The increase of Revenue in England, excluding Army, Opium, and the Railway Revenue Account, in respect of which I take net figures, is £33,900, and the increase of Revenue in India, excluding the heads in respect to which net figures are taken, and also Land Revenue, Salt, Stamps, Excise, which are dealt with separately, is Rx. 188,200. The head which chiefly contributes to this result being Telegraph, under which there is an increase of Rx. 137,800 in Indian receipts.

11. The total increase of Revenue in England and India may then be calculated as follows:—

	Rx.		£
Railways (net)	1,322,400	*plus*	37,800
Opium (net)	821,500	*minus*	300
Salt	282,100		
Stamps	21,100		
Excise	104,700		
Other Heads, excluding Army and Land Revenue	188,200	*plus*	33,900
TOTAL	Rx. 2,740,000	*plus*	£71,400

Against this increase must be set a falling off of Rx. 657,000 under Land Revenue. Deducting this amount from the figures just stated, the resulting improvement is Rx. 2,083,000, *plus* £71,400.

12. Of the unfavourable influences affecting the Indian finances during the current year, the chief was increased Expenditure under Army.

In the Budget the net Expenditure in India under Army was taken at Rx. 13,815,500 and in England at £4,625,500. These figures have been increased in the Revised Estimate by Rx. 1,095,500 and £123,100 respectively.

13. The increase of Military Expenditure in India was chiefly due to Frontier Expeditions and to the sanction of certain measures considered necessary for the efficiency of the Army.

The Budget Estimate of 1891-92 provided Rx. 155,000 for Expeditions. During the year further Expenditure on Expeditions was sanctioned to the amount of Rx. 720,000:—

	Rx.
Chin-Lushai Expedition	50,000
Manipur operations	300,000
Wunthoo Expedition	50,000
Hazara "	60,000
Meranzai "	140,000
Cold weather operations in Burma	120,000
TOTAL	Rx. 720,000

It is characteristic of the uncertainties of Indian Finance that in last Financial Statement I should have called attention to what I then considered the high scale of Expenditure on Frontier Expeditions of Rx. 374,400 in 1888-89, of Rx. 421,000 in 1889-90, and of Rx. 352,600 in the Revised Estimate of 1890-91, and expressed a hope that Expenditure of this nature was about to fall off.

A grant of Rx. 80,000 was also sanctioned during the year for additional transport mules, and Rx. 52,100 for additional remounts and ordnance mules, while the Revised Estimate for 1891-92 provides Rx. 213,400 under Army for Expenditure in India on preparations to facilitate mobilization.

14. The excess in the Home Expenditure under Army is due to the payment of £211,000 not provided for in the Budget, being arrears and increase of effective charges on account of British Forces serving in India, reduced by savings under other heads.

15. Putting on one side the Expenditure under Opium, the Railway Account, and Army, in respect to which we have found it more convenient to deal with net figures, the increase of gross Expenditure shown in the Revised Estimate amounts to Rx. 222,200 in India and £127,000 in England. With regard to the increase of Expenditure in India, I need only explain that it is the net result of a number of increases and decreases which individually are not of very great magnitude.

The chief increases are Rx. 51,700 under Political, Rx. 138,000 under Famine Relief and Insurance, Rx. 48,200 under Irrigation, Rx. 80,900 under Military Works, and Rx. 65,900 under Civil Works. And the chief decreases are Rx. 74,500 under Police, and Rx. 60,600 under Special Defences. These items of increase and decrease are explained in Part II, which, it should be recollected, deals with Provincial and Local Revenue and Expenditure as well as with Imperial Revenue and Expenditure.

In England the chief increase in Expenditure has been £232,000 under Interest, and the chief decrease £175,500 under Special Defences. The

increase is due to the Secretary of State having issued India Stock at a discount, which has thrown a charge of £255,000 on the Revenue of the year. The decrease under Special Defences is, as usual, a mere postponement of Expenditure.

16. Bringing together the whole of the items of Revenue and Expenditure with which I have just dealt, and still continuing to exclude Exchange, we get the following result:—

		Rx.		£
Improvement shown in paragraph 11		2,083,000	*plus*	71,400
Deduct—				
Increased Expenditure under Army	Rx. 1,095,500 *plus* £123,100			
Increased Expenditure, excluding Expenditure under Opium, Railways, and Army	Rx. 222,200 *plus* £127,000			
		1,317,700	*plus*	250,100
Balance		Rx. 765,300	*minus*	£178,700

The sum of Rx. 765,300 in rupees very considerably exceeds £178,700 in sterling, and we thus see that, notwithstanding the great increase of Military Expenditure and the falling off in Land Revenue, the Revised Estimate gives a result which shows a satisfactory improvement over the Budget Estimate if Exchange be excluded.

17. There now remains Exchange to be dealt with.

The increase of net Expenditure on this account is Rx. 782,200, partly due to increased Sterling Expenditure, but mainly to the average value of the rupee having proved to be 1s. 4·713*d.* instead of 1s. 5¼*d.*, the rate taken in the Budget Estimate.

Deducting from the increased Expenditure under Exchange, the figures at the end of the preceding paragraph, we find the Revised Estimate to be worse than the Budget by Rx. 178,700* *plus* Rx. 16,900 (782,200 *minus* 765,300), or Rx. 195,600. As the Budget Estimate showed a surplus of Rx. 115,600, a deterioration of this magnitude brings out a deficit of Rx. 80,000, being Rx. 195,600 *minus* Rx. 115,600.

18. The whole case may then be stated briefly and with sufficient accuracy in the following manner:—

The Railway Revenue Account and Opium, Salt, Stamps, Excise, and other Heads of minor importance, have given an improvement in 1891-92 over the Budget Estimate of not much less than three crores of rupees.

Of this improvement 1½ crores have been balanced by increased Military Expenditure; the fall in Exchange and reduction in Land Revenue account for nearly 1½ crores more, and increased Expenditure under Heads of minor importance in England and India, is sufficient to do rather more than swallow up the remainder of the improvement, thus converting a surplus of Rx. 115,600 into a deficit of Rx. 80,000.

Section III.—Budget Estimate of 1892-93.

19. In the Financial Statement for 1891-92, I made the following remarks:—

"So far as can be judged, our financial position during the next two years depends on two factors—Military Expenditure and Exchange. It is of great importance to the

* *On making the adjustment for Exchange, the sterling symbol (£) is changed to Rx.*

Indian finances that Exchange should not fall materially below the present rate for a year or two, that is, until we have experienced some relief from the heavy Military charges which we are now bearing. If Exchange falls materially within the next year or two, we may find ourselves in a difficult position, though I believe the difficulties would prove to be only temporary."

Since this passage was written Exchange has fallen heavily, and in the Budget Estimate for the coming year a rate of 1*s.* 4*d.* the rupee has been taken as against 1*s.* 5¼*d.* in the Budget Estimate of the current year. It would be a tedious process to calculate the exact loss due to this heavy fall, but for present purposes it will be sufficient to take it, in round figures, at Rx. 1,708,000. The sterling expenditure of the coming year is almost the same as the estimated sterling expenditure of 1891-92, and yet the *net* charge of the columns headed "Exchange" has increased by no less than Rx. 1,708,000.

On the other hand, there has been no reduction in total Military Expenditure as the following figures will show:—

	Budget, 1891-92.		Budget, 1892-93.	
	Rx.	£	Rx.	£
Military Works (net) . .	1,075,400	8,200	1,084,100	38,400
Army (net)	13,815,500	4,625,500	14,325,000	4,556,300
Special Defences . . .	360,000	350,000	270,900	229,100
TOTAL .	15,250,900	4,983,700	15,680,000	4,823,800

20. The difficulty which I foresaw twelve months ago has, therefore, come upon us, and the problem of the Budget of 1892-93 has been the overcoming of that difficulty. If we have not succeeded in dealing with it in a wholly satisfactory manner, we have at least done better than could have been hoped this time last year, and the Budget Estimate of 1892-93 shows a surplus of Rx. 146,600.

21. In explaining how this result has been obtained, I shall take as starting point the Budget Estimate of 1891-92, and a comparison of the figures of that Estimate with the figures of the Estimate for 1892-93 will show how the loss of Rx. 1,708,000, due to the fall in Exchange from 1*s.* 5¼*d.* to 1*s.* 4*d.*, has been covered and equilibrium between Revenue and Expenditure secured.

22. In the first place I may say at once that in the comparatively small item of sterling receipts in England there is not much difference between the Budget of 1891-92 and the Budget of 1892-93, there being merely a reduction from £212,600 to £200,800, or by £11,800; as there is an increase of £2,100 in receipts under Army, the decrease, excluding Army, is £13,900.

23. Under Principal Heads of Revenue (excluding Opium) there is an increase of Revenue amounting to no less than Rx. 1,091,600. This large increase is due partly to substantial increases under Salt, Excise, and Forests, but above all to an increase of Rx. 673,800 under Land Revenue. The latter figure requires special explanation.

The current Provincial Contracts terminate on 31st March 1892. They have lately been revised and continued for another period of five years, and the revision has been made in such manner as to give the Government of India additional Revenue to the amount of Rx. 466,300 yearly, and, I regret to say, as a necessary consequence, to contract the resources of the Local Governments by an equal amount. It is no doubt satisfactory that Local Governments should have been in a position to make a contribution to the resources of the Empire at a period of pressure, and thus, possibly, avoid the necessity of imposing further taxation. But it would have been still more satisfactory if the Government of India had been in a position to allow them to retain the whole or the greater portion of this amount for expenditure on the improvement of the internal administration of the several Provinces of India. This adjustment in favour of

the Government of India increases the Imperial share of the Land Revenue by Rx. 466,300. The amount so withdrawn may seem large, but as the total increase of Provincial Revenue during the last five years has been Rx. 2,042,700, it follows that the Government of India have now withdrawn only 23 per cent. of the increase of the last five years, leaving the remaining 77 per cent. for expenditure by Local Governments.

The Imperial share of Land Revenue in the coming year has also been increased by ordinary growth of Revenue and by postponements of Revenue collections from the current year in consequence of drought and scarcity. As has already been stated, the total increase of the Imperial share of Land Revenue due to all causes is Rx. 673,800.

24. Net Opium Revenue for 1892-93 is taken at Rx. 81,200 above the Budget Estimate for 1891-92; although the price of the drug has risen and the expenditure is expected to be somewhat less than the average, the short crops of recent years have told on the Opium Reserve, and the quantity to be sold has already been reduced by a Notification in the *Gazette of India* dated 26th June 1891.

25. The Receipts from Interest in India, less the corresponding Expenditure, have increased by Rx. 238,100; this very satisfactory result is due to our not having borrowed in recent years, and to the investment of another crore of the Paper Currency Reserve.

In England the charge for Interest is reduced by £11,500.

26. The net Receipts in India from the Railway Revenue Account are estimated to increase by Rx. 606,700, while the increase of sterling expenditure in England under the same head is £51,800.

27. Excluding the Principal Heads of Revenue, Interest, and the Railway Revenue Account, with which we have already dealt, and also the Revenue under the Heads of Military Works and Army, with which I shall deal hereafter, there is an increase of Revenue in India, under various Heads, of Rx. 375,700.

Excluding Expenditure under Interest, Opium, and the Railway Revenue Account, and Military Expenditure of all kinds (Military Works, Army, and Special Defences), there is an increase of Expenditure in India which amounts to Rx. 235,100, and in England of £95,700.

28. Net Military Expenditure of all kinds in India has increased by Rx. 429,100, of which Rx. 205,000 is due to the calculation of the pay of the British soldier serving in India at a lower rate of Exchange. In England the net Expenditure under Military Works has increased by £30,200 and decreased under Special Defences by £120,900, and under Army by £69,200, giving a net decrease of £159,900 in Military Expenditure of all kinds.

29. Bringing together the different items with which we have just dealt, we get the following result:—

GAIN.	Rx.		£
Revision of Provincial Contracts .	466,300		
Ordinary increase under Principal Heads of Revenue, excluding Opium .	625,300		
Increase in net Opium Revenue .	81,200	*minus*	100
Increase under the Railway Revenue Account	606,700	*minus*	51,800
Improvement under Interest in India, net	238,100		
Reduction of Interest charge in England	...		11,500
Increase of Revenue under various Heads in India	375,700		
Reduction of net Military Expenditure in England (Military Works, Army, and Special Defences) . . .	...		159,900
TOTAL . Rx.	2,393,300	*plus*	£119,500

Loss.	Rx.		£
Increase of net Military Expenditure in India	429,100		
Reduction in sterling Receipts in England (excluding Military Receipts) .	...		13,900
Increase of Expenditure under various Heads	235,100	*plus*	95,700
TOTAL . Rx	664,200	*plus*	£109,600

Deducting the loss from the gain, we get a net gain of Rx. 1,729,100 *plus* £9,900.

30. On the other side must be put the net loss by Exchange, which, as I have said, amounts to Rx. 1,708,000 It follows that the Budget Estimate of 1892-93 is better than that of 1891-92 by Rx. 21,100 (1,729,100—1,708,000) *plus* Rx. 9,900,* or Rx. 31,000 in all. As the surplus of the Budget Estimate of 1891-92 was Rx. 115,600, and as the Budget Estimate of the coming year is, on the whole, better by Rx. 31,000, the estimated surplus of 1892-93 is Rx. 146,600, being Rx. 115,600 *plus* Rx. 31,000.

31. The manner in which the very heavy charge of Rx. 1,708,000, which falls on the finances next year in connection with Exchange, has been met, may now be stated in a few words.

The additional charge of Rx. 1,708,000 on account of Exchange has been met almost entirely by contributions from Local Governments (Rx. 466,300), by increase of Revenue under Principal Heads (Rx. 625,300), and by growth of Railway Revenue (Rx. 606,700 *minus* £51,800); there has also been a substantial improvement under Interest in India owing to our having been able to avoid borrowing for some time, and to increase of the Paper Currency Investment by one crore of rupees.

Net Military Expenditure of all kinds is somewhat heavier, and net Opium Revenue is slightly better, for 1892-93 than for 1891-92, while the growth of Revenue under various Heads, not of the first importance, almost exactly balances the growth of other Expenditure in England and India.

Section IV.—Prospects of the Immediate Future.

32. In the Financial Statements of the last three years I have dwelt at some length on the general financial position of Government as it presented itself to me at the time, and have endeavoured to indicate the prospects of the immediate future.

Thus, in the Financial Statement for 1889-90, after a series of years of deficit, I ventured to predict that our financial difficulties were, for the time, at an end.

This forecast was amply justified, as the Accounts of the year 1889-90 gave a surplus of Rx. 2,612,000, though the sum of Rx. 460,255 had been set aside with a view to begin the restoration of the Famine Grant to its full amount of Rx. 1,500,000.

In the Financial Statement for the succeeding year, 1890-91, I looked forward to still further improvement, but expressed the opinion that 1890-91 was not likely to prove so prosperous, from a financial point of view, as 1889-90.

In point of fact, the Accounts of 1890-91 now show a larger surplus (Rx. 3,688,100) than that obtained in the preceding year; but the greater portion of this surplus was due to what has proved to be a speculative rise in Exchange and to other accidental causes, and all that can be said of 1890-91 is that it was a year of, on the whole, satisfactory financial progress.

* *The sterling symbol (£) is altered to Rx. when the adjustment for Exchange is made.*

33. As the result of two years' financial prosperity, the Government of India were able to restore the Famine Grant to its full amount of Rx. 1,500,000 in the Budget of 1891-92; but I pointed out, that while there were encouraging features in the position, there was also some danger of financial difficulties arising from a fall in Exchange taking place before Military Expenditure of a special character was reduced.

The difficulties to which I drew attention have actually come upon us, and we have had, besides, in the current year, a considerable loss of Land Revenue owing to drought and scarcity.

We should have had to face a heavy deficit in 1891-92 but for a remarkable increase in Railway Revenue, and considerable improvement under Opium. As it is, the Revised Estimate of 1891-92 shows a deficit of Rx. 80,000; but I have little doubt that improvement will yet take place, and that the Accounts of 1891-92 will close with a moderate surplus.

34. Although the three forecasts which I have ventured to make of the progress of Indian Revenue and Expenditure have, considering the nature of the subject, proved fairly accurate, I must admit that the result which I anticipated was sometimes not attained in the way I expected. For example, I had expected that the expenditure on Special Defences would, by this time, have come to an end, and this hope would have been fulfilled if the works could have been constructed and the armament provided as rapidly as the money was forthcoming. Unfortunately this has not proved to be the case, and the Estimates of the coming year are burdened with a charge of Rx. 614,500 on account of Special Defences, and a similar charge must be borne for another year or two. I could give other instances in which I have been disappointed, but what I have said is sufficient to show the necessity for caution in forecasts regarding Indian Revenue and Expenditure.

35. The circumstances of to-day are such as to make special caution necessary.

Exchange has fallen heavily and rapidly, and though now steady it is impossible to conjecture whether the next move will be upwards or downwards.

Railway receipts have largely increased in the current year, and for 1892-93 we have calculated on retaining a portion of this improvement; but no one can at present say whether Railway traffic is likely to be heavy or the reverse in 1892-93.

The price of Opium, after falling very low, has risen suddenly and rapidly, but it is impossible to say how long this rise will be maintained.

Above all, certain portions of the country are suffering from drought and scarcity, and already the collections on account of Land Revenue have shown some falling off. The extension of Railways in recent years has greatly reduced the risks from famine, and if the periodical rains, which are due about June next in the affected tracts of Madras, Bombay, and Upper Burma, in Rajputana and Behar, are received in due season, and are not insufficient, we shall in all probability have nothing worse than severe scarcity to meet. On the other hand, if the rains are delayed or are insufficient in the tracts in question, scarcity may deepen into famine, and the loss of Revenue and increase of Expenditure that must follow such a calamity cannot be calculated. Meteorological conditions, I understand, are not unfavourable at present for the occurrence of a timely monsoon.

36. Under the circumstances just stated, I refrain from making a forecast of probable financial progress during the coming year, and must content myself with saying that, putting aside the possibility of the occurrence of famine, there is, to the best of my judgment, no ground at this moment for any special anxiety regarding 1892-93. The Currency question, however, appears to be approaching the acute stage, and it is impossible to foresee what may happen in this connection within the next few years.

PART II.

IMPERIAL, PROVINCIAL, AND LOCAL REVENUE AND EXPENDITURE.

Section I.—Accounts of 1890-91.

37. The Revised Estimate for the year 1890-91, published in March last, showed a surplus of Rx. 2,787,100. In August the Under-Secretary of State for India announced in Parliament that the surplus would be nearly Rx. 900,000 in excess of that sum. The Accounts of the year show a surplus of Rx. 3,688,171.

38. Explanations of the variations under the several heads will be found in the Appropriation Report, published in the *Gazette of India* of the 12th March. The following statement gives a general comparison of the Revised Estimates with the Accounts of the year:—

	Revised Estimate.	Accounts.	Accounts, Better.	Accounts, Worse.
REVENUE.				
India . . . . . Rx.	84,799,300	85,221,551	422,251	...
England . . . . . £	388,100	392,009	3,909	...
Exchange . . . . . Rx.	120,100	128,089	1,989	...
TOTAL . Rx.	85,313,500	85,741,649	428,149	...
EXPENDITURE.				
India—				
Imperial, Provincial, and Local . Rx.	61,902,700	61,596,086	306,614	...
Adjustment of Provincial and Local Surplus or Deficit . . . Rx.	−312,800	−198,627	...	114,173
England . . . . . £	15,801,100	15,568,875	232,225	...
Exchange . . . . . Rx.	5,135,400	5,087,144	48,256	...
TOTAL . Rx.	82,526,400	82,053,478	472,922	...
Surplus . Rx.	2,787,100	3,688,171	901,071	...

1890-91, General Results.

39. The improvement in the Revenue and Expenditure in India was thus Rx. 728,865, of which Rx. 114,173 occurred in the Provincial and Local sections of the Accounts, and Rx. 614,692 in the Imperial section. The addition to the latter sum of the improvement of Rx. 286,379 in the Revenue and Expenditure in England, including Exchange, makes up the increase in the surplus of the year to the sum of Rx. 901,071, shown above.

Revenue in India.

40. Increased receipts under the Principal Heads of Revenue, Rx. 243,734, and from Railways, Rx. 228,298, account for the improvement of Rx. 422,251 shown in the Revenue in India. The more important increases under the Principal Heads occurred under Land Revenue, Rx. 130,609, and Salt, Rx. 70,168, while of the chief Principal Heads the only one under which the Actuals were less than the Revised Estimate was Stamps. The only important decrease in the Accounts, compared with the Revised Estimate, was one of Rx. 70,092 in Military Receipts.

Expenditure in India.

The decrease of Rx. 306,614 in the Expenditure in India, as compared with the Revised Estimate, occurred mainly under the groups Direct Demands on the Revenue, Rx. 83,985; Railways, Rx. 101,039; and Buildings and Roads, Rx. 82,161.

Expenditure in England.

41. The saving of Rx. 280,481, including Exchange, in the Expenditure in England, occurs mainly under the groups Miscellaneous Civil charges, Rx. 48,855; Army, Rx. 190,560; and Special Defence Works, Rx. 20,561.

Expenditure not charged to Revenue.

42. The Capital Outlay on Railways and Irrigation Works, not charged to Revenue, was less than assumed in the Revised Estimate by Rx. 123,768.

Section II.—Revised Estimates of 1891-92.

43. The following statement gives a general comparison of the Budget and Revised Estimates of 1891-92:—

	Budget.	Revised.	Revised, Better.	Revised, Worse.
REVENUE.				
India . . . . . Rx.	85,729,500	88,219,400	2,489,900	...
England . . . . . £	212,600	255,200	42,600	...
Exchange . . . . . Rx.	83,200	111,300	28,100	...
TOTAL . Rx.	86,025,300	88,585,900	2,560,600	...
EXPENDITURE.				
India—				
Imperial, Provincial, and Local . Rx.	64,516,000	65,873,700	...	1,357,700
Adjustment of Provincial and Local Surplus or Deficit . . . Rx.	−828,400	−461,500	...	366,900
England . . . . . £	15,972,100	16,193,400	...	221,300
Exchange . . . . . Rx.	6,250,000	7,060,300	...	810,300
TOTAL . Rx.	85,909,700	88,665,900	...	2,756,200
Surplus or Deficit . Rx.	+115,600	−80,000	...	195,600

1891-92, General Results.

44. The small surplus of the Budget Estimate has become in the Revised Estimate a small deficit. The salient features of the year may be stated as, on the one hand, a large increase of net Railway Revenue, and improvements in most other heads of Revenue; and, on the other hand, a large increase of Military Expenditure, a fall in the rate of Exchange, and some falling off in Land Revenue. The increase of Revenue is greater than that of Expenditure, apart from Exchange; if the rate of Exchange had not fallen below the rate assumed in the Budget Estimate, there would have been an improvement, instead of a deterioration, in the general result.

1891-92, Revenue in India.

45. The Revenue in India is now expected to be Rx. 2,489,900 more than was anticipated last March.

1891-92, Increases of Revenue in India.

46. The larger part of this occurs under Railways, the receipts from which show an improvement of no less than Rx. 1,781,100. The revival of Railway traffic which began towards the close of last financial year continued and developed to an unexpected extent in the present year. There are now some signs of the improvement coming to an end; but in all probability the high figure taken in the Revised Estimate for Railway Revenue will be realised. Almost all the important lines of Railway have contributed to this satisfactory result.

Most of the other heads of Revenue also show increases, the more important being the following:—

	Rx.
Opium	432,700
Salt	277,200
Stamps	78,700
Excise	143,100
Telegraph	137,900
Irrigation, Major Works	147,900

The larger part of the increase under Opium occurs in Bengal, where the receipts exceed the Estimate by Rx. 324,200: this is due to the average price realised at the sales of Bengal Opium having been R1,058 a chest, against a price of R1,000 a chest assumed in the Budget Estimate. There is also an increase of Rx. 110,000 in Bombay, due to the number of chests of Malwa Opium exported being higher than assumed in the Budget Estimate.

The rest of the increases may be ascribed to the general progress of the country.

1891-92, Decreases of Revenue in India.

47. Against those increases must be set the falling off in Land Revenue and Provincial Rates, due to the scarcity in Madras. The collections of Land Revenue, including that due to Irrigation, are now expected to be less than the Budget Estimate by Rx. 585,500, and those of Provincial Rates, by Rx. 54,400, the reductions in Madras being Rx. 603,000 and Rx. 65,300.

The only other important decrease in Revenue is one of Rx. 85,000 under Mint. It is due to the coinage being much below the average.

1891-92, Revenue in England.

48. The increase of the Revenue in England is not great; more than half of it occurs under Interest, the Secretary of State having been able to realise higher rates of interest than he anticipated on his temporary investments of cash balance.

1891-92, Expenditure in India. Increases under Army and Railways.

49. For the large increase of Expenditure in India shown in the statement in paragraph 43, amounting to Rx. 1,357,700, the two heads Army and Railways are responsible.

The increase in Railway Expenditure is a necessary accompaniment of the increase in the Railway Revenue. It amounts to Rx. 489,000 on State Railways—Working Expenses, and to Rx. 151,500 on Guaranteed Railways—Surplus Profits, Land and Supervision.

The increase in the Expenditure on the Army amounts to Rx. 1,059,500. The causes of this increase are (*a*) the cost of expeditions not contemplated when the Budget Estimate was framed amounting to Rx. 725,300; (*b*) the sanction given to an expenditure of Rx. 213,400 on measures designed to facilitate mobilisation; and (*c*) the sanction given to an expenditure of Rx. 132,100 for the purchase of additional mules and remounts.

1891-92, Expenditure in India. Other variations.

50. The sum of the increase in the Expenditure on Railways and of the increase in the Expenditure under Army being in excess of the increase of the total Expenditure in India, it follows that under the remaining heads of Expenditure there must have been, on the whole, a decrease. The following are the more important increases and decreases of expenditure under these heads:—

Decreases.	Rx.	Increases.	Rx.
Land Revenue	54,200	Political	50,700
Opium	388,800	Reduction of Debt	802,800
Police	133,100	Irrigation, Minor Works	58,400
Miscellaneous	109,400	Military Works	80,900
Construction of Protective Railways	680,100		
Special Defence Works	60,600		

1891-92, Decreases of Expenditure in India.

51. The larger part of the decrease under Land Revenue occurs in Bombay, Rx. 35,900, and is due partly to too high a margin having been allowed in the Estimate of Expenditure, and partly to provision having been made for a scheme of reorganisation of the Department of Land Records and Agriculture, which was not fully brought into operation in the year. There are also decreases in the Central Provinces Rx. 9,400, Assam Rx. 8,200, and India General Rx. 4,200 (all of these three decreases occurring mostly in Settlement charges): while there are increases in Bengal Rx. 4,200 (due to increased expenditure on Survey and Settlements) and in Lower Burma Rx. 4,100 (due to higher charges for the collection of the Revenue, which is expected to exceed the Budget Estimate).

The decrease under Opium is caused by the produce of the season's crop having been much less than was assumed in the Budget Estimate. The Estimates are framed at a time when the produce of the crop cannot be gauged with accuracy.

The decrease under Police is due to provision having been made in Bombay for large Expenditure on a scheme for the reorganisation of the Police which has not yet been brought into operation, and to the Expenditure in both Upper and Lower Burma having been largely over-estimated. These decreases are partially counterbalanced by increased Police charges in the South Lushai country.

The decrease under Miscellaneous occurs in Madras. About half of it is nominal, being due to the transfer of Local Sanitation charges from this head to Medical; while the remainder is due to the Madras Government having provided in the Budget Estimate a large sum under this head as a "reserve."

The decrease under Protective Railways and Special Defence Works is due merely to the rate of Expenditure having been slower than was anticipated.

1891-92, Increases in Expenditure in India.

52. The increase under Political is due mainly to the Amir of Afghanistan having drawn a portion of his subsidy for last year in arrears. If the Amir again allows his subsidy to fall into arrears, the increase under Political will almost entirely disappear in the actuals for the year.

The amount entered for Reduction of Debt is the sum required to make up the Famine Insurance Grant of the year to Rx. 1,500,000. It is composed of the sum of Rx. 680,100, the amount shown above as the decrease under Construction of Protective Railways, and of Rx. 166,900 being the amount by which the net loss on the Bengal-Nagpur and the Indian Midland Railways is now expected to be less than assumed in the Budget; diminished by the increases under the two other heads included in the grant, namely, Rx. 30,400 under Famine Relief and Rx. 13,800 under Construction of Protective Irrigation Works.

The increase under Irrigation is caused by the opening of Famine Relief Works in Ajmere, Upper Burma, and Madras.

The increase under Military Works is accounted for by the sanction given during the year to expenditure of Rx. 30,000 for the restoration of buildings at Quetta damaged by rain; and of Rx. 61,600 for works designed to facilitate mobilisation in time of war. Smaller expenditure on other works diminishes to some extent the above excess.

1891-92, Provincial and Local Adjustments.

53. The sum of Rx. 366,900 entered opposite "Adjustment of Provincial and Local Surplus and Deficit" represents the amount by which the reduction of their accumulated balances by Local Governments has been less than they proposed when the Budget Estimates were framed.

1891-92, Expenditure in England.

54. The more important variations accounting for the increase of £221,300 in the Expenditure in England are the following:—

Increases.	£	Decrease.	£
Interest	232,100	Special Defence Works	175,500
Army	130,800		

The excess in the Interest payments is caused by the payment of discount on the issue and sales of India Stock, for which no provision was made in the Budget Estimate. The public loan of £2,600,000 was issued at an average rate of £94-10-2½ *l.* per cent., and the discount, including that paid on

payments towards the loan in anticipation of due date, amounted to £153 478. The subsequent sales of stock to the amount of £2,000,000 were effected at a price of £95 per cent., and a further charge for discount of £101,522 was incurred. This total increase of £255,000 was partially counterbalanced by a saving in the interest charge in consequence of the loan having been issued later than was intended.

The report of Lord Northbrook's Commission on the claims of the War Office on account of British Forces serving in India necessitates the payment this year of £211,000 in excess of the amount provided in the Budget Estimate; this payment accounts for the increase of expenditure under Army and covers arrear charges for the four years 1887-88, 1888-89, 1889-90, and 1890-91, and the full payment likely to be due under the award of the Commission for the current year. The payments already made for the years 1887-88, 1888-89, and 1889-90 are respectively £655,000, £665,000, and £720,000, or in all £2,040,000. The amount due under the award of the Commission for those three years is £2,156,000. To close the account to March 1890, an arrear payment of £116,000 is therefore required. Owing to the increase in the payments on account of deferred pay, it is anticipated that the amounts due for each of the years 1890-91 and 1891-92 will be £760,000 against £700,000 paid in 1890-91, and £725,000 provided in the Budget Estimate of 1891-92, necessitating a further payment of £95,000 for these two years. The addition to the Budget Estimate for payments to the War Office is therefore £211,000 in all. On the other hand, it is anticipated that the payments for the Troop Service will be less by £29,300 owing chiefly to the new machinery for the *Euphrates* not having been supplied, and that the payments for stores will be less by £62,000: these reductions are mere postponements of expenditure, not real savings.

The decrease under Special Defence Works is due to Stores required for these works not being provided as rapidly as was anticipated.

1891-92, Exchange.

55. The net charge for Exchange on the Revenue and Expenditure in England is Rx. 6,949,000 against the Budget Estimate of Rx. 6,166,800, being worse by Rx. 782,200. This may be said to be due to the fall in the rate of exchange from 1*s.* 5·25*d.* to 1*s.* 4·713*d.* the rupee, a small portion only being on account of the variations in the amount of Sterling Revenue and Expenditure.

Section III.—Budget Estimate of 1892-93.

56. The following statement compares the Budget Estimate for 1891-92 with that for 1892-93:—

		1891-92.	1892-93.	1892-93 better than 1891-92.	1892-93 worse than 1891-92.
REVENUE.					
India	Rx.	85,729,500	88,066,700	2,337,200	...
England	£	212,600	200.800	...	11,800
Exchange	Rx.	83,200	100,400	17,200	...
TOTAL	Rx.	86,025,300	88,367,900	2,342,600	...
EXPENDITURE.					
India—					
Imperial, Provincial, and Local	Rx.	64,516,000	65,457,400	...	941,400
Adjustment of Provincial and Local Surplus or Deficit	Rx.	−828,400	−1,161,700	333,300	...
England	£	15,972,100	15,950,400	21,700	...
Exchange	Rx.	6,250,000	7,975,200	...	1,725,200
TOTAL	Rx.	85,909,700	88,221,300	...	2,311,600
SURPLUS	Rx.	115,600	146,600	31,000	...

1892-93, General Results.

57. A surplus of Rx. 146,600 means practical equilibrium between Revenue and Expenditure. A considerable development of Revenue is expected, which is, however, absorbed partly by increases in expenditure, but chiefly by the fall in the rate of Exchange from 1*s.* 5¼*d.* to 1*s.* 4*d.*

1892-93, Revenue in India.

58. The Revenue in India in 1892-93 is expected to exceed the Budget Estimate for 1891-92 by Rx. 2,337,200. The more important increases are the following:—

	Rx.
Land Revenue, including that due to Irrigation	224,400
Salt	201,200
Stamps	81,400
Excise	148,700
Provincial Rates	92,200
Forests	56,100
Interest	108,800
Post Office	74,500
Telegraph	129,300
XXIV—Exchange	137,100
State Railways	883,900
Guaranteed Railways	80,000
Irrigation, Major Works	99,500

1892-93, Increases in Revenue in India.

59. The increases under Land Revenue and Provincial Rates are partly due to new settlements, but to a larger extent merely represent the portion of the heavy remissions in Madras this year, which, it is hoped, will be recovered next year on the assumption that the season will be normal.

Of the increase under Interest, Rx. 38,000 is due to the increase of the Currency investment by one crore; Rx. 40,600 is on account of interest on overdrawn capital of Railway Companies—a charge of the same amount occurs in the Railway Revenue Account; and the remainder is obtained from the growth of interest on loans to Municipalities, other Local Bodies, and Cultivators.

The estimated increase under Railway Revenue, which amounts to over 40 per cent. of the total increase in Revenue, is justified by the good results of the current year; the Railway Revenue is taken at a considerably lower figure than in the Revised Estimate for the present year.

The increase under XXIV—Exchange is due chiefly to the fall in the rate of Exchange, which has the effect of increasing the apparent receipts under this head.

The other increases may be ascribed to the general progress of the country.

1892-93, Decreases in Revenue in India.

60. The only important decrease is one of Rx. 68,300 under Army: it is due mainly to the discontinuance of the employment of State agency in Madras and Bombay for the supply of Malt liquor to soldiers, and should involve a corresponding decrease in the charges.

1892-93, Revenue in England.

61. The falling-off of £11,800 in the Revenue in England is accounted for by decreases under Interest, the Secretary of State anticipating that the loans from his cash balance will be less than this year, and under Telegraph, due to a change in the method of bringing to account the transactions with Telegraph Companies.

The increase in the receipts from Exchange on Sterling Revenue is due to the fall in the rate of exchange.

1892-93, Expenditure in India.

62. The following are the more important of the increases and decreases which result in the increase in the Expenditure in India of Rx. 941,400, shown in the statement in paragraph 56:—

Increases.	Rx.	Decreases.	Rx.
Land Revenue	143,500	Interest	166,900
Forest	65,200	Scientific and other Minor Departments	161,600
Post Office	83,900	Miscellaneous	114,900
Education	69,900	Miscellaneous Railway Expenditure	68,800
Medical	96,000	Civil Works	238,800
Famine Relief	127,000	Special Defence Works	89,100
37.—Construction of Railways	91,000		
State Railways, Working Expenses	224,600		
Ditto ditto Interest	137,300		
Army	441,200		

1892-93, Increases of Expenditure in India.

63. The increase under Land Revenue is distributed over all the Provinces except Assam. The more important increases are, in Bengal, Rx. 50,600—Rx. 42,900 being for larger expenditure on Survey and Settlements, some of it in Behar, and Rx. 9,000 for improved sanitation on Government estates: in Madras Rx. 38,300—most of this is due to the gradual introduction of a scheme for the revision of village establishments under which the Village officers are paid by fixed salaries, and recoveries effected by means of a Local Cess: in Burma Rx. 28,200—being increased expenditure on Survey and Settlement: in the North-Western Provinces and Oudh, Rx. 11,700—mostly in charges for District administration; and in Bombay Rx. 10,700—for arrears of allowances to Village officers and for the reorganisation of the Department of Land Records and Agriculture.

The increase under Forest is a consequence of the expansion of the operations, and of improvements in the organisation, of the Department. It is accompanied by an increase of Revenue.

Most of the increase shown under Post Office is nominal, being due to the transfer of certain Printing and Stationery charges, amounting to Rx. 64,200, to the head as explained in paragraph 76 in Section IV: the remainder is the normal annual increase due to the expansion of operations.

The increase under Education occurs in all Provinces, the largest increase being in the Local Expenditure in Madras.

Under Medical more than half of the increase shown above is nominal, being due to the transfer to this head from Miscellaneous of Local Sanitation charges in Madras; the remainder is distributed over all the Provinces except Bengal, where there is a small decrease.

In view of the scarcity in Madras, the Madras Government think it necessary to provide for an expenditure of ten lakhs of rupees under Famine Relief. The Bengal Government has also provided two lakhs under the head, and the Bombay Government one lakh.

The increase under the head 37, Construction of Railways, is mainly the result of a special provision of Rx. 118,300 to be expended in carrying out the Railway programme of the Government of India, and of an increase of Rx. 61,900 in the Provincial Expenditure on the Mayaveram-Mutupet Railway in Madras, counterbalanced by a decrease of Rx. 92,000 in that on the Hyderabad Umarkot Railway in Bombay.

The increase under State Railways, Working Expenses, is required in consequence of the anticipated increase in traffic and Railway Receipts.

The increase in State Railways, Interest, is a transfer from the Interest on Ordinary Debt, and follows, as a matter of course, the increase of the Capital Expenditure on Railways.

The increase under Army is accounted for by an increase of Rx. 205,000 in the pay of the British soldiers due to the fall in the rate of exchange, the soldier's pay varying with that rate: by an increase of Rx. 94,500 due to the occupation of the Chin-Lushai country and of Manipur, the cost of feeding troops in those outlying stations being high; and by an increase of about Rx. 230,000 on various measures designed to improve the efficiency of the Army: these increases are partially counterbalanced by a smaller provision for Expeditions.

1892-93, Decreases of Expenditure in India.

64. The decrease under Interest represents the transfers from Ordinary to Public Works Debt of Interest on the Capital Expenditure on Railways and Irrigation Works.

The decrease under Scientific and other Departments is due to the practical completion of Census work this year.

The decrease under Miscellaneous occurs in Madras: nearly half of it is due to the transfer to Medical of Local Sanitation charges, and the remainder to the omission of the "reserve" which was made by the Madras Government last year.

The decrease under Miscellaneous Railway Expenditure occurs because smaller provision is required for Railway Surveys.

Under Civil Works the Expenditure is reduced by Rx. 110,000 in the North-Western Provinces and Oudh, the Budget Estimate of 1891-92 having made special provision, amounting to Rx. 120,000, for water-supply and sanitation projects; and in Madras there is a reduction of Rx. 122,400, as the Local Government is restricting the expenditure in consequence of the strain thrown on its finances by the scarcity. There are also decreases in Bombay, Rx. 63,000; Bengal, Rx. 91,100 (the decreases in Bombay and Bengal are due partly to the revision of the Provincial Contracts rendering it necessary for the Local Governments to reduce for a time the high Public Works Expenditure which accumulated balances had enabled them to incur); the Punjab, Rx. 22,300; and the Central Provinces, Rx. 28,700; while increased expenditure is contemplated in Burma, Rx. 46,000, Assam, Rx. 98,900, and the smaller Provinces under the Government of India, Rx. 53,800, the last being due partly to the necessity of providing relief works in Ajmere.

The grant for Special Defence Works has been fixed at a lower amount than for 1891-92.

65. The increase in the deductions shown in the table in paragraph 56 on account of the "Adjustment of Provincial and Local Surplus or Deficit" represents the amount by which Local Governments propose to increase their Expenditure from accumulated balances Most of this increase may be ascribed to the revision of the Provincial Contracts explained in Section VI, by which a portion of the surpluses of Provincial Revenues are resumed by the Government of India. Notwithstanding the revision, most of the Local Governments are able to continue their expenditure on much the same scale as in the current year.

1892-93, Expenditure in England.

66. The Expenditure in England in the two years does not differ much. The only variations which need be noticed are those under Army. The expenditure on Military Stores, chiefly Ordnance, is expected to be less next year than this by £115,500; and a saving is anticipated in the Troopship Service of £27,200; while the charges of the War Office for British Forces in India are increased by £35,000, Furlough allowances by £10,000, and the Non-Effective charges by £31,600.

1892-93, Exchange. The increase of Rx. 1,725,200 in the Exchange on Expenditure in England is due to the fall in the rate from 1*s.* 5¼*d.* to 1*s.* 4*d.* This heavy loss is the main reason why the prospects of 1892-93 are not considerably better than were those of 1891-92.

Section IV.—Examination of the Estimates under the more important heads of Revenue and Expenditure.

LAND REVENUE.

67. The Estimates for 1891-92 and for 1892-93, and the Actuals for the three preceding years, are shown in the following statement:—

	Accounts, 1888-89.	Accounts, 1889-90.	Accounts, 1890-91.	Budget Estimate, 1891-92.	Revised Estimate, 1891-92.	Budget Estimate, 1892-93.
	Rx.	Rx.	Rx.	Rx.	Rx.	Rx.
Revenue, including that due to Irrigation .	23,687,445	24,671,165	24,754,205	25,155,500	24,570 000	25,379,900
Expenditure .	3,513,957	3,624,194	3,676,596	3,887,400	3,833 200	4,031 000
Net .	20,173,488	21,046,971	21,077,609	21,268,100	20,736,800	21,348,900

The scarcity in Madras and Upper Burma is the cause of the falling off in the Revenue in 1891-92. It is expected that the scarcity will reduce the collections below the Budget Estimate by Rx. 603,000 in Madras and by Rx. 48,900 in Upper Burma.

In the North-Western Provinces and Oudh also the Revenue is expected to be less than the Budget Estimate by Rx. 77,600. About Rx. 20,000 of this is due to remissions in a few districts necessitated by floods, inroads of wild cattle, and hail-storms: the rest is due to the expectation of the recurrence of arrears; the Budget Estimate for the current year was framed in the anticipation that the arrears from the previous year would be recovered in addition to the Revenue of this year, but the Local Government now expects that the arrears of this year will be heavy, though not so heavy as were those of the preceding year.

In all other Provinces except the Central Provinces and India General the collections will be above the Budget Estimate, the increase in Lower Burma being Rx. 88,400.

The increase of Revenue shown in the Budget Estimate for 1892-93 is partly due to the normal growth of Revenue, notably in the Punjab as the result of Settlement operations, but also to a large extent to the expectation that some portion of the suspensions in the current year will be recovered next year. The scarcity this year will therefore improve the Revenue next year, so far as can be now foreseen. But this is based on the hope that next year will be a normal season. Should there be any failure of the rains in the coming season, the Budget Estimate may not be realised.

The areas in which agricultural conditions give rise to anxiety are four: first, the Deccan districts in Madras and Bombay, part of the States of Mysore and Hyderabad, and some Madras districts to the south and east of these; second, Rajputana and some of the British districts on its borders in the Bombay Presidency; third, Behar; and fourth, some districts in Upper Burma. Whether matters will improve or grow seriously worse cannot be known with any certainty till June next. The Estimates have been framed in the hope that the serious calamity of a famine will not occur. If a famine should occur, not only will the Land Revenue be reduced, but other Revenue also will suffer, and

Expenditure must be increased under many heads beyond the amounts provided in the Estimates.

OPIUM.

68. The figures are—

	Accounts, 1888-89.	Accounts, 1889-90.	Accounts, 1890-91.	Budget Estimate, 1891-92.	Revised Estimate, 1891-92.	Budget Estimate, 1892-93.
	Rx.	Rx.	Rx.	Rx.	Rx.	Rx.
Revenue . . .	8,562,319	8,583,056	7,879,182	7,593,400	8,026,100	7,631,600
Expenditure . .	2,597,905	1,605,107	2,180,797	2,274,600	1,886,200	2,234,800
Net .	5,964,414	6,977,949	5,698,385	5,318,800	6,139,900	5,399,800

The average price of Bengal Opium in 1891-92 has been Rx1,058 a chest, whereas in the Budget Estimate a price of Rx1,000 a chest only was assumed. The Bengal receipts will consequently be higher than the Budget Estimate by Rx. 324,200.

The exports of Malwa Opium through Bombay have been larger than was anticipated, and the receipts in Bombay have improved by Rx. 110,000.

In accordance with Notification No. 2586, dated 26th June 1891, the number of chests of Bengal Opium to be sold in 1892-93 is smaller than in the current year But neverthless the rise in price justifies the placing of the Budget Estimate somewhat higher than that for this year. For Bombay the Estimate is placed at the same amount as for 1891-92.

The Expenditure in the current year will be lower than the Budget Estimate, the crop of opium having been smaller than expected. The Estimate of Expenditure for 1892-93 is based on the assumption that an average crop will be obtained. The reports regarding the crop indicate that it may be below the average; but it is not considered safe to act on this assumption in framing the Estimates.

SALT.

69. The figures are—

	Accounts, 1888-89.	Accounts, 1889-90.	Accounts, 1890-91.	Budget Estimate, 1891-92.	Revised Estimate, 1891-92.	Budget Estimate, 1892-93.
	Rx.	Rx.	Rx	Rx.	Rx.	Rx.
Revenue . . .	7,675,634	8,187,739	8,523,368	8,343,500	8,620,700	8,544,700
Expenditure . .	412,979	412,766	429,013	466,900	459,600	497,500
Net .	7,262,655	7,774,973	8,094,355	7,876,600	8,161,100	8,047,200

The Salt Revenue in the current year has increased above the expectations of the Budget Estimate in all Provinces with the exception of Madras. In Madras the quantity of salt consumed has increased as in other Provinces, and the decrease in Revenue is due to the allowance made for the exceptional increase in cash payments in 1890-91, mentioned in paragraph 34 of Part II of the Financial Statement of March last, having proved to be insufficient. The Estimate of Revenue for next year is moderately framed at an amount lower by Rx. 76,000 than the Revised Estimate of this year.

The consumption of salt since 1888-89 has been as under:—

	Maunds.
1888-89	31,395,000
1889-90	33,086 000
1890-91	33,320,000
and in 11 months of 1891-92	31,152.000

STAMPS.

70. The figures are—

	Accounts, 1888-89.	Accounts, 1889-90.	Accounts, 1890-91.	Budget Estimate, 1891-92.	Revised Estimate, 1891-92.	Budget Estimate, 1892-93.
	Rx.	Rx.	Rx.	Rx.	Rx.	Rx.
Revenue	3,927,088	4,087 908	4,068,969	4,148.200	4,226.900	4,229,600
Expenditure	154,172	134,373	130,019	132,400	136,100	140,900
Net	3,772,916	3,953,535	3,938,950	4,015,800	4,090,800	4,088,700

The Stamp Revenue fell off in the closing months of 1890-91, and the Revenue of that year was lower than that of the previous year. But the ground lost is expected to be more than made up in the current year.

EXCISE.

71. The figures are—

	Accounts, 1888-89.	Accounts, 1889-90.	Accounts, 1890-91.	Budget Estimate, 1891-92.	Revised Estimate, 1891-92.	Budget Estimate, 1892-93.
	Rx.	Rx.	Rx.	Rx.	Rx.	Rx.
Revenue	4,705,346	4,891,894	4,947,780	4,953,700	5,096,800	5,102,400
Expenditure	137 941	156,739	175,053	188,700	188,900	206,100
Net	4,567,405	4,735,155	4,772,727	4,765,000	4,907,900	4,896,300

The increase in the Excise Revenue is distributed over all the Provinces with the one exception of the North-Western Provinces and Oudh. The increase this year is largest in Bengal.

CUSTOMS.

72. The figures are—

	Accounts, 1888-89.	Accounts, 1889-90.	Accounts, 1890-91.	Budget Estimate, 1891-92.	Revised Estimate, 1891-92.	Budget Estimate, 1892-93.
	Rx.	Rx.	Rx.	Rx.	Rx.	Rx.
Revenue	1,332,784	1,506,686	1,743,218	1,700,900	1,687,000	1,691,800
Expenditure	133.897	135.021	134,652	140,600	137,200	142,300
Net	1,198,887	1,371,665	1,608,566	1,560,300	1,549,800	1,549,500

The rice duty realised in 1890-91 was, owing to special conditions, abnormally large, and the reduction this year has been even greater than was assumed in the Budget Estimate. The trade at present is active and, unless the next

monsoon rains in India should be deficient, in which case Burma rice will be required to supplement local deficiencies, the Estimates should be fully realised. The import revenue shows a normal increase.

ASSESSED TAXES.

73. The figures are—

	Accounts, 1888-89.	Accounts, 1889-90.	Accounts, 1890-91.	Budget Estimate, 1891-92.	Revised Estimate, 1891-92.	Budget Estimate, 1892-93.
	Rx.	Rx.	Rx.	Rx.	Rx.	Rx.
Revenue	1,520,940	1,595,274	1,617,396	1,610,300	1,644,600	1,645,200
Expenditure	27,128	27,681	29,246	31,600	29,700	31,800
Net	1,493,812	1,567,593	1,588,150	1,578,700	1,614,900	1,613,400

The receipts from Income Tax are increasing yearly with the growth in wealth and population.

FOREST.

74. The figures are—

	Accounts, 1888-89.	Accounts, 1889-90.	Accounts, 1890-91.	Budget Estimate, 1891-92.	Revised Estimate, 1891-92.	Budget Estimate, 1892-93.
	Rx.	Rx.	Rx.	Rx.	Rx.	Rx.
Revenue	1,349,047	1,486,303	1,448,002	1,511,100	1,497,800	1,567,200
Expenditure	792,000	780,035	784,113	905,700	879,800	970,500
Net	557,047	706,268	663,889	605,400	618,000	596,700

The financial results of Forest administration are expected to remain much the same as was estimated in March last. There has been a considerable increase of Revenue compared with the previous year, but the Expenditure has also increased. For next year a similar result is expected.

INTEREST.

75. The Interest receipts since 1888-89 are shown below:—

	Accounts, 1888-89.	Accounts, 1889-90.	Accounts, 1890-91.	Budget Estimate, 1891-92.	Revised Estimate, 1891-92.	Budget Estimate, 1892-93.
REVENUE—						
India . Rx.	643,310	676,703	710,552	764,700	799,200	873,500
England . £	135,477	135,633	166,194	30,000	58,000	25,000
Exchange . Rx.	63,035	60,865	54,304	11,700	25,300	12,500
TOTAL . Rx.	841,822	873,201	931,050	806,400	882,500	911,000

The moderate and steady rate of progress in the receipts in India continues. The increase in the Revised Estimate is accounted for by the receipt of Rx. 39,700, as interest on overdrawn Capital of Railway Companies, the other receipts being slightly reduced owing to the sums placed at the disposal of Local Governments for loans to Municipalities and other bodies not having been fully utilised. Of the increase in the Budget Estimate Rx. 40,600 is for interest on

overdrawn Capital, Rx. 38,000 is in consequence of the increase of the Currency investment by one crore in accordance with the Notification in the Finance and Commerce Department No. 4861, dated 3rd December 1891, and the remainder comes from the loans to Municipalities and other bodies.

The Secretary of State obtained higher rates of interest on the temporary investments of his cash balance than he was able to count on in the Budget Estimate. During next year the cash balance available for investment will be smaller than this year.

The Expenditure under Interest (other than that charged to Railways and Irrigation Works) has been as follows since 1881-82:—

Year.	India.	England.	Exchange.	Total.
	Rx.	£	Rx.	Rx.
1881-82	1,827,369	2,513,126	518,461	4,858,956
1882-83	1,718,857	2,481,978	569,349	4,770,184
1883-84	1,516,887	2,447,333	559,241	4,523,461
1884-85	1,371,347	2,612,657	634,855	4,618,859
1885-86	1,136,962	2,429,243	764,656	4,330,861
1886-87	736,495	2,597,193	976,715	4,310,403
1887-88	662,025	3,365,509	1,414,220	5,441,754
1888-89	811,191	2,662,331	1,238,737	4,712,259
1889-90	760,375	2,402,478	1,078,110	4,240,963
1890-91	801,180	2,513,000	821,124	4,195,304
1891-92, Budget	517,600	2,407,500	942,100	3,867,200
1891-92, Revised	543,600	2,639,500	1,150,900	4,334,000
1892-93, Budget	383,100	2,396,000	1,198,000	3,977,100

The decrease in the Expenditure in India is the consequence of the transfers from Ordinary to Public Works Debt.

The increase in the Expenditure in England in the Revised Estimate is on account of discount paid on the loan raised in England and on sales of stock, as explained in para. 54.

POST OFFICE.

76. The figures are—

	Accounts, 1888-89.	Accounts, 1889-90.	Accounts, 1890-91.	Budget Estimate, 1891-92.	Revised Estimate, 1891-92.	Budget Estimate, 1892-93.
	Rx.	Rx.	Rx.	Rx.	Rx.	Rx.
Revenue	1,281,540	1,301,247	1,402,503	1,423,900	1,453,200	1,498,400
Expenditure	1,342,452	1,376,619	1,396,744	1,459,000	1,510,000	1,555,400
Net { Revenue (+) / Expenditure (−) }	−60,912	−75,372	+5,759	−35,100	−56,800	−57,000

In 1890-91 for the first time the Post Office transactions as recorded on the Finance and Revenue Accounts showed a small surplus. A similar small surplus would have appeared on the Revised Estimate for 1891-92 and on the Budget Estimate for 1892-93 had it not been for a recent decision to charge to the Post Office the expenditure on printing and stationery incurred on its account in the Central Press and Stationery Office, as well as the portion incurred directly by Post Office officials, which latter has always been so charged.

TELEGRAPH.

77. The figures for the Capital Account and the Revenue Account of the Telegraph Department are—

	Accounts, 1887-88.	Accounts, 1888-89.	Accounts, 1889-90.	Accounts, 1890-91.	Budget Estimate, 1891-92.	Revised Estimate, 1891-92.	Budget Estimate, 1892-93.
	Rx.	Rx.	Rx.	Rx.	Rx.	Rx.	Rx.
Telegraph Capital Account—							
Receipts	231	1,191	...	...	...	...	...
Expenditure	256,338	158,858	162,080	179,928	190,600	195,600	217,700
Net Expenditure	256,107	157,667	162,080	179,928	190,600	195,600	217,700
Telegraph Revenue Account—							
Revenue	763,655	740,957	766,865	781,035	779,500	910,900	892,600
Expenditure	530,289	545,234	569,275	582,870	601,800	636,700	659,500
Net Receipts	233,366	195,723	197,590	198,165	177,700	274,200	233,100

The increase in receipts during the current year is chiefly due to the large expansion of traffic from India and other Eastern Countries to Europe, and to the development of press and other private traffic in India. There is also a special increase caused by telegrams relating to Military Expeditions.

MINT.

78. The figures are—

	Accounts, 1888-89.	Accounts, 1889-90.	Accounts, 1890-91.	Budget Estimate, 1891-92.	Revised Estimate, 1891-92.	Budget Estimate, 1892-93.
	Rx.	Rx.	Rx.	Rx.	Rx.	Rx.
Revenue	221,138	269,512	354,152	266,300	181,300	227,000
Expenditure	99,967	120,530	121,888	116,700	98,200	115,300
Net	121,171	148,982	232,264	149,600	83,100	111,700

The coinage in 1890-91 was unprecedentedly large. This year it has fallen much below the average. Hence the reduction in the Revenue and Expenditure shown in the Revised as compared with the Budget Estimate. A coinage more nearly equal to the average is assumed in 1892-93.

The value of silver bullion presented at the Mints for coinage has been as under in the last few years:—

	Rx.
1884-85	5,610,880
1885-86	8,838,580
1886-87	3,822,170
1887-88	7,135,860
1888-89	6,550,852
1889-90	8,006,370
1890-91	12,547,736
1891-92 (Estimated)	5,750,000

CIVIL DEPARTMENTS.

79. The figures of Expenditure for this group are—

	Accounts, 1888-89.	Accounts, 1889-90.	Accounts, 1890-91.	Budget Estimate, 1891-92.	Revised Estimate, 1891-92.	Budget Estimate, 1892-93.
	Rx.	Rx.	Rx.	Rx.	Rx.	Rx.
General Administration	1,745,156	1,759,193	1,740,465	1,763,800	1,786,700	1,831,600
Law and Justice { Courts	2,694,252	2,716,275	2,759,431	2,844,200	2,831,700	2,860,600
Law and Justice { Jails	834,183	857,691	866,460	916,100	891,200	908,900
Police	3,754,294	3,887,564	3,859,683	3,938,500	3,805,400	3,910,000
Marine (including River Navigation)	578,284	657,865	559,257	710,600	663,800	780,200
Education	1,293,660	1,316,286	1,371,735	1,426,900	1,414,500	1,496,700
Ecclesiastical	156,856	161,068	166,905	169,900	161,000	169,300
Medical	772,233	785,243	806,937	833,100	876,800	931,100
Political	756,193	6[illegible]5,251	770,541	764,800	821,500	771,600
Scientific and other Minor Departments	428,432	438,967	485,747	608,600	611,000	472,500
TOTAL	13,013,543	13,235,400	13,386,261	13,976,500	13,863,600	14,132,500

A considerable part of the increase under General Administration occurs in the Exchange on Sterling Expenditure; the remainder is distributed over the Expenditure in England and of the Government of India and most of the Local Governments.

The provision made in the Budget Estimate of this year for Judicial Establishments has proved to be more than was required in Bengal, Madras, and Bombay, and the increase of those establishments in the two former Provinces will not be so great as was anticipated last March. On the other hand, it has been necessary to increase the expenditure in the Central Provinces, the North-Western Provinces and Oudh, and the Punjab.

The saving shown in the Revised Estimate of this year under Jails occurs chiefly in Bengal and Burma, the greater part of the saving in Bengal being under Manufactures and being more than counterbalanced by a falling off in the receipts. On the other hand, there has been a large excess in the North-Western Provinces and Oudh, where the Jail population is high.

The saving shown in the Revised Estimate under Police has been explained in paragraph 51. The Expenditure in Burma will be smaller also in 1892-93; but that saving is nearly swallowed up by renewed provision in all other Provinces for increasing the efficiency of the Police.

The reduction in the Revised Estimate under Marine occurs in Burma and England. In Burma it has not been possible to complete the construction of a vessel required for the Baragua Flats. In England the subsidy to the Admiralty mentioned in paragraph 29 of Part II of the Financial Statement of March last will not be payable for the whole year, owing to there having been delay by the Admiralty in taking over charge of the Defence vessels, this saving being partly absorbed by increased expenditure on the purchase of stores. In 1892-93 the vessel for Burma will be paid for, the Admiralty subsidy will be payable for the whole year, the expenditure on English stores will be as high as this year, and there will also be an increase in the charges of the Imperial Marine Department in India owing chiefly to the establishment of ferries on the Indus for Military purposes.

The increase in Expenditure on Education and for Medical purposes continues. But Rx. 50,000 of the increase under Medical is nominal in both years, being due to a change in the classification in the accounts of Local Sanitation charges in Madras.

Under Scientific and other Minor Departments there will be a large reduction next year, as but little Census Expenditure will remain to be met. The reduction would have been greater had it not been for the recent sanction to the establishment of a Civil Veterinary Department.

MISCELLANEOUS CIVIL CHARGES.

80. The figures for this group are—

	Accounts, 1888-89.	Accounts, 1889-90.	Accounts, 1890-91.	Budget Estimate, 1891-92.	Revised Estimate, 1891-92.	Budget Estimate, 1892-93.
	Rx.	Rx.	Rx.	Rx.	Rx.	Rx.
Territorial Political Pensions	543,657	535,582	527,569	530,000	568,000	536,200
Civil Furlough and Absentee Allowances	318,418	297,475	232,747	292,100	279,300	314,500
Superannuation Allowances and Pensions	3,114,823	3,140,361	3,051,541	3,218,500	3,334,900	3,497,600
Stationery and Printing	524,372	558,730	592,436	572,000	599,200	576,800
Miscellaneous	383,106	282,135	274,223	360,300	263,600	245,800
TOTAL	4,884,376	4,814,283	4,678,516	4,972,900	5,045,000	5,170,900

The increase in the Revised Estimate under Territorial and Political Pensions occurs in England, where arrears of the stipend of His Highness Maharaja Dhuleep Sing were paid, the payments to the Maharaja being also increased by a reduction in the rate of interest on the advances to him.

The amounts of the payments on account of Furlough Allowances fluctuate with the rate of exchange.

The charges for Pensions are increasing, a part of the increase in this year and next being due to the decision to pay certain pensions at the minimum rate of 1*s.* 9*d.* the rupee.

The amounts shown in the Revised Estimate of 1891-92 and in the Budget Estimate of 1892-93 under Stationery and Printing would have been much larger had it not been for the decision mentioned in para. 76 to charge the Post Office with the cost of all its printing and stationery. This has had the effect of transferring from the head Stationery and Printing to Post Office Rx. 62,300 in the Revised Estimate, and Rx. 64,200 in the Estimate for next year. There is therefore a considerable real increase of Expenditure under this head to be explained. While there has been some increase in the amount of printing done and of stationery used, the main reason of the rise under the head is to be found in the orders issued some years ago to substitute, as far as possible, the use of paper manufactured in India for paper procured from England. In the present year the purchases of paper in India have shown a marked increase, as the stocks of paper in the Calcutta Stationery Office procured from England under the old procedure have hitherto met a large portion of the demands, and those stocks have only now been exhausted. The exhaustion of the stock of English paper was not sufficiently allowed for in framing the Budget Estimate. The stocks of English paper having been exhausted, the local purchases must continue on the higher level in future years. The reduction of the sterling charges in England caused by the substitution of Indian-made for English-made paper took place some years ago when the indents for paper were reduced: the corresponding increase in the charges in India has only now reached its full extent.

The reduction in the Expenditure under Miscellaneous, both in the Revised Estimate of 1891-92 and in the Budget Estimate of 1892-93, as compared with the Budget Estimate of 1891-92, has been explained in paragraphs 51 and 64.

FAMINE RELIEF AND INSURANCE.

81. The figures are—

	Accounts, 1888-89.	Accounts, 1889-90.	Actuals, 1890-91.	Budget Estimate, 1891-92.	Revised Estimate, 1891-92.	Budget Estimate, 1892-93.

Net charge on account of the Bengal-Nagpur and the Indian Midland Railways . .	430,182	462,009	482,351	457,000	290,100	293,300
TOTAL EXPENDITURE CHARGEABLE TO THE FAMINE GRANT .	508,518	1,062,009	1,082,351	1,500,000	1,500,000	1,500,000

In accordance with the policy announced in the last two Financial Statements, the Famine Grant has been raised to its original amount of Rx.1,500,000 in the present year, and will be maintained at that amount in 1892-93.

The scarcity in Madras and Rajputana has caused the Expenditure on Famine Relief to exceed the Budget Estimate; and the Bombay Government has provided for some expenditure in the latter months of the year, while for next year the Madras Government has provided Rx.100,000, the Bengal Government Rx. 20,000, and the Bombay Government Rx 10,000.

It may be mentioned here that the provision made in Madras for Famine Relief has the effect of reducing the Madras Provincial balance below the prescribed minimum of Rx. 200,000. As the minimum balances of Local Governments were prescribed in order that there might be a reserve to meet Expenditure caused by famine, the reduction of the Madras balance is in this instance unobjectionable. This increase of Expenditure on direct Famine Relief is but a small portion of the effect produced on the finances by the scarcity. In addition to the loss of Land Revenue mentioned in para. 67, it has been necessary to open Famine Relief works in Madras, Ajmere, and Upper Burma, which will involve considerable expenditure both this year and next; but the expenditure on them is charged to the heads of account proper to the particular works opened.

The excess expenditure shown in the Revised Estimate on Protective Irrigation Works is on account of the more vigorous prosecution of the Rushikulya project in Madras.

The reduction under Protective Railways and the increase under Reduction of Debt shown in the Revised Estimate are in consequence of it having been found impossible to spend the full amount of the grant provided in the Budget Estimate for Capital Expenditure on Railways.

RAILWAYS.

82. The following table shows the main features of the Railway Revenue Account since 1888-89:—

	REVENUE.							EXPENDITURE.					
	Actuals, 1888-89.	Actuals, 1889-90.	Actuals, 1890-91.	Budget, 1891-92.	Revised, 1891-92.	Budget, 1892-93.		Actuals, 1888-89.	Actuals, 1889-90.	Actuals, 1890-91.	Budget, 1891-92.	Revised, 1891-92.	Budget, 1892-93.

Loss on the Railway Account.	2,233,392	1,852,631	687,291	1,501,700	528,800	1,574,500							
TOTAL .	17,754,088	18,458,202	17,923,269	19,374,100	20,183,700	20,407,200	TOTAL .	17,754,088	18,458,202	17,923,269	19,374,100	20,183,700	20,407,200

Railways in 1891-92.

It will be seen that the net loss on the railway account, which was estimated in the Budget of the current year at Rx. 1,501,700, is in the Revised Estimate placed at only Rx. 528,800, being an improvement of Rx. 972,900. The increase in the net traffic receipts of State Railways is Rx. 1,019,100, and the increase in the net traffic receipts of Guaranteed Railways Rx. 283,000; on the other hand, the fall in exchange, which increases the equivalent of the sterling payments of interest in England, causes an additional charge of Rx. 238,200, and the surplus profits payable to Companies are increased by Rx. 161,300.

The Miscellaneous Railway Expenditure is now expected to be less than the Budget Estimate by Rx. 39,800.

State Railways, 1891-92.

The gross traffic receipts of State Railways will probably exceed the amount entered in the Budget by Rx. 1,508,100, while the excess in working expenses will be Rx. 489,000.

The principal fluctuations in net receipts are the following:—

	Revised Estimate more (+) or less (—) than the Budget Estimate.
	Rx.
East Indian Railway	+365,000
North-Western Railway	+300,000
Rajputana-Malwa Railway	+197,500
Bengal Nagpur Railway	+158,000
Indian Midland Railway	+ 22,000
Oudh and Rohilkhand Railway	+ 60,000
Southern Mahratta Railway	+ 15,500
Bengal and North-Western and Tirhoot Railways . .	— 97,500
Eastern Bengal State Railway	—102,500

On all the lines showing a considerable increase, the principal cause of the increase is the largely augmented traffic in wheat and seeds carried to Calcutta, Bombay, and Karachi for export to Europe. Scarcity in Rajputana and high prices in Hyderabad and the Southern Mahratta country have caused considerable movement in food-grains. Part of the increase on the East Indian Railway is due to the continued expansion of the coal traffic.

In coaching traffic the chief contributors to the increase are the North-Western and Oudh and Rohilkhand Railways, on account of fairs at Hardwar, and the Bengal-Nagpur, which shows a satisfactory development in the whole of its traffic.

The decrease in net receipts on the Bengal and North-Western and Tirhoot Railways is chiefly due to provision being made for payment to the Company of

their share of net earnings for three half-years, as their share for the second half-year of 1890 was not paid in 1890-91, and so became an unexpected charge against 1891-92; there is also a slight falling off in the earnings, due to scarcity in Tirhoot.

The Eastern Bengal State Railway has suffered from the partial failure of the jute crop, but the main cause for the falling off in net receipts is the large renewals which have been carried out, and which were not anticipated when the Budget Estimates were framed.

Guaranteed Railways, 1891-92. The gross receipts of the Madras Railway are Rx. 30,000 below the Budget Estimate.

The Bombay, Baroda and Central India Railway and the Great Indian Peninsula Railway are now expected to yield, respectively, Rx. 55,000 and Rx. 258,000 more than the net receipts entered in the Budget Estimate. The improvement is all in goods traffic and is due to the causes just mentioned in connection with State Railways.

Railways in 1892-93. Excluding Exchange, on which account a sum of Rx. 406,300 is provided in excess of that entered in the Revised Estimate, the net result on the Railway account for 1892-93 is Rx. 639,400 worse than the Revised Estimate of the current year. It is not considered safe to estimate for such exceptional traffic as has been secured in 1891-92; and there is a considerable increase in the charge for interest owing to increase of Capital outlay.

State Railways, 1892-93. In 1892-93 the gross receipts of State Railways are estimated at Rx. 624,200 less than in the Revised Estimate of 1891-92. The most noticeable fluctuations occur on the East Indian Railway (—Rx.280,000); Rajputana-Malwa Railway (—Rx.243,800); Bengal-Nagpur Railway (+ Rx. 32,000); Eastern Bengal State Railway (+Rx. 35,000); Bengal and North-Western and Tirhoot Railways (+Rx. 35,000); North-Western Railway (—Rx. 340,000); South Indian Railway (+Rx. 91,000).

Guaranteed Railways, 1892-93. The net traffic receipts of the Guaranteed Railways are taken at Rx. 203,000 below the Revised Estimate of 1891-92; this is entirely due to the Estimates for 1892-93 being framed on the basis of a normal year with an allowance for natural expansion, and not on the very high receipts of the current year. Surplus profits, Land and Supervision are expected to diminish by Rx. 150,500.

IRRIGATION.

83. The figures are—

	Actuals, 1888-89.	Actuals, 1889-90.	Actuals, 1890-91.	Budget, 1891-92.	Revised, 1891-92.	Budget, 1892-93.
	Rx.	Rx.	Rx.	Rx.	Rx.	Rx.
Revenue . . .	1,900,718	1,991,078	2,172,578	2,160,600	2,249,600	2,216,700
Expenditure . .	2,622,964	2,652,707	2,742,128	2,883,100	2,963,200	2,919,500
Net Expenditure .	722,246	661,629	569,550	722,500	713,600	702,800

The improvement in Revenue during the current year is due to the irrigated area in the North-Western Provinces and Punjab having been larger than was anticipated in the Budget Estimate for 1891-92.

The Budget for the ensuing year shows that the revenue is expected to fall off by Rx. 32,900. The decrease occurs in the North-Western Provinces and

Oudh, where it is not anticipated that the season of 1892-93 will be so favourable for artificial irrigation as those of the previous two years. On the other hand, increases are expected from the growth of irrigation in the Punjab and Madras.

The increase in Expenditure in the current year is mainly due to Famine Relief Works in Upper Burma, Madras, and Rajputana. The Budget provides for a decrease in expenditure owing to the curtailment of outlay on Minor Irrigation Works in Madras and the cessation of Famine Works in Upper Burma.

BUILDINGS AND ROADS.

84. The figures are—

REVENUE.

	Actuals, 1888-89.	Actuals, 1889-90.	Actuals, 1890-91.	Budget, 1891-92.	Revised, 1891-92.	Budget, 1892-93.
	Rx.	Rx.	Rx.	Rx.	Rx.	Rx.
Military and Civil Works	604,753	650,398	649,289	597,100	615,700	606,400

EXPENDITURE.

	Actuals, 1888-89.	Actuals, 1889-90.	Actuals, 1890-91.	Budget, 1891-92.	Revised, 1891-92.	Budget, 1892-93.
	Rx.	Rx.	Rx.	Rx.	Rx.	Rx.
Military Works . .	1,108,206	1,138,463	1,220,676	1,130,300	1,215,200	1,183,800
Civil Works . .	4,202,526	4,273,726	4,510,231	4,978,800	5,033,500	4,736,300

The slight improvement in revenue in the Revised Estimate of 1891-92 is chiefly due to increased receipts from tolls on ferries and roads maintained from Local Funds.

The increase of Rx. 84,900 in the Military Works expenditure in the Revised is mainly due to special expenditure on the restoration of buildings at Quetta damaged by rain, and to outlay of Rx. 61,600 on measures intended to facilitate the speedy mobilization of the army in time of war. The increase of Imperial expenditure in 1891-92 under Civil Works amounts to Rx. 74,800, and is due to special expenditure on buildings at Quetta and Famine Relief Works in Upper Burma and in Rajputana. There is a decrease of Rx. 83,400 under Provincial.

An increase of Rx. 63,300 occurs under Local for Public Works under the control of Local Boards.

The Budget for the ensuing year provides for a decrease of Rx. 52,406 in the Imperial (Military and Civil Works) expenditure: the special expenditure of 1891-92 will not recur next year.

The figures for the Provincial portion of the Civil Works expenditure are:—

	Actuals, 1888-89.	Actuals, 1889-90.	Actuals, 1890-91.	Revised, 1891-92.	Budget, 1892-93.
	Rx.	Rx.	Rx.	Rx.	Rx.
Provincial Civil Works outlay .	1,814,931	1,945,626	2,188,276	2,490,800	2,198,500

ARMY.

85. The figures are—

Years.	India.	England.	Exchange.	Total.
	Rx.	£	Rx.	Rx.
1888-89	14,812,591	3,746,205	1,743,045	20,301,841
1889-90	14,944,095	3,957,703	1,776,016	20,677,814
1890-91	14,799,128	4,440,125	1,450,815	20,690,068
1891-92 Budget	14,565,500	4,661,600	1,824,100	21,051,200
1891-92 Revised	15,625,000	4,792,400	2,089,500	22,506,900
1892-93, Budget	15,006,700	4,594,500	2,297,300	21,898,500

The variations in the figures are explained in paragraphs 49, 54, 60, 63, and 66.

SPECIAL DEFENCE WORKS.

86. The following table shows the Expenditure on "Special Defence Works":—

	Rx.
To end of 1885-86	137,811
1886-87	325,626
1887-88	456,017
1888-89	789,595
1889 90	689,481
1890-91	491,837
1891-92 Budget Estimate	847,000
1891-92 Revised „	550,000
1892-93, Budget „	614,500

As has usually been the case in the past, the grant for this expenditure will not be fully utilized in the current year; and a smaller grant has been given for 1892-93. The lapse is chiefly on the English grant, and the slower progress in England involves less outlay in India.

The total expenditure on Special Defence Works being estimated at Rx. 5,000,000, if the amounts shown above for 1891-92 and 1892-93 are spent, there will remain Rx. 945,133 to be incurred in 1893-94 and future years.

UPPER BURMA.

87. The following tables give the Revenue, the Expenditure, and the net Expenditure on account of Upper Burma from the year following the annexation:—

REVENUE.

	Land Revenue.	Other Civil Revenue.	State Railway Receipts.	Total.

Section V.—Expenditure not charged to Revenue.

88. The following table gives the figures of the estimates for 1891-92 and 1892-93 for Capital Expenditure on Railways exclusive of sums found by Local Governments out of Provincial resources, the amounts charged to the Famine grant and to the head "37—Construction of Railways" being included for convenience, although charged to Revenue:—

	India.	England.	Exchange.	Total.
	Rx.	Rx.	Rx.	Rx.
1891-92, Budget Estimate	2,266,600	1,192.000	466,400	3,925,000
1891-92, Revised Estimate	1,825,200	870,000	379,300	3,074.500
1892-93, Budget Estimate	2,542,000	1,382,000	691,000	4,615,000

Of the totals shown above the following amounts are taken as charges against the Famine Grant for Protective Railways, namely, in the Budget Estimate of 1891-92, Rx. 975,000; in the Revised Estimate of 1891-92, Rx. 294,900; and in 1892-93, Rx. 1,011,700. In 1892-93 Rx. 118,300 is also charged under 37—Construction of Railways.

The Capital Expenditure on Railways in 1891-92 will be less than the Budget grant by Rx. 850,500 Of this lapse, Rx. 170,400 has been utilised for increased Capital Expenditure on Irrigation Works, and the remainder appears in the reduction in the Revised Estimate of the Expenditure on Protective Railways. The heaviest expenditure has been on the East Coast, the Mu Valley, the Godra-Rutlam, South Indian (including Villupuram-Guntakal), and the Dharmaveram-Hindupur Railway. The Chaman Extension of the Sind-Pishin Railway has been completed during the year, and also the Mianwali-Mari Branch of the North-Western system, while a start was made on the Barsoe-Kishengunge, the Lucknow-Rai Bareli-Jaunpur, the Bengal-Assam, the Bareilly-Rampur-Moradabad, the Mari-Attock, and the Muskhaf-Bolan Railways.

The provision for 1892-93 will, it is hoped, practically complete the Villupuram-Guntakal Section of the South Indian Railway and the Dharmaveram-Hindupur Extension, while large grants have been provided for the Godra-Rutlam, the Bareilly-Rampur-Moradabad, the Mari-Attock, the Lucknow-Rai Bareli-Jaunpur, gradient improvements of the North-Western Railway, the Mu Valley, the Bengal-Assam, and the Jherria Extension of the East Indian Railway.

The following figures show the rate at which Railways have been constructed at the cost, or on the responsibility, of the Government since 1880 :—

Date.	Number of miles open.
31st March 1880	8,382
,, 1881	9,134
,, 1882	9,437
,, 1883	9,748
,, 1884	10,230
,, 1885	11,283
,, 1886	11,634
,, 1887	12,536
,, 1888	13,448
,, 1889	14,184
,, 1890	14,832
,, 1891	15,621
,, 1892 (Estimate)	15,818

The following table gives the total Capital Outlay on Railway Construction up to date :—

To end of—	State Railways.	State Railways constructed through the agency of Companies.	Guaranteed Railways.	Total.	Annual progress.
	Rx.	Rx.	Rx.	Rx.	Rx.
1879-80	27,983,837	...	96,829,969	124,813,806	...

1892-93, Budget	139,975,646	24,137,709	45,477,963	209,591,318	6,498,800

* Includes Rx. 2,790,140 on account of past expenditure on the East Indian Railway, which must be deducted to arrive at the normal annual progress.
† Includes Rx. 294,937 on account of Eastern Bengal Railway.
‡ Includes Rx. 1,007,244 on account of Scinde, Punjab and Delhi Railway Company.
§ Includes Rx. 207,104 on account of South Indian Railway Company.

Capital Expenditure on Irrigation Works.

89. The figures of the Accounts and Estimates for Capital Expenditure on Irrigation Works not charged to Revenue are :—

Actuals, 1888-89.	Actuals, 1889-90.	Actuals, 1890-91.	Budget, 1891-92.	Revised, 1891-92.	Budget, 1892-93.
Rx.	Rx.	Rx.	Rx.	Rx.	Rx.
459,890	378,932	483,849	550,000	720,400	550,000

The increase of Rx. 170,400 in the Expenditure of the current year is due to a portion of the lapse on the Railway Capital grant having been utilised to secure the earlier completion of the Chenab Canal Works.

Section VI.—Revision of the Provincial Contracts.

90. It has long been the policy of the Government of India to delegate some of its powers in respect of certain Revenues and Expenditure to Local Governments.

The first step in this direction was taken in 1870, when certain heads of Expenditure were made Provincial, the Local Governments being given, under conditions, the powers possessed by the Government of India in the matter of sanctioning expenditure, and the financial responsibility of Local Governments being enforced by requiring them to keep the total Provincial Expenditure within the amount assigned for all the heads, *plus* any savings from that amount effected in previous years.

This policy was subsequently extended by making Provincial also some heads of Revenue, the financial responsibility of the Local Governments remaining as before, with the addition that they were allowed to spend any increases of Revenue obtained by them during the period for which the arrangement was made.

Still later, in restriction of the power of spending savings of previous years, Local Governments were required to maintain minimum balances of amounts fixed for each Province, to be drawn against in the event of pressure, such, for example, as the opening of works for the employment of labour in time of scarcity.

The arrangements with Local Governments to give effect to the delegation of powers as above explained are made for fixed periods, at the end of which the arrangements are subject to revision as well in respect of the heads of Revenue and Expenditure made Provincial as in respect of the assignment, including Revenue, made to the Local Government to cover the Provincial Expenditure.

91. The existing arrangements described in general terms in the preceding paragraph, commonly called contracts, come to an end with the close of the current year, having been made for the five years 1887-88 to 1891-92; and it has been necessary to settle the terms of the contracts to be in force during the next five years. The Government of India have been in correspondence with all the Local Governments concerned during the year. The final result of that correspondence is as follows.

92. The new contracts are framed on the same general lines as the preceding ones. The terms of the contract for each Province are contained in two Resolutions. The first of these is reprinted as an Appendix to this statement; it consolidates and re-enacts, with some modifications, the general rules relating to the powers of Local Governments under the scheme of provincial finance. In the second the heads of Revenue and Expenditure which are made provincial

are stated, it being declared that Revenue and Expenditure classified in the accounts under those heads, and no other, is Provincial; and the amount of the addition to, or the deduction from, the Provincial Revenue which is required to place the province in equilibrium is stated.

93. The following statement shows the total Provincial Expenditure and Revenue, as estimated for the new contracts, and the amount of the adjusting addition to or deduction from the Revenue of each province:—

	Central Provinces.	Burma (Lower).	Assam.	Bengal.	North-Western Provinces and Oudh.	Punjab.	Madras.	Bombay.
	Rx.	Rx.	Rx.	Rx.	Rx.	Rx.	Rx.	Rx.
Ordinary Revenue being a share of certain receipts.	567,600	1,427,500	657,700	4,249,300	3,403,500	1,370,400	2,479,300	3,123,900
Adjustment .	220,500	414,300	—112,700	—143,900	—250,600	348,500	325,400	771,400
Total Revenue	788,100	1,841,800	545,000	4,105,400	3,152,900	1,718,900	2,804,700	3,895,300
Expenditure .	788,100	1,841,800	545,000	4,105,400	3,152,900	1,718,900	2,804,700	3,895,300

94. The Revenue and Expenditure shown in the above statement are estimates of the amounts which may be taken as fairly representing, generally, the normal Revenue and Expenditure of each Province at the existing stage of growth. The actual Revenue and Expenditure will of course vary from year to year. But the amount of the adjustment is fixed for the five years.

95. The amount of the adjustment shown in paragraph 93 is not an index either of the financial position of the province or of the effect on the provincial finances of the revision of the contract. It is merely the amount required to place in equilibrium the Revenue and Expenditure which it has been found expedient to make provincial.

96. The financial effect of the revision of the contracts is the resumption by the Government of India of the following surpluses from Provincial Governments:—

	Rx.
Central Provinces	22,700
Lower Burma	58,900
Bengal	51,900
North-Western Provinces and Oudh	56,900
Punjab	41,000
Madras	103,800
Bombay	131,100
TOTAL .	466,300

97. These surpluses are the share of the increase in Revenue in the past five years which the needs of Imperial Revenues require the Government of India to resume from Local Governments. The statement below shows to what extent the Provincial Revenues have increased in each Province since the estimate for the contracts now coming to an end was framed. The statement also

shows the extent to which the Local Governments have used their increased Revenues in the five years, and the closing balance of each year:—

		Estimate for Contract of 1887-88 to 1891-92.	Accounts. 1887-88.	1888-89.	1889-90.	1890-91.	Revised. 1891-92.	Increase of Revenue in the Revised as compared with the Contract Estimate.

* Actuals of 1886-87.

Note.—In this statement Railway Revenue and Expenditure have been taken net.

98. It will be seen from the foregoing statement that the increase of revenue in the past five years has in every Province been much greater than the amount of the surplus which is now to be resumed. The difference the Local Governments have been allowed to retain to enable them to meet the increase of Expenditure which has occurred in the five years. It would have been desirable, if possible, to allow the Local Governments to retain the whole of the increase, as all of them have many needs on which money could be beneficially spent. But as stated in Part I of this Statement, this could not have been done without imposing additional taxation, and it is a less evil to restrict to some extent the progress of useful Provincial Expenditure than to impose additional taxation. The total increase in Provincial Revenue for all Provinces has been Rx. 2,042,700. The surplus resumed by the Imperial Government is Rx. 466,300, or less than one-fourth. The amount to be resumed has been fixed in every case on a careful consideration of the circumstances of each Province.

Section VII.—Ways and Means.

HOME TREASURY.

99. The Budget and Revised Estimates of the transactions of the Home Treasury for 1891-92 compare as follows:—

	Budget, 1891-92.	Revised, 1891-92
NET RECEIPTS.	£	£
Council Bills	16,000,000	16,200,000
3 per cent. Stock issued	2,600,000	4,600,000
Capital Receipts from Railway Companies	2,716,800	987,700
Deposits and Advances	4,700	1,600
Add—Opening Balance	3,532,473	3,835,050
TOTAL	24,853,973	25,624,350
NET OUTGOINGS.		
Excess of Expenditure over Revenue	15,759,500	15,938,200
Capital Expenditure of Government in England	1,196,400	878,200
Permanent Debt—		
Discharge of 3½ per cent. Debentures	1,386,000	1,386,000
Discharge of Oudh and Rohilkhund and South Indian Railway Debentures	117,100	117,100
4 per cent. Stock discharged	...	2,500
Issues to Railway Companies on Capital Account	2,974,000	3,126,400
On account of remittance from India	1,195,300	914,900
Add—Closing Balance	2,225,673	3,261,050
TOTAL	24,853,973	25,624,350

Council Bills.

The total estimate of the Secretary of State's drawings for the two years 1891-92 and 1892-93 is £33,200,000. It is now expected that Rx. 16,200,000 will be drawn during the current year.

3 per cent. Sterling Loan issued.

As explained in paragraph 68, page 46, of the last Financial Statement, the loan of £2,600,000 proposed in the Budget was required partly for the repayment of a portion of the India 3½ per cent. debentures which fell due on 16th August 1891 and partly for advances to Railway Companies under the Oudh and Rohilkhund Railway Purchase Act. The loan was issued at an average rate of £94-10-2½*d.* per cent. During the year the Secretary of State decided to issue additional 3 per cent. Stock to the amount of £2,000,000. This was required (*a*) for the discharge of £911,900 debentures of the Southern Mahratta Railway Company which expired on the 1st October 1891: in the Budget Estimate it was anticipated that additional capital would be received from the Company for this purpose; (*b*) for the discharge of £1,000,000 Oudh and Rohilkhund Railway debentures which will expire on 1st April 1892, and (*c*) for the discharge of £600,000 debentures of the Southern Mahratta Railway Company expiring on 1st April 1892.

Capital Receipts from and Issues to Railway Companies.

A sum of £302,143 of the loan of £2,600,000 remained unappropriated, and a total sum of £2,302,143 is therefore available for the discharge of the debentures just described, amounting to £2,511,900. The balance will be met from the loan to be raised in 1892-93. The additional Stock of £2,000,000 was issued at a price of £95 per cent.

100. The details of the estimated transactions of the Railway Companies are as follow:—

	Budget.	Revised.
RECEIPTS.	£	£
ON ACCOUNT OF SUBSCRIBED CAPITAL—		
State—		
Rohilkhand-Kumaon	160,000	...
Southern Mahratta Railway	1,000,000	...
Guaranteed—		
Bombay, Baroda and Central India Railway	556,500	536,000
Great Indian Peninsula Railway	900,300	331,300
Madras Railway	100,000	112,400
ON ACCOUNT OF TRANSFER AND MISCELLANEOUS REFUNDS	...	8,000
TOTAL	2,716,800	987,700
ISSUES.		
FOR DISCHARGE OF DEBENTURES—		
State—		
Southern Mahratta Railway	1,445,000	1,956,900
Guaranteed—		
Bombay, Baroda and Central India Railway	88,500	68,000
FOR STORES, ESTABLISHMENT CHARGES, ETC.—		
State—		
Bengal-Nagpur Railway	360,000	349,300
Indian Midland Railway	117,300	91,400
Other Railways	53,200	54,300
Guaranteed—		
Bombay, Baroda and Central India Railway	150,000	149,900
Great Indian Peninsula Railway	636,000	311,000
Madras Railway	124,000	145,600
	2,974,000	3,126,400

These transactions are liable to heavy fluctuations on account of changes in the programme of the Companies. As regards the receipts, the Rohilkhund Kumaon Railway, instead of paying £160,000 in England, paid its equivalent in India in exercise of an option given to the Company by the Contract. The

receipt of £1,000,000 from the Southern Mahratta Railway Company was intended to replace debentures to be paid off in the year, but £88,100 out of those debentures were renewed and £911,900 paid off with funds raised by the issue of 3 per cent. stock, as above explained. The difference between the Budget and Revised, of £20,500, in the case of the Bombay, Baroda and Central India Railway, represents debentures renewed. The requirements of the Great Indian Peninsula Railway were reduced by £569,000, but, on the other hand, a sum of £12,400 was received from the Madras Railway Company in 1891-92 which it was expected to receive in 1890-91.

The variations in the Estimates of payments for discharge of debentures are due (1) to partial provision towards paying off £600,000, debentures of the Southern Mahratta Railway, and (2) to the renewal instead of discharge, as originally provided for in the Budget, of debentures amounting to £88,100 and £20,500, respectively, of the Southern Mahratta and the Bombay, Baroda Companies.

The large reduction in the net payments on account of Remittances from India occurs chiefly in the advances for purchase of stores, for the Rajputana-Malwa and South Indian Railways and also in the payments on account of Indian Money Orders.

101. The following is the Budget Estimate of the Ways and Means of the Home Treasury for 1892-93:—

	Budget, 1892-93.
Net Receipts.	£
Council Bills	17,000,000
Three per cent. stock to be issued	1,800,000
Capital Receipts from Railway Companies	1,788,200
Deposits and Advances	4,600
Add—Opening Balance	3,261,050
TOTAL	23,853,850
Net outgoings.	
Excess of Expenditure over Revenue	15,749,600
Capital Expenditure of Government in England	1,385,700
Permanent Debt—	
Discharge of Oudh and Rohilkhund Railway Debentures	1,770,300
South Indian Railway Debentures	150,000
Issues to Railway Companies on Capital Account	1,430,300
On account of remittances from India	1,191,800
Add—Closing Balance	2,176,150
TOTAL	23,853,850

The loan of £1,800,000 is required partly for the discharge of the Southern Mahratta and Oudh and Rohilkhund Railway Debentures and partly for advances to Railway Companies. At present it is estimated that the drawings on India in the year will be £17,000,000. It should be understood that in stating the present intentions of the Secretary of State, no sort of pledge is given that he will adhere to the programme above explained, and that the amounts to be obtained by bills or by loans may be varied from time to time as may seem expedient.

102. The Ways and Means Estimate of India is as follows:—

	1891-92.		1892-93.
NET RECEIPTS.	Budget.	Revised.	Budget.
1. Excess of Revenue in India over the Expenditure charged against it	22,041,900	22,807,200	23,771,000
2. Public Loan	...	...	...
3. Increase of the Unfunded Debt, mostly Savings Bank deposits	583,000	905,700	869,000
4. Appropriation from Revenue for Reduction of Debt	...	802,800	...
5. Other items	350,800	999 900	671,500
6. *For Remittance to Secretary of State*	*1,214,800*	*906,300*	*1,175,700*
Add—Opening Balance	16,797,121	17,876,244	16,750,044
TOTAL	40,987,621	44,298,144	43,237,244
NET OUTGOINGS.			
7. Expenditure charged to Provincial Balances	828,400	461,500	1,161,700
8. Capital Expenditure of Government in India	1,835,500	2,238,900	1,956,500
9. Loans to Municipalities, etc.	1,008,300	935,300	611,500
10. *Issues on Capital Account to Railway Companies*	*184,200*	*—214,200*	*408,500*
11. Council Bill—*Sterling* Account	16,934,400	16,914,800	17,166,500
12. Do. Exchange	6,626,500	7,211,800	8,633,700
Add—Closing Balance	13,570,321	16,750,044	13,298,844
TOTAL	40,987,621	44,298,144	43,237,244

The headings in italics are connected with, and explained by, the corresponding figures of the Secretary of State's account in England. The others refer to purely Indian transactions.

Public Loans.

103. No public loan was raised in India in the current year or in 1890-91. The Estimates do not provide for the issue of any loan in India in 1892-93. But the Government of India are unable to say positively that there will or will not be a loan, and full liberty is reserved, as usual, to modify the present Estimates to any extent which may be expedient, and to issue a loan if one is required.

The fact that no loan has been raised for two years, and that it has been considered possible to frame the Estimates for a third year on the assumption that there will be no loan, is due to the following causes:—

(1) The large surpluses of 1889-90 and 1890-91.
(2) The provision made for reduction of debt since 1889-90.
(3) The large increase in the Savings Bank deposits.
(4) The fact that the Secretary of State hopes to receive in 1892-93 considerable Capital Receipts from Railway Companies, only a portion of which will be required for expenditure next year.
(5) The fact that the Secretary of State intends to meet a portion of his expenditure in 1892-93 by drawing on his cash balance.

Savings Banks.

104. The following are the usual details of the transactions of the Savings Banks during the last few years :—

Year.	Net additions to deposits cash.	Interest.	Total addition.
	Rx.	Rx.	Rx.
1887-88	656,330	224,000	880,300
1888-89	685,200	261,800	947,000
1889-90	—362,900	272,200	—90,700
1890-91	250,700	279,700	530,400
1891-92, Budget	229,500	305,100	534,600
1891-92, Revised	530,000	305,400	835,400
1892-93, Budget	459,400	333,800	793,200

The Post Office Savings Bank deposits now show a steady increase in spite of the reduction of the limits for deposits. The Budget Estimate of these deposits is framed with moderation, and allowance has been made for some falling off next year owing to the expectation of scarcity and dearness of provisions in some Provinces.

Appropriation for reduction of Debt.

The sum of Rx. 802,800, credited in the Revised Estimate under "Appropriation for Reduction of Debt," represents the amount charged to Revenue to raise the Famine Grant to Rx. 1,500,000. Provision was made in the Budget Estimate of the current year for an expenditure of Rx. 975,000 out of the Famine Grant on construction of Protective Railways, but only a portion of the amount having been spent the above amount has been set free for appropriation for reduction of debt.

Loans to Municipalities, etc.

The net amounts to be advanced to Municipalities, Presidency Corporations and others during 1891-92 and 1892-93 are Rx. 935,300 and 611,500. These include Rx. 471,300 and Rx. 432,700 respectively placed at the disposal of Local Governments under the Provincial Advance and Loan scheme, referred to in paragraph 62 of Part II of the Financial Statement of March 1890. They also include Rx. 410,000 and Rx. 65,600 required by the Calcutta and Bombay Port Trusts for the Kidderpore and Victoria Docks. The approaching completion of the Kidderpore docks is the chief cause of the reduction in the aggregate amount of advances provided for in 1892-93. The following is an account of the advances to the Calcutta and Bombay Port Trusts on account of the docks :—

	Calcutta.	Bombay.
	Rx.	Rx.
Up to 1890-91	2,194,566	878,622
Advances in 1891-92	390,000	20,000
„ „ 1892-93	55,600	10,000
TOTAL TO END OF 1892-93	2,640,166	908,622

Capital of Railway Companies.

105. The capital transactions with the Railway Companies in 1891-92 are expected to result in a net receipt in India of Rx. 214,200 instead of a net payment of Rx. 184,200 anticipated in the Budget Estimate. This is due partly to the payment in India instead of in England by the Rohilkhund Kumaon Railway Company of the equivalent of £160,000 referred to in paragraph 100, and partly to smaller capital expenditure in India.

Cash Balance.

106. The current year is now expected to close with a cash balance of Rx. 16,750,044 instead of Rx. 13,570,321, estimated in the last Financial Statement. The year 1892-93 is expected to close with a cash balance of 13,298,844.

Section VIII.—Summary.

107. The principal features in this Statement are—

(*a*) The Accounts of 1890-91 have closed with a surplus of Rx. 3,688,171.

(*b*) The Revised Estimates of 1891-92 show a deficit of Rx. 80,000 against the surplus of Rx. 115,600 shown in the Budget Estimate of the year. The increase in Military Expenditure caused mainly by expeditions and measures designed to facilitate mobilisation in time of war, the fall in the rate of exchange from 1*s.* 5¼*d.* to 1*s.* 4·713*d.* the rupee, and the falling off in Land Revenue, are the causes of the deterioration. The loss due to those causes is nearly made good by a remarkable improvement in Railway Revenue, by an increase in net Revenue from Opium, and by improvements under other heads of Revenue.

(*c*) The Budget Estimates of 1892-93 show a surplus of Rx. 146,600.

(*d*) For 1892-93 the Rate of Exchange is taken at 1*s.* 4*d.* the rupee, giving an increased charge of Rx. 1,708,000. The Estimate of net Revenue from Opium is taken at Rx. 5,399,800, being slightly higher than the Budget Estimate for 1891-92. It is anticipated that a portion of the improvement in Railway Revenue will be retained next year, and that most of the improvements in other Heads of Revenue which have been secured this year will be maintained. A sum of Rx. 466,300 out of the increase in Provincial Revenues secured by Local Governments in the past five years has been resumed by Imperial Revenues on the revision of the Provincial Contracts.

(*e*) The Expenditure on Railways and Irrigation Works (not charged against Revenue) is estimated at Rx. 3,500,000 in 1891-92 and at Rx. 4,035,000 in 1892-93; this is in addition to Rx. 294,900 in the former and Rx. 1,130,000 in the latter year charged against the Famine Grant and under Head 37—Construction of Railways.

(*f*) It is expected that the Secretary of State in 1892-93 will sell Council Bills to the amount of £17,000,000 and raise a loan of £1,800,000. The loan is required for the discharge of certain Railway debentures and for advances to Railway Companies. These announcements are accompanied by the usual reservation of entire liberty to the Secretary of State to vary the amounts to be obtained by bills or raised by loan as he may find occasion.

(*g*) The Estimates do not provide for the issue of any loan in India in 1892-93. The surpluses of 1889-90 and 1890-91, the sums provided for Reduction of Debt in 1889-90, 1890-91, and in 1891-92, and the increase in the Savings Bank Deposits, are the main reasons why the Government of India consider that it may be possible for a third year to meet the Capital Expenditure not charged to Revenue without borrowing. No pledge, however, is given that the Government will not borrow in India next year.

(*h*) The financial prospects of 1892-93 are considered to depend largely on the degree of scarcity or famine that may be experienced in the coming year. The currency question is a source of much anxiety as regards the future.

„ 5785, „ 12th December 1890.

RESOLUTION.—In supersession of the orders read in the preamble and all other existing orders on the subject, His Excellency the Governor General in Council is pleased to lay down, with effect from 1st April 1892, the following rules and conditions regulating the administration by Local Governments of Provincial Revenues and Expenditure.

2. The powers vested in Local Governments by this Resolution are subject to the general supervision and control of the Government of India; and His Excellency the Governor General in Council expressly reserves the right of issuing instructions to Local Governments on general or particular matters affecting the transferred revenues and services, when such interference with the discretion ordinarily vested in them seems to him expedient.

3. Subject to the limitations hereinafter stated, Local Governments exercise, in respect of Provincial Revenue and Expenditure, all the powers exercised, before the introduction of the system of Provincial finance, by the Government of India. In the case of Revenue and Expenditure classified under heads which are divided between Imperial and Provincial in fixed proportions, those powers

are exercised by Local Governments in respect of the Imperial portion also. The powers vested in Local Governments as above are necessarily limited to the powers possessed by the Government of India. In all very important matters and in certain minor matters, the orders of the Secretary of State are required; and, although some of the limitations, rendered necessary by this restriction on the powers of the Government of India, are included in the subsequent paragraphs of this Resolution, it should be understood that all orders, which are now in force or which may hereafter be issued, which have the effect of requiring the sanction of the Secretary of State in connection with any matter affecting Revenue or Expenditure, necessarily prevent the Local Governments from issuing, without a reference to the Government of India, final orders in regard to such matter.

4. Without the previous sanction of the Government of India—

(1) No additional taxation may be imposed, and no change made in any existing system of revenue management;

(2) No new general service or duty may be undertaken: whenever a Local Government proposes to undertake any such new service or duty, it must satisfy the Government of India that it can provide the funds for it, temporarily if the service of duty is temporary, and permanently if it is permanent;

(3) No appointment may be created with a pay of more than ₹250 a month; and no addition may be made to the pay and allowances of any officer if they exceed, or would, after the addition, exceed, ₹250 a month;

(4) No appointment of which the pay and allowances are more than ₹250 a month may be abolished; and the pay and allowances of no such appointment may be reduced;

(5) No class or grade of officers may be created or abolished; and the pay of no class or grade of officers may be raised or reduced;

(6) The rates of discount upon the retail of stamps and court-fees labels must not be altered;

(7) The rates of duty on spirits and drugs should not be altered in any case in which the alteration is likely to affect the excise arrangements of neighbouring provinces: and in particular the sanction of the Governor General in Council must be obtained to any alteration in the rates of duty in any district which borders on another province;

(8) No addition may be made to the pay or allowances of any individual officer, or class of officers, that may lead to increase in the emoluments of any public servants doing duty in the same province, whose pay and allowances are not charged under one of the transferred heads of service. The Government of India reserves the right to forbid alterations in rates of pay or allowances, which, in its opinion, would produce inconvenience in other provinces;

(9) No money may be removed from the public treasury for investment or deposit elsewhere; the Government of India, which is responsible for the provision of ways and means for the public service in all departments, must always retain, as at present, in its own hands, absolute and unconditional control over all money in the public treasury: a Local Government may not withdraw such money, except for expenditure upon the public service. This order applies to local fund balances as much as to provincial funds. The principle is that no funds contributed from the public revenues or raised by general taxation, such as the district cess funds, and the like, shall be invested without the consent of the Government of India; these orders do not apply to municipal or port funds nor to trust or endowment funds of any kind;

(10) No alteration must be made in the form or procedure of the public accounts; in particular Local Governments may not issue orders directing the division of a charge between two or more heads of account: the Comptroller General ordinarily decides the proper classification of an item on the accounts;

(11) No services previously rendered to other departments at the charge of the departments made over to the control of the Local Governments may be diminished, and no services previously rendered to these departments at the charge of other departments may be increased;

(12) No line of through communication may be abandoned, or allowed to fall out of repair.

5. The Provincial Revenues and Expenditure consist of the Revenue and Expenditure recorded, under the heads made Provincial, on the books of the Account Officers of the Province. Inter-Provincial adjustments are forbidden.

6. Local Governments are required to maintain balances of the following minimum amounts:—

	₹		₹
Central Provinces	8,00,000	N.-W. Provinces and Oudh	20,00,000
Lower Burma	6,00,000	Punjab	10,00,000
Assam	5,00,000	Madras	20,00,000
Bengal	20,00,000	Bombay	20,00,000

A Local Government should not, without the previous sanction of the Government of India, propose any estimates or allow any transactions which involve the reduction of the Provincial balance below the prescribed minimum. Accountants General are required to make a report to the Local Government and to the Government of India when it appears to them that there is any likelihood of the balance being reduced below the minimum.

7. Local Governments may sanction loans and advances under the orders contained in Resolutions Nos. 13 and 14, dated 1st January 1889, and Nos. 417 and 419, dated 24th January 1890, but may not, without the special sanction of the Government of India, sanction any other loans of public money.

8. When any Local Government proposes to provide in the estimates for Provincial Expenditure largely in excess of the Provincial Revenue of the year, that is, when it is proposed to incur considerable expenditure out of accumulated balances, the proposals should be forwarded to the Government of India for separate consideration in advance of the estimates.

9. It is a general condition, precedent to the delegation of all authority to disburse public money, that it shall be *bonâ fide* for a public object; nothing must be carried out by means of the public funds for the advantage of any individual or body of private persons, unless in accordance with some declared or established rule or principle recognized by the Government of India. It is the

duty of every Audit officer, at all times, to challenge any infringement of this principle; and every Local Government must submit, for the orders of the Government of India, any representation made to it by any Audit officer in accordance with this rule which it does not promptly accept.

10. All standing orders and rules of the Supreme Government are to be observed, including, in particular, the rules in the Civil Service Regulations, the Code of the Public Works Department, and the Civil Account Code.

11. Local Governments must exercise the powers vested in them by this Resolution subject to the ordinary rules of the Budget system. The most important of those rules which affect the exercise of the powers conferred by this Resolution, are—

(*a*) A Local Government cannot sanction any expenditure during a year which will involve an excess over the Budget grant for the year for any Provincial Major head without effecting re-appropriation, that is, without reducing by the amount of the excess the sanctioned grant under some other Provincial or Local Major Head under its control.

(*b*) A Local Government cannot sanction any expenditure which will involve an excess over the Budget grant for the year under a head which is divided in a fixed proportion between Imperial and Provincial, unless it can effect re-appropriation (for the Imperial and Provincial portions of the excess respectively) from Imperial and Provincial or Local heads under its control.

(*c*) A Local Government is required to keep the total Provincial expenditure under all heads within the total Budget grant of the year for that expenditure unless—

(1) it effects re-appropriation from the grants for Local expenditure under its control; or

(2) it has obtained the sanction of the Government of India to a supplementary grant.

ORDERED, that this Resolution be communicated to the several Local Governments and Administrations; to all Departments of the Government of India; to the Agent to the Governor General, Baluchistan; to the Comptroller and Auditor General; and to the several Accountants General and Comptrollers* for information.

* Except Comptrollers, Hyderabad and Post Office.

Ordered also, that this Resolution be published in the *Gazette of India*.

J. F. FINLAY,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the week ending at 8 a.m. on Saturday, 5th March, 1892.

The general weather during the week under review has been very similar to that which prevailed during the immediately preceding week. It will be remembered that at the close of last week a depression which had advanced over the Punjab from the westward had just disappeared, that the barometer had risen briskly in the north-west, and that a high pressure area had been formed over North-Western and Central India while readings were relatively low off the West Coast, over the Bay of Bengal, and over North Bengal. These conditions continued during February 28th and 29th, but on the 1st of March a well marked depression appeared over Sind, and on the 2nd of March, a deep depression over the north-west of the Punjab. The latter depression gave very unsettled weather to the Punjab, but it did not last long, as it had practically disappeared by the morning of the 4th. The former, on the contrary, was more long-lived and appears to have passed right across India to Bengal, to which Province it gave showers on the 4th and 5th.

The chart of the 28th showed that the barometer was falling, except across the head of the Peninsula and in the extreme south. Readings were high and uniform over North-Western and Central India, and relatively low off the west-coast, over the Bay and Burma, and in North Bengal. The winds were anti-cyclonic over Northern and Central India and variable over the Peninsula. Rain was reported from South-East Bengal, from Cachar, and from the south of the Peninsula. On the 29th the barometer was falling almost everywhere. The anti-cyclone had given way on its north-west side and was centred over Rajputana, but otherwise there was but little change in the distribution of pressure or in the winds. Moderate rain had fallen in the extreme south of the Peninsula and a few drops at Sibsagar. By the morning of the 1st March the anti-cyclone had travelled eastward and lay over the Central Provinces, while a well-defined depression had appeared over Sind. A local barometric rise was reported from Peshawar and gradients were steep over the Punjab. The winds showed a cyclonic circulation over North-Western India, where gales of wind were experienced. Rain was reported at Quetta, Peshawar, Rawalpindi, Murree, Srinagar, Bangalore, and Cochin. On the 2nd the depression which had entered India through Sind lay apparently over Central India and the west of the Central Provinces, and a fresh and deep depression was shown over the Punjab. Strong cyclonic winds and gales prevailed around the depression; snow was falling at Quetta and Srinagar, and moderate rain along the foot of the hills. At Peshawar the barometric fall during the 24 hours preceding 8 A.M. on the 2nd was as much as 0·365″. The chart of the 3rd showed that the Punjab depression had moved very slowly south-eastward, and that the centre was near Ludhiana. It was filling up somewhat, but was still a very considerable disturbance, and the cyclonic winds which surrounded it were very strong, particularly on the hills where a very severe gale was blowing. The shallow depression which entered India through Sind, lay apparently to the south of Allahabad. Rain had fallen at most of the Punjab stations, and rain and hail on the

hills. A slight shower was also reported from Raipur. On the 4th the barometer was rising except in Bengal and the South Carnatic. The rise had been very rapid in the north-west and a high, pressure area similar to that which prevailed at the commencement of the week had been formed over North-West and Central India. Readings were lowest in Bengal and the Circars. Except in Bengal, Burma, and Madras the winds were mainly anti-cyclonic, blowing outward from the high-pressure area in the North-West. Slight snow was again reported from the North-West, Himalayas, and slight rain from Sialkote, Rawalpindi, False Point, and Cuttack. On the 5th the barometer continued to rise, except in a few places, and the anti-cyclonic distribution noticed on the preceding day was undisturbed. Murree still reported slight hail, but elsewhere in the Punjab the weather had cleared. Showers of rain had fallen at Silchar and in south-east Bengal.

Temperature—A very decided deficiency of temperature has existed during the week over Northern and Central India, and a moderate excess in Madras. Two cold waves have passed across India during the week. The first covered the whole of Northern and Central India on the 28th and had its lowest point over Central India and Eastern Rajputana. By the 29th this point had advanced eastward to the Central Provinces, while the succeeding warm wave had made its appearance along the Indus Valley. By the 1st the lowest point of the cold wave was in Bengal, the highest point of the warm wave at Multan; by the 2nd the cold wave depression was greatest at Jessore, the warm wave excess was greatest at Sirsa and a fresh cold wave had commenced at Peshawar; by the third the first cold wave had reached Central Burma, the warm wave had reached Jhansi, and the second cold wave was most marked at Jacobabad. On the 4th and 5th the depression of the first cold wave was over Burma, the crest of the warm wave over Bengal, and the greatest depression of the second cold wave over Central India.

The following table shows the variations of the mean temperature from the normal on each day of the week for the principal provinces of India:—

Province.	28th.	29th.	1st.	2nd.	3rd.	4th.	5th.	Mean variation of week.
Burma	−0·9	−0·3	−0·1	−3·5	−2·2	−2·5	−3·3	−1·8
Bengal and Assam	−1·3	−4·6	−5·8	−5·0	−1·9	+1·5	−1·3	−2·6
North-Western Provinces and Oudh	−6·9	−5·8	−5·1	−1·2	+2·0	−2·1	−5·9	−3·6
Punjab	−6·5	−2·8	+1·4	+1·3	+0·5	−5·4	−6·3	−2·5
Bombay	−1·7	−0·7	−1·1	+0·4	−1·3	−6·1	−5·6	−2·3
Berar and Central Provinces	−5·1	−7·2	−6·5	−2·9	+0·7	−5·5	−10·2	−5·2
Guzerat and Central India	−8·5	−7·2	−5·4	−1·5	−1·7	−7·8	−8·7	−5·8
Sind and Rajputana	−7·6	−5·3	−2·0	+1·9	−4·1	−8·1	−6·9	−4·6
Madras	+2·0	+2·5	+2·5	+1·2	+0·6	+1·5	+1·0	+1·6
Mean for whole India	−4·1	−3·5	−2·5	−1·0	−0·8	−3·8	−5·2	−3·0

From the above it will be seen that the only province which recorded an excess of temperature was Madras. The greatest deficiency was in Guzerat and Central India, but the amount was closely approached in Sind, Rajputana, and the Central Provinces.

Rain.—The daily distribution of rainfall was described in the earlier paragraphs. At first it occurred in the south of the Peninsula, subsequently in

North-Western India, and finally in North-Eastern India. The concluding table shows that rain fell during the week in twenty out of the fifty-two rainfall divisions. Of these twenty divisions, ten, *viz.*, the Assam Valley, Deltaic Bengal, Chota Nagpur, the North-Western Provinces (submontane), the Punjab (south, submontane, and west), Mysore, the Central Provinces (east), and Sind had an average fall for the week of less than one-tenth of an inch, while the remaining ten, *viz.*, Eastern Bengal, Cachar, Orissa, the Punjab (hill districts and north-west), Malabar, Madras (south central and south), Coorg, and the East Coast (south) received effective rain the amounts varying from 0·71″ in Madras, south, to 0·12″ in East Bengal. In Burma, Behar, Central and North Bengal, nearly the whole of the North-Western Provinces, and nearly the whole of the Peninsula (except the south) and of the central parts of the country, there was no rain during the week. Where rain fell the amounts received were generally in defect of the normal, the only districts recording an excess being Orissa, the north-west of the Punjab, Malabar, Madras (south central and south), Coorg, Mysore, and the East Coast (south). With the present report a fresh rainfall period, *viz.*, that of the spring storm rainfall, is commenced. Consequently the figures in the final three columns of the concluding table simply give in another form the information already shown in the first three columns.

In the record of maximum falls during the week there are very few large amounts, but the following table shows the places where more than 1 inch was received during the week:—

		Inches.
Cuttack	Kendrapara	1·06
,,	False Point	1·01
Rawalpindi	Murree	1·50
Peshawar	Sudder	1·02
Hazara	Manshera	1·73

W. L. DALLAS,

Assistant Meteorological Reporter to the Government of India.

Simla, the 10th March, 1892.

E. C. BUCK,

Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 12th March.*—No improvement in agricultural prospect. Harvest continues in Southern districts, outturn moderate. Scarcity of fodder in north Nellore and Deccan districts intensifying, drinking water also growing scarce in some parts. Prices nearly stationary; fallen slightly in Nellore, Kurnool, Anantapur, Chingleput, Salem, Madura; risen slightly in Godavari, Bellary, South Arcot, Trichinopoly, and Coimbatore. FAMINE RELIEF:—*Numbers on works:* Deccan—men 10,118, women 13,987, children 5,895; East Coast—men 2,126, women 2,115, children 626; South Central—men 811, women 1,865, children 365; *Total* 38,208 against 35,862 last week. *Gratuitous relief:* Deccan—men 62, women 118, children 556; South Central—men 28, women 84, children 126; East Coast - men 2, women 4, children 26; *Total* 1,012 against 1,009 last week. Loans for construction and repair of wells: Deccan ₹2,11,894; East Coast ₹5,75 802; South Central ₹3,32,685; *Total* ₹11,20,381 disbursed. Wells constructed 96, 1,941, 292; under construction 1,817, 3,[illegible]92, 1,846 in respective blocks. Agricultural Loans Act:—₹42,733; ₹31,735; ₹79,328; *Total* ₹1,53,796 disbursed in respective blocks.

Bombay.—*For week ending 16th March.*—Standing crops damaged by drought, blight, frost, or insects in parts of Sind. Cotton blighted in Dharwar. Fodder scarce in parts of eleven and water in parts of six districts. Cattle distressed in parts of four districts. Prices generally steady. Harvesting of late crops progressing generally, and preparations for the next season in parts of five districts. FAMINE RELIEF:—*Numbers on works:* Professional Agency—Dharwar 8,100, Belgaum, 180; Civil Agency—Dharwar 3,620, Bijapur 26, Belgaum 811; *Total* 12,745.

Bengal.—*For week ending 15th March.*—No rain. Weather abnormally dry. Rain is generally much wanted for the cultivation of the autumn crops. Early rice and jute are being sown where there is moisture in Northern and Eastern Bengal. Spring rice is doing well, but this and other crops on the ground are in want of rain in some districts. Indigo sowings are coming on well except in Purneah, where they are retarded for want of moisture. *Rabi* harvest is in progress, the general outturn, as previously reported, will not be satisfactory, and in some parts it will be very poor. Opium collections are going on. In some places the yield will be reduced owing to strong west winds. Sugarcane, potato, and tobacco crops have turned out well. *Mahua* and mango prospects are favourable. Prices are stationary throughout the greater part of the province, but show a tendency to rise in Chittagong, Burdwan, and some parts of the Patna division. Cattle are generally in good condition, and fodder and water supplies are still reported to be sufficient except in parts of Midnapur and the 24-Parganas. Reports from the districts of the Patna division show no important change. The *rabi* crop generally has turned out better than was expected, and the people are now employed in reaping it. FAMINE RELIEF:—In Darbhanga it is said that relief works will be necessary a fortnight earlier than was anticipated. No signs of actual distress have as yet appeared in Muzaffarpur. The test applied to Gya has shown that works are not yet wanted there. The Rajshahi Commissioner reports that taking the division as a whole the deficiency of the rice crop has not as yet been followed by any overt symptoms of suffering or any special demand for employment on relief works. The Monghyr and Bhagulpur reports are on the whole reassuring. Prices have not risen, and the number of persons employed on relief works continues to be small. *Numbers on works*:—Monghyr, during last fortnight of February 650; Bhagulpur, in the first week in March 676; Purneah, on the 27th February 3,222; *Total* 4,548.

In the Purneah district 326 persons were in receipt of gratuitous relief on the 20th, 21st, and 22nd February.

North-Western Provinces and Oudh.—*For week ending 16th March.*—Weather seasonable. *Rabi* harvesting and opium collection in progress. Supplies are adequate. Prices are generally steady, but have fallen in a few districts.

Punjab.—*For week ending 16th March.*—Slight rain has fallen in parts of the Rawalpindi district. Prices are stationary in all but two districts, where they are unsettled. Irrigation of *rabi* crops in progress; gram being harvested in Hissar district; sowings of extra *rabi* crops commenced. Condition of crops on irrigated lands average, crops on Sidhnai canal lands are drying up, their condition is not good in parts of two districts; *baráni* land crops are a failure for want of rain in Lahore. Rain urgently wanted in most districts. Owing to drought the mustard crop is said to have been damaged by blight in parts of Lahore; damage is reported to have been done to crops by cold winds in parts of Dera Ismail Khan. Condition of cattle is reported good in all but two districts where it is poor. Fodder scarce in six districts; sufficient elsewhere.

Central Provinces.—*For week ending 16th March.*—No rain. Reaping of *rabi* crops nearly completed in the southern districts, just commenced in the northern districts. Fodder reported poor in one district; sufficient elsewhere. Prices stationary.

Burma.—*For week ending 12th March.*—LOWER BURMA:—Reaping, threshing, and winnowing practically completed. UPPER BURMA:—Dry-weather paddy progressing except in Katha and Ruby Mines where condition is poor; peas, tobacco, and maize are being gathered. Price of paddy has risen slightly in Akyab, considerably in Rangoon, Pegu, Moulmein, Tavoy, Bhamo, Shwebo, and largely in Shwegyin and very largely in Pakokku, Magwe, Kyaukse, and Yamethin; in Thayetmyo there is a slight fall; elsewhere it is stationary. Price of rice keeps high everywhere. FAMINE RELIEF:—*Numbers on relief works:* Shwebo 1,350; Ye-u 1,771; Sagaing 365; Lower Chindwin 2,877; Myingyan 1,919; Minbu not reported; Magwe (for week ending 5th) 391; Meiktila 8,485; Yamethin 10,280; *Total* 27,438.

Assam.—*For week ending 16th March.*—Weather hot and windy. Rain generally wanted. Pressure of sugarcane and sowing of summer rice continue. Cattle generally fair. Fodder and water growing scarce.

Mysore and Coorg.—*For week ending 16th March.*—MYSORE:—Crops withering. Harvest poor. Ordinary public works generally in progress. Drinking water scanty in parts and wells are sunk where necessary. Prices fallen in three districts.

COORG:—The hot-weather rice crop in north Coorg forming ears. Prices stationary. Water-supply for cattle sufficient, but forage failing in many parts.

Berar and Hyderabad.—*For week ending 16th March.*—BERAR:—Weather temperate. Threshing of *rabi* crop in progress. Fodder in one and water in another taluk insufficient. Prices almost steady.

HYDERABAD:—No rain during week. Sowing of *tabi* crops continues. General scarcity of water and fodder is being felt in almost all taluks and cattle are getting lean and weak. Prices—wheat 9¼, coarse rice 8¾, white *juar* 13¼, yellow *juar* 16, and *tur* 12½ seers per current rupee.

Central India.—*For week ending 16th March.*—No material change in condition of crops since last report.

Rajputana.—*For week ending 16th March.*—No rain. Standing crops in good condition. Wheat being cut in Kherwarra where only one-third yield expected. Cattle poor in six States and at Ajmere and Kherwarra. Pasturage or fodder scarce in six States and at Ajmere and Kherwarra; sufficient elsewhere. Prices steady in six States and at Kherwarra, falling in five States and at Ajmere, fluctuating in one State. FAMINE RELIEF:—2,630 relief labourers, 2,476 gratuitous relief and 98 emigrates in Marwar; 285 immigrants and 317 cattle in Kotah; 1,189 relief labourers and 105 gratuitous relief in Kishengarh; 5,619 relief labourers and 2,145 gratuitous relief in Bikaneer; 23,770 relief labourers and 4,166 gratuitous relief in Ajmere, labour ordinary in Ajmere 1,351; *Total*: Relief labourers 33,258; gratuitous relief 8,892.

Nepal.—*For week ending 10th March.*—Nights cold but days growing warmer. Wheat crops in good condition. Prices steady though high.

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the week ending at 8 a. m., on Saturday, March 12th, 1892.

Quiet weather has prevailed throughout India during the week under review, and the principal feature in the changes which have occurred has been the gradual approach towards hot weather conditions. Up to the present time variable light breezes have been general throughout Northern India, but during the present week the wind has more or less settled into north-west and west down the Gangetic plain. These winds are characteristic of the hot season, and their temperature has slowly increased as the week has progressed.

On the 6th the barometer was falling over north-western India and was rising elsewhere. Readings were highest over the central parts of the country, and low over the north of the Gangetic plain, over Burma and over the south of the Peninsula. The wind was southerly at Khushab and south-easterly at Murree and feebly cyclonic over Burma, but elsewhere the directions were anticyclonic. The force was strong down the Gangetic plain. On the 7th a large shallow low pressure area was shown over Sind, the west of Rajputana and the Punjab, while the low pressure area over the north of the Gangetic plain had disappeared. In other respects the distribution was similar to that reported on

the 6th. The wind exhibited irregular cyclonic movements in the north-west but elsewhere the directions were little changed. The force was lower down the Gangetic plain. Slight rain had fallen at Srinagar, Murree and Rawalpindi. The chart of the 8th showed that the barometer had risen in the north-west and fallen in Central, North-Eastern and Southern India. The low pressure area in the north-west was less distinctly marked than on the 7th, while on the contrary the low pressure over the north of the Gangetic plain had reappeared; otherwise there was little change. The cyclonic movements of the air in the north-west had given way to variable breezes, and south-westerly and southerly winds had taken the place of the westerly winds in the North-Western Provinces and Bengal. The only rainfall was a shower at Cochin. On the 9th the chart showed that the low pressure in the north-west had disappeared and that a high pressure area was forming in that region. Except in Northern India readings were very uniform and the winds throughout India varied very considerably in direction. There was no rain in any part of India. The chart of the 10th showed that the barometer was rising almost everywhere, and the high pressure area which was appearing in north-western India on the 9th had extended south-eastward and spread right across the country. Slight depressions were shown over Sind, over Behar and North Bengal and over Central Burma. The winds remained generally variable but the westerly current down the Gangetic plain was reappearing. Light rain had fallen at Murree, Rawalpindi and Mercara. On the 11th the barometer was falling except in the Indus Valley and the high pressure area, though still shown extending from the north of the Punjab south-eastward to the central parts of the country, had contrasted considerably in size. On the other hand, the low pressure in Behar and North Bengal had developed and the westerly winds down the Gangetic plain were more general and stronger. Light rain had fallen at Kushab, Murree and Srinagar. On the morning of the 12th the barometer was falling except in Sind and the south-west of the Peninsula. The general distribution was the same as on the 11th, readings being high in north-western India and low over Behar Gradients had, however, slightly increased in the north-west as the low pressure area had moved somewhat in that direction. In consequence the north-westerly and westerly current down the Gangetic plain had increased in force and gales were reported from several places. Elsewhere variable breezes prevailed. There was no rain in any part of India.

Temperature.—The general mean temperature for India has been below the average during the week under review. It will be remembered that at the close of the previous week a cold wave of considerable intensity was passing across India. On the 6th this cold wave covered almost the whole of India, the only province outside its influence being Madras. On the 7th, however, the commencement of a warm wave was shown over the Punjab, Sind and Rajputana. Between the 8th and the 10th the cold wave retreated eastward and the warm

wave advanced eastward, so that on the latter date the mean temperature was excessive over the Punjab, the North-Western Provinces, Oudh, Sind and Rajputana, and in defect in Burma, Bengal, Bombay, the Central Provinces Central India, Guzerat and Madras. By the 11th the warm wave had extended to all provinces except Burma, Bombay and Madras, and by the 12th to all provinces except Burma and Madras.

The following table shows the variations of the mean temperature from the normal on each day of the week for the principal provinces of India:—

Province.	6th.	7th.	8th.	9th.	10th.	11th.	12th.	Mean variation of week.

Madras	+0·7	+0·4	+0·3	−0·9	−1·8	−1·6	−1·0	−0·6
Mean for whole India .	−4·4	−2·5	−1·3	−0·6	0	+0·7	+1·4	−1·0

The above figures show that the mean temperature of the whole of India was 1° below the normal average on the mean of the week. From the 6th to 9th the mean was in defect by decreasing amounts, on the 10th it was exactly normal, and on the 11th and 12th it was excessive. The maxima began to exceed 100° in parts of the Peninsula, Berar and Guzerat at the close of the week.

Rain.—The earlier paragraphs of the summary have shown that the rainfall of the week was extremely light, and the concluding table shows that during the week rain was received in only four of the fifty-one rainfall divisions, and that in one division only did the average rainfall of the division exceed 0·1". The divisions which received rain were Eastern Bengal, the North-West Punjab, Malabar, and Madras (South Central). In Malabar the actual rainfall exactly equalled the normal; in the other three divisions it was in defect.

The columns showing the state of the rainfall for the two weeks, February 28th to March 12th, exhibit a deficiency in all divisions except Malabar, Coorg and Madras (South), where the fairly heavy rain of last week still occasions an excess.

Provinces.	Division.	Rainfall data for week ending 12th March 1892.			Rainfall data from 28th February to 12th March 1892.		
		Average actual rainfall of Division.	Average normal rainfall of Division.	Excess or defect in inches.	Average actual rainfall of season to date.	Average normal rainfall, 28th February to 12th March.	Excess or defect of (seasonal) rainfall expressed as a per-centage.

W. L. DALLAS,
Assistant Meteorological Reporter to the Government of India.

Simla, the 17th March, 1892.

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 19th March.*—No change in agricultural prospects. Harvest still proceeding in southern districts. In distressed areas of Nellore and Deccan scarcity of fodder seriously affecting cattle. Water-supply very deficient in many parts, but no serious failure of drinking water yet anticipated. Prices almost stationary and generally slightly easier, except in Ganjam, Cuddapah, South Arcot, Coimbatore and Malabar. FAMINE RELIEF:—*Numbers on works*:—Deccan—men 7,859, women 12,323, children 5,426, besides 9,313 sex not stated; East Coast—men 3,018, women 2,912, children 773; South Central—men 741, women 1,692, children 322; *Total* 44,379 against 38,208 last week. *Gratuitous relief*:—Deccan—men 62, women 109, children 452; East Coast—men 2, women 5, children 37; South Central—men 22, women 70, children 128; *Total* 887 against 1,012 last week, decrease being in children voluntarily removed by parents. Loans for construction and repair of wells: Deccan ₹2,40,514; East Coast ₹5,88,894; South Central ₹3,51,032; *Total* ₹11,80,440 disbursed. Wells constructed 94, 1,942, 306; under construction 2,235, 3,619, 2,031 in respective blocks. Agricultural Loans Act:—₹55,895; ₹32,190; ₹79,328; *Total* ₹1,67,413 disbursed in respective blocks.

Bombay.—*For week ending 23rd March.*—Standing crops damaged by frost, rats or insects in parts of Sind, and cotton blighted in Dhárwar. Fodder scarce in parts of twelve and water in parts of six districts. Cattle distressed in parts of five districts. Prices generally steady. Harvesting of late crops and preparations for the next season continue. FAMINE RELIEF:—*Numbers on relief works*: Professional Agency—Bijapur 70, Belgaum 215, on 19th; Dhárwar 961; Civil Agency—Belgaum 443, on 19th; Dhárwar 295; *Total* 1,984.

Bengal.—*For week ending 22nd March.*—Rain continues to hold off, and the weather is abnormally dry. Rain is now generally much required for ploughing and for sowing of the autumn crops. Early rice and jute are being sown in places in Eastern and Northern Bengal, and the sowings of *cheena*, *mung* and paddy are in progress in the low lands of Bihar. Spring rice promises to be a good crop, but is in want of rain in some districts. Indigo sowings are nearly finished and are doing well. *Rabi* crops are still being gathered, the general outturn is not expected to be satisfactory, and in some parts it will be very poor. Opium collections are nearly over with fair results, but the yield has been reduced in some places owing to high west winds. Mango and *mahua* prospects are good. Prices have slightly risen in some parts of the Patna Division: The condition of cattle is generally good and there is still plenty of fodder and water. Scarcity of water is, however, apprehended in a few localities. FAMINE RELIEF:—There has been no change of importance in the condition of affairs in any of the affected districts of the Bhagalpur, Patna, and Rajshahi divisions. Relief works are being carried on in Monghyr, Bhagalpur and Purnea, and works have also been started in Muzaffarpur and Darbhanga and in Dinajpur. *Numbers on relief works*, according to the latest reports; Monghyr 84; Bhagalpur 2,995; Purnea 3,353; Muzaffarpur 1,711; Darbhanga 1,985; Dinajpur 293; *Total* 10,421. *On gratuitous relief*: Monghyr 233; Purnea 1,075; Total 1,308.

North-Western Provinces and Oudh.—*For week ending 23rd March.*—Weather seasonable, but rain is wanted in Almora. Harvesting of *rabi* continues and a good outturn is expected. Sugarcane is being sown. Opium collections in progress. Prices are generally steady, but show a tendency to fall in a few districts. Fodder is still scarce in Saharanpur.

Punjab.—*For week ending 23rd March.*—Rainfall *nil.* Prices unsettled in one District, falling in four others; stationary elsewhere. Harvesting of barley and gram commenced, sowings of extra *rabi* crops continue. Ploughings for sugarcane commenced. Crops on irrigated lands generally fair, but suffering for want of rain on *barani* lands in most districts. Prospects below average in Rawalpindi and not good in Jullundur and parts of Amritsar and Lahore. Crops are reported to have been damaged to some extent for want of rain and by strong cold winds in parts of the Dera Ismail Khan district. Condition of cattle is generally good, they are suffering for want of fodder in Shahpur. Fodder scarce in seven districts; sufficient elsewhere.

Central Provinces.—*For week ending 23rd March.*—Reaping of *rabi* crops in full swing in the northern districts, practically completed in the southern districts. Prospects of *rabi* harvest, as given in the wheat nd linseed forecasts, are unchanged except in Raipur where the outturn of both crops is now estimated at 10 annas compared with 8 and 9 annas respectively given in the forecasts. Fodder sufficient except in Seoni, where it is reported to be poor. Prices unchanged.

Burma.—*For week ending 19th March.*—LOWER BURMA: Reaping, threshing and winnowing almost finished. UPPER BURMA: Dry-weather paddy progressing; peas, gram and wheat are being reaped. Price of paddy has risen slightly in Henzada, considerably in Akyab, Sandoway, Tharrawaddy, Bassein, Thayetmyo, Upper Chindwin, Kyaukse, largely in Thongwa, Toungoo, and very largely in Shwebo, Meiktila, and Pyinmana; stationary in Rangoon and Mandalay; fallen slightly in Prome, Amherst and Pakokku, and largely in Katha. Price of rice keeps high. FAMINE RELIEF:—*Numbers on relief works:* Shwebo 1,431 (exclusive of Shwebo-Yatha road); Yeu 1,350; Sagaing 270; Lower Chindwin 2,389; Myingyan 1,635; Minbu 1,722; Magwe (for week ending 12th instant) 169; Meiktila 7,948; and Yamethin 10,396; *Total* 27,310.

Assam.—*For week ending 23rd March.*—Weather hot, rain badly wanted. Pressing of sugarcane and sowing of summer rice continues. Condition of cattle fair. Fodder and water becoming scarce.

Mysore and Coorg.—*For week ending 23rd March.*—MYSORE:—Crops withering. Harvest poor. Ordinary public works generally in progress. Drinking water scanty in parts and wells sunk where necessary. Prices risen slightly in two districts.

COORG:—The hot weather rice crop thriving. Prices stationary. Forage for cattle scarce in some parts. Water sufficient.

Berar and Hyderabad.—*For week ending 23rd March.*—BERAR:—Weather warm. Threshing of *rabi* crops continues. Fodder in one and water in another taluk insufficient. Prices almost stationary.

HYDERABAD:—No rain during week. Scarcity of water and fodder is being felt in almost all taluks, and tanks are getting dry in many places. Cattle are getting weaker and leaner day by day for want of water and grass. Prices: wheat $9\frac{1}{4}$, coarse rice $8\frac{3}{4}$, white *juar* $13\frac{1}{4}$, yellow *juar* $16\frac{1}{4}$, and *tur* $12\frac{1}{4}$, seers per current rupee.

Central India.—*For week ending 23rd March.*—Agricultural operations in Gwalior and Neemuch completed. Condition of pasturage indifferent in Neemuch. No other changes since last report.

Rajputana.—*For week ending 23rd March.*—Standing crops good, later sown crops still irrigated in Ajmere. Harvests good, one-third in Ajmere, slightly injured by winds in Bikaneer. Cattle poor in six States, Ajmere and Kherwarra. Pasturage and fodder scarce in seven States, Ajmere and Kherwarra. Prices steady in six States, Kherwarra and Ajmere, falling in six, and fluctuating in two States. FAMINE RELIEF: 33 immigrants and 12 cattle in Kotah; in Marwar

2,460 relief labourers and 1,804 gratuitously treated; in Kishengurh, 1,190 relief labourers and 109 gratuitously treated; in Bikaneer 6,351 relief labourers, and 2,420 gratuitously treated; in Ajmere 24,710 relief labourers, 3,707 gratuitously treated, labour ordinary 1,420;—*Total*—Relief labourers 34,711; gratuitous relief 8,040.

Nepal.—*For week ending 17th March.*—Weather seasonable. Days growing warmer. Wheat crop in good condition. Prices rising.

J. W. P. MUIR-MACKENZIE,
for *Secretary to the Government of India.*

Secretary to the Government of India.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

TELEGRAPH ESTABLISHMENT.

SCALE OF SUPERIOR ESTABLISHMENT FOR THE HALF-YEAR ENDING 30th SEPTEMBER 1892.

No. 55 T. E., dated Calcutta, the 24th March 1892.

RESOLUTION—By the Government of India, Public Works Department.

INDIAN TELEGRAPH DEPARTMENT.

Read again—

Public Works Department Resolution No. 135 T. E., dated the 21st October 1887.

" " letter No. 53 T. E., dated the 17th March 1888, to the Director General of Telegraphs.

Read also—

Public Works Department letter No. 169 T. E., dated the 24th September 1891, to the Director General of Telegraphs.

Public Works Department letter No. 47 T. E., dated the 18th March 1892, to the Director General of Telegraphs.

OBSERVATIONS.—The ultimate scale of the Superior Establishment of the Indian Telegraph Department fixed in accordance with clause II of Public Works Department Resolution No. 135 T. E., dated the 21st October 1887, and the scales for the half-years ending 31st March and 30th September 1892, respectively, compare as follows :—

ULTIMATE SCALE.		SCALE FOR HALF-YEAR ENDING 31ST MARCH 1892.		SCALE FOR HALF-YEAR ENDING 30TH SEPTEMBER 1892.	
Class and Grade.	Number.	Class and Grade.	Number.	Class and Grade.	Number.
I . . .	1	I . .	1	I . .	1
II . . .	1	II . .	1	II . .	1

VI, 1st " .	14	VI, 1st " .	11	VI, 1st " .	11
VI, 2nd " .	15	VI, 2nd " .	The remainder (5) .	VI, 2nd " .	The remainder (9).
	84		78		76

2. The numbers in the various grades of the " ultimate scale " for a strength of 84, which was fixed upon as the necessary normal strength of the Department, were adjusted under instructions from the Secretary of State in such a manner as to give promotion to the grades below Class IV (1) in certain approximate periods of time that were considered fair and reasonable.

3. Under clause II of Public Works Department Resolution No. 135 T. E., dated the 21st October 1887, the Government of India, under instructions from the Secretary of State, reserved power to vary the numbers in the grades to any extent that might be necessary to adjust the rate of promotion to the approximate time-periods.

In para. 15 of Despatch No. 13 T., dated 25th August 1887, the Secretary of State said: "It must be clearly understood that, as soon as the condition of the Department admits of it, the normal scale must be reverted to, and that, later, whatever reduction may be thought possible, should be carried out by making proportional reductions in all the grades. The initiative in taking these steps must be left to the Government of India, and I leave also, for your further consideration, the manner in which the reductions should be made on the occurrence of vacancies."

4. The effect of the retirements that have taken place under the special rules sanctioned in Public Works Department Resolutions Nos. 136 and 128 T. E., dated, respectively, the 21st October 1887 and 11th August 1888, has been to reduce the strength of the Superior Establishment of the Department to 76, 20 officers having retired under the terms of these Resolutions. The numbers in the various grades for a total strength of 76, proportionate to the numbers for an ultimate scale of 84 as shown in para. 1 *supra*, are as follows :—

Class I, II and III	4
" IV (1)	4
" IV (2)	9
" IV (3)	11
" V (1)	11
" V (2)	12
" VI (1)	12
" VI (2)	13

The officers of the blocked years remaining in the Department will now all receive either permanent promotion, or temporary promotion in the place of officers absent on furlough, to class IV, 3rd grade. The result of the depletion of the Department by retirements, and the cessation of recruitment between the years 1872 and 1878, is that officers now coming forward for promotion to Class V, 1st grade, have only between 12 and 13 years' service; and a comparison between the numbers allotted to Class V, 1st and 2nd grades, in the scale for the half-year ending 31st March 1892, and the correct proportionate numbers in those grades as shown above, proves that the period has now arrived when the scale must be re-adjusted to suit the reduced aggregate strength. The numbers for the half-year ending 30th September 1892 have consequently been fixed on this basis. The numbers assigned to the grades in Class IV are fixed with reference to the number of Superintendent's charges; those assigned to the grades in Class V are in each case better than the correct proportionate numbers in those grades; but the excess numbers have been allowed during the half-year ending 30th September 1892 in order to give promotion to deserving officers.

ORDER.—Ordered, that the foregoing be forwarded to the Director General of Telegraphs, for information and guidance, and that it be published in the Supplement to the *Gazette of India* for general information.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the week ending at 8 a.m. on Saturday, March 19th, 1892.

The principal feature in the weather over India has been the increase of heat which has occurred generally, but more especially in the north-west. There has been no disturbance during the week over India, and consequently there has been no rainfall of importance; but over the Arabian Sea conditions have been unsettled and the wind directions on the Konkan and Kattiawar coasts and the low barometer which has prevailed there appear to show that a depression existed over the north of the Arabian Sea. The depression moved away, or dispersed, on the 16th, and at the close of the week readings were high and uniform over the Peninsula and the central parts of the country. Throughout the latter part of the week pressure was relatively low over the western desert, over the north of the Gangetic plain, and over Central Burma, but the pressure differences were at no time large, and, except down the Gangetic plain, where the normal north-west and western winds of the hot weather blew strongly, the wind force has been generally moderate and the directions more or less variable.

On the 13th pressure was high over the Indus Valley and the south of the

Peninsula, and low over Oudh and over North-East India. The wind was northerly over a large part of the Punjab, westerly down the Gangetic plain, south-westerly in Lower Bengal, and southerly at Bombay. Elsewhere the directions were variable. There was no rain. On the 14th the barometer was falling over North-West India, the Konkan, Madras, and Upper Burma, and was rising elsewhere. A low pressure area was shown over the Arabian Sea off Bombay, and the winds were cyclonic around the north-east angle of the Arabian Sea. The high pressure area which on the previous day lay over the Indus Valley, had advanced eastward and the centre was shown over Eastern Rajputana. In other respects there was not much change. The weather was very fine, and there was no rain anywhere. The chart of the 15th showed that the highest pressures lay within a broad band extending from Guzerat E.-S. eastward across the Peninsula to Madras. Both to the north-east and to the south-west of this band readings were low. The depression over the Arabian Sea had developed somewhat. The wind continued cyclonic around the north-east angle, and the barometer was abnormally low at Bombay. A very slight depression was shown over the western desert, but the lowest readings in Northern India were reported from Oudh, Behar, and North Bengal. Strong westerly winds prevailed down the Gangetic plain. The weather remained very fine, and the only rainfall was $\frac{1}{8}$ inch at Colombo. On the 16th the barometer was rising briskly on the Konkan Coast, and the depression over the Arabian Sea had apparently moved away or dispersed. The cyclonic movements of the wind had ceased. The general distribution of pressure and the winds were similar to those reported on the previous day. The weather remained fine, and the only rainfall was a slight shower at Cochin and Colombo. The observations of the 17th showed that a slight depression had been developed over the central parts of the Peninsula, but otherwise there was little change. The barometer was still rising in the northern parts of the Bombay Presidency. Slight rain had fallen in Assam and Ceylon, but elsewhere the weather was fine. On the 18th pressure was increasing everywhere. The low pressure area over the Arabian Sea had entirely disappeared, and readings were relatively high and very uniform over the Peninsula and the central parts of the country, while they were low over the Western Desert and over Oudh and Behar. The winds were variable over the Peninsula, feebly cyclonic over North-West India, strong from west down the Gangetic plain, and strong from south over the north of the Bay.

The only rainfall was a shower at Sibsagar. On the 19th the low pressure area over the western desert had largely disappeared, but otherwise there was little change. Again, the only rainfall was a shower at Sibsagar.

Temperature—Has been steadily rising throughout the week, both absolutely and relatively, to the normal average.

The following table shows the variations of the mean temperature from the normal on each day of the week for the principal provinces of India:—

Province.	13th.	14th.	15th.	16th.	17th.	18th.	19th.	Mean variation of week.
Burma	−0·9	−1·8	−1·7	−0·8	−0·6	−0·6	−0·2	−0·9
Bengal and Assam	+0·4	+0·5	+0·9	+2·2	+2·6	+2·4	+3·5	+1·8
N.-W. Provinces and Oudh	+2·0	+1·0	+1·2	+2·6	+4·4	+6·3	+6·6	+3·4
Punjab	+4·0	+4·9	+5·3	+5·8	+7·2	+9·1	+8·6	+6·4
Bombay	+0·8	+1·0	+1·4	+1·6	+1·6	+1·9	+1·6	+1·4
Berar and Central Provinces	+1·7	+1·2	+0·3	−0·1	+1·4	+2·2	+2·4	+1·2
Guzerat and Central India	+2·7	+2·2	+0·9	+2·4	+4·3	+4·3	+4·2	+3·0
Sind and Rajputana	+4·7	+3·5	+4·9	+6·1	+5·2	+6·5	+5·2	+5·2
Madras	−0·4	0	−1·0	−0·3	+0·1	−1·3	+0·1	−0·4
Mean for whole India	+1·6	+1·4	+1·4	+2·2	+2·9	+3·4	+3·6	+2·4

The above figures show that for the whole of India on the mean of the week there was an average diurnal excess of $2\frac{1}{2}°$. For the first three days the average excess was only about $1\frac{1}{2}°$, but on the 16th it reached 2°; on the 17th, 3°; and by the close of the week amounted to $3\frac{1}{2}°$. The provincial variations show that in Burma and Madras there was a trifling deficiency of temperature on the mean of the week, but that in all other provinces there was an excess which ranged from 6° in the Punjab and 5° in Rajputana, to 1·2° in Berar and the Central Provinces. Maxima exceeding 100° were reported from a few places at the commencement of the week, but the most marked rise of temperature occurred subsequent to the 17th, after which date maxima of over 100° were reported from all provinces.

Rain.—The rainfall table at the close of the summary shows that during the week under review rain fell only in Assam and Malabar, and even in these localities in smaller amounts than is normally the case; thus in the Cachar Division the normal rainfall for the week is 2·01 inches, while the actual amount received was 0·01 inch only; in the Assam Valley the normal is 0·90 inch, and the actual received was only 0·11 inch.

The three final columns of the table show that for the three weeks, February 28th to March 19th, rainfall has been largely deficient in, or altogether absent from, all divisions, except Malabar and Madras (South).

Provinces.	Division.	Rainfall data for week ending March 19th, 1892. Average actual rainfall of Division.	Average normal rainfall of Division.	Excess or defect in inches.	Rainfall data from February 28th to March 19th. Average actual rainfall of season to date.	Average normal rainfall, February 28th to March 19th.	Excess or defect of (seasonal) rainfall expressed as a percentage.

W. L. DALLAS,
Assistant Meteorological Reporter to the Government of India.

Simla, the 24th March, 1892.

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the week ending at 8 a.m. on Saturday, March 26th, 1892.

During the week under review very quiet weather has prevailed throughout India, and the conditions of pressure distribution and of wind circulation have steadily progressed towards those which are characteristic of the hot season. These conditions consist of relatively high pressures over the Arabian Sea, the Bay, and Lower Burma, and relatively low pressures over the Gangetic plain and the Punjab. While these changes have been in progress, temperature has risen steadily throughout nearly all parts of the Indian region, and at the close of the week the heat was excessive everywhere, but particularly over North-West India.

On the 20th the barometer was falling almost everywhere, the change in the north and north-west being brisk to rapid. Pressure was highest on the South Konkan Coast and lowest over the north of the Gangetic plain, but the pressure differences were nowhere large. Westerly winds prevailed over the Gangetic plain and south-westerly to southerly winds over the Bay and Bengal. Elsewhere the directions were variable. The only rainfall was a light shower at Cochin. On the 21st a recovery of pressure had commenced over Burma, but in all other provinces the barometric fall continued. Pressure was becoming high and uniform over the southern half of India, while slight gradients existed in the north, and readings were low over the Western desert and the Gangetic plain. The winds were generally unaltered, and the only rainfall was a light shower at Sibsagar and Trivandrum and a heavyish shower at Tavoy. The chart of the 22nd showed a slight barometric fall over the Deccan and Khandeish and a rise elsewhere. The general distribution was unaltered, and the wind circulation was approximately the same as on the two preceding days. Showers had fallen at Sibsagar, Tavoy, and Colombo. On the 23rd the barometric changes were irregular. Low pressure areas were shown over Burma, over the Western desert, over the north of the Punjab, and over the north-west of the North-Western Provinces; but the amount of the depression compared with that in neighbouring districts was slight, and pressure generally was uniform. The winds were more variable than on preceding days, and the only rainfall was a few drops at Colombo. On the following day, the 24th, pressure rose on the West Coast and fell everywhere else—most in the north-west—so that there had occurred a considerable increase in the barometric gradient, and the winds had become stronger. Pressure was lowest over the Punjab and highest on the West Coast. The winds exhibited the ordinary hot weather circulation, and westerly gales prevailed down the Gangetic plain. The only rainfall was a shower at Trivandrum. On the 25th the barometer was falling in all places except Lower Burma. A well marked depression overlay the Punjab, and gradients continued moderately steep. Strong winds from the normal directions prevailed generally, and the weather was fine, the only rainfall reported being a shower at Tavoy. The chart

of the 26th showed that the barometer had risen over Northern India and Upper Burma, changed irregularly over the Indian Peninsula, and fallen over Lower Burma. Pressure was lowest over the north of the Punjab and the Gangetic plain, and a small depression had appeared over Lower Burma. The winds varied a good deal in direction. Strong southerly winds prevailed in the Bay, easterly winds in Bengal and Behar, and hot westerly winds in North-Western and Central India. Duststorms and dusthaze were reported from several places, and the sky was more cloudy than of late in Northern India. Rain was falling in Lower Burma and at Sibsagar.

Temperature.—In most Provinces temperature has increased quickly during the week, the rise being more rapid than is ordinarily the case. The following table shows the variations of the mean temperature from the normal on each day of the week for the principal Provinces of India:

Province.	20th.	21st.	22nd.	23rd.	24th.	25th.	26th.	Mean variation of week.
	°	°	°	°	°	°	°	°
Burma	+0·2	+0·2	+0·3	+0·1	+1·1	+1·9	—0·5	+0·5
Bengal and Assam	+4·0	+4·0	+4·3	+3·6	+4·4	+4·8	+3·9	+4·1
North-Western Provinces and Oudh.	+6·1	+4·2	+4·2	+4·3	+4·8	+6·8	+6·6	+5·3
Punjab	+7·2	+6·7	+7·4	+8·4	+10·5	+12·1	+11·9	+9·2
Bombay	+1·4	+0·7	+0·5	+1·9	+2·4	+1·7	+2·1	+1·5
Berar and Central Provinces.	+3·8	+2·7	+2·5	+3·0	+3·8	+4·4	+4·9	+3·6
Guzerat and Central India	+2·3	+2·2	+2·1	+3·4	+5·3	+5·5	+5·8	+3·8
Sind and Rajputana	+4·3	+4·5	+5·5	+6·1	+7·4	+7·4	+9·3	+6·4
Madras	+1·3	+1·6	+1·6	+0·9	+2·6	+4·2	+4·3	+2·4
Mean for whole India	+3·4	+3·0	+3·2	+3·5	+4·7	+5·4	+5·4	+4·1

For the whole of India there was a mean diurnal excess of 4·1°, the excess being least (3°) on the 21st and greatest (5·4°) on the 25th and 26th. The provincial variations showed that the greatest excess was in the north-west, the Punjab having a mean diurnal excess of 9·2°, Sind and Rajputana of 6·4°, and the North-Western Provinces of 5·3°. In Burma and Bombay the excess was small.

The maxima in the north-west have been extraordinarily high, the readings as compared with normal having been on some days from 15° to 18° above the normal average.

Rain.—As shown in the earlier paragraphs of the summary, rainfall during the week was practically confined to North-East India, the only fall outside that region being a few light showers in Malabar. The table at the close of the

summary shows that rain has fallen in eleven of the rainfall divisions. These divisions are Tenasserim, Lower and Central Burma, Assam, East, Deltaic, Central, and North Bengal, North Behar, and Malabar. Of these eleven divisions, seven had effective—*i.e.*, more than one-tenth of an inch—rainfall, and four, *viz.*, East, Deltaic, and Central Bengal and North Behar, had non-effective rainfall, the average for the division for the week being less than one-tenth of an inch. The heaviest rainfall was in Tenasserim, where 1½ inches were received. In the three Burma divisions which received rain, and also in North Bengal, the rainfall of the week was in excess of the normal, but in the remaining seven divisions recording rain the fall was short.

The three last columns of the table which exhibit the state of the rainfall from February 28th to date show that Tenasserim, Lower Burma, and Central Burma are the only divisions in which the rainfall of the period has been excessive. In all the other divisions it has been deficient—in most cases very largely so. In Guzerat, though there has been no rain, there is no variation from the normal, as none is expected there for the period under review.

Some moderately heavy falls were recorded during the week in North-East India. Of these the following were the more important:

Burma—Amherst	Thatōn	2·37 inches.
Shwegyin	Pyuntaza	1·70 „
Assam—Khasia Hill	Cherrapunji	1·83 „
Bengal—Bogra	Sudder	2·46 „
Rungpur	Kurigram	3·85 „

W. L. DALLAS,

Assistant Meteorological Reporter to the Government of India.

Simla, *31st March, 1892.*

E. C. BUCK,

Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 26th March.*—Prospects unchanged; harvest nearly over; field work proceeding under falls and channels; water-supply in affected areas decreasing, but sufficient for drinking everywhere obtainable. Deficiency of fodder in affected areas increasing, and cattle suffering severely in parts. Prices stationary. FAMINE RELIEF: *Numbers on relief works*:—Deccan 38,742, East Coast 6,989, South Central 2,557: *Total* 48,288 against 44,380 last week. *Gratuitous relief*:—Deccan 771, East Coast 45, South Central 224: *Total* 1,040 against 887; increase in Kurnool. Loans for wells—Deccan Rs. 2,81,000, East Coast Rs. 6,06,000, and South Central Rs. 3,81,000 disbursed. Wells constructed—138, 1,954, and 306: under construction—2,465, 3,698, and 2,256 in respective blocks. Agriculturists loans—Rs. 60,000, Rs. 34,000, and Rs. 87,000 disbursed in respective blocks.

Bombay.—*For week ending 30th March.*—Harvesting of late crops, cotton picking, and preparations for next season progressing. Scarcity of fodder in parts of nine and of water in parts of six districts. Cattle distressed in parts of four districts. Prices generally steady. FAMINE RELIEF: *Numbers on relief works*:—Professional Agency—Bijapur 86, Belgaum 382 on 26th; Dharwar 1,045; Civil Agency—Belgaum 323 on 26th; Dharwar 638: *Total* 2,474.

Bengal.—*For week ending 29th March.*—Fairly general rain in Northern Bengal, where cultivation of early rice and jute will now go on. No rain in other parts of the Province, and it is urgently required for all standing crops and for ploughing and early sowings. *Rabi* harvest still proceeding; general outturn not expected to be good, and in some parts very poor. Opium collections nearly over, but owing to high west winds the yield has been somewhat reduced. A good crop of *mohua* is being gathered. Mango crop promises well, but in some districts blossoms said to have been injured. Prices continue practically unchanged. Cattle are in good condition; sufficient supply of fodder still available, but want of water is beginning to be felt in some places. FAMINE RELIEF: Rain has improved prospects in Rajshahye Division, but the situation in Patna and Bhagalpur Divisions remains as before. *Numbers on relief works*:—Mozaffarpur 1,768, Darbhanga 2,641, Monghyr 108, Bhagalpur 3,255, Purneah not reported, Dinajpur 9,255: *Total* 17,027. *Gratuitous relief*:—Monghyr 206, Bhagalpur 85, Purneah no report: *Total* 291.

North-Western Provinces and Oudh.—*For week ending 30th March.*—No rain. Weather abnormally hot. Harvesting of *rabi* in progress; average outturn expected. Wheat slightly injured by high wind and drought in Moradabad and Kumaon. Opium collection nearly finished. Sowing and irrigation of sugarcane, indigo, and extra crops in progress. Markets well supplied. Prices

steady. Water and fodder for cattle sufficient. Condition of agricultural stock continues good.

Punjab.—*For week ending 30th March.*—No rain. Prices unsettled in one district; rising in another; falling in two; and stationary elsewhere. Harvesting of *rabi* crops commenced. Irrigation of standing crops from canals and wells in progress. Crops withering for want of rain in most districts. Sowings of extra *rabi* and *kharif* crops commenced. Prospect of *rabi* crops is generally reported fair on irrigated lands, and below average on unirrigated lands. The condition of standing crops is not good for want of rain in Jullundur and parts of Amritsar. Cattle suffering from want of fodder and overwork on wells in Sialkot and Shahpur; their condition is fair in other districts. Fodder scarce in seven districts; insufficient in one; and sufficient elsewhere.

Central Provinces.—*For week ending 30th March.*—Weather very hot. Reaping of *rabi* crops in northern districts continues. Prospects of *rabi* harvest as given in the wheat and linseed forecasts unchanged. Fodder sufficient, except in Seoni and in Bargarh tahsil, Sambalpur district, where it is reported to be poor and insufficient. Prices unchanged.

Burma.—*For week ending 26th March.*—LOWER BURMA: Reaping, threshing, and winnowing completed. UPPER BURMA: The cultivation of *mayin* paddy is progressing favourably; peas, wheat, and gram being reaped in some places; reaping completed in others. The price of paddy has risen largely in Pegu, Bassein, Tavoy, Mandalay, Ruby Mines, Yamethin, Bassein, and Pyinmana; considerably in Akyab, Amherst, Pakokku, and Kyaukse; slightly in Prome; and fallen in Tharrawaddy and Bhamo. FAMINE RELIEF: *Numbers on relief works*:—Shwebo 1,605, excluding numbers on one tank, Yeu 1,351, Sagaing 254, Lower Chindwin 3,226, Myingyan 1,156, Magwe 428, Meiktila 7,235, and Yamethin 12,809; Minbu not reported: *Total* 28,074.

Assam.—*For week ending 30th March.*—Average rainfall 3·16 inches. Rain beneficial to crops. Pressing of sugarcane and sowing of summer rice continue. Cattle in good condition. Fodder sufficient.

Mysore and Coorg.—*For week ending 30th March.*—MYSORE: Crops withering for want of rain, and no improvement in prospects. No material change in prices. FAMINE RELIEF: *Numbers on relief works*:—Bangalore 741, Tumkur 1,040, Kolar 11,822, and Shimoga 20: *Total* 13,623.

COORG:—Slight rain. *Vyshaka* crop in good condition. Slight rise in prices. Water-supply sufficient, but forage becoming rather scarce.

Berar and Hyderabad.—*For week ending 30th March.*—BERAR:—Weather warm. Threshing of *rabi* crops continues. Fodder in Kurankhed and Mhysang circles of Akola taluk and in Ellichpur taluk insufficient. Water scarce in Dariapur taluk. Prices slightly risen.

HYDERABAD:—No rain during week. Scarcity of water and fodder in all taluks is increasing day by day, and tanks are getting dry and cattle are becoming weak and lean for want of fodder. Fever is prevalent, but it has abated a little in Anurpett taluk. Prices—wheat 9¼, coarse rice 8¾, white *juar* 13¾, yellow *juar* 16¼, and *tur* 12¼ seers per current sicca rupee.

Central India.—*For week ending 30th March.*—Prices of food-grains falling in Bundelkhand, Bhopawar, and Goona; steady elsewhere. No other change since last report.

Rajputana.—*For week ending 30th March.*—No rain; crops being cut and harvested. No material change in Ajmere; crops damaged partly by hail in Dholpur. Cattle in poor condition and fodder scarce in six States, and Ajmere and Kherwara. Water scarce in Ajmere, Kherwara, and at places in Kotah. Prices falling in four States; steady in seven; and fluctuating in one. FAMINE RELIEF: *Numbers on relief works*:—Marwar 2,390 laborers on relief works, 2,603 gratuitously treated, and 51 immigrants; Kotah 96 immigrants; Ajmere 23,838 laborers on relief works, 2,170 receiving gratuitous relief, and 1,391 on ordinary works; Bikanir 5,678 laborers on relief works, 2,237 gratuitously treated: *Total*—relief laborers 33,397; gratuitously treated 7,010.

Nepal.—*For week ending 24th March.*—No rain. Weather hot and cloudy. Prospects normal. Prices continue high.

SUPPLEMENT TO

The Gazette of India.

No. 15.} SIMLA, SATURDAY, APRIL 9, 1892.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the week ending at 8 a.m. on Saturday, 2nd April 1892.

During the past week the barometric changes over India, though at times large, have had comparatively little effect on the weather, which, except in parts of the north-east, has remained fine and hot. Pressure has been low over the Western desert and the Gangetic plain, and high over Burma, the Bay, the south of the Peninsula, and the Arabian Sea. Gradients have varied very considerably, at one time the barometric differences between the north and south being large, and at others very small.

Accompanying these changes there have been large alterations in the wind force. On the 28th and 29th very strong winds blew on the hills and the neighbouring plains, while on the 1st and 2nd, except in the north-east, light and rather variable breezes were reported. The disturbed weather with which the week commenced, if the barometric oscillation and its accompanying strong winds can be so described, had a marked effect on the temperature of Northern India. The extremely excessive temperatures of the previous week gave way; and, though in nearly all Provinces on nearly all days of the week the mean temperature was higher than usual, the excess was less than it had previously been.

On the 27th pressure was low over the Gangetic plain and high over the Bay and Lower Burma. The differences were slight, and the winds were somewhat irregular on the West Coast. Elsewhere the directions were fairly normal, and at the head of the Bay the force was strong. Showers were reported from parts of Burma, from Dhubri, and from Trivandrum. The chart of the 28th showed a

sudden fall of the barometer in all parts of India except the West Coast. The relative positions of the areas of high and low pressure were unaltered, but gradients had very considerably increased, and were steep in Northern India. Strong westerly and north-westerly winds prevailed over North-West and Central India, strong southerly winds over the Bay, and easterly winds in North Bengal and Behar. Showers were falling in Assam, North and East Bengal, and Malabar. In Bengal the amounts generally exceeded 1 inch. On the 29th the barometer was still falling, and the general conditions were unaltered. The winds were still strong from about the same directions as on the previous day; but the rain was lighter, though it still fell in Assam, East Bengal, and Malabar. The chart of the 30th showed that a recovery of pressure had commenced, and the barometer was rising almost everywhere, the rise being rapid in the north-west. Pressure was lowest over Behar and gradients were still moderately steep over North-East India, but elsewhere readings were becoming uniform. Strong southerly winds prevailed in Bengal, but elsewhere the force was decreasing. Rain was again reported from Assam, East Bengal, and Malabar. On the 31st pressure was still rising almost everywhere; and, though moderate gradients still prevailed over the Bay, readings generally were fairly uniform. Strong southerly winds still prevailed over the Bay and Lower Bengal and light breezes elsewhere. Light showers were again reported from Assam, Darjeeling, East Bengal, and Malabar. On the 1st pressure was still rising, except in Burma. Readings remained fairly uniform, and the general wind directions were unaltered. Heavyish rain had fallen in Assam and showers in East Bengal and Mysore. On the 2nd pressure was beginning to fall again in North-West India, but still rose elsewhere. Barometric gradients had consequently increased somewhat, but on the whole the general situation was little changed. Showers were reported from Assam and from a few central stations of the Peninsula. The amounts were small.

Temperature.—The mean temperature, though less excessive as compared with the normal than it was last week, has yet been considerably higher than usual almost everywhere.

The following table shows the variations of the mean temperature from the normal on each day of the week for the principal Provinces of India:

Province.	March					April		Mean variation of week.
	27th.	28th.	29th.	30th.	31st.	1st.	2nd.	
	°	°	°	°	°	°	°	°
Burma	−4·0	−1·1	−1·5	−0·8	+0·6	+0·1	+0·1	−0·9
Bengal and Assam	+3·7	+2·1	+1·6	+2·6	+1·4	+1·0	+0·3	+1·8
North-Western Provinces and Oudh.	+6·4	+6·7	+3·6	+1·3	−0·4	+0·6	+1·9	+2·9
Punjab	+8·5	+9·0	+7·0	+2·4	+1·0	+3·9	+8·5	+5·8
Bombay	+3·6	+5·2	+2·4	+0·8	+0·5	+0·9	+2·9	+2·3
Berar and Central Provinces.	+6·1	+6·0	+3·5	+2·6	+2·9	+4·1	+4·3	+4·2
Guzerat and Central India	+7·6	+7·6	+5·1	+4·6	+3·2	+4·2	+4·6	+5·3
Sind and Rajputana	+10·7	+8·7	+8·5	+7·3	+6·7	+7·6	+6·5	+8·0
Madras	+3·4	+3·9	+4·7	+5·4	+4·1	+3·1	+2·5	+3·9
Mean for whole India	+5·1	+5·3	+3·9	+2·9	+2·2	+2·8	+3·5	+3·7

The mean diurnal excess for the whole of India was thus 3·7°, the warmest day being the 28th, with an average excess of 5·3°, and the coolest the 31st,

with an average excess of 2·2°. The Provincial variations showed a slight deficiency in Burma, a slight excess in Bengal, a moderate excess in the North-Western Provinces, Bombay, the Central Provinces, and Madras, and a considerable excess in the Punjab, Guzerat, Central India, Sind, and Rajputana. In the two Provinces last named, and also in the Punjab, the abnormal excess at the commencement of the week was very large.

Rain has been somewhat more general during the week under review than in the immediately preceding weeks, and in North-East India has been much heavier. Rain has fallen in nineteen out of the fifty-two divisions into which India is divided; but in five of these nineteen divisions the total average rainfall of the division has been less than one-tenth of an inch, and consequently has been of relatively little importance. The regions within which rain has fallen include all the Burma divisions, except Arakan, the Assam divisions, East, Deltaic, Central, and North divisions of Bengal, Behar (North), Malabar, Madras (Central, South Central, and South), Coorg, Mysore, and the East Coast (North and South); and the divisions where the total average rainfall of the division has been less than one-tenth of an inch are Upper Burma, Deltaic Bengal, the East Coast (North and South), and Madras (Central).

The heaviest rainfall during the week was in Assam. Cachar received an average of 14 inches, which was 11 inches more than the normal; and the Brahmaputra valley received 5½ inches, which was 4 inches more than the average. After Assam the next heaviest falls were 1·21 inches in North Bengal and 1 inch in Tenasserim. The third column of the table shows that the week's rainfall was in excess of the normal in Tenasserim, Lower and Central Burma, in Assam, in North Bengal, in North Behar, in Malabar, in Coorg, and in Mysore, the excess, except in the case of Burma, Assam, North Bengal, and Malabar, being small.

The concluding columns of the table show that from the 28th of February to date the rainfall has been largely excessive over the greater part of Burma; moderately excessive over Assam and North Bengal; and slightly excessive in Malabar. In all the other divisions, except Guzerat, it has been deficient—in most cases largely so. Over the central parts of the country and the east of the Peninsula there has been practically no rain during this period.

The following were the heaviest falls recorded during the week:

Burma	Tavoy	Sudder	2·38 inches.
Bengal	Mymensingh	Netrakhona	4·99 ,,
,,	Rungpur	Gaibandha	3·94 ,,
Assam	Sylhet	Sunamganj	9·53 ,,
,,	Khasia Hills	Cherrapunji	61·54 ,,
,,	Sibsagar	Sudder	11·38 ,,
,,	Darrang	Mangaldai	7·05 ,,
Malabar	Travancore	Kottayam	4·71 ,,
Mysore	Mysore	Heggaddavankot	3·00 ,,

Simla, *7th April, 1892.*

W. L. DALLAS,
Assistant Meteorological Reporter to the Government of India.

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 2nd April.*—Some local showers in parts of Central, Southern, and West Coast districts. Prospects unchanged. Field work confined to land under wells and channels. Deficiency of water-supply and fodder in parts of affected area increases, but drinking water procurable everywhere. Sufferings of cattle intensify. Prices almost stationary. FAMINE RELIEF: *Numbers on relief works*:—Deccan 36,586, East Coast 6,034, and South Central 3,439: *Total* 46,059 against 48,288 last week. Decrease in Nellore, Kurnool, and Cuddapah due, where explained, to occurrence of Telugu New-Year's day in the week. *Numbers on gratuitous relief*:—Deccan 678, East Coast 42, and South Central 210: *Total* 930 against 1,040 last week. Decrease in Kurnool and Anantapur. Loans for wells—Deccan Rs. 3,55,000, East Coast Rs. 6,21,000, and South Central Rs. 3,92,000: *Total* Rs. 13,68,000 disbursed. Wells constructed—464, 1,956, and 306: under construction—2,680, 3,715, and 2,487 in respective blocks. Agriculturists' loans—Rs. 33,000, Rs. 34,000, and Rs. 87,000: *Total* Rs. 1,54,000 disbursed in respective blocks.

Bombay.—*For week ending 6th April.*—Slight rain in parts of Poona, Bijapur, and Belgaum. Wheat in parts of Hyderabad injured by stormy weather or insects; standing crops otherwise fair. Harvesting of late crops and preparations for the next season continue generally. Fodder scarce in parts of nine and water in parts of six districts. Cattle distressed in parts of four districts. Prices generally steady. FAMINE RELIEF: *Numbers on relief works*:—Professional Agency—Poona 297, Bijapur 105, Belgaum 664, and Dharwar 968; Civil Agency—Belgaum 255; Dharwar 381: *Total* 2,670.

Bengal.—*For week ending 5th April.*—Rain has fallen generally in Northern and Eastern Bengal and in parts of North Behar, while local showers also occurred in places in Central Bengal. In these tracts agricultural prospects have greatly improved, and ploughing and early sowings are now proceeding. *Rabi* harvest practically over. The general outturn, as previously reported, is not good, and in some parts very scanty. Opium weighments begun. Mango and *mahua* prospects continue satisfactory. Prices generally are stationary. Cattle are in good condition. Complaints of water running short are received from scattered localities in all parts of the Province except Orissa. Fodder is also reported to be becoming scarce in some districts. Rain over Rajshahye Division and parts of Bhagalpur Division has materially improved prospects in those parts. FAMINE RELIEF: *Numbers on relief works*:—Mozaffarpur 3,460, Darbhunga 11,501, Monghyr 75, Bhagalpur 3,957, Purneah 3,190, and Dinajpur, 1,094: *Total* 23,277. *Number on gratuitous relief*:—Monghyr 197,

Purneah 671: *Total* 868. No relief works yet opened or gratuitous relief given in Gaya, Bogra, or Julpaiguri.

The figure given in last week's telegram as number on relief works in Dinajpur, should have been 1,616 instead of 9,225.

North-Western Provinces and Oudh.—*For week ending 6th April.*—Weather seasonable. Rain much needed for spring crops in Almora. Harvesting of *rabi* in full progress; in some districts nearly finished; prospects good. Irrigation of sugarcane, indigo, and extra crops in progress. Opium collections nearly completed. Fodder and water-supply ample. Prices fluctuating.

Punjab.—*For week ending 6th April.*—Rainfall *nil*. Prices unsettled in two districts; falling in two others; stationary elsewhere. Irrigation of standing crops by canals and wells going on. Harvesting of *rabi* crops in progress. Ploughings and sowings of sugarcane and cotton as well as of extra *rabi* crops commenced. Crops on irrigated lands are reported average, but those on *barani* lands have suffered much for want of rain. Their condition is not good in five districts. Gales are said to have caused considerable damage to standing crops in Peshawar. Locusts have appeared in parts of Dera Ismail Khan, but no damage to crops is reported. Cattle suffering from want of fodder in three districts; elsewhere their condition is fair. Fodder scarce in all but three districts.

Central Provinces.—*For week ending 6th April.*—Weather very warm. Reaping of *rabi* crops in northern districts continues. Prospects of *rabi* harvest, as given in the wheat and linseed forecasts, unchanged. Fodder and water-supply getting scarce in places.

Burma.—*For week ending 2nd April.*—LOWER BURMA: Agricultural operations completed. UPPER BURMA: *Mayin* paddy progressing favourably; peas, wheat, gram, and island crops being reaped. In Kyaukse land being prepared for sowing of early paddy. The price of paddy has risen considerably in Henzada, Thayetmyo, Tavoy, and Minbu; slightly in Akyab, Prome, Toungoo, and Yamethin; while it has fallen in Amherst and Katha. FAMINE RELIEF: *Numbers on works*:—Yeu 1,776, Sagaing 257, Lower Chindwin 1,590, Myingyan 744, Minbu 62, Magwe 626, Meiktila 2,356, Yamethin 8,216, excluding one work; Shwebo 2,052, exclusive of number on one work: *Total* 17,679.

Assam.—*For week ending 6th April.*—Rainfall general. Weather seasonable. Sugarcane pressing finished. Sowing of summer rice continues. Fodder supply improving.

Mysore and Coorg.—*For week ending 6th April.*—MYSORE: Slight rain reported in parts of five districts. Crops withering. Outturn of harvests generally fair. Want of fodder and water felt in parts. Prices slightly risen in one district. FAMINE RELIEF: *Numbers on relief works*:—Bangalore 557, Tumkur 2,406, Kolar 1,900, Chitaldroog 399, and Shimoga 204: *Total* 5,466.

COORG: Hot-weather rice crop thriving. Coffee blossoming in some parts. More rain wanted. Slight rise in prices. Forage and water for cattle becoming scanty.

Berar and Hyderabad.—*For week ending 6th April.*—BERAR: Weather warm. Harvesting of *rabi* crops nearly completed. Land under

preparation for ensuing season. Fodder insufficient in three taluks. Water sufficient all over, except in Dariapur. Prices slightly risen in three districts and stationary in the rest.

HYDERABAD: No rain during week. Weeding of *tabi* crops in progress. Scarcity of water in all taluks is increasing day by day, and tanks are getting dry. Owing to scarcity of fodder cattle are getting weak. Prices—wheat $9\frac{1}{4}$, coarse rice $8\frac{3}{4}$, white *juar* $13\frac{3}{4}$, yellow *juar* $16\frac{1}{4}$, and *tur* 12 seers per current rupee.

Central India.—*For week ending 6th April.*—No change in condition of crops and weather since last report.

Rajputana.—*For week ending 6th April.*—No rain. Crops being cut and harvested. Sugarcane being planted in Kerowlee. No material change in Ajmere. Crops damaged partly by hail in Dholpur. Cattle poor in six States, also in Ajmere; good or fair in others. Pasturage or fodder scarce in six States, also in Ajmere. Water scarce at Ajmere and parts of Kotah. Prices fallen in three States, falling in three, steady in three, rising in Kherwara and Meywar, and fluctuating in Ajmere and Jeypore. FAMINE RELIEF: 2,610 on relief works and 2,521 gratuitously relieved in Marwar; 74 immigrants and 11 cattle in Kotah; in Ajmere 22,756 on relief works, 3,660 receiving gratuitous relief, and 1,455 on ordinary works; on relief works in Jeypore 6,076, in Kishengarh 948; on gratuitous relief in Kishengarh 119; in Bikanir 5,641 on relief works and 2,232 receiving gratuitous relief: *Total* on relief works 39,486; gratuitous relief 8,532.

Nepal.—*For week ending 31st March.*—Weather cool and pleasant. Prospects good. Prices high and rising.

J. W. P. MUIR-MACKENZIE,
Under-Secretary to the Government of India.

GOVERNMENT OF INDIA.

(*d*) Includes the Amritsar-Pathánkot and Jammu and Kashmir Railways.
(*e*) Although for convenience classed among the State Railways, this line is the property of the Bengal Central Railway Company.
(*f*) Includes the Toungoo-Mandalay and Mu Valley Railways.
(*g*) Includes the Dhond-Manmád, Wardha Coal, Khámgaon, and Amráoti State Railways.
(*h*) Total receipts from 1st to 28th March 1891.
(*i*) Includes the Bezváda Extension.
(*j*) Total receipts from 5th May 1890 to 28th March 1891.
(*k*) Total receipts from 21st April 1891 to 26th March 1892.

F. B. HEBBERT.

SIMLA, *the 8th April, 1892.*

Printed and published for the GOVERNMENT OF INDIA *at the* GOVERNMENT CENTRAL PRINTING OFFICE, *Simla.*

SUPPLEMENT TO

The Gazette of India.

No. 16.} CALCUTTA, SATURDAY, APRIL 16, 1892.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the* GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.

No Official Orders or Notifications, the Publication of which in the* GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.

GOVERNMENT OF INDIA.

FINANCE AND COMMERCE DEPARTMENT.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the week ending at 8 a.m. on Saturday, 9th April 1892.

Over the Peninsula ordinary conditions of pressure, wind, and weather have prevailed; but over Northern India conditions have been slightly unsettled, and rain has occurred first in the north-east, and subsequently in the extreme north-west. The rain in the north-east was apparently connected with small and local irregularities of pressure, which were accompanied with thunderstorms; while the rain in the north-west accompanied a rather large depression, which first appeared over the Western desert, and subsequently concentrated over the Punjab.

On the 3rd pressure was fairly uniform generally, but was relatively low over the Western desert, the Gangetic plain, and the north-east of the Peninsula, and relatively high over Burma, Assam, the Bay, and the Arabian Sea. The winds were fairly normal in direction and force, and the weather generally was fine and hot, though light local showers were reported from Kindat, Dhubri, Darjeeling, and Belgaum, and moderately heavy rain from Tavoy. The chart of the 4th showed that the barometer had risen in Sind, Guzerat, the Peninsula, and Lower Burma, and fallen over Northern and Central India. In consequence gradients had increased somewhat, but the relative distribution of pressure had not changed much. Over Bengal the isobars showed that the distribution of pressure was irregular, and moderate showers were reported from the stations in North and Central Bengal and light showers from Upper Burma. Mymensingh received nearly 2 inches and Jalpaiguri, Dinajpore, Bogra, and Purneah about 1 inch. There was no rain in any other part of India. On the 5th the barometer was rising over the Punjab, the Gangetic plain, and Bengal and falling elsewhere, so that gradients had again decreased. Fairly general showers were reported from Burma, Assam, and Lower Bengal, and light showers had fallen at Colombo, Belgaum, and Salem. On the 6th the barometer was falling generally, except in the North-Western Provinces. Over the Punjab the fall had been brisk, and a well marked depression had been formed over the Western desert, a second over the central parts of India, a third over North Bengal, and a fourth over Lower Burma. Easterly winds prevailed from North Bengal up the Gangetic plain and as far as Lahore, and feebly cyclonic winds prevailed around each of the low pressure areas noticed above. Light showers had fallen at Calcutta, Berhampore, Darjeeling, and Quetta; but elsewhere the weather was fine, though there was much dusthaze in the north-west. On the 7th the barometer was rising in the extreme north-west, but was still falling elsewhere. The depression in the north-west had concentrated considerably, and the centre, where pressure was nearly 0·1″ below the normal, lay over the north of the Punjab. In other respects the general distribution had not changed much. Strong cyclonic winds were blowing in the Punjab and a strong easterly current up the Gangetic plain. Duststorms were reported from several stations in the north-west, and rain had fallen at Srinagar, Murree, Peshawar, and Dera Ismail Khan, and during the day rain extended to Mussoorie and Ranikhet.

Light showers had also occurred at Ratnagiri and Belgaum. The chart of the 8th showed that pressure had risen fast in the Punjab, the depression had disappeared, and a high pressure area had been developed. A large low pressure area overlay the central parts of the country, while readings were relatively high over the Bay area. Local showers had fallen at Tavoy, Moulmein, Cuttack, Cochin, and Mercara. On the 9th the barometric changes were irregular and the distribution had returned to the condition which prevailed at the commencement of the week, readings being high over the Bay and Arabian Sea and low over the Gangetic plain and West Bengal and over the Western desert. The easterly current up the Gangetic plain had disappeared, and the wind directions were fairly normal. Showers had been fairly general over the Peninsula, and scattered rain had fallen in Lower Burma, Assam, and at Darjeeling.

Temperature.—There was still no change in the temperature conditions over India, the weather remaining exceptionally warm everywhere.

The following table shows the variations of the mean temperature from the normal on each day of the week for the principal Provinces of India:

Province.	3rd.	4th.	5th.	6th.	7th.	8th.	9th.	Mean variation of week.
	°	°	°	°	°	°	°	°
Burma	−0·3	−0·5	−0·1	−0·6	+1·1	+1·1	+0·5	+0·2
Bengal and Assam	+0·9	+0·7	−0·8	−0·5	+1·7	+2·8	+3·7	+1·2
North-Western Provinces and Oudh.	+4·5	+5·3	+6·1	+5·9	+6·0	+5·8	+3·8	+5·3
Punjab	+10·8	+10·6	+10·2	+11·6	+10·0	+4·8	+4·8	+9·0
Bombay	+2·8	+3·7	+2·7	+3·5	+3·9	+3·6	+2·8	+3·3
Berar and Central Provinces.	+3·2	+4·2	+5·3	+6·1	+5·3	+4·8	+5·2	+4·9
Guzerat and Central India	+5·2	+6·7	+6·2	+5·9	+5·9	+5·3	+4·3	+5·6
Sind and Rajputana	+7·5	+8·5	+5·7	+5·8	+7·4	+5·1	+3·9	+6·3
Madras	+2·5	+3·1	+2·7	+2·2	+1·8	+2·4	+2·2	+2·4
Mean for whole India	+4·1	+4·7	+4·2	+4·4	+4·8	+4·0	+3·5	+4·2

The mean temperature of the whole of India was thus half a degree higher than it was last week, and was 4·2° above the normal average. The daily excess was very steady at about 4½° for the first five days of the week, after which, owing to the rainfall in the north-west reducing the temperature of that locality, the excess fell to 4° and 3½°. From the 3rd to the 7th the excess of temperature over the Punjab was over 10°.

Rain.—The concluding table shows that, as described in the earlier sections of the summary, there has been good rain over North-Eastern India, moderate showers over the Peninsula, very slight rain in a few places in the north-west, and

no rain elsewhere. The table shows that rain has been received in twenty-four of the rainfall divisions. These twenty-four divisions include the whole of Burma except Arakan, the whole of Bengal except Orissa and South Behar, the submontane part of the North-Western Provinces, the north-west of the Punjab, and the whole of the Peninsula except the East Coast [North (*a*), Central, and South]. Of these twenty-four divisions, nineteen received effective rain, while five, *viz.*, the North-Western Provinces (Submontane), the Punjab (North-West), the East Coast (North), and Madras (Central and South), received less than one-tenth of an inch. The regions which had absolutely no rain were roughly the Punjab, the North-Western Provinces (with the unimportant exceptions noticed above), Rajputana, Central India, the Central Provinces, Berar, Khandeish, Guzerat, Kattiawar, and Sind.

Of the twenty-four divisions which received rain, thirteen, *viz.*, Tenasserim, Lower and Central Burma, the Assam Valley, Deltaic, Central, and North Bengal, Chota Nagpur, North Behar, Coorg, Mysore, the Konkan, and the Deccan, had more than the average rainfall for the week under review. This excess ranged from 1½ inches in Tenasserim to only a few hundredths of an inch in Lower Burma, Assam, Deltaic and North Bengal, and Chota Nagpur. The largest absolute deficiency among the divisions which received rain was in Cachar.

The three latter columns of the table which exhibit the state of the seasonal rainfall, *i.e.*, the total rainfall for the period February 28th to date, show that there has been a large excess of rain for that period over Burma (except Arakan), the Konkan, and the Deccan; a moderate excess in Assam and Mysore; and a slight excess in North Bengal and Malabar. In all other divisions there has been a deficiency, which over a large part of the country has been large. Over a considerable part of Northern and Central India there has been absolutely no rain during the period under review.

The reports of heavy falls for the week ending on April the 9th record some moderately large amounts in North-East India and the west of the Peninsula. The following are the falls exceeding 2 inches during the week:

Tenasserim	Tavoy	Sudder	3·22 inches.
,,	Amherst	Ditto	2·34 ,,
Assam	Sibsagar	Ditto	3·31 ,,
,,	Darrang	Mangaldai	3·94 ,,
Bengal	Bogra	Nowkhilla	2·94 ,,

W. L. DALLAS,

Assistant Meteorological Reporter to the Government of India.

SIMLA, *14th April, 1892.*

E. C. BUCK,

Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 9th April.*—Good showers in parts of Nilgiris and Malabar; light showers in some parts of Coimbatore, Salem, and Bellary; scattered falls elsewhere. Agricultural outlook unaltered. Water-supply in some parts of Salem slightly improved; elsewhere in affected areas very deficient, though procurable. Sufferings of cattle great in parts from scarcity of fodder. Prices steady generally. FAMINE RELIEF: *Numbers on relief works*:—Deccan 40,598, East Coast 6,672, South Central 6,054: *Total* 53,324 against 46,059 last week. Increase general. Works newly opened in Coimbatore. On *gratuitous relief*:—Deccan 678, East Coast 52, South Central 215: *Total* 945 against 930 last week. Loans for wells—Deccan Rs. 3,99,000, East Coast Rs. 6,30,000, South Central Rs. 4,01,000: *Total* Rs. 14,30,000 disbursed. Wells constructed or repaired—490, 1,956, and 325: under construction—3,122, 3,742, and 2,612 in respective blocks. Agriculturists' loans—Rs. 34,000, Rs. 32,000, and Rs. 64,000: *Total* Rs. 1,30,000 disbursed in respective blocks.

Bombay.—*For week ending 13th April.*—Rain in six districts of the Deccan and Karnatak generally slight. Wheat damaged in parts of Hyderabad; standing crops otherwise fair. Harvesting of late crops and preparations for the next season continue in several districts. Scarcity of fodder in parts of nine and of water in parts of seven districts. Cattle distressed in parts of five districts. Prices generally steady. FAMINE RELIEF: *Numbers on relief works*:—Professional Agency—Poona 764, Bijapur 120, Dharwar 598; Civil Agency—Belgaum 286, Dharwar 73: *Total* 1,841.

Bengal.—*For week ending 12th April.*—Rain on 4th and 5th over greater part of Bengal Proper and of Bhagalpur Division has improved agricultural prospects, and has facilitated ploughing and early sowings; more rain much wanted generally. Spring rice still suffering for want of rain in some districts; indigo indifferent owing to want of moisture. *Mahua* is a promising crop, except in some parts of the Bhagalpur Division. Mango prospects fair. Prices stationary. Opium weighments in progress; yield will not be up to estimate. Condition of cattle generally good. Insufficiency of water-supply reported from many scattered localities, and fodder also getting scarce in some places. Recent rain has improved prospects of the affected tracts in the Rajshahi and Bhagalpur Divisions, where people are now employed in ploughing and sowing. In the Patna Division early rain would be beneficial, but there is not as yet any urgency for it. In Bhagalpur and Purneah importation of food-grains is increasing, which is regarded as a good sign. FAMINE RELIEF: *Numbers on relief works*:—Muzaffarpur 4,114, Darbhunga 10,357, Monghyr 25, Bhagalpur 4,869, Purneah 2,493, Dinajpur 1,034: *Total* 22,892. *Numbers on gratuitous*

relief:—Monghyr 194, Bhagalpur 263, Purneah 1,249: *Total* 1,706. No relief works yet opened or gratuitous relief given in Gya, Bogra, and Jalpaiguri.

The figure in last week's report for Darbhunga should have been 3,014 instead of 11,501 on relief works.

North-Western Provinces and Oudh.—*For week ending 13th April.*—Weather seasonable. Harvesting of the *rabi* completed in some districts and approaching completion in others. Threshing and winnowing in active progress. Outturn generally good. In Almora the spring crops are drying up for want of moisture. Irrigation of sugarcane and extra crops continues. Prices fairly steady, but have risen slightly in four districts and are high in one. Supplies and fodder sufficient.

Punjab.—*For week ending 13th April.*—Slight rain has fallen in Peshawar. Prices unsettled in two districts, falling in one, and stationary elsewhere. Harvesting of *rabi* crops going on. Sowings of extra *rabi* as well as of sugarcane and cotton in progress. Prospects of crops on irrigated lands average, and of those on unirrigated lands not good in five districts. Crops said to have been damaged by recent gales in Shahpur. Crops are withering for want of rain in two tahsils of Lahore. Condition of cattle is reported fair in all districts, except Lahore and Shahpur, where they are suffering for want of fodder. Fodder scarce in all districts but three.

Central Provinces.—*For week ending 13th April.*—Weather hot and occasionally cloudy. Reaping of *rabi* crops in northern districts continues. Prospects of *rabi* harvest as given in the wheat and linseed forecasts unchanged. Fodder and water-supply getting scarce in places.

Burma.—*For week ending 9th April.*—*Mayin* paddy in Upper Burma progressing favourably, except in part of the Yeu District, where it is suffering owing to the scarcity of water in the Mu river. Wheat, gram, peas, and other miscellaneous crops reaped or being reaped. The price of paddy has risen slightly in Akyab, Toungoo, Magwe, and Kyaukse; considerably in Katha and Shwebo; and largely in Thongwa, while it has declined in Thayetmyo and Yeu. FAMINE RELIEF: *Numbers on relief works*:—Shwebo 2,575, Yeu 2,175, Sagaing 157, Lower Chindwin 509, Myingyan 832, Minbu 67, Magwe 90, Meiktila 100, Yamethin not reported: *Total* 7,505.

Assam.—*For week ending 13th April.*—Weather seasonable. Summer rice sowing continues. Tea doing well. Condition of cattle fair. Fodder and water sufficient.

Mysore and Coorg.—*For week ending 13th April.*—MYSORE: Moderate rain in Bangalore. Rainfall general and good in Mysore District. Crops withering, except in places where rain fell. Sugarcane being planted in parts. Prices fallen in the Mysore District. FAMINE RELIEF: *Numbers on relief works*:—Bangalore 50, Tumkur 2,356, Kolar 2,177, Mysore 1,682, Shimoga 298, and Chitaldroog 565: *Total* 7,128.

COORG: Rainfall good. Hot weather rice crop thriving. Rain favourable for coffee blossom. Prices stationary. Forage still scanty.

Berar and Hyderabad.—*For week ending 13th April.*—BERAR: Weather hot. Harvesting of *rabi* crops almost completed. Land under preparation for ensuing season. Fodder insufficient in two districts. Prices rising in three districts out of five.

HYDERABAD: No rain during week. Scarcity of water is increasing and tanks are getting dry. Fodder scarce and cattle getting lean. Prices—Wheat $9\frac{1}{4}$, coarse rice $8\frac{3}{4}$, white *juar* $13\frac{3}{4}$, yellow *juar* $16\frac{1}{4}$, and *tur* 12 seers per current rupee.

Central India.—*For week ending 13th April.*—Harvesting of wheat in Bhopawar almost finished. Outturn slightly below average. No other changes since last report.

Rajputana.—*For week ending 13th April.*—No rain. Harvesting of crops almost completed. Sugarcane being planted in Kerowlee. Cutting of wheat going on rapidly at Sirohi. Outturn of harvest expected to be good in two States, average in one, and below average in others. Linseed crop failed in some cases at Kotah. In Bikanir there was some injury done by wind and insects. No damage elsewhere. Agricultural stock poor in two States and also in Ajmere; good or fair in others. Pasturage or fodder scarce in five States; fair or sufficient in others. Water scarce in Marwar. Drinking water being supplied from Budda Pushkar in City of Ajmere. Prices steady in eight States, rising or fluctuating in four, and falling in others. FAMINE RELIEF: In Ajmere 1,460 labourers on ordinary works, 24,059 on relief works, and 3,554 receiving gratuitous relief; in Marwar 2,358 labourers on relief works, 1,553 receiving gratuitous relief; in Kishengarh 948 on relief works, 121 on gratuitous relief; on ordinary works in Jeypore 6,561; in Bikanir there is scarcity throughout the whole or part of ten tahsils, 6,196 labourers on relief works, 2,426 receiving gratuitous relief: *Total* on relief works 41,582; on gratuitous relief 7,654.

Nepal.—*For week ending 7th April.*—Weather cool and cloudy. Several showers of rain during the week have proved useful for the sowing of Indian-corn. Prices continue very high.

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

RAILWAY STATISTICS.

No. L! OF 1891-92.

APPROXIMATE STATEMENT OF GROSS RECEIPTS OF INDIAN RAILWAYS.

N.B.—As regards the figures in column *Total Receipts from 1st April to date*, audited figures have been used as far as possible.

Latest Return received.	Railways.	Average receipts per mile per week in 1890.	Last 3 days of March 1891. Total mean mileage worked.	Last 3 days of March 1891. Receipts. Total.	Last 3 days of March 1891. Receipts. Per mile open.	Last 5 days of March 1892. Total mean mileage worked.	Last 5 days of March 1892. Receipts. Total.	Last 5 days of March 1892. Receipts. Per mile open.	Total Receipts from 1st April 1890 to 31st March 1891.	Total Receipts from 1st April 1891 to 31st March 1892.	Total increase in 1891-92.	Total decrease in 1891-92.

* The amount refunded was greater than the duty collected.

J. F. FINLAY,
Secretary to the Government of India.

FINANCE AND COMMERCE DEPARTMENT
(Statistical Branch)
Calcutta, 18th April 1892.

GOVERNMENT OF INDIA.

HOME DEPARTMENT.

RESOLUTION DEALING WITH THE RECOMMENDATIONS OF THE PUBLIC SERVICE COMMISSION SO FAR AS THEY RELATE TO THE HIGHER BRANCHES OF THE EXECUTIVE AND JUDICIAL SERVICES THROUGHOUT INDIA.

No. 9 Public / 1342—1352.

Extract from the Proceedings of the Government of India, in the Home Department (Public),—under date Simla, the 21st April, 1892.

Read—

The Report of the Public Service Commission and the opinions expressed thereon by Local Governments and Administrations.

The Despatch of the Government of India to the Secretary of State, No. 58, dated the 9th October 1888, reviewing and stating its conclusions on the principal questions discussed in the Report.

The Despatch of the Secretary of State, No. 104, dated the 12th September 1889, communicating His Lordship's decision upon the recommendations made in the Report and by the Government of India, so far as they deal with the higher branches of Executive and Judicial work throughout India.

Letters to Local Governments and Administrations, dated the 14th February 1890, forwarding a copy of the Secretary of State's Despatch, and making suggestions as to the manner in which its decisions may best be given effect to.

Replies from the Local Governments and Administrations consulted.

The Despatch of the Government of India to the Secretary of State, No. 9, dated the 10th February 1892, stating the conclusions arrived at by the Governor General in Council on the subject.

The reply of the Secretary of State, No. 30, dated the 24th March 1892, concurring in the conclusions set forth by the Government of India.

RESOLUTION.

In his Despatch No. 104, dated 12th September 1889, the Secretary of State for India in Council announced the decision at which he had arrived on the recommendations made in the Report of the Commission appointed in 1886 to consider the question of the admission of Natives of India to higher and more extensive employment in the Civil Administration of the country.

2. The Secretary of State's Despatch having been communicated to the Local Governments and Administrations for consideration, and their replies having been received, the Governor General in Council is now in a position to pass orders upon the most important points calling for determination.

3. The following appointments in each province shall for the present be entered in the list as open to the Provincial Service :—

Madras.

Heads of Districts	2
District Judges	4
Sub-Collectors, Head Assistants, and Assistant Collectors ...	7
Secretary to the Board of Revenue	1
Under-Secretary to Government	1
Total ...	15

Bombay.

Heads of Districts...	2
Judges	2
Joint Judge	1
Assistant Judges	2
Assistant Collectors	9
Talukdari Settlement Officer	1
Registrar of the High Court	1
Total ...	18

Bengal.

Heads of Districts	4
District Judges	6
Joint and Assistant Magistrates	8
Secretary to the Board of Revenue	1
Under-Secretary to Government	1
Total ...	20

North-Western Provinces and Oudh.

Heads of Districts	2
District and Sessions Judges	4
Joint and Assistant Magistrates	9
Junior Secretary, Board of Revenue	1
Assistant Settlement Officers	2
Assistant Director of Land Records and Agriculture ...	1
Small Cause Court Judges, Allahabad and Lucknow	2
Total ...	21

Punjab.

Heads of Districts	2
Divisional Judges	2
District Judges	2
Assistant Commissioners	3
Junior Secretary to Financial Commissioner	1
Settlement Collectorships	2
Total ..	12

4. Before passing orders as to the Central Provinces, His Excellency will await a further expression of Mr. MacDonnell's views on the question. And the Government of India is constrained to agree in the opinion expressed by successive Chief Commissioners of Assam that that province is not yet ripe for the admission of provincial officers to any of the reserved posts. It appears that the Provincial Service in Assam is largely recruited from Bengal, and that it would be almost, if not quite, impossible, in view of the progress in education and the administrative aptitudes of the people, to find within any time which can now be foreseen an indigenous officer who could be utilized in one of these posts. Assam must therefore, like Burma, for the present remain outside the scope of the present orders.

5. Dealing in the first instance only with the superior appointments, and reserving for the next paragraph the case of Joint and Assistant Magistrates and

Collectors, the following are the rates of pay for officers of the Provincial Service in each grade, which the Secretary of State has sanctioned :—

JUDICIAL.	Rs.	EXECUTIVE.	Rs.
Madras.			
Judge, 1st grade	1,600	Collector, 1st grade	1,600
Judge, 2nd grade	1,200	Collector, 2nd grade	1,200
		Secretary to the Board of Revenue...	1,000
		Under-Secretary to Government ...	700
Bombay.			
Judge, 1st grade	1,600	Magistrate and Collector, 1st grade	1,600
Judge, 2nd grade	1,200	Magistrate and Collector, 2nd grade	1,200
Judge, 3rd grade	1,000	Talukdari Settlement Officer ...	800
Joint Judge	800		
1st grade Assistant Judge ...	600		
2nd grade Assistant Judge ...	500		
Registrar, High Court ...	1,200		
Bengal.			
District and Sessions Judge, 1st grade	1,600	Magistrate and Collector, 1st grade	1,600
District and Sessions Judge, 2nd grade	1,200	Magistrate and Collector, 2nd grade	1,200
		Magistrate and Collector, 3rd grade	1,000
		Secretary to the Board of Revenue	1,200
		Under-Secretary to Government	700
North-Western Provinces and Oudh.			
District and Sessions Judge, 1st grade	2,000	Magistrate and Collector, 1st grade...	1,600
District and Sessions Judge, 2nd grade	1,600	Magistrate and Collector, 2nd grade	1,200
District and Sessions Judge, 3rd grade	1,200	Magistrate and Collector, 3rd grade	1,000
District and Sessions Judge, 4th grade	1,000	Junior Secretary, Board of Revenue,	
Small Cause Court Judge	800—1,000	grade pay *plus*	150
		Assistant Settlement Officer, 1st grade	700
		Assistant Settlement Officer, 2nd grade	500
		Assistant Director, Department of Land	
		Records and Agriculture ...	400—500
Punjab.			
Divisional Judge, 1st grade ...	1,600	Deputy Commissioner, 1st grade ...	1,600
Divisional Judge, 2nd grade ...	1,400	Deputy Commissioner, 2nd grade ...	1,200
Divisional Judge, 3rd grade ...	1,200	Deputy Commissioner, 3rd grade ...	1,000
District Judge, 1st grade ...	1,000	Settlement Collector, 1st grade ...	1,000
District Judge, 2nd grade ...	800	Settlement Collector, 2nd grade ...	800
		Junior Secretary to Financial Com-	
		missioner	600

These rates of pay will, of course, be liable to alteration at any time should the interests of the public service require it.

6. The Government of India have determined, with the approval of the Secretary of State, to amalgamate the scheduled posts on the Executive side subordinate to the headship of a district with the existing grades of Deputy Magistrates and Collectors.

These posts are the following:—

Madras	7
Bombay	9
Bengal	8
North-Western Provinces and Oudh	9
Punjab	3

In all these Provinces the majority of them are at present held by Statutory Civilians appointed under the rules of 1879, while in some they are still occupied by officers of the Civil Service of India or Commissions appointed before 1882. Until these Statutory Civil Servants are provided for, either by promotion or by amalgamation with the new Provincial Service, the posts which they hold cannot be thrown into the general cadre of the latter service; but when that happens, and when the prior claims of officers of the Civil Service of India and Commissions have been satisfied, the posts now specified should be distributed as follows among the existing grades of Deputy Magistrates and Collectors and Extra Assistant Commissioners:—

Madras.

	Rs.
2 posts in the 1st grade on ... (corresponding to Sub-Collector.)	700
4 posts in the 3rd grade on ... (corresponding to Head Assistant.)	500
1 post in the 5th grade on ... (corresponding to passed Assistant.)	300

Bengal.

2 posts in the 3rd grade on ... (corresponding to Joint Magistrate, 1st grade.)	600
2 posts in the 4th grade on ... (corresponding to Joint Magistrate, 2nd grade.)	500
2 posts in the 5th grade on ...	400
2 posts in the 6th grade on ... (corresponding to Assistant Magistrates on Rs. 500 and Rs. 450 respectively.)	300

Bombay.

3 posts in the 3rd grade on ... (corresponding to First Assistant.)	600
4 posts in the 4th grade on ... (corresponding to Second Assistant.)	500
2 posts in the 6th grade on ... (corresponding to passed Assistant.)	300

North-Western Provinces and Oudh.

4 posts in the 5th grade on ... (corresponding to Joint Magistrates and Assistant Commissioners, 1st grade.)	600
5 posts in the 3rd grade on ... (corresponding to Joint Magistrates and Assistant Commissioners, 2nd grade.)	400

Punjab.

1 post of Extra Assistant Commissioner, 3rd grade, on ... ... (corresponding to Assistant Commissioner, 1st grade.)	600
1 post of Extra Assistant Commissioner, 5th grade, on ... ... (corresponding to Assistant Commissioner, 2nd grade.)	400
1 post of Extra Assistant Commissioner, 6th grade, on ... ... (corresponding to Assistant Commissioner, 3rd grade.)	300

7. The addition of these posts to the cadre of the Provincial Service will necessitate recruitment in the lower grades to supply the place of those who will be moved up to fill them; and this can take place at once where the condition of the Service demands it. Those Statutory Civilians who were appointed in the various provinces in 1889 and 1890 on the understanding that they would be transferred to the Provincial Service when it was constituted should now be gazetted to their appropriate places in that Service. In accordance with the decision of the Secretary of State, they will, like other

Statutory Civil Servants who join the Provincial Service, be understood to have a preferential claim for promotion to the scheduled posts (subject, of course, to the special claims of members of the Civil Service of India and officers of the Commissions appointed before 1882) over the other members of that Service.

8. The Statutory rules of 1879 now require the approval and sanction of the Governor General in Council to all nominations made by Local Governments. These nominations are at present ordinarily to offices in the subordinate ranks of the Covenanted Civil Service. The subordinate posts included in the list being thrown open to the Provincial Service, the Local Government will no longer require the sanction of the Government of India to appointments to them. His Excellency in Council, however, thinks that for the present it will be necessary to retain the rule requiring such sanction in the case of appointments (whether permanent or officiating for a period exceeding three months) under the Statute to Headships of Districts and District Judgeships in Madras, Bombay, Bengal, and the North-Western Provinces and Oudh, and to Headships of Districts, Divisional Judgeships, and Settlement Collectorships in the Punjab. He is willing that in the case of all other scheduled appointments the Local Government should nominate without reference to him. He is also willing that in the case of officiating appointments of Provincial Officers for short vacancies, not exceeding three months at a time, to Headships of Districts and the other posts mentioned above, such reference should be dispensed with. Such short vacancies will afford the means of testing an officer's fitness for more extended employment in those posts; and, in reporting for sanction nominations for longer periods, it should always be stated whether an officer has been tried in this manner, and with what result. As a general rule the Governor General in Council thinks that it will be prudent to take every suitable opportunity of thus ascertaining an officer's capacity before proposing to employ him permanently in these important and responsible posts. His Excellency in Council also desires to correct the impression which appears to have prevailed in some quarters that it will be necessary for a Provincial Civil Servant to go through the whole succession of subordinate grades in the Executive or Judicial Service before he can be selected for a scheduled post. On the contrary, it will always be desirable to select persons for higher executive office who, while they have given proof of distinguished ability by sufficiently long service, are still comparatively young, and possess that bodily activity which is a *sine qua non* for such employment. Every appointment of the kind must be based wholly upon fitness and merit, seniority being regarded only when the claims of two or more officers who are equally fit come into competition. Nor does the Governor General in Council intend that selection should be less absolute or more restricted to the higher grades of the Provincial Service in the case of judicial appointments. It has been too much the custom to regard promotion from grade to grade of the Subordinate Executive and Judicial Services as a mere matter of seniority; and it should be made publicly known that every Government and Administration reserves liberty to make promotions in these grades without regard to seniority.

9. In Appendix A attached to this Resolution will be found an example of the form in which the Government of India think that the list of appointments open to the Provincial Service should be published by the Local

Government. Each Local Government should frame and issue its list accordingly. In the Quarterly Provincial Civil List this form should, with the omission of the last paragraph, be prefixed to that division of the list which exhibits the appointments held by members of the Provincial Service. In lieu of the last paragraph a note should be entered in the list of subordinate offices against each grade to which additions have been made referring to the notification, and stating that "To this grade "appointments have been added as representing the same number of "appointments of now treated as open to the Civil "Service."

10. The Government of India recently directed that each Statutory Civilian appointed before the close of 1889 might be called upon to choose whether he would retain his present position or be transferred to the Provincial Service with an acknowledgment of his preferential claims to promotion to scheduled appointments before other members of the Provincial Service. As regards Bengal, Madras, the North-West Provinces, and Central Provinces, only one Statutory Civilian has elected to enter the Provincial Service. In Bombay and the Punjab they have not yet made their election. But as it is not improbable that some obscurity may still remain in the minds of the officers who were called upon to make their election in regard to the advantages and disadvantages to them of the transfer, a further opportunity ought to be afforded these gentlemen of reconsidering the decision at which they have provisionally arrived. The Governor General in Council will address Local Governments and Administrations again on this subject in a separate communication.

11. The present Uncovenanted Service Leave and Pension Rules, or, in other words, the provisions of Part III, Chapter XIV, of the Civil Service Regulations regarding leave, and of Part IV, Chapters XV to XIX, regarding pension, will be applied to the Provincial Service. But the present Statutory Civilians, whether they enter that Service or not, will continue to be governed by the Leave and Pension Rules now applicable to them.

12. After considering the suggestions made by the Local Governments and Administrations, the Governor General in Council has prepared a revised draft of Rules for the appointment of Natives of India to offices reserved under the Statute of 1861, which will be submitted in due course for the sanction of the Secretary of State for India in Council, and, if approved by him, will be published for general information.

13. As regards the rules for admission to the Provincial Service in each Province, and the precise place where the line should be drawn between the Provincial and Subordinate Services, the Government of India propose to address the Local Governments and Administrations separately, as there are great differences in the circumstances of the several Provinces and the classes from which the local officials must be drawn.

ORDER.—Ordered, that this Resolution be communicated to Local Governments and Administrations, and that it be published in the *Gazette of India* for general information.

[True Extract.]

C. J. LYALL,

Secretary to the Government of India.

APPENDIX A.

(*Referred to in paragraph 9.*)

With the previous sanction of the Governor General in Council, the Governor in Council is pleased to notify that the following appointments in the Madras Presidency, to fill which members of the Civil Service of India have hitherto been recruited, shall be appointments to which members of the Madras Civil Service can properly be appointed, subject to the rules for the time being in force under 33 Vict., Cap. 3, Section 6:—

4 posts of District and Sessions Judge.
2 posts of Collector and Magistrate of a District.
1 post of Secretary to the Board of Revenue.
1 post of Under-Secretary to Government.

2. When these posts are held by members of the Madras Civil Service, their pay shall be as follows:—

	Rs.
District and Sessions Judge—	
If in the 1st grade	1,600
If in the 2nd grade	1,200
Collector and Magistrate—	
If in the 1st grade	1,600
If in the 2nd grade	1,200
Secretary to the Board of Revenue	1,000
Under-Secretary to Government	700

3. In addition to these appointments, the following appointments, for which recruitment has hitherto been made in the Civil Service of India, have been thrown open to the Madras Civil Service, and added to the existing grades of that Service:—

		Rs.
2 posts of Sub-Collector and Joint Magistrate	converted into	2 posts of Deputy Magistrate and Collector, 1st grade, on ... 700
4 posts of Head Assistant to the Collector and Magistrate		4 posts of Deputy Magistrate and Collector, 3rd grade, on ... 500
1 post of Assistant Collector and Magistrate ...		1 post of Deputy Magistrate and Collector, 5th grade, on ... 300

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the week ending at 8 a.m. on Saturday, 16th April 1892.

The principal feature in the weather of the week under review, as of some weeks past, has been the excessive temperature which has prevailed over the greater part of the Indian region. Pressure has been somewhat unsteady, and has varied slightly from day to day; but the general distribution has not changed much, and the wind directions have been fairly steady throughout. Thunderstorms have occurred over North-East India and the west and south of the Peninsula, but in the centre and north-west strongly marked hot weather conditions have prevailed uninterruptedly, and the air has been exceedingly dry.

The chart of the 10th showed that pressure was highest over the Andaman Sea and lowest along the foot of the North-West Himalayas with moderate or slight intervening gradients. The winds were very variable on the West Coast and at many central stations, southerly over the Bay, easterly in Assam and North Bengal, and north-westerly down the Gangetic plain. The weather generally was very fine, but scattered showers were reported from North-East India and from the west of the Peninsula. On the 11th pressure was on the whole decreasing, except in Assam and Bengal. Readings were highest in Assam and low over the Gangetic plain and Sind. The wind directions were generally unchanged, and scattered showers were again reported from the same regions as on the preceding day. On the 12th pressure continued higher over North-East India than elsewhere, while the lowest pressures were reported from the Central Provinces and the Indus Valley. The north-westerly current of air down the Gangetic plain had ceased, and the easterly current from North Bengal had extended westward, but elsewhere the wind directions were unchanged. The rainfall, though still confined to the same districts, *viz*, Bengal and the west and south of the Peninsula, had increased considerably both in extent and amount. The barometric changes reported on the 13th were small in amount and irregular, and the general distribution was practically unchanged. The winds also were little altered, and the only important change was the contraction in the extent and amount of the rainfall. In North-East India the fall was confined to Dacca, Tounghoo, and Moulmein; in the Peninsula to Belgaum, Calicut, Cochin, and Trivandrum. On the morning of the 14th pressure was generally rising. Readings were highest over Lower Burma and the Andaman Sea and low over the Punjab and the Gangetic plain. Moderate gradients existed over North-East India, and very uniform pressures elsewhere. North-westerly winds were re-appearing down the Gangetic plain, but otherwise there was little change. Rain in small amounts had fallen over the west of the Peninsula, over Central Burma, and at Seoni, Murree, and Peshawar. On the 15th there was no important change in the distribution of pressure or in the direction of the winds or in the rainfall. On the 16th conditions as regards pressure and winds remained practically the same as on the two preceding days, but the rainfall area had changed somewhat. Rain had ceased in Lower and

Central Burma and was falling in Upper Burma, Assam, and Bengal, and to a small extent in the west of the Peninsula.

Temperature.—The temperature charts for the past week show that an area of very excessive temperature has existed over North-West India, and in a modified degree this area has extended over nearly the whole of India. Over Assam a similar, but less marked, high temperature area was shown, and the only places where the heat has been less than usual are parts of Bengal, Lower Burma, and the south of the Peninsula. From the actual distribution of temperature with respect to the normal distribution for the time of year it would appear probable that excessive temperatures prevail over a much larger area than that shown by the Indian meteorological system.

The following table shows the variations of the mean temperature from the normal on each day of the week for the principal Provinces of India:

Province.	10th.	11th.	12th.	13th.	14th.	15th.	16th.	Mean variation of week.
	°	°	°	°	°	°	°	°
Burma	+0·8	—0·1	+0·2	0	—2·5	—2·1	—1·2	—0·7
Bengal and Assam	+2·3	+2·8	+0·4	+0·5	+1·2	+1·6	—0·5	+1·2

Mean for whole India	+2·7	+2·7	+3·1	+3·8	+3·9	+4·4	+4·1	+3·5

For the whole week and for the whole of India there has been a mean diurnal excess of $3\frac{1}{2}°$. The warmest day was the 15th with a mean excess of 4·4°, and the coolest the 10th and 11th with a mean excess of 2·7°.

The provincial variations show that Burma was the only Province where the mean temperature was below the normal, though in the case of Madras and Bengal any excess was small. The greatest excess was in the Punjab, where on the 13th and 14th it amounted to 12° and $11\frac{1}{2}°$ respectively. Throughout nearly the whole of India the excess has been most marked in the day temperatures. This has been particularly the case in the Punjab, where the maxima have been on some occasions as much as 18° to 20° above the normal.

Rain.—The concluding table shows that rain has been much more general both in North-East India and in the Peninsula than for many weeks past, but that over the central and north-western parts of the country there has been an almost entire absence of rain. The regions within which rain has been altogether absent include the following divisions, *viz.*, Arakan, Orissa, Behar

(South), all the North-Western Provinces divisions, all the Punjab divisions except the west, all the Central Provinces divisions except the centre, Hyderabad, the Central India, and Rajputana divisions, and Guzerat, Kattiawar, and Sind. In all other parts of the country rain fell. There were thus twenty-six divisions which received rain and twenty-five which were without rain. Of the twenty-six divisions which received rainfall, seven, *viz.*, Lower Burma, Punjab (West), Khandeish, Central Provinces (Central), East Coast (North), Madras (Central), and East Coast (South), received an average of less than one-tenth of an inch of rain during the week, but all the remaining divisions had effective rain. Only eleven divisions, however, had more than the normal fall for the week, and of these eleven divisions, only seven, *viz.*, Central Burma Central Bengal, North Bengal, Coorg, Mysore, the Deccan, and Madras (South), had any considerable excess.

The largest actual deficiency was 3 inches in Assam (Surma); the largest actual excess 0·82 inch in North Bengal.

The three concluding columns of the table show the state of the seasonal rainfall, *i.e.*, the total rainfall from February 28th to date. In several divisions [Behar (South), the North-Western Provinces (East, Central, and West), Oudh (North and South), the Punjab (Central), Berar, the Central Provinces (West), Guzerat, Kattiawar, Central India, Rajputana, and the East Coast (Central)] there has been no rain whatever for the whole of that period, and in the great majority of divisions the total actual fall has been very much less than the total normal fall.

The divisions in which the total fall has exceeded the normal are Tenasserim, Lower Burma, Central Burma, Assam (Surma and Brahmaputra), Bengal (North and Central), Malabar, Coorg, Mysore, the Konkan, the Deccan, and Madras (South).

The records of heavy amounts during the week show that the rainfall has increased considerably in heaviness as compared with previous weeks.

The following are the falls exceeding 2 inches :—

Burma	Amherst	Thatôn		3·04 inches.

SIMLA, *21st April, 1892.*

W. L. DALLAS,
Assistant Meteorological Reporter to the Government of India.

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 16th April.*—Good showers in Vizagapatam Agency, Southern districts, Nilgiris, and West Coast; light and scattered showers in parts of Deccan districts, Salem, and Coimbatore. Agricultural prospects unaltered. Cultivation begun on West Coast. Deficiency of water-supply and fodder in parts of affected areas severely felt. Prices nearly stationary, though easier in Southern and Central districts. FAMINE RELIEF: *Numbers on relief works*:—Deccan 41,928, East Coast 6,942, and South Central 6,085: *Total* 54,955 against 53,324 last week. *On gratuitous relief*:—Deccan 455, East Coast 45, and South Central 217: *Total* 717 against 959 last week. Decrease in Anantapur 78. Loans for wells—Deccan Rs. 4,09,000, East Coast Rs. 6,47,000, and South Central Rs. 4,20,000: *Total* Rs. 14,76,000 disbursed. Wells constructed or repaired—503, 2,089, and 339: under construction—3,581, 3,309, and 2,765 in respective blocks. Agriculturists' loans—Rs. 35,000, Rs. 32,000, and Rs. 64,000: *Total* Rs. 1,31,000 disbursed in respective blocks.

Bombay.—*For week ending 20th April.*—Rain in parts of eight districts of Deccan and Karnatak, but generally slight. Standing crops slightly damaged by stormy weather in parts of Hyderabad; otherwise fair. Harvesting of late crops and preparations for next season continue in several districts. Fodder insufficient in parts of eleven and water in parts of six districts. Cattle distressed in parts of six districts. Prices generally steady. FAMINE RELIEF: *Numbers on relief works*:—Professional Agency—Bijapur 147, Belgaum 927, and Dharwar 1,024; Civil Agency—Belgaum 425, Dharwar 205; on relief works in Poona 287: *Total* 3,015.

Bengal.—*For week ending 19th April.*—Rain during the week has been fairly general over the greater part of the Province. It still holds off in Orissa and in all districts of the Patna Division except Darbhanga. The rain where received has done good to standing crops, and has facilitated ploughing and early sowings. More rain is still needed generally. In North Bengal the rainfall has been heavier and more general than elsewhere, and prospects of early rice and jute are good. Spring rice has been somewhat benefited by the rain, and is being harvested, but the general outturn will not be satisfactory. Prospects of indigo still poor, but improving, except in the Patna Division and Bhagalpur. A good crop of *mahua* is being gathered, except in places in the Bhagalpur Division. General prospects of the mango crop are fair, but it has been greatly injured in some districts by high west winds. No important change in prices of food-grains. Cattle are still generally in good condition, but fodder is diminishing, and water is reported scarce in many places throughout the Province. Plenty of rain throughout the Rajshahi Division, and prospects considerably improved. The rain in the Bhagalpur Division and Darbhanga District, though comparatively slight, has done some good. FAMINE RELIEF: *Numbers on relief works*:—Muzaffarpur 4,378, Darbhanga 10,052, Monghyr 17, Bhagalpur 6,392, Purneah 3,144, Dinajpur 2,080, and Jalpaiguri 37: *Total* 26,100. *Numbers in receipt of gratuitous relief*:—Monghyr 179, Bhagalpur 417, and Purneah 1,235: *Total* 1,831.

North-Western Provinces and Oudh.—*For week ending 20th April.*—Weather hot. Drought continues in Almora. Harvesting of *rabi* nearly completed. Threshing and winnowing in progress. Prospects generally favourable. Irrigation of summer crops going on. Supplies and fodder ample. Prices fairly steady: have slightly fallen in three Districts, risen in two others, and continue high in Almora.

Punjab.—*For week ending 20th April.*—No rain except a slight fall at Peshawar. Prices unsettled in two districts, slightly falling in one, rising in another, and stationary elsewhere. Harvesting of *rabi* crops in progress everywhere. Extra *rabi* sowing going on. Rain wanted and water scarce in parts. Sowings of *kharif* crops on irrigated lands commenced in Sialkot. Sugarcane weeding commenced in Jullundur. Canals almost all dry in Mooltan; flowing in Shahpur. Condition of irrigated crops average. Unirrigated crops in Western and Central districts mostly failed. Crops in one of the Lahore tahsils withering. Large failures of *rabi* reported on the Sidhnai Canal. Outturn is said to be much below average in Shahpur. Condition of cattle is reported good in all but two districts. Fodder sufficient in three districts; scarce elsewhere.

Central Provinces.—*For week ending 20th April.*—Weather hot and generally cloudy. Slight showers of rain in two districts. Reaping of *rabi* crops in Northern districts almost completed; threshing commenced. Prospects of *rabi* harvest—Wheat and linseed crops are satisfactory in the northern parts of the Province, but below average elsewhere. Fodder and water scarce in places.

Burma.—*For week ending 16th April.*—Showers of rain fell in nearly all districts. *Mayin* cultivation progressing favourably. Prospects in Yeu improved by recent rain, but not so good in parts of Upper Chindwin. Wheat, gram, and miscellaneous crops being reaped. Price of paddy has risen largely in Thayetmyo and Yeu; considerably in Shwegyin; slightly in Amherst, Mandalay, Bhamo, and Meiktila; while there is a slight fall in Rangoon. FAMINE RELIEF: *Numbers on relief works*:—Shwebo 2,300, Yeu 2,053, Lower Chindwin 315, Myingyan 428, and Meiktila 90: *Total* 5,186.

Assam.—*For week ending 20th April.*—Rainfall general. Weather seasonable. Crop prospects generally good. Summer rice sowing continues. Fodder and water sufficient.

Mysore and Coorg.—*For week ending 20th April.*—MYSORE: Rainfall good in parts of two districts and slight elsewhere. Outturn of harvests generally fair. Want of water and fodder felt in parts. Prices fallen in one district and risen slightly in another. FAMINE RELIEF: *Numbers on relief works*:—Bangalore 288, Kolar 2,076, Tumkur 2,747, Mysore 1,715, Shimoga 355, and Chitaldroog 493: *Total* 7,674.

COORG: Rainfall slight. More rain wanted in several parts for coffee blossom. Hot-weather rice crop in good condition. Prices stationary. Forage scanty.

Berar and Hyderabad.—*For week ending 20th April.*—BERAR: Weather hot. Harvesting of *rabi* crops nearly completed. Land under preparation for the next season. Fodder insufficient in three taluks and water in one; both scarce in the Wun District. Prices rising in four out of six districts.

HYDERABAD: No rain during week. Water scarce in all talukas; tanks and wells getting dry. Cattle emaciated for want of fodder. Prices—Wheat $9\frac{1}{4}$, coarse rice $8\frac{3}{4}$, white *juar* $13\frac{3}{4}$, yellow *juar* $16\frac{1}{4}$, and *tur* 12 seers per current rupee.

Central India.—*For week ending 20th April.*—No material changes since last report.

Rajputana.—*For week ending 20th April.*—No rain. Agricultural operations generally satisfactory. Harvesting continues. Cutting of *rabi* almost completed throughout. Standing crops generally fair, but *rabi* injured by wind in one tahsil of Bikanir. Outturn of harvest good in Marwar, fair in Ulwar, average in Kotah and Dholepur, and below average in Ajmere and elsewhere. No damage to crops in any State. Cattle suffering from want of fodder in Marwar. Agricultural stock fair, except at Ajmere and Kherwara, where it is very poor. Pasture extremely dear in Marwar, sufficient in eight States and four tahsils of Bikanir, and scarce elsewhere. No pasturage in Ajmere, but some fodder secured from *rabi* crops. Prices rising in three States, steady in Ajmere and six States, and fluctuating or falling elsewhere. Tanks and wells dry in Jhallawar. Water ample in Meywar. FAMINE RELIEF: In Ajmere 1,483 labourers on ordinary works, 27,361 on relief works, and 4,580 in receipt of gratuitous relief; in Marwar 1,154 persons on relief works, 2,188 receiving gratuitous relief; 51 emigrants, 62 immigrants, and 10 cattle in Kotah; on ordinary works in Jeypore 6,671; on relief works in Kishengarh 948; in receipt of gratuitous relief in Kishengarh 121; in Bikanir scarcity throughout whole or part of ten tahsils; 6,626 persons on relief works and 2,590 receiving gratuitous relief: *Total*—on relief works 44,243; on gratuitous relief 9,479.

Nepal.—*For week ending 14th April.*—Weather stormy with hail and rain. Prospects good. Indian-corn being sown. Prices high.

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.
REVENUE AND AGRICULTURAL DEPARTMENT.
(STATISTICS.)

IMPORTS OF COTTON, WHEAT, LINSEED, AND INDIGO.

(*a*) Includes the Nalhati State Railway, now amalgamated with the East Indian Railway.
(*b*) Includes the Tirhoot State Railway. Although for convenience classed among the State Railways, the Bengal and North-Western section of this line is the property of the Bengal and North-Western Railway Company.
(*c*) Includes the Bhopal-Itársi State Railway.
(*d*) Includes the Amritsar-Pathánkot and Jammu and Kashmir Railways.
(*e*) Although for convenience classed among the State Railways, this line is the property of the Bengal Central Railway Company.
(*f*) Includes the Toungoo-Mandalay and Mu Valley Railways.
(*g*) Includes the Dhond-Manmád, Wardha Coal, Khámgaon, and Amráo State Railways.
(*h*) Includes the Bezváda Extension.

F. B. HEBBERT,
Offg. Under-Secretary.

SIMLA, *the 21st April, 1892.*

Printed and published for the GOVERNMENT OF INDIA *at the* GOVERNMENT CENTRAL PRINTING OFFICE, *Simla.*

SUPPLEMENT TO

The Gazette of India.

No. 18.} CALCUTTA, SATURDAY, APRIL 30, 1892.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

ACCOUNT.

General.

REVIEW OF THE REVENUE AND EXPENDITURE RECORDED UNDER THE HEAD "CIVIL WORKS" IN THE ACCOUNTS OF THE GOVERNMENT OF INDIA FOR 1890-91.

No. 96 A.—G., Calcutta, the 20th April 1892.

RESOLUTION—By the Government of India, Public Works Department.

Read—

Note by R. G. MACDONALD, Esq., Officiating Accountant General, Public Works Department, upon the accounts of Revenue and Expenditure recorded under the head "Civil Works" in the accounts of the Government of India for 1890-91.

RESOLUTION.—The note* above referred to exhibits in a condensed and comprehensive form the transactions of the Public Works Department and of officers of other Departments with regard to public works during the year 1890-91, and contains much useful information not readily obtainable elsewhere.

* Copy appended.

2. The chief points of interest brought forward by the Accountant General in his note are as follows;—

I.—The cost of and return from buildings occupied as residences—*vide* para. 3.

II.—The relative outlay on Civil Buildings and Communications—*vide* paras. 27, 30 to 32, 37, and 44.

III.—The proportion of Provincial and Local funds expended upon the different services—*vide* paras. 36 and 37 and 43 and 44.

IV.—The proportion of the total outlay expended on repairs—*vide* paras. 38 and 45.

V.—The percentage of establishment charges on the outlay on works and repairs—*vide* paras. 29, 30, 36, and 43.

VI.—The cost of certain Civil Engineering Colleges—*vide* paras. 11 and 25.

3. As regards the outlay on residences the total capital cost, *viz.*, Rx. 1,393,924, may be considered low when taking into account the vast extent of territory covered and the complete lack of suitable residences for Government officers in many parts of the country. It is noticeable that the capital cost of residences occupied rent-free, *viz.*, Rx. 724,234, exceeds that of the residences for which rent is charged, *viz.*, Rs. 669,690, although the cost of residences occupied by Heads of Administrations rent-free are not included in the former category.

4. The total revenue from rents, which includes miscellaneous rents of buildings besides those occupied as residences, has been steadily on the increase during the past five years, mainly owing to the more rigid enforcement of the rent rules.

5. From para. 27 of the Accountant General's note it is apparent that the outlay by Public Works agency on civil buildings has during the past five years increased considerably; while during the same period the expenditure on communications has been falling off.

There is no doubt that the extension of railways has to a certain extent reduced the necessary expenditure on roads, and there has been a considerable transfer of roads to Local Boards, the outlay by whom appears in this account under "Officers of other Departments," and is not properly classified; yet there appears to be a tendency to neglect roads in favour of buildings, and there is probably room for a considerable outlay of much practical use in providing feeder roads in connection with railways in many provinces. The Government of India desires to invite the special attention of Local Governments and Administrations to this subject.

6. As regards the percentages of establishment on works and repairs given in para. 29 of the Accountant General's note, it is satisfactory to observe that the charges are on the decrease during the past five years.

Though the figures given indicate that the fixed rate of 23 per cent. now charged in all adjustments between funds is too low, the Government of India does not propose at present to make any alteration in the percentage chargeable.

7. From paras. 11 and 25 of the note it is observed that the net direct charge to the State during 1890-91 on account of the Thomason College at Rurki was nearly Rx. 14,000, and this is exclusive of interest and depreciation upon buildings and of the outlay on apparatus and furniture. During the same year the net direct charge on account of the Royal Indian Engineering College at Coopers Hill amounted to £27 only; but there were certain other charges on account of salaries, etc., of passed students detained in England and passages to India of officers on appointment.

The Governments of Madras and Bombay (General and Railway), Bengal, the North-Western Provinces and Oudh, and the Punjab.
The Chief Commissioners of the Central Provinces, Burma, Assam, and Coorg.
The Resident at Hyderabad.
The Agents to the Governor General for Central India, Rajputana, and Baluchistan.
The Superintendent of Port Blair and Chief Commissioner, Andaman and Nicobar Islands.
The Accountant General, Public Works Department.
The Director General of Military Works.

ORDER.—Ordered, that the foregoing, with a copy of the note referred to, be forwarded to the Local Governments and Administrations noted on the margin for information.

Ordered also, that a copy of the resolution and note be forwarded to the Finance Department, and that the papers be published in the *Gazette of India*.

J. G. FORBES, *Colonel, R.E.*,
Secy. to the Govt. of India.

Note by R. G. Macdonald, Esq., Officiating Accountant General, Public Works Department, upon the accounts of Revenue and Expenditure recorded under the head "Civil Works" in the Accounts of the Government of India for 1890-91.

The amount of *Revenue* and *Expenditure* exhibited in these accounts and reviewed in the following paragraphs is:—

	Collected or expended by		Collected or expended in England.	Total.
	Public Works Officers.	Officers of other Departments.		
	Rx.	*Rx.*	*Rx.*	*Rx.*
Revenue	189,965	380,871	34,408	605,244
Expenditure	3,583,929	1,184,926	125,109	4,893,964

REVENUE.

1. The *Revenue* credited in the accounts of the Government of India for 1890-91 under the head "Civil Works" amounts to Rx. 605,244. Of this sum—

Rx.
189,965 were realized by Public Works officers in India,
380,871 by officers of other Departments in India, and
34,408 in England.

TOTAL . 605,244

2. The sources of revenue and the amounts collected under each are:—

* No further particulars available.

3. *Rents of buildings, Rx. 41,916.*—The receipts from this source compare as follows with the realizations in the four preceding years :—

Years.	By Public Works Officers.	By Officers of other Departments.	Total.
	Rx.	Rx.	Rx.
1886-87	29,221	3,832	33,053
1887-88	29,730	3,817	33,547
1888-89	33,245	3,691	36,936
1889-90	36,875	4,061	40,936
1890-91	37,888	4,028	41,916

There has been much attention given of late years to the levy of fair rents for buildings occupied as residences by public servants and others, and the Government of India has issued several important resolutions on this subject. The revenue from this source has grown, but the financial results are not yet satisfactory. Taking the figures from the Examiners' accounts of buildings let and available for hire, which certainly do not err on the side of overstating the amount expended on this class of buildings, the Government of India has expended, on house property now occupied or available for occupation as residences, approximately the sum of Rx. 1,393,924 as noted below :—

		Capital cost of buildings from Examiners' Accounts.				Cost of Repairs.			
		Year of the Account.	Amount. Rent-free buildings.	Other buildings.	Total.	Rents realized.	Rent-free buildings.	Other buildings.	Net return excluding repairs to rent-free buildings.	Percentage of net return on Capital cost excluding rent-free buildings.

							23,681			

4. In many cases the cost of repairs exceeds the realizations from rent; but even excluding the cost of repairs altogether, Government has realized on its capital outlay on house property only 1·89 per cent. : excluding the capital cost of buildings allotted rent-free under the orders of the Government of India, Government has received a gross return of 3·93 per cent. only on the capital invested, and it has to pay for maintenance and repairs in addition.

The net return on capital cost of buildings excluding those allotted rent-free is 1·50 per cent.

It will be observed that the realizations of rent in other Departments are comparatively small; and that the proportionate return on the capital outlay varies considerably in different provinces.

5. *Sales of Buildings, Rx. 41,230.*—The largest recovery is under Bengal, Rx. 81,987, and is owing to the sale of certain premises and land near the custom house in Calcutta to the East Indian Railway. This was really only a transfer in the public accounts from Civil Works—Provincial to State Railway Construction—Not charged to Revenue.

6. *Sales of Tools and Plant, Rx. 4,565.*—The largest recovery was Rx. 2,114 under Madras, but Bengal followed with Rx. 1,289.

7. *Sales of Produce, Rx. 19,296.*—The amounts credited under this head consist of moneys accruing from sales of grass, fruit and other produce along lines of roads and on Government lands, and the largest contributions have been from :—

Provinces.	Public Works Officers.	Officers of other Departments.	Total.
	Rx.	Rx.	Rx.
North-Western Provinces and Oudh . .	1,769	2,621	4,390
Punjab	2,633	...	2,633
Central Provinces	38	...	38

8. *Sales of Old Materials, Rx. 5,318.*—Madras heads the list with a recovery of Rx. 1,909, and Bombay follows with a recovery of Rx. 1,144.

9. *Value of Materials from Old Buildings, Rx. 528.*—The distinction between this and the preceding head must be artificial. The recoveries credited under this head are small, the principal item appearing under Bengal.

10. *Receipts from Departmental Workshops, Rx. 9,547.*—The sum credited under this head, Rx. 9,547, represents profits which have accrued from the workshops at Rurki.

11. *Receipts from Civil Engineering Colleges, Rx. 2,586.*—The sum credited under this head represents the income from fees, &c., of the Thomason College at Rurki. There are Civil Engineering Colleges established at Madras, and Poona, and also at Seebpore, near Calcutta; but the fees and other income from the last three are not credited in the Public Works accounts. The financial effect of the Thomason College on the Public Works accounts in 1890-91 was—

	Rx.
Income	3,060*
Outlay—	
Salaries, Office establishment, Book Depôt and Press	15,870
Repairs of buildings	1,098
Total	16,968
Net debit	13,908

* Includes Rx. 474 Rent of Buildings.

Interest and depreciation upon buildings, apparatus and furniture are excluded from the above figures.

12. *Tolls on Roads, Rx. 103,748.*—The Provinces in which tolls on the public roads are credited in the public accounts under the head "Civil Works" are Bombay, the Punjab, Coorg and the Central Provinces.

In Bombay, tolls to the amount of Rx. 62,125 were realized by Public Works officers, and to the amount of Rx. 30,215 by officers of other Departments; in all Rx. 92,340 during 1890-91. There was also a sum of Rx. 2,238 realized, which is mentioned in para. 16 below. In the Punjab, Rx. 8,125 were realized by Civil officers. In Coorg, Rx. 2,356 were similarly collected. In the Central Provinces, the entire recovery was Rx. 927 only, of which Rx. 854 were collected in the Public Works Department.

13. *Ferry Receipts, Rx. 299,408.*—This is the most important source of revenue credited under the head "Civil Works." It amounted in 1890-91 to

Rx. 299,408 against the undernoted sums in the two preceding years; prior to this period tolls on roads and ferry receipts were not accounted for separately in the Finance and Revenue Accounts of the Government of India:—

Years.	By Public Works Officers.	By Civil Officers.	TOTAL.
	Rx.	Rx.	Rx.
1888-89	3,458	307,902	311,360
1889-90	2,511	306,707	309,218
1890-91	3,815	295,593	299,408

14. The Provinces which contributed this sum of Rx. 299,408 are:—

Province.	COLLECTIONS. By Public Works Officers.	By Officers of other Departments.	TOTAL.
	Rx.	Rx.	Rx.
Coorg	...	159	159
Central Provinces	2,182	6,430	8,612
Burma—Upper	...	3,614	3,614
Burma—Lower	...	6,360	6,360
Assam	1,166	12,118	13,284
Bengal	...	60,293	60,293
North-Western Provinces	467	63,412	63,879
Punjab	...	34,381	34,381
Madras	...	91,626	91,626
Bombay	...	17,200	17,200
TOTAL	3,815	295,593	299,408

15. *Unclaimed Deposits, Rx. 633.*—This sum consists of small amounts written off the Public Works deposit account in various provinces to the credit of Revenue. The rule is to credit Revenue with sums which have lain unclaimed for three complete account years—*vide* Civil Account Code, Volume I, Chapter 14, Rule 11.

16. *Collections under the Highway Act, Rx. 2,238.*—The Act referred to is in force in Bombay, and the whole of the recoveries are made by the city and cantonment magistrates of Poona, although accounted for under Public Works officers. This sum of Rx. 2,238 must be added to the sum of Rx. 92,340 mentioned in para. 12, to arrive at the total of Rx. 945,780 which is raised in Bombay by direct tolls on persons using the public roads.

17. *Fines, Refunds and Miscellaneous, Rx. 31,123.*—Fines from contractors and workmen are properly applicable in reduction of expenditure, as they lessen the amounts to be paid; and similarly refunds of expenditure are credits to works and heads of service. Neither of these classes of recoveries are credited to this head; but for the present fines from members of the establishment

are so exhibited. The Provinces realizing the largest amounts under this head are:—

Province.	COLLECTIONS OF FINES, REFUNDS AND MISCELLANEOUS. By Public Works Officers.	By Officers of other Departments.	TOTAL.
	Rx.	Rx.	Rx.
Bengal	7,942	3,187	11,129
North-Western Provinces	304	1,931	2,235
Punjab	235	668	903
Madras	1,458	7,109	8,567
Bombay	5,756	234	5,990

18. The following are the only items appearing in the above table of which particulars are known here:—

Province.	Particulars.	Amount.
		Rx.
	Public Works Officers.	
Bengal	Rents from strand bank and maidan	4,989
Bombay	Ground rent received from the Gaiety theatre, Bombay	Amounts not known.
	Receipts from lessees of plots of land on the esplanade.	
	Officers of other Departments.	No particulars available.

19. *Fees on Masonry Graves, Rx. 1,331.*—This amount is realized under the rule in Code, Volume I, Appendix M, Part II, Rule 1. The collections were—

	Rx.	
In Madras	282	
„ Bombay	204	
„ Punjab	118	
„ Bengal	245	
„ North-Western Provinces	319	
„ Hyderabad	15	Sale proceeds of grass of cemeteries.
„ Baluchistan	2	
„ Central Provinces	68	
„ Lower Burma	78	
TOTAL	1,331	

These collections are wholly made by officers of other departments.

20. *Arboriculture, Rx. 6,321.*—The whole of the sum of Rx. 6,321 was recovered in the North-Western Provinces and Oudh by civil officers. It accrued from sale of produce. Collections from this source were formerly credited in the accounts of the Civil Department.

21. *Tolls on Steamers, Rx. 1,048.*—This is an impost levied in the North-Western Provinces, but correct particulars of it are not known here.

EXPENDITURE.

22. The *Expenditure* recorded in the accounts of the Government of India for 1890-91, under the head "Civil Works," amounts to Rx. 4,893,964. Of this sum—

Rx. 3,608,801 were expended by officers of the Public Works Department;
„ 1,184,926 by officers of other Departments;
„ 4,793,727
and „ 100,237 in England including exchange; but exclusive of the value of supplies to India which are included in the outlay upon the works concerned
„ 4,893,964 in all.

This money was expended upon—

	Rx.
New works	2,160,410
Repairs	1,659,005
Tools and Plant	50,836
Increase of Stores, &c.	4,983
Miscellaneous (contributions to municipalities, &c.)	77,993
Establishment	840,500
	4,793,727
Add—	
In England	100,237
TOTAL	4,893,964

23. The following table exhibits the services on which this sum was spent and the funds out of which it came. The outlay from Excluded Local Funds, Rx. 382,550, represents money expended by the agency of the Public Works Department for local bodies and institutions:—

(a)—Profit and loss brought forward from the previous page.

27. Omitting the outlay from Excluded Local funds, in regard to which the Government is merely the executive agency employed to carry out the work, the outlay in India on Civil Works during 1890-91 compares as follows with that incurred during the four preceding years:—

	1886-87.	1887-88.	1888-89.	1889-90.	1890-91.
	Rx.	Rx.	Rx.	Rx.	Rx.

TOTAL OFFICERS OF OTHER DEPARTMENTS	*932,802	*957,062	*984,286	*1,146,525	1,184,926
GRAND TOTAL	4,023,560	4,096,927	4,062,281	4,131,608	4,411,177

28. The preceding table shews that the outlay by Public Works agency on Buildings has been of late years considerably increased, while the expenditure on Roads has been allowed to fall off.

29. The expenditure on Establishment has, with respect to outlay under Public Works Officers, borne the following relation to the outlay on Works and Repairs:—

1886-87	30·51 per cent.
1887-88	28·15 ,,
1888-89	26·12 ,,
1889-90	26·97 ,,
1890-91	25·51 ,,

These figures indicate that the present rate of 23 per cent. accepted for all adjustments between funds is too low.

The circumstances under which outlay is incurred under officers of other Departments render it misleading to state the similar results obtainable from the figures of 1890-91 given above, as no sum is included under Establishment for the time of the officers supervising the outlay.

30. The following table shews the percentages of the total money expended in each province which has been allotted to the different heads of service:—

I.—By Public Works Officers.

Omitting Excluded Local.

Percentage of all Provinces	3	2	19	48	5	3	14	...	...	...	6	100

31. Of the total outlay *under Public Works Officers*—

29 per cent. was expended on *new Buildings.*

17 ,, ,, ,, *Roads.*

2 ,, ,, ,, Works of *miscellaneous public improvement.*

8 ,, was spent in repairs of *Buildings.*

22 ,, ,, ,, *Roads.*

1 ,, ,, ,, Works of *miscellaneous public improvement.*

Establishment absorbed 20 per cent. of the total outlay, and Tools and Plant 1 per cent.

Similarly, of the total outlay under officers of other Departments—

3 per cent. was expended on *new Buildings.*

19 ,, ,, ,, *Roads.*

5 ,, ,, ,, Works of *miscellaneous public improvement.*

2 ,, ,, on repairs to *Buildings.*

48 ,, ,, ,, *Roads.*

8 ,, ,, ,, Works of *miscellaneous public improvement.*

14 per cent. of the total outlay was recorded under Establishment, and

6 ,, under Miscellaneous—the small outlay on Tools and Plant falls short of 1 per cent. of the outlay.

The head 'Miscellaneous Public Improvements' embraces water-supply of towns, works of sanitation, harbour improvements, light-houses, coal and oil prospecting operations, &c.

32. The variation from the above general results in the case of particular provinces is considerable. Of the outlay incurred by Public Works Officers, Madras shews 49 per cent. as expended on new Buildings and 13 per cent. only on new Roads. In Bengal 38 per cent. appears against new Buildings and 10 only against new Roads. In Madras and in Bengal also most of the expenditure on the construction and maintenance of roads is incurred and accounted for independently of the Public Works Department and hence it is classified in the public accounts as expenditure under Civil officers.

Attention is invited to the percentages expended on repairs of Buildings and Roads in the different provinces.

Central India shows the highest proportion of the total grant taken up by establishment and Baluchistan the lowest. Port Blair is quite an exceptional matter.

The bulk of the outlay by *officers of other Departments* has been incurred in Madras, Bengal and Bombay from local funds, and it will be seen that the largest share has been spent in repairs of Roads; but that there was considerable expenditure in Bengal (29 per cent.); Upper Burma (27 per cent.); Madras (17 per cent.), and Bombay (13 per cent.) on new Roads; also that in both of the two last named provinces 4 per cent. of the outlay has been expended on new Buildings. The percentage of outlay by this agency in other provinces and Administrations is not noteworthy as the outlay has been unimportant.

33. The *Imperial* outlay was expended in the under-noted Provinces upon the objects detailed:—

	Military Works.	Rajputana.	Central India.	Coorg.	Mysore.	Hyderabad.	Port Blair.	Baluchistan Agency.	Central Provinces.	Upper Burma.	Lower Burma.	Assam.	Bengal.	North-Western Provinces and Oudh.	Punjab.	Madras.	Bombay.	Total.

4. The large outlay in Upper Burma is due to the establishment of the requirements of a settled government in that country, and the opening out of communications. The other Provinces showing considerable outlay are Bengal, Punjab and Baluchistan. The principal works on which outlay was incurred were :—

In Bengal—

The new secretariat offices of the Government of India.

A combined post and telegraph office at Krishnagar.

A new post office at Chyebassa.

In Punjab—

Upper storey, Army head-quarters offices at Simla.

Quarters for telegraph signallers at Rawal Pindi. The Dera Ghazi Khan-Loralai road; metalling the Murree-Kohala cart-road.

In Baluchistan—

Constructing houses for the superintending engineer and treasury officer at Quetta.

The political agent's rest-house at Ziarut and quarters for two native officials of the agency.

Tahsil and thana at Barkhan for the new Zhob agency.

Levy posts at Hindubagh, Ismailzai, Hyderzai, &c.

Houses for staff and office accommodation at Fort Sandeman.

The Lower Torkhan road.

The Zhob Valley road.

The Murgha-Gomal road.

Flood protections, and water-works at Quetta.

Bengal shows the largest outlay on repairs of buildings, exhibiting about a fifth of the whole sum expended. Baluchistan, the Punjab, Upper Burma, with Bombay follow. The outlay on repairs of Civil buildings under the Director General of Military Works—chiefly ecclesiastical, aggregated Rs. 4,627.

Nearly a half of the total outlay on the up-keep of roads has been incurred in Upper Burma: Central India, Coorg, Baluchistan and Rajputana absorbing most of the remainder.

The outlay by officers of other Departments from Imperial funds is insignificant.

35. The *Provincial* outlay was incurred in the under-noted Provinces upon the objects specified below:—

Provincial.	Military Works.	Rajputana.	Central India.	Coorg.	Hyderabad.	Port Blair.	Baluchistan Agency.	Burma. Central Provinces.	Burma. Upper.	Burma. Lower.	Assam.	Bengal.	North-Western Provinces.	Punjab.	Madras.	Bombay.	Total.

Bengal	55	...	8	...	...	3	2	...	...	32	100	
North-Western Provinces.	3	12	2	7	30	25	15	1	...	5	100	
Punjab	...	...	...	...	...	...	55	...	...	45	100	
Madras	2	5	9	56	28	...	...	...	...	...	100	
Bombay	...	...	...	...	...	...	1	...	...	99	100	
	5	4	2	9	13	8	6	...	...	53	100	

37. The outlay by officers of the Public Works Department has been expended in the following proportions :—

32 per cent. on new *Buildings.*
13 ,, ,, ,, *Roads.*
2 ,, ,, *Miscellaneous Improvements.*
8 ,, ,, repairs to *Buildings.*
21 ,, ,, ,, to *Roads.*
1 ,, ,, ,, of *Miscellaneous Improvements.*
22 ,, of the total outlay has gone in payments to *Establishment,* and
1 ,, in *Tools and Plant.*

The percentage of outlay on these services varies considerably in the different Provinces.

On Buildings, Madras heads the list with 51 per cent. of the total outlay, whereas on Roads, the outlay has only reached 13 per cent. Lower Burma also shows abnormal outlay on Buildings, being 42 per cent., whereas Roads have only 4 per cent. Next follow Bengal, Punjab, and Bombay, with an outlay of 29 to 32 per cent. on Buildings, and only 9 to 13 per cent. on Roads. The circumstances related in para. 32 affect greatly any deductions made from the above percentages regarding Madras and Bengal.

Assam shows the highest percentage for Establishment, being 32 per cent. North-Western Provinces stands next with 25; the others are normal. It is understood that the Assam Provincial Establishment performs services for Local incorporated funds without charge.

The outlay from Provincial funds by officers of other Departments is not large. Out of over two millions of Rx. spent from these funds, only a little more than a twentieth has been administered by this agency; Lower Burma and the North-Western Provinces expending by far the largest portion. The whole

of the amount expended in Lower Burma appears under Miscellaneous, and consists of contributions to Municipalities, &c.; 30 per cent. of the outlay in the North-Western Provinces has gone upon Miscellaneous Public Improvements, and 25 per cent. on repairs of works of this class.

By far the larger portion of the outlay by officers of the Public Works Department on works of communications (in distinction to the money spent on repairs and up-keep) has been spent on 'metalled and bridged' roads and 'raised, bridged and unmetalled' roads. About 3 per cent. of the outlay under this head appears under the head Accommodation for travellers.

Under Miscellaneous Public Improvements, about 50 per cent. of the outlay by Public Works officers on works has been spent on water-supply. Sewage and drainage and harbours follow with about 20 per cent. each of the total outlay.

38. *Repairs* of Buildings and Roads have taken up the under-noted percentages of the total outlay:—

Provinces.	Percentage of total outlay expended on repairs.		
	Buildings.	Roads.	Miscellaneous Public Improvements.

39. The principal works on which outlay was incurred were—

In the Central Provinces—

The new residence for the Chief Commissioner at Nagpur.
Additions to the jail and reformatory at Jubbulpore.
A house for the manager of the reformatory.
Police stations in the Chandah and Damoh districts.
Raised, bridged, but unmetalled, roads in the Nagpur, Jubbulpore, Kanhan and Raipur divisions.

In Assam—

A new court-house at Silchar.
Cutcherry at Habigunge.
Raising and bridging the Manipur road.
Constructing bridges over the Singra, Krishnai, Deophong and Digru.
Restoring and raising roads in the Central Assam and Lakhimpur divisions and bridle-roads in the Naga Hills.

In Burma—

The new public offices, Rangoon.
Providing quarters for the assistant comptroller, Rangoon.
Jail at Insein.
Additions and extension of Shwegyin jail.
Enlarging the Henzada and Thayetmyo and improving the Ma-ubin jails.
Bridges over the Utu Chung and Kozaik Chung.
Metalling and bridging the Prome-Paukhaung road.

In Bengal—

New police office, Calcutta.
Port and shipping office, Calcutta.
Extension of the small cause court.
Extension of the Indian Museum, Calcutta.
New quarters for students of the Bethune college, Calcutta.
Customs and telegraph offices, Budge-Budge.
New court-house, Doomka.
Circuit houses at Buxa and Chupra.
A house and out-offices for the district superintendent of police at Bogra.
New police station at Dacca.
Sudder police station at Pooree.
Judges court, Noakhally.
Jails at Serajgunge, Cuttack and Alipore.
Custom house, Pooree.
Light-house at Norman's Point, Chittagong coast.
Re-constructing bridges on the Darjeeling high cart-road.
Road from Darjeeling to Lebong.
Road in the Terai, Mattigurra to Nunalbari.
Widening Teesta Valley road.
Feeder road from Ranchi to Chyebassa.
The Hazareebagh and Ranchi road.
New Dâk Bungalow, Purulia.

In the North-Western Provinces and Oudh—

New tehsils at Jhansi and at Kitcha.
Distilleries at Rai Bareli and Phulpur.
Combined tehsil and thana at Unao.
Pleader's chambers in the Civil court at Meerut.
Civil court at Fyzabad.
Warders' quarters in district jail at Allahabad.
Normal school at Lucknow.
Bridge over the Hindun at Gaziabad.
New dâk bungalow at Ranikhet.
Girder bridge over the Kalsa ravine, Terai.
Extension of the road from Belwa to Katra and Lakarmundi railway stations, Basti district.

In the Punjab—

Tehsils at Pind Dadan Khan, Ludiana, and Gurshanker.
District courts, Amritsar and Jullundar.
Civil court, Delhi.

In the Punjab—contd.

New central jail at Montgomery.

Police stations at Miani, Khan Mai, Pind Dadan Khan.

New police lines at Delhi.

New technical school, Lahore.

New government college, Lahore.

Additions to the Mayo hospital, Lahore.

Improving tracks and making roads and posts in the Gomal Pass and on the Samana and Black Mountain ranges.

Improving and metalling the grand trunk and other provincial lines of roads.

Jullundar city drainage scheme.

River protective works, Dera Ghazi Khan.

Madras—

New law courts, Madras.

Victoria Institute and Connemara free library.

District munsiffs' Courts at Behrampore, at Ellore, at Bellary, at Prodatur, at Karum, at Chowghat.

Central jail, Rajahmundry.

Deputy tashildars' cutcheries at Razole and Potinghi.

Police hospital at Koraput.

Cutcheries at Salur, at Satnopalli, at Badvel, at Perintalamana, at Kudliji, at Villupuram, at Srivaikuntham, at Morkapur, at Calicut, at Coondapoor and at Tirumangalam.

Collector's office, Nellore, Bellary, Nandyal, Mangalore.

District jail, Cuddapah.

Law courts at Palghat.

Lying-in-ward, Presidency hospital.

Potinghi-Koraput road.

Calicut-Vayitri road.

In Bombay—

New revenue offices at Broach.

District judge's court, Carwar.

New court-houses at Haveri and at Shirpur.

New central jail at Gujarat.

Police lines at Bijapur.

Thana at Sukker.

Elphinstone college, Bombay.

Sir Jamsetji Jijiboy's school of arts, Bombay.

College of science, Poona.

Mahalaxmi female training college, Ahmednaggar.

New civil hospitals at Nasik and Aden.

Metalled and bridged roads in the Ahmedabad, Kaira and Panch Mahal, Surat, Thana, Khandesh, Ahmednaggar, Poona, Ratnagiri, Bijapur, Belgaum and Dharwar Districts.

Unmetalled roads in the Thana, Khandesh and the above districts generally.

Village roads in the Nasik District.

Boat bridge and ferry at Malprabha.

Dharmsallahs (rest-houses) at Gothda, Bijapur and Kunbar.

Water-supply, Ahmedabad and Janjira.

40. The money obtained from *Incorporated Local Funds* has been expended on the under-noted objects :—

41. The outlay on new buildings by Public Works Officers from funds of this class is small; Rajputana and Central Provinces expending small sums on educational buildings, and the North-Western Provinces and Punjab and Bombay larger amounts on medical and educational buildings.

Under Works of Communication the major portion of the outlay has been spent on raised, bridged and unmetalled roads in the Central Provinces, Assam, North-Western Provinces and Bombay. The last two Provinces have also expended considerable sums on metalled and bridged roads; the North-Western Provinces on district roads, and the Punjab on accommodation for travellers.

The greater portion of the outlay on Miscellaneous Public Improvements has been spent on water-supply and markets. The latter class of expenditure appears mainly in Upper and Lower Burma, and the former principally in the Punjab, followed by Assam, the North-Western Provinces, and Bombay. There was also some little outlay in the Punjab on sewage and drainage.

About two-thirds of the total outlay from Incorporated Local Funds has been expended by officers of other Departments. The Departments of the Administration receiving the largest share of the outlay on new buildings were—

Provinces.	Departments.
North-Western Provinces	Educational and Miscellaneous.
Madras	Medical and Educational.
Bombay	Administration and Educational.

The classes of communications on which the largest outlay was incurred were:—

Provinces.	Classes of Communications.
Central Provinces	District roads and accommodation for travellers.
Upper and Lower Burma	Village roads, bridges and culverts, and accommodation for travellers.
Bengal	Miscellaneous (Rx. 124,008 have been so classified for want of details).
North-Western Provinces	Bridges and culverts and district roads.
Madras	Metalled and bridged roads; raised, bridged and unmetalled roads; district and village roads, boat bridges and ferries.
Bombay	Raised, bridged and metalled roads; accommodation for travellers and village roads.

On works of miscellaneous public improvements the outlay was distributed as under:—

Central Provinces . . . Water-supply.
Upper Burma . . . Markets, and miscellaneous.
Lower ,, . . . Ditto ditto.
Madras . . . Markets; miscellaneous; water-supply and improvements to towns.
Bombay . . . Water-supply.

42. With reference to paras. 40 and 41 above it will be seen that the outlay on repairs to communications under officers of other Departments amounted to—

Rx. 234,676 in Madras, and
Rx. 227,396 in Bengal.

One result of the arrangements in force is that Rx. 227,396 entered in the public accounts as outlay on repairs to communications in Bengal is not classified.

43. The money available for public works from Incorporated Local Funds was expended in the following proportions upon Buildings and Communications and other works of Miscellaneous Public Improvements:—

PERCENTAGE ON TOTAL OUTLAY.

	Civil Buildings.		Communications.		Miscellaneous Public Improvements.		Establishment.	Tools and Plant.	Suspense.	Profit and Loss and Miscellaneous.	Total.
	Works.	Repairs.	Works.	Repairs.	Works.	Repairs.					
Officers of the Public Works Department.

44. The money available for outlay by *officers of the Public Works Department* has been expended in the following proportions:—

6 per cent. on new *Buildings*.
33 ,, ,, ,, ,, *Roads*.
4 ,, ,, ,, ,, *Miscellaneous Improvements*.
3 ,, ,, ,, repairs to *Buildings*.
38 ,, ,, ,, ,, to *Roads*.
2 ,, ,, ,, ,, *Miscellaneous Improvements*.

Establishment has absorbed 14 per cent.; Tools and Plant one; and the balances under Suspense have been reduced by about one per cent. of the total outlay from this source.

The following are the percentages with respect to outlay by *officers of other Departments*:—

New Buildings	2 per cent.
,, Roads	22 ,,
Miscellaneous Improvements	4 ,,
Repairs to Buildings	2 ,,
,, to Roads	51 ,,
,, to Miscellaneous Improvements	3 ,,
Establishment	15 ,,
Miscellaneous	1 ,,

The percentages under provinces differ considerably from these figures.

45. Repairs have taken up the under-noted percentages of the total outlay :—

Provinces.	Percentage expended on repairs.		
	Buildings.	Roads.	Miscellaneous Public Improvements.
By Public Works Officers.			
Rajputana	4	80	...
Coorg	...	31	2
Central Provinces	*Nil.*	13	...
Upper Burma	*Nil.*	8	...

Assam	...	43	3
North-Western Provinces	2	34	1
Punjab	9	46	4
Madras	*Nil.*	36	...
Bombay	...	51	1
The percentage of the total outlay on repairs is	·3	38	2
By Officers of other Departments.			
Central Provinces	...	59	3
Upper Burma	...	11	8
Lower ,,	...	17	9
Assam	*Nil.*	*Nil.*	...
Bengal	*Nil.*	52	...
North-Western Provinces	11	54	...
Punjab	*Nil.*	*Nil.*	...
Madras	2	56	4
Bombay	5	37	8
And the percentage of the total	2	51	3

46. The principal works in progress were :—

In the Central Provinces—

Roads from Drag to Dhamda, Simgah to Tilda, Akaltarah to Pamgarh, Bhatapara to Loan and Narsinghpur to Luknadown.

In Assam—

Raised, bridged and unmetalled roads in the North Sylhet, Habigunj, South Sylhet, Karimgunj; Dhubri; Gauhatti and Dibrugarh Districts.

In North-Western Provinces—

The new dispensary at Bahraich.
Re-building the Haidramai bridge.
Metalling the Shamli and Khairna road.

North-Western Provinces—contd.

Iron bridge over the Sendhli nadi.
Powell's bridge, Saharanpur.
The Senghar nadi bridge.
Iron girder bridge at Madanpur.
Metalling the Bari and Biswan and the Unao and Rae Bareli roads.
Raising the Hardoi and Kanauj road.
Feeder road from Chaika to Puranpur.
Deoria and Padrauna road.

In the Punjab—

School at Tarn Taran.
Dispensary at Gujrat.
Bridge over Sakhi nulla.
Bunds in the Gujrat district.
River Protective Works, Gurdaspur District.

In Bombay—

School at Umreth, Khaira Collectorate.
,, at Chiplun, Ratnagiri ,,
,, Bhoj, Belgaum ,,
Dispensary at Kalol and at Mirajgoan.
Metalled and bridged and raised, bridged and unmetalled, and district roads in the Ahmedabad, Kaira and Panch Mahal, Broach, Surat, Thana, Khandesh, Bijapur and Belgaum, Poona, Dharwar, Nasik Districts.
The Hasteh Bareh village road.

47. The names of works and localities on which outlay by *officers of other Departments* has been expended cannot be given as accounts are not received in such detail

48. The works carried out by the Public Works Department from money assigned from Excluded Local Funds were of the following classes :—

	Hyderabad.	Assam.	Bengal.	North-Western Provinces.	Punjab.	Madras.	Bombay.	Total.

CALCUTTA;

R. G. MACDONALD,

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the week ending at 8 a.m. on Saturday, 23rd April 1892.

The weather during the present week has been unsettled in a greater or less degree over nearly the whole country. In North-West India a well-marked depression existed during most of the week, and gave squally winds and duststorms to the north-west stations; in North-East India steep gradients have prevailed, accompanied with strong winds blowing from the Bay inland, and moderately heavy scattered showers occurred almost daily; in the central parts the weather was fine and more settled than in other places; in the Peninsula, though pressure was high, showers were very general in the south and west. At the close of the week a depression commenced to form in the extreme south and heavy rain fell over Ceylon.

The chart of the 17th showed low pressures over the Punjab and Gangetic plain and high pressures over Assam and Burma, and relatively high pressures over the Bay and the greater part of the Peninsula. A slight depression was, however, shown off the Malabar Coast. Except in Bengal, the pressure differences were small. Easterly winds prevailed over North Bengal and to a certain distance up the Gangetic plain, and north-easterly breezes were reported from the West Coast. Elsewhere the directions were fairly normal. The force at the head of the Bay was high. Showers of rain had fallen over Upper Burma, Assam, North and East Bengal, and the south and west of the Peninsula. Except at Cochin and Wellington, the amounts in no case equalled one inch. On the 18th pressure was decreasing in parts of North-West and of North-East India, and was generally increasing elsewhere. The depression over the Punjab had become better defined and the surrounding gradients steeper, while the low pressure area off the Malabar Coast had disappeared. In other respects there had been no important change in the distribution. The easterly current up the Gangetic plain had extended north-westward as far as the Central Punjab. In other respects the wind directions were little altered. General showers were reported from Malabar and scattered showers from North-East India, while very slight falls of rain had occurred at Raipur and Gopalpur. Sibsagar, Mymensing, and Jessore received one inch and the other stations small amounts. On the 19th the barometer was falling almost everywhere, but the general conditions were very little changed, and the winds maintained the same general directions. Light showers of rain were reported from the West Coast stations from Karwar to Trivandrum, and scattered showers of moderate amount from North-East India. On the 20th pressure was giving way, except on the West Coast and in Assam and Arakan, but the changes were moderate or slight, except in the Punjab, where the fall had been brisk and the depression had undergone development. The winds were stronger over a large part of the country, but the directions were little changed. Westerly winds prevailed over the central parts of the country, southerly winds over the north of the Bay, and easterly winds in North Bengal and along the Himalayas as far north-west as Sialkot. On the 21st the Punjab depression began to move eastward. Consequently the barometer had fallen over the eastern, while it had risen over the western, half of India. The winds were little changed. Rain had nearly ceased over the Peninsula, but showers were general over Bengal, and rain had also occurred at Silchar, Moulmein, Simla, and Mussoorie. The chart of the 22nd showed that pressure was generally decreasing, the fall in Bengal and adjacent region being large. Gradients had consequently increased between Bengal and Lower Burma, but in other respects the distribution remained generally similar to that of the previous day. Rain had fallen in North Bengal, Assam, Burma, and the south of the Peninsula. The chart of the 23rd showed

that the Punjab depression was still moving slowly eastward. Pressure was consequently falling in the west of the North-West Provinces and rising in most other places. A small depression was apparently forming in the south of the Peninsula, and the barometer was falling in Malabar. Squally cyclonic winds prevailed in North-West India and in the extreme south. The rainfall was light and confined to scattered showers in North-East India and the south-west of the Peninsula.

Temperature.—The fairly steady daily rainfall which occurred in Bengal and Assam depressed the temperature in that region, and the heat was hardly so great as is usual; but the rainfall elsewhere was too light to materially affect the weather, and in the north-west the heat remained very great.

The following table shows the variations of the mean temperature from the normal on each day of the week for the principal Provinces of India:

Province.	17th.	18th.	19th.	20th.	21st.	22nd.	23rd.	Mean variation of week.
	°	°	°	°	°	°	°	°
Burma	—0·1	—0·2	—0·2	+0·2	+0·7	+1·1	+0·9	+0·3
Bengal and Assam	—0·6	—2·0	—2·6	—0·4	—0·4	+0·3	+2·7	—0·4
North-Western Provinces and Oudh.	+3·5	+5·2	+2·6	+4·6	+3·4	+3·5	+2·9	+3·7
Punjab	+8·5	+8·3	+8·3	+9·5	+7·4	+5·8	+8·5	+8·0
Bombay	+2·9	+2·7	+1·9	+1·5	+1·1	+0·6	+1·1	+1·7
Berar and Central Provinces	+6·6	+5·8	+4·4	+4·1	+3·9	+2·9	+3·4	+4·4
Guzerat and Central India	+6·0	+4·9	+4·7	+3·5	+2·3	+3·2	+3·2	+4·0
Sind and Rajputana	+7·9	+6·3	+6·0	+6·7	+4·9	+5·1	+6·0	+6·1
Madras	—0·1	+0·4	+1·2	+1·9	+2·8	+2·2	+2·4	+1·5
Mean for whole India	+3·8	+3·5	+2·9	+3·5	+2·9	+2·7	+3·5	+3·3

The above table shows that for the whole of India the mean temperature for the week has exhibited a mean diurnal excess of 3·3°. The warmest day was the 17th with a mean temperature 3·8° higher than usual, and the coolest day was the 22nd with a mean temperature 2·7° higher than usual. The mean temperature of Bengal and Assam for the week was half a degree lower than usual, but in all the other Provinces there was an excess. This excess ranged from 0·3° in Burma and 1½° over the Peninsula to about 4° in the North-West Provinces, the Central Provinces, Central India, and Guzerat to 6° in Sind and Rajputana and to 8° in the Punjab.

All over North-West and Central India the maxima generally ranged between about 100° and about 112°, and in the Punjab in the early part of the week the day temperatures were from 10° to 15° above the normal average.

Rain has been practically confined to North-East India and to the south and west of the Peninsula. Light showers have also occurred over the east of the Peninsula, over the centre and east of the Central Provinces, over the north-west of the Punjab and the submontane part of the North-West Provinces; but practically rain was confined to the two regions mentioned above.

In all thirty-two out of the fifty-one rainfall divisions received rain, but of these thirty-two nine divisions received an average fall for the district of less than one-tenth of an inch of rain during the week, and hence cannot be said to have received effective rain. The regions where actually no rain fell during the week included all the North-West Provinces divisions (except the Submontane), all the Punjab divisions (except the north-west), Khandeish, Berar, the Central Provinces (West), Guzerat, Kattiawar, Sind, Central India, and Rajputana, while the divisions which received rain, but where the average for the division for the whole week was less than one-tenth of an inch, were Orissa, Chota Nagpur, Behar (North and South), the North-West Provinces (Submontane), the Punjab (North-West), the Central Provinces (Central and East), and Hyderabad (South). Of the divisions which received rain, seventeen had more than the normal fall of the week, twelve had less, and in three cases there was either no rain or no comparison was possible. The greatest actual excess was in Assam (Surma), where eleven inches more than the usual amount was recorded. This was followed by an excess of 2·73 inches in Assam (Brahmaputra), of 1·83 inch in Malabar, and of 1·69 inch in North Bengal.

The last three columns of the rainfall table shew the total actual and total normal rainfall for the two months February 28th to April 23rd, and the difference of the actual from the normal.

In the Burma divisions except Arakan, in the Assam divisions, in the north and central divisions of Bengal, in Malabar, in Coorg, Mysore, the Konkan, the Bombay Deccan, and in Madras (South) the average actual rainfall has been in excess, while, on the contrary, in all the other divisions the actual has been in defect of the normal. The greatest excess relatively to the normal has been in the west of the Peninsula, where from three to four times the usual amount of rain has fallen during the period under review.

The following are the falls of rain exceeding three inches during the week, which, it will be observed, were nearly all recorded in North-East India. In—

Burma	Mogok	Sudder	received	3·56 inches.
Bengal	Chittagong	Ditto	ditto	3·89 ,,

SIMLA, *28th April, 1892.*

W. L. DALLAS,
Assistant Meteorological Reporter to the Government of India.

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 23rd April.*—Rainfall heavy on West Coast and Nilgiris; good to fair in parts of Southern districts, Coimbatore, Salem, Ganjam, Agency tracts, and Vizagapatam; showers in parts of Kistna, Kurnool, Anantapur, and Cuddapah. Rain since 23rd in parts of Chingleput and Central districts. Agricultural outlook in affected area unaltered. Rain has improved water-supply in places; otherwise water very scanty in affected parts. Scarcity of fodder increases, especially in Bellary. Prices stationary. FAMINE RELIEF: *Numbers on relief works*:—Deccan 50,670, Karnatic 5,749, and Central 5,284: *Total* 61,703 against 54,904 last week. *On gratuitous relief*:—Deccan 566 and Central 266: *Total* 832 against 917 last week. Decrease in Markapur, Kurnool. Loans for wells:—Deccan Rs. 4,20,000, Karnatic Rs. 3,73,000, and Central Rs. 7,19,000: *Total* Rs. 15,12,000 disbursed. Wells constructed or repaired—511, 1,679, and 786: under construction—3,869, 1,744, and 4,668 in respective blocks. Agriculturists' loans—Rs. 36,000 disbursed in Deccan; elsewhere figures unchanged. Deccan districts as before. Karnatic includes Nellore and Chingleput; Central—North Arcot, Salem, and Coimbatore.

Bombay.—*For week ending 27th April.*—Slight rain in parts of seven districts. Harvesting of late crops almost completed. Preparations for next season continue generally. Fodder insufficient in parts of ten and water in parts of seven districts. Cattle distressed in parts of six districts. Prices generally steady. FAMINE RELIEF: *Numbers on relief works*:—Professional Agency—Bijapur 232, Belgaum 1,545, and Dharwar 1,177; Civil Agency—Bijapur 690, Belgaum 572, and Dharwar 81; on relief works in Poona 435: *Total* 4,732.

Bengal.—*For week ending 26th April.*—Rain has fallen over the greater part of the Province, and general agricultural prospects have *pro tanto* improved. Cultivation much stimulated, except in South Behar, Orissa, and Chota Nagpur, which have had only a few scanty showers. More rain is also wanted in the Burdwan and Presidency Divisions and in parts of the Dacca and Bhagalpur Divisions. In the Rajshahi and Chittagong Divisions there has been copious rain, and prospects of early rice and jute are favourable. All standing crops have been benefited by the rain, but the spring rice, which has already suffered from previous drought, is not expected to yield a good outturn. Indigo much benefited in the Saran, Champaran, and Midnapur Districts. Sugarcane promises well. Mango has also suffered in the Bhagalpur Division and in parts of Patna and Chota Nagpur Divisions, but the general prospects are still fair. *Mahua* (*Bassia latifolia*) is yielding a good outturn, except in places in the Bhagalpur Division. Prices continue steady with a slight tendency to rise throughout the Patna Division. Condition of cattle is generally fair. Fodder supply is improving, but insufficiency of water is still reported from many places. In the Rajshahi Division generally the prospect of the early (autumn) crop has greatly improved: this has induced the grainsellers to open their stores, and enables the cultivators to give employment to labourers; but the effect on prices has not been great. In

the Bhagalpur Division and parts of the Patna Division the rain has done some good, and stimulated the cultivation of the early (autumn) crops. Want of work is now acutely felt in Muzaffarpur and Darbhanga, but there is no lack of food. FAMINE RELIEF: *Numbers on relief works*:—Muzaffarpur 4,992, Darbhanga 17,828, Monghyr 56 (including 13 dependants), Bhagalpur 7,056, Purneah 1,404, and Dinajpur 1,977: *Total* 33,313. *Numbers in receipt of gratuitous relief*:—Darbhanga 24, Monghyr 213, Bhagalpur 654, and Purneah 1,073: *Total* 1,964.

North-Western Provinces and Oudh.—*For week ending 27th April.*—Weather seasonable and heat increasing. Light local showers in Gorakhpur, Almora, and Garhwal; more rain urgently wanted in the last two districts. Threshing of spring crops in progress. Indigo, sugarcane, and extra crops are being irrigated. Prospects fair. Supplies ample, except in Garhwal, where food stocks are low. Fodder and water sufficient. Prices generally steady: have slightly risen in Jhansi, and continue high in Almora.

Punjab.—*For week ending 27th April.*—Rainfall *nil*. Prices unsettled in one district, falling in one, rising in another, and stationary elsewhere. Reaping of spring crops nearly over. Threshing operations in progress. Sowings for autumn crops on irrigated lands going on. Sugarcane weeding in progress; rain wanted. Water scarce in trans-Indus and part of Dera Ismail Khan. Crops on the Sidhnai Canal bad; damaged by gales in Peshawar. Outturn poor in one district and below average in another. Winged locusts passed through the Dera tahsil from north-east to south-west. Young locusts appeared in the Tank tahsil, but have gone towards the hills. Condition of cattle is good in all but three districts. Fodder sufficient in three districts; scarce elsewhere.

Central Provinces.—*For week ending 27th April.*—Weather hot and generally cloudy. Threshing of spring crops in Northern districts in progress. Prospects of spring harvest unchanged. Land being prepared for autumn sowings in Southern districts. Prospects of the sugarcane crop are good in two districts.

Burma.—*For week ending 23rd April.*—Rain in varying quantity fell in a few districts of Lower Burma and in most districts of Upper Burma, including all scarcity districts, except Magwe. Paddy cultivation progressing, and in Kyaukse the crop is being reaped. Wheat, gram, and miscellaneous crops being reaped. Price of paddy has risen largely in Magwe, considerably in Lower Chindwin and Mandalay, and slightly in Toungoo, Thayetmyo, Prome, and Rangoon, while in Akyab there is a slight fall. FAMINE RELIEF: *Numbers on relief works*:—Shwebo 2,296, Yeu 1,910, Lower Chindwin 753, Myingyan 315, Magwe 12: *Total* 5,286.

Assam.—*For week ending 26th April.*—Weather seasonable. Rainfall sufficient. Sowing of early rice continues. Prospects of crops good. Condition of cattle fair. Fodder and water plentiful.

Mysore and Coorg.—*For week ending 27th April.*—MYSORE: Rainfall general and good in parts of Mysore, Bangalore, and Hassan Districts. Crops benefited by rain. Sugarcane planted in parts. No material change in prices. FAMINE RELIEF: *Numbers on relief works*:—Bangalore 252, Kolar 1,369, Tumkur 1,969, Mysore 323, Chitaldroog 559, and Shimoga 439: *Total* 4,911.

COORG: Rainfall good. Hot-weather rice crop thriving. Sufficient rain fell in all parts for coffee blossom. Slight rise in prices. Forage scanty. Water sufficient.

Berar and Hyderabad.—*For week ending 27th April.*—BERAR: Weather warm. Harvesting of spring crops completed. Preparation of land for ensuing crops progressing. Fodder insufficient in one district. Water insufficient in Wun. Prices stationary in three districts out of four.

HYDERABAD: Rainfall good during week. Scarcity of water and fodder increasing in all talukas and cattle getting weaker. Prices—Wheat 9, coarse rice 8½, white *juar* 13½, yellow *juar* 16, and *tur* 11½ seers per current rupee. FAMINE RELIEF: *Numbers on works* (*for week ending 26th March*):—Lingsagur District 9,260, Raichur District 5,791, and Nalgunda District 2,670: *Total* 17,721.

Central India.—*For week ending 27th April.*—No rain during the week. Agricultural operations completed in Gwalior, Western Malwa, and Neemuch; in progress in other Agencies. Threshing of wheat almost finished in Bhopawar, and land being prepared for autumn crops. Condition of standing crops generally good; probable outturn average. Condition of agricultural stock good. Pasturage good, but water scarce in parts of Bhopawar and Indore. Prices of foodgrains steady in five Agencies and Neemuch; high in two other Agencies. Condition of opium indifferent in Baghelkhand, fair in Western Malwa, and good in Goona. Rajputana emigrants returning through Malwa to their homes.

Rajputana.—*For week ending 27th April.*—No rain. Agricultural operations generally satisfactory. Standing crops good. Spring crop gathered in Marwar and Meywar. Sugarcane sowing in progress in Kerowli. Outturn of harvest good in Marwar, fair in Ulwar, average in Kotah and Dholepur, and below average in Ajmere and elsewhere. No damage done to crops in any State. Cattle suffering from want of fodder and water in Marwar. Agricultural stock good in Sirohi, Jhallawar, Kotah, and Harowti; fair in Jeypore, Dholepur, and Ulwar; partly fair in Meywar and Bikanir; and poor in Ajmere and elsewhere. Pasturage or fodder very scarce, and dear in Ajmere and seven States; sufficient in four tahsils of Bikanir and elsewhere. Prices rising in Serohi, steady in five States, fluctuating in three, and falling, or partly falling, in others. Tanks and wells dry in Pertabgarh; wells low in Jhallawar; water ample in Meywar. FAMINE RELIEF: Fifty immigrants employed on deepening tanks in Jhallawar; in Ajmere 1,504 labourers on ordinary works, 27,637 on relief works, and 4,928 in receipt of gratuitous relief; in Marwar 2,021 persons on relief works and 2,081 receiving gratuitous relief; Kishengarh—948 on relief works and 121 in receipt of gratuitous relief; in Bikanir scarcity throughout whole or part of ten tehsils; 6,084 persons on relief works and 2,520 receiving gratuitous relief; 98 immigrants and three cattle in Kotah: *Total*—on relief works 38,244; on gratuitous relief 9,650.

Nepal.—*For week ending 21st April.*—Heavy showers with occasional hail. Prospects good. Prices continue high. Weather very cool and pleasant.

E. C. BUCK,
Secretary to the Government of India.

Irrigation.

REVIEW OF THE REVENUE REPORT OF IRRIGATION WORKS IN BALUCHISTAN FOR THE YEAR 1890-91.

No. 77-I., dated Simla, the 22nd April, 1892.

RESOLUTION—By the Government of India, Public Works Department.

Read—

Revenue Report of Irrigation Works in Baluchistan for the year 1890-91 forwarded with letter No. 3533, dated 10th November 1891, from the Secretary to the Agent to the Governor General in Baluchistan, Public Works Department.

OBSERVATIONS.—This is the first report of the kind submitted to the Government of India. The number of minor works in Baluchistan dealt with in the present report, and of which both Capital and Revenue Accounts are kept, is two. There are no major works in Baluchistan.

2. The Capital outlay on the two works during and up to the end of 1890-91 was as follows:

	Number of Works.	During the year 1890-91.								Total direct and indirect to end of 1890-91.
		Works.	Establishment.	Tools and Plant.	Profit and Loss.	Suspense Account.	Total direct charges.	Indirect charges.	Total direct and indirect charges.	
		Rs.	*Rs.*	*Rs.*	*Rs.*	*Rs.*	*Rs.*	*Rs.*	*Rs.*	*Rs.*
Minor Works and Navigation.										
Works for which Capital and Revenue Accounts are kept (Account head 43)	2	15,337	8,964	...	...	1,846	26,147	1,255	27,402	15,40,609

The total outlay on the Shebo Canal during 1890-91 amounted to Rs. 10,027, of which Rs. 3,743 represented the establishment charges; that on the Khushdil Khan Reservoir amounted to Rs. 17,375, of which Rs. 5,221 was on account of establishment. The high establishment charges on the former work are said to be due to exceptional circumstances, but what those circumstances were should have been explained. On the latter work the proportion of establishment charges to works outlay was also high.

The Shebo Canal has been in operation three years. During the year under review tank No. 4 was completed at a cost of Rs. 3,914.

3. The Khushdil Khan Reservoir was completed in March 1890, and the scheme as sanctioned is now finished. The first 11 feet of water in the reservoir were filled by ordinary rainfall over the catchment area, and water was first let in through the Barshor feeder cut on the 14th January 1891. By the 24th February 1891 the reservoir was filled to a total depth of 26 feet, which is 12 feet below the crest level of the dam and 5 feet below the proposed level of the full supply of the reservoir. On March 10th the water level rose to 27½ feet due to heavy rainfall, but the dam has stood well, only slight leakage due to springs being observed.

4. The following statement shows the actual financial results of the year under review:

Works.	Total Capital outlay to end of year, including indirect charges.	Gross Revenue collected.			Working Expenses.			Net Revenue.	Percentage of net revenue on Capital at end of year.
		Irrigation Revenue.	Miscellaneous receipts.	Total.	Direct.	Indirect.	Total.		
1	2	3	4	5	6	7	8	9	10
	Rs.	*Rs.*	*Rs.*	*Rs.*	*Rs.*	*Rs.*	*Rs.*	*Rs.*	
Minor Works and Navigation.									
Shebo Canal	6,55,170	16,181	18	16,199	14,480	1,279	15,759	440	0·07
Khushdil Khan Reservoir . . .	8,85,439	10	...	10	6,889	121	7,010	—7,000	...
Total .	15,40,609	16,191	18	16,209	21,369	1,400	22,769	—6,560	...

On the Shebo Canal the revenue is collected on the *batai* system, *i.e.*, in kind, and was assessed at one-fourth of the produce, except in the case of the Shadezai people, who pay only an one-eighth share because of their claims to a part of the water in the river. The yield of wheat and barley per acre during the year was—wheat 8 maunds 34 seers and barley 12 maunds 5 seers. Calculating at the rates at which wheat and barley were sold during the year under review, *viz.*, Rs. 2-8-0 and Rs. 2-0-0 per maund, the revenue per acre of wheat amounted to Rs. 4-9-3, and of barley to Rs. 5-7-4.

The kharif crop consists of millet, Indian-corn, and melons. Taking the rates at which the first two of these were sold during the year, *viz.*, Rs. 1-4-0 and Rs. 2-0-0 per maund respectively, the revenue realized was Rs. 1-4-6 per acre of millet and Rs. 2-7-0 per acre of maize, the rate per acre of melon being Rs. 3-5-0.

5. The area irrigated by the Shebo Canal during the year amounted to 2,656 acres, of which 313 acres were kharif and 2,343 acres rabi.

The area shown under Khushdil Khan Reservoir, *viz.*, 1·5 acres, was irrigated from the Surkhab karez—a karez excavated close to Khushdil Khan to bring water from the Surkhab river to culturable ground. The cost of this karez has been included in the Capital cost of the Khushdil Khan scheme.

6. The following table shows the details of the working expenses exhibited in the statement in para. 4:

	Repairs.	Establishment.	Tools and Plant.	Total.	Indirect charges.	Total working expenses.
	Rs.	*Rs.*	*Rs.*	*Rs.*	*Rs.*	*Rs.*
Shebo Canal	5,116	9,136	228	14,480	1,279	15,759
Khushdil Khan Reservoir .	6,025	864	...	6,889	121	7,010
Total .	11,141	10,000	228	21,369	1,400	22,769

The establishment charges form a large proportion of the total expenditure. It is said that they will be reduced in succeeding years by putting both the Shebo Canal and Khushdil Khan Reservoir scheme under the same establishment. The large expenditure on repairs on the Shebo Canal was due to the construction of a catch-water drain which was found necessary to intercept the drainage from higher lands, and to the planting of trees to protect the slopes of the channels.

The outlay for repairs on the Khushdil Khan Reservoir so soon after the completion of the works was due to the damage done by the heavy rainfall.

7. The months of greatest rainfall in Baluchistan are November to March. The rainfall at Quetta and Pishin respectively during 1890-91 was

18·26 and 20·54 inches as compared with 7·17 and 5·31 inches in the previous year. The rainfall of the year under review was of an abnormal character.

ORDER.—Ordered, that a copy of this Review be forwarded to the Agent to the Governor General in Baluchistan for information.

Also that a copy of the Review and of the Report be forwarded to the Governments of Madras, Bombay, Bengal, the North-Western Provinces and Oudh, and the Punjab, in the Public Works Department, for information.

Also that a copy of the Review and of the Report be forwarded to the Revenue and Agricultural Department for information.

Also that the Review be published in the Supplement to the *Gazette of India*.

Ordered further, that a copy of this Review and of the Report be forwarded to Her Majesty's Secretary of State for India for information.

F. J. HOME, *Colonel, R.E.*,

Deputy Secretary to the Government of India.

Irrigation.

REVIEW ON THE REVENUE REPORT OF IRRIGATION WORKS IN RAJPUTANA FOR THE YEAR 1890-91.

No. 84-I., dated Simla, the 28th April, 1892.

RESOLUTION—By the Government of India, Public Works Department.

Read—

Revenue Report of Irrigation Works in Rajputana for the year 1890-91 forwarded with letter No. 2864 S., dated 12th December 1891, from the Secretary to the Agent to the Governor General and Chief Commissioner, Rajputana.

OBSERVATIONS.—The year 1890-91 was not a favourable one for the crops in Rajputana owing to the insufficient supply of water in the tanks due to the scanty rainfall. The average rainfall in the Ajmere and Merwara Districts was 12·04 and 13·56 inches, or less than that of the previous year by 9·40 and 3·27 inches respectively.

2. The Capital outlay during the year amounted to Rs. 21,223, of which Rs. 16,326 was on works. The total Capital expenditure on the three groups of tanks to the end of the year amounted to Rs. 16,67,904.

3. The following statement shows the actual financial results of the year under review as given in the Revenue Accounts :

Tanks in	Total Capital outlay to end of year, including indirect charges.	Gross Revenue collected.			Working Expenses.			Net revenue.	Percentage of net revenue on Capital at end of year.
		Irrigation revenue.	Miscellaneous receipts.	Total.	Direct.	Indirect.	Total.		
	Rs.	*Rs.*	*Rs.*	*Rs.*	*Rs.*	*Rs.*	*Rs.*	*Rs.*	
Ajmere Sub-Collectorate	8,97,471	57,170	1,467	58,637	27,958	714	28,672	29,965	3·34
Beawar ,, ...	6,31,668	41,798	1,336	43,134	13,677	342	14,019	29,115	4·61
Todgurh ,, ...	1,38,765	22,858	116	22,974	16,500	426	16,926	6,048	4·36
TOTAL ...	16,67,904	1,21,826	2,919	1,24,745	58,135	1,482	59,617	65,128	3·90
Figures for 1889-90 ...	16,46,681	1,24,016	3,535	1,27,551	55,550	2,557	58,107	69,444	4·22

The irrigation revenue collected was made up as follows :

	1890-91.	1889-90.
	Rs.	*Rs.*
Water rates directly paid	9,243	12,879
Share of enhanced land revenue	1,12,583	1,11,137
	1,21,826	1,24,016

The share of enhanced revenue is made up of water rates, share of well assessments, and the difference between dry and wet rates which are collected with the land revenue.

4. The revenue assessed for the year is compared in the following table with the area irrigated. The decrease in the assessment is ascribed chiefly to the deficient rainfall, which failed to fill the tanks to the normal extent :

Sub-Collectorate.	Irrigation revenue assessed.	Area.			Assessment per acre.
		Irrigated.	Protected.	Total.	
	Rs.	*Acres.*	*Acres.*	*Acres.*	*Rs.*
Ajmere	49,395	7,931	4,721	12,652	3·90
Beawar	43,901	7,235	5,947	13,182	3·33
Todgurh	21,933	1,893	790	2,683	8·17
TOTAL FOR 1890-91 ...	1,15,229	17,059	11,458	28,517	4·04
TOTAL FOR 1889-90 ...	1,24,535	23,191	12,579	35,770	3·48

In the last clause of para. 4 of the Review on the Revenue Report for 1889-90, it was desired that, in submitting the report under review, it should be explained whether the irrigation revenue assessed relates to the area actually irrigated only, or if it includes the area protected as given in Statement I. E.; but no explanation is offered on this point, except that in para. 3 of Superintending Engineer's note, in which it is stated that, so far as he is aware, the irrigation revenue assessed includes all assessments due on protected as well as on irrigated areas. The question should have been answered by the Revenue authorities by whom the assessment is made, and the attention of the Agent to the Governor General and Chief Commissioner, Rajputana, is invited to the subject.

Of the irrigated area, 12,429 acres were cultivated under kharif and 4,630 acres under rabi crop. There was less irrigation in the rabi crops of 1891 than in the preceding year owing to deficiency of water. No remissions were, however, given.

5. The following table shows the distribution of the working expenses :

	1889-90.	1890-91.	Increase (+) or decrease (—).
	Rs.	*Rs.*	*Rs.*
New Works, Maintenance and Repairs ...	30,821	39,549	+8,728
Establishment	24,832	16,819	—8,013
Tools and Plant	—103	1,767	+1,870
Leave and Pension allowances	2,557	1,482	—1,075
TOTAL ...	58,107	59,617	+1,510

There is an increase in the working expenses of Rs. 1,510 as compared with the figures of the previous year. The cost of working expenses per acre

irrigated was Rs. 2·09 as compared with Rs. 1·62 per acre in the preceding year.

The establishment charges were divided as follows:

	Rs.
Direction	3,954
Executive	5,864
Civil Officers	7,001
	16,819

The outlay on new works and repairs was Rs. 3,260 and Rs. 36,289 respectively. The increased expenditure on the maintenance of irrigation works is due to the fact that some of the work was especially undertaken during the year as famine relief measures.

6. Some information as regards the experimental cutting of crops is furnished in statement No. VI appended to this Report. The highest produce per acre for barley crop was 28 maunds of grain and 44 maunds of straw. The value of these were respectively Rs. 56 and Rs. 66, and the expenditure is put down at Rs. 75 per acre, leaving a profit to the cultivator of Rs. 47. The statement need not be submitted with future reports, but the average results for each kind of crop would be interesting, and might be exhibited and commented on. The total value of the irrigated and unirrigated crops is estimated at nearly 5 lakhs, barley, maize, and cotton being the principal crops.

7. Table VII attached to the Report gives some details regarding the measurement of the depth of water in wells. It will be sufficient in future reports if information of this nature is summarised without submitting the detailed figures.

8. The Report has been correctly prepared, but the sketch map referred to in para. 7 of the Reviews on the two preceding years' Reports has not been submitted. The omission has been noticed by the Superintending Engineer in para. 2 of his note on the present Report, but the attention of the Agent to the Governor General and the Chief Commissioner is again invited to this.

ORDER.—Ordered, that a copy of this Review be forwarded to the Agent to the Governor General and Chief Commissioner, Rajputana, for information and guidance.

Also that a copy of the Review and of the Report be forwarded to the Governments of Madras, Bombay, Bengal, the North-Western Provinces and Oudh, and the Punjab, in the Public Works Department, for information.

Also that a copy of the Review and of the Report be forwarded to the Revenue and Agricultural Department for information.

Also that the Review be published in the Supplement to the *Gazette of India*.

Ordered further, that a copy of this Review and of the Report be forwarded to Her Majesty's Secretary of State for India for information.

(*a*) Includes the Nalháti State Railway, now amalgamated with the East Indian Railway.
(*b*) Includes the Tirhoot State Railway. Although for convenience classed among the State Railways, the Bengal and North-Western section of this line is the property of the Bengal and North-Western Railway Company.
(*c*) Includes the Bhopal-Itársi State Railway.
(*d*) Includes the Amritsar-Pathánkot and Jammu and Kashmir Railways.
(*e*) Although for convenience classed among the State Railways, this line is the property of the Bengal Central Railway Company.
(*f*) Includes the Toungoo-Mandalay and Mu Valley Railways.
(*g*) Includes the Dhond-Manmád, Wardha Coal, Khámgaon, and Amráoti State Railways.
(*h*) Includes the Bezváda Extension.

SIMLA, *the 28th April, 1892.*

F. B. HEBBERT,
Offg. Under-Secretary.

Printed and published for the GOVERNMENT OF INDIA *at the* GOVERNMENT CENTRAL PRINTING OFFICE, *Simla.*

SUPPLEMENT TO

The Gazette of India.

No. 19.} CALCUTTA, SATURDAY, MAY 7, 1892.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

Calcutta :
The 28th March, 1892.

G. C. MACONCHY,
Under-Secy. to the Government of Bengal.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the week ending at 8 a.m. on Saturday, 30th April 1892.

The unsettled weather which prevailed with greater or less intensity over the greater part of India during last week continued uninterruptedly during the week under review. At first the centre of disturbed conditions lay off the West Coast, but on Wednesday the principal area of disturbance was shown in the north-west of the Punjab, while by the close of the week North-East India experienced the most disturbed weather. Thus in all parts of India, but less in Madras and the central parts of the country than elsewhere, the weather has at some time during the week been unsettled, and over the greater part of the country this disturbance has been accompanied with rain.

The chart of Sunday, the 24th, showed a barometric fall over Burma and on the south-west coast of the Peninsula and a rise elsewhere. A large shallow area of low pressure existed over Northern India and a cyclonic storm apparently lay off the Malabar Coast, while readings were highest over the Andaman Sea. Gradients were steep over the north of the Bay, and strong southerly winds were blowing there and in Bengal. Westerly winds prevailed over the central parts of the country, but elsewhere the directions were variable. The force was fresh on the West Coast, but the directions gave very little evidence of cyclonic movement in that region. Moderate to light rain was general over the south of the Peninsula, while showers had occurred over North-East India and on and near the North-West Himalayas. On the 25th a well marked depression existed off the West Coast, and the winds there had shifted to cyclonic directions, and increased in Malabar to the force of a gale. A second low pressure area lay over West Bengal and Oudh, and gradients had still further increased over Bengal, so that very strong south-westerly winds were experienced in that region. Elsewhere the directions were rather variable. The weather had cleared in the north-west, but moderate rain continued to fall in the south of the Peninsula and scattered showers in North-East India. On the 26th the barometer was rising on the West Coast, and the depression there had ceased to affect the weather. A low pressure area lay over the Punjab and along the line of the hills in the north-west, but gradients were somewhat less steep. Rain was falling in Malabar and also at the stations of Belgaum, Poona, and Ahmednagar, while scattered showers continued in the north-east. On the 27th the barometer was rising, except at Peshawar and in the Karnatic. A deep depression had appeared near Peshawar, and steep gradients, with strong squally cyclonic winds, prevailed in the north-west. Dusthaze was reported all over North-West India, and the weather was unsettled, hot, and sultry. The only rainfall reported throughout India fell at Hyderabad (Deccan) and around the north-east angle of the Bay, and the amounts were small. The chart of the 28th showed that the depression in the north of the Punjab had moved very slowly eastward, and had its centre close to Rawalpindi. Owing to the barometric changes, the intensity of the depression had increased, and the gradients throughout India, but particularly in the north-west, were very steep. Strong squally winds consequently

continued to prevail, and duststorms and dusthaze were very generally reported. Rain had fallen in the south of the Peninsula, at Sholapur, at Rajahmundry, at Masulipatam, at Mussoorie, and at several places in Burma and Bengal. In East Bengal the amounts were moderately heavy. On the 29th there was no practical change in the distribution of pressure or the winds. Rain was, however, rather more widely distributed, having fallen fairly generally over the west of the Peninsula and over North-East India, while light showers had occurred over the North-West Himalayas. The chart of the 30th showed that the depression over the Punjab had largely filled up and that gradients were less steep, but the barometer was falling briskly very generally, and the weather was in an unsettled state. Strongish winds were reported from the greater part of India, and the rainfall area had still further extended. Moderate showers were reported very generally from North-East India and from the west and south of the Peninsula, and light showers from the east of the Central Provinces.

Temperature.—The unsettled weather resulting in much dusthaze in the north-west, and in fairly general rain in the north-east and south of India, has brought about a decrease in the heat over a large part of India. In all Provinces the heat remains excessive, the mean temperature being above the normal; but in Madras and Burma the excess is very small and in the other Provinces only moderate, and much below the excess recorded in some Provinces last week. Thus in the Punjab the mean temperature last week was 8° above the normal, and this week it has been only 4°; in Sind and Rajputana last week's excess amounted to 6°, and this week's only to 3°.

The following table shows the variations of the mean temperature from the normal on each day of the week for the principal Provinces of India:

Province.	24th.	25th.	26th.	27th.	28th.	29th.	30th.	Mean variation of week.
	°	°	°	°	°	°	°	°
Burma	+1·7	+1·5	+2·0	—0·1	—1·2	—0·9	—1·7	+0·2
Bengal and Assam . .	+3·6	+3·5	+3·8	+1·6	+2·2	+0·3	+0·6	+2·2
North-Western Provinces and Oudh.	+5·4	+4·8	+4·6	+4·8	+6·5	+4·1	+2·7	+4·7
Punjab	+4·4	+1·8	+3·4	+9·3	+6·8	+3·4	—0·2	+4·1
Bombay	+2·9	+3·0	+3·2	+0·5	—0·1	+0·4	—0·6	+1·3
Berar and Central Provinces	+2·8	+3·7	+2·9	+3·4	+4·1	+4·5	+1·1	+3·2
Guzerat and Central India .	+3·1	+3·2	+3·2	+4·3	+3·3	+3·4	+1·0	+3·1
Sind and Rajputana . .	+3·7	+1·4	+2·2	+6·4	+4·9	+3·1	—1·0	+3·0
Madras	+0·3	—2·9	—0·8	+0·8	+2·1	+1·7	+1·3	+0·4
Mean for whole India . .	+3·1	+2·2	+2·7	+3·4	+3·2	+2·2	+0·4	+2·5

The mean diurnal excess for the whole of India was 2½°. The warmest day was the 27th with an excess of 3·4°; the coolest the 30th with an excess of 0·4° only. In most Provinces the mean temperature was steadily excessive throughout the week, but in Burma on four days, in the Punjab, Sind, and Rajputana on one day, and in Bombay and Madras on two days the mean temperature was lower than usual.

Rain.—The earlier paragraphs of this summary have shown that showers of rain were received over a large part of the country, and the table at the close shows that of the fifty-one divisions into which India is divided, thirty-two had more or less rainfall during the week.

The regions which received absolutely no rain included the following divisions, *viz.*: Orissa, Chota Nagpur, the North-Western Provinces divisions except the Submontane, the Central and West Punjab, Berar, the Central Provinces (West and East), Guzerat, Kattiawar, Sind, and the Central India and Rajputana divisions. In all other parts of India rain was received. The heaviest fall was 10½ inches in Assam (Surma), followed by 4½ inches in Tenasserim, by 4 inches in East Bengal, by 3 inches in Assam (Brahmaputra), by 2⅓ inches in Malabar, and by 2 inches in Central Burma and Madras (South). The lightest falls were registered in Behar (South), the North-Western Provinces (Submontane), the Punjab (South, Submontane, and North-West), the Konkan, Khandeish, and the East Coast (North and Central), where the average fall for the division for the whole week did not equal one-tenth of an inch. Of the divisions which received rain, seventeen had more and thirteen had less than the normal fall of the week. In the case of Upper Burma no comparison is possible, and in the East Coast (Central) the fall exactly equalled the average. The greatest actual excess was 7 inches in Assam (Surma), but very much more rain than the normal was also received in Tenasserim, in East Bengal, and in South Madras.

The three concluding columns of the table show that for the period February 28th to date the total rainfall has been heavier than usual in Burma (except Arakan), in Assam, in East, Central, and North Bengal, in Malabar, in Coorg, in Mysore, in the Konkan, in the Deccan, and in Madras (South), while in Arakan, in South-Central Madras, and in Khandeish there has been no departure from the normal. The excess in parts of Burma and of the west of the Peninsula has been large. In a large part of the North-Western Provinces, of the Punjab, of the Central Provinces, of Central India, of Rajputana, and of Sind, Kattiawar, and Guzerat there has been absolutely or practically no rain throughout the two months noticed above.

Several heavy falls during the past week are recorded. Of these the following are the more important. In—

Burma . .	Amherst . .	Thatôn	received	9·46	inches.

W. L. DALLAS,

Assistant Meteorological Reporter to the Government of India.

SIMLA, *5th May, 1892.*

E. C. BUCK,

Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 30th April.*—Good rain in south, west, and parts of Central districts and light showers in parts of Karnatic, Deccan, and Circars. Showers reported subsequently in parts of Central districts. April rainfall greatly exceeded average in west and south and slightly in Central districts; normal elsewhere. Agricultural prospects improving in Coimbatore and Salem; elsewhere unaltered. Water-supply slightly improved in parts of Salem; elsewhere in affected area scanty. Fodder very scarce in affected parts and cattle suffering. Prices almost stationary, but slightly easier, except in Ganjam and Vizagapatam. FAMINE RELIEF: *Numbers on works*:—Deccan 51,047, Karnatic 7,542, and Central 5,876: *Total* 64,465 against 61,408 last week (revised figures). *On gratuitous relief*:—Deccan 665 and Central 251: *Total* 916 against 832 last week; increase in Kurnool. Loans for wells:—Deccan Rs. 4,40,000, Karnatic Rs. 3,77,000, and Central Rs. 7,59,000: *Total* Rs. 15,76,000 disbursed. Wells constructed or repaired—511, 1,716, and 791: under construction or repair—4,176, 1,759, and 4,935 in respective blocks. Agriculturists' loans—Deccan Rs. 42,000, Karnatic Rs. 30,000, and Central Rs. 65,000: *Total* Rs. 1,37,000 disbursed.

Bombay.—*For week ending 4th May.*—Rain in parts of fifteen districts, generally slight. Harvesting of late crops completed, except in four districts. Preparations for next season continue generally. Fodder insufficient in parts of eleven and water in parts of seven Deccan districts. Cattle distressed in parts of six Deccan districts. Prices generally steady. FAMINE RELIEF: *Numbers on works*:—Professional Agency—Bijapur 294, Belgaum 2,352, Dharwar 100, and Kolhapur 9,196; Civil Agency—Satara 365, Bijapur 369, Belgaum 703, Dharwar 360, Kolhapur 1,322, and Poona 370: *Total* 15,431 against 4,732, not including Kolhapur, last week.

Bengal.—*For week ending 3rd May.*—Plenty of rain has fallen in Eastern and sufficient in Northern Bengal, where prospects are fair and early rice, jute, and sugarcane already sown are coming on well. Some rain has also fallen in other parts of the Province, but more is wanted. Rain still holds off in the Patna Division, with the exception of Darbhanga, and also in Orissa and Chota Nagpur. Spring rice is being harvested. Sugarcane and millets in the Patna Division are being irrigated and doing well. Indigo is also doing well, but rain is wanted. Mungo prospects are fair, but the crop has been injured in some parts by high winds and excessive heat. *Mahua* (*Bassia latifolia*) has been gathered; outturn good, except in Sonthal Parganas. Prices have slightly risen in the districts of the Patna Division; elsewhere no change has been reported. Cattle are healthy, and fodder supply is generally sufficient, having been improved by recent rain. Want

of good drinking water still reported from several places. The late rain has improved prospects of the Rajshahi Division generally and of the Bhagalpur Division and the Darbhanga District to some extent. FAMINE RELIEF: *Numbers on works*:—Muzaffarpur 3,844, Darbhanga 17,713, Monghyr 76, Bhagalpur 8,342, Purneah 1,040, and Dinajpur 1,927: *Total* 32,942 against 33,313 last week. *Numbers on gratuitous relief*:—Darbhanga 323, Monghyr 237, Bhagalpur 2,005, and Purneah 874: *Total* 3,439 against 1,964 last week.

North-Western Provinces and Oudh.—*For week ending 4th May.*—Weather cooler; occasionally cloudy in some districts, with light rain in Almora, Garhwal, and Jhansi. Threshing and winnowing of spring crops almost finished. Summer crops are being irrigated, and are doing well. Fodder sufficient, except in Almora, where it is scarce. Prices have slightly fallen in three and risen in two districts. Flight of locusts in Meerut District, but no damage is reported. From Almora and Garhwal light local rain is reported. Good rain is urgently required. Spring crops being harvested; outturn in Garhwal estimated at four annas.

Punjab.—*For week ending 4th May.*—Rain has fallen in Jullundur, Amritsar, and Lahore Districts. Prices stationary in all districts except Peshawar, where they are rising. Reaping of spring crops nearly over. Threshing in progress. Sugarcane weeding going on. Rain much wanted for autumn ploughings and sowings. Water scarce in parts of two districts. Canals flowing feebly in Mooltan. In Peshawar water deficient in Bara Canal. Crops on the Sidhnai Canal bad; standing crops in Peshawar injured by heavy westerly gales. Prospects below average in Lahore and average in Mooltan, except on Sidhnai Canal. Flights of locusts passed through two tehsils of Mooltan without damage to crops, and have also appeared in one tehsil of Shahpur. Condition of cattle fair in all districts except two. Fodder sufficient in five districts only; scarce elsewhere.

Central Provinces.—*For week ending 4th May.*—Weather generally hot and cloudy, with slight showers of rain in seven districts. Threshing of winter crops in northern districts in progress. Prospects of winter crops are satisfactory in the northern districts, but below average elsewhere. Land being prepared for autumn sowings. Prices steady.

Burma.—*For week ending 30th April.*—Heavy showers all over Lower Burma; light showers in Upper Burma, except in Minbu and Magwe, where no rain fell. *Mayin* (paddy) and wheat harvests begun. *Mayin* (paddy) thriving. Ploughing for new crops and sowing of early paddy also started in parts. Price of paddy risen largely in Meiktila and slightly in Rangoon; in Mandalay and two other districts there is a considerable fall. FAMINE RELIEF: *Numbers on works*:—Shwebo 2,144, Yeu 1,173, Lower Chindwin 982, Myingyan 295, Meiktila 3,860, Yamethin 803: *Total* 9,257 against 7,451 last week.

Numbers on relief works, Meiktila.—In report for week ending 16th April, *for* "9" *read* "943," and for week ending 23rd April 2,165.

Assam.—*For week ending 4th May.*—Weather seasonable. Sowing of early rice continues. Crop prospects good. Fodder plentiful.

Mysore and Coorg.—*For week ending 4th May.*—MYSORE: Rainfall good in parts of Kolar and Mysore Districts. Crops and prospects improving in parts where there was rainfall. Ploughing operations commenced in parts. No change in prices. FAMINE RELIEF: *Numbers on works*:—Bangalore 288, Kolar 1,241, Mysore 1,120, Shimoga 509, Chitaldroog 1,032, and Tumkur 1,257: *Total* 5,447 against 4,911 last week.

COORG: Rainfall good. Hot-weather rice crop being reaped. Prospects generally good. Prices stationary. Forage and water-supply for cattle improving after the late heavy showers.

Berar and Hyderabad.—*For week ending 4th May.*—BERAR: Weather warm. Preparation of land for ensuing crops progressing. Fodder insufficient in parts of four districts. Water insufficient in two. Prices of food-grains stationary in two districts out of five.

HYDERABAD: No rain during week. Scarcity of fodder and water increasing and cattle becoming emaciated. Prices high.

Central India.—*For week ending 4th May.*—Slight and partial rain in four States. Land being prepared for autumn sowings. Probable outturn of spring crops and condition of stock good to fair in States from which reports have been received. Water scarce in parts of Bhopawar. Prices of food-grains high in Bhopal and Western Malwa; elsewhere steady. Condition of opium, except in Baghelkhand, good to fair, though somewhat injured in places by hail and heat.

Rajputana.—*For week ending 4th May.*—Rainfall over 2 inches at Abu and nearly half an inch in Ajmere. Agricultural operations generally satisfactory. *Jowar* (*sorghum vulgare*) being sown in Ajmere, where wells have retained sufficient water. Standing crops good generally. No change in Jeypore. Outturn of harvest below average in Ajmere. Slight damage was caused by recent rains to spring grain not removed from threshing floors. Agricultural stock good, except in Marwar and Ajmere. Cattle suffering from want of fodder and water in Marwar. Pasturage or fodder practically *nil* at Ajmere; scarce in Sirohi, Marwar, Meywar, Dholepur, and parts of Bikanir; sufficient elsewhere. Prices rising in six States, fluctuating in one, and steady elsewhere. FAMINE RELIEF: Twenty-four immigrants and eleven cattle in Kotah; famine people in Kotah returning to their homes in Marwar in expectation of monsoon rainfall. In Ajmere-Merwara 1,534 labourers on ordinary works, 27,916 on relief works, and about 5,000 receiving gratuitous relief; on relief works in Marwar 1,818 and in receipt of gratuitous relief 2,453; Kishengarh—relief works 948 and receiving gratuitous relief 129; in Bikanir scarcity throughout whole or parts of ten tehsils; 6,033 persons on relief works and 2,550 receiving gratuitous relief; 350 immigrants employed in deepening wells in Jhallawar: *Total*—on works 38,599 and on gratuitous relief 10,132 against 38,244 and 9,650 respectively last week.

Nepal.—*For week ending 28th April.*—Weather showery. Prospects good, but prices rising.

E. C. BUCK,

Secretary to the Government of India.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

RAILWAY STATISTICS.

No. III OF 1892-93.

APPROXIMATE STATEMENT OF GROSS RECEIPTS OF INDIAN RAILWAYS.

N.B.—As regards the figures in column *Total Receipts from 1st April to date*, audited figures have been used as far as possible.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the week ending at 8 a.m. on Saturday, 7th May 1892.

Very unsettled, stormy weather prevailed over North-West India early in the week: this subsequently cleared away, and conditions remained fairly quiet in this region till the close of the week; but in North-East India showery weather continued throughout the week, and off the west of the Peninsula conditions on several occasions were unsettled, and apparently between the 4th and 7th a small depression advanced up the West Coast of the Peninsula, but at such a distance as only slightly to affect the weather on the coast.

The chart of 1st May showed that a very rapid and sudden barometric fall had occurred in Kattiawar and Sind, and a deepish cyclonic storm had advanced very suddenly from the north of the Arabian Sea to the entrance of the Gulf of Cutch. Strong cyclonic winds prevailed around the storm, and rain was falling along the Konkan Coast. In other parts of India conditions were fairly normal, pressure decreasing from a high pressure area in the extreme south to a low pressure area in the extreme north. The winds were westerly to southerly over the Bay area, westerly over the central parts of the country, and variable on the West Coast and in North-West India. Heavyish rain had fallen at Chittagong, moderate rain at Akyab, and showers in other parts of North-East India and over a large part of the Peninsula. The chart of the 2nd May showed that the storm which had struck the Kattiawar Coast on the previous morning had advanced very quickly north-north-eastward, and the centre lay between Sirsa and Ludhiana. The barometer had fallen over the greater part of the Punjab, and had risen with great rapidity in Guzerat. Steep gradients still surrounded the storm, and strong cyclonic gales prevailed over North-West India. The highest pressures were reported from Guzerat, and, in addition to the low pressure area due to the storm in the north-west, a large shallow low pressure area overlay West Bengal and the east of the Peninsula. Rain had to a large extent ceased in North-East India, but over the greater part of the Peninsula, of the Central Provinces, of Central India, of Guzerat, and of Rajputana light to moderate showers were reported. By the morning of the 3rd the cyclonic storm in the north-west had disappeared, and a very rapid barometric rise had taken place in the north-west, where the highest readings were reported. The winds had fallen lighter, and the directions over a large part of the country were very variable. Moderate showers were reported from North-West India, from North-East India, and from the south of the Peninsula. On the 4th pressure was relatively uniform. Readings were relatively high over Guzerat and Sind and over the Bay; relatively low over the north of the Punjab, on the mid-West coast, and in North Behar and Oudh. The winds had recovered their normal directions, and practically the only rainfall was in North-East India. On the 5th pressure was high in North-East India and over Sind and Guzerat and low over the Punjab and the central parts of the country. Southerly winds were reported from the South Konkan Coast, and the weather was probably disturbed off that Coast. Elsewhere the wind directions were generally fairly normal. Rain was confined to Burma, Assam, and the south-west of the Peninsula, but the amounts were nowhere considerable. On the 6th the general distribution was unaltered, but gradients were slightly steeper. The southerly winds on the West Coast had

advanced further northward, but otherwise there was but little change. Rain was reported from Burma, Assam, North Bengal, and the south-west of the Peninsula, the amounts in some cases exceeding 1 inch. On the 7th, owing to a continued fall of pressure in the north and rise in the south, gradients had still further steepened. The lowest pressures lay over the central Punjab; the highest over the south of the Bay and of the Peninsula. The wind was southerly over the Bay area, easterly in Bengal, and generally westerly elsewhere. The force was rising. Very light showers had fallen at the hill stations in the North-West Himalayas and fairly general moderate rain in Bengal, Assam, Burma, and the south-west of the Peninsula.

Temperature.—It will be remembered that the unsettled weather which prevailed last week had produced an appreciable reduction of temperature. This unsettledness having continued and intensified during the week under review, a further fall of temperature resulted, and the average temperature for the whole of India for the first time since the week ending March 12th has now fallen below the normal. The fall was most marked in Central and North-West India, where the mean temperature as compared with the normal was about 5° lower than it was last week.

The following table shows the variations of the mean temperature from the normal on each day of the week for the principal Provinces of India:

Province.	1st.	2nd.	3rd.	4th.	5th.	6th.	7th.	Mean variation of week.
	°	°	°	°	°	°	°	°
Burma	—1·0	—0·1	—0·4	—1·0	—1·4	—1·6	—1·6	—1·0
Bengal and Assam	+2·0	+3·5	+3·8	+3·7	+3·6	+5·0	+3·8	+3·6
North-West Provinces and Oudh.	—0·1	+2·2	—2·5	—4·0	—1·4	+1·5	+2·9	—0·3
Punjab	—0·1	+3·7	—6·4	—7·7	—1·2	+5·0	+6·6	0
Bombay	—0·7	—2·1	—1·4	+1·4	+2·4	+2·6	+2·4	+0·7
Berar and Central Provinces	—0·3	—2·2	—3·9	—4·1	—1·7	—0·3	+3·0	—1·4
Guzerat and Central India	—0·5	—6·1	—6·7	—3·7	—1·7	—0·5	+0·7	—2·6
Sind and Rajputana	0	—4·9	—7·8	—2·6	—1·6	+0·2	+1·6	—2·1
Madras	+1·6	+0·6	+0·9	+0·5	+0·4	+0·2	+0·1	+0·6
Mean for whole India	+0·1	—0·6	—2·7	—1·9	—0·3	+1·3	+2·2	—0·3

The mean diurnal variation for the whole of India was thus —0·3°, the coolest day being the 3rd and the warmest the 7th, when the effects of the disturbed weather were beginning to disappear. In Bengal there was a mean diurnal excess of 3½° and in Madras and Bombay of ½°. In all the other Provinces there was a deficiency, which exceeded 2° in Central India, Guzerat, Sind, and Rajputana. On the 3rd in Central India and Rajputana the maxima were from 15° to 17° below the normal of the day, and on the 4th in the east of the Punjab were between 10° and 27° below the normal.

Rain.—The table with which the summary concludes shows that rain has been more general than for many weeks past. In many parts of the country

only showers have been received, but the cyclonic storm which passed into North-West India, the depressions which have passed along the West Coast, and the strong southerly winds from the Bay which have passed into Bengal have given good rain in each of those regions.

Of the fifty-one divisions into which India is divided, only thirteen had absolutely no rain during the week, eight more had a total average fall of less than one-tenth of an inch, while the remaining thirty divisions received effective rainfall. The rainfall was heaviest in Assam (Surma), which received an average fall for the division of 4·78 inches: this was followed by 2·59 inches in Coorg, by 2·21 inches in Assam (Brahmaputra), and by 2 inches in North Bengal. The regions which received absolutely no rain or an average fall of less than one-tenth of an inch include the following divisions, *viz.*: Orissa, Chota Nagpur, the Behar divisions, the North-West Provinces divisions, the west of the Punjab, Berar, the Central Provinces divisions, Guzerat, Kattiawar, Sind, Central India (East), Hyderabad (South), and the East Coast (Central). Of the thirty-eight divisions which received rain, only fifteen had more than the average fall for the week. These fifteen were North Bengal, all the Punjab divisions except the west, Malabar, Coorg, the Konkan, the Bombay Deccan, Khandeish, Guzerat, Central India, and Rajputana. The greatest actual excess was in Coorg, where the average fall of the division was nearly two inches heavier than usual, but the greatest excess relatively to the normal was in Rajputana (West), where the rainfall of the week was nearly twenty times as heavy as usual. In the Punjab also, but particularly in the hill and submontane districts, the rainfall was much heavier than usual. The greatest actual deficiency was in East and Deltaic Bengal, where the fall was about 1½ inches less than usual.

The concluding columns of the table show some improvement in the state of the reasonal rainfall, *i.e.*, the total rainfall from the 28th of February to the 7th of May. Last week fourteen divisions exhibited an excess of rain for this period, and in three other divisions the rainfall practically equalled the average. In the present week seventeen divisions have had an excess of rain, and in two others the rainfall equals the average. These nineteen divisions are the Burma divisions, the Assam divisions, East, Central, and North Bengal, Malabar, Coorg, Mysore, the Konkan, the Bombay Deccan, Khandeish, Guzerat, Western Rajputana, and South Madras. In the North-West Provinces, Berar, the Central Provinces, Kattiawar, and Sind there has actually or practically been no rain from the end of February to the present date.

The following is the record of the more important amounts received in the different Provinces during the week:

Burma	Tavoy	Sudder	2·36 inches.	
	Pyinmana	Ditto	2·32	"
Assam	Sylhet	Ditto	11·46	"
Bengal	Cooch Behar	Ditto	7·20	"

W. L. DALLAS,

Assistant Meteorological Reporter to the Government of India.

E. C. BUCK,

Secretary to the Government of India.

SIMLA, *12th May, 1892.*

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 7th May.*—Good rain during the week on West Coast, fair showers in parts of Central and Southern districts, and light showers general in Deccan and parts of Circars. Some improvement in affected parts of Central districts and of Cuddapah; elsewhere in Deccan showers refreshing and have given water in parts for cattle, but of little use for cultivation. Cultivation proceeding in West Coast, Coimbatore, parts of Salem, and Cuddapah. Cattle still suffering in affected area. Pasture and fodder generally very scarce, and in places water-supply scanty. Prices easier in Deccan, North Arcot, and Salem; elsewhere nearly stationary. FAMINE RELIEF: *Numbers on works*:—Deccan 52,372, Karnatic 9,383, and Central 9,213: *Total* 70,968 against 64,991 last week; increase general, except in Markapur in Kurnool and Bhavani. *On gratuitous relief*:—Deccan 716 and Central 244: *Total* 960 against 916 last week. Loans disbursed:—Deccan Rs. 4,63,000, Karnatic Rs. 3,82,000, and Central Rs. 7,87,000: *Total* Rs. 16,32,000 disbursed. Wells constructed or repaired—516, 1,721, and 856: under construction—4,344, 1,809, and 5,153 in respective blocks: *Total* 3,093 constructed and 11,306 under construction. Agriculturists' loans—Deccan Rs. 44,000, Karnatic Rs. 30,000, and Central Rs. 65,000: *Total* Rs. 1,39,000 disbursed.

Bombay.—*For week ending 11th May.*—Moderate rain in five districts; slight in seven more. Harvesting of late crops completed, except in three districts. Preparations for monsoon crops progressing generally. Fodder scarce in parts of nine and water in parts of seven districts. Cattle poor in four districts. Prices steady, except in parts of six districts. FAMINE RELIEF: *Numbers on works*:—Poona 1,645; Professional Agency—Bijapur 310, Belgaum 3,173, Dharwar 196, and Kolhapur 9,245; Civil Agency—Satara 605, Bijapur 943, Belgaum 710, and Kolhapur 1,350: *Total* 18,177 against 15,431 last week.

Bengal.—*For week ending 10th May.*—Plenty of rain has fallen in the Chittagong Division and slight rain throughout the Rajshahi Division; little or no rain in other parts of the Province. Agricultural operations consequently retarded. Scarcity of water is felt in many places, but no appreciable want of fodder. No rain throughout Behar, Orissa, and Chota Nagpur. Prospects much brighter in Dinajpur, where 2½ inches of rain fell. Standing crops on low lands doing well, but not so on high lands. Ploughing in progress in most places for early rice and low wet-land rice crops. Sugarcane and millets in the Patna Division being irrigated and doing well. Indigo is doing well in Midnapur. Early rice is still being sown. Mango crop ripening, but good outturn is not expected owing to drought. Prices stationary in most places, with a tendency to rise in Birbhum, Gya, Muzaffarpur, and Motihari. Cattle are generally healthy. In the Bhagalpur Division reassuring reports have been received from Monghyr,

Purneah, Maldah, and Sonthal Parganas Districts, but there is still cause for anxiety in Bhagalpur. Condition of Patna has not improved, and the prospects in Darbhanga are not very hopeful. Prospects in the Rajshahi Division have much improved owing to the timely fall of rain, but prices show some tendency to rise, probably owing to failure of rain in Behar. FAMINE RELIEF: *Numbers on works*:—Muzaffarpur 5,214, Monghyr 77, Bhagalpur 9,551, Darbhanga 25,114, Purneah 795, and Dinajpur 2,411: *Total* 43,162 against 32,942 last week. *Numbers on gratuitous relief*:—Monghyr 254, Darbhanga 99, Bhagalpur 1,714, and Purneah 816: *Total* 2,883 against 3,439 last week.

North-Western Provinces and Oudh.—*For week ending 11th May.*—Weather very hot; cloudy in some places. Light local showers have fallen in Jhansi and in north of Garhwal. Harvesting of spring crops completed; irrigation of extra crops in progress. Fodder scarce in Almora and Garhwal. Prices have risen in six districts and continue high in Almora and Garhwal.

Punjab.—*For week ending 11th May.*—Rain has fallen in the Ferozepore, Amritsar, Lahore, and Rawal Pindi districts. Prices rising in Amritsar and Peshawar; stationary in other districts. Reaping of spring crops nearly over; threshing in progress. Rain wanted for ploughings for autumn crops in Hissar. Sowings of autumn crops commenced on irrigated lands in some districts. Sugarcane weeding going on. Water scarce in parts of Dera Ismail Khan. Canals flowing feebly in Mooltan and Shahpur. In Peshawar water deficient in the Bara Canal. Wells drying up in Jullundur. Crops on the Sidhnai Canal bad; average elsewhere; those in Peshawar injured by westerly gales. Prospects generally reported to be below average. Condition of cattle fair in all districts except three. Fodder insufficient in seven districts; sufficient elsewhere.

Central Provinces.—*For week ending 11th May.*—No rain except a slight fall in Sambalpur. Weather continues very hot, generally cloudy and high south-westerly winds. Threshing of winter crops in northern districts continues. Wheat and linseed crops satisfactory in northern parts of the Province, but below average elsewhere. Land being prepared for autumn sowings. Fodder scarce in six districts. Water deficient in rice-growing districts.

Burma.—*For week ending 8th May.*—Showers in all districts except Magwe. Reaping of *mayin* (paddy) crop progressing in five districts and completed in Kyaukse. Ploughing progressing in Meiktila and Pyinmana. Price of paddy has risen largely in Bassein and Minbu and slightly in Rangoon; it has fallen largely in Yamethin and slightly in Magwe and Kyaukse; elsewhere prices are stationary. FAMINE RELIEF: *Numbers on works*:—Shwebo 2,157, Yeu 1,117, Lower Chindwin 1,024, Myingyan 450, Meiktila 3,227, Yamethin (figures for two groups of works) 3,988, and Sagaing, Magwe, and Minbu, no relief works in progress: *Total* on relief works 11,963 against 9,257 last week.

Complete figures of Yamethin for labour on relief works were for week ending 2nd April 2,704; 9th, 3,670; 16th, 2,975; 23rd, 2,618; and 30th, 2,907; Magwe figures for week ending 16th April were 12 and for 23rd 50.

Assam.—*For week ending 10th May.*—Weather seasonable. Excessive rain in Sylhet. Sowing of summer paddy continues. Fodder and water plentiful.

Mysore and Coorg.—*For week ending 11th May.*—MYSORE: Rainfall general, and good in parts of the Bangalore and Shimoga Districts. Ploughing operations continue in parts. Prospects improving in parts where rain fell. Prices risen slightly in the Bangalore District. FAMINE RELIEF: *Numbers on works*:—Bangalore 434, Kolar 965, and Shimoga 414: *Total* 1,813 against 5,447 last week.

COORG: Rainfall good. Ploughing of rice fields commenced in some parts. Prospects generally good. Forage and water-supply for cattle improved. Prices stationary.

Berar and Hyderabad.—*For week ending 11th May.*—BERAR: Weather hot. Preparation of land for ensuing crops progressing. Fodder insufficient in parts of four districts. Water insufficient in two. Prices of food-grains stationary in three out of five districts.

HYDERABAD: No rain during week. Cattle getting weak owing to scarcity of fodder and water. Prices continue high.

Central India.—*For week ending 11th May.*—Rain reported from five States. Agricultural operations completed in three States and in progress in three others. Probable outturn good in Bundelkhand and Gwalior, fair in Western Malwa, average in Baghelkhand, and below average in Bhopawar. Condition of agricultural stock good and pasturage sufficient. Prices of food-grains steady in all but two Agencies. Opium damaged in some places by early heat and hail; yield on the whole fair, but there is a decrease in the area of poppy cultivation.

Rajputana.—*For week ending 11th May.*—Good rain in Marwar; slight in six other States. Agricultural operations generally satisfactory. Threshing operations going on in five tehsils of Bikanir. Standing crops generally good. Outturn of harvest fair in Meywar and Kerowli; below average elsewhere. Agricultural stock generally sufficient. Cattle suffering from want of fodder and water in Marwar. Pasturage and fodder sufficient in Jhallawar, Kotah, and Harowti; scarce in some tehsils of Bikanir and elsewhere. Prices of food-grains fluctuating in Pertabgarh and Jhallawar, rising in Meywar and Harowti, falling in Kerowli, and steady in Ajmere and elsewhere. No material variation in Ajmere and Jeypore. Good importation of grain in Sirohi. Locusts appeared in Dholepur and Ulwar. FAMINE RELIEF: *Numbers on works*:—Ajmere-Merwara 32,616, Marwar 1,969, Kishengarh 1,122, Bikanir 5,859, and Jhallawar 280: *Total* 41,846 against 38,599 last week. *On gratuitous relief*:—Ajmere-Merwara 6,000, Marwar 2,841, Kishengarh 129, and Bikanir 2,517: *Total* 11,487 against 10,132 last week.

Nepal.—*For week ending 5th May.*—Weather dry and warm. Prospects good. Prices continue high with upward tendency.

E. C. BUCK,

Secretary to the Government of India.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

RAILWAY STATISTICS.

No. IV OF 1892-93.

APPROXIMATE STATEMENT OF GROSS RECEIPTS OF INDIAN RAILWAYS.

N.B.—As regards the figures in column *Total Receipts from 1st April to date*, audited figures have been used as far as possible.

(*a*) Includes the Nalháti State Railway, now amalgamated with the East Indian Railway.
(*b*) Includes the Tirhoot State Railway. Although for convenience classed among the State Railways, the Company's section of this line is the property of the Bengal and North-Western Railway Company.
(*c*) Includes the Bhopal-Itársi State Railway.
(*d*) Includes the Amritsar-Pathánkot and Jammu and Kashmir Railways.
(*e*) Although for convenience classed among the State Railways, this line is the property of the Bengal Central Railway Company.
(*f*) Includes the Toungoo-Mandalay and Mu Valley Railways.
(*g*) Includes the Wardha Coal, Dhond-Manmád, Khámgaon, and Amráoti State Railways.
(*h*) Includes the Bezvada Extension.
(*i*) Total receipts from 21st April to 2nd May 1891.

SIMLA, *the 12th May, 1892.*

F. B. HEBBERT,
Offg. Under-Secretary.

Printed and published for the GOVERNMENT OF INDIA *at the* GOVERNMENT CENTRAL PRINTING OFFICE, *Simla.*

SUPPLEMENT TO

The Gazette of India.

No. 21.} CALCUTTA, SATURDAY, MAY 21, 1892.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

Calcutta, 16th May 1892.

J. F. FINLAY,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the week ending at 8 a.m. on Saturday, 14th May 1892.

The general meteorological conditions have been very steady throughout the week under review. Pressure has been lowest over the Punjab, relatively low over the Gangetic plain, highest over the south of the Bay, and relatively high over the Arabian Sea and off the West Coast of the Peninsula. Gradients have been steepish, and the winds have been strong and squally. North-West India, North-East India, and the south-west of the Peninsula have all experienced unsettled weather in a greater or less degree, while elsewhere ordinary hot weather conditions have prevailed.

The chart of May 8th showed a shallow depression over the centre and south of the Punjab and the north of Rajputana and relatively low pressures over the Gangetic plain. Readings were highest over the south of the Bay, and gradients were moderately steep at the head of the Bay. On the West Coast, though pressure was relatively high, conditions were unsettled, and the winds were variable and the weather showery. A westerly current of air was shown over the central parts of the country, a southerly current over the Bay area, and an easterly current in North Bengal and on the north side of the Gangetic plain. Light showers of rain were reported from the Peninsula and the stations in the North-West Himalayas and moderate to heavy showers in North-East India. On the 9th conditions were practically unchanged. Feebly unsettled weather still prevailed off the West Coast, and in other respects there was little change. Rain was a little more general than on the previous day in North-West India. On the 10th the barometer had risen on the West Coast, and the unsettled conditions previously prevailing off that coast had largely disappeared. Otherwise there was no important change. Light showers continued to be reported from the neighbourhood of the North-West Himalayas and moderate or rather heavy showers from North-East India and from the south-west of the Peninsula. On the 11th the barometer was still rising on the West Coast, and the area of disturbed conditions had quite disappeared. Accompanying this change rain had ceased over the Peninsula, and the weather was very fine there. Rain had again fallen at Srinagar, Murree, and Rawal Pindi, but the amounts were small and the fall less in amount and extent than on the previous day. In North-East India, on the contrary, the fall was very general and in places moderately heavy. The chart of the 12th showed high pressures existing off the West Coast and over the south of the Bay and low pressures over the Gangetic plain and West Bengal. Strong squally winds blowing from about the normal directions prevailed. Duststorms had given light rain to a few places in the Punjab; thundershowers, varying in amount from 0·05 inch to 2·05 inches, had occurred in the south of the Peninsula; and general rain had fallen in the north-east. On the 13th the barometer was rising, except in Lower Burma and the Peninsula, but there had been but little change in the general distribution. The winds were abnormally northerly in the west of the Peninsula, but elsewhere the directions were

about the same as on the preceding day. Rain was very general over Burma, Assam, and North Bengal, and showers had occurred at Jacobabad and Multan, but in the Peninsula rain had ceased. On the 14th the pressure distribution remained practically unchanged, and the abnormal northerly winds in the west of the Peninsula were as strongly marked as on the 13th. Rain had, however, recommenced in the south of the Peninsula; it continued generally in North-East India, and showers were reported from Srinagar and Murree.

Temperature.—The relatively low temperature which had prevailed in the previous week disappeared with the unsettled weather which had occasioned it, and the heat during the week under review has been higher than is usual at this season. The average diurnal excess for the whole of India for the week was 2·6°, the warmest days being the 9th and 10th with an excess of 3·3°; the coolest day the 14th with an excess of only 1·2°.

The following table shows the variations of the mean temperature from the normal on each day of the week for the principal Provinces of India:

Province.	8th.	9th.	10th.	11th.	12th.	13th.	14th.	Mean variation of week.

The hottest part of India relatively to the normal was the North-West Provinces with an excess of 6°: this was followed by 5° in the Punjab and about 2½° in Bengal, the Central Provinces, Sind, and Rajputana.

Rain.—The concluding table shows that general and on the whole heavy rain has fallen during the week in North-East India; that light general rain has fallen in the Punjab, and light to moderate general rain in the south of the Peninsula. Of the fifty-one rainfall divisions as many as thirty-four have received rainfall during the week. Of these thirty-four divisions, however, nine divisions had an average fall for the division of less than one-tenth of an inch of rain. The regions which had absolutely no rain during the week included the following divisions, *viz.*: South Behar, the North-Western Provinces divisions except the submontane division, the submontane division

of the Punjab, Khandeish, Berar, the Central Provinces except the east division, Guzerat, Kattiawar, Central India, Rajputana, and the East Coast division (Jeypur).

The heaviest average fall was received in Assam (Surma), and amounted to 10 inches: this was followed by 4·99 inches in Assam (Brahmaputra), by 4·57 inches in East Bengal, by 4·45 inches in North Bengal, by 3·45 inches in Arakan, by 3 inches in Tenasserim, and by 2·72 inches in Malabar. Of the thirty-four divisions which received rain, thirteen had more than the normal for the week, the actual excess being 5·20 inches in Assam (Surma), over 2 inches in Assam (Brahmaputra) and East and North Bengal, and about 1½ inches in Tenasserim, Arakan, and Malabar.

The seasonal rainfall which is shown in the three concluding columns of the table is in excess of the normal average in all the Burma divisions, in both the Assam divisions, in East and North Bengal, in Malabar, in Madras (South Central), in Coorg, in Mysore, in the Konkan, in the Bombay Deccan, in Rajputana (West), and in Madras (South), and is in defect elsewhere, though in Central Bengal the defect is unimportant.

In the North-West Provinces, a large part of the Central Provinces, in Kattiawar, and in Sind there has been actually or practically no rain throughout the period under review, extending from February 28th to May 14th.

The following are the principal large amounts collected during the week:

Tenasserim .	Amherst . .	Thaton .	7·88 inches.
Upper Burma .	Magok . .	Sudder .	4·78 „
Arakan . .	Akyab . .	Maungdaw .	4·12 „
Assam . .	Khasia Hills .	Cherra .	16·09 „
Bengal . .	Noakhali .	Fenny .	4·95 „
	Cooch Behar .	Sudder .	8·96 „
	Purneah . .	Kishenganj .	2·00 „
Malabar . .	South Kanara .	Kasargod .	11·11 „
Deccan . .	Dharwar . .	? .	6·75 „

PROVINCES.	DIVISION.	Rainfall data for week ending May 14th, 1892. Average actual rainfall of division.	Average normal rainfall of division.	Excess or defect in inches.	Rainfall data from February 28th to May 14th. Average actual rainfall of season to date.	Average normal rainfall, February 28th to May 14th.	Excess or defect of (seasonal) rainfall expressed as a percentage.

W. L. DALLAS,

Assistant Meteorological Reporter to the Government of India.

SIMLA, *19th May, 1892.*

E. C. BUCK,

Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 14th May.*—Rain heavy in West and good in Central districts, showers in parts of Deccan and East Coast districts, and subsequent good rain in Coimbatore and Salem. Improvement in Central districts continues; elsewhere prospects unaltered. Water-supply in affected area of Deccan and Karnatic deficient, but procurable. Fodder almost exhausted, except for valuable stock. Prices nearly stationary; slightly easier in Karnatic and Central districts. FAMINE RELIEF: *Numbers on works*:—Deccan 53,054, Karnatic 10,157, and Central 7,170: *Total* 70,381 against 70,384 last week. *On gratuitous relief*:—Deccan 718, Karnatic 102, and Central 264: *Total* 1,084 against 1,134, the revised number for last week. Loans disbursed for wells:—Deccan Rs. 4,89,000, Karnatic Rs. 3,83,000, and Central Rs. 8,17,000: *Total* Rs. 16,89,000. Wells constructed or repaired—520, 1,724, and 862: under construction—4,545, 1,786, and 5,357 in respective blocks. Agriculturists' loans—Deccan Rs. 47,000, Karnatic Rs. 30,000, and Central Rs. 65,000: *Total* Rs. 1,42,000.

Bombay.—*For week ending 18th May.*—Slight rain in parts of eight districts. Preparations for the next season continue generally. Fodder scarce in parts of eleven and water in parts of eight districts. Cattle poor in parts of six districts. Prices generally steady. FAMINE RELIEF: *Numbers on works*:—Poona 2,391; Professional Agency—Bijapur 263, Belgaum 2,624, Dharwar 770, and Kolhapur 9,435; Civil Agency—Satara 951, Bijapur 479, Belgaum 1,041, and Kolhapur 1,723: *Total* 19,677 against 18,177 last week.

Bengal.—*For week ending 17th May.*—Rain has fallen generally in Bengal Proper, but more is still required. Except in the Northern and Eastern districts, some districts in the Presidency Division have been benefited. In the Bhagalpur Division slight showers received in every district except Monghyr, but inadequate, except in Purneah. In the Patna Division no rain to speak of except in Sitamarhi. No rain in Orissa and Chota Nagpur, with the exception of local showers in the Balasore and Manbhum Districts. Ploughing and sowing in progress, but retarded in many districts for want of rain. Spring rice is still being harvested with fair outturn. Sugarcane and millets generally doing well. Prices are generally steady, with a slight tendency to rise in some districts. Fodder and water-supply are reported to be insufficient in places in the Burdwan, Patna, Orissa, and Chota Nagpur Divisions for want of rain. Cattle are generally in good condition. FAMINE RELIEF: *Numbers on works*:—Muzaffarpur 7,103, Darbhanga 25,551, Monghyr 50, Bhagalpur 10,471, Purneah 478, and Dinajpur 753: *Total* 44,406 against 43,162 last week. *Numbers on gratuitous relief*:—Darbhanga 417, Monghyr 256, Bhagalpur 1,371, and Purneah 796: *Total* 2,840 against 2,883 last week.

North-Western Provinces and Oudh.—*For week ending 18th May.*—Very light rain has fallen in north of Garhwal and in one pargana of the Dehra

Dun District. More rain is urgently needed in the hill districts to ensure germination of autumn sowings; elsewhere the weather has been hot and occasionally cloudy. Irrigation of sugarcane and indigo is in progress. Fodder scarce in Almora and part of Gorakhpur. Locusts appeared at Cawnpore and in Faridpur in the Bareilly District, but no damage is reported. Prices are fluctuating, and have risen in seven districts; they continue high in Almora and Garhwal.

Punjab.—*For week ending 18th May.*—Slight rain has fallen in all districts except Umballa, Jullunder, Ferozepore, Amritsar, Sialkot, and Shahpur. Prices rising in five districts; stationary elsewhere. Reaping of spring crops over; threshing of wheat in progress. Rain wanted for ploughings and sowings of autumn crops in most districts. Sugarcane weeding going on. Cotton and rice sowings commenced. Water scarce in parts of Dera Ismail Khan. Canal supply deficient in some districts; more water has come into the Bara river, Peshawar; wells drying up in Jullundur. Crops on unirrigated lands almost entirely lost by drought in Kangra; outturn of irrigated crops is reported below average throughout the Province. Prospects of autumn crops said to be below average owing to long continued drought. Condition of cattle fair in all but four districts, where it is poor owing to want of fodder. Fodder sufficient in three districts only; scarce elsewhere. The poppy crop is reported an average one in Kangra.

Central Provinces.—*For week ending 18th May.*—No important change in the weather during the week. Threshing of winter crops approaching completion in two Northern districts. Land being prepared for autumn sowings. Fodder sufficient in three districts; scarce elsewhere.

Burma.—*For week ending 14th May.*—Little rain has fallen in most districts, and in several none at all. In lower parts of Thongwa ploughing has commenced; in Bhamo, Katha, Shwebo, Yeu, Sagaing, and Minbu reaping of *mayin* (paddy) crop is progressing; in Myingyan and Pyinmana ploughing is going on, while in Meiktila sesamum and maize are being sown. In Kyaukse paddy is being transplanted. In Bhamo ploughing of forest clearances completed; in the Ruby Mines District it is still going on. The price of paddy has risen considerably in Meiktila and slightly in Magwe, Katha, Thongwa, and Pegu, and has fallen largely in Kyaukse, considerably in Bassein, and slightly in Akyab, Rangoon, and Toungoo. FAMINE RELIEF: *Numbers on works*:—Shwebo (returns of one work not received) 2,547, Yeu 932, Lower Chindwin 1,083, Myingyan 688, Magwe (for week ending 7th May) 17, Meiktila (including railway branch line) 2,445, and Yamethin, 6,004: *Total* 13,716 against 11,963 last week. No distress and no relief works in Sagaing, which has been removed from list of districts suffering from scarcity. Minbu will probably be removed next week.

Assam.—*For week ending 18th May.*—Rainfall heavy. Crops likely to suffer in Sylhet and Kamrup. Sowing of early rice continues. Condition of cattle normal. Fodder and water sufficient.

Mysore and Coorg.—*For week ending 18th May.*—MYSORE: Rainfall general and good in parts of Bangalore, Mysore, Tumkur, and Kadur

districts. Crops benefited in places where rain fell. Ploughing operations in progress. Prices fallen in the Mysore district. FAMINE RELIEF: *Numbers on works*:—Bangalore 256, Kolar 1,232, Tumkur 1,479, and Chitaldroog 536: *Total* 3,503 against 1,813 last week.

COORG: Rainfall good. Ploughing of rice fields continues. Sowing of *ragi* (*Eleusine coracana*) commenced. Prices stationary. Forage and water-supply much improved.

Berar and Hyderabad.—*For week ending 18th May.*—BERAR: Weather hot. Preparation of land for autumn crop progressing. Fodder insufficient in three districts and water insufficient in two. Prices of food-grains rising in two districts.

HYDERABAD: Moderate rain during the week. Cattle becoming emaciated as no water is available. Prices continue high.

Central India.—*For week ending 18th May.*—No rain during week. Ploughing for autumn crops continues. Condition of agricultural stock moderately good, except in Neemuch. Pasturage sufficient, but water scarce in some parts of Western Malwa and Nimar. Prices of food-grains high in Western Malwa and Bhopal; rising in Bhopawar.

Rajputana.—*For week ending 18th May.*—Good rain in parts of Bikanir, slight in parts of Ulwar, no rain elsewhere. Agricultural operations generally satisfactory, except at Ajmere. Maize and lucerne being sown in Merwara, where wells have retained sufficient water. Cotton cultivation impracticable in Ajmere through insufficiency of water in wells. Threshing and winnowing going on in Kerowli and Bikanir. Land being prepared for the autumn crop in Bikanir. Standing crops generally good. Gram good in Serohi. Outturn of harvest below average in Bikanir. Agricultural stock good in eight agencies; very poor in Ajmere, Ulwar, and Kherwara. Cattle suffering from want of fodder and water in Marwar. Pasturage and fodder sufficient in six agencies; scarce elsewhere. Prices rising in Meywar, risen in Harowti, falling in Kerowli, fluctuating in Jhallawar and Jeypore, and steady elsewhere. In Kotah 93 immigrants, 754 immigrants, and 3,347 cattle returning. FAMINE RELIEF: *Numbers on works*:—Ajmere-Merwara 32,493, Marwar 1,928, Kishengarh 1,122, Bikanir 5,844, and Jhallawar 185: *Total* 41,572 against 41,846 last week. *On gratuitous relief*:—Ajmere-Merwara 6,250, Marwar 3,015, Kishengarh 129, and Bikanir 2,524: *Total* 11,918 against 11,487 last week.

Nepal.—*For week ending 12th May.*—Weather unsettled, with occasional showers. Wheat harvest begun. Prices continue high.

E. C. BUCK,

Secretary to the Government of India.

	TOTAL—Average of corresponding periods of 1889 and 1890	...	...	...	2,755	6	74	7	26	13	100

(a) Not a passenger, but a cattle driver.
(b) Not passengers, but cartmen.
(c) Not a passenger, but an infant of a gangman.
(d) Of these, one was not a passenger, but a cooly.
(e) Of these, seven were not passengers.
(f) Of these, eleven were not passengers.

2. As compared with the average of the two corresponding periods of 1889 and 1890, the number of accidents to trains, rolling-stock, permanent-way, etc., during the nine months ending the 30th September, 1891, shows an increase of 621, or 22·54 per cent., with an increase of 1,397·46 miles, or 8·94 per cent. in the mean mileage worked, and of 6,918,452 miles, or 17·35 per cent. in the train-mileage run.

Principal variations as compared with the average of the corresponding periods of 1889 and 1890.

3. The principal variations occurred under "Collisions between passenger trains and goods or mineral trains, engines, and vehicles standing foul of the line," 44 against 29; "Collisions between goods trains or parts of goods trains," 88 against 64; "Passenger trains or parts of passenger trains leaving the rails," 77 against 43; "Trains running over cattle on the line," 1,520 against 1,160; "Trains running over obstructions on the line," 140 against 109; "The bursting of tubes, etc., of engines," 110 against 79; "The failure of machinery, springs, etc., of engines," 302 against 206; "The failure of axles," 46 against 64; "The flooding of portions of permanent-way," 50 against 104; "Slips in cuttings or embankments," 71 against 36; and "Fire at stations, or involving injury to bridges or viaducts," 59 against 32.

4. Under "Collisions between passenger trains or goods or mineral trains, engines, and vehicles standing foul of the line," the number of accidents rose from 29 to 44. The chief variations were an increase of 5 each on the East Indian, the Tirhoot and Bengal and North-Western, and the Eastern Bengal State railways, and of 4 on the North Western railway; and a decrease of 3 on the Southern Mahratta railway and of 2 each on the South Indian, the Oudh and Rohilkhand, and the Burma State railways.

5. "Collisions between goods trains or parts of goods trains" showed an increase of 24 accidents, of which 7 occurred on the Rajputana-Malwa State railway and 7 on the North Western railway, 4 on the Southern Mahratta railway, and 3 on the Great Indian Peninsula railway.

6. Of the increase of 34 accidents under "Passenger trains or parts of passenger trains leaving the rails," 13 took place on the North Western railway, 9 on the South Indian railway, and 5 on the Burma State railway.

7. The number of cattle accidents was largest on the Southern Mahratta railway, *viz.*, 312; next to this comes the South Indian railway with 211; then the Rajputana-Malwa State and the North-Western railways with 140 each, the Eastern Bengal State railway with 109, the East Indian railway with 94, and the Madras railway with 93. As compared with the average of the corresponding periods of 1889 and 1890, there were increases of 109 accidents each on the Southern Mahratta and the South Indian railways, 42 on the North Western railway, 28 on the Madras railway, 27 on the Oudh and Rohilkhand railway, 26 on the East Indian railway, and 23 on the Bengal-Nágpur railway, and decreases of 26 on the Eastern Bengal State railway, and of 14 each on the Indian Midland and the Dibru Sadiya railways.

8. The increase of 31 accidents under "Trains running over obstructions on the line" was chiefly due to the number recorded on the Eastern Bengal State railway having risen from 14 to 41.

9. Under "The bursting of tubes, etc., of engines," there was an increase of 31 accidents, of which 14 occurred on the South Indian railway and 7 on the Rajputana-Malwa State railway.

10. The number of accidents from "Failure of machinery, springs, etc., of engines" increased chiefly on the Bengal-Nágpur railway, 26 against 6; on the North Western railway, 60 against 42; on the Southern Mahratta railway, 32 against 19; on the East Indian railway, 16 against 5; and on the Tirhoot and Bengal and North-Western railways, 9 against *nil*.

11. The decrease in the number of "Failure of axles" was almost entirely due to the failures recorded on the Rajputana-Malwa State railway, having fallen from 49 to 12. The number of failures increased from *nil* to 5 on the Thatôn-Duyinzáik railway; from 1 to 5 on the Tirhoot and Bengal and North-Western railways; from 3 to 6 on the Great Indian Peninsula railway, and from 2 to 5 on the Jorhát State railway.

12. Under the head "The flooding of portions of permanent-way," there was a decrease of 54 accidents, of which 19 occurred on the North Western railway, and 16 on the Eastern Bengal State railway.

13. The number of accidents under "Slips in cuttings or embankments" rose from 36 to 71. This was chiefly owing to an increase of 19 on the North Western railway, and of 7 on the Bengal-Nágpur railway.

14. Of the increase of 27 cases of "Fire at stations, or involving injury to bridges or viaducts," 17 occurred on the Eastern Bengal State railway, and 4 each on the East Indian and Madras railways.

15. The accidents under "Collisions between light engines" numbered 18 against 8, of which six against *nil* occurred on the East Indian railway alone.

16. The casualties to passengers and servants in the employ of railways or of contractors, from accidents not coming under the classification adopted in paragraph 1, were, in the case of passengers, 52 killed and 160 injured, against 30 killed and 105 injured, and, in the case of servants, 121 killed and 398 injured, against 115 killed and 401 injured. (For details, *vide* abstract No. 2.)

Casualties to passengers, servants, and others not included in para. 1.

17. The total casualties to persons from all causes, including trespassers, cases of suicide, etc., were 455 killed and 724 injured, against 363 killed and 673 injured. (For details, *vide* abstract No. 2.)

Total casualties from all causes.

18. In addition to the above, 38 persons were reported to have been killed and 153 injured in yards, workshops, etc., and 751 persons to have died in carriages and at stations from causes unconnected with the working of trains.

Casualties in yards, workshops, etc.

19. The following table gives, for *the third quarter of 1891*, the number of accidents as classified in paragraph 1, which resulted in loss of, or injury to life and limb, and shows the railways on which they occurred :—

Casualties resulting from accidents to trains, rolling-stock, etc., for 3rd quarter of 1891.

Railway.	Number of accidents during the 3rd quarter of 1891.	Passengers and others.		Servants.		Total.	
		Killed.	Injured.	Killed.	Injured.	Killed.	Injured.

Total	...	1	6	1	6	2	12
Average of the two corresponding quarters of 1889 and 1890	...	...	19	1	6	1	25

20. *Tirhoot railway.*—On the 29th July, 1891, a wagon whilst being shunted in the Somastipur yard was derailed at a crossing. The pointsman was injured.

21. *South Indian railway.*—On the 20th July, 1891, a collision took place at Cuddalore Old Town, between a shunting engine and a material special, and both the engines, a horse box, and a loaded high-sided truck were derailed and damaged. A railway servant was also injured.

22. *North Western railway.*—On the 31st August, 1891, a portion of the carriage shed at Kurrachee City station collapsed owing to the door of a brake-van on an up goods train having struck the centre pillar of the shed. The brake-van and two carriages were badly damaged, and an employé of the carriage and wagon department was seriously injured.

23. *Burma State railway.*—On the 7th September, 1891, the engine and 7 vehicles of No. 33 up mail train were derailed at mile 57—19 Irrawaddy branch, owing, evidently, to the line having been tampered with by some person or persons unknown. A fireman had his thigh broken and subsequently succumbed to the injuries received. There was also damage to rolling-stock and permanent-way.

On the 23rd September, 1891, the engine of No. 33 up mail train parted, owing probably to the road at mile 59—6, Irrawaddy line not having been in good order, and collided with the rest of the train. The engine and 5 vehicles were damaged, and one passenger was slightly injured.

24. *Great Indian Peninsula railway.*—On the 24th July, 1891, while some men were working at a slip at mileage 72—17 near the Bhore Ghât reversing station, about 20 tons of rock slipped from some 30 feet above rail level. The gang foreman was slightly injured.

On the 12th September, 1891, a man and a colt were run over and killed by a down passenger train at mileage 404—1 between Yádgiri and Saidápur stations.

25. *Bombay, Baroda and Central India railway.*—Oh the 28th July, 1891, while the up mail train was passing over a bridge at mile 189—4 between Kim and Pánoli stations, the upper half of the south abutment, which had been underscoured, gave way under the weight of the engine and tender. The driver and the fireman jumped off, and the former had his rib broken.

On the 29th July, 1891, some vehicles of No. 6 up mail were derailed at mileage 538—3 near Sábli Road station, owing to the permanent-way having been damaged by floods. Five passengers were injured by splinters, and rolling-stock damaged.

26. *Darjeeling-Himalayan railway.*—On the 19th July, 1891, the engine and two luggage vans of the up mail train were derailed at the second mile, the engine being capsized. The driver was slightly hurt.

The Governments of Madras, Bombay, Bengal, North-Western Provinces and Oudh, and the Punjab.
The Chief Commissioners of the Central Provinces, Burma, and Assam.
The Resident at Hyderabad.
The Resident in Mysore.
The Agents to the Governor General for Rajputana, Central India, and Baluchistan.
The Director General of Railways.
The Consulting Engineers to the Government of India for railways, Calcutta, Central Division, and Lucknow.

ORDER.—Ordered, that the above note with the abstract returns be communicated for information to the Local Governments, Administrations, and Officers noted in the margin.

Ordered also, that copies be forwarded for the information of Her Majesty's Government.

Ordered further, that the note with the abstract returns be published in the Supplement to the *Gazette of India*.

F. B. HEBBERT,
Offg. Under Secretary.

Documents accompanying.

Abstract Returns of Accidents for nine months ending 30th September, 1891.

ABSTRACT No. 1.

GENERAL TOTAL.

NUMBER of PERSONS reported, during the NINE MONTHS ending 30th September 1891, as KILLED or INJURED on ALL RAILWAYS open for TRAFFIC in INDIA, distinguishing between PASSENGERS, RAILWAY SERVANTS and OTHER PERSONS; and distinguishing also, in the case of the two former Classes, between ACCIDENTS caused by ACCIDENTS to TRAINS, ROLLING-STOCK, PERMANENT-WAY, etc., and ACCIDENTS happening otherwise.

	Killed.	Injured.	
PASSENGERS:—			
From accidents to trains, rolling-stock, permanent-way, etc.	2	41	
By accidents from other causes, including accidents from their own want of caution or misconduct	52	160	
SERVANTS:—			
From accidents to trains, rolling-stock, permanent-way, etc.	16	44	
By accidents from other causes, including accidents from their own want of caution or misconduct	121	398	
OTHER PERSONS:—			
Whilst passing over railways at level-crossings	14	16	
Trespassers	180	50	
Suicides	52	...	
Miscellaneous, not included in either of the above	18	15	
TOTAL	455	724	

ABSTRACT

No. 2.

NUMBER of PERSONS reported during the NINE MONTHS ending 30th September 1891 as KILLED or INJURED in INDIA by the RAILWAY SERVANTS, and OTHER PERSONS, and classifying, as far as practicable,

TRAVELLING of TRAINS or the MOVEMENT of VEHICLES used exclusively upon Railways, distinguishing between PASSENGERS, the nature and causes of the ACCIDENTS occasioning the DEATH or INJURY.

| Serial No. | RAILWAYS. | PASSENGERS. | | | | | | | | | | | | | | | | | | | | | | SERVANTS. | | | | | | | | | | | | | | | | | | | | | | | | OTHERS. | | | | | | | | | | | | TOTAL ALL CLASSES. | | Serial No. |
|---|---|---

ABSTRACT No. 3.

ACCIDENTS to TRAINS, ROLLING-STOCK, PERMANENT-WAY, ETC., reported during the NINE MONTHS ending 30th September 1891, as having occurred on the several RAILWAYS open for TRAFFIC in INDIA, distinguishing the different Classes of ACCIDENTS and the Number of PASSENGERS AND OTHERS and of RAILWAY SERVANTS KILLED or INJURED in each Class of Accident.

(a) Not a passenger, but a cattle driver.
(b) Not passengers, but cartmen.
(c) Not a passenger, but an infant of a gangman.
(d) Of these, one was not a passenger, but a cooly.
(e) Of these, seven were not passengers.
(f) Of these, eleven were not passengers.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the week ending at 8 a.m. on Saturday, 21st May 1892.

The weather during the week under review has been in the main of the type ordinarily experienced during the period antecedent to the appearance of the summer monsoon. The heat has been great, more particularly in the North-West and Central India. Pressure has been low over the Punjab and Western desert and high in the extreme south of the Indian region, and, as is usual at this season, the barometric gradients have been steep. In North-East India the pressure conditions and the winds were towards the close of the week very similar to those ordinarily recorded during the rains; and in Burma, Assam, and North Bengal these conditions resulted in very general and fairly heavy rain; but in Lower Bengal the weather, though cloudy, was dry. In the west of the Peninsula the pressure distribution and the winds were strongly opposed to any advance of the monsoon, and the rainfall, which, however, was fairly general throughout the south of the Peninsula, was light or moderate, and fell generally during thunderstorms.

On the morning of the 15th the barometer was falling everywhere, but there was very little general change in the distribution. Readings were lowest over the plains at the foot of the North-West Himalayas and highest off the West Coast and over the south of the Bay. The wind directions were generally unaltered, and, except on the West Coast, where they were abnormally northerly, blew from the usual quarters. Rain had almost ceased over the Peninsula, where the only amounts reported were light showers at Kurnool and Trichinopoly. In North-East India, on the contrary, rain was about as general as on the preceding day, and the amounts were somewhat heavier, Moulmein, Jessore, Cuttack, and Dhubri recording over 1 inch. On the 16th there was very little change to record, the barometer remaining highest off the West Coast and over the south of the Bay and lowest along the foot of the North-West Himalayas. Gradients were somewhat steeper than on the preceding day. The winds were generally unaltered in force and direction. Rain had become more general in the south of the Peninsula and less general in North-East India. The principal amounts were 2·59 inches at Mercara, 2·20 inches at Jalpaiguri, 1·91 inches at Mymensingh, 1·15 inches at Moulmein, 1·07 inches at Calicut, and 1·04 inches at Dhubri. On the 17th the barometer was rising all over Northern and Central India, but was falling in the south of the Peninsula. In consequence gradients had decreased somewhat. A small depression had appeared over the Central Punjab, and an arm of relatively low pressure ran south-eastward from the Punjab down the Gangetic plain to West Bengal. Accompanying this change in the distribution of pressure there had occurred a slight extension of the easterly current from North Bengal into Behar. The rainfall was very slight, and scattered over Lower Burma, over Assam, and over North Bengal. The only considerable amount was 2·30 inches at Jalpaiguri. On the 18th the barometric changes were generally small, and the distribution of pressure was practically unaltered. The winds were southerly over the Western desert, but the general directions were the same as on the 17th. There had been no extension of the easterly current north-westward. Showers were reported from the south of the Peninsula as well as from

Lower Burma and North Bengal. The chart of the 19th also showed very little change in the distribution of pressure and the direction of the prevailing air currents. The easterly wind in North Bengal and Behar was, however, a trifle stronger. Moderately heavy rain was reported from Lower Burma, Assam, and North Bengal, and light scattered showers from parts of the Peninsula. On the morning of the 20th, though the pressure distribution was generally unaltered, two important changes were shown in the wind currents. In the first place, the strong northerly current which had hitherto prevailed on the West Coast had given way and been replaced by variable winds; in the second, the easterly current had undergone considerable extension over the Himalayas. On the 21st these changes had been maintained and intensified. The pressure distribution had undergone a slight modification, and in its main features was that characteristic of the commencement of the rains. Easterly winds had suddenly extended up the north side of the Gangetic plain, and westerly to north-westerly winds were shown on the West Coast. Rain was falling in Malabar, in Ceylon, in Lower Burma, in Cachar, and in Bengal, the amounts in North Bengal being considerable.

Temperature.—As described above, the rainfall received during the week has been confined to light scattered showers over the south of the Peninsula and to moderate showers over the greater part of North-East India. Elsewhere there has been no rain, and in consequence the rise of temperature which had commenced last week has been maintained, and the mean temperature has been generally above the normal.

The following table shows the variations of the mean temperature from the normal on each day of the week for the principal Provinces of India:

Province.	15th.	16th.	17th.	18th.	19th.	20th.	21st.	Mean variation of week.
	°	°	°	°	°	°	°	°
Burma	—0·1	+0·5	—0·3	+0·5	—0·5	—1·6	—1·5	—0·4
Bengal and Assam	+0·9	+3·3	+3·2	+3·5	+2·1	+1·3	—1·5	+1·8
North-West Provinces and Oudh.	+4·3	+5·2	+6·6	+6·6	+6·6	+7·4	+7·1	+6·3
Punjab	+3·7	+4·8	+6·6	+8·0	+8·8	+9·6	+12·0	+7·6
Bombay	+0·3	+0·4	—0·1	+1·3	+1·7	+0·3	—0·2	+0·5
Berar and Central Provinces	+0·1	+2·1	+1·9	+1·8	+2·6	+3·3	+4·1	+2·3
Guzerat and Central India	0	+1·0	+1·0	+0·8	+1·3	+2·8	+3·3	+1·5
Sind and Rajputana	+0·7	+1·7	+2·0	+2·8	+3·8	+4·2	+4·5	+2·8
Madras	+3·2	+1·8	+2·0	+1·5	+1·7	+0·5	+1·3	+1·7
Mean for whole India	+1·5	+2·3	+2·5	+3 0	+3·1	+3·1	+3·2	+2·7

The above figures show a mean diurnal excess for the whole of India of 2·7°. The warmest day was the 21st with a mean excess of 3·2°; the coolest day was the 15th with a mean excess of 1·5°. The provincial variations show that, except in Burma, the weather in all the Provinces has been hotter than usual: this has been particularly the case in the Punjab, where on the 21st the mean temperature exceeded the normal by 12°.

Rain.—The table at the close of the summary shows that general rain has fallen over the Peninsula, Burma, Assam, and Bengal Proper; that light scattered showers have fallen over the Gangetic plain from Chota Nagpur to the Punjab; and that no rain has fallen over the central parts of the couutry, the Western desert, and the Indus Valley.

Thirty out of the fifty-one rainfall divisions have received rain, but of these thirty divisions eight had an average fall for the division for the week of less than one-tenth of an inch. These eight divisions are Chota Nagpur, Oudh (North), the North-West Provinces (West and Submontane), the Punjab (North-West), the Konkan, the Bombay Deccan, and the East Coast (Central). The regions which received absolutely no rain include the following divisions, *viz.*: Behar (South), the North-West Provinces (East and Central), Oudh (South), all the Punjab divisions except the North-West, Khandeish, Berar, the Central Provinces divisions, Guzerat, Kattiawar, Sind, and the Central India and Rajputana divisions.

Of the thirty divisions which received rain, only four had more than the normal average fall for the week, and in two cases no comparison is possible. All the remaining divisions had less than the average amount. The four divisions exhibiting an excess are Tenasserim, Assam (Brahmaputra Valley), North Bengal, and Madras (South Central). The excess in the case of North Bengal was 4·89 inches, of Assam (Brahmaputra) 2·53 inches, and of Tenasserim and Madras (South Central) about ½ inch. The greatest actual deficiency was in Malabar, and amounted to 1·42 inches. This was followed by a deficiency of 1·29 inches in Arakan and 1·23 inches in Central Burma.

The three concluding columns of the table show the state of the seasonal rainfall, *i.e.*, the average and actual rainfall from February 28th to May 21st. In the case of fifteen divisions the actual rainfall of the period exceeds the normal average. In all the other divisions the rainfall has been deficient. The divisions exhibiting an excess are Tenasserim, Central Burma, Arakan, Bengal (East and North), both the Assam divisions, all the West Coast divisions, Madras (South), and Rajputana (West). The greatest excess relatively to the normal average is in North Bengal, Malabar, and Rajputana (West). Over the greater part of the North-West Provinces, of the Central divisions, and of the Indus, Valley, as well as in Guzerat and Kattiawar, there has been practically no rain during the period under review.

The record of large totals for the week shows that most of the principal falls have occurred over North-East India, though in parts of the Peninsula also considerable amounts have been received.

The following are the principal large amounts recorded during the week:

Division.	District.	Station.	
Tenasserim	Amherst	Thaton	11·98 inches.
Lower Burma	Bassein	Sudder	5·63 „
Upper „	Shwebo	Ditto	3·05 „
Assam	Khasia Hills	Cherra	14·53 „
	Goalpara	Sudder	11·53 „
North Bengal	Jalpaiguri	Bhagatpur	17·88 „
Behar	Purneah	Kishenganj	3·22 „
Malabar	South Kanara	Hosdrug	3·00 „
Mysore	Mysore	Sudder	3·80 „
Deccan	Dharwar	?	3·40 „
Madras	Coimbatore	Erode	3·58 „
	Trichinopoly	Perumbatur	3·85 „

W. L. DALLAS,

Assistant Meteorological Reporter to the Government of India.

E. C. BUCK,

Secretary to the Government of India.

SIMLA, *26th May, 1892.*

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 21st May.*—Rainfall good in West and Central districts; scattered showers elsewhere. Cultivation active in West and Central districts and commencing in Deccan. Pasture springing up in Central districts and some parts of Deccan, but cattle in Deccan and affected parts of Nellore suffering severely. Prices generally steady; fallen slightly in Central districts, but risen somewhat in Madras, Ganjam, and Vizagapatam. FAMINE RELIEF: *Numbers on works*:—Deccan 56,053, Karnatic 11,017, and Central 6,460: *Total* 73,530 against 70,109 last week; decrease in Salem and Coimbatore after recent rains. *On gratuitous relief*:—Deccan 743, Karnatic 61, and Central 268: *Total* fed 1,072 against 1,040 last week. Loans disbursed for wells:—Deccan Rs. 5,16,000, Karnatic Rs. 3,87,000, and Central Rs. 8,44,000: *Total* Rs. 17,47,000. Wells completed—Deccan 526, Karnatic 1,759, and Central 1,171: under construction or repair—4,732, 1,827, and 6,009 in respective blocks. Agriculturists' loans—Deccan Rs. 52,000, Karnatic Rs. 36,000, and Central Rs. 65,000: *Total* Rs. 1,53,000 disbursed.

Bombay.—*For week ending 25th May.*—Slight rain in parts of five districts. Preparations for ensuing season progressing throughout the Presidency. Water insufficient in parts of eight and fodder in parts of eleven districts. Cattle distressed in parts of five districts. Prices generally steady. FAMINE RELIEF: *Numbers on works*:—Poona 868, Bijapur 222, Belgaum 3,728, Dharwar 945, Kolhapur 11,381, and Satara 1,076: *Total* 18,220 against 19,677 last week.

Bengal.—*For week ending 24th May.*—Rain has fallen in almost all districts during the week. It has improved agricultural prospects generally by facilitating ploughing and sowings. More rain is still wanted, except in Northern and Eastern Bengal. In these parts the rainfall has been abundant and early rice and jute are coming on well, and cultivation of late rice is in progress. In Rangpur, Jalpaiguri, and Mymensingh early rice and jute on low lands are even suffering from excessive rain. Necessity for rain most felt in Monghyr. In Bhagalpur prospects are fairly satisfactory. In Purneah sowings are in progress and prospects encouraging. In the Patna Division recent rain has facilitated preparation of lands for autumn sowings. Sugarcane prospects are generally favourable, except in parts of the Burdwan and Chota Nagpur Divisions and in the Sonthal Parganas. Indigo is doing well. Spring rice and millets continue to be reaped with fair results. Prices continue almost stationary. Cattle are generally in good condition, but in some parts of the Burdwan, Patna, Orissa, and Chota Nagpur Divisions they are suffering owing to insufficiency of fodder and water-supply. A small area has been added to southern affected tract in Bhagalpur, but situation not materially changed. FAMINE RELIEF: *Numbers*

on works :—Muzaffarpur 11,423, Darbhanga 39,475, Monghyr 84, Bhagalpur 10,895, Purneah 336, and Dinajpur 388: *Total* 62,601 against 44,406 last week. *Numbers on gratuitous relief*:—Darbhanga 597, Monghyr 255, Bhagalpur 1,390, and Purneah 728: *Total* 2,970 against 2,840 last week.

North-Western Provinces and Oudh.—*For week ending 25th May.*—Thunderstorms, accompanied by rain, reported from most districts. In Jaunsar-Bawar parganah in Dehra Dun crop prospects have improved, but more rain is needed in the Almora and Garhwal Districts for the autumn sowings. A flight of locusts passed through tahsils in the Allahabad and Cawnpore Districts, but no damage was done. Prices are generally stationary; they continue high in Almora and Garhwal.

Punjab.—*For week ending 25th May.*—Rain in one district only. Prices rising in six districts; stationary elsewhere. Harvesting of spring crops nearly over. Sowings of autumn crops going on. Sugarcane and cotton weeding in progress. Water getting scarce in Umballa, Rawal Pindi, and parts of Dera Ismail Khan. Canals flowing very low in Hissar and Mooltan. Sidhnai Canal in Mooltan and Bara river in Peshawar almost dry. Wells drying up in Jullundur. Rain wanted in most districts. Outturn of spring crops is reported below average, and prospect of autumn crops not good throughout the Province owing to want of rain. Opium crop seriously injured in one tahsil of the Simla District. Locusts are reported from one tahsil in Dera Ismail Khan. Condition of cattle fair in all but four districts, where they are suffering from want of fodder. Fodder sufficient in three districts only; scarce elsewhere.

Central Provinces.—*For week ending 25th May.*—Weather hot and occasionally cloudy, with a slight fall of rain in Seoni. Threshing and winnowing of spring crops continue in Saugor and in one tahsil of Seoni. Land being prepared for autumn sowings. Fodder and water sufficient in three districts; elsewhere scarce. Prices still high in Bhandara, rising in Sambalpur, steady elsewhere.

Burma.—*For week ending 21st May.*—Heavy rain in Shwebo and Sagaing, and showers in most of the other districts, including those of the dry zone. Ploughing continues in lower part of Thongwa. In Bhamo and Katha reaping of dry-weather paddy continues, and in parts of the former district planting in forest clearances has commenced. Ploughing operations are progressing in five and sowing in two districts, and transplanting in one district of Upper Burma. The price of paddy has fallen considerably in Rangoon and the scarcely affected district of Meiktila as well as in four other districts. It has risen, however, in five, including Yeu, an affected district. FAMINE RELIEF: *Numbers on works*:—Shwebo 1,810, Yeu 1,038 on two roads—numbers on one road not reported, Lower Chindwin 738, Myingyan 732, Meiktila 2,311, Yamethin 6,382: *Total* 13,011 against 13,716 last week. Minbu and Sagaing have already been removed from the list of districts suffering from scarcity. Magwe will probably follow.

Assam.—*For week ending 25th May.*—Weather seasonable. Planting of early rice continues. Land for winter rice being prepared. Condition of cattle normal. Fodder plentiful.

Mysore and Coorg.—*For week ending 25th May.*—MYSORE: Rainfall slight throughout the State. Crops benefited in parts where rain fell, but more rain is wanted. Ploughing continues. Prices slightly fallen in the Bangalore District. FAMINE RELIEF: *Numbers on works*:—Bangalore 282, Kolar 1,417, Tumkur 1,553, Mysore 102, Chitaldroog 379, and Shimoga 342: *Total* 4,075 against 3,503 last week.

COORG: Ploughing of rice and sowing of *ragi* (*Eleusine coracana*) fields in progress. Prices stationary. Forage and water-supply for cattle fair.

Berar and Hyderabad.—*For week ending 25th May.*—BERAR: Weather hot. Preparation of land for next autumn crops progressing. Water scarce in three districts. Fodder insufficient in one district and in parts of three others. Prices rising in three districts out of six.

HYDERABAD: Scarcity of fodder and water for cattle increasing day by day. Cattle becoming weak and emaciated. Prices continue high.

Central India.—*For week ending 25th May.*—Slight rain during week in four Agencies. Pasturage scarce in Bhopal and round Neemuch. Prices of food-grains high in Bhopal, Neemuch, and Western Malwa and rising in Goona. Water-supply deficient in some places, but as yet no serious inconvenience caused thereby. Irrigation insufficient for sugarcane crop in part of Indore.

Rajputana.—*For week ending 25th May.*—Slight rain in Jeypore and parts of Bikanir. Agricultural operations generally satisfactory, except in Ajmere, where early cotton cultivation retarded for want of water in wells. Preparation of land for the autumn crop in progress in Merwara and one tahsil in Bikanir. Land being prepared for cotton in Kerowli. Standing crops fair in Meywar. Gram good in Sirohi. Outturn of harvest below average in Bikanir. Agricultural stock poor in Ajmere, Marwar, Kherwara, and Ulwar; good elsewhere. Cattle suffering from want of fodder and water in Marwar. Pasturage and fodder sufficient in four and parts of two States; scarce and dear elsewhere. Some patches of fodder under wells in Merwara. Prices generally steady, and Ajmere-Merwara emigrants and cattle are beginning to return. FAMINE RELIEF: *Numbers on works*:—Ajmere-Merwara 29,908, Marwar 2,179, Kishengarh 1,024, and Bikanir 5,849: *Total* 38,960 against 41,572 last week. *On gratuitous relief*:—Ajmere-Merwara 9,704, Marwar 2,977, Kishengarh 170, and Bikanir 2,405: *Total* 15,256 against 11,918 last week.

Nepal.—*For week ending 19th May.*—Weather warm with occasional showers. Prospects of crops good.

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.
REVENUE AND AGRICULTURAL DEPARTMENT.
(STATISTICS.)

IMPORTS OF COTTON, WHEAT, LINSEED, AND INDIGO.

Statement showing in maunds the imports of Cotton, Wheat, Linseed, and Indigo by rail and river into Calcutta, Bombay Town, and Karachi during the month of March 1892, compared with the corresponding period of the years 1890 and 1891.

ANNUAL REPORT ON THE OPERATIONS OF THE POSTAL LIFE INSURANCE AND MONTHLY ALLOWANCE SCHEMES FOR THE OFFICIAL YEAR 1890-91.

Simla, the 20th May, 1892.

Read—

Letter from the Director General of the Post Office of India, No. 27-C., dated the 20th April 1892, and enclosures.

ORDERED, that these papers be published in the *Supplement to the Gazette of India* for general information.

J. F. FINLAY,
Secretary to the Government of India.

No. 27-C., dated 20th April, 1892.

From—A. U. FANSHAWE, Esq., Director General of the Post Office of India,

To—The Secretary to the Government of India, Finance and Commerce Department.

I have the honour to submit the Annual Report on the operations of the Postal Life Insurance and Monthly Allowance schemes for the official year 1890-91.

2. During this year 168 new policies were granted of the aggregate value of Rs. 2,46,150 against 166 policies issued in the previous year for sums amounting in all to Rs. 2,71,250. Of the 168 persons who insured their lives, 43 were servants of the Telegraph Department, and the total value of policies issued in their favour was Rs. 95,500. The remaining 125 persons were Post Office servants, and the aggregate value of their policies was Rs. 1,50,650. As compared with the results of the previous year, there was an increase of 16 in the number of new policies issued in favour of Post Office servants, and a decrease of 14 in the number issued in favour of servants of the Telegraph Department; but in the aggregate value of the policies taken out by the servants of both Departments taken together, there was a falling off.

3. The total sum realized on account of premiums on both old and new policies amounted during the year to Rs. 58,273 as compared with Rs. 51,014 in the previous year; claims to the extent of Rs. 16,559 were discharged during the year as compared with payments amounting to Rs. 15,044 during the preceding year; and five policies or contracts representing a gross assurance of Rs. 6,100 either lapsed or were surrendered or cancelled. The general results of the past two years are summarised in the table below:

Life Insurance.	Up to 31st March 1890.	Up to 31st March 1891.
Number of lives insured	1,221	1,389
	Rs.	*Rs.*
Amount received in premiums	1,94,242	2,52,515
" of insurance	16,46,875	18,93,025
" of claims met	51,437	67,996

4. The active policies existing on the 31st March 1891 numbered 1,213, representing a total insurance of Rs. 16,81,250, the details of which are as follows:

		Rs.			
1	for	700	effected by a payment of	premium	in one sum.
416	,,	5,91,300	ditto	ditto	up to the age of 50.
408	,,	5,33,850	ditto	ditto	ditto 55.
388	,,	5,55,400	ditto	ditto	during life.
Total 1,213	for	16,81,250			

5. There was no case of insurance by a single payment during the year under report. Of the 168 policies actually issued, 104 represented a total insurance of Rs. 1,51,200 by payment of premiums during a fixed period, of which 82 were held by natives of India and 22 by Europeans or Eurasians; while 64 policies represented a total insurance of Rs. 94,950 by payment of premiums during life, of which 49 were held by natives of India and 15 by Europeans or Eurasians. The 125 policies taken out by servants of the Post Office may be classified territorially as shown below, and it will be seen that, as in former years, the greatest advantage was taken of the scheme in the lower Provinces of Bengal and in Assam:

50	issued in Lower Bengal and Assam.
27	ditto the Madras Postal Circle.
18	ditto the Bombay Postal Circle.
30	ditto other Circles.
125	

6. The following statement shows the distribution of life insurance policies among the various grades of Post Office officials:

Grade in Post Office.	Number of officials on 31st March 1891.	Number of Life Insurance Policies held		Percentage of lives insured.
		On the 31st March 1890.	On the 31st March 1891.	
Superintendent and Inspectors .	402	76	87	21·64
Postmasters, Sub-Postmasters, and Branch Postmasters.	5,040	266	290	5·75
Schoolmasters and other extraneous Agents.	3,423	5	5	·14
Clerks	6,361	433	483	7·59
Postmen and Village Postmen . .	16,477	80	93	·56
Road Establishment . . .	12,339	20	20	·16
Signallers, Clerks, and other servants in combined offices.	915	44	55	6·01
TOTAL .	44,957	*924	†1,033	2·29

* Exclusive of 139 policies held by employés of the Telegraph Department.

† Exclusive of 180 policies held by employés of the Telegraph Department.

It will be seen that of the 44,957 servants of all grades of this Department, 1,033 persons, or 2·29 per cent. of the whole establishment, had insured their lives on the 31st March 1891; and, as pointed out in the report of last year, the percentage was highest in the grade of supervising officers.

7. There was no progress whatever in the direction of Monthly Allowances. At the close of the year only three contracts were in existence, *viz.*, one for Rs. 5 and two for Rs. 50 each.

8. The usual statement showing the assets and liabilities of both schemes is given below:

	Rs. a. p.	*Rs.* a. p.	*Rs.* a. p.
Life Insurance.			
Balance, including interest on 31st March 1890.	...	1,55,94 20 2	...

Total Balance on 31st March 1891 .	...	...	2,09,809 1 11

Liabilities.	Number.	Amount.	Remarks.
		Rs.	
Life Policies in existence . .	1,213	16,81,250	Payment in a lump sum.
Monthly Allowance in existence—Immediate.	1	5	Commenced from March 1884.
Monthly Allowance in existence—Deferred.	2	100	Of Rs. 50 each: one to commence from January 1894, and the other from September 1893.

9. In a memorandum by the Actuary of the India Office, dated the 27th September 1890, on the report for 1888-89, it was stated that if a record was kept of the ages at which withdrawals and deaths occur, it would be possible to construct a life table by which to test the correctness of the tables in use. This record was kept during the past year, and I now subjoin a statement with the information on this point.

Statement showing the number of Policies surrendered, lapsed, and discharged by payment up to 31st March 1891.

Ages at the time of the surrender, lapse, or discharge of the Policy.	Surrendered at the ages mentioned in the first column.		Lapsed at the ages mentioned in the first column.		Discharged by payment on death at the ages mentioned in the first column.		Total.		Number of Policies obtained at the ages mentioned in the first column.			Total number of employés in superior service on 31st March 1891.*
	From the introduction of the system up to 31st March 1890.	During the year 1890-91.	From the introduction of the system up to 31st March 1890.	During the year 1890-91.	From the introduction of the system up to 31st March 1890.	During the year 1890-91.	From the introduction of the system up to 31st March 1890.	During the year 1890-91. Total	74	4	46	1	38	13	158	18	1,221	168	1,389	10,341

* The ages of 371 employés in superior service are not known, and have therefore been omitted from this column.

10. It should be added that under Article 867 of the Civil Service Regulations, Local funds are competent within certain conditions to purchase from the Life Assurance Branch of the Post Office pensions or annuities for any of their servants for whom such pensions or annuities are not otherwise admissible; and during the year under report the Akyab Municipal Committee, with the sanction of the Chief Commissioner of Burma, purchased by a single payment an annuity of Rs. 4 per mensem for the late Head Dresser in the Akyab General Hospital.

11. The usual statements are annexed.

Statement showing the operation of the scheme of Life Insurance and Monthly Allowance during the years 1889-90 and 1890-91.

GOVERNMENT OF INDIA.

MILITARY DEPARTMENT.

The following is published for general information:

No. 1214-F., dated Simla, the 9th May, 1892.

CONTRACTS.

RESOLUTION—By the Government of India in the Military Department.

Rules regarding the execution of contracts on behalf of the Secretary of State for India in Council for supplies and services required by the Government of India for military purposes.

Read—

From Director-General of Ordnance in India, No. 548-Camp, dated 17th February 1892.

To Government Solicitor, No. 1117-D, dated 11th March 1890.

From Government Solicitor, No. 343, dated 19th March 1890.

From Director-General of Ordnance in India, No. 1600-A, dated 28th May 1890.

To Government Solicitor, No. 16-F, dated 3rd January 1891.

From Government Solicitor, No. 18, dated 9th January 1891.

To Government Solicitor, No. 538-F, dated 7th March 1891.

From Government Solicitor, No. 230, dated 11th March 1891.

To Director-General of Military Works and others, No. 2721-F, dated 4th December 1891.

From Director-General of Ordnance in India, No. 8263-A, dated 10th December 1891.

From Surgeon-General with the Government of India, No. 4718, dated 17th December 1891.

From Director-General of Military Works, No. 5246-B, dated 21st December 1891.

From Director of the Army Remount Department, No. 2159, dated 29th December 1891.

From Commissary-General-in-Chief, No. 3630, dated 15th January 1892.

OBSERVATIONS.—A question having arisen as to whether an Inspector-General of Ordnance could sign a contract deed on behalf of the Secretary of State for India in Council, the Government of India have reviewed the whole question of what officers serving under their orders in the Military Department should be empowered to execute such contract deeds for supplies and services required for military purposes.

RESOLUTION.—In exercise of the powers conferred by 33rd and 34th Vic., cap. 59, section 2, and other powers enabling him in this behalf, the Governor-General in Council is pleased to declare that the undermentioned classes of deeds, contracts, and other instruments referred to in the 22nd and 23rd Vic.,

cap. 41, section 2, shall be executed as follows on behalf of the Secretary of State:

Classes of instruments to be executed.	Classes of officers by whom they may be executed.
I.—Contracts for the Military Works Department as detailed in Table I.	Officers mentioned in Table I.
II.—Contracts and other instruments for the Ordnance Department as detailed in Table II.	An Inspector-General of Ordnance.
III.—Contracts for the Commissariat Department as detailed in Table III.	Officers mentioned in Table III.
IV.—Contracts for the Clothing Department as detailed in Table IV.	Officers mentioned in Table IV.
V.—Contracts for the Medical Department as specified in Table V.	The Surgeon-General with the Government of India.
VI.—Contracts and other instruments for the Army Remount Department as detailed in Table VI.	Officers mentioned in Table VI.

TABLE I.

MILITARY WORKS DEPARTMENT.

Contracts.	Officers who may execute.
Contracts for the execution of any sanctioned work within the jurisdiction or under the charge of the officer executing the same—	
Where the amount or value of the contract does not exceed Rs. 2,000.	Executive Engineers in charge of divisions.
Where the amount or value of the contract exceeds Rs. 2,000, but does not exceed Rs. 5,000.	Executive Engineers in charge of divisions, with the approval of the Director-General of Military Works.
Where the amount or value of the contract exceeds Rs. 2,000, but does not exceed Rs. 10,000.	Chief Engineers in Madras or Bombay and Superintending Engineers elsewhere.
Where the amount or value of the contract exceeds Rs. 10,000, but does not exceed Rs. 20,000.	Chief Engineers in Madras or Bombay and Superintending Engineers elsewhere, with the approval of the Director-General of Military Works.
Where the amount or value of the contract exceeds Rs. 10,000, but does not exceed Rs. 50,000.	Director-General of Military Works.
Where the amount or value of the contract exceeds Rs. 50,000.	A Secretary to the Government of India.

Explanation.—An Executive, Superintending, or Chief Engineer may execute any number of contracts relating to one work which is estimated to cost more than the sum named as the limit of his powers, provided that no individual contractor receives a contract amounting to more than the said sum in connection with one work or estimate to be in force at one time.

TABLE II.

ORDNANCE DEPARTMENT.

By Inspectors-General of Ordnance:

(1) Contracts for stores obtained in India for supplies to arsenals, depôts, or factories.
(2) Contracts for undertaking sales of unserviceable stores.

Contracts and other instruments.	Officers who may execute.
(1) Agreements with shippers for landing horses at Garden Reach, Calcutta.	Remount Agent, Presidency.
(2) Contracts for undertaking the sale of rejected Government horses and cattle.	Director, Army Remount Department.
(3) Contracts for the occupation of land.	Depôt officer, with the approval of the Director, Army Remount Department.
(4) Contracts for grain, fodder, or stores.	Depôt officer, with the approval of the Director, Army Remount Department.

ORDER.—Ordered, that the above Resolution be communicated to the Home, Finance, and Legislative Departments of the Government of India, and to the Departments and officers concerned, for information and guidance; and further that it be published in the *Gazette of India*.

E. H. H. COLLEN,

Secretary to the Government of India.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

CIVIL WORKS.

Irrigation.

REVIEW OF THE REVENUE REPORT OF IRRIGATION WORKS IN THE NORTH-WESTERN PROVINCES FOR THE YEAR 1890-91.

No. 117-I., dated Simla, the 17th May, 1892.

RESOLUTION—By the Government of India, Public Works Department.

Read—

Letter No. 1014½-I., dated the 14th April 1892, from the Government of the North-Western Provinces, forwarding the Revenue Report of Irrigation Works in the North-Western Provinces for 1890-91, and the Resolution of that Government reviewing the Report.

OBSERVATIONS.—The number of irrigation works in operation for which Capital and Revenue Accounts are kept dealt with in the report is nine, one being classed as a Protective Work, four as Major Works the capital outlay on which is not charged against Revenue, and four as Minor Works. The direct and indirect capital outlay for each class of works during and up to the end of the year under review is shown in the following statement:

	Number of works.	During the year 1890-91.							Total direct and indirect to end of 1890-91.
		Works.	Establishment.	Tools and Plant.	Suspense Account.	Total direct charges.	Indirect charges.	Total direct and indirect charges.	
	1	2	3	4	5	6	7	8	9
		Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Major Works.									
Protective Works (Account head 35)	1	9,464	1,949	—35	1,580	12,958	1,014	13,982	41,78,150
Irrigation Works not charged against Revenue (Account head 49)	4	4,27,809	70,896	—36,182	—38,487	4,24,036	27,214	4,51,250	7,44,05,015
Minor Works.									
Works for which Capital and Revenue Accounts are kept (Account head 43).									
Works in operation	4	13,663	3,142	...	—849	15,956	2,070	18,026	24,93,098
Surveys	3	193	43	...	...	236	6	242	2,81,209
Total Minor Works	7	13,856	3,185	...	—849	16,192	2,076	18,268	27,74,307
GRAND TOTAL	12	4,51,129	76,030	—36,207	—37,756	4,53,186	30,304	4,83,500	8,13,57,472

2. The aggregate capital outlay was Rs. 4,06,821 less than during 1889-90 principally owing to the completion of the Nadrai aqueduct on the Lower Ganges Canal.

On the Betwa Canal the capital outlay amounted to Rs. 13,982 chiefly on account of distributaries.

On the Upper Ganges Canal the outlay was Rs. 1,62,547, a large number of drainage works being under construction.

On the Lower Ganges Canal the outlay was Rs. 2,03,786. The length of distributaries was increased by 19 miles, and 71 miles of drainage lines were completed.

On the Agra Canal the capital outlay amounted to Rs. 35,239. The raising of the right flank of the Okhla weir was completed, and several distributaries were provided with masonry outlets.

On the Eastern Jumna Canal the outlay was Rs. 49,678. The tail escape for the canal was completed, some distributaries were remodelled, and drainage works were proceeded with. The Raipur torrent escape, which was said to have been completed in the report of 1889-90, is again entered as having been completed in the year under review.

3. The following statement shows the mileage of main channel and distributary sanctioned and in operation at the close of the year :

		Sanctioned.		Completed.	
		Miles of canals.	Miles of distributaries.	Miles of canals.	Miles of distributaries.
Major Works.					
Protective Works—Betwa Canal		182	379	168	341
Works of which the capital outlay is not charged against Revenue.	Ganges Canal	463	3,000	437	2,523
	Lower Ganges Canal	566	2,457	557	2,097
	Agra Canal	109	600	109	565
	Eastern Jumna Canal	130	641	129	643
Total Major Works, 1890-91		1,450	7,077	1,400	6,169
Figures for 1889-90		1,450	7,077	1,401	6,151

The decrease in the mileage of completed canal is due to the abandonment of the tail portion of the Eastern Jumna Canal.

4. The actual financial results of the year under review are exhibited in the following statement :

Canal.	Total direct and indirect Capital outlay to end of year.	Gross Revenue collected.			Working Expenses.			Net Revenue.	Percentage of net Revenue on capital outlay.
		Irrigation Revenue. (a)	Miscellaneous Receipts.	Total.	Direct.	Indirect.	Total.		
1	2	3	4	5	6	7	8	9	10
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	
Major Works.									
Protective Works—Betwa Canal	41,73,150	71,158	3,320	74,478	1,05,268	9,589	1,14,857	—40,379	...
Irrigation Works not charged against Revenue. Ganges Canal	2,85,56,144	30,28,114	1,24,134	31,52,248	10,43,007	71,383	11,14,390	20,37,858	7·1

(a) Refunds deducted from Revenue.

5. In the Chief Engineer's report the returns on capital outlay have, as suggested in the Review of the Report for 1889-90, been calculated with reference to the actual realisations of the year instead of on the assessments.

6. The gross revenue derived from the Major Works shows an improvement of nearly ten lakhs over the figures for the previous year. All the major canals, except the Betwa, contribute to this increase. There is an increase of more than a lakh in working expenses, but the net revenue is more than in 1889-90 by over eight lakhs. The increase is attributed to the long break in the rains during August and September 1890, creating a strong demand for water for the kharif crops, and to the scanty cold-weather rainfall in the districts irrigated by the Lower Ganges Canal.

The net revenue derived from the Minor Works was about the same as in the previous year.

7. The last statement gives the actual collections of the year. In the following statement details of the assessed revenue are given, and the total for each canal is compared with the area irrigated :

Canals.	Area irrigated.		Assessments, 1890-91.				Assessments, 1889-90.	Rate per acre irrigated.	
	1890-91.	1889-90.	Occupiers' rates.	Owners' rates.	Share of land revenue.	Gross assessed revenue, excluding miscellaneous.		1890-91.	1889-90.
1	2	3	4	5	6	7	8	9	10
	Acres.	*Acres.*	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Betwa	33,953	24,282	1,00,335	..	...	1,00,335	69,420	3·0	2·9
Ganges	821,652	807,574	22,36,023	1,27,318	6,64,458	30,27,799	28,00,954	3·7	3·5
Lower Ganges	642,632	499,894	15,12,755	1,80,487	2,09,586	19,02,828	14,73,214	3·0	2·9
Agra	152,118	178,254	4,24,453	79,368	...	5,03,821	6,36,375	3·3	3·6
Eastern Jumna	237,422	273,817	7,41,786	16,185	2,32,985	9,90,210	9,27,597	4·2	3·8
Dun	16,984	19,220	32,404	3,605	24,980	60,989	62,189	3·6	3·2
Rohilkhand	98,472	98,140	75,760	8,407	50,070	1,34,237	1,27,843	1·4	1·3
Bijnor	8,730	9,262	15,505	2,108	8,172	25,785	24,738	2·9	2·7
Bundelkhand, Irrigation Works. Jhansi Lakes	673	474	1,115	...	1,299	7,019	6,555	3·0	3·3
Bundelkhand, Irrigation Works. Hamirpur Lakes	1,678	1,486	2,842	...	1,763				
Total	2,014,114	1,879,403	51,42,352	4,17,418	11,93,253	67,53,023	61,28,885	3·3	3·3

8. The area irrigated and the assessments both exhibit a marked advance over the figures for the previous year. The cause of the increase has already been stated. The area under kharif crop was 727,489 acres and under rabi crop 1,286,625 acres.

9. In the previous year's report a detailed comparison was made between the figures of the forecast for the Agra Canal and the actual results obtained. A confident hope was expressed that the improvement in financial results begun in 1889-90 would be maintained. The Government of India observes that the figures for 1890-91 do not bear out this anticipation, the irrigated area having fallen from 178,254 acres to 152,118 acres, which is below the average for the preceding decade, and the assessments from Rs. 6,36,375 to Rs. 5,03,821. The decrease is attributed to some extent to the supply during the early kharif being insufficient to meet the demand, but chiefly to the slack demand throughout the rabi season for mixed crops owing to the favourable rainfall.

The question of the low duty obtained from the water-supply of the Agra Canal, which was referred to in paragraph 8 of last year's Review, is attributed by the Chief Engineer to the scattered nature of the irrigation, the small percentage of high class crops, and the objection of the people to taking water otherwise than by flow. The duty obtained in 1890-91 was higher than during the previous year, and the question is said by the Local Government to be receiving careful attention.

10. The areas under the principal crops were as follows :

Crops.	1890-91.	1889-90.
	Acres.	*Acres.*
Sugarcane	198,577	158,484
Rice	167,868	132 554
Indigo	224,663	223,633
Cotton	69,887	62,967
Wheat	736,297	713,199
Barley	107,352	113,505
Gram	57,158	70,960
Poppy	12,744	10,847

The area under sugarcane increased by over 25 per cent., and that under rice by nearly 27 per cent. The area under rice is the largest recorded, the increase being attributed to the long break in the rains.

The estimated value of the irrigated crops was 720 lakhs, equivalent to Rs. 35·75 per acre, or to 88·5 per cent., on the capital outlay on all the canals. Of the total area, 335,228 acres, or 16·6 per cent., were double-cropped.

11. The unrealised balance of demands, which amounted at the beginning of the year to Rs. 85,133, had increased at its close to Rs. 2,21,266. These figures are taken from Statement III C, which exhibits the demands and realizations during the year 1890-91 : the figures given in paragraph 7 are different, being those for the agricultural year ending 30th September 1891. The increase is attributed to the loss the cultivators sustained from floods, and to the poorness of the kharif crops.

12. The following statement gives the details of the working expenses for the year under review, and compares the total with that of the previous year :

Canals.	1890-91. Works.	Establishment.	Tools and Plants.	Indirect charges.	Total.	1889-90. Total.
1	2	3	4	5	6	7
Major Works.	*Rs.*	*Rs.*	*Rs.*	*Rs.*	*Rs.*	*Rs.*
Protective Irrigation Works—						
Betwa Canal	35,583	68,806	879	9,589	1,14,857	1,16,232

Bundelkhand Irrigation Works — Jhansi Lakes	1,528	633	...	84	2,245	1,602
Bundelkhand Irrigation Works — Hamirpur Lakes	1,802	815	...	103	2,720	4,000
GRAND TOTAL	13,10,468	13,85,075	31,475	1,91,113	29,19,331	27,81,882
Per acre irrigated	...	...	...	...	1·45	1·48

NOTE.—Sundries and plantation charges have been included in item "Works."

The principal works outlay on the Ganges Canal was incurred in raising the crest of the Hardwar dam, the contraction of the Pattri torrent, and extending the flanks of Dhumat bars. On the Lower Ganges and Agra Canals the principal works outlay was in connection with the permanent river-training works.

Under Repairs a large outlay on the Ganges Canal was rendered necessary by the extraordinary flood which occurred on 30th July 1890. On the Lower Ganges Canal a large sum was spent on clearance of weeds, the growth of which is attributed to the long closure of the canal above Nadrai while the new aqueduct was under construction.

13. The details of the expenditure under establishment, as shown in the last statement, compare as follows with the figures for the previous year :

Head.	Class of establishment.	1889-90.	1890-91.
		Rs.	*Rs.*
Maintenance of Works	Direction	64,838	67,261
	Executive	3,20,597	3,04,677
	Medical	6,003	5,779
	Plantation	13,563	13,271
	Total	4,05,001	3,90,988
Revenue Management	Direction	1,24,657	1,63,650
	Executive	3,34,552	4,26,255
	Revenue (Irrigation Branch)	2,34,444	2,45,449
	„ Payments by Civil officers, including fees	1,20,097	1,48,132
	Navigation	7,450	11,501
	Total	8,21,200	9,94,987
	GRAND TOTAL	12,26,201	13,85,975

The increase in the year under review is mainly due to the diminished expenditure on capital account. The manner in which the establishment charges are apportioned was explained in paragraph 14 of the Review on the Report for 1889-90.

The total assessed revenue of the year from the four Major Works classed as Productive, including Miscellaneous and the share of enhanced land revenue, amounted to Rs. 66,95,744. The incidence of working expenses on this total was nearly 40 per cent., of which the share on account of establishment was about 18 per cent.

14. The length of canal open for navigation was 535 miles, of which 412 miles were on the Upper and Lower Ganges Canals and 123 miles on the Agra Canal. The ton mileage amounted to 7·66 millions, the estimated value of cargoes to nearly 23 lakhs, and of rafts to a little over 2 lakhs. There was hardly any passenger traffic.

The receipts and charges on account of navigation were as follows :

Canal.	Receipts.		Charges.	
	1889-90.	1890-91.	1889-90.	1890-91.
	Rs.	*Rs.*	*Rs.*	*Rs.*
Upper and Lower Ganges . . .	18,403	15,816	25,877	21,425
Agra	10,168	5,966	12,491	9,394
Total . .	28,571	21,782	38,368	30,819

There was a considerable falling-off in the navigation receipts from the Agra Canal due to the competition of the East Indian Railway.

15. The revenue realized on account of water power amounted to Rs. 70,297.

16. The following hydraulic details are given in the report :

Canal.	Number of irrigating days.	Mean discharge at head, cubic feet per second.	Discharge utilized, cubic feet per second.	Percentages.	
				Discharge utilized.	Discharge escaped.
Ganges	287	(a)3,976	3,718	93·5	6·5
Lower Ganges	306	3,185	2,204	69·2	30·8
Agra	262	945	748	79·2	20·8
Eastern Jumna	322	938	891	95·0	5·0

(a) Exclusive of the volume passed on to the Lower Ganges Canal.

The high percentage utilised on the Upper Ganges Canal is due to the surplus water required for navigation being passed on to the Lower Ganges Canal.

17. The following figures relate to the water-duty obtained and the occupier's rate per cubic foot of discharge :

Canal.	Area irrigated per cubic foot		
	of discharge at head.	of discharge utilized.	Occupiers' rate per cubic foot of discharge utilized.
	Acres.	*Acres.*	*Rs.*
Ganges	207	221	601
Lower Ganges	202	291	686
Agra	161	203	567
Eastern Jumna	253	266	832

There is a considerable improvement in the figures for the Lower Ganges, Agra, and Eastern Jumna Canals over those for the previous year. The falling-off in the case of the Ganges Canal is due to the introduction of a new discharge table for the Solani aqueduct gauge, which gives higher results than the table hitherto used.

18. The following details regarding the distributaries are taken from the Chief Engineer's report :

Canal.	Area irrigated per mile of distributary.	Number of outlets per mile.	Area irrigated per outlet.
	Acres.		*Acres.*
Ganges	313	7·4	42
Lower Ganges	296	5·5	54
Agra	268	7·6	35
Eastern Jumna	362	5·1	71

19. The capital outlay on drainage connected with the Major Works amounted to Rs. 88,339 and the Revenue expenditure to Rs. 50,287, exclusive of charges for Establishment and Tools and Plant. The length of drainage cuts is 1,814 miles, but the drainage system requires further development, and projects for a number of new drains are said to be under preparation.

The normal level of the ground water, as determined by observations on wells, showed a tendency to rise owing to the heavier rainfall, which was in excess of the average at all stations except those on the Eastern Jumna Canal.

21. The following figures relate to the Tarai and Bhabar Canals, which are administered by the Superintendent of the Tarai and the Commissioner of Kumaon respectively :

Canals.	Irrigated area.	Revenue Receipts.				Revenue Expenditure.				
		Water-rate.	Plantation.	Water power.	Total.	Original Works.	Repairs.	Establishment.	Tools and Plant.	Total.
	Acres.	*Rs.*	*Rs.*	*Rs.*	*Rs.*	*Rs.*	*Rs.*	*Rs.*	*Rs.*	*Rs.*
Tarai .	13,286	16,440	...	...	16,440	10,604	8,529	4,167	...	23,300
Bhabar .	50,475	1,68,242	570	32,906	2,01,718	1,962	55,811	15,713	1,443	74,929

An Engineer officer has been deputed to take charge of these canals.

22. The Revenue Report was received by the Government of India on the 14th April, which is six weeks earlier than that for the previous year, but is still five months after the due date. In the letter from the Government of the North-Western Provinces and Oudh forwarding the report, an expectation is expressed that the report for 1891-92 will be submitted at a much earlier date. The Government of India hopes that this expectation may be realized.

23. The report has, as usual, been very well prepared. The maximum flood level might be shown in future on the river diagrams.

24. The Governor General in Council notices with approval that the Irrigation officers in the North-Western Provinces and Oudh have performed their duties to the satisfaction of the Local Government and of the Chief Engineer.

ORDER.—Ordered, that copy of this Review and of the Report be forwarded to the Revenue and Agricultural Department for information.

Ordered also, that copies of this Review be forwarded to the Government of the North-Western Provinces for information and guidance, and that copies of the Review be forwarded to the Local Governments and Administrations in the Public Works Department noted in the margin for information.

The Governments of Madras, Bombay, Bengal, and the Punjab.
The Chief Commissioners of the Central Provinces, Burma, Assam, and Coorg.
The Residents at Hyderabad and in Mysore.
The Agents to the Governor General in Central India, Rajputana, and Baluchistan.

Ordered further, that this Review and the Resolution by the Local Government be published in the Supplement to the *Gazette of India*, and that copies of this Review and of the Report be forwarded to Her Majesty's Secretary of State for India.

F. J. HOME, *Colonel, R.E.,*
Deputy Secretary to the Government of India.

Accompaniment to Public Works Department Resolution No. 117-I. of 1892.

No. 1013½-I., dated 6th April 1892.

RESOLUTION—By His Honour the Lieutenant-Governor of the North-Western Provinces and Chief Commissioner of Oudh.

Read—

Irrigation Revenue Report of the North-Western Provinces for the year ending 31st March 1891 by the Chief Engineer, Irrigation Works, North-Western Provinces and Oudh.

CAPITAL OUTLAY.

RESOLUTION.—The total outlay on the Capital account of canals in the North-Western Provinces and Oudh for and to the end of the financial year 1890-91 is shown below:

	Canal.	Outlay on construction under all heads.	
		During 1890-91.	To end of 1890-91.
		Rs.	*Rs.*
Famine Relief and Insurance: 35—Construction of Protective Irrigation Works.	Betwa Canal	13,982	41,78,150
Capital expenditure on Public Works not charged against Revenue: 49—Irrigation Works.	Upper Ganges	1,62,547	2,85,56,144
	Lower Ganges	2,03,786	3 32,99,809
	Agra	35,239	91,62,337
	Eastern Jumna	49,678	33,86,725
	Total outlay on Public Works not charged against Revenue	4,51,250	7,44,05,015
Irrigation: 43—Minor Works and Navigation.	Dún Canals	...	6,36,834
	Rohilkhand Canals	17,951	16,86,740
	Bijnor Canals	75	87,126
	Bundelkhand Irrigation Works .	...	82,398
	Ditto ditto Survey .	242	1,74,891
	Cawnpore Branch Extension Survey	...	56,746
	Sarda Canal Survey	...	49,572
	Total outlay on Minor Works and Navigation . . .	18,268	27,74,307
	GRAND TOTAL .	4,83,500	8,13,57,472

The Capital expenditure was Rs. 4,06,821 less than in the previous year. There was an increase of outlay on the Upper Ganges Canal of Rs. 82,946 and on the Rohilkhand Canals of Rs. 17,580. On most of the other canals there was a decrease, that on the Lower Ganges Canal being Rs. 4,30,676, due to the completion during the previous year of the new aqueduct over the Kali nadi at Nadrai; while on the Eastern Jumna Canal the expenditure was less by Rs. 61,178.

2. Details of the Capital outlay will be found in Table A of the Chief Engineer's summary and the statement which follows it; whilst particulars regarding the works on which the expenditure was incurred are given in the remaining clauses of para. 1 of the Review. The chief items are:

On the Betwa Canal, 20 miles of distributaries and 5 miles of escapes and drainage cuts.

On the Ganges Canal, squaring ogees of the Somera falls, new tail falls to the Jani escape, mills at Salawa, extensions of minors of the left Akbarpur distributary, preparation of materials for the new regulator at Myapur, clearance of the Karon nadi in the Bulandshahr and Aligarh Districts, and a large number of drainage cuts in the Northern, Bulandshahr, and Aligarh Divisions.

On the Lower Ganges Canal, subsidiary works in connection with the Nadrai aqueduct, additional cattle bridges and regulators on the Etáwah Branch, 19 miles of minor distributaries in the Etáwah and Bhognipur Divisions, completion of 71 miles of drainage cuts in the Narora and Etáwah Divisions, and widening of Isan nadi in the Mainpuri Division.

On the Agra Canal, completing the raising of the right flank of the Okhla weir, Muttra escape, provision of masonry outlets, bed bars and profiles to distributaries, and widening the Chota Kosi drain.

On the Eastern Jumna, the Raipur torrent escape and a tail escape, remodelling Reri-Rámpur, Kishanpur-Bural, Tharauli, and Pilkhani distributaries, and drainage cuts in the Muzaffarnagar and Meerut Districts.

On the Rohilkhand Canals, remodelling the right Oganpur distributary.

Realizations.

3. In accordance with the remarks made in para. 5 of the Review by the Government of India of the Revenue Report for 1889-90, the returns on Capital outlay have been calculated on the actual receipts of the year after deducting the refunds of revenue. This has been done for purposes of comparison for the previous ten years also, and has necessitated the preparation of entirely fresh tables at a considerable expenditure of time and trouble.

The income realized from all sources after deducting refunds of revenue amounted to Rs. 67,72,889—an increase of Rs. 9,69,515, or nearly 17 per cent. on that of the previous year. It is the largest hitherto realized next to that of 1884-85, of which it falls short by Rs. 5,08,137, or nearly 7 per cent. The charges, direct and indirect, aggregate Rs. 29,19,331—an increase of Rs. 1,37,449.

The total net revenue was Rs. 38,53,558, or an increase over 1889-90 of Rs. 8,32,066, and is equivalent to 4·74 per cent. on the entire capital of Rs. 8,13,57,472 invested in all the canal works in the Province—Major (Productive and Protective) and Minor. This is an increased profit of 1 per cent. as compared with the previous year.

The net revenue on the four Productive works alone (Upper and Lower Ganges, Agra, and Eastern Jumna Canals) was Rs. 38,13,642, or 5·13 per cent. on their Capital outlay. This net revenue has been exceeded by nearly 2½ lakhs in 1882-83, by upwards of 2¼ lakhs in 1883-84 and by nearly 9 lakhs in 1884-85. It is, however, Rs. 8,31,165 better than that of last year, and exceeds the average of the previous ten years by nearly 3¾ lakhs.

The interest charges on the total Capital outlay on Productive and Protective works (which alone bear interest) amount to Rs. 29,30,889; and, deducting this from the total net revenue, there is left a clear profit of Rs. 9,22,669, or an advance of Rs. 8,06,402 over that of the previous year. The profit on the Productive and Minor works amounts to Rs. 11,21,392, whilst the loss on the Protective work, the Betwa Canal, was Rs. 1,98,723—a slight increase of Rs. 694 on the previous year's loss.

Assessments.

4. The gross assessments amounted to Rs. 70,56,364—an increase of Rs. 5,68,849, or nearly 9 per cent. on those of last year, the second best up to that date, and less than 2 lakhs short of those of 1883-84, the best on record.

Deducting working expenses and interest charges, the net surplus according to assessments is Rs. 12,06,144, or an improvement of Rs. 4,05,736 on that of 1889-90, and equivalent to 1·48 per cent. on the total Capital outlay.

Excluding interest charges, the total net revenue from assessments is Rs. 41,37,033, and is equivalent to 5·09 per cent. on the entire capital.

The net assessed revenue on the four Productive works alone was Rs. 40,67,688, or 5·47 per cent. on their Capital expenditure.

The Betwa Canal, although still worked at a loss, shows an improvement of Rs. 30,689 as compared with the previous year, the gross assessed revenue having increased by Rs. 29,314, while the charges have decreased by Rs. 1,375. The net loss, Rs. 11,022 (excluding interest), is equal to 0·26 per cent. only on its Capital outlay.

Total Interest Charges.

5. The total interest charges on the capital invested in Productive and Protective works in these Provinces since 1830 amount to Rs. 6,18,64,378.

The total *net* revenue derived from all classes of canals from the same date aggregates Rs. 6,96,83,203. There is therefore a clear profit of Rs. 78,18,825, or 9·61 per cent. on the total Capital outlay.

Working Expenses.

6. The working expenses, both direct and indirect, amounted to Rs. 29,19,331—an increase of Rs. 1,37,449, or nearly 5 per cent. on last year's.

The percentage of working expenses to assessments on the four Productive works is shown in the following statement:

Year.	Upper Ganges Canal.		Lower Ganges Canal.		Agra Canal.		Eastern Jumna Canal.	
	Assessments.	Percentage.	Assessments.	Percentage.	Assessments.	Percentage.	Assessments.	Percentage.
	Rs.		*Rs.*		*Rs.*		*Rs.*	
1886-87 . .	18,84,846	48·63	9,81,794	85·66	4,76,057	62·98	6,86,629	32·17
1887-88 . .	20,17,654	46·86	12,53,357	73·10	4,83,271	53·90	6,44,802	32·20
1888-89 . .	21,32,897	45·98	13,64,348	74·83	4,92,589	51·61	6,96,326	38·74
1889-90 . .	23,82,070	42·79	13,34,487	71·93	6,94,660	37·19	7,67,671	34·21
1890-91 . .	24,87,113	44·81	17,53,142	54·05	5,49,657	44·97	7,98,863	39·93

The high percentage of working expenses to assessments on the Lower Ganges Canal during the five years ending with 1889-90 was explained in last year's Resolution, and it was anticipated that with a return to former figures of revenue a considerable improvement would be shown. The anticipation has been fulfilled in the year under review, when, notwithstanding that heavy expenditure had still to be incurred on training works, the percentage fell from nearly 72 to about 54.

There is an increase in the figures for all other canals; but, since the assessments vary with the seasons, any percentages based on them can only be received with caution, and more as an indication of the comparative ratios than a true index of the ratios.

Under the sub-head of establishment there was a total increase on all canals of Rs. 1,60,063; under revenue management there was an increase of Rs. 1,73,789; whilst there was a decrease of Rs. 13,721 under maintenance of works. A large portion of the net increase is due to the diminished expenditure under capital. More especially the cessation of outlay on the Nadrai aqueduct on the Lower Ganges Canal, owing to its completion in the previous year, has thrown a larger share of the charges for "Direction and Accounts" on the other canals, accounting, especially in the case of the Upper Ganges Canal, for much of the increase in percentages shown in the foregoing statement as compared with the percentages for 1889-90.

The cost of measuring irrigated areas and preparing demand statements came to Rs. 38,434, or Rs. 1·91 per 100 acres, against Rs. 1·99 in 1889-90. The bulk of the work being performed by the permanent establishment, the rate varies pretty nearly as the area irrigated.

The cost incurred in the Civil Department on the collection of the water-rate was Rs. 1,48,132, or 2·80 per cent. on the gross collections as compared with 2·72 per cent. in the previous year. The increased percentage appears to be mainly due to the larger percentage paid as lambardárs' fees.

Balances of Demands.

7. The total balances of the demands for the year ending 30th September 1891 unrealized at its close under occupier's and owner's rate respectively were Rs. 1,16,737 and Rs. 14,430. Of the former Rs. 85 and of the latter Rs. 3 were in the Delhi and Gurgaon Districts.

In addition to the above, there were balances outstanding of previous years under occupier's rate of Rs. 22,207 and under owner's rate of Rs. 2,412.

The outstanding balances have again increased largely, and are nearly double of those of the previous year. This large outstanding is attributed to the loss the cultivators sustained by floods and to the poorness of the kharíf crops. They are almost entirely confined to the districts irrigated by the Lower Ganges Canal. The Board of Revenue have taken measures in the matter, and it is expected that the balances will soon be realized.

Remissions aggregating, exclusive of any that may have been sanctioned from outstanding balances of owner's rate of previous years (the detailed figures of which are not given), Rs. 41,938 were granted. This sum is abnormally high, and the increase is attributed to a compensating reduction of 25 per cent. of the rates on the Bewar Branch sanctioned after the submission of the demand statements, and to special remissions for loss of crops from flood and hail.

Mileage of Channels.

8. The total mileage of all channels that were in use at the close of the year is shown by canals and classes in the following statement, and compared with the totals of the previous year:

Canal.	Main canal and branches.	Navigation channels.	Escapes and mill channels.	Distributaries.	Drainage cuts.	Total 1890-91.	Total 1889-90.	Increase or decrease + or −
	Rs.	*Rs.*	*Rs.*	*Rs.*	*Rs.*	*Rs.*	*Rs.*	*Rs.*
Betwa	168	...	15	341	14	538	513	+ 25
Upper Ganges	437	19	62	2,523	972	4,01	4,006	+ 7
Lower Ganges	557	...	78	2,097	462	3,194	3,089	+105
Agra	109	25	10	565	39	748	750	— 2
Eastern Jumna	129	...	16	643	327	1,115	1,112	+ 3
Dún	...	...	...	74	3	77	77	...

Jhánsi Lakes	...	...	...	42	...	42	45	— 3
Hamírpur Lakes	...	...	...	39	...	39	25	+ 14
Total 1890-91	1,420	44	·183	6,706	1,820	10,175	...	+1·6
Total 1889-90	1,421	44	194	6,646	1,712	...	10,017	...
Increase or decrease	—1	...	—11	+60	+108	+156	...	...

The decrease under main canal is due to the abandonment of the tail portion of the Eastern Jumna Canal. The decrease under escapes and mill channels is explained thus: Last year 22 miles of the Bagar nala, Narora Division, Lower Ganges Canal, which should properly be classed as a drainage cut, were shown under this head, and 7 miles in excess were erroneously reported in previous returns for the Eastern Jumna Canal. Deducting these, the mileage for 1889-90 becomes 165 miles. On the other hand, 4 miles in the Narora Division and 12 miles in the Mainpuri Division have been added by the correction of errors in measurement and inclusion of distributary escapes hitherto omitted, and 1 mile in the Bhognipur Division has been reduced on account of erroneous measurement, leaving a net increase of 15 miles for the Lower Ganges Canal. Lastly, 3 miles of new escape have been completed on the Betwa Canal. These additions, aggregating 18 miles, added to 165, give 183, the mileage at the end of 1890-91 under this head. Under distributaries on the Upper Ganges Canal 7 miles of old distributary were abandoned in the Northern Division, which were compensated by the opening of 7 miles of new minors on the Anúpshahr Branch. On the Lower Ganges Canal 23 miles of new distributaries and minors were completed, while 2 miles of old minor were abandoned and erroneous measurements in excess and defect corrected to the extent of a reduction of 2 miles, thus resulting in a net addition of 19 miles for the whole canal. On the Eastern Jumna Canal 3 miles were added chiefly by remodelling heads. On the Rohilkhand Canals there was a net increase of 7 miles by the remodelling of the right Oganpur distributary after deducting abandoned portions from length of new channels. The correction of errors of measurement on the Hamírpur and Jhánsi Lakes resulted in a net addition of 11 miles to the mileage. Lastly, 20 miles of new distributaries were opened on the Betwa Canal. These additions account for the total increase of 60 miles. Under drainage cuts on the Upper Ganges Canal 7 miles were completed. On the Lower Canal 22 miles of escape have

been transferred as explained above, 76 miles of new cuts were completed, and excess errors of measurement, aggregating 5 miles, have been deducted, resulting in a net addition of 93 miles. On the Agra Canal the remodelling of the Nyabas cut resulted in a net reduction of 2 miles in the mileage. On the Eastern Jumna 7 miles of new cut were opened and correction of measurements added 1 mile to total length, aggregating an addition of 8 miles. Lastly, on the Betwa Canal 2 miles of new cut were opened. The net addition on all canals is therefore 108 miles of drains.

Irrigated Area.

9. The following table gives the area of *kharif* and *rabi* crops irrigated by canals under the direct control of the Irrigation Department for 1890-91 and the previous five years:

	Kharíf.	Rabi.	Total.	Percentage.	
	April to September.	October to March.		Kharíf.	Rabi.
	Acres.	*Acres.*	*Acres.*		
1885-86	702,259	1,007,417	1,709,676	41·08	58·92
1886-87	541,821	821,994	1,363,815	39·73	60·27
1887-88	612,436	904,852	1,517,288	40·36	59·64
1888-89	653,443	951,310	1,604,753	40 72	59·28
1889-90	649,737	1,229,666	1,879,403	34·57	65·43
1890-91	727,489	1,286,625	2,014,114	36·12	63·88

The average area irrigated during the ten years preceding 1890-91 was 1,761,273 acres. The area for that year exceeded this by 252,841 acres, or 14·4 per cent., whilst as compared with 1889-90 the increase is 134,711 acres, or 7·2 per cent.

There has been a steady increase in the area of irrigation since 1886-87, a year of heavy rainfall, and that of the year under review was the largest on record, with the exception of that of 1883-84, a year of very scanty rainfall.

The area irrigated on all canals, including those of the Tarai and Bhabar, was 2,188,249 acres, or an increase of 124,166 acres over that of the previous year. A doubt was expressed in last year's Review and Resolution on the accuracy of the figures for the Tarái and Bhábar Canals owing to the anomaly of the double-cropped area exceeding the area irrigated in the kharíf. The explanation given is that a large proportion of the land under "rape" is re-sown early in March with *ganara*, which, though in reality an early kharíf crop, has hitherto been classed as a rabi crop.

The early part of the kharíf season was normal. The rains broke very generally over the Provinces about the 20th June, and continued till the middle of August. There was then a break for about a month, succeeded by moderate rain between the 17th and 25th September; this latter was sufficient to admit of the sowing of the rabi without the aid of canal water.

The cold weather rains were plentiful in the upper districts of the Provinces and the demand correspondingly slack; but elsewhere the rainfall was light and demand continuous from November to March.

The increase in the kharíf area was due partly to the large increase under sugarcane and partly to the break in August and September; whilst the increase in the rabi, which is chiefly on the Lower Ganges Canal, was due to the short rainfall, the Upper Divisions of the Upper Ganges and the Agra and Eastern Jumna Canals all exhibiting a falling off.

Principal Crops Irrigated.

10. The acreage of the principal crops during the last six years is compared in the following statement:

	Crops.	1885-86.	1886-87.	1887-88.	1888-89.	1889-90.	1890-91.
		Acres.	*Acres.*	*Acres.*	*Acres.*	*Acres.*	*Acres.*
Kharíf.	Sugarcane . . .	175,944	168,452	197,532	224,245	158,484	198,577
	Rice	100,706	109,513	102,367	110,137	132,554	167,868
	Indigo . . .	297,314	164,013	212,756	224,177	223,633	224,663
	Cotton . . .	60,580	41,835	47,912	35,990	62,967	69,887
Rabi .	Wheat . . .	550,891	495,370	508,263	545,153	713,199	736,297
	Barley . . .	118,569	70,881	79,937	92,142	113,505	107,352
	Gram . . .	42,087	27,793	33,091	32,279	70,960	57,158
	Poppy . . .	15,629	14,679	12,957	8,819	10,847	12,744

The area under sugarcane increased by 40,093 acres, or over 25 per cent. With the exception of that of 1888-89, it is by a few acres the largest recorded. It appears to fluctuate to a large extent with the price of "gur" at sowing time.

Rice has again increased, this time by 35,314 acres, or nearly 27 per cent. over last year's area. It is more than half as much again as the average area for the decade preceding, and has exceeded the highest hitherto on record, that of 1880-81, by 29,644 acres, or over 21 per cent. The increase is attributed to the long break in the rains, which also accounted for the increase under cotton.

The area under indigo remained steady, a large falling off on the Agra Canal being made good by the increase on the Lower Ganges Canal. The area continues well below the average for the decade.

The rabi area increased by 57,143 acres. Wheat accounts for a portion of this, but the chief increase was under "Other cereals," due to the destruction by floods in July and August of kharíf crops in the area commanded by the Lower Ganges Canal having rendered an exceptionally large area available for rabi and to the light winter rainfall in the same area necessitating the irrigation of a large portion of the mixed cereals sown therein.

The area under wheat is the next largest to that of 1883-84, of which it has fallen short, however, by upwards of 10 per cent.

The double-cropped area was 335,228 acres, or 16·6 per cent. of the total and 46·1 per cent. of the kharíf area.

"Flow" irrigation was 76·6 per cent. of the total area irrigated,—a very slight falling off from last year's figure, which was 77·0 per cent.

Value of Crops.

11. The total value of crops raised with canal water is estimated at Rs. 7,20,17,689, as shown in the following statement, which is prepared on data supplied by the Agricultural Department. This is equal to 88·5 per cent. on the capital sum invested in all the canals of these Provinces:

Year.	Area irrigated.	Value of crops.	Occupier's rate.	Value of crops per acre.	Occupier's rate per acre.	Percentage on value of crops.
	Acres.	*Rs.*	*Rs.*	*Rs.*	*Rs.*	*Rs.*
1888-89 . . .	1,604,753	5,31,04,539	41,80,276	33·10	2·60	7·87
1889-90 . . .	1,879,403	6,52,72,344	46,58,828	34·73	2·48	7·14
1890-91 . . .	2,014,114	7,20,17,689	51,42,352	35·75	2·55	7·14

The average value per acre by canals varies from Rs. 50·3 on the Bijnor Canals to Rs. 27·3 on the Agra Canal, the average being Rs. 35·75 as shown above.

Villages and Outlets.

12. During the year 9,593 villages were irrigated from 37,212 outlets. The returns do not give any information on these points for the Tarái and Bhábar Canals nor for the Bundelkhand Lakes.

Irrigating Duty.

13. The following table shows the irrigating duty and the value of each cubic foot of water on the four Productive works:

Canal.	Area irrigated per cubic foot of water at head.			Total water rate per cubic foot of water at head.		
	1888-89.	1889-90.	1890-91.	1888 89.	1889-90.	1890-91.
	Acres.	*Acres.*	*Acres.*	*Rs.*	*Rs.*	*Rs.*
Upper Ganges	211	219	207	820	760	762
Lower Ganges	187	168	202	537	474	597
Agra	123	149	161	452	531	533
Eastern Jumna	208	239	253	968	912	1,056

There is an increase in the area irrigated per cubic foot of water entering at head on all canals except the Upper Ganges, where the duty is somewhat lower than that of the last two years, due wholly to the use of a new table of discharges for the Solani aqueduct gauge, which shows higher volumes by nearly 10 per cent. for similar readings. The duty is, as usual, highest on the Eastern Jumna and lowest on the Agra Canal. There was, however, a marked improvement in the latter, all the more satisfactory that it was due to greater economy of water rather than briskness of demand.

In para. 8 of the Review by the Government of India on the Revenue Report for 1889-90, particular attention was invited to the low duty on the Agra Canal. The conditions on this canal are adverse to a high duty, and it will probably be many years before the duty becomes as good on this as on the other canals of these Provinces. The chief causes tending to keep the duty low are the scattered nature of the irrigation, the small percentage of high class crops, and the objection of the people to taking water otherwise than by flow. This necessitates high supplies even with slack demand and consequent wastage. The matter is more fully discussed by the Chief Engineer in para. 94 of his Review, and is receiving careful attention at the hands of the local officers.

The water rate per acre has increased on all canals, and markedly so on the Lower Ganges and Eastern Jumna Canals, and is due chiefly to the increased duty.

Maintenance Charges.

14. The maintenance charges per acre irrigated are given for five years in the table below:

Canal.	Rupees.				
	1886-87.	1887-88.	1888-89.	1889-90.	1890-91.
Upper Ganges	1·60	1·60	1·56	1·26	1·35
Lower Ganges	2·34	2·00	1·96	1·92	1·47
Agra	2·46	2·20	2·04	1·45	1·62
Eastern Jumna	1·09	1 18	1·40	1·07	1·34

Navigation Operations.

15. The results of the year's navigation operations are given in the following table. Those for the years 1888-89 and 1889-90 are also given for comparison:

Canal.	1888-89.			1889-90.			1890-91.		
	Gross revenue (receipts).	Working expenses.	Deficit.	Gross revenue (receipts).	Working expenses.	Deficit.	Gross revenue (receipts).	Working expenses.	Deficit.
	Rs.	*Rs.*	*Rs.*	*Rs.*	*Rs.*	*Rs.*	*Rs.*	*Rs.*	*Rs.*
Upper and Lower Ganges.	16,799	27,207	10,408	18,403	25,877	7,474	15,816	21,425	5,609
Agra	9,714	12,530	2,816	10,168	12,491	2,323	5,966	9,394	3,428
Total	26,513	39,737	13,224	28,571	38,368	9,797	21,782	30,819	9,037

There has been a further reduction in the annual deficit on the Upper and Lower Ganges Canals by Rs. 2,201, wholly due to reduction in expenditure, for the receipts fell off by Rs. 4,452. This falling off is attributed chiefly to the general decrease in traffic throughout the canals.

The Cawnpore extension project, which was returned by the Government of India for further information, has been referred to the Board of Revenue of these Provinces for the approval of the principles on which the irrigation is to be distributed with reference to tracts already irrigated from wells. It is hoped that it will be submitted shortly. On the completion of this work the prospects of navigation are greatly dependent.

On the Agra Canal the deficit was greater than that of last year by Rs. 1,105, due wholly to the large decrease of Rs. 4,202 in the receipts, the expenditure having been reduced by Rs. 3,097. The decrease in receipts is attributed partly to the very low supply in May and June, when traffic is usually most brisk, and partly to the diversion of the stone traffic between Agra and Delhi by reason of the reduction in railway freights for stone on the East Indian Railway, only about one-fifth of the quantity being carried in 1890-91 as compared with 1889-90.

Minor Receipts.

16. The receipts realized from the minor sources of income are detailed in the following statement for the past five years:

	1886-87.	1887-88.	1888-89.	1889-90.	1890-91.
	Rs.	*Rs.*	*Rs.*	*Rs.*	*Rs.*
Plantations	1,75,542	1,79,754	1,93,724	1,89,376	1,50,473
Water power	89,361	69,362	72,697	76,548	70,297
Miscellaneous	48,530	52,336	53,337	53,487	56,980

The decrease in plantation receipts occurred on the Lower Ganges and Agra Canals, and more than one-half of it on the Eastern Jumna. In the case of the first named, it was due to a reduced demand for fuel, on the Agra Canal to reduction of prices obtainable in Delhi and Agra, and on the Eastern Jumna to a contraction of the sales which had been in excess of the productive power of the plantations. The decrease under water power was chiefly on the Dún Canals, and is ascribed mainly to the competition of private mills.

In addition to the receipts from water power shown above, the sum of Rs. 33,276 was realised on the Tárai and Bhábar Canals under the Commissioner of Kumaun during the revenue year ending 30th September 1890.

RAINFALL.

17. The year 1890-91 may again be considered as one of heavy rainfall, for, except on the Dún and Rohilkhand Canals, the rainfall was considerably in excess of that of the previous year, and, taking the area commanded by the canals as a whole, the fall was about equal to the mean of the five years ending 1889-90.

On the Eastern Jumna Canal there was a slight defect from the normal, but on all other canals there was an excess, varying from 8·48 per cent. on the Bijnor Canals to 28·27 per cent. on the Rohilkhand. The Aligarh Division of the Upper Ganges Canal was a special sufferer, with nearly 39 per cent. above the normal.

DRAINAGE WORKS.

18. The mileage of these is now 1,820 miles, no less than 108 miles having been brought to completion during the year. The drains are reported to have worked well on the whole notwithstanding that they were severely strained during the heavy rainfall of July and early part of August.

The heavy rainfall again brought into prominence many drainage requirements. Five projects for the relief of a tract near the Mat Branch have been sanctioned since the rains of 1890, and projects for a number of new drains are under consideration and preparation in various parts of the country, having for their chief object, as usual, merely the relief of the country by preventing the rain water from being wholly absorbed into the soil.

SPRING LEVEL OBSERVATIONS.

19. The observations have been continued on the same lines as in the preceding year. They show generally a rise in spring level owing to the heavier rainfall.

On the Upper Ganges the rise is greatest near the Mat Branch, and the projects lately sanctioned should have a beneficial effect here. Lowering the water surface of the Bhognipur Branch, Lower Ganges Canal, by berm cutting and removing the crest walls of certain falls has had a marked effect in reducing percolation close to the canal.

The wells on the Agra Canal, situated at 1,500 and 3,000 feet from the canal, still continue to show a rise in the spring level; whilst in the Western depression the rise since last year was 1·10, the rise in the previous year having been 3·22.

On the Betwa Canal there was a further rise of 2·52 feet on the Hamirpur Branch wells; whilst on the Kathaund Branch and Main Canal the spring level fell about half a foot.

RIVER SUPPLIES.

20. The supply in the Ganges was equal to the requirements of the Upper Canal during the kharif, but during the early part of the season the supply failed greatly for the Lower Canal, and an increased volume had to be passed down from the Upper Canal.

In para. 70 of Chief Engineer's review some very interesting quotations are given from the Superintending Engineer's report of the difficulties experienced on account of the abnormal growth of weeds in passing down the supply in the Lower Ganges Canal. Ordinary measures were of no avail, and nothing but constant

closures enabled the weeds to be kept down to a certain extent. During the last closure in March measures were adopted to tighten up the channel by means of sand groynes and trees, resulting in a marked improvement of the channel during the succeeding early kharíf.

During the rabi the supply was sufficient and generally in excess of requirements.

The supply in the Jumna during the early part of the kharíf was much below the requirements both of the Eastern Jumna and Agra Canal, and, owing to the construction of the tail falls of the Jani escapes, the supply for the latter canal could not be supplemented from the Upper Ganges. During the rabi the supplies both at Nowshera and Okhla were in excess of the requirements.

The supply in the Betwa fell very low. On the 1st April 1890 the water surface in the reservoir was 6·1 feet below the crest of the Paricha weir, and it fell steadily till 22nd June, when it was 17·5 feet below the crest, with a discharge of only 103 cubic feet per second. It rose after this and topped the weir, and did not fall again to the level of the crest until 21st January 1891. By the 31st March it was 4·5 feet below the crest. The supply for the early kharíf was thus very short.

The supplies in other canals were on the whole ample, though in the early kharíf the average supply in the Dún was somewhat below that of last year.

PROFITS OF PRODUCTIVE WORKS.

21. The following statement shows the net profits and percentages on capital of the four Productive works calculated on realizations:

	Upper Ganges.		Lower Ganges.		Agra.		Eastern Jumna.	
	Net profit.	Percentage on capital.	Net profit.	Percentage on capital.	Net profit.	Percentage on capital.	Net profit.	Percentage on capital.
	Rs.		*Rs.*		*Rs.*		*Rs.*	
1886-87 . . .	17,35,644	6·17	4,23,495	1·41	3,13,552	3·49	6,99,277	22·44
1887-88 . . .	14,68,752	5·20	3,57,769	1·14	2,21,018	2·44	7,16,981	22·86
1888-89 . . .	15,91,785	5·62	4,20,474	1·30	2,10,152	2·31	6,62,475	20·53
1889-90 . . .	15,17,935	5·35	5,79,892	1·75	2,91,009	3·19	5,93,641	17·79
1890-91 . . .	20,37,858	7·14	6,65,425	2·00	3,65,183	3·99	7,45,176	22·00

The profits have hitherto been shown on assessments, and consequently the figures will be found to vary considerably from those shewn in the similar statement in the Resolution on the Report for 1889-90 for the reasons given in para. 5 of the Review by the Government of India, *viz.*, that in the case of assessments the rabi assessments of the year under review are shewn, while in the case of realizations it is the collections on account of the assessments made in the previous rabi crop which are included.

All four canals show a marked improvement on the previous year's results.

FAMINE PROTECTIVE WORKS.

22. There is only one work of this class in these Provinces, and the year under review was the fifth in which irrigation was effected from it in both seasons.

The following statement shows the actual results obtained since the opening of the canal:

Year.	Area irrigated.	Gross Revenue.		Charges.	Net revenue realized.	Percentage on capital.
		Assessed.	Realized.			
	Acres.	*Rs.*	*Rs.*	*Rs.*	*Rs.*	
1885-86	12,356	13,794	...	2,136	—2,136	—0·06
1886-87	8,608	23,157	20,629	76,277	—55,648	—1·39
1887-88	24,135	66,428	30,556	89,696	—59,140	—1·44
1888-89	32,609	79,476	72,961	1,12,458	—39,497	—0·95
1889-90	24,282	74,521	75,760	1,16,232	—40,472	—0·97
1890-91	33,953	1,03,835	74,478	1,14,857	—40,379	—0·97

The causes of the poor returns on this canal were fully discussed in last year's review by the Chief Engineer and Resolution by this Government. The results are stationary, but, judging from the improved assessments for the year under review, there appears to be a prospect of a better return next year.

Minor Works.

23. The Dún Canals show a profit based on realizations of Rs. 32,437 or 5·09 per cent. on the Capital outlay. This is a considerable decrease on the previous year, when the return was 5·71 per cent. There was a small increase in the revenue realized, and the falling off in the returns is wholly due to the abnormal expenditure which had to be incurred in constructing a new syphon at the Naru nadi and in repairing the damages caused by the heavy floods of 1890.

On the Rohilkhand Canals there is a profit of Rs. 34,299, or 2·03 per cent. on the Capital outlay, as against Rs. 28,363, or 1·70 per cent. in the previous year. There was a substantial increase of Rs. 9,970 in the revenue, which was partly absorbed by the increased expenditure on repairing damages caused by excessive floods. The most serious item was the destruction of the Kicha weir; and the question of replacing it is under the consideration of the local revenue officers.

The Bijnor Canals show a profit of Rs. 11,055, or 12·69 per cent. on the Capital expenditure. There is a small increase of about 1 per cent. There was an increase of both revenue and expenditure, but the former increased more than the latter.

On the Bundelkhand Lakes there is a profit of Rs. 2,504, or 3·04 per cent. on the Capital, against Rs. 4,588, or 5·57 in the previous year. The decrease is due to a falling off in revenue, the charges having also decreased. A question was raised as to the abolition of the "qadimi ab-pashi" right on these lakes, since such rights militate greatly against their improvement. It has been decided that these rights cannot be abolished, but measures have been taken by the issue by the Board of Revenue, with the approval of the Government, of certain instructions to the Settlement Officer engaged on the new settlement, the result of which, it is anticipated, will be increased efficiency and a larger revenue.

The Tárai and Bhábar Canals are, as usual, shown in the report, though their figures are not included in the canal statements, since no actual water-rate is levied on them.

The following statistics are based on data supplied by the local authorities:

Tarái Canals.

Area irrigated	Acres	13,286
Revenue	Rs.	16,440
Expenditure	,,	23,300
Loss	,,	6,860

Bhábar Canals.

Area irrigated	Acres	90,849
Revenue	Rs.	2,01,718
Expenditure	,,	74,929
Profit	,,	1,26,789

No separate water-rate is levied on these canals, but an arbitrary portion of the land rent is shown as water-rate. In the case of the Tarái Re. 1 per acre is credited to the canals, and on the Bhábar Canals the rate is apparently either an average of Rs. 3·33 on the land actually irrigated in the course of the year or an average of Rs. 1·85 on the area of crops irrigated. As an Engineer officer has been deputed to the charge of these canals, it is anticipated that the return regarding areas irrigated will be more trustworthy in future.

Total Net Profits, including all classes of works.

24. The net profits and the percentages on the total Capital outlay from all the canals in the North-Western Provinces, with the exception of those in the Tarái and Bhábar, calculated on realizations are shown in the following table, and compared with the figures for the ten previous years:

Year.	Capital outlay at end of each year.	Net profits.	Percentage on capital.
	Rs.	*Rs.*	
1880-81	(a)*6,47,54,273	30,32,593	4·68
1881-82	*6,62,06,214	37,15,831	5·61
1882-83	*6,76,33,960	42,05,593	6·22
1883-84	*6,90,92,987	42,07,164	6·09
1884-85	*7,02,83,698	47,65,914	6·78
1885-86	†7,51,49,595	29,72,275	3·96
1886-87	†7,70,59,223	31,53,012	4·09
1887-88	†7,87,67,319	27,85,495	3·54
1888-89	†7,99,83,651	29,51,762	3·69
1889-90	†8,08,73,972	30,21,492	3·74
Average for ten years ending with 1889-90 . .	...	34,81,113	...
1890-91	†8,13,57,472	38,53,558	4·74

(a) The amount shown in previous reports, *viz.* Rs. 6,45,61,717, was incorrect.
* Excluding Betwa Canal.
† Including Betwa Canal.

As already explained in para. 21 above, in the case of the Productive Works the figures in the above statement, which is based on realizations, will be found to vary considerably as regards profits and percentages from those given in the similar statement in last year's Resolution, which were based on assessments.

25. The thanks of the Government are due to the officers and subordinates of this Department, who in their several grades have maintained the high reputation of the Canal administration in these Provinces.

ORDER.—Ordered, that the above Resolution be submitted to the Government of India, and that it be published in the *North-Western Provinces and Oudh Gazette.*

Ordered also, that it be circulated to other Governments and Departments as usual.

C. W. I. HARRISON, *Colonel, R.E.,*
Secretary to Government, Public Works Department,
North-Western Provinces and Oudh.

SUPPLEMENT TO

The Gazette of India.

No. 23.} SIMLA, SATURDAY, JUNE 4, 1892.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Memorandum on the snowfall in the mountain districts bordering Northern India and the abnormal features of the weather in India during the past five months, with a forecast of the probable character of the south-west monsoon rains of 1891.

The following introductory remarks taken from last year's memorandum are given in order that the objects of the forecast, the principles used in its preparation, and the limitations of its application may be understood.

The present memorandum is drawn up in accordance with the practice of the past nine years, and includes, *first*, a statement of the information received from certain district officers relating to the snowfall of the past winter or cold weather in the Afghan mountains and the Himalayan area; *second*, a statement of the chief peculiarities or abnormal features of the meteorology of India during the past five months; and, *third*, a forecast of the probable character of the approaching south-west monsoon rains based on this information.

The following remarks extracted from the report of the Famine Commission explain succinctly and clearly one of the duties of the Meteorological Department which it is attempted to carry out in this memorandum:

"Within the last few years a very satisfactory system of meteorological observation has been established all over British India, and in our opinion it is of primary importance that it shall be maintained in complete efficiency, and shall so far be strengthened and improved as to ensure the early and punctual supply of information to the Executive Governments and to the officials in all departments concerned with the agriculture of the country or the preparations required to meet famines as to the actual progress of the periodical seasons of rain in all parts of the Provinces for which those Governments or officers are respectively responsible. *So far as it may become possible with the advance of knowledge*

to form a forecast of the future, such aids should be made use of, though with due caution."

The present forecast is based in part on the snowfall information and on the abnormal features of the weather during the past five months, and in part on a comparison with the meteorology of the previous 20 years, so far as it is available. The forecast has hence been drawn up carefully after a consideration of all the available information, but it should, to use the words of the Famine Commission report, "*be used with due caution.*"

It appears to be desirable to repeat the brief preliminary statement given last year in order to explain the theory or the principles upon which the forecast is partly based.

At least five-sixths of the rainfall of India occurs during the south-west monsoon, and is brought up by humid winds in the lower atmosphere from the Arabian Sea and Bay of Bengal. The air currents advancing across these two seas into India during this period form the two branches of the monsoon lower air motion or circulation. The current from the Bay of Bengal prevails exclusively in Burma, Bengal, and Assam, and the greater portion of Behar, Chutia Nagpur, and the North-Western Provinces. The current from the Arabian Sea obtains wholly in the Peninsula (*i.e.*, the Deccan, Bombay, Madras, the Central Provinces, and the greater part of Central India and Rajputana). During nearly the whole of the south-west monsoon there is a well defined belt of country separating the two areas in which one or other of the currents prevails exclusively, which is characterized by very variable winds and by lower pressure than occurs either to the north or south. This belt is hence meteorologically a trough of low pressure, and usually stretches in a curved line from Orissa to Sind or the South-West Punjab.

It is a feature of great importance, as there is a marked tendency for any cyclonic storms that advance from the Bay in the months of June, July, August, and September to run along it and discharge cyclonic rainfall. Its position varies to some extent from year to year, and apparently depends, in part at least, upon the relative strengths of the two currents. Its probable average position during the monsoon is hence one of the factors that have to be taken into consideration in determining the probable distribution of the monsoon rains.

The south-west monsoon winds are undoubtedly the continuation of the south-east trade winds of the Indian Ocean. During the cold and hot weather months the trade winds usually extend only as far north as the neighbourhood of the Equator. Usually in the last week of May or the first week of June a rapid change occurs, due to the advance of southerly winds (with more or less of westing) from the Equator northwards, which produces an almost complete reversal of the weather conditions in India. The primary cause of this extension of the winds and air movement of the Indian Ocean northward across the Bay of Bengal and Arabian Sea and the land masses of the Indian and Burmese peninsulas is undoubtedly the rapid heating of Central and Northern India in April and May. This cause, however, acts indirectly and not directly. The air movement does not commence over and near the hot area and extend outwards; nor does it increase gradually in intensity with the increase of temperature during the hot weather months. It is only after hot weather conditions have prevailed for a considerable period in India that the movement commences. It also begins far to the south in the Arabian Sea and Bay of Bengal as a rush of strong winds which advance more or less rapidly northward and eastward according to circumstances.

Previously to the setting in of the south-west monsoon proper very dry hot weather, with cloudless skies, usually much obscured by dust, prevails. The advent of the monsoon gives damp, cloudy weather with much rain and a moderate and nearly constant temperature. On the West Coast the change is always more or less sudden, and frequently accompanied with very severe thunderstorms, and is usually known as the "burst or setting in of the monsoon." On the Bengal Coast the change is less marked, as the weather is always more or less showery in Bengal and Assam in May.

The motion of the south-west monsoon current is hence a horizontal movement from the Indian Ocean across the Arabian Sea and Bay of Bengal into

India and Burma. This vast mass of humid air is impelled northwards by forces due to differences of pressure over the whole tropical region of Southern Asia and the Indian Ocean. It is evident that if there are differences from year to year in the strength of the south-east trades or in the pressure gradients over the sea area to the south of India and Burma due to causes in operation there, they will affect the general strength of the monsoon.

Whether there are such differences from year to year has not been proved in the absence of accurate observations over the sea area, but there are various reasons for believing that they do occur. If this be the case, they form one of the factors which determine the general strength of the monsoon currents.

Again, the conditions in India and Burma before and at the time of the advance of the monsoon differ very largely from one year to another. In one year, for example, little rain may fall in the cold weather, and the hot weather may be prolonged and intense, or may be tempered by frequent series of thunderstorms and duststorms. In other years excessive rain and snow may have fallen in Upper India and the adjacent mountains, and the cold weather may have been unusually prolonged, and the hot weather conditions necessary to initiate the monsoon may have been feebler than usual, or may have been chiefly exhibited in Burma, North-East India, or Central India. It is evident that these prevailing conditions will modify and determine to some extent at least the extension of the monsoon currents over India at the time of their advance. These conditions must give a certain set to the air currents. Also in virtue of well known laws of air motion or of fluid motion, the currents by their subsequent action and motion will tend during their existence to maintain the peculiarities set up by the conditions in existence at their commencement. The forecast in the final paragraphs is hence partly based on the important principle indicated above, *viz.*, that the meteorological conditions prevailing in India before and at the commencement of the monsoon mainly determine the character and extension of the current, and thus impress upon it features which are more or less permanent throughout its whole period of prevalence, and are largely influential in determining the accompanying rainfall, and may therefore be used as indications of the probable distribution of that rainfall.

It is, however, necessary to point out that such a forecast is a statement of probabilities and not of certainties, and that it is liable to error from the limitation and uncertainty of part of the data on which it is based. The monsoon forecasts as at present issued necessarily leave out of consideration two important points on which the agricultural value of the monsoon rainfall largely depends, *viz.*:

(1) The probability of the occurrence of a prolonged break in the rains in July or August,

(2) The probability of the unusually early termination of the rains in Upper India or Bengal,

and are hence imperfect in every year to that extent.

To sum up: the chief features or conditions which appear to influence and determine the extension and general strength of the south-west monsoon current areas follows:

1st.—The amount and time of occurrence of the cold weather snowfall in the mountain districts adjacent to Northern India.

2nd.—The local peculiarities of the weather in India itself immediately antecedent to the advance of the monsoon currents across the coast of India into the interior, and which it is found are generally impressed upon it during the hot weather, and are frequently more or less persistent in character. These abnormal features are on the whole best estimated by means of the variations of pressure from its normal value in different parts of India.

3rd.—Local peculiarities in the Bay of Bengal and Arabian Sea, over which the monsoon currents pass before they reach India.

The first of these conditions or factors appears to be mainly influential in determining the northern limits of the monsoon rains, heavy and prolonged snowfall in the Western Himalayan area either preventing or delaying the extension of the monsoon current over Upper India during the rainy season. Heavy and untimely snowfall in April and May appears especially to exercise a very powerful influence in this way.

The second factor appears to determine those large local district or provincial variations of rainfall during the monsoon which are evidently due to persistent local conditions or peculiarities, and not to general causes influencing the whole of India more or less. As a recent example may be given the prolonged drought in Ganjam in 1888-89.

The third and last factor is almost certainly of equal importance with the preceding two, but it is that on which information is most difficult to obtain, and is least in amount and longest in being received. In fact, hitherto information respecting the weather conditions in the Arabian Sea or Bay of Bengal has rarely been received in time to be utilized in drawing up the annual forecasts.

Snowfall information.—The whole of the information referring to the snowfall of the past cold weather (up to the end of May) in the mountain districts bordering Northern India which has been received is given in the following paragraphs:

I.—AFGHAN MOUNTAIN DISTRICTS.

(A) Hills west of Dera Ismail Khan.

The Deputy Commissioner, in a letter dated 16th April, gives in the following table a statement of the snowfall on the Takht-i-Suleiman and Zmarai Range during the winter of 1891-92:

Date.	Takht-i-Suleiman.		Zmarai Range.	
	Feet.	Inches.	Feet.	Inches.
12th December 18,1	1	...	...	6
18th February 1892	1	6	1	...
24th „ „	...	9	...	6
29th „ „	1	6	1	3
1st March „	2	...	1	6
2nd „ „	1	6	1	...

The fall was very light as compared with the previous year.

The Assistant Commissioner, Tonk, supplied the following details regarding the snowfall on the Waziri hills:

"The first fall of snow took place on the 30th December 1891, when a little fell on Pirghal, which is over 11,000 feet. On the 9th there was a fair fall of snow in Razmak, but south of this none was observed. On the 1st February 1892 a sprinkling of snow fell on the hills between the Kaisorghal peak of the Takht-i-Suleiman Range and Pirghal. On the 12th of the same month there was a slight snowstorm on the Shinsar peak near Kashmir Kar, when about 6 inches of snow fell. The fall was heavier on Pirghal and the Takht-i Suleiman range. On the 17th February there was a fair fall of snow on the higher Waziri hills generally. On 1st March snow fell on the Kashmir Kar Range (Shinsar, Branj, and Ziarat) and the peak of Kundighar as well as all the high Waziri hills. This was the last and heaviest fall of snow. It will be observed that snow fell during the season on the higher ranges only, and even there in very diminished quantity."

"The rainfall was very scanty during the cold weather months—in fact almost nil—and the season was much milder than usual."

(B) Mountains west of Kohat.

The following information has been received from the Assistant Commissioner, Thal Outpost, respecting the snowfall on the Sufed Koh and neighbouring mountains:

January.—Snow fell on the 9th January on the Sufed Koh and neighbouring mountains. The following gives the approximate depth of the snowfall:

Sufed Koh (Spinghar)	5 to 6 feet.
Daudoghar	3 „ 4 inches.
Zawa mountain	4 „ 5 „
Samana mountain	4 „ 5 „
Mastura (Tirah)	5 „ 6 „

The snow melted rapidly from all the mountains except the Sufed Koh, on which there was a depth of 4 to 5 feet at the end of the month.

February.—Light to moderate snow fell during a storm on the 26th February. The reported depth of the snowfall was as follows:

Spinghar	4 to 5 feet.
Daudoghar	2 inches.
Torghar	2 „

The snow melted rapidly from the lower elevations, but was lying to a depth of 3 to 4 feet on the Sufed Koh at the end of the month.

March.—There was no snowfall on the mountains during the month of March 1892. The previous snow melted from all the mountains except Sufed Koh, on which it was lying at the end of the month to the depth of about one foot.

April.—No snowfall occurred on the Spinghar or other mountains during the month of April 1892.

(C) Mountains west and north of the Peshawar District.

The Political Officer, Khyber, forwarded the following information of the snowfall on the Khyber and neighbouring hills:

January.—No snow fell in the Khyber, Lakka, and Torsappar hills during the month of January 1892. Reports received from the Bara valley and the Maidan of Tirah show that on two occasions a small quantity of snow fell there, which soon melted.

February.—On the 4th February 1892 rain fell in the Khyber, but no snow came with it. About one foot snow fell on the Lakka and Torsappar hills on the 24th February 1892. Between the 1st and 24th February snow fell on two occasions in Bara, Tirah, and the Surghur hills. It soon melted away in the two former places, but it remained for some time on the Surghur hills. The average fall was between one and two feet.

No information has been received for the past three months, but it is almost certain that no snow fell on these hills during that period.

The Assistant Commissioner, Mardan, reports that no snow fell in the north of the Mardan Sub-Division in January. Six feet of snow fell in the Mahabun hills in the Gadun territory in February. No snow fell in March or April.

II.—THE HIMALAYAS.

(1) The Punjab and Kashmir Himalayas.

(*a*) *Ladakh.*—The Superintendent of the Observatory, Leh, states that heavy snow is reported to have fallen on the mountains to the south of Leh at the end of January.

(*b*) *Lahoul.*—The Reverend Mr. Heyde, Superintendent of the Observatory at Kailong, writing on the 21st March, says:

"The winter which is now going has been an extremely mild and snowless one, only 2 feet of snow having been registered up to this date. The heaviest fall we had on the 2nd and 3rd March, when 12 inches fell. The remainder fell during February, whilst none fell during January. The snow which came down on the 2nd and 3rd March was mixed with a great deal of dust, which gave it a strong yellowish tinge, so much so that the natives said 'red snow has fallen.'

"Probably a duststorm somewhere down in the plains had sent this dust up into Lahoul. Since this fall the weather has been quite clear. Even so early we have nights above freezing point, and during the day the temperature is unusually high. The hill sides up to 12,000 feet and more are quite free of snow, and so dry that very moderate winds are able to raise dust. This is very abnormal for this time of the year. On the passes and high hills also little fresh snow

lies. The man who brought my first letters this year over the Rotang Pass a few days ago says that no more than about three feet of snow are on the top of the pass, and on the slopes of both sides only patches here and there."

(*c*) *Murree.*—The following statement of the snowfall at Murree and on the hills adjacent to Kahuta is based on information supplied by the Deputy Commissioner of the Rawal Pindi District:

District.	Approximate depth of snow in			Total fall from January to March.					
	January 1892.	February 1892.	March 1892.	1892.	1891.	1890.	1889.	1888.	1887.
	Ft. in.	Ft. in.	Ft. in.	Ft.	Ft.	Ft.	Ft.	Ft.	Ft.
Murree	*Nil.*	0 5	*Nil.*	5/8	29	3 3/4	7 1/4	6 1/2	4 3/4
Kahuta	*Nil.*	*Nil.*	*Nil.*	*Nil.*	5 1/4	3/4	4 1/4	6	2 1/8

No snow fell in April or May, and the snowfall of the past winter is the smallest on record.

(*d*) *Kulu.*—The Assistant Commissioner, Kulu, has sent the following information of the weather during the past winter in his district:

January.—There were only two light falls of snow during the month, which did not extend below an elevation of 6,000 to 6,500 feet.

February to April.—No remarks.

The following table gives the depth in the snow on the chief passes of the Kangra District of the 25th on each month from January to April 1892, and comparative data for the 25th of April of the past five years:

District.	Name of Pass.	Height.	Approximate depth of snow on				Depth of snow on April 25th.				
			January 25th.	February 25th.	March 25th.	April 25th.	1892.	1891.	1890.	1889.	1888.
		Feet.	Feet.	Feet.	Feet.	Feet.	Feet.	Feet.	Feet.	Feet.	Feet.
Kulu	Rotang	13,000	6	6	5	3	3	10	6	15 1/2	4
	Hamta	14,500	3	6	4	2 1/2	2 1/2	?	8	13	3
	Chandar Khani	?	4	8	4	3 1/2	3 1/2	10	3	7	5

	Gargarasan	17,000	1/8	7	3	...	...	12	8	2	7
	Bashleo	11,000	1/8	4	1	...	...	4	2	2	1
	Plach	?	1/8	5	2	...	...	7	6	?	2
	Tirath	?	1/8	5	3	...	...	10	7	11	7

(*e*) *Kangra.*—The Civil Surgeon, Kangra District, states that no snow fell at Dharmsala during the past winter.

Upper Sutlej Valley.—The snowfall of the past winter is stated by the hillmen to be the smallest that has been received for at least 25 years. This is confirmed by the rainfall data of Kilba, a forest station in the Upper Sutlej Valley at an elevation of 8,500 feet. The total precipitation from 1st of November 1891 to 31st March 1892 was only 4·29 inches, or barely 11 per cent. of the normal fall of the period (36·78 inches).

(2) The Nepal Himalayas.

The Assistant Resident, Katmandu, writes of the snowfall in the adjacent mountains as follows:

"So far as I have been able, I have made enquiries into the snowfall last winter on the Himalayas lying north of this, and my informants assure me that the snowfall, in January chiefly, was this year reported by travellers to have been greater than in the past few years, their impression being founded on the fact that the pass usually used by them was found to be blocked by snow, and that they had to make a detour eastward in order to cross by another way."

(3) Sikkim Himalayas.

The Political Agent, Sikkim, has sent the following statement respecting the snowfall of the past winter:

"It is difficult to give any reliable information, as I can only go by hearsay for this year, not having visited the higher passes as yet.

"A comparison with the last year may be of use.

"I visited the following places during July and August 1891:

Number.	Pass.	Elevation.
		Feet.
1	Yeamtso-la	15,800
2	Tang Chung-la	17,340
3	Thi-la	17,810
4	Nangua-la	17,590
5	Sibu-la	17,580
6	Dankia-la	18,100
7	Pass Nonawe	17,700
8	Peak Nonawe	18,210

"On 1, 2, 3, 4, 5 and 7 there was deep snow, though on 1, 2, 3 and 4 at that time of the year there is usually no snow. There was no snow on 6 and 8, but these are very far north, and are getting beyond the snowfall. There was generally more snow last year than usual.

"This year from what I can gather from travellers there is not much snow on the Jelap Chola Range, and less than the average; and from a messenger just returned from the Lachu Valley I have learnt that the snow in the north of Sikkim is much less than usual."

Surgeon Captain A. Pearse, in charge of the Station Hospital at Gnatong (elevation about 12,000 feet), sends the following interesting and valuable information reporting the snowfall in Sikkim:

"I send herewith a rough statement of the snowfall as recorded at Gnatong during the last two years. The records for 1890, such as they are, are very scanty, and do not go further back than the April of that year. I have not had anything more to go on than these old records, which I have simply copied into the accompanying table.

"A few days ago I was at the Jalap Pass (15,000 feet). The snow there is still very deep, especially on the Sikkim side. There is also some snow on the

mountain ridges around Gnatong, though at Gnatong itself the snow has all disappeared, although it is only 100 to 200 feet lower than some of the ridges.

"As to the information which I have been able to gather from travellers, it is indeed very scanty. So far as I can gather, the snowfall this season has been rather less than the last three years. The passes about this part have not been blocked at all this year, and neither the British nor Chinese dâk have missed a day in getting through to this place, and thence to Thibet. In Thibet also the snowfall is said to have been less than usual:

Months.	1890-91.		1891-92.	
	Total precipitation, or amount of melted snow water in inches.	Number of days on which snow fall.	Total precipitation, or amount of melted snow water in inches.	Number of days on which snow fall.

May	3·08	4	2·63	2
TOTAL ...	30.07	29	31·52	46

The Reverend Father Desgodins, head of the Mission at Pedong, forwarded the following account of the snowfall in Sikkim based on the observations he was able to make at Pedong:

Snowfall in Sikkim during season 1890-91.

Date.	Character of fall.	Elevation to which snow descended.
21st November .	Heavy storm in North Sikkim	9,000
24th January .	Ditto ditto	7,000
19th February .	Light snowstorm in North Sikkim	
21st, 22nd, 23rd „ .	Heavy snowstorm	3,500
25th „ .	Character of storm not ascertained . . .	7,000
2nd March .	Ditto ditto	8,000
7th „ .	Heavy snowstorm in North Sikkim	10,000
13th „ .	Ditto ditto	8,500
17th „ .	Snowstorm	10,000
April .	Rain fell on 13 days at Pedong, and heavy snow during the month in North Sikkim, but the hills were not visible during the greater part of the month. When the weather cleared up at the end of the month, it was seen that heavy and deep snow was lying on the Sikkim mountains, and it lay much longer than in normal years.	

Snowfall in North Sikkim during the cold weather season, 1891-92.

Date of storm.	Character of storm.	Height to which snow line descended during the storm.
		Feet.
12th January .	Light snowstorm on the North Sikkim hills . .	13,000
15th, 16th February .	Very heavy snowstorm. Seven to nine feet of snow is reported to have fallen in the passes, which were blocked for some time afterwards	8,000
25th, 28th March .	Light snowstorm	12,000
2nd, 3rd April .	Light snowstorm	13,000
12th „ .	Light snowstorm	10,000
15th „ .	Heavy snowstorm	
18th „ .	Heavy snowstorm. The higher passes were said to be blocked for some time afterwards . . .	12,000

"The most striking feature of the past winter was the clear dry weather of the period from the 16th February to the 25th March. It is usually a stormy period, giving much snow to the Sikkim hills. The heavy snow of the 15th and 16th February melted away very rapidly during this period. So far as can be judged from my own experience and from what I hear from the hillmen, the snowfall has been under the average to some extent."

(4) ASSAM HIMALAYAS.

The Deputy Commissioner, Kamrup, reports that during his visit to Darrang, Dewangiri, and Subankhata he made the usual enquiries regarding snowfall in the Himalayas, and was informed by the Bhutias and Khampas that the fall of snow was much heavier than in the previous year.

The Deputy Commissioner, Darrang, states (as the result of his enquiries into the snowfall of the winter of 1891-92) that, according to the Charduar Bhutia Sub Rajas, there has been deficient rain and snowfall throughout the year, but that when they left the hills about the middle of February, heavy snow was falling on the hills. The Sub-Divisional Officer states that the snowfall towards the Koriapara side has been very much greater than it was last year.

The Assistant Political Officer, Sadiya, reports that the snowfall on the adjacent Himalayas for the cold season 1891-92 was somewhat less than in previous years. The season too was very late.

Summary of the snowfall information.—The following statement gives the chief features of the snowfall of the past winter in the Himalayan and Afghan mountain districts:

1st.—The past winter was exceptionally mild in the Afghan mountain districts, and the snowfall much below the normal.

2nd.—The snowfall in the Punjab and Kashmir Himalayas was abnormally small in amount, and the smallest since snowfall data began to be collected by the Department (in 1883). In some parts of the mountain area the snowfall of the past winter is the smallest that has fallen during the past 25 or 30 years. The data appear to indicate that

the precipitation was in defect to a much greater extent on the higher elevations than on the first line of hills (as represented by the hill stations). Some light to moderate falls of snow occurred at intervals, but the whole season from November to May was exceptionally dry and the precipitation abnormally small in amount. According to accounts received from Kashgar in Central Asia, the snowfall there was considerably above the average.

3rd.—No accounts have been received of the snowfall in the hill districts of Kamaun and Garhwal in the North-Western Provinces, but it is almost certain from the meteorological data of the Ranikhet and Mussoorie observatories that the snowfall was as largely below the average in these districts as in the Punjab Himalayas.

4th.—Full and interesting information has been received for the first time for the Nepal and Sikkim Himalayas. So far as can be judged, the snowfall in that area was probably in slight to moderate defect.

5th.—The information for the Assam Himalayas is very meagre, but appears to indicate that it was normal in amount or slightly below the average.

It hence appears that the snowfall over the whole mountain area to the north and north-west of India was more or less below the average. The deficiency was small in amount in the Eastern Himalayas, but increased westwards, and was very large in the North-Western Himalayas (*i.e.*, the Punjab, Kashmir, and the North-Western Provinces Himalayas), where it was certainly the smallest that has been received during the past 10 years, and probably less than during the past 25 years. The deficiency was probably nearly as large relatively to the normal in the Afghan mountains as it was in the North-Western Himalayas. It is hence almost certain that the snowfall during the past winter in the Afghan and North-West Himalayan region was even more markedly in defect in the past winter than it was in excess in the preceding winter.

Abnormal features of the weather during the past five months.—It may be remembered that the cold weather of 1890-91 was characterized by excessive snowfall in the North-West Himalayas. The south-west monsoon was hence greatly delayed, and was not fully established on the Bombay coast until nearly the end of June. In the North-West Provinces and East Punjab the rains did not set in properly until the last week of July. Notwithstanding this prolonged delay in the establishment of the monsoon currents in Upper India, the rainfall of the monsoon period was very largely in excess in a central area, including the North-Western Provinces, the eastern districts of Rajputana and Central India, and the Central Provinces, due chiefly to steady heavy rainfall in the months of August and September. The rainfall of the district of Narsinghpur in the Central Provinces during the month of September may be taken as an example. The average total rainfall of the three rain-gauge stations in that district in September was 55·02 inches, or upwards of six times the normal rainfall of the month, *viz.*, 8·82 inches.

The great indraught of the monsoon currents to this central area of excessive rainfall diminished the rainfall in the remainder of India, more especially in West and Central Rajputana and North Bengal and Behar. The rains ceased almost simultaneously over the whole of Northern and Central India at the beginning of the second week of October (from the 5th to 8th), and the area of heavy general rainfall was immediately transferred to South Madras, which continued to receive moderate to heavy rain during the next two months. The intermediate area, including the South Deccan, Mysore, and the North Madras coast districts, which usually obtain general rain in October and November from the retreating south-west monsoon, hence suffered severely from drought during this period. The rainfall in South Madras was interrupted by two cyclonic storms in November. The first, the Port Blair cyclone, gave a timely burst of rain to the rice crops in South and East Bengal, and the second to Burma. During their existence little or no rain fell in South Madras. The south-west monsoon finally withdrew from the Bay

in the fourth week of December. During the whole of this period, from the beginning of October to the end of December, fine clear weather prevailed almost uninterruptedly in North-Western and Central India and the North Deccan, and no rain fell in any part of that area. Temperature was slightly above the normal of the period, and the air was drier than usual. There was a very large relative excess of pressure at the hill stations compared with the neighbouring land stations—a condition almost invariably associated (as in the present case) with very deficient winter or cold weather rains. The following gives a brief summary of the abnormal features of the weather during the next five months, January to May 1892, month by month:

January.—The weather was finer than usual throughout the month. Two shallow depressions in the second week of the month gave light local showers in the Punjab. The only important disturbance of the month appeared in Lower Sind on the 21st, and advanced eastwards across Northern India during the next three days. It gave a moderate burst of rain to Rajputana, Central India, and the North-Western Provinces, and showers in Sind, the Punjab, and Behar. The snowfall in the hill districts during this disturbance was very small in amount, and the precipitation accompanying the storm hence occurred chiefly in the plains of North-Western and Central India.

The mean pressure of the whole of India was almost identical with the mean. The local pressure variations or anomalies were also small, and indicated that the month was a period of transition from the peculiar conditions of the previous south monsoon period to a period of different, but very persistent, conditions lasting up to the present time. The air was much drier than usual, and skies remarkably free from cloud, in North-Western and Central India and the Central Provinces. The mean temperature of the month was above the average over the whole of India, the excess increasing from the west districts to Upper and Central India, and being absolutely greatest at the following stations in Rajputana and the Punjab:

District.	Station.	Variation of the mean temperature of the month from the normal.
Rajputana	Deesa	+ 5·0
	Ajmere	+ 3·4
Punjab	Peshawar	+ 4·0
Murree	Murree	+ 3·6

February.—At the beginning of the month temperature was considerably above the normal, and increasing rapidly. This continued until the 7th, when the mean temperature was 10° to 15° above the normal at many stations in the Punjab and Rajputana. Weather was disturbed with numerous local thunderstorms from the 8th to the 19th. Two depressions appeared in Sind during this period, and advanced eastwards across Northern India, the North-Western Provinces, Bengal, and Assam. The Punjab and hill districts received light showers of no great importance. In the Eastern Himalayas the weather was very stormy, and heavy snow fell, more especially on the 15th and 16th. The weather continued more or less unsettled until the 25th, when fine clear weather set in. A cool wave, due partly to the rainfall in the plains of Northern India and in part to the snowfall in the Himalayan area (chiefly the eastern portion), gradually extended southwards and eastwards. This period of cool weather lasted until the 10th or 11th of March. The greatest deficiency of temperature was shown in the Central Provinces and Berar on the 7th, on which

day the mean temperature of the previous 24 hours was 10·2° below the normal in the former and 8·7° in the latter area. The mean pressure of the whole of India during the month was ·06″ below the normal pressure. Pressure was locally in defect in Northern India and in excess in the peninsula. The following gives the largest anomalies in these two cases :

Area.	Station.	Local pressure anomaly (negative).	Area.	Station.	Local pressure anomaly (positive).
Sind .	Hyderabad . . .	—027	Deccan	Bellary . . .	+·026
	Jacobabad . . .	—024		Sholapur . . .	+·023
				Poona . . .	+·028
				Malegaon . . .	+·029

Temperature was above the normal over the whole of India, the excess being greatest, as in January, in Rajputana and the Punjab and the hill stations in Upper India. The following gives the largest variations :

Area.	Station.	Variation of mean temperature of February 1892 from the normal.
Rajputana.	Ajmere	+4·7
	Deesa	+4·6
Punjab . . .	Mooltan	+4·7
	Quetta	+3·4

March.—As already stated, the air was unusually cool for nearly a fortnight after the stormy weather of February. The greatest reduction of temperature was experienced on the 5th in the Central Provinces and Berar. Temperature increased steadily and rapidly from that date, and unusually dry weather, with strong hot day winds, prevailed during the latter half of the month. The excess of the temperature above the normal increased until the 25th, on which day the mean temperature of the Punjab was 12·1° above the normal.

The mean pressure of the whole of India for the month was ·076″ in defect. Relatively to this general state pressure was locally in defect in Northern India and in excess in the peninsula. The following gives the largest positive and negative pressure anomalies :

Area.	Station.	Local pressure anomaly (negative).	Area.	Station.	Local pressure anomaly (positive).
Punjab .	Dera Ismail Khan .	—·041	Deccan	Bellary . . .	+·035
North-Western Provinces	Roorkee . . .	—·036		Sholapur . . .	+·034
				Poona . . .	+·023
	Bareilly . .	—·039		Akola . . .	+·053

Temperature was even more largely in excess in March than in the two preceding months, and the area of greatest excess of temperature was transferred northwards to the West and South Punjab. The following gives the largest variations :

Area.	Station.	Variation of the mean temperature of April 1892 from the normal.
Punjab . . .	Mooltan	+6·1
	Sirsa	+5·5
	Dera Ismail Khan	+5·2

April—Was a month of frequent local disturbance and thunderstorms in Burma, Assam, East and North Bengal, and in Malabar, Coorg, and Mysore. The rainfall was exceptionally heavy in Assam, more especially in Cachar, which received an average of merely 50 inches during the month, or upwards of double its normal rainfall. The weather was abnormally hot and dry in North-Western and Central India and the Deccan throughout the whole month, the 4th, 7th, and 15th being excessively hot days. Duststorms were of frequent occurence in the dry area, but they gave no rain and exercised no permanent influence in reducing temperature. The chief features of the month were hence excessive temperature and dryness of the air and the prevalence of very strong hot winds in Northern and Central India. The mean pressure of the month of the whole of India was ·044″ below the normal. Pressure was, as in the preceding two months, locally in defect in Northern India and in excess in the peninsula and Burma. The following gives the stations at which the local variations of pressure were greatest :

District.	Station.	Local pressure anomaly (negative.)	District.	Station.	Local pressure anomaly (positive.)
Punjab . .	Dera Ismail Khan	—·078	Deccan . .	Bellary . .	+·031
	Mooltan . .	—·056	...	Sholapur . .	+·032
	Rawal Pindi .	—·044	...	Poona . .	+·033

Temperature was in excess over the whole of India. The excess was greatest in Upper India, and was as large at the hill stations as at the neighbouring plain stations. The following gives the variations at four stations where the excess was absolutely greatest :

Province.	Station.	Variation of mean temperature of the month from the normal.
Punjab . . .	Peshawar	+8·9
	Mooltan	+8·7
	Dera Ismail Khan	+8·6
	Murree	+8·9

May—Weather was unusually disturbed throughout the month. A cyclonic storm of very unusual character which formed in the Arabian Sea crossed the

Kathiawar Coast on the 1st, and advanced with abnormal rapidity north-eastwards across Rajputana to the Simla hills. It gave moderate rain to the area it traversed. Burma, Bengal, Assam, and Southern India received frequent thundershowers during the month. In Burma the showers gradually increased in amount, and the monsoon was apparently quietly established in the fourth week of the month. At the end of the month south-west monsoon winds were almost certainly blowing over the centre and south of the Bay. In the Arabian Sea the first great advance of the south-west monsoon apparently commenced about the commencement of the fourth week of the month. At the end of the month heavy rain had extended northwards as far as Ratnagiri, and there were indications that a cyclonic storm of considerable intensity had formed. Strong local sea winds prevailed during the month on the Bengal and North Bombay coasts, but in the interior excessively dry and hot day winds continued throughout the month. The mean pressure of the whole of India for the month was ·021″ below the normal. Pressure was in local deficiency in Northern India. The deficiency was greatest in the South Punjab and (perhaps) in Upper Assam. Pressure was locally in excess in the Peninsula. The area of greatest excess of pressure still included Bellary (as in the previous three months), but now extended northwards across the West Deccan into Berar, Khandesh, and Guzerat. The following gives the largest variations in these two areas of local excess and defect of pressure :

District.	Station.	Local pressure anomaly (negative).	District.	Station.	Local pressure anomaly (positive).
Punjab . .	Dera Ismail Khan	—·056	South-West Rajputana.	Deesa . .	+·045
	Ludhiana . .	—·048	Guzerat .	Rajkot . .	+·050
	Mooltan . .	—·046	Berar . .	Akola . .	+·049
Assam . .	Sibsagar . .	—·045	...	Khandwa . .	+·047
			Khandesh .	Malegaon . .	+·044
			Deccan . .	Bellary . .	+·045

Temperature was more or less above the normal, except in Burma, East Bengal, Assam, and Southern India, all of which areas received larger amounts of rain than usual. The excess was less than in the previous two months, probably in consequence chiefly of the increased influence of the sea winds. The following gives temperature variation data for the stations at which the excess was greatest:

District.	Station.	Variation of mean temperature of the month from the normal.
Punjab plains . .	Mooltan	+6·0
	Dera Ismail Khan	+5·1
	Peshawar	+5·1
Punjab hills . .	Murree	+4·6
North-Western Provinces hills.	Ranikhet	+4·9
	Chakrata	+4·7

The character of the rainfall in Northern India during the past seven months is shown by the following data for representative stations :

District.	Station.	Actual rainfall from 1st November to 31st May 1892.	Normal rainfall from 1st November to 31st May.	Ratio of actual to average.
Punjab hills . .	Kilba* . . .	4·29	36·78	0·1
	Quetta . . .	2·82	7·60	0·4
	Murree . . .	12·33	17·68	0·7
	Simla	5·06	15·25	0·3
Punjab plains . .	Peshawar . . .	2·37	7·90	0·3
	Sialkot . . .	4·57	7·04	0·6
	Lahore . . .	1·40	4·27	0·3
	Dera Ismail Khan .	0·33	2·81	0·1
North-West Provinces hills.	Mussoorie . . .	4·96	13·70	0·4
	Ranikhet . . .	5·44	11·62	0·5
North-West Provinces plains.	Roorkee . . .	2·81	5·74	0·5
	Lucknow . . .	1·58	2·95	0·5
	Allahabad . . .	1·68	2·32	0·7
	Gorakhpur . . .	1·25	3·32	0·4
Behar . . .	Patna	1·74	4·10	0·4
Chota Nagpur . .	Hazaribagh . . .	3·05	5·68	0·5
West Bengal . .	Burdwan . . .	6·24	10·94	0·6
	Calcutta . . .	6·49	11·69	0·6

* In case of Kilba the rainfall figures are for the period 1st November to 31st March.

The preceding data show that the precipitation in Northern India during the past seven months has been very much smaller than usual The deficiency was least in Bengal, and increased in amount westwards to the Punjab. West Bengal received about 60 per cent. of its normal rainfall during the period, Behar, Chota Nagpur, and the North-Western Provinces about 50 per cent., and the Punjab about 30 per cent. In some parts of the Punjab, more especially the Northern and Western Districts, the rainfall was less than one-fifth of the normal. The data for the hill stations in Northern India show that the deficiency was as great at these stations as in the adjacent plains, whilst the data for Kilba indicate that in some portion of the Western Himalayas the deficiency was as great as in the north-western districts of the Punjab (and probably of the adjacent mountains).

The preceding remarks have established that the following large abnormal features have been very marked and persistent from February to the end of May:

1st.—General defect of pressure over the whole Indian area:

Mean deficiency in	February	·060″
Ditto	March	·076″
Ditto	April	·044″
Ditto	May	·021″

giving a mean deficiency for the whole period of four months of ·05″, or one-twentieth of an inch. This, it may be noted, is the greatest deficiency of pressure that has been noted for so long a period since the commencement of systematic meteorological observations in India. The deficiency of pressure during the past four months is hence very remarkable.

2nd.—Local deficiency of pressure relative to the general conditions during the whole period in Northern India, the deficiency on the whole being greatest and most marked in the South Punjab and to a less extent in Upper India generally, and also in Assam. The local deficiency has not only been a permanent feature of the meteorology of the past four months, but it has increased in intensity with the continuance of the abnormal temperature conditions of the season. The following gives data for the four stations at which the deficiency has been, on the whole, most marked:

Area.	Station.	February.	March.	April.	May.
Punjab	Dera Ismail Khan	—13	—41	—78	—56
	Mooltan	—13	—27	—56	—46
	Ludhiana	—9	—30	—43	—48
Assam	Sibsagar	—25	—34	—15	—45

The local deficiency hence increased steadily in amount from February to April, and was merely as large in May as in April.

3rd.—Local excess of pressure in Burma and the peninsula.—This feature was as persistent as the deficiency in Northern India, and was apparently complementary to it. The excess was throughout the period greatest in the West Deccan. In the months of February, March, and April the area of greatest excess was defined by the stations of Bellary, Sholapur, and Poona. In the month of May it had extended northwards into Kathiawar, Guzerat, and Khandesh. The following gives data for Bellary, Malegaon, Akola, Khandwa, and Deesa, where the excess was greatest in May:

Area.	Station.	Local pressure anomaly (positive) in thousandths of an inch.				Mean of period.
		February.	March.	April.	May.	
Deccan	Bellary	26	35	31	45	34
	Sholapur	23	34	32	34	31
	Poona	28	30	22	30	28
Berar	Akola	18	33	12	49	28
Khandesh	Malegaon	29	27	16	44	29
	Khandwa	21	23	8	47	25
South-West Rajputana.	Deesa	8	23	9	45	21

4th.—The abnormal temperature conditions have been quite as marked as the abnormal pressure conditions. Temperature has been steadily in excess from the beginning of the year to the present time (1st June). The excess increased in amount to a maximum until the month of April, and decreased slightly in the month of May.

The excess has been as large at the hill stations of Upper India (and also at Leh) as at the level of the plains, thus showing that it is almost certainly a general feature of the whole atmosphere to a great elevation.

The excess has been on the whole greatest in the West Punjab. The following gives data for four stations at which the excess was absolutely greatest:

Station.	Variation from the Normal of the mean temperature of					
	January.	February.	March.	April.	May.	Period, January and May.
Mooltan	+3·0	+5·2	+5·5	+8·7	+6·0	+5·7
Dera Ismail Khan	+2·0	+2·3	+5·2	+8·6	+5·1	+4·6
Peshawar	+4·0	+4·2	+4·9	+8·9	+5·1	+5·4
Murree	+3·6	+1·5	+3·9	+8·3	+4·6	+4·4

It may also be noted that as usually happens in periods of increased temperature under hot weather conditions, the increase was nearly as large in the night as in the day temperature. It has hence been a persistent elevation of temperature over the Indian and adjacent level areas up to an elevation of at least 15,000 feet.

5th.—The air has been abnormally dry and the sky more free from cloud than usual over the whole of North-Western and Central India. The whole season has been remarkably free from large disturbances giving rise to general rainfall, and hence the local rainfall of by far the greater part of Northern and Central India has been less than half the normal amount, and in many districts less than a third or fourth of the normal. As a further consequence the snowfall in the Western Himalayas is, taken on a whole, probably the smallest that has been received during the past 25 years.

It is interesting to note that the larger abnormal features of the present year (a year of very deficient snowfall) are in almost every case the opposite of those of the pre-monsoon period of the preceding year—a year of excessive snowfall. The following contrasts the conditions of those two periods:

Chief abnormal features of the pre-monsoon period of 1891, in which the cold weather snowfall was excessive.	Chief abnormal features of the pre-monsoon period of 1892, in which the cold weather snowfall was very deficient.
1st.—General excess of pressure in India from January to May averaging +·017″.	*1st.*—General deficiency of pressure in India from February to May, averaging ·050″
2nd.—Local excess of pressure in Northern India greatest in the Punjab, where it averaged in May +·03″.	*2nd.*—Local deficiency of pressure in Northern India greatest in the Punjab, where it averaged —·04″.
3rd.—Local deficiency of pressure in the Peninsula, Burma, and North-East India, which was greatest in Assam and the west of the Peninsula, where it averaged ·03″ in amount.	*3rd.*—Local excess of pressure in the Peninsula and Burma and greatest in the West Deccan, where it averaged ·03″ in May.
4th.—Decreased temperature from January to May, the deficiency reaching its maximum in March, when it averaged 7·9″ in the Punjab, where it was greatest.	*4th.*—Increased temperature from January to May, which reached its maximum in April, when it averaged 7·6° in the Punjab, where it was greatest.
5th.—Excessive rainfall in Northern India, the total amounts ranging from two to five or six times their normal amounts over Northern India.	*5th.*—Deficient rainfall in Northern India, the total amounts ranging from normal to one-tenth the ordinary rainfall of the period.

The information of snowfall in modifying the weather conditions in India is strikingly shown by the meteorology of the past eighteen months.

Comparison with previous years.

During the past 15 years the snowfall in the Himalayas has been scanty and much below the average in the years 1879, 1880, 1881, 1882, and 1890. The following gives a very brief statement of the chief features of the meteorology of these five years for comparison with that of the present year :

1879.—The snowfall was very light, and considerably below the normal in the North-Western Himalayas. Very heavy snow had fallen during the preceding winters of 1876-77 and 1877-78. Pressure was generally in defect, the deficiency being greatest in April and May, when it averaged ·03″ for the whole of India. The local variations of pressure were not strongly marked or persistent. In the month of May pressure was locally in defect in the west of the Peninsula, more especially in the Gulf of Cambay, and was in excess in Upper India. Temperature was in excess in January, February, April, and May. The excess was greatest in the two latter months, and averaged 4° in the Punjab, where it was greatest.

The rains set in over Bengal fully on the 14th and commenced at Bombay on the 1st, but were not strong before the 24th. The rainfall of the south monsoon period was more or less in excess over the whole of India, except the Punjab, where it was in moderate defect, and in Bengal, where it was slightly below the normal. The rains ceased in Upper India on the 29th September.

1880.—The winter snowfall was in moderate defect in the Western Himalayas, and the cold weather rainfall below the normal to a moderate extent in Northern India. Pressure was in general defect from January to May. The deficiency was largest in January (·033″), and averaged ·023″ for the whole period. Pressure was locally in excess in the Peninsula, the excess being most marked at the West Coast stations from Bombay to Calicut. It was locally deficient in Northern India, the deficiency being most marked in the Punjab, where it averaged ·05″. These large local pressure variations were fairly persistent from March to May. Temperature was largely above the average from March to May. The excess was most marked in the Punjab during the whole period. It averaged 7½° in March, 6° in April, and 4½° in May. The rains commenced on the 2nd of June in Bengal and on the 6th at Bombay, but both currents were at first feeble. Very heavy rain fell in the Punjab in July, and the weather was stormy, with much snow in the hill districts. This was followed by a prolonged break in the rains lasting throughout nearly the whole of August. The rains ceased in Upper India on the 24th September. The rainfall of the south-west monsoon period was largely in defect in the Punjab, North-West Provinces, Rajputana, and Central India, and in moderate defect in the Central Provinces and Berar. It was in excess in North-Eastern India, Burma, and Madras.

1881.—The snowfall of the cold weather of 1880-81 was very light throughout the whole season, and considerably below the normal in the Western Himalayas. Pressure was in general excess from January to May, but the average variation for the whole of India was small. There was a large local excess of pressure on the West Coast, and a moderate deficiency at the Coromandel Coast stations. The local variations over the remainder of India were small and of no importance. Temperature was considerably in excess in January and February, and in slight excess in April and May. The greatest excess was shown in the Punjab in February, when the mean temperature was 5° above the normal. The rains commenced on the 2nd June in Bengal and on the 3rd June at Bombay, and were hence earlier than usual, but were not established in full strength until nearly the end of the month. The rainfall of the south-west monsoon period was in general excess over the whole of Burma and Western India (including Rajputana and Central India), and was below the normal in the Peninsula. The deficiency was not large, except in Malabar and Mysore. The rains ceased in Upper India on the 11th September, and hence earlier than usual.

1882.—The snowfall of the winter 1881-82 in the Western Himalayas was below the normal (probably to a slight extent), and the winter rains in Northern India in moderate defect. The variations of pressure and temperature from the

normal during the pre-monsoon period, January to May, were small and apparently of little importance. They, however, indicated the prevalence of approximately normal conditions. The rains commenced on the 2nd June at Bombay and on the 11th June in Bengal. The Bombay current was strong, and gave very heavy rain in June and July. The Bengal current was feeble in these two months, but was vigorous in August. The rains ceased on the 15th September in Upper India. The rainfall in the districts and provinces dependent on the Bombay current had abundant rain, whilst Burma and North East India (*i.e.*, Assam, Bengal, Behar, and the North-West Provinces) and Behar obtained smaller amounts than usual. The deficiency was small, except in some parts of Burma.

1890.—The cold weather of 1889-90 was unusually dry in Northern India, and the snowfall in the Western Himalayas and Afghan mountains much below the normal amount. The winter was reported to have been very severe in Kashgar in Central Asia. The snowfall in the Eastern Himalayas was also in slight to moderate defect. No rain fell in Rajputana in January and February 1890, and the North-Western Provinces and the Punjab received total average amounts of one-fifth and one-third of the normal amounts respectively. Temperature was considerably above the normal in January and February, the excess being greatest in Upper India, where it averaged 2½°. The hot weather was also drier than usual, and temperature was in moderate excess, averaging in the Punjab, where it was greatest, 1½°. Pressure was generally in defect over India during this period by moderate amounts. Pressure was locally in defect in Northern India, the deficiency being most marked in the north of the Bay. It was locally in excess in the Peninsula and North-West India, the excess being largest in Kathiawar, Guzerat, Berar and the North Bombay Deccan, where it ranged from ·03″ (at Poona) to ·044″ (at Rajkot). The rains commenced on the Bombay Coast on the 1st June and in Bengal feebly on the 7th, and fully on the 19th. The rainfall of the south-west monsoon period (June to October) was more or less in excess in Northern India, Konkan, the Central Provinces, and Hyderabad, the excess being greatest in Behar and the North-Western Provinces. It was in moderate defect in Burma, Southern India, and Ceylon, and largely in defect in Guzerat, Sind, and Cutch, and to a less extent in West Rajputana The rain ceased in Upper India on the 27th of September.

Probable character of the approaching south-west monsoon.

The combination of conditions which have obtained with marked persistency from the middle of January to the end of May are directly related to the abnormally deficient snowfall in the Western Himalayas during the past winter. It is almost certain that the fall is the smallest in record in a great part, if not the whole, of that area. The deficiency in the snowfall of the past winter is more marked than the excess of the preceding winter. What are the causes of these very large variations in the winter snow supply of the Afghan and Western Himalayan mountain area from year to year can at present only be surmised. The only fact of importance that appears to be established is that they are connected with variations in the character and strength of the upper atmospheric currents over India (and perhaps Central Asia). The past winter was abnormally dry throughout, and the snowfall deficient in every month. The deficiency was nearly as large, so far as can be judged, in the Afghan mountains as in the Western Himalayas, but apparently did not extend far north into Central Asia, as reports from Leh and Kashgar indicate that heavy snow fell during a part of the winter at least in these areas.

In India itself pressure was largely in defect, temperature very considerably above the average, and the air abnormally dry. The variations in these respects have been larger and more persistent than have been registered since the commencement of the work of systematic meteorological observation in India, and the present season is hence in these respects unique. The contrast of the pressure conditions of Northern India and the Peninsula (*viz.*, local deficiency in the first area and excess in the second) is what usually occurs in years of deficient snowfall.

In some respects the meteorological conditions of the pre-monsoon periods of the year 1879, 1880, and 1890 resemble those of the same period of the

present year. There are, however, in each of these years large differences in some one or other of the important determining conditions that it is not possible to consider any one of these years as resembling the present year in the sum total of the more important conditions, and as only varying from it in the intensity of these conditions The conditions are such as are almost invariably accompanied by earlier establishment of the monsoon currents on both the Bombay and Bengal Coasts, and more especially on the Bombay Coast. They are also usually associated with considerably increased strength of the Bombay current, more especially in June and July.

The low pressure conditions in West Bengal and Behar, and also in Upper Assam (if real), will probably give a slightly stronger Bengal monsoon than usual. The trough of low pressure occupies a position considerably further to the north than usual, and runs up the centre of the Gangetic plain instead of along its southern edge. In consequence of this peculiarity the Bay of Bengal current will probably be confined to a narrower belt than usual in the Gangetic plain along the foot of the hills, and hence probably the hill districts of Northern India and the submontane districts will obtain heavier rain than usual. If this position of the trough be persistent during the next two or three months, the cyclonic storms of the rains will advance by more north-westerly tracks than usual into Behar, the North-Western Provinces, and perhaps the Punjab, and avoid the Central Provinces and Rajputana. This will to some extent affect the distribution of rainfall.

It is difficult to estimate how far the local excess of pressure in Berar, Khandesh, and the West Deccan will affect the strength of the monsoon and the distribution of the rainfall in the Deccan. If the Bombay current is, as is probable, stronger than usual, the effect will almost certainly be small. The unusually low pressure in the Punjab, combined with the local high pressure in West Rajputana, will tend to give an excess of comparatively dry north-westerly winds in Sind, Cutch, and perhaps Kathiawar and West Rajputana, and hence are unfavourable features in the conditions of these areas.

It is necessary to point out that this forecast should be used with even greater "caution" than in previous years for two reasons. The first is that the strength of the Bombay current depends in part upon the pressure conditions in the Arabian Sea as well as the land conditions, and the former are at present unknown. The second reason is that in a year like the present, when the abnormal features and conditions are so marked as to make it unique in many respects, there is a much greater possibility than usual of the introduction of actions on the large scale, which may modify the conditions in India very largely during the rains, and the subsequent distribution of rainfall. It is, for example, possible that, as is 1880, there may not only be heavy rain in the hill districts, but that heavy and continuous snow may fall on the higher elevations; and if this occurs, there may be a prolonged break in the rains in August, which will largely diminish the seasonal rainfall in Northern India and increase it in Southern India. The chances against the occurrence of this appear to be about 3 to 1.

It is very important that these two elements of doubt should be kept carefully in view in judging the following probabilities which are based on the *present known* conditions.

The preceding remarks give the chief conditions and actions that have been taken into consideration in drawing up the following forecasts.

It may be noted that the chief meteorological features and conditions of the season have been so strongly marked that the minor features, (*e.g.*, local excess of pressure in the West Deccan) will probably be of smaller influence than usual in determining the rainfall distribution. The chief minor features are the following:

1st.—Considerable local deficiency in Upper Assam, as indicated by the Sibsagar observations.

2nd.—Local excess in the South Deccan is represented by the station of Bellary.

These depend upon the observations of single stations, and it is hence doubtful how far they are real; but considering the character and previous good work of the observers, it is very probable that they are real, and represent local peculiarities.

The following is a statement of the chief inferences representing the probable character of the monsoon rains of the present year drawn from the *known* antecedent conditions which have been more or less fully stated in the preceding months:

(1) The snowfall conditions in the Western Himalayas and Afghan highlands during the past five months and the pressure conditions in North-Western India during the past month are very favourable to the establishment of an early and strong monsoon on the Bombay Coast. The monsoon under the conditions that obtain this year is usually established on the Konkan Coast in the last week of May or the beginning of the first week of June. It is under these circumstances (in about two cases out of three) somewhat feeble at first, but usually sets in vigorously in the second or third week of the month.

(2) The snowfall conditions in the Eastern Himalayas and the pressure conditions in Northern India are favourable to a normal monsoon in the Bay of Bengal and its establishment in Bengal somewhat earlier than usual. It is doubtful how far the local deficiency of pressure in Upper Assam will affect the strength and set of the current. It will probably tend to give increased rainfall to Upper Burma.

(3) Taking into consideration pressure and other conditions, it is probable that the rainfall in Burma (and more especially Upper Burma) will be at least normal in amount. (It should be noted that observations have not yet been taken for a sufficient length of time in Upper and Central Burma to enable the influence of abnormal conditions in that area in modifying the set of the Bay of Bengal current to be ascertained.)

(4) The position of the trough of low pressure is very abnormal this year, and lies further north than usual. It will hence probably largely modify the tracks of the cyclonic storms of the rains. They will on the average advance along north-westerly tracks into Behar and the North-Western Provinces, and perhaps the Punjab. This will tend to increase rainfall in the Gangetic plain, and diminish it in the Central Provinces and the western districts of Central India and Rajputana.

(5) Conditions in Bengal are on the whole favourable. It is probable that the rainfall in East Bengal will be below the normal, whilst in West Bengal, and perhaps Chota Nagpur, it will be either normal or in moderate excess.

(6) Conditions are favourable in Behar and the North-Western Provinces, and it is very probable that that area as a whole will obtain at least normal rainfall, and probable that it will be in excess, more especially in the central and western districts of the North-Western Provinces.

(7) The abnormal position of the trough of low pressure and other conditions appears to indicate the probability of heavy to excessive rain in the Lower Himalayas from Sikkim to the Punjab.

(8) Conditions are on the whole favourable in the Punjab, and it is probable that the East Punjab will receive at least rainfall normal in amount. It is also probable (chances about 2 or 3 to 1) that the rains will set in earlier than usual in the Gangetic plain and the Punjab.

(9) The pressure conditions that have obtained for some time past in North-Western India are such as are usually associated with deficient rainfall in Sind, Cutch, and Kathiawar, and also (but less frequently) in Guzerat and Rajputana. The unfavourable conditions are, *1st*, the position of the Upper India low pressure area in the Central Punjab instead of in Upper Sind and the South-West Punjab; and, *2nd*, the local excess of pressure in Berar,

Khandesh, and Kathiawar. The influence of these, more especially the latter, depends largely upon the strength of the Bombay current. If it be strong, as appears to be very probable (chances about 5 to 1), their influence will be small. So far hence as can be judged, it is probable (chances 2 or 3 to 1) that the rainfall will not be in excess in West Rajputana, and possible that it may be more or less below the normal. It will, on the other hand, be probably at least normal in the eastern districts of Rajputana and Central India.

(10) It is very probable from the known conditions that the rainfall of the south-west monsoon period (June to October) will be in excess in the Konkan, and probable that it will be in slight to moderate defect in Malabar.

(11) Taking into consideration the probable strength of the Bombay monsoon and the position of the trough of low pressure, it is probable that the rainfall in Berar and the Central Provinces will be approximately normal in amount. It is more likely to be in excess in Berar and the north-eastern districts of the Central Provinces than in the intermediate districts.

Conditions are slightly less favourable in Hyderabad than in the Central Provinces, but it is on the whole probable that that State will receive normal rainfall, or, if deficient, that the deficiency will not be large or important.

(12) The conditions in the south of the Peninsula are somewhat less unfavourable than in Hyderabad and the Central Provinces. It is probable that the rainfall of the period, June to September, will be in slight to moderate defect, unless there be a prolonged break in the rains in August, in which case Southern India would very probably receive favourable and perhaps abundant rain.

It is difficult to estimate the effect of the local conditions in the South Deccan as represented by Bellary. So far as can be judged, if they are real, they indicate the probability of decreased and deficient rain in the districts to the east, *i.e.*, Cuddapah, Kurnool, and perhaps Nellore.

It should be noted that in the preceding statement, when it is stated that an event is probable, the chances in its favour are at least 5 to 2, and when very probable at least 5 to 1.

JOHN ELIOT,

SIMLA, *4th June, 1892.* *Meteorological Reporter to the Government of India.*

E. C. BUCK,

Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the week ending at 8 a.m. on Saturday, 28th May 1892.

It will be remembered that at the close of the previous week the pressure conditions and the winds in North-East India were such as are ordinarily associated with the rains, and the meteorological changes and conditions of the present week have indicated clearly that the monsoon current has advanced up the east side of the Bay and into Burma, Assam, and parts of Bengal, to which regions it has brought fairly general rain. Simultaneously with this advance of the monsoon current over the east of the Indian region, and probably due to the same causes, the northerly current which prevailed last week over the west of the Peninsula gave way; and though the wind directions on the West Coast cannot be said to have exhibited the usual monsoon characteristics, yet the weather in Malabar, and to a certain extent in the South Konkan, has undoubtedly undergone a change during the week, and rain has been heavier and more extensive. Over the central parts of the country the weather has been characterised by strong westerly winds and squally weather, while moderate local storms have occurred occasionally. In Northern India the weather has been unsettled. At the end of last week there had occurred a sudden and considerable extension of the easterly current up the north side of the Gangetic plain. This continued during the week under review, and the current occasioned rainfall—scattered and generally light—over a considerable portion of Northern India.

On the 22nd the barometer was changing irregularly. Pressure was high in the extreme south and low over Western Bengal and the Western desert. Gradients were rather steep, and the wind currents were blowing freshly generally. The directions were westerly to north-westerly on the West Coast, southerly over the Northern Bay area, easterly up the Gangetic plain, and generally westerly elsewhere. Heavy to moderate rain was reported from parts of Bengal and Assam, but elsewhere the amounts were small. The rainfall area included the extreme south of the Peninsula, Burma, Bengal, and Assam, while local showers were reported from a few places in Central India and the Gangetic plain. On the 23rd the changes of pressure were again irregular, but were on the whole upward. The chart showed no change in the general distribution, and very little alteration in the movements of the winds, the only really important change being the extension of westerly winds over the North-West Provinces, whereby the continuity of the easterly current up the Gangetic plain was interrupted. Rain was reported from the West Coast of the Peninsula, from Burma, Assam, Bengal, the North-West Provinces, and the east of the Punjab. The amounts were again heavier in Bengal than elsewhere. The chart of the 24th showed that pressure continued to change irregularly, and the general distribution of pressure was somewhat complicated. Slight depressions were shown—one over the Gulf of Martaban, a second off the Orissa Coast, a third over part of Bengal and of the North-West Provinces, and a fourth over the Western desert, while the highest readings were reported from the extreme south. The wind directions were very little changed, but, agreeing with the somewhat complicated distribution of pressure, there was a good deal of variability in the wind directions. Rain was falling along the West Coast, and scattered showers were reported from Burma, Assam, Bengal, the Gangetic plain, and the east of the Central Provinces. The amounts were not large, except at Tavoy. On the 25th the chart showed very little change of importance either in the distribution of pressure or in the direction of the prevailing winds. Heavy rain was falling around the Gulf of Martaban and showers in Upper Burma, in Assam, in Bengal, on the West Coast, and at a few places in North-West India. The

chart of the 26th showed a sudden and considerable fall of pressure over the Punjab and the appearance of a rather deep depression over that Province. On the other hand, the depressions previously noticed over the Gulf of Martaban and off the Orissa Coast had disappeared. Gradients had increased, and the winds in North-West India had risen. Heavy rain had again fallen in Tenasserim, but otherwise the extent and area of rainfall was about the same as on the previous day. On the 27th the general distribution was very favourable to the advance of the monsoon current, and the chart showed a fairly normal circulation of the winds. Rain had extended considerably on the West Coast and become heavier, while general showers were reported from Lower Burma and from Bengal. A few local showers were also reported from other parts of the country. On the 28th the general conditions were unaltered Rain was very general over North-East India and fairly general on the West Coast, while widely scattered local showers were reported elsewhere.

Temperature.—Agreeing with the more widely extended rainfall, the mean temperature has fallen, and over a large part of the country has been below the normal average.

The following table shows the variations of the mean temperature from the normal on each day of the week for the principal Provinces of India:

Province.	22nd.	23rd.	24th.	25th.	26th.	27th.	28th.	Mean variation of week.
	°	°	°	°	°	°	°	°
Burma	—0·9	—0·8	—0·4	—0·5	—1·5	—4·2	—2·5	—1·5
Bengal and Assam . .	—2·1	—4·7	—2·7	—1·9	—0·4	+1·1	+1·2	—1·4
North-West Provinces and Oudh.	+2·5	—3·2	—6·2	—4·1	+0·4	+3·6	+3·9	—0·4
Punjab	+10·8	+4·7	—2·3	+3·0	+5·3	+2·8	+4·0	+4·0
Bombay	+0·1	+0·7	—0·7	—1·1	—0·7	—0·6	—1·2	—0·5
Berar and Central Provinces	+2·7	—0·3	—2·0	—1·6	—0·8	+0·1	+1·6	0
Guzerat and Central India .	+0·8	—1·8	—3·7	—3·8	—2·2	—1·0	+1·1	—1·5
Sind and Rajputana . .	+4·2	+3·9	+1·4	—0·4	+0·5	+1·9	+1·3	+1·8
Madras	+2·2	+3·4	+2·7	+2·0	+2·5	+2·5	+2·0	+2·5
Mean for whole India . .	+2·3	+0·2	—1·5	—0·9	+0·3	+0·7	+1·3	+0·3

From the above figures it will be seen that the mean diurnal excess for the whole of India for the week was only 0·3° as compared with 2·7° last week. The warmest day was the 22nd, by which date the change in the weather was only just appearing; and the coolest day was the 24th, the day following that on which the rainfall area was most extensive. The provincial variations show that on the mean of the week there was an excess of temperature over the Punjab, over Sind and Rajputana, and over Madras, and a deficiency in all the other Provinces. In the Punjab and North-West Provinces, and to a certain extent in Bengal, the variations from day to day were large: thus, for example, in the Punjab on the 22nd the excess was 10·8°, while on the 24th the deficiency was 2·3°; so that there was a change of 12° in the mean temperature between the 22nd and 24th. On the 22nd the Jacobabad observer reported a maximum temperature of 121·0°, which is the highest temperature yet recorded this season.

Rain.—The concluding table shows that the rainfall over India has been heavier and more general than for many months past. Only in six divisions, *viz.*, the Punjab (West), Guzerat, Kattiawar, Sind, Rajputana (West), and Hyderabad (South), was there absolutely no rain throughout the week. In all the other divisions rain was received, the average rainfall for the divisions ranging from 12·83 inches in Tenasserim, 4·94 inches in Cachar, and 4·22 inches in Central Burma to 0·09 inch in Berar, to 0·08 inch in Central India (East), to 0·06 inch in the Central Provinces (Central), and to 0·01 inch in the Central Provinces (East). Moreover, of the divisions which received rain, the amount received exceeded the average in twenty-one divisions, and was below the average in twenty-four divisions. Consequently the final result was much more satisfactory than has been the case for weeks, and even months, past. The regions over which the rainfall was excessive included the following divisions: Tenasserim, Central Burma, Assam (Surma and Brahmaputra), East, Deltaic, Central, and North Bengal, Orissa, Chota Nagpur, Behar (North), the North-West Provinces (East, Central, and West), the Punjab (Central, Submontane, and Hills), Malabar, the Konkan, the Deccan, and the Central Provinces (West). In the other divisions the rainfall for the week was less than the normal.

The greatest actual excess was in Tenasserim, where the actual fall was 12·83 inches compared with an average fall for the week of 7·71 inches, giving an excess of 5·12 inches. The greatest actual deficiency was in Arakan, where there was an average actual fall of only 2·29 inches compared with an average normal fall of 8·65 inches, giving a deficiency of 6·36 inches. In other parts of the Indian region the variations from the normal were generally less than 1 inch, but in Coorg the average actual fall was only 0·96 inch, whereas the normal rainfall of the division for the week is as much as 3·76 inches, thus leaving a deficiency of 2·80 inches.

The three concluding columns of the table show the state of the seasonal rainfall, *i.e.*, the total rainfall for the period February 28th to May 28th compared with the normal rainfall for the period. As with the present report the period of the spring rainfall ceases, the figures are of importance. The last column shows that, thanks to the recent rainfall, which, however, in many divisions should properly belong to the approaching or monsoon period, there has been an excess in several divisions. Thus Tenasserim, Central Burma, Assam, East, Central, and North Bengal, Malabar, Madras (South Central), Mysore, the Konkan, the Deccan, Rajputana (West), and Madras (South) all report good rains. The divisions in which the least satisfactory results are shown are Behar (South), the North-West Provinces (East and Submontane), Oudh, the Punjab (West), Berar, the Central Provinces, Guzerat, Kattiawar, Sind, Central India, the East Coast (North and Central), and Hyderabad (South); but in some of these divisions the total fall expected is so small that its total, or almost total, absence is of relatively little importance.

The record of heavy falls during the week is much larger than of late owing to the greater heaviness and extent of rainfall.

The following are the more important falls during the week:

Division.	District.	Station.	Amount.
Tenasserim . . .	Amherst . .	Thaton . .	16·59 inches.
Central Burma . .	Shwegyin . .	Sudder . .	10·63 „
Assam	Khasia Hills .	Cherra . .	10·40 „
Bengal	Mymensingh .	Netrakona .	9·40 „
Behar	Purneah . .	Arraria . .	3·45 „
North-West Provinces .	Bulandshahr .	Khurja . .	2·20 „
Punjab	Rohtak . .	Gohana . .	2·10 „
Malabar	Calicut . .	Tellicherry .	10·84 „
Konkan	North Kanara .	Ankola . .	7·61 „
Deccan	Kolhapur . .	Kagal . .	2·56 „
Khandeish . . .	Ahmednagar .	Shevgaon .	1·05 „
Ganjam	Ganjam . .	Surada . .	2·52 „
Madras (Central) . .	Bellary . .	Kudligi . .	3·00 „

Simla, *2nd June, 1892.*

W. L. DALLAS,
Assistant Meteorological Reporter to the Government of India.

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 28th May.*—Heavy rain on West Coast; fair showers in parts of other districts, but so far neither general nor sufficient. May rainfall much below average, except on West Coast and in Salem and Coimbatore; good fall urgently required in Deccan and Circars. [Since receipt of report there have been copious falls in Kurnool and Vizagapatam.] Ploughing and sowing active on West Coast, Coimbatore, and Salem; proceeding elsewhere, where rain has fallen. Showers have improved water-supply. Pasture and fodder very scarce in Deccan and Nellore. Prices of staple food-grains generally steady, but risen slightly in Deccan, and fallen slightly in Karnatic. FAMINE RELIEF: *Numbers on works*:—Deccan 58,171, Karnatic 12,757, and Central 9,581: *Total* 80,509 against 74,323 last week; increase in Nellore, Bellary, Cuddapah, and Salem. *Numbers on gratuitous relief*:—Deccan 777, Karnatic 58, and Central 248: *Total* 1,083 against 1,043 last week; increase in Kurnool. Loans disbursed for wells:—Deccan Rs. 5,87,000, Karnatic Rs. 3,92,000, and Central Rs. 8,05,000: *Total* Rs. 17,84,000. Wells completed—538, 1,767, and 1,177: under construction or repair—5,022, 1,836, and 6,303 in respective blocks. Agriculturists' loans—Rs. 56,000, Rs. 42,000, and Rs. 65,000 in respective blocks: *Total* Rs. 1,63,000 disbursed.

Bombay.—*For week ending 1st June.*—Rain in twelve districts; slight in two, and good or moderate in others. Preparations for monsoon crops in full progress; sowing commenced in eight districts. Water insufficient in parts of nine and fodder in parts of eleven districts. Cattle distressed in parts of seven districts. Prices generally steady. FAMINE RELIEF: *Numbers on works*: Bijapur 530, Belgaum 1,733, Dharwar 879, and Kolhapur 12,289: *Total* 15,431 against 18,220 last week.

Bengal.—*For week ending 31st May.*—Fairly general rain during the week. Cultivation is now going on generally, but in parts of the Burdwan and Presidency Divisions, South Behar, Chota Nagpur, and Orissa more rain is still much wanted. Early rice and jute sowings nearly finished, and sowing of late rice in progress. In parts of East and North Bengal young rice and jute on low lands have suffered from excessive rain. Sugarcane and indigo crops doing well. Spring rice and millets are still being harvested. Prices are fairly steady, but show a rise in Darbhanga and an inclination to fall in Muzaffarpur. Fodder and water supplies are still scanty in places in the Patna, Orissa, and Chota Nagpur Divisions, but generally much improved by the rain. Flights of locusts reported from Bankura and the Sonthal Parganas. FAMINE RELIEF: *Numbers on works*:—Muzaffarpur 10,459, Darbhanga 33,779, Monghyr 1,082, Bhagalpur 11,554, Purneah 149, and Dinajpur 384: *Total* 57,407 against 62,601 last week. *Numbers on gratuitous relief*:—Darbhanga 2,512, Monghyr 256, Bhagalpur 1,383, Purneah 464: *Total* 4,615 against 2,970 last week.

North-Western Provinces and Oudh.—*For week ending 1st June.*—Light rain has fallen in most districts in the plains. In Almora there has been slight rain, but insufficient for autumn sowings. In Garhwal there has been a little rain in the north and south, but none in the centre of the district. Sugarcane and indigo are being irrigated, and are doing well. Fodder is scarce in Almora and Garhwal. Prices show a tendency to rise, and are high in Almora and Garhwal; also in the Tehri State, where scarcity prevails.

Punjab.—*For week ending 1st June.*—Slight rain has fallen in all but five districts. Prices generally stationary. Harvesting of spring crops over. Ploughings for autumn crops in Hissar and Rawal Pindi cannot be started for want of rain; ploughings and sowings commenced on irrigated lands and on lands where rain has fallen in other districts. Water getting scarce in four districts. Canals, except the Sidhnai, flowing feebly in Mooltan. Bara river in Peshawar almost dry. Wells drying up in Jullundur. Outturn of spring crops is generally reported below average. Prospects of standing crops unfavourable owing to drought. Condition of cattle fair in all but four districts, where they are suffering from want of fodder and water. Fodder is said to be scarce in all districts except four.

Central Provinces.—*For week ending 1st June.*—Rainfall good in Khandwa; slight in four other districts. Threshing and winnowing of spring crops completed. Land being prepared for autumn sowings. Fodder sufficient in two districts; elsewhere scarce. Prices steady.

Burma.—*For week ending 28th May.*—Considerable rain has fallen in all districts. Ploughing was fairly general, and sowings of the season commenced locally. The price of paddy has fallen considerably in Rangoon, Bassein, and Mandalay. At the head-quarters of Meiktila it has risen considerably, but in the district there is little change. The price of rice and *jowar* continue high. FAMINE RELIEF: *Numbers on works*:—Shwebo 1,819, Yeu 922 on two roads—numbers on one road not reported, Lower Chindwin 784, Myingyan 1,139, Meiktila 3,603, Yamethin 7,248, and Magwe (for week ending 21st) 70: *Total* 15,585 against 13,011 last week.

Assam.—*For week ending 31st May.*—Weather seasonable. Planting of early rice and preparing of land for late rice continue. Fodder and water sufficient.

Mysore and Coorg.—*For week ending 1st June.*—MYSORE: Rainfall very slight throughout the State. More rain is wanted in parts. Sowing operations commenced. No material change in prices. FAMINE RELIEF: *Numbers on works*:—Bangalore 346, Kolar 1,546, Mysore 68, Chitaldroog 199, and Shimoga 315: *Total* 2,474 against 4,075 last week.

COORG: Rainfall good. Ploughing of rice fields in progress. Sowing of *ragi* (*Eleusine coracana*) completed. Prospects generally good. Prices stationary. Forage and water-supply for cattle sufficient.

Berar and Hyderabad.—*For week ending 1st June.*—BERAR: Rainfall moderate. Weather hot. Land under preparation for ensuing monsoon crops. Water scarce in three districts and in parts of another. Fodder insufficient in one district and three taluks. Prices rising in three districts.

HYDERABAD: Scarcity of fodder and water increasing daily, and cattle are getting weak and emaciated. Prices still continue high.

Central India.—*For week ending 1st June.*—Slight rain during the week in four Agencies and Neemuch. Weather hot and cloudy. Cattle in poor condition in the districts round Neemuch. Prices of food-grains generally steady. In the Bhopawar Agency and in Gwalior, Bundelkhand, Baghelkand, and Goona condition of pasturage generally good, but still scarce in Bhopal.

Rajputana.—*For week ending 1st June.*—Rainfall moderate in Jeypore, Bhurtpore, Kherwara, and eleven tahsils of Ulwar; scattered showers in Ajmere. Agricultural operations satisfactory in Jhallawar and Sirohi. Preparations for autumn sowings in Ulwar and some villages of Bikanir. Ploughing for the autumn crop only partly commenced in Ajmere; patches of maize and lucerne being irrigated, and isolated patches being ploughed for the autumn crop in Merwara. Standing crops fair in Meywar. Gram good in Sirohi. Agricultural stock good in seven Agencies; poor elsewhere. Cattle suffering from want of fodder in Marwar. Pasturage and fodder sufficient in five Agencies; scarce elsewhere. Prices rising in Meywar, Ajmere, and two other Agencies; steady elsewhere. In Kotah 7,138 emigrants returning and cattle 12,753. FAMINE RELIEF: *Numbers on works*:—Ajmere-Merwara 29,801, Marwar 1,967, Kishengarh 951, and Bikanir 5,249: *Total* 37,968 against 38,960 last week. *On gratuitous relief*:—Ajmere-Merwara 8,940, Marwar 1,666, Kishengarh 170, and Bikanir 2,217: *Total* 12,993 against 15,256 last week.

Nepal.—*For week ending 26th May.*—Weather dry. Prospects good. Prices have advanced.

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

RAILWAY STATISTICS.

No. VII OF 1892-93.

APPROXIMATE STATEMENT OF GROSS RECEIPTS OF INDIAN RAILWAYS.

N.B.—As regards the figures in column *Total Receipts from 1st April to date*, audited figures have been used as far as possible.

Latest Return received.	Railways.	Average length worked during the week.	Week ending 23rd May 1891. Total mean mileage worked.	Receipts. Total.	Receipts. Per mile open.	Week ending 21st May 1892. Total mean mileage worked.	Receipts. Total.	Receipts. Per mile open.	Total Receipts from 1st April to 23rd May 1891.	Total Receipts from 1st April to 21st May 1892.	Total increase in 1892-93.	Total decrease in 1892-93.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the week ending at 8 a.m. on Saturday, 4th June 1892.

At the close of the previous week incipient monsoon conditions prevailed throughout the Indian region, which at the commencement of the week under review intensified, and resulted in the appearance of what was apparently a severe cyclone off the West Coast and in a very general fall of rain over the Peninsula and the north-east of India. The north-western parts of the country were less affected, but even here the wind blew from the normal monsoon directions, and thunderstorms, which are the usual forerunners of the regular rains, occurred over the North-West Himalayas.

On the 29th the barometer was changing rather irregularly. Readings were lowest over the east of the Punjab, and from this region an arm of low pressure extended south-eastward as far as Orissa. Pressure was highest in the extreme south. The wind was easterly and north-easterly on the Malabar Coast, but blew from the normal monsoon directions elsewhere. The easterly current up the north side of the Gangetic plain was particularly strong for the time of year. Ten inches of rain had fallen at Karwar, and light or moderate amounts all along the West Coast from Goa to Cochin, over the central parts of the Peninsula, and over Burma, Assam, and Bengal Proper. The chart of the 30th showed very little change in the general distribution of pressure, readings remaining highest in the south and low over the Punjab and down the Gangetic plain. The isobars opened out off the West Coast in a manner which raised the suspicion that a storm was developing there. The winds were generally unaltered. Heavyish rain had fallen along the West Coast from Ratnagiri to Cochin, light showers in the south of the Peninsula and at some central stations, and light or moderate general showers over North-East India. On the 31st the barometer was falling, except in parts of North-East India. On the West Coast the change was rapid, and a cyclonic storm existed off the West Coast to the west of Ratnagiri. Gradients were steep on the Malabar and South Konkan Coasts, and very strong, but irregular, winds prevailed on that coast. Moderate to heavy rain was reported from the west of the Peninsula, and general moderate rain from Burma, Assam, and Bengal. Light local showers were also reported from a few other parts of the country. The chart of June 1st showed comparatively little change. The cyclone off the West Coast had moved somewhat northward, and the barometer had risen at some stations on the mid-West Coast, while it had fallen fast in Sind and Kathiawar. Gradients remained steep off the West Coast, and cyclonic gales had prevailed there. Elsewhere the winds were fairly normal, though the force was steadily light over the Bay. Heavy rain had fallen at Ratnagiri and moderate rain along the coast to the southward, but elsewhere the fall was light, and, except in lower Burma and North Bengal, where it was general, was widely scattered. The chart of the 2nd showed that the cyclone off the West Coast was travelling north-westward or west-north-westward, and that the centre lay at about 300 miles to the south-west of the Kathiawar Coast. The barometer had recovered quickly throughout India. The wind was southerly

on the Konkan Coast and south-easterly in Kathiawar. The easterly current of wind up the Gangetic plain was exceptionally well marked, while elsewhere the directions were about normal. Rain in small or moderate amounts had fallen over the west of the Peninsula, at several central and north-eastern stations, and at Ranikhet and Mussoorie. By the morning of the 3rd the cyclone had disappeared from the Indian region and the barometer continued to rise everywhere. The winds were abnormally southerly on the West Coast, and were very variable over the central parts of the country, but elsewhere the directions remained fairly normal. Rain still in moderate or small amounts had fallen generally over the Peninsula and the central parts of the country, but in North-East India the fall had decreased considerably, and was very widely distributed. On the 4th, except that pressure was much more uniform than usual on the West Coast, and the winds there very variable and light, the general conditions were of a decidedly monsoon character. Rain had fallen generally throughout the Peninsula, the central parts of the country and North-East India, and a thunderstorm had occurred at Ranikhet.

Temperature.—Notwithstanding the large extent of country which has received fairly general rain during the past week, the general temperature of India has been above the normal.

The following table shows the variations of the mean temperature from the normal on each day of the week for the various Provinces of India:

Province.	May.			June.				Mean variation of week.
	29th.	30th.	31st.	1st.	2nd.	3rd.	4th.	
	°	°	°	°	°	°	°	°
Burma	—1·1	—2·1	—1·3	—1·8	+0·4	+1·7	+1·1	—0·4
Bengal and Assam . .	+1·0	+1·5	+0·2	—2·1	—0·5	+1·2	+1·7	+0·4
North-West Provinces and Oudh.	+4·1	+3·4	+3·0	+3·9	+1·5	+2·7	+4·1	+3·2
Punjab	+4·1	+1·1	+2·9	+6·5	+6·0	+5·6	+7·8	+4·9
Bombay	—0·9	—1·6	—1·4	—3·5	—2·8	—1·5	—1·7	—1·9
Berar and Central Provinces	+2·5	+2·6	+2·3	+2·3	+1·8	+0·3	—0·1	+1·7
Guzerat and Central India .	+1·3	+1·8	+1·7	+2·8	+3·6	+1·2	+1·9	+2·0
Sind and Rajputana . .	+1·1	+1·1	+2·0	+4·4	+5·9	+6·2	+4·6	+3·6
Madras	+2·8	+1·1	+0·3	—1·1	—0·4	—0·4	—3·0	—0·1
Mean for whole India . .	+1·7	+1·0	+1·1	+1·3	+1·7	+1·9	+1·8	+1·5

The above figures show that the mean diurnal excess for the whole of India for the week was 1·5°. In Burma, Bombay, and Madras, where the rain was most continuous, the mean temperature was below the normal, but in other parts of the country, and more particularly the North-West Provinces, the Punjab, Sind, and Rajputana, where no rain fell, the temperature was excessive, so that the net result as given above for the whole of India was + 1·5°. The general variations from day to day were very regular, ranging from +1° on May 30th to +1·9° on June 3rd. Over the Punjab and Sind the temperature was very high throughout

the week, the 8 A.M. temperatures frequently exceeding 100°, and the maxima ranging between 117° and 120°.

Rain.—The table at the close of the summary shows that there has again been a week of very general rain throughout India. In only ten of the rainfall divisions was there absolutely no rain during the week, but in four others the average actual rainfall for the division was less than one-tenth of an inch, so that fourteen divisions did not receive effective rain. In all the other divisions the rainfall was fairly heavy. The divisions which received actually or practically no rain were the North-West Provinces and Oudh divisions, the Punjab divisions except the Hill districts, Sind, and the Rajputana divisions. As shown in the earlier portions of the summary, the greater part of North-West India was outside the influence of the monsoon currents as they existed during the week under review, so that as thunderstorms were not very prevalent, this region had practically no rain. It was also noticed above that the wind over the Bay was below its normal strength, while, on the contrary, the West Coast was visited by a cyclonic storm, which gave general and heavy rain to the most western divisions, and occasioned unsettled weather over the whole of the Peninsula. In consequence of these conditions the parts of the Indian region which depend for their rainfall on the Bay branch of the monsoon had less than their normal amount of rain, while those which depend on the Arabian Sea branch had more than usual. The heaviest actual rainfall was in Malabar, which division had an average fall for the week of 7·07 inches; this was followed by 5·77 inches in Coorg, by 4·97 inches in Tenasserim, and by 4·88 inches in the Konkan. The third column of the table shows that all over the Peninsula, except in Coorg, and over most of the central parts of India the average fall for the week was in excess of the normal fall, while, on the contrary, all over Burma, Assam, Bengal, Upper India, Rajputana, Central India, and Sind the average actual fall for the week was less than usual. The excess was considerable on the West Coast divisions, but small over the centre and east of the Peninsula and the central parts of the country. The greatest actual excess was 3·39 inches in the Konkan. The greatest actual deficiency was 6·56 inches in Arakan, but all over North-East India the deficiency was considerable.

The three final columns of the table only give the same information in a different form as that contained in the first three columns. With the present week the rainfall of the monsoon period commences.

The following are the principal large totals recorded during the week:

Division.	District.	Station.	Amount.
Tenasserim . . .	Amherst . .	Thatôn . .	9·91 inches.
Central Burma . .	Shwegyin . .	Kyaikto . .	6·27 „
Assam	Khasia Hills .	Cherra . .	7·03 „
	Goalpara . .	Sudder .	7·18 „

W. L. DALLAS,

Assistant Meteorological Reporter to the Government of India.

SIMLA, *9th June, 1892.*

E. C. BUCK,

Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 4th June.*—Rainfall heavy on the West Coast, good in the Central district and adjoining uplands in Cuddapah and parts of the Southern districts, and fair showers in parts of Deccan, Karnatic, and Circars. Fair subsequent rain in parts of Kurnool, North Arcot, and Salem. Rain is much wanted in Ganjam, Nellore, Bellary, and Anantapur. Cultivation and sowing are proceeding where rain has fallen. Recent rains have improved water-supply, and will encourage the growth of pasture, but fodder is extremely scarce. Prices have not much changed, but have fallen slightly in the West Coast districts, and risen slightly in the Deccan and Ganjam. FAMINE RELIEF: *Numbers on works*:—Deccan 57,128, Karnatic 17,315, and Central 9,955: *Total* 84,398 against 81,035 last week; increase in Bellary and Nellore and decrease in Kurnool and Cuddapah. *Numbers on gratuitous relief*:—Deccan 741, Karnatic 58, and Central 231: *Total* 1,030 against 1,128 last week. Loans disbursed for wells:—Deccan Rs. 6,16,000, Karnatic Rs. 3,96,000, and Central Rs. 9,23,000: *Total* Rs. 19,35,000. Wells completed—553, 1,834, and 1,180: wells constructed or repaired—5,283, 1,873, and 6,532 in respective blocks. Agriculturists' loans—Deccan Rs. 58,000, Karnatic Rs. 51,000, and Central Rs. 65,000: *Total* Rs. 1,74,000 disbursed.

Bombay.—*For week ending 8th June.*—Rain throughout the Presidency except Upper Sind. Good or moderate in Konkan, Deccan, and Karnatak; generally slight in Guzerat, Kathiawar, and Sind.* Preparations for monsoon cultivation are progressing generally. Sowing continues in eleven districts. Water-supply has improved in parts of Karnatak, but still insufficient in parts of seven districts. Fodder is scarce in parts of ten districts. Cattle are poor in parts of five districts. Prices are generally steady. FAMINE RELIEF: *Numbers on works*: Bijapur 364, Belgaum 3,177, Dharwar 867, and Kolhapur 10,344: *Total* 14,752 against 15,431 last week.

* A heavy fall has occurred in Surat since date of report.

Bengal.—*For week ending 7th June.*—Rain has fallen all over the Province during the week. More rain is still wanted in parts of the Burdwan and Presidency Divisions and in South Behar and Orissa generally. Cultivation is now in general progress. Early rice and jute sowings are nearly finished. Sowing of late rice and autumn crops are in progress. Spring rice harvest is almost over. Millets are still being gathered. Sugarcane is doing well. Indigo prospects are favourable. Fodder and water supplies generally sufficient, but still reported to be scanty in places in Behar, Orissa, and Chota Nagpur. Reports from districts under special notice show a marked improvement in the condition of crops. Good rain in Dinajpur and Purneah, where prospects are favourable. In Bhagalpur the rainfall has been satisfactory in the north, but deficient in the south. More rain is

wanted in Monghyr. In Darbhanga, Muzaffarpur, and Champaran heavy rain fell on the 6th, and cultivation will now be pushed on. In Gya the rainfall is still scanty. No marked change in prices. FAMINE RELIEF: *Numbers on works*:—Champaran 605, Muzaffarpur 14,432, Darbhanga 45,184, Monghyr 1,364, Bhagalpur 10,405, Dinajpur 313, and Purneah *nil*: *Total* 72,303 against 57,407 last week. *Numbers on gratuitous relief*:— Darbhanga 766, Monghyr 274, Bhagalpur 1,497, and Purneah 433: *Total* 2,970 against 4,615 since last week.

North-Western Provinces and Oudh.—*For week ending 8th June.*—There has been rain in most districts, the fall being heaviest in the Central and Hill districts. In the latter the autumn crops are germinating, and prospects have much improved. In the plains preparations for the autumn crop have begun in several districts. Sugarcane and indigo are doing well. Supplies are adequate, but fodder continues scarce in Almora. Locusts have appeared in one pargana of the Cawnpore district, but no damage is reported. Prices have slightly risen in some districts, and are still high in Almora.

Punjab.—*For week ending 8th June.*—Slight rain has fallen in two districts. Prices are rising in four districts; stationary elsewhere. Harvesting of spring crops is over. Sowings of autumn crops have commenced in most districts. Ploughings await rain in some districts. Water is getting scarce in Umballa, Kangra, and parts of Rawal Pindi and Dera Ismail Khan. Canals are flowing feebly in Hissar and also in Mooltan, except the Sikandrabad and Sidhnai canals. The Bara river in Peshawar is almost dry. Wells are drying up in Jullundur. Rain is wanted throughout the Province. Prospects of standing crops are reported average, except in two districts, where they are bad. The extra spring crop is said to be below average in Dera Ismail Khan. Condition of cattle is reported good in all districts except three, where they are suffering from scarcity of fodder. Fodder is sufficient in three districts only; scarce elsewhere.

Central Provinces.—*For week ending 8th June.*—Heavy rain in Raipur; moderate in four districts, and slight in four others. Preparation of land for autumn sowings is in full progress. Sowing of rice has commenced in Bilaspur. Prices are falling in Raipur; elsewhere steady.

Burma.—*For week ending 4th June.*—In Lower Burma good rain has fallen throughout. In Upper Burma the rainfall is abundant in most districts, the rainfall in the scarcity districts to date being very largely in excess of that for the same period of last year. Agricultural prospects are promising, and ploughing for and sowing of paddy and other crops are in active progress both in Lower and Upper Burma. The price of paddy has fallen in several districts, including the affected district of Meiktila, but has risen considerably in Bassein, Shwebo, and Tharawaddy, and slightly in Henzada. There is a slight rise in the price of rice and wheat in Mandalay; elsewhere prices of rice, wheat, and *jowar* are more or less stationary, with an inclination to fall. FAMINE RELIEF: *Numbers on works*:—Shwebo 2,354, Yeu 764, Lower Chindwin 1,039, Myingyan 957, Meiktila 3,469, Yamethin 7,279, and Magwe (for week ending 28th May) 55: *Total* 15,917 against 15,585 last week.

Assam.—*For week ending 7th June.*—Weather seasonable. Sowing of early rice is over. Transplanting of winter rice has begun. Condition of cattle is normal. Fodder is plentiful, except in Sylhet.

Mysore and Coorg.—*For week ending 8th June.*—MYSORE: Rainfall general and good in two districts. Ploughing operations in progress in parts. Prospects are improving. Prices have slightly risen in three districts. FAMINE RELIEF: *Numbers on works*:—Bangalore 260, Kolar 1,687, Tumkur 1,087, Mysore 64, Shimoga 227, and Chitaldroog 259: *Total* 3,584 against 2,474 last week.

COORG: Rainfall good. Ploughing of rice fields and forming of nurseries are in progress. *Ragi* (*Eleusine coracana*) crop is thriving. Coffee and cardamoms are in good condition. Prices stationary. Water and forage supply for cattle are sufficient.

Berar and Hyderabad.—*For week ending 8th June.*—BERAR: Average rainfall moderate. Weather hot. Land is under preparation for autumn crops. Water is scarce in three districts and fodder insufficient in another. Prices are rising in one district.

HYDERABAD: Slight fall of rain during the week and every likelihood of a good monsoon, which will dispel fears of scarcity of fodder and water. Prices continue high.

Central India.—*For week ending 8th June.*—Rain throughout Central India during the week, but not sufficient for agricultural purposes in three Agencies, and in the Neemuch District. Condition of agricultural stock is generally good. Pasturage is still scarce in Bhopal; generally good in other Agencies. Water is scarce in the Neemuch Cantonment. Prices of food-grains are rising in Bundelkhand; no change in other Agencies.

Rajputana.—*For week ending 8th June.*—Rainfall slight in Ajmere-Merwara and five Agencies and three tehsils of Bikanir]; light showers in Merwara. No change since last week in Ajmere. Standing crops are fair in Meywar. Outturn of harvest is fair in Kerowli. Agricultural stock is good in eight Agencies; poor elsewhere. Cattle still suffering from want of fodder in Ajmere and Marwar, which is scarce in Ajmere and most other Agencies. Prices are rising in Ajmere and Marwar, but fairly steady elsewhere. In Kotah 1,906 emigrants reported as returning and cattle 7,474; in Ajmere emigration has practically ceased, and immigration is in progress. FAMINE RELIEF: *Numbers on works*:—Ajmere-Merwara 30,898, Marwar report not received, Kishengarh 1,823, and Bikanir 5,159: *Total*, exclusive of Marwar, 37,880 against 37,968 last week. *On gratuitous relief*:—Ajmere-Merwara 10,218, Marwar report not received, Kishengarh 170, and Bikanir 2,201: *Total*, exclusive of Marwar, 12,589 against 12,993 last week.

Nepal.—*For week ending 2nd June.*—Weather cloudy. Wheat harvested. Prices have slightly fallen.

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

(*a*) Includes the Nalháti State Railway, now amalgamated with the East Indian Railway.
(*b*) Includes the Tirhoot State Railway. Although for convenience classed amongst the State Railways, the Company's section of this line is the property of the Bengal and North-Western Railway Company.
(*c*) Includes the Bhopal-Itársi State Railway.
(*d*) Includes the Amritsar-Pathánkot and Jammu and Kashmir Railways.
(*e*) Although for convenience classed amongst the State Railways, this line is the property of the Bengal Central Railway Company.
(*f*) Includes the Toungoo-Mandalay and Mu Valley Railways.
(*g*) Includes the Wardha Coal, Dhond-Manmád, Khámgaon, and Amráoti State Railways.
(*h*) Includes the Bezváda Extension.
(*i*) Total receipts from 21st April to 30th May 1891.

SIMLA, *the 9th June, 1892.*

F. B. HEBBERT,
Offg. Under-Secretary.

Printed and published for the GOVERNMENT OF INDIA *at the* GOVERNMENT CENTRAL PRINTING OFFICE, *Simla.*

SUPPLEMENT TO

The Gazette of India.

No. 25.} CALCUTTA, SATURDAY, JUNE 18, 1892.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

FINANCE AND COMMERCE DEPARTMENT
(*Statistical Branch*)
Calcutta, 15th June 1892.

J. F. FINLAY,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the week ending at 8 a.m. on Saturday, 11th June 1892.

The daily weather reports for the period under review show another week of very unsettled weather. The cyclone in the Arabian Sea which was noticed last week left the weather in a very disturbed condition on the West Coast, and moderate to heavy rain, with variable winds, prevailed all over the west of the Peninsula. A well marked depression was also during the week developed over the Central Punjab, and the easterly winds up the north side of the Gangetic plain which this disturbance induced brought up a good deal of rain to that region. Finally, a very severe cyclone appeared over the north-west of the Bay towards the close of the week, and gave heavy rain in its neighbourhood. This general rain reduced temperature all over the country, and the weather was cooler than for several weeks past.

The chart of the 5th showed a deepish depression over the Punjab, whence an arm of relatively low readings extended south-eastward down the Gangetic plain as far as West Bengal. The wind was variable on the West Coast and over the Bay, easterly up the Gangetic plain, cyclonic over the Punjab, and generally westerly elsewhere. There was hardly any rain over North-West India and the Gangetic plain, and only light showers in Bengal, but elsewhere rain was general, and in parts of Burma and of the West Coast heavy. On the 6th the depression over the Punjab was filling up, while a large shallow area of low pressure had appeared over the north of Madras, the west of Bengal, and the east of the Central Provinces. With these exceptions, the general distribution was unaltered. Rain had extended up the Gangetic plain, and was also general on the west coast of the Peninsula and in Burma; but there was very little in Bengal or over North-West India. On the 7th conditions were very similar to those reported on the 6th. The low pressure area in the north-west and that over West Bengal, the east of the Central Provinces, and North Madras still existed, while readings were highest in the extreme south. Rain had fallen fairly generally, except in the Carnatic, Sind, the greater part of the Punjab, and of the south of the Gangetic plain. The fall was very general, and moderately heavy over the north side of the Gangetic plain and on the hills. On the 8th a well marked cyclonic storm had appeared over the head of the Bay, but elsewhere there had been but little alteration in the distribution of pressure. Rain had fallen off considerably over the Gangetic plain, but fairly general falls were reported, except in the south-east of the Peninsula and the extreme north-west of India. At Ratnagiri the amount was very large. Cyclonic winds of increasing strength prevailed over the northern portion of the Bay area. The chart of the 9th showed that considerable development had occurred within the storm area over the north of the Bay, and gradients were very steep over North-East India. In North-West India, on the contrary, pressure was very uniform, and over the Peninsula the differences were moderate. Rain in moderate to large amounts had fallen over the west of the Peninsula, and False Point, in the immediate neighbourhood of the depression, had received four inches; but elsewhere, owing to the fact that the monsoon currents of the Bay were feeding into the cyclonic storm, the rainfall over the land was relatively light, while over the Gangetic plain there was practically none. Cyclonic gales prevailed over the head of the Bay. Early on the morning of the 10th the cyclone from the Bay crossed the coast near Balasore, and at 8 A. M. the barometer at Balasore marked 28·73 inches. This depression of the barometer was phenomenal, but the influence of the storm was not very widely felt, and, except in its immediate neighbourhood, the winds were not very strong. Heavy rain had fallen at Akyab, and moderately heavy rain to the south of the cyclone; but in

Bengal Proper the fall was light, and in the Gangetic plain and North-West India there was no rain. In the Peninsula and the west of the Central Provinces rain was general, and on the West Coast fairly heavy. On the morning of the 11th the centre of the storm lay between Sambalpur and Chaibassa, it having moved very slowly during the preceding twenty-four hours. Cyclonic gales and winds prevailed in its neighbourhood, and rain was universal over North-East India, the amounts received in some places being large. Slight rain had commenced in the east of the North-West Provinces, but generally over the Gangetic plain, North-West and Central India, and the Carnatic there was no rain. In the west of the Peninsula rain was general, but not heavy.

Temperature.—From the above it will be seen that rain has been very general throughout the country, and in consequence the mean temperature has been low.

The following table shows the variations of the mean temperature from the normal on each day of the week for the principal Provinces of India :—

Province.	5th.	6th.	7th.	8th.	9th.	10th.	11th.	Mean variation of week.
	°	°	°	°	°	°	°	°
Burma	+2·0	+1·6	+1·8	+0·8	—0·6	—1·8	—0·1	+0·5
Bengal and Assam	+1·5	+0·5	—3·2	—2·4	—2·8	—3·8	—5·6	—2·3
North-West Provinces and Oudh.	+1·8	—3·8	—11·5	—8·7	—5·7	—3·5	—3 8	—5·0
Punjab	+10·0	+0·3	—5·7	—6·2	—5·6	—3·1	—0·7	—1·6
Bombay	—2·3	—4·1	—2·0	—2·5	—3·1	—1·9	—1·5	—2·5
Berar and Central Provinces	—0·6	—4·0	—3·7	—4·5	—4·6	—2·4	+0·2	—2·8
Guzerat and Central India	—0·6	—3·0	—5·3	—4·3	—4·2	—1·8	—1·1	—2·9
Sind and Rajputana	+3·2	+1·1	—0·7	—1·7	—2·4	—1·1	+1·3	0
Madras	—2·8	—1·9	—0·2	—0·1	—2·1	—2·7	—1·8	—1·7
Mean for whole India	+1·4	—1·5	—3·4	—3·3	—3·5	—2·5	—1·5	—2·0

The mean diurnal deficiency for the whole of India was thus 2·0°. The coolest day was the 9th, with a mean deficiency of $3\frac{1}{2}$°; the warmest was the 5th, with a mean excess of 1·4°. The Provincial variations show a slight excess in Burma and no departure from the normal in Sind and Rajputana, and a general deficiency elsewhere. The largest variation was —5·0° in the North-West Provinces, in which region between the 6th and 8th both the maximum and minimum temperatures, but especially the former, were very low.

Rain.—The rainfall table at the close shows that during the week under review rain has fallen in all the rainfall divisions except Sind and Rajputana (West). In Madras (South) and the Punjab (West and South) the amount received was very small, but generally the fall was fairly good. The largest average actual fall was in Arakan, where 14·91 inches fell; this was followed by 9·80 inches in the Konkan, by 9 inches in Tenasserim, by 7 inches in Orissa, and by $5\frac{1}{4}$ inches in Coorg. The average distribution of rainfall for the week differs somewhat from the actual. The region of heaviest rainfall on the average is in Arakan, but the next heaviest rainfall usually occurs in Malabar, while the rainfall of Orissa is usually light. These variations are due, in the first place, to the weakness of the monsoon current on the Malabar Coast; and, secondly,

to the exceptional rainfall occasioned by the cyclone which passed from the north-west of the Bay into Orissa.

The third column of the table shows that the rainfall was heavier than usual in thirty-four of the rainfall divisions, and lighter than usual in sixteen divisions. The region of deficient rainfall included the following divisions, *viz.*, Tenasserim and Lower Burma, the Assam divisions, East, Deltaic, and North Bengal, the Punjab (South), Malabar, Madras (South-Central, Central, and South), Coorg, Sind, Rajputana (West), and the East Coast (South). In all other parts of the country there has been an excess. The largest actual deficiency was in Malabar, where only four instead of ten inches fell, but in Assam (Surma) and in parts of Bengal the deficiency relatively to the normal was equally great. The greatest excess was in Orissa, where the actual rainfall was more than six times the average. In the Gangetic plain, though the actual amount received was not large, the variation from the average was considerable.

The concluding three columns of the table show that for the two weeks from May 29th to June 11th the progress of the monsoon has been satisfactory over the greater part of the country. North-East India, including Burma, Assam, and Bengal Proper, has had deficient rain, and so also have most parts of the Punjab, of the south-west of the Peninsula, and of Sind, Rajputana, and Central India; but all the other divisions have had an excess. Rajputana (West) and Sind have had no rain during the period, while, on the contrary, Orissa, the North-West Provinces (East), Oudh (South), Guzerat and the Central Provinces (East) have had between two and three times their average.

The following are the principal large totals received during the week:

Division.	District.	Station.	Amount.
Tenasserim	Amherst	Thatôn	13·90 inches.
Arakan	Akyab	Minbya	15·43 „
Bengal	Dinajpur	Thakurgaon	7·15 „
Orissa	Cuttack	False Point	13·49 „
Chota Nagpur	Lohardugga	Sudder	7·40 „
Behar	Purneah	Arrareah	10·22 „
North-West Provinces	Ghazipur	Zamania	5·97 „
	Fyzabad	Sudder	4·70 „
Punjab	Umballa	Jagadhri	2·06 „
	Kangra	Palampur	2·15 „
Malabar	South Kanara	Karkul	8·93 „
Mysore	Shimoga	Nagar	13·60 „
Konkan	Ratnagiri	Sangameshwar	23·62 „
Deccan	Kolhapur	Bhosa	28·50 „
Central Provinces	Sambalpur	Sudder	10·40 „
Central India	Sirdarpur	Ditto	5·03 „
East Coast	Godavari	Tuni	6·90 „
	Kistna	Repalli	5·70 „

The above figures show that the heaviest falls were received in North-East India and the west of the Peninsula.

SIMLA, *16th June, 1892.*

W. L. DALLAS,
Assistant Meteorological Reporter to the Government of India.

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 11th June.*—Rainfall good on the West Coast, Circars, and parts of Kurnool; useful showers in the remainder of the Deccan, Karnatic, and parts of the Central districts. Prospects in Ganjam, Vizagapatam, and parts of Kurnool have much improved; conditions are favourable in the Central districts. Cultivation and sowing are proceeding where rain has fallen. Pasture is improving and difficulties of water-supply are generally lessened, but sufferings of grazing cattle are unabated in Bellary, Anantapur, and Nellore. Prices are very steady. FAMINE RELIEF: *Numbers on works*:—Deccan 56,390, Karnatic 21,990, and Central 8,876: *Total* 87,256 against 84,690 last week; increase chiefly in the Nellore district. *On gratuitous relief*:—Deccan 790, Karnatic 78, and Central 211: *Total* 1,079 against 1,134 last week. Loans for wells:—Deccan Rs. 6,61,000, Karnatic Rs. 4,01,000, and Central Rs. 9,48,000: *Total* Rs. 20,10,000. Wells completed—560, 1,831, and 1,181: under construction or repair—5,581, 1,916, and 6,684 in respective blocks. Agriculturists' loans—Deccan Rs. 64,000, Karnatic Rs. 53,000, and Central Rs. 65,000: *Total* Rs. 1,82,000 disbursed.

Bombay.—*For week ending 15th June.*—Rain throughout the Presidency proper, generally good or moderate. Water-supply in Deccan and Karnatak has improved. Slight rain in one district of Sind. Ploughing and sowing operations are progressing generally. Fodder is scarce in parts of twelve and water in parts of four districts. Cattle are poor in parts of five districts. Prices are steady, except in parts of five districts. FAMINE RELIEF: *Numbers on works*:—Bijapur 325, Belgaum 2,557, Dharwar 745, and Kolhapur 7,651: *Total* 11,278 against 14,752 last week.

Bengal.—*For week ending 14th June.*—General and often heavy rain has fallen throughout the Province during the week. A cyclone in the north of the Bay which crossed the coast near Balasore on the morning of the 10th gave exceptionally heavy rain in parts of Orissa. Agricultural prospects are now generally reported to be favourable. Cultivation is being vigorously pushed on, sowings are making good progress, and all standing crops are doing well. Satisfactory reports come from the districts especially under observation as being affected. In all ample rain has fallen and agricultural operations are generally brisk. Prices remain almost stationary. Cattle are generally in good condition, and now get ample supplies of fodder and water throughout the Province. FAMINE RELIEF: *Numbers on works*:—Champaran *nil*—works closed, Muzaffarpur 8,667, Darbhanga 47,452, Monghyr 771, Bhagalpur 6,075, Purneah *nil*, and Dinajpur 346: *Total* 63,311 against 72,303 last week. *Numbers on gratuitous relief*:—Darbhanga 732, Monghyr 253, Bhagalpur 1,470, and Purneah 341: *Total* 2,796 against 2,970 last week.

North-Western Provinces and Oudh.—*For week ending 15th June.*—Rain has been general and the fall heavy in several districts. Prospects have improved in the scarcity affected tracts of Almora and Jaunsar-Bawar pargana of Dehra Dun, but more rain is urgently needed in Garhwal, where some of the crops are thin and stunted. In the plains districts ploughings and sowings for the autumn crop are in progress. Sugarcane and indigo are flourishing. Locusts appeared in one pargana of the Cawnpore district and in another in the Jhansi district, but did no damage. Supplies are adequate. Fodder continues scarce in Almora and Garhwal. Prices are fluctuating, and show a tendency to rise in some districts: they continue high in Almora.

Punjab.—*For week ending 15th June.*—Rain has fallen throughout the Punjab, except in three districts. Prices are generally stationary. Harvesting of spring crops is over. Sowings of autumn crops have commenced in some districts. Ploughings await rain in Hissar and Umballa. Water is getting scarce in Umballa, Kangra, and parts of Dera Ismail Khan. Canals are flowing in Mooltan, with the exception of the Sidhnai. The Bara river in Peshawar is improving slightly. Wells are drying up in Jullundur. Rain is much needed in all districts. Prospects of crops unfavourable in Kangra, poor in Shahpur, bad in Peshawar and on irrigated lands of Lahore; average elsewhere. White ants injuring sugarcane in parts of the Sialkote district. Condition of cattle is reported good, except in five districts, where they are suffering for want of fodder, which is generally scarce.

Central Provinces.—*For week ending 15th June.*—Sufficient rain has fallen in five districts; moderate to slight in others. Autumn sowings have commenced in four districts, and continue in the Bilaspur tahsil. Prices generally stationary.

Burma.—*For week ending 11th June.*—Abundant rain has fallen in all districts except Bhamo, Pakkoku, and the three affected districts of Myingyan, Meiktila, Yamethin, where showers are light. Ploughing, sowing, and transplanting of wet weather paddy are in progress generally both in Upper and Lower Burma. The price of paddy has fallen considerably in three districts and slightly in five others; it is generally steady elsewhere. The price of rice and *jowar* has fallen slightly. FAMINE RELIEF: *Numbers on works*:—Shwebo 2,466, Yeu 521, Lower Chindwin 629, Myingyan 1,160, Meiktila 2,880, Yamethin 6,111, and Magwe (for week ending 4th June) 86: *Total* 13,853 against 15,917 last week.

Assam.—*For week ending 15th June.*—Report not received.

Mysore and Coorg.—*For week ending 15th June.*—MYSORE: Rainfall general. Ploughing operations completed and sowing is in progress in parts. No material change in prices. FAMINE RELIEF: *Numbers on works*:—Bangalore 208, Kolar 1,344, Tumkur 810, Shimoga 179, and Chitaldroog 230: *Total* 2,771 against 3,584 last week.

COORG: Rainfall good. Ploughing and preparing of rice nurseries are in progress. *Ragi* (*Eleusine coracana*), coffee, and cardamom are in good condition. Prices stationary. Water and forage supply for cattle are sufficient.

Berar and Hyderabad.—*For week ending 15th June.*—BERAR: Average rainfall good. Weather cloudy and sultry. Preparation of land for the ensuing crop is progressing. Water is scarce in one district and fodder insufficient in one district and in four other taluks. Prices are rising in Ellichpur. Sowing of cotton commenced in two taluks.

HYDERABAD: Rainfall of week over four inches. Recent rains have in a great measure tended to save the cattle from starvation. There is a fairly good quantity of water and grass available for them now. Prices still keep high.

Central India.—*For week ending 15th June.*—Rain general; nearly nine inches in Bundelkhand. Agricultural operations started in five Agencies. Prices of food-grains have fallen slightly in parts of Bhopawar, rising in Goona, and steady elsewhere. Condition of agricultural stock and pasturage are generally good.

Rajputana.—*For week ending 15th June.*—Rainfall good in six Agencies and at Abu; elsewhere moderate rain has fallen, except in Marwar, Dholpur, and Bikanir. Agricultural operations are satisfactory in two Agencies, and have commenced in part of Ajmere and also in Sirohi and Meywar. Standing crops are fair in Meywar. Agricultural stock is generally good and sufficient, except in Marwar, where cattle are suffering from want of fodder and water. Pasturage and fodder sufficient in eight Agencies; scarce elsewhere. Prices are rising in five Agencies; falling, or partly falling, in Ajmere and two Agencies; steady elsewhere. In Kotah 177 emigrants returning and 1,031 cattle. FAMINE RELIEF: *Numbers on works*:—Ajmere-Merwara 30,110, Marwar (for week ending 8th June) 7,306, Kishengarh 1,723, and Bikanir 4,142: *Total* 43,281 against 37,880 last week, exclusive of Marwar. *On gratuitous relief*:—Ajmere-Merwara 10,353 (including 3,587 in receipt of home relief), Marwar (for week ending 8th June), 3,233, Kishengarh 170, and Bikanir 1,902: *Total* 15,658 against 12,589 last week, exclusive of Marwar.

Nepal.—*For week ending 9th June.*—Rainfall good. Days bright and nights wet. Prospects of crops good.

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

Letter No. 164 A-540, dated the 30th March 1892, from the Government of Bombay, Public Works Department, and enclosures.

OBSERVATIONS.—In paragraph 5, clause I, of Finance and Commerce Department Resolution No. 2650, dated 25th June 1891, Local Governments and Administrations were directed to furnish the Government of India with lists of the manufacturing firms that might be permitted in view of their general standing and the completeness of their manufacturing and testing plant to tender for the supply of articles of iron and steel made up from imported raw materials, subject to the conditions and restrictions mentioned in that Resolution.

2. The replies read above furnish the information required. A preliminary list of selected firms is published as Appendix A to this Resolution; other firms that, in the opinion of a Local Government, satisfy the necessary conditions will be added to this list from time to time, and subject to the checks and limitations prescribed in Finance and Commerce Department Resolution No. 2650, dated 25th June 1891, which must be strictly enforced, the firms specified are at liberty to tender for any of the less important supplies of articles of iron and steel manufacture required by all branches of the Public Works Department, except State Railways under construction. As regards the latter, the only circumstances in which supplies may be locally obtained are stated in paragraph 4 of that Resolution.

3. The conditions as regards the tests to be applied to the raw material and, when necessary, to the finished product, as defined in paragraph 5, clause IV, of Finance and Commerce Department Resolution No. 2650, dated 25th June 1891, require, however, to be re-stated. It has been ascertained that, except in isolated cases, the various railway workshops are not prepared to undertake the necessary tests. As a general rule, therefore, these tests must be carried out by the manufacturers themselves. In the case of all articles requiring to be tested before delivery, the specification must specify the tests that the material employed is to undergo. Such tests will be carried out invariably in the presence of a competent officer of the Public Works Department, one who has received special training in testing operations either at Cooper's Hill College or elsewhere being employed whenever available. Local Governments and Administrations that may place orders with firms outside their jurisdiction—as, for instance, orders placed by the Government of the Punjab or of the North-Western Provinces and Oudh with firms in Bombay or Calcutta—should as a rule arrange with the administration in which the manufacturers' works are situated for the necessary supervision of the tests. In special cases, however, they may be authorised to depute an officer to supervise the testing under the rules for deputations on special duty laid down in the Civil Service Regulations. The actual testing will be in all cases at the sole cost of the manufacturer.

4. The annexed specifications (Appendix B), drawn up by the Director General of Stores at the India Office, show the conditions as regards tests and manufacture that are exacted in the case of iron and steel work procured from England for use in India, and will serve as a guide to officers in this country. No relaxation of the tests specified should be permitted, except on the express authority of the Local Government or Administration in each case. The conditions as regards manufacture may be modified as required by local conditions.

5. Nothing in this Resolution is to be taken as interfering with the discretion of the Local Governments concerned in regard to the employment of the agency of the various Government workshops for purposes of manufacture, or as implying that tenders must be called for in all cases from the firms named, or as restricting the power of the officers receiving the tenders to reject any or all of them as they may think fit.

Paragraph 3 of Finance and Commerce Department Resolution No. 2650, dated the 25th June 1891.

"Having regard, however, to the representations contained in the memorial read above, and with the view of encouraging local industries and the development of technical education, His Excellency the Governor General in Council has now resolved to modify, as a tentative measure, the existing orders prohibiting the local purchase of manufactured articles of iron and steel made up from imported materials. In so doing the Governor General in Council desires it to be clearly understood that this relaxation of existing rules is sanctioned solely in the hope of thereby effecting economy in the public administration, both by actual saving in the cost of articles purchased locally, and by avoiding the delays that are sometimes inevitable when the articles have to be procured by indent on England. It is not intended to sanction thereby a procedure in any degree of a protective nature, and firms that may obtain orders under this Resolution must be distinctly warned that no claim for compensation of any sort will be admitted in the event of its being found necessary to discontinue the practice of inviting tenders in India."

6. Attention is drawn to paragraph 3 of Finance and Commerce Department Resolution No. 2650, dated 25th June 1891, which is quoted in the margin.

The Governments of Madras, Bombay, Bengal, the North-Western Provinces and Oudh, and the Punjab.
The Chief Commissioners of the Central Provinces, Burma, Assam, and Coorg.
The Residents at Hyderabad and in Mysore.
The Agents to the Governor General in Central India, Rajputana, and Baluchistan.
The Directors General of Railways and Telegraphs.
The Consulting Engineers to the Government of India for Railways, Calcutta, Central Division, and Lucknow.
The Accountant General, Public Works Department.

ORDER.—Ordered, that this Resolution be communicated to the Local Governments and Administrations noted on the margin for information and guidance.

Ordered also, that copy be forwarded to the Military and Finance and Commerce Departments, and that it be published in the Supplement to the *Gazette of India*.

J. G. FORBES, *Colonel, R.E.,*
Secretary to the Government of India.

Documents accompanying.

APPENDIX B.

METRE GAUGE.

Specification of Ironwork of Bridges, spans of 6, 12, 20, and 40 feet.

Materials.

2. The wrought-iron is to be well and cleanly rolled to the full sections shewn on the drawing or in the specification, and free from scales, blisters, laminations, cracked edges, and defects of every sort, and the name of the maker is to be rolled or stamped on every piece.

It must be of such strength and quality as to be equal to the following tensional strains, and to indicate the following percentages of contraction of the tested area at the point of fracture, and percentages of elongation:

	Tensional stresses per square inch.	Percentage of contraction of fractured area.	Percentages of elongations in a length of 10 inches.
	Tons.		
Round and square bars, and flat bars under 6 inches wide .	24	20	15
Angle and T- bars, and flat bars 6 inches wide and upwards .	22	15	12
Plates	21	10	8
Plates across grain	18	5	4

The rivet iron must be of such a quality that any rivet will stand the following tests without showing signs of failure:

Bending double upon itself whilst cold.

Bending double upon itself whilst red hot.

The shank being nicked whilst cold and bent double, showing the fibre of the iron to be of good quality.

Flattening down the head whilst red hot until its diameter is equal to $2\frac{1}{2}$ times that of the shank without showing any signs of cracking at the edges.

Punching through the shank when at a red heat, with a taper punch a round hole the diameter of the rivet without showing signs of cracking or splitting.

The tests are to be conducted at the works of the Contractor or elsewhere, or both, as may be determined by the Consulting Engineer. The expense of the tests is to be borne as provided for in the Conditions of Contract.

No material is to be used which, in the opinion of the Consulting Engineer, falls short of the tests and other requirements of the specification, and no iron of foreign manufacture is to be used throughout the Contract.

Manufacture.

3. It is to be expressly understood that the greatest accuracy is to be observed in every part of the work, a main object of the designs being to facilitate as much as possible the erection of the work in India by perfection of workmanship in this country. All corresponding parts of all spans must be made exactly similar and interchangeable.

4. All plates and bars must be rolled to the full sections, and the angle irons to the full widths and weights per foot, shown on the drawings. All angle irons which do not hold their full widths and weights from end to end, or which have rough, jagged, or imperfect edges or ends, will be rejected.

5. All plates, bars, T-bars, and angle irons must be carefully levelled and straightened (the angle and T-bars by pressure and not by hammering) before and after they are punched or drilled. All edges of all plates, and the ends of all angle irons and bars, must be planed dead true to the dimensions, or, where planing is impossible, they must be dressed off fair with hammer, chisel, and file. No rough edges fresh from the shears will be permitted anywhere throughout the work.

6. All rivet holes to be filled in India are to be *drilled*.

All other rivet holes may be either drilled or punched, at the option of the Contractor, but any plate or bar in which the holes are not accurately in place will be rejected. The holes through which any one rivet passes must correspond in any number of plates or bars.

Although the word "rivets" may be used on the drawings, the rivet *holes* are to be made the sizes figured, and in no case must the diameter of the rivet be more than $\frac{1}{32}$ inch less than the diameter of the hole it has to fill. All loose rivets, and rivets with cracked, badly formed, or deficient heads, must be cut out and replaced by others. Rivets must also be cut out when required for the examination of the work. All riveted work must be absolutely in contact all over the whole surface.

All rivets, unless otherwise specified, are to be cup-headed at each end, and the heads are to contain not less than $1\frac{1}{4}$ diameters of the rivet.

Whenever necessary for the division of the work for transport, the rivets are to be left out, but the holes in all cases must be drilled ready for riveting, and all the requisite rivets, including the spare rivets, must be sent with the ironwork.

7. In all cover plates, except in webs, the fibre of the iron must run in the direction of the length of the span.

The gussets and cover plates must be shaped to the full sizes shewn on the drawings, and any plate in which the rivet holes have been drilled nearer to the edge than shewn on the drawings will be rejected.

Where cover plates are used to connect plates of different thicknesses, so much of the covers must be planed down as will make them fit fairly over the joint, no packing plates being allowed. The figured dimensions on the drawings shew the different thicknesses after the cover plates have been planed down.

8. The main girders of all spans above 20 feet are to be built with a camber in the arc of a circle, the upper members being proportionately longer than the lower. The extent of the camber is in each case figured on the drawing.

The joints to be riveted in India must be chipped and filed so as to butt with perfect accuracy over the whole of the meeting surfaces to the true radius necessary for the specified camber, and any joint which fails to form a perfect butt all over will involve the rejection of the length or lengths of the members which cannot be made to fit without being shortened.

The spans of 20 feet and under are to be without camber.

9. The underside of the bearing plates of all main girders must be perfectly level and the rivets countersunk.

All bed plates are to be absolutely flat, and the guiding edges planed and truly parallel.

10. All bolts are to be screwed to Whitworth's standard thread, and all nuts must fit too tightly to be turned by hand. The heads and nuts for all timber bolts (except where otherwise shewn on the drawings) and service bolts are to be square; for other bolts they are to be hexagonal.

The head and body of all bolts are to be forged out of one piece of rod or bar iron. All bolts are to be screwed for a length of three diameters.

Completion of Work and Erection.

11. All the spans are to be temporarily erected complete, so that accuracy of fit and perfection of workmanship may be assured.

As the work is erected, all the holes which are left to be riveted in India must be filed at one and the same time by temporary bolts $\frac{1}{16}$ inch less in diameter than the holes which they fill firmly screwed or keyed up. It will not be sufficient that bolts shall be placed in a certain number of holes only at a time, nor will it be sufficient that only such a number of bolts shall be inserted as may temporarily hold the span together.

Painting, Marking, &c.

12. The whole of the ironwork, with the exception of the bolts and rivets, is to be scraped perfectly free from rust, scale, and dirt, and then brushed all over with boiling hot linseed oil. It is afterwards to be painted with two coats of good oil paint, the first being of red lead and the second of Roman ochre, or other colours to be specially approved by the Consulting Engineer. Wherever plates or bars are to be riveted together, the surfaces that will be in contact are to be thoroughly cleaned immediately before plating, and one of them is to be covered with a good coat of red lead paint.

One end of every case is to be painted the same colour as the span for which its contents are intended.

The bolts (including the service bolts) and rivets are to be heated to the temperature of melted lead, and then dipped into boiled linseed oil.

13. Every portion of every span is to be very distinctly stencilled with paint and marked with the punch for guidance in erection in India, and every piece or bundle of iron is to be similarly marked, and every packing case branded, with such shipping marks as the Consulting Engineer may require.

All parts of the work are to be stamped with the letters "I. S. R."

A neat casting bearing the name of the manufacturer, with place and date of manufacture, is to be bolted conspicuously on every main girder.

5' 6" GAUGE.

Specification of Ironwork of Bridges, spans of 6, 12, 20, 40, and 60 feet.

Materials.

2. The wrought-iron is to be well and cleanly rolled to the full sections shewn on the drawing or in the specification, and free from scales, blisters, laminations, cracked edges, and defects of every sort, and the name of the maker is to be rolled or stamped on every piece.

It must be of such strength and quality as to be equal to the following tensional stresses, and to indicate the following percentages of contraction of the tested area at the point of fracture, and percentages of elongation:

	Tensional stresses per square inch.	Percentage of contraction of fractured area.	Percentages of elongations in a length of 10 inches.
	Tons.		
Round and square bars, and flat bars under 6 inches wide	24	20	15
Angle and flat bars, 6 inches wide and upwards	22	15	12
Plates	21	10	8
Plates across grain	18	5	4

The rivet iron must be of such a quality that any rivet will stand the following tests:

Bending double upon itself whilst cold or red hot without showing signs of fracture.

The shank being nicked whilst cold and bent double, showing the fibre of the iron to be of good quality.

Flattening down the head whilst red hot until its diameter is equal to $2\frac{1}{2}$ times that of the shank without shewing signs of cracking at the edges.

Punching through the shank when at a red heat, with a taper punch, a round hole the diameter of the rivet without shewing signs of cracking or splitting.

The tests are to be conducted at the works of the Contractor or elsewhere, or both, as may be determined by the Consulting Engineer. The expense of the tests is to be borne as provided for in the Conditions of Contract.

No material is to be used which, in the opinion of the Consulting Engineer, falls short of the tests and other requirements of the specification, and no iron of foreign manufacture is to be used throughout the Contract.

Manufacture.

3. It is to be expressly understood that the greatest accuracy is to be observed in every part of the work, a main object of the designs being to facilitate as much as possible the erection of the work in India by perfection of workmanship in this country. All corresponding parts of all spans must be made exactly similar and interchangeable.

4. All plates and bars must be rolled to the full sections, and the angle irons to the full widths and weights per foot, shown on the drawings. All angle irons which do not hold their full widths and weights from end to end, or which have rough, jagged, or imperfect edges or ends, will be rejected.

5. All plates, bars, and angle irons must be carefully levelled and straightened (*the angle bars by pressure and not by hammering*) before and after they are punched or drilled. All edges of all plates, and the ends of all angle irons and bars, must be planed dead true to the dimensions, or, where planing is impossible, they must be dressed off fair with hammer, chisel, and file. No rough edges fresh from the shears will be permitted anywhere throughout the work.

6. All the rivet holes to be filled in India are to be *drilled*.

All other rivet holes may be either drilled or punched, at the option of the Contractor, but any plate or bar in which the holes are not accurately in place will be rejected. The holes through which any one rivet passes must correspond in any number of plates or bars.

All holes to be punched must be marked off with a centre punch, and punched with a nipple punch.

Although the word "rivets" may be used on the drawings, the rivet *holes* are to be made the sizes figured, and in no case must the diameter of the rivet under the head be more than $\frac{1}{32}$ inch less than the diameter of the hole for which it is intended. All loose rivets, and rivets with cracked, badly formed, or deficient heads, must be cut out and replaced by others. Rivets must also be cut out when required for the examination of the work. All riveted work must be absolutely in contact all over the whole surface.

All rivets, unless otherwise specified, are to be cup-headed at each end, and the shank of the rivet must project through the rivet hole before closing by a length of at least $1\frac{3}{8}$ diameters for a drilled hole and $1\frac{1}{2}$ diameters for a punched hole, a further and sufficient allowance for filling the hole being also made when the rivet passes through more than two plates or bars.

Whenever necessary for the division of the work for transport, the rivets are to be left out, but the holes, except those hereinafter mentioned, must in all cases be drilled or punched for riveting, and all the requisite rivets, including the 50 per cent. extra, must be sent with the ironwork.

7. In all cover plates, except in webs, the fibre of the iron must run in the direction of the length of the span.

The gussets and cover plates must be shaped to the full sizes shewn on the drawings, and any plate in which the rivet holes have been drilled nearer to the edge than shewn on the drawings will be rejected.

8. The main girders of all spans above 20 feet are to be built with a camber in the arc of a circle, the upper members being proportionately longer than the lower. The extent of the camber is figured on the drawing. Spans of 20 feet and under are to be without camber.

The joints to be riveted in India must be chipped and filed so as to butt with perfect accuracy over the whole of the meeting surfaces to the true radius necessary for the specified camber, and any joint which fails to form a perfect butt all over will involve the rejection of the length or lengths of the members which cannot be made to fit without being shortened.

9. The underside of the bearing plates of the main girders must be perfectly level and the rivets countersunk.

10. All bolts are to be screwed to Whitworth's standard thread, and all nuts must fit too tightly to be turned by hand. The heads and nuts for all timber bolts (except hook bolts) and service bolts are to be square; for other bolts they are to be hexagonal.

The head and body of all bolts are to be forged out of one piece of rod or bar iron. All bolts, except those which are fitted, are to be screwed for a length of three diameters.

5′ 6″ GAUGE.

Specification of Steelwork, &c., for Bridges, spans of 40, 20, 12, and 6 feet.

Materials.

2. The bridges, including bolts, nuts, and rivets, are to be entirely of steel, except that iron may be used for service bolts, packings, and washers. The steel is to be well and cleanly rolled to the full sections shewn on the drawings or named in the specification, and free from scales, blisters, laminations, cracked edges, and defects of every sort, and the name of the maker, and the distinguishing number of the plate or bar, are to be rolled or stamped on every piece. The names of the makers from whom it is proposed to obtain the steel are to be submitted for approval to the Consulting Engineer.

The steel must be of such strength and quality as to be equal to the following tensional stresses, and to indicate the following percentages of elongation:

	Tensional stresses per square inch.	Percentages of elongation in a length of 10 inches.
	Tons.	
Steel in plates, either with or across the grain, and in angle or other bars, not less than	27	20
Or more than	31	
Steel rods for rivets and bolts not less than	25	25
Or more than	28	

Strips of steel, whether cut lengthwise or crosswise of any plate or bar, heated to a low cherry red, and cooled in water at a temperature of 82° Fahrenheit, must stand bending double round a curve of which the diameter is not more than three times the thickness of the piece tested. In addition to this, angle and other bars must stand the test known at Lloyd's as the ram's horn test.

All rivets and bolts are to be of steel, and the steel used for them must be ingot steel of a special quality, and the rivets and bolts must stand bending double, both hot and cold, and also flattening down from the head, without shewing cracks or other defects.

Side and end shearings must be taken as samples from every plate and flat bar and from as many angle, T, channel, and other bars as the Consulting Engineer shall require. At least 20 per cent. of the samples so taken will be tested for tensile strength, and the whole of them for bending in the manner described above; but it is to be distinctly understood that power is reserved to test every plate and bar for tensile strength if the Consulting Engineer think fit; also that such power will be exercised in the event of there being in his opinion any indication that the material supplied is not equal in every respect to the requirements or intentions of this specification. For this purpose each sample must bear a number stamped to the satisfaction of the Consulting Engineer corresponding to the plate or bar from which it is taken, and all samples must be kept until the completion of the Contract.

In addition to the above tests, samples of the steel supplied for use will be from time to time chemically examined; and should such examination shew the presence of silicon, phosphorus, or sulphur to a greater extent than 0·06 per cent. of any one of them, no further supplies of steel will be accepted from the makers of the bad sample until the Consulting Engineer is satisfied that in future supplies the percentages of silicon, phosphorus, and sulphur will be reduced so as not to exceed the maximum limit.

All the above tests, with the exception of the analyses, are to be conducted at the works where the steel is manufactured by some person to be appointed by the Consulting Engineer. Other tests may be conducted elsewhere, as the Consulting Engineer may direct. The expense of the tests and analyses is to be borne as provided for in the Conditions of Contract.

No plate or bar is to be annealed or otherwise manipulated after leaving the rolls without the special authority of the Consulting Engineer and his approval of the process employed, and when annealing is permitted, the test pieces are not to be cut off till the annealing is completed.

No material is to be used which, in the opinion of the Consulting Engineer, falls short of the tests and other requirements of the specification.

Firms tendering are required to submit with their tender the names of the makers from whom they propose to obtain the steel, and, in the event of the acceptance of their tender, it will be upon the understanding that the steel will actually be obtained from such firms, unless written permission be given to the contrary.

Manufacture.

3. It is to be expressly understood that the greatest accuracy is to be observed in every part of the work, a main object of the designs being to facilitate as much as possible the erection of the bridges in India by perfection of workmanship in this country. All corresponding parts of them must be made exactly similar and interchangeable.

4. All plates and bars must be rolled to the full sections, and bars to the full weights per foot, shown on the drawings. All angle or other bars which do not hold their full widths and weights from end to end, or which have rough, jagged, or imperfect edges or ends, will be rejected.

5. All plates and bars must be carefully levelled and straightened (*by pressure and not by hammering*) before and after they are punched or drilled. All edges of all plates, and the ends of all bars, of every kind, must be planed dead true to the dimensions, or, where planing is impossible, they must be dressed off fair with hammer, chisel, and file. Every sheared edge, whether of a plate or bar, must have at least $\frac{1}{8}$th of an inch taken off it by machine or by the chisel, and any plate or bar too small to leave $\frac{1}{8}$th of an inch for planing or chipping on every sheared edge will be rejected.

6. All holes are to be drilled, but the Contractor may, if he think proper, first punch a smaller hole of such diameter in each case as to leave at least $\frac{1}{8}$th inch of material all round to be subsequently drilled out; thus the *punched* hole intended to be enlarged to $\frac{3}{4}$ inch must not exceed at the largest end $\frac{1}{2}$ inch in diameter. When punched holes are thus drilled out, the punching must be so accurate that when the work is put together before drilling, a rivet $\frac{1}{32}$ inch less in diameter than the size of the punched hole can be easily passed through all the holes. All burrs left by the drill are to be completely removed. All punched holes are to be marked off with a centre punch, and punched with a nipple punch.

7. Although the word "rivets" may be used on the drawings, the rivet *holes* are to be made the sizes figured. All riveting is to be done by hydraulic, steam, or other machines of approved construction, and in no case must the diameter of the rivet under the head be more than $\frac{1}{32}$nd inch less than the diameter of the hole it is intended to fill. All loose rivets, and rivets with cracked, badly formed, or deficient heads, must be cut out and replaced by others.

Rivets must be cut out when required for the examination of the work.

All rivets are to be cup-headed at each end, and the heads are to project through the holes before closing not less than $1\frac{3}{8}$ diameters for a drilled hole and $1\frac{1}{2}$ diameters for a punched hole, a further and sufficient allowance for filling the hole being also made when the rivet passes through more than two plates or bars.

All plates must be shaped to the full sizes shewn on the drawings, and any plate or bar in which the rivet holes have been made nearer to the edge than shewn on the drawings will be rejected.

8. The ends of all plates, &c., must be chipped and filed so as to butt with perfect accuracy over the whole of the meeting surfaces, and any joint which fails to form a perfect butt all over will involve the rejection of the plates and bars which cannot be made to fit.

9. All screwed bolts are to be screwed to Whitworth's standard thread, and all nuts must fit too tightly to be turned by hand. The heads and nuts (except those for timber bolts, which are to be square) are to be hexagonal. The head and body of all bolts are to be forged out of one piece.

10. The bearing plates are to be perfectly level, and all rivet heads bearing on them countersunk and chipped flush with the surface.

Specification of Ironwork for Engine and Goods Sheds Roofing.

Materials.

2. The wrought-iron is to be well and cleanly rolled to the full sections shewn on the drawings or in the specification, and free from scales, blisters, laminations, cracked edges, and defects of every sort, and the name of the maker, and the distinguishing number of the plate or bar, are to be rolled or stamped on every piece.

The wrought-iron must be of such strength and quality as to be equal to the following tensional stresses, and to indicate the following percentages of elongation:

	Tensional stresses per square inch.	Percentage of elongation in a length of 10 inches.
	Tons.	
Wrought-iron, round and square bars, and flat bars under 6 inches wide	24	15
Wrought-iron, angle, T, H, and channel bars, and flat bars 6 inches wide and upwards	22	12
Wrought-iron plates	21	8
" " " across grain	18	3

The rivet iron must be of such a quality that any piece of it made into a rivet will stand the following tests:

Bending double upon itself whilst cold or red hot without shewing signs of failure.

The shank being nicked whilst cold and bent double, shewing the fibre of the iron to be of good quality.

Flattening down the head whilst red hot until its diameter is equal to $2\frac{1}{2}$ times that of the shank without shewing any signs of cracking at the edges.

Punching through the shank when at a red heat, with a taper punch, a round hole the diameter of the rivet without shewing signs of cracking or splitting.

The tests are to be conducted at the works of the Contractor or elsewhere, or both, as may be determined by the Consulting Engineer. The expense of the tests is to be borne as provided for in the Conditions of Contract.

No material is to be used which, in the opinion of the Consulting Engineer, falls short of the tests and other requirements of the specification.

Manufacture.

3. It is to be expressly understood that the greatest accuracy is to be observed in every part of the work, a main object of the designs being to facilitate as much as possible the erection of the work abroad by perfection of workmanship in this country. All corresponding parts must be made exactly similar and interchangeable.

4. All plates and bars must be rolled to the full sections and weights per foot shown on the drawings. All bars which do not hold their full widths and weights from end to end, or which have rough, jagged, or imperfect edges or ends, will be rejected.

5. All plates and bars must be carefully levelled and straightened (*by pressure and not by hammering*) before and after they are punched or drilled. All edges of all plates, and the ends of all bars, of every kind, must be planed dead true to the dimensions, or, where planing is impossible, they must be dressed off fair with hammer, chisel, and file.

6. All holes which are left unfilled are to be drilled, but the Contractor may, if he think proper, first punch a smaller hole of such diameter in each case as to leave at least $\frac{1}{8}$th inch of material all round to be subsequently drilled out; thus the *punched* hole intended to be enlarged to $\frac{3}{4}$ inch must not exceed at the largest end $\frac{1}{2}$ inch in diameter. All burrs left by the drill are to be completely removed. The other holes may be punched or drilled, at the option of the Contractor, but any plate or bar in which the holes are not accurately in place will be rejected. All punched holes are to be marked off with a centre punch, and punched with a nipple punch. All ironwork intended to be riveted or bolted together must be absolutely in contact over the whole surface.

Although the word "rivets" may be used on the drawings, the rivet *holes* are to be made the sizes figured. All riveting is to be done by hydraulic, steam, or other machines of approved construction, and in no case must the diameter of the rivet under the head be more than $\frac{1}{32}$nd inch less than the diameter of the hole it is intended to fill. All loose rivets, and rivets with cracked, badly formed, or deficient heads, must be cut out and replaced by others.

Rivets must be cut out when required for the examination of the work.

All rivets are to be cup-headed at each end, and the heads are to contain not less than $1\frac{1}{2}$ diameters of the rivet.

7. The gussets and cover plates must be shaped to the full sizes shewn on the drawings, and any plate or bar in which the rivet holes have been made nearer to the edge than shewn on the drawings will be rejected.

8. In all cover plates the fibre of the material must run in the direction of the length of the principal strains.

9. The ends of all plates, &c., to be jointed abroad must butt with perfect accuracy over the whole of the meeting surfaces, and any joint which fails to form a perfect butt all over will involve the rejection of the plates and bars which cannot be made to fit without being shortened.

10. All screwed bolts are to be screwed to Whitworth's standard thread, and all nuts must fit too tightly to be turned by hand. The head and body of all bolts are to be forged out of one piece of rod or bar iron.

11. All bolts are to be turned and fitted to the work. The holes are to be bored for them the exact size, so that the bolts have no shake whatever in the holes.

Completion of Work and Erection.

12. The work is to be erected temporarily complete as a whole in every respect, with all bolts, nuts, and washers in place, so that accuracy of fit and perfection of workmanship may be ascertained by inspection.

Painting, Marking, &c.

13. The whole of the ironwork, with the exception of the bolts, nuts, washers, and rivets, after being scraped perfectly free from rust, scale, and dirt, and well brushed with steel brushes, is then to be immediately painted with one good coat of red oxide of iron paint. It is afterwards to be painted with one coat of good oil paint of such colour as shall be approved by the Consulting Engineer. The bolts are to be heated to the temperature of melted lead, and then dipped into boiling linseed oil. Wherever plates or bars are to be riveted together, the surfaces that will be in contact are to be well cleaned immediately before plating.

14. Every portion of the work is to be very distinctly stencilled with paint and marked with the punch for guidance in erection, and every piece or bundle of iron is to be similarly marked, and every packing case branded with such shipping and other marks as the Consulting Engineer may require.

Packing, &c.

15. The work is to be sent out in convenient parts for shipping and for erection, divided as indicated on the drawings.

All projecting plates or angle bars are to be kept in shape by timber or angle irons bolted or spiked to them, as may be directed by the Consulting Engineer.

16. All straight bars and plates, except small pieces, are to be sent out in convenient bundles temporarily riveted or bolted together, or bound with rod iron, as may be directed by the Consulting Engineer.

All bolts, nuts, and washers, all plates under 12 inches square, and generally such small articles as may be selected by the Consulting Engineer, are to be packed in strong cases, each weighing, when full, not more than 7 cwt. The cases are to be made of $1\frac{1}{4}$-inch deal boards, with $1\frac{1}{8}$-inch elm ends, nailed with $3\frac{1}{2}$-inch wire nails, and strengthened by battens and $1\frac{1}{8}$-inch No. 16 B. W. G. hoop iron, and the whole made secure for transit to India.

17. The cost of all painting, temporary erection, testing, marking, packing, and delivery is to be included in the price named in the tender.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

RAILWAY STATISTICS.

No. IX OF 1892-93.

APPROXIMATE STATEMENT OF GROSS RECEIPTS OF INDIAN RAILWAYS.

N.B.—As regards the figures in column *Total Receipts from 1st April to date*, audited figures have been used as far as possible.

Latest Return received.	Railways.	Average receipts per mile per week in 1891-92.	Week ending 6th June 1891. Total mean mileage worked.	Receipts. Total.	Receipts. The Gazette of India.

No. 26.} SIMLA, SATURDAY, JUNE 25, 1892.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the week ending at 8 a.m. on Saturday, 18th June 1892.

The principal meteorological features of the week under review have been the north-westerly advance and disruption of the severe cyclone which appeared over the north-west of the Bay, the appearance of well-marked monsoon conditions and weather over the Indian region, and the disappearance of these conditions at the close of the week. The two first mentioned features occasioned a considerable and widely extended rainfall and a consequent lowering of temperature over a very large part of India, but the change at the close of the week showed that the monsoon advance has been premature, and that a well-marked reaction was setting in.

The chart of Sunday, the 12th, showed that the cyclone which had formed over the north-west angle of the Bay and had crossed the Orissa Coast early on Saturday morning had advanced north-westward, and that its centre lay close to Sutna at 8 A.M. The lowest isobar was 29·35″, but probably at the actual centre pressure was considerably lower. The barometer had risen very fast in Bengal, and was rising in all parts of the Indian region, except in the immediate neighbourhood of the storm. The wind circulation was very largely influenced by the storm, and over a large part of India was drawn into the circulation around the centre. The easterly current which prevailed to the north of the storm extended north-westward well into the Punjab. On the West Coast the wind was abnormally southerly. Scattered showers of rain were reported from the centre and west of the Peninsula and general rain over Burma, Bengal, Central India, and the east of the North-West Provinces. At Sutna the amount received exceeded 5 inches. On the morning of the 13th the cyclone was still near Sutna, but was filling up quickly. The winds were much the same

as on the preceding day. Rain was general and moderately heavy over the North-West Provinces and the central parts of the country as well as in Lower Burma, while light or moderate scattered showers were reported from the west and centre of the Peninsula, Assam, East Bengal, and the North-West Himalayas. By the morning of the 14th the cyclone had practically disappeared. Pressure was lowest over Upper Sind, relatively low over the Gangetic plain, and highest in the extreme south. The rainfall was moderate or light, and scattered over Burma, Assam, Bengal, the North-West Provinces, the Punjab, the Central Provinces, and the west and centre of the Peninsula. On the 15th, except that gradients were slight on the West Coast and that an elbow of relatively high pressure existed over Guzerat and part of Rajputana, the conditions were of a distinct monsoon type. Pressure was lowest over the Western desert, and an arm of low pressure lay over the Gangetic plain with higher readings along the line of the hills. In consequence westerly winds prevailed over Southern and Central India and easterly winds in Bengal and up the north side of the Gangetic plain. Rain was well distributed, the only large regions which received no rain being Sind, Guzerat, and the central parts of the Peninsula (except Hyderabad). The amounts were nowhere large. On the 16th the relatively high pressures which had existed along the line of the hills had disappeared, and with them had gone the easterly current. Pressure decreased from a high pressure area in the extreme south to a low pressure area lying close to the hills in the Punjab. A very slight depression also existed over Central Bengal. The distribution of rain was much the same as on the preceding day, showers having fallen very generally, except in the two regions mentioned on the 15th. On the 17th pressure decreased steadily from the south to the north, westerly or variable breezes prevailed generally, and showers were again reported from the greater part of the country, except the Gangetic plain, where the fall had ceased. On the 18th conditions were practically unchanged. There was again very general rain over the Peninsula and North-East India and scattered showers in Rajputana and the Punjab, but no rain over the Gangetic plain.

Temperature.—Owing to the general rainfall, the mean temperature was low, the abnormal deficiency for the whole of India being 2·2°.

The following table shows the variations of the mean temperature from the normal on each day of the week for the principal Provinces of India:

Province.	12th.	13th.	14th.	15th.	16th.	17th.	18th.	Mean variation of week.
	°	°	°	°	°	°	°	°
Burma	+·03	—0·7	+0·2	+0·6	+0·5	—0·5	+0·9	+0·2
Bengal and Assam . .	—4·4	—0·9	—0·3	—1·2	—2·9	—2·0	—1·2	—1·8
North-West Provinces and Oudh.	—9·9	—12·2	—8·5	—7·0	—6·1	—3·6	—2·3	—7·1
Punjab	+1·6	+1·9	+0·1	—4·0	—9·4	—10·7	—11·7	—4·6
Bombay	—0·9	—0·3	+0·8	+0·8	+1·1	+1·0	—1·0	+0·2
Berar and Central Provinces	—0·9	—5·1	—2·4	—1·6	—0·7	+0·1	+0·7	—1·4
Guzerat and Central India .	—5·7	—7·0	—4·9	—3·4	—5·0	—3·4	—2·4	—4·5
Sind and Rajputana . .	+1·7	+0·1	+2·5	+0·3	—6·0	—6·6	—4·5	—1·8
Madras	—2·6	+1·6	+2·6	+2·4	+1·1	+0·1	—0·1	+0·7
Mean for whole India . .	—2·3	—2·5	—1·1	—1·5	—3·0	—2·8	—2·4	—2·2

The final line of figures shows that on each day of the week the mean temperature for the whole of India was below the normal. The coolest day was the 16th, with an abnormal deficiency of 3°; the warmest day was the 14th, with a deficiency of only 1·1°.

The provincial variations show that in Burma, Bombay, and Madras the mean temperature was about normal, while the other Provinces exhibited a deficiency which was greatest in the North-West Provinces and Oudh. For the last three days of the week the maxima in North-West India were exceedingly low.

Rain.—For the first time for many months rain is reported from all the rainfall divisions of the Indian region. The table at the close of the summary shows the amount of rain received in each case, and shows that effective rainfall was received in all the divisions. The first column of the table shows that the average actual rainfall received was as much as 11·95 inches in Arakan, which was followed by 6·88 inches in Tenasserim, by 6·04 inches in Assam (Surma), by 4·18 inches in Lower Burma, and by over 3 inches in Chota Nagpur and the Konkan, while the smallest average actual rainfall was 0·16 inch in the Central Punjab. The actual distribution of rain during the week differed from the normal in two or three important points. The heaviest rainfall is ordinarily reported from divisions in North-East India, but the fall in Malabar is usually nearly as heavy, whereas in the case of the present week the amount received in the south-west of the Peninsula was very much less than that received in the north-east. Similarly, in ordinary years, the region of least rainfall during the present week is Sind, whereas the actual rainfall minimum was in the Central Punjab. The third column of the rainfall table shows that the rainfall of the week has been, when compared with the normal, excessive in twenty and deficient in twenty-eight divisions, while in two divisions there was no variation from the normal. The greatest actual deficiency was 7·76 inches in Malabar, but large deficiencies were also reported from Assam, North and East Bengal, and the Konkan. The greatest actual excess was 2·02 inches in Chota Nagpur. The regions of deficient rain included the following divisions: all the Burma divisions, Assam, all the Bengal divisions except Central Bengal and Chota Nagpur, the submontane division of the North-West Provinces, the Central and hill divisions of the Punjab, all the divisions in the west and centre of the Peninsula, Berar, the Central Provinces divisions except the central, Rajputana, and Central India (West), and the Jaipur division on the East Coast. Elsewhere the rainfall was more or less excessive.

The three concluding columns of the table show that up to date the monsoon rainfall has been satisfactory over a large part of the country. All over West Bengal, the North-West Provinces, the west and centre of the Punjab, the Konkan, Khandeish, the Bombay Deccan, the central parts of the country, the extreme north-west of India, and the east of the Peninsula the rainfall of the past three weeks has been heavier than usual. This excess has been most marked over the Gangetic plain and West Bengal.

The record of heavy falls shows several considerable totals for the week in North-East India and the central parts of the country, the falls being largely attributable to the action of the cyclone in the early part of the week.

The following are the more important amounts:

Division.	District.	Station.	Amount.
Tenasserim . . .	Amherst . .	Thatôn . .	8·83 inches.
Assam	Khasia Hills .	Cherra . .	16·52 ,,
Bengal	Tipperah . .	Chandpur .	8·26 ,,

W. L. DALLAS,

Assistant Meteorological Reporter to the Government of India.

SIMLA, *23rd June, 1892.*

E. C. BUCK,

Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 18th June.*—The rainfall, though for the week under report satisfactory only in portions of the affected area, has since been generally good. Cultivation is proceeding actively where rain has fallen. Water-supply and pasture have generally improved, though still deficient in parts of Anantapur, Bellary, and Nellore. Prices are nearly stationary; rather easier in the Circars, but slightly dearer in Madura and Tinnevelly. FAMINE RELIEF: *Numbers on works*:—Deccan 58,077, Karnatic 25,638, and Central 7,350: *Total* 91,065 against 86,885 last week; increase in Bellary and Nellore owing to delay in rains, and decrease in Salem. *On gratuitous relief*:—Deccan 759, Karnatic 83, and Central 213: *Total* 1,055 against 1,037 last week. Loans for wells:—Deccan Rs. 6,94,000, Karnatic Rs. 4,08,000, and Central Rs. 9,86,000: *Total* Rs. 20,88,000. Wells completed—570, 1,906, and 1,215: wells under construction or repair—5,750, 1,868, and 6,850 in respective blocks. Agriculturists' loans—Rs. 65,000 in each block: *Total* Rs. 1,95,000.

Bombay.—*For week ending 22nd June.*—Rain throughout the Presidency; generally good or moderate. Ploughing and sowing operations are progressing generally. Transplantation has commenced in two districts. Fodder is scarce in parts of ten and water in parts of four districts. Cattle are poor in parts of three districts. Prices are generally steady. FAMINE RELIEF: *Numbers on works*:—Bijapur 167, Belgaum 2,727, Dharwar 910, and Kolhapur 8,526: *Total* 12,330 against 11,278 last week.

Bengal.—*For week ending 21st June.*—Fairly general rain at the beginning of the week, followed by a break towards the close. Agricultural prospects are now everywhere favourable, ploughing and sowing have made considerable progress, and all standing crops promise well. Reports from the affected districts of North Bengal and Behar continue satisfactory. The improvement to agriculture caused by the recent rain is maintained; good progress is being made, and work promises to be plentiful. Prices still remain high in all districts. Cattle are generally in good condition, and now obtain ample supplies of fodder and water. FAMINE RELIEF: *Numbers on works*:—Muzaffarpur 6,045, Darbhanga 25,815, Monghyr 999 (including 13 dependants), Bhagalpur 6,803, and Dinajpur 365: *Total* 40,027 against 63,311 last week. *Numbers on gratuitous relief*:—Darbhanga 923, Monghyr 254, Bhagalpur 1,494, and Purneah 342: *Total* 3,013 against 2,796 last week.

North-Western Provinces and Oudh.—*For week ending 22nd June.*—Good rain has fallen in Gorakhpur and Jhansi and local showers in most other districts. More rain is needed for the autumn sowings. Ploughing operations are in progress. Injury to sugarcane and indigo is reported from Bareilly owing

to strong west winds and want of rain. Supplies and fodder are adequate. Prices are rising in several districts and are high in Ballia and Almora.

Punjab.—*For week ending 22nd June.*—Rain has fallen in nine districts. Prices are generally stationary. Sowings of autumn crops are in progress on irrigated lands in Lahore, Mooltan, and in the hills districts, in parts of which, however, rain is awaited. Water is getting scarce in Kangra and parts of Dera Ismail Khan. Canals are flowing feebly in Mooltan, except the Sidhnai Canal. The Bara river in Peshawar is in flood. Wells are drying up in Jullundur, and rain is much needed in all districts. Extra *rabi* crop is improving in Dera Ismail Khan. Prospects of crops are unfavourable in Kangra, on irrigated lands in Lahore, and in Shahpur. Condition of cotton and cane is average in Amritsar and has improved in Peshawar. White ants are injuring sugarcane in parts of the Sialkote district. Fall of hail in parts of Ferozepore. Condition of cattle good, except in eight districts. Pasturage sufficient in four districts, but scarce elsewhere.

Central Provinces.—*For week ending 22nd June.*—Rainfall insignificant, except in the Nerbudda Valley and Chhattisgarh districts. More rain is needed in Nimar and Nagpur; autumn sowings have been retarded in the former district. Fodder insufficient in parts. Prices steady.

Burma.—*For week ending 18th June.*—Rainfall abundant in all districts except Prome, Thayetmyo, Katha, and Lower Chindwin, where showers are light, and Shwebo, Yeu, Sagaing, Pakkoku, and Kyaukse, where no rain fell. Ploughing, sowing, and transplanting of wet weather paddy are in general progress in both Upper and Lower Burma. The price of paddy has fallen considerably in one district, slightly in two, while in the Northern Shan States it has risen slightly. Price of rice has fallen considerably in two districts. FAMINE RELIEF: *Numbers on works*:—Shwebo 3,131, Yeu 1,135, Lower Chindwin 616, Myingyan 1,137, Meiktila 2,327, Yamethin 3,915, and Magwe (for week ending 11th June) 161: *Total* 12,422 against 13,853 last week.

Assam.—*For week ending 21st June.*—Weather seasonable. Sowing and transplanting of late rice continue. Condition of cattle is normal. Fodder abundant.

Mysore and Coorg.—*For week ending 22nd June.*—MYSORE: Rainfall good in parts of three districts; elsewhere slight. Sowing operations have been retarded in parts for want of more rain. Prices have slightly fallen in one district. FAMINE RELIEF: *Numbers on works*:—Bangalore 184, Kolar 1,393, Shimoga 199, Chitaldroog 353, and Tumkur 749: *Total* 2,878 against 2,771 last week.

COORG: Rainfall good. Ploughing and forming of nurseries continue. More rain is wanted. *Ragi* (*Eleusine coracana*), coffee, and cardamom are thriving. Prices stationary. Water-supply and forage for cattle are sufficient.

Berar and Hyderabad.—*For week ending 22nd June.*—BERAR: Average rainfall 54 cents. Weather cloudy and sultry. Land under preparation for autumn crops. Sowing of cotton has commenced in four districts. There is some local scarcity of fodder and water, and prices are rising in two districts.

HYDERABAD.—(Report not received.)

Central India.—*For week ending 22nd June.*—Rain throughout Central India, except in Baghelkhand and Western Malwa. Agricultural operations are in progress, and sowing has begun in Bhopal, Bhopawar, and Western Malwa. Condition of agricultural stock generally good, except in parts of Bhopal and Neemuch. Pasturage is still scarce in Bhopal, but good elsewhere. Prices of food-grains are high in Bhopal, Western Malwa, and Neemuch, rising in Bundelkhand, and steady elsewhere.

Rajputana.—*For week ending 22nd June.*—Rainfall ·77 inch in Abu, over one inch in Pertabgarh and Kotah, near one inch in Ajmere and Ulwar, and less than one inch in Kerowli and Bikanir; slight elsewhere. Ploughing for autumn crops has commenced in Ajmere and seven Agencies. Standing crops fair in Meywar. No material change in condition of agricultural stock since last week. Pasturage and fodder sufficient in nine Agencies; still scarce elsewhere. A fall of prices has occurred in Ajmere, but generally they are steady. FAMINE RELIEF: *Numbers on works*:—Ajmere-Merwara 28,024, Kishengarh 1,681, Bikanir, 3,381, and Marwar (for preceding week) 2,012: *Total* 35,098 against 43,281 last week. *On gratuitous relief*:—Ajmere-Merwara 10,806 (including 3,630 in receipt of home relief), Kishengarh 170, Bikanir 1,599, and Marwar (for preceding week) 2,645: *Total* 15,220 against 15,658 last week.

Nepal.—*For week ending 16th June.*—Weather warm with occasional showers. Prospects good.

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

No. 1156-69.
109

Extract from the Proceedings of the Government of India in the Revenue and Agricultural Department, (Surveys),—dated Simla, the 11th June, 1892.

Read—

The General Report on the Operations of the Survey of India Department for the year 1890-91.

RESOLUTION.

The Report for 1890-91 has been brought out with commendable punctuality, is illustrated by excellent maps and photographs, and is well compiled.

2. Twenty-three parties and seven detachments were employed during the year on the various operations indicated in the following list:—

Nature of Survey.	No. of parties.	No. of detachments.
1. Trigonometrical	1	...
2. Topographical	4	1
3. Forest	4	...
4. Cadastral	7	1
5. Traverse	2	...
6. Scientific	3	...
7. Geographical	2	5

The surveys under the 3rd, 4th, and 5th heads of the list were of a remunerative character calculated to lead to the enhancement of land or forest revenue. Thus thirteen out of the twenty-three parties were engaged on revenue producing work.

3. The strain which had been thrown on the Department by the unexpected loss of officers, the annexation of Upper Burma, and other causes was noticed in the Resolution on last year's report. During the year the Department was brought by recruitment up to its full strength, but the strain on it has lightened very little, and the Government of India are pleased to acknowledge the satisfactory manner in which the officers of the Department have endeavoured to fulfil the programme which has been placed before them.

4. It is unnecessary that any detailed account of the work done in each branch of the survey should be recorded in this Resolution, in which reference need only be made to the summary of the operations contained in the Surveyor General's review. One point, however, which deserves special mention is the satisfactory reduction of the cost rates shown in the tables on pages 82-85 as compared with the rates which prevailed a few years ago. This remark applies chiefly to the cost of cadastral surveys. The reduction is mainly due to the conscientious efforts of the officers of the Department to carry out the two principles of utilising local agencies and of expanding the subordinate staff under each controlling officer, and partly also to the increased experience gained in cadastral operations.

5. The opportunity may be usefully taken to draw attention to the canon laid down in the Imperial Resolution on survey administration, No. 45-S., dated 4th September 1882, that all field-surveys should be based upon a skeleton or framework prepared by the officials of the scientific department, and that details only should be filled in by locally trained agency. A tendency is often shown, when

the Survey Department has started operations in a province, to permit continuance of them entirely by the local agency which has been initially trained by the survey officials. This course may be successfully adopted for a short time, so long as the instructions of the survey officials are remembered; but sooner or later the accuracy of the traverse or skeleton survey prepared by new or inefficiently supervised workmen becomes impaired, and the maps are rendered more or less useless for inclusion in any cartographical series of recognized accuracy. The reduction of rates which has now been attained by the Survey Department has removed the objection of expense, which formerly stood in the way of the acceptance by some Provincial authorities of its aid in cadastral surveys, and the Government of India see no reason why any departure from the canon laid down should in future be justified. The matter is of great importance in connection with the maintenance of the topographical maps of the country, which can always be corrected at an insignificant cost if the cadastral maps maintained by local agency are based upon the same series of survey stations, but not otherwise. It becomes, therefore, the duty of the Surveyor General to bring to the notice of the Government of India any material breach of the canon laid down in 1882 in order that unnecessary expenditure may not be incurred in maintaining the cartographical series of maps in the Imperial office. His Excellency the Governor General in Council has, however, reason to be satisfied that at present the continuous efforts of the Department to reduce the acreage rates of all classes of survey are fully recognized by Provincial Governments, and that it is to this circumstance that the expansion of the programme which has been entrusted to the Survey Department, and which has resulted in the maintenance of the Imperial Survey establishments at a fuller strength than could at one time be anticipated, is greatly due.

6. The most important example of the now recognized utility of the Imperial Survey Department in provincial surveys is its present employment upon all cadastral and field-surveys in Bengal, in which province all such surveys had in previous times been executed by provincial establishments. It was essential that on this occasion the survey should be executed by the cheapest agency compatible with correct results. Colonel Sandeman, whose valuable work in bringing about the most economical amalgamation of scientific and local agencies that has as yet been effected was acknowledged by the Surveyor General and the Government of India in connection with the report for 1889-90, has been selected to take charge of all cadastral surveys in Bengal—a work which, in view of the forthcoming field-survey of Behar, is of no little magnitude. It is creditable to the Imperial Survey Department that this result has been secured by the persistent endeavours of its officers to reduce the acreage cost of survey to rates which justified the Provincial Government in accepting their control over the local surveys.

7. The same position has been obtained in Burma. There, however, the local officers were at first less capable of being utilized than in Bengal or Northern India, and the cadastral surveys had perforce to be conducted entirely by professional agency. It is satisfactory that during the last year material progress has been made in training Burman surveyors, and that a prospect is now held out of a gradual reduction in cadastral rates. Care, however, will have to be taken that the new local agency is not made too independent of the professional department, and that ultimate expenditure is not caused by a neglect of the canon to which reference has been made in paragraph 5. The same caution must be applied also to Assam.

8. The relations between the survey officials and the Provincial Governments have throughout the year been on a satisfactory footing, and the Government of India are glad to observe that the more frequent tours of the inspecting officers have tended to secure the result, which was anticipated, of removing such local difficulties as had hindered progress in consequence of insufficient personal communication between the Provincial authorities and the responsible officers of the Survey Department. The establishment of a thorough understanding between the Imperial Survey Department and the authorities in the Province where it is at work has, under the present system of financial decentralization,

become one of the most important duties of the more responsible officers of the Department. No effort should be spared to secure this result.

9. The outturn of work has increased in every branch of the head-quarters offices, and it is satisfactory to notice that the demand for maps is steadily increasing. The total number issued in 1890-91 was 208,848, valued at Rs. 1,45,245. This number is four times greater than it was ten years ago. The Mathematical Instrument Department also did good work during the year. The value of the instruments issued amounted to Rs. 2,88,337, or Rs. 17,879 more than in the previous year.

10. The demands from the public for heliogravures are increasing, and the introduction of the photo-block process in half tones is satisfactory. The success with which Colonel Waterhouse has kept the photo-lithographic printing of the Department abreast with, and in some directions ahead of, European improvements is a subject for congratulation.

11. At the Dehra Office material progress has been made towards the reduction and publication of the trigonometrical records of past years, a work which it is important to bring to an early close in view of the Dehra buildings being required for other imperial purposes. Solar photography, which was started in 1877 at the request of the Industry, Science and Art Department, has been continued as usual, photographs of the sun having been taken throughout the year on all days that the sun was visible, and the negatives sent to the Solar Physics Committee at South Kensington. The results are included in the yearly volumes of Greenwich observations. But it is probable that a new observatory for the purpose of heliographic observations will be shortly established under a clearer atmosphere in the Madras Presidency, and the Dehra series will then cease.

12. The Department has been maintained in an efficient manner throughout the year, and the Government of India acknowledge the services rendered by the Surveyor General and the other officers of the Department.

ORDER.—Ordered, that the above Resolution be forwarded to the Surveyor General of India, to the Inspector General of Forests, to the Local Governments and Administrations noted on the margin, and to the Foreign, Military, and Public Works Departments.

Madras.	Punjab.
Bombay.	Central Provinces.
Bengal.	Burma.
North-Western Provinces and Oudh.	Assam.
	Coorg.

Ordered also, that the Resolution be published in the Supplement to the *Gazette of India*.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

MILITARY DEPARTMENT.

THE CANTONMENT CODE, 1892.

MEMORANDUM.

(ANNEXURE TO THE REVISED DRAFT OF THE CANTONMENT CODE, 1892.)

1. This Code, framed under the Cantonments Act (XIII of 1889), provides for matters coming under one or other of the following heads:

(1) Matters hitherto provided for by rules framed under Act XXII of 1864* (for Bengal), Bombay Act III of 1867 (for Bombay), and Madras Act I of 1866 (for Madras): all such rules [except as noted in clause (3) below] had of course the full force of law.

(2) Matters hitherto provided for by the three Codes of so-called "Military Regulations."† These Codes are by no means to be confounded with mere army orders; they contained all such regulations of the Governor-General in Council as related to military subjects, including as one of those subjects the management of lands held by Government for military purposes. A good deal of misapprehension has existed regarding these "Regulations," some of which were promulgated as long ago as A. D. 1770, and some of which have legal force while others have not. Such as consist of extracts from Bengal, Madras, and Bombay Regulations passed by the

* Re-enacted by Act III of 1880.

† Re-published as the "Army Regulations, India," in 1887.

Legislature before 1834 have, of course, the force of law, and others have legal force in individual cases wherever they have been incorporated expressly or by implication into the terms of agreements under which grantees were permitted to occupy portions of the above-mentioned lands. Such regulations, however, as do not come into either of the above categories are simply executive orders of Government binding only on persons in the service of Government.

(3) Matters hitherto provided for in a rule incorporated with those referred to in clause (1), but which rule was for some reason *ultra vires* either owing to its subject being one for which the Act had given no power to make a rule, or owing to the rule in question never having been formally made applicable to the particular cantonment concerned.

(4) Matters not hitherto provided for at all. Almost all these are matters regarding which rules have long been needed, and for the majority of which provision has long ago been made in municipalities.

The principal changes made either by the Code itself or by the Act under which it is framed are noted in the following paragraphs.

Chapter I.

2. The Code will be applicable to all India instead of there being, as hitherto, a separate set of rules in each Presidency.

Chapter II.

3. The Cantonment Committee is no longer a merely consultative body—"the council of the Commanding Officer." It is now by the Cantonments Act, 1889, itself the local authority. At the same time there is no reason to suppose that it was the intention of the Legislature to abandon the power to hold the Commanding Officer of a cantonment responsible to Government as the executive head of affairs for any mismanagement in those affairs; it appears to us essential to maintain this long-standing principle, and that clause (4) of section 26 of the Act gives full power to do so. The Code, therefore, provides that while the Commanding Officer will ordinarily act simply as the President of the Committee, he will still have the power on an emergency to act independently of them, provided that all such independent action is both in accordance with the law and is at once reported for the confirmation or otherwise of the Commander-in-Chief. Having this power (however rare may be its exercise), the Commanding Officer of a cantonment can still be held responsible as heretofore. Considerable executive powers are also throughout the Code vested in the President of the Committee.

Chapter II.

4. The General Officer Commanding the district will no longer be President of the Cantonment Committee of the head-quarter station of his district. Throughout the Code it is constantly necessary to provide a referee, confirming authority, or authority to hear appeals from the orders of the Cantonment Authority* other than the Commander-in-Chief. The Officer Commanding the district is the only proper person who could be designated, and his being himself President would make this impossible. The Deputy Surgeon General is also no longer a member of the Cantonment Committee of the head-quarter station of the district.

Chapter II.

5. The powers of the Commanding Officer of a cantonment where there is no Cantonment Committee have hitherto been somewhat ill-defined. It is now provided that such a Commanding Officer will have the same powers as a Cantonment Committee, but subject to the proviso that the Local Government may, on the recommendation of the Commander-in-Chief, modify this arrangement in any way thought desirable.

Chapter II.

6. In the constitution of the Cantonment Committee, it appears desirable that all Commanding Officers should be members of the Committee, more especially in view of the altered character of that body. The only other change of

* "Cantonment Authority" means the Cantonment Committee or the Commanding Officer of the Cantonment, according as the cantonment is one where there is or is not a Cantonment Committee.

importance is the enabling the District Magistrate when absent from the cantonment to depute a (European) Magistrate of the 1st class to represent him.

As it may occasionally be desired to add to the Committee other officers of Government, or house-owners, or other persons, the Code enables the Commander-in-Chief to do this either permanently or temporarily.

Chapter II.

7. As regards the Cantonment Magistrate, there will no longer be in the smaller cantonments officers with powers merely "to try breaches of Cantonment rules." There must now, by section 5 of the Act, be in every cantonment (however small) outside the Presidency towns an officer appointed as the Cantonment Magistrate. The Code, therefore, proceeds on this basis. As regards the position of the Cantonment Magistrate, the Code aims at maintaining this entirely unchanged; in all executive matters he will be simply the secretary and agent of the Cantonment Authority, acting under its full control; in judicial matters his position is regulated by the Code of Criminal Procedure and other Acts of the Legislature, and is unaffected by this Code.

Chapter III.

8. Regarding control over Cantonment Committees, it is evident (in view of the very important interests of Government involved, of the constant change in the *personnel* of those Committees, and of the impossibility of continuity in their proceedings) that it is most essential, no less on behalf of the welfare of the whole community than of the interests of Government, that there should be a firm central control over their proceedings. This control is vested as heretofore in the Commander-in-Chief, who (acting as the agent and representative of the Governor-General in Council) is given power to require a Cantonment Committee to take any measures which may at any time be considered by the Commander-in-Chief or the Government necessary to the proper administration of the cantonment. Minor powers of control are also given to Officers Commanding districts, with the proviso that any exercise of such powers is to be reported at once to the Commander-in-Chief for confirmation or otherwise.

Chapter VI.

9. In the rules which deal with the management of the Cantonment Fund, the main desideratum appears to be to more carefully define (1) the procedure to be observed, and (2) the objects on which the funds may lawfully be expended, while at the same time strictly to avoid introducing any radical changes, as the existing procedure works well and there appear to be various grave disadvantages in allowing it to be in any way disturbed.

The rules on this subject have therefore been drawn up on this principle. While the matters in question have been carefully defined and set in suitable legal language, the existing procedure has been kept unchanged; the objects on which expenditure may take place are kept the same as at present; the sums which shall form the income are kept the same as at present; and the sanctioning authority for all expenditure is kept the same as at present, *viz.*, the Commander-in-Chief.

Chapter VI.

10. Regarding the amount of freedom to be given to Cantonment Committees over expenditure in cantonments, the Code gives a wide latitude in procedure. Where a cantonment is well provided with all sanitary requirements, and has an ample income to meet such requirements, it will be possible to make the control exercised over expenditure little more than nominal; where, on the other hand, a cantonment is ill-provided with sanitary appliances, and has so limited an income that it either is, or is in chronic danger of being, State-aided, there the strictest control can be exercised (in the interests of all concerned) over every item of expenditure however small.

Chapter VI.

11. As a code of law does not seem an appropriate place for a set of financial rules, especially as the latter at times require modification, when a very cumbrous procedure would be entailed, we have thought it best to leave all the financial rules which Cantonment Committees must observe to be drawn up (as now) by the Comptroller General, who will in doing so of course be guided by the views of Local Governments. It is necessary that all such rules, or modifications thereof, should receive the concurrence of the Commander-in-Chief *in*

India, as otherwise modifications pressed for in one part of India might take place which would be very unsuitable in another part of India, while it is absolutely necessary that, just as there is only one Code, there should be only one set of financial rules for all cantonments wherever situated. The inconveniences of allowing local alterations in such rules are a matter of practical experience, that arrangement having been tried some years ago, and we therefore consider that the course adopted by us is the only one which promises to be satisfactory. The delegation to the Comptroller-General of the power to make such rules appears in the circumstances to be unobjectionable.

Chapters VIII to XII.

12. In the five important chapters which deal with house property in cantonments the aim of the rules is—

(i) To prevent the granting by any officer, or authority, of permission to occupy land belonging to the Government, except in the regular manner, the latter involving, in the submission of applications for a grant, the preparation of plans and compliance with various formalities.

(ii) To prevent the occupation by any person of such land until he has duly subscribed to the conditions on which alone Government permits its land to be occupied, by the execution of an agreement (or in some cases the taking of a license) in which those conditions are detailed.

(iii) To prevent the alienation of the land, owing to the loss of such documents, by carefully detailed rules regarding their registration, and by the deposit of duplicate and triplicate copies in charge of different authorities.

(iv) To carefully define the manner in which the priority of right to rent houses [which is one of the "conditions" noted in clause (ii) above] shall be exercised, with a due regard to the interests of the grantee, of the officer, and of the Government.

(v) To provide carefully detailed rules on the subject of rents and repairs which shall be fair to both landlords and tenants, and which, while recognising that the tenant is in this case an officer of Government, and therefore placed under restrictions as to residence such as do not apply in the case of private persons, shall also carefully safeguard and protect the interests of the landlord, and prevent his being put to loss owing to unfair treatment on the part of such officers as tenants.

(vi) To provide carefully detailed rules for arbitration in all disputed cases arising on the subjects referred to in clause (v).

(vii) To obviate the inconvenience of having absentee owners, by a few simple rules as regards estate agency.

In dealing with the subjects mentioned in clauses (v) and (vi), the principal provisions of sections 23, 24, 25 and 27 of the Cantonments Bill of 1888 have been incorporated in Chapters IX and X.

In the present state of the law the provisions of Chapters VIII, IX and X on the above subjects will only be applicable (except as noted in the next paragraph) to grants made after the issue of this Code. This will no doubt make a very undesirable complication in this already difficult and complicated question, but it is at present unavoidable pending a further Act of the Legislature authorising the making of rules as to conditions of occupancy applicable to all grants of whatever date.

Present grantees will have the option of applying to place their grants under the provisions of the Code, by doing which they will obtain certain tangible advantages in regard to protection from unfair and arbitrary treatment by their tenants, and in regard to a more satisfactory procedure where disputes arise on the subject of rent or repairs.

Chapters XIII to XXII.

13. In the ten chapters which refer to subjects affecting the public health, the Code aims at giving to the Cantonment Authority the widest possible powers allowed by the law over all those matters in which a strict control is now becoming recognised as of such exceptional importance in India from a sanitary point of view. The requirements of sanitary science are every year becoming greater as that science progresses, and, it being necessary that legislation should advance *pari passu* therewith, each new Code which may deal with sanitation should show an advance in this respect over those which have preceded it, especially in view of the position to which legislation on this subject has now advanced in England. It is, therefore, to be regretted that the section of the Cantonments Act, 1889, under which the rules are made (section 26) is of such very meagre scope in its sanitary aspect; and though this want may be partially remedied by a liberal use, under the authority of section 25 of the Act, of municipal enactments, still it is evident, for the reasons just noted, that such enactments cannot fail to fall short of what is required, and that a municipal enactment of, for instance, 1881 cannot meet the sanitary needs current in 1891, much less those which will be current by 1901. All, however, that could be done in this respect has been done, both by rules framed under section 26 of the Act and by a liberal use of all such municipal enactments as were suitable, and in particular of the Central Provinces Municipal Act (XVIII of 1889), which, by its more extended scope and breadth of treatment, much more nearly approaches the requirements of the case than any other Municipal Act, and has been invaluable. While, therefore, the advance may not be all that sanitary authorities would have desired, it is still considerable, and a comparison of the provisions of Chapters XIII to XXII of the present Code with those contained in Chapters III and IV of the Rules under Act XXII of 1864 will give some idea of the advance made.

As regards the Sanitary Officer, the Code recognizes that the main sanitary need of the day in India, next after a stringent control over the preparation and sale of articles of food and drink, is a Sanitary Officer for each cantonment without any other duties. It proceeds on the assumption that such an officer will be appointed, and defines his duties and responsibilities. As, however, it is necessary to provide for the existing state of things also, it is ruled that, pending such special appointment, the Sanitary Officer of a cantonment means the senior executive medical officer present. The Sanitary Officer is given in Chapter XIII complete supervision over every sanitary matter within the cantonment, together with full powers for bringing to the notice of superior authority any recommendation which he may make and which does not receive due attention.

14. As regards the much needed rules for exercising a strict control over the preparation and sale of articles of food and drink, which are the first sanitary requirement of the day in India, section 26 of the Act gives no direct power to make such rules; but to meet this we have in Chapter XVIII taken advantage of the recently passed Punjab Municipal Act (XX of 1891), section 137 of which contains such a power, and this will enable Cantonment Authorities to make rules for this purpose. But in adopting a municipal enactment like this, we have considered ourselves bound to adopt its restricting proviso also, to the effect that the section must be specially extended to each cantonment by the Local Government concerned. As, however, we are aware of the great inconveniences suffered in the past by cantonment rules having the force of law in one place and not in another by reason of requiring such special extension, and as the universal need of such rules as above referred to in every cantonment is undoubted, we desire to note here that we have included this proviso in the hope that all Local Governments will extend the section in question to all cantonments within their jurisdiction.

Chapters XXIII to XXXIV.

15. In the twelve chapters which deal with matters affecting the public safety and convenience the provisions of the Code are practically a selection from all the most suitable enactments of the principal municipalities. They are thus very comprehensive, and this is desirable seeing that the Code is intended to apply throughout the whole of India. Here again a comparison with Chapters

III and IV of the Rules under Act XXII of 1864 will show the extent of the advance made. By the almost entire use for this purpose of municipal enactments, rather than of rules made under the Cantonments Act, 1889, it is ensured that the provisions are those to which all dwellers in towns are already accustomed. The various subjects dealt with are sufficiently indicated by the headings of the chapters, which will be found detailed in the list entitled "Abstract of contents." A few of these chapters have only a partial application, not being applicable in provinces where Acts of the Legislature on the same subjects are, or may be brought, in force.

16. The remaining four chapters (containing supplemental provisions) call for no special remarks. Chapters XXXV to XXXVIII.

17. Any section of the Code (except such as are made under clauses (1) to (11) of section 26 of the Cantonments Act, 1889) can be extended to any reasonable distance in the vicinity of the cantonment. The procedure is an application through the Commander-in-Chief to the Local Government, which has power, under section 28 of the Act, to make such extension.

18. Each chapter is provided with a foot-note showing in outline its scope.

19. The authority for each section is noted in the margin in brackets.

GEORGE F. YOUNG, *Lieut.-Colonel,*
Assistant Quartermaster-General.

F. G. WIGLEY,
Personal Assistant to the Secretary to the Government of India, Legislative Department.

H. B. SANDERSON, *Colonel,*
Judge Advocate-General in India,
(*Attending Committee*).

SIMLA,
The 12th November 1891.

THE CANTONMENT CODE, 1892.

ABSTRACT OF CONTENTS.

PART I.

CHAPTER I.—Preliminary.

PART II.—GENERAL ADMINISTRATION.

CHAPTER II.—The Cantonment Authority and the Cantonment Magistrate.
III.—Control over Cantonment Authorities.
IV.—Cantonment Servants.
V.—Privileges and Liabilities of Members of Cantonment Committees and Others.
VI.—The Cantonment Fund.
VII.—Contracts.

PART III.—OCCUPATION OF LAND.

CHAPTER VIII.—Applications to hold Land.
IX.—Conditions of Occupancy.
X.—Committees of Arbitration.
XI.—Estate Agency.
XII.—Registration of Immoveable Property.

PART IV.—THE PUBLIC HEALTH, SAFETY AND CONVENIENCE.

CHAPTER XIII.—Sanitary Supervision.
XIV.—Conservancy and Drainage.
XV.—Water-supply.
XVI.—Markets.
XVII.—Slaughter-houses.
XVIII.—Control over certain Trades, Callings and Occupations.
XIX.—Hospitals.
XX.—Inoculation and Vaccination.
XXI.—Further Provisions for preventing the Spread of Infectious Disorders.
XXII.—Disposal of the Dead.
XXIII.—Encamping-grounds and Sarais.
XXIV.—Fairs.
XXV.—Extinction and Prevention of Fires.
XXVI.—Streets and Public Places.
XXVII.—Further Provisions relating to Buildings and Lands.
XXVIII.—Cattle-disease.
XXIX.—Grazing and Cruelty to Animals.
XXX.—Registration of Births and Deaths.
XXXI.—Verification of Weights and Measures.
XXXII.—Prevention of Gaming.
XXXIII.—Nuisances.
XXXIV.—Expulsion from Cantonments.

PART V.—SUPPLEMENTAL PROVISIONS.

CHAPTER XXXV.—Cognizable Offences.
XXXVI.—Appeals.
XXXVII.—Notices and other Documents.
XXXVIII.—Miscellaneous.

SCHEDULES.

I.—Forms.
II.—Instructions for the Guidance of the Public in case of Fire.
III.—Persons who may be expelled from Cantonments.
IV.—Cognizable Offences.
V.—Appeals.
VI.—Rewards to Informers.

INDEX.

THE CANTONMENT CODE, 1892.

CONTENTS.

PART I.

CHAPTER I.

PRELIMINARY.

SECTIONS.
1. Title and commencement.
2. Extent.
3. Repeal of prior rules and regulations.
4. Authority for the Code.
5. Definitions.

PART II.
GENERAL ADMINISTRATION.

CHAPTER II.

THE CANTONMENT AUTHORITY AND THE CANTONMENT MAGISTRATE.

Cantonment Committees.

6. Discharge of functions of Cantonment Authority by Cantonment Committee.
7. Constitution of Cantonment Committee.
8. President and secretary.
9. Holding of meetings.
10. Notice of meetings.
11. Quorum.
12. Minutes of the proceedings.
13. Meetings to be public.
14. Business at meetings.
15. Decision by majority of votes.
16. Record of decisions and dissents.
17. Exceptional powers of president.
18. Executive Sub-committees.
19. Consultative Sub-committees.
20. Proceedings of Sub-committees.
21. Joint Committees and their proceedings.
22. Cessation of the existence of Cantonment Committee.

The Commanding Officer as Cantonment Authority.

23. Discharge of functions of Cantonment Authority by Commanding Officer.
24. Power to limit or extend powers of Commanding Officer.

The Cantonment Magistrate.

25. Position of Cantonment Magistrate.
26. Discharge by Special Magistrate of functions of Cantonment Magistrate.

CHAPTER III.

CONTROL OVER CANTONMENT AUTHORITIES.

27. Administrative control of Commander-in-Chief over Cantonment Authorities.
28. Plans, estimates, returns, statements, reports and correspondence.
29. Power of Commander-in-Chief and Officer Commanding the district to call upon Cantonment Authorities and Joint Committees for information, and to record observations.
30. Power of Commander-in-Chief to delegate his powers or functions.
31. Powers of Officer Commanding the district if Cantonment Authority fails to perform duty.
32. Power of Officer Commanding the district to suspend action of Cantonment Authority or Joint Committee.
33. Orders made under section 31 or section 32 to be forwarded to Commander-in-Chief.

CHAPTER IV.

CANTONMENT SERVANTS.

34. Number and salaries of cantonment servants.
35. Control of Cantonment Magistrate over cantonment servants.
36. Disqualifications for employment.
37. Security to be furnished by certain servants.
38. Bond of sureties.
39. Classes of security.
40. Deposit of money, securities and security-bonds.
41. Periodical examination of securities.
42. Re-delivery of securities.
43. Procedure to be observed in punishing certain classes of servants.
44. Penalty on public conservancy establishments withdrawing from their duties without permission or notice.

SECTIONS.

CHAPTER V.

PRIVILEGES AND LIABILITIES OF MEMBERS OF CANTONMENT COMMITTEES AND OTHERS.

45. Liability of members of Cantonment Committees for loss, waste or misapplication.
46. Members of Cantonment Committees, cantonment servants and certain contractors and agents deemed to be public servants.
47. Penalty on member of Cantonment Committee or cantonment servant being interested in contract made with Cantonment Authority.
48. Members of Cantonment Committees and Commanding Officers not personally liable on contracts or for expenses.

CHAPTER VI.

THE CANTONMENT FUND.

Income.

49. Income of Cantonment Fund.
50. Income to be recovered within the year for which it is due.

Application of the Fund.

51. Application of the Fund.

Budget Estimates and Authority for payments.

52. Budget Estimate to be forwarded to Commander-in-Chief.
53. Procedure when Commander-in-Chief has reviewed the Budget Estimates.
54. Consolidated estimate for each province.
55. Expenditure limited to amounts provided in Budget or subsequently sanctioned.
56. Expenditure not to be incurred in anticipation of succeeding year's Budget.
57. Payments how made.

Investment of Balance.

58. Investment of balance of Cantonment Fund.

Accounts.

59. Accounts to be kept.
60. Audit of accounts.
61. Consolidated account of actuals.
62. Publication of accounts.

CHAPTER VII.

CONTRACTS.

63. Limitation of power to make contracts under which money is to be received into the Cantonment Fund.
64. Limitation of power to make contracts involving expenditure.
65. Officers by whom contracts are to be executed.
66. Consent of Cantonment Authority required before Cantonment Magistrate executes certain contracts.
67. Draft of contract for farming octroi collections to be referred to Commander-in-Chief.

SECTIONS.

68. Form of contracts executed by Cantonment Magistrate.
69. Obligation of Cantonment Magistrate to proceed by tender or auction in certain cases.
70. Time of payment for moveable property sold privately by Cantonment Magistrate.
71. Security for fulfilment of contract.
72. Power of Cantonment Magistrate to rescind contract made with servant of Cantonment Authority or of Government.
73. Power of Commander-in-Chief to rescind contract executed by Cantonment Magistrate.

Procedure as to Tenders and Auctions.

74. Publication of notice in case of tenders or auction.
75. Provisions as to tender forms, earnest money and security.
76. Opening of tenders.
77. Provisions as to time of payment, security and compensation for non-payment in case of auctions.
78. Cantonment Magistrate not bound to explain his action as to tender or bid.

PART III.

OCCUPATION OF LAND.

CHAPTER VIII.

APPLICATIONS TO HOLD LAND.

Applications for building-sites.

79. Cantonment Authority not to permit irregular occupation of land.
80. Applications for building-sites outside bazars.
81. Documents to accompany such applications.
82. Disposal of such applications.
83. Applications for building-sites in bazars.

Applications in respect of land granted before the commencement of this Code.

84. Applications by existing grantees to hold under Chapter IX.
85. Particulars required in respect of such applications.
86. Disposal of such applications.

CHAPTER IX.

CONDITIONS OF OCCUPANCY.

Conditions applicable in case of building-sites (outside bazars) granted after the commencement of this Code.

87. Conditions applicable in case of building-sites (outside bazars) granted after commencement of this Code.
88. Execution of agreement.
89. Form of agreement not to be varied.
90. Erection of buildings.
91. Commencement and completion of buildings.

SECTIONS.

92. Right of the Government to require the grantee to let the house to a military or civil officer.
93. Exercise of the Government right in behalf of a military officer where the house is not already occupied by a military officer.
94. Exercise of the Government right in behalf of a military officer where the house is occupied by another military officer.
95. Exercise of the Government right in behalf of a civil officer.
96. Procedure to be observed before the Government right is exercised.
97. Government right not to be exercised in respect of certain houses.
98. Sanction to be obtained before the house is occupied as a bank, hotel, shop or school or by a railway-administration.
99. Grantee to inform intending tenant, not being a military or civil officer, of his liability to ejectment.
100. Rent offered to be stated in notice.
101. Time to be allowed for giving possession of house.
102. Claims to compensation barred.
103. Terms of tenancy applicable to military and civil officers.
104. Responsibility of joint tenants for rent.
105. Reference to arbitration.
106. Procedure where military or civil officer fails to pay rent or damages.
107. Government right not to be exercised in behalf of certain officers.
108. Assignment of grantee's interest.
109. Penalties for breach of conditions whose breach is not otherwise provided against.
110. Right of the Government to resume the land.

Conditions applicable in case of building-sites in bazars granted after the commencement of this Code.

111. Conditions applicable in case of building-sites in bazars.
License or agreement.
Form of license not to be varied.
Erection of buildings.
Commencement and completion of buildings.
Right of the Government to resume the land.

Conditions applicable in case of land granted before the commencement of this Code.

112. Conditions applicable in case of existing grants.

Supplemental Provisions.

113. Form of agreement, or license, and annexure of site-plans.
114. Record of copies of agreements, licenses and site-plans.
115. Procedure where occupier fails to vacate house after issue of notice.
116. Power of entry.
117. Meaning of "house."

SECTIONS.

CHAPTER X.

COMMITTEES OF ARBITRATION.

118. Application of chapter.
119. Cases in which Committee of Arbitration may be convened.
120. Grounds for refusing to convene Committee.
121. Procedure for convening Committee.
122. Composition of Committee.
123. President.
124. Calculation of rent.
125. Decision to be by vote.
126. President's report.
127. Requisition on grantee to carry out repairs, and tenant's right to do so in default and to recover expenses.

CHAPTER XI.

ESTATE AGENCY.

128. Obligation of absentee owner to appoint agent.
129. Presumption as to agency.
130. Acceptance and termination of agency.
131. Notice to appoint agent.

CHAPTER XII.

REGISTRATION OF IMMOVEABLE PROPERTY.

Plans.

132. General plan.
133. Bazar plans.
134. Estates and streets to be distinguished.
135. Dating and authentication of plans.
136. Preservation of site-plans.
137. Plans not to be destroyed without sanction.

Registers.

138. Register of occupation.
139. Register of bazars.
140. Register of private land.
141. Register of assignments.
142. Reference in other registers to the register of assignments.
143. Annual inspection of register of occupation, register of bazars and register of private land.
144. Power to require information in view to the proper maintenance of such registers.

Power of Entry.

145. Power of entry.

PART IV.

THE PUBLIC HEALTH, SAFETY AND CONVENIENCE.

CHAPTER XIII.

SANITARY SUPERVISION.

146. Division of responsibility for sanitation.
147. Weekly sanitary report.
148. Duties and powers of Sanitary Officer.

SECTIONS.

149. Cantonment Magistrate's duties in respect of sanitation.
150. Reports by conservancy overseers.
151. Duties of conservancy overseers.

CHAPTER XIV.

CONSERVANCY AND DRAINAGE.

Conservancy.

152. Private privies, latrines and urinals to be under control of Cantonment Authority.
153. Prohibition of cesspools.
154. Power to prevent private privy, latrine or urinal being put to public use.
155. Provision of privies, latrines and urinals on private premises.
156. Protection of private privies.
157. Control over construction of new private privies, latrines and urinals.
158. Removal of insanitary private latrine or urinal.
159. Cleansing, repair or alteration of private privy, latrine or urinal.
160. Penalty for allowing offensive matter to flow or be put upon street or public place.
161. Employment of public sweepers.
162. Provision and maintenance of public latrines and urinals.
163. Rules as to provision of public latrines and establishments therefor.
164. Receptacles or places for temporary deposit of offensive matter and rubbish.
165. Collection of offensive matter and rubbish for public removal.
166. Penalty for not removing, or improperly removing, offensive matter or rubbish, or for keeping filth receptacle in a noxious state.
167. Removal and disposal by Cantonment Authority of offensive matter, rubbish and carcasses.
168. Vesting in Cantonment Authority of offensive matter and rubbish removed by its servants.
169. Penalty for careless removal of offensive matter or rubbish.
170. Penalty for detaining filth cart or receptacle in street or public place.
171. Further provisions as to removal and disposal of carcasses.
172. Penalty for depositing carcass in street or public place.

Drainage.

173. Powers where private drain is not adapted to general drainage system of the cantonment.
174. Power to require proper drainage of building or land insufficiently drained.
175. Power to compel drainage of group of buildings by a combined operation.
176. Authority to occupiers of estates to carry drains through land occupied by other persons.
177. Power to complete private drains by carrying them through public land.
178. Covering of private drain.

SECTIONS.

179. Power to control construction of private drain.
180. Penalty for making or altering without permission a drain leading into a public drain.
181. Penalty for carrying a private drain under a building.
182. Removal or alteration of private drain constructed or opened without authority.
183. Removal of obstruction from private drain.
184. Cleansing, repair or alteration of private drain.
185. Maintenance of drain kept up for the benefit of certain premises only.
186. Construction and maintenance of roadside culverts.
187. Penalty for altering, obstructing or encroaching upon public drain.

Powers of Entry and Inspection.

188. Power to enter where public sweepers employed.
189. Inspection of private privy, latrine, urinal or drain.

CHAPTER XV.

WATER-SUPPLY.

190. Definitions.
191. Control of Cantonment Authority over public water-supply.
192. Protection of catchment area.
193. Power to prevent fouling of source of public water-supply by person engaged in offensive trade.
194. Power to prevent fouling of source of public water-supply by fishing, boating or gathering plants.
195. Penalty for bathing or washing at public well or spring so as to foul the water.
196. Penalty for fouling source of public water-supply used for drinking purposes.
197. Power to stop use of any source of public water-supply for drinking purposes.
198. Maintenance of source of private water-supply used for drinking purposes.
199. Power to stop use of, and to close, source of private water-supply used for drinking purposes.
200. Penalty for placing latrine, &c., near source of public water-supply, and *vice versâ*.
201. Removal or closing of latrine, &c., near source of public water-supply, or filling up of the latter.
202. Altering, obstructing or encroaching upon public water-channel.
203. Laying of gas-pipes and water-pipes.
204. Power to control removal of water from water-works.
205. Power to assign portion of water-works for use for a special purpose.
206. Penalty for obstructing or diverting water belonging to water-works.
207. Power to cut off water where private supply is wasted.
208. Penalty for wasting private supply.
209. Penalty for trespassing on water-works.
210. Penalty for damaging water-works.

SECTIONS.

Bathing and Washing Places.

211. Public bathing-places.
212. Public washing-places.
213. Regulation of public bathing and washing.
214. Power to prohibit certain acts.
215. Penalty for annoying people using a public bathing-place.

Powers of Entry and Inspection.

216. Powers of entry and inspection.

CHAPTER XVI.

MARKETS.

217. Provision and maintenance of public markets.
218. Rents and charges in public markets.
219. Power to fix limits of existing private markets.
220. Establishment of private markets.
221. Power to make rules for public markets.
222. Power to make rules for private markets.
223. Provision of conveniences for weighing and measuring.
224. Further powers for regulation of private markets.
225. Power to close public market.
226. Power to close new private market at a year's notice.
227. Power to close new private market for failure to comply with requisition.
228. Power to close any private market in other case.
229. Notification of documents relating to market.
230. Penalty for disobeying market rule.
231. Power to expel person disobeying market rule and to determine his tenure of shop, &c.
232. Penalty for selling without permission in public market.
233. Penalty for opening private market without permission.
234. Penalty for encroaching on approaches or passages of market.
235. Inspection of market by Sanitary Officer and Cantonment Magistrate for sanitary purposes.

Powers of Entry and Inspection.

236. Powers of entry and inspection.

CHAPTER XVII.

SLAUGHTER-HOUSES.

237. Provision and maintenance of public slaughter-houses.
238. Rents and charges in public slaughter-houses.
239. Establishment of private slaughter-houses.
240. Position of new slaughter-houses.
241. Outer and inner yards.
242. Power to make rules for public slaughter-houses.
243. Power to make rules for private slaughter-houses.
244. Further powers for regulation of private slaughter-houses.

SECTIONS.

245. Power to close public slaughter-house.
246. Power to close new private slaughter-house at a year's notice.
247. Power to close new private slaughter-house for failure to comply with requisition.
248. Power to close any private slaughter-house in other cases.
249. Notification of documents relating to slaughter-house.
250. Penalty for disobeying slaughter-house rule.
251. Power to expel person disobeying slaughter-house rule, and to determine his tenure of shop, &c.
252. Penalty for using public slaughter-house without permission.
253. Penalty for opening private slaughter-house without permission.
254. Penalty for using unauthorised slaughter-house.
255. Penalty for using private slaughter-house after notice of closure.
256. Penalty for encroaching on roads, passages or approaches in or to slaughter-house.
257. Power to prohibit on grounds of public health the slaughter of any particular description of animal.
258. Power to prohibit slaughter except at a lawful slaughter-house, and sale of meat of animal slaughtered elsewhere.
259. Power to prohibit or regulate ceremonial slaughter likely to disturb the public peace.

Powers of Entry and Inspection.

260. Powers of entry and inspection.

Application of Chapter to Commissariat slaughter-houses.

261. Application of chapter to Commissariat slaughter-houses.

CHAPTER XVIII.

CONTROL OVER CERTAIN TRADES, CALLINGS AND OCCUPATIONS.

262. Licensing of offensive or dangerous trades.
263. Licensing of shops for sale of medicines or drugs.
264. Places in which animals may be kept for profit.
265. General provisions as to licenses granted under section 262, 263 or 264.
266. Conditions to be specified in licenses granted under section 262, 263 or 264.
267. Power to refuse a license.
268. Power to prohibit or regulate offensive or dangerous trade.
269. Power to provide places for carrying on of offensive or dangerous trades.
270. Public stables, sheds and standings for animals kept for profit.
271. Penalty for carrying on certain trades or callings without a license, except at places provided by the Cantonment Authority.

SECTIONS.

272. Penalty for breach of conditions of license.
273. Penalty for feeding certain animals on filth, or dealing with filth for that purpose, or permitting certain animals to graze in prohibited place.
274. Power to regulate manufacture, preparation and sale of food and drink.
275. Power to make rules as to vehicles, boats, animals and coolies plying for hire.
276. Procedure in making rules under section 274 or 275.
277. Penalty for selling food or drink of a nature different from that demanded.
278. Penalty for buying or taking pledge from child.
279. Power to compel pawnbrokers and others to watch for stolen property.
280. Power to remove brothels.

Powers of Entry and Inspection.

281. Power to enter and inspect certain places.
282. Cantonment Authority to provide for inspection of food and medicine exposed for sale.
283. Seizure of unwholesome food, medicine, utensils, &c.
284. Disposal of things seized.
285. Power to purchase food or drink for analysis.

CHAPTER XIX.

HOSPITALS.

Cantonment General Hospitals and Dispensaries.

286. Maintenance of general hospitals or dispensaries for the sick poor.
287. Free treatment of pauper strangers in such hospitals.
288. Treatment of paying patients in such hospitals.

Hospitals for infectious or contagious disorders.

289. Maintenance of hospitals for infectious or contagious disorders.
290. Gratuitous treatment and subsistence allowance in such hospitals.
291. Removal of infected person to hospital.
292. Detention of infected person in hospital.

Hospitals generally, and Dispensaries.

293. Medical officer.
294. Medical subordinates.
295. Medical supplies, hospital furniture and diet.
296. Regulation of hospitals and dispensaries and notification of hospital rules.
297. Power to expel patients and others disobeying hospital rule.
298. Penalty for re-entry after expulsion.
299. Penalty for introducing liquor or drug into hospital.

SECTIONS.

CHAPTER XX.

INOCULATION AND VACCINATION.

Preliminary.

300. Certain cantonments excluded from operation of chapter.
301. Definitions.

Inoculation.

302. Penalty for inoculating with small-pox.
303. Penalty for entering cantonment after inoculation.

Vaccination.

304. Vaccination-circles, and appointment of vaccinators and superintendents of vaccination.
305. Compulsory vaccination of unprotected children.
306. Inspection after vaccination.
307. Procedure when vaccination is successful.
308. Procedure when vaccination is unsuccessful.
309. Procedure when child has been certified to be unfit for vaccination.
310. Certificate of insusceptibility of successful vaccination.
311. Search for unprotected children.
312. Cantonment Magistrate's order requiring child to be vaccinated.
313. Regulation of the use of lymph.
314. Fees not chargeable by public vaccinators.
315. Females not to be compelled to appear in public.
316. Power to make rules as to vaccination.
317. Penalty for neglecting to have child inspected.
318. Penalty for disobeying order under section 312 or section 317.
319. Penalty for obstructing vaccinator in his duties.
320. Penalty for false answer to enquiries of superintendent of vaccination.
321. Offences by vaccinators.
322. Public vaccinator accepting illegal fee or remuneration.
323. Offences by superintendent of vaccination.
324. Penalty for falsifying certificate.
325. Fines imposed on vaccinators to be in addition to other penalties.

Powers of Entry and Inspection.

326. Power to enter and inspect in case of breach of provisions as to inoculation.

CHAPTER XXI.

FURTHER PROVISIONS FOR PREVENTING THE SPREAD OF INFECTIOUS DISORDERS.

327. Medical officers to report existence of infectious disorder.
328. Penalty for failing to give information or for giving false information as to infectious disorder.
329. Power to require names of dairyman's customers.
330. Power to require names of washerman's customers.

SECTIONS.

331. Inquiries as to infectious disorder arising from milk or washed clothes.
332. Procedure where introduction of infectious disorder is attributable to supply of milk from, or to washing of clothes, &c., outside, the cantonment.
333. Special conveyances for carriage of infected persons, corpses, clothing, bedding, &c.
334. Penalty for use of public conveyance by infected person.
335. Penalty for using public conveyance for carriage of infected corpse.
336. Compensation to owner or driver of public conveyance used for carriage of infected person or corpse.
337. Condition as to hiring public conveyance for carriage of infected person or corpse.
338. Penalty for neglecting to disinfect public conveyance after carrying infected person or corpse.
339. Disinfection of building or articles therein.
340. Destruction of infected hut or shed.
341. Temporary shelter while building is being disinfected or when infected hut is destroyed.
342. Penalty for letting infected building.
343. Penalty for leaving infected building without disinfecting it or informing owner of the infection, or for failing to answer or falsely answering inquiries of owner or new tenant.
344. Disinfection or destruction of infected articles.
345. Penalty for improper disposal of infected article.
346. Disposal of infected excreta and other matter.
347. Cholera hospitals and camps in cantonments.
348. Routes for pilgrims and others.
349. Penalty for making or selling food, &c., by person suffering from contagious leprosy or an infectious disorder.
350. Power to prohibit the making, carrying or selling of clothes, bedding or other articles by infected person.
351. Power to prohibit or restrict sale of specified articles of food or drink on outbreak of infectious disorder.
352. Power to take other special measures to prevent outbreak or spread of infectious disorder.

Powers of Entry and Inspection.

353. Power to inspect dairy or washerman's place of business, and order on such inspection.
354. Further powers of entry in case of infectious disorders.

CHAPTER XXII.

DISPOSAL OF THE DEAD.

355. Certain burial-grounds partly excepted from operation of chapter.
356. Cantonment Authority's control over burial and burning grounds.
357. Power to provide new burial or burning grounds.

SECTIONS.

358. Power to close burial or burning ground and provide a new ground.
359. Power to re-open a closed burial or burning ground.
360. Power to make rules for burial and burning grounds.
361. Notification of rules made for burial or burning ground.
362. Penalty for disobeying rule made for burial or burning ground.
363. Penalty for burying too near the surface.
364. Penalty for making grave too close to neighbouring graves.
365. Penalty for re-opening grave.
366. Penalty for failing to bury or burn corpse within six hours after arrival at burial or burning ground.
367. Penalty for incomplete burning.
368. Penalty for disposing of corpse at unauthorised place, or exhuming corpse.
369. Powers in respect of improperly disposed of corpses.
370. Disposal of corpses of paupers and unknown persons.

Removal of Corpses.

371. Period for disposal of corpses.
372. Provision of mortuaries and removal of infected corpses thereto.
373. Removal of infected corpse.
374. Routes for carrying corpses.
375. Penalty for improperly carrying corpse along street or public place.
376. Penalty for depositing corpse in street or public place.
377. Penalty for improperly carrying dissected corpse.

CHAPTER XXIII.

ENCAMPING-GROUNDS AND SARAIS.

378. Saving of Sarais Act, 1867.

Encamping-grounds.

379. Provision and maintenance of encamping-grounds.
380. Penalty for using an unauthorised place as an encamping-ground.

Sarais.

381. Maintenance and provision of Government sarais.
382. Registration of private sarais.
383. Power to refuse registration.
384. Obligations of keeper of a private sarai.
385. Power to require reports as to persons using private sarai.
386. Power to close private sarai which is a nuisance.
387. Power to cancel registration and to re-register.
388. Penalty for maintaining sarai without registration.
389. Penalty for using an unauthorised building as a sarai.
390. Power to declare shops, &c., in sarais to be markets.

Powers of Entry and Inspection.

391. Power to enter and inspect private sarais and places used as such.

SECTIONS.

CHAPTER XXIV.

FAIRS.

392. Meaning of "fair."
393. Certain sections not to apply where a fair is managed by the Local Government.
394. Appointment and maintenance of fair-grounds.
395. Management of fair by Cantonment Magistrate in consultation with Sanitary Officer.
396. Power to make rules for fairs and fair-grounds.
397. Notification of rules in fair-ground.
398. Penalty for disobeying rule.
399. Power to expel defaulter from fair-ground.
400. Penalty for encroaching on approaches, roads, passages or spaces to or in fair-ground.
401. Power to close fair or fair-ground.
402. Penalty for holding fair without permission.

Powers of Entry and Inspection.

403. Powers of entry and inspection.

CHAPTER XXV.

EXTINCTION AND PREVENTION OF FIRES.

Cantonment Fire-brigade.

404. Power to establish a cantonment fire-brigade.
405. Constitution of cantonment fire-brigade.
406. Provision of fire-stations.
407. Provision of fire-engines and appurtenances.
408. Power to make rules for regulating cantonment fire-brigade.

Proceedings at Fires.

409. Control of operations at a fire.
410. Powers of officer controlling operations at a fire.
411. Duty of cantonment servants, the police and others to aid at fires.
412. Damage done in the extinction of fire, &c., declared to be damage by fire.
413. Saving of liability for acts done by regimental fire-party, cantonment fire-brigade, &c.
414. Fire-reports.
415. Power to make rules as to fires.
416. Instructions for guidance of the public in case of fire.

Prevention of Fires.

417. Power to control private stores of inflammable materials or explosive substances.
418. Penalty for collecting inflammable materials in prohibited place.
419. Penalty for letting off fire-works, sending up fire-balloon or lighting bonfire without permission.
420. Penalty for illuminating building without permission.

SECTIONS.

Powers of Entry and Inspection.

421. Power of entry into building or land used for storing inflammable material or explosive substance.
422. Power of entry where fire-works are let off, &c., without permission.

CHAPTER XXVI.

STREETS AND PUBLIC PLACES.

423. Cantonment Authority's obligation to water streets.
424. Closing and opening of streets.
425. Breaking up of street and protection of broken places.
426. Power to permit temporary occupation of street or public place.
427. Penalty for altering, obstructing or encroaching upon street or public place.
428. Regulation of processions and public assemblies.
429. Penalty for injuring or disturbing direction-post, lamp or lamp-post, and damages in case of accidental injury to lamp.
430. Power to prohibit street sales.
431. Cart-stands and public halting-places.
432. Penalty for rash driving or riding.
433. Penalty for disregarding the rule of the road.
434. Penalty for driving or riding contrary to public notice.
435. Penalty for causing mischief or obstruction in driving animal.
436. Penalty for not removing elephant or camel on approach of horse or bullock-cart.
437. Penalty for driving without a sufficient light.
438. Penalty for driving vehicle without proper means of control.
439. Penalty for permitting child to control animal or vehicle.
440. Penalty for leaving vehicle or animal unattended.
441. Penalty for obstructing thoroughfare.
442. Penalty for obstructing footway.
443. Penalty for making or repairing vehicle, or cleaning or exposing for show, hire or sale an animal or vehicle, or training or exercising an animal, at unauthorized place or time.
444. Penalty for carrying article projecting beyond vehicle.
445. Power to prescribe proper tires for vehicles taken along a road.

CHAPTER XXVII.

FURTHER PROVISIONS RELATING TO BUILDINGS AND LANDS.

Construction of Buildings.

446. Conditions of permission to erect or re-erect building.
447. Power to require alteration or demolition of unauthorized building and removal of materials.
448. Power to prohibit use of inflammable materials for roofs and external walls.

SECTIONS.

449. Unauthorised building over main, water-course, pipe, drain or culvert.
450. Power to regulate line of buildings.
451. Ground-floor doors, &c., not to open outwards.

Projections and Obstructions from Buildings.

452. Placing of projection or obstruction.
453. Removal or alteration of projection, encroachment or obstruction.
454. Erection of open verandahs, balconies or projecting rooms.

Troughs, Pipes and Brackets.

455. Power to put up troughs and pipes for rain-water.
456. Power to attach brackets for lamps.

Numbering of Estates.

457. Affixing of numbers on estates.

Insanitary Buildings and Lands.

458. Report by medical officers on insanitary block of buildings.
459. Procedure for carrying out proposed improvements in insanitary block.
460. Insanitary huts and sheds.
461. Power to prohibit use of building unfit for human habitation.
462. Power to require filthy premises to be cleansed.
463. Cleansing or filling up of offensive well, marshy ground, &c.
464. Penalty for cultivating prohibited crop.
465. Power to control agriculture and irrigation.
466. Removal of noxious vegetation.

Overcrowded Dwellings.

467. Powers as to overcrowded dwelling.

Dilapidated Buildings.

468. Powers in respect of dilapidated building.

Dangerous or Ruinous Buildings and Places.

469. Control over buildings used as places of public entertainment or resort.
470. Power to require ruinous or dangerous building to be removed or repaired.
471. Power to require dangerous building or excavation to be secured.

Untenanted Buildings or Land.

472. Powers in respect of untenanted building or land which is a nuisance.

Preservation of Lands.

473. Penalty for injuring public land or water.
474. Penalty for making excavation without permission, and filling up of unauthorized excavations.
475. Preservation of land in hill cantonments.

Trespass.

476. Penalty for trespassing on public land.

Trees, Fences and Hedges.

477. Felling of trees.
478. Lopping and trimming of trees.
479. Construction and maintenance of fences or hedges.
480. Cutting or trimming of hedges.

SECTIONS.

Powers of Entry and Inspection.

481. Power to enter and inspect building and direct cleansing of same.
482. Power to enter land to examine excavations, &c., or to enquire into its sanitary condition.
483. Power to enter and inspect building used as a place of public entertainment or resort.

CHAPTER XXVIII.

CATTLE-DISEASE.

Preliminary.

484. Certain cantonments excluded from operation of chapter.
485. Certain animals partly excepted from operation of chapter.
486. Definitions.

Veterinary Hospitals.

487. Provision and maintenance of veterinary hospitals.
488. Appointment of person to take charge of veterinary hospitals.
489. Medical supplies and furniture.
490. Feeding and treatment of animals in hospital, and recovery of cost in certain cases.
491. Penalty for letting animal escape from hospital.

Prevention of the spread of Dangerous Cattle-disease.

492. Penalty for not segregating infected animal.
493. Penalty for careless or improper moving of animal which has been exposed to infection.
494. Penalty for allowing infected animal in street, &c.
495. Power to appoint inspectors.
496. Penalty for failing to give information of dangerous cattle-disease.
497. Examination of diseased animal by veterinary surgeon.
498. Removal to hospital or destruction of diseased animal.
499. Destruction of diseased animal in hospital.
500. Cleansing and disinfection of premises, and disinfection or destruction of fodder, dung, &c.
501. Penalty for bringing infected animal into cantonment.
502. Removal of infected animal from cantonment.
503. Power to prescribe routes for taking infected animals.
504. Disposal of carcasses.
505. Power to make rules.
506. Power to take special measures on outbreak of dangerous cattle-disease.

Powers of Entry and Inspection.

507. Powers of entry and inspection.
508. Penalty for vexatious entry or seizure.

Claims to Compensation barred.

509. Claims to compensation barred.

SECTIONS.

CHAPTER XXIX.

GRAZING AND CRUELTY TO ANIMALS.

Grazing.

510. Power to seize animal doing damage while grazing, &c.
511. Penalty for grazing animal without control or unauthorisedly on cantonment land.

Cruelty to Animals.

512. Extension of the Prevention of Cruelty to Animals Act, 1890, to cantonments.

CHAPTER XXX.

REGISTRATION OF BIRTHS AND DEATHS.

513. Preparation of registers, and registration of births and deaths by Cantonment Magistrate.
514. Penalty for failure to give information as to birth.
515. Penalty for failure to give information as to death.
516. Penalty for false information as to birth or death.
517. Entry of birth or death to be signed by informant.
518. Extract from register of births to be given to informant.
519. Correction of clerical errors in register of births or deaths.
520. Alteration, or entry in register of birth, of name of child.
521. No further alteration in registers.
522. Power to search registers and require extract.

CHAPTER XXXI.

VERIFICATION OF WEIGHTS AND MEASURES.

523. Provision, custody and use of local standards.
524. Appointment of servant of Cantonment Authority to verify weights and measures, and duties of such servant.
525. Power to deal with weights and measures differing from local standards.

Powers of Entry and Inspection.

526. Power to enter shop and seize false weights and measures.

CHAPTER XXXII.

PREVENTION OF GAMING.

527. Certain cantonments excluded from operation of chapter.
528. Definitions.

SECTIONS.

529. Penalty for keeping common gaming-house.
530. Penalty for being found in common gaming-house.
531. Powers of entry in respect of gaming-houses.
532. Evidence of gaming.
533. Proof of playing for stakes unnecessary.
534. Penalty on person found in common gaming-house who refuses to give his name and address.
535. Power to confiscate and destroy instruments of gaming.
536. Indemnification of witnesses.
537. Rewards to informers or police.
538. Saving of games of mere skill.
539. Penalty for gaming in street or public place.
540. Penalty for sharping.

CHAPTER XXXIII.

NUISANCES.

541. Penalty for drunkenness or riotous or indecent behaviour.
542. Penalty for using threatening or abusive language, &c.
543. Penalty for indecent exposure of person, &c.
544. Penalty for begging.
545. Penalty for soliciting for prostitution.
546. Penalty for feloniously lurking about cantonment.
547. Penalty for dangerous quarrying, blasting, cutting of timber or building.
548. Penalty for playing music without permission.
549. Penalty for creating noise in street or public place so as to cause a nuisance.
550. Penalty for discharging fire-arm, &c., or propelling vehicle, so as to frighten animals or cause annoyance.
551. Penalty for bill-sticking or defacing building or other property.
552. Penalty for allowing certain animals to be at large.
553. Power to destroy stray dogs.
554. Penalty for storing or using night-soil or other offensive matter.
555. Silos and ensilage.
556. Penalty for drying skin so as to cause nuisance.
557. Power to prohibit commission of public nuisance.

CHAPTER XXXIV.

EXPULSION FROM CANTONMENTS.

558. Expulsion by Cantonment Magistrate.
559. Expulsion by Commanding Officer.
560. Order of expulsion to be recorded by Commanding Officer, and copy in certain cases to be forwarded to Officer Commanding the district.
561. Record and disclosure of Commanding Officer's reasons for expulsion.

SECTIONS.

562. Method of proving convictions had outside cantonment.
563. Penalty for remaining in or returning to cantonment after expulsion.
564. Penalty for harbouring person who has been expelled from cantonment.

Powers of Entry, Inspection and Search.

565. Power to search for person expelled from cantonment.

PART V.

SUPPLEMENTAL PROVISIONS.

CHAPTER XXXV.

COGNIZABLE OFFENCES.

566. Offences for which police-officer may arrest without warrant.

CHAPTER XXXVI.

APPEALS.

567. Appeals when allowed and to whom to lie.
568. Procedure in submitting appeal to Commander-in-Chief.
569. Time for appeal.
570. Order in appeal final except in certain cases.
571. Cantonment Authority's power to apply for revision in certain cases.
572. Suspension of action pending appeal.

CHAPTER XXXVII.

NOTICES AND OTHER DOCUMENTS.

Authentication and Validation.

573. Authentication of notices and other documents.
574. Validation of facsimiles of signatures on notices and other documents.
575. Validation of notices and other documents.

Service.

576. Service of notices and other documents.
577. Service on agent of absentee owner.
578. Service of notice where owner or occupier is unknown.

Publication.

579. Publication of public notices.

Enforcement.

580. Execution on failure to comply with notice.
581. Recovery of costs of execution.
582. Sale of building-materials taken down or removed by Cantonment Authority.

SECTIONS.

Objections.

583. Power to prefer objection to requisition.
584. Hearing of objections.
585. Order on objection.
586. Notice of such order.

Penalties.

587. Penalty for disobedience to orders where not punishable under any other section.
588. Penalty for destroying or defacing public notice.

CHAPTER XXXVIII.

MISCELLANEOUS.

589. General power to pay compensation out of Cantonment Fund.
590. Settlement of amount where dispute arises in certain cases in which compensation is compulsory.
591. Damage to Government property to be made good.
592. Power to apportion expenses payable by owners, grantees or occupiers.
593. Rewards to informers.
594. General power of entry and inspection.
595. Precautions to be observed in entering dwelling.
596. Penalty for obstructing person employed by Cantonment Authority or Cantonment Magistrate.
597. Powers to be exercisable from time to time.
598. Method of framing notifications.
599. Use of forms Nos. 6 to ———* in Schedule I.
600. Vacancies and irregularities not to invalidate proceedings.

SCHEDULE I.—FORMS—

1.—Bond to be executed by Sureties.

2.—Invitation to Tender.

3.—Notice of Auction.

4.—Registration of Births.

5.—Registration of Deaths.

SCHEDULE II.—INSTRUCTIONS FOR THE GUIDANCE OF THE PUBLIC IN CASE OF FIRE.

SCHEDULE III.—PERSONS WHO MAY BE EXPELLED FROM CANTONMENTS.

SCHEDULE IV.—COGNIZABLE OFFENCES.

SCHEDULE V.—APPEALS.

SCHEDULE VI.—REWARDS TO INFORMERS.

INDEX.

* These forms will be prepared hereafter.

[*N.B.*—The notes in square brackets in the margin will remain there when this Code is published as law—see section 4 (*2*) of the Code. The numbers and years of Acts which are noted in the margin without brackets (see, *e.g.*, section 3 (*a*) of the Code) will also remain.

The figures in circular brackets in the margin are references to Major Temple's draft Code, and the notes in circular brackets in the margin (see, *e.g.*, section 5, clause (6), of the Code) are references to enactments on which sections are based, but which are not relied upon as authorities for the sections. All these references will be removed when the Code is published as law.

The footnotes to the chapters are inserted for convenience in studying the draft, and will be removed when the Code is published as law.]

THE CANTONMENT CODE, 1892.

PART I.

CHAPTER I.[a]

PRELIMINARY.

[*Clause* (*31*).] (*1*.)

1. (*1*) This Code may be called the Cantonment Code, 1892; and

Title and commencement.

(*2*) It shall come into force on the first day of ———, 1892.

[*Clause* (*31*).] (*2*, 915.)

2. Except as provided in sections 300, 378, 484 and 527, and except as the Governor General in Council may hereafter otherwise direct, this Code shall apply to all cantonments in British India.

Extent.

[*Clause* (*31*).]

3. The following rules and regulations are hereby cancelled, namely:—

Repeal of prior rules and regulations.

(*a*) all rules and regulations made under any enactment repealed by the Cantonments Act, 1889, or under any enactment repealed by that Act, in so far as they (*i*) *are covered by, or are inconsistent with, this Code and* (*ii*) apply to any cantonment in British India *in which the corresponding portions of this Code are for the time being in force*, and

XIII of 1889.

(*b*) the rules published under notification of the Government of India in the Military Department No. 617, dated the 4th July, 1890, in so far as they apply to any cantonment in British India.

[*Clause* (*31*).] (*5*, 7, 8.)

4. (*1*) This Code consists of enactments extended under the authority of section 25 of the Cantonments Act, 1889, with such restrictions and modifications as the Governor General in Council has thought fit to make, and rules made under the authority of section 26, read with section 27, sub-section (*4*), of the same Act.

Authority for the Code.

XIII of 1889.

(*2*) Where a section, or part of a section, consists of an enactment extended as aforesaid, the enactment is noted in brackets* in the margin of the section, and

where a section, or part of a section, consists of a rule made as aforesaid, the clause of section 26 of the Cantonments Act, 1889, under which the rule is made is noted in brackets* in the margin of the section.

(3, 4.)

5. In this Code, unless there is something repugnant in the subject or context,—

Definitions.

[*Clause* (*31*).] (12.)

(*1*) "Commander-in-Chief" means, as regards cantonments in the Bengal Command, the Commander-in-Chief of the Forces in India; as regards cantonments in the Madras Command, the Commander-in-Chief in Madras, and as regards cantonments in the Bombay Command, the Commander-in-Chief in Bombay;

[*Clause* (*31*).] (15.)

(*2*) "Sanitary Officer" means, where no Sanitary Officer has been specially appointed, the senior executive medical officer in military employ present on duty in the cantonment;

[*Clause* (*31*).]

(*3*) "Executive Engineer" means the Engineer Officer of any circle, division or district having charge of the military works in a cantonment;

[*Clause* (*31*).]

(*4*) "officer in immediate executive engineering charge of the cantonment" means the officer having charge of the military works in the absence of the Executive Engineer;

[*Clause* (*31*).] (27.)

(*5*) "Government security" includes promissory notes, debentures, stock-certificates and all other securities issued by the Government of India or by any Local Government in respect of any loan contracted by it;

(*See Act XIII of 1886, s. 3 (1).*)

[*Act XVIII of 1889, s. 3 (3).*] (43.)

(*6*) "street" includes any way, road, lane, square, court, alley, passage or open space, whether a thoroughfare or not, over which the public have a right of way, and also the roadway and footway over any public bridge or causeway;

[*Clause* (*31*).]

(*7*) "bazar" means any land which has been specially demarcated for occupation by natives, except the lines of native troops;

[*Clause* (*31*).] (31.)

(*8*) "grantee" means a person who has been granted permission, whether before or after the commencement of this Code, to occupy land belonging to the Government in a cantonment for the purposes of a building-site; and includes the successors in interest of a grantee;

[*Clause* (*2*).] (18.)

(*9*) "military officer" means a commissioned or warrant officer of the army on military duty in a cantonment, and includes any European or Eurasian in Army departmental employment whom the Commander-in-Chief may for the purposes of Chapter IX place on the same footing as a military officer;

[*Clause* (*2*).] (19.)

(*10*) "civil officer" means an European or Eurasian civil officer of the Government, and includes any other European or Eurasian, not being a military officer, whom the Local Government may for the purposes of Chapter IX place on the same footing as a civil officer;

[*Bombay Act III of 1888, s. 3 (m).*] (45.)

(*11*) "drain" includes a sewer, pipe, ditch, channel and any other device for carrying off, along the surface or otherwise, sewage, polluted water, rain-water or sub-soil water;

[*Bengal Act III of 1884, s. 6 (10).*] (51, 52.)

(*12*) "offensive matter" includes kitchen refuse, dung, putrid and putrefying substances and filth of any other kind;

[*Bengal Act III of 1884, s. 6 (14).*] (53.)

(*13*) "rubbish" includes dust, dirt, bones, ashes, mortar, broken bricks, broken tiles, broken glass, broken pottery, stable and garden refuse, and refuse of any other kind not included in "offensive matter";

[*Clause* (*17*).] (57, 58.)

(*14*) "public market" means a market maintained by the Cantonment Authority, and "private market" means a market maintained by a private person;

[*Bengal Act II of 1888, s. 3.*] (59.)

(*15*) "slaughter-house" means any place used for the slaughter of cattle, sheep, goats, kids or pigs for the purpose of selling the flesh thereof as meat;

[*Clause* (*17*).] (60, 61.)

(*16*) "public slaughter-house" means a slaughter-house maintained by the Cantonment Authority, and "private slaughter-house" means a slaughter-house maintained by a private person;

[*Bengal Act V of 1880, s. 2.*] (16.)

(*17*) "medical practitioner" means any person duly qualified by diploma, degree or license to practise medicine or surgery;

[*Clause* (*31*).]

(*18*) "vehicle" includes a hack-cart, palankin, palki, doolie, jhampan, dandi, jinrikshaw and bath-chair;

[*Clause* (*21*).] (66.)

(*19*) "public conveyance" includes a hackney-carriage, a hack-cart and any other vehicle kept, offered or plying for hire, whether drawn by an animal or drawn, propelled or carried by men, but does not include a conveyance maintained by the Cantonment Authority under section 333 for the free carriage of infected persons or corpses or the free transport of infected articles;

[*Act XIV of 1879, s. 2.*] (65.)

(*20*) "hack-cart" means any wheeled vehicle drawn by animals and used for the conveyance of goods, which is kept or offered or plies for hire;

[*Clause* (*21*).] (69.)

(*See 53 & 54 Vict., c. 34, s. 2.*)

(*21*) "dairy" includes any farm, shed, milk-store, milk-shop or other place from which milk is supplied, or in which milk is kept for purposes of sale;

[*Clause* (*21*).] (68, 70.)

(*See 53 & 54 Vict., c. 34, s. 2.*)

(*22*) "dairyman" includes the keeper of any cow, buffalo, goat, ass or other quadruped the milk of which is used for human consumption, any purveyor of milk and any occupier of a dairy;

[*Clause* (*17*).] (54.)

(*23*) "sarai" means any building used for the accommodation of native travellers, and includes a choltri, zayát, dharamsála or other lodging-house or boarding-house for natives, and, where only part of a building is used as a sarai, the part so used;

[*Clause* (*17*).] (55.)

(*24*) "keeper of a sarai" includes the owner of a sarai, any person having or acting in the care or management of a sarai, and the grantee of any land used as a sarai; and

[*Clause* (*15*).] (41.)

(*25*) "fence" includes all necessary gates, and the posts or pillars thereof.

(a) This chapter shows the local extent of the Code and the authority on which it is based, repeals prior rules and regulations, and contains definitions of general application. Definitions required for the purposes of one chapter alone are inserted in that chapter.

* *i.e.*, square brackets.

PART II.

GENERAL ADMINISTRATION.

CHAPTER II.[a]

THE CANTONMENT AUTHORITY AND THE CANTONMENT MAGISTRATE.

Cantonment Committees.

[*Clause* (*4*).]

6. In every cantonment in which there is a Cantonment Committee, such Committee shall discharge the functions of the Cantonment Authority under this Code.

Discharge of functions of Cantonment Authority by Cantonment Committee.

[*Clause* (*4*). (75—82.)]

7. (*1*) The following persons shall be members of every Cantonment Committee *ex-officio*, namely:—

Constitution of Cantonment Committee.

the Commanding Officer of the cantonment, or, where the cantonment is the headquarters station of a district, the officer who succeeds, or would succeed, to the command of the station during any temporary absence of the Officer Commanding the district,

the Officer Commanding the Royal Artillery (if any) in the cantonment, and the Commanding Officer of each regiment or battalion forming part of the ordinary garrison of the cantonment,

the Sanitary Officer,

the Executive Engineer, or, when he is absent from the station, the officer in immediate executive engineering charge of the cantonment, if appointed in Station Orders to act in his stead,

the District Magistrate or, when he is absent from the station, a Magistrate of the first class, being a Justice of the Peace, appointed by the District Magistrate to act in his stead,

the Civil Surgeon of the district, and

the Cantonment Magistrate.

(*2*) The Commander-in-Chief may at any time appoint any other person by name or by office to be a member of any Cantonment Committee, and may revoke any such appointment.

(a) The changes made in the constitution of the Cantonment Committee are noted in the memorandum attached to the Code.

Rules for meetings of Cantonment Committees are provided in some detail in view of the more important status of these bodies, and also of the fact that in the future there may often be non-official members.

The fullest powers of control are given to the President.

Owing to the great variety of conditions under which small cantonments exist, it has been thought the best arrangement, as regards the powers of the Commanding Officer of a cantonment where there is no Cantonment Committee, to give the Local Government power (on the recommendation of the Commander-in-Chief) to modify the powers of the Commanding Officer as Cantonment Authority according as it may think fit, and to whatever extent it may see fit.

To the Cantonment Magistrate as secretary to the Cantonment Committee are left all executive matters, but he is to act solely as the agent and representative of the Committee, and is to be fully controlled by them. This control is to be exercised on behalf of the Committee by the president, or, in a cantonment where there is no Committee, by the Commanding Officer.

[*Clause* (4).] (78—83.)

8. (*1*) The Commanding Officer of the cantonment, or, where the cantonment is the head-quarters station of a district, the officer who succeeds, or would, succeed to the command of the station during any temporary absence of the Officer Commanding the district, shall be president of the Committee.

President and secretary.

(*2*) If when any meeting is held the president is absent, the next senior combatant officer present at the meeting shall preside.

(*3*) The Cantonment Magistrate shall be secretary of the Committee *ex-officio*.

[*Clause* (4).] (96—99.)

9. (*1*) Every Cantonment Committee shall meet for the transaction of business at least once in every month on such day and at such place as may be notified in Station Orders. Meetings held under this sub-section shall be called ordinary meetings.

Holding of meetings.

(*2*) The president may call a special meeting whenever he thinks fit.

(*3*) The president may adjourn any meeting from time to time.

[*Clause* (4).] (101, 102.)

10. (*1*) The Cantonment Magistrate shall give three clear days' notice of every meeting and adjourned meeting, unless the president for sufficient reason directs a meeting or adjourned meeting to be held at shorter notice:

Notice of meetings.

Provided that every member present in the cantonment shall have a reasonable opportunity of being served with the notice.

(*2*) Every notice shall specify the time and place at which the meeting is to be held, and shall be accompanied by an *agenda* paper specifying the business to be transacted at the meeting.

[*Clause* (4).] (103.)

11. No business shall be transacted at a meeting unless three members are present.

Quorum.

[*Act XVIII of 1889, s. 16.*] (121.)

12. Minutes of the proceedings at each meeting shall be recorded in a book to be kept for the purpose, shall be signed by the president of the meeting or of the next ensuing meeting, and shall at all reasonable times and without charge be open to the inspection of any inhabitant of the cantonment.

Minutes of the proceedings.

[*Clause* (4).] (100.)

13. Every meeting shall be open to the public unless the president, for a reason to be recorded in the minutes, orders otherwise.

Meetings to be public.

[*Clause* (4).] (98 (*2*), 99, 104—112.)

14. (*1*) If any business is brought forward at a meeting which—

Business at meetings.

(*a*) was not specified in the notice of the meeting, or

(*b*) does not directly relate to a report made by a Sub-committee or by a member of the Cantonment Committee appointed in that behalf,

it shall, on the requisition of any three members present, be postponed to a future meeting:

Provided that the president shall not be required to postpone the consideration of any business more than once.

(*2*) All business relative to the imposition, abolition or modification of taxes must be transacted at a special meeting.

(*3*) The president may, for any reason to be recorded in the minutes, refuse to permit any motion or amendment of a motion to be discussed.

(*4*) The president shall preserve order at meetings, and his decision on any point connected with the conduct of business at a meeting shall, subject to the provisions of Chapter XXXVI, be final.

15. (*1*) Except as provided in section 17, all questions coming before a meeting shall be determined by a majority of the votes of the members present and voting on the matter to be decided.

Decision by majority of votes.

[*Clause* (4).] (113, 114.)

(*2*) In case of an equality of votes the president shall have a second or casting vote.

Explanation.—This section excludes voting by proxy. (103.)

16. (*1*) A declaration by the president that a motion or amendment has been carried, and an entry to that effect in the minutes, shall be conclusive proof of the fact without proof of the number of votes given for or against the motion or amendment.

Record of decisions and dissents.

[*Clause* (4).] (115.)

(*2*) The dissent of any member from any decision of the Committee, together with the grounds thereof, shall, if the member so requests, be entered by the secretary in the minutes.

17. (*1*) The president may place his veto upon any decision of the Committee.

Exceptional powers of president.

[*Clause* (4).]

(*2*) If the president considers that any measure which the Committee is empowered to adopt, and to which a majority of the Committee do not agree, is of essential importance to the public health, safety or convenience,

and if he is of opinion that the matter is of such urgency that delay would be seriously prejudicial to the public interests,

he may order the measure to be adopted.

(*3*) Any order made by the president under sub-section (*2*) shall have the same effect as an order of the Committee.

(*4*) Every order made under sub-section (*1*) or sub-section (*2*) shall be entered, with the reasons for making it, in the minutes, and a copy of the entry shall forthwith be submitted to the Commander-in-Chief, who may thereupon rescind the order, or direct that it shall continue in force, with or without modification, as he thinks fit.

18. (*1*) With the previous sanction of the Commander-in-Chief, a Cantonment Committee may, by order, appoint any two or more of its members to be a Sub-committee for the purpose of discharging or performing such of the functions or duties of the Committee as are specified in the order, and may delegate to the Sub-committee all or any of the powers of the Committee to be exercised for the purpose so specified.

Executive Sub-committees.

[*Act XVIII of 1889, s. 19.*] (92.)

(*2*) Sub-committees appointed under this section shall be called "Executive Sub-committees."

(*3*) Unless the president otherwise directs, the Cantonment Magistrate shall be secretary and member of every Executive Sub-committee.

[*Bombay Act III of 1888, s. 38, and Act XVIII of 1889, s. 19.*] (93.)

19. (*1*) A Cantonment Committee may appoint out of its own body such and so many Sub-committees, consisting of such number of persons, and may refer to those Sub-committees for enquiry and report or for opinion such special subjects relating to the purposes of this Code, as it thinks fit; and may delegate to any such Sub-committee all or any of the powers of the Committee to be exercised for the purposes for which the Sub-committee is appointed.

Consultative Sub-committees.

(*2*) Sub-committees appointed under this section shall be called "Consultative Sub-committees."

(*3*) Nothing in this section shall prevent a Cantonment Committee from referring to any particular member of the Committee any special subject as aforesaid for enquiry, report or opinion, and delegating to him all or any of its powers for the purpose.

[*Clause* (4).] (116, 199 (*2*).)

20. The proceedings of every Sub-committee shall be conducted, so far as practicable, in the manner hereinbefore prescribed for the conduct of the proceedings of a Cantonment Committee:

Proceedings of Sub-committees.

Provided that the quorum necessary for the transaction of the business of a Sub-committee shall be two:

Provided also that the report of a Consultative Sub-committee shall be a sufficient record of the minutes of its proceedings.

[*Act XVIII of 1889, s. 18.*] (94.)

21. (*1*) With the previous sanction of the Commander-in-Chief, a Cantonment Committee may concur with any other local authority or authorities in appointing out of their respective bodies a Joint Committee for any purpose in which they are jointly interested, and in appointing a president of such Joint Committee, and in delegating to any such Joint Committee any power which might be exercised by either or any of the authorities, and in framing and modifying rules as to the proceedings of any such Joint Committee, and as to the conduct of correspondence relating to the purpose for which such Joint Committee is appointed.

Joint Committees and their proceedings.

(*2*) If any difference of opinion arises between authorities acting under this section, the decision thereon of the Commander-in-Chief, if all the authorities are Cantonment Authorities, or, subject to the provisions of any enactment for the time being in force, of the Local Government in any other case shall be final.

[*Act XVIII of 1889, s. 128.*] (128, 129.)

22. If at any time it appears to the Local Government that the continuance of a Cantonment Committee in any cantonment is not necessary, it may, by order published in the official Gazette, declare that the Committee shall cease to exist.

Cessation of the existence of Cantonment Committee.

The Commanding Officer as Cantonment Authority.

23. In every cantonment in which a Cantonment Committee does not exist or cannot be convened, the Commanding Officer of the cantonment, subject to any notification issued by the Local Government under section 24,

Discharge of functions of Cantonment Authority by Commanding Officer.

[*Clause* (5).] (197, 198, 199 (1), 200.

shall discharge the functions of the Cantonment Authority under this Code, and

may exercise any of the powers of a Cantonment Committee under sections 18, 19 and 21 in reference to the appointment of Sub-committees and Joint Committees, and the power of a president of a Cantonment Committee under section 18, sub-section (*3*):

Provided as follows:

the persons appointed by the Commanding Officer to be members of any Sub-Committee or Joint Committee may be any officers under his command, or any other persons (whether in the service of the Government or not) who are willing to serve voluntarily, and

the Commanding Officer may himself be president or member of any Joint Committee.

24. (*1*) The Local Government may, on the recommendation of the Commander-in-Chief, by notification in the official Gazette, direct, in respect of any cantonment in which a Cantonment Committee does not exist or cannot be convened,—

Power to limit or extend powers of Commanding Officer.

[*Clause* (5).] (197.)

(*a*) that any of the functions of the Cantonment Authority under this Code shall be in abeyance, or

(*b*) that any of the functions of the Cantonment Magistrate under this Code shall be discharged by the Commanding Officer of the cantonment.

(*2*) The Local Government may, on the recommendation of the Commander-in-Chief, by notification in the official Gazette, cancel or modify any notification issued under sub-section (*1*).

The Cantonment Magistrate.

25. (*1*) The Cantonment Magistrate shall be the executive officer of the Cantonment Authority, and all orders of the Cantonment Authority shall be issued through him.

Position of Cantonment Magistrate.

[*Clause* (6).] (131, 133.)

(*2*) All executive acts which by this Code are directed or authorised to be done by the Cantonment Magistrate shall be done by him as the agent of the Cantonment Authority, and subject to the general control—

(*a*) where there is a Cantonment Committee, of the president, and

(*b*) where a Cantonment Committee does not exist or cannot be convened, of the Commanding Officer of the cantonment.

26. (*1*) Whenever a Special Magistrate has been appointed by the Local Government under section 12 of the Code of Criminal Procedure, 1882, for the purpose of exercising powers under that

Discharge by Special Magistrate of functions of Cantonment Magistrate.

[*Clause* (31).] (11.)

X of 1882.

Code in a cantonment, the Local Government may, by general or special order published in the official Gazette, authorise him to discharge any of the functions imposed by this Code on the Cantonment Magistrate, except those referred to in Chapters VIII to XII (both inclusive).

(2) When any Special Magistrate is so authorised, he shall discharge such of the said functions as the Cantonment Magistrate may assign to him, and in the discharge of those functions shall exercise the same powers as the Cantonment Magistrate.

(3) The Cantonment Magistrate may withdraw from such Special Magistrate any business pending before him under this Code.

CHAPTER III.[a]

CONTROL OVER CANTONMENT AUTHORITIES.

[*Clauses (4) and (31).*]

Administrative control of Commander-in-Chief over Cantonment Authorities.

27. The administrative control of every cantonment is vested in the Commander-in-Chief, who may at any time require the Cantonment Authority to perform any duty, to provide for any purpose or to take any measures which he or the Governor General in Council considers necessary to the proper administration of the cantonment.

[*Clauses (4) and (31).*] (117.)

Plans, estimates, returns, statements, reports and correspondence.

28. Every Cantonment Authority shall act with regard to the following matters in accordance with any rules made, orders passed or forms framed for its guidance by the Commander-in-Chief, and not being inconsistent with the Cantonments Act, 1889, or this Code, namely:—

XIII of 1889.

(*a*) as to the preparation of plans and estimates for works which are to be constructed at the cost of the Cantonment Fund, and as to the authority by whom such plans are to be approved and such estimates are to be sanctioned respectively,

(*b*) as to returns, statements and reports to be submitted by the Cantonment Authority, and

(*c*) as to the intermediate office or offices, if any, through which correspondence between the Cantonment Authority and any other authority or officer is to pass:

Provided that all correspondence between a Cantonment Authority and a Local Government shall pass through the Commander-in-Chief.

[*Act XVIII of 1889, s. 124.*] (122.)

Power of Commander-in-Chief and Officer Commanding the district to call upon Cantonment Authorities and Joint Committees for information, and to record observations.

29. The Commander-in-Chief or the Officer Commanding the district may—

(*a*) by order in writing call for, and inspect, any book or document in the possession or under the control of any Cantonment Authority or any Joint Committee appointed under this Code,

(*b*) by order in writing require any such Authority or Committee to furnish such statements, accounts, reports and copies of documents relating to its proceedings or duties as he thinks fit to call for, and

(*c*) record in writing, for the guidance of any such Authority or Committee, any observations which he thinks proper in regard to its proceedings or duties.

[*Clause (31).*] (10.)

Power of Commander-in-Chief to delegate his powers or functions.

30. The Commander-in-Chief may, by notification in Army Orders, delegate any of his powers or functions under this Code, except those conferred or imposed by Chapters II, III, IV, VI, VII, IX, XIV, XVI, XVII, XVIII, XXII, XXVII and XXXVI, to any Officer Commanding a district, and may, by a like notification, whenever he thinks fit, resume all or any of the powers or functions so delegated.

[*Act XVIII of 1889, s. 127.*] (125, 126.)

Powers of Officer Commanding the district if Cantonment Authority fails to perform duty.

31. (*1*) If at any time it appears to the Officer Commanding the district that any Cantonment Authority has failed to perform any duty imposed upon it by or under this Code, he may require the Cantonment Magistrate to perform the duty, and may direct that any expenses incurred in so performing it shall be paid by the Cantonment Authority out of the Cantonment Fund.

[*Bengal Act II of 1888, s. 38.*]

(2) The Cantonment Magistrate shall, in the performance and for the purposes of such duty, have all the powers of the Cantonment Authority.

[*Act XVIII of 1889, s. 125 (1).*] (123.)

Power of Officer Commanding the district to suspend action of Cantonment Authority or Joint Committee.

32. The Officer Commanding the district may, for any sufficient reason, by order in writing, suspend the execution of any resolution or order of any Cantonment Authority or any Joint Committee appointed under this Code, or prohibit the doing of any act which is about to be done or is being done in pursuance or under cover of this Code.

[*Act XVIII of 1889, s. 125 (2).*] (124, 127.)

Orders made under section 31 or section 32 to be forwarded to Commander-in-Chief.

33. Whenever an Officer Commanding a district makes an order under section 31 or section 32, he shall forthwith forward a copy of the order, with a statement of his reasons for making it, to the Commander-in-Chief, who may thereupon rescind the order, or direct that it shall continue in force, with or without modification, as he thinks fit.

CHAPTER IV. (a)

CANTONMENT SERVANTS.

[*Clause (31).*] (134, 137, 145—147).

Number and salaries of cantonment servants.

34. (*1*) The number of servants to be employed by the Cantonment Authority, and the amount of their salaries, shall be fixed by the Cantonment Authority with the previous sanction of the Commander-in-Chief; and no alteration in the number of such servants or in their salaries shall be made without similar sanction:

(2) Provided that temporary servants may in cases of emergency be appointed without such sanction as aforesaid for any period not exceeded three months, if funds are available but no temporary servants shall, without the previous sanction of the Commander-in-Chief, be employed more than once on the same duties in the same year.

(a) The powers of control given to the Commander-in-Chief and to the Officer Commanding the district are dealt with in the memorandum attached to the Code.

The Commander-in-Chief is empowered to delegate his powers (with certain exceptions) to the Officer Commanding the district.

(a) Provision is made for the appointment of servants under regular rules for prohibiting their discharge without due reason, and for requiring security from those who have charge of money.

A share in contracts, previous dismissal from employment for misconduct, and undue nearness of relationship are made disqualifications for employment.

Temporary servants may be entertained by the Cantonment Authority, and their employment will no longer require the sanction of the Officer Commanding the district.

[*Clause (6).*] (134, 137, 145—147.)

Control of Cantonment Magistrate over cantonment servants.

35. All servants of the Cantonment Authority shall be appointed by the Cantonment Magistrate, and shall, except where a contrary intention appears in this Code, be exclusively under his orders; and it shall be his duty—

(*a*) to apportion and superintend the performance of the duties of such servants under this Code;

(*b*) to disburse the salaries of such servants; and

(*c*) to deal with applications from such servants for leave of absence.

[*Clause (31).*] (142—144.)

Disqualifications for employment.

36. (*1*) No person shall be appointed to, or retained in, the service of any Cantonment Authority—

(*a*) if he has, by himself or his partner, any share or interest in any contract made by or on behalf of the Cantonment Authority, or

(*b*) if he has been dismissed for misconduct from employment under any other Cantonment Authority or under any Municipal Authority or other Local Authority or under any department of the Government, or

(*c*) where his proposed or actual salary exceeds ten rupees, if he is related to any other servant of the Cantonment Authority, and the Cantonment Magistrate considers the relationship a sufficient disqualification for employment:

(2) Provided that no servant who is in employment at the commencement of this Code shall be dismissed on any of the grounds hereinbefore mentioned except with the sanction of the Officer Commanding the district and with due notice.

[*Clause (31).*] (134 (*f*), 153.)

Security to be furnished by certain servants.

37. (*1*) The Cantonment Authority shall require each of its servants who by reason of his office is entrusted with the receipt, custody or control of moneys or securities for money to furnish security for the due discharge of the trusts of his office and for the due account of all moneys and securities for money which may come into his possession by reason of his office.

(2) The amount of any security required from a servant under sub-section (*1*) shall be fixed by the Cantonment Magistrate, and shall be regulated by reference to the sums likely from time to time to be in the servant's hands:

(3) Provided that the amount shall not in any case be less than the total sum likely to pass through the servant's hands in any one week.

[*Clause (31).*] (156, 157.)

Bond of sureties.

38. (*1*) Where a servant of the Cantonment Authority is required to furnish security, the Cantonment Magistrate may in his discretion accept as such security a bond executed by two sureties.

(2) Every security-bond executed under this section shall be in Form 1 of Schedule I, or as near thereto as circumstances admit, and shall be registered under the law for the time being in force relating to the registration of documents.

(3) When any such bond relates to a mortgage of immoveable property, the mortgage shall be notified by the Cantonment Magistrate to the chief revenue-officer of the district in which the property is situate.

[*Clause (31).*] (154, 155.)

Classes of security.

39. (*1*) Without the previous sanction of the Commander-in-Chief, no security shall be accepted from or on behalf of any servant of the Cantonment Authority which is not a deposit of—

(*a*) cash, or

(*b*) Government securities, or

(*c*) shares in the Bank of Bengal, the Bank of Madras or the Bank of Bombay, or

(*d*) debentures or other securities for money issued by or on behalf of a Local Authority (i) in exercise of powers conferred by an Act of a legislature established in British India, or (ii) under the sanction of the Governor General in Council, or

(*e*) the mortgage-deed of a registered first mortgage of immoveable property situate in British India.

(2) No mortgage-deed shall be accepted as security—

(*f*) if the property to which it relates is a leasehold, or

(*g*) unless the value of the property exceeds, in the opinion of the chief revenue-officer of the district in which the property is situate, by one-third, or, if consisting of buildings, by one-half, the amount of the security to be furnished, or

(*h*) unless it sets forth that the mortgagee is the Secretary of State for India in Council, and that the mortgagee has power, in default of payment of the mortgage-money, to sell or concur in selling the mortgaged property or any part thereof without the intervention of a Civil Court.

[*Clause (31).*] (134 (*f*), 158.)

Deposit of money, securities and security-bonds.

40. The Cantonment Magistrate shall deal with all moneys and securities deposited and all security-bonds executed under this chapter in the manner prescribed in the Civil Account Code.

[*Clause (31).*] (159.)

Periodical examination of securities.

41. On or about the first day of January in each year the Cantonment Magistrate shall satisfy himself as to the sufficiency of the security furnished by or on behalf of each servant of the Cantonment Authority who has been required to furnish security.

Cantonment Code.

(Part II.—General Administration.—Chapter IV.—Cantonment Servants.—Sections 42-44. Chapter V.—Privileges and Liabilities of Members of Cantonment Committees and others.—Sections 45-48. Chapter VI.—The Cantonment Fund.—Section 49.)

[Clause (31).] (160.)

Re-delivery of securities.

42. The Cantonment Magistrate shall not deliver up any money, security or security-bond taken under section 37 or section 38 to the person or persons by whom it was furnished or executed, or to his or their representative or representatives in interest, until one year after the death of, or the vacation of his office by, the servant from or on whose behalf the same was taken.

[Clause (6).] (138—141.)

Procedure to be observed in punishing certain classes of servants.

43. (*1*) The Cantonment Magistrate shall not dismiss any servant whose aggregate salary exceeds forty rupees per mensem, or reduce him to a lower grade or salary, without the previous sanction of the Cantonment Authority.

(*2*) The Cantonment Magistrate shall record his reasons in writing whenever he dismisses or fines a servant of the Cantonment Authority who has been employed as such for an unbroken period of one year or more, or whose aggregate salary exceeds fifteen rupees per mensem.

[Bengal Act III of 1884, s. 188.] (474.)

Penalty on public conservancy establishments withdrawing from their duties without permission or notice.

44. If any public sweeper or other servant of the Cantonment Authority employed to remove or deal with night-soil or other offensive matter or rubbish withdraws from his duties without either obtaining the permission of the Cantonment Magistrate or giving one month's notice in writing of his intention so to withdraw,

he shall be punishable with fine which may extend to twenty rupees, or with rigorous imprisonment for a term which may extend to eight days, and shall forfeit all salary which may be due to him.

CHAPTER V. (a)

PRIVILEGES AND LIABILITIES OF MEMBERS OF CANTONMENT COMMITTEES AND OTHERS.

[Act XVIII of 1889, s. 28.] (130.)

Liability of members of Cantonment Committees for lose, waste or misapplication.

45. Every person shall be liable for the loss, waste or misapplication of any money or other property under the control of a Cantonment Committee, if such loss, waste or misapplication is a direct consequence of his neglect or misconduct while a member of the Committee; and a suit for compensation for the same may be instituted against him by the Secretary of State for India in Council.

[Bengal Act II of 1888, s. 51.] (149.)

Members of Cantonment Committees, cantonment servants and certain contractors and agents deemed to be public servants.

46. Every member of a Cantonment Committee, every servant of a Cantonment Authority, every contractor or agent for the collection of any cantonment tax, and every servant or other person employed by any such contractor or agent in the collection of any such tax shall be deemed to be a public servant within the meaning of section 21 of the

XLV of 1860. Indian Penal Code.

(a) Serious losses are sometimes incurred by the Government in consequence of negligence on the part of Cantonment Magistrates and others. By this chapter Cantonment Magistrates and other members of Cantonment Committees are made liable for all such losses as are the direct consequence of negligence on their part.

[Act XVIII of 1889, s. 138.] (195, 196.)

Penalty on member of Cantonment Committee or cantonment servant being interested in contract made with Cantonment Authority.

47. (*1*) If any member of a Cantonment Committee or any servant of a Cantonment Authority is, otherwise than with the permission in writing of the Commander-in-Chief, directly or indirectly interested in any contract made with the Cantonment Authority, he shall be deemed to have committed an offence punishable under section 168 of the Indian Penal Code.

XLV of 1860.

(*2*) A person shall not, by reason of being a shareholder in, or member of, any incorporated or registered company, be held to be interested in any contract entered into between the company and the Cantonment Authority, but he shall not take part in any proceedings of a Cantonment Committee relating to any such contract.

[Madras Act IV of 1884, s. 46.] (9.)

Members of Cantonment Committees and Commanding Officers not personally liable on contracts or for expenses.

48. No member of a Cantonment Committee or Commanding Officer shall be personally liable in respect of any contract lawfully made, or for any expense lawfully incurred, by or on behalf of a Cantonment Authority; but the Cantonment Fund shall be liable for and chargeable with all such contracts and expenses.

CHAPTER VI. (a)

THE CANTONMENT FUND.

Income.

[Clause (31).]

Income of Cantonment Fund.

49. There shall be placed to the credit of the Cantonment Fund the following sums, namely:—

(*a*) all fines mentioned in clause (*a*) of section 21 of the Cantonments Act, 1889, subject to the deductions referred to in that clause; XIII of 1889.

(*b*) the proceeds of taxes imposed under section 17 of the Cantonments Act, 1889, or levied under Act XX of 1856, in the cantonment, or continued in force in the cantonment under section 2, sub-section (*2*), of the Cantonments Act, 1889;

(*c*) rents and profits accruing from lands or other property placed by the Government under the management of the Cantonment Authority;

(*d*) all sums directed by section 8 of the Hackney-carriage Act, 1879, or by any other enactment for the time being in force, to be placed to the credit of the Fund; XIV of 1879.

(*e*) all sums which the Local Government may, by order under section 31 of the Cattle-trespass Act, 1871, or under any other enactment for the time being in force, direct to be placed to the credit of the Fund; I of 1871.

(a) The objects to which Cantonment Funds may be applied are practically the same as heretofore, but they are more carefully defined.

The method of drawing money is maintained under the same restrictions as heretofore.

All procedure is, while more carefully defined, maintained as heretofore.

Provision is made for the investment of the balance when convenient, and for the periodical publication of the accounts.

Cantonment Code.

(Part II.—General Administration.—Chapter VI.—The Cantonment Fund.—Sections 50-54.)

(239.)

(*f*) interest realised on the investment of any balance of the Fund;

(*g*) all other moneys received under this Code; and

(*h*) all sums granted by the Governor General in Council in aid of the Fund.

[Clause (31).]

Income to be recovered within the year for which it is due.

50. It shall be the duty of the Cantonment Authority to take such steps as may be necessary, consistent with this Code and any other law for the time being in force, for the recovery of all income of the Cantonment Fund within the year for which it is due.

Application of the Fund.

[Clause (7).] (201, 202, 207.)

Application of the Fund.

51. (*1*) The Cantonment Fund shall be applicable, subject to the provisions of this Code, to the following purposes, namely:

(*a*) the payment of any expenses directed by section 8 of the Hackney-carriage Act, 1879, or by any other enactment for the time being in force to be debited to the Fund; XIV of 1879.

(*b*) the maintenance of the police force employed in the cantonment;

(*c*) the payment of the salaries of all servants of the Cantonment Authority;

(*d*) the maintenance of an office for the Cantonment Authority;

(*e*) the carrying out of a proper system of conservancy throughout the cantonment for all its inhabitants other than British troops, including the pay of conservancy establishments, the construction of latrines and other conservancy works, and the purchase of all necessary conservancy carts, utensils and other appliances;

(*f*) the carrying out of other sanitary measures within the cantonment, including the prevention of the spread of infectious or contagious disorders, and generally the maintenance of the cantonment in a thoroughly sanitary condition;

(*g*) the provision and maintenance within the cantonment of hospitals, dispensaries, markets and slaughter-houses;

(*h*) the management and improvement of lands and other property placed by the Government under the management of the Cantonment Authority, including—

(i) the construction and maintenance of streets (other than those maintained from Imperial or Provincial Funds),

(ii) the lighting, watering and cleansing of streets,

(iii) the maintenance of public parks and gardens and the planting of trees;

(*i*) the abatement of nuisances in the cantonment;

(*j*) the survey of buildings and lands in the cantonment; and

(*k*) generally the payment of all expenses incurred in the cantonment under this Code or under any other law for the time being in force in the cantonment.

(*2*) The Cantonment Fund shall, with the general or special sanction of the Local Government, be applicable to any of the purposes mentioned or referred to in sub-section (*1*), within or without British India, beyond the limits of the cantonment in cases in which, in the opinion of the Local Government, the application of the Fund beyond those limits is for the benefit of the inhabitants of the cantonment or of any military force ordinarily quartered therein or of any detachment of any such force.

Budget Estimates and Authority for Payments.

[Clause (31).] (227, 228, 230.)

Budget Estimate to be forwarded to Commander-in-Chief.

52. (*1*) On the first day of June in each year, or on such other date as the Commander-in-Chief, in order to meet the requirements of the Local Government, may direct, the Cantonment Authority shall forward to the Commander-in-Chief, through the proper channel, a Budget Estimate of income and expenditure for the ensuing financial year.

(*2*) The Budget Estimate shall be prepared in such form as may be prescribed by the Comptroller General in communication with the Commander-in-Chief in India.

(*3*) The Cantonment Authority shall, when preparing the Budget Estimate, carefully reconsider that portion of it which refers to the current year, and make such revision therein (in the columns provided for that purpose) as, having regard to the actuals of the year, so far as they have been recorded, and the probabilities of the remaining months of the year, may appear to it to be necessary.

[Clause (31). (286.)

Procedure when Commander-in-Chief has reviewed the Budget Estimates.

53. (*1*) On completing his review of the several Budget Estimates, the Commander-in-Chief shall forward—

(*a*) to the Government, with such observations as he may think fit, an abstract of the Estimates, showing which of the several Cantonment Funds require State aid and to what amount such aid is required in each case, together with a copy of the Budget Estimate of each such Fund, and

(*b*) to the Controller of Military Accounts, detailed statements showing the amount of each grant-in-aid required and the purpose and the cantonment for which each is required.

Explanation.—In this sub-section "Government" means, as regards cantonments in the Bengal command, the Governor General in Council, and, as regards cantonments in the Madras and Bombay commands, the Local Government.

(*2*) Whenever the Commander-in-Chief sanctions any Budget Estimate, he shall forward the same to the Local Government for communication to the Accountant General or Comptroller and for inclusion in the Budget Estimate of Excluded Local Funds.

[Clause (31).] (285.)

Consolidated estimate for each province.

54. As soon as possible after the receipt by it of the several Budget Estimates, the Local Government shall forward to the Commander-in-Chief for record a consolidated estimate of the receipts and expenditure of the several cantonments within the territories subject to its administration.

Cantonment Code.

(Part II.—General Administration.—Chapter VI.—The Cantonment Fund.—Sections 55-62. Chapter VII.—Contracts.—Sections 63-65.)

[*Clause* (8).] (226, 232, 273.)

55. (*1*) The sum at the disposal of the Cantonment Authority for expenditure for any purpose is strictly limited to the amount provided for that purpose in the Budget Estimate, as sanctioned by the Commander-in-Chief :

Expenditure limited to amounts provided in Budget or subsequently sanctioned.

(*2*) Provided that—

(*a*) if it appears to the Commander-in-Chief that an additional allotment is necessary for any special purpose, he may sanction the same, at any time during the year to which the Estimate relates, up to the amount of any balance in hand to the credit of the Fund ;

(*b*) the Cantonment Authority may, with the previous sanction of the Commander-in-Chief, re-appropriate any sum from one head or sub-head of the Budget to another.

(*3*) A copy of every order made under sub-section (*2*) shall be sent by the Commander-in-Chief or the Officer Commanding the district, as the case may be, to the Accountant General or Comptroller.

Explanation 1.—No payment may be made from the Cantonment Fund unless it is provided for either (*a*) in the Budget as sanctioned, or (*b*) under an additional allotment, or (*c*) by re-appropriation.

Explanation 2.—Savings under one head or sub-head of the Budget cannot be applied to expenditure under another head or sub-head without the previous sanction of the Commander-in-Chief.

[*Clause* (31).]

56. The Cantonment Authority shall not incur any expenditure in anticipation of, or accumulate outstanding debts against, the succeeding year's Budget.

Expenditure not to be incurred in anticipation of succeeding year's Budget.

[*Clause* (8).] (208, 209.)

57. Money may be paid from the Cantonment Fund—

Payments how made.

(*a*) where a charge does not exceed ten rupees in amount, on the order of the Cantonment Magistrate, in cash, and

(*b*) where a charge exceeds ten rupees in amount, by cheque signed—

(*i*) where there is a Cantonment Committee, by the president, or,

(*ii*) where a Cantonment Committee does not exist or cannot be convened, by the Commanding Officer of the cantonment.

Investment of balance.

[*Clause* (9).] (233, 234, 238, 241, 242.)

58. (*1*) The Local Government may, with the concurrence of the Commander-in-Chief, direct that any balance of the Cantonment Fund which is not required for expenditure within twelve months be invested in Government securities, and may, when necessary, direct the sale of the whole or any of the securities in which any balance has been so invested.

Investment of balance of Cantonment Fund.

(*2*) The purchase and sale of the securities shall be effected, and the investment shall be held, under the rules prescribed in the Civil Account Code for securities purchased and sold for and held in trust by officers of the Government.

Accounts.

[*Clause* (11).] (243—271.)

59. The Cantonment Authority shall keep such accounts of receipts into and expenditure from the Cantonment Fund as may be prescribed by rules made by the Comptroller General in communication with the Commander-in-Chief in India.

Accounts to be kept.

[*Clause* (11).] (274—281.)

60. The accounts of Cantonment Funds shall be audited by the Accountant General or Comptroller in accordance with such rules as may be prescribed by the Comptroller General in communication with the Commander-in-Chief in India.

Audit of accounts.

[*Clause* (31).] (272, 284.)

61. After the accounts of all Cantonment Funds in a Province have been audited, an abstract thereof shall be forwarded by the Local Government to the Commander-in-Chief for record.

Consolidated account of actuals.

[*Clause* (11).] (288.)

62. The Cantonment Authority shall publish the accounts of the Cantonment Fund annually in such form and in such manner as it may consider best adapted for making them known to the inhabitants of the cantonment.

Publication of accounts.

CHAPTER VII. [a]

CONTRACTS.

[*Clause* (10).] (164, 396.)

63. (*1*) Leases or other contracts under which money is to be received into the Cantonment Fund shall not ordinarily be made by the Cantonment Authority for a longer period than twelve months.

Limitation of power to make contracts under which money is to be received into the Cantonment Fund.

(*2*) If in any case the Cantonment Authority desires to make such a contract for a longer period than twelve months, it shall before doing so obtain the sanction of the Commander-in-Chief.

[*Clause* (10).] (167.)

64. No contract involving expenditure from the Cantonment Fund shall be made by the Cantonment Authority unless provision for the expenditure has been made in the Budget Estimate as sanctioned, added to or altered under Chapter VI.

Limitation of power to make contracts involving expenditure.

[*Clause* (10).] (171, 174.)

65. (*1*) Every contract made by the Cantonment Authority shall, except as provided in sub-section (*2*), be executed by the Cantonment Magistrate.

Officers by whom contracts are to be executed.

(*2*) Every contract made by the Cantonment Authority for the execution of works shall, when the value or amount of the contract exceeds two hundred rupees, be executed by the Executive Engineer.

(a) The object of the rules regarding contracts is to ensure system and regularity in the mode of entering into them, and the proper conduct of sales, tenders and auctions, these being all matters in which carelessness on the part of Cantonment Magistrates entails loss to the Government.

Cantonment Code.

(Part II.—General Administration.—Chapter VII.—Contracts.—Sections 66-74.)

[*Clause* (10).] (173.)

66. (*1*) The Cantonment Magistrate shall not execute on behalf of the Cantonment Authority any contract the value or amount of which exceeds fifty rupees without the consent of the Cantonment Committee or, where a Cantonment Committee does not exist or cannot be convened, of the Commanding Officer of the cantonment :

Consent of Cantonment Authority required before Cantonment Magistrate executes certain contracts.

(*2*) Provided that in a case of urgency the Cantonment Magistrate may, with the consent of the president, execute on behalf of a Cantonment Committee any contract the value or amount of which exceeds fifty rupees but does not exceed two hundred rupees, but he shall in every such case submit to the Committee at its next meeting a report of the action taken and the reasons therefor.

[*Clause* (10).]

67. The Cantonment Magistrate shall not execute on behalf of the Cantonment Authority any contract for the farming of octroi collections unless a draft of the same has been referred, through the Officer Commanding the district, to the Commander-in-Chief, who shall, if he considers it desirable to do so, refer the draft to the Local Government with a view to obtaining legal opinion thereon.

Draft of contract for farming octroi collections to be referred to Commander-in-Chief.

[*Clause* (10).] (172.)

68. Every contract executed by the Cantonment Magistrate on behalf of the Cantonment Authority the value or amount of which exceeds fifty rupees, except a contract for the sale of moveable property, shall be in writing, shall be signed by the Cantonment Magistrate and shall be drawn up in the prescribed form (if any).

Form of contracts executed by Cantonment Magistrate.

Explanation 1.—The prescribed form for a contract for the execution of a work is the form in use for that purpose in the Public Works Department under the orders of the Local Government.

Explanation 2.—The prescribed form for any other contract is the form (if any) prescribed by the Governor General in Council for the purpose. Copies of any forms so prescribed will be obtainable on application to the Cantonment Magistrate.

[*Clause* (10).] (176, 182.)

69. (*1*) Unless the Commander-in-Chief otherwise specially directs, or it is impracticable, the Cantonment Magistrate shall publicly invite tenders, or give notice of a public auction, before he executes on behalf of the Cantonment Authority any lease or other contract the value or amount of which exceeds five hundred rupees.

Obligation of Cantonment Magistrate to proceed by tender or auction in certain cases.

(*2*) Every sale of moveable property by the Cantonment Magistrate shall be made by public auction unless the Cantonment Authority in any case otherwise directs.

Clause (10).] (183, 184.)

70. Where the Cantonment Magistrate sells moveable property otherwise than by public auction, payment for the same shall be made not later than three days after delivery of the property.

Time of payment for moveable property sold privately by Cantonment Magistrate.

[*Clause* (10).]

71. (*1*) The Cantonment Authority may fix the amount of security (if any) to be deposited for the fulfilment of any contract (other than a contract based upon a tender or auction) executed by the Cantonment Magistrate on its behalf.

Security for fulfilment of contract.

(*2*) Where security is required, it shall be of the nature and shall be dealt with in the manner prescribed in Chapter IV for security taken from a servant of the Cantonment Authority :

(*3*) Provided that re-delivery of securities to a depositor may be made at any time after the expiry of one month from the completion of the contract to the satisfaction of the Cantonment Authority.

[*Clause* (10).] (191.)

72. The Cantonment Magistrate may rescind any contract executed by him on behalf of the Cantonment Authority if he finds after due enquiry that the tender or the auction bid on which the contract was based was made by a person who at the time of making the tender or bid belonged to, or was directly or indirectly connected with, the service of the Cantonment Authority or of the Government.

Power of Cantonment Magistrate to rescind contract made with servant of Cantonment Authority or of Government.

[*Clause* (10).] (169, 192.)

73. (*1*) The Officer Commanding the district, or the Cantonment Authority, may call for the proceedings of the Cantonment Magistrate in respect of any contract executed by him or any tender which he has accepted, or any auction or other sale which he has effected, and, if he or it finds that any of the provisions of this chapter have been contravened, may refer the matter for the orders of the Commander-in-Chief.

Power of Commander-in-Chief to rescind contract executed by Cantonment Magistrate.

(*2*) The Commander-in-Chief may rescind any contract or revoke any transaction so referred to him, and may direct that no payment in pursuance of any such contract or transaction shall be made from the Cantonment Fund.

(*3*) Any loss to which the Cantonment Authority may become liable by reason of any order made by the Commander-in-Chief under sub-section (*2*) shall be borne by the Cantonment Magistrate.

Procedure as to Tenders and Auctions.

[*Clause* (10).] (177, 178, 185, 186.)

74. (*1*) Whenever the Cantonment Magistrate determines to invite tenders or to hold a public auction, he shall give public notice in one or more of the following modes, namely :

Publication of notice in case of tenders or auction.

(*a*) advertisement in the official Gazette,

(*b*) advertisement in a local newspaper,

(*c*) proclamation by public written notice in English or in such vernacular languages as may be convenient,

(*d*) proclamation by beat of drum,

(*e*) any other mode of giving public notice customary in the neighbourhood :

Provided that the notice is made as public locally as is reasonable in the circumstances of each case.

(2) The notice shall, when published in the manner specified in clause (*a*), clause (*b*) or clause (*c*) of sub-section (*1*), be in Form 2 or Form 3, as the case may be, of Schedule I, or as near thereto as circumstances admit, and shall, when published in any other manner, contain such of the particulars mentioned in the said Form 2 or Form 3, as the case may be, as the Cantonment Magistrate thinks sufficient.

[*Clause* (10).] (178, 179.)

Provisions as to tender forms, earnest-money and security.

75. (*1*) All tenders shall be submitted in a form (if any) prescribed by the Commander-in-Chief.

(*2*) The Cantonment Magistrate may fix the price (if any) to be paid for blank forms of tender.

(*3*) The Cantonment Magistrate may fix the amount of earnest money (if any) required to accompany any tender, and the amount of security (if any) to be deposited for the fulfilment of the contract created by the acceptance of any tender:

Provided that the amount shall not in either case be less than one-twelfth of the gross total of the value or amount of the tender.

(*4*) Where earnest money is required, it shall be deposited in cash.

(*5*) Where security is required, it shall be of the nature and shall be dealt with in the manner prescribed in Chapter IV for security taken from a servant of the Cantonment Authority:

Provided that re-delivery of securities to a depositor may be made at any time after the expiry of one month from the completion of the contract to the satisfaction of the Cantonment Authority.

(*6*) The date for depositing security shall be not later than one month after the acceptance of the tender.

[*Clause* (10).] (180.)

Opening of tenders.

76. At the appointed day and hour the Cantonment Magistrate shall open the tenders publicly, and, if any of the persons tendering or their agents are in attendance, in their presence.

[*Clause* (10).] (186, 187.)

Provisions as to time of payment, security and compensation for non-payment in case of auctions.

77. (*1*) The Cantonment Magistrate may appoint the time or times (if any) for payment of money due as the result of an auction, and may fix the sum (if any) to be deposited as security for payment and the sum (if any) to be paid as compensation in the event of failure by the purchaser to carry out the contract:

Provided that a sum fixed under this sub-section shall not be less than one-twelfth of the amount of the accepted bid.

(*2*) The provisions of sub-sections (*5*) and (*6*) of section 75 shall apply to any security taken under this section.

[*Clause* (10).] (181, 188.)

Cantonment Magistrate not bound to explain his action as to tender or bid.

78. (*1*) The Cantonment Magistrate shall not be bound to give any explanation of his reasons for accepting or rejecting any particular tender or bid to any person or authority except the Cantonment Authority.

(*2*) Any explanation given to the Cantonment Authority under this section may, if the Cantonment Magistrate thinks fit, be given in confidence.

PART III.

OCCUPATION OF LAND.

CHAPTER VIII. (a)

APPLICATIONS TO HOLD LAND.

Applications for building-sites.

[*Clause* (1).]

Cantonment Authority not to permit irregular occupation of land.

79. The Cantonment Authority shall not permit any land belonging to the Government in the cantonment to be enclosed, or any house, hut, shed, stable or building of any kind to be erected on such land, except in accordance with the provisions of this Chapter and Chapter IX.

[*Clause* (1).] (289-291.)

Applications for building-sites outside bazars.

80. Every application for permission to occupy, for the purposes of a building-site, land (outside bazars) belonging to the Government in a cantonment shall be submitted to the Cantonment Magistrate in writing, and shall contain the following particulars, namely:

(*a*) the situation, area and boundaries of the land;

(*b*) the materials to be used in the intended buildings; and

(*c*) the period after the date of occupation within which the intended buildings are to be completed.

[*Clause* (1).] (292, 293, 295.)

Documents to accompany such applications.

81. Every such application shall be accompanied by—

(*a*) a plan in triplicate, on a scale of one hundred and ten feet to the inch, authenticated by the Executive Engineer, showing—

(*i*) the boundaries of the land,

(*ii*) the roads or lands adjoining, and

(*iii*) all buildings intended to be erected on the land;

(*b*) a ground plan and elevation of the principal building intended to be erected, showing the dimensions of the same;

(*c*) a specification of the buildings intended to be erected;

(*d*) an approximate statement of the intended outlay on the buildings;

(*e*) a certificate from the Executive Engineer that there is no departmental objection to the application being granted; that the land is or is not within two thousand yards of a fortified place, and that the land is not in his opinion likely to be required for any public purpose; and

(*f*) a certificate from the applicant that he has read the form of agreement prescribed in accordance with section 113, and is willing to execute an agreement in that form.

(a) The provisions of this chapter aim at preventing irregular permissions to squatters and others to occupy Government land, and at ensuring that every application for the grant of a site in cantonments shall be made in regular form, and be accompanied by such plans and other documents as will both furnish information on all necessary details and render the site capable of identification with absolute certainty at all future times.

Provision is also made for allowing existing grantees of sites in cantonments to have their grants placed under the Code.

[*Clause* (1).] (293, Expln., 294.)

Disposal of such applications.

82. (*1*) Every such application shall, if the procedure prescribed by section 80 and section 81 has been correctly observed, be submitted by the Cantonment Magistrate as soon as convenient to the Commanding Officer of the cantonment.

(*2*) If the Commanding Officer considers that the occupation of the land in the manner proposed will not be objectionable, either as regards the health or comfort of the troops or in any other respect, he shall attach to the application a certificate to that effect, and shall forward the application through the proper channel to the Commander-in-Chief.

(*3*) The Commander-in-Chief may sanction or reject any such application, as he thinks fit:

(*4*) Provided that, if the land applied for is within two thousand yards of a fortified place, the Commander-in-Chief shall not accord his sanction without the express orders of the Governor General in Council:

(*5*) Provided also that, if it is intended to set apart for occupation by civil officers the house to be erected on the land, the Commander-in-Chief shall not accord his sanction without the concurrence of the Local Government.

[*Clause* (1).] (289—291.)

Applications for building-sites in bazars.

83. (*1*) Every application for permission to occupy for the purposes of a building-site land situate in a bazar shall be submitted to the Cantonment Magistrate in writing, and shall contain the following particulars, namely:

(*a*) the situation, area and boundaries of the land;

(*b*) a description of the building intended to be erected; and

(*c*) the materials to be used in the intended building.

(*2*) The Cantonment Magistrate may sanction or reject any such application, as he thinks fit.

Applications in respect of land granted before the commencement of this Code.

[*Clause* (31).] (289.)

Applications by existing grantees to hold under Chapter IX.

84. Any grantee of land (outside bazars) occupied before the commencement of this Code may apply for permission to hold the land under the provisions of Chapter IX.

[*Clause* (31).] (290—293.)

Particulars required in respect of such applications.

85. Every application made under section 84 shall be submitted to the Cantonment Magistrate in writing, shall show the situation, area and boundaries of the land, and shall be accompanied by—

(*a*) a plan, in triplicate, on a scale of one hundred and ten feet to the inch, authenticated by the Executive Engineer, showing—

(*i*) the boundaries of the land,

(*ii*) the roads or lands adjoining, and

(*iii*) all buildings standing on the land; and

(*b*) a certificate from the applicant that he has read the form of agreement prescribed in accordance with section 113, and is willing to execute an agreement in that form.

[*Clause* (31).] (293, Expln., 294.)

Disposal of such applications.

86. (*1*) Every such application shall, if the procedure prescribed by section 85 has been correctly observed, be submitted by the Cantonment Magistrate as soon as convenient to the Commanding Officer of the cantonment for transmission through the proper channel to the Commander-in-Chief.

(*2*) The Commander-in-Chief may sanction or reject any such application, as he thinks fit.

CHAPTER IX. (a)

CONDITIONS OF OCCUPANCY.

Conditions applicable in case of building-sites (outside bazars) granted after the commencement of this Code.

[*Clause* (2).] (296, 308, 323, 328.)

Conditions applicable in case of building-sites (outside bazars) granted after commencement of this Code.

87. Every permission given in pursuance of an application to occupy land (outside bazars) for the purposes of a building-site shall be deemed to have been granted on the conditions specified in sections 88 to 110, both inclusive.

[*Clause* (2).] (309.)

Execution of agreement.

88. The applicant shall not use or occupy the land, or erect any building thereon, until he has duly executed an agreement in the prescribed form, and has registered the same

(a) The two main conditions exacted by the Government in return for the permission to build houses on its land are—

(*i*)—that the Government shall have the first claim to rent the house to the exclusion of any other person: this claim it passes on to its officers, but modified by a proviso that the claim shall not be exercised so long as there is another suitable available; and

(*ii*)—that the Government may resume the land at any time on paying compensation for all buildings which have been erected thereon with the concurrence of proper authority.

The principal aim, therefore, of this chapter is to enunciate these two conditions, and to ensure that they are duly subscribed to by every grantee. With this object a carefully drawn form of agreement is prescribed, in which these and all minor conditions are to be detailed, and which shall be signed by the grantee in all cases before he is put in possession of the land.

Provision is also made for setting apart certain houses for the exclusive use of civil officers, and carefully detailed rules are provided for the exercise, under due restrictions, of the right of priority of claim to rent houses in the three cases (*a*) of a military officer, (*b*) of a civil officer and (*c*) of departmental and regimental military officers, *inter se*. This is preferable to any arrangement for setting apart portions of a cantonment for particular classes or sub-divisions of the community, a method now out of date.

The subjects of tenancy, rents, repairs, &c., are all provided for by rules aimed both at placing all such matters on a just and equitable basis, such as should be equally satisfactory to both landlords and tenants, and also at protecting landlords from unfair treatment by unscrupulous tenants.

Disputes are to be settled by arbitration.

Cantonment Code.

(Part III.—Occupation of Land.—Chapter IX.—Conditions of Occupancy.—Sections 89-97.)

under the law for the time being in force relating to the registration of documents.

Explanation.—"The prescribed form" means a form prepared in accordance with section 113 and published in the *Gazette of India*. Copies of the form will be obtainable on application to the Cantonment Magistrate.

[*Clause* (2).] (309.)

Form of agreement not to be varied.

89. Any material variation made in the prescribed form of agreement without the express sanction of the Governor General in Council shall not be binding on the Government.

[*Clause* (2).] (300.)

Erection of buildings.

90. Buildings may be erected on the land only in accordance with the agreement or, where a proposed building, alteration or addition is not provided for by the agreement, with the written permission of the Cantonment Authority.

[*Clause* (2).] (301.)

Commencement and completion of buildings.

91. The buildings to be erected on the land in accordance with the agreement shall be commenced within six months from the execution of the agreement, and shall be completed within the period fixed in that behalf by the agreement, or within such further period (if any) as the Cantonment Authority may, by order in writing, allow.

[*Clause* (2).]

Right of the Government to require the grantee to let the house to a military or civil officer.

92. (*1*) In view of the special objects with which land is taken up by the Government for use as a cantonment, and of the necessity of securing, in the interests of the State,

(*See Cantonments Bill of 1888, s. 23 (1).*)

that military officers on duty in cantonments shall not be compelled to reside too far, in the case of regimental officers, from the men under their command, and, in the case of departmental officers, from the locality in which their duties chiefly lie, and

that civil officers shall be provided with accommodation in cantonments,

the Government reserves a right, subject to the provisions hereinafter in this chapter contained, to require the grantee at any time to let the house erected on the land to any military officer or civil officer to the exclusion of any other person.

Clause (2).] (310, 324.)

Exercise of the Government right in behalf of a military officer where the house is not already occupied by a military officer.

93. Whenever the Cantonment Authority considers that the right reserved by section 92 should be exercised in behalf of any military officer, it may, if the house is not already occupied by a military officer, and if it has not been set apart under section 95 for occupation by civil officers, by notice require the grantee to let the house to the military officer named in the notice, and for that purpose to cause the existing tenant (if any) to vacate the same:

Provided that the grantee may at his option apply to the Cantonment Magistrate to enforce the vacation of the house under the provisions of section 115.

[*Clause* (2).] (325.)

Exercise of the Government right in behalf of a military officer where the house is occupied by another military officer.

94. If the house is occupied by a departmental military officer, and the Cantonment Authority considers that it should, in view of the requirements stated in section 92, be vacated in favour of a regimental officer, or *vice versâ*, it may by notice require such departmental officer to vacate the house in favour of such regimental officer, or such regimental officer to vacate the house in favour of such departmental officer, as the case may be;

and may, if necessary, by further notice require the grantee to permit the change of tenancy.

[*Clause* (2).] (310, 329–332.)

Exercise of the Government right in behalf of a civil officer.

95. (*1*) The Cantonment Authority may at any time, with the previous sanction of the Commander-in-Chief given with the concurrence of the Local Government, set apart the house for occupation by civil officers.

(*2*) If the house has been so set apart, the arrangement shall not be revoked without the concurrence of the Local Government.

(*3*) If, while the house is so set apart, the Cantonment Authority at any time considers that the right reserved by section 92 should be exercised in behalf of any civil officer, it may, if the house is not already occupied by a civil officer, by notice require the grantee to let the house to the civil officer named in the notice, and for that purpose to cause the existing tenant (if any) to vacate the same:

Provided that the grantee may at his option apply to the Cantonment Magistrate to enforce the vacation of the house under the provisions of section 115.

[*Clause* (2).] (327, 333.) (*See Cantonments Bill of 1888, s. 23 (1).*)

Procedure to be observed before the Government right is exercised.

96. (*1*) Whenever a military officer or a civil officer considers that a notice should be issued in his behalf under section 93, section 94 or section 95, he may request the Commanding Officer of his regiment, or (in the case of a military departmental officer) the local head of his department, or (in the case of a civil officer) the District Magistrate to make an application to that effect to the Cantonment Authority.

(*2*) On receipt of any such application the Cantonment Authority shall enquire into the case, and it shall not issue the notice unless it is satisfied—

(*a*) that the circumstances are such as to require its intervention, and

(*b*) that no other suitable house is available, having regard both to the rank of the officer and the locality in which his duties chiefly lie.

[*Clause* (2).] (311.) (*See Cantonments Bill of 1888, s. 23 (1).*)

Government right not to be exercised in respect of certain houses.

97. No notice shall be issued under section 93 or section 95 if the house—

(*a*) is occupied as a bank, and has been so occupied continuously during the last preceding twelve months, or

(*b*) is occupied as an hotel, shop or school, and has been so occupied continuously during the last preceding three years, or

Cantonment Code.

(Part III.—Occupation of Land.—Chapter IX.—Conditions of Occupancy.—Sections 98-105.)

(*c*) is occupied by a railway-administration, or

(*d*) is appropriated by the Government for use as a public office or for any other purpose.

[*Clause* (2).]

Sanction to be obtained before the house is occupied as a bank, hotel, shop or school or by a railway-administration.

98. (*1*) In view of the privilege granted by section 97, the house shall not be occupied—

(*a*) for the purposes of a bank, hotel, shop or school without the previous sanction of the Commander-in-Chief obtained through the Cantonment Auhority, or

(*b*) by a railway-administration without the previous sanction of the Government obtained through the Cantonment Authority.

Explanation.—In this sub-section "Government" means, as regards cantonments in the Bengal Command, the Governor General in Council, and, as regards cantonments in the Madras and Bombay Commands, the Local Government.

(*2*) The Commander-in-Chief shall not sanction the occupation of the house for the purposes of a bank, hotel, shop or school unless he is satisfied that the number of houses in the cantonment, as compared with the strength of the existing or probable garrison, renders it unlikely that such occupation would—

(*a*) cause any difficulty in obtaining accommodation in the cantonment, or in the part of the cantonment in which the house is situate, for military officers or civil officers, or

(*b*) necessitate the acquisition of land at some future time for the extension of the cantonment.

[*Clause* (2).] (298.)

Grantee to inform intending tenant, not being a military or civil officer, of his liability to ejectment.

99. To prevent hardship in the enforcement of the right reserved by section 92, it shall be the duty of the grantee, before he lets the house to any person other than a military officer or (if the house has been set apart for occupation by civil officers) a civil officer,

to inform the tenant of his liability to ejectment, and to send to the Cantonment Authority a report, countersigned by the tenant, stating that he has so informed him.

[*Clause* (2).] (311.) (*See Cantonments Bill of 1888, s. 23 (2).*)

Rent offered to be stated in notice.

100. Every notice issued under section 93 or section 95 shall state the amount of the monthly rent which, with the approval of the Cantonment Authority, the proposed tenant offers to pay for the house.

[*Clause* (2).] (311, 312.) (*See Cantonments Bill of 1888, s. 23 (1).*)

Time to be allowed for giving possession of house.

101. (*1*) If the house is unoccupied, any notice issued under section 93 or section 95 may require the grantee to give possession of the same to the proposed tenant within seven days from the service of the notice.

(*2*) If the house is occupied, no notice issued under section 93, section 94 or section 95 shall require its vacation in less than thirty days from the service of the notice.

[*Clause* (2).] (322.) (*See Cantonments Bill of 1888, s. 23 (12).*)

Claims to compensation barred.

102. Neither the Cantonment Authority nor any military officer or civil officer shall be liable to pay compensation to any person for any loss incurred in consequence of any notice issued under section 93, section 94 or section 95; and

the grantee shall not be liable to pay compensation to any occupier for any loss so incurred, where he has duly informed the occupier of his liability to ejectment.

[*Clause* (2).] (319–321.) (*See Cantonments Bill of 1888, s. 24.*)

Terms of tenancy applicable to military and civil officers.

103. (*1*) Every lease to a military officer or civil officer shall, unless the officer of his own accord makes a special agreement to the contrary, be deemed to be a lease from month to month, terminable without notice in the case of the departure of the officer from the cantonment on duty or on medical certificate, or by fifteen days' notice to the grantee in any other case.

(*2*) Every notice under sub-section (*1*) must be in writing, signed by or on behalf of the tenant, and the Cantonment Magistrate shall, if the tenant so desires, cause it to be served on the grantee free of charge.

(*3*) If a military officer or civil officer who leaves the cantonment on duty or on medical certificate has occupied the house during a portion only of the calendar month in which he so leaves, he shall be liable to pay as rent for that portion a sum bearing the same proportion to the monthly rent as the period bears to the whole month:

Provided that the sum shall not in any case be less than one-fourth of the monthly rent.

[*Clause* (2). (314.)

Responsibility of joint tenants for rent.

104. Where two or more military officers or civil officers occupy the house, whether each pays a share of the rent direct to the grantee or not, one of them shall be responsible for the whole rent, as follows:—

(*a*) where an arrangement has been made between the grantee and one of the tenants for the payment of the whole rent, the tenant who made the arrangement; and

(*b*) where no such arrangement has been made,—

(*i*) if the terms of tenancy commenced at the same time, the senior tenant, as seniority is reckoned in the service of the Government, and

(*ii*) if the terms of tenancy commenced at different periods, the first occupant.

[*Clause* (2).] (316–318.)

Reference to arbitration.

105. If the grantee and his tenant, being a military officer or a civil officer, disagree on any question relating to rent or repairs, the question shall, subject to section 120, be referred for settlement to a Committee of Arbitration under the provisions of Chapter X:

Provided as follows:

(*a*) an offer of rent made in a notice in accordance with section 100 shall be deemed to have been accepted, unless the (*See Cantonments Bill of 1888, s. 23 (7).*)

Cantonment Code.

(Part III.—Occupation of Land.—Chapter IX.—Conditions of Occupancy.—Sections 106-111.)

grantee applies within fifteen days from the service of the notice for a Committee of Arbitration;

(*b*) after such acceptance, or the decision of a Committee of Arbitration, the amount of such rent shall not be called in question by either party except in the circumstances mentioned in clause (*b*) of section 119;

(*See Cantonments Bill of 1888, s. 25 (4).*)

(*c*) when a Committee of Arbitration has decided on any question relating to repairs, no such question in respect of the same house shall again be brought before a Committee of Arbitration within twelve months from the date of the decision.

(411.) *Explanation.*—In this section "repairs" includes such repairs as are usually made in the neighbourhood to buildings of the same class as that to which the house in question belongs, but does not include additions, improvements or alterations except in so far as they are necessary to carry out such repairs as aforesaid, or have been made with the grantee's consent.

[*Clause (2).*] (315.)

106. If the house has been vacated in compliance with a notice issued under section 93, section 94 or section 95 in favour of a military officer or a civil officer, and the tenant fails to pay the rent due for the use and occupation of the house, or to pay for any damage caused by an unreasonable use of the same, the grantee may, when the sum due to him on account of rent or damages (if any), or both, is equal to three months' rent, apply to the Officer Commanding the district for an order revoking the notice; and on receipt of any such order the Cantonment Magistrate shall by notice require the tenant to vacate the house.

Procedure where military or civil officer fails to pay rent or damages.

[*Clause (2).*] (313.)

107. If any Cantonment Authority is satisfied that a military officer or civil officer in whose favour a house was vacated as aforesaid—

Government right not to be exercised in behalf of certain officers.

(*a*) made any default in payment of the rent, or

(*b*) used the house in an unreasonable manner, or

(*c*) failed to comply with any reasonable conditions imposed upon him by the grantee, or

(*d*) gave up his occupation of the house during any temporary absence from the cantonment,

the Cantonment Authority shall not require any grantee to let a house to him within five years from the date of such default, act or failure.

Explanation 1.—This section applies whether the default, act or failure occurred in the same or any other cantonment, or with respect to a house belonging to the same or any other grantee.

Explanation 2.—"Temporary absence" means an absence for any reason other than departure from the cantonment on duty or on medical certificate.

[*Clause (2).*]

108. (*1*) Whenever the grantee intends to assign his interest in the land, or in the house erected on the land, by sale, gift or exchange, he or the intended assignee shall give the Cantonment Magistrate one month's notice in writing before the assignment is completed, and the Governor General in Council shall have power within that period to veto the assignment.

Assignment of grantee's interest.

(*2*) If in any case the Cantonment Authority considers it desirable that the said power of veto should be exercised, it shall report the case to the Commander-in-Chief by telegram.

109. (*1*) If the grantee commits any breach of the conditions specified in sections 88 and 91, the Cantonment Authority may by notice require him to vacate the land, and to remove all or any buildings or materials which he may have erected or collected thereon, and, if any agreement has been executed, may cancel the same.

[*Clause (2).*] (297.)

Penalties for breach of conditions whose breach is not otherwise provided against.

(*2*) If the grantee commits any breach of the conditions specified in section 90, the Cantonment Authority may by notice require him to remove any building or part of a building in respect of which the breach has been committed, or to alter the same to its satisfaction.

(*3*) The grantee shall not be entitled to compensation for any loss resulting from the issue of any notice under sub-section (*1*) or sub-section (*2*).

(*4*) If the grantee permits the house to be occupied for the purposes of a bank, hotel, shop or school, or by a railway-administration, without obtaining the sanction required by section 98, the privilege granted by section 97 in the case of a house so occupied shall be withdrawn.

(*5*) If both the grantee and the assignee fail to give notice, as required by section 108, of any intended assignment, the assignee shall be deprived of the benefit of sections 97, 104, 106 and 107.

[*Clause (2).*] (299.)

110. The Government may resume the land or any portion thereof at any time after giving one month's notice, and on payment of compensation for the buildings standing thereon:

Right of the Government to resume the land.

Provided that no compensation shall be paid for any buildings standing on the land which have been erected without authority.

Explanation.—No compensation will be payable for the land or for anything in or on the land except buildings.

Conditions applicable in case of building-sites in bazars granted after the commencement of this Code.

[*Clause (2).*] (296, 303.)

111. Every permission given in pursuance of an application to occupy for the purposes of a building-site land situate in a bazar shall be deemed to have been granted on the following conditions, namely:

Conditions applicable in case of building-sites in bazars.

(304—306.)

(*1*) The applicant shall not use or occupy the land, or erect any building thereon, until he has either—

License or agreement.

(*a*) received from the Cantonment Magistrate a license in the prescribed form, or

Cantonment Code.

(Part III.—Occupation of Land.—Chapter IX.—Conditions of Occupancy.—Sections 112-115.)

(*b*) executed an agreement drawn up as nearly as may be in the form prescribed for a license.

Explanation 1.—The prescribed form of license means a form prepared in accordance with section 113 and published in the *Gazette of India*. Copies of the form will be obtainable on application to the Cantonment Magistrate.

Explanation 2.—The applicant may at his option execute an agreement instead of taking a license.

(305.)

(*2*) Any material variation made in the prescribed form of license without the express sanction of the Governor General in Council shall not be binding on the Government.

Form of license not to be varied.

(300.)

(*3*) Buildings may be erected on the land only in accordance with the license or agreement, or, where a proposed building, alteration or addition is not provided for by the license or agreement, with the written permission of the Cantonment Magistrate.

Erection of buildings.

(301).

(*4*) The buildings to be erected on the land in accordance with the license or agreement shall be commenced within six months from the issue of the license or execution of the agreement, and shall be completed within the period fixed in that behalf by the license or agreement.

Commencement and completion of buildings.

(299.)

(*5*) The Government may resume the land or any portion thereof at any time after giving one month's notice, and on payment of compensation for the buildings standing thereon:

Right of the Government to resume the land.

Provided that no compensation shall be paid for any buildings standing on the land which have been erected without authority.

Explanation.—No compensation will be payable for the land or for anything in or on the land except buildings.

Conditions applicable in case of land granted before the commencement of this Code.

[*Clause (31).*] (296, 308, 309, 323, 328.)

112. (*1*) When permission has been given to a grantee to hold under the provisions of this chapter land (outside bazars) occupied before the commencement of this Code, the grantee shall execute an agreement in the prescribed form, and shall register the same under the law for the time being in force relating to the registration of documents.

Conditions applicable in case of existing grants.

(*2*) On the registration of such agreement, the grantee shall be deemed to hold the land on the conditions specified in sections 89 to 108 (both inclusive), section 109, sub-sections (*2*), (*3*) and (*4*), and section 110.

Explanation.—"The prescribed form" means a form prescribed in accordance with section 113 and published in the Gazette of India. Copies of the form will be obtainable on application to the Cantonment Magistrate.

Supplemental Provisions.

[*Clause (31).*] (307, 309.)

113. (*1*) Every agreement executed or license given under this chapter to occupy or hold land shall, unless the Governor General in Council in any case expressly sanctions a variation in the form of agreement or license,—

Form of agreement, or license, and statement of site-plans.

(*a*) set forth that the permission to occupy or hold the land confers no proprietary right there-

specify the conditions on which permission to occupy or hold the land is granted, as stated in this chapter, and

contain a form of endorsement to be used in all cases of assignment by a grantee of any of the rights vested in him under the agreement or license.

(*2*) Every agreement to occupy land outside bazars shall contain a clause obliging the grantee to adhere, except with the written permission of the Cantonment Authority, to the particulars given in or with his application under Chapter VIII as to the buildings to be erected, the period within which they are to be completed, the materials to be used therein, the outlay to be incurred thereon and the dimensions of the principal building.

(*3*) Every agreement or license to occupy land situate in a bazar shall specify the situation, area and boundaries of the land, and shall contain a clause obliging the grantee to adhere, except with the written permission of the Cantonment Magistrate, to the particulars given in his application under Chapter VIII as to the building to be erected and the materials to be used therein.

(*4*) To every agreement to occupy or hold land outside bazars a site plan of the land shall be annexed. Such plan shall show the dimensions of the land in feet, shall be authenticated by the Executive Engineer as agreeing with the land, and shall be endorsed with the date of its preparation, the name of the grantee and the signature of the Officer Commanding the district or his principal Staff Officer.

[*Clause (31).*]

114. (*1*) Two copies of all agreements executed or licenses given under this chapter shall be prepared under the orders of the Cantonment Magistrate and authenticated by his signature.

Record of copies of agreements, licenses and site-plans.

(*2*) Two copies of all site-plans annexed to such agreements shall be prepared, at the cost of the grantee, under the orders of the Executive Engineer, and authenticated by the signature of that officer.

(*3*) One of the aforesaid copies of each agreement, license or plan shall be delivered to the Cantonment Magistrate, and the other shall be forwarded to the Quarter Master General for record at head-quarters.

Explanation.—In this sub-section "Quarter Master General" means, as regards cantonments in the Bengal Command, the Quarter Master General in India; as regards cantonments in the Madras Command, the Quarter Master General, Madras, and as regards cantonments in the Bombay Command, the Quarter Master General, Bombay.

[*Bengal Act II of 1888, ss. 447 and 448.*] (334, 335.) (*See Cantonments Bill of 1888, s. 25 (11).*)

115. (*1*) If the occupier of any house fails to vacate the same on a requisition made by the grantee in pursuance of a notice issued under section 93 or section 95, the Cantonment Magistrate may by notice require him to vacate the house.

Procedure where occupier fails to vacate house after issue of notice.

(*2*) If the occupier refuses to obey any such notice,

(*a*) the grantee shall, during the continuance of the refusal, be discharged from [illegible] for non-compli[illegible]

(*b*) the occupier shall be punishable with fine which may extend to fifty rupees, and with an additional fine which may extend to five rupees for every day after the first during which the refusal continues.

[*Clause* (28).] (845.)

116. The Cantonment Magistrate, by himself or by any person authorised by him in this behalf, may, after giving twenty-four hours' notice to the occupier or, if there is no occupier, to the grantee or owner of any land or building, at any time between sunrise and sunset,

Power of entry.

enter on the land or into the building for the purpose of resuming any land, or of compelling the vacation of any land or building, or of removing any building or any materials of or collected for any building.

[*Clause* (31).] (39.) (*See Cantonments Bill of 1888, s. 23 (14).*)

117. For the purposes of this chapter, the word "house" includes the land and buildings appurtenant to the house; and if any question arises whether any land or building is appurtenant to the house, it shall be decided by the Cantonment Magistrate, and, subject to revision by the District Magistrate, his decision shall be final.

Meaning of "house."

CHAPTER X. [a])

COMMITTEES OF ARBITRATION.

[*Clause* (31.)]

118. This chapter applies only in the case of houses situate on land occupied or held under the provisions of Chapter IX.

Application of chapter.

[*Clause* (31).] (410.) (*See Cantonments Bill of 1888, ss. 23 (3), 25 (1).*)

119. The Commanding Officer of the cantonment may, on the application of any person interested, convene a Committee of Arbitration in any of the following cases, namely:—

Cases in which Committee of Arbitration may be convened.

(*a*) where a notice has been served on a grantee requiring him to let a house to a military officer or a civil officer, and the grantee is aggrieved by the amount of rent offered, or

(*b*) where a grantee and his tenant, being a military officer or a civil officer, disagree as to any change in rent proposed in consequence of dilapidations or additions to buildings or for any similar reason, or

(*c*) where a tenant who is a military officer or a civil officer is unable to induce a grantee to execute reasonable repairs, or

(*d*) in any other case in which a grantee and his tenant, being a military officer or a civil officer, are unable to agree on any question relating to rent or repairs.

[*Clause* (31).] (413.)

120. The Commanding Officer of the cantonment may in his discretion refuse to convene a Committee of Arbitration on the ground that the application therefor is groundless or frivolous or for any other sufficient reason.

Grounds for refusing to convene Committee.

[a]) This chapter shows the cases where Committees of Arbitration may be convened, how they are to be composed and by what rules their proceedings are to be guided. The rules aim at ensuring a result which shall be both fair to each party and effective.

[*Clause* (31).] (408, 409, 412.)

121. (*1*) Whenever the Commanding Officer of the cantonment determines to convene a Committee of Arbitration, he shall cause an order to that effect to be published in Station Orders.

Procedure for convening Committee.

(*2*) Such order shall be published as soon as is convenient after the receipt of the application from the person at whose instance the Committee is convened.

(*3*) The Commanding Officer shall direct the Cantonment Magistrate to serve on the parties concerned a notice, containing a copy of the order aforesaid, stating the question to be decided, and requiring the parties to nominate members of the Committee in accordance with section 122.

(*4*) The Committee shall assemble within seven days of the completion, in the manner prescribed by section 122, of the appointment of the members.

[*Clause* (31).] (416.) (*See Cantonments Bill of 1888, ss. 23 (3), 25 (1).*)

122. (*1*) Every Committee of Arbitration shall consist of three persons, who shall be—

Composition of Committee.

(*a*) the District Magistrate or, when he is absent from the station, a Magistrate of the first class appointed by the District Magistrate to act in his stead;

(*b*) a person to be nominated by the military officer or civil officer concerned; and

(*c*) a person to be nominated by the grantee concerned:

(*2*) Provided that, whenever any person bound hereby to nominate a member of a Committee fails to make such nomination within seven days from the service of a notice under section 121, or whenever any person so nominated neglects or refuses to act, the Commanding Officer of the cantonment shall forthwith appoint some person to be a member of the Committee in his stead:

(*3*) Provided also that any person to be nominated or appointed a member of a Committee of Arbitration must be a person who is not directly or indirectly interested in the matter under reference, and whose services are immediately available for the purposes of the Committee, and that the nomination of any person who is so interested, or whose services are not so available, shall be deemed to constitute a failure to make a nomination.

(*See Cantonments Bill of 1888, s. 27.*)

[*Clause* (31).] (417.) (*See Cantonments Bill of 1888, ss. 23 (4), 25 (2).*)

123. The District Magistrate or the Magistrate appointed by him to act in his stead shall be the president of the Committee.

President.

[*Clause* (31).] (311.)

124. (*1*) For the purpose of determining the amount of the monthly rent to be paid for any house, a Committee of Arbitration shall ascertain the capital cost of all buildings and authorised additions as registered in the register of occupation maintained under Chapter XII, and shall deduct from such capital cost such sum on account of dilapidations as shall be assessed by the Executive Engineer.

Calculation of rent.

(*2*) The amount of rent determined upon shall be a percentage on such capital cost *minus* such deduction as aforesaid, and such percentage shall be the percentage certified by the District

Magistrate to be customarily paid for the time being in the neighbourhood by tenants.

Explanation 1.—"Capital cost" includes any reasonable price at which an estate has been purchased.

Explanation 2.—The percentage certified by the District Magistrate shall include the taxes (if any) levied upon the land, or such proportion thereof as the District Magistrate may certify to be customarily paid for the time being in the neighbourhood by tenants.

[*Clause* (31).] (419, 420.) (*See Cantonments Bill of 1888, ss. 23 (5), 25 (3).*)

125. (*1*) The decision of every Committee of Arbitration shall be determined by the majority of the votes of the members present at a meeting of which notice of the time and place therefor has been served on each of the members of the Committee.

Decision to be by vote.

(*2*) If only two members attend a meeting as aforesaid, and there is an equality of votes, the president shall have a second or casting vote.

[*Clause* (31).] (421, 422.)

126. (*1*) The president shall, as soon as may be convenient, forward to the Commanding Officer of the cantonment a report signed by himself in which the grounds for the decision of the Committee shall be clearly specified.

President's report.

(*2*) The report shall contain a statement that, previous to the submission thereof, the president invited each member of the Committee to record thereon under his signature, within seven days of such invitation, any dissent from the report.

(*3*) If no dissent is so recorded, it shall be presumed that all the members have agreed to the decision contained in the report.

[*Clause* (31).] (424.)

127. (*1*) Whenever a Committee of Arbitration has decided that repairs are necessary, and the extent to which they are necessary, the Commanding Officer of the cantonment shall forward the president's report, as soon as may be after the receipt thereof, to the Cantonment Magistrate, and the Cantonment Magistrate shall thereupon by notice require the grantee, concerning whose land or buildings the report has been made, to make such repairs in accordance with the decision, within a period to be specified in the notice.

Requisition on grantee to carry out repairs, and tenant's right to do so in default and to recover expenses.

(*See Cantonments Bill of 1888, s. 25 (5), (6).*)

(*2*) If the grantee fails to comply with the notice within the period specified therein, the tenant may, if he so desires, make the repairs himself, and may deduct the expense thereof from the rent, or otherwise recover it from the grantee; but in that case the grantee shall not be punishable for breach of the notice.

CHAPTER XI. [a])

ESTATE AGENCY.

[*Clause* (27).] (404.)

128. Every absentee owner shall appoint as his agent some person who resides within the cantonment or within ten miles thereof, or within such further distance therefrom as the Cantonment Authority may, by order, specify in this behalf.

Obligation of absentee owner to appoint agent.

[a]) The object of this chapter is to obviate the inconvenience caused where no one can be found who can be rapidly communicated with and required to carry out directions given under the Code.

[*Clauses* (27) *and* (31).] (405.)

129. (*1*) Whenever the Cantonment Magistrate becomes aware that an absentee owner has not appointed an agent as required by the last foregoing section, he may by notice require any person hereinafter referred to to act as the agent of the absentee owner or show cause why he should not be required so to act.

Presumption as to agency.

(*2*) A notice under sub-section (*1*) may be served on any person who is residing within the cantonment, or within such distance therefrom as is prescribed by or under the last foregoing section, and who

(*a*) is proved to the satisfaction of the Cantonment Magistrate to be doing, or to have recently been doing, any of the following things with respect to any building or land belonging to or under the control of the absentee owner, namely:

(*i*) making repairs,

(*ii*) acting as care-taker,

(*iii*) giving or taking a lease,

(*iv*) receiving or paying rent, or

(*v*) acting as agent, representative or owner; or

(*b*) is occupying the estate in respect of which an agent has not been appointed.

Illustration 1.—Any person who negotiates a lease on behalf of another acts as an agent.

Illustration 2.—Any person who intervenes between an owner and a third party in respect of any matter regarding an estate acts as a representative.

Illustration 3.—Any person who fells timber, sells grass or keeps up a garden acts as an owner.

[*Clauses* (27) *and* (31).] (406.)

130. (*1*) If any person on whom a notice under section 129 has been served—

Acceptance and termination of agency.

(*a*) fails to show cause why he should not act as agent, or

(*b*) makes no objection within the time specified in the notice to acting as agent,

he shall be deemed to be the agent of the absentee owner, and shall be registered as such in the register of occupation or the register of private land (as the case may be) maintained under Chapter XII.

(*2*) Where a person has become an agent under this section, he shall no longer be deemed to be, or be registered as, such agent whenever he—

(*c*) ceases to reside within the cantonment or within such distance therefrom as is prescribed by or under section 128, or

(*d*) shows cause to the satisfaction of the Cantonment Magistrate why he should not be required to act as agent.

[*Clause* (27).] (407.)

131. In either of the following cases, namely:

Notice to appoint agent.

(*a*) where no person can be found under the procedure prescribed by section 129 to act as [redacted]

(*b*) where any person has ceased to be an agent under the circumstances mentioned in sub-section (*a*) of section 130,

the Cantonment Magistrate shall cause a notice to be served on the absentee owner requiring him to appoint some person residing within the cantonment, or within such distance therefrom as is prescribed by or under section 128, to be his agent.

CHAPTER XII. [a]

REGISTRATION OF IMMOVEABLE PROPERTY.

Plans.

[*Clause* (3).] (336, 337.)

132. The Executive Engineer shall maintain a general plan of the cantonment on a scale of twenty-four inches to the mile showing all necessary details, and distinguishing in particular—

General plan.

(*a*) all houses (if any) which have been set apart under section 95 for occupation by civil officers, and

(*b*) all land (if any) which does not belong to the Government, and all houses (if any) situate thereon.

[*Clause* (3).] (339.)

133. The Cantonment Authority shall maintain a plan on a scale of eighty-eight feet to the inch of each bazar in the cantonment.

Bazar plans.

[*Clause* (3).] (340, 345, 346.)

134. (*1*) Every site or estate shall be shown on the appropriate plan under a distinguishing number, and the numbers for each bazar shall form a separate series.

Estates and streets to be distinguished.

(*2*) Every street shall be shown on the appropriate plan by its name or under an alphabetical letter or under a number.

[*Clause* (3).] (335, 341—344.)

135. (*1*) Every plan prepared under this chapter shall on completion be dated, and be authenticated by the signature of the Executive Engineer.

Dating and authentication of plans.

(*2*) Whenever a general plan is altered, the alteration shall be explained on the plan in a memorandum dated and signed by the Executive Engineer.

[*Clause* (6).]

136. The Cantonment Magistrate shall preserve in his office every copy of a site-plan delivered to him under section 114.

Preservation of site-plans.

[*Clause* (3).] (341.)

137. No plan relating to land in a cantonment shall be destroyed without the previous sanction of the Governor General in Council.

Plans not to be destroyed without sanction.

(a) To preserve the property of the Government in the land from becoming alienated in the course of years, the maintenance of proper plans and the careful registration of all sites granted and of all changes in occupancy are of the utmost importance. This chapter aims at providing as many safeguards as possible in these directions in order to counterbalance, as far as may be, the serious results which so frequently occur to the Government from ignorance, laziness or negligence in these important matters.

Registers.

[*Clause* (3).] (347, 348.)

138. The Cantonment Magistrate shall maintain a register of occupation, showing, in regard to all land (outside bazars) held by grantees (whether the grant was made before or after the commencement of this Code), and the houses situate thereon, the following particulars, namely:

Register of occupation.

(1) the name of the cantonment;

(2) a reference to any similar register kept before the commencement of this Code;

(3) the date of registry of the site,

(4) the number of the site as shown on the general plan;

(5) the dimensions of the site;

(6) in the case of grants made before the commencement of this Code, the date of the permission to occupy the site and the date of the agreement (if any) executed by the grantee under Chapter IX, and

in the case of grants made after the commencement of this Code, the date of the agreement executed by the grantee under Chapter IX;

(7) the name and description of the grantee at the time of registry;

(8) the name and description of the grantee's agent at the time of registry;

(9) the nature of the grantee's right—

(*a*) under this Code, or

(*b*) under any other law, including particulars of any special right of occupancy;

(10) the value of buildings on the site at the time of registry;

(11) the dates of authorities to add to buildings and;

(12) particulars of changes occurring from time to time, whether—

(*a*) by assignment,

(*b*) by alterations or additions,

(*c*) by decisions of Committees of Arbitration,

(*d*) in dimensions,

(*e*) in value, or

(*f*) in agency.

[*Clause* (3).] (349.)

139. The Cantonment Magistrate shall maintain a register of bazars, showing, in regard to all land in bazars (whether occupied before or after the commencement of this Code), and the houses situate thereon, the following particulars, namely:

Register of bazars.

(1) the name of the bazar;

(2) the date of registry of the site;

(3) the number of the site, as shown on the bazar plan;

(4) the dimensions of the site;

(5) in the case of grants made before the commencement of this Code, the date of the permission to occupy the site, and

in the case of grants made after the commencement of this Code, the date of the license given to, or of the agreement executed by, the grantee under Chapter IX;

(6) the name and description of the grantee at the time of registry; and

(7) particulars of changes occurring from time to time by assignment.

[*Clause* (3).] (350, 351.)

140. The Cantonment Magistrate shall maintain a register of private land showing, in regard to all land (if any) which is private property, and the houses situate thereon, the following particulars, namely:

Register of private land.

(1) the name of the cantonment;

(2) a reference to any similar register kept before the commencement of this Code;

(3) the date of registry of the estate;

(4) the number of the estate as shown on the general plan;

(5) the dimensions of the estate;

(6) the name and description of the owner at the time of registry;

(7) the name and description of the owner's agent at the time of registry;

(8) particulars of the owner's right, namely:

(*a*) reference to any acknowledgment by the Government, or

(*b*) reference to any other proof; and

(9) particulars of changes occurring from time to time, whether—

(*a*) by assignment,

(*b*) by alterations or additions,

(*c*) in dimensions, or

(*d*) in agency,

[*Clause* (3).] (352.)

141. (*1*) The Cantonment Magistrate shall maintain a register of assignments, in which he shall from time to time enter references to all assignments of immoveable property—

Register of assignments.

(*a*) registered in his own office, where he is himself sub-registrar or registrar of the cantonment, or

(*b*) appearing in the copies forwarded to him by the registrar of the district under section 32, sub-section (*2*), of the Cantonments Act, 1889,

XIII of 1889.

as the case may be.

(*2*) The register of assignments shall contain the following particulars, namely:

(*a*) a serial number for each assignment;

(*b*) the date of registry;

(*c*) the distinguishing number of the estate or site as recorded in the register of occupation, the register of bazars or the register of private land, as the case may be;

(*d*) the name of the assignor;

(*e*) the name of the assignee;

(*f*) the nature of the assignment, namely:

(*i*) sale,

(*ii*) mortgage,

(*iii*) gift,

(*iv*) exchange, or

(*v*) bequest,

(*g*) the date of the assignment; and

(*h*) where the cantonment has been constituted a sub-district or district for the purposes of the Indian Registration Act, 1877, references to the Indexes No. I, No. II and No. III kept in the cantonment under sections 54 and 55 of that Act.

III of 1877.

[*Clause* (3).] (355.)

142. Reference, when possible, to serial numbers in the register of assignments shall be sufficient record in the register of occupation, the register of bazars or the register of private land of changes made by assignment.

Reference in other registers to the register of assignments.

[*Clause* (3).] (358.)

143. The Cantonment Authority shall make an inspection of the register of occupation, the register of bazars and the register of private land in the month of July in each year, on such day as it may by notice determine, and shall ascertain whether all the changes referred to in clause (*12*) of section 138 or in clause (9) of section 140 which have taken place during the last preceding twelve months have been duly entered in the appropriate register.

Annual inspection of register of occupation, register of bazars and register of private land.

[*Clause* (3).] (359, 360.)

144. (*1*) The Cantonment Magistrate may by notice require all grantees, owners or occupiers to furnish him with all information necessary for the proper maintenance of the register of occupation, the register of bazars and the register of private land, and may make all necessary enquiries with respect to changes affecting any of those registers, and may by notice—

Power to require information in view to the proper maintenance of such registers.

(*a*) require any grantee, owner or occupier, or any adult dweller in any house, to answer within a specified time any such enquiries, and

(*b*) require proof, by documentary or other evidence, of the truth of any verbal or written statement or answer made or given to him under this section.

(*2*) The Cantonment Magistrate may by order in writing delegate to any one or more such persons as the Cantonment Authority may approve all or any of the powers conferred upon him by this section.

Power of Entry.

[*Clause* (38).] (845.)

145. The Cantonment Magistrate, by himself or by any person authorised by him in this behalf, may, after giving twenty-four hours' notice to the occupier or, if there is no occupier, to the grantee or owner of any land or building, at any time between sunrise and sunset,

Power of entry.

enter on the land or into the building for the purpose of enquiring into occupation, ownership, agency or rights, or into any other matter required to be entered in the register of occupation, the register of bazars or the register of private land.

PART IV.

THE PUBLIC HEALTH, SAFETY AND CONVENIENCE.

CHAPTER XIII. [a]

SANITARY SUPERVISION.

[*Clause (31).*] (475, 483.)

146. In every cantonment the following officers shall, for the purposes of sanitation, have control over, and shall be responsible for the sanitary condition of, the parts of the cantonment mentioned or referred to opposite their names respectively, namely:

Division of responsibility for sanitation.

(*a*) the Officer Commanding the Royal Artillery (if any), and the Commanding Officer of each regiment or battalion permanently or temporarily quartered in the cantonment;	his regimental lines, including the regimental bazar and all latrines used by the troops and followers under his command or control:
(*b*) the Executive Engineer;	all yards, works, workshops and other places used by establishments under his charge, and all Christian burial-grounds:
(*c*) the executive officer of the commissariat department;	all transport-lines, cattle-yards, slaughter-houses, bakeries and other places used by establishments under his charge:
(*d*) the head of any other military department occupying as such any part of the cantonment;	all blocks of buildings, workshops and other places used by establishments under his charge:
(*e*) the Cantonment Magistrate;	the Sudder Bazar, all streets and all other parts of the cantonment not under the control of any officer mentioned in clause (*a*), clause (*b*), clause (*c*) or clause (*d*).

[*Clause (31).*] (476—478, 482.)

147. (*1*) Every officer mentioned in clauses (*a*) to (*e*) (both inclusive) of section 146 shall forward to the Commanding Officer of the cantonment a weekly sanitary report, stating that the parts of the cantonment over which he has control as aforesaid have been inspected by him, and are, in his opinion, in a sanitary condition or otherwise, as the case may be.

Weekly sanitary report.

(*2*) Whenever any such officer reports that any part of the cantonment under his control as aforesaid is not in his opinion in a sanitary condition, he shall specify the defects and may make such suggestions for remedying the same as he thinks fit.

(*3*) The weekly sanitary reports of the officers mentioned in clauses (*a*) to (*d*) (both inclusive) of section 146 shall be forwarded through the Cantonment Magistrate.

(*4*) Where there is a Cantonment Committee, every weekly sanitary report shall be laid before the Committee at the first meeting held after the receipt of the report.

[*Clause (31).*]

148. (*1*) The Sanitary Officer shall exercise a general sanitary supervision over the whole cantonment, and shall report every insanitary practice and every insanitary condition of things, whenever or wherever existing therein, both to the officer responsible under section 146 and to the Cantonment Authority, and shall attach to his report such recommendations for the remedy of the same as he may consider suitable:

Duties and powers of Sanitary Officer.

(*2*) Provided that when the remedy is within the power of the officer responsible under section 146, and that officer intimates to the Sanitary Officer that he intends to apply a suitable remedy, the Sanitary Officer may at his discretion defer making any report to the Cantonment Authority.

(*3*) If any recommendation made to the Cantonment Authority by the Sanitary Officer is not carried into effect within a reasonable time, the Sanitary Officer may request the Cantonment Authority to forward a copy of his report to the Officer Commanding the district, and shall at the same time himself send a copy of the report to the Deputy Surgeon-General of the district.

(*4*) The Cantonment Authority on receiving such a request shall forthwith forward a copy of the report, together with any remarks it may wish to make, to the Officer Commanding the district.

[*Clause (6).*] (484.)

149. It shall be the duty of the Cantonment Magistrate,—

Cantonment Magistrate's duties in respect of sanitation.

(*a*) subject to the provisions of this Code, to make, and supervise the carrying out of, all arrangements (including the provision and maintenance of a sufficient number of animals, vehicles, receptacles and implements, and of places for keeping the same) necessary for—

(*i*) the removal of night-soil and other offensive matter and rubbish from latrines, urinals, streets and all other places, public and private, from which the removal of the same by the public conservancy establishments is directed by the Cantonment Authority,

(a) This chapter provides for a complete sanitary supervision (1) by continuing the present system (under more carefully defined rules) of making some one officer directly responsible for all sanitary matters within each portion of the cantonment; (2) by requiring that all that portion of the cantonment which is directly in the Cantonment Magistrate's charge shall be divided into conservancy blocks, with a conservancy overseer, whose duties are carefully detailed, over each block; and (3) by requiring a Sanitary Officer to exercise a general sanitary supervision over the whole cantonment, making him responsible for bringing to the notice of the Cantonment Authority every insanitary practice and every insanitary condition of things, and giving him large powers for ensuring that his recommendations are attended to.

The Sanitary Officer will recommend, the Cantonment Authority order, and the Cantonment Magistrate carry out, sanitary measures.

(*ii*) the surface cleansing of all streets and public places, and

(*iii*) the maintenance in a sanitary condition of public and private privies, latrines and urinals, of all sources of water-supply and the lands in the vicinity thereof, of markets, slaughter-houses, places for the disposal of the dead, encamping-grounds, sarais and fair grounds, of all other places likely to create a nuisance, and generally of every part of the cantonment;

(*b*) to make frequent inspections of all parts of the cantonment with a view to ensuring that all orders of the Cantonment Authority on sanitary matters are duly obeyed, and that all conservancy establishments satisfactorily perform their duties; and

(*c*) subject to the provisions of this Code and to the control of the Cantonment Authority, to take all necessary steps for remedying any defects in the sanitary condition of the cantonment of which he may become aware.

[*Clause (31).*] (479, 480.)

150. (*1*) The parts of the cantonment referred to in clause (*e*) of section 146 shall be divided for conservancy purposes into as many blocks as the Cantonment Authority may direct, and a conservancy overseer shall be placed in charge of each block.

Reports by conservancy overseers.

(*2*) Every conservancy overseer shall report daily to the Cantonment Magistrate on the sanitary condition of his block.

[*Clause (31).*] (481.)

151. The duties of every conservancy overseer shall include the following, namely:

Duties of conservancy overseers.

(*a*) to visit daily every latrine and urinal in his block;

(*b*) to ascertain whether each such latrine and urinal is in a sanitary condition, and whether any prescribed rules as to the use of dry earth, tar or any other deodorant, or as to any other like matter, are duly observed;

(*c*) to ascertain whether all receptacles, utensils and other conservancy appliances are complete and in good repair, and cleaned, tarred or deodorized in the prescribed manner;

(*d*) to ascertain whether the prescribed arrangements for the removal of night-soil and other offensive matter and rubbish have been properly carried out, and whether the sweeper attached to any latrine is present;

(*e*) to inspect all vessels, carts or other vehicles employed by the Cantonment Authority for the removal of night-soil and other offensive matter, and to ascertain whether they are in good repair, and properly tarred or deodorized;

(*f*) to visit daily all such trenches and other places for the deposit or disposal of night-soil and other offensive matter and rubbish as may be placed under his charge, and to ascertain whether all rules as to the deposit and disposal of night-soil and other offensive matter and rubbish are duly observed;

(*g*) to see that all streets in his block have been properly swept;

(*h*) to bring to the notice of the Cantonment Magistrate the commission of any offence which is punishable under Chapter XIV, XV, XVI, XVII, XXI or XXVII; and

(*i*) to report to the Cantonment Magistrate any neglect of duty on the part of any sweeper or other servant of the public conservancy establishments.

CHAPTER XIV. [a]

CONSERVANCY AND DRAINAGE.

Conservancy.

[*Bengal Act III of 1884, s. 190.*] (438.)

152. All private privies, latrines and urinals, wheresoever situated within a cantonment, and all receptacles and utensils used in connection therewith, shall be under the survey and control of the Cantonment Authority.

Private privies, latrines and urinals to be under control of Cantonment Authority.

[*Clause (31).*]

153. (*1*) The Cantonment Authority shall not authorise the making or use of any cesspool in the cantonment.

Prohibition of cesspools.

[*Clause (13).*]

(*2*) The Cantonment Authority may by notice require the grantee, owner or occupier of any land or building to close any cesspool belonging to the land or building and to provide a proper receptacle in lieu thereof.

[*Clause (13).*] (439.)

154. The Cantonment Authority may by notice require the owner of any privy, latrine or urinal not to put the same to public use.

Power to prevent private privy, latrine or urinal being put to public use.

[*Madras Act I of 1884, s. 280, and Act XVIII of 1889, s. 69.*] (440, 441.)

155. (*1*) The Cantonment Authority may by notice require the owner or occupier of any building to provide, in such manner as it may direct, any privy or urinal, or additional privies or urinals, which should in its opinion be provided for the building.

Provision of privies, latrines and urinals on private premises.

(a) This chapter provides—

(*1*) that no latrine, either public or private, shall be constructed in cantonments, except on the standard plan approved for the purpose by the Commander-in-Chief;

(*2*) that the provision of an insufficient number of latrines or receptacles, which causes both insanitation and hardship to the people, shall be prohibited; and

(*3*) that, in the arrangements for *removal* of offensive matter to the place of *disposal*, the removal establishments shall not be allowed to fall below a certain fixed scale, such scale being that which is now recognised by all sanitary authorities as the absolute minimum at which sanitation can be expected.

The above deal with the three main causes to which are to be attributed the gravest of the evils under which cantonment conservancy at present labours.

The chapter also gives the widest powers at present allowed by the law to compel private persons to conform to those rules which sanitary science now demands as necessary for their well being. These powers are selected from the enactments in force in the principal municipalities of India, and consequently are such as all dwellers in towns are accustomed to.

Cantonment Code.

(Part IV.—The Public Health, Safety and Convenience.—Chapter XIV.—Conservancy and Drainage.—Sections 156-163.)

(2) The Cantonment Authority may by notice require any person employing more than twenty workmen or labourers for any period exceeding one month, or any person being the grantee, owner or occupier of any land on which a block of six or more huts stands, to provide such latrines and urinals as it may think fit, and to cause the same to be kept in proper order and to be daily cleansed.

[*Act XVIII of 1889, s. 69.*] (442.)

156. The Cantonment Authority may by notice require the owner, grantee or occupier of any building or land to have any privy provided for the same shut out by a sufficient roof and wall or fence from the view of persons passing by or dwelling in the neighbourhood, or to remove or alter, as it may direct, any door or trap-door of a privy opening on to any street.

Protection of private privies.

[*Act XVIII of 1889, s. 70 (2), and Clauses (13) and (31).*] (443, 444.)

157. (1) No new private privy, latrine or urinal shall be constructed in any cantonment, and no existing private privy, latrine or urinal shall be rebuilt, except on the approved standard plan.

Control over construction of new private privies, latrines and urinals.

(2) No private privy, latrine or urinal which has been newly constructed or rebuilt shall be opened for use until it has been inspected by the Cantonment Magistrate and passed by him as conforming, in respect both of the manner in which it is constructed and of the utensils with which it is supplied, with the approved standard plan.

(3) The Cantonment Authority may by notice require any person who constructs, rebuilds or opens any privy, latrine or urinal without its permission in writing or contrary to its directions or to the provisions of this section, or

who opens, constructs or rebuilds any privy, latrine or urinal which the Cantonment Authority has ordered to be removed or not to be made,

to remove the privy, latrine or urinal, or to make such alteration therein as it may think fit.

Explanation.—"The approved standard plan" means a standard plan for the construction and furnishing of privies, latrines or urinals which has been approved by the Commander-in-Chief. Copies of such plans will be obtainable on application to the Cantonment Magistrate.

[*Clause (13).*]

158. (1) If any private latrine or urinal fails, in the opinion of the Cantonment Authority, whether by reason of the manner in which it is constructed or of the manner in which it has been kept, or for any other reason, to comply with the requirements of sanitary knowledge, and is in consequence likely to create a nuisance, the Cantonment Authority may by notice require the grantee or owner of the land or building to which it belongs to remove it, and to substitute fresh earth, to a depth of two feet, for the earth on which the latrine or urinal stood:

Removal of insanitary private latrine or urinal.

(2) Provided that, where the insanitary condition of any such latrine or urinal is not fairly attributable to any neglect on the part of the said grantee or owner, the Cantonment Authority shall either—

(*a*) bear the whole cost of the construction of a new latrine or urinal to be substituted therefor, or

(*b*) provide in lieu thereof all necessary accommodation in a public latrine or urinal situate within a reasonable distance from the land or building.

[*Clause (13).*] (443.)

159. The Cantonment Authority may by notice require the owner, grantee or occupier of any building or land to cleanse or purify, or to repair or alter or put in good order, within a period to be specified in the notice, any privy, latrine or urinal belonging to the building or land, in such manner with respect to the site, materials, dimensions or construction thereof, the supply of utensils or of water thereto, or the use of disinfectants or deodorants therein, as may be prescribed in the notice.

Cleansing, repair or alteration of private privy, latrine or urinal.

[*Act XVIII of 1889, s. 93, and Clause (12).*] (448.)

160. Whoever, without the written permission of the Cantonment Authority, causes or allows the water of any privy, urinal or sink, or any other offensive matter, to soak, flow, drain or be put upon any street or public place, shall be punishable with fine which may extend to twenty rupees and, in case of a continuing offence, with an additional fine which may extend to three rupees for every day after the first during which the offence continues.

Penalty for allowing offensive matter to flow or be put upon street or public place.

[*Act XVIII of 1889, s. 66 (1).*] (849.)

161. The Cantonment Authority may, with respect to any building or land, or to any privy, latrine, urinal or other receptacle for offensive matter pertaining to any building or land, provide for the performance by its agents of the duties usually performed by sweepers,—

Employment of public sweepers.

(*a*) with the consent of the occupier of the building or land, upon any terms that may be agreed upon between them, or

(*b*) without such consent, if the occupier fails to make arrangements to the satisfaction of the Cantonment Authority for the performance of such duties, upon any terms it may think fit to impose.

[*Bengal Act II of 1888, s. 310.*] (492-494.)

162. (1) The Cantonment Authority shall provide and maintain public latrines and urinals, and shall place them in proper and convenient situations as near as circumstances admit to the dwelling-places of the persons for whose use they are intended:

Provision and maintenance of public latrines and urinals.

(2) Provided that, except with the sanction of the Commander-in-Chief, no public latrine or urinal shall be placed within fifty feet, and no trench latrine shall be placed within two hundred feet, of any inhabited building.

(3) Every public latrine and urinal shall be constructed either for the exclusive use of males or for the exclusive use of females, and, whenever any public latrine or urinal for the use of males is constructed so as to be under the same roof as a latrine or urinal for the use of females, it shall be so constructed as to be entirely separated therefrom.

[*Clause (31).*]

163. (1) In the provision of public latrines, the Cantonment Authority shall be guided by the following rules, namely:

Rules as to provision of public latrines and establishments therefor.

(*a*) such number of latrines shall be provided as will admit of there being one seat

Cantonment Code.

(Part IV.—The Public Health, Safety and Convenience.—Chapter XIV.—Conservancy and Drainage.—Sections 164-170.)

partment for the use of every fifteen adult persons resorting to the latrines;

(*b*) no latrine shall be constructed for the use of more than five hundred persons;

(*c*) every latrine, other than a trench latrine, shall be provided with proper closed iron receptacles in the proportion of not less than two for every hundred persons using the latrine, and with one iron or glazed earthen pan for each compartment;

(*d*) for every latrine, other than a trench latrine, there shall be provided, (*i*) for the cleansing thereof, sweepers in the proportion of not less than one for every hundred persons using the latrine, and, (*ii*) for the removal of night-soil therefrom, air-tight iron filth carts in the proportion of not less than one for every five hundred persons using the latrine, or, where carts cannot be used, sweepers in the proportion of not less than three for every five hundred persons using the latrine;

(*e*) for every trench latrine, there shall be provided digging sweepers in the proportion of not less than one for every two hundred persons using the latrine:

(2) Provided that, if in any case it is impracticable, owing to want of funds or for any other sufficient reason, to observe the foregoing rules, the Commander-in-Chief may modify them to such extent as he may consider necessary.

(3) No public latrine shall be constructed or re-built in any cantonment except on a standard plan approved by the Commander-in-Chief.

[*Bengal Act II of 1888, s. 298.*] (497.)

164. The Cantonment Authority shall, whenever necessary, provide and maintain in proper and convenient positions receptacles or places for the temporary deposit of offensive matter and rubbish.

Receptacles or places for temporary deposit of offensive matter and rubbish.

[*Bombay Act III of 1888, s. 368, and Bengal Act II of 1888, ss. 298 and 299.*] (447, 449.)

165. (1) The Cantonment Authority may by notice require the owners, grantees or occupiers of any buildings or land in the cantonment to cause all offensive matter and rubbish to be collected from their respective buildings or land, and to be deposited (for removal by the public conservancy establishments), at such times and in such receptacles or places (whether provided under section 164 or not) as the Cantonment Authority may prescribe in the notice:

Collection of offensive matter and rubbish for public removal.

(2) Provided that no owner, grantee or occupier shall be required to deposit any offensive matter or rubbish in any receptacle or place situated at a greater distance than one hundred and fifty feet from the nearest boundary of his premises.

(3) If any person, after the issue of a notice under sub-section (1), deposits, or causes or permits to be deposited by his servants or by any other person, any offensive matter or rubbish in any place not prescribed by the notice, he shall be punishable with fine which may extend to ten rupees.

[*Act XVIII of 1889, s. 94, and Clause (12).*] (451, 452.)

166. (1) Whoever, being the owner, grantee or occupier of any building or land,

Penalty for not removing, or improperly removing, offensive matter or rubbish, or for keeping filth receptacle in a noxious state.

keeps, or allows to be kept, for more than twenty-four hours, or

keeps, or allows to be kept otherwise than in some proper receptacle, of a pattern (if any) approved by the Cantonment Authority,

any night-soil or other offensive matter or any rubbish in or upon the building or land, or

suffers any such receptacle to be in a filthy or noxious state, or

neglects to employ proper means, approved or prescribed by the Cantonment Authority, for cleansing and purifying the same, or

neglects to cause the contents thereof to be removed at the time or in the manner approved or prescribed as aforesaid,

shall (unless the act or neglect is attributable to any sweepers provided by the Cantonment Authority under section 161) be punishable with fine which may extend to twenty rupees.

[*Madras Act I of 1884, s. 312.*] (451.)

(2) Whoever, being the owner, grantee or occupier of any building or land, deposits, or causes or suffers to be deposited, in any such receptacle as aforesaid any matter (except as a deodorant) other than that for which the receptacle is intended to be used shall be punishable with fine which may extend to ten rupees.

[*Act XVIII of 1889, s. 55.*] (486.)

167. The Cantonment Authority shall appoint places for the disposal of night-soil and other offensive matter and rubbish, and of the carcasses of animals, and

Removal and disposal by Cantonment Authority of offensive matter, rubbish and carcasses.

may, by public notice, which may be general for the whole cantonment or special for any portion thereof specified in the notice, give directions as to the route, time, manner and conditions by, at, in and under which offensive matter, rubbish and carcasses may be removed to such places.

[*Act XX of 1891, s. 117.*]

168. All night-soil and other offensive matter and rubbish removed by the servants of the Cantonment Authority under this chapter shall belong to the Cantonment Authority.

Vesting in Cantonment Authority of offensive matter and rubbish removed by its servants.

[*Clause (12).*] (490.)

169. Whoever, being engaged in the removal of night-soil or other offensive matter or rubbish, neglects to sweep away or otherwise effectually remove any portion thereof that may fall or spill on to any street or public place shall be punishable with fine which may extend to ten rupees.

Penalty for careless removal of offensive matter or rubbish.

[*Clause (12).*] (491.)

170. Whoever causes or permits any cart or receptacle used for the removal of night-soil or other offensive matter or rubbish to be detained longer than is reasonably necessary in any street or public place shall be punishable with

Penalty for detaining filth cart or receptacle in street or public place.

fine which may extend to twenty rupees, or with imprisonment for a term which may extend to four days.

[*Bombay Act III of 1888, ss. 385 and 471.*] (487, 488.)

171. (*1*) If any person, being the occupier of any building or land in or upon which an animal dies, or in or upon which the carcass of an animal is found, or having the charge of an animal which dies in a street or public place, neglects within three hours after the death of the animal, or, if the death occurs at night, within three hours after sunrise, either—

Further provisions as to removal and disposal of carcasses.

(*a*) to remove and dispose of the carcass in accordance with any directions given by notice under section 167, or

(*b*) to report the death of the animal, with a view to the removal and disposal of the carcass, to the Cantonment Magistrate or to some officer (if any) appointed by him to receive such reports,

he shall be punishable with fine which may extend to ten rupees.

(*2*) The Cantonment Authority may cause the carcass of any animal to be removed and disposed of at any time after three hours from the death of the animal, or, if the death occurs at night, after three hours from sunrise, with or without the consent of the person who is or has been in charge of the animal or its carcass.

(*3*) Whenever any carcass is so removed and disposed of by the Cantonment Authority, the person who is or has been in charge of the animal or its carcass shall pay such sum (if any) to the Cantonment Authority for the removal of the carcass as that Authority may have prescribed by notice under section 167.

[*Clause (12).*] (489.)

172. Whoever, by himself or his servant, or by any other person, deposits, or causes or permits to be deposited, the carcass of any animal in any street or public place, except after making the report prescribed in section 171, shall be punishable with fine which may extend to ten rupees.

Penalty for depositing carcass in street or public place.

Drainage.

(*Bombay Act III of 1888, s. 233.*) (459.)

173. (*1*) Where a drain connecting any building or land with a public drain is sufficient for the effectual drainage of the said building or land, and is otherwise unobjectionable, but is not, in the opinion of the Cantonment Authority, adapted to the general drainage system of the cantonment,

Powers where private drain is not adapted to the general drainage system of the cantonment.

the Cantonment Authority may discontinue or destroy the said drain, and cause any work necessary for that purpose to be done;

but shall in that case provide another drain which shall effectually drain the building or land and be in communication with a public drain.

(*2*) All expenses incurred under this section shall be paid by the Cantonment Authority.

[*Madras Act I of 1884, s. 273, and Bengal Act II of 1888, s. 277.*] (462, 464.)

174. If any building or land within one hundred feet of a public drain, or of some other place set apart for the discharge of drainage, is at any time not drained to the satisfaction of the Cantonment Authority by a sufficient drain or pipe communicating with a public drain or other place as aforesaid,

Power to require proper drainage of building or land insufficiently drained.

the Cantonment Authority may by notice require the owner or grantee of the building or land, within fifteen days after the service of the notice, to construct or lay from the building or land a covered or open drain or pipe of such materials, size and description, at such level and with such fall, as the Cantonment Authority may consider necessary for the drainage of the building or land,

and, for the purpose of efficiently draining any building or land, may by notice require any courtyard, alley or passage between two or more houses to be raised, or to be paved with such materials, and to be kept in proper repair in such manner, as it may specify in the notice.

[*Bengal Act II of 1888, s. 282.*] (466.)

175. If it appears to the Cantonment Authority that any group or block of buildings belonging to separate owners might be drained more economically or advantageously in combination than separately, and a drain of sufficient size already exists or is about to be constructed within one hundred feet of any part of the group or block of buildings, the Cantonment Authority may by notice require the group or block of buildings to be drained by a combined operation;

Power to compel drainage of group of buildings by a combined operation.

and may, by the same notice, require the expenses of the work to be paid by the owners or grantees of the buildings or of the land on which they stand in such proportions as may to the Cantonment Authority seem fit:

Provided that, not less than fifteen days before any work under this section is commenced, the Cantonment Authority shall give to each owner or grantee concerned an estimate of the expenses about to be incurred in respect of such work and the proportion payable by each owner or grantee.

[*Bombay Act III of 1888, s. 230.*] (468.)

176. (*1*) If it appears to the Cantonment Authority that the only means, or the most convenient means, by which the owner or grantee of any building or land can cause any drain leading therefrom to empty into a public drain is by carrying the same into, through or under land belonging to or occupied by some person other than the said owner or grantee,

Authority to occupiers of estates to carry drains through land occupied by other persons.

the Cantonment Authority, after giving that person a reasonable opportunity of stating any objection, may,

if no objection is raised, or if any objection which is raised appears to the Cantonment Authority to be invalid or insufficient,

by notice require that person to permit the said owner or grantee to carry any such drain as aforesaid into, through or under his land in such manner as may be specified in the notice.

(*2*) After the service of the notice the Cantonment Authority may, by order in writing, authorise the said owner or grantee to carry his drain into, through or under the said land in the manner aforesaid,

and every such order shall be a complete authority to the person in whose favour it is made, or to any agent or person employed by him for this purpose,

after giving to the owner or occupier of the land reasonable written notice of his intention so to do, to enter upon the land with assistants and workmen at any time between sunrise and sunset, and to construct the said drain,

and thereafter, upon the necessity arising and after the like notice, to repair and alter the same, or to construct a new drain in place thereof, in such manner and at such times as may be specified in any notice issued by the Cantonment Authority in that behalf.

[*Bengal Act II of 1888, s. 278.*] (471.)

177. The Cantonment Authority may, after notice, lay down and construct such portions of the drains referred to in section 174 and section 175 as require to be carried through or under any public drain, aqueduct or street, and may by the said notice require the expenses thereby incurred to be paid by such of the persons referred to in those sections as are specified in the notice.

Power to complete private drains by carrying them through public land.

[*Bombay Act III of 1888, s. 243.*] (456.)

178. The Cantonment Authority may by notice require the owner of any drain to provide and apply to the same within ten days after the service of the notice such covering as may be prescribed in the notice.

Covering of private drain.

[*Bengal Act II of 1888, s. 281.*] (470.)

179. When any drain is being constructed or laid by a private person, the Cantonment Authority may cause the work to be supervised while in progress by or under the orders of the Executive Engineer,

Power to control construction of private drain.

and from time to time during the progress of the work may, upon the advice of the Executive Engineer, by notice require any such person to make any reasonable alterations in the drain or additions thereto, or to abandon any part or parts of the work whenever a requisition to that effect appears upon such advice to be necessary to secure the complete and satisfactory execution of the work.

[*Act XVIII of 1889, s. 95.*] (460, 461.)

180. Whoever without the permission in writing of the Cantonment Authority makes or causes to be made, or alters or causes to be altered, any drain leading into any of the public drains shall be punishable with fine which may extend to fifty rupees.

Penalty for making or altering without permission a drain leading into a public drain.

[*Bombay Act III of 1888, ss. 240 and 471.*]

181. Whoever, except with the written permission of the Cantonment Authority, causes a drain to be so constructed as to pass beneath any part of a building shall be punishable with fine which may extend to fifty rupees.

Penalty for carrying a private drain under a building.

[*Act XVIII of 1889, s. 70 (2).*] (444.)

182. The Cantonment Authority may by notice require any person who constructs any new drain without its permission in writing or contrary to its directions or to the provisions of this Code,

Removal or alteration of private drain constructed or opened without authority.

or who opens or constructs any drain which the Cantonment Authority has ordered to be removed or stopped up or not to be made,

to remove the drain or to make such alteration therein as it thinks fit.

[*Bengal Act II of 1888, s. 287.*] (455.)

183. If any private drain is obstructed, the Cantonment Authority may by notice require the occupier of the building or land in or on which the drain is situated to cause the obstruction to be removed within six hours after the service of the notice.

Removal of obstruction from private drain.

[*Clause (13).*] (443.)

184. The Cantonment Authority may by notice require the owner, grantee or occupier of any building or land to cleanse or purify, or to repair or alter or put in good order, within a period to be specified in the notice, any drain belonging thereto.

Cleansing, repair or alteration of private drain.

[*Bombay Act III of 1888, s. 226.*] (467.)

185. Whenever any drain in, alongside of or under any street is constructed or continued, whether at the cost of the Cantonment Fund or not, for the sole use and benefit of any building or land adjoining or near to the street, the Cantonment Authority may by notice require the owner, grantee or occupier of the said building or land to repair, flush, cleanse or empty the drain or to take such other order therewith as the Cantonment Authority may deem necessary.

Maintenance of drain kept up for the benefit of certain premises only.

[*Madras Act I of 1884, s. 274.*] (472.)

186. The Cantonment Authority may by notice require the owners, grantees or occupiers of buildings or land fronting or abutting on any street to construct, alter or maintain, within fifteen days after the service of the notice, culverts, of such plan, size and material as the Cantonment Authority may prescribe, over the drains at the entrances to their buildings or land.

Construction and maintenance of road-side culverts.

[*Act XVIII of 1889, s. 106.*] (436.)

187. Whoever without the permission of the Cantonment Authority alters, obstructs or encroaches upon any public drain shall be punishable with fine which may extend to fifty rupees.

Penalty for altering, obstructing or encroaching upon public drain.

Powers of Entry and Inspection.

[*Clause (28).*] (849(2).)

188. Whenever the Cantonment Authority has provided, with respect to any building or land or to any privy, latrine, urinal, or other receptacle for offensive matter pertaining to any building or land, for the performance by its agents of the duties usually performed by sweepers,

Power to enter where public sweepers employed.

the persons employed by it to perform such duties may enter into or on the building or land at all reasonable times so far as may be necessary for the proper discharge of their duties, and the Cantonment Magistrate, by himself or by any person authorised by him in this behalf, may, after giving twenty-four hours' notice to the occupier, at any time between sunrise and sunset enter therein or thereon for the purpose of ascertaining whether such duties have been duly performed.

[*Act XVIII of 1889, s. 61, and Clause (28).*] (850.)

Inspection of private privy, latrine, urinal or drain.

189. (*1*) The Cantonment Magistrate, by himself or by any person authorised by him in this behalf, may, after giving twenty-four hours' notice to the occupier or, if there is no occupier, to the owner or grantee of any building or land in which any privy, latrine, urinal or drain is situated, inspect any such privy, latrine, urinal or drain at any time between sunrise and sunset, and

may, if necessary, cause the ground to be opened where such Magistrate or person may think fit for the purpose of preventing or removing any nuisance arising from the privy, latrine, urinal or drain.

(*2*) If, on such inspection, it appears that the opening of the ground was necessary for the prevention or removal of a nuisance, the expenses thereby incurred shall be paid by the owner, grantee or occupier of the building or land; but if it is found that no nuisance exists, or, but for such opening, would have arisen, the ground shall be closed and made good as soon as may be, and the expense of opening, closing and making it good shall be borne by the Cantonment Authority.

CHAPTER XV. (a)

WATER-SUPPLY.

190. In this chapter, unless there is something repugnant in the subject or context,—

Definitions.

[*Clause (19).*] (*1*) "source of public water-supply" means all public wells, tanks, rivers, streams, springs, channels and other sources from which water is or may be made available for public use, whether or not they are used for the purposes of or form part of an artificial system for supplying water,

and includes any well situate on private premises from which water is taken for the use of any persons other than the occupier of the premises; and

(*2*) "water-works" includes all wells, tanks, rivers, streams, springs, channels, lakes, cisterns, pumps, reservoirs, conduits, aqueducts, tunnels, mains, hydrants and fountains, and all lands, bridges, buildings, engines, machinery, works, materials and things used for the purposes of or forming part of an artificial system for supplying water.

[*Act XIX of 1884, s. 2, (5).*] (48.)

191. (*1*) All sources of public water-supply within a cantonment, except such as are for the time being under the control of the Public Works Department, shall be under the control of the Cantonment Authority.

[*Clause (19).*] (500.)

Control of Cantonment Authority over public water-supply.

(*2*) In every cantonment in which there are no water-works, the Cantonment Authority shall take all necessary measures for maintaining a supply of pure water, for guarding from pollution water which is used for human consumption, and for preventing polluted water from being so used.

192. (*1*) The Cantonment Authority may by public notice declare any particular area to be the catchment area of any source of public water-supply.

[*Bombay Act III of 1888, s. 267, and Clause (19).*] (505, 506.)

Protection of catchment area.

(*2*) If without the written permission of the Cantonment Authority any person—

(*a*) erects any building for any purpose whatever within any such catchment area, or

(*b*) extends, alters or applies to any purpose different from that to which the same was previously applied any building already existing within such an area, or

(*c*) within such an area carries on any operation of manufacture, trade or agriculture in any manner, or does any other act whatsoever, whereby injury may arise to any source of public water-supply, or whereby the water thereof may be fouled or rendered less wholesome,

the Cantonment Authority may by notice require him to remove such building or extension, undo or modify such alteration, or cease from such application, operation or act.

193. The Cantonment Authority may by notice require the owner, grantee or occupier of any building or land wherein or whereon gas-works are situated or any offensive trade or manufacture is carried on, by himself or his servant or agent, to cease, within twenty-four hours from the service of the notice, from any act whereby any source of public water-supply in the cantonment is fouled.

[*Madras Act IV of 1884, s. 152.*] (511.)

Power to prevent fouling of source of public water-supply by person engaged in offensive trade.

194. The Cantonment Authority may by public notice prohibit fishing, boating or the gathering of flowers or plants, generally or by any particular method specified in the notice, in any source of public water-supply in the cantonment, whenever it considers that such fishing, boating or gathering of flowers or plants is likely to cause danger to the public health.

[*Madras Act I of 1884, s. 330, and Clause (19).*] (510.)

Power to prevent fouling of source of public water-supply by fishing, boating or gathering plants.

(a) A strict control by the Cantonment Authority over all sources of water-supply capable of being used for drinking, or of being introduced into articles of food or drink, is of the first importance to the public health.

This chapter therefore aims at providing—

(1) that all sources of water-supply to which the public either have, or can by any means obtain, access, and which are or may be used for drinking purposes, shall be strictly kept from being fouled, and that all fouling be punished;

(2) that impure water shall be declared so in as public a manner as possible by means of a conspicuous placard notifying the fact to all, natives being utterly careless in such matters; and

(3) that no well or other source of water-supply be allowed within fifty feet of a latrine, urinal, cesspool, drain or place for the deposit of offensive matter, and that wherever such a state of things exists it be promptly put an end to.

As a means of ensuring that drinking water is not fouled, the Cantonment Authority is required to set apart sufficient places for bathing and washing.

Provision is made for the protection of catchment areas from being fouled.

Artificial water-works are left under the control of the Public Works Department; but powers are taken to punish persons damaging them or trespassing on them, and also to control the issue of water from them should such control be at any time required to be exercised by the Cantonment Authority.

[*Clause (19).*] (527, *Ill. 2.*)

Penalty for bathing or washing at public well or spring so as to foul the water.

195. Whoever bathes, or washes any animal, or any clothes, cloth, wool, leather, skin, utensil or other thing, by the side of any public well or spring in such a manner as to let the water flow back or percolate into the well or spring, shall be punishable with fine which may extend to twenty rupees, or with imprisonment for a term which may extend to four days.

[*Act XIX of 1884, s. 37, and Clause (19).*] (509.)

Penalty for fouling source of public water-supply used for drinking purposes.

196. (*1*) If any person—

(*a*) bathes in any source of public water-supply which is used for drinking purposes, or

(*b*) washes, throws or causes or permits to enter therein any dog or other animal, or

(*c*) washes or cleanses therein any clothes, cloth, wool, leather, skin, utensil or other thing, or

(*d*) throws or allows to flow therein any offensive matter or rubbish, or

(*e*) causes or allows the water of any sink, drain, steam-engine or boiler, or any other filthy or polluted water belonging to him or under his control, to flow therein, or

(*f*) does any other act whereby the water thereof is fouled or is likely to be fouled,

he shall be punishable with fine which may extend to fifty rupees, or with imprisonment for a term which may extend to eight days, and, in case of a continuing offence, with an additional fine which may extend to five rupees for every day after the first during which the offence continues.

(*2*) For the purposes of this section, the Cantonment Authority may by public notice declare what sources of public water-supply are used for drinking purposes.

[*Bengal Act II of 1888, s. 323, and Clause (19).*] 514, 515.)

Power to stop use of any source of public water-supply for drinking purposes.

197. (*1*) If it appears to the Cantonment Authority, on the advice of the Sanitary Officer, that the water in any source of public water-supply is likely, if used for drinking purposes, to engender or cause the spread of any infectious disorder, it may by public notice prohibit the removal or use of the said water for the purpose of drinking or of being mixed with any article of food or drink, or of washing vegetables or cooking-utensils, or of being used in any other manner which is likely to cause its introduction into any article of food or drink.

(*2*) Whenever a notice is issued under this section, a notice-board shall be put up near the well, tank or other place to which the notice relates, stating that the water is impure.

[*Madras Act IV of 1884, s. 156 (1).*] (512.)

Maintenance of source of private water-supply used for drinking purposes.

198. The Cantonment Authority may by notice require the owner of, or the person having control over, any private well, tank, stream, spring, channel, reservoir or other place, the water of which is used for drinking purpose, to keep and maintain the same in good order and repair, and to clear the same from time to time of silt, refuse or decaying vegetation,

and may also require him, in such manner as it may think fit, to protect any such well from pollution by surface drainage.

[*Madras Act IV of 1884, s. 156 (2).*] (513.)

Power to stop use of and to close source of private water supply used for drinking purposes.

199. Whenever the water of any private well, tank or reservoir used for drinking purposes is proved to the satisfaction of the Cantonment Authority to be unfit for drinking, the Cantonment Authority may by notice require the owner or the person having control thereof to desist from using such water and from permitting others to use it in any manner likely to cause its introduction into articles of food or drink;

and if, after such notice, the water of such well, tank or reservoir is used by any person in any such manner as aforesaid, the Cantonment Authority may by notice require the owner or the person having control thereof to close such well, either temporarily or permanently, or to enclose or fence such well, tank or reservoir in such manner as it may direct, so that the water thereof may not be so used.

[*Clause (19).*] (517.)

Penalty for placing latrine, &c., near source of public water-supply, and *vice versâ*.

200. Whoever places any latrine, urinal, cesspool or drain, or uses for the deposit of offensive matter or rubbish any place, within fifty feet of any source of public water-supply,

and whoever makes any well, tank or reservoir within fifty feet of any latrine, urinal, drain or place used for the deposit of offensive matter or rubbish,

shall be punishable with fine which may extend to fifty rupees.

[*Act XVIII of 1889, s. 72, and Clause (19).*] (518.)

Removal or closing of latrine, &c., near source of public water-supply, or filling up of the latter.

201. The Cantonment Authority may by notice require any grantee, owner or occupier on whose land any latrine, urinal, cesspool or drain, or any place used for the deposit of offensive matter or rubbish, or any stable or other place for keeping animals, for the time being exists within fifty feet of any source of public water-supply,

at his option, within eight days after the service of the notice, either to remove or close the latrine, urinal, cesspool, drain, stable or place, or to fill up the source of water-supply.

[*Act XVIII of 1889, s. 106.*] (436.)

Altering, obstructing or encroaching upon public water-channel.

202. Whoever without the permission of the Cantonment Authority alters, obstructs or encroaches upon any public water-channel shall be punishable with fine which may extend to fifty rupees.

[*Madras Act I of 1884, ss. 250 and 251, and Bombay Act III of 1888, ss. 281 and 471.*] (519, 544, 545.)

Laying of gas-pipes and water-pipes.

203. (*1*) All pipes for the conveyance of gas shall be laid at the greatest practicable distance from any water-pipe, and no pipe for the conveyance of gas shall, except when it is necessary for the purpose of crossing, be laid at a distance of less than four feet from any water-pipe.

(*2*) Whenever it is necessary to lay a gas-pipe across a water-pipe, or a water-pipe across a gas-pipe, the pipes shall be laid at the greatest

practicable distance apart from each other, and shall be placed at right angles, or as nearly at right angles as the situation will admit.

(3) Whenever a gas-pipe crosses a water-pipe, it shall be of such length that no joint of it shall be nearer to the water-pipe than four feet, and it shall for a distance of six feet on either side of the water-pipe be sufficiently bedded in with good sound clay or other fit material.

(4) No gas-pipe or water-pipe shall be laid in a drain or on the surface of an open channel; and no water-pipe shall be laid in any other position where the pipe is likely to be injured or the water therein polluted.

(5) The Cantonment Authority may by notice require any person who has laid or ordered, or permitted to be laid, any gas-pipe or water-pipe in contravention of any of the provisions of this, section to remove or relay the same, or otherwise deal therewith as it may think necessary.

[*Bombay Act III of 1888, s. 269 (3).*] (520.)

204. The Cantonment Authority may by public notice direct that water carried away by any person from any cantonment water-works shall be taken for his private use only and not for sale, and that, except with the written permission of the Cantonment Magistrate, no water shall be carried away from any such works in a cask, cart or pakhál.

Power to control removal of water from Water-works.

[*Bombay Act III of 1888, s. 270.*] (521.)

205. (1) The Cantonment Authority may by public notice assign and set apart any portion of the cantonment water-works and the water therein for use by the public for such purpose only as it thinks fit.

Power to assign portion of water-works for use for a special purpose.

(2) A copy of every such notice shall be affixed on a conspicuous spot on or near the portion of the works to which it relates, indicating the purpose for which the same is assigned and set apart.

[*Act XIX of 1884, s. 35.*] (522.)

206. Whoever unlawfully obstructs the flow of flushes, draws off, diverts or takes water from any water-works, or from any water or stream by which any water-works are supplied, shall be punishable with fine which may extend to fifty rupees.

Penalty for obstructing or diverting water belonging to water-works.

[*Bengal Act II of 1888, s. 161.*] (538.)

207. If any pipes, works or fittings connected with the supply of water from cantonment water-works to any building or land are at any time found to be out of repair to such an extent as to cause a waste of water, the Cantonment Authority may cause the water to be turned off or cut off from the building or land after giving notice in writing of not less than twenty-four hours to the occupier,

Power to cut off water where private supply is wasted.

and may recover from the occupier and pay to the Executive Engineer the expense incurred in so turning off or cutting off the water.

[*Bengal Act II of 1888, s. 163.*] (539.)

208. The occupier of any building or land in which water supplied from cantonment water-works is from negligence or other circumstances under the control of the said occupier wasted, or

Penalty for wasting private suplpy.

in whose building or land the pipes, works or fittings for the supply of water are found to be out of repair to such an extent as to cause any waste of water,

shall be punishable with fine which may extend to twenty rupees.

[*Madras Act IV of 1884, s. 150, and Clause (19).*] (507.)

209. (1) If any person trespasses upon land occupied by water-works, he shall be punishable with fine which may extend to twenty rupees, or with imprisonment for a term which may extend to four days.

Penalty for trespassing on water-works.

(2) If any person so trespassing refuses to leave such land on being requested so to do by any servant of the Cantonment Authority, or by any person authorised in that behalf by the Cantonment Magistrate, he shall be punishable with further fine which may extend to fifty rupees, or with further imprisonment for a term which may extend to eight days, and may be removed from the land by such servant or other person.

[*Madras Act IV of 1884, s. 151.*] (508.)

210. Whoever unlawfully breaks, injures or causes damage to any water-works, or without due authority opens or removes any lock, cock or pipe belonging thereto,

Penalty for damaging water-works.

shall be punishable with fine which may extend to twenty rupees, and, in case of a continuing offence, with an additional fine which may extend to five rupees for every day after the first during which the offence continues.

Bathing and Washing Places.

[*Act XVIII of 1889, s. 54.*] (523.)

211. The Cantonment Authority shall set apart suitable places for the purpose of bathing, and may assign any such place or any part thereof for the exclusive use of persons suffering from infectious or contagious disorders;

Public bathing-places.

and may specify the times at which and the sex of the persons by whom places or parts so set apart or assigned may be used.

[*Act XVIII of 1889, s. 54.*] (524.)

212. The Cantonment Authority shall set apart suitable places for washing animals and for washing clothes, cloth, wool, leather, skins, utensils or any other thing,

Public washing-places.

and may assign any such place or any part thereof exclusively for the washing of animals suffering from dangerous cattle-disease, or for the washing of clothing, bedding or other things which have been exposed to the infection of any infectious disorder and have not been freed from infection in such manner as the Cantonment Authority may have prescribed.

[*Act XVIII of 1889, s. 54.*] (525, 526.)

213. (1) The Cantonment Authority may by public notice prohibit bathing, or the washing of animals, clothes, cloth, wool, leather, skins, utensils or other things, in any public place not set apart for the purpose.

Regulation of public bathing and washing.

(2) Whenever the Cantonment Authority has assigned bathing-places for the exclusive use of persons suffering from infectious or contagious disorders, or places for the washing exclusively of diseased animals or infected clothing, bedding or other things, it may by public notice prohibit bathing by such persons or the washing of such animals or things in any public place not assigned for the purpose.

(74.) *Explanation.*—"Washing an animal" includes driving or throwing an animal, or permitting it to go, into water.

(3) Whenever the Cantonment Authority has specified the times at which, or the sex of the persons by whom, any public bathing-place may be used, it may by public notice prohibit bathing thereat at times or by persons other than those specified.

[*Act XVIII of 1889, s. 54.*] (527.)

214. The Cantonment Authority may by public notice prohibit the doing of any act which in its opinion—

Power to prohibit certain acts.

may render water in or adjacent to any place set apart for bathing or washing foul or unfit for use, or

may cause inconvenience or annoyance to persons using or being in the neighbourhood of any bathing or washing place.

Illustration.—Bathing in a street, or bathing at a well or tank so situated that bathing causes annoyance to any section of the inhabitants of the cantonment, is an act which may be prohibited by public notice.

[*Bengal Act IV of 1866, s. 66 (15), and Clause (12).*] (818.)

215. Whoever obstructs or incommodes any person bathing at a place set apart as a bathing-place by wilful intrusion or by using such a place as a landing-place, or by anchoring or otherwise fastening or keeping boats or by washing animals at or near such place, or in any other way, shall be punishable with fine which may extend to fifty rupees or with imprisonment for a term which may extend to eight days.

Penalty for annoying people using a public bathing-place.

Powers of Entry and Inspection.

[*Clause 28.*] (851.)

216. The Cantonment Magistrate, by himself or by any person authorised by him in this behalf, may, after giving twenty-four hours' notice to the occupier or, if there is no occupier, to the owner or grantee of any building or land, at any time between sunrise and sunset enter into or upon the building or land—

Powers of entry and inspection.

(*a*) for the purpose of ascertaining whether any source of public water-supply in the cantonment is being fouled by gas-works or by the carrying on of any offensive trade or manufacture; or

(*b*) for the purpose of ascertaining whether any source of water-supply in the cantonment, the water of which is used for drinking purposes, is kept and maintained in good order and repair and free from pollution, or whether the use of the water for drinking purposes would be likely to engender or to cause the spread of any infectious disorder.

CHAPTER XVI. [a]

MARKETS.

[*Bombay Act III of 1888, s. 399, and Clause (17).*] (647.)

217. (1) The Cantonment Authority may by public notice appoint such places as it thinks fit for the purpose of being used as public markets, and define and alter the limits of any such place.

Provision and maintenance of public markets.

(2) The Cantonment Authority may

build and maintain upon such places as aforesaid such shops, warehouses, stalls, sheds, pens, standings and other buildings or conveniences, and

make, alter and maintain such drains, roads, passages and approaches in or for such places,

as may in its opinion be necessary for the purposes of a public market.

[*Bombay Act III of 1888, s. 407.*] (647, 648.)

218. The Cantonment Authority may charge such rents, tolls and fees as to it may seem proper for the right to expose goods for sale in any public market, and for the occupation or use of shops, warehouses, stalls, sheds, pens and standings therein; and

Rents and charges in public markets.

may farm the rents, tolls and fees leviable in respect of any public market or part thereof for any period not exceeding one year at a time on such terms and conditions as to the Cantonment Authority may seem fit, or

may sell, by auction or by private contract, the privilege of occupying or using any shop, warehouse, stall, shed, pen or standing in any public market for such term and on such conditions as may to it seem proper.

[*Bengal Act II of 1888, s. 359.*] (660.)

219. The Cantonment Authority may by public notice fix and define the limits of any private market existing at the commencement of this Code.

Power to fix limits of existing private markets.

[*Madras Act IV of 1884, s. 196.*] (656.)

220. The Cantonment Authority may, with the previous sanction of the Commander-in-Chief, grant permission in writing to any person to establish a private market at such place, upon such terms and conditions, and for such purposes, as to it may seem proper.

Establishment of private markets.

[*Bombay Act III of 1888, s. 406, and Clause (17).*] (649.)

221. (1) The Cantonment Authority may make rules, consistent with the Cantonments Act, 1889, and this Code, to provide, with respect to

Power to make rules for public markets.

XIII of 1889.

(a) A strict control over the preparation and sale of articles of food and drink is one of the first sanitary requirements of the day in India. Chapters XVI, XVII and XVIII aim at giving the Cantonment Authority the very widest powers in this respect of which the law at present admits.

In the case of many of such articles this control is only obtainable by the establishment and maintenance of regular markets for them, and Chapter XVI provides for this.

Markets may be established either by the Cantonment Authority itself or by private persons, and may range from an expensive building, like the Bombay market, to a mere field or other space within specified limits, where people congregate for barter, and which is declared a market. The conditions under which markets exist depend on local customs, differing widely in the different provinces of India, and this chapter therefore aims at investing the Cantonment Authority with such ample powers as will enable it to meet the requirements of its particular locality. The powers so given in respect of public markets relate mainly to nuisances, obstructions, conservancy, sanitation, ventilation, and water-supply, while power is given to make the owners or lessees of private markets conform as far as possible to similar rules.

any public market, for all or any of the following matters, namely:

(*a*) fixing the days on which and the hours during which the market may be kept open for use;

(*b*) preventing nuisances or obstruction in the market or in the approaches thereto;

(*c*) keeping the market in a cleanly and proper condition, removing offensive matter and rubbish therefrom, and maintaining public latrines and urinals for the use of persons frequenting the market;

(*d*) the proper ventilation of buildings, and the provision therefor of a sufficient supply of pure water;

(*e*) the provision of convenient passages between the shops, warehouses, stalls, sheds, pens and standings; and

(*f*) generally the control of the market.

(*2*) In making any rules under clause (*c*), the Cantonment Authority shall prohibit the placing of latrines within one hundred yards of a market.

(*3*) Where there is a Cantonment Committee, rules under this section may be made only at a special meeting.

(*4*) No rule made under this section shall come into force until it has been confirmed by the Commander-in-Chief and the Local Government.

[*Clause* (17).] (661 (*a*).)

222. (*1*) The Cantonment Authority may by notice declare that all or any rules in force under section 221 in a public market shall apply, with such modifications (if any) as it may think fit, to any private market specified in the notice.

Power to make rules for private markets.

(*2*) In any cantonment in which there is no public market, the Cantonment Authority may make rules, consistent with the Cantonments Act, 1889, and this Code, to provide, with respect to any private market, for all or any of the matters referred to in clauses (*a*) to (*f*) (both inclusive) of section 221; and the provisions of sub-sections (*2*), (*3*) and (*4*) of that section shall apply with respect to any rules so made.

XIII of 1889.

[*Bombay Act III of 1888, ss. 399 and 407, and Clause* (17).] (667.)

223. (*1*) The Cantonment Authority may provide and maintain in any public market, and may by notice require the owner or lessee of any private market to provide and maintain in his market, such buildings, places, machines, weights, scales and measures for weighing and measuring goods sold in the market as the Cantonment Authority may think fit.

Provision of conveniences for weighing and measuring.

(*2*) The Cantonment Authority may charge such fees as to it may seem proper for the weighing or measuring goods in buildings or places, or with machines, weights, scales or measures provided by it under this section.

[*Madras Act IV of 1884, s. 200, and Clause* (17).] (661.)

224. The Cantonment Authority may by notice require the owner or lessee of any private market, by himself or his agent, to do any of the following things, namely:

Further powers for regulation of private markets.

(*a*) to construct and maintain such drains in and for the market of such materials and of such description as the Cantonment Authority may direct;

(*b*) to cause the market or any portion thereof to be roofed and paved with such materials and in such manner, and to be provided with such latrines and urinals, as the Cantonment Authority may direct;

(*c*) to make such alterations in the stalls, shops, doors, passages or other parts of the market, or in the approaches thereto, as the Cantonment Authority may direct;

(*d*) to provide for such supply of water to the market as the Cantonment Authority may direct;

(*e*) to report to the Cantonment Magistrate the breach by any person using the market of any rule in force under section 222.

[*Bombay Act III of 1888, s. 400.*] (655.)

225. The Cantonment Authority may, with the sanction of the Commander-in-Chief, at any time by public notice close, permanently or for such period as may to it seem proper, any public market or any portion thereof.

Power to close public market.

[*Clause* (17).] (657.)

226. Every permission granted under section 220 to establish a private market shall imply the following conditions, namely:

Power to close new private market at a year's notice.

(*a*) the market shall, on the requisition of the Cantonment Authority, made by notice with the sanction of the Commander-in-Chief, be closed within one year from the service of the notice;

(*b*) no person shall have any claim to compensation for any loss or damage which he may incur in consequence of any such notice:

Provided that nothing in this section shall be deemed to affect the provisions of section 227 or section 228.

[*Bombay Act III of 1888, s. 403, and Clause* (17).] (662.)

227. If the owner or lessee of any private market established after the commencement of this Code fails to comply with any requisition made upon him by notice under section 224, the Cantonment Authority may by notice require him to close the market permanently or for any period specified in the notice.

Power to close new private market for failure to comply with requisition.

[*Madras Act IV of 1884, s. 198.*] (661 (*c*).)

228. (*1*) If any private market is, by reason of its position, construction or arrangement, unfit, in the opinion of the Cantonment Authority, for the purposes of a market, or is, in the opinion of the Cantonment Authority, a nuisance to the neighbourhood,

Power to close any private market in other cases.

the Cantonment Authority may by notice require the owner or lessee to close the same, or any portion thereof, permanently or for any period specified in the notice.

(*2*) Where a private market existing at the commencement of this Code, or any portion thereof, is closed on a requisition made by the Cantonment Authority under this section, the Cantonment Authority shall pay to the owner and lessee reasonable compensation for any loss or damage which they may incur in consequence of the closure.

[*Madras Act IV of 1884, s. 198, and Bombay Act III of 1888, s. 408.*] (651, 656, 660, 663—665.)

229. (*1*) A copy of the following documents, namely,—

Notification of documents relating to market.

the table of rents, tolls and fees chargeable,

all rules in force under section 221 or section 222, as the case may be, and

every notice issued under section 219, section 225, section 226, section 227 or section 228,

shall be affixed, in English and the vernacular, to some conspicuous spot in the market to which the original relates.

(*2*) Until a copy of a rule or notice has been so affixed, no person shall be dealt with for disobeying the rule or notice.

[*Bombay Act III of 1888, ss. 406 and 471, and Clause* (17).] (650, 664.)

230. Whoever disobeys any rule in force under section 221 or section 222 shall, subject to the provision of section 229, sub-section (*2*), be punishable with fine which may extend to twenty rupees.

Penalty for disobeying market rule.

[*Bombay Act III of 1888, s. 409, and Clause* (17).] (653, 664.)

231. The Cantonment Magistrate may expel from any market any person carrying on trade or business therein who, or whose servant, has been punished for disobeying any rule for the time being in force in the market under section 221 or section 222, and

Power to expel person disobeying market rule and to determine his tenure of shop, &c.

may prevent such person, by himself or his servants, from further carrying on any trade or business in such market, or occupying any shop, warehouse, stall, shed, pen, standing or other place therein, and

may determine any lease or tenure which such person may have in any such shop, warehouse, stall, shed, pen, standing or place.

[*Bombay Act III of 1888, ss. 401 and 471, and Clause* (17).] (654.)

232. (*1*) If any person without the permission of the Cantonment Authority sells or, exposes for sale, any animal or article within a public market, he shall be punishable with fine which may extend to fifty rupees, and, in case of a continuing offence, with an additional fine which may extend to five rupees for every day after the first during which the offence continues.

Penalty for selling without permission in public market.

(*2*) The Cantonment Magistrate may summarily remove from the market any person found so selling or exposing for sale any animal or article.

[*Madras Act IV of 1884, s. 360.*] (658.)

233. If any person, by himself or his agent or servant, establishes a market after the commencement of this Code without obtaining the permission of the Cantonment Authority under section 220, he shall be punishable with fine which may extend to fifty rupees, and with an additional fine which may extend to five rupees for every day after the first during which he keeps the market open.

Penalty for opening private market without permission.

[*Bengal Act II of 1888, s. 360.*] (656.)

234. Whoever causes any encroachment in or on any of the approaches, roads or passages to or in any market shall be punishable with fine which may extend to twenty rupees, and, in case of a continuing offence, with an additional fine which may extend to three rupees for every day after the first during which the offence continues.

Penalty for encroaching on approaches or passages of market.

[*Clause* (17).]

235. The water-supply of every market, the arrangements for the removal and disposal of offensive matter and rubbish therefrom, and all other arrangements for maintaining the same in a sanitary condition, shall be frequently inspected by the Sanitary Officer and the Cantonment Magistrate.

Inspection of market by Sanitary Officer and Cantonment Magistrate for sanitary purposes.

Powers of Entry and Inspection.

[*Clause* (28).] (856.)

236. The Cantonment Magistrate, by himself or by any person authorised by him in this behalf, may, at all reasonable times,—

Powers of entry and inspection.

(*a*) enter into any private market, or any shop, warehouse, stall, shed, pen, standing or other place in a private or public market,—

(i) for the purpose of ascertaining whether any rules made under this chapter and applicable to such market are being obeyed, or

(ii) for the purpose of expelling from such market, or of preventing from carrying on any trade or business, or occupying any shop, warehouse, stall, shed, pen, standing or other place therein, any person whom the Cantonment Magistrate is empowered by this chapter to so expel or prevent; and

(*b*) enter into and inspect any private market which has been established without the permission of the Cantonment Authority, or which is kept open after notice of closure has been given under this chapter.

CHAPTER XVII. [a]

SLAUGHTER-HOUSES.

[*Bombay Act III of 1888, s. 399, and Clause* (17).] (675, 677.)

237. (*1*) The Cantonment Authority may, by public notice, appoint such places as it thinks fit for the purpose of being used as public slaughter-houses, and define and alter the limits of any such place.

Provision and maintenance of public slaughter-houses.

[a] The principal objects of this chapter are to secure—

(1) that animals be slaughtered only at certain specified places carefully chosen by the Cantonment Authority;

(2) that, as a rule, all slaughtering places be under the direct management of the Cantonment Authority, and that where, as a special case, a private slaughter-house is allowed, it shall only be established with the express sanction of the Commander-in-Chief; and that all private slaughter-houses shall be governed by rules similar to those applicable to public slaughter-houses, and be liable to be discontinued at one year's notice, or, in the case of disobedience to requisitions or for other good reason, at any time; and

(3) that slaughter-houses shall be under strict control, not only as regards the many ways in which such places generally offend from a sanitary point of view, but also as regards various practices which result in much cruelty to the animals brought for slaughter.

Special powers [illegible] slaughter.

(2) The Cantonment Authority may

build and maintain upon such places as aforesaid such pens, standings, enclosures and other buildings or conveniences, and

make, alter and maintain such drains, roads, passages and approaches in or for such places,

as may in its opinion be necessary for the purposes of a public slaughter-house.

(3) The Cantonment Authority may by public notice direct that any place appointed under sub-section (1) shall be used for the slaughter of animals of such description only as may be specified in the notice.

[*Bombay Act III of 1888, s. 407.*] (675, 679.)

238. The Cantonment Authority may charge such rents, stallages, tolls and fees as to it may seem proper for the right to slaughter animals in any public slaughter-house, and for the occupation or use of pens, standings, enclosures and buildings therein, and

Rents and charges in public slaughter-houses.

may farm the rents, stallages, tolls and fees leviable in respect of any public slaughter-house or part thereof for any period not exceeding one year at a time on such terms and conditions as to the Cantonment Authority may seem fit, or

may sell, by auction or by private contract, the privilege of occupying or using any pen, standing, enclosure or building in any public slaughter-house for such term and on such conditions as may to it seem proper.

[*Bombay Act III of 1888, s. 403.*] (687.)

239. The Cantonment Authority may, with the previous sanction of the Commander-in-Chief, grant permission in writing to any person to establish a private slaughter-house at such place, upon such terms and conditions, and for the slaughter of such description of animals, as to it may seem proper.

Establishment of private slaughter-houses.

[*Clause (17).*]

240. Notwithstanding anything contained in section 237 or section 239, the Cantonment Authority shall not establish, or permit the establishment of, a slaughter-house at any place situate within three hundred feet of—

Position of new slaughter-houses.

(a) a nulla or watercourse, or

(b) an inhabited dwelling, or

(c) a latrine or urinal, or

(d) a place used for the deposit of night-soil or other offensive matter, or

at any place at which the location of a slaughter-house would, in the opinion of the District Magistrate, be objectionable to any class of residents in the cantonment.

[*Clause (17).*] (676.)

241. (1) In every public slaughter-house, and in every private slaughter-house established under section 239, there shall be two separate enclosures, to be called respectively the outer yard and the inner yard.

Outer and inner yards.

(2) The outer yard shall be used for the confinement of animals proposed for slaughter, and the inner yard for the confinement of animals selected for slaughter; and every outer and inner yard shall be so situated or constructed that the animals confined therein or approaching thereto shall not be able to see, or, so far as it is practicable to avoid it, to smell the odours arising from, the place of slaughter.

[*Bombay Act III of 1888, s. 406, and Clause (17).*] (680.)

242. (1) The Cantonment Authority may make rules, consistent with the Cantonments Act, 1889, and this Code, to provide, with respect to any public slaughter-house, for all or any of the following matters, namely:

Power to make rules for public slaughter-houses.

XIII of 1889.

(a) fixing the days on which and the hours during which the slaughter-house may be kept open for use and the slaughter of animals permitted therein;

(b) preventing nuisances or obstruction in the slaughter-house or in the approaches thereto;

(c) keeping the slaughter-house in a cleanly and proper condition, removing offensive matter and rubbish therefrom, and maintaining public latrines and urinals for the use of persons frequenting the slaughter-house;

(d) the proper ventilation of buildings, and the provision therefor of a sufficient supply of pure water;

(e) the provision of convenient passages between the pens, standings, enclosures, buildings and yards;

(f) the inspection, selection and marking of animals for slaughter, and the removal of animals from the outer to the inner yard, and from the inner yard to the place of slaughter, and fixing the days on which and the hours during which such inspection, selection, marking and removal shall be carried on;

(g) the treatment while in the slaughter-house of animals proposed or selected for slaughter;

(h) prohibiting the keeping of animals at a slaughter-house for more than twenty-four hours;

(i) the method of slaughter, and the removal and disposal of blood, offal, skins, horns, feet and the refuse of carcasses, and of other offensive matter;

(j) the destruction and disposal of animals which are offered for slaughter and are from disease or for any other reason unfit for human consumption, the destruction of carcasses which from disease or for any other reason are found after slaughter to be unfit for human consumption, and the marking of carcasses fit for human consumption;

(k) admittance into the slaughter-house or yards, and the conduct of persons carrying on business or trade or working for gain therein; and

(l) generally the control of the slaughter-house.

(2) Where there is a Cantonment Committee, rules under this section may be made only at a special meeting.

(3) No rule made under this section shall come into force until it has been confirmed by the Commander-in-Chief and the Local Government.

[*Clause (17).*] (691 (a).)

243. (1) The Cantonment Authority may by notice declare that all or any rules in force under section 242 in a public slaughter-house shall apply, with such modifications (if any) as it may think fit, to any private slaughter-house specified in the notice.

Power to make rules for private slaughter-houses.

(2) In any cantonment in which there is no public slaughter-house, the Cantonment Authority may make rules, consistent with the Cantonments Act, 1889, and this Code, to provide, with respect to any private slaughter-house, for all or any of the matters referred to in clauses (a) to (l) (both inclusive) of section 242; and the provisions of sub-sections (2) and (3) of that section shall apply with respect to any rules so made.

XIII of 1889.

[*Bombay Act III of 1888, s. 405, and Clause (17).*] (691.)

244. The Cantonment Authority may by notice require the owner or lessee of any private slaughter-house, by himself or his agent, to do any of the following things, namely:

Further powers for regulation of private slaughter-houses.

(a) to provide and maintain receptacles for the blood, offal, skins, horns, feet and refuse of slaughtered animals and for other offensive matter;

(b) to construct and maintain such drains in and for the slaughter-house, of such materials and of such description, as the Cantonment Authority may direct;

(c) to cause the slaughter-house or any portion thereof to be provided with such pens, standings, enclosures, fences, buildings, outer and inner yards, latrines and urinals, as the Cantonment Authority may direct;

(d) to make such alterations in the pens, standings, enclosures, fences, buildings or yards of the slaughter-house, or in the approaches to the slaughter-house, as the Cantonment Authority may direct;

(e) to provide for such supply of water to the slaughter-house as the Cantonment Authority may direct;

(f) to provide such proper means and materials for the inspection, selection and marking of animals for slaughter, for the slaughter of animals, and for the removal and disposal of the carcasses, blood, offal, skins, horns, feet and refuse thereof, as the Cantonment Authority may direct;

(g) to report to the Cantonment Magistrate the breach by any person using the slaughter-house of any rule in force under section 243.

[*Bombay Act III of 1888, s. 400.*] (686.)

245. The Cantonment Authority may, with the sanction of the Commander-in-Chief, at any time by public notice close, permanently or for such period as may to it seem proper, any public slaughter-house or any portion thereof.

Power to close public slaughter-house.

[*Clause (17).*] (688.)

246. Every permission granted under section 239 to establish a private slaughter-house shall imply the following conditions, namely:

Power to close new private slaughter-house at a year's notice.

(a) the slaughter-house shall, on the requisition of the Cantonment Authority, made by notice with the sanction of the Commander-in-Chief, be closed within one year from the service of the notice;

(b) no person shall have any claim to compensation for any loss or damage which he may incur in consequence of any such notice:

Provided that nothing in this section shall be deemed to affect the provisions of section 247 or section 248.

[*Bombay Act III of 1888, s. 403, and Clause (17).*] (692.)

247. If the owner or lessee of any private slaughter-house established after the commencement of this Code fails to comply with any requisition made upon him by notice under section 244, the Cantonment Authority may by notice require him to close the slaughter-house permanently or for any period specified in the notice.

Power to close new private slaughter-house for failure to comply with requisition.

[*Madras Act IV of 1884, s. 198, and Clause (17).*] (691 (c).)

248. (1) If any private slaughter-house is, by reason of its position, construction or arrangement, unfit, in the opinion of the Cantonment Authority, for the purposes of a slaughter-house, or is, in the opinion of the Cantonment Authority, a nuisance to the neighbourhood,

Power to close any private slaughter-house in other cases.

the Cantonment Authority may by notice require the owner or lessee to close the same, or any portion thereof, permanently or for any period specified in the notice.

(2) Where a private slaughter-house existing at the commencement of this Code, or any portion thereof, is closed on a requisition made by the Cantonment Authority under this section, the Cantonment Authority shall pay to the owner and lessee reasonable compensation for any loss or damage which they may incur in consequence of the closure.

[*Bombay Act III of 1888, s. 408, and Clause (17).*] (681, 687, 693.)

249. (1) A copy of the following documents, namely:

Notification of documents relating to slaughter-house.

the table of rents, stallages, tolls and fees chargeable,

all rules in force under section 242 or section 243, as the case may be, and

every notice issued under section 245, section 246, section 247 or section 248,

shall be affixed, in English and the vernacular, to some conspicuous spot in the slaughter-house to which the original relates.

(2) Until a copy of a rule or notice has been so affixed, no person shall be dealt with for disobeying the rule or notice.

[*Bombay Act III of 1888, ss. 402 and 471, and Clause (17).*] (688, 694.)

250. Whoever disobeys any rule in force under section 242 or section 243 shall, subject to the provision of section 249, sub-section (2), be punishable with fine which may

Penalty for disobeying slaughter-house rule.

Cantonment Code.

(Part IV.—The Public Health, Safety and Convenience.—Chapter XVII.—Slaughter-houses.—Sections 251-260.)

[*Bombay Act III of 1888, s. 409, and Clause (17).*] (684, 694.)

251. The Cantonment Magistrate may expel from any slaughter-house any person carrying on trade or business therein who, or whose servant, has been punished for disobeying any rule for the time being in force in the slaughter-house under section 242 or section 243, and

Power to expel person disobeying slaughter-house rule, and to determine his tenure of shop, &c.

may prevent such person, by himself or his servants, from entering into or further carrying on any trade or business in such slaughter-house, or occupying any pen, standing, enclosure, building or other place therein, and

may determine any lease or tenure which such person may have in any such pen, standing, enclosure, building or place.

[*Bombay Act III of 1888, ss 409 and 471, and Clause (17).*] (685.)

252. (*1*) If any person without the permission of the Cantonment Authority enters into or carries on any trade or business in a public slaughter-house, he shall be punishable with fine which may extend to fifty rupees, and, in case of a continuing offence, with an additional fine which may extend to five rupees for every day after the first during which the offence continues.

Penalty for using public slaughter-house without permission.

(*2*) The Cantonment Magistrate may summarily remove from the slaughter-house any person found so entering or carrying on trade or business therein.

[*Bengal Act II of 1888, s. 341, and Clause (17).*] (689.)

253. If any person, by himself or his agent or servant, establishes a slaughter-house after the commencement of this Code without obtaining the permission of the Cantonment Authority under section 239, he shall be punishable with fine which may extend to fifty rupees, and with an additional fine which may extend to five rupees for every day after the first during which he keeps the slaughter-house open.

Penalty for opening private slaughter-house without permission.

[*Bengal Act II of 1888, s. 342, and Clause (17).*] (690.)

254. Whoever, having reason to believe that a private slaughter-house has been established after the commencement of this Code without such permission as aforesaid, carries on any trade or business in such slaughter-house shall be punishable with fine which may extend to twenty rupees, and, in case of a continuing offence, with an additional fine which may extend to three rupees for every day after the first during which the offence continues.

Penalty for using unauthorised slaughter-house.

[*Bombay Act III of 1888, s. 403, and Clause (17).*]

255. Whoever, having reason to believe that the Cantonment Authority has by notice required the closing of a private slaughter-house, carries on any trade or business in such slaughter-house after the expiry of the period specified in the said notice shall be punishable with fine which may extend to fifty rupees, and, in case of a continuing offence, with an additional fine which may extend to five rupees for every day after the first during which the offence continues.

Penalty for using private slaughter-house after notice of closure.

[*Clause (17).*] (696.)

256. Whoever causes any encroachment in or on any of the roads, passages or approaches in or to any slaughter-house shall be punishable with fine which may extend to rwenty rupees, and, in case of a continuing offence, with an additional fine which may extend to three rupees for every day after the first during which the offence continues.

Penalty for encroaching on roads, passages or approaches in or to slaughter-house.

[*Clause (17).*] (698.)

257. Whenever it appears to the Cantonment Authority to be necessary for the preservation of the public health, it may by public notice prohibit, for any period specified in the notice, or for such further period as it may from time to time by a like notice prescribe, the slaughter at a slaughter-house of any animal of a description specified in the notice.

Power to prohibit on grounds of public health the slaughter of any particular description of animal.

[*Madras Act I of 1884, s. 348, and Bombay Act III of 1888, s. 412.*] (697, 699, 700.)

258. (*1*) In any cantonment in which there is a slaughter-house lawfully existing (other than a slaughter-house maintained by the Commissariat Department), the Cantonment Authority may by public notice prohibit the slaughtering, cutting up or skinning of any animal or any specified description of animal, at any place within the cantonment other than such a slaughter-house, or the selling or offering for sale within the cantonment of the meat of any animal not slaughtered in such a slaughter-house.

Power to prohibit slaughter except at a lawful slaughter-house, and sale of meat of animal slaughtered elsewhere.

(*2*) Any meat brought into a cantonment in contravention of a notice published under sub-section (*1*) may be seized by the Cantonment Magistrate, and may be sold or otherwise disposed of as he may direct.

(*3*) Nothing in this section shall apply to the slaughter of animals on the occasion of any festival or ceremony, or to the sale of cured or preserved meat.

[*Act XVIII of 1889, s. 57.*] (704.)

259. Whenever it appears to the Cantonment Magistrate to be necessary for the preservation of the public peace or order, he may, subject to the provision of any local enactment and of any rules under any such enactment for the time being in force, and with the consent of the District Magistrate,

Power to prohibit or regulate ceremonial slaughter likely to disturb the public peace.

by public notice prohibit or regulate the slaughter, within the cantonment, of animals, or of any specified description of animals, on the occasion of any festival or ceremony, and prescribe the mode and route in and by which meat shall be conveyed from the place where such animals are slaughtered.

Powers of Entry and Inspection.

[*Clause (28).*] (856, 857.)

260. The Cantonment Magistrate, by himself or by any person authorised by him in this behalf, may, at all reasonable times,—

Powers of entry and inspection.

(*a*) enter into any private slaughter-house, or any pen, standing, enclosure or other place in any private or public slaughter-house,—

(i) for the purpose of ascertaining whether any rules made under this chapter and applicable to such slaughter-house are being obeyed, or

Cantonment Code.

(Part IV.—The Public Health, Safety and Convenience.—Chapter XVII.—Slaughter-houses.—Section 261. Chapter XVIII.—Control over certain Trades, Callings and Occupations.—Sections 262-266.)

(ii) for the purpose of expelling from such slaughter-house, or of preventing from carrying on any trade or business, or occupying any pen, standing, enclosure, building or other place therein, any person whom the Cantonment Magistrate is empowered by this chapter to so expel or prevent;

(*b*) enter into and inspect any private slaughter-house which has been established without the permission of the Cantonment Authority, or which is kept open after notice of closure has been given under this chapter; and

(*c*) enter into and inspect any building or place in which such Magistrate has reason to believe that any animal is being or is about to be slaughtered, cut up or skinned, or that the meat of any animal is being or is about to be sold or offered for sale, after such slaughter, cutting up, skinning, sale or offering for sale has been prohibited by public notice under section 258.

Application of chapter to Commissariat slaughter-houses.

[*Clause (17).*] (702.)

261. The following portions of this chapter, namely, section 240, section 241, section 242, clauses (*b*), (*c*), (*d*), (*g*), (*h*), (*i*) and (*j*), section 250, section 260, and so much of section 249 as relates to the affixing of rules in force under section 242, shall apply to slaughter-houses maintained by the Commissariat Department.

Application of chapter to Commissariat slaughter-houses.

CHAPTER XVIII. [a]

CONTROL OVER CERTAIN TRADES, CALLINGS AND OCCUPATIONS.

[*Madras Act I of 1884, s. 332, Bengal Act II of 1888, s. 346, Bombay Act III of 1888, s. 394, and Act XVIII of 1889, s. 82.*] (777, 778.)

262. (*1*) No person shall use any place within a cantonment for any of the following purposes, namely:

Licensing of offensive or dangerous trades.

(*a*) melting tallow or sulphur; or

(*b*) boiling bones, rags, offal, blood or paddy; or

(*c*) depositing or washing soiled clothes for profit; or

(*d*) as a soap-house, oil-boiling-house, dyeing-house or tannery; or

(*e*) as a brick-kiln, pottery or lime-kiln; or

(*f*) as a knacker's yard; or

(*g*) for storing fish, offal, hides, horns, hoofs, bones, skins, hair or any other thing from which offensive or unwholesome smells arise; or

(*h*) as any other manufactory or place of business from which offensive or unwholesome smells arise; or

(*i*) as a yard or depôt for trade in rags, hay, straw, thatching-grass, wood, coal or any other highly inflammable material,

except under a license granted by the Cantonment Authority.

(*2*) The Cantonment Authority may, with the sanction of the Commander-in-Chief granted with the concurrence of the Local Government, by public notice declare that sub-section (*1*) shall apply to the carrying on of any trade, calling or occupation not mentioned or referred to in that sub-section which is, in the opinion of the Cantonment Authority, dangerous to life, health or property, or likely to create a nuisance.

[*Bengal Act II of 1888, s. 368.*] (777 (*n*).).

263. No person shall use any place in a cantonment for the sale of medicines dispensed upon prescription or drugs intended to be used in the composition of such medicines, except under a license granted by the Cantonment Authority.

Licensing of shops for sale of medicines or drugs.

[*Bengal Act II of 1888, s. 335.*] (770.)

264. No person shall keep any animal for profit in a cantonment except at a place licensed by the Cantonment Authority for the purpose, or provided by the Cantonment Authority under section 270.

Places in which animals may be kept for profit.

Explanation.—The words "animal kept for profit," as used in this chapter, mean an elephant, camel, horse, pony, mule or ass, milch cow or other horned beast, sheep, lamb, goat, kid or pig, which is kept for the purpose of trade or business.

[*Act XV III of 1889, s. 82, and Clause (20).*]

265. (*1*) Every license granted under section 262, section 263 or section 264 shall specify the conditions to be observed by the licensee.

General provisions as to licenses granted under section 262, 263 or 264.

(*2*) Such licenses shall ordinarily be granted for one year, and shall be renewable annually.

(*3*) The Cantonment Authority may impose a fee not exceeding one rupee on the grant and on every renewal of any such license.

[*Clause (20).*] (770, 779, 780.)

266. The conditions to be specified in a license granted under section 262, section 263 or section 264 may include rules to provide for any of the following among other matters, namely:

Conditions to be specified in licenses granted under section 262, 263 or 264.

(*1*) in the case of any building or place which is the subject of a license—

(*a*) paving, cubical space, ventilation, light, drainage, water-supply, cleansing or over-crowding,

(*b*) all arrangements necessary for keeping the building or place in a sanitary and safe condition, and for the health and security of the residents thereof, and of persons working in, using or frequenting the same,

(*c*) the prevention of nuisance to persons residing in the neighbourhood or to the public;

(a) The object aimed at in this chapter is to give the Cantonment Authority the widest powers possible for controlling all trades or occupations which are calculated to affect injuriously either life, health or property.

Control is also provided for over a few trades in which the public convenience is specially affected.

Provision is made for a liberal use of licenses, and wide powers of inspection and search are given.

O

(*a*) in the case of any manufactory or place of business by the use of which smoke is produced—

(*a*) the height and dimensions of chimneys in connection with the furnaces or steam-boilers employed,

(*b*) the use of steam-whistles or steam-trumpets ;

(*3*) in the case of any place used for a purpose mentioned in clause (*a*), clause (*b*) or clause (*d*) of section 262—

effectually destroying or rendering harmless or inoffensive any offensive vapour or gas issuing from any boiler, mixer or other vessel, or from any room, chamber or other place ;

(*4*) in the case of a dyeing-house—

(*a*) the spreading and hanging of articles while undergoing the process of dyeing,

(*b*) the disposal of refuse material ;

(*5*) in the case of any yard or depôt referred to in clause (*i*) of section 262—

(*a*) the quantity of materials which may be stored therein or in any specified portion thereof,

(*b*) the taking of special precautions against fire ;

(*6*) in the case of any place used for the sale of medicines dispensed upon prescription or drugs intended to be used in the composition of such medicines—

(*a*) the qualification of persons employed in compounding, mixing, preparing, dispensing or selling any such medicine or drug,

(*b*) preventing the adulteration of medicines or drugs,

(*c*) preventing the sale of medicines and the use of drugs which have deteriorated or have become noxious, unwholesome, inert, lessened in efficacy or changed in operation ;

(*7*) in the case of any place used for keeping animals for profit—

(*a*) fencing,

(*b*) the number of animals which may be kept,

(*c*) feeding,

(*d*) all arrangements necessary to ensure the keeping of the animals and the produce thereof in a healthy condition and fit for human consumption or use, as the case may be,

(*e*) the combination of human dwellings with any such place,

(*f*) the letting for hire of any animal which through infirmity of temper or for any other reason is dangerous to the person using it or to passers-by.

[*Madras Act I of 1884, s. 332.*] (786.)

Power to refuse a license.

267. (*1*) The Cantonment Authority may in any case, in its discretion, refuse to grant or renew a license under section 262, section 263 or section 264.

(*2*) Every order refusing to grant a license shall be in writing, and shall set forth the grounds on which it is made.

Power to prohibit or regulate offensive or dangerous trade.

[*Act XV III of 1889, s. 83.* (784.)]

268. If it is shown to the satisfaction of the Cantonment Authority that any place licensed under section 262 is a nuisance to the neighbourhood, or likely to be dangerous to life, health or property, the Cantonment Authority may by notice require the occupier of the place to discontinue the use thereof for the purpose for which it was licensed, or to use the place in such manner as will in the opinion of the Cantonment Authority render it no longer a nuisance or dangerous.

Power to provide places for carrying on of offensive or dangerous trades.

[*Clause (20).*] (781.)

269. The Cantonment Authority may provide places for the carrying on of any trade, calling or occupation mentioned or referred to in section 262,

and may build and maintain upon any such place such buildings, and make, alter and maintain such pens, standings, enclosures, fences, drains, roads, passages and approaches therein and therefor, as it considers necessary for the purposes of such place,

and may permit the use of such places upon such terms and conditions and by such persons as to it may seem proper.

Public stables, sheds and standings for animals kept for profit.

[*Bengal Act III of 1884, s. 264.*] (771.)

270. The Cantonment Authority may provide and maintain public stables, sheds or standings for the accommodation of animals kept for profit, and may charge reasonable fees for the use thereof.

Penalty for carrying on certain trades or callings without a license, except at places provided by the Cantonment Authority.

[*Bengal Act III of 1884, s. 273 (2), and Clause (20).*] (782.)

271. (*1*) Whoever carries on any trade, calling or occupation mentioned or referred to in section 262 without a license granted under that section, except in a place provided by the Cantonment Authority for the purpose under section 269, and whoever uses any place for any purpose mentioned in section 263 without a license granted under that section,

shall be punishable with fine which may extend to fifty rupees, and, in case of a continuing offence, with an additional fine which may extend to five rupees for every day after the first during which the offence continues.

[*Bengal Act II of 1888, s. 336.*] (772, 773.)

(*2*) If any animal is kept at any place in contravention of section 264, the person keeping the animal, and the grantee, owner or occupier of the land or building on which it is kept, shall be punishable with fine which may extend to fifty rupees, and, in case of a continuing offence, with an additional fine which may extend to five rupees for every day after the first during which the offence continues.

Penalty for breach of conditions of license.

[*Bengal Act III of 1884, s. 273 (3), and Clause (20).*] (774, 785.)

272. If the holder of a license granted under section 262, section 263 or section 264 commits any breach of the conditions of the license, he shall be punishable with fine which may extend to fifty rupees, and, in case of a continuing breach, with an additional fine which may extend to five rupees for every day after the first during which the breach continues.

[*Bombay Act III of 1888, s. 384 (c), and Clause (20).*] (775, 776.)

Penalty for feeding certain animals on filth, or dealing with filth for that purpose, or permitting certain animals to graze in prohibited place.

273. (*1*) Whoever feeds with night-soil, dung, stable-litter, refuse or any other deleterious or offensive matter any animal which is kept for dairy purposes or may be used for food, or suffers or permits any such animal to be fed with or to feed upon any such matter, or

wilfully feeds or waters any such animal with any substance or liquid which would result in injury to the health of human beings, or wilfully suffers or permits any such animal to be fed or watered with, or to feed upon or drink, any such substance or liquid, or

sells, buys, disposes of or procures any such matter, substance or liquid as aforesaid for the purpose of being consumed by any such animal, or

suffers or permits any such animal to graze on land on which grazing has for sanitary reasons been prohibited,

shall be punishable with fine which may extend to fifty rupees, or with imprisonment for a term which may extend to eight days, and, in case of a continuing offence, with an additional fine which may extend to five rupees for every day after the first during which the offence continues.

(*2*) Articles in respect of which a conviction has been obtained under this section shall be dealt with under the provisions of section 517 of the Code of Criminal Procedure, 1882.

X of 1882.

[*Act XX of 1891, s. 137.*]

XIII of 1889.

Power to regulate manufacture, preparation and sale of food and drink.

274. (*1*) The Cantonment Authority may make rules, consistent with the Cantonments Act, 1889, and this Code, to provide for all or any of the following matters, namely :

(*a*) prohibiting the manufacture or preparation for sale of any specified articles of food or drink in any premises not licensed by the Cantonment Authority ;

(*b*) regulating the grant and withdrawal of licenses to premises for the manufacture or preparation for sale of such specified articles of food or drink ;

(*c*) regulating the hours and manner of transport within the cantonment of any specified articles of food or drink ;

(*d*) fixing the places in which meat, milk, butter, bread, aërated waters, ginger-beer, ice or any other article of food or drink specified in the rules may be sold or exposed for sale, or the places in which any such article may not be sold or exposed for sale :

(*2*) Provided that no person shall be punishable for breach of any rule made under clause (*a*) or clause (*d*) of sub-section (*1*) by reason of the continuance of such manufacture, preparation or exposure for sale, or sale, upon any premises which are at the time of the making of such rule used for such purpose, until he has received from the Cantonment Authority six months' notice in writing to discontinue such manufacture, preparation or exposure for sale, or such sale, in such premises.

(*3*) This section shall not take effect in any cantonment until it has been specially extended thereto by the Local Government at the request of the Cantonment Authority.

[*Act XX of 1891, ss. 143 (a), (b).*] (777 (*b*), 780 (*g*).)

Power to make rules as to vehicles, boats, animals and coolies plying for hire.

275. The Cantonment Authority may make rules, consistent with the Cantonments Act, 1889, and this Code, to provide for all or any of the following matters, namely :

(*a*) rendering licenses necessary for the proprietors or drivers of vehicles (other than hackney-carriages), boats or animals kept or plying for hire within the cantonment, and fixing the fees payable for such licenses and the conditions on which they are to be granted and may be revoked ;

(*b*) limiting the rates which may be demanded for the hire of any vehicle (other than a hackney-carriage) or boat, or of animals hired to carry loads, or for the services of persons hired to carry loads, and the loads to be carried by such vehicles, animals or persons, when hired within the cantonment for a period not exceeding twenty-four hours, or for a service which would ordinarily be performed within twenty-four hours.

[*Act XX of 1891, ss. 145, 146.*]

Procedure in making rules under section 274 or 275.

276. (*1*) Where there is a Cantonment Committee, rules under section 274 or section 275 may be made only at a special meeting.

(*2*) In making any rule under section 274 or section 275, the Cantonment Authority may direct that a breach of it shall be punishable with fine which may extend to twenty rupees, and, when the breach is a continuing breach, with an additional fine which may extend to three rupees for every day after the first during which the breach continues.

(*3*) No rule made under section 274 or section 275 shall come into force until it has been confirmed by the Commander-in-Chief and notified by public notice.

[*Act XV III of 1889, s. 116.*] (791, 792, 868 (*2*).)

Penalty for selling food or drink of a nature different from that demanded.

277. (*1*) Whoever sells to the prejudice of any purchaser any article of food or drink for human consumption which is not of the nature, substance or quality of the article demanded by such purchaser shall be punishable with fine which may extend to fifty rupees.

(*2*) The provisions of sub-section (*1*) shall not apply in the following cases, namely :

(*a*) when any matter or ingredient not injurious to health has been added to the food or drink in order to make the food or drink fit as an article of commerce for carriage or consumption, and not with intent fraudulently to increase the bulk, weight or measure of the food or drink or to conceal the inferior quality thereof ; or

(*b*) when the food or drink is unavoidably mixed with some extraneous matter in the process of collection or preparation.

(*3*) The provisions of this section apply to the purchase under section 285 of any article for the purpose of analysis.

Cantonment Code.

(Part IV.—The Public Health, Safety and Convenience.—Chapter XVIII.—Control over certain Trades, Callings and Occupations.—Sections 278-284.)

[*Madras Act III of 1888, s. 66.*] (906.)

278. Whoever without the knowledge and consent of the owner buys any article from any child apparently under the age of fourteen years, or takes any article as a pawn, pledge or security for any sum of money lent or advanced to any such child, shall be punishable with fine which may extend to fifty rupees.

Penalty for buying or taking pledge from child.

[*Madras Act III of 1888, s. 28.*] (907.)

279. (*1*) The Cantonment Magistrate may deliver to any pawnbroker, money-changer, dealer in second-hand property or worker in metals a list of any property believed to have been stolen, and thereupon it shall be the duty of such pawnbroker, money-changer, dealer or worker as aforesaid, upon any article answering the description of any property set forth in such list being offered to him in pawn, for exchange or sale, or otherwise, to—

Power to compel pawnbrokers and others to watch for stolen property.

(*a*) inquire the name and address of the person offering the article;

(*b*) seize and detain the article; and

(*c*) forthwith communicate to the police the fact of the article having been offered, and such name and address as may be given by the person offering it.

(*2*) Any pawnbroker, money-changer, dealer or worker as aforesaid failing without reasonable excuse to comply with the requirements of this section shall be punishable with fine which may extend to fifty rupees.

(*3*) Any pawnbroker, money-changer, dealer or worker as aforesaid may detain any person offering any such article as aforesaid pending the arrival of the police.

[*Clause (20).*] (777 (*2*), 780 (*10*).)

280. The Cantonment Authority may by notice require any brothel to be removed.

Power to remove brothels.

Powers of Entry and Inspection.

[*Clause (28).*] (862, 863.)

281. The Cantonment Magistrate, by himself or by any person authorised by him in this behalf, may, at all reasonable times, enter into and inspect—

Power to enter and inspect certain places.

(*a*) any place used for any of the purposes mentioned in section 262, sub-section (*1*), or for the purpose of carrying on any trade, calling or occupation in respect of which a notice has been issued under section 262, sub-section (*2*), or

(*b*) any place used for the sale of medicines dispensed upon prescription or drugs intended to be used in the composition of such medicines, or

(*c*) any place used for the purpose of keeping an animal for profit, or

(*d*) any place in which the Cantonment Magistrate has reason to believe that any animal is being fed or watered in contravention of section 273.

[*Bombay Act III of 1888, s. 414.*] (866.)

282. It shall be the duty of the Cantonment Authority to make provision for the constant and vigilant inspection of animals, carcasses, meat, poultry, game, fish, fruit, vegetables, corn, bread, flour, milk, ghee, butter and any other article exposed or hawked about for sale, or deposited in or brought to any place for the purpose of sale or preparation for sale, and intended for human food or for medicine, and

Cantonment Authority to provide for inspection of food and medicine exposed for sale.

in all cases of dispute the burden of proof that the same was not exposed or hawked about, or deposited or brought for any such purpose, or was not intended for human food or for medicine, shall lie on the person charged.

[*Bombay Act III of 1888, s. 415, and Clause (28).*] (865, 867.)

283. (*1*) The Cantonment Magistrate, by himself or by any person authorised by him in this behalf, may at all reasonable times inspect and examine any such animal or article as aforesaid, and any utensil, vessel or thing used for preparing, manufacturing, containing or covering any such article.

Seizure of unwholesome food, medicine, utensils, &c.

(*2*) If any such animal or article appears to such Magistrate or person to be diseased or unsound or unwholesome or unfit for human food or for medicine, as the case may be, or to be not what it is represented to be, or

if any such utensil, vessel or thing is of such kind or in such state as to render any article prepared, manufactured or contained therein or covered thereby unwholesome or unfit for human food or for medicine, as the case may be,

he may seize the same.

Explanation.—Meat which has been subjected to the process of blowing is unfit for human food. [*Bengal Act II of 1888, s. 365.*]

[*Bengal Act III of 1884, s. 251O.*] (867.)

284. (*1*) When any animal or any article intended for human food or for medicine is seized under section 283, the person seizing it may, if the owner or the person in whose possession it was found consents, forthwith destroy the same or so dispose of it as to prevent its being used as food or medicine.

Disposal of things seized.

[*Bombay Act III of 1888, s. 417, and Act XVIII of 1889, s. 117.*] (867, 869.)

(*2*) When any animal or any article intended for human food or medicine is seized under section 283, and the owner or the person in whose possession the same was found does not consent to its destruction or disposal as aforesaid,

and when any utensil, vessel or thing used for preparing, manufacturing, containing or covering any such article is seized under that section,

the person seizing the same shall forthwith remove it, and cause it to be brought before the Cantonment Magistrate in his judicial capacity;

and, if it appears to such Magistrate that any such animal or article is diseased or unsound or unwholesome or unfit for human food or for medicine, as the case may be, or is not what it was represented to be, or that any such utensil, vessel or thing is of such kind or in such state as aforesaid,

he shall cause the same to be destroyed or disposed of, at the charge of the owner or the person in whose possession it was found, in such manner as to prevent the same being again exposed or hawked about for sale or used for human food or for medicine or for the preparation or manufacture of, or for containing or covering, any such article as aforesaid; and may punish such owner or person with fine which may extend to fifty rupees:

Provided that no person who is in possession of any animal or any article or thing as aforesaid as a carrier or bailee thereof shall be liable to fine under this section.

Cantonment Code.

(Part IV.—The Public Health, Safety and Convenience.—Chapter XVIII.—Control over certain Trades, Callings and Occupations.—Section 285. Chapter XIX.—Hospitals.—Sections 286-292).

[*Act XVIII of 1889, ss. 65 (2) and 118.*] (868, 870.)

285. (*1*) If the Cantonment Magistrate, or any person authorised by him under section 283, applies to purchase any article of food or drink exposed for sale, and tenders the price for a quantity such as may be reasonably requisite for the purpose of analysis, the person exposing the same for sale shall be bound to sell such quantity.

Power to purchase food or drink for analysis.

(*2*) Whoever, contrary to the provisions of sub-section (*1*), refuses to sell any article of food or drink shall be punishable with fine which may extend to fifty rupees.

CHAPTER XIX. [a]

HOSPITALS.

Cantonment General Hospitals and Dispensaries.

[*Clause (21).*] (550.)

286. The Cantonment Authority shall, if and so far as the funds placed at its disposal for the purpose permit, provide and maintain a general hospital or dispensary where the sick poor of the cantonment shall be entitled to receive medical treatment free of charge; or

Maintenance of general hospitals or dispensaries for the sick poor.

it may, with the previous sanction of the Commander-in-Chief, give such grant from the Cantonment Fund as to it may seem proper, upon such terms as it may think fit to impose, in aid of any hospital or dispensary not maintained by the Cantonment Authority at which the sick poor of the cantonment are entitled to receive medical treatment free of charge:

Provided that, without the concurrence of the Local Government, no grant-in-aid to a hospital or dispensary shall be withdrawn or changed in amount, and no alteration shall be made in the terms upon which any such grant-in-aid is made.

[*Clause (21).*] (551.)

287. Any persons, other than the sick poor of the cantonment, who, in the opinion of the Cantonment Authority or the Cantonment Magistrate, are fit objects of public charity, may, by written order of the Cantonment Authority or the Cantonment Magistrate, be treated free of charge in any hospital or dispensary maintained or aided under section 286.

Free treatment of pauper strangers in such hospitals.

[*Clause (21).*] (552.)

288. Any person, whether resident in the cantonment or not, who is not, in the opinion of the Cantonment Authority or the Cantonment Magistrate, a fit object of public charity, may, upon such terms as the Cantonment Authority may think fit to impose, obtain medical treatment in any hospital or dispensary maintained or aided under section 286:

Treatment of paying patients in such hospitals.

Provided that any charges incurred in respect of such persons shall be reimbursed by them.

Hospitals for infectious or contagious disorders.

[*Clause (21).*] (561.)

289. (*1*) As many hospitals (if any) as may be necessary within or without the cantonment, as the Cantonment Authority, with the concurrence of the District Magistrate, may determine, shall be maintained at the expense, wholly or in part, of the Cantonment Fund for the treatment of persons suffering from infectious or contagious disorders.

Maintenance of hospitals for infectious or contagious orders.

(*2*) A hospital for the treatment of persons suffering from infectious or contagious disorders may form part of a general hospital provided under section 286.

[*Clause (21).*] (565, 566.)

290. (*1*) Every person admitted to a hospital for infectious or contagious disorders shall be treated gratuitously, and if he is without means of support, and either is a resident of the cantonment or was admitted to the hospital on the request or with the consent of the Cantonment Authority, he shall receive from the Cantonment Fund such subsistence allowance, not being less than the lowest allowance for the time being fixed by the Local Government under section 338 of the Code of Civil Procedure, as the Cantonment Authority may determine.

Gratuitous treatment and subsistence allowance in such hospitals.

XIV of 1882.

(*2*) Such subsistence allowance shall be paid, either daily or at such periods in arrear as may be ordered by the Cantonment Authority, in the presence of the medical officer in charge of the hospital, who shall certify monthly to the Cantonment Authority that the allowance has been so paid.

(*3*) A table of the authorised subsistence allowances in English and the vernacular shall be affixed to some conspicuous spot in every ward of every hospital to which the table relates.

[*Bombay Act III of 1888, s. 424.*] (572, 573.)

291. (*1*) Where a hospital is maintained by the Cantonment Authority for the treatment of infectious or contagious disorders, the Cantonment Magistrate may, on a certificate signed by a medical officer of the Government or by a medical practitioner, direct or cause the removal to the hospital of any person suffering from such a disorder, who, in the opinion of such medical officer or practitioner, is without proper lodging or accommodation where precautions could be taken to prevent the spreading of the disorder by such person.

Removal of infected person to hospital.

(*See 38 & 39 Vict., c. 55, s. 124.*)

(*See 53 & 54 Vict., c. 34, s. 12.*)

(*2*) Such direction may be given to the person suffering from the disorder or to any person in charge of or in attendance on him.

Explanation.—The occupation of a room in a sarai or in the enclosure of a temple, or within the limits or in the neighbourhood of a fair-ground or market or other place of public resort, may amount to being without proper lodging or accommodation.

[*Clause (21).*]

292. (*1*) The Cantonment Magistrate may by order in writing direct that

Detention of infected person in hospital.

(a) The sections of this chapter and Chapter XXI dealing with hospitals and the treatment of infectious or contagious disorders are based on precedents in English and Indian Acts and practice. The English Acts referred to are the Public Health Act, 1875, the Infectious Disease (Prevention) Act, 1876, and the Infectious Disease (Prevention) Act, 1890; the Indian Acts are the Indian Penal Code, the Bombay Sanitary Regulation Act, 1867, the City of Bombay Municipal Act, 1888, the Calcutta Municipal Consolidation Act, 1888, the City of Madras Municipal Act, 1884, and the Madras District Municipalities Act, 1884. No reference has been made to the various Contagious Diseases Acts recently repealed. Special attention has been paid to the use of suspected milk and the washing of suspected clothing, and also to the making and sale of clothing and bedding by infected persons.

The provisions of Government of India Notification No. 617, dated the 4th July 1890, published in the *Gazette of India*, 1890, Part I, page 489, have been incorporated in this chapter and Chapter XXXIV.

any person removed under section 291 to a hospital for infectious or contagious disorders, or

any person suffering from an infectious or contagious disorder, who is then in such a hospital, and who would not, on leaving the hospital, be provided with proper lodging or accommodation where precautions could be taken to prevent the spreading of the disorder by such person,

(*See 53 & 54 Vict., c. 34, s. 12.*)

shall be detained in the hospital for any period specified in the order.

(*2*) No order shall be made under this section except upon the advice of the medical officer in charge of the hospital.

Hospitals generally, and Dispensaries.

[*Clause* (21).] (554, 563.)

293. A medical officer, to be appointed in such manner as the Governor General in Council may direct, shall be in charge of all hospitals and dispensaries maintained by the Cantonment Authority under this chapter.

Medical officer.

[*Clause* (21).] (564.)

294. For each hospital maintained by the Cantonment Authority under this chapter there shall be appointed a hospital assistant and, with the previous sanction of the Commander-in-Chief, such other subordinate establishments as the Cantonment Authority may consider necessary.

Medical subordinates.

[*Clause* (21).] (553.)

295. So far as the funds placed at its disposal for the purpose permit, the Cantonment Authority shall

Medical supplies, hospital furniture and diet.

furnish every hospital and dispensary maintained by it under this chapter with all necessary drugs, instruments, apparatus, furniture and appliances on a scale to be approved by the Local Government, and

provide every such hospital with a sufficient quantity of cots, bedding and clothing for in-patients admitted into the hospital.

[*Clause* (21).] (555.)

296. (*1*) Every hospital and dispensary maintained by the Cantonment Authority under this chapter shall be maintained in accordance with the rules made generally or specially by the Governor General in Council or the Local Government for the conduct of hospitals and dispensaries respectively, or in accordance with the said rules modified in such manner as the Governor General in Council or the Local Government may think proper.

Regulation of hospitals and dispensaries and notification of hospital rules.

(*2*) A copy of such of the said rules as affect the patients, inmates or visitors in, of or to any hospital or dispensary shall be affixed in English and the vernacular to some conspicuous spot in each ward or room thereof.

(*3*) Until such copies have been so affixed in a ward or room, no patient, inmate or visitor in, of or to that ward or room shall be dealt with for disobeying any such rule.

[*Clause* (21).] (557.)

297. Whoever, being a patient, inmate or visitor in, of or to any such ward or room, disobeys any rule made as aforesaid and affecting him may, under the orders of the medical officer in charge of the hospital or dispensary, or of any other person authorised by the Cantonment Authority in this behalf, be summarily removed from the hospital or dispensary and from the land on which the same is situated.

Power to expel patients and others disobeying hospital rule.

[*Clause* (21).] (558.)

298. Whoever, having been removed from a hospital or dispensary under section 297, again enters, or attempts to enter therein or on, the land on which the same is situated without the permission of the medical officer in charge shall be punishable with fine which may extend to fifty rupees.

Penalty for re-entry after expulsion.

[*Madras III of 1888, s.* 68.] (559.)

299. Whoever introduces, or attempts to introduce, without the permission of the medical officer in charge, or throws, or attempts to throw, into any hospital maintained by the Cantonment Authority under this chapter any spirituous or fermented liquor or intoxicating drug or preparation, shall be punishable with fine which may extend to fifty rupees.

Penalty for introducing liquor or drug into hospital.

CHAPTER XX. (a)

INOCULATION AND VACCINATION.

Preliminary.

[*Clause* (31).] (944.)

300. This Chapter shall not apply to any cantonment situate in the territories administered respectively by the Lieutenant-Governors of Bengal, the North-Western Provinces and the Punjab, and the Chief Commissioners of Oudh, the Central Provinces, Burma, Assam, Ajmere and British Baluchistan.

Certain cantonments excluded from operation of chapter.

[*Bombay Act I of 1877, s.* 2, *and Act XIII of 1880, s.* 2. (946—950, 954.)

301. In this chapter, unless there is something repugnant in the subject or context,—

Definitions.

(*1*) "parent" means, in the case of a legitimate child, either the father or the mother, and, in the case of an illegitimate child, the mother only;

(*2*) "guardian" includes any person who has accepted or assumed the care or custody of a child;

(*3*) "unprotected child" means a child who has not been protected from small-pox by having had that disease, either naturally or by inoculation, or by having been successfully vaccinated, and who has not been certified under this chapter to be insusceptible to vaccination;

(*4*) "vaccinator" means any vaccinator appointed under this chapter to perform the operation of vaccination, or any private person authorised by the Local Government in the manner hereinafter provided to perform the same operation; and includes a "superintendent of vaccination;" and

(*5*) "vaccination-season" means the period from time to time fixed by the Local Government for any cantonment to which this chapter applies by notification in the official Gazette during which alone vaccination may be performed.

(a) This chapter will prohibit inoculation and make vaccination compulsory in every cantonment in the Madras and Bombay Presidencies, the procedure being based on existing Vaccination Acts. For every other province in British India provision has been made by the Legislature in Bengal Acts IV of 1865 and V of 1880 and Act XIII of 1880, which can be brought into force in any cantonment by notification in the Gazette.

Inoculation.

[*Bombay Act IV of 1879, s.* 20.] (951.)

302. Whoever produces, or attempts to produce, in any person by inoculation with variolous matter, or by wilful exposure to variolous matter, or to anything impregnated therewith, the disease of small-pox, and

Penalty for inoculating with small-pox.

whoever wilfully by any other means produces the disease of small-pox in any person,

shall be punishable with fine which may extend to fifty rupees, or with imprisonment for a term which may extend to eight days.

[*Bombay Act IV of 1879, s.* 20.] (952.)

303. Whoever, having been inoculated with small-pox, or in whom the disease of small-pox has been produced in any such manner as aforesaid, enters any cantonment to which this chapter applies before the lapse of forty days from the date of such inoculation or production of small-pox, or without a certificate from a medical officer of the Government, or from a medical practitioner, or from such person as the Local Government may, by notification in the official Gazette, authorise to grant such certificates, stating that he is no longer likely to produce small-pox by contact or near approach, and

Penalty for entering cantonment after inoculation.

whoever, having the charge or control of any person who has been inoculated with small-pox, or in whom the disease of small-pox has been produced as aforesaid, knowingly, within such period or without such certificate as aforesaid, brings such person into, or causes or permits him to enter, any such cantonment,

shall be punishable with fine which may extend to fifty rupees.

Vaccination.

[*Act XIII of 1880, ss.* 7 *and* 8.] (955, 957.)

304. (*1*) Every cantonment to which this chapter applies shall be a vaccination-circle, or shall, in the manner hereinafter provided, be divided into a number of such circles, and as many vaccinators and superintendents of vaccination shall be appointed for such circles by such authority, and subject to such conditions, as the Local Government may think fit.

Vaccination-circles, and appointment of vaccinators and superintendents of vaccination.

(*2*) The Local Government may, by written license, authorise private vaccinators to perform vaccination in any cantonment to which this chapter applies, and may suspend or cancel any such license.

[*Act XIII of 1880, s.* 9.] (958.)

305. (*1*) When any unprotected child, having attained the age of six months, has resided for a period of one month during the vaccination-season in any cantonment to which this chapter applies, and has not at the expiration of such period attained the age, if a boy, of fourteen years, or, if a girl, of eight years, the parent or guardian of such child shall take it, or cause it to be taken, to a vaccinator to be vaccinated, or send for a vaccinator to vaccinate it.

Compulsory vaccination of unprotected children.

(*2*) Such vaccinator shall vaccinate the child with all reasonable despatch, and shall deliver to its parent or guardian a memorandum, in such form as the Local Government may prescribe, stating the date on which the vaccination has been performed and the date on which the child is to be inspected in order to ascertain the result of the operation; or

shall, if he finds such child in a state unfit for vaccination, deliver to its parent or guardian a certificate under his hand, in such form as the Local Government may prescribe, to the effect that the child is in a state unfit for vaccination for the whole or part of the current vaccination-season.

[*Act XIII of 1880, s.* 10.] (959.)

306. The parent or guardian of every child which has been vaccinated under section 305 shall, on the date of inspection stated in the memorandum, take the child, or cause it to be taken, to a vaccinator for inspection, or get it inspected at his own house by a vaccinator; and

Inspection after vaccination.

such vaccinator shall append to the memorandum a certificate, in such form as the Local Government may prescribe, stating that the child has been inspected and the result of the inspection.

[*Act XIII of 1880, s.* 11.] (960.)

307. If it is ascertained at the time of inspecting a child under section 306 that the vaccination has been successful, a certificate, in such form as the Local Government may prescribe, shall be delivered by the vaccinator to the parent or guardian of the child to that effect, and the child shall thereafter be deemed to be protected.

Procedure when vaccination is successful.

[*Act XIII of 1880, s.* 12.] (961.)

308. If it is ascertained as aforesaid that the vaccination has been unsuccessful, the parent or guardian shall, if the vaccinator so directs, cause the child to be forthwith again vaccinated, and subsequently inspected in the manner hereinbefore provided.

Procedure when vaccination is unsuccessful.

[*Act XIII of 1880, s.* 13.] (962.)

309. A certificate granted under section 305 showing the unfitness of a child for vaccination shall remain in force for the period stated therein, and on the termination of that period, or, if that period terminates after the vaccination-season is over, when the next vaccination-season begins, the parent or guardian of the child shall take it, or cause it to be taken, to a vaccinator to be vaccinated, or procure its vaccination at his own house by a vaccinator:

Procedure when child has been certified to be unfit for vaccination.

Provided that, if the child is still found to be in a state unfit for vaccination, the certificate granted under section 305 shall be renewed.

[*Act XIII of 1880, s.* 14.] (963.)

310. If a superintendent of vaccination is of opinion that a child which has been three times unsuccessfully vaccinated is insusceptible of successful vaccination, he shall deliver to the parent or guardian of the child a certificate under his hand, in such form as the Local Government may prescribe, to that effect, and the parent or guardian shall thenceforth not be required to cause the child to be vaccinated.

Certificate of insusceptibility of successful vaccination.

[*Act XIII of 1880, s.* 17.] (966.)

311. Every superintendent of vaccination shall ascertain whether all unprotected children under the age of fourteen years

Search for unprotected children.

if boys, and under the age of eight years if girls, within the local area under his superintendence have been vaccinated; and,.

if he has reason to believe that the parent or guardian of any such child is bound by the provisions of this chapter to procure the vaccination of the child or to present it for inspection, and has omitted so to do, he shall personally go to the house of such parent or guardian and there make inquiry, and shall, if the fact is proved, forthwith deliver to the parent or guardian, or cause to be affixed to his house, a notice requiring that the child be vaccinated, or (as the case may be) that it be presented for inspection, at a time and place to be specified in the notice.

[*Act XIII of 1880, s. 18.*] (967.)

Cantonment Magistrate's order requiring child to be vaccinated.

312. If such notice is not complied with, the superintendent of vaccination shall report the matter to the Cantonment Magistrate, who shall thereupon by notice require the parent or guardian of the child to make an explanation, and shall, if such explanation is not satisfactory, make an order in writing directing such parent or guardian to comply with the notice of the superintendent before a date to be specified in the order.

[*Act XIII of 1880, s. 15.*] (964.)

Regulation of the use of lymph.

313. The vaccination of a child shall ordinarily be performed with such lymph as may be prescribed by rules made under section 316:

Provided that—

(*a*) if animal-lymph is so prescribed, and the parent or guardian of any child desires that the child should be vaccinated with human-lymph, the child shall be so vaccinated; and

(*b*) if, where animal-lymph is procurable, human-lymph is so prescribed, and the parent or guardian of any child desires that the child should be vaccinated with animal-lymph, the child shall be so vaccinated.

[*Act XIII of 1880, s. 16.*] (965.)

Fees not chargeable by public vaccinators.

314. No fee shall be charged by any vaccinator, or, except a private vaccinator, to the parent or guardian of any child for any of the duties imposed on the vaccinator by or under this chapter.

[*Madras Act IV of 1884, s. 139.*] (968.)

Females not to be compelled to appear in public.

315. If the parent or guardian of any child be a female, nothing in this chapter shall be held to compel her to appear in public against the custom of her class, or to have the child vaccinated elsewhere than in her own house.

[*Act XIII of 1880, ss. 21, 22.*] (969, 970.) XIII of 1889.

Power to make rules as to vaccination.

316. (*1*) The Cantonment Authority may make rules, consistent with the Cantonments Act, 1889, and this Code, to provide for all or any of the following matters, namely:

(*a*) the division of the cantonment into circles for the performance of vaccination;

(*b*) the appointment of a place in each vaccination-circle to be a public vaccine-station, and the posting of some distinguishing mark in a conspicuous place near such station;

(*c*) the time of attendance of public vaccinators at vaccine-stations;

(*d*) the distinguishing mark or badge to be worn by public vaccinators;

(*e*) the amount of fee chargeable by private vaccinators, and their guidance generally in the performance of their duties;

(*f*) the facilities to be afforded to the people for procuring the vaccination of children at their own houses;

(*g*) the nature of the lymph to be used and the supply of a sufficient quantity of such lymph;

(*h*) the preparation and keeping of registers showing—

(*i*) the names of children born in the cantonment after the commencement of this Code;

(*ii*) the names of unprotected children born in the cantonment before the commencement of this Code, and who are at the commencement of this Code under the age of fourteen years if boys, and of eight years if girls;

(*iii*) the names of unprotected boys and girls, respectively, under those ages brought within the cantonment at any time after the commencement of this Code, and who have resided there for one month; and

(*iv*) the result of each vaccination or its postponement, and the delivery of certificates;

(*i*) the assistance to be given by the servants of the Cantonment Authority in the preparation of the aforesaid registers and in other matters; and

(*j*) the preparation of vaccination reports and returns.

(*2*) Where there is a Cantonment Committee, rules under this section may be made only at a special meeting.

(*3*) No rule made under this section shall come into force until it has been confirmed by the Commander-in-Chief and the Local Government and notified by public notice.

(*4*) Whoever disobeys any rule made under this section shall be punishable with fine which may extend to twenty rupees.

[*Bengal Act V of 1880, s. 28, and Clause (21).*] (971.)

Penalty for neglecting to have child inspected.

317. Whoever, being the parent or guardian of a child, and bound by any provision of this chapter to produce the child for inspection, without reasonable excuse neglects or refuses so to do, shall be punishable with fine which may extend to fifty rupees; and

the Cantonment Magistrate may, if a superintendent of vaccination so advises, by written order, direct such parent or guardian to forthwith cause the child to be vaccinated, or to take such other measure therewith, consistent with this chapter, as may be specified in the order:

Provided that no prosecution under this section shall be instituted after the expiry of twelve months from the date on which the offence was committed.

[*Act XIII of 1880, s. 22, and Clause (21).*]

Penalty for disobeying order under section 312 or section 317.

318. Whoever without just cause neglects to obey an order made under section 312 or section 317 shall be punishable with fine which may extend to twenty rupees.

[*Bengal Act V of 1880, s. 29, and Clause (21).*] (976.)

Penalty for obstructing vaccinator in his duties.

319. (*1*) Whoever voluntarily obstructs any vaccinator in the discharge of the duties assigned to him as such shall be punishable with fine which may extend to fifty rupees.

(*2*) Whenever any person who has been fined for an offence against sub-section (*1*) again commits such an offence, he may be punished, in lieu of fine, with imprisonment for a term which may extend to eight days.

[*Clause (21).*] (974.)

Penalty for false answer to enquiries of superintendent of vaccination.

320. If the parent or guardian of any child fails to answer, or knowingly makes a false answer to, any question put to him by a superintendent of vaccination as to the fact of the child's having been protected from small-pox, he shall be punishable with fine which may extend to twenty rupees.

[*Bombay Act I of 1877, s. 23, and Clause (21).*] (972.)

Offences by vaccinators.

321. (*1*) If any vaccinator bound by any provision in this chapter to do any of the following things, that is to say:—

(*a*) to vaccinate any child,

(*b*) to deliver any memorandum or certificate to the parent or guardian of any child, or

(*c*) to inspect any child,

neglects or unreasonably refuses so to do, he shall be punishable with fine which may extend to fifty rupees.

(*2*) If any vaccinator—

(*a*) causes, or attempts to cause, the vaccination of a protected child, or of a child in respect of whom a certificate has been delivered to any person under section 310, or

(*b*) vaccinates, or attempts to vaccinate, any child in contravention of section 313,

he shall be punishable with fine which may extend to fifty rupees.

[*Bombay Act I of 1877, s. 25.*] (972 (*c*).)

Public vaccinator accepting illegal fee or remuneration.

322. If any public vaccinator accepts or obtains, or agrees to accept or attempts to obtain, from any parent or guardian any fee or remuneration for any of the duties imposed on the vaccinator by or under this chapter, he shall be deemed to have committed an offence punishable under section 161 of the Indian Penal Code. XLV of 1860.

[*Bombay Act I of 1877, s. 21, proviso, and Clause (21).*] (973.)

Offences by superintendent of vaccination.

323. (*1*) If any superintendent of vaccination—

(*a*) neglects to ascertain whether an unprotected child has been vaccinated within the local area under his superintendence, or

(*b*) neglects to make any report which he is bound by section 312 to make, or

(*c*) makes a report under section 312 without having reasonable grounds therefor,

he shall be punishable with fine which may extend to fifty rupees.

(*2*) Whenever any fine is imposed for an offence mentioned in clause (*c*) of sub-section (*1*), the Cantonment Magistrate may grant the whole or such portion of the amount realised, as he may think fit, as compensation to any person appearing to him to have been injuriously affected by the report referred to in that clause.

[*Bombay Act I of 1877, s. 24, and Clause (21).*] (975, 977.)

Penalty for falsifying certificate.

324. Whoever wilfully signs or makes, or procures the signing or making of, any false certificate or memorandum purporting to be signed or made under this chapter shall be punishable with fine which may extend to fifty rupees.

[*Clause (21).*] (972, 973, 975.)

Fines imposed on vaccinators to be in addition to other penalties.

325. Any fine imposed under section 321, section 323 or section 324 on a vaccinator or superintendent of vaccination who has committed an offence may be in addition to, or in lieu of, any penalty prescribed for that offence by the Local Government in the conditions of his appointment or in the terms of his license, as the case may be.

Powers of Entry and Inspection.

[*Clause (28).*] (978.)

Power to enter and inspect in case of breach of provisions as to inoculation.

326. The Cantonment Magistrate, by himself or by any person authorised by him in this behalf, may, at all reasonable times, enter into and inspect any building or land wherein or whereon such Magistrate has reason to believe that—

(*a*) any operation for inoculating any person with small-pox is being, or is about to be, carried on, or

(*b*) there is any person who has been inoculated with small-pox, or in whom the disease of small-pox has been produced, and who has entered or been brought into the cantonment in contravention of section 303.

CHAPTER XXI. [a]

FURTHER PROVISIONS FOR PREVENTING THE SPREAD OF INFECTIOUS DISORDERS.

[*Clause (21).*] (570.)

Medical officers to report existence of infectious disorder.

327. It shall be the duty of every medical officer of the Government to give information to the Cantonment Magistrate and the Cantonment Authority of the existence of any infectious disorder in the cantonment or its neighbourhood of which he becomes cognizant.

Penalty for failing to give information or for giving false information as to infectious disorder.

328. Whoever,—

[*Bombay Act III of 1888, s. 421, and Clause (21).*] (571.)

(*a*) being a medical practitioner or other person openly and constantly practising the medical profession in a cantonment, and becoming cognizant of the existence of any infectious disorder in any private dwelling therein or in any public dwelling therein other than a public hospital, or

(*b*) (in default of such medical practitioner or person practising the medical

(a) See footnote to Chapter XIX.

profession,) being the owner or occupier of any such dwelling, and being cognizant of the existence of any such disorder therein, or

(*c*) (in default of such owner or occupier) being the person in charge of or in attendance on any person suffering from any such disorder in any such dwelling, and being cognizant of the existence of any such disorder therein,

fails, by himself or by any inmate of such dwelling, or by a servant or other person, to give information, or gives false information, to the Cantonment Magistrate, or to some person appointed by him or by the Cantonment Authority in this behalf, respecting the existence of such disorder shall be punishable with fine which may extend to fifty rupees:

Provided that where any person is not required to give information in the first instance, but is only required to give it in default of some other person, he shall not be punished if it is shown that he had reasonable cause to suppose that the information had been duly given.

[*Clause* (21.)] (590.)

Power to require names of dairyman's customers.

329. Whenever it is certified to the Cantonment Magistrate by a medical officer of the Government or by a medical practitioner that the outbreak or spread of any infectious disorder is, in the opinion of such medical officer or practitioner, attributable to the milk supplied by any dairyman, the Cantonment Magistrate may by notice require the dairyman to furnish him with a full and complete list of the names and addresses of all his customers within the cantonment, or to give him such information as will enable him to trace the persons to whom the dairyman has sold milk.

[*Clause* (21.)] (591.) (*See 53 & 54 Vict., c. 34, s. 4.*)

Power to require names of washerman's customers.

330. Whenever it is certified to the Cantonment Magistrate by the Sanitary Officer that it is desirable, with a view to prevent the spread of any infectious disorder, that such Sanitary Officer should be furnished with a list of the customers of any washerman, the Cantonment Magistrate may by notice require the washerman to furnish the Sanitary Officer with a full and complete list of the names and addresses of the owners of clothes and other articles for whom the washerman washes or has washed during the six weeks immediately preceding the date of the notice.

[*Clause* (21.)] (592, 593.)

Inquiries as to infectious disorder arising from milk or washed clothes.

331. (*1*) If any person specified in a list furnished under section 329 or section 330 or indicated by a dairyman under section 329,

or any servant, follower or agent, or member of the family, of any such person, or any other person under his control,

fails to answer, or knowingly makes a false answer to, any question asked by the Sanitary Officer, or by a medical officer of the Government appointed by the Sanitary Officer in this behalf, as to the existence of any infectious disorder caused by, or likely to have arisen from, or to have been spread by, any milk or washed clothes or other articles,

he shall be punishable with fine which may extend to fifty rupees.

(*2*) The Sanitary Officer, or any medical officer appointed as aforesaid, may take possession of any such milk, clothes or articles, and subject the same, or cause the same to be subjected, to any chemical or other process which he may think necessary; and

the Cantonment Authority shall pay from the Cantonment Fund all the costs of any such process, and shall also pay to the owner of the milk, clothes or other articles such sum as compensation for any loss occasioned by such process as may in the circumstances appear to it to be reasonable.

[*Clause* (21).] (879.) (*See 53 & 54 Vict., c. 34, s. 4.*)

Procedure where introduction of infectious disorder is attributable to supply of milk from, or to washing of clothes, &c., outside, the cantonment.

332. (*1*) If the Sanitary Officer has reason to believe that any person is suffering from an infectious disorder attributable to milk supplied within the cantonment from a dairy, or to clothes or other articles washed in a place, situated beyond the cantonment, or that

the consumption of milk from any such dairy, or the washing of clothes or other articles in any such place, is likely to cause the introduction of an infectious disorder into the cantonment,

he shall make a report to the Cantonment Authority.

(*2*) Upon receipt of any such report, the Cantonment Authority may, with the concurrence of the Magistrate of the district in which such dairy or such place as aforesaid is situated, move the Local Government to extend, under section 28 of the Cantonments Act, 1889, such of the provisions of this Code as relate to dairies or the places of business of washermen, as the case may be, to the area within which such dairy or place is situated.

XIII of 1889.

[*Bengal Act II of 1888, s. 328.*] (577.)

Special conveyances for carriage of infected persons, corpses, clothing, bedding, &c.

333. (*1*) The Cantonment Authority may provide and maintain suitable conveyances for the free carriage of persons suffering, or of the bodies of persons who have died, from any infectious disorder, and for the free transport of clothing, bedding or other articles which have been exposed to the infection of any infectious disorder.

(*2*) When such conveyances have been provided, the Cantonment Authority may, by public notice, prohibit the carriage of any such person, body, clothing, bedding or other article as aforesaid by or in any public conveyance within the cantonment.

[*Madras Act I of 1884, s. 375.*] (578.)

Penalty for use of public conveyance by infected person.

334. Any person suffering from an infectious disorder, who causes himself without proper precaution against spreading the disorder to be conveyed in any public conveyance,

any person in charge of or accompanying a person so conveyed, and

any person who, knowing himself to be suffering from an infectious disorder, enters a public conveyance without previously notifying to the owner or driver thereof that he is so suffering,

shall be punishable with fine which may extend to fifty rupees.

[*Clause* (21).] (579.)

Penalty for using public conveyance for carriage of infected corpse.

335. Whoever hires or uses a public conveyance for the carriage of the body of a person who has died from an infectious disorder without previously notifying to the owner or driver of the conveyance that the person whose body is, or is intended, to be carried has died from such a disorder shall be punishable with fine which may extend to fifty rupees.

[*Madras Act I of 1884, s. 375.*] (580.)

Compensation to owner or driver of public conveyance used for carriage of infected person or corpse.

336. Where a fine has been imposed under section 334 or section 335 for the use of a public conveyance contrary to the provisions of either of those sections, the Cantonment Magistrate may grant the whole or such portion as he thinks fit of the amount realised to the owner or driver of the conveyance as compensation for the expense of properly disinfecting the same and for any loss incurred by him in consequence of the use to which it was put.

[*Madras Act I of 1884, s. 376.*] (581.)

Condition as to hiring public conveyance for carriage of infected person or corpse.

337. No owner or driver of a public conveyance shall be required to convey any person suffering, or the body of any person who has died, from an infectious disorder without payment or tender of a sum sufficient to cover such expense and loss as are referred to in section 336, anything in any Act relating to public conveyances for the time being in force in the cantonment to the contrary notwithstanding.

[*Bombay Act III of 1888, s. 431.*] (582.) (*See 53 & 54 Vict., c. 34, s. 11.*)

Penalty for neglecting to disinfect public conveyance after carrying infected person or corpse.

338. Whoever, being the owner, driver or person in charge of a public conveyance in which any person suffering, or the body of any person who has died, from an infectious disorder has been carried, fails to provide for the immediate disinfection of the conveyance in such manner as the Cantonment Authority may by public notice prescribe in this behalf shall be punishable with fine which may extend to fifty rupees.

[*Madras Act I of 1884, s. 372.*] (583.) (*See 53 & 54 Vict., c. 34, s. 5.*)

Disinfection of building or articles therein.

339. If the Cantonment Magistrate is, upon the advice of the Sanitary Officer, of opinion that the cleansing or disinfecting of any building or part thereof, or of any article therein likely to retain infection, would tend to prevent or check the spread of any infectious disorder, he may by notice require the owner or occupier to cleanse and disinfect the same within a period to be specified in the notice:

Provided that where, in the opinion of the Cantonment Magistrate, the owner or occupier is from poverty or for any other reason unable effectually to carry out any such requisition, the Cantonment Magistrate may, at the expense of the Cantonment Fund, cleanse or disinfect the building or part, or any articles therein likely to retain infection.

[*Bengal Act II of 1888, s. 326, and Bombay Act III of 1888, s. 426.*] (584.)

Destruction of infected hut or shed.

340. (*1*) If the Cantonment Authority is of opinion that the destruction of any hut or shed is necessary to prevent the spread of any infectious disorder, it may, after giving the owner or occupier thereof reasonable notice, destroy the hut or shed and the materials thereof.

(*2*) The Cantonment Authority shall pay such compensation (if any) as it may consider reasonable to any person sustaining substantial loss by the destruction of any hut or shed under this section, but no person shall be entitled as of right to claim compensation for any loss or damage sustained by him by reason of such destruction.

[*Clause* (21).] (585.) (*See 53 & 54 Vict., c. 34, s. 15.*)

Temporary shelter while building is being disinfected or when infected hut is destroyed.

341. The Cantonment Authority shall provide free of charge temporary shelter or house accommodation for the members of any family in which an infectious disorder has appeared, who have been compelled to leave their dwellings in consequence of any proceedings taken under section 339 or section 340.

[*Madras Act I of 1884, s. 377.*] (586.)

Penalty for letting infected building.

342. (*1*) Whoever knowingly lets any building or part of a building in which any person has within the six weeks immediately preceding been suffering from an infectious disorder without having such building or part, and all articles therein liable to retain infection, disinfected in such manner as the Cantonment Authority may by public or special notice prescribe in this behalf shall be punishable with fine which may extend to fifty rupees.

(*2*) For the purposes of this section, the keeper of a sarai shall be deemed to let part of a building to any person who is admitted as a guest into the sarai.

[*Clause* (21).] (587.) (*See 53 & 54 Vict., c. 34, s. 7.*)

Penalty for leaving infected building without disinfecting it or informing owner of the infection, or for failing to answer or falsely answering inquiries of owner or new tenant.

343. Whoever ceases to occupy any building or part of a building in which any person has within the six weeks immediately preceding been suffering from an infectious disorder without having such building or part, and all articles therein liable to retain infection, disinfected in such manner as the Cantonment Authority may by public or special notice prescribe in this behalf, or without first giving to the owner or occupier of the building or part notice of the previous existence of such disorder,

and whoever, on or after ceasing to occupy any building or part of a building, fails to answer, or knowingly makes a false answer to, any question asked by the owner thereof, or by any person negotiating for the hire of such building or part, as to the fact of there having within the six weeks immediately preceding been therein any person suffering from an infectious disorder,

shall be punishable with fine which may extend to fifty rupees.

[*Madras Act I of 1884, s. 373.*] (588.) (*See 53 & 54 Vict., c. 34, s. 6.*)

Disinfection or destruction of infected articles.

344. (*1*) The Cantonment Authority may provide a proper place or places, with all necessary apparatus and attendance, for the disinfection of clothing, bedding or other articles which have been exposed to the infection of any infectious disorder; and

the Cantonment Magistrate may by public or special notice require any person having charge of infected articles to take them to any such place to be disinfected free of charge :

(2) The Cantonment Magistrate may, upon the advice of the Sanitary Officer, at any time direct the destruction of any clothing, bedding or other article which is likely to retain infection, and the Cantonment Authority shall pay such compensation (if any) as it may consider reasonable for any article so destroyed.

[*Madras Act I of 1884, s. 374.*] (589.)

Penalty for improper disposal of infected article.

345. Whoever without previous disinfection of the same gives, lends, sells, transmits or otherwise disposes of to another person any article or thing which he has reason to know has been exposed to the infection of any infectious disorder shall be punishable with fine which may extend to fifty rupees :

Provided that nothing in this section shall apply to any person who transmits with proper precautions any article or thing for the purpose of having the same disinfected.

[*Clause (21).*] (576, 599.)

Disposal of infected excreta and other matter.

346. (1) The Cantonment Authority shall by public notice prescribe the manner in which excreta and other offensive matter and rubbish which has been exposed to the infection of any infectious disorder shall be dealt with or disposed of.

(*See 53 & 54 Vict., c. 34, s. 13.*)

(2) Whoever deposits, or causes or permits to be deposited, any excreta or other offensive matter or rubbish which has been exposed to the infection of any infectious disorder

in any private or public receptacle or place used or appointed for the deposit of offensive matter or rubbish

shall be punishable with fine which may extend to fifty rupees, and, in case of a continuing offence, with an additional fine which may extend to five rupees for every day after the first during which the offence continues.

[*Clause (21).*] (600, 601.)

Cholera hospitals and camps in cantonments.

347. (1) No land shall be selected in a cantonment for use as a cholera hospital or cholera camp without giving the Cantonment Magistrate and the Sanitary Officer an opportunity of stating their opinion upon the proposed selection.

(2) Whenever any land in a cantonment is used as aforesaid, it shall be ploughed up as soon as it has ceased to be put to such use.

[*Clause (21).*] (568.)

Routes for pilgrims and others.

348. The Cantonment Authority may provide or prescribe suitable routes for the use of persons passing through the cantonment on their way to or from fairs or places of pilgrimage or other places of public resort, or passing through the cantonment during times when an infectious disorder is prevalent, and may by public notice require such persons to use such routes and no others.

[*Act XVIII of 1889, s. 109, and Clause (21).*] (790.)

Penalty for making or selling food, &c., by person suffering from contagious leprosy or an infectious disorder.

349. Whoever, when suffering from contagious leprosy or from any infectious disorder, makes or offers for sale any article of food or drink for man, or any drug or medicine, or takes any part in the business of depositing or washing soiled clothes, shall be punishable with fine which may extend to fifty rupees.

[*Clause (21).*] (575.)

Power to prohibit the making, carrying or selling of clothes, bedding or other articles by infected person.

350. The Cantonment Authority may by notice prohibit any person, while suffering from or likely to spread any infectious disorder, from making, carrying or offering for sale, or from taking any part in the business of making, carrying or offering for sale,

any article of clothing or bedding, or anything for use in the making of clothing or bedding, or any other article for personal wear or use which may be specified in the notice.

[*Clause (21).*] (698, 789.)

Power to prohibit or restrict sale of specified articles of food or drink, on outbreak of infectious disorder.

351. If any cantonment is at any time visited or threatened with an outbreak of any infectious disorder which the District Magistrate reports to be epidemic in the neighbourhood,

the Cantonment Authority may, on the advice of the Sanitary Officer, by public notice, restrict, in such manner as it may think necessary, or prohibit absolutely, the sale or preparation of any article of food or drink for human consumption specified in the notice, or the sale of the meat of any description of animal specified in the notice, for such period as it may think proper.

[*Bombay Act III of 1888, s. 434.*] (567.)

Power to take other special measures to prevent outbreak or spread of infectious disorder.

352. If at any time the Cantonment Authority considers that the provisions of this Code or any other law for the time being in force in the cantonment are insufficient for the purpose of preventing the outbreak or spread of any infectious disorder, it may, with the previous sanction of the Local Government, or of such authority as the Local Government may by general or special order appoint in this behalf,

(*a*) take such special measures, and

(*b*) by public notice prescribe such temporary rules to be observed by the public or by any person or class of persons,

as it may deem necessary.

Powers of Entry and Inspection.

[*Clauses (21) and (28).*] (878.)

[*See 53 & 54 Vict., c. 34, s. 4.*]

Power to inspect dairy or washerman's place of business, and order on such inspection.

353. (1) Whenever any dairyman or washerman has been required under section 329 or section 330 to furnish any list or information, the Sanitary Officer, by himself or by any medical officer of the Government specially deputed in writing by him in this behalf, may, at all reasonable times, enter into and inspect the dairy of such dairyman, or any place at which such washerman washes or keeps clothes or other articles in the course of his business, and,

if, after such inspection, the Sanitary Officer is of opinion that any infectious disorder is caused, or is likely to arise, from the consumption of the milk supplied from such dairy, or from the washing of soiled clothes or other articles in any such place as aforesaid, or from any process employed by such washerman, he shall make a report to the Cantonment Magistrate.

(2) Upon receipt of any such report the Cantonment Magistrate may by notice—

(*a*) prohibit the occupier of the dairy from supplying milk therefrom until the notice has been withdrawn, or

(*b*) prohibit the washerman from washing soiled clothes or other articles in any such place or by any such process as aforesaid until the notice has been withdrawn or unless he uses such place in such manner or washes by such process as the Cantonment Magistrate may direct in the notice.

[*Clause (28).*] (862 (*d*), 875, 876.)

Further powers of entry in case of infectious disorders.

354. The Cantonment Magistrate, by himself or by any person authorised by him in this behalf, may, at all reasonable times, enter into and inspect—

(*a*) any building or land in or on which any infectious disorder is believed to exist, or

(*b*) any building which the Cantonment Magistrate has reason to believe to require cleansing or disinfecting for the purpose of preventing the spread of any infectious disorder, or

(*c*) any hut or shed the destruction of which the Cantonment Authority has reason to believe to be necessary for such purpose as aforesaid, or

(*d*) any building or land in or on which there is any public conveyance which the Cantonment Magistrate has reason to believe to require disinfecting for such purpose as aforesaid, or

(*e*) any building or land in or on which there is any clothing, bedding or other article which the Cantonment Magistrate has reason to believe to require cleansing or disinfecting, or the destruction of which the Cantonment Magistrate has reason to believe to be necessary, for such purpose as aforesaid, or

(*f*) any building or land in or on which any excreta or other offensive matter or rubbish has been deposited in contravention of section 346, or

(*g*) any building or land in or on which the Cantonment Magistrate has reason to believe that any person suffering from contagious leprosy or from any infectious disorder is making or offering for sale any article of food or drink for man, or any drug or medicine, or is taking part in the business of depositing or washing soiled clothes.

CHAPTER XXII. (a)

DISPOSAL OF THE DEAD.

[*Clause (18).*] (742, 745, 746 (*a*), 762.)

Certain burial-grounds partly excepted from operation of chapter.

355. Sections 356 to 362 (both inclusive) shall not apply to any burial-ground which is for the time being managed under rules published in the Public Works Department Code.

[*Madras Act I of 1884, s. 380, and Clause (18).*] (742.)

Cantonment Authority's control over burial and burning grounds.

356. All places in a cantonment which are, or have recently been, used as burial or burning grounds shall be under the survey and control of the Cantonment Authority.

[*Madras Act IV of 1884, s. 234.*] (743.)

Power to provide new burial or burning grounds.

357. The Cantonment Authority may, with the previous sanction of the Commander-in-Chief, provide, and by public notice appoint, such fit and convenient places as to it may seem proper for use as burial or burning grounds.

[*Act XVIII of 1889, s. 58, and Clause (18).*] (751.)

Power to close burial or burning ground and provide a new ground.

358. (1) The Cantonment Authority may by public notice, with the previous sanction of the Commander-in-Chief, and after considering any objections which may be preferred within three months from the publication of the notice,

order any burial or burning ground which is, in its opinion, dangerous to the health of, or offensive to persons living in, the neighbourhood, or otherwise likely to cause inconvenience to the public, to be closed from a date to be specified in the notice,

and shall in such case, with the like sanction, if no suitable place for the burial or burning of the dead exists within a reasonable distance, provide a fitting place for the purpose.

(2) Private burial-places in any burial-ground to which a notice issued under this section relates may be excepted from the notice, subject to such conditions as the Cantonment Authority may impose in that behalf :

Provided that the limits of such burial-places are sufficiently defined and that they shall only be used for the burial of members of the family beneficially interested therein.

[*Bombay Act III of 1888, s. 438 (4).*] (752.)

(3) A copy of any public notice issued under this section shall be affixed in English and the vernacular to some conspicuous spot on or near the place to which the original relates.

[*Bombay Act III of 1888, s. 439.*] (754.)

Power to re-open a closed burial or burning ground.

359. The Cantonment Authority may, with the sanction of the Commander-in-Chief, at any time after closing a burial or burning ground, re-open the same, if it is, in the opinion of the Cantonment Authority, no longer dangerous to the health of, or offensive to persons living in, the neighbourhood, or otherwise likely to cause inconvenience to the public.

[*Clause (18).* (745, 746.) XIII of 1889.]

Power to make rules for burial and burning grounds.

360. (1) The Cantonment Authority may make rules, consistent with the Cantonments Act, 1889, and this Code, to provide for all or any of the following matters, namely :

(*a*) preventing nuisances or obstruction in a burial or burning ground or in the approaches thereto ;

(*b*) keeping a burial or burning ground in a cleanly and proper condition ;

(*c*) the appointment of a person or persons to have charge of a burial or burning ground ;

(*d*) fixing, in accordance with the custom of the class to which the deceased belonged,

(a) This chapter provides for bringing native burial and burning grounds, when situated in cantonments, under rather more careful sanitary supervision and control than heretofore ; for preventing the disposal of corpses in insanitary methods ; and for the proper removal of corpses.

The provisions are based on existing Municipal Acts and practice.

the hours during which a burial or burning ground may be used for the disposal of corpses;

(*e*) securing reasonably free use of the rites of their religion by the persons in charge of any corpse brought for disposal to a burial or burning ground, and providing for the exercise of those rites on behalf of such persons as may desire them;

(*See Bengal Act V of 1881, s. 8 (d).*)

(*f*) the appointment and control of the persons employed in digging graves, burning corpses or disposing of the dead at a burial or burning ground, and regulating the manner in which all work in a burial or burning ground shall be executed;

(*See Bengal Act II of 1888, s. 384.*)

(*g*) the supply of necessaries for burying or burning corpses at a burial or burning ground to such persons as may require them;

(*See Bengal Act II of 1888, s. 378.*)

(*h*) fixing the fees, dues or rates which may be charged for—

(*i*) the burial or burning of a corpse in a burial or burning ground,

(*ii*) the services of the persons appointed by the Cantonment Authority to perform the rites observed at such burial or burning, whenever such persons are so employed, and

(*iii*) the necessaries for burying or burning supplied by the Cantonment Authority;

(*See Bengal Act V of 1881, s. 8 (b).*)

(*i*) the preservation, repair or removal of existing monuments, and regulating the dimensions and the erection of new monuments, in a burial ground;

(*j*) the maintenance of sufficient walls or fences, entrances, approaches, roads, pathways, wells and buildings for a burial or burning ground;

(*See Bombay Act III of 1881, s. 436.*)

(*k*) the maintenance of a plan of every burial or burning ground, showing the extent and boundaries of the same, the approaches, roads, pathways and buildings thereto and therein, the spaces occupied by existing graves, the spaces allotted for future graves, and the alignment to be observed in digging, building or constructing graves;

See Bengal Act II of 1888, s. 412 (m).

(*l*) the periodical inspection of burial and burning grounds; and

(*m*) generally the control and management of burial and burning grounds.

(*2*) Where there is a Cantonment Committee, rules under this section may be made only at a special meeting.

(*3*) No rule made under this section shall come into force until it has been confirmed by the Commander-in-Chief and the Local Government.

[*Clause (18).*] (748.)

Notification of rules made for burial or burning ground.

361. (*1*) A copy of all rules made under section 360, and of the table of fees, dues or rates (if any) fixed by rule under clause (*h*) of that section, shall be affixed in English and the vernacular to some conspicuous spot in each burial or burning ground to which the rules, fees, dues or rates, as the case may be, relate.

(*2*) Until a copy of the said rules has been so affixed, no person shall be punished for disobeying any such rule.

Penalty for disobeying rule made for burial or burning ground.

362. Whoever disobeys any rule made under section 360 shall, subject to the provision of section 361, sub-section (*2*), be punishable with fine which may extend to twenty rupees. [*Bengal Act II of 1888, s. 417.*] (747.)

Penalty for burying too near the surface.

363. Whoever without the permission in writing of the Cantonment Authority buries, or causes to be buried, any corpse or part of a corpse in a grave or vault, or otherwise, in such manner that the surface of the coffin, or, where no coffin is used, the surface of the corpse or part, is at a less depth than five feet from the surface of the ground shall be punishable with fine which may extend to fifty rupees, or with imprisonment for a term which may extend to eight days. [*Bombay Act III of 1888, s. 441 (f), and Clause (18).*] (763.)

Penalty for making grave too close to neighbouring graves.

364. Whoever builds or digs, or causes to be built or dug, any grave or vault in any burial ground at a less distance than two feet from the margin of any other grave or vault shall be punishable with fine which may extend to fifty rupees, or with imprisonment for a term which may extend to eight days. [*Bombay Act III of 1888, s. 441 (g), and Clause (18).*] (764.)

Penalty for re-opening grave.

365. Whoever without the written permission of the Cantonment Authority re-opens for the interment of a corpse or any part of a corpse a grave or vault already occupied shall be punishable with fine which may extend to fifty rupees, or with imprisonment for a term which may extend to eight days. [*Bombay Act III of 1888, s. 441 (i), and Clause (18).*] (766.)

Penalty for failing to bury or burn corpse within six hours after arrival at burial or burning ground.

366. Whoever after bringing, or causing to be brought, to a burial or burning ground any corpse or part of a corpse fails to bury or burn the same, or to cause the same, to be buried or burnt, within six hours after its arrival at the ground shall be punishable with fine which may extend to fifty rupees, or with imprisonment for a term which may extend to eight days. [*Bombay Act III of 1888, s. 441 (k), and Clause (18).*] (767.)

Penalty for incomplete burning.

367. Whoever when burning, or causing to be burnt, any corpse or part of a corpse permits the same or any portion thereof to remain without being completely reduced to ashes, or permits any cloth or other article used for the conveyance or burning of such corpse or part to remain on or near the place of burning without its being completely reduced to ashes, shall be punishable with fine which may extend to twenty rupees, or with imprisonment for a term which may extend to four days. [*Bombay Act III of 1888, s. 441 (l), and Clause (18).*] (768.)

Penalty for disposing of corpse at unauthorised place, or exhuming corpse.

368. Whoever without the written permission of the Cantonment Authority granted with the general or special sanction of the Commander-in-Chief,— [*Bombay Act III of 1888, s. 440, and Clause (18).*] (760.)

(*a*) makes any vault or grave or interment within any wall, or underneath any passage, porch, portico, plinth or verandah, of any place of worship, or

(*b*) makes any interment, or otherwise disposes of any corpse, in any place which is for the time being closed for the disposal of the dead by notice under section 358, or

(*c*) builds, digs, or causes to be built or dug, any grave or vault, or burns or in any other way disposes of, or suffers or permits to be disposed of, any corpse at any unauthorised place, or

(*d*) exhumes any body, except under the provisions of section 176 of the Code of Criminal Procedure, 1882, or of some other law for the time being in force, from any place for the disposal of the dead,

X of 1882.

shall be punishable with fine which may extend to fifty rupees, or with imprisonment for a term which may extend to eight days.

[*Clause (18).*] (761.)

Powers in respect of improperly disposed of corpses.

369. Whenever a corpse has been buried, burnt or otherwise disposed of or exhumed in contravention of any of the provisions of this chapter, the Cantonment Authority may, if it thinks fit, with the concurrence of the Sanitary Officer, take such order therewith, or with the remains thereof, as shall ensure its or their proper disposal in accordance with law, and may for that purpose exhume any corpse and remove it for such disposal.

[*Bengal Act III of 1884, s. 260.*] (769.)

Disposal of corpses of paupers and unknown persons.

370. The Cantonment Authority may out of the Cantonment Fund provide for the burial, burning or other lawful disposal, free of charge, of the corpses of paupers and unknown persons who have died within the cantonment.

Removal of Corpses.

[*Bombay Act III of 1888, s. 441 (a).*] (755.)

Period for disposal of corpses.

371. (*1*) The Cantonment Authority shall by public notice direct that all corpses be buried, burnt or otherwise disposed of according to the custom of the class to which the deceased belonged within twenty-four hours after death if the death occurs in the cold season, or within twelve hours after death if the death occurs in the hot season.

(*2*) The periods of the year to be included in the cold season and the hot season respectively for the purposes of this section shall be determined for each cantonment on the advice of the Sanitary Officer, and shall be specified in the said notice.

[*Clause (21).*] (594, 595.) (*See 53 & 54 Vict., c. 34, s. 8.*)

(*3*) Where any person has died from an infectious disorder, the Cantonment Magistrate may by notice direct any person having charge of the corpse to bury, burn or otherwise dispose of the same according to the custom of the class to which the deceased belonged forthwith, or within any period shorter than that prescribed under sub-section (*1*) which may be specified in the notice.

[*Clause (21).*] (597.)

Provision of mortuaries and removal of infected corpses thereto.

372. The Cantonment Authority may, with the previous sanction of the Commander-in-Chief, provide and maintain mortuaries for the reception of corpses before burial, burning or other disposal, and

where any person has died from an infectious disorder, the Cantonment Magistrate may by notice require any person having charge of the corpse to convey the same to such a mortuary, thereafter to be buried, burnt or otherwise disposed of according to the custom of the class to which the deceased belonged. (*See 38 & 39 Vict., c. 55, ss. 141, 142.*)

[*Clause (21).*] (596.) (*See 53 & 54 Vict., c. 34, s. 9.*)

Removal of infected corpse.

373. When any person has died from an infectious, disorder, the Cantonment Magistrate may by notice prohibit the removal of the corpse from the place where death occurred, except for the purpose of being buried, burnt or otherwise disposed of according to the custom of the class to which the deceased belonged, or of being conveyed to a mortuary.

[*Bombay Act III of 1888, s. 441 (c), and Clause (21).*] (598, 757.)

Routes for carrying corpses.

374. (*1*) The Cantonment Authority may by public notice prohibit the carrying of corpses along any route specified in the notice.

(*2*) The Cantonment Authority may by public notice prescribe the routes by which the corpses of persons who have died from infectious disorders shall be conveyed to the place of burial, burning or other disposal or to a mortuary.

(*3*) If any person carries, or causes to be carried, any corpse or part of a corpse in contravention of any notice issued under this section, he shall, unless no other route was available, be punishable with fine which may extend to twenty rupees.

[*Bombay Act III of 1888, s. 441 (b), and Act XVIII of 1889, s. 115.*] (756.)

Penalty for improperly carrying corpse along street or public place.

375. Whoever carries, or causes to be carried, a corpse or part of a corpse along any street or public place without having and keeping the same decently covered, or without taking due precaution to prevent risk of infection or injury to the public health or annoyance to passers-by or to persons dwelling in the neighbourhood, shall be punishable with fine which may extend to twenty rupees.

[*Bombay Act III of 1888, s. 441 (e).*] (758.)

Penalty for depositing corpse in street or public place.

376. Whoever, while conveying a corpse or part of a corpse, without sufficient reason places or leaves the same, or causes it to be placed or left, on or near any street or public place, shall be punishable with fine which may extend to twenty rupees.

[*Bombay Act III of 1888, s. 441 (d).*] (759.)

Penalty for improperly carrying dissected corpse.

377. Whoever removes, or causes to be removed, otherwise than in a closed and properly deodorized receptacle or vehicle, a corpse or part of a corpse which has been kept or used for purposes of dissection, shall be punishable with fine which may extend to fifty rupees.

Cantonment Code.

(Part IV.—The Public Health, Safety and Convenience.—Chapter XXIII.—Encamping-grounds and Sarais.—Sections 378-385.)

CHAPTER XXIII. (a)

ENCAMPING-GROUNDS AND SARAIS.

[*Clause* (31).] Saving of Sarais Act, 1867.

378. Sections 382 to 385 (both inclusive) and 387 to 389 (both inclusive) shall not apply to any cantonment in which the Sarais Act, 1867, is for the time being in force.

XXII of 1867.

Encamping-grounds.

[*Clause* (17).] (629.) Provision and maintenance of encamping-grounds.

379. The Cantonment Authority shall appoint places within the cantonment for use as encamping-grounds, and

shall, so far as the funds placed at its disposal for the purpose permit, with respect to all encamping-grounds from time to time existing within the cantonment, other than military encamping-grounds,—

(*a*) provide all necessary conservancy arrangements therefor,

(*b*) maintain the wells and other sources of water-supply situated therein,

(*c*) provide for the cultivation annually of one-third of the area thereof, and

(*d*) provide for the carrying out of such other arrangements as may from time to time be ordered by the Commander-in-Chief for the proper maintenance thereof.

[*Clause* (17).] (645.) Penalty for using an unauthorised place as an encamping-ground.

380. Whoever without the permission of the Cantonment Authority uses as an encamping-ground any place within a cantonment, other than a place appointed for that purpose by the Cantonment Authority, by lodging or by causing any cattle, or any sheep, elephant, camel, horse or other animal, or any vehicle, to halt or be placed thereon,

shall be punishable with fine which may extend to twenty rupees, and, in case of a continuing offence, with an additional fine which may extend to three rupees for every day after the first during which the offence continues.

Sarais.

[*Clause* (17).] (630.) Maintenance and provision of Government sarais.

381. The Cantonment Authority shall, so far as the funds placed at its disposal for the purpose permit, make adequate provision for the maintenance of any sarais from time to time existing within the cantonment which belong to, or are under the management of, the Government;

and may, with the previous sanction of the Commander-in-Chief, construct and maintain as many additional sarais as to it may appear necessary for the accommodation of native travellers passing through or frequenting the cantonment.

[*Clause* (17).] (631, 632.) Registration of private sarais.

382. (*1*) The Cantonment Magistrate shall keep a register, to be called the register of sarais, in which shall be entered by the Cantonment Magistrate, or by such person as he may appoint in this behalf, the name and residence of the keeper of every private sarai within the cantonment, and the situation of every such sarai.

(*2*) No charge shall be made for making any such entry.

(*3*) The Cantonment Magistrate shall by notice require the keeper of every private sarai to furnish, within one month from the service of the notice, all information requisite for the registration of the sarai under this section.

[*Clause* (17).] (634.) Power to refuse registration.

383. The Cantonment Magistrate may refuse to register any sarai under section 382—

(*a*) if he has reason to believe that the sarai is, or is likely to become, offensive to persons residing in or frequenting the immediate neighbourhood, or

(*b*) until the Sanitary Officer has certified to the Cantonment Magistrate that the sanitary condition of the sarai, the water-supply thereof and the nature and extent of the accommodation which it is capable of affording to travellers or lodgers are such as to render it fit to be used as a sarai, or

(*c*) until the keeper of the sarai has produced a certificate of character in such form, and signed by such persons, as the Cantonment Authority may direct.

[*Clause* (17).] (636.) Obligations of keeper of a private sarai.

384. It shall be the duty of the keeper of every private sarai—

(*a*) when any person in the sarai is to his knowledge ill of any infectious disorder, or has died of any such disorder, to give immediate notice of the fact to the officer in charge of the police-station within the limits of which the sarai is situated;

(*b*) thoroughly to cleanse the rooms and verandahs and the drains of the sarai, and the wells, tanks or other sources from which water is obtained for the persons or animals using the sarai, to the satisfaction of, and so often as may be required by, the Cantonment Magistrate, or such person as the Cantonment Magistrate may appoint in this behalf;

(*c*) to remove all noxious vegetation on or near the sarai, and all trees and branches of trees capable of affording to thieves means of entering or leaving the sarai;

(*d*) to keep the gates, walls, fences, roofs and drains of the sarai in repair;

(*e*) to provide such number of watchmen as may, in the opinion of the Cantonment Magistrate, be necessary for the safety and protection of persons, animals and vehicles lodging in, halting at or placed in the sarai; and

(*f*) to exhibit, at such place and in such form and languages as the Cantonment Magistrate may direct, a list of charges for the use of the sarai.

[*Clause* (17).] (637.) Power to require reports as to persons using private sarai.

385. (*1*) The Cantonment Magistrate may at any time by notice require the keeper of any private sarai to report to him, or to any person whom he may appoint in this behalf, either orally or in writing, as may be directed in the notice,

(a) Under this chapter sarai-keepers will be obliged to register themselves, maintain their sarais in a sanitary condition, and provide reasonable protection to travellers.

Cantonment Code.

(Part IV.—The Public Health, Safety and Convenience.—Chapter XXIII.—Encamping-grounds and Sarais.—Sections 386-391. Chapter XXIV.—Fairs.—Sections 392-393.)

the persons who resorted to the sarai during the preceding day or night, or during any recent series of days or nights.

(*2*) If written reports are required for any space of time exceeding a single day or night, schedules shall be furnished by the Cantonment Magistrate to the keeper, and the keeper shall from time to time fill up the schedules with the information so required, and transmit them to the Magistrate, or to the person (if any) appointed under sub-section (*1*), in such manner and at such intervals as may be directed by the Magistrate.

[*Clause* (17).] (644.) Power to close private sarai which is a nuisance.

386. If it be shown to the satisfaction of the Cantonment Authority that the maintenance of any building as a private sarai is a nuisance to the neighbourhood, the Cantonment Authority may by notice require the keeper of the sarai to discontinue the use of the building as a sarai after thirty days from the service of the notice.

[*Clause* (17).] (638, 639.) Power to cancel registration and to re-register.

387. (*1*) If the keeper of any registered private sarai disobeys any notice or direction lawfully issued or given by the Cantonment Authority or the Cantonment Magistrate under this chapter, or omits to do anything which he is by this chapter bound to do, the Cantonment Magistrate may, in addition to any punishment which may lawfully be inflicted therefor, after notice, cancel the entry relating to the sarai in the register of sarais.

(*2*) The Cantonment Magistrate may at any time re-register a sarai the registration of which has been cancelled under this section.

[*Clause* (17).] (635, 639, 646.) Penalty for maintaining sarai without registration.

388. Whoever—

after one month from the service of a notice under section 382 with respect to any sarai, and before the sarai has been registered, or

after seven days from the service under section 387 of notice of cancelment of the registration of a sarai, and before the sarai has been re-registered under the power conferred by that section,

receives any lodger or allows any person, any cattle, or any sheep, elephant, camel, horse or other animal, or any vehicle, to halt or be placed in the sarai,

shall be punishable with fine which may extend to twenty rupees, and, in case of a continuing offence, with an additional fine which may extend to three rupees for every day after the first during which the offence continues.

[*Clause* (17).] (645.) Penalty for using an unauthorised building as a sarai.

389. Whoever uses as a sarai any building within a cantonment, other than a sarai maintained by the Cantonment Authority, or for the time being registered under this chapter, by lodging or by causing any cattle or any sheep, elephant, camel, horse or other animal, or any vehicle, to halt or be placed therein, shall be punishable with fine which may extend to twenty rupees, and, in case of a continuing offence, with an additional fine which may extend to three rupees for every day after the first during which the offence continues.

[*Clause* (17).] (646.) Power to declare shops, &c., in sarais to be markets.

390. The Cantonment Authority may by public notice declare that any shop or warehouse, or collection of shops or warehouses, or any place used for the sale of meat, fish, fruit, vegetables, live-stock or any other thing,

within the limits of any sarai, or within such limits outside the nearest boundary thereof within the cantonment as may be specified in the notice,

shall be deemed to be a public market or a private market, and subject as such to the provisions of Chapter XVI relating to public or private markets, as the case may be.

Powers of Entry and Inspection.

[*Clause* (28).] (855.) Power to enter and inspect private sarais and places used as such.

391. The Cantonment Magistrate, by himself or by any person authorised by him in this behalf, may,—

(*a*) at any time between sunrise and sunset, enter into and inspect—

(i) any private sarai, or any part thereof, in order to ascertain whether the keeper has omitted to do any thing which he is by this chapter bound to do, or

(ii) any building which is being used as a private sarai without being registered, or after the registration thereof has been cancelled, or after the closing of the sarai has been required under the provisions of this chapter; and

(*b*) at all reasonable times enter into any private sarai and search for any person, or the body of any person, whom the Cantonment Magistrate has reason to believe to be ill of, or to have died from, any infectious disorder, or for any traveller or other person resorting to such sarai.

CHAPTER XXIV. (a)

FAIRS.

[*Clause* (17).] (62, 63.) Meaning of "fair."

392. In this chapter "fair" includes a show of cattle, horses, mules or other animals, or of agricultural produce, instituted to improve the breed of such animals or to improve such produce, and also any public assembly held for religious or other purposes in or upon a place appointed by the Cantonment Authority under section 394 for use as a fair-ground.

[*Clause* (17).] Certain sections not to apply where a fair is managed by the Local Government.

393. The Local Government may undertake the management of any fair held in a cantonment, and section 394, sub-section (*2*), and sections 395 to 401 (both inclusive) shall not apply to any fair so managed or to any fair-ground used for the purpose.

(a) The object of this chapter is to enable the Cantonment Authority to control large gatherings of people for religious and other purposes, with reference especially to the preservation of order, sanitation, food and water-supply, outbreaks of sickness and epidemics, and the ceremonial slaughter of animals. Fairs managed by the Local Government, e.g., the Kumbh fair at Allahabad, are exempted from the operation of the

Cantonment Code.

(Part IV.—The Public Health, Safety and Convenience.—Chapter XXIV.—Fairs.—Sections 394-402.)

[*Clause* (17).] (705.)

Appointment and maintenance of fair-grounds.

394. (*1*) The Cantonment Authority may, with the previous sanction of the Commander-in-Chief, by public notice, appoint such places for the purpose of being used as fair-grounds, upon such terms and conditions, at such times, by such persons, and for such purposes as to it may seem proper, and prescribe and alter the limits of any such place.

(*2*) The Cantonment Authority may build and maintain upon such places as aforesaid such temporary structures, and make, alter and maintain such drains, roads, passages and approaches in or for such places, as may in its opinion be necessary.

[*Clause* (17). (706, 707.)

Management of fair by Cantonment Magistrate in consultation with Sanitary Officer.

395. (*1*) Whenever any fair-ground is used for the purposes of a fair, the Cantonment Magistrate shall be the officer in charge of the fair, and may appoint such of the servants of the Cantonment Authority to assist him as he may think necessary upon such terms as the Cantonment Authority may prescribe.

(*2*) The Cantonment Magistrate shall consult with the Sanitary Officer as to the proper measures to be taken in respect of all matters relating to the sanitary arrangements of a fair and the health and well-being of the persons attending thereat.

[*Clause* (17).] (708.)

Power to make rules for fairs and fair-grounds.

XIII of 1889.

396. (*1*) The Cantonment Authority may make rules, consistent with the Cantonments Act, 1889, and this Code, to provide for all or any of the following matters, namely:

(*a*) fixing the days on which a fair may be held and a fair-ground kept open for use;

(*b*) the maintenance of order at a fair;

(*c*) preventing nuisances or obstruction in a fair-ground or in the approaches thereto;

(*d*) keeping a fair-ground in a cleanly and proper condition, removing offensive matter and rubbish therefrom, and maintaining public latrines and urinals for the use of persons frequenting a fair-ground;

(*e*) the proper supervision of the sanitary arrangements at a fair, or the appointment of officers and servants for that purpose, and the supply of proper food and water with due regard to the habits and customs of the persons attending at a fair;

(*f*) the discovery of the sick at a fair, the discovery of the causes of sickness and death, and the prevention of the importation and spread of infectious or contagious disorders;

(*g*) the regulation and distribution of encampments, booths, shops, stalls, pens or standings during a fair, and of places for the supply of food or drink;

(*h*) the sacrifice or slaughter of animals for purposes other than food;

(*i*) the disposal of the bodies of persons dying, and of the carcasses of animals slaughtered or dying, on a fair-ground or during a fair; and

(*j*) generally the control of fairs and the management of fair-grounds.

(*2*) Where there is a Cantonment Committee, rules under this section may be made only at a special meeting.

(*3*) No rule made under this section shall come into force until it has been confirmed by the Commander-in-Chief and the Local Government.

[*Clause* (17).] (710.)

Notification of rules in fair-ground.

397. (*1*) A copy of all rules made under section 396 shall be affixed in English and the vernacular to some conspicuous spot in each fair-ground to which the rules relate.

(*2*) Until a copy of the said rules has been so affixed, no person shall be dealt with for disobeying any such rule.

[*Clause* (17).] (709.)

Penalty for disobeying rule.

398. Whoever disobeys any rule made under section 396 shall, subject to the provision of section 397, sub-section (*2*), be punishable with fine which may extend to twenty rupees, and, in case of a continuing offence, with an additional fine which may extend to three rupees for every day after the first during which the offence continues.

[*Bombay Act III of 1888, s. 409, and Clause* (17).] (712.)

Power to expel defaulter from fair-ground.

399. The Cantonment Magistrate may expel from any fair-ground any person who has been punished for disobeying any rule made under section 396 for the time being in force in such fair-ground or during a fair held thereon, and

may prevent such person, by himself or his servants, from entering into such fair-ground, or from further carrying on any trade or business therein, or from occupying any encampment, booth, shop, stall, pen, standing or other place therein, or from attending any such fair, and

may determine any lease or tenure which such person may have in any such encampment, booth, shop, stall, pen, standing or place.

[*Clause* (17).] (713.)

Penalty for encroaching on approaches, roads, passages or spaces to or in fair-ground.

400. Whoever causes any encroachment in or on any of the approaches, roads, passages or spaces to or in any fair-ground shall be punishable with fine which may extend to twenty rupees, and, in case of a continuing offence, with an additional fine which may extend to three rupees for every day after the first during which the offence continues.

[*Clause* (17).] (714.)

Power to close fair or fair-ground.

401. The Cantonment Authority, with the previous sanction of the Commander-in-Chief, may at any time, by public notice, close any fair, or close, permanently or for such period as may to it seem proper, any fair-ground or any portion thereof.

[*Clause* (17).] (715.)

Penalty for holding fair without permission.

402. Whoever without the permission of the Cantonment Authority, or after that Authority has closed a fair or fair-ground,

opens, keeps open, holds or attends a fair on a fair-ground, or in a place which was a fair-ground, or in any other place in a cantonment, or

Cantonment Code.

(Part IV.—The Public Health, Safety and Convenience.—Chapter XXIV.—Fairs.—Section 403. Chapter XXV.—Extinction and Prevention of Fires.—Sections 404-408.)

places or erects any encampment, booth, shop, stall, pen, standing or other thing for the purpose of a fair on a fair-ground or on any other place as aforesaid,

shall be punishable with fine which may extend to fifty rupees, and, in case of a continuing offence, with an additional fine which may extend to five rupees for every day after the first during which the offence continues.

Powers of Entry and Inspection.

[*Clause* (28).] (856.)

Powers of entry and inspection.

403. The Cantonment Magistrate, by himself or by any person authorised by him in this behalf, may, at all reasonable times,—

(*a*) enter into any encampment, tent, booth, shop, stall, pen, standing or other place in or on any fair-ground—

(*i*) for the purpose of ascertaining whether the rules (if any) made under this chapter and applicable to such fair-ground are being obeyed, or

(*ii*) for the purpose of expelling from such fair-ground, or of preventing from carrying on any trade or business, or occupying any encampment, booth, shop, stall, pen, standing or other place therein, any person whom the Cantonment Magistrate is empowered by this chapter to so expel or prevent; and

(*b*) enter into and inspect any place which is being used for the purposes of a fair in contravention of section 402.

CHAPTER XXV. (a)

EXTINCTION AND PREVENTION OF FIRES.

Cantonment Fire-brigade.

[*Clause* (25).] (799.)

Power to establish a cantonment fire-brigade.

404. (*1*) In addition to the regimental fire-parties, there may be established in any cantonment a fire-brigade, to be called the "cantonment fire-brigade:"

(*2*) Provided that no such fire-brigade shall be established unless provision can be made for the appointment of a superintendent thereof.

[*Clause* (25).] (797.)

Constitution of cantonment fire-brigade.

405. (*1*) For the purpose of forming a cantonment fire-brigade, the Cantonment Authority may, so far as the funds placed at its disposal for the purpose permit, appoint as many of its servants to act as firemen and fire-coolies as it may think necessary for the efficient extinction of fires and the protection of life and property in case of fire, and appoint any person to be superintendent of the fire-brigade:

(800.)

(*2*) Provided that no person shall be appointed to be superintendent of a cantonment fire-brigade unless he is in possession of a certificate from the officer in immediate executive engineering charge of the cantonment stating that he is competent to be in charge of fire-engines, fire-escapes, and the tools, implements, appurtenances and machinery necessary for the efficient extinction of fires and the protection of life and property in case of fire.

(801.)

(*3*) No police-officer shall without the previous sanction of the Local Government be appointed to be superintendent or a member of a cantonment fire-brigade.

(798.)

(*4*) Every fireman and fire-coolie shall perform his duties as such in addition to his duties as a servant of the Cantonment Authority.

[*Clause* (25).] (802.)

Provision of fire-stations.

406. The Cantonment Authority may appoint places for the purpose of being used as fire-stations and

(*See 28 & 29 Vict., c. 90, s. 5.*)

may, with the previous sanction of the Commander-in-Chief, so far as the funds placed at its disposal for the purpose permit, build and maintain upon any such place such buildings, and make, alter and maintain such pens, standings, enclosures, walls, fences, drains, roads, passages and approaches therein and therefor, as may in its opinion be necessary for the discharge of duties connected with the extinction of fires, and

may permit the use thereof upon such conditions, for such purposes and by such persons as to it may seem proper.

[*Clause* (25).] (803.)

(*See Bombay Act III of 1888, s. 359.*)

Provision of fire-engines and appurtenances.

407. When a cantonment fire-brigade has been established, the Cantonment Authority shall, so far as the funds placed at its disposal for the purpose permit, furnish the fire-brigade with all such fire-engines, fire-escapes, accoutrements, tools, implements and means of inter-communication as may be necessary and practicable for the efficient discharge of its duties.

[*Clause* (25).] (804, 805.)

(*See Bombay Act III of 1888, s. 360.*)

XIII of 1889.

Power to make rules for regulating cantonment fire-brigade.

408. (*1*) The Cantonment Authority may make rules, consistent with the Cantonments Act, 1889, and this Code, to provide for all or any of the following matters, namely:

(*a*) the training, discipline and good conduct of the members of the cantonment fire-brigade (if any);

(*b*) securing their speedy attendance with engines, fire-escapes and all necessary implements on the occasion of any alarm of fire;

(*c*) ensuring their acquaintance with the distribution of the water-supply of the cantonment;

(*d*) ensuring their maintenance generally in a due state of efficiency; and

(*See Bengal Act IV of 1883, s. 20.*)

(*e*) sending the cantonment fire-brigade (if any) or its fire-engines and the appurtenances thereof beyond the limits of the cantonment in order to extinguish fire and protect life and property in case of fire in the neighbourhood.

[*Act XVIII of 1889, s. 84* (*2*), *and Clause* (25).] (*See 28 & 29 Vict., c. 90,*

(*2*) In making any rule under this section, the Cantonment Authority may direct that a breach of it shall be punishable with fine which may extend to ten rupees.

(a) The object of this chapter is to define the powers and duties of the Cantonment Authority, its servants, and all concerned in the extinction of a fire; also to prevent acts likely to cause a fire.

As it may be useful in some parts of India, power is given to form the cantonment servants into a fire-brigade, to act as auxiliary to the regular fire-parties from the troops. These provisions are only intended for cantonments having special needs.

Cantonment Code.

(Part IV.—The Public Health, Safety and Convenience.—Chapter XXV.—Extinction and Prevention of Fires.—Sections 409-416).

Proceedings at Fires.

[*Clause* (25).] (806, 807.) (*See Bengal Act IV of 1883, s. 21.*)

409. (*1*) The senior officer present at a fire shall control the operations and take command of all regimental fire-parties present, of the cantonment fire-brigade (if any), and of any persons voluntarily placing their services at his disposal.

Control of operations at a fire.

(*2*) The Cantonment Magistrate, or, in his absence, the superintendent of the cantonment fire-brigade (if any), or any servant of the Cantonment Authority appointed or authorised by the Cantonment Magistrate in this behalf, shall take subordinate command of all cantonment servants present at a fire, and of any other persons voluntarily placing their services at his disposal.

(*3*) Any person authorised by sub-section (*1*) to control the operations at a fire, and being on the spot, may verbally nominate or depute any other person to act at a distance.

[*Bombay Act III of 1888, ss. 361 and 362, and Clause* (25).] (549, 806, 807, 809, 854.)

410. Any person authorised by section 409 sub-section (*1*), to control the operations at a fire, and any person nominated or deputed by him to act at a distance, may—

Powers of officer controlling operations at a fire.

(*a*) remove, or order any fireman or other person under his command to remove, any persons who, by their presence, interfere with, or impede the operations for, the extinction of the fire or the protection of life and property endangered thereby, and

(*b*) take generally any measures that may appear expedient for the protection of life and property, with power, by himself or by any persons under his command,—

(*i*) to break into or through, or take possession of, or use for the passage of hoses or other appliances, any buildings or land, or to pull down any buildings, for the purpose of extinguishing the fire, doing as little damage as may be,

(*ii*) to close or clear any street, building or land in or near which a fire is burning, and

(*iii*) notwithstanding any notice or order of the Cantonment Authority closing any source of water-supply, or prohibiting the use of water therein or therefrom, to utilise, to such extent as may be necessary for extinguishing the fire, the water of any available well, tank or other source of water-supply in or upon any public or private building or land.

[*Bombay Act III of 1888, ss. 362, and Clause* (25).] (809.)

411. It shall be the duty of all servants of the Cantonment Authority, all police-officers, and, under the orders of the Commanding Officer of the cantonment, all persons under his control, to aid the regimental fire-parties and the cantonment fire-brigade (if any) in the execution of their duties at a fire.

Duty of cantonment servants, the police and others to aid at fires.

412. Any damage occasioned by a regimental fire-party or a cantonment fire-brigade in the due execution of its duties, or by any person aiding the fire-party or brigade, shall be deemed to be damage by fire within the meaning of any policy of insurance against fire.

Damage done in the extinction of fire, &c., declared to be damage by fire.

[*Bombay Act III of 1888, s. 363, and Clause* (25).] (810.)

413. No member of a regimental fire-party or a cantonment fire-brigade, and no person aiding a regimental fire-party or a cantonment fire-brigade in accordance with section 411, shall be held liable to damages on account of any act done by him in the *bonâ fide* belief that the act was required in the proper execution of his duties.

Saving of liability for acts done by regimental fire-party, cantonment fire-brigade, &c.

[*Bengal Act IV of 1883, s. 21, and Clause* (25).] (811.)

414. In any cantonment in which there is a cantonment fire-brigade, a report of every fire occurring in the cantonment shall be submitted by the superintendent of the fire-brigade, not later than the day following the fire, to the Cantonment Magistrate.

Fire-reports.

[*Bombay Act III of 1888, s. 364.*] (812.)

415. (*1*) The Cantonment Authority may make rules, consistent with the Cantonments Act, 1889, and this Code, to provide for all or any of the following matters, namely:

Power to make rules as to fires.

[*Clause* (25).] (804) XIII of 1889.

(*a*) the guidance, training, discipline and conduct of persons voluntarily assisting in extinguishing fires and protecting life and property in case of fire;

(*b*) the removal of persons interfering with or impeding the operations at a fire;

(*See Bombay Act III of 1888, s. 361.*)

(*c*) the measures necessary for the protection of life and property on the occasion of a fire;

(*d*) the breaking into or through, or taking possession of, any buildings or land, or the pulling down of any buildings, on the occasion of a fire;

(*e*) the grant of gratuities to persons giving notice of, or assisting at, a fire, and to such members of any regimental fire-party or of the cantonment fire-brigade (if any) as may, in the opinion of the Cantonment Authority, be deserving of reward for extraordinary services rendered at a fire or in the quick supply of water therefor; and

(*See Bengal Act IV of 1883, s. 20.*)

(*f*) the grant of compensation to servants of the Cantonment Authority and other persons for injuries or damages sustained in the extinction of a fire and in the protection of life and property on the occasion of a fire.

(*2*) Where there is a Cantonment Committee, rules under this section may be made only at a special meeting.

(*3*) No rule made under this section shall come into force until it has been confirmed by the Commander-in-Chief and the Local Government.

416. (*1*) The Cantonment Magistrate shall once at least in every six months affix on conspicuous places in the cantonment

Instructions for guidance of the public in case of fire.

[*Clause* (25).] (808.)

Cantonment Code.

(Part IV.—The Public Health, Safety and Convenience.—Chapter XXV.—Extinction and Prevention of Fires.—Sections 417-422. Chapter XXVI.—Streets and Public Places.—Sections 423-426.)

a notice containing instructions for the guidance of the public in case of fire.

(*2*) Such instructions shall embody, in as plain words as may be, and in as many languages as the Cantonment Magistrate may think necessary, the several points mentioned in Schedule II.

Prevention of Fires.

[*Madras Act I of 1884, s. 340.*] (813. IV of 1884. XII of 1886.)

417. The Cantonment Authority may, subject to the provisions of any rules for the time being in force under the Indian Explosives Act, 1884, or the Petroleum Act, 1886, by notice,

Power to control private stores of inflammable materials or explosive substances.

require any person who uses any place for the storage for private use, and not for sale, of wood, firewood, thatching materials, hay, grass, straw, coal or any other highly inflammable material, or of kerosine, petroleum, naphtha or any other inflammable oil or spirit, or of fireworks or any other explosive substance,

to comply with any directions specified in the notice for ensuring safety from fire.

[*Clause* (25).] (777(*f*), 780.(4))

418. Whoever stacks or collects dry grass, straw or any other highly inflammable material, or constructs a matted structure or a cooking-place, within one hundred yards of any public building or of any building having a thatched roof, or in any other place in which the collection or placing of highly inflammable materials may be prohibited by public notice issued by the Cantonment Authority, shall be punishable with fine which may extend to fifty rupees, or with imprisonment for a term which may extend to eight days.

Penalty for collecting inflammable materials in prohibited place.

[*Bengal Act IV of 1883, ss. 23 and 26, and Clause* (25).] (814, 815.)

419. (*1*) Whoever without the general or special permission of the Cantonment Authority lets off fire works or rockets, or sends up a fire-balloon, or lights a bonfire, shall be punishable with fine which may extend to fifty rupees, or with imprisonment for a term which may extend to eight days.

Penalty for letting off fire-works, sending up fire-balloon or lighting bonfire without permission.

(*2*) Whenever a breach of this section has been committed in any private building or land, it shall be presumed, until the contrary is proved, that it was committed by the owner, grantee or occupier of the building or land.

[*Act XLVIII of 1860, s. 19 (3), and Clause* (25).] (816.)

420. Whoever, in any street or public place, without the permission of the Cantonment Magistrate, puts up any post or other thing whereon to affix lamps for the purpose of illumination, or affixes to or lights anything on any building for the said purpose, shall be punishable with fine which may extend to twenty rupees, or with imprisonment for a term which may extend to four days.

Penalty for illuminating building without permission.

Powers of Entry and Inspection.

[*Clause* (28).] (871.)

421. Whenever the Cantonment Magistrate has reason to believe that any person is not complying with the directions contained in a notice served upon him under section 417, he may, by himself or by any person authorised by him in this behalf, at all reasonable times enter into or on and inspect any building or land in respect of which the said notice has been served.

Power of entry into building or land used for storing inflammable material or explosive substance.

422. If any fire-works or rockets are let off, or any fire-balloon is sent up, or bon-fire lighted from or in any building or land without the permission of the Cantonment Authority, the Cantonment Magistrate, by himself or by any person authorised by him in this behalf, may at all reasonable times enter into or on and inspect such building or land.

Power of entry where fire-works are let off, &c., without permission.

[*Clause* (28).] 872

CHAPTER XXVI. (a)

STREETS AND PUBLIC PLACES.

423. The Cantonment Authority shall, so far as the funds placed at its disposal for the purpose permit, cause the streets to be watered, and for that purpose may provide such establishment, animals, carts, works and engines as it may think necessary.

Cantonment Authority's obligation to water streets.

[*Madras Act I of 1884, s. 328.*] (546.)

424. (*1*) The Cantonment Authority may close temporarily any street or part of a street for the purpose of repairs, or for the purpose of constructing or repairing any drain, culvert or bridge, or for any other public purpose.

Closing and opening of streets.

[*Act XVIII of 1889, s. 46, and Clause* (31).] (433.)

(*2*) No street in a cantonment shall be permanently closed, and no new street shall be opened in a cantonment without the previous sanction of the Commander-in-Chief.

425. (*1*) Whenever the pavement or surface of any street, or any drain in a street, is opened or broken up by the Cantonment Authority for the purposes of any work, that Authority shall with all convenient speed complete the work and fill in the ground, and make good the pavement, surface or drain so opened or broken up, and carry away the rubbish occasioned by the work; and

Breaking up of street and protection of broken places.

[*Bengal Act II of 1888, s. 226.*] (429.)

shall in the meantime cause the place where the pavement or surface is opened or broken up to be fenced and to be sufficiently lighted during the night.

(*2*) Whoever without the permission of the Cantonment Magistrate takes down, alters or removes any bar, chain or post, or extinguishes any light, placed by the Cantonment Authority to protect any place in a street which has been opened or broken up shall be punishable with fine which may extend to fifty rupees.

[*Madras Act I of 1884, s. 293.*] (430.)

426. The Cantonment Authority may grant permission in writing for the temporary occupation of any street or public place for the purpose of depositing building materials, or making any

Power to permit temporary occupation of street or public place.

[*Act XVIII of 1889, s. 47.*] (434.)

(a) This chapter deals with the maintenance of the public streets at all times in a fit state for traffic, and provides rules for the efficient control of traffic.

The provisions are those generally to be found in Municipal Acts.

temporary excavation therein or erection thereon, subject to such conditions as it may prescribe for the safety or convenience of persons passing by or dwelling or working in the neighbourhood, and may charge fees for such permission, and may at its discretion withdraw the permission.

Explanation.—"Temporary erection" includes a booth or other structure put up on the occasion of a ceremony or festival.

[*Act XVIII of 1889, s. 106.*] (436.)

Penalty for altering, obstructing or encroaching upon street or public place.

427. Whoever without the permission of the Cantonment Authority—

(*a*) alters, obstructs or encroaches upon any street, or

(*b*) displaces, takes up or alters the pavement or other materials, or the fences or posts of any street or public place, or

(*c*) deposits building materials or goods or any other thing on any street or public place, or

(*d*) makes any hole or excavation in any street or public place,

shall be punishable with fine which may extend to fifty rupees.

[*Clause (17).*] (721—723.)

Regulation of processions and public assemblies.

428. (*1*) The Cantonment Magistrate may, as occasion may require, permit or prohibit any procession or public assembly in the cantonment,

and may permit or prohibit the use of music by any procession or public assembly.

(*2*) The Cantonment Magistrate may, in the absence of the officer locally superintending the police and having statutory authority in this behalf,—

(*a*) direct the conduct of processions and public assemblies in any street or public place, and prescribe the routes and the times by and at which processions may pass;

(*b*) regulate the use of music in any street or public place on the occasion of any festival or ceremony; and

(*c*) take such steps as to him may seem proper for keeping order and preventing obstruction in or near any street or public place on occasions of processions or public assemblies, or whenever a crowd is anticipated, or during times of public worship, or whenever for any reason obstruction is anticipated.

(*3*) Whoever—

opposes or disobeys any order issued, or fails to comply with the conditions subject to which any permission is given, by the Cantonment Magistrate under this section, or

conducts or joins in any procession or public assembly, or uses, plays or joins in any music, in contravention of any prohibition or direction made or given under this section,

shall be punishable with fine which may extend to fifty rupees, or with imprisonment for term which may extend to eight days.

[*Bombay Act III of 1888, ss. 331 and 471, and Act XVIII of 1889, s. 110.*] (437.)

Penalty for injuring or disturbing direction-post, lamp or lamp-post, and damages in case of accidental injury to lamp.

429. (*1*) Whoever wilfully breaks, throws down or damages, or without being authorised by the Cantonment Magistrate defaces or disturb, any direction-post, lamp, or lamp-post, or any pole, standard, stay, strut or other contrivance for carrying, suspending or supporting any direction-post or lamp or the appurtenances of any lamp,

or without being authorised as aforesaid extinguishes any light

maintained by the Cantonment Authority in any street or public place,

shall be punishable with fine which may extend to twenty rupees.

[*Bombay Act III of 1888, ss. 332 and 505.*]

(*2*) If any person through mere negligence or by accident breaks any lamp set up in a street or public place, the Cantonment Magistrate may, by order in writing, direct him to pay the whole or such portion of the damage caused by the injury as may to him seem fit, and, in default of payment of the amount of such damage on demand, the same may be levied by the Cantonment Magistrate in the same manner as a fine.

[*Madras Act I of 1884, s. 366.*] (674.)

Power to prohibit street sales.

430. The Cantonment Authority may by public notice prohibit the sale or exposure for sale of any animal or article in or upon any street specified in the notice, and may in like manner cancel, suspend or modify such prohibition.

[*Madras Act IV of 1884, s. 190.*]

Cart-stands and public halting-places.

431. The Cantonment Authority may provide places for the purpose of being used as cart-stands or public halting-places, and may levy fees for the use thereof.

[*Madras Act III of 1889, s. 3 (1).*] (730.)

Penalty for rash driving or riding.

432. Whoever in any street or public place drives or rides any animal, or drives, drags or pushes any vehicle, in a rash or negligent manner shall be punishable with fine which may extend to fifty rupees, or with imprisonment for a term which may extend to eight days.

[*Madras Act III of 1889, s. 3 (3).*] (731.)

Penalty for disregarding the rule of the road.

433. Whoever in any street or public place, without reasonable excuse, and so as to cause danger or obstruction to any person, drives, drags or pushes any vehicle otherwise than on the near or left side of the road shall be punishable with fine which may extend to twenty rupees, or with imprisonment for a term which may extend to four days.

[*Clause (17).*] (725.)

Penalty for driving or riding contrary to public notice.

434. Whoever drives or rides any animal, or any animal of a specified description, or drives any vehicle, on a road, at a time or in a manner prohibited by public notice issued by the Cantonment Authority, shall be punishable with fine which may extend to twenty rupees, or with imprisonment for a term which may extend to four days.

[*Madras Act III of 1889, s. 3 (2).*] (734.)

Penalty for causing mischief or obstruction in driving animal.

435. Whoever in any street or public place, by negligence or ill-usage in driving any animal, causes any mischief or obstruction

by such animal shall be punishable with fine which may extend to fifty rupees, or with imprisonment for a term which may extend to eight days.

[*Clause (17).*] (726.)

Penalty for not removing elephant or camel on approach of horse or bullock-cart.

436. Whoever, being an elephant-driver or camel-driver, omits, on being requested so to do, to remove his elephant or camel to a safe distance on the approach of a horse, whether ridden or driven, or of a vehicle drawn by bullocks, shall be punishable with fine which may extend to twenty rupees, or with imprisonment for a term which may extend to four days.

[*Madras Act III of 1888, s. 71 (iv).*] (738.)

Penalty for driving without a sufficient light.

437. Whoever in any street or public place drives, drags or pushes any vehicle at any time between half an hour after sunset and one hour before sunrise without a sufficient light, unless there is sufficient moonlight to render a light unnecessary, shall be punishable with fine which may extend to twenty rupees, or with imprisonment for a term which may extend to four days.

[*Clause (17).*] (737.)

Penalty for driving vehicle without proper means of control.

438. Whoever drives any vehicle on a road without having proper means of controlling the animal yoked, harnessed or otherwise fastened thereto shall be punishable with fine which may extend to twenty rupees, or with imprisonment for a term which may extend to four days.

[*Madras Act III of 1888, s. 71 (viii).*] (736.)

Penalty for permitting child to control animal or vehicle.

439. Whoever in any street or public place permits

any animal or vehicle to be under the control of a child under the age of twelve years, or

any animal or vehicle of a description specified in a public notice issued in this behalf by the Cantonment Authority to be under the control of a person under such age as may be prescribed in the said notice,

shall be punishable with fine which may extend to twenty rupees, or with imprisonment for a term which may extend to four days.

[*Madras Act III of 1889, s. 3 (4).*] (732.)

Penalty for leaving vehicle or animal unattended.

440. Whoever in any street or public place, being in charge of any vehicle or animal, leaves it without reasonable excuse at such a distance as not to have it under due control shall be punishable with fine which may extend to twenty rupees, or with imprisonment for a term which may extend to four days.

[*Madras Act III of 1889, s. 3 (5).*] (733.)

Penalty for obstructing thoroughfare.

441. Whoever in any street or public place causes any vehicle, with or without animals harnessed thereto, to remain or stand longer than may be necessary for loading or unloading, or for taking up or setting down passengers, except at some place appointed by the Cantonment Authority by public notice for such purposes,

or leaves or fastens any vehicle or animal so as to cause obstruction,

or in any other way wilfully obstructs or causes obstruction to the free passage of any thoroughfare,

shall be punishable with fine which may extend to twenty rupees, or with imprisonment for a term which may extend to four days.

[*Madras Act III of 1888, s. 71 (vii).*] (734.)

Penalty for obstructing footway.

442. Whoever leads or rides any animal, or drives, drags or pushes any vehicle, upon any footway in a street or public place, or fastens any animal so that it can stand across or upon any such footway, shall be punishable with fine which may extend to twenty rupees, or with imprisonment for a term which may extend to four days.

[*Madras Act III of 1888, s. 71 (x).*] (729.)

Penalty for making or repairing vehicle, or cleaning or exposing for show, hire or sale an animal or vehicle, or training or exercising an animal, at unauthorized place or time.

443. Whoever in any street or public place, except at such places (if any) and at such times (if any) as may be prescribed by the Cantonment Authority by public notice,—

(*a*) makes or repairs any part of a vehicle, except in cases of accident where repair on the spot is necessary, or

(*b*) cleans or exposes for show, hire or sale any animal or vehicle, or

(*c*) trains or breaks or leads for exercise any animal,

shall be punishable with fine which may extend to fifty rupees, or with imprisonment for a term which may extend to eight days.

[*Madras Act III of 1888, s. 71 (xiii).*] (735.)

Penalty for carrying article projecting beyond vehicle.

444. Whoever in any street or public place without the permission of the Cantonment Magistrate conveys any article which projects more than five feet in front or behind the vehicle or vehicles on which it is placed shall be punishable with fine which may extend to ten rupees, or with imprisonment for a term which may extend to four days.

[*Clause (17).*] (739.)

Power to prescribe proper tires for vehicles taken along a road.

445. (*1*) The Cantonment Authority may, if it thinks fit, with the concurrence of the District Magistrate, by public notice direct that vehicles of any description specified in the notice shall not be taken along any road unless their wheels are provided with tires of such description as may be specified in the notice.

(*2*) If any vehicle is driven, dragged or pushed along a road in contravention of any notice issued under this section, the owner shall be punishable with fine which may extend to twenty rupees, and, in case of a continuing offence, with an additional fine which may extend to three rupees for every day after the first during which the offence continues.

Cantonment Code.

(Part IV.—The Public Health, Safety and Convenience.—Chapter XXVII.—Further Provisions relating to Buildings and Lands.—Sections 446-452.)

CHAPTER XXVII. [a]

FURTHER PROVISIONS RELATING TO BUILDINGS AND LANDS.

Construction of buildings.

[Act XVIII of 1889, s. 52, and Clause (15).] (387.)

446. (*1*) Every person intending to erect or re-erect any building (except a person applying under Chapter VIII for permission to occupy land) shall apply in writing to the Cantonment Authority, and submit with his application a plan and specifications of the works intended to be constructed and the materials to be used, and shall obey all written orders which may be given by the Cantonment Authority either—

Conditions of permission to erect or re-erect building.

(*a*) prohibiting the erection or re-erection if deemed, for any sufficient reason, objectionable, or

(*b*) in respect of all or any of the matters following, namely:

(*i*) free passage or way in front of the building,

(*ii*) space to be left about the building to secure free circulation of air and facilitate scavenging,

(*iii*) ventilation and drainage,

(*iv*) level and width of foundation, level of lowest floor and stability of structure,

(*v*) if the building abuts on a street, the line of frontage with neighbouring buildings.

(*2*) The Cantonment Authority shall make full compensation to any owner of land not belonging to the Government for any damage he may sustain in consequence of the prohibition of the re-erection of any building, but no compensation shall be made to any grantee of land belonging to the Government in consequence of any such prohibition.

(40.) *Explanation.*—The expression "erect any building" includes—

(*i*) the erection of a wall,

(*ii*) all additions and alterations which involve new foundations or increased superstructure on existing foundations,

(*iii*) the conversion into a dwelling-house of any building not originally constructed for human habitation, and

(*iv*) the conversion into more than one dwelling-house of a building originally constructed as one dwelling-house only.

[Act XVIII of 1889, s. 52.] (388.)

447. If any building is erected or re-erected, wholly or in part, in contravention of the provisions of section 446 or of any orders given by the Cantonment Authority thereunder, the Cantonment Authority may by notice require the building to be altered or demolished as it may deem necessary, and all materials collected for the building or resulting from the alteration or demolition to be removed.

Power to require alteration or demolition of unauthorized building and removal of materials.

[Act XVIII of 1889, s. 50.] (386.)

448. The Cantonment Authority may, by order in writing, direct that, within certain limits to be fixed by it, the roofs and external walls of huts or other buildings shall not be made or renewed of grass, mats, leaves or any other highly inflammable material, unless with the written permission of the Cantonment Authority; and

Power to prohibit use of inflammable materials for roofs and external walls.

the Cantonment Authority may by notice require any person who has disobeyed any such direction to remove or alter, as it may think fit, the roofs or walls so made or renewed.

[Bombay Act III of 1888, s. 268, and Act XVIII of 1889, s. 71.] (473, 516.)

449. The Cantonment Authority may by notice require any person who without its permission in writing newly erects or rebuilds any building over a main or over a public water-course, water-pipe, drain or culvert to pull down or otherwise deal with the building as it thinks fit.

Unauthorised building over main, water-course, pipe, drain or culvert.

[Act XVIII of 1889, s. 51.] (435.)

450. (*1*) If any building or part of a building projects beyond the front of the building on either side thereof, or beyond the regular line of a street either existing or determined on for the future, the Cantonment Authority may,

Power to regulate line of buildings.

whenever the building or part has been either entirely or in greater part taken down or burnt down or has fallen down,

by notice require the building or part when being re-built to be set back to or towards the front of the adjoining buildings or the said regular line:

Provided that the Cantonment Authority shall make full compensation to the owner for any damage he may sustain in consequence of his building or any part thereof being set back.

(*2*) The Cantonment Authority may, on such terms as it may think fit, allow any building to be set forward for the improvement of the line of the street.

[Madras Act I of 1884, ss. 283 and 284.] (431.)

451. (*1*) All doors, gates, bars and ground-floor windows which open on any street shall be made so as not to open outwards.

Ground-floor doors, &c., not to open outwards.

(*2*) If any such door, gate, bar or window opens outwards on any street, the Cantonment Authority may by notice require the grantee, owner or occupier of the premises to which the same is attached, within eight days after service of the notice, to alter the same so that it shall not open outwards.

Projections and Obstructions from Buildings.

[Act XVIII of 1889, s. 53 (1).] (380.)

452. It shall not be lawful, unless with the written permission of the Cantonment Authority, for the owner or occupier of any building in a street to add to or place against or in front of the building any projection or structure overhanging, projecting into or encroaching on the street or into or on any drain therein.

Placing of projection or obstruction.

(a) This chapter deals with a large number of important matters relating to immoveable property.

It provides for control by the Cantonment Authority over the construction of buildings in all their details; for the removal or cleansing of insanitary buildings and places; for powers over overcrowded, dilapidated, ruinous, and untenanted buildings; for the preservation of lands, the prevention of unwholesome excavations, and control over undue irrigation and unsuitable crops; and lastly for control over trees, and the construction and maintenance of fences.

The rules are almost entirely a selection from the principal Municipal Acts.

Cantonment Code.

(Part IV.—The Public Health, Safety and Convenience.—Chapter XXVII.—Further Provisions relating to Buildings and Lands.—Sections 453-460.)

[Act XVIII of 1889, s. 53 (2).] (381.)

453. The Cantonment Authority may by notice require the owner or occupier of any building to remove or alter any projection, encroachment or obstruction built or placed against the building or in front thereof if the same overhangs or projects into or encroaches on any street, or projects into or encroaches on any drain in the street:

Removal or alteration of projection, encroachment or obstruction.

Provided that, in the case of a projection, encroachment or obstruction which has been lawfully made, the Cantonment Authority shall make reasonable compensation to any person who suffers damage by the removal or alteration.

[Act XVIII of 1889, s. 53 (3).] (382, 383.)

454. The Cantonment Authority may give written permission to the owners or occupiers of buildings in streets to put up open verandahs, balconies or rooms projecting from an upper storey thereof to an extent beyond the line of the plinth or basement wall, and at a height from the level of the ground or street, to be specified in the written permission.

Erection of open verandahs, balconies or projecting rooms.

Troughs, Pipes and Brackets.

[Act XVIII of 1889, s. 68.] (384.)

455. The Cantonment Authority may by notice require the owner of any building in any street to put up, alter or keep in good condition proper troughs and pipes for receiving and carrying the water from the roof and other parts thereof, and for discharging the same so as not to cause injury to the street or inconvenience to persons passing along the street, or to the owners or occupiers of adjoining premises.

Power to put up troughs and pipes for rain-water.

[Act XVIII of 1889, s. 48.] (385.)

456. The Cantonment Authority may attach to the outside of any buildings brackets for lamps in such a manner as not to occasion inconvenience.

Power to attach brackets for lamps.

Numbering of Estates.

[Act XVIII of 1889, ss. 49 and 111.] (362, 363.)

457. (*1*) The Cantonment Authority may cause the distinguishing number of any estate to be affixed on any building or thing belonging to the estate in such place as it may think fit, and may in like manner from time to time cause the number to be altered.

Affixing of numbers on estates.

(*2*) Whoever destroys, pulls down or defaces any distinguishing number put up under this section by order of the Cantonment Authority, or puts up any different number, shall be punishable with fine which may extend to twenty rupees.

Insanitary Buildings and Lands.

[Bengal Act II of 1888, s. 257.] (365.)

458. (*1*) Whenever it appears to the Cantonment Authority that any block of buildings is, by reason of the manner in which the buildings are crowded together, or for any other reason, in an unhealthy condition,

Report by medical officers on insanitary block of buildings.

the Cantonment Authority may cause the block to be inspected by a committee of medical officers consisting of the Sanitary Officer and the Civil Surgeon of the district, or, where the services of the Civil Surgeon are not available, the Sanitary Officer and any two other medical officers.

(*2*) The medical officers shall make a report in writing on the sanitary condition of the block; and if the report states that the condition of the block is likely to cause risk of disease to the inhabitants of the block or of the neighbourhood, or to endanger the public health, the Cantonment Magistrate shall cause to be prepared a plan showing the existing arrangement of the block and what changes are proposed by the medical officers.

(*3*) The report of the medical officers shall clearly indicate the buildings which should wholly or in part be removed, the roads and drains which should be constructed, the tanks and low lands which should be filled up, and any other works which are necessary to abate the unhealthy condition of the block.

Explanation.—In this section and section 459 the word "buildings" means huts, servants' houses, stables, cowhouses and structures or a like nature.

[Bengal Act II of 1888, s. 268.] (366.)

459. (*1*) If, upon receipt of the report of the medical officers, the Cantonment Authority is of opinion that the block is an unhealthy area,

Procedure for carrying out proposed improvements in insanitary block.

and that all or any of the buildings should be removed for the purpose of making the proposed improvements,

the Cantonment Authority shall forward the report and the plan prepared under section 458, together with such estimates as are necessary for a due understanding of the same, for the orders of the Commander-in-Chief.

(*2*) If the Commander-in-Chief sanctions the proposed improvements or any part thereof, the Cantonment Authority shall,—

(*a*) if the land is held by grantees, remove such buildings as the Commander-in-Chief may direct, paying reasonable compensation therefor; and

(*b*) if the land is private property, take the necessary steps for acquiring such land and buildings as the Commander-in-Chief may direct,

and shall then proceed to carry out such other of the proposed improvements as the Commander-in-Chief may direct:

Provided that the grantees or owners, or any of them, shall in every case have the option of carrying out the improvements themselves, receiving such compensation as may be determined by the Cantonment Authority.

[Bombay Act III of 1888, s. 380.] (364.)

460. (*1*) If the Cantonment Authority is of opinion that any hut or shed used either as a dwelling or as a stable or for any other purpose

Insanitary huts and sheds.

is likely, by reason of its being built without proper means of drainage, or on account of the impracticability of scavenging, or on account of the manner in which it and other huts or sheds are crowded together, to cause risk of disease to the inmates thereof or to the inhabitants of the neighbourhood,

or is for any reason likely to endanger the public health,

it may, by notice, which shall be affixed to some conspicuous part of the hut or shed, require the owner or occupier of the hut or shed, or the grantee or owner of the land on which it stands, to remove or alter the hut or shed,

or to take such order for the improvement thereof as the Cantonment Authority may deem necessary.

(2) The Cantonment Authority shall make reasonable compensation to any person who suffers damage by the removal under this section of any hut or shed other than a hut or shed which was erected without authority on land belonging to the Government.

[*Act XVIII of 1889, s. 79.*] (376)

Power to prohibit use of building unfit for human habitation.

461. If any building appears to the Cantonment Authority to be unfit for human habitation in consequence of the want of proper means of drainage or ventilation, or for other sufficient reason, the Cantonment Authority may by notice prohibit the owner or occupier of the building from using it for human habitation, or suffering it to be so used, until the Cantonment Authority is satisfied that it has been rendered fit for such use.

[*Act XVIII of 1889, s. 78.*] (377, 643.)

Power to require filthy premises to be cleansed.

462. (1) If the owner or occupier of any premises suffers the same to be in a filthy or unwholesome state, the Cantonment Authority may by notice require him to cleanse the same, or otherwise put them in a proper state, within twenty-four hours.

(2) The notice may specify the manner, with the concurrence of the Sanitary Officer, in which the cleansing shall be wholly or in part carried out.

[*Madras Act I of 1884, s. 325, and Bengal Act II of 1888, s. 315.*] (402, 403.)

Cleansing or filling up of offensive well, marshy ground, &c.

463. (1) Whenever any well, tank or marshy ground, or any waste or stagnant water, whether within any private enclosure or not, appears to the Cantonment Authority to be injurious to health or offensive to the neighbourhood, the Cantonment Authority may by notice require the grantee, owner or occupier of the land within thirty days from the service of the notice to cleanse such well, or to fill it up with clean soil, gravel or sand, or to fill up such tank or marshy ground, or to drain off or remove such waste or stagnant water, as the case may be:

Provided that if, in the opinion of the Cantonment Authority, it is unreasonable to throw the whole expense on the grantee, owner or occupier, it may, with the previous sanction of the Commander-in-Chief, specify in the notice how much of the expense or what proportion thereof will be borne by the Government.

(2) No well, whether situate on private or public land, shall be filled up otherwise than with clean soil, gravel or sand.

[*Clause (16).*]

Penalty for cultivating prohibited crop.

464. Whoever cultivates any description of crop which is prohibited by the Cantonment Authority by public notice shall be punishable with fine which may extend to fifty rupees.

[*Act XVIII of 1889, s. 81.*] (398, 400.)

Power to control agriculture and irrigation.

465. (1) If the Cantonment Authority considers the cultivation of any description of crop not specified in a notice issued under section 464, or the use of any kind of manure, or the irrigation of land in any specified manner, in any place within the cantonment to be injurious to the public health, the Cantonment Authority may by notice require any person or persons carrying on the cultivation of the crop, or using the manure or irrigating the land in that manner to cease therefrom, or to obey any directions it may give, imposing such conditions as may prevent the injury.

(2) When any land to which such notice applies has been lawfully prepared for cultivation, or any crop is sown therein or is standing thereon, the Cantonment Authority shall make compensation to all persons interested in the land or crop for any damage caused to them in consequence of the notice.

[*Act XVIII of 1889, s. 76.*] (397.)

Removal of noxious vegetation.

466. The Cantonment Authority may by notice require the owner or occupier of any land to clear away and remove any thick or noxious vegetation or undergrowth which appears to the Cantonment Authority to be injurious to health or offensive to the neighbourhood.

Overcrowded Dwellings.

[*Bengal Act II of 1888, s. 320, and Clause (14).*] (367, 369, 370.)

Powers as to overcrowded dwelling.

467. (1) If it appears to the Cantonment Authority that any building used as a dwelling is so overcrowded as to endanger the health of the inmates thereof,

it may, after such enquiry as it thinks fit to make, by notice require the owner of the building within a reasonable time, not exceeding six weeks, to be prescribed in the notice, to abate the overcrowding of the building by reducing the number of lodgers, tenants or other inmates thereof,

or may pass such other order as it may deem just and proper.

(2) It shall be incumbent on every tenant, lodger or other inmate of the building to vacate the same on being required by the owner so to do in pursuance of any such notice.

(3) If the owner of the building has sub-let the same, the landlord of the lodgers, tenants or other actual inmates of the building shall, for the purposes of this section, be deemed to be the owner of the building.

(4) Whoever disobeys any written notice or order lawfully issued by the Cantonment Authority under sub-section (1) shall be punishable with fine which may extend to five rupees, and, in case of a continuing breach, with an additional fine which may extend to five rupees for every day after the first during which the breach continues.

(5) Whoever disobeys any requisition lawfully issued by an owner of an overcrowded building under sub-section (2) to vacate such building shall be punishable with fine which may extend to five rupees, and, in case of a continuing breach, with an additional fine which may extend to one rupee for every day after the first day during which the breach continues.

Dilapidated Buildings.

[*Clause (15).*] (371, 372.)

Powers in respect of dilapidated building.

468. Whenever any building is so dilapidated as, in the opinion of the Cantonment Authority, to be unfit for the purpose for which it was constructed or has been used, the Cantonment Authority may, with the previous sanction of the Commander-in-Chief, by notice require the owner of the building to make it fit for one or other of those purposes.

Dangerous or Ruinous Buildings and Places.

[*Clause (17).*] (717—719.)

Control over buildings used as places of public entertainment or resort.

469. (1) The Cantonment Magistrate may prohibit the use of any building as a place of public entertainment or resort if in his opinion the building is unsafe or proper precautions have not been taken for securing the safety of the people to be assembled therein.

(2) Whoever, being the owner or occupier, or having the use, of any building, uses the same, or permits it to be used, in contravention of any order issued by the Cantonment Magistrate under this section, shall be punishable with fine which may extend to fifty rupees, or with imprisonment for a term which may extend to eight days, and, in case of a continuing offence, with an additional fine which may extend to five rupees for every day after the first during which the offence continues.

[*Act XVIII of 1889, s. 75.*] (379, 642.)

Power to require ruinous or dangerous building to be removed or repaired.

470. If any building, wall or structure, or anything affixed thereto, is deemed by the Cantonment Authority to be in a ruinous state or in any way dangerous, it may by notice require the owner or occupier forthwith either to remove the same or to cause such repairs to be made to the building, wall or structure or thing affixed thereto as it may consider necessary for the public safety; and

if it appears to the Cantonment Authority to be necessary in order to prevent imminent danger, it shall forthwith take such steps as are in its opinion necessary to avert the danger.

[*Act XVIII of 1889, s. 74.*] (378, 642.)

Power to require dangerous building or excavation to be secured.

471. If any building, or any well, tank or other excavation, is for want of sufficient repair, protection or enclosure dangerous to persons passing by or dwelling or working in the neighbourhood, the Cantonment Authority may by notice require the owner or occupier thereof to repair, protect or enclose the same; and

if it appears to the Cantonment Authority to be necessary in order to prevent imminent danger, it shall forthwith take such steps as are in its opinion necessary to avert the danger.

Untenanted Buildings or Land.

[*Act XVIII of 1889, s. 80.*] (373—375, 641.)

Powers in respect of untenanted building or land which is a nuisance.

472. The Cantonment Authority may by notice require the owner, or person claiming to be the owner, of any building, or the grantee or person claiming to be the grantee of any land,

which, by reason of abandonment or disputed ownership or other cause, remains untenanted, and thereby becomes a resort of idle and disorderly persons, or otherwise a nuisance,

to secure or enclose the same within a reasonable time to be specified in the notice.

Preservation of Lands.

[*Madras Act I of 1884, s. 331.*] (425.)

Penalty for injuring public land or water.

473. If any person, not acting in the discharge of his duty as an officer of the Government or a servant of the Cantonment Authority, and not having obtained the written permission of the Cantonment Magistrate,

removes grass, wood, earth, sand or any other material from, or

deposits any matter or makes any encroachment or obstruction in or upon,

any land, river, estuary, canal, backwater, watercourse, lake or tank within the cantonment which is not under the control of a private person,

he shall be punishable with fine which may extend to fifty rupees.

[*Bengal Act II of 1888, s. 314, and Clause (16).*] (401.)

Penalty for making excavation without permission, and filling up of unauthorized excavations.

474. If without the permission of the Cantonment Authority

any person makes an excavation in any land in the cantonment for the purpose of removing earth, sand, stone, gravel, bricks, coal, metal or any other thing, or of storing offensive matter or rubbish, or of providing for the passage of water, or for any other purpose, or

digs any tank, well or pit in any such land,

he shall be punishable with fine which may extend to fifty rupees, or with imprisonment for a term which may extend to eight days, and the Cantonment Authority may by notice require the grantee, owner or occupier of the land within two weeks to fill upthe excavation, tank, well or pit with earth, or with such other material as it may approve.

[*Act XX of 1891, ss. 144—146.*] (393, 394, 426.) XIII of 1889.

Preservation of land in hill cantonments.

475. (1) The Cantonment Authority of any cantonment situated in a hilly tract may make rules, consistent with the Cantonments Act, 1889, and this Code, for regulating or prohibiting the cutting or destroying of trees or shrubs, or the making of excavations or removal of soil or quarrying, where such regulation or prohibition appears to the Cantonment Authority to be necessary for the maintenance of a water-supply, the preservation of the soil, the prevention of land-slips, or of the formation of ravines or torrents, or the protection of land against erosion, or the deposit thereon of sand, gravel or stones.

(2) Where there is a Cantonment Committee, rules under this section may be made only at a special meeting.

(3) In making any rule under this section, the Cantonment Authority may direct that any breach of it shall be punishable with fine which may extend to fifty rupees, and, when the breach is a continuing breach, with an additional fine which may extend to five rupees for every day after the first during which the breach continues.

(4) In lieu of or in addition to such fine, the Magistrate may require the offender to remedy the mischief so far as lies within his power.

(5) No rule made under this section shall come into force until it has been confirmed by the Commander-in-Chief and notified by public notice.

Trespass.

[*Act XLVIII of 1860, s. 9.*] (824.)

Penalty for trespassing on public land.

476. Whoever without reasonable excuse trespasses in or on any building or land belonging to the Government or appropriated to a public purpose shall be punishable with fine which may extend to twenty rupees.

Cantonment Code.

(Part IV.—The Public Health, Safety and Convenience.—Chapter XXVII.—Further Provisions relating to Buildings and Lands.—Sections 477-483.)
Chapter XXVIII.—Cattle-disease.—Section 484.)

Trees, fences and hedges.

[Clause (16).] (392—394.)

Felling of trees.

477. (1) No general felling of trees shall be ordered by the Cantonment Authority without the previous sanction of the Commander-in-Chief.

(2) Whoever without the written permission of the Cantonment Authority fells any tree growing in a cantonment shall be punishable with fine which may extend to fifty rupees, or with imprisonment for a term which may extend to eight days.

[Clause (16).] (395.)

Lopping and trimming of trees.

478. The Cantonment Authority may from time to time,—

(*a*) in such manner as it may think fit, or may be directed by the Commander-in-Chief, lop or trim any trees growing on land belonging to the Government in the cantonment, or

(*b*) by general notice require all grantees, owners or occupiers of land to lop or trim in such manner as aforesaid the trees growing on lands under their control, or

(*c*) by special notice require any grantee, owner or occupier of land to lop or trim in such manner as aforesaid any tree or trees growing on land under his control:

Provided that no order for the general trimming of trees in any manner which might be considered likely to cause permanent damage thereto shall be given without the previous sanction of the Commander-in-Chief.

[Madras Act I of 1884, s. 329, and Clause (15).] (390, 391.)

Construction and maintenance of fences or hedges.

479. (1) The Cantonment Authority may by notice require the grantee, owner or occupier of any land to construct, maintain or repair sufficient fences for such land, so that they may not exceed such height from the level of the ground as the Cantonment Authority may from time to time determine.

(2) Any notice requiring the construction of a fence may specify the materials to be used; and, in determining what materials are to be used, the Cantonment Authority shall be guided by the usage of the neighbourhood, and may in accordance therewith direct that the fence shall be a hedge of any particular description, or shall be made of mud, bricks, stone, wood or any other material.

[Clause (15).] (389.)

Cutting or trimming of hedges.

480. The Cantonment Authority may by notice require the grantee, owner or occupier of any land to cut or trim within three days, in the manner specified in the notice, the hedges standing on the land.

Powers of Entry and Inspection.

[Act XVIII of 1889, s. 62.]

Power to enter and inspect building and direct cleansing of same.

481. The Cantonment Magistrate, by himself or by any person authorised by him in this behalf, may, after giving twenty-four hours' notice to the occupier, or, if there is no occupier, to the owner of any building, at any time between sunrise and sunset, enter into and inspect the building,

and the Cantonment Authority may, after such inspection, by notice direct that all or any part of the building be forthwith internally or externally lime-washed, disinfected or otherwise cleansed for sanitary reasons.

[Clause (28).] (845.)

Power to enter land to examine excavations, &c., or to enquire into its sanitary condition.

482. The Cantonment Magistrate, by himself or by any person authorised by him in this behalf, may, after giving twenty-four hours' notice to the occupier, or, if there is no occupier, to the grantee or owner of any land, at any time between sunrise and sunset,

enter on the land for the purpose of examining the condition of wells, tanks, pools, excavations, vegetation, trees, fences or hedges, or of enquiring into the sanitary condition of the land.

[Clause (28).] (858.)

Power to enter and inspect building used as a place of public entertainment or resort.

483. The Cantonment Magistrate, by himself or by any person authorised by him in this behalf, may, after giving twenty-four hours' notice to the occupier, at any time between sunrise and sunset enter into and inspect any building which is being, or is about to be, used as a place of public entertainment or resort

for the purpose of ascertaining whether the building is safe, or whether proper precautions have been taken for securing the safety of the people to be assembled therein.

CHAPTER XXVIII. [a]

CATTLE-DISEASE.

Preliminary.

[Clause (31).] (979.)

Certain cantonments excluded from operation of chapter.

484. This chapter shall not apply [b]—

(*a*) to any cantonment situate in the territories administered by the Governor of Fort St. George in Council, or

(*b*) so far as regards horses affected with glanders, farcy or any dangerous disease notified under section 2 of the Bengal Contagious Diseases (Animals) Act, 1880, to any cantonment situate in the territories administered by the Lieutenant-Governor of Bengal, or VIII of 1880.

(*c*) so far as regards horses affected with glanders or farcy, to any cantonment situate in the territories administered respectively by the Governor of Bombay in Council, the Lieutenant-Governors of the North-Western Provinces and the Punjab, and the Chief Commissioners of Oudh, the Central Provinces, Burma, Assam and Ajmere.

Explanation.—In clauses (*b*) and (*c*) of this section "horse" includes also ponies, asses, mules and jennets.

(a) The Glanders and Farcy Act (XX of 1879) and the Bengal Contagious Diseases (Animals) Act (Bengal Act VIII of 1880) deal only with horses. Madras Act II of 1866 is the only Act dealing with cattle-disease generally. The object of this Chapter is to provide for Cantonment Authorities a means of protecting themselves against cattle-disease without interfering with the provisions of existing enactments on the subject.

(b) The chapter will apply (*1*) to all cantonments in Bengal, except as regards horses affected with glanders, farcy or any dangerous disease notified under section 2 of Bengal Act VIII of 1880; (*2*) to all cantonments in the Bombay Presidency, the North-Western Provinces, the Punjab, Oudh, the Central Provinces, Burma, Assam and Ajmere, except as regards horses affected with glanders or farcy; and (*3*) to all cantonments in British Baluchistan.

Cantonment Code.

(Part IV.—The Public Health, Safety and Convenience.—Chapter XXVIII.—Cattle-disease.—Sections 485-495.)

[Clause (31).] (1016.)

Certain animals partly excepted from operation of chapter.

485. Sections 487 to 491 (both inclusive), 495, 497 to 499 (both inclusive), 502, 503, 506 and 508 shall not apply to any chargers of military officers which are under the care of a Government veterinary surgeon, or to any animals belonging to a military force quartered in a cantonment.

[Madras Act II of 1866, s. 2, and Bengal Act VIII of 1880, s. 2.] (980—982.)

Definitions.

486. In this chapter, unless there is something repugnant in the subject or context,—

(*1*) "animal" means a horse, pony, ass, mule, jennet, camel, buffalo, bull, bullock, cow, heifer, calf, sheep, lamb, goat, kid or pig;

(*2*) "dangerous cattle-disease" means glanders, farcy or anthrax, and includes any other infectious or contagious disease among animals which the Local Government may, by notification in the official Gazette, declare to be a dangerous cattle-disease; and

(*3*) "veterinary surgeon" includes any salútri or other person appointed by the Local Government to act as a veterinary surgeon for the purposes of this chapter.

Veterinary Hospitals.

[Clause (22).] (983.)

Provision and maintenance of veterinary hospitals.

487. The Cantonment Authority may by public notice, with the previous sanction of the Commander-in-Chief, appoint such places as it thinks fit within or (with the concurrence of the District Magistrate) outside the cantonment for the purpose of being used as hospitals for animals affected with dangerous cattle-disease.

[Madras Act II of 1866, s. 3.] (985.)

Appointment of person to take charge of veterinary hospitals.

488. The Cantonment Authority shall appoint such person as it thinks fit to be in charge of any hospitals provided under this chapter.

[Clause (31).] (986.)

Medical supplies and furniture.

489. The Cantonment Authority shall furnish every hospital provided under this chapter with all necessary drugs, instruments, apparatus, furniture and appliances.

[Madras Act II of 1866, ss. 9 and 11.] (987, 988.)

Feeding and treatment of animals in hospital, and recovery of cost in certain cases.

490. (1) Every animal taken to a hospital provided under this chapter shall be fed and treated at the cost of the Cantonment Fund:

Provided that the owner or the person who was in charge of any such animal may himself supply food and medicines for its use, but any food or medicine so supplied must be such as the person in charge of the hospital may approve or direct.

(2) If any animal which has been fed and treated at the cost of the Cantonment Fund recovers from the disease with which it was affected, the owner, or the person who was in charge of the animal, shall pay the actual cost of its feeding and treatment while in the hospital.

(3) If such owner or other person fails to pay such cost, the Cantonment Magistrate may, after giving notice of his intention to such person, cause the animal to be sold by auction, and may apply any sum realised thereby to the payment in full or in part of such cost, paying over the balance (if any) to such person:

Provided that the Cantonment Magistrate may in his discretion remit the whole or any part of such cost in the case of any person who from poverty or for any other cause cannot reasonably be expected to pay the same.

[Clause (22).] (1007.)

Penalty for letting animal escape from hospital.

491. Whoever without the permission of the person in charge of a hospital provided under this chapter voluntarily or negligently causes or permits any animal to be turned loose, or to stray or escape, from such hospital shall be punishable with fine which may extend to fifty rupees, or with imprisonment for a term which may extend to eight days.

Prevention of the Spread of Dangerous Cattle-disease.

[Bengal Act VIII of 1880, s. 3, and Clause (22).] (1004.)

Penalty for not segregating infected animal.

492. Whoever, having in his possession or under his charge any animal which he knows, or has reason to believe, to be affected with a dangerous cattle-disease, fails to keep such animal separate from animals not so affected, shall be punishable with fine which may extend to fifty rupees.

[Act XX of 1879, s. 11, and Clause (22).] (1005.)

Penalty for careless or improper moving of animal which has been exposed to infection.

493. Whoever, having in his possession or under his charge any animal which has been in the same building or place, or in contact with any other animal which he knows, or has reason to believe, to have been affected with a dangerous cattle-disease,

moves, or causes to be moved, such animal, except in good faith, for the purpose of preventing the spread of, and with proper precautions against spreading, such disease, or except with the permission of the Cantonment Magistrate granted on the advice of a veterinary surgeon,

shall be punishable with fine which may extend to fifty rupees, or with imprisonment for a term which may extend to eight days.

[Bengal Act VIII of 1880, s. 11, and Clause (22).] (1006.)

Penalty for allowing infected animal in street, &c.

494. Whoever voluntarily or negligently works, drives or leads, or causes or permits to be worked, driven or led, on any street or public place any animal affected with a dangerous cattle-disease, except for the purpose of being taken to a veterinary surgeon or to a hospital provided under this chapter, or of being destroyed in accordance with this chapter, or

voluntarily or negligently causes or permits any such animal to be turned loose, or to stray or escape into any place whence it can afterwards escape into any street or any public or private place,

shall be punishable with fine which may extend to fifty rupees, or with imprisonment for a term which may extend to eight days.

[Act XX of 1879, s. 4.] (990.)

Power to appoint inspectors.

495. The Cantonment Authority may appoint the person in charge of any hospitals provided under this chapter, or any other person or persons whom it thinks fit, to be inspectors for the purposes of this chapter.

[*Bengal Act VIII of 1880, s. 3, and Clause (22).*] (991.)

Penalty for failing to give information of dangerous cattle-disease.

496. Whoever, having in his possession or under his charge any animal which he knows, or has reason to believe, to be affected with a dangerous cattle-disease,

fails, within six hours of his becoming cognizant of the existence of such disease, by himself or by a servant or some other person, to give information to one of the following officers, namely, the Cantonment Magistrate or an inspector or an officer of police, respecting the existence of such disease,

shall be punishable with fine which may extend to fifty rupees, or with imprisonment for a term which may extend to eight days.

[*Bengal Act VIII of 1880, s. 4.*] (993.)

Examination of diseased animal by veterinary surgeon.

497. (*1*) Whenever an officer of police receives information that an animal is affected with a dangerous cattle-disease, he shall immediately make a report to the Cantonment Magistrate or, where any inspector has been appointed under section 495, to an inspector.

(*2*) Whenever any such information is received by, or any such report is made to, the Cantonment Magistrate or an inspector, he shall cause the animal to be immediately examined by a veterinary surgeon:

Provided that, when the inspector is a veterinary surgeon, he may examine the animal himself.

[*Bengal Act VIII of 1880, s. 4.*] (994.)

Removal to hospital or destruction of diseased animal.

498. If any veterinary surgeon who examines an animal under section 497 finds that it is affected with a dangerous cattle-disease, the Cantonment Magistrate or the inspector, as the case may be, may,—

(*a*) if the veterinary surgeon certifies in writing under his hand that the animal ought in his opinion to be sent to a hospital provided under this chapter, by notice require the owner or the person in charge of the animal to forthwith either send it to the hospital or suffer it to be destroyed, or,

(*b*) if the veterinary surgeon so certifies that the animal ought in his opinion to be forthwith destroyed, cause it to be destroyed.

[*Madras Act II of 1866, s. 10.*] (994.)

Destruction of diseased animal in hospital.

499. When any animal has been removed to a hospital provided under this chapter, the person in charge of the hospital may, with the sanction of the Cantonment Magistrate, at any time cause it to be destroyed if he is of opinion that its destruction is necessary to prevent the spread of the disease with which it is affected.

[*Madras Act II of 1866, s. 8.*] (999.)

Cleansing and disinfection of premises, and disinfection or destruction of fodder, dung, &c.

500. The Cantonment Magistrate may, upon the advice of any veterinary surgeon, by notice require the owner, grantee or occupier of any building or land in or on which any animal affected with a dangerous cattle-disease has been or is to cleanse and disinfect, in such manner as may be specified in the notice, the building or land, and to disinfect, in such manner as aforesaid, and, if necessary, to destroy, any fodder, dung, refuse, rubbish, fittings or other thing which is or are likely to retain infection:

Provided that, if, in the opinion of the Cantonment Magistrate, the owner, grantee or occupier is from poverty or for any other reason unable effectually to carry out any requisition which is or might be made under this section, the Cantonment Magistrate, or any servant of the Cantonment Authority appointed by him in this behalf, may, at the expense of the Cantonment Fund, cleanse or disinfect the building or land or any part of the same, and any fodder, dung, refuse, rubbish, fittings, or other thing therein or thereon which is or are likely to retain infection.

[*Clause (22).*] (1008.)

Penalty for bringing infected animal into cantonment.

501. Whoever, having in his possession or under his charge any animal which he knows, or has reason to believe, to be affected with a dangerous cattle-disease, or to be likely to produce such disease in other animals by contact or near approach,

brings or conveys, or causes to be brought or conveyed, such animal into any cantonment, except in good faith, for the purpose of preventing the spread of, and with proper precautions against spreading, such disease,

shall be punishable with fine which may extend to fifty rupees;

and the Cantonment Magistrate or any inspector upon a certificate from a veterinary surgeon that such animal is affected with a dangerous cattle-disease may cause it to be forthwith destroyed.

[*Clause (22).*] (1010, 1012.)

Removal of infected animal from cantonment.

502. (*1*) In any case in which the Cantonment Magistrate is authorised by this chapter to direct the removal of an animal to a hospital, and

in any case in which a veterinary surgeon advises that an animal which has been exposed to the infection of a dangerous cattle-disease should be excluded from the cantonment,

the Cantonment Magistrate may, by order in writing, require the person having possession or charge of the animal to remove it from the cantonment within a time to be specified in the order, and prohibit him from permitting the animal to re-enter the cantonment without the permission of the Cantonment Magistrate.

(*2*) If any person disobeys any order given to him under sub-section (*1*), he shall be punishable with fine which may extend to fifty rupees, or with imprisonment for a term which may extend to eight days.

[*Clause (22).*] (1009.)

Power to prescribe routes for taking infected animals.

503. The Cantonment Authority may by public notice prescribe the routes by which animals which are affected with or have been exposed to the infection of any dangerous cattle-disease shall be taken, driven or led when removed for any of the purposes of this chapter:

Provided that no person shall be punished for not taking, driving or leading any such animal by a route prescribed as aforesaid if it is found to have been impracticable so to do in his case.

[*Bengal Act VIII of 1880, s. 10.*] (997.)

Disposal of carcasses.

504. Whenever any animal affected with a dangerous cattle-disease dies or is destroyed, the carcass shall be buried or burnt within such time and in such manner as the Cantonment Authority may by rules made under section 505 direct.

[*Act XX of 1879, s. 14, and Bengal Act VIII of 1880, s. 5.*] XIII of 1889. (999, 1001, 1002.)

Power to make rules.

505. (*1*) The Cantonment Authority may make rules, consistent with the Cantonments Act, 1889, and this Code, to provide for all or any of the following matters, namely:

(*a*) regulating the cleansing and disinfecting of buildings and places in which animals affected with dangerous cattle-disease have been, and the cleansing, disinfecting or destruction of cloths, fodder, dung, refuse, rubbish, fittings and other things found therein or near thereto;

(995.)

(*b*) regulating the destruction of animals certified under section 498 to be affected with dangerous cattle-disease;

(*c*) determining a proper place for the burial or burning of the carcasses of animals affected with dangerous cattle-disease; and

(997, 998, 1009 (*b*).)

(*d*) regulating the burial or burning of such carcasses.

(*2*) Rules made under clause (*d*) of sub-section (*1*) may provide, among other matters, for fixing the routes by which carcasses must be taken to the place of burial or burning, for fixing the depth at which carcasses are to be buried, for the slashing of the skin before burial, for the covering of carcasses with quicklime or some other disinfectant, and for prohibiting the exhumation of carcasses.

(*3*) Where there is a Cantonment Committee, rules under this section may be made only at a special meeting.

(*4*) No rule made under this section shall come into force until it has been confirmed by the Commander-in-Chief and the Local Government.

(*5*) Whoever disobeys any rule made under this section shall be punishable with fine which may extend to fifty rupees, or with imprisonment for a term which may extend to eight days.

[*Bombay Act III of 1888, s. 434.*] (989.)

Power to take special measures on outbreak of dangerous cattle-disease.

506. If any cantonment is at any time visited or threatened with an outbreak of any dangerous cattle-disease which the District Magistrate reports to be epizootic in the neighbourhood, and the Cantonment Authority considers that the provisions of this Code or any other law for the time being in force in the cantonment are insufficient for the purpose of preventing the outbreak or spread of that disease,

the Cantonment Authority may, with the sanction of the Local Government or of such authority as the Local Government may by general or special order appoint in this behalf,—

(*a*) take such special measures, and

(*b*) by public notice prescribe such temporary rules to be observed by the public or by any person or class of persons,

as it may deem necessary.

Powers of Entry and Inspection.

[*Madras Act II of 1866, s. 7, and Clause (28).*] (1017.)

Powers of entry and inspection.

507. The Cantonment Magistrate, by himself or by any person authorised by him in this behalf, or any inspector appointed under section 495, may at all reasonable times, with or without the assistance of a veterinary surgeon or of any other person, enter into and inspect any building or land wherein or whereon such Magistrate or inspector has reason to believe there is or has been—

(*a*) any animal which is affected with a dangerous cattle-disease, or is or has been exposed to the infection thereof, or

(*b*) the carcass of any animal which has died from such a disease;

and may inspect any such animal or carcass, or any fodder, dung, refuse, rubbish, fittings or other thing found in, on or near such building or land.

[*Act XX of 1879, s. 12.*] (1014, 1015.)

Penalty for vexatious entry or seizure.

508. (*1*) Any inspector who without reasonable ground for suspicion, enters or inspects any building or land, or vexatiously and unnecessarily seizes or detains any animal on the pretence that it is affected with a dangerous cattle-disease, shall be punishable with fine which may extend to fifty rupees.

(*2*) No prosecution under this section shall be instituted after the expiry of three months from the date on which the offence was committed.

[*Madras Act II of 1866, s. 16.*]

(*3*) The Cantonment Magistrate may award the whole, or such portion as he thinks fit, of the amount of any fine realised under this section as compensation to any person who has suffered substantial loss in consequence of the offence in respect of which the fine was imposed.

Claims to Compensation barred.

[*Madras Act II of 1866, s. 10.*] (1013.)

Claims to compensation barred.

509. Subject to the provisions of section 508, sub-section (*3*), no compensation shall be claimable in respect of any loss incurred by reason of any act authorised by this chapter.

CHAPTER XXIX. (a)

GRAZING AND CRUELTY TO ANIMALS.

Grazing.

[*Clause (24).*] (795.)

Power to seize animal doing damage while grazing, &c.

510. (*1*) The Cantonment Magistrate may, by himself or by any person authorised by him in this behalf,

(*a*) seize any animal which, being at large for the purpose of grazing, does damage to, or is found straying on, any public road in the cantonment, or any land in the cantonment which is not in the occupation or under the control of any grantee, owner or occupier, or

(a) In this chapter power has been taken to impound cattle grazing on unauthorised places or at unauthorised times within cantonment limits, and to punish persons who send them to such places for the purpose.

The proper procedure is indicated for dealing with cruelty to animals. The cantonment pound can easily be used for the purposes of an infirmary.

(*b*) seize any animal found grazing upon any such road or land unattended or not duly controlled, or unauthorisedly grazing in any place in the cantonment.

(*2*) Every person who seizes an animal under this section shall send it, or cause it to be sent, within twenty-four hours to the cantonment pound.

[*Clause* (24).] (796.) Penalty for grazing animal without control or unauthorisedly on cantonment land.

511. Whoever

grazes any animal, or permits any animal to graze, upon any public road in a cantonment, or upon any land in a cantonment which is not in the occupation or under the control of any grantee, owner or occupier, and leaves the animal unattended or not duly controlled, or

without authority allows any animal to graze in any place in a cantonment,

shall be punishable with fine which may extend to fifty rupees.

Cruelty to Animals.

[*Clause* (24).] (793.) Extension of the Prevention of Cruelty to Animals Act, 1890, to cantonments.

512. (*1*) Unless the Commander-in-Chief concurs with the Cantonment Authority in thinking there is some special reason to the contrary, the Cantonment Authority shall apply to the Local Government to extend the Prevention of Cruelty to Animals Act, 1890, to the cantonment.

XI of 1890.

(*2*) In making such an application, the Cantonment Authority shall, unless there is some reason to the contrary, suggest that the place appointed to be an infirmary under section 6, subsection (*2*), of the said Act should be the pound (if any) established in the cantonment under the Cattle-trespass Act, 1871.

I of 1871.

CHAPTER XXX. (a)

REGISTRATION OF BIRTHS AND DEATHS.

[*Bengal Act II of 1888, ss. 183 and 184.*] (614, 616, 617, 620, 622.) Preparation of registers, and registration of births and deaths by Cantonment Magistrate.

513. (*1*) The Cantonment Authority shall cause to be prepared and printed registers for making entries, according to the forms numbered 4 and 5 respectively in Schedule I, of all births and deaths occurring in the cantonment.

(*2*) The pages of such registers shall be numbered progressively from the beginning to the end, and every space for an entry shall be also numbered progressively from the beginning to the end of the register, and shall be divided from the next following space by a line.

(*3*) The Cantonment Magistrate shall inform himself of every birth and death occurring in the cantonment, and shall register the same without charge as soon as conveniently may be after the event.

(*4*) All entries in a register shall be made consecutively from the beginning to the end of the register.

(a) The object of this chapter is to improve the existing procedure and render the registration of births and deaths a record of value.

Penalty for failure to give information as to birth.

[*Bengal Act IV of 1873, s. 7, and Bombay Act III of 1888, s. 446 (2).*]

514. (*1*) Whoever,—

(*a*) being the father or mother of a child born in the cantonment, or

(*b*) (in default of the parents) being a medical practitioner or other person openly and constantly practising the medical profession, or a midwife, and assisting at the birth of the child, or

(*c*) (in default of such practitioner, person or midwife) being a person in charge of the child, or

(*d*) (in default of a person so in charge) being the owner, grantee or occupier of the building or land in or on which the child was born, and being cognizant of the birth,

fails to give information to the Cantonment Magistrate, personally or in writing, within eight days next after the day of the birth, according to the best of his or her knowledge and belief, of the several particulars required by this chapter to be registered touching the birth of the child,

shall be punishable with fine which may extend to five rupees:

(*2*) Provided that, where any person is not required to give information in the first instance, but is only required to give it in default of some other person, he or she shall not be punished if it is shown that he or she had reasonable cause to suppose that the information had been duly given:

(*3*) Provided also that not more than one person shall be punished for failure to give such information:

(*4*) Provided also that, in the case of an illegitimate child, no person shall, as father of the child, be bound to give information concerning the birth, and the Cantonment Magistrate shall not enter in the register the name of any person as father of the child unless at the request of the mother and of the person acknowledging himself to be the father.

Penalty for failure to give information as to death.

[*Bengal Act IV of 1873, s. 8.*]

515. (*1*) Whoever,—

(*a*) being the nearest male relative of a person dying in the cantonment, and being present at the death or in attendance on the deceased during his last illness, or

(*b*) (in default of such relative) being a person in charge of the deceased immediately before his death, or

(*c*) (in default of such person) being the owner, grantee or occupier of the building or land in or on which the death occurred,

fails to give information to the Cantonment Magistrate, personally or in writing, within eight days next after the day of the death, according to the best of his knowledge and belief, of the several particulars required by this chapter to be registered touching the death,

shall be punishable with fine which may extend to five rupees:

(*2*) Provided that, where any person is not required to give information in the first instance,

but is only required to give it in default of some other person, he shall not be punished if it is shown that he had reasonable cause to suppose that the information had been duly given:

(*3*) Provided also that not more than one person shall be punished for failure to give such information:

(*4*) Provided also no person shall be bound to give the name of any female relative.

[*Bengal Act IV of 1873, s. 10.*] (627.) Penalty for false information as to birth or death.

516. Whoever knowingly makes, or causes to be made, for the purpose of being inserted in any register of births or deaths kept under this chapter, any false statement touching any of the particulars required to be registered shall be punishable with fine which may extend to fifty rupees.

[*Clause* (26).] Entry of birth or death to be signed by informant.

517. (*1*) When an entry of a birth or death has been made under this chapter, the person giving information of the birth or death must sign the entry in the presence of the Cantonment Magistrate or of some servant of the Cantonment Authority appointed by the Cantonment Magistrate in this behalf.

(*2*) When the birth of an illegitimate child is registered, and the mother and the person acknowledging himself to be the father of the child jointly request that that person may be registered as the father, the mother and that person must both sign the entry in the presence of the Cantonment Magistrate or of some servant of the Cantonment Authority appointed by the Cantonment Magistrate in this behalf.

[*Madras Act I of 1884, s. 403.*] (623.) Extract from register of births to be given to informant.

518. (*1*) Whenever any birth is registered under this chapter, the Cantonment Magistrate shall, upon the application of the person on whose information the registration was made, give to such person, free of charge, an extract from the register relating to such birth.

(*2*) The extract shall be in such form as the Local Government may prescribe, and shall be signed by the Cantonment Magistrate.

[*Bombay Act III of 1888, s. 452.*] (624.) Correction of clerical errors in register of births or deaths.

519. Any clerical error which may at any time be discovered in a register of births or a register of deaths kept under this chapter may, upon proof that the same is an error, be corrected by the Cantonment Magistrate without any erasure of the original entry, and the Cantonment Magistrate shall attest the correction by his signature in the register.

[*Bombay Act III of 1888, s. 453.*] (625.) Alteration, or entry in register of birth, of name of child.

520. When the birth of any child has been registered under this chapter, and the name, if any, by which it was registered is altered, or

if it was registered without a name, when a name is given to it,

the Cantonment Magistrate may, upon proof that the name of the child has been altered or that a name has been given to it, cause the alteration in the name to be made or the name to be entered in the register without any erasure of the original entry, and shall in every such case attest the alteration or entry by his signature in the register.

[*Bombay Act III of 1888, s. 452 (3).*] No further alteration in registers.

521. Except as provided in sections 519 and 520, no alteration shall be made in any register of births or register of deaths kept under this chapter.

[*Madras Act IV of 1884, s. 249 (4).*] (626.) Power to search registers and require extract.

522. Any person may at all reasonable times, on payment of a fee of eight annas for each visit, search in the presence of the Cantoment Magistrate, or of any servant of the Cantonment Authority appointed by the Cantonment Magistrate in this behalf, any register of births or register of deaths kept under this chapter, and

may require the Cantonment Magistrate to give him an extract, signed by the Cantonment Magistrate, from any such register, relating to any birth or death registered therein, on payment of a further fee of eight annas in respect of each birth or death regarding which an extract is required.

CHAPTER XXXI. (a)

VERIFICATION OF WEIGHTS AND MEASURES.

[*Bengal Act II of 1888, s. 370.*] (668.) Provision, custody and use of local standards.

523. (*1*) The Cantonment Authority shall ascertain what denominations of weight and measure are in use in the cantonment, and shall provide such local standards as it may deem requisite for the purpose of verifying weights and measures of any of those denominations.

(*2*) The Cantonment Authority shall make such arrangements as it may think fit for the safe keeping of the said standards, and shall provide proper means for verifying weights and measures by comparison with the said standards, and for stamping weights and measures so verified.

[*Bengal Act II of 1888, s. 371.*] (669—671.) Appointment of servant of the Cantonment Authority to verify weights and measures, and duties of such servant.

524. (*1*) The Cantonment Authority shall, by public notice, fix the times and places at which a servant of the Cantonment Authority appointed by the Cantonment Magistrate in this behalf shall attend for the purpose of verifying weights and measures.

(*2*) The servant of the Cantonment Authority so appointed shall attend with the local standards in his custody at each time and place so fixed, and shall examine every weight or measure which is of the same denomination as one of such standards and is brought to him for the purpose of verification, and shall compare the same with that standard, and, if he finds the same correct, shall stamp it with a stamp of verification in such manner as to prevent fraud.

(*3*) The said servant of the Cantonment Authority shall enter in a book to be kept by him for the purpose minutes of every such verification, and shall, if required, give a certificate signed by him of every such stamping.

[*Madras Act III of 1888, s. 32.*] (672, 673.) Power to deal with weights and measures differing from local standards.

525. The Cantonment Authority shall by public notice declare that any weight or measure of the same denomination as a local standard provided

(a) This chapter aims at preventing the use of false weights and measures, by the provision of approved standards, and by arranging for the regular comparison of weights and measures therewith.

under section 523 which does not agree with that standard shall be deemed to be false; and on conviction being had under Chapter XIII of the Indian Penal Code in respect of any such weight or measure, the same shall be forfeited and dealt with under the provisions of section 517 of the Code of Criminal Procedure, 1882.

XLV of 1860.

X of 1882.

Powers of Entry and Inspection.

[*Madras Act III of 1888, s. 33, and Clause (28).*] (856 (2), (b), 880.)

Power to enter shop and seize false weights and measures.

526. The Cantonment Magistrate, by himself or by any person authorised by him in this behalf, may, at any time during which a shop or other place for the sale of any article is open for business, enter into and inspect such place, and seize any weight or measure which there is reason to believe is false.

CHAPTER XXXII. [a]

PREVENTION OF GAMING.

[*Clause (31).*] (1018.)

Certain cantonments excluded from operation of chapter.

527. This chapter shall not apply [b]—

(*a*) to any cantonment situate in the territories administered by the Governor of Bombay in Council or the Lieutenant-Governor of Bengal, or

(*b*) to any cantonment situate in the territories administered respectively by the Lieutenant-Governors of the North-Western Provinces and the Punjab and the Chief Commissioners of Oudh, the Central Provinces, Burma, Assam, Ajmere and British Baluchistan in which Act III of 1867 (*An Act to provide for the punishment of public gambling and the keeping of common gaming-houses*) is for the time being in force.

Definitions.

528. In this chapter, unless there is something repugnant in the subject or context,—

[*Bombay Act I of 1890, s. 1.*]

[*Bombay Act I of 1890, s. 1.*] (1020.)

(*1*) "gaming" includes wagering;

(*2*) "instruments of gaming" include cards, dice, tables, cloths, boards, mechanical or other contrivances, boxes, receptacles, money, securities for money, cowries, counters, and any other article used as a means or subject of gaming; and

[*Madras Act III of 1888, s. 3.*] (1019.)

(*3*) "common gaming-house" means any enclosure, tent, room or place, whether public or private, in which instruments of gaming are kept or used for the profit or gain of the person owning, occupying, using or keeping such enclosure, tent, room or place, whether by way of charge for the use of the instruments of gaming or of the enclosure, tent, room or place, or otherwise howsoever.

[a] Gambling among the lower classes in cantonments is a source of much petty crime, and requires to be put down. There is no general Gambling Act for all India, and this chapter aims at providing a law for those cantonments not reached by the existing enactments on the subject. The sections are based on existing law and practice.

[b] The chapter will apply (1) to all cantonments in the Madras Presidency, and (2) to all cantonments in the North-Western Provinces, the Punjab, Oudh, the Central Provinces, Burma, Assam, Ajmere and British Baluchistan in which Act III of 1867 is not for the time being in force. To cantonments in the Bombay Presidency and Bengal, Bombay Act IV of 1887 and Bengal Act II of 1867 respectively can be extended.

[*Madras Act III of 1888, s. 45.*] (1022.)

Penalty for keeping common gaming-house.

529. Whoever opens, keeps or uses, or permits to be used, any common gaming-house, or conducts or assists in conducting the business of any common gaming-house, or advances or furnishes money for gaming therein, shall be punishable with fine which may extend to fifty rupees, or with imprisonment for a term which may extend to eight days.

[*Madras Act III of 1888, s. 46.*] (1023.)

Penalty for being found in common gaming-house.

530. Whoever is found gaming, or present for the purpose of gaming, in a common gaming-house shall be punishable with fine which may extend to fifty rupees, or with imprisonment for a term which may extend to eight days;

and any person found in any common gaming-house during any gaming or playing therein shall be presumed, until the contrary be proved, to have been there for the purpose of gaming.

[*Madras Act III of 1888, s. 42.*] (1030.)

Powers of entry in respect of gaming-houses.

531. If the Cantonment Magistrate has reason to believe that any enclosed place or building is used as a common gaming-house, he may by his warrant give authority to any police-officer above the rank of constable to enter, with such assistance as may be found necessary, by night or by day, and by force if necessary, such place or building, and to arrest all persons and seize all instruments of gaming found therein, and to search all parts of such place or building, and also the persons found therein, and to demand the names and addresses of such persons.

[*Madras Act III of 1888, s. 43.*] (1031.)

Evidence of gaming.

532. Any instruments of gaming found in any place or building entered or searched under the provisions of section 531, or on any person found therein, shall be evidence that such place or building is used as a common gaming-house, and that the persons found therein were there present for the purpose of gaming, although no play was actually seen by the police-officer or any of his assistants.

[*Madras Act III of 1888, s. 44.*] (1032.)

Proof of playing for stakes unnecessary.

533. It shall not be necessary, in order to convict any person of keeping a common gaming-house, or of being concerned in the management of any common gaming-house, to prove that any person found playing at any game was playing for any money, wager or stake.

[*Act III of 1867, s. 7.*] (1026.)

Penalty on person found in common gaming-house who refuses to give his name and address.

534. If any person found in a common gaming-house by a police-officer authorised under section 531 to enter therein, on being required by such police-officer or by the Cantonment Magistrate to give his name and address, refuses or neglects so to do, or gives a false name or address, he shall be punishable with fine which may extend to fifty rupees, or with imprisonment for a term which may extend to eight days.

[*Madras Act III of 1888, s. 47.*] (1027.)

Power to confiscate and destroy instruments of gaming.

535. On conviction of any person for keeping a common gaming-house, or being present therein for the purpose of gaming, all the instruments of gaming found therein may be destroyed by order of the Cantonment

Magistrate, and such Magistrate may order all or any of the other articles seized or the proceeds thereof, or all money seized, to be forfeited.

[*Madras Act III of 1888, s. 48.*] (1028.)

Indemnification of witnesses.

536. Any person who has been concerned in gaming in contravention of this chapter, and who, on being examined as a witness before the Cantonment Magistrate on the trial of any person for a breach of any of the provisions of this chapter, makes true and faithful discovery to the best of his knowledge of all things as to which he is so examined, shall thereupon receive from the Cantonment Magistrate a certificate in writing to that effect, and shall be freed from all prosecutions under this chapter or under any other law for the time being in force for anything done before that time in respect of such gaming.

[*Madras Act III of 1888, s. 50.*] (1029.)

Rewards to informers or police.

537. The Cantonment Magistrate may direct any portion, not exceeding one-half, of any fine levied under section 529 or section 530, and of the moneys or proceeds of articles ordered to be forfeited under section 535, to be paid to any informers or police-officers who have assisted in the detection of the offender.

[*Madras Act III of 1888, s. 49.*] (1021.)

Saving of games of mere skill.

538. Nothing in the foregoing sections of this chapter shall apply to any game of mere skill wherever played.

[*Madras Act III of 1888, s. 72.*]

Penalty for gaming in street or public place.

539. (*1*) Whoever is found gaming in any street or public place, or present as a spectator of such gaming, shall be punishable with fine which may extend to fifty rupees, or with imprisonment for a term which may extend to eight days.

(*2*) All instruments of gaming in respect of which any offence against this section has been committed shall be forfeited.

[*Madras Act III of 1888, s. 51.*] (1025.)

Penalty for sharping.

540. Whoever, by any fraud or unlawful device or malpractice in playing with any instrument of gaming, or in bearing a part in the stakes, wagers or adventures, or in betting on the sides or hands of the players, or in wagering on the event, of any game, sport, pastime or exercise, wins from any other person for himself or for any other or others any sum of money or valuable thing, shall be punishable with fine which may extend to fifty rupees, or with imprisonment for a term which may extend to eight days.

CHAPTER XXXIII. [a]

NUISANCES.

[*Madras Act III of 1888, s. 75.*] (819.)

Penalty for drunkenness or riotous or indecent behaviour.

541. Whoever in any street or public place is found drunk and incapable of taking care of himself, or is guilty of any riotous, disorderly or indecent behaviour, and whoever is guilty of any violent, disorderly or indecent behaviour in any police-office or police-station, shall be punishable with fine which may extend to fifty rupees, or with imprisonment for a term which may extend to eight days.

[a] The provisions in this chapter are those usual in municipalities.

[*Madras Act III of 1888, s. 71 (xix).*] (821.)

Penalty for using threatening or abusive language, &c.

542. Whoever in any street or public place uses any threatening, abusive or insulting words, or behaves in a threatening or insulting manner, or posts up or affixes or exhibits any indecent, threatening, abusive or insulting paper or drawing with intent to provoke a breach of the peace, or whereby a breach of the peace may be occasioned, shall be punishable with fine which may extend to fifty rupees, or with imprisonment for a term which may extend to eight days.

[*Madras Act III of 1889, s. 3 (11).*] (496, 820.)

Penalty for indecent exposure of person, &c.

543. Whoever in or by the side of any street or public place wilfully and indecently exposes his person, or commits a nuisance by easing himself, or having the care or custody of a child under seven years of age, omits to prevent such child from committing a nuisance as aforesaid, shall be punishable with fine which may extend to ten rupees, or with imprisonment for a term which may extend to four days.

[*Madras Act III of 1888, s. 71 (xxi), and Clause (12).*] (829 (1), (3).)

Penalty for begging.

544. (*1*) Whoever in any street or public place begs or applies for alms, or exposes or exhibits any sore, wound, bodily ailment or deformity with the object of exciting charity or of extorting alms, or seeks for or obtains alms by means of any false statement or pretence or by intimidation of any kind, shall be punishable with fine which may extend to ten rupees, or with imprisonment for a term which may extend to four days.

(*2*) Nothing in this section shall apply to any person to whom alms are given by the custom of any religion, creed, sect, race or class, and who begs or applies for alms in the customary manner from those who are accustomed to give alms to him or to persons of the like description, unless such person causes annoyance to passers-by or to persons dwelling in the neighbourhood by his mode of begging or applying for alms.

[*Madras Act III of 1888, s. 71 (xx), and Clause (23).*] (830 (1).)

Penalty for soliciting for prostitution.

545. Whoever importunes, solicits or molests any person, or loiters, for the purpose of prostitution, or on behalf of a prostitute, shall be punishable with fine which may extend to twenty rupees, or with imprisonment for a term which may extend to four days.

[*Madras Act III of 1888 s. 64.*] (828 (1).)

Penalty for feloniously lurking about cantonment.

546. Whoever is found between sunset and sunrise—

(*a*) armed with any dangerous instrument with intent to commit an offence, or

(*b*) having his face covered or otherwise disguised with intent to commit an offence, or

(*c*) lying or loitering in any street or public place, being a reputed thief, and without being able to give a satisfactory account of himself, or

(*d*) having in his possession without lawful excuse any implement of house-breaking,

shall be punishable with imprisonment for a term which may extend to eight days.

Cantonment Code.

(Part IV.—The Public Health, Safety and Convenience.—Chapter XXXIII.—Nuisances.—Sections 547-557.)

[*Act XVIII of 1889, s. 107, and Clause (12).*] (427.)

Penalty for dangerous quarrying, blasting, cutting of timber or building.

547. Whoever quarries blasts, cuts timber or carries on building operations in such a manner as to cause, or be likely to cause, danger to persons passing by or dwelling or working in the neighbourhood shall be punishable with fine which may extend to fifty rupees, and, in case of a continuing offence, with an additional fine which may extend to five rupees for every day after the first during which the offence continues.

[*Madras Act III of 1888, s. 71 (xv), and Clause (12).*] (822.)

Penalty for playing music without permission.

548. Whoever beats a drum or tom-tom, blows a horn or trumpet, or beats or sounds any brass or other instrument or utensil, or plays any music, except at such times and places as are from time to time allowed by the Cantonment Authority, shall be punishable with fine which may extend to twenty rupees, or with imprisonment for a term which may extend to four days, and, in case of a continuing offence, with an additional fine which may extend to five rupees for every day after the first during which the offence continues.

[*Bengal Act II of 1866, s. 40 (11), and Clause (12).*] (740.)

Penalty for creating noise in street or public place so as to cause a nuisance.

549. Whoever by driving, dragging or pushing any vehicle with insufficiently greased wheels, or by singing or shouting, in any street or public place creates a noise which is reasonably calculated to cause annoyance to persons frequenting or residing or working in the neighbourhood shall be punishable with fine which may extend to ten rupees, or with imprisonment for a term which may extend to four days.

[*Act XVIII of 1889, s. 101, and Clause (12).*] (741.)

Penalty for discharging fire-arm, &c., or propelling vehicle, so as to frighten animals or cause annoyance.

550. Whoever—

(*a*) discharges a fire-arm, air-gun, blow-pipe or bow, or lets off fire-works or sends up a fireballoon, or flies a kite, or lights a bonfire, or sets fire to or burns any straw or other matter, or

(*b*) drives, drags or pushes any vehicle,

in such a manner as to frighten animals passing by, or to cause or be likely to cause annoyance or danger to persons passing by or dwelling or working in the neighbourhood,

shall be punishable with fine which may extend to fifty rupees, or with imprisonment for a term which may extend to eight days.

[*Madras Act III of 1888, s. 71 (xvi), and Clause (12).*] (823.)

Penalty for bill-sticking or defacing building or other property.

551. Whoever without the consent of the owner or occupier of the premises, or except at such public places or place as may from time to time be allowed by the Cantonment Authority, affixes, or causes to be affixed, any bill, notice or other paper upon any building, wall, fence, tree, post or other thing, or writes upon or defaces or marks any building, wall, fence, tree, post or thing, shall be punishable with fine which may extend to twenty rupees, or with imprisonment for a term which may extend to four days.

[*Clause (12).*] (727, 728.)

Penalty for allowing certain animals to be at large.

552. Whoever, being the owner or person in charge of any dog, tiger, leopard, bear, snake or other dangerous animal which is likely to annoy or intimidate passengers or persons frequenting or residing or working in the neighbourhood, neglects to restrain it, so that it shall not be at large in any street or public place without a muzzle or other proper means of rendering it harmless, and

whoever lets loose, or permits to be at large, or neglects to restrain, any animal, so that it becomes a cause of annoyance or intimidation to passengers or persons frequenting or residing or working in the neighbourhood, or to the public,

shall be punishable with fine which may extend to twenty rupees, and, in case of a continuing offence, with an additional fine which may extend to three rupees for every day after the first during which the offence continues;

and the Cantonment Magistrate may by notice require the owner or person in charge of the animal to efficiently restrain, or to remove or destroy, it within twenty-four hours from the service of the notice,

or he may, if no owner or person as aforesaid can be found, after the issue of a public notice signifying his intention, remove or destroy, or otherwise deal with the animal as may to him seem fit.

[*Bengal Act III of 1884, s. 213.*] (825.)

Power to destroy stray dogs.

553. The Cantonment Authority may by public notice appoint certain periods within which any dogs found straying which either are unmuzzled or are without a collar bearing the owner's name may be destroyed; and any dog found straying as aforesaid during any period so appointed may be destroyed by such person and in such manner as the Cantonment Magistrate may direct.

[*Bombay Act VI of 1873, ss. 63 and 74.*] (454.)

Penalty for storing or using night-soil or other offensive matter.

554. Whoever, except with the written permission of the Cantonment Authority, stores or uses night-soil or any other manure or substance emitting an offensive smell shall be punishable with fine which may extend to twenty-five rupees.

[*Clause (12).*]

Silos and ensilage.

555. Whoever constructs a silo, or feeds an animal on ensilage, except in a place authorised by the Cantonment Authority, shall be punishable with fine which may extend to twenty rupees.

[*Madras Act I of 1884, s. 348.*] (701.)

Penalty for drying skin so as to cause nuisance.

556. Whoever dries, or permits to be dried, the skin of any animal so as to cause a nuisance shall be punishable with fine which may extend to ten rupees.

[*Act XVIII of 1889, s. 85.*] (817.)

Power to prohibit commission of public nuisance.

557. Subject to the control of the Local Government, the Cantonment Authority may order any person not to do, or not to omit to do, within the cantonment anything the doing of, or the omission to do, which is a public nuisance as defined in section 268 of the Indian Penal Code.

XLV of 1860.

Cantonment Code.

(Part IV.—The Public Health, Safety and Convenience.—Chapter XXXIV.—Expulsion from Cantonments.—Sections 558-565.)

CHAPTER XXXIV. [a]

EXPULSION FROM CANTONMENTS.

[*Clause (23).*] (828—835, 839.)

Expulsion by Cantonment Magistrate.

558. (*1*) The Cantonment Magistrate may, with the previous sanction of the Commanding Officer of the cantonment, order any person referred to in Part A of Schedule III to remove from the cantonment within twenty-four hours, and prohibit him from re-entering the cantonment without the written permission of the Commanding Officer.

(*2*) On the application of the medical officer in charge of a hospital maintained under Chapter XIX for the treatment of infectious or contagious disorders, the Cantonment Magistrate may, with the previous sanction of the Commanding Officer of the cantonment, order any person referred to in Part B of Schedule III to remove from the cantonment within twenty-four hours, and prohibit him from re-entering the cantonment without the written permission of such medical officer.

[*Clause (23).*] (831, 838.)

Expulsion by Commanding Officer.

559. (*1*) If the Commanding Officer of a cantonment deems it expedient to exclude from the cantonment any person referred to in Part C of Schedule III, he may direct the Cantonment Magistrate to order such person to remove from the cantonment within twenty-four hours, and to prohibit him from re-entering the cantonment without the written permission of the Commanding Officer.

(*2*) If the Commanding Officer of a cantonment deems it expedient to exclude from the cantonment any person not referred to in Schedule III, he may direct the Cantonment Magistrate to order such person to remove from the cantonment within a time to be specified in the order, and to prohibit him from re-entering the cantonment without the written permission of the Commanding Officer.

[*Clause (23).*]

Order of expulsion to be recorded by Commanding Officer, and copy in certain cases to be forwarded to Officer Commanding the district.

560. (*1*) In every case in which the Commanding Officer of a cantonment sanctions or directs the removal and exclusion of a person from the cantonment, he shall record an order of expulsion.

(*2*) Whenever a Commanding Officer exercises the power conferred by section 559, sub-section (*2*), he shall forthwith forward a copy of the order of expulsion to the Officer Commanding the district, who may at any time, if he thinks fit, rescind the order.

[*Clause (23).*] (841.)

Record and disclosure of Commanding Officer's reasons for expulsion.

561. (*1*) The Commanding Officer shall not be bound to state his reasons for making any order of expulsion; but, whenever he does so, the reasons shall, unless the Commanding Officer otherwise directs, be mentioned in the order issued by the Cantonment Magistrate to the person concerned.

(*2*) In any case in which the Commanding Officer has not stated his reasons for making an order of expulsion, he shall not be bound to disclose those reasons except—

(*a*) to the Cantonment Magistrate, and

(*b*) on a requisition from any officer to whom the Commanding Officer is subordinate, to that officer.

(*3*) When a Commanding Officer discloses his reasons to any officer referred to in sub-section (*2*), he shall do so in official confidence, either in writing or verbally, as he may think fit.

[*Clause (23).*] (836.)

Method of proving convictions had outside cantonment.

562. In order to prove that any person has been convicted beyond the cantonment of any offence specified in clause (*3*), clause (*4*), clause (*5*), clause (*6*), clause (*9*) or clause (*12*) of Schedule III, or has been ordered beyond the cantonment to execute a bond for his good behaviour, it shall be necessary to prove his identity with the person who was so convicted or ordered, and to produce an extract certified under the hand of the officer having the custody of the records of the Court in which such conviction was had or such order was made to be a copy of the sentence or order:

(See Act X of 1882, s. 511.)

Provided that in the case of a conviction of an offence, either a certificate signed by the officer in charge of the jail in which the punishment or any part thereof was inflicted, or the warrant of commitment under which the punishment was suffered, may be produced instead of such extract as aforesaid.

[*Clause (23).*]

Penalty for remaining in or returning to cantonment after expulsion.

563. If any person who has under section 558 or section 559 been ordered to remove from and prohibited from re-entering a cantonment remains in or re-enters that cantonment without such written permission as is mentioned in the section, he shall be punishable with fine which may extend to fifty rupees, or with imprisonment for a term which may extend to eight days.

[*Clause (23).*] (843.)

Penalty for harbouring person who has been expelled from cantonment.

564. Whoever harbours or conceals in a cantonment any person who has under section 558 or section 559 been ordered to remove from and prohibited from re-entering that cantonment, and who has not obtained the written permission mentioned in the section, shall be punishable with fine which may extend to fifty rupees, or with imprisonment for a term which may extend to eight days:

Provided that no wife shall be punished for harbouring her husband.

Powers of Entry, Inspection and Search.

[*Clause (28).*] (873.)

Power to search for person expelled from cantonment.

565. Whenever the Cantonment Magistrate has reason to believe that any person who has been ordered to remove from and prohibited from re-entering the cantonment is in or on any building or land within the cantonment, he may, by himself or by any person authorised by him in this behalf, at all reasonable times enter into and inspect such building or land and search for such person.

(a) The Cantonments Act, 1889, authorises the expulsion from cantonments of persons who may be generally classed as bad characters and disorderly. The subject has been dealt with in some detail in this chapter and Schedule III for administrative convenience.

Cantonment Code.

(Part V.—Supplemental Provisions.—Chapter XXXV.—Cognizable Offences.—Section 566.—Chapter XXXVI.—Appeals.—Sections 567-572.)—Chapter XXXVII.—Notices and other Documents.—Sections 573-576.)

PART V.

SUPPLEMENTAL PROVISIONS.

CHAPTER XXXV. (a)

COGNIZABLE OFFENCES.

[*Clause* (28).] (905.)

566. The breach of any of the sections or parts of sections which are specified in the first column of Schedule IV shall be a cognizable offence.

Offences for which police-officer may arrest without warrant.

CHAPTER XXXVI. (b)

APPEALS.

[*Clause* (30).] (896, 901.)

567. (*1*) Any person aggrieved by an order, notice or decision described in the second column of Schedule V may appeal to the authority specified in that behalf in the third column of the same schedule:

Appeals when allowed and to whom to lie.

(*2*) Provided that no appeal shall lie from a decision of a Committee of Arbitration unless a dissent from the decision has been recorded by one of the members of the Committee on the president's report in the manner provided in section 126, sub-section (*2*).

[*Clause* (30).] (902.)

568. Where an appeal lies to the Commander-in-Chief, it shall be submitted to the Commanding Officer of the cantonment, to be by him forwarded to the Commander-in-Chief with any remarks which he may think fit to make thereon.

Procedure in submitting appeal to Commander-in-Chief.

[*Act XVIII of 1889, s. 91, and Clause* (30).] (896—898.)

569. (*1*) Every appeal must be made within the period specified in that behalf in the fourth column of Schedule V:

Time for appeal.

(*2*) Provided that the appellate authority may for sufficient cause extend any such period.

(*3*) The period specified in the fourth column of Schedule V as the time allowed for making an appeal shall be computed in accordance with the provisions of the Indian Limitation Act, 1877, with respect to computing the period of limitation.

[*Act XVIII of 1889, s. 91, and Clause* (30).] (899.)

570. (*1*) Except as provided in section 571, the order of the appellate authority confirming, setting aside or modifying an order, notice or decision appealed against shall be final:

Order in appeal final except in certain cases.

(*2*) Provided that no order, notice or decision shall be confirmed, set aside or modified in appeal until the appellant and the authority or person making, issuing or giving the order, notice or decision have had an opportunity of being heard.

[*Clause* (30) (900.)

571. (*1*) When an appeal from an order made or notice given by the Cantonment Authority has been decided by the District Magistrate, the Cantonment Authority, if it is dissatisfied with the decision, may within thirty days from the date of the decision apply, through the Commander-in-Chief, to the Local Government, or to such authority as the Local Government may appoint in this behalf, for a review of such decision.

Cantonment Authority's power to apply for revision in certain cases.

(*2*) The provisions of this chapter with respect to appeals shall apply, so far as may be, to every application made and every decision given under sub-section (*1*).

[*Clause* (31).] (903, 904.)

572. Whenever an appeal has been instituted within the period specified in that behalf in the fourth column of Schedule V from any order, notice or decision, the Cantonment Magistrate shall suspend all action on such order, notice or decision pending the decision of the appeal; and, if the order, notice or decision is set aside on appeal, no further action shall be taken thereon.

Suspension of action pending appeal.

CHAPTER XXXVII. (a)

NOTICES AND OTHER DOCUMENTS.

Authentication and validation.

[*Act XVIII of 1889, s. 131* (1).] (881.)

573. Every notice, order, requisition, license, written permission or other such document issued under the Cantonments Act, 1889, XIII of 1889, or under this Code, or under any rule made under this Code, shall be sufficiently authenticated by the signature of the authority or person required or authorised by the Act, Code or rule, as the case may be, to issue the same:

Authentication of notices and other documents.

Provided that every document issued by a Cantonment Authority shall be signed either by the Commanding Officer of the cantonment or by the Cantonment Magistrate.

[*Bombay Act III of 1888, s.* 487.] (882.)

574. (*1*) Every notice, order, requisition, license, written permission or other such document required by this Code to bear the signature of any authority or person shall be deemed to be properly signed if it bears a facsimile of the signature of such authority or person stamped thereon.

Validation of facsimiles of signatures on notices and other documents.

(*2*) Nothing in this section shall apply to a cheque drawn upon the Cantonment Fund.

[*Act XVIII of 1889, s. 131* (5).] (883.)

575. No notice, order, requisition, license, written permission or other such document issued under this Code or under any rule made thereunder shall be invalid for defect of form.

Validation of notices and other documents.

Service.

[*Act XVIII of 1889, s. 131, and Clause* (29).] (884.)

576. (*1*) Unless it is in this Code in any case otherwise expressly provided, any notice, order, requisition or other such document issued under this Code or any rule made thereunder may be served by being delivered to the person to whom it is addressed, or by being left at his usual place of abode or business with some adult male member or servant of his family, or, if it cannot be so served, may be posted on some conspicuous part of his usual place of abode or business.

Service of notices and other documents.

(*2*) If the usual place of abode or business of the person to whom the notice, order, requisition or document is addressed is not within the cantonment, it may be served by posting it in a registered cover addressed to his usual place of abode or business.

(*3*) If the usual place of abode or business of the owner of any property is not known, any such notice, order, requisition or document addressed to him as such owner may be served on the occupier.

(*4*) If the usual place of abode or business of the occupier of any property is not known, any such notice, order, requisition or document addressed to him as such occupier may be served by posting it on some conspicuous part of the property.

(a) The offences here declared to be cognizable offences are those which are usually made so in Police and Municipal Acts.

(b) The right of appeal is granted as widely as is consistent with the effectual execution of orders, with a view to creating a feeling of protection against arbitrary acts on the part of individuals.

(a) The method adopted of enforcing executive orders issued under this Code is usually to empower certain authorities and persons to issue such orders by means of notices to do or not to do certain things, and to punish those who disobey the notices. The sections in this chapter aim, therefore, at making the authentication and service of notices complete, and at ensuring enforcement on the above lines of every order issued.

Procedure as to making and disposing of objections to notices is also laid down.

Cantonment Code.

(Part V.—Supplemental Provisions.—Chapter XXXVII.—Notices and other Documents.—Sections 577-582.)

[*Clause* (29). (885.)

577. The service of a notice, order, requisition or other such document on any agent of an absentee owner appointed or registered in accordance with Chapter XI shall be deemed to be service on the owner.

Service on agent of absentee owner.

[*Act XVIII of 1889, s. 132.*] (886.)

578. When any notice is under the provisions of this Code to be given to or served on the owner or occupier of any property, and he is unknown, it may, unless it is in this Code otherwise expressly provided, be given or served—

Service of notice where owner or occupier is unknown.

(*a*) by delivering a written notice to some person on the property or, if there is no person on the property, to whom the notice can be delivered, by fixing it on some conspicuous part of the property, or

(*b*) by putting into the post a prepaid registered letter containing a written notice, and addressed by the description of the "owner" or "occupier" of the property (naming it) in respect of which the notice is given without further name or description.

Publication.

[*Act XVIII of 1889, s. 133.*] (887.)

579. (*1*) Unless it is in this Code in any case otherwise expressly provided, every public notice issued under this Code or under any rule made thereunder shall be published by proclamation or in such manner as the Local Government may direct.

Publication of public notices.

(*2*) Proclamation shall be by such method as the authority issuing the notice or the Cantonment Magistrate may deem to be the customary method; and if the proclamation, relates to land, it shall be further made by affixing a copy of the notice to some conspicuous spot in or near the land.

Enforcement.

[*Act XVIII of 1889, s. 88.*] (888.)

580. (*1*) When any notice under this Code requires any act to be done for which no time is fixed by this Code, the notice shall fix a reasonable time for doing the same.

Execution on failure to comply with notice.

(*2*) If the owner, grantee or occupier of any building or land fails to comply with the terms of any notice issued under this Code requiring him to do any act upon or in respect to that building or land, the Cantonment Authority may, after six hours' notice, cause the act to be done by the Cantonment Magistrate or by any servant of the Cantonment Authority.

[*Act XVIII of 1889, s.* 89.] (889.)

581. (*1*) When the owner, grantee or occupier of any building or land is required under this Code by the Cantonment Authority to execute any work or do any thing, and makes default in complying with the requisition, and the Cantonment Authority executes the work or does the thing, the Cantonment Authority may recover the cost thereof from the person in default.

Recovery of costs of execution.

(*2*) If the person in default is the owner or grantee, the Cantonment Authority may, by way of additional remedy, recover the whole or any part of the cost from the occupier, and in such case the occupier may deduct any sum paid by him under this sub-section from the rent due, or from time to time accruing due, from him to the owner or grantee of the property in respect of which the payment is made, or may otherwise recover such sum from the owner or grantee.

(*3*) An occupier shall not be required to pay under sub-section (*2*) any greater sum than the amount of rent—

(*a*) which is for the time being due from him to the owner or grantee, or

(*b*) which, after demand for payment of the money payable by him to the Cantonment Authority and notice not to pay rent without first deducting the amount so demanded, becomes payable by him to the owner or grantee,

unless he refuses, on application to him by the Cantonment Authority, truly to disclose the amount of his rent and the name and address of the person to whom it is payable;

but the burden of proof that the sum so demanded by the Cantonment Authority from the occupier exceeds the rent which was due at the time of the demand, or which has since accrued due, shall lie on the occupier.

(*4*) All money recoverable by a Cantonment Authority under this section may be recovered either by suit or, on application to the Cantonment Magistrate in his judicial capacity, by distress and sale of the moveable property of the person from whom the money is recoverable, and, if payable by the owner or grantee of immoveable property, shall, until it is paid, be a charge on the property.

(*5*) Nothing in this section shall affect any contract between an owner or grantee and an occupier.

[*Bengal Act II of 1888, s.* 234.] (368.)

582. If any building or part of a building be taken down, or if any building-materials be removed, by the Cantonment Authority under this Code, it may sell the materials taken down or removed and apply the proceeds of the sale in payment of the expenses incurred, and shall on demand restore to the owner any surplus arising from the sale.

Sale of building-materials taken down or removed by Cantonment Authority.

Objections.

[*Bengal Act III of 1884, ss. 176 and 177.*] (892, 893.)

583. Any person who is required by any notice issued under this Code to execute any work or do any thing may, instead of executing the work or doing the thing required, prefer an objection in writing to the Cantonment Authority against such requisition within five days from the service or publication of the notice, or, if the time within which he is required to comply with the requisition is less than five days, then within such time.

Power to prefer objection to requisition.

[*Bengal Act III of 1884, ss. 176 and 177.*] (892, 893.)

584. (*1*) Except as provided in sub-section (*2*), every such objection shall be heard and disposed of by the Cantonment Magistrate.

Hearing of objections.

(*2*) If it is alleged in the objection that the cost of executing the work or doing the thing required will exceed three hundred rupees, the objection shall be heard and disposed of—

(*a*) where there is a Cantonment Committee, by the Committee at a meeting, or,

(*b*) where a Cantonment Committee does not exist or cannot be convened, by the Commanding Officer of the cantonment,

unless the Cantonment Magistrate certifies that such cost will not exceed three hundred rupees, in which case the objection shall be heard and disposed of by the Cantonment Magistrate:

(*3*) Provided that in any case in which the Cantonment Magistrate has certified as aforesaid, and the objection has in consequence been heard and disposed of by the Cantonment Magistrate, the person making the objection may, if the requisition made upon him is not withdrawn on the hearing of his objection, pay in the said sum of three hundred rupees to the Cantonment Authority as the cost of executing the work or doing the thing required; whereupon such person shall be relieved of all further liability and obligation in respect of executing the work or doing the thing required, and in respect of paying the expenses thereof; and

the Cantonment Authority shall cause the work to be executed or the thing required to be done, and may exercise all powers necessary therefor.

[*Bengal Act III of 1884, s. 178.*] (894.)

585. (*1*) The Cantonment Magistrate, the Cantonment Committee or the Commanding Officer of the cantonment, as the case may be, shall, after hearing any objection and making any inquiry which he or it may deem necessary, record an order withdrawing, modifying or making absolute the requisition against which the objection was preferred; and,

Order on objection.

if such order does not withdraw the requisition, it shall specify the time within which the requisition shall be carried out, which shall be not less than the shortest time stated in the original requisition.

(*2*) No order made as aforesaid shall operate as a bar to any appeal allowed by Chapter XXXVI from any notice.

[*Bengal Act III of 1884, s. 179.*] (895.)

586. Notice of any order made under section 585 shall be served, in the manner provided in this chapter, on the person making the objection, and such notice shall be deemed to be a requisition duly made under this Code to execute the work or do the thing required.

Notice of such order.

Penalties.

587. (*1*) Whoever—

Penalty for disobedience to orders where not punishable under any other section.

[*Act XVIII of 1889, s. 1.12.*] (891.)

(*a*) disobeys any lawful direction or requisition given or made by notice under any of the powers conferred by this Code, or

(*b*) fails to comply with the conditions subject to which any permission was given to him under any of those powers,

shall, if the disobedience or failure is not an offence punishable under any other section, be punishable with fine which may extend to fifty rupees, and, in case of a continuing offence, with an additional fine which may extend to five rupees for every day after the first during which the offence continues:

(*2*) Provided that, when the notice fixes a time within which a certain act is to be done, and no time is specified in this Code, it shall rest with the Magistrate to determine whether the time so fixed was a reasonable time within the meaning of this Code:

(359, 406.)

(*3*) Provided also that no person shall be punished for disobeying any notice issued under section 129 requiring him to act as agent of an absentee owner or show cause why he should not be required so to act, or for failing to comply with any requisition made by notice under section 144.

588. Whoever unlawfully removes, destroys, defaces or otherwise obliterates any notice or other document put up or exhibited under this Code shall be punishable with fine which may extend to twenty rupees.

Penalty for destroying or defacing public notice.

[*Madras Act 1 of 1884, s. 432.*] (556, 652, 654, 683, 694, 711, 749, 826.)

CHAPTER XXXVIII. (a)

MISCELLANEOUS.

589. The Cantonment Authority may, with the previous sanction of the Commander-in-Chief, make compensation out of the Cantonment Fund to any person sustaining any damage by reason of the exercise of any power vested in the Cantonment Authority, the Cantonment Magistrate or the servants of the Cantonment Authority by or under this Code.

General power to pay compensation out of Cantonment Fund.

[*Act XVIII of 1889, s. 90 (1).*] (910, 1000.)

590. If any dispute arises touching the amount of any compensation which the Cantonment Authority is required by any provision of this Code to pay for injury to any building or land, it shall be settled in such manner as the parties may agree, or, in default of agreement, in the manner provided by the Land-acquisition Act, 1870, sections 3, 8 to 42 (both inclusive), 51 to 53 (both inclusive) and 56 to 59 (both inclusive), so far as they can be made applicable.

Settlement of amount where dispute arises in certain cases in which compensation is compulsory.

[*Act XVIII of 1889, s. 90 (2).*] (911.)

X of 1870.

(a) The matters provided for by this chapter are dealt with in the manner usual in municipalities.

[*Bengal Act II of 1888, s. 420.*] (913.)

591. If, through any act, neglect or default on account of which any person has been fined under this Code, any damage to the property of the Government has been committed by such person, he shall be liable to make good such damage as well as to pay such fine; and

Damage to Government property to be made good.

the amount of such damage shall be determined by the Magistrate by whom such person has been fined; and,

in default of payment of the amount of such damage on demand, the same may be levied in the same manner as a fine.

[*Bengal Act III of 1884, ss. 181 and 182.*] (912.)

592. Whenever any expenses are required by or under this Code to be paid by the owners, grantees or occupiers of any buildings or land, and there is more than one owner, grantee or occupier, the Cantonment Magistrate may, in any case in which apportionment is not expressly authorised by this Code, apportion such expenses among such of the owners, grantees or occupiers as are known in such manner as to him may seem fit.

Power to apportion expenses payable by owners, grantees or occupiers.

[*Clause (31).*] 914, 953, 992.)

593. (*1*) Whenever any person is punished with fine under any section specified in the first column of Schedule VI, the Magistrate may award any portion, not exceeding one-half of the amount realised, of the fine to the person on whose information the conviction was had.

Rewards to informers.

(*2*) Nothing in this section shall be deemed to affect any other section under which the whole or any portion of a fine may be awarded to any person.

[*Bombay Act III of 1888, s. 488, and Clause (28)*] (844.)

594. The Cantonment Magistrate by himself, or by any person authorised by him in this behalf, may, after giving twenty-four hours' notice to the occupier, or, if there is no occupier, to the owner or grantee of any building or land, enter into or upon such building or land at all reasonable times, with or without assistants or workmen,

General power of entry and inspection.

in order to make any inspection or survey, or execute any work, or do any act which is authorised by or is necessary for carrying out the provisions of this Code or any rule made thereunder

in any case in which such entry is not expressly authorised by this Code.

[*Act XVIII of 1889, s. 67.*] (847.)

595. When any building used as a human dwelling is entered under this Code, due regard shall be paid to the social and religious sentiments of the occupiers; and

Precautions to be observed in entering dwelling.

before any apartment in the actual occupancy of any woman who, according to custom, does not appear in public, is entered under this Code, verbal notice shall be given to her that she is at liberty to withdraw, and every reasonable facility shall be afforded to her for withdrawing.

596. Whoever obstructs or molests

Penalty for obstructing person employed by Cantonment Authority or Cantonment Magistrate.

[*Bengal Act II of 1888, s. 396.*] (848.)

any person employed by the Cantonment Authority or the Cantonment Magistrate (not being a person declared by section 46 of this Code to be a public servant within the meaning of section 21 of the Indian Penal Code), or XLV of 1860.

any person with whom the Cantonment Authority or the Cantonment Magistrate may have contracted under the provisions of this Code,

in the performance of any duty or the exercise of any power under or by virtue of this Code,

shall be punishable with fine which may extend to fifty rupees, or with imprisonment for a term which may extend to eight days.

597. Any power conferred by this Code on a Local Government, Commander-in-Chief, Officer Commanding a district, Cantonment Authority, Sanitary Officer or Cantonment Magistrate may be exercised from time to time as occasion requires.

Powers to be exercisable from time to time.

[*Clause (31).*]

598. When a notification under the Cantonments Act, 1889, or this Code has been published at length in an official Gazette or in Army Orders, it shall be sufficient in any subsequent notification to the same effect in such Gazette or Orders to refer to the number, date and subject of the previous notification.

Method of framing notifications.

[*Clause (31).*] (9.) XIII of 1889.

599. The forms numbered 6 to—* respectively in Schedule I, with such variation as the circumstances of each case require, shall be used for the respective purposes therein mentioned.

Use of forms numbered 6 to—* in Schedule I.

[*Clause (31).*]

600. No proceeding taken or thing done under this Code shall be questioned on account of any casual vacancy in a Cantonment Committee, Sub-Committee or Joint Committee, or on account of any defect or irregularity not affecting the merits of the case.

Vacancies and irregularities not to invalidate proceedings.

[*Act XVIII of 1889, s. 147.*] (118—120, 423.)

SCHEDULE I.

FORMS.

(1) BOND TO BE EXECUTED BY SURETIES. (186.)

(See section 38.)

Whereas A. B., the Cantonment Magistrate of the Cantonment, has agreed to appoint C. D. to be (*or* agreed to retain C. D. in the appointment of) on our becoming sureties for the true and faithful performance of his duties as , and for his accounting to the said A. B. and his successors in office for all moneys or securities for money whatsoever which he, the said C. D., shall receive or be entrusted with by virtue of his office as so long as he continues in such office;

* These forms will be prepared hereafter.

Cantonment Code.

(Schedule I.—Form 2.—Invitation to Tender. Form 3.—Notice of Auction.)

Be it known that we, E. F. and G. H., are held and firmly bound to the said A. B. in the sum of rupees to be paid to the said A. B. or his successors in office, for which payment to be well and truly made we each of us bind ourselves and each of our heirs, executors and administrators firmly by these presents, and to further secure which payment we hereby deposit with the said A. B. and his successors in office *(here specify the sum deposited, or, as the case may be, the nature of the security deposited, with a description thereof sufficient to identify the same)* :

The condition of the above-written obligation being such that if the said C. D. shall truly and faithfully perform his duties as , and shall from time to time and at all times account for, render and deliver in such manner and to such person as he may by the said A. B., or his successors in office, be required all moneys and securities for money whatsoever which he, the said C. D., may receive or be entrusted with by virtue of his office as ,

and shall not embezzle, withhold, destroy or anywise injure any such moneys or securities for money as aforesaid, then the above-written obligation shall be utterly void, otherwise the same shall remain in full force and virtue.

E. F.

G. H.

(178, 179(1).) (2) INVITATION TO TENDER.

(See section 74.)

1. Tenders are hereby invited for

2. Documents showing the conditions to be complied with by the person whose tender is accepted may be seen at (*place*) at (*time*) on (*day*).

*3. Blank forms of tender can be obtained at (*place*)* at (*price*) each.

4. Tenders must be sent to (*place*) on or before (*time*) on (*day*)..

*5. The sum of Rupees in cash must accompany each tender as earnest-money.

*6. The sum of Rupees in (*nature of security*) must be deposited on or before the (*date*) as security for the fulfilment of the contract in the event of the tender being accepted.

*7. The earnest-money will be forfeited to the Government and the provisional acceptance of a tender *ipso facto* revoked if the security hereby required is not deposited on or before the date mentioned above.

*8. The Cantonment Magistrate will refuse to receive any tender unless it be submitted in a sealed cover bearing such superscription as shall enable him to clearly understand what contract the tender is for.

* The clauses marked with asterisks should be struck out where blank forms of tender are not supplied or are issued free of charge, or where earnest money or security is not required, as the case may be (see section 75), or where sealed superscribed covers are not required.

9. The Cantonment Magistrate will refuse to accept any tender which is not accompanied by a declaration that the person making it does not belong to, and is not directly or indirectly connected with, the service of the Cantonment Authority or of the Government. If any such declaration is found to be untrue, any contract based on the tender will be liable to rescission by the Cantonment Magistrate, and the contractor will have no claim to compensation in respect of such rescission.

10. All tenders will be opened by (*name*) at (*place*) at (*time*) on (*day*).

11. The authority to accept a tender vests in the Cantonment Magistrate, who will at his discretion accept the highest (*or* lowest, *as the case may be*) or any other tender, or reject any or all tenders submitted.

(*Signed*) A. B.,
Cantonment Magistrate.

---

(3) NOTICE OF AUCTION. (161, 168, 186.)

(See section 74.)

1. An auction will be held by (*name*) at (*place*) at (*time*) on (*day*).

2. The following will be put up for sale, namely :

(*here specify the property for sale, or the right or privilege for which it is proposed to grant a lease or license*).

3. Particulars as to the property (*or* right *or* privilege, *as the case may be*) offered for sale may be ascertained on application to (*name*) at (*place*) at (*time*) on (*day*).

4. The authority to conclude the sale vests in the Cantonment Magistrate, who will at his discretion accept the highest (*or* lowest, *as the case may be*) or any other bid, or reject all the bids, or postpone the auction to such day, hour and place as he may think fit.

5. If any bid is made directly or indirectly by any person who belongs to, or is directly or indirectly connected with, the service of the Cantonment Authority or of the Government, any contract based on that bid will be liable to rescission by the Cantonment Magistrate, and the contractor will have no claim to compensation in respect of such rescission.

*6. Payment for property (*or* rights *or* privileges, *as the case may be*) bought at the auction must be made (*time or times*).

*7. The sum of Rupees in (*nature of security*) must be deposited on or before the (*date*) as security for such payment.

*8. The sum of Rupees must be paid as compensation if the purchaser fails to carry out the contract.

(*Signed*) A. B.,
Cantonment Magistrate.

* The clauses marked with asterisks should be struck out where no time for payment, or no security, or no compensation money, as the case may be, is fixed (see section 77).

Cantonment Code.

(Schedule I.—Form 4.—Registration of Births. Form 5.—Registration of Deaths.)

(4) REGISTRATION OF BIRTHS.

(See section 513).

189 . Births in the Cantonment.

Number.	When born.	Nationality or caste.	Name, if any.	Sex.	Name of father.	Profession of father.	Signature, description and residence of informant.	When registered.	Signature of Cantonment Magistrate.

(5) REGISTRATION OF DEATHS.

(See section 513).

189 . Deaths in the Cantonment.

Number.	When died.	Nationality or caste.	Name.	Sex.	Age.	Profession.	Cause of death.	Residence at time of death.	Residence previous to last illness.	Signature, description and residence of informant.	When registered.	Signature of Cantonment Magistrate.

Cantonment Code.

(Schedule II.—Instructions for the guidance of the public in case of fire. Schedule III.—Persons who may be expelled from cantonments.)

SCHEDULE II.

(808.) INSTRUCTIONS FOR THE GUIDANCE OF THE PUBLIC IN CASE OF FIRE.

(*See section 416.*)

1. The first thing to do at a fire is to rescue any person in danger.

2. The next thing to do is to prevent the fire from spreading, and, if there is danger of its doing so, the buildings adjoining those on fire should be pulled down or soaked with water before those actually on fire are touched.

3. While a fire is still small, it can be easily put out by throwing earth or dust or a blanket or heavy cloth on it. It is a good thing to keep a box of earth in every room in a house liable to catch fire.

4. When a person is on fire, wrap him up in the nearest blanket, rug, carpet, curtain or heavy cloth available, and, if possible, roll him round in it.

5. When a house is on fire, if possible shut all the doors and windows before leaving it.

6. If smoke is choking or the heat is very great, when entering or leaving a burning house crawl on the hands and knees, because breathing is then easiest in this position.

7. When entering, and if possible when leaving, a burning house, draw a wet rag or piece of flannel over the mouth, and the breathing will be easy.

8. No crowd should gather close to a fire, because this prevents the firemen from working.

9. When buildings are thatched with grass or roofed with bamboo shingles, fire always catches in small patches at first; but, if there are people on the roof, these patches are easily beaten out with sticks or branches of trees, or put out with small quantities of water.

10. In saving property, watch the wind, and take the property either towards the wind or to one side of the direction in which it blows. Never take property in the direction of the wind.

11. Look out for thieves and help the police to catch them.

12. People who are helping at a fire should do exactly what the person in command tells them. Help is only obstruction if every person does as he may think best.

SCHEDULE III.

PERSONS WHO MAY BE EXPELLED FROM CANTONMENTS.

(*See sections 558 and 559.*)

PART A.—PERSONS WHO MAY BE EXPELLED BY THE CANTONMENT MAGISTRATE WITH THE PREVIOUS SANCTION OF THE COMMANDING OFFICER OF THE CANTONMENT.

1. Disorderly persons.

(828 (2), 829 (2), 830 (2).) (1) Any person who is convicted in the cantonment of an offence against section 544, section 545 or section 546.

(2) Any person, being the keeper or the agent or servant of the keeper of a shop or place where spirituous or fermented liquor is sold by retail, or a private sarai, or a place of public entertainment, or any other building or place to which the public resorts, who is convicted in the cantonment of permitting drunkenness or other disorderly behaviour, or of suffering gaming, or of permitting prostitutes, disorderly persons or persons of notoriously bad character to meet or remain therein. (*See Act XIII of 1856, s. 53, and Act XLVIII of 1860, s. 11.*) (831 (1).)

(3) Any person who is convicted in the cantonment, or who is proved to have been convicted beyond the cantonment, under this Code or under any other law for the time being in force,— (832 (1).)

(*a*) of opening, keeping, using, or permitting to be used, a common gaming-house, or conducting, or assisting in conducting, the business of a common gaming-house, or

(*b*) of advancing or furnishing money for gaming in a common gaming-house, or

(*c*) on more than one occasion of gaming, or being present for the purpose of gaming, in a common gaming-house, or

(*d*) on more than one occasion of winning from any other person, for himself or for any other or others, any sum of money or valuable thing by any fraud or unlawful device or malpractice in playing with any instrument of gaming, or in bearing a part in the stakes, wagers or adventures, or in betting on the sides or hands of the players, or in wagering on the event, of any game, sport, pastime or exercise.

2. Persons who have been convicted of offences against Chapter XVII of the Indian Penal Code. XLV of 1860.

(833.) (4) Any person who is convicted in the cantonment, or who is proved to have been convicted beyond the cantonment, of any offence against any of the following sections of the Indian Penal Code, namely:

(*a*) section 381 or 382 (theft), or

(*b*) section 386, 387, 388 or 389 (extortion), or

(*c*) section 392, 393, 394, 395, 396, 397, 398, 399, 400, 401 or 402 (robbery and dacoity), or

(*d*) section 408 (criminal breach of trust), or

(*e*) section 411, 412, 413 or 414 (receiving stolen property), or

(*f*) section 429, 436 or 440 (mischief), or

(*g*) section 449, 450, 451, 454, 455, 456, 457, 458, 459, 460 or 462 (criminal trespass).

Cantonment Code.

(Schedule III.—Persons who may be expelled from Cantonments.)

(833.) (5) Any person who is convicted on more than one occasion in the cantonment, or who is proved to have been convicted on more than one occasion beyond the cantonment, of any offence against any of the following sections of the Indian Penal Code, namely:

(*a*) section 379 or 380 (theft), or

(*b*) section 384 or 385 (extortion), or

(*c*) section 403 or 404 (criminal misappropriation of property), or

(*e*) section 406, 407 or 409 (criminal breach of trust), or

(*g*) section 417, 418, 419 or 420 (cheating), or

(*h*) section 427, 428, 430, 431, 432 or 435 (mischief).

44 & 45 Vict., c. 58. *3. Persons who have been convicted of offences against section 156 of the Army Act.*

(834.) (6) Any person who is convicted in the cantonment, or who is proved to have been convicted beyond the cantonment, of any of the following offences against section 156 of the Army Act, that is to say, of—

(*a*) buying, exchanging, taking in pawn, detaining or receiving from a soldier or any person acting on his behalf, on any pretence whatsoever, or

(*b*) soliciting or enticing any soldier to sell, exchange, pawn or give away, or

(*c*) assisting or acting for a soldier in selling, exchanging, pawning or making away with, or

(*d*) being in possession of or keeping when stolen, bought, exchanged, taken in pawn, obtained or received as aforesaid,
