imports from Manipur into Cachar and by the levy throughout the year of pass fees on the timber drawn from Hill Tipperah into Sylhet. In *Bengal* the indents from State Railways were small, about 88,000 bamboos were lost by floods, and in the Chittagong Division people avoided the forest in the interior of the hill tracts for fear of raids from across the frontier; but on the other hand, the sale improved of some descriptions of timber and minor produce. The report from the *North-Western Provinces and Oudh* shows that the demand for sleepers had nearly ceased and so caused the small receipts in 1887-88. There was also a decline in the sale of firewood and of dry timber which is used by the poorer classes, who were in less prosperous circumstances this year. These deficiencies, however, were partly met by increased indents from the Irrigation Department, by sales of standing trees, of timber obtained from improvement fellings and of grass, by salvage receipts in connec-

Section A.—PRINCIPAL HEADS OF REVENUE—*continued.*

tion with operations on the Gunduk river, by royalty on elephants captured by the Bulrampur Khedda, and by the Jumna river dues. The *Punjab* revenue also suffered from the diminished requirements of the Public Works Department and of the public generally, but the proceeds from scantling and firewood and from grazing dues were better than expected in some parts of the country. In *Madras* higher prices were obtained and a larger yield from grazing dues secured than in 1886-87, but both the budget and revised were too sanguine. As regards *Bombay* the aggregate results nearly agree with the actuals of the previous year, though the details differ. The falling off under timber, &c., removed by Government agency is in the Sind and Northern Circles due to slack traffic on the North-Western Railway and to a small demand for timber and myrabolams. The decline would have been much greater, but for a large increase in the Southern Circle from (1) an unexpected indent for 35,000 teak sleepers from the Southern Mahratta Railway, as well as from the value of sleepers supplied to the Western India Portuguese Railway Company, in 1886-87 having been credited in the accounts for the year under report; (2) to the fact that 3,000 teak trees were added to the departmental fellings originally in the budget; and (3) to a larger supply of fuel to the Southern Mahratta Railway than was anticipated. The improvement in timber removed by purchasers is in the Northern and Sind Circles, and is due in the former (1) to large quantities of timber and firewood having been sold in the Thana Division by "Compartments" of so many acres for a lump sum, in connection with the clearance of the site of the new "Tansa Lake" for the supply of additional water for the city of Bombay, and (2) to grazing fees, which, in the original estimate, were under-estimated by the Conservator. The improvement in the Sind Circle is due (1) to the growing demand in Lower Sind for small bábul timber for export; and (2) to a demand for grazing and fodder grass due to the larger area that has been added to the reserves. On the other hand, there was a decrease in the revenue of the Southern Circle due (1) to fewer permits for timber being taken out in the Southern Division of Kanara than were originally anticipated; (2) to the diminished demand for wood in Bijápur owing to sales from Inámdári forests, and to the restriction of operations in Kolába, the markets having become overstocked with wood sold in the previous year.

25. There is nothing specially noticeable in India, the Central Provinces, Burma and Assam. The diminished receipts in *Bengal* are due to a loss in searching fees, consequent upon an order of the High Court cancelling the rule which required a search to be made prior to the sale of immoveable property under attachment in execution of decree, in order to ascertain whether it was subject to any antecedent incumbrance. In the *North-Western Provinces and Oudh* the high price of food-grains contributed largely to the increase, while in the *Punjab* it is explained to be the result of bad harvest and a rise in the price of land leading to numerous transfers. The steady improvement observable in *Madras* is secured by affording greater facilities in the registration of documents, and the high actuals in Bombay are accounted for by the introduction of an enhanced rate of fees.

26. As regards *Tributes and Contributions for ₹5,000 and over*, the Oodeypore Tribute was estimated at 21,7, 1,7 being for arrears, of which however only 3 was realized. The excess recovery in Kathiawar includes arrears, and the amount entered against the Baroda State represents the subsidy for the Police employed in the Political Agencies in Gujarat, and which was formerly credited to the Gujarat (excluded) Police Funds. These funds have been provincialized from April 1887. Under *Contributions for Special Military forces*, the increased amount received from Bhopal is due to the instalment of 1888-89 having been paid in advance in March 1888. The India budget for *Tributes and Contributions under ₹5,000* was exceeded, as it did not provide for the sums payable by the Dholepore and Kerowlee States towards the cost of the triple Agency of Bhurtpore, Dholepore, and Kerowlee, as sanctioned by the Government of India in October 1887. The decrease in the Central Provinces is due to a moiety of the tribute from the Sonapore State in the Sambalpore District having been received in advance in 1886-87, and the other moiety in 1888-89. In Bombay the Junagadh Tribute was previously credited to the Gujarat Police Funds mentioned above, but these having now been provincialized, the credit is brought under this head. The improvement in *Fees on Succession to Native States* arises, in India, from unexpected nazerannas from Alirajpore and Kothi, and in Bombay, from the Savanpur State having paid the balance due by it in one sum in May 1887 instead of by instalments as anticipated.

Section A.—DIRECT DEMANDS ON THE REVENUE.

1886-87. Accounts.	1887-88. Budget.	1887-88. Revised.	1887-88. Accounts.
9,746,2	9,650,6	9,611,5	9,438,2

27. The following are the principal differences comprised in this group. The payments under *Assignments* exceeded the estimate by 101,4, owing mainly to the adjustment of the alienated revenue in Bombay at new survey rates, but this was done by per contra credit, and hence there has been a corresponding increase under 1—Land Revenue. Under *Land Revenue*, the budget provided 38,2 for the revision of the revenue establishments in Madras, but the amount was not utilized, and it also took "Malikana" charges amounting to 33,8 under this head, but the classification having been changed, the payments appear in the actuals under 2—Assignments and Compensations. The *opium* expenditure was less than expected in consequence of a smaller produce, and the charges for *Salt* were also low, chiefly in India, owing partly to the abolition of the agency system for the sale of salt, and partly to reduced establishments. The salt expenditure in 1886-87 was abnormally high, as explained in last year's report.

28. The Actuals under this head show an increase over the previous year and the budget and the increase is principally in Burma and Madras. The India figures comprise 9 on account of income tax realised in excess on certain Government Securities and refunded to the parties concerned. The accounts of 1886-87 included 1,5 on account of certain local cesses credited to Government but subsequently paid to the Municipality of Bangalore to which the revenue properly belongs, and 2,8 representing an excess payment by traders to whom it was refunded in consequence of the reduction in the price of Sambhar Salt. There were special refunds of Excise and Salt revenues in Burma and of Land Revenue in Upper Burma. The actuals in the North-Western Provinces and Oudh under *Land Revenue* include a special payment of 2,3 made to free an estate from encumbrances which escheated to Government on the possessor of the estate being declared a disqualified proprietor. In Madras the Land Revenue Refunds includes 1,8 erroneously credited to Imperial Revenues instead of to Local funds, and there were also excess collections which had to be

Section A.—DIRECT DEMANDS ON THE REVENUE—*continued.*

refunded. Under *Salt* 2,6 had to be refunded as the Salt could not be issued. The *stamp* refunds are also high owing to return of spoilt stamps and of Small Cause Court fees on certain compromised suits of large value. The high figures under Assessed Taxes in 1886-87 comprised an item of 8,3 on account of income tax refunded to the Madras and South Indian Railways under a ruling of Government by which net profits not exceeding the guaranteed interest were declared not to be liable to taxation. In Bombay the revised estimate provided 5,6 for a special Land Revenue refund to certain land-holders in Gujarat of which a part only was brought to account in 1887-88.

	950,2			893,2	970,0	968,0
1,446,9		TOTAL	1,367,6	1,469,1		1,469,0

29. The compensation payable to the *Dholepore* State was not drawn till April 1888. As regards *Meywar*, the revised estimate was reduced on account of the amount paid in advance in 1886-87 under the arrangement explained in last year's report. This arrangement was continued in 1887-88, and as the postal collections were greater than the compensation, a similar advance payment occurred in that year. The royalty payable to the Joudhpore and Jeypore States is variable since it depends upon the quantity of salt taken. The amount paid on account of other compensations is small as the sums drawn by the Raisini Sirdars are now charged to 25—Political. The difference between budget and accounts, in *other compensations, &c., Bengal*, is due chiefly to a change of classification by which Malikana has been brought into this head from 3—Land Revenue, and in a minor degree to compensation paid to the

Chief of the Mourbhunj State for loss of revenue in consequence of the prohibition to cultivate ganja in his State. The *North-Western Provinces and Oudh* compensations also include Malikana for the first time. The short payments in *Madras* have been caused by the allowances not being fully drawn. A revised classification of alienated revenue having been adopted in Bombay, it is necessary, for the purposes of the present review, to take together the two heads—*Pensions in lieu of resumed lands* and *Inamdars and other grantees*. These two heads consist partly of cash allowances and partly of alienated revenue. The cash allowances are never regularly drawn, and in 1887-88 they were 12,0 more than in previous year and 8,2 more than the budget. The alienated revenue is also largely in excess of the budget and the actuals of 1886-87, owing to the introduction of new survey rates, &c., as well as the transfer to this head from 3—Land Revenue of the revenue of lands alienated for services rendered to the community. This is the fourth year in which attention has been drawn to the large differences in these heads between estimates and accounts. The subject has been under the consideration of Government, and instructions have been issued which, it is hoped, will secure accuracy in future. The variations in the last two heads are due chiefly to the Goa Customs Tariff compensation of 5,9 having remained undrawn and to a saving of 8 in the Goa salt compensation.

30. The *Charges of District Administration* exceeded the budget in India owing to the Putwari charges having been debited to this head in the accounts, whereas in the budget they were taken under 18—General Administration. There is a similar excess in the Central Provinces, and it is due to a rise in Putwari charges consequent on the operations now in progress for a revision of the land revenue settlements. The Bengal accounts of 1886-87 were high as they included a special payment of 2,3 for land

taken up for the construction of public offices in Chittagong. The North-Western Provinces and Oudh budget was too high, and in Madras the amount estimated in connection with the revision of revenue establishments was not utilised. The Bombay estimate did not allow sufficiently for general savings. As regards *Survey and Settlement*, the excess in India was caused partly by the Coorg Survey which was sanctioned after the budget was passed, and partly by insufficient provision for the Surveyor General's Office. The India expenditure in 1886-87 was swollen by the outlay connected with Settlement operations in Ajmere. In the Central Provinces the establishments contemplated in the budget were not fully maintained, and the expenses relating to the Commissioner of Settlement, though estimated under this head, have been classified in the accounts under Land Records and Agriculture. A similar change in classification has caused the difference in Burma. The savings in Assam, Bengal, the North-Western Provinces and Oudh and the Punjab are almost wholly in the charges connected with the Survey of India Department, and in Bombay in salaries, establishments and travelling allowances. As regards *Land Records and Agriculture* the difference in Burma is explained above. In Bengal additional officers were appointed under the Director of Agriculture and additional expenditure incurred for travelling and other expenses. In the North-Western Provinces and Oudh the post of the Deputy Director was abolished. In Madras, the full scope of this minor head was not understood when the budget was framed, and the estimate was accordingly framed too low. The excess under *Management of Government Estates* in Bengal has occurred in the outlay on public improvements and in the commission paid on collection of rents and cesses. On the other hand, the expenditure on temporary establishments and improvements was low in the Mirzapore and Tarai districts of the North-Western Provinces. The saving under *Commission on Collections* is due in Burma to a portion of the amount not having been drawn within the year, and in Assam to the gradual extension of the Tehsili in lieu of the Mouzadari system. In *Allowance to District Officers* a change of classification has been introduced in Bengal, North-Western Provinces and Oudh, and Bombay, by which Malikana or allowance to excluded proprietors has been transferred to "2—Assignments and Compensation." The small excess in Madras was chiefly on account of arrears. The budget for Upper Burma charges was based on the information available at the time, but the result has shown a smaller payment on account of commission than was expected.

4.—Opium.

1886-87. Accounts.		Budget.	1887-88. Revised.	Accounts.
	BENGAL—			
51,3	Behar Agency Establishment and Contingencies	52,7	50,9	50,4
1,249,2	,, Cultivation and Manufacturing charges	1,280,0	1,155,3	1,081,7
74,7	Benares Agency Establishment and Contingencies	82,3	77,1	75,7
1,344,0	,, Cultivation and Manufacturing charges	1,082,0	1,220,3	1,208,9
3,5	Other charges	3,0	3,0	2,8
1,4	India	1,4	1,3	1,3

1,8	England	1,5	1,2	9
7	Exchange	6	5	4
2,729,1	TOTAL	2,506,1	2,512,1	2,424,6

31. The opium expenditure in *India and Bombay* do not call for remark. The variations in *Bengal* occur chiefly in cultivation and manufacturing charges, which are regulated by the outturn, the large payments made in 1886-87 being principally due to the produce of the great crop of 1885-86.

32. In *England* part of the anticipated payments were not made till the following year.

33. In *India* the saving in *establishment and contingencies* resulted from large reductions made on the suggestions of the Finance Committee. The *manufacturing* charges were also low as the Punjab mines held a large stock of salt, and the season in Sambhar commenced later than was anticipated. The total absence of *freight* charges in India is attributed to the abolition of the agency system for the sale of salt. In *Madras* the budget proved too high, as the full sanctioned scale of establishment was not entertained throughout the year. Some circles were also abolished, and other economies were carried out in Orissa. In *Bombay* the revised estimate under *purchase and freight* provided 6,0 on account of carriage of Baragora salt from the Runn Salt Works, but only 3,1 were required.

(a) Includes 1 on account of Upper Burma.

Section A.—DIRECT DEMANDS ON THE REVENUE—*continued.*

34. There is nothing calling for notice under this head except that the Bengal and North-Western Provinces and Oudh budgets were respectively too high and too low as regards stamps supplied from Central Stores, but they seem to have been based on the actuals of 1886-87 as far as they were known at the time. In England the indents from India for stamps were smaller than were anticipated in the estimates.

7.—Excise.

1886-87. Accounts.		Budget.	1887-88. Revised.	Accounts.
	Charges of Collection—			
1,3	India	1,5	1,4	1,1
6,9	Central Provinces	7,2	7,2	7,1
3,3	Burma	2,9	2,2	2,1
4	Assam	5	4	5
37,8	Bengal	37,8	42,0	42,7
11,3	N.-W. Provinces and Oudh	11,5	11,7	11,3
5,8	Punjab	5,8	5,7	5,6
24,1	Madras	25,6	22,3	26,9
25,6	Bombay	25,8	29,5	29,8
116,5	Total	118,6	122,4	127,1
1	England	2	1	...
1	Exchange	1	...	...1
116,7	Total	118,9	122,5	127,1

35. The fluctuations under this head are trifling, except in Burma, Bengal, Madras, and Bombay. In *Burma*, the decrease, as compared with the budget, is due to the closing of a distillery, and as compared with 1886-87 to the abolition of the appointment of Commissioner of Excise, Stamps and Registration. *Bengal*, on the other hand, incurred some excess expenditure in consequence of the revision of Excise establishments and by the amalgamation, in certain districts, of the posts of Income Tax Assessors with those of Excise Inspectors. This head is charged with a moiety of the pay and travelling allowances of the former. The *Madras* figures represent the proportionate cost of the combined Salt and Abkari establishments, and hence the explanations given under *Salt* are applicable to these charges also. The increase in *Bombay* is ascribed to the entertainment of an additional Abkari establishment in Sindh, to exceptional rewards in smuggling cases of opium, to the construction of temporary distilleries in the Thána district, and to the deputation of a special officer at Baroda in connection with the settlement of excise arrangements with Native States.

8.—Provincial Rates.

1886-87. Accounts.		Budget.	1887-88. Revised.	Accounts.
	Establishment and other charges—			
5,1	Burma	4,5	4,1	4,2
4	Assam	4	4	4
22,6	Bengal	19,1	36,9	35,2
6	N.-W. Provinces and Oudh	7	7	7
17,2	Punjab	16,8	16,8	16,8
5,2	Bombay	5,7	5,1	4,8
51,1	Total	47,2	64,0	62,1

36. The expenditure was high in *Burma* during 1886-87, as large arrears were collected in that year and commission was paid on them as well as upon the ordinary receipts of the year. In *Bengal*, there has been a change of system as explained in the last year's report, and the new procedure having been extended has caused a further rise in the charges recorded under this head.

37. The rise in *Bengal* is caused by the transfer to this head from "32.—Miscellaneous" of charges on account of Rents, Rates, and Taxes of the Customs buildings, as well as by the entertainment of two additional appraisers for half the year. *Madras* shows a reduced expenditure as compared with the previous year owing chiefly to a revision of the establishments. The small saving in *Bombay* is spread over various items, the savings carried out in the Gujarat and Konkan Divisions under "Salaries, &c." being partially counterbalanced by the purchase of a steam launch for the Customs Department, Karachi, and by an increase in the establishment charges of the Reporter General of External Commerce.

10.—Assessed Taxes.

1886-87. Accounts.		1887-88. Budget.	Revised.	Accounts.
1	India	...	1	1
1	Central Provinces	2	1	1
5	Assam	6	3	2
27,1	Bengal	17,0	15,0	15,1
3,9	N.-W. Provinces and Oudh	2,5	2,0	1,8
3,4	Punjab	3,7	1,4	1,4

39. The differences in the *India* column are explained by the fact that in the accounts of 1886-87 and in the Budget of 1887-88, the expenditure in Port Blair and the Nicobars was not entered under this head, but charged to Law and Justice—Courts of Law. In the *Central Provinces* there has been a change of classification by which certain charges which had formerly been regarded as appertaining to timber removed by purchasers, are now treated as establishments. Apart from this alteration in account, there was an increase of expenditure owing to revisions of establishments, to extension of fire protection and improvement in demarcation, but on the other hand, savings were effected in roads and buildings and in feed and keep of cattle. As stated in paragraph 24, forest operations were extended in *Burma* as the country became more quiet, and hence the outlay in 1887-88 surpassed that of 1886-87, the revenue being increased at the same time. The expenditure, however, was much below the Budget, the principal savings being in survey charges, in purchase of elephants, in roads and buildings, and in the controlling staff and subordinates, both of which were under the sanctioned strength. The expenditure in *Upper Burma* was almost nil in 1886-87, as regular work had hardly commenced, and even in 1887-88 the state of the country restricted operations, and so kept down charges. As explained in paragraph 24, the demand for timber and forest-produce was small in *Bengal*, and this was followed by shorter expenditure generally. In the *North-Western Provinces and Oudh*, the diminished outlay was the consequence of smaller indents, chiefly for sleepers, but the estimates also were in some instances framed too high. The *Punjab* expenditure was kept well within the budget, except under the head timber and other produce removed by Government Agency, which includes 9,5 for preparation of additional sleepers and construction of auxiliary slides, and 9,1 for carriage of boxwood to Simla, not sanctioned in the estimates. More timber also was felled in Multan and Chenab than had been expected, and cost 9, and extended operations in Kulna caused an increase of 3. As regards *Madras*, the expenditure in 1887-88 was less than that of the previous year under *Timber removed, &c.*, owing to restriction of departmental felling operations in both Northern and Southern Circles, where the stock in hand was found equal to the demand. It was also less under *Other Charges*, but the expenditure in 1886-87 included an exceptional outlay of 7,5 to secure the lease of the Takedi Forest, in South Coimbatore. In 1887-88 the charge for establishment was greater, owing to a gradual strengthening of the establishments. The budget for *Timber removed, &c.*, was too high, and though the amounts were reduced in the revised, yet these diminished figures were not reached in the actuals owing to (1) curtailment of expenditure consequent upon restricted felling operations; (2) payment of lower rates of commission to seignorage collectors; and (3) the engagement of temporary establishments at lower rates than was anticipated. Under *Other charges* the amount sanctioned in the Budget was increased in the revised, chiefly by the grants for purchase of elephants, and for roads and buildings which could not be utilised during the year, but the saving which so accrued was counterbalanced by unforeseen expenditure connected with the purchase of the Amrapoliem forests in the Malabar district. The charge for establishment was kept down by not working up to the sanctioned scale in the lower grades. The *Bombay*

Section A.—DIRECT DEMANDS ON THE REVENUE—*concluded.*

accounts show an excess under other charges, and it is due to the causes which led to an augmentation of the revenue as explained in paragraph 24. The cost of establishments was apparently high, but includes 1,0 paid to officers of other Provinces passing through Bombay. If this be deducted, the actuals practically agree with the revised. The Budget allowed too large a deduction on account of probable savings.

40. There is a decrease in *Bengal* under *District Charges*, as compared with the budget, owing to the provision for commission to Sub-Registrars and *ex-officio* Registrars not being fully used. In *Madras*, a re-organization of the Department, not contemplated in the estimates, was carried out, which resulted in a saving. The *Bombay* budget was framed with reference to certain economies proposed by the Finance Committee, but these have not, for the most part, been carried into effect. A slight saving (8) has been effected by amalgamating the appointments of Inspector General of Jails and of Registration, only one-third of the pay of the combined appointments being charged under this head. It will be noticed that as compared with 1886-87, there is a rise in the cost of superintendence and a fall in district charges. This is due to the charges for Inspectors having been transferred from the latter to the former minor head.

670,5	Receipts	686,5	749,2	746,6

41. The principal points in this group are (1) that the arrears due in respect of the Kidderpore Dock Loan have been realised, (2) that the Loan on account of the Hughli Bridge having been paid up the interest has ceased, and (3) that the cash balance of the Secretary of State was abnormally large, and the rate of interest obtained in connection with it was unusually high.

a Included under "other items."

42. The *Interest on loans to Native States*, &c., shows a decline in *India*, *the North-Western Provinces and Oudh* and *Madras*, owing respectively to the re-payment of the Scindia loan, to the cancellation of the Government Promissory notes belonging to the Benares College, and to the liquidation of the Famine-loan to the Mysore Durbar and the debt due by the Ramnad estate. The increase in *Bombay* is caused by the recovery of arrears from certain talukdari estates. The credits under *Interest on loans to municipalities, &c.*, includes in Bengal arrears on account of the Kidderpore Dock Loan, but the interest realised

Section B.—INTEREST—*continued.*

on the Hughli Bridge loan was small owing to the capital having been paid off. The differences in Bombay are ascribed to the dates on which the loans were taken thereby altering the dates from which interest is payable. The interest *on over-drawn Capital of Guaranteed Railways* is a fluctuating item and cannot be estimated with accuracy. The large receipts in England are explained by the cash balance being abnormally great, and the rate of interest being unusually high.

43. The balances under Loans to Municipalities, &c., have, in the last six years, stood as follows :—

Description of Loans.	31st March 1883.	31st March 1884.	31st March 1885.	31st March 1886.	31st March 1887.	31st March 1888.

411,0	TOTAL DISCHARGED .	...	...	...
+10,503,5	NET IN ENGLAND .	...	...	...
+10,520,1	NET IN INDIA AND ENGLAND	+2,000,5	+5,434,0	+5,435,8*

* The above amounts are exclusive of—88,0, comprising 80,6 charged to Railways on account of Sinking Funds of East Indian, Eastern Bengal and Sind, Punjab and Delhi Railways and 7,4 to Discount Sinking Fund.

45. The 5,505,3 entered as debt incurred in India consists of 3,500,0 received from the Gwalior Durbar and 2,000,0 raised in the open market, the remaining 5,3 representing the value of Stock Notes sold. The loan from the Gwalior Durbar was entered under "Special Loans" in the Budget, but was subsequently classified as Permanent Debt in the Revised Estimate and the accounts. The sum of 69,5 shown as debt discharged is composed of three items amounting to 63,8, 2,9, and 2,8, respectively. The item of 63,8 includes 63,7 representing the nominal value of Government Promissory Notes which were purchased some years ago on account of certain Educational funds in the North-Western Provinces. This purchase was made out of Government money, and hence the notes have been cancelled and the money credited to Government. The item of 2,9 is the amount of debt appertaining to the Transfer Loan of 1854 discharged in England, but adjusted upon the Indian accounts. The item of 2,8 is also made up of debt discharged, 1,5 being on account of debentures of the Nagpur-Raipur Railway, 7 on account of Loans on which the interest ceased some time ago, and 6 chiefly on account of Stock Notes returned by Post Offices and Syndicates to whom they were issued for sale.

46. In *England*, no addition was made to debt during the year, but the India 4 per cent. stock was converted into 3½ per cents.

Section B.—INTEREST—*continued.*

13.—Interest on Ordinary Debt.—

A Statement analysing this charge may be given as follows :—

1886-87. Accounts.	Rate.	Debt in India on 31st March 1887. Principal.	Interest.	1887-88. Budget.	Revised.	Accounts.
1,044,9	4½	23,290,3	1,048,1	1,048,2	1,029,7	990,0
2,725,0	4	68,958,1	2,758,3	2,858,1	2,861,1	2,803,4
..9	3½	52,8	1,9	1,9	1,8	1,2
7,6	Provincial	142,8	5,7	5,9	5,7	6,1
6,8	Stock Notes	156,4	6,3	6,2	6,3	6,0
3,785,2	Total	92,600,4	3,820,3	3,920,3	3,904,6	3,806,7
7	Interest on Loans in course of discharge			5	8	7
5,5	Discount on new Loans and Miscellaneous			82,9	43,0	43,4
3,791,4	Total Interest paid in India			4,003,7	3,948,4	3,850,8
3,163,0	England			3,182,6	3,917,8	3,917,3
1,189,5	Exchange			1,182,1	1,645,5	1,646,1
4,352,5	Total Interest paid in England			4,364,7	5,563,3	5,563,4
8,143,9	GRAND TOTAL, INTEREST			8,368,4	9,511,7	9,414,2
	Divided into—					
3,949,0	Interest on ordinary Debt			4,025,1	5,121,3	5,054,8
4,194,9	Interest on debt for Railways and Irrigation Works			4,343,3	4,390,4	4,359,4

47. As compared with 1886-87, the *Indian* payments on account of the 4½ per cent. Debt were short by 54,9, from interest not having been fully claimed chiefly in connection with the Transfer Loan of 1879. On the other hand, the payments on account of the 4 per cent. Loans were naturally higher in consequence of the additions made to that debt. In the Budget of 1887-88 provision was taken for a full year's interest on the debt of 1,200,0 raised in 1886-87 *plus* 93,4 on account of interest connected with the additional debt of 5,500,0 mentioned above in paragraph 45. The accounts show that the full amount of interest payable during the year was not claimed, including London drafts for 20,0 which were not presented until after 31st March 1888.

48. The 43,4 under "Discount on new Loans and Miscellaneous" is made up of the following sums, and the discrepancy between them and the Budget is due to the Loan of 2,000,0 having been obtained on better terms than was expected. The charges, moreover, attending the Gwalior Loan were 1,0 less than the Budget provision, and the Budget also made no allowance for the share recoverable from the Calcutta and Bombay Port Trusts of the discount on the loan mentioned above.

Discount on the Loan of 2,000,0 raised during the year		51,5
Remittance charges on Gwalior Loan of 3,500,0		6,9
		58,4
Deduct—Discount charged to the Calcutta and Bombay Port Trusts to whom advances were made on the condition that they received the money at the rate at which it was raised	14,3	
Recredit of interest paid on paper purchased on Government account	7	
		15,0
		43,4

49. The amount entered above as Interest paid in *England* consists of two parts, namely, interest on debt excluding that charged to Railways and the interest that is charged to Railways. The sums pertaining to each division are given below, and in this place only the interest not charged to Railways is explained. The second portion of the account, Interest charged to Railways, is examined in paragraph 163 under the head Railway Expenses. As compared with 1886-87, the accounts of the present year include an additional charge of 663,0 owing to an extra quarterly dividend and other interest charges consequent on the conversion of 4 per cent. stock into 3½ per cent. stock, together with 82,7 as commission paid on the conversion and 45,0 as additional interest on the 3 per cent. stock created in May 1886. These three items make a total of 790,7, from which should be deducted the interest on the Transfer Loan of 1854 paid off in 1886-87. This being done, the net remaining difference is 768,2. As compared with the Budget, the accounts show the two sums of 663,0 and 82,7 mentioned above as an excess because the

Section B.—INTEREST—*concluded.*

Budget did not provide for the conversion. On the other hand, the Budget allowed a sum of 10,4 for interest on temporary loans, but it was not paid.

1886-87. Accounts.		1887-88. Budget.	Revised.	Accounts.

	Accounts 1887-88.	3	1	4		387,0

50. As explained in former reports, the interest on "*Special Loans*" is steadily declining in consequence of the commutation of pensions connected with the Oudh Loans. Particulars of the interest on *Treasury Notes and Service Funds* are given below; the 4,9 entered therein against "Other Funds" included an over-estimate for interest on Madras Non-transferable Treasury Notes which was corrected in the Revised. The charge for "*Savings Bank Deposits*" compares fairly with the Budget, but the Revised in some cases proved a little too high. Under *Miscellaneous* the India Budget omitted to provide for the interest on the balances of net traffic receipts of Guaranteed Railways, and the excess in Bombay represents arrears of interest paid in the year on the Administrator General's deposits.

51. The Post Office has done better than last year, and has kept very near to the estimates. In the Telegraph Department the net result is very much what it was in 1886-87, but the revenue and expenditure are larger by 71,1 and 72,1 respectively. The improvement in revenue has occurred wholly in the Indian lines and has accrued partly from development of traffic and partly from a revised scale of the charges that are recoverable from the various railways. Of the increased expenditure, 56,2 has arisen in the Indian lines chiefly on account of Burma and a revision of salaries in the superior grades, 4,5 in the Indo-European line and 11,5 in Exchange. As compared with the budget, the expenditure was economised and the revenue enlarged chiefly by the increased recoveries from railways mentioned above. The Mint figures are also satisfactory, the seignorage on silver and the gain on copper coinage having exceeded expectations.

52. On the whole, the actuals are in advance of the previous year and extremely close to the budget. Under *Sale of Postage Stamps, Service*, the budget provided a sum of 1,5, on account of collections in Upper Burma, but the official correspondence in that province having been carried free, the expected revenue was not realised. The revised was accordingly reduced, but the accounts show that the deficiency in Upper Burma has been filled up by the Stamps used in the other parts of that province. The

Section C.—POST OFFICE, TELEGRAPH, AND MINT—*continued.*

Payments to English, Colonial, and other Foreign Post Offices have been high this year, as they include 2,0 on account of Statistical Account of open and closed Mail Transit Postage for the year 1887, not anticipated at the time the estimates were framed. The *Money Order* receipts indicate a more extended use of the Money Order system than was witnessed in the previous year or contemplated in the budget. The discrepancy between Estimates and Accounts under Bullock Train Collections is due to payments to the North-Western Railway on account of *Bullock Train* packages having been treated as distinct charges in the former; whereas in the accounts they have been deducted from the receipts. The decrease under the *District Post* in the Punjab is ascribed to the abolition of the Mail Cart Service between Jhang and Bhakkar.

Indian Telegraphs.

53. Compared with the Actuals of 1886-87 a great improvement has taken place in the message revenue owing to the expansion of the Department, and the numerous connections of wire with post offices. There has also been a rise in interest and recoveries resulting from the extension of railway communication in India, and the modification of the terms on which railways are allowed to use the Government lines of telegraph. The principle formerly adopted, was to charge interest on the actual capital expenditure on

Section C.—POST OFFICE, TELEGRAPH, AND MINT—*continued.*

each line in proportion to the number of wires provided for the use of each administration, *plus* a maintenance rate proportionate to the total maintenance charges of the Telegraph Department for the year for which the bill was prepared. This procedure was altered by Public Works Department Resolution No. 53T., dated 23rd February 1887, the charges being now based on fixed rates, and the change, while simplifying the preparation of bills and equalising charges for identical services, has also increased the revenue.

54. The Actuals also exceed the Budget and Revised estimate of the year, the excesses in both cases being partly due to extensions and recovery of arrear charges from railways, but chiefly to the State traffic with and in Burma, which, instead of declining as was expected, proved to be greater than in the previous year.

Indo-European Telegraph.

55. The receipts in 1887-88 fell short of those in 1886-87, owing to the adjustment in the latter year of 3,3, recovered on account of the Persian Telegraph Department debt, and also to the total cessation of traffic to and from the United Kingdom during the months of February and March 1888.

56. The budget was framed low, as interruptions of the Turkish route had reduced the balance of earnings receivable in 1887-88, and it was also anticipated that the lower rates introduced for the Far East traffic would lead to a decrease of revenue.

57. During the year, however, the local messages, private and state, in the Persian Gulf section increased greatly, and the Perso-Afghan Boundary Commission with the flight of Ayub Khan having caused an abnormal accession of traffic, the Revised estimate was raised to 104,6. The lengthy interruption on the Indo-European Telegraph Company's line between Emden and Lowestoft in February and March 1888, however, reduced the receipts considerably, and the Actuals fell short of the Revised estimate by 9,7.

Exchange.

58. The Exchange, which on this side of the accounts relates to the Indo-European Telegraph only, has been steadily increasing, partly on account of larger receipts and partly on account of the fall in the rate of Exchange.

XV.—Mint.

1886-87, Accounts.		Budget.	1887-88. Revised.	Accounts.

180,4	GRAND TOTAL	170,4	216,0	251,5

59. As explained in previous reports, these receipts are of a fluctuating character and depend on circumstances which it is difficult to forecast. The *seignorage on silver* was high in consequence of the large quantity of silver tendered at the Mint, as is shown in the following figures. Of this sum Gwalior rupees to the value of Government ₹3,18,37,783 were received from the Maharajah Sindhia in part of his loan of ₹3,50,00,000, and were recoined at the Calcutta Mint. The *gain on copper coinage* was higher than anticipated in the budget owing to the large demand for the coins, partly on account of opium payments and Hindu marriages as in the North-Western Provinces and Oudh, and partly for the requirements of railways in course of construction as in the Central Provinces. The excess in *other receipts*, Calcutta, is mainly due to the coinage of the Gwalior rupees received by the British Government when the loan was taken from that State. The importation of silver in recent years has been as follows :—

	Net Importation.	Silver Coinage.	Seignorage.
1880-81	3,892,6	4,249,7	76,1
1881-82	5,379,0	2,186,3	43,4

60. The increased cost of the *Chief Office, Calcutta*, is due mainly to additional establishment sanctioned for the Comptroller's Department in consequence of the expansion of the Money Order system and other causes of the same nature. The excess in *Presidency and District Offices* is the net result of numerous increases and savings. Under *Conveyance of Mails* the expenditure on *Road Establishment* was less than the previous year by 3,4, owing to a change of classification by which certain charges have been transferred from it to mail cart. The *Payments to State Railways* were less than in 1886-87 owing to economies in the carriage of mails, but the budget limit was exceeded in consequence of the haulage being greater than was anticipated. The *Bullock Train and Mail Cart* Line from Umballa to Simla have been amalgamated during the year, and hence the Actuals of 1887-88 cannot well be compared with the estimates or with the accounts of the previous year. In addition to this amalgamation certain transfers have been made from road establishment to mail cart establishment, as stated above, and certain recoveries from the railways have been deducted from the bullock train and mail cart charges instead of being distinctly credited, as was contemplated in the estimates. This change is explained in paragraph 52. Apart from these changes, there has been some saving of expenditure from a reduction of the rate allowed to certain railways. The rise in *Railway charges* is caused by the Bengal-North-Western Line having drawn certain arrears due to it. The difference under *Subsidies* is attributable to the Tigris and Euphrates Steam Navigation Company not having taken the full amount payable to it, counterbalanced by the payment of arrears for the conveyance of mails between Bombay and Goa.

61. As regards the *District Post charges*, India reports a saving in Beluchistan consequent on the extension of railway communication. In the North-Western Provinces and Oudh certain district lines were

Section C.—POST OFFICE, TELEGRAPH, AND MINT—*continued.*

taken over by the Imperial Post Office, and in the Punjab, the line from Jhang to Bhakkar has been abolished, as explained in paragraph 52.

62. In *England* the large expenditure on stores proceeded from large indents from this country. The loss by exchange was greater, partly on account of the greater expenditure and partly from the diminished value of silver.

Indian Telegraphs—Imperial.

63. The *Capital* expenditure in 1886-87 was abnormally low; the excess in 1887-88 is almost entirely due to larger purchases of stores both in India and England. The Budget for 1887-88 represented the

Section C.—POST OFFICE, TELEGRAPH, AND MINT—*concluded.*

average annual outlay, but during the year the expenditure on works in Upper Burma was so large, that the Revised estimate was framed with a view to the additional outlay. The outlay in India turned out even larger than the amount so provided, but in England there was a saving of 5,5 as some payments for stores were not made so soon as had been expected.

64. The *Revenue* outlay in 1887-88 also exceeded by 13,3 that of 1886-87, the increase being almost entirely due to revision of salaries in the superior grades, to additional establishment required for Upper Burma, and to annual increments in all grades. The Budget was framed to meet these increases, and special provision made for the outlay of 1886-87 which had to be postponed on account of the absence of many members of the Department in Upper Burma. During the year, however, fewer offices were opened than was at first anticipated, and less repairs were required, so that the Revised estimate was passed for a smaller sum corresponding with the expenditure of the previous year. The Revised has proved inadequate in consequence chiefly of more repairs having been carried out than were provided for, and of the payment of certain frontier allowances to officers. The saving in England occurred in the absentee allowances of officers on leave.

Indo-European Telegraph.

65. The *Capital* expenditure is affected by the quantity of stores issued on revenue account, or sold since the credits obtained in connection with them are deducted from the outlay. Accordingly the greater expenditure in 1887-88 as compared with the previous year is largely due to stores issued from stock being smaller than in 1886-87. On the other hand, the Actuals of 1887-88 fell short of both the Budget and Revised estimates of the year, as more line stores were issued than was anticipated, and large quantities of obsolete stores were sold at a nominal rate at the close of the year.

66. The *Revenue* outlay in 1887-88 compared with that in 1886-87 shows a decrease of 3,0, due to more repairs having been carried out in 1886-87. The Actuals fell short of both the Budget and Revised estimates of 1887-88; the decrease in both cases is chiefly under establishment, and is ascribed to economy in working, to absence on furlough, and to general over-estimate of requirements.

Exchange.

67. The Exchange was very much less in 1886-87 than in 1887-88, owing to the abnormally small expenditure on stores in that year. The necessity for a larger outlay on stores was anticipated, and provision was made in the Budget for 1887-88 accordingly. The fall in the rate of Exchange necessitated an increase in the Revised estimate, but owing to the outlay in England having been less than that provided for, the Exchange was only 2,8 over the Budget.

17.—Mint.

1886-87. Accounts.		1887-88, Budget.	1887-88, Revised.	Accounts.

80,5	GRAND TOTAL	86,1	98,6	94,0

68. The establishment charges in Calcutta were high owing to extra work in the Operative Departments of the Mint: the small expenditure in 1886-87 was due in a large measure to the absence of officers on leave, their places being filled by officers in lower grades. The increase in *Loss of weight in coinage* is ascribed to the recoinage of uncurrent coin to a larger extent than was expected in the budget, but this was foreseen in the Revised estimate. The excess in *other charges*, Calcutta, is in the purchase of local stores. The Revised estimate under this head in Bombay included a grant of 2,0 for coal and coke, the major portion of which passed into the accounts of 1888-89.

69. The most important deficiency in this group is connected with *Jail manufactures* owing to a reduced demand for such articles and a diminution in the jail population. The increases occur chiefly in *Fees and Fines* levied under Law and Justice—Courts of Law, in rents from Cattle Pounds under *Police* in Bengal, and in fees and contributions for *Educational* purposes in Burma and the Punjab respectively.

70. The fall in "Sale-proceeds of unclaimed and escheated property" in *India* is due to smaller transfers than were expected on account of unclaimed estates in the hands of the Administrator General, Bengal. The improvement in general fees, fines and forfeitures, *Burma*, and in *Upper Burma receipts* ensues from the country becoming more quiet. *Bengal* reports that the increase in that province on account of general fees, &c., consists entirely of the large commission realised by the Receiver, High Court. The rise in Court-fees in the North-Western Provinces and Oudh is traced to higher receipts on ccount of "Amin's fees." The general fees, fines and forfeitures have been large in the *Punjab* owing to an increase in crime, and in *Madras* to large receipts from Magisterial fines and Translation and Printing fees in the High Court, but also and chiefly to Magisterial fines which have fluctuated greatly in recent years.

71. The *India* receipts on account of Port Blair and the Nicobars have been affected by a reduction in the rate at which Native States now pay for the maintenance of their convicts in those places, and also by a change of system whereby the value of supplies issued to the Military Department is deducted from the corresponding charge instead of being entered as a credit under this head. Another change has been made during the year whereby the Forest Revenue of Port Blair is now classified under IX—Forests. The deficiency in the *Central Provinces* is counterbalanced by diminished expenditure for purchase of raw materials, the School of Industry having held large stocks awaiting manufacture. The improvement in *Burma* is attributed to the presence of a larger number of prisoners in the jails than was expected when the budget was framed. The fall in *Bengal*, the *North-Western Provinces and Oudh* and the *Punjab* is due to smaller indents for manufactured articles and convict labour from other Government Departments, and also in the North-Western Provinces to the Central Prison at Bareilly not having been completed, and in the Punjab to sickness among the prisoners. *Madras* still reports a steady decline in its Jail revenue, and in *Bombay* it is said that the decrease is due "primarily to the large number of releases on the occasion of the Jubilee, which, setting free the most skilled of the workmen and materially reducing the jail population, seriously affected the Factory operations."

Section D.—RECEIPTS BY CIVIL DEPARTMENTS—*continued.*

72. The budget for Police supplied to Railways in the *Central Provinces* related to the contribution payable by the Great Indian Peninsula Railway, which is now deducted from expenditure, as mentioned in last year's report. The increase in *Burma* is due to larger employment of Punitive Police and larger Cattle Pound fees. The *Upper Burma* receipts were high, owing, it is explained, to fees, fines, and forfeitures, which it was expected in the budget would be credited to new Municipalities, but many of them were not established till the end of the year. The improvement in *Bengal* and in the *North-Western Provinces and Oudh* under fees, fines, &c., results from the high rents obtained for pounds farmed out, and under other receipts in *Bengal* as compared with 1886-87 from the sale of provisions to the Chittagong Frontier Police, including the recovery of arrears on account of the previous year. The *Punjab* credits have been enlarged by additions made to the Municipal Police Force and the Punitive Police located in certain towns, after the budget had been passed. In *Madras* there was a misclassification in the budget, certain sums having been entered under Police supplied to Public Departments, which should have been taken under Police supplied to Municipal and Cantonment Funds. Allowing for this misclassification, the first-named head is short owing to the abolition of the Abkari distillery guards and the other to certain Mopila fines not having been recovered in full. The increase in fees, fines, &c., occurs almost entirely in Pound Fund receipts, which were formerly classified under "Other Receipts." As regards *Bombay*, the head Police supplied to Municipalities, &c., has increased in consequence of the recovery from Cantonment Funds of the full cost of the Cantonment Police force, the former practice being to recover only a moiety, and in a few cases no contribution at all. The head Presidency Police presents a large increase, consisting (1) of a moiety of the cost of the Harbour Police; (2) of the sale-proceeds of the hulk *Elphinstone;* (3) of recoveries from the public in connection with private watchmen; and (4) by the pension contributions on account of Police lent to private Companies. The first was not anticipated in the budget, and the others were estimated for under "Other Receipts." The excess under fees, fines, and forfeitures is attributed to the gross receipts of the Municipal Cattle Pounds in Sindh having been credited to this head for the first time, whereas previously they went direct to the Municipalities. The head "Other Receipts" in 1886-87 and in the budget included clothing recoveries which are now deducted from the expenditure.

73. The increase in *Pilotage receipts* is ascribed in Bengal to the development of trade, in Madras to the transfer to this head of the receipts of the Harbour Master's Department at Madras now provincialized and the rise in *Dockyard Services, &c.*, to the large amount of work done for other Departments owing apparently to reduction of Departmental charges on the cost of labour and material employed, and also to unusual supplies to Royal Navy Vessels. The Budget for *Sale-proceeds of Vessels and Stores* was framed on the supposition that only the *Amberwitch* would be disposed of, but subsequently the hulks

Section D.—RECEIPTS BY CIVIL DEPARTMENTS—*continued.*

Semiramis and *Koel*, the troop-flat *Gogra*, the water-boat *Carnac*, and the Survey Cutter *Greenwich* were also sold. This excess was partly counterbalanced by diminished sales of Stores owing to the clearance last year of obsolete and surplus stock from the Kidderpore Dockyard.

74. In *India* the decrease in contributions consists of the Educational Plough Tax in Coorg, which though entered under this head in the estimates has been credited to "VI—Provincial Rates" in the accounts. The Municipalities in *Burma* were for the first time required to contribute for educational purposes after the budget was framed. The increase in other receipts, *Bengal*, is due to recoveries from District Boards by transfer debit to the heads concerned of charges paid on their account in 1886-87; deducting these the actuals compare well with the budget. In 1886-87 the head "Other Receipts" in the *North-Western Provinces and Oudh* contained special items as stated in last year's report. The *Punjab* excess in fees and fines arises from an enhanced scale of fees introduced during the year, and from large proceeds from the sale of Government books. The *Bombay* improvement occurs principally in the "local" figures and is produced very much in the same way as the improvement in the Punjab.

75. In 1886-87 the *Hospital Receipts* in Bengal were high owing to large recoveries from the Hospital Port Dues Fund on account of seamen treated in the Calcutta General Hospital. Under *Contributions* the North-Western Provinces and Oudh Budget was too low and had to be raised in the Revised. The fall in *Lunatic Asylum Receipts*, Punjab, is attributable to certain payments by District Funds, which were formerly credited to this head, having this year been adjusted under Contribution from Local to Provincial, and a similar change was made in Madras. The increase under *Other Receipts* in that province occurs chiefly in the "Local Section" for which the budget was insufficient. The *Bombay* credits under *Contributions* are small as compared with 1886-87, but in that year there were special recoveries, as explained in last year's report. The rise in the *English* figures is due to an increase in the number of patients in the Royal Indian Lunatic Asylum, portions of whose pensions are appropriated to their maintenance.

76. Under orders of the Chief Commissioner the expenditure on *experimental cultivation* in Burma

has been considerably reduced since 1886-87. The increase in *Botanical and other Garden receipts*, Punjab, is in the local section for which no Budget was proposed by district boards. The rise under *Cinchona Plantations* in Bengal comes from large issues of the febrifuge to Madras. The decline in that Presidency is attributed to no sales having taken place during the year. The *receipts on account of Public Exhibitions and Fairs* were good in the North-Western Provinces where the proceeds of the Mágh Méla Fair at Allahabad were greater than was anticipated, but Punjab obtained less than was expected owing to the Amritsar Cattle Fair having been transferred to the Municipal Committee. The *Sale of Instruments and Stores* depends on the demand for these articles and it is not regular, but during the last three years there has been a steady rise, the amounts being 10,3, 20,6, and 27,7 respectively. As regards *Miscellaneous receipts* the Punjab Budget made no provision for local items, while in Madras the actuals were increased in consequence of additional examinations held during the year.

77. The failure in the English Budget is caused by the receipts anticipated for sales of the "Imperial Gazetteer of India" not having been realised till after March 1888.

Section D.—SALARIES AND EXPENSES OF CIVIL DEPARTMENTS.

1886-87. Accounts.		1887-88. Budget.	Revised.	Accounts.
12,698,5	EXPENDITURE	13,179,7	12,897,3	12,906,4

78. As compared with 1886-87 there was an excess expenditure under *Police* on account of the military police in Burma. On the other hand, the *Marine* and *Political* charges were less owing respectively to smaller requirements on account of Burma and the withdrawal of the Afghan Delimitation Commission. As compared with the Budget, the principal difference is in *Marine*, which shows a large saving, as 177,0 was provided for torpedo boats, but no payments were made during the year. The grant for *Administration* was exceeded by 59,6, of which 17,7 is debitable to Burma, and the rest chiefly to expenditure in England and exchange. The head *Political* shows an increase of 54,1 chiefly in connection with the delimitation of the Perso-Afghan frontier and the deportation of Sirdar Ayub Khan.

79. The excess in *Salaries of Governor General*, &c., is due in Burma to the increased pay granted to the Chief Commissioner, and in Bengal to a portion of Sir Charles Barnard's salary as Chief Commissioner of Burma having been paid in that Province. The difference between the India Budget and accounts under *Staff and Household* arises partly from a change of classification, by which rents and taxes are now entered here as explained in last report, and partly from larger outlay for service telegrams and contingencies counterbalanced by savings in hill journey charges. The Revised estimate allowed an additional grant of 5,4 on these accounts, but it was not all required. The charges for the *Executive Council* were higher than was expected owing to acting arrangements.

80. As regards the *Secretariats*, the charges relating to the Government of India are particularised in the following figures, from which it will be seen that the Foreign Department, India, spent about 6,1 more than its budget grant chiefly in service telegrams, hill journey charges and miscellaneous contingencies. Some increase also occurred from acting arrangements. The Home Department presents an excess of 1,3 on account of acting arrangements and hill journey charges, and the Revenue Department 1,0 in connection with the new appointment of Reporter on Economic Products. The rise in Burma is due to additions made to the strength of the Secretariat in that Province.

142,4	TOTAL .	135,6	142,3	143,4

81. The *tour charges* in India and the North-Western Provinces and Oudh were smaller than was anticipated, owing apparently to the tours having been curtailed. The large difference under *Board of Revenue*, Madras, is caused by the charges for the Commissioner of Revenue Settlement and the Commis-

Section D.—SALARIES AND EXPENSES OF CIVIL DEPARTMENTS—*contd.*

sioner of Salt and Abkari Revenue having been entered under this head in the Budget, whereas in the accounts they have been debited to 3—Land Revenue and 5—Salt respectively. Acting arrangements have occasioned the fluctuations in the head *Commissioners*, but in Burma and Bengal an additional Commissioner was appointed for a short time. Acting arrangements have also affected the figures relating to *Account Offices*, but the office in Burma has been permanently enlarged in consequence of the annexation of Upper Burma. The *allowance to Presidency Banks* is now regulated by the new agreements, but the accounts of 1887-88 include some charges which became payable under the former contract. The charges entered in the India Budget as relating to the *General Establishment of Local Funds* were on account of Patwaris and have been classified under 3—Land Revenue. These charges are growing in Bengal by reason of the extended operation of the Local Self-Government Act. In the Punjab, the Budget was too low, and in Madras large additions were made to the number of Punchayats and Unions existing in the previous year, but not to the extent contemplated in the Budget. The Budget for *Upper Burma charges* was necessarily a rough forecast. The saving in *other charges*, India, is nominal since the budget allowed for certain rents, rates and taxes which under present arrangements have been placed against the departments concerned.

82. In *England*, there was an exceptional increase this year under the charge for management of debt attending the conversion of the 4 per cent. stock into 3½ per cent. stock, counterbalanced to a small extent by a decrease in the cost of telegrams to India. Further increases occurred from the detention of the Member of the Royal Commission on Gold and Silver who was deputed from India, and from the demand for currency notes having been larger than was anticipated.

Section D.—SALARIES AND EXPENSES OF CIVIL DEPARTMENTS—*contd.*

83. The fluctuations under *High Courts* are largely due to the absence of officers on leave; but in the North-Western Provinces and Oudh, in the Punjab and in Madras, additional expenditure was sanctioned. In the last-named province the grant for printing and translation was exceeded, but this was met by larger receipts as explained in paragraph 70. The head *Law officers* in Madras is high as compared with 1886-87, but in that year the appointments were held for the most part by acting officers. The Bengal excess in *Civil and Sessions Courts* arises entirely from the appointment of additional munsifs and their establishments. The saving under this head in the Punjab and in Madras consists of several small items; but in Bombay, it is due to a native of India having been appointed Special Judge under the Deccan Agriculturists Relief Act whereby only two-thirds of the sanctioned pay was drawn. Some changes have been made during the year in connection with *Criminal Courts* which have affected the expenditure on their account. In India certain charges relating to the police of the Rajputana-Malwa Railway have been transferred to the head 20—Police. In the Central Provinces the outlay has been curtailed since last year by abolishing the office of Cantonment Magistrate at Saugor and the substitution of an allowance of R100 a month to a Military Officer for performing the duty. In Burma, Assam, Bengal, the North-Western Provinces and Oudh and Bombay the savings have resulted from the absence of officers on leave and in miscellaneous charges, for which sufficient allowance was not made in the Estimates. The Punjab excess is in diet and road money of witnesses and in postage. The Madras Budget was made high in expectation of a revision of establishments which, however, was not carried out. The diminished expenditure on *Small Cause Courts* in Bengal and Bombay has resulted from the absence of officers on leave; but in the latter Presidency a permanent saving of about 1,0 has been effected by Government purchasing the house in which the Court is held. The Budget for *Upper Burma Charges* was necessarily incomplete. The excess over the payments in 1886-87 is spread over many heads, and arises out of the extension of judicial establishments as the country settles down. *Refunds* are always a fluctuating quantity, and this year in India, Burma, and Bengal the claims to escheats were greater than was anticipated. Of the saving of 1,1 in *Other Charges*, North-Western Provinces and Oudh, 9 is in compensation pay of Covenanted Civil Servants and 2 in examinations for Pleaderships.

84. The Budget in *England* provided for outfit for three Judges, but none came to India during the year.

85. The reduced expenditure on *Jail Manufactures* in Burma is attributed to economy in the purchase of raw materials. In the other provinces it was the result of restricted manufacture and was counterbalanced by diminished receipts. The rise in *Other Jail charges*, India, comes mainly from the establishment of a new prison at Quetta. The excess in the Central Provinces is due to an increase in the number of prisoners, rise in the price of food-grains, introduction of a more liberal diet scale and substitution of Warder for police guards. The increase in the North-Western Provinces and Oudh and in the Punjab is also due to the higher cost of rations, but in the former the jail allowance of Medical officers has been charged for the first time to this head It was previously classified under 24—Medical. The

Section D.—SALARIES AND EXPENSES OF CIVIL DEPARTMENTS—*contd.*

saving in Burma was obtained by smaller expenditure in the transport of prisoners, in Bengal by closing the Bhaugulpore district Jail and by converting the Central Jail at Hazaribagh into a district Jail, in Madras by the abolition of three district Jails and of the European penitentiary at Ootacamund, and in Bombay by the release of prisoners in connection with the Jubilee, by the conversion of several district Jails into subordinate Jails and by the abolition of some subordinate Jails. The Assam Budget was too high. The small amount of *convict charges at Port Blair and Nicobars* as compared with the budget is caused chiefly by the transfer of 5,5 from this head to 11—Forests. Independently of this transfer the accounts show that the budget was exceeded in the item of stores, but this was counteracted by savings in establishment from the absence of officers on leave. Considering the circumstances of the country the estimates for *Upper Burma charges* have proved satisfactory.

(a) Included under District Executive Force.

86. The high cost of the *Presidency Police*, Madras, as compared with 1886-87, is caused by the transfer to this head of the pay of the superior officers of that body, formerly taken under Superintendence. In Bombay, on the other hand, the expenditure was higher in 1886-87, but in that year a special payment of 2,5 was made for a police hulk. The reduced charge for *Superintendence* in Madras is due partly to the transfer mentioned above and partly to a reduction in the number of Deputy Inspectors General. The saving in *District Executive Force*, India, is the result of reduced establishments at Quetta. In the Central Provinces, it is due partly to the employment of warder guards in jails and the withdrawal of police from conservancy supervision; and so far the saving is nominal

Section D.—SALARIES AND EXPENSES OF CIVIL DEPARTMENTS—*contd.*

as it has led to increased expenditure under jails and to a fall in police receipts. A third cause of the saving is the transfer of the Saugor Cantonment Police to the Cantonment Fund. The Burma budget included 27,0, which really appertained to special police, and should have been classified as such. Allowing for this correction, the actuals have exceeded the forecast in the items of escort charges, and arms, accoutrements, and clothing. The Assam police is officered from Bengal, and changes occur in the grade of the officers employed. This explains the fluctuations in that Province. In Bengal, the grant for pay of constables was not fully utilised. In the North-Western Provinces and Oudh the budget was too high. The Punjab budget included the grant for *Municipal and Cantonment Police* which has been separately classified in the accounts. The fall in Madras is caused by the employment of warder guards in jails, and is subject to the criticism noted above in the case of the Central Provinces. In Bombay, some interchanges have taken place between this head and Special and Municipal and Cantonment Police, and hence the figures cannot be compared separately. The principal difference here is in the charges of the Gujarat Police which amounted to 42,0 and 40,0, respectively, in the revised estimate and accounts of 1887-88, while they were not included in the accounts of 1886-87 or in the budget, because they were charged at that time to an Excluded Local Fund. Allowing for this difference the accounts and estimates agree fairly well except in the cost of clothing which is now shown net instead of gross as formerly. The higher cost of *Government Railway Police* in India ensues from the additional force required by extension of the Sindh-Pishin line. The saving in the Central Provinces is, for the most part, nominal owing to recoveries from the Great Indian Peninsula Railway having been deducted from the expenditure instead of being distinctly credited. In Bengal, the grant for the police on the Northern Bengal and Tirhoot lines was not fully used; and in the Punjab, the Company working the Rajputana-Malwa Railway paid a portion of the charges connected with the Rewari-Ferozepore line. The charge for *Village Police* was small in Burma owing to fewer men having been employed in Akyab than was anticipated. The Bengal budget was high, and in Bombay it did not allow sufficiently for arrears that were due and for the *pro-forma* adjustments on account of alienated (service) land revenue. The Bombay estimates also provided for some items under 3—Land Revenue, which belong properly to this head. As regards *Special Police*, the fluctuations in Burma and Bombay have been noticed above under the head *District Executive Force.* The excess in Bengal is in the cost and carriage of clothing and stores. *Cattle Pounds* have outstripped the budget, but this is counterbalanced by large receipts. These increases arise, chiefly from the construction of additional pounds and remuneration to additional pound-keepers. The rise in *other charges*, Bengal, consists of refunds to District Boards of sums received from them in 1886-87. It was difficult in the circumstances of the country to make an accurate estimate of *Upper Burma charges.*

87. The budget for *Marine Survey and establishments* was too high. The grant for *dockyards* had to be raised in the revised as a good deal of work came in from other departments for which there has been an increase in receipts as explained in paragraph 73. The actuals did not reach the revised from various causes, of which the chief are a revision of certain appointments and establishments in Kidderpore and the employment of less labour than was anticipated. The *salaries and allowances of officers and men* were high owing to demands on account of Upper Burma for which it was necessary to employ additional establishments, some new vessels having been added to the Indian Marine. The cost of *Marine Stores*, *&c.*, was high in 1886-87, chiefly on account of coal and stores required for the conveyance of troops and material to Burma, and for the steamers and launches employed in Upper Burma. Both the budget and revised contemplated a considerable reduction of expenditure on this account, but the circumstances of the country did not admit of such savings being effected. The increase in *pilotage and pilot establishments* is due, in Bengal, to improved trade and is accompanied by larger receipts as mentioned in paragraph 73. In Madras it has been caused by the transfer to Provincial Services of the Harbour Master's Department, as already noted in the same paragraph. The excess in India under *other charges* is connected chiefly with the operations in Upper Burma, but unforeseen charges for the Bushire Coal Depôt and the Perim Light House have also contributed to it. The Lower Burma budget provided for a contribution to the Akyab Port Fund which was not paid, and fewer vessels were employed than was anticipated. These produced a saving of 3,2; but on the other hand the expenditure on Light Houses and Light Ships was 1,6 more than expected. The Bengal budget provides 10,0 for the purchase of a new vessel which was not obtained during the year. Allowing for this special item the accounts of 1887-88 shew an excess both as regards the accounts of 1886-87 and the budget and this excess arises from the contribution of 2,0 granted to the Balasore Port Fund, and from the share due from that Province of the subsidy for conveying mails between Naraingunge and Assam.

88. In *England*, a sum of 177,0 was entered in the budget for torpedo boats, but no payments were made on this account during the year.

89. The Bengal figures cannot be analysed this year in the usual detail, as a good deal of the expenditure has been transferred to District Boards, which have not followed the classification observed in the State accounts. The total outlay in Bengal has exceeded the budget by 15,1 in consequence of additional expenditure incurred by District Committees. The whole system of administering these funds by means of district bodies is in a transition state, and defects like these are not, I am told, likely to occur again. As regards the other Provinces, the North-Western Provinces and Oudh budget for *Inspection* was too high, and the Punjab revised too low. The appointment of two additional Deputy Inspectors explains the excess in Madras, the Bombay saving being due to the abolition of the inspectorship of the North-Eastern Division. The short charge for *Government Colleges*, Madras, is attributed to the authorised staff not having been fully engaged. The saving under *Government Schools*, Central Provinces, is the result of orders issued by the Chief Commissioner, restricting the outlay from district funds on education to the amount of the Education Cess, added to a fixed contribution from Provincial Revenues, and the private subscriptions and fees collected. In comparing the Burma charges for 1886-87 and 1887-88, it is to be noted that in the former year contributions to Municipalities were classified under "other charges," where there is a corresponding abatement. In 1887-88 the amounts did not work up to the budget owing to a general reduction of expenditure, and the same may be said with respect to the North-Western Provinces and Oudh. The Punjab report states that the budget was too high and the revised too low; and that as compared with the previous year, the expenditure in 1887-88 is large, owing partly to the establishment of four new Normal Schools and partly to greater outlay by district bodies. The Bombay excess over 1886-87 is in the local section, there being a reduction of 3,4 in the Provincial portion of the account. The differences between budget and accounts consists of various small increases and decreases. The India accounts under *grants-in-aid*, &c., include 7, for which the budget grant was entered under 32—Miscellaneous, and 4 sanctioned after the budget was framed. In Burma fewer grants were made than

Section D.—SALARIES AND EXPENSES OF CIVIL DEPARTMENTS—*continued.*

was expected, and in the Punjab the amounts provided for building and miscellaneous purposes were not fully utilised. The large sum spent in 1886-87 was mainly on account of the Aitchison College Building Fund. The amount allowed in Madras was raised in the revised, with reference to sanctions given late in the year, and the actuals have followed closely upon this provision. The year 1886-87 was one of unusually high expenditure on education in Bombay, and the budget to some extent was based upon it, but the revision of the Provincial contract caused a curtailment of the outlay. The principal economies have been 10,5 in the building grant and 2,1 in the technical grant, but on the other hand there was an increase of 4,0 in payment by results. With respect to *scholarships*, the Burma budget provided for sums payable in Calcutta and Madras, but these are adjusted inter-provincially. The Bombay saving in *other charges* is due to a smaller purchase of books for resale at the Government Central Book Depôt than was anticipated.

90. The fluctuations in India are mostly due to absence of chaplains on leave. In the English Budget provision was made for six chaplains, whereas eleven came out.

91. The increase under *Medical Establishments* in India is due principally to the whole salary of the Surgeon at Ajmere having been charged to this head, whereas formerly part was debited to 25—Political. In the Central Provinces and Bengal certain appointments were filled by junior officers, and establishments were not maintained at their full strength. This explanation also applies to the other provinces, but in the North-Western Provinces and Oudh and in Madras there has also been a change of classification. In the former about 5,4 has been transferred to Jails, Police and Education on account of the allowances of Medical Officers connected with those departments, and in the latter certain charges of the Medical College, which were formerly included in this minor head, have been removed to Medical Colleges and Schools. The Bombay outlay on *Vaccine Establishments*, &c., was small, owing chiefly to the absence of officers on deputation and leave. The Burma Budget for *Medical Colleges and Schools* allowed for charges in Calcutta and Madras, but these are settled interprovincially. In Madras the actuals have been increased by the transfer noted above as well as by a similar transfer from the head *Hospitals and Dispensaries* where there is a corresponding reduction as regards that Presidency. This last-named transfer has also been made in Bombay. The excess expenditure on these institutions in Bengal was in Services and Supplies and Contingencies. The India Budget for *Lunatic Asylums* proved insufficient, because of arrears claimed by the Mysore State for the maintenance of lunatics belonging to the Mysore Assigned Tract. The short expenditure on this account in the Punjab and Madras is nominal, since it is caused by a change in the method of dealing with certain contributions. The Budget for *Upper Burma Charges* was unavoidably imperfect.

92. The charges of the Maisur Residency having been removed from Madras to the India accounts have caused a reduction in the former by a corresponding increase in the latter. In addition to this transfer, the head *Political Agents* in India includes an excess expenditure of 7,8 on account of telegrams chiefly in Persia. The saving in Bombay is spread over many items, but it has been obtained largely by the substitution of a Cantonment Magistrate, with an allowance of R200 per mensem, for one of the Assistant Political Agents in Baroda. The increase in *Charges on the North-Western Frontier* is connected with the delimitation of the Perso-Afghan frontier, for which the budget did not provide. The Punjab excess is in charges for Jezailchi corps, &c., and in payments for guarding hill passes. *Political Subsidies* are small, from the Amir of Afghanistan not having drawn the full amount payable to him. The Bengal charge under *Durbar presents* embraces the cost of articles purchased for the Thibet Mission. As regards *Refugees and State prisoners*, the payments in India include charges for deporting Ayub Khan and his party from Persia; the abatement in the Punjab being mainly due to the lapse of certain allowances to Kabul refugees. The budget for *Upper Burma charges* could not be otherwise than approximate. The India budget for *Other charges* proved inadequate, chiefly in pensions to men of the Merwara Battalion, and the Punjab Budget made no provision for the Gilgit and Kashghar Missions, for the Viceregal Durbar held at Peshawar and for the exploration and survey of the Gomal Pass.

93. In *England*, the payments on account of the Afghan Boundary Commission exceeded the provision made in the budget.

	Accounts 1887-88	18,6	7,8	20,4		Accounts 1887-88	448,5

94. The charge on account of the *Survey of India* is a net sum, the amounts payable by Provincial Governments being deducted from the gross expenditure. In the present instance the provincial shares as entered in the accounts are less by 9,5 than the amount computed in the Budget, and this is the principal cause of the difference between the estimates and accounts of 1887-88. As compared with 1886-87, the expenditure in 1887-88 has been greater by 2,6 in the Mathematical Instrument Factory, by 3,1 in the salaries of Deputy Superintendents, by 5,0 in native establishments, by 1,3 in contingencies, and by 5,4 in extra departmental charges. The expenses of the *Geological Survey and Museum* fell short of the Budget in consequence of the absence of officers on leave. The charges of the *Archæological Department* have now been consolidated in the India accounts, and hence the provincial distribution contemplated in the estimates has not been fully carried out. The India actuals under *Museums* include 1,2 for rents, rates, and taxes, for which provision was made in the Budget under the minor head *Miscellaneous*. The outlay on *Public Exhibitions and Fairs* was larger than anticipated in India owing to payments in connection with the Indo-Colonial Exhibition, while in Bombay there was a saving of 2,0 in the provincial and an excess of 7 in the local grant. The large amount of *Bull and Stallion Charges* occurred in Beluchistan, where about 2,2 more than the Budget limit was spent on the feed and keep of stallions. As regards *Other Agricultural Charges*, the Budget was not reached in Burma, as the establishments were not maintained at full strength. The saving in the Punjab consists of various small economies, and in Madras it has been obtained chiefly in the expenditure on account of Cattle Disease Inspectors. The reduced expenditure on *Other Statistical Charges*, India, as compared with 1886-87, comes from abolishing the Office of Director General of Statistics. The saving in *Miscellaneous* is due to rents, rates and taxes having been distributed among the Departments concerned.

Section E.—MISCELLANEOUS.

1886-87. Accounts.		1887-88. Budget.	1887-88. Revised.	Accounts.
848,3	RECEIPTS	1,177,0	1,349,9	1,606,1

95. These receipts have been largely influenced by *Exchange*, which gave a loss of 26,3 in 1886-87, but has produced a gain of 744,5 in 1887-88. The unfavourable result in 1886-87 proceeded mainly from the repayment of the stock receipt Loan of 1854, as explained in paragraph 122 of last year's report. The gain this year is obtained largely from the expenditure of the Subsidized Railway Companies both in England and in India. There were also additional receipts under *Miscellaneous* in connection with Upper Burma, and with the extended operations of the Local Self-Government Act in Bengal, &c.

96. The Madras Budget on account of the *Military and Medical Retiring Funds*, and the India Budget on account of *appropriation from the Capital of the Military Orphan Fund*, were too sanguine. The *subscriptions to the Bengal Civil Fund* were enhanced by fines levied for disparity of age on marriage

Section E.—MISCELLANEOUS—*continued.*

and by composition for future payments. The Madras Budget for the *Madras Civil Fund* allowed for recoveries on account of advances, but it was subsequently ruled that such advances, if made after the Government had taken over the Fund, should be carried to a debt account. The large recovery on account of *contributions* in the Central Provinces includes unforeseen receipts on account of officers of the Public Works Department lent for service on the Bengal-Nagpur and Indian Midland Railways. In Bombay the contributions from Local Boards' employés and from Municipalities on account of their school masters were greater than expected.

97. In *England* the Budget was short in the receipts on account of the Military Funds.

98. *The India budget for receipts from sale of stationery* provided for expected receipts from the Rajputana-Malwa Railway, but they were not realised owing to the management of the line having been transferred to the Bombay, Baroda Railway Company. The Punjab budget and revised for this head included 4,5 and 4,8, which belonged really to other Press receipts. The large sale of *Gazettes and other publications* in Bengal consists chiefly of Indian Law Reports. The discrepancy between estimates and accounts as regards *other Press receipts* in the Punjab is explained above.

99. In paragraph 103 of the report for 1885-86, it was explained in detail how the gains and losses arise on the various transactions included in the foregoing statement, and the information was repeated in a condensed form in paragraph 122 of last year's report. It is unnecessary therefore to enter into these particulars now; but during the present year, a question was raised as to the proper method of treating exchange on the sums withdrawn in England by the subsidized Railway Companies from Her Majesty's Secretary of State in Council. The question was referred by the Government of India to the Secretary of State, whose decision was communicated in a despatch No. 201, dated 16th August 1888. The actuals for 1887-88 entered above have been compiled in accordance with that decision.

100. The results produced in this account depend first upon the sterling amount of the transactions with which the exchange is connected, and second upon the average rate at which Her Majesty's Secretary of State in Council is able to sell his bills on India. In comparing therefore the results of the two years 1886-87 and 1887-88, it is to be noted that the sterling amount of transactions was 745,6 and 1,974,3, respectively, and the average rate 17·4*d.* and 16·9*d.* The difference between budget and accounts may be explained in the same way, the figures being 391,5 and 1,828,9 and 17·5*d.* and 16·9*d.*

Section E.—MISCELLANEOUS—*continued.*

The amount of transactions is largely regulated by the arrangements of the various Railway Companies, and the average rate by the gold value of silver. The loss by exchange in 1886-87 was increased by the repayment of the stock receipt loan of 1854.

101. With the following exceptions the variations in this group are of the ordinary kind and inseparable from items of such a fluctuating character. The large amount of *miscellaneous fees* in Bengal consists of partition and other fees which accrued from the extended operations of the Local Self-Government Act. The failure of the North-Western Provinces and Oudh Budget for *contributions* is attributed to the Lucknow Municipality having been exempted from payment of the amount assessed upon it. The Madras figure for *rents* includes 1,8 on account of certain endowments in the Tanjore district which were erroneously treated as land revenue, imperial, in former years. The *extraordinary items* in India relate to recoveries connected with Upper Burma, and in Bombay to the sale-proceeds of Government securities belonging to several Local Boards which were held contrary to rule and were sold under orders of Government. The Bengal receipts under *other items* were unusually great this year owing to large recoveries on account of insurance on State Railway Stores and Durbar Presents. The Punjab and Bombay Budgets were too sanguine.

102. The excess in *England* occurred mainly in fines and penalties incurred by contractors in providing stores.

Section E.—MISCELLANEOUS—*continued.*

4,701,1	EXPENDITURE	4,856,2	4,777,2	4,761,1

103. In this section there is a large saving under *Territorial and Political Pensions* consequent on the death of the late King of Oudh, but it is counterbalanced by an excess of 126,0 over 1886-87 and 68,8 over Budget in *Superannuation allowances* and pensions owing to additions to the pension list. The other charges have been kept well under control.

104. The large abatement in India under *Territorial and Political Pensions* is due to the death of the late King of Oudh, and in the Central Provinces and Bombay to ordinary lapses. There were lapses also in Bengal, in addition to which a pension of 4,6 per annum was transferred to Bombay from November 1887. The North-Western Provinces payments were high owing to arrears drawn by the Maharajah of Benares and to two new pensions sanctioned by the Government of India. Several of the Punjab stipendiaries did not claim their pensions before the close of the year, and in Madras there were several lapses including a stipend of 4,8. The Punjab estimates for *charitable allowances* were too high.

105. The discrepancy between budget and accounts in *England* is explained by the undrawn stipend of His Highness the Maharajah Dhulip Singh.

107. The charges under this head need to be examined in totals for the whole of India, as the provincial distribution is liable to disturbance by change of residence among the pensioners. The payments on account of *Superannuation and retired allowances* have largely exceeded the expenditure in 1886-87, as well as the budget and revised estimates, and shew the rapid growth of these allowances. As regards the other heads, the budget has been fairly well sustained, considering the uncertain character of the charges, and the only point requiring notice is that the saving in England arises from a change in account keeping, by which loans granted under the rules of the Madras and Bombay Civil Funds are now treated as remittances to India.

108. The budget for *purchase of stationery* was again exceeded in Bengal, but this was due partly to arrear bills of the previous year and partly to higher prices ruling for country-made paper. The Bombay excess was caused by the increased substitution of articles of local manufacture for European stores. The cost of *Government Presses* has fluctuated in some of the Provinces. In India 3,9 more than Budget was spent on fixed and temporary establishments, but 1,5 was saved in overtime allowance and 7 in the establishment of the Type Foundry. Again there is an excess of 2,1 in the contract payments for printing stock forms, but 1,8 was short-paid for purchase of type. The excesses in Burma and Bengal are in overtime allowance and contingencies. In the Central Provinces the Budget allowed 1,4 for printing to be executed by the Jail Presses, but such departmental transfers were not permitted in the accounts. The Budget also allowed 1,1 for contract printing which has been classified in the accounts under other charges. The short payment in Bombay is the result chiefly of economies in contingencies, but about 1,2 was also curtailed under Establishments. The cost of *stationery supplied from Central Stores* is always an uncertain quantity, and there is nothing special to record this year except that an addition of 12 per cent. has been made to the value of the issues in order to cover the loss by exchange on imported articles for which some of the estimates did not provide.

109. In *England*, the saving is chiefly in stores for India as the consignments were smaller and obtained at lower prices than was contemplated in the Budget. The payments for printing done for the India Office were also small, as the Stationery Office did not present accounts as rapidly as had been expected.

	Accounts	1887-88	292,9

110. Considering the nature of the items, the fluctuations in the first two heads are not greater than might have been expected. Large payments were made in Bengal on account of *Charitable Donations* in 1886-87, partly in grants to the Hospital Nurses' Institution and specially in a contribution to the District Charitable Society for repairs of the Alms-House buildings. The Punjab Budget for *destruction of wild animals* was too low, and the Madras budget too high. The Madras excess under *petty establishments* has occurred entirely in the local section, and is due to increased charges for sanitation. The India budget for *Special Commissions of Enquiry* contemplated a very large expenditure on account of the Public Service Commission, but the commission closed earlier than was expected. The nominal expenditure under *irrecoverable loans written off* is made up of small writes-off of irrecoverable advances to cultivators, &c., but it is subject to great variations owing to the occasional cancellation of large items. This year the figures represent ordinary writes-off only. *Rents, rates, and taxes* seem small in Bengal owing to assessments on the customs buildings having been charged to 9—Customs. The *extraordinary item* of 9 in Assam includes a write-off under orders of Government to clear an advance which was made to the contractors of the Tonga Service between Gowhatty and Shillong. The *Upper Burma charges* were small, as unsettled claims were not paid to the extent anticipated and the amount provided in the budget for Conservancy, Lighting and other town charges at Mandalay were not required. The India Budget and Revised for *other items* allowed too much for petty construction and repairs and miscellaneous and unforeseen charges. The high charge in Bengal comprises the write-off connected with the frauds in the late District Savings Bank, in Chittagong. The Punjab and Madras budgets provided a reserve for certain outlays which were not required, and the Bombay budget made allowance for some petty local works, which by a change in accounting have been classified under 45—Civil Works.

Section F.—FAMINE RELIEF AND INSURANCE.

1886-87. Accounts.		1887-88. Budget.	1887-88. Revised.	Accounts.
309,0	EXPENDITURE	94,5	93,3	91,4

111. Considerable changes have been made in this head as explained in para. 124 of last year's report, and it is now limited to the following charges :—

1886-87. Accounts.		1887-88. Budget.	1887-88. Revised.	Accounts.
1,0	Famine Relief	2,0	8	4
200,0	Construction of Protective Railways	*Nil*	*Nil*	*Nil*
108,0	Construction of Protective Irrigation Works	92,5	92,5	91,0
309,0	TOTAL	94,5	93,3	91,4

33.—Famine Relief.

1886-87. Accounts.		1887-88. Budget.	1887-88. Revised.	Accounts.
5	Central Provinces	1,0	5	3
...	Bengal	...	...	...
5	Madras	1,0	3	1
...	Bombay	...	...	...
10	TOTAL	2,0	8	4

112. The amount spent in the Central Provinces was on account of relief works in the Bilaspur District, but it was not necessary to incur expenditure to the extent provided in the Budget. The amount entered against Madras represents the write-off of an irrecoverable advance made during the famine of 1876-78.

35.—Construction of Protective Irrigation Works.

RESULTS.	Actuals. More.	Actuals. Less.
Actuals with Actuals of previous year	...	17,0
" Budget Estimate	...	1,5
" Revised Estimate	...	1,5

(a) Includes £285,400 outlay from funds not classed under this special head.

113. As explained in para. 128 of last year's report, the charges comprised in this head are regulated by the amount available for expenditure and by the works awaiting construction. The decrease of 17,0 compared with the Actual expenditure of the previous year is due chiefly to the operation of this rule.

114. During the year 1887-88 the grants for the Betwa and Swat River Canals and the Rushikulya projects were reduced, and those for the Nira Canal and Mhasvad tank increased, while a sum of 6,4 was held in reserve to meet an excess charge under *43—Minor Works and Navigation.* These changes were embodied in the Revised Estimate and have been followed in the Actuals. There was an excess outlay on the Rushikulya project and Nira Canal, but on the other hand the reserve of 6,4 was not fully used.

Section G.—CONSTRUCTION OF RAILWAYS (charged against Revenue in addition to that under Famine Insurance).

116. The small outlay of 1887-88, as compared with the previous year, is due (1) to the practical completion of the Jorhat State Railway in 1886-87, necessitating smaller expenditure during 1887-88, (2) to no work of any importance having been carried out on the Kaunia-Dhurla State Railway during 1887-88, and (3) to the Lucknow-Sitapur-Seramau Railway needing less construction work than was required on this line in 1886-87. The budget of the Kaunia-Dhurla line provided for the substitution of iron pile and girder bridges for the wooden ones now on the road, but this work has been deferred pending settlement of the question of extending the metre gauge line in the direction of Dhubri. The excess over budget on the Lucknow Sitapur-Seramau Railway is due chiefly to greater progress of work than was anticipated.

Section H.—RAILWAYS.

117. The following is a general statement of the Revenue Accounts:—

1887-88.	State Railways.	Guaranteed Railways.	Subsidized Companies.	Miscellaneous.	TOTAL.
GROSS EARNINGS	10,871,9	7,241,4	24,8	...	18,138,1
WORKING EXPENSES	5,329,2	3,604,8	...	...	8,934,0
Surplus Profits	265,0	662,6	...	...	927,6
Interest	4,008,3	3,853,0	...	...	7,861,3
Annuities	2,390,8	...	...	...	2,390,8
Land and Supervision	...	51,4	43,6	...	95,0
Miscellaneous Railway Expenditure	...	...	...	51,8	51,8
TOTAL EXPENDITURE	11,993,3	8,171,8	43,6	51,8	20,260,5
NET GAIN OR LOSS TO THE GOVERNMENT—					
1887-88	*—1,121,4*	*— 930,4*	*— 18,8*	*— 51,8*	*—2,122,4*
1886-87	*— 375,1*	*— 675,6*	*— 43,6*	*— 94,4*	*—1,188,7*
1885-86	+ 394,9	*— 983,3*	*— 44,0*	*— 99,3*	*— 731,7*
1884-85	+ 173,9	*—1,043,3*	*— 84,2*	*— 97,6*	*—1,051,2*
1883-84	+ 647,5	*— 996,4*	*— 85,5*	+129,4	*— 305,0*

118. These figures show that the *State Railways* did worse than last year by 746,3, and the *Guaranteed Railways* by 254,7. The deficiency under the former is due to a great extent to heavy payments on account of Interest and Annuities connected with the purchase of Guaranteed lines, and which amounted to 245,7 and 5,8, respectively, plus exchange 163,4. There was an increase of 355,2 also in the working expenses of State Railways. As regards *Guaranteed Railways*, the increase is due to larger payments on account of Interest and Surplus Profits. The other items do not call for special remark here.

1886-87. Accounts.	RECEIPTS.	1887-88. Budget.	1887-88. Revised.	1887-88. Accounts.
14,477,8		14,892,5	14,412,8	14,533,3

119. The following sums are comprised in these receipts, particulars of them being given in the succeeding statements. As regards *State Railways* the gross earnings exceeded those of the previous year by 42,8 and the revised by 20,4, but fell below the Budget by 446,9. The increase over the Actuals of 1886-87 is due principally to the opening of the Bellary-Kistna and Cuddapáh-Nellore State Railways, and to large additions to the open mileage of existing lines. The decrease on the Budget Estimate is caused by a considerable fall in traffic on the East Indian, Rajputana-Malwa, and North-Western Railways, as explained below, but it did not go down to the extent apprehended in the Revised Estimate as the traffic on some lines, notably the Rajputana-Malwa and North-Western Railways, revived somewhat during the closing months of the year. These several differences are more fully explained below. The *Guaranteed* lines have worked up very closely to last year's figures, and the net traffic receipts have exceeded the Budget owing to the large quantity of grain and other produce carried by the Great Indian Peninsula Railway and to increased receipts in the Madras Railway. The discrepancy between Budget and accounts in the *Subsidized* Companies is attributable to a change in the method of showing the capital expenditure of the Mysore State Railway.

120. The net earnings realised during 1887-88 are considerably less than those of 1886-87, owing to reduced exports of wheat consequent on smaller crops, and the low prices prevailing in foreign markets. They were also diminished by the cash collections of the last two days of the official year 1887-88, which were holidays, not having been accounted for till 1st April 1888. On the other hand, the coaching receipts were better owing to a larger number of pilgrims having used the line, as well as to a development of traffic from the opening of the Dufferin and Gunduk bridges and the extension of through booking to other lines.

121. The Budget was based upon the Actuals of the previous year as far as they were known at the time, and hence it has been affected by the same causes. The decline from the Revised Estimate is due principally to the cash collections of the 30th and 31st March not having been accounted for till 1st April 1888, as explained above.

122. These figures comprise the earnings of the Eastern Bengal Railway under the head Imperial, and of the various lines entered in the foregoing statement under the heads from Eastern Bengal to Kaunia-Dhurla subordinate to Provincial; they are united as parts of the same undertaking. The improvement in the earnings, compared with the previous year, is due partly to the 69 miles of the Assam-Behar Railway, from Munihari to Kusba and from Dinagepore to Raigunj, opened to the public in 1887-88. There was a large improvement in *Goods* traffic also, owing to better rates and to larger quantities of jute requiring carriage over the line, in addition to which a sum of 9,3 was received chiefly from the East Indian Railway Company for running powers over the Naihati-Chitpore Section. The increase over the Budget is due to the same causes. The Revised Estimate was not reached owing to delay in recovering the amounts due for the conveyance of troops and stores in connection with the Sikkim Expedition.

„ Revised Estimate	18,3	...

123. It will be noticed that the figures entered above as accounts of 1886-87 do not agree with the corresponding amounts in the report of that year. The difference is composed of the earnings of the Cawnpore-Achnera line which has become Imperial from 1st April 1887 and is included in the Rajputana-Malwa Railway. The diminished earnings of this line are due principally to a decline in the wheat, grain, seed, and cotton traffic, the receipts on this account being 114,2 less than in the preceding year, and 125,3 less than the budget. The fall was anticipated in the Revised Estimate, but the traffic improved during the closing months of the year and the result is better than seemed probable at that time.

„ Revised Estimate	28,2	...

124. Although there was a large addition to the open mileage during the year, the earnings have not been satisfactory. The falling-off is general and is due in the *Goods* Department, to a decline in the grain traffic produced by the high prices which followed the partial failure of last year's crops, and in the *Coaching* receipts, to the depression in trade and scarcity prevailing in some parts of the Punjab. The proceeds from steam-boats were also low owing in a great measure to the abolition of special charges for ferry service as well as to diminished traffic. The earnings, however, were not quite so bad as they appear in these figures since there were large outstandings awaiting recovery. The increase over the Revised Estimate is due to the carriage of larger quantities of stores for Revenue purposes before the close of the year than anticipated.

Other State Railways—Imperial.

RESULTS.	Actuals. More.	Actuals. Less.
Actuals with Actuals of previous year	446,9	...
„ Budget Estimate	57,7	...
„ Revised Estimate	17,4	...

125. A good deal of the increase over the previous year is nominal, being due to the transfer to *Imperial* of the Nagpur-Chhattisgarh (now called the Bengal-Nagpur Railway), the Patna-Gya and the Dildarnagar-Ghazipur State Railways, which were formerly classed under *Provincial*. The two latter were so treated under the terms of the new Provincial Contract, and the former in consequence of its transfer to the Bengal-Nagpur Railway Company from 1st April 1887. Excluding these Railways the increase over 1886-87 would amount to 251,7, due principally to the opening of the Bellary-Kistna and the Cuddapah-Nellore State Railways and of various additions to existing lines. On the Bellary-Kistna 90 miles were opened, on the Cuddapah-Nellore 83 miles, on the Southern Mahratta an addition of 167½ miles, and on the Indian Midland 84¾ miles. Apart from these extensions, the traffic was better on the Wardha Coal, Sindia-Katni-Umaria, Umaria Colliery, the Bengal Central and the Mysore State Railways. In the case of the Wardha Coal State Railway, the improvement is ascribed principally to large sales of coal, and in the Sindia State Railway to an improvement in both passenger and goods traffic, greater quantities of grain, stone and Revenue stores having been carried over the line than in the previous year. The increase on the Katni-Umaria Railway is due to only 5 months' and in the Bengal Central and Mysore State Railways to only 9 months' transactions having appeared in the accounts for 1886-87. The increase on the Umaria Colliery is due chiefly to larger sales of coal to the Katni-Umaria Railway.

126. The actual earnings realised during 1887-88 exceeded the Budget by 57,7, the principal variations being as follows:—

Wardha Coal	+10,5
Bengal Central	+15,5
Southern Mahratta	+26,4
Mysore	+51,5
Katni-Umaria	— 9,4
Umaria Colliery	—16,0
Bellary-Kistna	—11,3
Cuddapah-Nellore	—12,7

127. The improvement on the *Wardha Coal* State Railway is caused by large sales of coal, the growing demand for which was foreseen and provided for, but the actuals far exceeded the most sanguine expectation. In the case of the *Bengal Central* Railway, the Budget provision represented the estimated earnings of the calendar year 1887, as the transactions were at that time adjusted with the Eastern Bengal Railway according to the calendar half-year. It was subsequently arranged to adjust the transactions monthly, and the Actuals of 1887-88 therefore include the earnings from 1st January 1887 to 31st March 1888, and this change has caused the large increase noticed on this line. The large excess on the *Southern Mahratta* Railway is due to increased open mileage, to the traffic on some of the newly-opened sections proving more favourable than it was prudent to anticipate, and to the transfer of the Bellary-Kistna Railway to the Southern Mahratta Railway Company from 1st January 1888, since which date it is worked as an integral portion of the Company's own line. The *Mysore* State Railway was not included under the head *State Railways* in the Budget for 1887-88. It was subsequently decided that they should be recorded under this head, and the Actuals have now been so shown.

Section H.—RAILWAYS—EARNINGS—*continued.*

128. The falling off on the *Katni-Umaria* Railway is due to the anticipated mineral and passenger traffic not having been realised to the extent expected. When the Budget for 1887-88 was framed, the traffic on this line had not had time to develop, and it was difficult to frame a trustworthy estimate. The decrease on the *Umaria Colliery* is ascribed to a smaller demand for coal than expected, and the failure to attract customers for slack coal. As regards the *Bellary-Kistna* Railway, it was assumed, when the Budget was under preparation, that a section of the line from Guntakul to Nandyal would have been opened to traffic on the 1st April 1887, but that was not done till the 11th July 1887, besides which the traffic was not so good as expected. The same may be said of the *Cuddapah-Nellore* State Railway, the Budget having been framed on the assumption that the line would be opened to traffic on the 1st May 1887, whereas the actual date was the 15th September 1887.

129. The Actuals are in excess of the Revised Estimate by 17,4, of which 5,0 is in the Bengal-Nagpur, 3,0 in the Wardha Coal and 7,9 in the Southern Mahratta Railways. These improvements are due on the Bengal-Nagpur Railway to the carriage of construction material to greater extent than was anticipated, on the Wardha Coal Railway to the large sales of coal and on the Southern Mahratta Railway to the traffic having been more favourable than was expected.

Other State Railways—Provincial, Excluding Eastern Bengal Railway System.

RESULTS.	ACTUALS. More.	Less.
Actuals with Actuals of previous year	...	241,3
„ Budget Estimate	46,6	...
„ Revised Estimate	...	7·3

130. As explained in paragraph 125 the comparison between the two years 1886-87 and 1887-88 is interrupted by the transfer of the Nagpur-Chhattisgarh, the Patna-Gya, the Cawnpore-Achnera and the Dildarnagar-Ghazipur State Railways from the *Provincial* to the *Imperial* section of the account. Eliminating these lines from the figures for 1886-87 the earnings during 1887-88 actually exceeded those of the former year by 78,9, of which 39,4 occurs in Burma, 20,6 in Tirhoot and 16,6 in Lucknow-Sitapur-Seramau. The improvement on the Burma State Railway is attributed to the pacification of the country, and the impetus to trade caused by the opening out of Upper Burma, as well as to the revenue derived from the carriage of construction material for the Tounghoo-Mandalay Extension. The increase in the case of the Tirhoot State Railway is due to an additional length of line opened for traffic during 1887-88, and to a considerable development of 3rd class passenger and Goods traffic, owing to the completion of the Gunduck Bridge. The improvement on the Lucknow-Sitapur-Seramau Railway is due to increased mileage, an additional length of 50½ miles from Sitapur to Gola-Gokarahnath having been opened during 1887-88.

131. Compared with the Budget Estimate, the actual earnings realised during 1887-88 show an increase of 46,6, of which +41,1 was in Burma, +15,5 in Tirhoot and —9,7 in Lucknow-Sitapur-Seramau. The explanations given above in the preceding paragraph apply also to the differences in the Burma and Tirhoot lines, and as regards the Lucknow-Sitapur-Seramau Railway when the Budget was framed, only a portion of the line had been opened for traffic, and no information was available on which to base a reliable estimate.

132. The actual earnings realised are less than the Revised Estimate by 3,9 in Burma and 3,5 in Tirhoot. In the case of the Burma Railway the Goods traffic was not as large as anticipated. The decrease on the Tirhoot Railway is due to the outstanding earnings at the close of the year being higher than was expected when the Revised Estimate was framed.

Gross Earnings.

133. The earnings realised during 1887-88 fell short of those of the preceding year by 39,1, chiefly in the Bombay, Baroda and Central India and in the South Indian Railways. The decrease on the Bombay, Baroda and Central India Railway is due to a falling off in *Goods* traffic exchanged with the Rajputana-Malwa State Railway, and in the carriage to and from Bombay of wheat, coal, coke, grain, salt, and seeds. The fall on the South Indian Railway was the result chiefly of fluctuations in *Suspense* transactions, the payments to other lines in excess of receipts from them having been larger than in the previous year.

134. The increase over the Budget Estimate occurred chiefly on the Great Indian Peninsula and the Madras Railways. The large increase on the former line may be attributed to the moderate estimate adopted by the Government of India, as it was not considered advisable to calculate on a continuance of the very favourable traffic which had developed in the preceding year. The increase was in 3rd class passengers, and in wheat, cotton, oil-seeds, food-grains, &c. The increase on the Madras Railway is attributed to development of traffic and to larger receipts from other lines. These results were counterbalanced by a falling off in the Bombay, Baroda and Central India as noted above in paragraph 133, and in the Oudh and Rohilkhund Railways The decrease on the latter line occurred entirely in *Goods* traffic, in which the Budget expected an improvement, but the result has been a further decline.

135. The comparison with the Revised Estimate is made below, and is satisfactory as showing an increase of 87,4. The increase on the Bombay, Baroda and Central India Railway is due to a sudden improvement in traffic during the last months of the year, which was little expected at the time of the preparation of the Revised Estimate, and in the Great Indian Peninsula Railway to a greater number of 3rd class passengers, and to larger quantities of wheat, cotton, oil-seeds, and food-grains having been carried over the line than was expected. The small decrease on the Madras and South Indian Railways needs no remark. The improvement on the Oudh and Rohilkhund Railway is caused by a better traffic during the closing months of the year than it was considered safe to calculate upon when framing the Revised Estimate.

Bombay, Baroda and Central India	+ 17,2
Great Indian Peninsula	+ 64,6
Madras	— 1,0
Oudh and Rohilkhund	+ 11,7
South Indian	— 5,1
NET INCREASE	87,4

Working Expenses.

136. The decrease on the actuals of the preceding year is made up as under—

Bombay, Baroda and Central India	— 42,8
Great Indian Peninsula	— 15,1
Madras	+ 9,3
Oudh and Rohilkhund	— 6,2
South Indian	+ 26,2
NET DECREASE	28,6

137. The decrease on the Bombay, Baroda and Central India Railway is due to the smaller traffic noticed above in paragraph 133 as well as to a considerable reduction of expenditure in the Engineering Department. The saving on the Great Indian Peninsula Railway occurred in the Locomotive and in the Carriage and Wagon Departments, the decline in the former being attributed to charges for renewals having been considerably less than in the previous year, and in the latter to cheaper rates paid for timber and to other economies. The increase on the Madras Railway is connected with the reconstruction of the Penner and Chitravati bridges and with extensive renewals of goods vehicles. The saving on the Oudh and Rohilkhund Railway is satisfactory, especially as the traffic worked in 1887-88 was larger than that of 1886-87. The increase on the South Indian Railway is caused chiefly by a larger renewal of permanent-way and by repairs to bridges.

Section H.—RAILWAYS—EARNINGS—*continued.*

138. Compared with the Budget Estimate of 1887-88, the actuals shew a small increase of 9,8 as under—

Bombay, Baroda and Central India	— 29,8
Great Indian Peninsula	+ 12,2
Madras	+ 38,9
Oudh and Rohilkhund	—33,9
South Indian	+ 22,4
NET INCREASE	9,8

139. The decrease on the Bombay, Baroda and Central India Railway is due principally to the late receipt of stores from England for renewals of permanent-way, and to non-arrival from England of material required for renewals of Carriage and Wagon stock. The increase on the Great Indian Peninsula Railway is attributable to insufficient provision having been made in the Budget for maintenance and traffic expenses, and in the Madras Railway to heavier renewals of engines and goods vehicles than anticipated, and to charges connected with the re-construction of the Penner and Chitravati bridges. The saving on the Oudh and Rohilkhund Railway is due to the provision in the Budget Estimate having been too liberal for requirements, while on the South Indian Railway extensive renewals of permanent-way became necessary, and the loss by Exchange was greater than anticipated.

140. The Revised Estimate was not reached in the Bombay, Baroda and Central India owing to smaller payments to the Great Indian Peninsula Railway Company on account of traffic arising from the Carnac Bunder Bridge, to non-arrival of material from England for renewal of Carriage and Wagon stock, and to economy in working. The decrease on the Great Indian Peninsula Railway is due to the charges on account of engine renewals having been considerably less than anticipated.

141. The Gross Receipts, Expenses and Net Receipts of these lines for the past six years are given in the following Statement:—

Guaranteed Railway Companies.	Gross Receipts.						Expenses.						Net Receipts.					
	1882-83.	1883-84.	1884-85.	1885-86.	1886-87.	1887-88.	1882-83.	1883-84.	1884-85.	1885-86.	1886-87.	1887-88.	1882-83.	1883-84.	1884-85.	1885-86.	1886-87.	1887-88.

XXVIII.—Subsidized Companies (Repayment of Advances of Interest).

1886-87. Accounts.		1887-88. Budget.	1887-88. Revised.	1887-88. Accounts.
1,6		58,7	27,3	24,8

142. When the Budget for 1887-88 was under preparation, the system of accounting for the Mysore State Railway was not definitely arranged, and hence, pending a final settlement, it was decided to enter the amount of interest on Capital Expenditure, which it was understood would be recoverable from the Mysore State under this head, and the sum of 58,7 entered above represented the interest charges for the two years 1886-87 and 1887-88. Under later orders from the Secretary of State, the receipts and working expenses as well as the interest charges are now recorded in the accounts under State Railways—gross earnings and working expenses, and only the *net* charge for interest (*i.e.*, interest on Capital Expended *minus* Net Receipts), which is recoverable from the Mysore Durbar, is credited to this head, by transfer debit to the Civil Department for realisation from the Durbar. The transactions for 1886-87 were finally adjusted in the accounts of 1886-87 in accordance with these orders, which have also been carried out in Revised Estimate and Actuals of 1887-88. Hence the difference between the latter and the Budget.

Section H.—RAILWAYS—EXPENSES.

1886-87. Accounts.		1887-88. Budget.	1887-88. Revised.	1887-88. Accounts.
15,666,4	EXPENDITURE	16,481,9	16,567,1	16,655,7

143. These figures comprise the expenditure under the following heads:—

1886-87. Accounts.		1887-88. Budget.	1887-88. Revised.	1887-88. Accounts.
	STATE RAILWAYS—			
5,219,9	Working Expenses	5,831,3	5,460,7	5,594,2
3,202,4	Interest on debt	3,318,4	3,371,2	3,341,9
2,308,6	Annuities	2,308,1	2,390,6	2,390,8
473,2	Interest on Capital Deposits	585,2	666,4	666,4
	GUARANTEED COMPANIES—			
600,8	Surplus Profits, &c.	573,0	721,0	714,0
3,721,9	Interest	3,732,3	3,856,8	3,853,0
	SUBSIDISED COMPANIES—			
45,2	Land, &c.	60,0	47,0	43,6
...	Advances of Interest	...	...	...
94,4	MISCELLANEOUS RAILWAY EXPENDITURE	73,6	53,4	51,8
15,666,4		16,481,9	16,567,1	16,655,7

144. The excess over the Actuals of 1886-87 is 989,3, and is spread over all heads, and more particularly *State Railways*, where it is due chiefly to heavy charges for the maintenance of the new frontier lines opened in 1887-88. The rise in Interest, Annuities, &c., has been caused for the most part by the lower rate of exchange which prevailed in 1887-88, as compared with the previous year, and in the case of Interest on Capital Deposits, by capital deposited with the Secretary of State by the Bengal-Nagpur Railway Company for the first time.

145. The differences between the Actuals and Budget and Revised Estimates of 1887-88 are comparatively small, and are chiefly owing to the fall in exchange.

38.—State Railways—Working Expenses.

1886-87. Accounts.		1887-88. Budget.	1887-88. Revised.	1887-88. Accounts.
5,219,9	Expenditure	5,831,3	5,460,7	5,594,2

146. Particulars of these charges are given in page 67, and the results as compared with the previous year and the estimates may be summarised as follows:—

	Actuals. More.	Actuals. Less.
Actuals with Actuals of previous year	374,3	...
,, Budget Estimate	...	237,1
,, Revised Estimate	133,5	...

147. The excess over the Actuals of 1886-87 may be briefly attributed to increased open mileage, to growth of traffic on some lines necessitating larger expenditure, and to the charges connected with the new lines opened on the frontier.

148. The decrease as compared with the Budget is due generally to economies following the decline of traffic on some of the principal lines, to less expenditure on repairs and renewals, and to the special renewals contemplated on the North-Western Railway not having been carried out to the extent provided for.

149. The excess over the Revised Estimate occurred chiefly on the North-Western Railway, where the special renewals mentioned in the preceding paragraph made greater progress than was anticipated, and where the credits for material taken out of the line were not so large as expected. The expenditure on

Section H.—RAILWAYS—EXPENSES—*continued.*

repairs of bridges, flood damages, and on fuel for the Sind-Pishin Section was greater than the Revised allowed. The following paragraphs explain these differences in detail.

East Indian Railway.

1886-87. Accounts.		1887-88. Budget.	Revised.	Accounts.
	WORKING EXPENSES—			
464,5	Maintenance	571,9	460,2	464,0

182,5	⅓ Surplus profits paid to the Company and Contribution to Provident Fund of one per cent. on Net Earnings	190,0	205,0	205,1
1,721,8	TOTAL EAST INDIAN RAILWAY	1,840,0	1,650,0	1,662,6

RESULTS.

	ACTUALS. More.	Less.
Actuals with Actuals of previous year	...	59,2
„ Budget Estimate	...	177,4
„ Revised Estimate	12,6	...

150. The short expenditure in 1887-88, as compared with 1886-87, arose chiefly from less renewals of engines and vehicles in the former, and to the inclusion in the accounts of 1886-87 of the cost of a new steamer.

151. The difference between the Actuals and Budget Estimate is due to 9 engines and 18 tenders not having arrived from England during the year, as expected, and hence the debit to working expenses on account of them was delayed. Some part of the difference is also attributable to less repairs and renewals of vehicles, to steel rails not having been available for renewals of permanent-way, and to savings effected in consequence of a falling off in the traffic generally.

152. The excess over the Revised Estimate is not large, considering the magnitude of the transactions of the East Indian Railway. The Government Examiner of Accounts reports that no specific reason can be assigned for the variations leading up to this excess.

Eastern Bengal Railway.

1886-87. Accounts.		1887-88. Budget.	Revised.	Accounts.

„ Budget Estimate	...	14,9
„ Revised Estimate	16,1	...

153. As stated in para. 122, the foregoing figures include the charges of the main line and also of its branches. The expenditure in 1887-88 was considerably less than that of the preceding year, when the expenses were exceptionally heavy, owing to the diversion of the line at Goalundo and the removal of the Station from Goalundo to Rajbari, and also to extensive repairs of locomotives and steamers. There were no abnormal charges of this nature in the accounts for 1887-88, besides which there was a large reduction of establishment, owing to the amalgamation of the Northern Bengal, Dacca, Kaunia-Dhurla, and the open portion of the Assam-Behar Section of the Assam-Behar State Railway with the Eastern Bengal Railway. The saving on the Budget is due to reduced establishment caused by the amalgamation just mentioned, and to less expenditure on repairs and renewals than was at first thought necessary. The excess over the Revised Estimate is small, and is the net result of various savings and excesses of which the following are the chief. Under *Locomotive* expenses there was an excess of 9,0, due chiefly to the cost of two locomotives debited to Revenue. The expenditure in the *Traffic* department exceeded the provision in the estimate by 5,8 chiefly in handling charges owing to increased traffic which was not fully provided for. Against these excesses there was a saving of 1,4 under *Carriage and Wagon* expenses, owing to less expenditure on renewals of those vehicles.

„ Budget Estimate	...	45,3
„ Revised Estimate	7,2	...

154. The figures entered above as accounts of 1886-87 do not agree with the corresponding amounts in the report of that year, but the discrepancy is explained above in paragraph 123. The saving, as compared with the Actuals of 1886-87, occurred chiefly in the Locomotive and Traffic Departments owing to the smaller goods traffic noticed in paragraph 123. The saving in the Locomotive Department occurred chiefly in coal and running expenses, and in the Traffic Department to reduction in the cost of handling goods, and to fewer trains run. The discrepancy was further widened by a special debit of 10,9 in the accounts of 1886-87 for stationery and forms. The decrease on the Budget Estimate is due generally to the same causes, while the excess over the Revised Estimate resulted from increased earnings during the closing months of the year, which was not anticipated.

	ACTUALS. More.	Less.
Actuals with Actuals of previous year	316,6	...
„ Budget Estimate	...	66,5
„ Revised Estimate	83,5	...

155. The large increase in expenditure, compared with the previous year, is due to heavy charges connected with the maintenance of the new frontier lines opened in 1887-88, as well as to a re-organization in the establishments employed on the line, and to the transfer to the North-Western Railway of the Port Stores Establishment at Kurrachee. The decrease on the Budget Estimate is due to the special renewals of permanent-way not having been executed to the extent contemplated owing to delay in supplying material from England. The excess over the Revised Estimate is attributed to certain important special renewals of permanent-way being in progress in the closing months of the year, and to credits for material taken out from the line not being as large as expected. Larger expenditure also was incurred on the carriage of Revenue stores in connection with the work of special renewals, repairs of bridges flood damages at Saharanpore and the consumption of fuel on the Pishin Section.

Section H.—RAILWAYS—EXPENSES—*continued.*

Other State Railways—Imperial.

RESULTS.	ACTUALS. More.	Less.
Actuals with Actuals of previous year	291,3	...
,, Budget Estimate	53,4	...
,, Revised Estimate	13,8	...

156. The large increase over the actuals of the previous year is to a great extent merely nominal, owing to the transfers mentioned in para. 125. Eliminating these transfers, the increase would only amount to 177,7, which occurred principally on the following Railways :—

Wardha Coal	+ 8,4
Katni-Umaria	+ 7,0
Bengal Central	+ 24,2
Indian Midland	+ 12,0
Southern Mahratta	+ 92,8
Bellary-Kistna	+ 8,5
Cuddapah-Nellore	+ 9,2
Mysore	+ 17,4
	179,5
Umaria Colliery	— 5,6
NET INCREASE	173,9

157. The increase on the Wardha Coal Railway is due to extra cost of cutting coal to meet the increased demand, and to heavy renewals of sleepers and repairs to goods vehicles and machinery. In the case of the Katni-Umaria Railway the increase is due to only five months' transactions appearing in the accounts for 1880-87, the line having been opened for traffic on the 2nd November 1886. The increase on the Bengal Central Railway is due to the accounts for 1886-87 having included the transactions of 9 months only, while the accounts for 1887-88 include the transactions of 15 months, as explained in para. 127. The increase on the Indian Midland and Southern Mahratta Railways is due to additional lengths of line having been opened for traffic as explained under Earnings. The Bellary-Kistna and Cuddapah-Nellore Railways were opened during 1887-88. The increase in the case of the Mysore Railway is due to only 9 months' transactions appearing in the accounts for 1886-87. The decrease on the Umaria Colliery is chiefly due to a write-back to Capital, ordered by the Government of India, of R83,100 being the net loss on the working of the undertaking to the end of 1886-87.

158. The actual working expenses during 1887-88 exceeded the Budget Estimate by 53.4. The principal differences occurred on the following Railways :—

Wardha Coal	+ 10.5
Bengal Central	+ 5,6
Southern Mahratta	+ 38.7
Mysore	+ 37.4
Umaria Colliery	— 18,0
Bellary-Kistna	— 7,5
Cuddapah-Nellore	— 5,8

159. The increase on the Wardha Coal Railway is due to the cost of cutting and raising a larger quantity of coal than it was anticipated would be necessary, to extensive repairs to machinery, to charges incurred in connection with repeated outbreaks of fire in the mines, and to increased outlay on pumping and ventilating arrangements. The increase in the case of the Bengal Central Railway is due to increased earnings, as the line is worked by the Eastern Bengal State Railway for a certain percentage of gross earnings. The increase on the Southern Mahratta Railway is due to increased open mileage. The transactions of the Mysore Railway were not included under State Railways in the Budget Estimate. It was subsequently decided that they should be recorded under this head, and the Actuals have now been so shown. The decrease on the Umaria Colliery is due to the out-put of coal having been less than anticipated and to the write-back to Capital of R83,100, being the net loss on the working of the undertaking to the end of 1886-87. The decrease in the case of the Bellary-Kistna and Cuddapah-Nellore Railways is due to the lines not having been opened as early as was expected when the Budget Estimate was under preparation.

160. As compared with the Revised Estimate, the Actuals show an increase of 13,8 chiefly on the following Railways :—

Bengal-Nagpur	4,3
Wardha Coal	3,0
Bengal Central	3,1
Southern Mahratta	2,4

Section H.—RAILWAYS—EXPENSES—*continued.*

161. The increase on the Bengal-Nagpur Railway is due to a larger consumption of coal owing to improved traffic, to heavier repairs to stock, to increased maintenance charges, and to the employment of additional train staff. The increase in the case of the Wardha Coal Railway is due to extensive renewals of sleepers and to larger outlay than was expected in connection with outbreaks of fire in the mines. The increase on the Bengal Central Railway is due to an increase in the maintenance charges, owing to a re-allocation of the expenditure on flood damage repairs. The increase on the Southern Mahratta Railway is due to increased traffic.

Other State Raliways—Provincial, excluding Eastern Bengal State Railway.

RESULTS.	ACTUALS. More.	Less.
Actuals with Actuals of previous year	...	164,2
,, Budget Estimate	5,2	...
,, Revised Estimate	7	...

162. As explained in paragraph 130, the large decrease, compared with the Actuals of the previous year, is merely nominal, owing to the transfer of the Nagpur-Chhattisgarh, Patna-Gya, and Dildarnagar-Ghazipur State Railways to *Imperial* during 1887-88. There were also no transactions against the Rajputana-Malwa and Cawnpore-Achnera State Railways in 1887-88, owing to the transfer of the latter line to Imperial. Eliminating the transactions of these lines for 1886-87 for purposes of comparison, the working expenses during 1887-88 exceeded those of 1886-87 by 27,2, of which 2,6, 7,6 and 13,8 relate respectively to the Burma, Tirhoot and Lucknow-Sitapur-Seramau lines. The increase on the Burma Railway is due to the growth of traffic and to greater train mileage, and in the Tirhoot Railway to increased traffic, to large payments to the Bengal and North-Western Railway Company for hire of rolling stock, and to charges for rent of the Sonepore Junction Station. The increase on the Lucknow-Sitapur-Seramau Railway is due to increased mileage, an additional length of 50½ miles having been opened during 1887-88. As regards the Budget the improvement in the actuals has been caused by development of traffic.

Section H.—RAILWAYS—EXPENSES—*continued.*

Interest on Capital.

163. As explained in former reports, the interest charge for State Railways depends upon the progress of construction during the year, and hence the payments in 1887-88 were greater than in the previous year owing to the larger sum expended upon construction. Considering the nature of the charge, the estimates have been fairly well-maintained. The following statement shews in usual form how the interest charged in the accounts of 1887-88 has been computed. It will be noticed that the amount entered in this statement under the head "Other State Railways" as capital expenditure at the end of 1886-87 is 53,968,0, whereas the corresponding figure in the report for 1886-87 is 55,334,8. The difference of 1,366,8 consists of 1,390,4 on account of the capital expenditure on the Nagpur-Chattisghar, Bilaspur-Etawa and Nagpore-Bengal Railways, removed from this statement because those lines have been made over to the Bengal-Nagpore Railway Company, less 23,6, being the survey charges of the Chaman and Bezwada extensions now brought into the capital account.

Capital Expenditure on which Interest is chargeable.	E. I. Ry.	E. B. Ry.	Other State Railways.	Total.
Capital Expenditure at end of 1886-87	2,095,0	1,689,2	53,968,0	57,752,2

Actuals with Actuals of previous year	67,9	...
,, Budget Estimate	38,7	...
,, Revised Estimate	1	...

Interest.

167. The increase over the Actuals of the previous year is due principally to the formation of the Bengal-Nagpur Railway Company which did not exist in 1886-87, and to more capital deposited with the Secretary of State for existing lines. The increase over the Budget Estimate is also due to the latter cause.

Exchange.

168. The increased charges for exchange, compared with the Actuals of the previous year and with the Budget Estimate, are due to larger payments of interest on increased deposits of capital, as well as to a further fall in the rate of exchange.

Surplus Profits.

169. The large increase over the Actuals of the preceding year and the Budget Estimate of 1887-88 occurred on the Great Indian Peninsula Railway, owing to increased earnings.

Land and Supervision.

170. The recoveries from Companies were larger in 1887-88 than in the previous year when they amounted to 29,0 only, which accounts chiefly for the decrease in the total expenditure. The saving on the Budget provision is due chiefly to delay in settling claims for compensation for land in Bombay and Oudh. The saving on the Revised Estimate is attributed to the same cause.

Section H.—RAILWAYS—EXPENSES—*continued.*

Interest.

171. The increase under this head, as compared with the Actuals of the preceding year, is due principally to larger payments by the Oudh and Rohilkhund and Great Indian Peninsula Railways on account of interest on overdrawn Capital.

172. The decrease between the Actuals and Budget and Revised Estimates of 1887-88 is due to smaller payments in England in consequence of Capital not having been raised to the extent anticipated, besides which the provision for interest on overdrawn Capital in India in the Revised Estimate was overestimated in the case of the South Indian Railway.

Exchange.

173. The excess in all cases is the result of a fall in the rate.

RESULTS.

	Actuals. More.	Less.
Actuals with Actuals of previous year	...	1,6
,, Budget Estimate	...	16,4
,, Revised Estimate	...	3,4

174. The difference between the Actuals of 1886-87 and 1887-88 is very small, and is due to slightly smaller payments for land on the Bengal North-Western Railway during 1887-88, and to a credit of 3 realised by the sale of C Class land and a house at Dum-Dum in connection with the Bengal Central Railway.

175. The saving on the Budget Estimate is due to the above credit, which was not foreseen when the estimate was under preparation, to shorter payments on the Bengal North-Western Railway, and to the provision for land in connection with the proposed Nilgiri Railway not having been utilised.

176. The saving on the Revised Estimate is due to smaller payments for land on the Bengal and North-Western Railway. It may be mentioned that the estimates for land are prepared by the Revenue authorities, and are beyond the control of the Public Works Department.

178. The first difference calling for notice is the rise in *Surplus Establishment and Miscellaneous Charges*, and it is due to this head being now debited with the leave allowances of Government officers lent to Railway Companies. The *reserve* of 24,6 was in excess of the demands which arose during the year and was saved accordingly. The minus figure against the *Nagpur-Chhattisgarh Extension Survey* arises out of the refund received from the Bengal-Nagpur Railway Company on that account. The *Bannu Railway Survey* was ordered after the Budget was passed, and the expenses of the *Survey for Extension beyond the Khwaja-Amran Mountains* are now classified under the head 48—State Railways—Construction. The Budget provision for the *Share of the Public Works Secretariat Establishment* was made under 45—Civil Works, but the Government of Bengal has asked that the charges may be entered under 41—Miscellaneous Railway Expenditure.

Section J.—IRRIGATION.

1886-87 Accounts.		1887-88. Budget.	1887-88. Revised.	1887-88. Accounts.
1,656,7	REVENUE	1,688,0	1,706,8	1,714,3

179. These collections exceeded those of 1886-87 by 57,6 and the Budget by 26,3. The increase is in both cases chiefly in the Punjab, and is due to the development and extension of irrigation on almost all the canals in that province.

Imperial Works.

Gross Revenue.

180. The gross revenue in 1887-88 exceeded that in 1886-87 by 105,1. The excess, it will be observed from the details, occurred chiefly in the Punjab, and was caused by extension and development of almost all the works in that province. In the North-Western Provinces there was a slight increase due to development of irrigation on the Betwa Canal, and in Madras there was also a rise in consequence of improvements made to the Sangam Anicut.

181. The Budget Estimate anticipated to a great extent the increase in revenue in the Punjab, but in preparing the Revised Estimate it was discovered that owing to the rapid advance of irrigation from the Western Jumna Canal it did not go far enough. The Revised Estimate was therefore prepared for a considerably larger income which has been exceeded in the actuals owing to a larger irrigation of *kharif* and

rabi crops on the Sidhnai Canal, the recovery of arrears on the Sirhind Canal and the sale of water and plantation on the Bari Doab Canal.

Working Expenses.

182. With the increase in gross revenue there was also an augmentation of the working expenses, though not nearly to the same extent as in the case of revenue. One of the chief causes of this increase was the transfer to this head from 49—Irrigation, Section N, Expenditure not charged to revenue, of the old expenditure on the Kali Nadi aqueduct on the Lower Ganges Canal. This transfer has become necessary because the cost of the new aqueduct is being treated as capital outlay and is debited to Expenditure not charged to revenue. In the Punjab the increase is caused by maintenance and repairs of the newly opened Chenab Canal, by repairs to damages caused by floods, and by the progress of operations on the Swat river, the Sirhind, and the Western Jumna Canals. The same causes have led to the excess over the Budget and Revised Estimates.

Provincial Works.

Gross Revenue.

183. The falling-off in the revenue of 1887-88 as compared with 1886-87 is due chiefly to the agitation against the irrigation system of the Sone canals. During the sitting of the Commission that was appointed to enquire into their complaints, the rate-payers withheld payment of the sums due from them in the hope of obtaining remissions. In the North-Western Provinces also, there was a decrease in the revenue owing to the abundant rainfall having lessened the demand for artificial irrigation.

184. These causes also operated in diminishing recovery of the amounts entered in the Budget and Revised Estimates.

Working Expenses.

185. Compared with 1886-87, the rise in working expenses during 1887-88 is entirely due to a change of system by which the Irrigation Branch in Bengal has now its own establishment. The Budget provision had to be increased in the Revised, owing to additional charges for repairing the Mahanady weir breached by floods in 1886, and the damages to the Midnapore Canal caused by the cyclone of 1887 as well as to correct a short estimate on account of Establishment in the North-West Provinces and Oudh. The effect of these increases was nullified by the write-back to Imperial of expenditure on the Kali Nadi aqueduct mentioned above in para. 182. This expenditure is first transferred from capital outlay on Irrigation Works to working expenses; but as provincial funds are not able to bear the charge, the Imperial Government removes the burthen by allowing the amount to be charged against itself.

186. The Actuals fell short of the Revised Estimate by 20,4. The falling-off occurs chiefly in the North-West Provinces, and is due to the transfer to Imperial funds mentioned in the preceding paragraph.

XXIX.—Major Works—Indirect Receipts.

Portion of Land Revenue due to Irrigation.

1886-87. Accounts.		1887-88. Budget.	Revised.	Accounts.
87,2	N.-W. Provinces and Oudh	87,2	87,2	87,2
68,2	Punjab	40,1	43,2	45,7
390,2	Madras	377,9	386,8	409,6
51,9	Bombay	71,3	61,2	60,1
597,5	TOTAL	576,5	578,4	602,6

187. The Actuals of 1887-88 exceeded those of the previous year by 5,1. The increase is attributed chiefly to a large collection of water-rates on the Godavari and Kistna Delta systems in Madras, owing to a favourable season and sufficient supply of water in the canals, and partly to an extension of irrigation on some of the canals in Sindh. The decrease in the Punjab is only apparent, and comes from an item of 20,0 on account of arrears of previous years on the Bari Doab canal, having been included in the figures of 1886-87.

188. The Budget and Revised Estimates of 1887-88 were prepared on the basis of the actuals of the previous year exclusive of adjustments. The Actuals, however, show an improvement of 24,2 over the Revised Estimate owing to an increase of revenue in Madras, as explained in the preceding paragraph.

„ Budget Estimate	4,0	...
„ Revised Estimate	4,9	...

189. The Actuals of 1887-88 were better by 11,3 than those of 1886-87, and this improvement is the net result of numerous small increases and decreases.

190. The Budget and Revised Estimates were framed for normal earnings, but the Actuals were slightly in excess of the Estimates. This increase is the aggregate of small increases in all the provinces excepting Lower Burma, where there was a falling-off of 7, owing to a considerable area of land on the Pegu and Sittang canal having been allowed to remain fallow on account of the disturbed state of the country.

Section J.—IRRIGATION—EXPENDITURE.

1886-87. Accounts.	EXPENDITURE.	Budget.	1887-88. Revised.	Accounts
2,310,7		2,441,3	2,484,4	2,461,6

191. The expenditure of 1887-88, though close to the Budget and Revised Estimates, exceeded that of the previous year by 150,9, the excess being due (1) to larger working expenses consequent on a greater length of canals having been opened for irrigation, (2) to increased charge for interest owing to the additional capital outlay, and (3) to higher rate of expenditure from Provincial funds in Bengal. These differences have been further enlarged by the transfer to this group under *43—Minor Works and Navigation* of the outlay on the Khusdil Khan reservoir which has hitherto been charged under *Capital Expenditure not charged against Revenue.*

Imperial Works.

194. The decrease as compared with the accounts of the previous year is due to the transfer from *Imperial* to *Provincial* of the outlay on certain works in Bengal and Madras which have been provincialized from the commencement of 1887-88.

195. The Budget was framed for 271,7, which took into account the transfers to Provincial mentioned above and allowed 24,0 for irrigation works in Upper Burma. An additional grant, however, was sanctioned during the course of the year for canal clearances in Sind, and so the Revised Estimate was placed at 280,6, against which the Actuals have amounted to 292,9. The increase in the Actuals is due chiefly to the debit under this head of the outlay on the Khushdil Khan reservoir, for which provision was made under *49—Capital Expenditure not charged against Revenue* in section N of the accounts. The short charge in Bombay, as compared with the revised estimate, occurs under Establishment, and is ascribed to the amalgamation of the Irrigation Executive offices with those of the General Branch.

Provincial and Local Works.

196. The excess of 315,5 over the expenditure of 1886-87 is due chiefly to the works in Bengal and Madras hitherto constructed from Imperial funds, having been provincialized from the commencement of 1887-88 as stated above in para. 194.

197. The Budget and Revised Estimates were framed for 498,8 and 501,9 respectively, whereas the Actuals have amounted to 473,6 only. The decrease is attributed to an over-estimate of the actual requirements of the year in Bengal and to several small savings in Madras.

Section K.—BUILDINGS AND ROADS—RECEIPTS.

1886-87. Accounts.		Budget.	1887-88. Revised.	Accounts.
727,6	. . . . .	539,5	566,2	592,3

198. Compared with 1886-87 the receipts under the head Buildings and Roads' are short by 135,3, which is chiefly due to the recovery in the previous year of 150,0 from His Highness the Maharajah of Sindia on account of the rendition of the Gwalior Fort and the Morar Cantonment. The excess of Actuals over Estimates is obtained principally by an improvement in the receipts from ferry tolls and the Roorkee workshops, and to unexpected realizations from sales of buildings and old materials. The differences between the Accounts and Estimates of the various Provinces are explained in the following paragraphs :—

XXXI.—Military Works.

1886-87. Accounts.		Budget.	1887-88. Revised.	Accounts.

RESULTS.

		Actuals. More.	Less.
Actuals with	Actuals of previous year	...	148,0
,,	Budget Estimate	4,0	...
,,	Revised Estimate	2,7	...

199. The decrease of 148,0 in the total revenue compared with that of the previous year is due to the exceptional recovery in 1886-87 of 150,0 on account of the rendition of the Gwalior Fort and the Morar Cantonment to His Highness the Maharajah Sindia.

200. The Actuals are better than the Budget Estimate by 4,0 owing to increased receipts from sale of water at Aden. The improvement of 2,7 over the Revised Estimate is the result of the estimate of the Inspector General, Military Works, having been placed at too low a figure.

Section K.—BUILDINGS AND ROADS—RECEIPTS—*concluded.*

Imperial.

201. There is little change in the *departmental revenue*, but the collections by *Civil Officers* has improved owing to an extension of ferries in Upper Burma consequent on the pacification of the country.

Provincial.

202. The *departmental revenue* in the Central Provinces is near last year's figure, but the Budget was too low. There is apparently a large decline in Bengal as compared with 1886-87, but the credits in that year included the receipts derived from the Burrakur Iron Works from 1882-83 to 1886-87, these having previously been held in the deposit account. There is a rise in the North-Western Provinces and Oudh, consisting of improved receipts from the Roorkee Workshops and the Printing Press and Book Depôt of the Thomason Engineering College. There is also an increase in Bombay in Public Works tolls and sales of old buildings and materials.

203. As regards the revenue collected by *Civil Officers*, Bengal presents a decline which is due to the transfer of ferries to Local Boards, but these transfers were not made to the extent contemplated in the Budget. The decline in the North-Western Provinces and Oudh is attributed to the opening of the Dufferin bridge over the Ganges at Benares, and in the Punjab to a revision of the conditions under which the ferries in that Province are administered by Local Boards.

Local.

204. The total revenue is greater than that of 1886-87 by 46,0, of which 43,3 represents the increase under Bengal from the transfer of Provincial ferries to District Boards as noticed in the preceding paragraph. In view of these transfers, the Bengal Budget was placed at 51,7, but owing to the transfers not having been carried out to the extent originally contemplated, the Actuals are short by 6,2. The improvement of 13,5 on the Revised Estimate is attributed to high rates having been obtained for the lease of ferries. In Madras, the Actuals are better than the Budget Estimate by 8,7 owing to larger receipts from ferry tolls. This was duly provided for in the Revised Estimate.

5,201,7	EXPENDITURE.	5,553,2	5,599,6	5,451,1

205. The total Expenditure under this head exceeds that of the previous year by 249,4, owing chiefly to the provision of buildings and roads in Upper Burmah, and to increased work on the Frontier roads in the Punjab and Beluchistan. The increases in the Expenditure chargeable to Imperial and Local Funds amount to 462,3 and 36,9 respectively, but on the other hand, the Provincial Expenditure has been reduced by 249,8, so that the net increase is only 249,4. The reduction in the Provincial Expenditure is chiefly due to smaller grants having been assigned for expenditure on Public Works in consequence of the revision of the Provincial contracts in 1887-88.

206. The Estimates have been fairly worked up to on the whole. The Budget Estimate of Expenditure from Local Funds was placed too high, particularly under Public Works in charge of Civil Officers.

207. In comparing the actuals of the two years it will be convenient to note the differences in each province. As regards *India General and Political* the largest difference is in the accounts of the Inspector General of Military Works, who seems to have spent 11,2 more on new works, but 5,6, and 19,4 less in repairs and establishments. In Central India there was an excess of 25,1 in 1887-88 arising mainly from a grant-in-aid of 30,0 to the Mhow Cantonment Fund on account of the Mhow water-works. There was a similar excess of 8,8 in the Hyderabad circle, owing to the provision of additional accommodation for British cavalry at Trimulgherry. In the *Central Provinces* the expenditure was less, owing to the completion in 1886-87 of the more important military works and to the stock balances having been worked off in 1887-88. The large outlay in *Upper Burma* is due to the necessity of providing accommodation for troops and erecting fortifications in consequence of the recent occupation of the country, while the decrease in *Lower Burma* is mainly in the accommodation of European and Native troops, Commissariat buildings and works of communication. In *Assam* the savings occur mainly in the grants for housing the Native infantry at Shillong and for the fortified post at Kohima. In *Bengal* the works

Section K.—BUILDINGS AND ROADS—EXPENDITURE—*continued*.

required by the Commissariat and Khedda Departments were in an advanced state when the year 1887-88 commenced, and no new works were undertaken. It is also reported that the military buildings at Bhagulpur and Dacca were transferred during the year to Provincial Services. The increase in the *North-West Provinces and Oudh* is due mainly to the works connected with the defences of Jhansi. In the *Punjab* a large expenditure was incurred in 1887-88 on buildings for the Native infantry at Abbottabad and Mardan, the total outlay on this account being 10,4 against 5,5 in 1886-87. The saving in *Madras* is made up of numerous small items, and in *Bombay* is due partly to diminished expenditure and partly to a recovery of 25,8 from Her Majesty's Imperial Government as its share of the cost of the Aden Defences up to 1885-86. This recovery has been deducted from the expenditure.

208. As compared with the budget the accounts of 1887-88 shew a *saving* in India, the Central Provinces, Assam, Bengal, Madras and Bombay. The saving in *India, General and Political*, is mainly in the reserve of 83,9 held in the budget, and which was distributed afterwards in the manner and to the extent found to be necessary. Allowing for this reserve, the accounts show an excess expenditure of 6,6 and 19,1 respectively in the Hyderabad Circle and in the department of the Inspector General of Military Works. The excess in the former was caused mainly by providing additional accommodation for the troops in Trimulgherry and Secundrabad, and in the latter partly by similar expenditure, and partly by the construction of block houses on the railway bridges at Benares and Ferozepore and of the defensive post at Loralai.

209. The saving in the *Central Provinces* is the result of a deduction of 4,1 on account of suspense balances connected with the stock account, and in *Assam* it arises partly from an over-estimate, partly from the drainage of the Silchar Cantonment not having been carried out in the year, and partly from failure of the arrangements for carriage of material for the Golaghat-Nichuguard road. The *Bengal* saving has accrued from the transfer to Provincial Services of all military buildings at Bhaugulpur and Dacca as noticed in the preceding paragraph. In *Madras* the expenditure on original works was curtailed by 1,2, and there were small savings in repairs and establishments. The large abatement in *Bombay* is caused chiefly by the recovery of 25,8 from the Home Government on account of the defences at Aden and in a minor degree to a reduction of 3,6 in the store balances.

210. The accounts also show that the budget has been exceeded in some provinces. The principal *excess* is in *Upper Burma*, where it amounts to 14,8, and consists of charges for the acquisition of land for a cantonment at Mandalay. There was a small excess of 7 in *Lower Burma* in consequence of the construction of temporary barracks for Native troops at Bassein. The increase of 1,5 in the *North-Western Provinces and Oudh* has reference to the defences at Jhansi, and of 5,4 in the *Punjab* to the new barracks at Mardan and Abbottabad.

211. The higher expenditure in *England* as compared with the budget is due to larger indents for stores sent from this country. The larger charge for exchange has followed upon this higher expenditure.

Imperial.

212. Of the difference of 276,1 between the two years 1886-87 and 1887-88 as noted above, 14,1 relates to *India—General and Political*, and consists of the following items. There was an excess in the last-named year of 3,1 in Central India, owing partly to expenditure on the Political Agent's house at Sirdarpur and to smaller percentage of establishment recoverable from Military and Contribution Works, while from the Mhow Water-works no recovery whatever was made. There was also an increase of 1,4 in Coorg connected with the maintenance of metalled and bridged roads, and of 9 in Hyderabad on account of additional rooms required for the civil offices. In the Military Works Branch additional church accommodation was provided at Ferozepore, Multan and Quetta at an increased cost of 2,3, and in Biluchistan the charges increased by 5,5, chiefly on account of the petroleum experiments. The accounts of the Simla Circle present an excess of 9,5 on account of the new Viceregal Residence on Observatory Hill. There were some counterbalancing decreases, chiefly in Rajputana where most of the major works were completed in the previous year. In addition to these savings the amount deducted from expenditure in 1887-88 is 12,6 against 3,1 added in 1886-87. The other provincial differences between the two years may be summarised as follows: In *Upper Burma* there was an increased expenditure of 171,4 in opening out the country and erecting buildings for the Civil Administration. *Bengal* spent 11,2 more than last year on the buildings for accommodating the Photographic, Lithographic, and Mathematical Instrument Departments of the Surveyor General's Office in Calcutta. The excess in the *Punjab* is 91,0, of which 69,3 was on account of frontier roads, the balance being due to the transfer of the Murree-Kohala road to the Imperial Section of this account. The increase in *Bombay* was caused by extension of the Telegraph Office, Bombay, and by work done for the Salt Department. There were small savings in *Assam* and in the *North-Western Provinces and Oudh*, the saving in the latter being due to a smaller number of buildings required for Postal, Telegraph and Opium purposes.

213. These remarks give the main features of the expenditure in 1887-88. As contrasted with the Budget there was in *India—General and Political*, a saving of 8,9 in the Military Works Division from withdrawal of the grants for the new Protestant Church at Allahabad, and for additional church accommodation at Rawalpindi. On the other hand, there was an excess expenditure in Biluchistan of 33,8 on account of petroleum explorations, frontier roads, and the Political Agent's house at Loralai. There was also an excess of 8,6 in Simla owing to the new Viceregal Residence, the Foreign Office, and various minor works connected with the Secretariat buildings. As regards the other Provinces, the Budget was exceeded in the *Central Provinces* by 1,2 in consequence of coal-boring operations in Rampur, in *Upper Burma* by 187,0 for the

Section K.—BUILDINGS AND ROADS—EXPENDITURE—*continued.*

reason mentioned in the preceding paragraph, and in *Bengal* by 14,4 on account of additions to the Surveyor General's Office in Calcutta and of extensions and improvements to the Viceregal Residences in that City and Barrackpore. The *Punjab* figures show an excess of 12,1 in 1887-88, owing to the construction of the Murree-Kohala and the Dehra-Ghazi-Khan Pishin roads. The saving of 6,6 in *Bombay* arises from inability to utilise the whole of the Budget grant.

214. The excess of 2,2 under civil offices, *Upper Burma* represents the contribution given to the Mandalay Municipality to cover the deficit in its transactions during the year 1887-88.

Provincial.

215. The provincial expenditure was less in 1887-88 than in 1886-87 in all parts of India except in the *North-Western Provinces and Oudh*, where there is an increase owing to the transfer from Local to Provincial of the charges payable from the Tarai and Bhabar Improvement Fund, and to a larger expenditure on account of the Ghazipur Steam Ferry. But for this transfer there would have been a saving of 6,1 owing to the completion in the preceding year of certain important jail works at Benares, Fategarh and Bareilly. The savings in the *Central Provinces*, *Lower Burma* and *Assam* were 12,3; 5,7 and 5,9 and accrued respectively from restricted expenditure on works of communication and on Jails and other district buildings. In *Bengal* the decrease amounted to 92,5 and resulted mainly from the separation of the establishments appertaining to the Buildings and Roads and the Irrigation Branches, whereby a considerable reduction has been effected in the cost of the former. The decrease is also due to smaller suspense balances, especially in the Akra Brick Factory where extensive manufacturing operations are proceeding for the Port Commissioners in Calcutta, as well as to the accounts of 1886 87 having included a special charge in connection with the Burrakur Iron Works. These abatements were partially counterbalanced by the increase of 8,9 under Civil Officers arising from the refund of ferry collections erroneously credited as Provincial Revenue in 1886-87. The decrease of 22,9 in the *Punjab* is the outcome largely of the transfer to Imperial of the Murree-Kohala road as noticed above in paragraph 212. It is also occasioned partly by a reduction under suspense and by a smaller charge for establishments in consequence of a percentage being debited to other funds. In *Madras* the decrease in departmental officers was 23,4, and was mainly the result of a considerable reduction in the cost of the construction establishment of the Province. It was 12,0 in the expenditure by Civil Officers and accrued in Miscellaneous Public Improvements. The fall in *Bombay* is in the expenditure in Civil Buildings many of which were completed in the previous year.

216. The following are the principal variations in the accounts of 1887-88 as contrasted with the budget. In the *Central Provinces* and *Assam* a saving of 54,0 and 3,5 was secured by curtailing expenditure generally, and in the former by postponing till next year the construction of the Chief Commissioner's residence at Nagpur. The saving in the *North-Western Provinces and Oudh* amounted to 7,9 in Original Works, Civil Buildings, and to 1,4 and 2,7 respectively in Civil Buildings and Communications, Repairs. On the other hand Original Works, Communications, cost 3,9 more than the budget which was also exceeded in the expenditure by Civil Officers owing to the transfer from Local to Provincial mentioned in the preceding paragraph. The *Punjab* Budget was apparently too high, while in *Bombay* the grants were reduced during the year, in addition to which certain charges were removed from the Provincial to the Local head. The Provinces which have exceeded their grants are *Bengal* and *Madras*, the former having retained under Provincial Services, certain ferries which it was intended to make over to District Boards. In *Madras* the grants for departmental officers were exceeded by 24,7 and 4,3 as regards original works and repairs, but the charge for establishments was short by 6,7 owing to the amounts recoverable from other funds, &c., having been larger than was anticipated.

Local.

217. The differences in this section of the account are not important and arise from various causes. In the *Central Provinces* the work to be done departmentally was almost wholly postponed to the following year, while the work done by Civil Officers included several undertakings that had lain over from 1886-87. In *Lower Burma* a good deal was done in the way of constructing new roads and markets and in general improvements in various large towns. Owing to the financial exigencies of the year the expenditure in *Assam* was diminished under all the heads and reduced to 4,6 below 1886-87 and 20,0 below the budget. The *Bengal* accounts shew an increased expenditure by departmental officers of 1,1 on the Chandbally and Bhudruck road, and a saving of 67,9 as compared with the budget in the expenditure by Civil Officers owing to the postponement of many works. The *North-Western Provinces and Oudh* exhibit also a large saving, which is partly due to the transfer to Provincial mentioned above in para. 215, and partly to diminished outlay resulting from difficulty in acquiring land and collecting materials, and from delay on the part of contractors. The *Punjab* expenditure was 15,3 below the budget, but the latter was framed too high. The charges by departmental officers in *Madras* were more than double the amount spent in 1886-87, chiefly in the progress made with the Vagai bridge at Madura. The expenditure by Civil Officers was also great as compared with 1886-87, but it was particularly small in that year. The budget proved too high. The departmental charges in *Bombay* were lower than in the previous year, but a little higher than the budget owing to numerous small differences. The expenditure by Civil Officers was enlarged by the transfer to Local noticed in the preceding paragraph.

219. The army receipts in India are in some measure dependent upon the number of British troops in the country, and the revised estimate was accordingly fixed at 920,0 as compared with 850,0 in the budget, on account of larger sales of malt liquors to be expected from additions to the British force. The actuals have outstripped the revised, the excess being due chiefly to additional sales of Commissariat stores, cattle and other supplies; to sales of condemned and unserviceable ordnance stores; to additional receipts on account of officers who have served under the Hyderabad Administration, and larger recoveries for Indian military service family pensions. They also include a recovery of 30,0 on account of an advance to the Irrawaddy Flotilla Company in 1886-87. The fluctuations in army receipts in England arise out of the Indian troop service and the stores carried home by troops when transferred from the Indian to the British establishment.

220. As regards army expenditure, the figures at foot of this paragraph show how much of the payments made in India during the two years, 1886-87 and 1887-88, relates severally to operations in Burma, and to what may be regarded as the ordinary requirements of the army. In paragraph 227 are given details of the charges on account of Burma. The budget for these charges was altogether inadequate, but it was not anticipated at the time that the operations in that country would be prolonged. The budget, for what may be considered as the ordinary requirements of the army, has also been exceeded, and this is due to special purchases of transport, of additional horses to raise the reserve, and of clothing for the army, including locally manufactured boots at enhanced rates, as well as to increased expenditure for barrack and medical supplies, the Sikkim Expedition, and compensation for losses.

1886-87. Accounts.		1887-88. Budget.	Revised.	Accounts.
14,620,5	Total Expenditure	14,010,0	15,063,0	15,104,9

13,102,7	Total excluding Burma . . .	13,290,0	13,513,0	13,629,6
	Excess of actuals over Budget and Revised Estimates, excluding Burma	339,6	116,6	.....

221. As regards the charges in England, the principal difference is a sum of 75,0 which was included in the budget on account of deferred pay, but payment was postponed in consequence of Lord Northbrook's Committee not having reported on the subject. The next large difference is in Medical and Commissariat stores, the payments for which were greater by 29,6 than was anticipated in the budget.

222. The following paragraphs supply the particulars usually given with respect to army services.

985,0	GRAND TOTAL .	897,4	979,9	1,060,8

223. These receipts are all more or less of a fluctuating character and dependent upon circumstances which it is difficult to forecast. The deficiency in *Regimental Pay, &c.*, has occurred almost entirely in Madras in the item of miscellaneous recoveries, counterbalanced in the same presidency by various refunds on account of hutting advances and bounty-money, and by larger receipts than were expected from British soldiers purchasing their discharge. Madras also contributes the largest difference under *Commissariat Establishments, &c.*, the excess being 56,3, of which about 30,0 represents the refund of advances made in the previous year to the Irrawady Flotilla Company. The remainder of the difference under this head is attributed to the following causes. The sale of Commissariat provisions and stores was high in Burma, but in Bengal it diminished owing to the extension of supply by contract of meat to the troops. The augmented strength of the army led to a larger sale of malt liquor, except in Burma, where it declined, and the sale of rum increased. The sale of surplus cattle at the Hoonsoor Depôt was unexpected in the Budget, and so also were the credits taken in Madras for the value of supplies sent to Suakim in 1885 and of the ponies made over to the Military Police in Upper Burma. The head *Clothing Establishments* compares well as regards totals, but there are considerable variations in the figures of each Presidency. The principal facts connected with this group are that the Clothing Agency in Bombay has discontinued the supply of great-coats to native troops on payment, that the issue of clothing to the Hyderabad Contingent, for which payment would have been received in 1887-88, was not made, and that the "sale of necessaries" was large owing to the augmented strength of troops in India. The head *Medical Establishments* is small owing to diminished sales of medical stores on payment and the reduced price of quinine. The excess in *Ordnance Establishments* is mainly the result of credits received for the value of Naval Stores taken over by Her Majesty's Imperial Government, and in a minor degree to larger sales of condemned and unserviceable stores in Bengal, but on the other hand the indents from the Hyderabad Contingent and some other Government Departments were unusually small. The increase in *Sea Transport charges* is composed of large receipts on account of table-money, chiefly in connection with Burma, and also in connection with the Indian Troopships. The estimates for *Military Pensions to Europeans* were also framed too low, in addition to which Berar paid up the arrears due from it on account of officers lent for service in that Province. The recoveries on account of *Military Pensions to Natives* are very small and do not amount even to 1. The accounts of *Widows' Pensions, &c.*, surpassed the budget in consequence partly of the admission of new subscribers and partly by recovery of arrears.

224. The increase in *England* occurs partly under the head of Indian Troop Service and partly in the value of stores in possession of Regiments on their transfer from the Indian to the British Establishment.

225. The short expenditure on *Army and Garrison Staff* is obtained mainly by a reduction in the divisional and brigade commands and staff in Upper Burma, although it was attended by a larger number of station commands and station staff officers. Extra contingent and telegram charges were incurred in the Adjutant-General's and Quarter-Master-General's Departments on account of Burma, but on the other hand the cost of telegrams sent by Army Head-Quarter Offices in Bengal without prepayment, have been charged this year under the head Miscellaneous Services. During the year a new appointment was created in connection with Cavalry inspection, but a Brigade Command of about equal emoluments was abolished at the

same time. No changes requiring notice have occurred in connection with the *Administrative Staff*, except that additional establishments have been sanctioned for Burma. Of the large reduction in *Regimental Pay, &c.*, 16,1 falls under European army and 120,5 under Native army. The saving under European army was due to the withdrawal of artillery batteries from Burma, and the diminished strength of that arm for a portion of the year; to a reduced force of British Cavalry; to casualties in the invalid and veteran establishments; to fewer unemployed officers of the Staff Corps; to the retirement of unattached and general officers on the unemployed list, and to less expenditure on account of recruiting rewards and bounty for extension of service. These abatements were partly counteracted by increased charges resulting from the strength of British Infantry battalions having exceeded the budget, and from greater postage and miscellaneous charges of a regimental nature. About two-thirds of the saving under Native army accrued from reductions made in the strength of the infantry regiments. Considerable savings also resulted from a smaller number of men having been transferred to the Reserve force than was contemplated in the budget. The *Commissariat* budget was inadequate in consequence of requirements in Upper Burma, in addition to which the extension of Kheda operations led to larger establishments, and a rise in prices caused an increase in the compensation granted for dearness of provision, and in the cost of forage, &c. On the other hand, various economies were carried out in the Hoonsoor Cattle Depôt, and the grants for contingencies, freight and miscellaneous were not fully used. It may be noted here that owing to the amalgamation of the Supply and Transport Branches of the Commissariat during the year, the comparison between estimates and accounts cannot be thoroughly made. The excess under *Remounts and Cattle* consists of additional horses purchased to raise the strength of the reserve. The budget for *clothing* proved inadequate from large demands against Supplies and Services, Agency, partially counterbalanced by smaller issues under Supplies and Services, Regimental. The increase under "Supplies and Services, Agency," is due to large purchases of locally-manufactured cloth, a portion of which was to meet requirements in Burma; to a large supply of boots for the army at increased contract prices, by Messrs Cooper, Allen and Company, Cawnpore; and to arrear charges in Madras on account of local purchases of khaki drill in 1886-87. In Bombay there was a saving under the above head, owing to the non-supply of helmets to certain British troops. The balance of the increase falls under "Compensation in lieu of clothing," the result of grants to battalions of Native troops newly raised in Bengal, partly counterbalanced by smaller payments of compensation to British troops on the Madras establishment. The chief saving under "Supplies and Services, Regimental," is in the allotment for clothing for reserve forces of the Native army, which was used to a very limited extent in consequence of the small number of soldiers transferred to the reserve. There was also a saving under manufacturing and store establishment, the result of retirements and temporary vacancies; and a general decrease in the total expenditure, owing to recoveries on account of supplies to the Burma Military Police and other departments. As regards *Barrack Establishments, &c.*, there was a saving in Bengal and Bombay on account of punka-pulling and tattie watering, but in Madras additional conservancy establishments were entertained for service in Burma. The estimates for barrack furniture and bedding and for lighting charges and miscellaneous were too low, in addition to which the demands from Burma were greater than expected, and certain arrear charges had to be met on account of water supplied to troops by the Bombay and Kurrachi Municipalities. The abatement under *Administration of Martial Law* is the result mainly of the reduction of one Deputy Judge Advocate on the Madras establishment. The *Medical* expenditure was high owing partly to the necessity of granting extra allowances to officers and others in Burma, and entertaining additional establishments in that country. The principal rise however is in supplies owing to higher prices as well as increased requirements for troops in Burma, to the number of sick, to additional purchases of reserve stock, and to purchases of instruments, drugs, diets and equipment. The value of stores supplied to Civil Departments, which is deducted from the expenditure, was unexpectedly large in Madras in consequence partly of issues to the Burma Military Police. The figures relating to the *Ordnance* Deparment have been largely affected this year by the issues to Civil Departments, including the Burma Military Police and the Hyderabad Contingent, since these have been unusually great. Apart from these issues, the accounts present an increase of about 30,0 over the budget, of which about 25,5 represents credits given to Her Majesty's Government and various Indian Departments for the value of stores returned to the arsenals in India. The balance consists of extra expenditure caused by the condition of Burma, by the fire in the arsenal at Rawal-Pindi, and by the demands on the Harness and Saddlery Factory at Cawnpore. The effect of these increases, however, was partly diminished by closing the gunpowder factory at Madras and by various economies in the matter of establishments, and purchase of timber, &c. The *Ecclesiastical* expenditure includes the pay and allowances of chaplains serving with troops in Burma. With respect to *Miscellaneous* services, the explanation is that a sum of 300,0 was included in the Revised under this grant, chiefly for Burma and Sikkim, but the expenditure against it has been classified under the various heads with which they were severally concerned. Allowing for this, the excess charge in the accounts was chiefly due to Burma, including the gratuity and cost of medals granted to the troops who took part in the field operations, as well as the heavy charges for field telegraph messages and services. The accounts also include the following special and extra charges, some of which were not provided for in the estimates, *viz.*, Mobilization Committee, Camp of Exercise, Bengal, Committees for purchasing remounts for native (silladar) cavalry, and compensation to contractors for losses or cancellation of contracts. These expenses

Section L.—ARMY SERVICES EXPENDITURE—*continued.*

were partly counterbalanced by savings, chiefly in rewards for passing in the native languages, in personal allowances to officers serving in the police, and in the charges for Sub-Marine Mining. The grant for *Volunteer Corps* was exceeded in extra staff allowances, establishments, and in capitation grants to existing and newly raised corps, that for *Rewards for Military Services*, in an increase to the establishment of the "Order of British India" after the budget was prepared. The *Military Pensions to Europeans* have been high in consequence of new admissions to the pension list and of large payments in India to officers who have capitalized their pensions. The estimates for *Military Pensions to Natives* were framed too high; and there were also numerous casualties among the pensioners. The rise in *Widows' Pensions, &c.*, represents the growth resulting from new admissions.

226. In England the saving in *Home charges* is due to postponement of the payment of 75,0 provided in the budget, on account of arrears of deferred pay, no report having been received from Lord Northbrook's Committee, and to Furlough Allowances of officers of British Regiments serving in India not having been drawn to the extent anticipated. On the other hand, the excess of 19,9 under *Furlough Allowances of Officers of the Indian Service* was caused by a larger number of such officers going to England. The decline under *Indian Troop Service* represents unusually low expenditure for repairs of the Troopships, while the number of officers provided with *passages otherwise than in Troopships* being larger than estimated, produced the excess under that head. Of the increased charge under *Miscellaneous*, 1,7 is on account of the expenses of Native officers attending the Queen's Jubilee, and 1,2 for Burma field allowance to Naval Brigade, the remainder being due to the purchase of stallions and the pay and expenses of Military Officers on special duty or under technical instruction in England. The budget for *Stores* did not provide sufficiently for the requirements of the Medical and Commissariat Departments. The non-effective charges were low for *British forces* in the pay of non-effective Colonels of Royal Artillery and new Line Regiments, and high for the *Indian service*, owing to the large number of retirements. The budget for "*Miscellaneous pensions*" allowed 5,0 on account of the Burma medals, but these were subsequently struck in India.

227. The following statement supplies details of the additional expenditure on account of Burma:—

Grants.	Bengal.	Madras.	Bombay.	Total.

1886-87. Accounts.		1887-88. Revised.	1887-88. Accounts.
325,6	Expenditure	568,9	456,0

228. In the Budget of 1887-88 this expenditure was shewn as not chargeable to revenue, but the arrangement was subsequently altered as explained in paragraph 258 of last year's report. For the sake of comparison, however, the Budget figures are placed below in juxtaposition with the revised estimate and the actuals. The increase of 130,4 over the expenditure of the previous year is due to the Frontier and Coast Defences having been pushed on rapidly. The actuals compare on the whole favourably with the Budget Estimate, but the Revised Estimate was fixed too high.

229. The expenditure in India shows an increase of 248,0 over that of the previous year, in consequence of larger grants for the construction and improvement of the fortifications and lines of Military communication on the North-Western Frontier. The Budget was framed for 383,7 as entered above, but during the course of the year an additional grant of 260,0 was sanctioned for special expenditure, of which 137,3 was surrendered before the close of the year owing to certain projects not having been matured. In consequence of these modifications and of certain reappropriations which became necessary to provide for additional indents sent forward for English stores, the Revised Estimate for Indian outlay was fixed at 487,1. Of this grant, a sum of 75,7 remained unexpended at the close of the year owing (1) to the establishment charges under India having been over-estimated, (2) to inability to utilise fully the grants sanctioned for the defensible post at Mooltan, the Baleli-Regi-Ghazabund Defensive Works and the Miri fortifications, and (3) to stoppage of work on the Karachi defences by reason of bad weather and the late receipt of plans. To this sum of 75,7 must be added the recovery of 40,3 from the Home Government on account of a moiety of the expenditure incurred during 1886-87 and 1887-88 on the Aden Defence Works. This recovery is in addition to the sum of 25,8 mentioned in section K of this report, and like it has been treated as a reduction of the Indian outlay during the year, and neither the budget nor the revised estimate allowed for it.

230. As regards the charges in England the variations arise from large payments having been made for heavy guns for India which had not been anticipated, while the payments for heavy guns for Aden were much less than the estimate.

231. As explained in former reports, the above figures represent the surplus or deficit of each Provincial Government in respect of the revenues and charges assigned to it, including Incorporated Local Funds. The Budget contemplated a deficit of 759,6 as compared with the revenues of the year, but the actuals show a surplus of 370,6 as compared with the charges. The net improvement therefore is 1,130,2, and it is derived from economy in expenditure to the extent of 442,9 and additional revenues amounting to 687,3. These differences between the Budget and the accounts are explained in the earlier part of this report, and all that is required now is to show how they have affected each Provincial Government. This is done in the following figures which show that the Provincial balances have increased in all the Provinces except the North-Western Provinces and Bombay where they have diminished by 53,1 and 24,6 respectively. It will also be seen from these figures that as regards Provincial Funds the revenue was short in the North-Western Provinces and Oudh by 38,6, but the other Provinces collected more than was expected in their Budgets. Under Expenditure there are savings in all Provinces except Burma, Bengal, and Bombay which have exceeded their Budgets by 22,5, 26,0, and 15,3 respectively. In the local section the revenue was short by 1, 15,1 and 2 in India, Bengal, and the North-Western Provinces and Oudh. The other Provinces received more than was anticipated in the Budget, and all show a saving as regards expenditure :—

EXTRAORDINARY RECEIPTS.

232. The amount taken under this head during 1887-88 is 63,7, and it was obtained by the cancellation of certain Government Promissory Notes belonging to the North-Western Provinces Educational Funds. As these Promissory Notes appear to have been purchased originally from Government money, they were cancelled and their value credited to Government as an extraordinary receipt.

233. The Expenditure is less than the Actuals of the previous year by 7,800,2, and the Budget by 2,209,4, and particulars of these deviations are given at foot of this paragraph, + meaning better and — worse. In the case of the capital outlay on railways, the differences are due to two main causes, namely, the practical completion in 1886-87 of certain lines and the sale of certain other lines to the Bengal-Nagpur Railway Company. The deviations have also resulted, but in a minor degree, from postponement of works and reduced expenditure on stores. The capital outlay on Irrigation works was in some instances over-estimated, but in other respects there is nothing special to record. No capital charges were incurred during 1887-88 in the redemption of liabilities.

234. It will be convenient to arrange the following explanatory remarks separately for each province and in the order in which the lines have been placed in the foregoing statement.

India, General and Political.—The comparatively small expenditure on the East Indian Railway is due in a great measure to the completion in 1886-87 of the "Jubilee" Bridge over the Hughli, and to the postponement of a number of works, chiefly the Mogul Serai junction arrangements and additional sidings at certain stations. The sum of 126,5, entered against the Rajputana-Malwa line, is the net outlay after deducting 9,2 as gain by exchange on English stores in stock on the 1st January 1885, and sold between that date and the 31st December 1887. There was a large excess over 1886-87 and also over the budget caused in both instances by the purchase of land for the Colaba-Basin, and by increased supplies of stores from England. The actuals of 1886-87 in the case of the Holkar Railway included credits on account of stores transferred to the Rajputana-Malwa Railway from the Choral Bridge and the workshop buildings at Khandwa. The expenditure in 1887-88 fell below the budget, as the provision made in the latter for 14A class traffic quarters and for the water-supply at Khandwa, was not required, the Rameshwar Nulla in the last-named case having been found sufficient for all necessary requirements. The head Stores represents

Section N.—EXPENDITURE NOT CHARGED TO REVENUE—*continued.*

48.—State Railways—*continued.*

on one side the value of stores purchased during 1887-88, plus the balance brought over from the previous year, and on the other the value of stores issued during 1887-88. The value issued in 1887-88 exceeded the purchases, and produced 97,0 in the Indian account, and 215,5 in the English account, or a total of —312,5. This result is very near the figure of 1886-87, but differs from the budget. The principal cause of this difference is a short expenditure of 225,1 in England, the indents having been less than was anticipated.

Central Provinces.—The large difference apparent in the expenditure of the Wardha-Coal line between 1886-87 and 1887-88 is attributed principally to credit taken in the latter year for one hundred ten-ton coal wagons transferred to the Bilaspur-Etawa Railway, as well as to heavy outlay in 1886-87 for tools and machinery required for the Colliery. The transfer of the wagons was not contemplated in the budget. The credits on account of the Nagpur-Chattisgarh, Bilaspur-Etawah, and Nagpur-Bengal Railways comprise the recovery from the Bengal-Nagpur Railway Company of the capital outlay on those lines. The expenditure was small on the Katni-Umaria Railway, as the construction work was practically complete in 1886-87. In fact the budget was framed for a credit on account of sales to the Umaria Colliery, but it became necessary during the year to purchase coal wagons, the cost of which exceeded the anticipated receipts. The amount entered against the Umaria Colliery includes a write-back of 8,3 from the revenue account of the line, being the loss incurred in working the Colliery to 31st March 1887. Allowing for this special item the real difference between the two years is an excess expenditure of 26,2 in 1886-87, owing to the completion of the works in that year. The budget appears to have been framed too high.

Burma.—The outlay on the Burma open line has followed the budget closely, but has exceeded the expenditure of 1886-87 by 7,7. This result, however, is due to a large credit taken in 1886-87 under the head Ballast Permanent-way, whereby the outlay appeared to be less than it really was. As regards the Tounghoo-Mandalay extension, work was only commenced in December 1886 and was carried on vigorously throughout 1887-88. Hence the large difference between the payments of the two years. The budget allotment was not reached partly in consequence of some rolling-stock not having been received from England within the year, and partly owing to an overestimate on account of land, permanent-way, buildings, and other charges.

Bengal.—The increase in the Eastern Bengal Railway, as compared with 1886-87, is caused by the transfer to this line of the suspense balances of the Dacca and Northern Bengal Railways, and as compared with the budget by additional expenditure for rolling stock and for the land required at Chitpur to double the line to Calcutta. The credits entered against the Northern Bengal and Dacca lines have resulted from the transfer just mentioned. Increased expenditure was incurred in the Tirhoot line for fencing, for the new temporary Mothurapur ghât line, and for the staff quarters at Mozufferpur and Somastipur, which explains the excess over 1886-87 and the budget. The diminished charges of the Patna-Gya line ensue from completion of the works, which were agreed upon with the East Indian Railway Company as necessary to bring the line up to the required standard of efficiency. The saving is chiefly in ballasting and in the postponement of other work. The transaction relating to the Nalhati consist principally of two locomotive engines taken over from the Akhra brick-fields for a sum of 4 not contemplated in the budget. This charge was covered by the value of stores issued from stock. There were practically no transactions during 1887-88 in connection with the Ranaghat-Bhagwangola Railway project. The expenditure in 1886-87 on the Tirhoot section of the Assam-Behar Railway included the outlay on the Gunduck Bridge, which was practically completed in that year. During 1887-88 the Kosi extension involved considerable outlay, and additional grants in excess of the budget were granted for it, but the effect of these charges was practically counterbalanced by credits obtained for plant and material sold or transferred. The charges relating to the Assam-Behar section of this line are also connected with the extension west of the Kosi.

North-Western Provinces and Oudh.—There was a large credit in 1886-87 on account of the Cawnpore-Achnera Railway owing to the transfer of large quantities of stock to the Lucknow-Sitapur-Seeramau Line, and of stores to the Rajputana-Malwa Railway. The difference between the budget and accounts of 1887-88 arises partly from postponement of expenditure, and partly from credits realised from sale of land at Muttra, from transfer to working charges of the interchange sidings at Hattras and from large quantities of machinery and stores returned to stock on the abolition of the workshops at Fatehgurh. The Bareilly-Pilibhit Railway is 36 miles long, and has been constructed from contributions made by the Government of the North-Western Provinces and Oudh from provincial revenues. There is nothing special to note respecting it.

Punjab.—The large expenditure on the North-Western Railway as compared with 1886-87 is connected with the Sukkur Bridge and gradient improvements carried out during the present year, and with a large quantity of permanent-way material purchased in 1887-88 but not used till the following year. The excess over the budget is caused (1) by the transfer to this line of the reserve stores at Kurrachi, and of certain other stores which were imported for the Sind-Pishin Railway and (2) by stores which arrived too

Section N.—EXPENDITURE NOT CHARGED TO REVENUE—*continued.*

48.—State Railways—*concluded.*

late to be used in the year and so remained in balance. With two very trifling exceptions the transactions relating to the Amritsar-Pathankot Railway consisted of stores issued to the North-Western Line and which produced the credit noted in the foregoing statement. The large difference under Rewari-Ferozepur is the result of various writesback in 1887-88 on account of ballasting, permanent-way materials and rolling-stock, which were also not foreseen in the budget. The short outlay on the four sections of the Sind-Pishin Railway as compared with 1886-87 is due to the approaching completion of the line. The budget of the Sibi-Quetta Section was high, in addition to which some parts of the work were put off till the following year. A quantity of permanent-way material was returned to the Kandahar Reserve Stores, and the line having been opened earlier than was expected, the cost of maintenance became a charge on revenue instead of on capital. The outlay on the Killa-Abdulla section was also reduced by credits taken for permanent-way materials returned to stock, while the saving in the Bostan-Gulistan Section accrued (1) from the impossibility of completing certain works owing to their not having been sanctioned in time, and (2) to economies resulting from alterations in designs. The short payments on account of the Durwaza-Quetta section were caused by the temporary suspension of work pending settlement of the question whether Quetta or Bostan should be an engine changing station. The excess in the Chaman Extension occurs in the stores used. The western section of the Sind-Sagar line was nearly complete in 1886-87, and hence the outlay was small during the present year. As compared with the budget the chief saving is in the charges for the Victoria Bridge over the Jhelum and partly also in the expenditure for level crossings and fencing. The charges on account of the Eastern section of the line relate to the conversion from metre to the standard gauge of the two divisions from Lalla-Musa to Malikwal and from Malikwal to Bhera. The increase in 1887-88 as compared with the previous year is due to larger outlay on rolling-stock and stations and buildings. The budget was exceeded chiefly because it did not provide sufficiently for loss by exchange. As regards the Sutlej Bridge less work was required in 1887-88 than in the previous year, and this accounts for the fall in expenditure. The whole of the budget grant could not be utilised in 1887-88. The Bolan temporary line is a surface one and was laid down in the Bolan Pass to meet the requirements of the Military Department. There is nothing special to record here about it. The head Kandahar Reserve represents a net charge and is dependent upon the amount of stores purchased and issued during the year. The fluctuations are unavoidable. The Chenab Bridge was sanctioned and commenced during 1887-88.

Madras.—The bulk of the work on the Cuddapah-Nellore Railway under construction of line, ballast and permanent-way and rolling stock was finished in 1886-87. The budget for 1887-88 was exceeded in consequence of new work sanctioned after it was framed. As regards the Bellary-Kistna Railway the accounts of 1887-88 include the expenditure up to 31st December 1887, when it was made over to the Southern Mahratta Railway Company. This expenditure must be borne by Government according to the terms of the agreement with the Company. The Bezwada extension is being constructed on behalf of the Government of India by His Highness the Nizam's Guaranteed State Railway Company. Work was commenced in January 1887, but under an agreement with the Government, the payments in 1886-87 were made from the funds of the Company. Those payments with interest at 4 per cent. have been refunded to the Company and included in the accounts of 1887-88. The full amount sanctioned in the budget has not been spent owing to reduced outlay in England accompanied by smaller loss by exchange and reduced freight and landing charges, &c.

„ Revised Estimate	...	69,8

235. The following are the principal points in this group.

Biluchistan.—The charges on account of the Khushdil Khan Reservoir have been removed from this group to 43—Minor Works and Irrigation.

Bengal.—The short payments in this province occur chiefly in connection with the Orissa Canals for which the budget was too high, and where the rapid percolation of water retarded the progress of some works. Work was also delayed partly from scarcity of labour and partly from sanctions having been received late.

The *North-Western Provinces and Oudh.*—Here the decrease is in the Ganges Canals and is also attributed mainly to an overestimate, and in a minor degree to the stoppage of the Myapur regulator and to payment not having been made during the year for lands that were purchased.

Punjab.—As compared with 1886-87 the Sirhind Canal shews a decrease as it is nearing completion, the Chenab Canal an increase on account of additional work done.

Madras.—The charges of the Kistna Canal were apparently over-estimated.

50.—Capital Charge involved in Redemption of Liabilities.

1886-87. Accounts.	1887-88. Budget.	1887-88. Revised.	1887-88. Accounts.
4,914,5	...	...	...

236. There were no transactions under this head in 1887-88.

NET ENGLAND	...	...	...
NET BOTH	+2,000,5	+5,434,0	+5,435,8

237. These figures have already been explained in paragraph 45. Of the sum of 5,505,3 mentioned above 2,000,0 comprised the loan from the public and 3,500,0 the loan from the Gwalior Durbar. Of the latter loan, 315,6 was received in Government rupees and 3,183,8 in Gwalior and Chandori coins, making a total of 3,499,4. These coins were melted by the mint and credit given at one rupee for each 165 grains of pure silver, and the balance of 6 was received by deduction from the accruing interest.

Section P.—UNFUNDED DEBT.

	Budget.	1887-88. Revised.	Accounts.
Special Loans	+3,499,8	— 2	— 5
Treasury Notes and Service Funds, India	+ 53,1	+ 46,9	+ 42,3
Savings Bank Deposits	+ 660,2	+875,4	+884,7
TOTAL	+4,213,1	+922,1	+926,5

238. As already stated in paragraph 45, the Gwalior loan was provided for in the Budget under *Special Loans*, but classified as Permanent Debt in the Revised Estimate and Accounts. The —5 entered under Special Loans in the accounts represents the commuted value of certain pensions chargeable against the 1st Oudh Loan. These commutations are compulsory when the monthly stipends fall below four annas, and they are also allowed on the application of the pensioners if the pension is below one rupee per mensem. The Budget for *Service funds* was too high as regards the Bengal Uncovenanted Service Family Pension Fund.

239. Details of the *Savings Bank Deposits* are given below. The budget for Presidency Savings Banks contemplated a large excess of withdrawals over deposits at the mofussil stations in the Madras and Bombay Presidencies where those Banks received deposits through the treasuries, in consequence of the transfer of district accounts to the Post Office Banks, but the deposits at the Presidency towns were unexpectedly great and covered these special withdrawals. The increase in the Civil Engineer's Provident Fund is due to the extension of its benefits to the superior Civil Officers of the Telegraph Department and to the pensionable employés of the Revenue Establishments of State Railways.

240. In the foregoing statement the third line of figures in each column shows net transactions. The gross receipts and payments are entered in the first and second lines, except for the head *Provincial Balances* as they are already given in Section M of this report. The gross receipts and payments relating to Exchange on Remittance Accounts are entered at foot of this paragraph. The first head, *Provincial Balances*, has already been explained in para. 231. The net result under *Excluded Local Funds* is very nearly what the estimates contemplated, considering that they represent purely Banking accounts. The gross transactions were large, as the Gujarat Police Fund was provincialised during the year, and its receipts and payments were written back from this group to Revenue and Service expenditure. The head *Political and other Funds* now includes the Bahu Begum's Stipend Fund and the various funds belonging to the Guaranteed Railway Companies. The large credit in 1887-88 has accrued from increased receipts in the Fire Insurance and Provident Funds of the Bombay, Baroda and Central India Railway. The fluctuations under *Departmental and Judicial Deposits* are unavoidable considering the character and magnitude of the transactions. During the last three years the net result has been +67,0+44,6 and +66,9. The head *Advances* shows larger payments than were contemplated in the Budget, and the excess occurs chiefly in "Mint Certificates and Bullion Advances," the silver coinage being about double the amounts contemplated in the Budget and larger receipts occurring towards the close of the year. The large sum standing against *Suspense Account* is made up largely of the balances in the hands of Opium Agents in Bengal on 31st March 1888, and which were higher than usual. The amount entered under *Exchange on Remittance Accounts* may be analysed as follows. The difference between Budget and Accounts is connected with the operations of the Railway Companies as stated in para. 245 :—

	Budget, 1887-88.				Accounts, 1887-88.		
	Sterling amount.	Exchange. Cr.	Exchange. Dr.	Sterling liabilities increased.	Sterling amount.	Exchange. Cr.	Exchange. Dr.

NET		...	276,5	NET	...	...	489,5

241. Of the sum of 323,6 under *Miscellaneous*, 318,7 is credited to the head "London Bills Payable Exchange," and represents the difference between the Exchange on Council Bills drawn in the year and the Exchange on the bills discharged. The amount is comparatively large, as the drawings of the Secretary of State in March 1888 were almost entirely in the form of bills which could not be presented until after March 1888.

242. The —1,4 in *England* is made up as follows :—

Repayment by the Imperial Government of expenses in England in connection with the employment of Native troops in Soudan and Nubia	+1
Net amount recovered from the Imperial Exchequer in repayment of expenditure on account of Defence Works at Aden	+5
Portion of the outstanding interest repaid by the Sindh, Punjab and Delhi Railway Company on the purchase of their undertaking by the State claimed during the year	—2,0
TOTAL	—1,4

Section R.—LOANS TO MUNICIPALITIES, NATIVE STATES, &c.

	1887-88. Budget.		1887-88. Revised.		1887-88. Accounts.	
India	162,6	—839,8	267,3	—689,8	271,2	—668,2
		—677,2		—422,5		—397,0

243. The details of these amounts are given in the following figures, which for the first time shew the Budget Estimate, as well as the account entries. This addition admits of a more minute examination of the amounts than has been made hitherto :—

1887-88. Budget. Amount advanced.	1887-88. Budget. Amount repaid.		1887-88. Accounts. Amount advanced.	1887-88. Accounts. Amount repaid.
...	14,6	Loans to Native States	7,1	42,7
...	1,8	Advances for Ceylon Cable	...	1,8
716,3	57,3	Loans to Presidency Corporations and Port Trusts	600,5	126,0
2,5	17,3	Do. Mofussil Municipalities	4,0	17,3
100,0	...	Do. Port Fund	48,5	...
...	3,0	Do. District and other Local Committees	...	5,2
21,0	68,6	Do. Landholders and other Notabilities	8,1	78,2
839,8	162,6	TOTAL	668,2	271,2

244. The 7,1 advanced to *Native States* comprises 3,1 taken by the Jaora State and 4,0 by the Nawab of Cambay for which no provision was made in the Budget. On the other hand, the Maisur State repaid in the year 28,0 more than was expected from it. The loans contemplated in the Budget to *Presidency Corporations, &c.*, were 386,3 and 250,0 respectively to the Calcutta and Bombay Port Trusts for the new Docks, and 80,0 for Madras Harbour Works, but the actual amounts drawn were 300,2, 256,6, and 43,7. The repayments by these Corporations and Trusts were unusually large in Calcutta where those on account of the Hugli Bridge, the Calcutta Municipality and the Port Trust loans amounted to 83,4 against an estimate of 37,8 only. The 2,5 provided in the Budget for advance to *Moffusil Municipalities* referred to the Simla Town Hall, but the actual amount taken was 2,8, in addition to which an unexpected advance of 1,0 was granted to the Cawnpore Municipality for drainage improvement. The sum of 48,5 entered against *Port Funds* includes 45,3 advanced to the Kurrachee Harbour Board and 3,2 to the Moulmein Port Fund, the provision of 100,0 in the Budget being for the former alone. The excess recovery from *District and Local Committees* occurs in Madras and Bombay and is distributed among a number of funds. As regards loans to *Landholders and other Notabilities*, Bombay provided for a payment of 20,0 to the Manager, Sindh Encumbered Estates, but only 5 was taken. The saving of 19,5, however, was counterbalanced to some extent by new loans of 2,5 and 4,0 respectively to the Talukdaree Settlement Officer, Broach, and to Rajah Feroze Khan of Khairpore, which were not anticipated at the time the Budget was prepared. The excess recovery of 9,6 from *Landholders, &c.*, includes 5 from the Rajah of Hindole in Bengal, 5 from the Dholepore State in the North-West Provinces, 2,5 from Ramnad Zemindary in Madras, and the rest chiefly from the Manager, Sindh Encumbered Estates, Bombay.

Section S.—CAPITAL OF RAILWAY COMPANIES.

	India, 1887-88. Budget.	India, 1887-88. Revised.	India, 1887-88. Accounts.	England, 1887-88. Budget.	England, 1887-88. Revised.	England, 1887-88. Accounts.	Total, 1887-88. Budget.	Total, 1887-88. Revised.	Total, 1887-88. Accounts.

B. Central	...	—13,6	—3,4	—1,5	+243,8	+243,8	—1,5	+230,2	+240,4
B. Nagpur	—358,9	—1,560,8	—1,514,7	+600,0	+1,745,4	+1,755,2	+241,1	+184,6	+240,5
	—1,770,7	—3,499,2	—3,375,0	—247,3	+3,114,4	+3,109,5	—2,018,0	—384,8	—265,5
TOTAL	—1,673,2	—3,165,0	—3,031,6	+1,017,0	+2,448,1	+2,457,5	—656,2	—716,9	—574,1

245. As explained in former reports these are all net sums. The Indian figures represent the difference between the advances taken by the Railway Companies and the credits given to them chiefly on account of stores used. The English figures represent the capital deposited by the Companies with the Secretary of State, less payments made therefrom. These figures are necessarily exposed to great fluctuations. During the present year, in the Indian account the advances to Guaranteed Companies were less than the Budget Estimate by 253,9 of which 106,3 was short drawn by the Oudh and Rohilkund Company. The credits were very near the Budget, the actual difference being 8,1 only. In the case of the Subsidized Companies the advances exceeded the Budget by 1,604,9, the Southern Mahratta, the Indian Midland and the Bengal-Nagpur having drawn respectively 100,8, 345,0, and 1,155,8 more than was provided in the Budget.

246. In England, the amount received on account of the subscribed capital was 226,0 less than the Budget. This sum represents three short receipts, one of 1,591,3 owing to debentures having been renewed instead of being replaced by fresh capital, another of 2,000,0 owing to capital having been subscribed in March 1887, which was not expected until 1887-88, and the third of 127,8 owing to that sum not having been required. On the other hand, the receipts from several Companies exceeded the Budget by 3,493,1. There was a short receipt in England of 29,7 on account of transfer fees and miscellaneous refunds, which are at all times difficult to estimate. On the payment side the expenditure was less by the sum of 1,591,3 mentioned above, the discharge of debentures having been below the Budget to that extent. The payments on account of stores and establishment charges, &c., were also short by 45,4.

Section T.—REMITTANCES.

	Budget.	1887-88. Revised.	Accounts.
Money Order (net)	...	...	5,0
Other Local Remittances (net)	8,5	1,6	—20,9
Other Departmental Accounts (net)	—2	395,2	6,9
Accounts between Civil and other Departments (net)—			
Post Office	...	...	—6,8
Telegraph	...	...	1
Marine	...	...	—5,3
Military	...	...	—63,2
Public Works	...	...	29,8
Remittance Account between England and India (net)	—93,3	—18,2	40,1
TOTAL	—85,0	948,6	—14,3

247. The 5,0 against the first item here represents money orders issued but not paid on 31st March 1888. From the following figures it will be seen that this method of remitting small sums is still in great favour and has made important strides during the present year. The other figures entered in this group are the net result of very large transactions and there is nothing special to record in respect of them.

		Issued.	Paid.
1884-85	Money order transactions	8,192,8	8,197,0
1885-86		9,312,4	9,298,4
1886-87		10,538,9	10,519,1
1887-88		11,665,7	11,660,7

Section U.—SECRETARY OF STATE'S BILLS.

	Budget.	1887-88. Revised.	Accounts.
Drawings	16,250,0	15,250,0	15,358,5
Payments	16,250,0	14,691,1	14,682,5

248. The following bills were drawn during the year by the Secretary of State:—

		£	Rx.	Rate in Pence.
On account of allotments in	April 1887	1,773,4	2,498,6	17·03
,, ,,	May ,,	1,527,8	2,182,0	16·80
,, ,,	June ,,	1,452,8	2,070,7	16·83
,, ,,	July ,,	1,339,8	1,902,6	16·90
,, ,,	August ,,	874,4	1,231,0	17·04
,, ,,	September ,,	710,7	998,5	17·08
,, ,,	October ,,	475,8	675,5	16·90
,, ,,	November ,,	1,062,1	1,521,3	16·75
,, ,,	December ,,	1,470,0	2,076,6	16·02
,, ,,	January 1888	1,557,0	2,194,4	17·02
,, ,,	February ,,	1,411,7	2,002,5	16·91
,, ,,	March ,,	1,703,0	2,458,7	16·62
		15,358,5	21,812,4	16·89

249. The receipts, in England, of capital subscribed by the Railway Companies being much in excess of the Budget as explained in paragraph 245, the original estimate of drawings by the Secretary of State on India was reduced by 1,000,0 in the Revised Estimate which was closely followed by the actual allotments.

250. The payment account of the year may be stated as follows:—

	£	Rx.
Bills of 1886-87 outstanding on 1st April 1887	271,3	380,0
Bills drawn in 1887-88 as entered above	15,358,5	21,812,4
Total bills for payment	15,629,8	22,192,4
Bills paid in 1887-88	14,682,5	20,817,7
Bills outstanding on 1st April 1888	947,3	1,374,7

Section V.—CASH BALANCE.

	Budget.	1887-88. Revised.	Accounts.
Balance on 1st April 1887	15,093,7	18,476,6	18,476,6
Balance on 31st March 1888	13,276,0	19,347,4	19,784,4
Increase (+) or decrease (—) of balance on 31st March 1888	—1,817,7	+870,8	+1,307,8

251. This difference between the estimate and the accounts is distributed between India and England in the following proportions:—

	Budget.	1887-88. Revised.	Accounts.
India	—1,911,9	+537,3	+687,9
England	+94,2	+333,5	+619,9
TOTAL	—1,817,7	+870,8	+1,307,8

GOVERNMENT OF INDIA.

HOME DEPARTMENT.

EXECUTION OF DEEDS, CONTRACTS, &c., ON BEHALF OF THE SECRETARY OF STATE.

No. 311-312.

Extract from the Proceedings of the Government of India in the Home Department (Judicial),—under date Calcutta, the 12th March 1889.

READ again :—

Home Department Resolution, No. 613, dated 11th May 1878, relative to the execution of deeds, contracts, &c., on behalf of the Secretary of State.

Read also the under-mentioned papers :—

Letter from the Government of the Punjab, No. 1727½, dated 15th December 1888.

Letter to the Solicitor to Government, No. 149, dated 8th February 1889.

Letter from Solicitor to Government, No. 184, dated 15th February 1889.

RESOLUTION.

IN exercise of the power conferred by the thirty-third and thirty-fourth of Victoria, Cap. fifty-nine, section two, the Governor General in Council is pleased to declare, in supersession of the orders contained in the Resolution dated 11th May 1878 cited in the preamble, that the under-mentioned classes of the deeds, contracts and other instruments referred to in the twenty-second and twenty-third of Victoria, Cap. forty-one, section two, may be executed as follows in the territories under the administration of the Government of the Punjab :—

By the Chief Engineer and Secretary to Government in the Public Works Department.	Contracts and other instruments for the supply of building materials, stores, machinery, &c., for public works; contracts and other instruments for the conveyance or carriage of such materials, stores, machinery, &c., and for the execution and maintenance of public works generally.

ORDER.—Ordered, that this Resolution be communicated to the Government of the Punjab, and be published in the Supplement to the *Gazette of India*.

(True Extract.)

A. P. MACDONNELL,

Secretary to the Government of India.

GOVERNMENT OF INDIA.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Summary for February 1889.

February is usually the last cold-weather month of the year in Northern India, as hot-weather conditions generally set in at the end of this month or the beginning of the month of March and rapidly intensify. It is occasionally a very unsettled stormy month in Upper India and the adjacent hill districts, more especially if the preceding month has been finer than usual. The majority of the most severe cold-weather storms of recent years have occurred during the last week of January and first ten days of February. The storms of the month usually belong to the class known as cold-weather storms, the chief features of which have been described in the two previous monthly reports. These are generally shallow depressions but are almost as persistent as the storms of the rains proper. They usually move quickly and in the great majority of cases advance in an easterly course and hence in the opposite direction to the storms of the rains. Each storm gives moderate to heavy snow to the hill districts and light to moderate rain, chiefly in the plain districts to the north of the area of lowest barometer. One of the more remarkable features of these storms is the temperature relations and changes which accompany them. Temperature is generally considerably above the normal before the formation of each storm. A rapid increase of temperature generally occurs immediately in front of the advancing storm, and an even more rapid decrease of temperature takes place in the rear of the storm, where fine clear weather with westerly winds usually prevails. Hence a wave of high temperature appears to advance across Northern India in front of each of these storms and a similar wave of low temperature follows them.

Another interesting feature of the temperature conditions of the month is that the changes and variations of temperature in Southern India are usually

inverse to those in Northern India, that is, when temperature is excessive and increasing in Northern India, it is below the normal and decreasing in Southern India, and *vice versâ*.

The past month has been unusually stormy and rainy in Northern and Central India, and the temperature relations indicated in the preceding remarks have been exhibited to a marked extent during the month.

BAROMETRIC DEPRESSIONS AND STORMS OF THE MONTH.

First storm of January 27th to February 3rd.—This was fully described in the previous month's report. It was a double storm consisting of a shallow depression which drifted from Beluchistan across the head of the Peninsula into Burma and of a deep depression which formed in the North Punjab and advanced for some distance eastwards along the Himalayas and filled up on the 31st. The shallow depression was passing through East Bengal into Upper Burma on the 1st, and local showers were received in Assam and Bengal on that day. It gave low barometer and cloudy skies but no rain to Burma on the 2nd.

A very rapid rise of the barometer in Northern India on the 1st and 2nd established anticyclonic conditions with fine cool weather and westerly winds. The fall of temperature following the storm continued until the 3rd, when the variations of the mean temperature of the day from the normal were as follows:—

Sind and Rajputana	6° below.
North-Western Provinces	5° „
Punjab, Guzerat and Central India, Central Provinces, Bengal	4° „
Bombay	2° „
Madras	1½° above.

This storm gave a heavy fall of snow in the hill districts and general rain to the Punjab, North-Western Provinces, Rajputana, Central India, Behar, Chutia Nagpur and Bengal.

Depression of 5th to 8th February.—This was a very shallow depression and of little importance. It appeared in Sind on the morning of the 5th. Temperature increased very rapidly in Sind, Rajputana and Guzerat on the 5th, in the Central Provinces on the 6th, and in the North-Western Provinces and Bengal on the 7th. The average variations of the mean temperature from the normal on these days and on the 8th were as follows:—

	Average Temperature Variation.				
	4th.	5th.	6th.	7th.	8th.
Punjab	−1½°	−1°	+3°	+3½°	+3°
Sind and Rajputana	Normal.	+5	+5½	+4	+4
North-Western Provinces	−5	−2½	+1	+4½	+3½
Central India	−2½	+2	+4	+8½	+8
Central Provinces	−4½	−1	+4½	+7½	+7½
Bengal	−4½	−3	−2	+ ½	+2
Bombay	+1	+1½	+2	+3	+3½
Madras	+1½	+2	+1	+ ½	−1

The depression passed into Bengal on the 8th and gave some cloud and filled up on the 9th.

Little or no rain fell in the plains or hills during the advance of this depression and hence the temperature relations were different from those of the preceding storm, and no rapid fall of temperature occurred in the the rear of the storm.

Depression of 10th to 13th February.—The barometer fell rapidly on the 9th in North-Western India and a shallow depression overlay Guzerat and

South-West Rajputana on the morning of the 10th. Thunderstorms giving light showers occurred during the day in Central India, Rajputana, and the South-East Punjab.

The depression was transferred to Chutia Nagpur and the adjacent districts on the morning of the 11th, and numerous thunderstorms and light showers had fallen during the previous twenty-four hours in the North-Western Provinces and Central India. Temperature was now decreasing rapidly in North-Western and Central India and increasing briskly in Eastern India.

The depression passed into Central Bengal on the morning of the 12th. Thunderstorms giving moderate rain occurred in Behar and Bengal during the previous twenty-four hours.

Temperature increased rapidly on the 12th in Burma, East Bengal and Assam and was now falling steadily in North-West and Central India. The following gives the temperature variations of the 9th, 10th, 11th, and 12th:—

	Average Temperature Variation.			
	9th.	10th.	11th.	12th.
Punjab	+4½°	+3½°	+3½°	+4°
Sind and Rajputana	+6°	+1°	+1°	+3½°
North-Western Provinces	+4½°	*Nil*	+1°	+2°
Central India	+10½°	+4°	*Nil*	+1½°
Central Provinces	+9½°	+6°	*Nil*	−10°
Bengal	+2½°	+4°	+4½°	−½°
Assam	+1½°	+4°	+7½°	+2°
Bombay	+3°	+1°	−½°	+½°
Madras	−½°	+2°	+1½°	+½°
Burma	−½°	+2°	+2°	+1½°

The depression passed into Burma on the 13th when it filled up.

Temperature increased rapidly in North-Western India on the 14th and 15th and decreased in North-Eastern India. A fall of the barometer in Beluchistan and Sind on the 15th preceded the advance of another depression from Beluchistan.

Depression of 16th to 19th February.—The depression shewn by the Quetta observations on the 15th covered Guzerat and South-West Rajputana on the 16th. The temperature variations of the 15th immediately antecedent to the storm were as follows:—

Sind	5½° above.
Rajputana	10° „
Guzerat and Central India	8½° „
Central Provinces	7° „
North-Western Provinces	4½° „
Bengal	2° „
Madras	2° below.

The depression changed its character during the next twenty-four hours and, at 8 A.M. on the 17th, formed a long trough stretching from the Central Provinces to the South-East Punjab. Heavy rain fell on the 16th and 17th over the whole of this area, except the southern portion of the Central Provinces. Falls of one inch were recorded on the 17th at Sutna and Nowgong and at the Hill Stations. The depression was transferred to Bengal on the 18th. Temperature had increased rapidly in North-East India and fallen very quickly in North-West

and Central India. The temperature variations on the 16th, 17th, 18th, and 19th were as follows:—

	16th.	17th.	18th.	19th.
Punjab	+1°	+1°	+2½°	+3°
Sind and Rajputana	+1°	−3°	*Nil*	+3½°
North-Western Provinces	+3°	−4°	−1°	−1½°
Central India	+3°	−2°	−2°	−1°
Central Provinces	+4°	−2°	−3°	−4½°
Bengal	+2½°	+3½°	+3°	−2½°
Bombay	+2°	−1°	−2°	−1½°
Madras	−2°	−1°	*Nil*	+½°
Burma	+3°	+3½°	+3½°	+4½°

Moderately heavy rain fell on the 17th in the North-Western Provinces, Chutia Nagpur, and Behar. The depression passed into Bengal on the 19th, but filled up and disappeared before the morning of the 20th. It gave some local thunderstorms on the 18th and 19th in Bengal.

Temperature again began to increase rapidly in North-West India and continued to decrease in North-East India, and on the 21st the temperature variations were as follows:—

Quetta	15½° above
Sind and Rajputana	7½° ,,
Punjab	3½° ,,
Central India	2½° ,,
Central Provinces	½° below.
Bengal	3½° ,,
Assam } Burmah }	1° ,,

Depression of 22nd to the 25th February.—This was by far the most remarkable storm of the month, partly by reason of the unusual direction of its advance and partly by reason of the excessive burst of rainfall it gave to the whole of the Punjab. It formed in East Beluchistan and Sind on the 21st and 22nd, and advanced in a northerly instead of the usual easterly direction. The centre was between Mooltan and Jacobabad on the morning of the 23rd. Light showers fell on the 22nd in the hill districts, and skies were densely covered over the Punjab. On the morning of the 24th, the centre was to the west of Dera Ismail Khan, and the depression had increased to a third of an inch. Very heavy rain had fallen in the Punjab during the previous twenty-four hours. Murree received 5 inches, Rawalpindi 3¾ inches, Lahore 2½ inches, and Ludhiana and Simla 2 inches. The depression filled up with unusual rapidity during the day. The rise of the barometer was larger and more rapid than has been observed for many years in the Punjab, and exceeded half an inch at Peshawar. Showers were received during the previous day in the Punjab and north-western districts of the North-Western Provinces.

Strongly marked anticyclonic conditions were re-established in Upper India on the 25th, when pressure was two-tenths of an inch above the normal in the North Punjab, and this continued during the remainder of the month.

Hence, of the four depressions or storms of the month, three advanced across Northern India in the usual direction, whilst the fourth marched northwards parallel to, or more probably over, the Suliman Mountains and developed until it reached the much higher ground to the north of the Punjab when it broke up very rapidly. Its history hence confirms the supposition that these cold-weather storms are generated and maintained at a very considerable elevation, and are not primarily phenomena of the lower atmosphere.

Pressure.—The mean pressure of the month for the whole of India was ·024″ in excess of the normal. The excess was, as in the month of January, greater at the hill than the plain stations. Pressure was relatively to the general state in defect generally in Northern India. There were two areas in which

the local deficiency exceeded ·02″, *viz.*, Sind and Rajputana, and Burma. The following gives data:—

	Relative deficiency.
Jacobabad	−·032″
Kurrachee	−·024″
Ajmere	−·021″
Akyab	−·022″
Diamond Island	−·023″

Pressure was relatively in excess over the greater part of the Peninsula, but the abnormal variations exceeded ·02″ only at Ratnagiri (·027″) and Bellary (·022″).

Temperature.—The chief feature of the temperature of the month, *viz.*, the rapid fluctuations which accompanied the passages of an unusually large number of storms across Northern India, has been already fully shewn in the preceding remarks. The cloudy weather which accompanied these storms increased the night temperature and diminished the day temperature. This effect is shewn very clearly in the average temperature variations of the month in Northern India given below:—

	Variation of maximum temperature from normal.	Variation of minimum from the normal.	Variation of mean temperature from normal.
Burma	+0·8	+1·4	+1·1
Bengal and Assam	−0·4	+1·3	+0·5
Behar	−2·0	+3·0	+0·5
Nort-Western Provinces	−2·5	+3·0	+0·2
Punjab	−1·0	+3·5	+1·2
Rajputana	−1·2	+3·2	+1·0
Bombay	+1·0	+0·3	+0·7
Madras	+0·7	−0·4	+0·2
Berar and Central Provinces	+1·2	+1·9	+1·6
Central India—Guzerat	+1·0	+2·4	+1·7

Rainfall.—The most remarkable feature of the weather of the month is the rainfall. The whole of the Punjab, North-Western Provinces, Chutia Nagpur, Rajputana, and Central India received from two to ten times their normal amount. In Bengal and Assam there was a moderate excess. In the Central Provinces, the Deccan, and Southern India the rainfall of the month is always very small in amount, but was even smaller than usual during the first month.

The conditions of its occurrence were as abnormal as its amount. Excessive rainfall in February (such as that of the past month) usually accompanies excessive rain throughout the whole of the cold-weather months, as was the case in the cold weather of 1877. The excessive rain of the past month on the contrary followed a period of drier weather than usual in the months of December and January.

The following table gives the actual and average rainfall at several typical stations in Northern India for two periods, *viz.*, one from the 15th of December 1888 to the 27th of January 1889, and the second extending from 27th January to the end of February:—

Provinces.	Stations.	Rainfall from 15th December to 27th January.			Rainfall from 28th January to 28th February.		
		Actual.	Average.	Variation.	Actual.	Average.	Variation.
Punjab	Rawalpindi	0·53	2·85	−2·32	11·81	2·06	+9·75
	Sialkot	0·26	1·99	−1·73	8·62	1·46	+7·16
	Dera Ismail Khan	0·05	0·47	−0·42	2·28	0·37	+1·91
	Lahore	0·05	1·05	−1·00	5·34	0·96	+4·38
	Ludhiana	0·11	2·09	−1·98	5·14	1·09	+4·05
	Delhi	0·05	1·35	−1·20	3·96	0·66	+3·30

Provinces.	Stations.	Rainfall from 15th December to 27th January.			Rainfall from 28th January to 28th February.		
		Actual.	Average.	Variation.	Actual.	Average.	Variation.
North-Western Provinces	Roorkee	0·28	2·05	—1·77	4·22	1·18	+3·04
	Agra	0·11	0·68	—0·57	1·85	0·11	+1·74
	Lucknow	0·58	1·36	—0·78	1·44	0·17	+1·27
	Allahabad	0·51	1·04	—0·53	1·31	0·16	+1·15
	Gorakhpur	0·44	0·61	—0·17	4·01	0·33	+3·68
Behar	Patna	0·17	0·51	—0·34	3·47	0·43	+3·04
	Durbhanga	0·23	0·60	—0·37	2·67	0·50	+2·17
	Purneah	0·15	0·35	—0·20	3·91	0·62	+3·29
Rajputana	Jeypore	0	0·55	—0·55	1·11	0·20	+0·91
	Ajmere	0	0·44	—0·44	0·96	0·29	+0·67
Central India	Jhansi	0·37	0·58	—0·21	1·00	0·35	+0·65
	Nowgong	0·25	1·11	—0·86	1·24	0·28	+0·96
	Saugor	0·10	1·39	—1·29	0·62	0·28	+0·34
	Jubbulpur	0·05	1·28	—1·23	0·89	0·31	+0·58

This table exhibits fully the contrast between the rainfall of December and January and that of February, and also the excessive character of the latter.

As might be expected from the circumstances under which the rainfall of the cold weather occurs, the precipitation in the hill districts of Northern India was even more excessive than in the adjacent plains. The following gives data for the hill stations similar to that in the preceding table :—

Stations.	Rainfall from 15th December to 27th January.			Rainfall from 28th January to 28th February.		
	Actual.	Average.	Variation.	Actual.	Average.	Variation.
Murree	2·57	2·92	—0·35	18·58	2·87	+15·71
Simla	1·97	2·78	—0·81	10·38	2·62	+ 7·76
Mussoorie	1·48	?	?	12·26	?	?
Ranikhet	1·28	2·56	—1·28	8·78	1·85	+ 6·93
Quetta	2·10	1·99	+0·11	2·89	1·83	+ 1·06

No such rainfall has occurred in February during the past fifteen or sixteen years, so far as can be ascertained from the records of the Meteorological Office. The most remarkable feature was, that at the hill stations the precipitation during the storms occurred chiefly as rain and not as snow, and hence there has been apparently no excessive accumulation of snow in the hill districts, such as occasionally happen to influence the weather in Northern India. This inference from the weather at the hill stations is confirmed by the few snowfall reports that have been received up to date. Thus the Deputy Commissioner of Kohat states "that there was a good fall of snow on the Sufed Koh and neighbouring mountains on the last week of January, but that heavy rain followed the snowfall and washed the greater part away."

The Political Officer, Khyber, writes as follows respecting the snowfall in the Khyber and Tirah Hills :—"Snow fell on three different occasions in January, and the amount was reported to have been from one to three feet. Heavy rain fell during February and was followed by snow. The depth was reported to be about two feet."

The Assistant Commissioner, Kulu, states "that between 30th January and 2nd February there was an exceptionally heavy fall of snow, and that up to that date the winter had been one of frequent showers of exceptional severity."

No reports have been received up to date from the Assam and Sikkhim Himalayas.

Hence it is almost certain that there is not at present any excessive accumulation of snow in the Himalayan and Afghan Mountain areas, and it is also

probable, after the dry cold-weather season of 1886-87 and 1887-88, that the amount of snow at the present time is not above the average. This appears to be confirmed by the excessive temperature which has prevailed during the past fortnight over the whole of Northern India. For example, the mean temperature at Ajmere and Dera Ismail Khan on the 13th and 14th was 13° above the normal temperature of the day.

The following table shows the actual average rainfall and the normal rainfall of the month of the twenty-one districts into which the country is divided, so far as it is indicated by the telegraphic reports of a few stations in each district :—

Districts.	Number of stations.	Normal average rainfall in February.	Actual average rainfall in February 1889.	Difference from the average in February 1889.

JOHN ELIOT,

Offg. Meteorological Reporter to the Government of India.

SIMLA,

The 13th March 1889.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and prospects of the Crops.

Madras.—*For week ending 16th March, 1889.*—Rainfall very slight in Madura and Salem; none elsewhere. Rain wanted in Ganjam, Vizagapatam, Trichinopoly, Tinnevelly and Coimbatore. Standing crops generally good; withering in parts of Cuddapah, Trichinopoly, and Coimbatore; affected by disease in parts of Bellary. Pasture deficient in Ganjam, Coimbatore, Bellary, Salem and Tinnevelly. Prices rising in eight districts, falling in six, and stationary in others. General prospects favourable except in Ganjam, improving in Coimbatore. Labourers employed on last day of week on Rushikulya works 5,294, on Gopalpur Canal 8,672.

Bombay.—*For week ending 20th March, 1889.*—Rain throughout Sind and in one taluka of Poona. Late crops in three talukas of Surat and one of Sholapur unsatisfactory. Exotic cotton in parts of Dharwar blighted. Opium in Baroda fair. Harvesting progressing generally. Preparations for next season's crops commenced in parts of Karachi, Poona, Sholapur, Bijapur and Kathiawar. Probable outturn of late crops in Ahmednagar from four to twelve annas and of opium in Baroda twelve annas. Fodder scarce in parts of Poona, Ahmednagar, Khandesh, Kathiawar and Baroda.

Bengal.—*For week ending 19th March, 1889.*—Light local showers reported in Darjeeling and Dacca, otherwise the whole province has been without rain. Prospects of the *rabi* harvest are generally fair, and have improved in consequence of the recent rain and the present favourable weather. In Chota Nagpore, however, the *rabi* will, owing to previous drought, be a short crop of from eight to twelve annas. Opium collections are proceeding satisfactorily. *Mahua* prospects are hopeful, except in Manbhoom where the crop has been considerably injured by rain and storms. Spring rice is a promising crop. Cultivation of early rice and jute is well forward, but rain is wanted throughout East Bengal, and in places in Central Bengal. *Cheena* and other millets are still being sown and are coming up well. Indigo sowings in Behar are also in progress, and sugarcane is being planted. Prices of rice are fairly stationary, particularly in the distressed districts.

North-Western Provinces and Oudh.—*For week ending 20th March, 1889.*—Weather seasonable. Slight rain in some districts. *Rabi* harvest in progress; a fair outturn is expected. Sugarcane-pressing continues. Opium extraction commenced. Supplies sufficient. Prices falling. Condition of cattle good.

Punjab.—*For week ending 20th March, 1889.*—Slight rain in Hissar, Amritsar, Lahore and Peshawar, general in Rawalpindi and Dera Ismail Khan. Prices falling in Delhi, Jullundur, Rawalpindi, Shahpur, Dera Ismail Khan and Peshawar, stationary in other districts. Ploughing for *kharif* in progress. Prospects for *rabi* crops are generally good throughout the Province. Crops are reported to have been damaged by hot winds and floods in the Ghaggar in the Hissar district. Stock cattle are healthy. Fodder sufficient. Poppy in good condition in Jullundur.

Central Provinces.—*For week ending 20th March, 1889.*—Weather cloudy and warm. Harvesting of winter crops continues. Outturn of wheat, except in Jubbulpore, is ten annas, and in Hoshangabad only six annas. Prospects are better in the southern districts, but in Raipur only an eight-anna crop is anticipated. Cattle generally in fair condition. Scarcity of water felt in places.

Burma.—*For week ending 16th March, 1889.*—A little rain fell in several districts in Upper and Lower Burma. The dry-weather crops on the whole promise well, but in Bhamo rain is badly wanted. Prices of grain are almost stationary.

Assam.—*For week ending 20th March, 1889.*—Weather seasonable. Slight rain fell in most districts. Sowing of early rice going on. Sugarcane-crushing continues. Tea plucking begun.

Mysore and Coorg.—*For week ending 20th March, 1889.*—No rain in Mysore. Crops in parts of the Kolar and Mysore districts are suffering from want of rain, elsewhere they are reported to be in good condition. Outturn of crops harvested fair. Water-supply diminishing in parts of the Mysore district. Prices slightly fallen in the Kolar district.

No standing crops in Coorg.

Berar and Hyderabad.—*For week ending 20th March, 1889.*—Cutting and threshing of *rabi* crop still in progress in Berar. Prospects good, except in Melghat, where wheat has been affected by grubs; outturn about twelve annas. Cattle free from disease. Fodder and water same as last week. Prices rather high in the Akola district.

No rain in Hyderabad during the week. Weeding of hot-weather and reaping of *rabi* crops continue. Scarcity of fodder and water still felt in some places. Prices stationary.

Central India.—*For week ending 20th March, 1889.*—Slight rain during the week in parts of Western Malwa and Goona Agencies. Prices of food grains reported stationary in Western Malwa. Condition of opium crops indifferent in Goona. No other change of importance during the week.

Rajputana.—*For week ending 20th March, 1889.*—Good rain in Ajmere and Jeypore. Agricultural operations satisfactory. Standing crops good and being harvested. Harvest poor in Kherwara. Agricultural stock good. Pasturage or fodder sufficient, except in Kherwara, Meywar and parts of Sirohi. Prices rising slightly in Pertabgarh and Bhurtpore.

Nepal.—*For week ending 14th March, 1889.*—Slight rain. Weather beginning to get hot. Mornings are sometimes foggy. Potatoes are germinating. Agricultural prospects good.

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

FINANCIAL STATEMENT for 1889-90.

Section I.—Preliminary.

1. THE Financial Statement for 1889-90 deals with the Accounts of 1887-88, which have been finally closed, with the Revised Estimate for the current year, 1888-89, and with the Budget Estimates for the coming year, 1889-90. In this Statement tens of rupees are denoted by the symbol Rx.; tens of rupees represent what used to be called conventional sterling; when pounds sterling are meant the words "true sterling" are always added; pounds sterling are also denoted by the customary symbol, and not by Rx.

In previous years columns have been inserted in Statements A and B, showing (1) differences between the Revised and Budget Estimates of the current year, and (2) differences between the Revised Estimate of the current and the Budget Estimate of the coming year. In order that the change in the financial position, as estimated a year ago and as estimated now, may be seen at a glance, it has been decided to add a column showing the increases and decreases resulting from a comparison of the Budget Estimate of the current year with the Budget Estimate of next year.

The magnitude of the financial transactions of the Government of India is now very great, the aggregate of Revenue and Expenditure, as entered in the estimates for 1889-90, being more than Rx. 166,000,000. The Revenue and Expenditure, as recorded in the Accounts, include the gross receipts and working expenses of Indian State Railways and the net receipts of the old Guaranteed Railways, and it is this inclusion which swells the total Revenue and Expenditure and causes them to increase so rapidly.

The Accounts and Estimates include three distinct categories of Revenue and Expenditure—Imperial, Provincial, and Local,—and deal with the transactions of eight Local Governments and Administrations, and of many Local Funds, as well as with those of the Supreme Government.

The Local Governments and Administrations are Madras, Bombay, Bengal, the North-Western Provinces and Oudh, the Punjab, Burma, the Central Provinces, and Assam; all of which enjoy a considerable measure of financial independence.

The transactions of the Government of India are carried on in India in the silver standard, and in England in the gold standard, and are consequently attended with the inconvenience and uncertainty which result from the frequent and considerable fluctuations in the relative value of the two standards which have been experienced in recent years.

The Accounts of the Government of India also include, as I have already stated, the transactions of a great system of Railways, some of which are owned by the Government, being either worked directly by Government, or leased to Companies, while others are owned and worked by Companies to whom a minimum rate of interest is guaranteed; a few are owned and worked by Private Companies which receive a greater or less amount of assistance from the Government. The contracts between Government and the different Railway Companies are numerous and complex, and vary in their terms in the case of different Railways.

For the reasons I have just stated, the preparation of a satisfactory Financial Statement is a task of difficulty. To fully explain the details of every transaction would weary the attention of the most patient reader or listener, while a mere attempt to sketch briefly the leading features of the situation would exclude much valuable information. In such circumstances nothing is practicable but a compromise, and a compromise, from the very nature of the case, cannot be wholly satisfactory to everybody interested.

Section II.—Accounts of 1887-88.

2. In the Financial Statement of March 1888 the Revenue of the year 1887-88, which was then about to close, was estimated at Rx. 77,926,600, and the Expenditure chargeable thereon at Rx. 80,943,300, the deficit being Rx. 3,016,700; the cost of the Special Defence Works, which were being constructed for the protection of the North-West Frontier and the chief places on the Coast, was included in the Expenditure.

A statement was subsequently published in the *Gazette of India* of the 12th May 1888, giving the corrections in that Estimate rendered necessary by the further information at that time available.

This additional information referred only to the Indian portion of the transactions, and not to the Home Accounts, and indicated a net improvement of Rx. 397,000 as compared with the figures of the Financial Statement, the probable deficit of the year 1887-88 being reduced from Rx. 3,016,700 to Rx. 2,619,700,

3. As the process of compilation of the accounts of the year proceeded, the position was shown to have further improved by Rx. 238,000, making the probable deficit Rx. 2,381,700. This alteration of the Estimate was telegraphed to the Secretary of State in August 1888, and was adopted in the "latest estimate" laid before Parliament in the Under-Secretary of State's Financial Statement of September 1888. The probable deficit announced to Parliament was, however, Rx. 1,960,800, and not the sum of Rx. 2,381,700 just mentioned. The difference of Rx. 420,900 was due, as explained by Sir John Gorst, to an improvement in the English Account of Rx. 120,900, and to the inclusion as revenue of a special item,* then estimated at Rx. 300,000, representing the gain by exchange on the capital transactions of Subsidized Railways in England, which had been placed under a suspense head in the Revised Estimates pending the decision of the Secretary of State whether it properly formed an item of current revenue, or not.

4. On closing the Accounts of the year 1887-88 the actual figures proved to be, Revenue Rx. 78,759,744, Expenditure Rx. 80,788,576, and the deficit of 1887-88 is finally shown to be Rx. 2,028,832, being Rx. 68,032 more than the deficit as estimated in September last. The principal differences between the Revised Estimate as given in the last Financial Statement and the Actuals of 1887-88 are set out in the following statement, and complete details will be

* "I mentioned just now a sum of £300,000, which I said the Government had gained by exchange, transactions. I must just explain how that arises. The Committee are, no doubt, aware that the Government have contracts with certain Railway Companies—the Southern Mahratta, the Indian Midland, and the Bengal-Nagpur—by which the Government undertake to transmit to India the capital of these Companies subscribed in London, which is required for expenditure in India, at a certain fixed rate of exchange In the case of the Southern Mahratta money is transmitted by contract at 12 rupees per £1 sterling, in the case of the Indian Midland at 12½ rupees per £1 sterling, and in the case of the Bengal-Nagpur at 13 rupees per £1 sterling. The Committee will see that when exchange comes down below the rate named in the contract, the Government gain by the transaction. For instance, at the present time, the £1 sterling is nearly equivalent to 15 rupees in India, whereas the Government would only have to pay the Southern Mahratta Railway 12 rupees. So long as the rupee is lower than the exchange rate of the contract there is again, and that gain makes up this sum of Rx. 300,000."

found in the appropriation audit report published in the *Gazette of India* of 16th March 1889.

		1887-88.		Accounts Better.	Accounts Worse.
		Revised Estimate.	Accounts.

TOTAL	Rx.	80,943,300	80,788,576	497,615	342,891
DEFICIT	Rx.	3,016,700	2,028,832	987,868	

5. The Revenue in India (Imperial, Provincial, and Local) proved to be Rx. 829,003 more, and the Expenditure in India (Imperial, Provincial, and Local) Rx. 379,713 less than the estimate of March 1888. Allowing for the increase in the Provincial adjustment of Rx. 342,891, these figures give a net Imperial improvement of Rx. 865,825, and if we add the net improvement in the English Accounts, and under Exchange, of Rx. 122,043, we get a total improvement of Rx. 987,868, being the amount by which the actual deficit falls short of the estimated deficit of March last.

6. Of the increase of Revenue in India, Rx. 244,540 resulted from the gain by exchange on capital transactions of Subsidized Railways in England, which was not taken credit for in the Estimates for reasons already stated, and the balance Rx. 584,463 represents the actual improvement in Revenue. It has been explained on former occasions that the financial year terminates in the middle of the season of heavy revenue collections and large Railway receipts. A difference of a day in the payment of the instalments of Land Revenue due at the end of March may seriously affect the estimate of revenue for the year. If the Land Revenue is paid on 31st March, it appears as a receipt of the year 1887-88; if it is paid on 1st April it appears as a receipt of 1888-89. The estimated results are further liable to be falsified by an unexpected distribution of the Railway traffic between March and April. The months of March and April are also periods of heavy Public Works expenditure, and it is difficult to say beforehand how much of such expenditure will fall into March and how much into April. In fact, for the purposes of the Revised Estimate, the year could hardly end on a more inconvenient date than the last day of the month of March. If the variations from the Estimate occur under Provincial or Local heads the estimated surplus or deficit, which depends solely on Imperial revenue and Imperial expenditure, is not affected, but the total revenue and total expenditure recorded in the Accounts may be materially altered.

7. The improvement in the Revenue figures calls for no further remarks. The reduction of the Indian Imperial Expenditure below that of the Revised Estimate, amounting to Rx. 204,484 in all, was mainly due to a less expenditure of Rx. 115,963 on Special Defence Works, of Rx. 87,162 under Opium, of

Rx. 66,559 under Interest on ordinary Debt, of Rx. 49,937 under Military Works, and to an excess of Rx. 116,739 under working expenses of State Railways. The gain in the English Account was mainly due to reduced Military expenditure and to the resulting saving in exchange. The saving under Provincial and Local expenditure occurs mainly under Civil Works and Irrigation and, in a less degree, under charges for collection of Land and Forest Revenue.

8. The above explanations dispose of the Revenue and Expenditure Account of 1887-88, on the results of which depends the surplus or deficit of the year. The Capital Expenditure on Railways and on Irrigation Works constructed from loan funds amounted to Rx. 2,251,776 and Rx. 533,048 respectively, thus falling short of the anticipations of the Revised Estimates by Rx. 191,976, of which Rx. 122,224 was due to short expenditure on Railways and Rx. 69,752 to short expenditure on Irrigation. This result does not of course affect the question of surplus or deficit on the Revenue and Expenditure Account, and, as already stated, the final result of the year 1887-88 was a deficit of Rx. 2,028,832, including as expenditure Rx. 456,017 on account of Special Defence Works. Excluding the cost of these Works the deficit of 1887-88 was Rx. 1,572,815.

Section III.—Revised Estimates of 1888-89.

9. The Estimates of 1887-88 as originally framed in March 1887 showed a surplus of Rx. 16,700, representing practically a bare equilibrium of Revenue and Expenditure.

As I have just stated, the trifling surplus shown in the Budget Estimate of 1887-88 has proved, on closing the accounts of the year, to have become a deficit of Rx. 2,028,832.

The deterioration in the financial position manifested itself in the course of 1887-88, and led to steps being taken in the course of the year for increasing the revenue. Of the actual deficit, Rx. 1,059,000 were due to the conversion of the India 4 per cent. stock of £48,200,000 into 3½ per cent. stock in consequence of the operation throwing on the Accounts of that year a charge of £1-7-6 per cent. which would otherwise have been paid in 1888-89. A further deterioration resulted from the decision to charge against Revenue the expenditure on Special Defence Works which had been treated in the Estimates as a charge against borrowed money, the additional charge imposed on the Revenue Account being Rx. 456,017. Other causes for apprehension were found in the fall in Exchange, the reduction in the net Railway revenue, the fall in the price of Opium, and increased Military expenditure in Burma. The position was deemed to be of a nature so serious that, as I have said, steps were taken towards the close of the year to add to the revenue by the imposition of fresh taxation. The measures adopted for this purpose were the following—

(1) the raising of the rate of the duty on Salt from R2 to R2-8 a maund, with effect from the 19th January 1888 except in Burma where the rate was raised from 3 annas to R1 a maund;

(2) the imposition of a duty on the import of petroleum with effect from the same date; and

(3) the extension of the Income Tax Act to Lower Burma, from 1888-89.

These measures were estimated to produce about Rx. 1,900,000; but as they were introduced in the end of 1887-88 they had but little effect on the Revenue of that year.

10. The full effect of the measures just referred to would be felt in 1888-89, and the Estimates of that year showed a deficit of only Rx. 698,000 after including in the expenditure of the year a sum of Rx. 1,121,500 for Special Defence Works. If the expenditure on Special Defence Works had been

excluded the Estimates would have shown a surplus of Rx. 423,500. The financial position has, I regret to say, been again affected injuriously by various influences during the progress of the year. On the expenditure side we have had to allow for a considerable fall in Exchange. In the Estimates the rupee was taken at 1-4·9; the rate actually received has been 1-4·38, a fall of more than a half-penny per rupee, which adds Rx. 684,400 to the expenditure of the year. There has also been unforeseen expenditure, estimated at Rx. 387,500, on Military Expeditions—being Rx. 142,500 on the Black Mountain Expedition, and Rx. 210,000 on account of Sikkim, besides Rx. 35,000 on account of the Lushai Expedition. The Revenue Account has been affected by a reduction in the quantity of salt that has paid duty, and there have been short crops in some parts of India—a condition which exercises an injurious effect on the revenue generally.

In face of these adverse circumstances it will be a surprise to most people to learn that, including expenditure on Special Defence Works, we now estimate for a deficit of Rx. 201,700 as against the deficit of Rx. 698,000 which was anticipated in the Financial Statement of March last, and if the cost of Special Defence Works be excluded, for a surplus of Rx. 616,600 as against the previous estimate of Rx. 423,500. Although the improvement is due in some respects to what may be termed accidental and temporary causes, yet, on the other hand, some of the influences which have adversely affected the finances of the year are of a precisely similar character, and the final result is not unsatisfactory.

I shall now explain the various causes which have tended to modify the Budget Estimates of 1888-89.

11. The Revenue of the current financial year 1888-89 was estimated in March last at Rx. 80,010,500; it is now estimated at Rx. 81,585,500, an improvement of Rx. 1,575,000.

The Expenditure proper of 1888-89 was estimated at Rx. 81,192,100 and the Provincial adjustment at *minus* Rx. 483,600, giving a total charge against Revenue of Rx. 80,708,500, the deficit being Rx. 698,000. What is meant by a *minus* Provincial adjustment of Rx. 483,600 is that the total Provincial Expenditure of the year was estimated to exceed the total Provincial Revenue by Rx. 483,600, and this sum was consequently shown as a charge against the accumulated balances of former years, and not against current Provincial Revenue.

The Expenditure properly so called is now estimated at Rx. 81,584,100, and the Provincial adjustment at *plus* Rx. 203,100, giving a total charge against Revenue of Rx. 81,787,200, being an increase over the former estimate of Rx. 1,078,700. The increase of Revenue over the Estimate has exceeded the increase of Expenditure chargeable against that Revenue by Rx. 496,300, and the estimated deficit has been reduced by that amount and now stands at Rx. 201,700 instead of Rx. 698,000.

12. The increase of Revenue for which we have to account is Rx. 1,575,000, and it is due mainly to increases under the following heads:—

	Rx.
Receipts under Exchange	536,800
Railways	243,300
Interest	182,500
Forests	154,100
Land Revenue	111,800
Post Office, Telegraph, and Mint	109,100
Opium	107,000
Excise	96,200
Irrigation	80,200
Stamps	77,800
Assessed Taxes	56,800
TOTAL	1,755,600

The total increase under these heads comes to Rx. 1,755,600, and there are increases under other heads amounting in the aggregate to Rx. 283,200, and making the total increase of Revenue under certain heads no less than Rx. 2,038,800. On the other hand, there is a falling off of Revenue under certain heads amounting to Rx. 463,800; of this sum the falling off under Salt accounts for no less than Rx. 445,600, leaving Rx. 18,200 as the total falling off under the remaining heads. The net increase of Revenue, as already explained, is Rx. 1,575,000.

13. In attempting to present an intelligible statement of a subject so extensive and complicated as the financial position of British India, more would be lost than gained by going into minute details, and attempting to explain every petty fluctuation in Revenue and Expenditure due to ordinary causes. I shall, therefore, confine myself to dealing with those variations in Revenue or Expenditure which are due to important or special causes, and which have had a perceptible influence on the financial results of the year.

14. The head under which the greatest increase of Revenue is anticipated is Exchange, and the increase is no less than Rx. 536,800.

The receipts under Exchange arise from the net gain accruing to Government in consequence of certain remittance transactions being carried out by it, under contract or as concessions, at a rate of exchange different from the average rate obtained by the Secretary of State by the sale of bills and telegraphic transfers on India. These receipts occur chiefly in connection with the contracts with Guaranteed and Subsidized Railways, with transactions with Her Majesty's Imperial Government, with family remittances of officers serving in India, and with remittances for the purchase of stores through the Secretary of State for Local Bodies and Native States.

The very large amounts of revenue accruing in this way in the current and past years have been due almost entirely to the heavy transactions of the Subsidized Railway Companies. Transactions are carried out at contract rates which are more favourable than the market rates, and a gain is made in this way which increases as the market rate falls below the contract rate. Of course, this is not a source of gain to which we can permanently look forward, and we run the risk of loss when the reverse transaction takes place, as well as when the rate of exchange is rising instead of falling.

The large difference between the Budget and Revised Estimates of the current year under this head is due partly to the fall in the rate of exchange since the Budget Estimate was prepared, but mainly to no provision having been made in the Budget Estimate for the gain, now estimated at Rx. 266,000, accruing from the payments made to the Railway Companies in England, as the question whether this should be treated as current revenue was under the consideration of the Secretary of State at the time the Estimates were prepared. The gain accrued mainly in connection with transactions relating to the Indian Midland, the Bengal-Nagpur, the Southern Mahratta, and the various Guaranteed Railways.

15. Increased Railway receipts account for an improvement of Rx. 243,300, and, as the receipts under this head are intimately connected with the expenditure on working expenses and surplus profits of Guaranteed Companies, I propose to deal with both the Revenue and the Expenditure at the same time, thus anticipating to some extent what it would otherwise be necessary to say hereafter. The improvement in Railway Revenue amounts to Rx. 243,300, but there is an increase of Rx. 393,300 in Expenditure (including Exchange), so that the net result in the Railway Account is a deterioration of Rx. 150,000.

The following is a statement of the increase or decrease under the Revenue heads of the Railway Account:—

	Increase + and Decrease—
	Rx.
State Railways (gross receipts)	—500
Guaranteed Companies (net traffic receipts)	+247,500
Subsidized Companies (repayments of advances of interest)	—3,700
TOTAL	243,300

The gross earnings of State Railways are almost the same as in the original Estimate, but there are considerable increases and decreases in the case of particular lines.

The main fluctuations are as follows:—

	Increase.	Decrease.
	Rx.	Rx.
State Railways (gross receipts)—		
East Indian	...	250,000
North-Western	150,000	...
Rajputana-Malwa	95,000	...
Eastern Bengal	70,000	...
Bengal-Nagpur	13,500	...
Indian Midland	12,500	...
Tirhoot	...	25,000
Oudh and Rohilkhund	...	20,000
Southern Mahratta	...	17,500
Burma	...	12,500
Tounghoo-Mandalay	...	10,000
	341,000	335,000
Guaranteed Companies (net traffic receipts)—		
Great Indian Peninsula	270,000	...
South Indian	27,500	...
Madras	25,000	...
Oudh and Rohilkhund	...	60,000
Bombay-Baroda	...	15,000

The serious falling off on the East Indian Railway is ascribed to a variety of causes, amongst which may be enumerated the cessation of an abnormal traffic in the previous year caused by scarcity in the North-Western Provinces, a continued falling off in a long lead traffic of wheat and grains from Upper India, certain writes-back due to overcharges, and, possibly, a diversion of traffic consequent on the opening of the Indian Midland Railway.

On the other hand, the grain traffic of the North-Western Railway, which fell off so much in the previous year, has revived to a great extent; the Rajputana-Malwa and Eastern Bengal Railways have both had prosperous years,—the jute season having been extremely favourable for the latter Railway.

16. The total increase of expenditure in the Railway Account amounts to Rx. 393,300, which is mainly due to the loss on sterling payments owing to the fall in Exchange.

The rupee expenditure in India has only increased by Rx. 86,400, and the expenditure in England by only £37,100 (true sterling), but the conversion of the sterling payments on account of interest and annuities (which amount to £5,652,600 (true sterling)) into rupees at a lower rate of Exchange than was taken in the Budget Estimate, raises the total increase to no less than Rx. 393,300.

It should also be explained that a more unfavourable exchange adds to the working expenses, under the head of Indian expenditure, by increasing the

rupee price of stores procured from England, though, owing to the system of accounting, this factor does not appear separately in the Accounts.

It is possible that up to the present this loss by the fall in exchange may have been to a great extent met by a corresponding fall in English prices; but with prices constant, it is obvious that an unexpected fluctuation in exchange would have a considerable effect on working expenses.

17. The increased receipts under Interest appear in the Home Accounts, and are due to the Secretary of State having, as explained hereafter, raised the loan required for purchase of the Oudh and Rohilkhand Railway much earlier than it was required. This had the effect of placing a large cash balance at his disposal, most of which he was able to lend out temporarily at high rates of interest.

18. The increase of Revenue under Forests is Rx. 154,100, but there is an increase of Expenditure on the other side of the Account amounting to Rx. 39,700, and making the net improvement Rx. 114,400. This increase is due mainly to increased receipts in Upper and Lower Burma. The increase in Upper Burma is Rx. 81,500, and includes a payment of Rx. 37,700 by the Bombay-Burma Trading Company on account of previous years. The increase in Lower Burma amounts to Rx. 84,700. The increased expenditure is mainly due to the payment of Rx. 43,400, to the Trading Company just referred to, in satisfaction of a claim against the late Government of Upper Burma, and of Rx. 10,000 on account of expenditure incurred by the Company for guards owing to the disturbed state of the country.

19. In the Budget Estimate for 1888-89, the total Land Revenue, including the portion due to Irrigation, which is shown in the Estimates under the Irrigation head of account, was Estimated at Rx. 23,680,800. The Revised Estimate now shows the following increases and decreases :—

	Increase. Rx.		Decrease. Rx.
India	3,500	Lower Burma	71,500
Central Provinces	14,600	Bengal	21,000
Upper Burma	36,200	North-Western Provinces and Oudh	40,000
Assam	15,700		
Punjab	14,500		
Madras	78,500	TOTAL	132,500
Bombay	103,100		
TOTAL	266,100		
Deduct decrease	132,500		
Net increase	133,600		

Considering the magnitude of the Revenue under this head in the different Provinces, the various items of increase and decrease are of little importance, with the exception of the increases of Rx. 103,100 in Bombay, of Rx. 78,500 in Madras, and of Rx. 36,200 in Upper Burma, and the decrease of Rx. 71,500 in Lower Burma. The decrease in Lower Burma is due entirely to the postponement of the date of the Land Revenue demand in two Districts, which transfers Rx. 87,000 from 1888-89 to 1889-90. The increase in Bombay is stated to be due to prompt realisation of the demand; that in Madras is due to land newly brought under cultivation having raised the demand of the year and to expected advance collections, and in Upper Burma to growing receipts in that Province as order is established. The decrease in Bengal and the North-Western Provinces reflects the influence of an unfavourable season and poor crops in some places.

20. The increase of Revenue under the group which comprises Post Office, Telegraph and Mint is made up as follows:—

	Rx.
Post Office	49,800
Telegraph	33,400
Mint	25,900
TOTAL	109,100

The increased revenue of the Post Office is due to the steady growth of the Department; the receipts of the Telegraph Department have increased from a similar cause and from the extension of private lines; while the increased revenue of the Mint is due to a larger amount of copper coin passing into circulation than was taken credit for in the Estimates.

21. The increase of Rx. 107,000 in receipts from Opium is entirely due to the rise in the price of the Bengal drug. The increased revenue from this source alone has been Rx. 444,600, against which has to be set a reduction of Rx. 333,000 in duty on exports of Malwa Opium and a small falling off of Rx. 4,600 under other heads. The average price of Bengal Opium has been Rs. 1,120, as against an estimate of Rs. 1,042. In the Budget Estimate it was anticipated that duty would be paid on 35,350 chests of Malwa Opium. It is now expected that duty will be paid on only 30,300 chests. The rise in the price of the Bengal drug, and the reduced exports of Malwa, appear to have been due to short crops both in China and Malwa.

22. The increase of Rx. 96,200 in Excise Revenue is the net result of the following increases and decreases in the different Provinces:—

	Increase. Rx.		Decrease. Rx.
India	1,700	Central Provinces	6,000
Lower Burma	42,000	Upper Burma	12,000
Bengal	5,000	Assam	1,200
Punjab	10,700	North-Western Provinces and Oudh	11,000
Madras	40,000		
Bombay	27,000		
TOTAL	126,400	TOTAL	30,200

The increase in Lower Burma is due to an enhancement of the rate of duty, in Madras to the extension of the stricter system of excise, and the introduction of the tree-tax system, and in Bombay and the Punjab to expansion of the revenue due to a good season and general prosperity.

23. The increase under Irrigation is Rx. 80,200, but there is an increase of expenditure on the other side of the Account amounting to Rx. 48,500, making the net improvement Rx. 31,700. The increase in Revenue is mainly due to higher direct receipts in the North-Western Provinces and Punjab and an increase in Madras of the portion of the Land Revenue due to Irrigation, and in the Punjab to the increased area under Irrigation from new Canals.

24. The increase in Stamps of Rx. 77,800 is distributed between all Provinces except Bengal, where a reduction of Rx. 20,000 is expected.

25. The increase of Rx. 56,800 in Assessed Taxes is mainly due to the fol-

lowing changes: In the "India" Account an increase of Rx. 23,100 chiefly in interest on Government securities; in Bengal Rx. 5,000 due to revision of assessments and realization of arrears: in Madras Rx. 10,000 from revision of assessments, and in Bombay Rx. 9,200.

The year 1887-88 was the second in which the Income Tax of 1886 was in operation, and though I have already completed the examination of the Accounts of that year in another place, it may be of interest if I state here that the smoother working of the administrative machinery is indicated by the reduction, in 1887-88, in the number of objections from 100,428 to 72,571, in the amount refunded from Rx. 27,067 to Rx. 19,949, and in the cost of collection from Rx. 50,157 to Rx. 28,679. The net collections amounted to Rx. 1,382,808, and exceeded those of the previous year by Rx. 105,297.

26. The estimated falling off in the Salt Revenue is Rx. 445,600, and it is due to a reduction in the quantity of salt on which duty was paid. The question of the causes which have brought about this reduction is of importance, because it has followed the increase of duty which took place towards the close of last year. I shall deal specially with this matter hereafter.

27. Turning to the Expenditure side of the Account, we find a total increase in Expenditure proper of Rx. 392,000, as well as an alteration in the Provincial adjustment of Rx. 686,700, the result appearing as an increase on the whole Account of Rx. 1,078,700.

It will be convenient, in the first place, to divide the total increase of Expenditure into its three component parts of (1) rupee expenditure in India, (2) sterling expenditure in England, and (3) Exchange.

In the Indian or rupee expenditure there has been an increase of Rx. 208,800 in Imperial expenditure and a reduction of Rx. 254,400 in Provincial expenditure. In the English or sterling expenditure there is a decrease of £168,400 (true sterling), and notwithstanding this reduction in the gold payments, an increased charge on account of Exchange of no less than Rx. 606,000. If the sterling expenditure had equalled the Estimate, the increased charge for Exchange would have been Rx. 684,400. This increased charge on account of Exchange is due of course to the Budget Estimates having been calculated in March last at an exchange of 1*s.* 4·9*d.* per rupee, while in the Revised Estimate we have only been able to take 1*s.* 4·38*d.*

28. The principal heads under which increases of expenditure have occurred are the following:—

	Increase. Rx.
Army	402,500
Railway Revenue Account	393,300
Interest on debt	189,100
Opium	93,800
Superannuation Allowances and Pensions	88,800
Political	51,800
Forests	39,700
Irrigation	48,500
TOTAL	1,307,500

The aggregate increase under these heads comes to Rx. 1,307,500. Minor increases under other heads come to Rx. 166,700, making a total increase of

Rx. 1,474,200. Against this figure must be set decreases amounting to Rx. 1,082,200, of which the following are the most important:—

	Decrease. Rx.
Special Defence Works	303,200
Civil Works	221,600
Land Revenue	145,200
Stationery and Printing	71,000
TOTAL	741,000

The explanations of the increased expenditure under the Railway Revenue Account and Forests have already been given.

29. The increased cost under Army is accounted for by an increase of Rx. 210,000 in India, of £16,000 (true sterling) in England, and of Rx. 176,500 for Exchange. The increase in India is due to the Sikkim, Black Mountain, and Lushai Expeditions already mentioned, to the rupee payments to British Troops having been increased by the fall in the rate of Exchange, and to the introduction of the practice of fixing the rate of Exchange for the issue of pay to British troops serving in India for the half-year only, instead of for the whole year, and to higher expenditure on account of dearness of provisions and forage (including compensation paid to Native Troops on this account). These increases were balanced to some extent by considerable savings in Military expenditure in Burma.

30. The increased charge of Rx. 189,100 on account of Interest on debt is made up of an increase of £68,100 (true sterling) in England, and a decrease of Rx. 27,400 in India, *plus* an increase of the charge for Exchange amounting to Rx. 148,400. The increase in the English sterling payment is due to the inclusion, under this head, of so much of the interest on the sum raised for the purchase of the Oudh and Rohilkhand Railway as was not chargeable to the Railway Revenue Account, and there is a corresponding receipt arising from the investment by the Secretary of State of a portion of his surplus cash balance owing to the favourable condition of the money market. The loan was raised in April 1888 and payment was not due till 1st January 1889, except in the case of some of the debenture loans which matured intermediately. Obviously, therefore, the Railway Revenue Account could not be charged with the interest, for the period April to 31st December, on any portion of the loan that was not applied to pay off debentures at maturity.

31. The increase in the charge for Opium is due to a larger crop than was anticipated, and the increase under Superannuation Allowances and Pensions of Rx. 88,800 is due, to the extent of Rx. 72,800, simply to the increased exchange on the sterling payments made in England.

The increased Political charge of Rx. 51,800 is chiefly due to the payment of arrears of the subsidy of the Amir of Afghanistan, as well as to an advance payment on the same account of Rx. 20,000.

The increase in expenditure under Irrigation is the net result of a great many variations, amongst which may be mentioned a heavy increase in the Punjab (Rx. 26,300) to repair damages by flood, and the classification of the Khushdil Khan Reservoir (Rx. 26,124) in Biluchistan as a work to be constructed from Revenues instead of from Loan Funds, as was originally intended.

32. The decrease of Rx. 303,200 in the estimated expenditure on Special Defence Works is mainly due to a decrease in the estimated expenditure in England of £186,300 (true sterling) caused by the fact that payments for heavy guns for arming the Indian defences were not made as rapidly as was expected

33. The decrease in the expenditure on collection of Land Revenue is distributed over the several Provinces in the following manner:—

	Decrease. Rx.
India	600
Central Provinces	24,900
Upper Burma	4,000
Lower Burma	16,100
Assam	4,000
Bengal	8,300
North-Western Provinces and Oudh	49,500
Punjab	12,300
Madras	32,700
England	200
Exchange	100
TOTAL	152,700

Against this decrease is to be set an increase of Rx. 7,500 in Bombay. In the Central Provinces the saving is partly due to low expenditure on Survey and Settlement Operations and partly to the transfer of Forest Survey Charges to the head of Forests. In Upper Burma it is due to provision having been made for reorganisation of the Commission from 1st April, whereas it actually took effect from 1st December. In the North-Western Provinces it is chiefly in Survey and Settlement Charges owing to cessation of operations in certain Districts. The saving in the Punjab also occurs in Survey and Settlement expenditure, and that in Madras is due to the revision of Revenue Establishments not having been carried out as intended.

34. The reduction in cost of Stationery and Printing is due to the demand for stores from England having been less than was anticipated.

The reduced Estimate of Expenditure under Civil Works is due; under Imperial (Rx. 31,800), to short outlay in Upper Burma and to the non-completion of the Surveyor General's Office in Bengal and to payments in England for Light-houses not having been made to the full extent anticipated; under Provincial, to outlay in the Central Provinces (Rx. 37,600) having been postponed; while in Bombay the expenditure appears to have been over-estimated (Rx. 53,300). The expenditure from Local Funds in Bengal by Local Boards was also over-estimated (Rx. 81,300).

35. The alteration in the Provincial adjustment arises in the following manner:—

The Original Estimate of Provincial Revenue was Rx. 21,668,100, and of Expenditure Rx. 22,151,700, giving a Provincial deficit of Rx. 483,600, which represents the Provincial adjustment of the Budget Estimate of 1888-89.

The Provincial Revenue of the year is now taken at Rx. 22,100,400, and the Provincial Expenditure at Rx. 21,897,300, giving a surplus on Provincial Account of Rx. 203,100, which represents the Provincial adjustment of the Revised Estimate.

36. The outlay on Railways (not charged against Revenue) has fallen from Rx. 3,444,500, as estimated in the Budget, to Rx. 1,364,800, as provided in the Revised Estimate. The greater portion of this apparent lapse, however, is nominal, and is due to the transfer from the State Railway account of the following sums—

	Rx.
Past outlay incurred by the State on the Sindia State Railway transferred to the Capital Account of the Indian Midland	921,000
Katni-Umaria Railway transferred to the Capital Account of the Bengal-Nagpur	485,700

But, apart from this, the expenditure has fallen short of the provision to the extent of about Rx. 673,000, the principal causes being the following: Rx. 200,000 were provided for the re-purchase by the State from the Bengal-Nagpur Railway Company of the old metre-gauge material of the Nagpur-Chhattisgarh line on the conversion of the gauge having been completed. Up to date the rolling stock only has been taken over, and for this a purchaser has been found in the Southern Mahratta Railway Company. The permanent-way and other metre-gauge materials have not yet been valued, so that the whole provision in the Budget has practically proved unnecessary.

There have been further heavy lapses in the provision for the following items, which may be approximately stated, thus—

	Rx.
Bolan High Level Line	147,500
North-Western Railway (including Jhelum-Pindi gradients)	143,000
Kandahar Reserve, due to heavy issues to the Chaman Extension	93,000
Sind-Pishin Railway	67,000
Sind-Sagar Railway	63,000
Bellary-Kistna	25,000
Jammu-Kashmir	20,000

There have also been small excesses and lapses on other lines which it is unnecessary to detail. It was found possible to provide about Rx. 90,000 for expenditure on the Villupuram-Dharmaveram line just commenced, and also for an increased outlay on the Chenab Bridge.

37. The reduced estimate of Expenditure under Irrigation Capital expenditure from loan funds (Rx. 107,000) is mainly due to the transfer of the Kushdil Khan Reservoir from this head to works chargeable to ordinary revenues (Rx. 26,124) and to the inability of the Executive Engineers in the North-West Provinces and Oudh to spend the full grants provided on the Jani Escape, Ganges Canal, and Nadrai Acqueduct (Rx. 63,200).

Section IV.—Estimates of 1889-90.

38. The Revenue of the coming year 1889-90 is estimated at Rx. 82,935,300, and the total Expenditure at Rx. 83,469,800.

The Provincial adjustment for the year is estimated at *minus* Rx. 640,800, and consequently the expenditure chargeable against the Revenue of the year is Rx. 82,829,000, and the estimated surplus is Rx. 106,300. This surplus is obtained after including in the expenditure of the year a sum of Rx. 1,102,900 on account of the cost of Special Defence Works. Exchange has been taken at 1*s.* 4·38*d.* = 1 rupee.

A comparison of the Budget Estimates of 1889-90 under the different heads with the Budget Estimates of 1888-89 will show the progress of Revenue and Expenditure during the year which is now drawing to a close.

39. Before, however, proceeding with this comparison, it is necessary to give some explanation of a special arrangement which has had a considerable influence on the Estimates of the coming year. It was explained in the Financial Statement for 1887-88 that the Provincial Contracts had been renewed with Local Governments for a further period of five years from 1st April 1887. The average annual gain to Imperial Revenues during the period of revision was stated to be Rx. 550,000, in addition to which, a greater share in the improvement of the revenue was secured under the new arrangements. It has been explained elsewhere in this Statement that the continued fall in exchange and growth of Military expenditure compelled the Government to raise the duty on salt and to impose

a tax on imported petroleum. The Secretary of State, in sanctioning this additional taxation, examined and reviewed the financial relations between the Imperial and Provincial Governments, and pointed out the inequality of the existing arrangements which secure freedom from financial difficulties to Local Governments, while the Supreme Government may be passing through a phase of acute embarrassment. The Government of India was requested to reconsider the propriety of arrangements which protected Local Governments from sharing in the financial responsibilities of the Empire, and from contributing to their relief.

Proposals for an alteration in the financial relations between the Supreme and Local Governments, which virtually had the effect of terminating the Provincial Contracts of 1887-88, were made on 2nd October last. These proposals met with much opposition, and it was decided to reserve for future determination a decision on the questions involved. It was, however, settled as a temporary expedient, that each Local Government, except the Punjab, should make a contribution in aid of Imperial Revenues in 1889-90. The total of this contribution is Rx. 740,000, and, with scarcely an exception, Provincial resources are so ample, that the contribution has been made without seriously affecting the financial position of any of the Local Governments.

The contributions made by the several Local Governments are as follows :—

	Rx.
Central Provinces	30,000
Burma	50,000
Assam	10,000
Bengal	100,000
North-Western Provinces	200,000
Madras	175,000
Bombay	175,000
TOTAL	740,000

In the case of the North-Western Provinces and Oudh and Lower Burma the contributions will be permanent. In the former case the Local Government will be reimbursed its contribution by receiving the proceeds of the Patwari cess now about to be re-imposed; in the case of Lower Burma the financial position of the Province had so far improved in recent years that a special annual grant of Rx. 47,900, made to it in 1887-88, has been simply resumed.

The important and difficult question of the nature of the future financial relations between the Supreme and Local Governments remains for future consideration.

40. The Revenue of the year 1888-89 was estimated in March last at Rx. 80,010,500, and the Revenue of 1889-90 is now estimated at Rx. 82,935,300 The increase is Rx. 2,924,800.

The following are the principal heads under which the increase occurs:—

	Increase. Rx.
Railway Account	1,501,800
Land Revenue	301,200
Provincial Rates	244,700
Post Office, Telegraph, and Mint	197,400
Irrigation	130,600
Excise	117,800
Receipts under Exchange	112,300
Stamps	105,100
Forest	98,000
Assessed Taxes	63,500
Customs	49,300
TOTAL	2,921,700

The total increase under the heads just specified comes to Rx. 2,921,700, leaving a balance of Rx. 3,100, which is the net result of variations under other heads of which the most important are, a decrease of Rx. 193,900 under Opium and of Rx. 92,600 under Salt.

41. In the Budget Estimate of 1888-89 the receipts from Railways were estimated at Rx. 15,184,700. For 1889-90 they are estimated at Rx. 16,686,500, giving the increase of Rx. 1,501,800. If we consider the expenditure side of the Account, however, we find that the estimated expenditure of Rx. 17,299,600 in 1888-89 has risen to Rx. 18,713,100 in 1889-90, showing an increase of Rx. 1,413,500; the net improvement in the Railway Revenue Account is, therefore, only Rx. 88,300.

42. The variations in receipts of the Railway Account fall under the following heads :—

	Increase+ Decrease— Rx.
State Railways (gross receipts)	+1,362,600
Guaranteed Companies (net traffic receipts)	+155,000
Subsidized Companies (repayment of advances of interest)	—15,800
TOTAL	Rx. 1,501,800

The increased receipts of State Railways shown in the above figures are not altogether real, as they are exaggerated by the transfer of the Oudh and Rohilkhand Railway to this head from that of Guaranteed Railways. The line was purchased by the State on 1st January 1889, so that the transactions relating to it, which were entered in the Budget of 1888-89 for nine months under Guaranteed Railways and for three months under State Railways, now appear in the Budget for 1889-90 wholly in the latter category.

The principal increases and decreases of receipts occur in connection with the following lines :—

STATE.	Increase+ Decrease— Rx.
East Indian Railway	—240,000
Rajputana-Malwa	+100,000
Bengal-Nagpur	+95,000
Tounghoo-Mandalay	+85,000
Eastern Bengal System	+90,000
Oudh and Rohilkhand	+550,000
Indian Midland	+400,000
North-Western Railway	+200,000
Mysore Railway	+54,600
TOTAL	1,334,600

GUARANTEED.	(Net receipts.) Rx.
Madras	20,000
South Indian	40,000
Bombay Baroda	15,000
Great Indian Peninsula	310,000
Oudh and Rohilkhand	—230,000
TOTAL	+155,000

The cause of the increase and decrease in the case of the Oudh and Rohilkhand line has been explained. In the case of the Indian Midland, Bengal-Nagpur, Tounghoo-Mandalay, and Mysore it is due to the opening of additional lengths of line.

On the remaining lines noticed, the estimate has been fixed principally on a consideration of the current year's results. The very serious falling off on the East Indian Railway has been explained in dealing with the Revised Estimate. The opening of the Indian Midland will probably still further affect the receipts, but to what extent it is impossible to foretell.

The falling off is fortunately more than covered by the increase on the Great Indian Peninsula line. The estimated gross receipts of this line show an anticipated increase of Rx. 400,000 over the Budget of the year about to close; the estimate is based on the traffic of the past twelve months, which has shown a steady improvement, likely not only to be maintained but to be still further augmented by the opening of the Indian Midland and Bengal-Nagpur Railways. The opening of the Indian Midland may, on the other hand, tend to reduce the earnings of the Rajputana-Malwa and Bombay Baroda lines, so that there is considerable uncertainty in framing the Estimates this year of individual lines: taken as a whole the estimate is likely to prove a fairly correct one.

To meet the increased traffic on the Great Indian Peninsula Railway, it has been necessary to raise the estimate of Working Expenses by Rx. 90,000, showing a net increase of Rx. 310,000.

43. Turning to the Expenditure side of the Account, it will be found that there has been an increase of Rx. 1,177,900 in the Indian or rupee portion of the transactions, a decrease of £11,600 (true sterling) in the English expenditure, and an increased charge of Rx. 247,200 on account of Exchange.

The increase in working expenses of State Railways is mainly due to the Oudh and Rohilkhand Railway being treated as a State line for the whole year, to the opening out of new lines, and to increase of traffic on lines already open.

An item appears for the first time in the Estimates, namely, "Interest chargeable against Companies for advances of Capital." It represents interest on moneys, raised directly by the Secretary of State under the provisions of the Oudh and Rohilkhand Railway Purchase Act, to meet expenditure incurred by Companies in preference to allowing Companies to borrow themselves. It is found that Capital can be raised on more favourable terms in this way.

The increase in the charge against Revenue for Exchange is wholly due to the fall in value of the rupee, the estimated sterling expenditure, other than on account of Revenue stores, being actually less than in the current year; in addition to the amount shown on this account, Rx. 247,200, a large sum, representing a further loss, is concealed in the working expenses, as explained in dealing with the Revised Estimate.

44. Considering the very heavy increased burdens on account of the fall in exchange, and bearing also in mind the fact that in recent years a very large amount of Capital has been expended on lines for the defence of the Frontier, which cannot be expected to prove remunerative, a net improvement, though only of Rx. 88,300, cannot be considered unsatisfactory.

The rapidity with which the construction of Railways has been pushed on, and the influence of the fall in exchange, had, however, an injurious influence

on the net results of the Railway Revenue Account in recent years, as will be seen from the following figures:—

	Net Receipts + Net Expenditure — Rx.
1880-81	—1,014,203
1881-82	—285,955
1882-83	—1,306,194
1883-84	—305,239
1884-85	—1,051,751
1885-86	—731,713
1886-87	—1,188,668
1887-88	—2,122,386
1888-89 (Revised Estimate)	—2,264,900
1889-90 (Budget Estimate)	—2,026,600

The net loss on the Railway Account has increased from Rx. 1,044,203 in 1880-81 to Rx. 2,026,600 in the Estimates of 1889-90.

The following figures show the rate at which Railways have been constructed at the cost, or on the responsibility, of the Government since 1880:—

Date.	No. of miles open.	No. of miles under construction.
31st March 1880	8,382	1,037
1881	9,134	539
1882	9,437	1,155
1883	9,748	1,552
1884	10,188	2,185
1885	10,824	2,809
1886	11,173	2,969
1887	12,000	2,557
1888	12,918	1,882
1889 (Revised Estimate)	13,671	1,438

Between March 1880 and March 1889 the number of miles open has increased from 8,382 to 13,671, or by more than 63 per cent.

TOTAL CAPITAL EXPENDITURE.

	State Railways.	State Railways constructed through the agency of Companies.	Guaranteed lines.	Total.	Annual Progress.
To end of—	Rx.	Rx.	Rx.	Rx.	Rx.
1879-80	28,007,395	...	96,829,969	124,837,364	...
1880-81	67,724,624	...	66,348,478	133,573,102	8,735,738
1881-82	70,569,867	...	67,021,756	137,591,623	4,018,521
1882-83	72,800,428	468,270	67,431,448	140,700,146	3,108 523
1883-84	76,653,281	704,155	68,769,369	146,126,805	5,426,659
1884-85	81,389,391	3,126,906	69,904,427	154,420,724	8,293,919
1885-86	90,863,111	4,775,059	67,383,682	163,521,852	9,101,128
1886-87	108,456,220	7,915,378	57,046,325	173,417,923	9,896,071
1887-88	110,788,941	12,979,680	57,694,898	181,463,519	8,045,596
1888-89 Revised	122,507,721	18,254,330	49,116,331	189,878,382	8,414,863
1889-90 Budget	126,079,721	20,890,990	49,840,731	196,811,442	6,933,060

The average yearly expenditure of capital on Railways has been Rx. 7,197,000.

45. Land Revenue (including the portion due to Irrigation) is estimated to increase by Rx. 340,300, distributed in the following manner:—

	Increase. Rx.
India General	3,400
Central Provinces	29,300
Lower Burma	81,400
Upper Burma	68,300
Assam	10,700
North-Western Provinces and Oudh	47,200
Punjab	36,700
Madras	28,600
Bombay	50,700
TOTAL	Rx. 356,300
Deduct falling off in Bengal	16,000
NET INCREASE	340,300

Rx. 39,100 of the increase is credited as irrigation revenue. In the Central Provinces, North-Western Provinces, and the Punjab the increases are due to settlement operations, and in the case of the last-mentioned Province also to collection of arrears. A large portion of the increase in Lower Burma is due to the postponement of the demand from the current year, and the remainder to revised assessments, and to the resumption from certain Local Funds of receipts which they formerly obtained, a fixed contribution being given them as compensation. The increase in Madras is due to a higher percentage of collections being anticipated, and in Bombay to reduction of arrears and suspensions. In Upper Burma the increase is due to the gradual development of the country.

Provincial rates are estimated to increase by Rx. 244,700, due almost entirely to the receipts expected from the re-imposition of the Patwari cess. The Revenue classed under this head is appropriated to Local purposes and shown in the Local column in the Estimates.

46. The receipts under Irrigation are expected to increase by Rx. 130,600, but there is an increased charge of Rx. 32,400, giving a net improvement of Rx. 98,200.

The increase in Revenue is due to increase of direct receipts from Irrigation in the North-Western Provinces and the Punjab, and to an increase in the Land Revenue due to Irrigation in Madras and Bombay. The increased expenditure is chiefly due to increase in the charge for interest owing to additional capital expenditure.

47. Post Office, Telegraph, and Mint—The net account of these Departments stands as follows:—

	Net Estimate, 1888-89. Surplus + Deficit — Rx.	Net Estimate, 1889-90. Surplus + Deficit — Rx.	Improvement. Rx.
Post Office	—118,100	— 54,800	+ 63,300
Telegraph	— 36,700	—. 10,300	+ 26,400
Mint	+103,900	+125,500	+ 21,600
TOTAL	— 50,900	+ 60,400	+111,300

The improvement in the case of the Post Office is due to steady progress of the Department. The figures just given do not profess to be a strict Profit and Loss Account of the working of the Departments concerned. They represent merely the difference between the Revenue and Expenditure as recorded in the

Accounts and Estimates, but they are sufficient for the purpose of indicating the financial progress of the Departments.

48. The increase of Rx. 117,800 in the case of Excise and of Rx. 105,100 in the case of Stamps is generally distributed over the several Provinces with the exception of Bengal, where a decrease of Rx. 50,000 in Excise revenue is anticipated on the ground that the unfavourable crops and the changes which are being introduced in the management of the Excise may have an unfavourable effect on the Revenue for a time.

49. The increase in Customs (Rx. 49,300) is mainly due to large exports of rice anticipated from Burma in 1889-90.

The Petroleum tax when it was first imposed was expected to give a Revenue of Rx. 100,000 on a total import of 32,000,000 gallons. It is expected to give in the current year a Revenue of Rx. 115,000 on an import of 38,000,000 gallons. And for 1889-90 it is expected to give Rx. 120,000.

50. I have already explained the nature of the Receipts under Exchange. In the Budget Estimate of 1888-89 these Receipts were estimated at Rx. 415,000; in the Revised Estimate for that year the figure has been raised to Rx. 951,800, due largely to the addition of a credit now estimated at Rx. 266,000 which was not included in the Original Estimate owing to a difference of opinion as to the proper method of dealing with it in the Accounts. The estimate of these receipts in 1889-90 is Rx. 527,300. The large decrease is due to reduced capital expenditure on some of the Subsidized Railways now approaching completion.

51. In the case of Forests the improvement expected in Revenue is Rx. 98,000, against which must be set an increase of expenditure amounting to Rx. 30,700, giving a net improvement of Rx. 67,300. This improvement is due to increased Revenue in Upper and Lower Burma.

52. Under Assessed Taxes the increase of Revenue is expected to be Rx. 63,500. The expectation of an increase is based on the results of the current year.

53. The decrease of Rx. 193,900 under Opium is due to an increase of Rx. 159,600 under Bengal opium, the selling price having been taken at R1,070 instead of R1,042 as in the current year's Estimates, and to a decrease of Rx. 347,000 under Malwa opium owing to an expected reduction in the number of chests exported, from 35,350 to 30,000.

54. For Salt we have taken a moderate estimate of Rx. 8,029,900, which is Rx. 353,000 more than the Revised Estimate, and Rx. 92,600 less than the Budget Estimate for the current year. A large increase over the receipts of the current year is expected, as the falling off this year is mainly due to unfounded rumours of an immediate reduction of the duty.

55. The Expenditure of 1889-90 is estimated at Rx. 83,469,800 as compared with an estimated expenditure of Rx. 81,192,100 for 1888-89, showing an increase of Rx. 2,277,700 which requires explanation.

The Provincial Adjustment is *minus* Rx. 640,800 as against an adjustment of *minus* Rx. 483,600 in the Estimates of 1888-89.

The increase of Rx. 2,277,700 is made up of an increase of Rx. 1,651,500 in the rupee portion of the Account, of a decrease of £39,700 (true sterling) in the Home Account, and of an increase of Rx. 665,900 in Exchange. The increase in Exchange of Rx. 665,900 is almost entirely due to the fall in the value of the rupee; the alteration in the rate of exchange for converting the pay of the British troops which is fixed in gold but payable in rupees, adds an additional charge to the Military expenditure of about Rx. 195,000, so that the additional expenditure for which the Government of India has to provide has been increased in one year by Rx. 860,900 on account of the fall in Exchange.

56. It will facilitate explanation of the various increases or decreases, if the heads of expenditure are dealt with in the first instance according to the grouping which is generally adopted in the Accounts.

The following statements show the groups under which (I) increases and (II) decreases have occurred :—

I.	Expenditure Increased.
	Rx.
Railway Revenue Account	1,413,500
Army	1,005,700
Salaries and Expenses of Civil Departments	192,900
Post Office, Telegraph, and Mint	86,100
Irrigation	32,400
Famine Relief and Insurance	27,300
TOTAL	2,757,900

II.	Expenditure Decreased.
	Rx.
Interest	149,800
Direct demands on the Revenue	133,000
Buildings and Roads	110,500
Miscellaneous Civil Charges	34,700
Construction of Railways (charged against Revenue)	33,600
Special Defence Works	18,600
TOTAL	480,200

The aggregate of increases is Rx. 2,757,900 and of decreases Rx. 480,200, giving a net increase of Rx. 2,277,700.

57. The causes of the increase under Railway Revenue Account, Post Office, Telegraph and Mint, and Irrigation have already been explained.

By far the most important of the other increases is that under Army. The total increase of Rx. 1,005,700 is made up of an increase in rupee expenditure of Rx. 477,000, in English expenditure of £245,500 (true sterling), and of Rx. 283,200 under Exchange. The increased charge for Exchange is chiefly due to the fall in the value of the rupee, and the increases, of which special explanation is necessary, are an increase in the Indian Estimates of Rx. 477,000, and an increase in the English Estimates of £245,500 (true sterling).

Taking the latter item first it may be said with practical accuracy that the increase in the Home Expenditure is due to provision made for the purchase of Magazine rifles and 12-pounder breech-loading guns. However much the Government of India may regret that it should be necessary to incur such expenditure, it is not possible to avoid it, without placing the Indian Army in a position of inferiority as compared with that of other countries. The cost of these rifles and guns accounts for £206,000 (true sterling) of the Home expenditure.

As regards the increased cost of the Army in India, it will be obvious that the increase to the number of troops, European and Native, must give rise to petty increases in the various Departments that deal with them, and minor reforms account in the aggregate for a perceptible amount of increase. But the

greater portion of the increase is due to special measures of which the most important are the following:—

	Rx.
Provision for rapid mobilisation of an Army Corps in case of necessity	203,500
Exchange on pay of British Troops	195,000
Provision on account of Troops in Sikkim	100,000
Ditto ditto Lushai Country	10,000
Increased cost of provisions, including compensation for dearness of provisions and forage	79,500
TOTAL	588,000

The total comes to Rx. 588,000, but there is a saving of Rx. 220,000 in the extra cost of troops in Burma, so that the additional cost is reduced to Rx. 368,000. The difference of Rx. 109,000 between this figure and the total increase in India of Rx. 477,000 is due to the minor elements of increase to which I have just referred, balanced to some extent by savings under other heads.

The sum of Rx. 203,500 on account of mobilisation is intended to meet the cost of purchasing transport animals, provisions, and equipments, so that in case of need an Army Corps may be in a position to take the field promptly. This is one of these precautions which in the present days of scientific warfare cannot safely be neglected. The greater portion of the cost will be incurred once for all, and will not recur. The pay of the British troops is fixed in sterling, and as the Exchange falls, the number of rupees which they are entitled to receive increases. In the Estimate of 1888-89 the rate was taken at 1*s.* 5½*d.*; it has now been fixed at a much lower rate, and the change has added Rx. 195,000 to the estimate of expenditure for 1889-90.

58. The increased expenditure on Salaries and Expenses of Civil Departments is mainly due to the entertainment of additional Police. The increase of expenditure on Police is Rx. 168,800, and of this Rx. 125,600 is on account of Police in Upper Burma. There is also an increase of Rx. 45,200 in Bengal, due to Government undertaking to bear the whole cost of the Police of the Presidency Town. There is also some increase in Madras, due to a provision for giving a special allowance to officers in charge of Police Stations.

59. The decrease of Rx. 149,800 under Interest is made up of a decrease of Rx. 21,300 in the rupee portion of the Account, of a decrease of £167,400 (true sterling) in the English Account, and an increase of Rx. 38,900 in the charge for Exchange.

The statement below brings together the net charge for interest on debt in India and in England, excluding that incurred for Railways and Irrigation Works:—

	In thousands of Rx.										
	1880-81.	1881-82.	1882-83.	1883-84.	1884-85.	1885-86.	1886-87.	1887-88.	1888-89. Budget.	1888-89. Revised.	1889-90. Budget.
India	1,139	987	1,049	697	703	450	123	9	182	157	113
England	2,144	2,457	2,458	2,418	2,578	2,420	2,556	3,300	2,584	2,529	2,397
Exchange	435	506	564	552	626	762	961	1,386	1,086	1,176	1,114
TOTAL	3,718	3,950	4,071	3,667	3,907	3,632	3,640	4,695	3,852	3,862	3,624

It will be seen from these figures that the net charge for interest on ordinary debt has not varied much between the years 1880-81 and 1889-90, if the year 1887-88 is left out of consideration. The irregular result in that year arises (*a*) in India, from (1) about Rx. 90,000 of the interest charges having

remained unpaid at the end of the year, and (2) the realisation of arrears due on the Kidderpore Dock loan, and (*b*) in England, from special charges amounting to about Rx. 1,059,000 having fallen into that year in consequence of the conversion of about £48,200,000 of 4 per cent. Stock into 3½ per cent. Stock. The gradual diminution of the net burden of debt in India is of course due to the transfer to the Capital Account of Railways and Irrigation Works of their portion of the debt, and means that the expenditure on Capital construction has exceeded the amounts borrowed by public loans. The decrease in England in 1889-90 is accounted for by the conversion of £53,262,000 of 4 per cent. Stock into 3½ per cent. Stock, which reduces the yearly interest charge by £266,300. The increase in Exchange requires no explanation.

60. The decrease under "Direct Demands on the Revenues" is Rx. 133,000. It occurs under Opium cultivation and manufacture (Rx. 190,400), Collection of Land Revenue (Rx. 55,000), and Stamps (Rx. 40,700). The other heads in this group, except Customs, show increases. The expenditure on Opium cultivation and manufacture is determined by the amount of crude opium produced. The area under cultivation in the present season is 14 per cent. less than last year, and the produce is estimated at 15 per cent. less. Our reserve is unusually large and is expected to stand at 49,705 chests at the end of 1889. With a reserve of this magnitude it is obviously desirable to temporarily contract production, and this policy has been adopted in making the engagements for the present season. The decrease under Collection of Land Revenue occurs under Survey and Settlement charges, and that under Stamps is owing to smaller indents for supplies of stamped paper from England.

61. The reduction under Buildings and Roads of Rx. 110,500 is due to a reduction of Rx. 110,600 in Civil Works. Of the decrease under Civil Works, Rx. 96,200 is in Imperial expenditure, and is owing to the completion of the bulk of the Frontier Roads and other Imperial Works. On the other hand, a large Imperial grant (Rx. 298,100) is still being made for Civil buildings and roads in Upper Burma, and it is hoped that the Light-houses on Oyster Rock and Savage Islands on the Burmese coast will be completed.

62. The reduction in Miscellaneous Civil Charges is the net result of a number of increases and decreases, of which the most important are an increase of Rx. 118,000 on account of Superannuation Allowances and Pensions, and decreases of Rx. 47,500, Rx. 81,000, and Rx. 40,000 under Territorial and Political Pensions, Stationery and Printing, and Miscellaneous.

The increase in Superannuation Allowances is very largely due to the increase of Exchange on sterling pensions, the decrease in Political Pensions to the death of the Ex-King of Oudh, and the decrease under Stationery and Printing to a reduced demand for stores from England.

63. In the Budget Estimates of 1888-89 Provincial Revenues were estimated to yield Rx. 21,668,100, and Provincial Expenditure was taken at Rx. 22,151,700, the Provincial Adjustment being *minus* Rx. 483,600.

In the Estimate for 1889-90 Provincial Revenues are taken at Rx. 21,781,300, and Provincial Expenditure at Rx. 22,422,100, and the Provincial Adjustment is *minus* Rx. 640,800.

CAPITAL EXPENDITURE.

64. The provision in 1889-90 for Railways not charged to Revenue varies but little in the aggregate from the original provision of the previous year, thus—

	India. Rx.	England. £	Exchange. Rx.	Total. Rx.
1888-89 .	2,062,800	973,000	408,700	3,444,500
1889-90 .	1,697,100	1,273,000	591,900	3,562,000

The Mandalay Extension, for which a heavy grant was made in 1888-89, is now practically completed, and for the Sind-Pishin, Sind-Sagar, and Assam-Behar lines, which are approaching completion, a comparatively small sum is required. The grants for the Chaman Extension and for the Chenab Bridge are about the same as in last year, and provide for the completion of the latter work.

On the other hand, a provision of Rx. 1,021,600 is made for the Villupuram-Dharmaveram line, which is to be constructed by the South Indian Railway. In this figure a very large sum is included for English expenditure (£436,000).

Other new works are: an extension of the Eastern Bengal Railway to Budge-Budge (Rx. 90,000); Barrakar branch (Rx. 110,000); Peshawar Jamrood (Rx. 70,000); and a small provision for ferry arrangements over the Kistna.

Section V.—General Financial Position.

65. Having now explained the Estimates of Revenue and Expenditure for 1889-90, I propose to make a few remarks on the general financial position and the prospects of the future. The special difficulties with which Indian finance has to contend are, War, Famine, the fall in Exchange, and the reduction of the Revenue from Opium. On the question of War I can say little; petty frontier wars are almost certain to occur at intervals, but their cost is not such as to seriously embarrass the finances. I am not aware of any reasons for thinking that War on a large scale is likely to occur in the immediate future, but expenditure must be incurred as an insurance against national danger. The country has happily escaped Famine for a decade, but we have no ground for assuming that the climatic conditions of the Indian continent have changed, and that there will never be drought sufficient to produce famine.

66. **Regarding the future of Exchange, it is impossible to give a confident opinion. Before the year 1873, gold and silver were never used as legal standards without the regulating influence of a system of double legal tender, and there is consequently no experience in the past to which we can appeal in forming our opinion as to the probable course of events in the future.** The sanguine declare the rupee will soon be worth two shillings; the despondent anticipate a further fall of undefined magnitude.

I cannot pretend to arbitrate between these conflicting views. But during the last 15 years the great falls in the value of the rupee have coincided to an extent, which can hardly be the result of accident, with corresponding falls in the gold prices of commodities. If this law should hold good in the future, the gold value of the rupee will not again fall largely and suddenly unless the gold prices of commodities fall.

I will venture to depart so far from the safe attitude of reserve, as to say that, if there is another heavy fall in gold prices, it will probably be accompanied by another heavy fall in the gold price of silver. At present gold prices have ceased to fall, and there is even a slight tendency to a rise.

67. It is needless to say that the question of the future relations between the gold and silver standards is one of great importance for India. The present condition is not one of permanent equilibrium. Either there will be continuous progress in the direction of demonetising silver and substituting gold, or the world will revert to the old system of double legal tender. In the former case our financial difficulties will probably be greater in the future than they have been in the past, and it is impossible to forecast the ultimate result; in the latter case we may have to pass through a severe convulsion caused by foreign nations attempting

to restore the old ratio of 1 to 15½ between gold and silver. If we are unable to join with them in attempting to settle the question by international agreement, we cannot expect them to consider our interests in any course which they may think fit to adopt.

In the interests of India a sudden reversion to the old ratio of 1 to 15½, brought about by the action of foreign countries, and the continuous and progressive demonetisation of silver, accompanied with a fall in the value of the rupee to an unknown and unlimited extent, are alike to be deprecated. Yet if the question is not dealt with by international agreement, we must accept the risks and inconveniences of either the one result or the other, unless we are prepared to choose the heroic and hazardous remedy of adopting a gold standard. Nor is it possible for us to conjecture at what time the action of the United States and the continental nations of Europe may bring on a crisis either of the one kind or the other.

For these reasons it is of paramount importance to India that an attempt to settle the question by international agreement should be made. No other course affords a prospect of a safe solution to be gradually carried out with the minimum of disturbance to existing interests. It is to be hoped that, if any prospect of a settlement appears, India shall not be required to subordinate her interests to the needs, or supposed needs, of countries which may desire to maintain the single gold standard.

68. The future of the Opium revenue is surrounded with almost as much uncertainty as the question of Exchange. There has been, during the current financial year, a considerable rise in the price of the Bengal drug, but that rise appears to have been due, in a very large degree, to poor crops in Malwa and China, and has been accompanied with a large falling off in the exports of Malwa Opium.

Already the price of Bengal Opium has fallen from its highest figure of ₹1,244 a chest in November to ₹1,126 a chest at the sales of the present month.

69. The dangers I have just indicated are of a general nature. We must also anticipate some falling off in revenue in the immediate future from two special causes. As I have explained elsewhere, we expect to receive in the coming year a contribution of Rx. 740,000 from Local Governments. Of this amount Rx. 250,000 is permanent, being made up of Rx. 200,000 from the Patwari cess and about Rx. 50,000 from Lower Burma. The balance of Rx. 490,000 we receive for a single year only, and unless other arrangements can be made, we must be prepared to accept a reduction of Rx. 490,000 in the Estimates of 1890-91. There is also a credit of Rx. 527,300 arising from receipts on account of exchange on the capital transactions of Railway Companies. This credit must soon disappear, with a corresponding reduction in revenue. It may then be said that temporary causes give us an additional revenue of Rx. 1,017,300 in 1889-90, which is not permanent, and which will be largely reduced in future years, and will ultimately disappear altogether.

70. But I should give a very erroneous opinion of our position if I were to dwell only on the difficulties and dangers of the future. There are hopeful as well as discouraging elements, and I may say at once that in my judgment there are no grounds for a despairing or pessimistic view of Indian finance. If we could get rid of the exchange difficulty, I should be prepared to adopt a hopeful view of the future, and if there were in addition no risk of a great war, I should look forward to our progress in coming years with as much confidence as it is ever safe to feel in financial matters.

71. Among the more encouraging features in Indian finance is the elasticity

of the ordinary revenue. It is true that we have not many new sources of revenue open to us, but the receipts from existing sources grow with satisfactory rapidity. The figures which I have given in comparing the Budget Estimates of 1888-89 with the Budget Estimates of 1889-90 have made this point sufficiently clear, and I need not add anything more on the subject.

72. In Upper Burma, too, we appear to have turned the corner and may now look forward to steady reduction of the net charge which that Province imposes on the finances.

The account for Upper Burma stood as follows in the Estimates of 1888-89:—

	Rx.		Rx.
Revenues	547,000	**Civil Expenditure—**	
		Police	732,000
		Other Departments	339,00
		Military Works	190,000
		Civil Works	314,000
		Irrigation	23,000
		Army Special Expenditure	824,000
		TOTAL	2,422,000

The net charge was Rx. 1,875,000.

In the Estimates of 1889-90 the account of Upper Burma stands thus:—

	Rx.		Rx.
Revenues—		Civil Expenditure—	
State Railways	115,000	Police	868,200
Other Revenues	755,200	Other Departments	366,400
		Railways (including Interest on Railway Capital)	192,800
		Military Works	150,000
		Civil Works	298,100
		Irrigation	20,000
		Army Special Expenditure	600,000
	870,200		2,495,300

The net charge is Rx. 1,625,300.

A net improvement of Rx. 249,700 in a single year is an encouraging symptom, especially as there is every ground for supposing that the improvement will continue. The improvement is really greater by Rx. 77,800, as the account now presented includes a net charge of Rx. 77,800 on account of railways, which is not charged in the Estimates of 1888-89, and which we may hope will very soon disappear.

73. It should also be recollected that in recent years we have had to bear the burden of a considerable increase to the Native and European Army. That increase has been completed and its cost provided for, with the exception of the expenditure on the Reserve for the Native Army, which will not be great.

Heavy expenditure has also been incurred on Frontier Railways. The total estimated cost of these Railways is Rx. 13,410,700, of which Rx. 10,083,300 will have been met at the end of this month, and Rx. 1,191,800 is provided for in the Estimates of 1889-90, leaving only Rx. 2,135,600 for future years.

74. We have also been carrying out an extensive scheme of Coast and Frontier Defences, estimated to cost Rx. 5,449,515 (which is charged against Revenue), of which Rx. 1,850,768 will have been expended by the end of this year, and Rx. 1,102,900 is provided for in the Estimates of the coming

year, leaving Rx. 2,495,847 to be incurred in subsequent years. There are also special charges in the Estimates for next year of Rx. 110,000 for the Sikkim and Lushai Expeditions, Rx. 203,500 for thoroughly equipping at least one army corps with transport, and of Rx. 301,800 on account of magazine rifles and 12-pounder breech-loading guns. The former charge will not recur, and though considerable expenditure may be necessary for a time on account of rifles and guns, the charge is not a permanent one.

75. It would be rash to assume that we are able to foresee the end of all special military expenditure. In such matters there is no finality; new dangers may arise involving further preparations and additional expenditure, but the figures I have given are sufficient to show that the sacrifices which the country has been called on to make in recent years have not been in vain; that the original programme of military defences is approaching completion, and that there is at least some prospect of a material alleviation of existing burdens within the next few years.

76. The improvement of means of communication by the opening out of Railways is exercising a marked beneficial influence on the country, and India is entering on what I hope may prove to be but the beginning of a prosperous industrial career. No better example of the change that is taking place can be found than the progress of the cotton-spinning industries.

In 1880-81 there were 13,307 looms and 1,470,830 spindles at work, employing 39,537 people. In 1887-88 there are no less than 18,840 looms and 2,375,739 spindles and 80,515 people at work.

The exports of Indian yarn and cotton cloth were valued at Rx. 1,909,134 in 1880-81. In 1887-88 they came to Rx. 5,227,928, and the returns of the current year show still further progress.

These are results of which India may well be proud; they have been achieved without the fostering aid of Protective Tariffs, or any special assistance from Government, and are due to the patient industry and intelligence of the Indian people, and to the enterprise of her capitalists who have begun to avail themselves of the natural advantages of the country; under these circumstances it may confidently be anticipated that the ground that has been gained will be maintained, and that still greater progress will be made in the future.

Nor does there seem to be any good reason why India should not very shortly undertake the manufacture of iron and steel on a large scale with success.

77. I have tried to state fairly both the probable difficulties of the future, and the reasons that exist for holding that we shall be able to encounter them successfully, and my deliberate conclusion is that while there is every need for economy and for husbanding our revenue, there is no ground for despondent or pessimistic views. Unless some unforeseen disaster occurs, there is every reason to hope that the lapse of two or three years will show a decided improvement in the financial position of the Government of India. It is true that the surplus which we have been able to show in the Estimates of the coming year is little more than nominal, only Rx. 106,300, but the Estimates have been framed with great moderation, and if the Indian revenues continue to exhibit their usual elasticity and no unforeseen disaster occurs, I anticipate that the Financial Statement of 1890-91 will show decided improvement.

Section VI.—Falling off in the Revenue from Salt.

78. As a preliminary step in dealing with the question of the causes of the falling off in the Salt Revenue during the current year, I wish to point

out that the quantity of salt paying duty in any year is not a perfect test of the quantity of salt actually consumed in that year by the people. There is always a large amount of salt in the hands of dealers, and a falling off in any one year in the quantity of salt paying duty may represent a reduction in the quantity of salt in the hands of dealers, and not a reduction in the quantity of salt actually consumed. It would be rash to jump to the conclusion that a reduction in the quantity of salt paying duty necessarily represents an equivalent reduction in the quantity of salt actually consumed.

It will also be convenient to treat Burma separately from the rest of India, as that Province has been subject to special conditions.

The consumption of salt (using consumption in the sense of the quantity on which duty was paid) has been as follows since 1882-83, excluding Burma:—

	Maunds.
1882-83	28,720,000
1883-84	29,338,000
1884-85	31,348,000
1885-86	30,606,000
1886-87	32,200,000
1887-88	31,186,000

In 1884-85 the recorded consumption increased by 2,010,000 maunds, or 6·8 per cent.

In 1885-86 there was a falling-off of 742,000, or nearly 2·4 per cent.

There is no ground for assuming that in 1884-85 there was anything approaching to an increase of 6·8 per cent. in the quantity of salt actually consumed by the population, and there is just as little ground for supposing that in 1885-86 there was a falling-off in the real consumption of 2·4 per cent.

These variations were due entirely, or almost entirely, to trade fluctuations, and the actual consumption of salt in 1884-85 per head of population was probably not, in any considerable degree, higher than in 1883-84, and was not lower in 1885-86 than in 1884-85. I state these figures, in order to show that an increase or decrease in the quantity of salt that pays duty in any one year does not necessarily indicate a corresponding increase or decrease in the quantity actually consumed.

79. Opinions vary as to the effect on the real consumption of a rise of duty. Some authorities hold that it has very little effect; others that it has a considerable effect. Experience seems to show that the truth lies between the two opinions, and that a rise in the rate of duty has an appreciable, but not a very great, effect on the real consumption. But a rise in duty may have a considerable temporary effect on the trade and on the quantity of salt on which duty is paid, especially when rumours prevail that the rise in duty is not likely to be permanent.

80. The raising of the rate of duty in January 1888 was followed by reduced issues, and rumours regarding an impending reduction of the duty have had an unfavourable effect on the trade during 1888-89. In Northern India persistent rumours have prevailed of an impending change, and it was believed that the rise in the rate of exchange which took place in January 1889, would so improve the position of the Government of India as to lead to the reduction of the duty. These rumours have had the effect of checking issues and causing traders to keep their stocks at a minimum. No trader was willing to pay a duty of R2-8 a maund on salt, so long as it was expected that the duty would be shortly reduced.

This state of affairs was accentuated and brought to a crisis by a telegram sent by Reuter's Agency on the 1st of March and published in the Indian newspapers of the following day. The telegram stated that the Secretary of State for India, speaking on 28th February, had said that "he was convinced that the earliest occasion should be taken to abrogate the increase in the salt tax."

The telegram was published on a Saturday. On the following Monday sales of salt in Bombay began to fall off, and by Tuesday they had practically ceased. On that day only one application was received for the removal of 267 maunds of salt. The salt merchants applied to the departmental officials stating that trade was paralysed, and enquiring whether it was true that the duty was to be reduced. On the 5th of March one firm telegraphed direct to the Government of India in the same sense.

On the 9th and 10th of March the Government of Bombay drew attention to the disturbance to the trade, and on the 12th the Accountant General telegraphed that the estimate of salt receipts must be reduced, for that Province alone, by nearly 16 lakhs of rupees, as salt sales had ceased since the 4th of March.

The Commissioner of Northern India Salt Revenue telegraphed on the *evening of 15th as follows* :—

"Trade is disturbed by telegram published locally on second instant. Lord Cross's opinion regarding salt duty understood to mean that reduction is imminent. Collections fell from average ₹55,000 to under ₹1,000 daily from fourth to eleventh. In consequence of the contradiction published on twelfth trade is since recovering. Collections on twelfth were ₹16,000, on thirteenth ₹38,000. Progress is watched."

The recent news is more favourable, as the rumours of an intention to reduce the duty have been contradicted through the agency of the Press. But the magnitude of the effect of these rumours on the Revenue will be understood when I explain that at the end of February the estimate of salt revenue for the current year was Rx. 7,840,700, whereas it is now taken at Rx. 7,676,900, a reduction of more than 16 lakhs of rupees. No doubt, this amount will be to a very great extent recovered, but probably too late to materially affect the revenue of 1888-89.

81. There have been other causes also at work which unfavourably affected the salt revenue. In Calcutta, the trade was greatly disorganised after the increase of the duty, and the price of salt (free of duty) rose from 11·5 annas a maund in December 1887 to 28·3 annas a maund in February 1888, but has since fallen to 14·6 annas a maund in February 1889.

In Madras, where the Government was giving up its monopoly of manufacture, the manufacturers and traders secured something like a monopoly for themselves with the natural result of raising the price to the public. The salt revenue of the year has also been adversely affected by the want of rain and prospects of a bad harvest in certain tracts. I mention these facts not with the view of showing that the increase of the salt duty can have no effect on consumption, because I cannot believe that an increase of 25 per cent. should not have some effect, but in order to make it clear that there is as yet no ground for assuming that the falling-off in the issues of salt, which has occurred, is permanent, and due to the increased cost which the public have to pay for that article. The publication of the present Financial Statement will dissipate the fears of an immediate reduction of the salt duty, and we shall doubtless see an increase of the issues.

82. The following figures giving the total quantity of salt on which duty was paid from the beginning of the financial year to 22nd February for a series of years shows the amount of falling off in the current year (Burma excluded) :—

	Maunds.
1882-83	25,068,000
1883-84	25,832,000
1884-85	27,093,000
1885-86	26,714,000
1886-87	27,603,000
1887-88	27,847,000
1888-89	26,797,000

These figures show distinctly that there had been a considerable falling off before Reuter's telegram was received, but the quantity that paid duty up to 22nd February in the current year is larger than the quantity which paid duty in any year previous to 1886-87 except one, and is 1,729,000 maunds, or 6·9 per cent. in excess of the quantity that paid duty in 1882-83, the first year after the duty was reduced. Even allowing for increase of population, the issues of salt in the current year to 22nd February last are sufficient to provide as large a quantity of salt per head of population as in 1882-83.

83. In Lower Burma there has been a great falling off in the quantity of salt that paid duty in 1888-89, but that falling off is mainly due to the excessive imports of the preceding year.

The following figures show the quantity of salt that paid duty every year up to 22nd February for a series of years :—

	Maunds.
1881-82	973,000
1882-83	972,000
1883-84	1,152,000
1884-85	1,562,000
1885-86	930,000
1886-87	1,160,000
1887-88	1,841,000
1888-89	235,000

The falling off in 1888-89 which seems excessive at first sight, is explained by the great imports of 1887-88, the average for the two years being not much below the normal quantity.

Salt is locally manufactured on the sea coast in Burma, and there is a certain amount produced from brine wells in Upper Burma. The local manufacture is, from the nature of the case, insufficiently supervised, and an experienced officer of the Northern India Salt Department has just been deputed to Burma by the Government of India to enquire into the whole question on the spot. It is said that the increase in the rate of duty on salt interferes to some extent with the local production of *ngapi* and salted fish, and has led to an increased import of salt fish from abroad. The facts are, however, obscure, and a final opinion cannot be formed until the report of the officer specially deputed to Burma has been received.

Section VII.—Excise Policy.

84. I take this opportunity of correcting a misapprehension which has arisen in some quarters regarding the policy of the Government of India in connection with the Excise Revenue. Last year Mr. Westland used the following language in the Legislative Council—

"I look hopefully to a considerable increase in the Excise Revenues, and believe that a great deal might be done in Northern India by the introduction of the methods which, in Bombay and Madras, have so powerfully contributed to the increase of revenue under this head."

With reference to this language it has been alleged that Mr. Westland expressed gratification at the prospect of an increase in drinking among the Indian population on account of the increased revenue which such a change in the habits of the people would produce. I make no insinuation of wilful misrepresentation against those who have brought this charge, nor do I say that they acted otherwise than in good faith, and yet the charge is absolutely without foundation. Mr. Westland used the language which I have quoted in the Legislative Council of the Government of India, and in the presence of the Members of that Council. His remarks passed without challenge. Is it conceivable that if he had meant, or been understood to

mean, that the people of India should be encouraged to drink in order that the revenues of the Government of India might grow, there would have been found not a single Member of that Council, official or non-official, to protest against the adoption of such a policy?

85. Less than two months afterwards the Financial Statement for 1888-89 was published under Mr. Westland's signature, and in that statement he used language which puts his meaning beyond the reach of cavil. The words he used were as follows:—

"As regards Excise it will be seen that it is in Madras and Bombay that the revenue administration has been most successful, as these two provinces with 31 and 16½ millions of inhabitants respectively produce a revenue nearly as large as that of Bengal with 69 millions. In fact, in both these Provinces, a very remarkable progress has been made. The whole system of distillation has been brought more thoroughly under control, and stricter and more methodical preventive measures have enabled the Government to greatly enhance the rate of duty: for the question of the rate of duty which it is possible to levy, is simply the question of the prevention of illicit distillation."

Mr. Westland's expectation was that by the prevention of illicit dealings, it would be possible to raise a larger revenue, the increase of revenue being accompanied not by an increase of, but by a check on, drinking. To show that there really was, and is, extensive smuggling in Northern India, I will quote a passage from the report of the Financial Commissioner of the Punjab, who is now the Lieutenant-Governor of that Province, for the year 1881-82:—

"Mr. Hawkins, the Deputy Commissioner of Amritsar, says—'There were twelve cases of illicit distillation. It is notorious that there are few villages in this district which have no private stills of their own. The police are constantly finding pieces of stills and jars of materials in deserted houses while searching for other property.' The Lahore District has also a bad reputation in this respect. The Deputy Commissioner of Jullunder, Mr. Bullock, writes—'Illicit distillation is of very general occurrence throughout the district. Twenty-four cases have been detected, and it is to be hoped that some check will be found to have been given to the system, which, however, we can never expect wholly to extirpate.'

"In Hoshiarpur the khansama of a dâk Bungalow was found to possess a still, and there were three cases in which villagers were convicted of the same offence. Sirdar Gurdayal Singh, the Assistant Commissioner in charge of Excise, says that illicit distillation is carried on in some villages of the Gurshankar Tahsil. He adds—'These cases of illicit distillation it is very difficult to detect and to prove. Generally they distil during the night and keep good watch all round. In one village, it is said, they distil the wine on the banks of the Bein stream, and whenever their sentinels espy any stranger approaching the place, they throw down all the materials, &c., into the stream, and leave no trace behind. But it prevails only in villages where the inhabitants are united and have confidence in each other.'

"The Deputy Commissioner of Jhang, Mr. Macauliffe, strongly suspected the existence of the practice among powerful zemindars living in remote jungle villages. Whenever liquor shops in Native States are situated close to our border, it is a common practice for our villagers to resort to them, and they often bring back small quantities of spirits for their own use and that of their friends. Even when the Sadr distillery system has been adopted at the request of our Government in independent States, the price of liquor is far less than in our own territory. This must be due to lower rates of still-head duty. The Assistant Commissioner in charge of excise at Sirsa, Mr. Kennedy, says—'In Patiala spirits are sold at about eight annas a bottle, not differing much in quality from the Sirsa spirits at Rı-8 a bottle. The only hope of grappling with the existing evil is to lower the price of Sirsa spirits so as to bring them into competition with the Patiala spirits. Any other method is impracticable. The Sikh Jats will drink; and we cannot wean them from the practice by making the cost of liquor high; the only effect of this is to demoralize them by leading to a continual evasion of the law without any corresponding benefit in increased sobriety.'

"There is probably some exaggeration here. Mr. Lyall is inclined to believe that the dearness of lawfully-distilled liquor had led to a decrease in drinking among the Sikh population, but to an increased use of opium and perhaps also of bhang."

The Lieutenant-Governor, before whom this Report was placed, was Sir Charles Aitchison, who throughout his whole service had striven to reduce the consumption of liquor and drugs, and the following passage will show the views which he then entertained:—

"In paragraph 15 of the Report, the Financial Commissioner has dwelt on the loss caused to the Excise revenue by illicit distillation and by the smuggling of country spirits into British districts from Native States. It is no doubt difficult, if not impossible, entirely to put an end to the latter practice, though the chief Native States of the Province have, at the request of the Punjab Government, accepted the system of Sadr distilleries to the restriction, it is believed, of smuggling, at least in some degree. But as regards the former evil, His Honour cannot consider it creditable to the magistracy of the Province that the unlawful manufacture of spirits should prevail unchecked and unpunished to the extent alleged."

86. The state of things which these extracts show to have existed in the Punjab in 1881-82 is the state of things which has continued to exist up to the present time.

In May 1887 the following opinion was expressed by a Punjab officer:—

"The Excise Department in this Province has never been properly supervised and controlled, for the simple reason that the Department has never had a responsible head, and has been left to take care of itself with such perfunctory attention as district officers have been able to pay to it. I can speak on this point from twenty-four years of district experience in various parts of the Province. The extent to which country spirit is illicitly manufactured and sold is enormous, and the quantity so disposed of is in my opinion as large as that which is lawfully sold; and the Excise revenue is therefore much smaller than it would be if the Department were carefully controlled."

It is right that I should mention that the Financial Commissioner did not accept these remarks in their entirety. He remarked that the "description of Excise management in the Punjab must, in the absence of specific evidence, be regarded as exaggerated," but no authority, so far as I am aware, has ever denied that there was, and is, a very great amount of smuggling and of illicit distillation in that Province.

87. I have now shown that when Mr. Westland, speaking on behalf of the Government of India, anticipated an increase of Excise revenue in Northern India, he based his expectation of an increase not on the possibility of being able to increase the consumption of liquor and drugs, but on the prospect of being able to increase the revenue by means of a stricter control and the suppression of illicit practices. I shall show by one or two instances that the policy which Mr. Westland favoured had already proved a marked success in other Provinces, both in respect of checking consumption and increasing the revenue.

From 1st October 1884 a new system of Excise Administration was introduced into a portion of the Madras Presidency. The change in system resulted in a rise in the price of country liquor, varying from 8 annas to one rupee per gallon.

For five years the consumption of spirits and the revenue in the districts where the manufacture is centralised in large distilleries were as follows:—

	Consumption in gallons reduced to 30° under proof.	Revenue. Rx.
1883-84	1,204,241	280,977
1884-85	Year of transition.	
1885-86	1,014,566	347,526
1886-87	1,084,474	380,213
1887-88	1,270,146	415,319

The average annual consumption of the three years of the new system is less than the consumption of the last year of the old system by more than 6 per cent., while simultaneously the average annual revenue increased by more than 35 per cent. These figures show conclusively that a large increase of Excise revenue is not necessarily attended with an increase of consumption, and may coincide with a positive decrease.

88. A still more remarkable illustration of the possibility of increasing the Excise revenue while diminishing the consumption is afforded by the statistics of the consumption of ganja in Bengal. Ganja is probably the most pernicious of all drugs in common use, and the Government has never felt any hesitation in increasing the rate of duty leviable on it.

The following statement shows the number of shops licensed for the sale of ganja, the quantity of ganja consumed, the total revenue, and the incidence of taxation per seer for every year from 1868-69 to 1887-88 :—

	No. of shops.	Consumption.	Total Revenue.	Taxation per seer.
		Mds.	Rx.	R
1868-69	4,073	8,442	89,524	2·6
1869-70	4,437	8,667	92,521	2·6
1870-71	4,749	9,682	103,251	2·6
1871-72	4,934	9,972	106,275	2·6
1872-73	4,694	8,593	110,028	3·2
1873-74	4,398	8,125	107,785	3·3
1874-75	4,394	7,830	105,818	3·3
1875-76	3,340	7,389	112,035	3·7
1876-77	3,130	7,458	119,711	4·0
1877-78	3,247	8,197	138,566	4·2
1878-79	3,244	5,460	134,555	6·1
1879-80	3,210	5,137	129,016	6·2
1880-81	3,411	5,600	145,467	6·4
1881-82	3 488	6,431	171,379	6·6
1882-83	3,271	5,646	186,050	8·2
1883-84	3,298	5,881	197,371	8·3
1884-85	3,196	5,798	198,760	9·0
1885-86	3,033	5,717	194,662	8·5
1886-87	3,046	6,264	207,567	8·2
1887-88	2,949	6,550	224,497	8·5

Notwithstanding the large increase of population which must have taken place between 1868-69 and 1887-88, the number of shops for the sale of ganja has decreased by more than 27 per cent., and the consumption by more than 22 per cent., while simultaneously the revenue has increased by more than 150 per cent., and the incidence of taxation per seer has increased by more than 226 per cent. These figures may be left to speak for themselves. The reduction during the same period in the number of shops for the sale of opium and in the quantity of opium consumed is even more remarkable than in the case of ganja, but there has not been the same increase of revenue, mainly, I believe, because opium smuggling prevails extensively.

89. In mentioning this subject my object has been to defend my predecessor against the charge which has been brought against him, and indirectly against the Government of India, of encouraging intemperance for the sake of revenue, and it must not be supposed that I have been dealing with the whole Excise system of India, or that I intend to assert that that administration has been as successful in every instance as in the cases which I have quoted.

Section VIII.—Ways and Means—Home Treasury.

90. The Secretary of State's Revised and Budget Estimates of the transactions at the Home Treasury for 1888-89 compare as follows :—

	Budget.	Revised.
Net Receipts.	£	£
Council Bills	14,000,000	14,310,100
Receipts from Railway Companies for Capital expenditure	5,667,800	2,545,100
Deposits and Advances	4,500	800
Permanent Debt—India 3½ per cent. stock issued for the discharge of a like amount of 4 per cent. stock	...	4,030,700
3 per cent. stock issued for purchase of the Oudh and Rohilkhand Railway and the discharge of its debentures as they fell due	...	6,921,000
Debentures and Debenture stock taken over by the Secretary of State	...	3,415,000
Add Opening Balance	5,614,329	5,900,697
TOTAL	25,286,629	37,123,397
Net Outgoings.		
Excess of expenditure over Revenue	15,028,700	14,714,300
Capital expenditure of Government in England	973,000	792,200
Issues to Railway Companies for expenditure	5,915,300	2,550,000
Capital charge involved in redemption of liabilities Purchase of the Oudh and Rohilkhand Railway	...	10,336,000
Permanent Debt—Discharge of 4 per cent. stock	...	3,730,700
On account of Remittances from India	1,091,200	1,150,400
Add Closing Balance	2,278,429	3,849,797
TOTAL	25,286,629	37,123,397

The most important variations from the Budget Estimate have occurred in the transactions connected with the discharge of the 4 per cent. stock remaining unconverted in October 1888 and the purchase of the Oudh and Rohilkhand Railway. These are explained below.

CONVERSION OF 4 PER CENT. INTO 3½ PER CENT. STOCK.

91. It was explained in the last Financial Statement that the terms offered by the Secretary of State for conversion of the 4 per cent. into 3½ per cent. stock were accepted by a majority of the holders. Out of a total 4 per cent. stock of £53,261,820, only £4,030,700 remained to be paid off in October 1888. For the discharge of this sum, 3½ per cent. stock for an equal amount was issued at par, but it is believed that the whole of the outstanding stock will not be presented for payment during the current year, and that £300,000 will remain unclaimed until 1889-90. No entries were made in the Budget Estimates of the current year on account of these transactions, as it could not be foreseen how much of the stock would remain unconverted.

PURCHASE OF THE OUDH AND ROHILKHAND RAILWAY.

92. No provision was made in the Budget Estimate on account of the purchase of the Oudh and Rohilkhand Railway, as the nature of the offer to be made to the Company had not been determined at the time. The terms upon which the purchase has been made are, briefly, that the Company has been paid £125-18s.-0½d. for every £100 of its share capital, and that out of a total amount of £5,300,000

of debentures and debenture stock issued by the Company, debentures for £1,885,000, which fell due during the current year, have been discharged by the Secretary of State, and the liability for debentures and debenture stock for £3,415,000 has been accepted by him. The total amount required for the purchase of the Railway and the discharge of the debentures was £6,921,000, which was raised by the Secretary of State by the issue of £7,206,531 of 3 per cent. stock.

AIDED RAILWAY COMPANIES.

93. The variations in the transactions of the Railway Companies will appear from the following figures:—

Receipts from	Budget.	Revised.
STATE—		
On account of subscribed capital—	£	£
Bengal-Nagpur Railway	1,032.700	513,500
Indian Midland Railway	1,121,100	2,022,800
Southern Mahratta Railway	500,000	...
Miscellaneous Receipts	...	3,100
GUARANTEED—		
For discharge of debentures—		
Great Indian Peninsula Railway	1,069,000	...
Madras Railway	60,000	...
Oudh and Rohilkhand Railway	1,885,000	...
Miscellaneous Receipts	...	5,700
TOTAL	5,667,800	2,545,100

Issues to		
STATE—		
On account of stores, establishment charges, &c.—		
Bengal-Nagpur Railway	871,000	892,900
Bengal Central Railway	2,000	2,000
Indian Midland Railway	635,000	421,000
Southern Mahratta Railway	241,000	214,600
GUARANTEED—		
For discharge of debentures—		
Great Indian Peninsula Railway	1,069,000	200
Madras Railway	60,000	...
Oudh and Rohilkhand Railway	1,885,000	...
On account of stores, &c.	1,152,300	1,019,300
	5,915 300	2,550,000

In the Budget Estimate it was anticipated that the debentures of the Oudh and Rohilkhand, Great Indian Peninsula and Madras Railway Companies falling due in the current year would be discharged by the Companies by raising fresh capital. In the case of the Great Indian Peninsula and Madras Railway Companies the debentures were, however, renewed, and the Oudh and Rohilkhand Railway debentures were, as mentioned above, discharged by the Secretary of State by the issue of India 3 per cent. stock. The additional capital expected to be raised by the Indian Midland Railway Company is mainly owing to the transfer to the Company of the Sindia Railway, as the Company has to repay the Government the capital cost of the line.

94. The following is the Secretary of State's Budget Estimate of Ways and Means for 1889-90, made up in the same form as above:—

Net Receipts.	£
Council Bills	14,689,900
Permanent Debt for Advances to Companies	3,750,000
Receipts from Railway Companies	515,000
Add Opening Balance	3,849,797
TOTAL	22,804,697

Net Outgoings.	
Excess of expenditure over Revenue	14,956,100
Capital expenditure of Government in England	1,273,000
Permanent Debt—Discharge of 4 per cent. stock	300,000
Issues to Railway Companies for expenditure	3,056,700
Deposits and Advances	2,700
On account of Remittances from India	1,069,500
Add Closing Balance	2,146,697
TOTAL	22,804,697

95. By the Oudh and Rohilkhand Railway Purchase Act, the Secretary of State has been authorised to raise in London, in addition to the amount required for the purchase ot the Oudh and Rohilkhand Railway, further amounts up to a limit of £10,000,000 for the purpose of advancing funds to Railway Companies, when it may seem more economical to do so than to authorise them to raise debenture capital under his guarantee. The exercise of this power forms the most important feature of the Secretary of State's Ways and Means Estimates of next year. The total capital required to meet outlay in England and India by the Aided Railway Companies will be £3,750,000 in addition to the balances at their credit, and the whole of this will be raised by the Secretary of State by a sterling loan. The Secretary of State also proposes to draw £14,689,900 of Council Bills during the year. It should be fully understood that, in stating these as the present intentions of the Secretary of State, no sort of pledge is given that he will adhere to the programme thus explained, and he will be absolutely at liberty to raise the money by bills or by loans from time to time as he deems expedient.

Section IX.—Ways and Means—India, 1888-89.

96. The following figures compare the Budget Estimate of Ways and Means of 1888-89 with the Revised Estimates:—

NET RECEIPTS.	Budget.	Revised.
	Rx.	Rx.
1. Excess of Revenue in India over the Expenditure charged against it	20,642,800	21,354,600
2. Public Loan	3,000,000	2,777,500
3. Increase of Unfunded Debt—mostly Savings Bank Deposits	845,300	1,043,700
4. *For Remittance to Secretary of State*	1,020,700	1,142,200
Add Opening Balance	13,733,100	13,883,701
	39,241,900	40,201,701

	Budget.	Revised.
NET OUTGOINGS.		
5. Expenditure charged to Provincial Balances . .	483,600	—203,100
6. Capital Expenditure of Government in India .	2,662,800	697,200
7. Loans to Municipalities, &c. (chiefly the Calcutta and Bombay Dock Loans)	486,800	510,900
8. Other items (*a*)	472,500	811,900
9. *Issues on Capital Account to Railway Companies, against receipts in England* . . .	2,895,900	3,345,800
10. Council Bills. *Sterling Account* . . .	14,548,500	15,119,900
11. Do. Exchange	6,110,400	7,019,100
Add Closing Balance . . .	11,581,400	12,900,001
	39,241,900	40,201,701

The transactions recorded in italics are connected with, and explained by, the corresponding figures of the Secretary of State's account in England. The others are purely Indian transactions.

(*a*) The explanation of this is omitted, as it would be of a highly technical character. It arises to a very large extent out of the exchange entries that are necessary in charging off exchange upon the English expenditure and in connection with Railway Companies and other Remittance accounts.

RUPEE LOAN OF 1888-89.

97. By Notification No. 2952, published in the *Gazette of India, Extraordinary*, of 2nd June 1888, tenders were invited for a Public Loan of Rx. 3,000,000, the notes issued for this amount to form part of the 4 per cent. Loan of 1865. Tenders were received up to the 3rd July following, on which date they were opened simultaneously at Calcutta, Madras, and Bombay. The total amount tendered was Rx. 7,705,680, and the result was as follows:—

	Rx.
Accepted at minimum rate, *viz.*, R99-11 (60·45 per cent.) .	493,150
Above that rate	2,506,850
TOTAL .	3,000,000

The actual amount realised was Rx. 2,993,650, or an average rate of R99-12-7 per 100 Rupees.

The permission to tender at Madras was an innovation intended to satisfy a local demand, and was made use of to some extent; the aggregate value of the tenders at Madras was Rx. 686,000, of which Rx. 82,550 were accepted.

The account in paragraph 96 shows a net receipt on account of Public Loan of Rx. 2,777,500 and not of Rx. 3,000,000. It will be understood that the difference of Rx. 222,500 represents the reduction of debt during the year, in connection with the conversion of the 4½ per cent. Loan of 1870, and payment of Stock Notes and other loans under discharge.

CONVERSION OF 4½ PER CENT. LOAN OF 1870.

98. The 4½ per cent. Loan of 1870 matured on the 15th July 1885, and as 4 per cent. paper was above par in July last, it was determined to convert the Loan into one bearing interest at 4 per cent., and to pay off all Notes which were not converted. It was accordingly notified on the 27th July 1888 that all Notes or Stock Certificates of this Loan would be paid off on the 27th October 1888, on which date the interest on them was to cease. But proprietors of such Notes or Stock Certificates were allowed the option, which had to be exercised

before 1st September 1888, of transferring their holdings into the 4 per cent. Transfer Loan of 1865. The terms offered were as follows:—

I.—Payment of Interest at 4½ per cent. to 31st October 1888 inclusive.

II.—Issue of Notes of 4 per cent. loan of 1865, bearing interest from 1st November 1888.

III.—A further payment of two annas per R100 in India and of two pence per R100 in England as brokerage or commission to the persons presenting the Notes for transfer.

These terms were very generally accepted. Rx. 1,490,000 out of Rx. 1,787,540 were at once transferred into the 4 per cent. Loan of 1865 and less than Rx. 200,000 have been demanded in cash.

99. In order to distribute the payments for interest more evenly over the year, it was decided in December last to allow transfers from other 4 per cent. Loans to the Loan of 1854-55, of which the dates for payment of interest are 1st January and 1st July. It is expected that this will prove convenient both to the Public Debt Office and to the holders of Stock.

STOCK NOTES.

100. With the object of affording greater facilities to the public for the investment of small sums at interest, securities termed Stock Notes were issued in 1882 as an experimental measure.

These notes were of four denominations, namely, R12½, R25, R50, and R100 respectively. They were issued at par and bore interest at 4 per cent. payable yearly, but were not enfaceable to Europe. After six years' experience it was found that the public would not adopt these securities as a regular form of investment, and it was decided to discontinue their further sale and to withdraw, as far as possible, those in circulation, amounting to Rx. 162,350, by substituting for them Government Promissory Notes of the 4 per cent. Loan of 1842-43. Accordingly in August last, orders were issued, authorizing (1) the payment in cash at par at any Treasury in India of Stock Notes of less value than R100, and (2) the conversion into Government Promissory Notes of the 4 per cent. Loan of 1842-43 of any amount of Stock Notes tendered in even hundreds of rupees, at a premium of eight annas per cent. (altered to par from 24th January last).

The following amounts of Stock Notes were reported as discharged up to the end of February last, namely:—

	R
Tendered for conversion	10,68,000
Paid off in cash	3,31,686-8
TOTAL .	13,99,686-8

leaving R2,23,813-8 as the balance outstanding on the 1st March 1889.

INDIAN SAVINGS BANKS.

101. There are two classes of Savings Banks, namely, (*a*) the Presidency and Post Office Banks, which are open to the public, and (*b*) Banks established for the benefit of servants of Government, such as the Railway and Civil Engineers' Provident Institutions and the Regimental Savings Banks.

In class (*a*) there were, on the 31st of March 1888, 300,560 depositors, with an aggregate balance of Rx. 6,217,700 at their credit; and in class (*b*) 31,616 depositors with Rx. 457,800; making a total of 332,176 depositors, to whom Rx. 6,675,500 were due. Of this amount more than Rx. 5,100,000 had been

received from Natives, and the balance from Europeans and Eurasians. In the previous year there were 289,277 depositors in all, with Rx. 5,795,200 at their credit. There was therefore an increase in 1887-88 of 42,899 in the number of depositors and of Rx. 880,300 in the amount deposited in excess of withdrawals. Moreover, in all Banks, except the Military ones, the average balance at credit of each depositor was considerably larger than in 1886-87.

The interest paid to depositors in 1887-88 was Rx. 224,049, and only Rx. 196,910 in the previous year.

It is no doubt very satisfactory to be able to point to such evidence of the growing popularity of these Banks. But as facilities for persons residing in the interior of districts for investing money in Government securities have of late years been considerably extended, and as Savings Bank Depositors are allowed to purchase and sell these securities through Post Office Banks, and also to deposit them for safe custody, it seemed unnecessary and, for some reasons, it was certainly undesirable, to maintain the existing high limits for deposits. Accordingly, on the 19th January 1889, orders were issued directing that, with effect from 1st April next, the yearly limits of deposits should be reduced from ₹500 to ₹200, and the maximum limit for each account from ₹3,000 to ₹2,000. It has been estimated that the effect of these orders will be to make the net addition to our cash balances in 1889-90 on this account only Rx. 564,500, the corresponding figures in 1887-88 and 1888-89 (Revised Estimate) being Rx. 830,300 and Rx. 981,300.

Capital Expenditure of Government in India.

102. The reduction in the Estimate from Rx. 2,662,800 to Rx. 697,200 is the result, as explained in paragraph 36, of the credits afforded (*a*) by the transfer of the cost of the Sindhia Railway to the Capital Account of the Indian Midland Railway (Rx. 921,000), (*b*) by transfer of the cost of the Katni-Umaria Railway to the Capital Account of the Bengal-Nagpur Railway (Rx. 485,700), (*c*) to a provision of Rx. 200,000 for taking over metre gauge stock from the Bengal-Nagpur Railway, not having been required as part of the stock has not yet been valued, and the Southern Mahratta Company took over the rest, and (*d*) to various lapses.

Calcutta and Bombay Dock Loans.

103. In the last Financial Statement it was explained for what reasons and under what conditions the Government undertook to raise and advance, to the Port Trustees of Calcutta and Bombay, funds for the construction of the Kidderpore Docks, and for the extension of Prince's Dock.

The advances made on this account by the Government to the Port Trustees of Calcutta and Bombay have been as follows :—

Advances.	Calcutta. Rx.	Bombay. Rx.
Up to the end of 1887-88	860,700	768,400
In 1888-89 (*a*)	496,800	80,000
TOTAL .	1,357,500	848,400

In 1889-90 the Trustees will, it is estimated, require funds to the following extent :—

Calcutta. Rx.	Bombay. Rx.
549,000	35,000

(*a*) Partly estimate.

Interest is payable on all these sums half-yearly, on the 1st May and 1st November of each year, at the rate at which Government borrows money in India in the year in which the advances are made; and the repayment of the principal is secured by a sinking fund of one per cent.

The further amount which the Government will have to advance on these accounts after 1889-90 is estimated at Rx. 426,100.

Issues on Capital Account to Railway Companies.

104. The increase from Rx. 2,895,900 to Rx. 3,345,800 is the net result of over-estimates by the Companies, and of the transfer, as explained above, of the cost of the Sindhia Railway to the Capital Account of the Indian Midland Railway and of the Katni-Umaria Railway to that of the Bengal-Nagpur Railwa.

Management of Government Balances.

105. The present year has seen a great scarcity of money in the Indian markets, which has kept the Bank rate at 12 per cent. for a considerable period, and, as usually happens in such cases in this country, the question has been raised whether Government might not in some way come to the assistance of trade.

The scarcity is no doubt owing in part to an early cotton season in Bombay coinciding with a demand for rice in Burma, and other customary requirements at this season; but the root of the difficulty appears to be the doubtful position of silver. But for this, it seems inexplicable that for week after week there should be a difference of 9 per cent. in the rate of money in London and India, and yet that in some weeks the whole amount of bills and transfers offered by the Secretary of State should not be taken up.

106. That so high a rate of interest is prejudicial to trade is obvious, and Government has not been unmindful of the fact. The best way in which Government can assist trade is by providing that the Secretary of State's drawings shall never be curtailed for lack of money to meet them, and in one week demands for bills and telegraph transfers exceeded 77 lakhs. Arrangements are also made to grant telegraph transfers freely at a small charge between the three Presidency towns, and Government, besides keeping up the normal current balances, has further been able to offer to the Presidency Banks at Calcutta and Bombay temporary loans at their own minimum rate of interest if they cared to avail themselves of the offer.

107. As the Treasury balances are nearly two crores below last year, and in fact lower than they have been for twenty years at this season, all this would scarcely have been possible without the assistance derived from what are called "currency transfers," a system which, while preserving the Reserve of the Paper Currency Department intact for the payment of the currency notes, yet gives the advantage of a large balance that can be made available without the delay of actual remittance, wherever it may be wanted. Thus in the present month the accruing revenue of the opium districts has been allowed to remain in those districts in the charge of a currency agency, an equivalent being immediately released to the Treasury in Calcutta; a fortnight hence this money will be wanted for payments to opium cultivators in the districts, but by that time the Land Revenue from Eastern Bengal will have been received, and being in like manner made over to the Currency Department will liberate the coin where it is wanted.

108. The charge that Government does not do all it might to assist trade, sometimes takes the form of an assertion that the currency balances

should be lent out in a time of pressure. This is of course impossible, as the currency balances are pledged by law to secure the convertibility of the currency notes, and can no more be lent to the market than can the gold in the Issue Department of the Bank of England.

109. Another contention is, that the cash balance of the Government of India is too high. Now the question whether the Government cash balance is too high or too low, is one that must be determined by the experience of those who actually deal with that balance, and are responsible for seeing that there is sufficient money in the treasury to meet all the claims against Government.

I do not think I exaggerate when I say that every person who has experience of the actual work of dealing with the balances in this country is in favour of rather a high cash balance. The question has been frequently considered both in India and in England, and though a cash balance of 10 to 13 crores may seem enormous, yet if we reflect on the special difficulties in the way of suddenly obtaining a large amount of cash in this country, on the sudden and large demands to which Government is exposed, and on the enormous extent of country over which the balance has to be spread, it will easily be recognised that the mere fact of the cash balance being large is no proof that it is larger than is required by the wants of the case.

Some authorities hold that, if anything, the Indian cash balance has been kept somewhat too low in recent years. In that opinion I am inclined to concur. The cash balance of recent years has been low, because the claims against the Government were heavy owing to expenditure of all kinds, and it was thought desirable to avoid borrowing more than was absolutely necessary.

110. I have mentioned the allegations (1), that Government ought to lend out the currency balance, and (2), that Government keeps too high a cash balance, simply in order to clear the ground. There is no force in them, and they could only be made by persons ignorant of the facts of the case. I now come to what is the real question, namely, the expediency of the maintenance of the Reserve Treasuries in the Presidency Towns. Should the Government keep the whole of its spare cash in the Presidency Banks, or should it aim at keeping balances of tolerably constant amounts in those Banks, the surplus being kept in the Reserve Treasuries? This is a question which deserves consideration, and on which there may reasonably be a difference of opinion, though I can hold out no hope of any change in the policy of Government in this respect.

The justification for the existence of the Reserve Treasuries is to be found in the special conditions affecting the Indian money market. These special conditions are the liability of that market to extreme pressure at times, the difficulty in adding temporarily to the amount of cash by drawing on other markets, and the magnitude of the cash transactions of the Government as compared with those of the trade. Under the circumstances I have just stated, and looking to the fact that the Government in case of war, famine, or other unexpected cause, is exposed to the risk of having to meet sudden and large demands on it for cash, it was decided by Lord Northbrook's Government that it would be to the interest both of the commercial public and the Government of India that the surplus cash, for the time being, of the Government of India in excess of certain regulated balances in the Presidency Banks and the cash in Mofussil Treasuries, should be kept in Reserve Treasuries.

It was held that, if the whole of the surplus cash was kept in the Presidency Banks, trade would rely on the permanence of the resources thus supplied to it, and that, in case of a sudden demand for cash, the Government of India would either be forced to abandon its right to reduce its balance in the Presidency Banks, or risk producing a financial crisis by suddenly and largely reducing the resources of these Banks.

To show that this is not an imaginary fear, I will quote a telegram received in 1874 from the Government of Bombay:—

"Clear the line. You are placing the exchange banks and trade of Bombay in great danger. The eight Exchange Banks are indebted to the Bank of Bombay 68 lakhs of rupees, half payable on demand, secured by Government paper, and remainder in February. Their balances for current purposes in the Bank of Bombay are under 20 lakhs of rupees; balance of other customers of Bank of Bombay exceedingly low. Bank of Bombay has to meet Council Bills for 25 lakhs of rupees arrived from England this morning, and similar Bills for 20 lakhs of rupees will shortly arrive. Bills on Calcutta absolutely unsaleable. If you draw more on Bank of Bombay, they must call in the sums due from the Exchange Banks, and there will be a general panic and serious danger of stoppages."

There was at that time a Government balance of about 100 lakhs in the Bank of Bombay, and the proposed withdrawal, which called forth this startling protest from the Governor of that Province, only came to 35 lakhs. I do not think a stronger argument could be produced to show the dangers that might arise if the Government of India reverted to the old system of keeping all its spare cash in the Presidency Banks. The arguments which weighed with the Government of India in introducing the system of Reserve Treasuries are contained in a Despatch to the Secretary of State, No. 256, dated 30th June 1874; it has been printed in the Appendix to this Statement. It will show that the policy of the establishment of Reserve Treasuries was adopted deliberately and in order to meet real difficulties.

111. It has been urged that Government could relieve the market by lending out the balance of the Reserve Treasuries on favourable terms to the Banks; but if this course were followed the same difficulties that arose when the Presidency Banks held the whole of the surplus balances would again occur. Trade would become accustomed to rely on the resources furnished by the Government, and at a time of pressure the withholding of the assistance usually given by Government might have a very serious effect.

Section X.—Ways and Means—India, 1889-90.

112. The Ways and Means Estimate of India, made up in the same form as in paragraph 96, is as follows:—

NET RECEIPTS.	Rx.
1. Excess of Revenue in India over the Expenditure charged against it	22,016,900
2. Public Loan	2,500,000
3. Increase of Unfunded Debt—mostly Savings Bank Deposits	629,700
4. *For Remittance to Secretary of State*	1,112,300
Add Opening Balance	12,900,001
	39,158,901

NET OUTGOINGS.	Rx.
5. Expenditure charged to Provincial Balances	640,800
6. Capital Expenditure of Government in India	2,224,600
7. Loans to Municipalities, &c.	827,700
8. Other items	170,400
9. *Issues on Capital Account to Railway Companies against receipts in England*	1,221,400
10. Council Bills. *Sterling Account*	14,690,900
11. Do. Exchange	6,829,800
Add Closing Balance	12,553,301
	39,158,901

Proposed Rupee Loan.

113. It is estimated that a loan of Rx. 2,500,000 will be required during the year, but no pledge can be given either as to the amount of the loan or the time when it will be issued, or the conditions which will attach to it. According to the estimates, a loan of Rx. 2,500,000 will give an ample cash balance, and if matters turn out favourably, it may not be necessary to borrow so much. We expect, with this assistance, to close 1889-90 with a cash balance of Rx. 12,553,301.

Loans to Municipalities, &c.

114. Before 18 8-89 all loans and advances of public money were treated as advances on Imperial account. The loans were made on the advice and through the agency of Local Governments, and Local Governments were so far responsible that irrecoverable sums were charged off as Provincial Expenditure. But they had no concern with the punctual and complete realisation of the interest due on these advances, which was credited as an asset of Imperial Revenue. At the instance of the Secretary of State the arrangements were re-considered, and the occasion was thought appropriate for extending the principle of decentralisation beyond the limits of the Revenue account. The interest received on these loans is almost always higher than that paid by Government on its public loans, and by surrendering this advantage it was obvious that an inducement might be offered to Local Governments to undertake complete responsibility for the administration of this department of finance. This responsibility was accepted in every case, the necessary arrangements were completed last year, and orders were published in the *Gazette of India* of 5th January 1889.

115. In connection with this subject the question of lending from public funds to Municipalities and other public bodies was considered. It was believed from the Secretary of State's observations in a despatch of September 1887, that, under the arrangements described above, sanction might be given to a relaxation of the restrictive policy which has been followed in this matter since 1876.

116. Experience has shewn that the rigid refusal to lend money to small Municipalities and Local Boards has operated unfavourably in delaying and preventing sanitary improvement and reform. It has been found that such bodies cannot raise money in the market, except at high rates of interest; and Municipalities have in several cases found it necessary in consequence to abandon, or indefinitely postpone, well-considered schemes of drainage and water-supply. The Government of India accepted the Secretary of State's invitation to review the question, and the Secretary of State has, in consideration of the fact that, under the scheme described above, Provincial responsibility will be enforced, withdrawn the prohibition.

117. It is not proposed at present to adopt the policy of lending to the Presidency Corporations, as they have a public credit of their own and can borrow, in ordinary cases, in the open market, while the claims on the Government of India are so great that it cannot without difficulty find the necessary funds. But in pursuance of the principles enunciated above, Local Governments have been authorised to grant loans to Mofussil Municipalities in future, on the following conditions:—

(1) Loans may be granted only for works of public and general convenience and utility, such as drainage and water-works, bridges and the like; and not for works which are merely or mainly ornamental or convenient, such as town halls, public gardens or market places.

(2) A local body, having borrowed from Government, may not borrow from any other source until it has obtained the sanction of the Local Government concerned, which should not be given until it is clearly shown that the sum lent by Government, with interest thereon, is duly secured.

118. I have stated that the rules regulating the new scheme were published in the *Gazette of India* on 5th January. The demands of Local Governments have since been received. These demands, so far as they relate to advances to cultivators, to embarrassed landed proprietors, and for drainage embankments and the like, have no special interest, as the only change in respect of them is the transfer of administration and responsibility. As regards loans to Mofussil Municipalities, the importance attached to the change of policy will be understood when it is stated that, notwithstanding the short notice given, the applications for loans for Municipal sanitary purposes amount to Rx. 254,900, which sum it has been found possible to place at the disposal of Local Governments. The projects comprise schemes of water-supply for Allahabad, Agra, Nagpore, Delhi, and Peshawar. Although an important step has now been taken towards facilitating the carrying out of Local Works and Improvements, the large claims on the resources of the Government of India on account of Railway and Irrigation Works will prevent, for the present, any very important extension of the system.

Section XI.—Summary.

119. The principal features of this Statement are summarised as follows:—

(*a*) The Accounts of 1887-88 have closed with a deficit of Rx. 2,028,832, including as expenditure Rx. 455,017 on account of Special Defence Works. Excluding the cost of these works, the deficit was Rx. 1,572,815. This has resulted mainly from a special charge of Rx. 1,059,000 incurred in connection with the conversion of the 4 per cent. Sterling Stock into 3½ per cent., from heavy military expenditure in Burma, from a fall in exchange, and in the price of opium, and from a reduction in Railway Revenue, counter-balanced by an improvement in Revenue and reduced Expenditure under other heads.

(*b*) The Revised Estimates of 1888-89 show a deficit of Rx. 201,700, including as expenditure Rx. 818,300 on account of Special Defence Works, and a surplus of Rx. 616,600, if the cost of these works be excluded. Seeing that there has been a further fall in the rate of exchange, which has been taken for the current and coming year at 1*s.* 4·38*d.* = 1 rupee, heavy unforeseen expenditure on Military Expeditions, and a decline in the salt revenue owing to persistent rumours of an impending reduction of the duty, the result is satisfactory.

(*c*) The Budget Estimates for 1889-90 show a surplus of Rx. 106,300 after providing Rx. 1,102,900 for Special Defence Works. If the cost of these works be excluded, there is a surplus of Rx. 1,209,200. Imperial revenues have received a special asset of Rx. 740,000, towards which all Local Governments, except the Punjab, contributed. Of this only Rx. 250,000, most of which represents the proceeds of the re-imposed Patwari Cess in the North-Western Provinces and Oudh, will be permanent, the remainder being a receipt of next year only.

(*d*) The Capital Expenditure on Railways and Irrigation Works is expected to amount to Rx. 1,857,800 in 1888-89, and Rx. 4,089,500 is provided for 1889-90. The expenditure in 1888-89 is really Rx. 3,264,500, but Rx. 1,406,700 of it has been transferred to the Capital Accounts of the Indian Midland and the Bengal-Nagpur Railways on account of the cost of the Sindia and Katni-Umaria Railways transferred to them.

(*e*) As regards the general financial position of the Government of India, while there is every need for economy and for husbanding our revenue, there is no ground for desponding or pessimist views. There are probable difficulties in the future, but there are also reasons for holding that we shall be able to encounter them successfully. The Estimate of Revenue for 1889-90 have been framed with moderation.

(*f*) The Secretary of State proposes to draw, during 1889-90, £14,689,900 of Council Bills. He also proposes to raise a loan of £3,750,000 under the Oudh and Rohilkhand Railway Purchase Act for the purpose of advancing funds to Railway Companies.

(*g*) The Government of India will probably raise a loan of Rx. 2,500,000 in India, of which Rx. 584,000 is required for the Dock Works at Calcutta and Bombay, and Rx. 254,900 for Municipal Water Works, but no pledge can be given either as to the amount of the loan or the time when it will be issued, or the conditions which will attach to it.

D. BARBOUR.

CALCUTTA;
March 27, 1889.

APPENDIX I.

Despatch from the Government of India, to Her Majesty's Secretary of State for India, No. 256, dated 30th June 1874.

We have postponed consideration of the Bill for the regulation of the Presidency Banks and of the agreements depending upon it, pending receipt of the decision of Your Lordship in Council on the question of the agency of the Bank of Bengal in Bombay, in regard to which we forwarded with our despatch of the 9th January, No. 17, a letter from the Directors of the Bank of Bengal.

2. The strain to which our finances were exposed early this year has given us the advantage of an experience which we had not when the terms of the new agreements were last under our consideration.

3. We have been much impressed with the consideration that the effect of the existing agreements with the banks which compels us to place all the cash balances belonging to Government in their hands leads to consequences which may be very inconvenient, if not worse, both to Government and to trade.

4. The only use of these balances to Government is that they may be made available the moment the public service requires them.

5. We have had no difficulty in regard to the balances in the hands of the Banks of Bengal and Madras; the Bank of Bombay, however, protested against meeting drafts upon it, and on the urgent representations of the Governor of Bombay, we were obliged, on the 29th January, to allow a month's time before drawing.

Progs., May 1874, Nos. 33A & 33 B.

6. The Bank of Bombay, accustomed to high Government balances, and relying on the maintenance of those balances, had so employed them that they were practically locked up; for had we insisted on withdrawing them more suddenly, we should have done so in the face of a warning that we should produce a commercial crisis, and therefore for a time the Government balances at Bombay were useless for the purposes of the Government.

7. We think it doubtful, moreover, whether it is any real advantage to trade that large Government balances should be kept in the hands of the banks. It appears to us that an element of uncertainty is thereby introduced into the money market not unlikely to aggravate commercial difficulties at a time of tightness.

8. An amount of capital which is large relatively to the whole capital engaged in trade at the Presidency towns is supplied by Government, but Government, for reasons quite unconnected with trade, may have to withdraw these balances suddenly.

In this case a sudden demand ensues for capital to replace that which is thus removed; the rate of discount rises, not from any commercial reason, but from the accident of State necessities, and if this should occur at a time of commercial pressure, it would precipitate a crisis which otherwise might not occur. If Government did not supply this capital to the trade, it would be found by private individuals through banks or in some other way.

9. Had the Government funds in the hands of the banks in January last been limited to a fair working balance, and had we had a reserve in our own hands, we think it may be assumed that the market rise in the rates of discount which has occurred would not have taken place, and our business would have been transacted without disturbing trade operations.

10. The resources of a large money market are not open to us, and we do not think it would be safe to trust to being able to raise funds readily and immediately in India. The amount (£350,000) that we wanted in January out of our balance of about a million with the Bank of Bombay, and the demand for which brought down the remonstrance that we should place in jeopardy the trade of Bombay, cannot be considered as large. Calcutta may have larger resources, but we cannot suppose that even here the supplies immediately available are really considerable.

11. We are of opinion that a Government subject to the contingencies to which the Government of India is exposed ought not to be without a reserve, and that this reserve should be in its own hands.

12. This object might be attained by dissolving our connexion with the banks and re-establishing our treasuries. We are unwilling to take this course unless forced to do so: the banks are useful institutions, and the Bank of Bengal especially has upon several occasions been of great assistance to the Government.

13. We should prefer, as an alternative plan, to make a change in the agreements with the banks, so that, instead of giving them the right to hold all the Government balances, the stipulation may be confined to engaging to pay them interest when our balances are reduced below certain amounts.

If it be necessary to go further than this, we might stipulate that the banks should have the use of our balances up to certain limits, after which we should be unfettered as to their employment. The exact sums to be fixed in connection with the proposed stipulations would be settled in communication with the banks.

14. The amount to be kept in reserve need not, in our opinion, be very large, as the main difficulty is one only of time. The sense of security which we should derive from the possession of a reserve of two millions immediately available for any emergency would, in our judgment, amply repay the charge for interest on that amount.

APPENDIX II.

ACCOUNTS AND ESTIMATES.

† Approximate Estimates.

‡ It is estimated that stores to the value of Rx. 25,000 will be in hand at the end of 1889-90.

§ A Revised Estimate has been called for.

* Not known separately. Included under North Western Railway above.

‖ These represent sums held in Reserve for expenditure likely to be incurred during 1889-90, if the projects are sanctioned.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and prospects of the Crops.

Madras.—*For week ending 23rd March, 1889.*—Slight rain in Ganjam, Tanjore, Madura, Tinnevelly, Coimbatore, Nilgiris, Salem, and Malabar; none elsewhere. Rain wanted in Ganjam, Vizagapatam, Cuddapah, Anantapur, North Arcot, Trichinopoly, Tinnevelly, and Coimbatore. Standing crops generally good, but wet crops withering in parts of Cuddapah, Anantapur, and Kurnool; late crops withering or diseased in parts of Bellary. Pasture deficient in Ganjam, Vizagapatam, Tinnevelly, Coimbatore, Salem, and Malabar. Prices rising in ten districts, falling in six and stationary in others. General prospects favourable except in Ganjam; improving in Coimbatore. Labourers employed on last day of week on Rushikulya works 6,623 and on Gopalpur canal 8,191.

Bombay.—*For week ending 27th March, 1889.*—Rain in parts of Shikarpur and Upper Sind Frontier. Late crops in three talukas of Surat and one of Sholapur unsatisfactory. Exotic cotton in parts of Dharwar blighted. Opium in Baroda good. Harvesting progressing generally, and preparations for next season's crops commenced in parts of Karachi, Ratnagiri, Sholapur, Bijapur, Kanara, and Kathiawar. Probable outturn of late crops in Belgaum from six to nine annas. Fodder scarce in Khandesh and parts of Karachi, Ratnagiri, Poona, Ahmednagar, Dharwar, Kathiawar, and Baroda.

Bengal.—*For week ending 26th March, 1889.*—Showers reported during the week in several districts of Bengal Proper, Orissa, and Chota Nagpore, but no rain in Behar. The rain there has done good to the spring rice, which is doing well, and has also facilitated the ploughing and sowing of autumn rice and jute. More rain is still wanted in Central and Eastern Bengal. The *rabi* harvest is proceeding, and a fair outturn is generally expected, but in Chota Nagpore the crop will be rather short. The extraction of opium is nearly over, and the weighments are about to begin. In Behar *cheena* and *mung* are doing well, and the indigo sowings are nearly finished. Sugarcane is being planted satisfactorily. *Mohua* is being gathered and promises well, but in Manbhoom the crop has been damaged by high winds, and the outturn will not exceed eight annas. The latest report regarding the affected tracts in the Patna Division shows that distress is more keenly felt in Balwa and Madhwapore in the Durbhanga district; that the attendance on the relief works in Mozufferpore has considerably increased; that in Chumparun works have been opened for the infirm, old and young; and that gratuitous relief is being given on a limited scale.

North-Western Provinces and Oudh.—*For week ending 27th March, 1889.*—Weather seasonable. Slight rain in some districts. Harvesting of *rabi* continues and a good outturn expected. Opium extraction in progress. Supplies ample. Prices falling.

Punjab.—*For week ending 27th March, 1889.*—Slight rain in a few districts. Prices falling in Delhi, Amballa, Lahore, Rawalpindi, Shahpur, Dera Ismail Khan, and Peshawar, and stationary in other districts. Ploughing for *kharif* in progress; sowings for cotton and sugarcane have also commenced. Prospects of *rabi* crops are generally good throughout the province. No damage done to crops. Stock cattle are healthy. Fodder sufficient except in Lahore. Poppy crops are reported good in Jullundur and Amritsar.

Central Provinces.—*For week ending 27th March, 1889.*—Weather cloudy with storms in Jabalpur and Seoni. Hail has caused damage in Jabalpur. Anticipated wheat outturn, Saugor 11, Hoshangabad 5½, Nagpur 12, and Bilaspur 9 annas. Scarcity of water felt in places.

Burma.—*For week ending 23rd March, 1889.*—A little rain fell in several districts in Upper Burma, except in Bhamo where more rain is required. The dry

weather crops promise well. The price of paddy has risen in Akyab, Rangoon, Tharrawaddy, Bassein, Thôngwa, Henzada, and Magwé. Prices are lower in Prome, Amherst, Tavoy, and Pyinmana, and elsewhere are stationary.

Assam.—*For week ending 27th March, 1889.*—Weather warm; moderate rainfall in most districts. Sowing of summer rice progressing well; pressing of sugarcane nearly finished. Tea operations commenced.

Mysore and Coorg.—*For week ending 27th March, 1889.*—No rain in Mysore. Standing crops in good condition, except in parts of the Kolar district where want of rain is felt. Prospects generally favourable. Fodder and water-supply reported to be deficient in parts of the Mysore district. Prices slightly risen in the Kadur district.

Rain has fallen in parts of South Coorg during the week.

Berar and Hyderabad.—*For week ending 27th March, 1889.*—Cultivators engaged in threshing *rabi* crops, and preparing the soil for the ensuing season in Berar. Prospects favourable. Agricultural stock generally good. Fodder and water insufficient in certain districts. Prices somewhat high in the Akola and Ellichpur districts.

No rain in Hyderabad during the week. Weeding of hot-weather crops finished. Harvesting of *rabi* continues. Tanks and wells drying up for want of rain. Prices stationary.

Central India.—*For week ending 27th March, 1889.*—Slight fall of rain in Baghelkhand and Western Malwa Agencies. Agricultural operations reported completed in Bundelkhand. Prices of food grains continue to fall in Bhopal. Weather warm and cloudy in Bhopawar and Indore.

Rajputana.—*For week ending 27th March, 1889.*—Good rain in Alwar, slight in Harowti and Bikanir. Agricultural operations satisfactory. Standing crops being harvested. Harvests poor in Kherwara, above average in Kerowli. Agricultural stock good. Pasturage or fodder sufficient except in Marwar, Kherwara, Meywar, and parts of Serohi. Prices falling at many places. Opium satisfactory in Kotah and Jeypur, damaged in Harowti.

Nepal.—*For week ending 21st March, 1889.*—Slight rain. Mornings and evenings cool. Weather beginning to be hot during the day. Prospects good.

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

(*i*) Includes the Northern Bengal, Dacca, Kaunia-Dharlla and Assam-Behar State Railways.

M. C. BRACKENBURY, *Major, R.E.*,
Offg. Deputy Secretary.

CALCUTTA,
The 29th March, 1889.

Printed and published for the GOVERNMENT OF INDIA *at the Office of the* SUPERINTENDENT OF GOVERNMENT PRINTING, INDIA, *No. 8, Hastings Street, Calcutta.*

SUPPLEMENT TO

The Gazette of India.

No. 14.] CALCUTTA, SATURDAY, APRIL 6, 1889.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and prospects of the Crops.

Madras.—*For week ending 30th March, 1889.*—No rain at Godavery, Kistna, Cuddapah, Bellary, Madras, Chingleput, South Arcot, Trichinopoly, and South Canara, slight elsewhere and in Ganjam. Rain wanted in Ganjam, Vizagapatam, Cuddapah, Anantapur, Trichinopoly, Tinnevelly, and Coimbatore. Standing crops good, but withering in parts generally of Cuddapah, Bellary, Anantapur, and Tinnevelly. Pasture deficient in Ganjam, Vizagapatam, Tinnevelly, Salem, and Malabar. Prices rising in six districts, falling in six, and stationary in others. General prospects favourable except in Ganjam, improving in Coimbatore. Labourers employed on last day of week on Rushikulya works 11,097, Gopalpur canal 8,149.

Bombay.—*For week ending 3rd April, 1889.*—Slight rain in parts of Poona. Late crops in three talukas of Surat and one of Sholapur unsatisfactory; standing crops in one taluka of Karachi damaged by insects and drought, and exotic cotton in parts of Dharwar blighted. Harvesting of late crops and ploughing for next season's crops progressing. Fodder scarce in Khandesh and parts of Poona, Ahmednagar, Dharwar and Kathiawar.

Bengal.—*For week ending 2nd April, 1889.*—The last few days have been cloudy, but without rain, which is now generally wanted for *boro* (spring rice), and other standing crops, and for the cultivation of *aus* (autumn rice), and jute. *Aus* sowings have begun in some districts. The *rabi* harvest is still proceeding, and a fair outturn is generally expected, but in Chota Nagpore it will be from six to twelve annas only. Opium collection is over, and weighments have begun. *Cheena*, *mung* and indigo are promising crops. In Durbhanga

and Sarun damage to indigo from caterpillars is apprehended. *Mahua* is a good crop in Bhagulpur, the Sonthal Pergunnahs, and Hazareebagh, but short in Manbhoom, and the Palamow Sub-Division of Lohardugga. In Rajshahye the *ganja* crop has been somewhat damaged by hail. Prices of rice are almost stationary throughout the province. No further report has been received concerning the distressed tracts in the Patna Division.

North-Western Provinces and Oudh.—*For week ending 3rd April, 1889.*—Weather seasonable. *Rabi* harvest approaching completion, a good outturn expected in the eastern districts. Threshing operations are in progress. Collecting of opium continues. Markets well supplied, but prices are fluctuating.

Punjab.—*For week ending 3rd April, 1889.*—Slight rain in certain districts. Prices falling in Sialkot and Shahpur, rising in Rawalpindi, stationary elsewhere. Ploughing for *kharif* in progress; sowings for cotton, sugarcane, tobacco and melons continuing. Prospects of *rabi* crops are generally good throughout the province. Crops are slightly affected by rust in Tahsil Chunian in the Lahore district. Stock cattle are healthy, except in Muktsar in the Ferozepur district. Fodder sufficient except in parts of Lahore. Poppy crops are reported good in Jullundur.

Central Provinces.—*For week ending 3rd April, 1889.*—Weather cloudy with sprinkling of rain in places. Harvesting of winter crops continues. Wheat outturn expected in Saugor 11, Hoshangabad 6, Nagpur 8, and Bilaspur 9 annas.

Burma.—*For week ending 30th March, 1889.*—Slight rain fell in Mergui, Bhamo, Myadaung, Shwebo, Yeu, Sagaing and Myingyan. Crop prospects good, but rain wanted for dry-weather crops in Bhamo and Tigyaing. Price of paddy remains much the same as last week.

Assam.—*For week ending 3rd April, 1889.*—Weather seasonable. Rain fell in Cachar and most districts of the Brahmaputra Valley. Sowing of early rice in progress. Tea doing well.

Mysore and Coorg.—*For week ending 3rd April, 1889.*—Slight rain in parts of Mysore. Crops in good condition except in parts of the Kolar district. Outturn of crops harvested generally fair. Water supply and pasturage diminishing in parts of the Mysore district. No material change in prices.

Slight rain in Coorg. More rain wanted for coffee blossoms.

Berar and Hyderabad.—*For week ending 3rd April, 1889.*— Preparation of fields for the next *kharif* sowings continued in Berar. Harvesting of *rabi* crops almost completed. Prospects good. Cattle generally healthy. Fodder and water same as last week. No material change in prices.

No rain during week at Hyderabad. *Rabi* and hot-weather crops continue to be harvested. Scarcity of fodder felt in some places. Prices stationary.

Central India.—*For week ending 3rd April, 1889.*—Prices of food grains reported rising in Bundelkhand, slightly fallen in Dhar and Manpur. Apprehensions of water famine in the Neemuch district.

Rajputana.—*For week ending 3rd April, 1889.*—Good rain in Alwar, slight in Bikaneer. Agricultural operations satisfactory. Standing crops being harvested; harvest poor in Kherwara. Agricultural stock good. Pasturage or fodder sufficient, except in Marwar, Kherwara, Meywar and parts of Sirohi. Prices falling at many places

Nepal.—*For week ending 28th March, 1889.*—No rain. Strong wind in the evenings during the week. Prospects good.

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.
