any of the following property, namely, any arms, ammunition, equipments, instruments, regimental necessaries or clothing, any military decorations of an officer or soldier, any furniture, bedding, blankets, sheets, utensils or stores in regimental charge, or any provisions or forage issued for the use of an officer or soldier or his horse, or of any horse employed in Her Majesty's service, or

(*e*) of receiving, detaining or having in his possession the identity certificate or life certificate of a person entitled to a military pension or to reserve pay, as a pledge or security for a debt, or with a view to obtain payment from the pensioner or person entitled to the pay of a debt due either to himself or to any other person.

X of 1882. *4. Persons who have been ordered under the Code of Criminal Procedure, 1882, to execute a bond for their good behaviour.*

(835.) (7) Any person who has been ordered in the cantonment, or who is proved to have been ordered beyond the cantonment, under the provisions of the Code of Criminal Procedure, 1882, to execute a bond for his good behaviour.

Explanation.—In addition to the cases specified in section 110 of the Code of Criminal Procedure, 1882, a person may, under the provisions of the Burma Gaming Act, 1884, be ordered to execute a bond for his good behaviour if he earns his livelihood, wholly or in part, by carrying on, or assisting in carrying on, the game of *ti* or any game or pretended game of a like nature. XVI of 1884.

PART B.—PERSONS WHO MAY BE EXPELLED BY THE CANTONMENT MAGISTRATE, WITH THE PREVIOUS SANCTION OF THE COMMANDING OFFICER OF THE CANTONMENT, ON THE APPLICATION OF THE MEDICAL OFFICER IN CHARGE OF A HOSPITAL FOR DANGEROUS DISORDERS.

(839.) (8) Any person in respect of whom the medical officer in charge of a hospital maintained under Chapter XIX for the treatment of infectious or contagious disorders certifies in writing to the Commanding Officer of the cantonment that he is suffering, or is supposed by such medical officer to be suffering, from an infectious disorder, and who either refuses to go to the hospital, or, having gone to the hospital, leaves it before such medical officer has pronounced him to be free from the disorder.

PART C.—CERTAIN PERSONS WHO MAY BE EXPELLED BY THE COMMANDING OFFICER OF THE CANTONMENT.

(831 (3).) (9) Any person who is convicted in the cantonment, or who is proved to have been convicted beyond the cantonment, under section 136 of the Indian Penal Code, of harbouring an officer, soldier or sailor, knowing or having reason to believe that he has deserted. XLV of 1860.

(831 (3).) (10) Any person who is convicted in the cantonment, under section 564 of this Code, of harbouring or concealing any person who has been ordered to remove from and prohibited from re-entering the cantonment.

(831 (4) & (5).) (11) Any person, not being subject to military law and not being a soldier's wife, who is convicted in the cantonment of an offence against section 13 of the Cantonments Act, 1889, or who has been so convicted on more than one occasion of an offence against section 14 of that Act. XIII of 1889.

(831 (6).) (12) Any person who has been convicted, under section 48 of Act XIII of 1856 (*an Act for regulating the Police in the town of Bombay*) or section 33 of the Calcutta Police Act, 1866, or section 67 of the Madras City Police Act, 1888, or under any other similar enactment for the time being in force, of introducing, or attempting to introduce, into any fort, military barrack, guard-room or encampment, or on board any vessel of war belonging to Her Majesty, any spirituous or fermented liquor or intoxicating drug or preparation without the license in writing of the Commanding Officer. Ben. IV of 1866. Mad. III of 1888.

Cantonment Code.

(Schedule IV.—Cognizable Offences.)

SCHEDULE IV.

COGNIZABLE OFFENCES.

(See section 566.)

1	2
Section or part.	Subject.
160	Allowing offensive matter to flow or be put upon street or public place.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the week ending at 8 a.m. on Saturday, 25th June 1892.

It will be remembered that at the close of last week the favourable conditions which had resulted in general rain throughout the Indian region were disappearing. The monsoon currents were withdrawing and becoming weaker on each side of India, and rainfall was lighter and less general. This change has continued during the week under review and increased in intensity as the week has progressed, so that by the close of the week the greater parts of Northern and Central India were without rain. This result was in part due to the abnormal weakness of the monsoon currents on either side of India, and in part to the fact that the arm of low pressure which ordinarily exists over the southern side of the Gangetic plain was pushed during the week under review close alongside the hills, so that no easterly current could pass from the Bay into North-Western India.

The chart of the 19th showed low pressure areas—one over Sind, and a second over Oudh and Bengal, while the highest readings were in the extreme south. Pressure differences were smaller than usual over the Peninsula, and the winds on the West Coast, instead of being strong from the westward, were light and variable. Southerly winds prevailed over the head of the Bay and easterly winds at a few places in Bengal, but all over the Gangetic plain and the central parts of the country the direction was westerly. Rain was reported generally over the Peninsula, Burma, and East Bengal, while showers were reported from the Central Provinces and the north of the Punjab. The amounts were moderate or small. Elsewhere there was no rain. On the 20th the chart showed very little alteration as regards the general direction of the wind or the distribution of pressure, but there was some little change in the extent and area of the rainfall. Thus rain had ceased over the centre and part of the east of the Peninsula and had decreased in the central parts of the country and in Bengal. In Burma, Assam, and the west of the Peninsula the fall continued general. All over the Gangetic plain, North-West India, and the east and centre of the Peninsula there was no rain. On the 21st there was again very little change in the distribution of pressure, but readings had become even more uniform over the Peninsula than on the preceding day. The wind was north-easterly and light on the West Coast, and north-westerly to westerly all down the Gangetic plain. Rain had fallen along the West Coast, over the central parts of the Peninsula, over Burma, over Assam, and over North Bengal, while there were one or two showers reported from the central regions. The rainfall was locally heavy at Ahmednagar, but was light elsewhere. On the morning of the 22nd the lowest pressures were shown over the Punjab, and moderately steep gradients existed over the central parts of the country; but over the Peninsula the readings remained very uniform. Southerly or variable light winds prevailed over the Peninsula, and westerly winds over the central parts of the country and the Gangetic plain. Elsewhere there was no change. The force was abnormally light on both sides of India and the rainfall very light generally. Showers had occurred on both sides of the Peninsula, at a few central stations, and at several places in North-East India. At Dhubri and Bombay the fall

was locally heavy, but elsewhere the amounts were generally small. On the 24th pressure was slightly less uniform over the Peninsula, and this change appears to have been accompanied with a greater flow of monsoon air, as the rainfall over the Peninsula was much more general and rather more heavy than on the preceding day. Elsewhere there was no important alteration, and scattered showers were reported from Burma, Assam, and North Bengal. The chart of the 24th showed that the tendency towards the production of the normal pressure gradient over the Peninsula had disappeared, and very uniform pressures and light winds were reported. In other parts of India conditions were generally unchanged. Showers of rain, generally of small amount, were reported from Bombay, the Central Provinces, the Carnatic, Lower Burma, and parts of Bengal. During the 24 hours up to 8 A.M. on the 25th there was again no general change. Light or moderate, fairly general rain was reported from the Peninsula, a few showers in the Central Provinces, but more general and heavier rain in Burma and Bengal.

Temperature:—Owing to the much less general incidence of rainfall, the depression of temperature which prevailed during the preceding week did not last through the week under review. The following table shows the variations of the mean temperature from the normal on each day of the week for the principal Provinces of India:

Province.	19th.	20th.	21st.	22nd.	23rd.	24th.	25th.	Mean variation of week.
	°	°	°	°	°	°	°	°
Burma	+0·5	+0·6	—0·2	—1·1	—1·5	—1·0	—0·4	—0·4
Bengal and Assam	+0·8	+1·8	+1·8	+2·0	+2·3	+2·9	+1·0	+1·8
North-West Provinces and Oudh.	—1·9	+0·1	+2·2	+3·9	+7·6	+6·0	+6·8	+3·5
Punjab	—9·3	—4·7	—1·6	+2·0	+5·9	+4·3	+2·9	—0·1
Bombay	—0·3	+0·7	+1·3	+1·2	+0·1	—1·2	+0·7	+0·4
Berar and Central Provinces	+0·6	+2·0	+5·3	+5·3	+4·5	+2·4	+3·4	+3·4
Guzerat and Central India	—2·5	—0·8	+2·0	+3·5	+4·1	+3·2	+3·8	+1·9
Sind and Rajputana	—3·3	+0·2	+1·3	+3·4	+3·0	+2·2	+2·2	+1·3
Madras	—0·8	+0·6	+1·2	+1·1	+0·2	+0·2	+0·4	+0·4
Mean for whole India	—1·8	+0·1	+1·5	+2·4	+2·9	+2·1	+2·3	+1·4

From the above it will be seen that the mean temperature for the week was 1·4° above the average, showing a rise of 3·6° as compared with the mean temperature of last week. The first day was the only day on which the mean temperature of India was deficient; on all the other days it was excessive, the greatest excess being on the 23rd. The provincial variations show that only in Burma and the Punjab was the mean temperature below the normal, and in these two instances the amount of the deficiency was very small. In the Punjab the range of temperature during the week was very large; for whereas on the 19th the mean temperature was 9·3° below the normal, on the 23rd it was 5·9° above, showing a range in the mean temperature of 15°.

Rain:—The rainfall of the week under review has been less heavy and less general than during the preceding week. During last week effective rain

was received in every division in India, while, on the contrary, during the present week ten divisions have received actually no rain, and seven more divisions have received average amounts for the division of less than one-tenth of an inch for the whole week. The regions which received absolutely or practically no rain include the following divisions, *viz.*, Chota Nagpur, Behar (South), all the North-Western Provinces and Oudh divisions, all the Punjab divisions except the North-Western, Kathiawar, Sind, Rajputana, and Central India (West). In all other parts of India the rainfall for the week was effective, though over by far the larger portion of the country the amount received was considerably less than that normally recorded during this week. The divisions which received excessive rain were Lower and Central Burma, Assam (Surma and Brahmaputra), the Bombay Deccan, Khandeish, the East Coast (North (*a*), Central, and South), and Madras (Central). In all the other divisions there was a deficiency. The greatest actual defect was 7·58 inches in Coorg, followed by 5·44 inches in Malabar, by 4 inches in Tenasserim and Arakan, and by 3·30 inches in the Konkan. The greatest actual excess was 3 inches in Assam (Surma), followed by 2¼ inches in Central Bengal.

The relative distribution of rainfall was not very dissimilar to the normal except in one important particular, *viz.*, the very large failure of the rains on the west, and particularly on the South-West Coasts.

The three final columns of the table show the state of the monsoon rains up to date—the 1st column giving the average actual divisional rainfall for the period May 29th to June 1892; the second, the normal average rainfall for the same division and period; and the third showing the variation. The rains so far then have been heavy in Orissa, Chota Nagpur, Oudh (South), the North-West Provinces (Central), the Punjab (West), the Bombay Deccan, Khandeish, the Central Provinces (East), Guzerat, and nearly all the Madras divisions. In Lower Burma, Central Burma, Behar (North), the North-West Provinces (East and West), the Konkan, and the Jaipur division of the East Coast the rainfall has been about equal to the normal, and in all the other divisions the fall has been deficient.

The record of heavy falls during the week shows no very heavy amounts, except in parts of the North-East of India, and even there the amounts received were by no means exceptional. The following were the more important:

Division.	District.	Station.	Amount.
Burma	Shwegyin	Kyaikto	10·05 inches.
	Arakan	Akyab	15·58 ,,
Assam	Khasia Hills	Cherra	45·37 ,,
Bengal	Mymensingh	Netrakona	11·16 ,,
	Cooch Behar	Matabhanga	12·39 ,,
Behar	Purneah	Arraria	3·35 ,,
Malabar	South Kanara	Coondapur	5·76 ,,
Mysore	Kolar	Srinivaspur	3·68 ,,
Deccan	Kolhapur	Bawda	6·28 ,,
Khandeish	Ahmednagar	Parner	7·01 ,,
Berar	Amraoti	Murtazapur	4·95 ,,
Guzerat	Surat	Pardi	5·26 ,,
Madras	Godavari	Alamur	4·25 ,,
	Cuddapah	Piler	7·05 ,,
	North Arcot	Punganur	4·65 ,,

SIMLA, *30th June, 1892.*

W. L. DALLAS,
Assistant Meteorological Reporter to the Government of India.

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 25th June.*—Rainfall good in the Deccan; moderate in the Circars, Karnatic, and parts of the Central districts; light in the South and on the West Coast. Cultivation and sowing are proceeding actively in most parts, but retarded on the West Coast. Anxiety regarding water-supply is removed generally. Pasture is becoming available after rain, but fodder is very scarce in parts of Nellore, Bellary, and Anantapur. General prospects have much improved in the affected portion of the Deccan, and somewhat in Nellore. Prices are practically stationary, but very high everywhere; sharp rise in Nilgiris; slightly easier in the Deccan. FAMINE RELIEF: *Numbers on works*:—Deccan 50,677, Karnatic 26,961, and Central 9,030: *Total* 86,668 against 92,353, the corrected number for last week; decrease in the Deccan general, except in the Cumbum taluk of Kurnool and the Bellary taluk of Bellary, owing to recent rainfall. *On gratuitous relief*:—Deccan 756, Karnatic 210, and Central 215: *Total* 1,181 against 1,055 last week; increase in Nellore. Loans for wells:—Deccan Rs. 7,34,000, Karnatic Rs. 4,11,000, and Central Rs. 10,21,000: *Total* Rs. 21,66,000 disbursed. Wells completed—583, 1,887, and 1,232: wells under construction—5,912, 1,897, and 7,070 in respective blocks. Agriculturists' loans—Rs. 68,000, Rs. 69,000, and Rs. 66,000: *Total* Rs. 2,03,000 disbursed in respective blocks.

Bombay.—*For week ending 29th June.*—Rain throughout the Presidency Proper, except in three districts; generally good or moderate. Total fall insufficient for sowing purposes or young seedlings throughout Konkan, and in parts of Gujarat, Kathiawar, Khandesh, Nasik, and Dharwar. Slight rain in three districts of Sind, but river low, and want of water for crops greatly felt. Fodder is scarce in parts of seven and water in parts of two districts. Cattle are poor in parts of three districts. Prices are generally steady. FAMINE RELIEF: *Numbers on works*:—Bijapur 115, Belgaum 2,185, Dharwar 675, and Kolhapur 8,508: *Total* 11,483 against 12,330 last week.

Bengal.—*For week ending 28th June.*—There was a break in the rains at the beginning of the week, and a slight check to cultivation is reported from some districts; but fairly general rain fell towards its close over the greater part of the Province. More rain is wanted in South Behar and Chota Nagpur. Standing crops are doing well. Rice and autumn crops are still being sown, while in some places transplanting of seedlings has begun. Reports from the affected districts continue to be satisfactory. In Darbhanga much land still remains to be sown, for which necessary advances are being given. In spite of the large decrease in the number on relief works reported last week, no retrograde movement has taken place in Darbhanga, and numbers have further decreased. A small increase is reported from Monghyr and Dinajpur and a

decrease from Bhagalpur. In Muzaffarpur the decrease has been large. Prices continue stationary, but in Dinajpur, Gaya, and Shahabad they show an upward tendency. Cattle are generally in good condition. Fodder is now abundant, and there is no lack of water-supply in any part of the Province. FAMINE RELIEF: *Numbers on works*:—Muzaffarpur 4,020, Darbhanga 24,144, Monghyr 1,109, Bhagalpur 6,516, and Dinajpur 485: *Total* 36,274, showing a decrease of 3,753 since last week. *Numbers on gratuitous relief*:—Darbhanga 827, Monghyr 283, Bhagalpur 1,527: *Total* 2,637, showing a decrease of 376 since last week.

North-Western Provinces and Oudh.—*For week ending 29th June.*—Weather very hot and oppressive. There have been but a few local showers in the plains, and no rain in the hill districts of Kumaon, where scarcity prevails. The early autumn sowings which had germinated are suffering from drought, and further sowings are stopped. Early and good rain is urgently required throughout the Provinces. Prices are rising in several districts. Fodder continues scarce in Almora

Punjab.—*For week ending 29th June.*—Slight rain has fallen in parts of seven districts. Prices are rising in six districts; stationary elsewhere. Sowings of autumn crops on irrigated lands are going on in Lahore, and have commenced, though badly, in Mooltan, but discontinued in Rawal Pindi owing to insufficient rainfall. Rice and maize are being sown in parts of Kangra. Cotton sowing is delayed for want of rain in Umballa. Water is getting scarce in Kangra and in parts of Dera Ismail Khan. Wells are drying up in Jullunder. The Sidhnai Canal, Mooltan, is dry; others flowing feebly. Rain urgently wanted throughout the Province. Prospects of crops continue bad in Kangra; also on irrigated lands in Lahore, and poor in Shahpur. Extra spring crops are reported below average in Dera Ismail Khan. General outlook gloomy in Mooltan. Condition of cattle is bad in four districts. Cattle lean in Hissar and suffering from scarcity of fodder in Simla and three plain districts. Fodder is reported insufficient in all but two districts.

Central Provinces.—*For week ending 29th June.*—Rain has continued to fall in light showers, but more is required for autumn sowings, especially in four districts, where sowings have been stopped from want of rain. Fodder insufficient in parts. Prices steady.

Burma.—*For week ending 25th June.*—Good rainfall everywhere, except in five districts of Upper Burma and the Northern Shan States, where showers are light, and in Shwebo and Yeu, where no rain fell. Ploughing and sowing of paddy are progressing throughout Lower Burma. Ploughing, sowing, and transplanting of wet-weather paddy continue in progress in most districts of Upper Burma. Sowing of sessamum in Lower Chindwin and Myingyan, of cotton in Myingyan, and of Indian-corn in Pakokku is progressing. The price of paddy has risen considerably in one district and slightly in seven others, while it has fallen considerably in one and slightly in four districts. The price of rice has fallen in two districts. FAMINE RELIEF: *Numbers on works*:—Shwebo 3,031, Yeu 101, Lower Chindwin 380, Myingyan 572, Meiktila 2,691, and Yamethin 3,576: *Total* 10,351 against 13,853 last week. Relief works closed in Magwe.

Assam.—*For week ending 29th June.*—Weather seasonable. Rain is wanted in Sibsagar. Transplanting of winter paddy continues. Tea doing well. Condition of cattle is fair. Fodder plentiful.

Mysore and Coorg.—*For week ending 29th June.*—MYSORE: Rainfall general, but more rain is wanted in parts of three districts. *Ragi* sown in parts, and crops are generally in fair condition. Prices have slightly risen in one district. FAMINE RELIEF: *Numbers on works*:—Bangalore 276, Kolar 1,070, Shimoga 89, and Chitaldroog 252: *Total* 1,687 against 2,878 last week.

COORG: Rainfall slight. Ploughing of rice fields and forming of nurseries, also planting of coffee, delayed for want of sufficient rain. *Ragi* and cardamom crops are thriving. Slight rise in prices. Forage and water for cattle are sufficient.

Berar and Hyderabad.—*For week ending 29th June.*—BERAR: Average rainfall good. Weather cloudy and sultry. Preparation of land for autumn crops is in progress. Cotton sowing has commenced. Water scarce in one district and fodder locally insufficient. Cattle are in good condition. Prices are almost stationary.

HYDERABAD.—Rain moderate during week. Sowing of autumn crops has commenced in some places and fields are being prepared in others. Prices continue high.

Central India.—*For week ending 29th June.*—Slight rain in four Agencies; everywhere insufficient. Agricultural operations started in two Agencies; in progress in three others. Sowings discontinued in parts of Bhopawar for want of rain. Condition of standing crops in Bhopal is indifferent, and reported to be withering from want of rain in Western Malwa. Rain is urgently required to save young crops. No change in the condition of pasturage. Prices of food grains are high in two Agencies and Neemuch; steady elsewhere.

Rajputana.—*For week ending 29th June.*—Rainfall good at Abu and three Agencies; slight in four other Agencies. Ploughing for the autumn crop has commenced in seven Agencies and Ajmere, where rain has fallen. Standing crops fair in Meywar. Agricultural stock is generally good and sufficient, except in Marwar and parts of Meywar and Bikanir, where cattle are suffering from want of fodder and water. Cattle very emaciated in Kherwara, and reported dying from starvation in Merwara. Pasturage and fodder sufficient in eight Agencies; scarce elsewhere. Prices have risen in four Agencies; fluctuating in three others; steady elsewhere. In Kotah 447 emigrants returning and 3,256 cattle. FAMINE RELIEF: *Numbers on works*:—Ajmere-Merwara 30,929, Marwar (for week ending 22nd June) 1,774, Kishengarh 1,514, and Bikanir 3,085: *Total* 37,302 against 35,098 last week. *On gratuitous relief*:—Ajmere-Merwara 11,650 including 3,625 in receipt of home relief, Marwar (for week ending 22nd June) 2,496, Kishengarh 170, and Bikanir 1,429: *Total* 15,745 against 15,220 last week.

Nepal.—*For week ending 23rd June.*—Weather dry and warm. Rice is being transplanted.

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

SUMMARY OF REPORTS ON AGRICULTURAL CONDITIONS AND PROSPECTS IN INDIA FOR THE MONTH OF MAY (PUBLISHED IN CONTINUATION OF THE SUMMARIES FOR MARCH AND APRIL CONTAINED IN THE DESPATCHES TO THE SECRETARY OF STATE WHICH APPEARED IN THE "GAZETTE OF INDIA" OF THE 25TH JUNE).

1. The position is very much what was predicted in the summary for April. In districts which have received the earlier showers of the monsoon in sufficient quantity agricultural operations have been more or less resumed. In those which have received little or no rain the numbers on relief-works have continued slowly to increase. During May the monsoon did not give so much rain as was hoped to the Madras Presidency, but the exceptional cyclone which travelled from the West Coast to the North-West Himalayas in two days produced unexpected rainfall in the tracts through which it passed, and had considerable influence in attracting labour from the relief-works to the fields. Briefly reviewing the agricultural condition in the various Provinces at the end of May, it may be said that the position in Bombay had materially improved; that in Madras some of the affected tracts had been relieved by rain, while in the rest no serious change for the worse had occurred. In Burma the area officially reported as affected by scarcity had contracted. In Bengal, although the number on relief-works had increased, many of the affected tracts had been considerably benefited by rain. In Ajmir and Rajputana the position remained much as before. In no other part of India was there any real cause for anxiety.

2. The following is a brief abstract province by province of the more important facts noticed in the provincial reports for May or brought to knowledge during June:

In *Madras*, although the rainfall of May was much below the average expected, there has since the close of the month been heavy and general rain in three of the affected districts, and useful showers have fallen elsewhere. During the period under report prices were slightly easier, trade was active, and there was no evidence of any diminution in the food-stocks. No unsatisfactory reports as to the condition of the people either in their villages or on the relief-works have been received, except from Bellary and Salem. It is now reported that the increased mortality in February last was wholly due to small-pox, while that of March and April is mostly ascribed to the same cause and to fever.

In *Bombay* the affected area has been reduced by the exclusion of the districts of Sholapur, Poona, and Satara, where it is reported that no further cause for anxiety remains. In the other three affected districts the general condition and prospects are not unsatisfactory. Good and sufficient rain has fallen throughout them, and agricultural operations are in progress. The Bombay Government has abolished the special appointment of Famine Under-Secretary which was created in February last to deal with the work due to the scarcity.

In *Bengal* the prospects of the country have been generally improved by the rain which fell in May, and field work has been resumed in several of the affected districts. Further improvement has occurred during the current month, and there has been a material decrease in the numbers on relief-works. The mortality in April was abnormal in three districts, but is ascribed to fever and small-pox, and not in any way to the scarcity or to want of relief.

In the Himalayan tracts of the *North-Western Provinces and Oudh* the physical condition of the people remains generally good. There was an increase in the death-rate in April, but it was due to fever and bowel-complaints and not to the distress. There was no change in the prospects of the affected districts during May.

There is very little cause for apprehension in the *Punjab*. The scarcity in the hills is not giving rise to any pronounced distress, and the only district

(Rawalpindi) in which the possibility of a demand for relief-works was anticipated has received good rain in the current month.

In *Burma* the condition of the affected districts continues to improve, and a further considerable decrease in the area officially shown as affected took place in May. The public health is satisfactory, and in no district has the death-rate been affected by the scarcity. Prices fell during the month. Large stocks of rice are believed to be held in the upper division of the Province, to which the distress is confined, while importations from Lower Burma continue to be brisk.

In *Ajmere-Merwara* there was again no important change during May. An epidemic of cholera has unfortunately visited the district, causing a large number of deaths; but, apart from this, the health and condition of the people were fairly good. The Chief Commissioner has recently submitted a revised programme of relief-works sufficient to provide for all emergencies for the next three months. The numbers on relief-works continue large.

As regards the Native States where scarcity exists, it is reported that in *Mysore* the condition continues to improve, and the numbers on relief-works are steadily decreasing. In the *Rajputana States* there was no material change during May. In the *Southern Mahratta States* the monsoon has set in favourably, and a considerable decrease in the number on relief-works is anticipated.

The large number relieved in *Kolhapur* is due to exceptional action adopted by the Darbar. This circumstance is mentioned in order to explain the exceptional character of the statistics from Kolhapur, where the position is in reality no worse than in the adjacent country. Some distress is also reported to exist in the Tehri State (Garhwal), but the situation does not give any cause for anxiety.

3. The following is a conspectus of the relief operations in each Province:

Province.	Number of affected districts.	Area, square miles.	Population.	Affected area, square miles.	Population of affected area.	Number on relief works on last day of May 1892.	Number on gratuitous relief on same date.
Madras	9	67,613	13,167,000	22,893	3,565,000	80,492	1,138

REVENUE AND AGRICULTURAL DEPT., *Simla, the 28th June, 1892.*

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Circular No. $\frac{23}{4}$.

Extract from the Proceedings of the Government of India in the Revenue and Agricultural Department, (Museums and Exhibition),—dated Simla, the 21st June, 1892.

Read—

The following Official Circular of information for Foreign Exhibitors, received from the Chief of the Department of Foreign Affairs, World's Columbian Exposition, Chicago, United States, America.

GENERAL REGULATIONS FOR FOREIGN EXHIBITORS.

1. The Exhibition will be held on the shore of Lake Michigan, in the City of Chicago, and will be opened on the first day of May 1893, and closed on the 30th day of October following.

2. All Governments have been invited to appoint commissions for the purpose of organizing their departments of the Exhibition. The Director-General should be notified of the appointment of such foreign commissions as soon as the appointment is made.

Diagrams of the buildings and grounds will be furnished to the foreign commissions on or before January 1, 1892, indicating the localities to be occupied by each nation, subject, however, to revision and readjustment.

3. Applications for space and negotiations relative thereto must be conducted with the commission of the country where the article is produced.

4. Foreign commissions are requested to notify the Director-General not later than June 1, 1892, where they desire any increase or diminution of the space offered them, and the amount.

5. Before November 1, 1892, the foreign commissions must furnish the Director-General with approximate plans showing the manner of allotting the space assigned to them, and also with lists of their exhibitors and other information necessary for the preparation of the official catalogue.

Products brought into the United States at the ports of Portland, Me.; Boston, Mass.; New York, N. Y.; Philadelphia, Penn.; Baltimore, Md.; Norfolk, Va.; Newport News, Va.; Key West, Fla.; Mobile, Ala.; New Orleans, La.; Galveston, Texas.; San Francisco, Cal.; Port Townsend, Wash.; Portland, Ore.; Port Huron, Mich.; Detroit, Mich.; and Chicago, Ill., or at any other port of entry, intended for display at the International Exhibition, will be allowed to go forward to the Exhibition buildings, under proper supervision of customs officers, without examination at such ports of original entry, and at the close of the Exhibition will be allowed to go forward to the port from which they are to be exported. No duties will be levied upon such goods unless entered for consumption in the United States.

6. The transportation, receiving, unpacking, and arranging of the products for exhibition will be at the expense of the exhibitor.

7. The installation of heavy articles requiring special foundations or adjustment should, by special arrangement, begin as soon as the progress of the work upon the buildings will permit. The general reception of articles at the Exhibition buildings will commence on November 1, 1892, and no articles will be admitted after April 10, 1893.

NOTE.—Weight of single article limited to 30,000 pounds.

8. Space assigned to foreign commissions, and not occupied on the 10th day of April 1893, will revert to the Director-General for reassignment.

9. If products are indented for competition, it must be so stated by the exhibitor; if not, they will be excluded from the examination by the International juries.

10. An Official Catalogue will be published in English, French, German, and Spanish. The sale of catalogues is reserved to the World's Columbian Exposition.

The twelve departments of the classification which will determine the relative location of articles in the Exhibition—except in such collective exhibits as may receive special sanction—also the arrangement of names in the catalogue, are so follows:

A. Agriculture, Forest Products, Forestry, Machinery, and Appliances.
B. Viticulture, Horticulture, Floriculture.
C. Live Stock: Domestic and Wild Animals.
D. Fish, Fisheries, Fish Products, and Apparatus for Fishing.
E. Mines, Mining, and Metallurgy.
F. Machinery.
G. Transportation: Railways, Vessels, Vehicles.
H. Manufactures.
J. Electricity.
K. Fine Arts: Painting, Sculpture, Architecture, and Decoration.
L. Liberal Arts: Education, Literature, Engineering, Public Works; Music, and the Drama.
M. Ethnology, Archæology, Progress of Labour and Invention, Isolated and Collective Exhibits.

11. Foreign commissions may publish catalogues of their respective sections.

12. Exhibitors will not be charged for space.

A limited quantity of steam and water power will be supplied gratuitously. The quantity of each will be settled definitely at the time of the allotment of space. Any power required by the exhibitor in excess of that allowed will be furnished by the World's Columbian Exposition at a fixed price. Demands for such excess of power must also be settled at the time of the allotment of space.

13. Exhibitors must provide at their own cost all show-cases, shelving, counters, fittings, etc., which they may require, and all countershafts, with their pulleys, belting, etc., for the transmission of power from the main shafts in the building where the exhibit is located. All arrangements of articles and decorations must be in conformity with the general plan adopted by the Director-General.

NOTE.—The general plan requires all decorations, signs, etc., to be in harmony with the dignity and magnitude of a magnificent exhibition, and the Director-General is empowered to secure this result.

The World's Columbian Exposition will take precautions for the safe preservation of all objects in the Exhibition; but it will in no way be responsible for damage or loss of any kind, or for accidents by fire, or otherwise, however originating.

NOTE.—A thoroughly equipped fire department will protect the buildings and exhibits, and a large police force will maintain order. The entire exposition grounds will be under the immediate supervision of the City of Chicago and of the State of Illinois. A guard equal to any possible contingency is thus provided; the municipal authority being upheld, if necessary, by the State troops, and the State by the army of the United States, so that no apprehension need arise as to losses resulting from lawlessness.

14. Favourable facilities will be arranged by which exhibitors or foreign commissions may insure their own goods.

NOTE.—Special care has been taken to render everything about the Exposition as nearly fireproof as possible, and it is reasonably certain that the rates of insurance will not be excessive, but, on the contrary, very reasonable. Exhibitors may insure in any company, foreign or domestic. Arrangements will be made with English, French, German, and American companies to fix uniform or special rates on exhibits and buildings, so that no advantage will be taken of any exhibitor who wishes to insure his goods.

Foreign commissions may employ watchmen of their own choice to guard their goods during the hours the Exhibition is open to the public, subject to the rules and regulations of the Exposition.

15. Foreign commissions, or such agents as they may designate, shall be responsible for the receiving, unpacking, and arrangement of objects, as well as for the removal at the close of the Exposition; but no person shall be permitted to act as such agent until he can give to the Director-General written evidence of his having been approved by the proper commission.

16. Each package must be addressed, "To the Commission (name of country) at the World's Columbian Exposition, Chicago, United States of America," and should have at least two labels affixed to different, but not opposite, sides of each case, and give the following information:

17. (1) The country from which it comes; (2) name of firm of the exhibitor; (3) residence of the exhibitor; (4) department to which objects belong; (5) total number of packages sent by that exhibitor; (6) serial number of that particular package.

18. Within each package should be a list of all objects.

19. If no authorized person is at hand to receive goods on their arrival at the Exposition buildings, they will be removed without delay and stored at the risk and cost of whomsoever it may concern.

20. Articles that are in any way dangerous or offensive, also patent nostrums and empirical preparations, whose ingredients are concealed, will not be admitted.

21. The removal of goods on exhibition will not be permitted prior to the close of the Exhibition.

NOTE.—Articles not on exhibition in competition may be sold under special permit.

22. Sketches, drawings, photographs, or other reproductions of articles exhibited will only be allowed upon the joint assent of the exhibitor and the Director-General; but views of portions of the building may be made upon the Director-General's sanction.

23. Immediately after the close of the Exhibition, exhibitors shall remove their effects, and complete such removal before January 1, 1894. Goods then remaining will be removed and sold for expenses, or otherwise disposed of under the direction of the World's Columbian Exposition.

24. Each person who becomes an exhibitor thereby acknowledges and agrees to be governed by the rules and regulations established for the Government of the Exhibition.

Special regulations will be issued concerning the exhibition of fine arts, awards, the organization of the international juries, and sales of special articles within the buildings, and on other points not touched upon in these preliminary instructions.

25. All communications concerning the exhibition will be addressed to the Director-General, World's Columbian Exposition, Chicago, Illinois, United States of America.

The Management reserves the right to explain or amend these regulations, whenever it may be deemed necessary for the interest of the Exhibition.

WALKER FEARN, *Chief, Department of Foreign Affairs.*

GEORGE R. DAVIS, *Director-General.*

UNITED STATES GOVERNMENT REGULATIONS GOVERNING THE FREE IMPORTATION OF ARTICLES FOR EXHIBITION AT THE WORLD'S COLUMBIAN EXPOSITION AT CHICAGO IN THE YEAR 1893.

TREASURY DEPARTMENT,

OFFICE OF THE SECRETARY,

WASHINGTON, D. C., November 5, 1891.

On April 25, 1890, the President of the United States approved an Act passed by the Congress providing for celebrating the four hundredth anniversary of the discovery of America by Columbus, which Act contains the following preamble:

"WHEREAS it is fit and appropriate that the four hundredth anniversary of the discovery of America be commemorated by an exhibition of the resources of the United States of America, their development, and of the progress of civilization in the new world; and

"WHEREAS such an exhibition should be of a national and international character, so that not only the people of our Union and this Continent, but those of all nations as well, can participate, and should therefore have the sanction of the Congress of the United States."

And Section 11 of said Act is as follows:

"That all articles which shall be imported from foreign countries for the sole purpose "of exhibition at said Exposition, upon which there shall be a tariff or customs duty, shall "be admitted free of payment of duty, customs fees, or charges under such regulation as "the Secretary of the Treasury shall prescribe; but it shall be lawful at any time during "the exhibition to sell, for delivery at the close of the Exposition, any goods or property "imported for and actually on exhibition in the Exposition buildings or on its grounds, "subject to such regulations for the security of the revenue and for the collection of the "import duties as the Secretary of the Treasury shall prescribe: *provided*, that all such "articles, when sold or withdrawn for consumption in the United States, shall be subject "to the duty, if any, imposed upon such articles by the revenue laws in force at the date "of importation, and all penalties prescribed by the law shall be applied and enforced

"against such articles, and against the persons who may be guilty of any illegal sale or "withdrawal."

Under the authority conferred upon him by the above section and by previous statutes of the United States, the Secretary of the Treasury prescribes the following regulations, *viz.*:

1. It is the purpose of this Department to secure expedition and security to all articles imported for exhibition at the Chicago Exposition without the exaction of customs duties, fees, or charges, and to arrange the proceedings on entry so as to afford the utmost convenience and despatch.

2. In order to obtain the benefits of this arrangement, every package destined for the Exposition should have affixed to it by the foreign shipper one or more labels representing the flag of the country to which it belongs. This label should be about eight by twelve inches in size, and should bear across the face, in plain black letters, the inscription "Exposition at Chicago." All packages should be plainly marked as follows: (1) "Collector of Customs, Chicago"; (2) "Exhibits for Columbian Exposition"; (3) Name of consignee or agent at the port of first arrival in the United States; (4) The shipping marks and numbers of the exhibitor; (5) Name and address of the exhibitor.

3. Every foreign exhibitor will prepare, in duplicate, a statement in the form of an invoice, which shall show the name of the exhibitor, the marks and numbers of the packages, with a description of their contents and a declaration of the quantity and the market value of each separate kind thereof in the country of production. This statement must be signed by the exhibitor, but will require no further verification. One of the invoices will be transmitted by mail to the Collector of Customs at Chicago, and the other to the consignee of the goods at the port of first arrival.

4. As a matter of convenience, it is recommended that all packages intended for the Exposition shall be consigned to an agent, or forwarder, or commissioner, at the port of first arrival, who will attend to customs business incident to the transfer of packages from the importing vessel to a bonded route for transportation to Chicago. All of the bonded transportation lines will discharge their freight at stations in Chicago to be arranged within the Exposition grounds, and packages marked as suggested in Article 2 may be taken to their respective divisions as soon as they have been identified by the customs officers.

5. The following list of companies, bonded for the transportation of merchandise to Chicago, without appraisement, is furnished for the information of parties whom it may concern:

From Portland Me.—Grand Trunk Railway Company of Canada; American Express Company.

From Boston, Mass.—Central Vermont Railroad Company; American Express Company; New York and New England Railroad Company; The Fitchburg Railroad Company; Merchants' Despatch Transportation Company; Boston and Maine Railroad Company.

From New York, N. Y.—Pennsylvania Company; American Express Company; Pennsylvania Railroad Company; New York, West Shore, and Buffalo Railway Company; Michigan Central Railroad Company; Merchants' Despatch Transportation Company; New York, Lake, Erie and Western Railroad Company; Central Vermont Railroad Company; Chesapeake and Ohio Railway Company; Baltimore and Ohio Railroad Company; Wells, Fargo & Co.; Lehigh Valley Railroad Company; West Shore Railroad Company; Delaware, Lackawanna, and Western Railroad Company; United States Express Company.

From Philadelphia, Pa.—Pennsylvania Company; Pennsylvania Railroad Company; Delaware, Lackawanna, and Western Railroad Company; Merchants' Despatch Transportation Company; Baltimore and Ohio Railroad Company.

From Baltimore, Md.—Baltimore and Ohio Railroad Company; Northern Central Railway Company.

From Norfolk, Va.—Norfolk and Western Railroad Company.

From Newport News, Va.—Chesapeake and Ohio Railway Company.

From Key West, Fla.—Plant Investment Company.

From Mobile, Ala.—Mobile and Ohio Railroad Company.

From New Orleans, La.—Morgan's Louisiana and Texas Railroad and Steamship Company; St. Louis, Iron Mountain and Southern Railway Company; Illinois Central Railroad Company; Luisville, New Orleans, and Texas Railway Company; Texas and Pacific Railway Company; Southern Pacific Company; Mobile and Ohio Railroad Company.

From Galveston, Tex.—St. Louis Iron Mountain and Southern Railway Company; Southern Pacific Company.

From San Francisco, Cal.—The Central Pacific Railroad Company; Southern Pacific Company; Wells, Fargo & Co.

From Port Townsend, Wash.—Northern Pacific Railroad Company.

From Portland, Oregon.—Northern Pacific Railroad Company; Oregon Short Line and Utah Northern Railway Company.

From Port Huron, Mich.—Chicago and Grand Trunk Railway Company.

From Detroit, Mich.—Michigan Central Railroad Company; Lake Shore and Michigan Southern Railroad Company; Wabash Railroad Company.

6. The consignee of the merchandise at the first port of arrival must present at the custom-house the invoice above described, with a bill of lading and an entry in duplicate made out upon the special form to be provided for this purpose by the Treasury Department, which shall show the name of the foreign shipper or owner, the name of the importing vessel, the marks and numbers of the packages, with a statement of the nature of their contents and of their foreign value as declared in the invoice. The entry must also indicate the bonded route by which the goods are to be transported to Chicago, and must be signed by the consignee. No other declaration will be required. The goods will be consigned, on the customs entry, to "Collector of Customs, Chicago," and there need be no computation of duties upon this entry, but the amount charged against the bond of the transportation company shall be double the invoice value.

7. The Collector will thereupon issue a special permit bearing the words "Chicago Exposition," authorizing the transfer of the goods from the ship to the bonded railroad for transportation to Chicago, and will record and file one of the entries in his office and send the other by mail, with the invoice, to the Collector at Chicago.

8. The permit will be taken by the agent or consignee to the inspector on board the importing vessel, who will thereupon send the goods, by a cartman duly licensed, to be delivered under the supervision of a customs officer to the transportation company.

9. The consignee will also prepare a manifest of the goods, which, after being duly certified, will be handed to the conductor of the car carrying the same, and a duplicate copy must be sent by mail to the Collector of Customs at Chicago. Upon arrival at Chicago of any car containing such articles, the conductor or agent of the railroad company will report such arrival by the presentation of the manifest to the customs officer designated to receive it, who shall compare the same with the copy received by mail, and superintend the opening of the car, taking care to identify the packages by marks and numbers as described in the manifests. In case of the non-receipt of the manifests, the unlading of cars need not for that reason be delayed, but the invoice may be used to identify the packages.

10. Articles sent by foreign Governments to the Exposition, which are used solely for Government purposes and are not intended for sale, will be admitted to entry at the exterior port of arrival on certificates of the proper foreign commissioner without the production of invoice. But it is desired that the estimated value of each package shall be stated on the certificate or the bill of lading in order that the pecuniary responsibility of the transportation company may be fixed.

11. These regulations will also apply to goods sent to the Exposition from foreign contiguous territory. All articles destined for the Exposition arriving from Canada on through cars under consular seal, and articles which are sent direct by vessel from any foreign port to Chicago, must be consigned by the foreign shipper to the "Collector of Customs" at that port, and on entry being made, as in the case of goods arriving at the seaboard, a permit will be issued for the transfer of the goods directly to the Exposition grounds.

12. The buildings and spaces set apart for the purposes of the Exposition are constituted "constructive bonded warehouses and yards," and all foreign articles placed therein under the supervision of the custom officers, and which have been specially imported for exhibition therein, will be treated the same as merchandise in bond. No warehouse entry will be required at Chicago in order to obtain entrance for such goods, but the latter will be kept under customs supervision in accordance with the general regulations governing merchandise in bonded warehouses, except as herein otherwise provided for. The Collector at Chicago will keep a special record, in the form of a warehouse ledger, of every invoice, assigning serial numbers to the same in order of their reception, and the transportation entry received from the Collector at the port of arrival will be considered the warehouse entry.

13. After the packages have been placed in the respective positions assigned to them by the officers of the Exposition, they will be opened by an officer of the customs, who shall primarily identify the contents with the invoice only as to quantity and character. Due examination of the contents and appraisement of values will be subsequently made by the appraiser, who shall be furnished with the invoice of the articles to be appraised, and

shall indorse his report of appraisement upon such invoice in like manner as if such articles were regularly entered for consumption or warehouse. The entry will then be liquidated, the full amount of duties ascertained, and the whole transaction entered upon the prescribed record. All the proceedings relating to the examination, appraisement, and liquidation shall be the same as on ordinary importations.

14. As, under the United States tariff, the cost of packages is made a part of the dutiable value of imported goods, the empty boxes, barrels, and casks from which imported articles have been taken in order to be displayed should be carefully preserved so as to be repacked for exportation at the close of the Exposition. Dutiable packing-cases not exported will be subject to the payment of duty. It is expected that a place will be provided for the storage of such empty packages, and the latter should be recorded and numbered for identification.

15. Packages containing articles imported for gratuitous distribution, or for actual use and consumption in restaurants, refreshment rooms, etc., must be regularly entered for consumption and duty paid thereon before being delivered by the customs officers.

16. The articles after having been received in the Exposition will remain under the custody of the customs officers, and must not be removed from the place assigned without a permit from the Collector of Customs or the officer who may be designated by him to grant such permit. In no case shall such articles be released from the custody of the customs officers, unless the same shall have been regularly withdrawn for consumption, for warehouse, or for export. The requisite number of customs inspectors will be stationed at every place containing foreign exhibits, each of whom will be placed in charge of a section, which shall be numbered and designated as a customs division. A list of the articles entered for exhibit in his section will be furnished to each of such inspectors, who shall retain a copy thereof, certify the original, and transmit it to the Collector.

17. Sales may be made during the exposition of articles imported for exhibition, but deliveries of the same will be allowed only at the close of the Exposition. For this purpose a regular withdrawal as from bond will be required, and duty must be paid according to law. In case the articles are sold for delivery at some port other than Chicago, a withdrawal may be made for transportation and re-warehouse, duty to be paid at the place of destination. Any exhibitor of articles which shall be sold may authorize withdrawal of the same by the purchaser, such authority to be contained in a written notice to the Collector at Chicago. After the filing of such notice, the person specified in the same shall be recognised as entitled to all the rights and subject to all the liabilities of the original importer.

18. Withdrawal from bond cannot be made for less than one entire package, but in case of accidental damage or destruction, it is not intended to assess duties upon such articles as shall not have entered into actual consumption in this country. On articles which shall have suffered diminution or deterioration from incidental handing and necessary exposure, the duty, if paid, will be assessed according to the appraised value at the time of withdrawal for consumption.

19. At the close of the Exhibition all goods intended for exportation will be transported in bond to the seaboard or exterior port, and exported therefrom under the general regulations for immediate export in bond, as modified by special regulations to be in due time provided.

20. Any exhibitor who may import merchandise in excess of that which he desires to place on view in the Exposition may make regular warehouse entry of the same on its arrival at Chicago, whereupon it shall be taken to a United States bonded warehouse and stored without payment of duty, subject to the regulations provided for bonded goods. Withdrawals of merchandise stored under these conditions, if made for the purpose of placing the same within the Exposition, will be treated under the provisions for entry on arrival at first port of entry, and no duty will be required to be paid. Such merchandise must be delivered at the Exposition in charge of a customs officer. Should any merchandise be abandoned by the owner at the close of the Exposition, it will be placed in a general order warehouse for twelve months, and, if then unclaimed, will be sold for account of owner.

21. The privileges granted by virtue of these regulations are intended solely for the benefit of exhibitors at the World's Columbian Exposition, and with the view of relieving them, so far as practicable, of delays and vexations in connection with the customs business pertaining to their importations. Any attempt to take advantage of these regulations in order to evade the tariff laws of the United States will subject the offender to all the penalties prescribed by those laws, including confiscation of goods and fine and imprisonment.

22. The regulations issued by this Department on January 7, 1891, are hereby revoked, and the foregoing adopted in lieu thereof.

SUPPLEMENT TO

The Gazette of India.

No. 28.} SIMLA, SATURDAY, JULY 9, 1892.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the week ending at 8 a.m. on Saturday, 2nd July 1892.

The week under review has been most marked by the absence of monsoon conditions on the West Coast, and consequently during a large part of the week of any rain of importance on the Bombay Coast and over Central and North-West India. Over the Bay and surrounding coasts the monsoon has blown comparatively steadily, and rain has been general, though not on the whole heavy, over Burma and Bengal. At first the monsoon current from the Bay ceased in Behar, and there was no rain beyond that Province; but on the 29th there was a feeble extension north-westward, and rain in small amounts extended as far as Rawal Pindi. On the 30th rain, still in small amounts, prevailed over the greater part of the Gangetic plain and the Punjab, but on July 1st the current retreated again, and only scattered showers were reported; and similar conditions prevailed on the 2nd. Over the central parts of the Peninsula and in the Carnatic showers have been very frequent, so that, though the amounts were generally small, the total for the week was large.

On the 26th June pressure was highest in Tenasserim and lowest over the Punjab, moderate gradients interfering between those Provinces. Over the Peninsula, on the contrary, pressure was exceedingly uniform. Over the Peninsula the winds were light and very irregular in direction, while over the Bay area a moderate monsoon was blowing. In North Bengal the direction turned round into south-east and east, and with this direction penetrated north-westward as far as Bahraich. All over the central parts of the country a fresh westerly wind was blowing. A few light showers were reported over the Peninsula and general moderate rain over North-East India; but elsewhere there was no rain. On the 27th the barometer was rising everywhere, and a slight high pressure area had appeared over the Peninsula. With this exception, conditions were but little changed. The winds were almost unaltered. Rain was heavier on the Malabar Coast, and was more general and heavier throughout the Peninsula, while, on the contrary, it was less general and less heavy in North-East India. Heavy rain

had fallen at Jeypore, and light showers at Saugor, Jubbulpore, and Amraoti ; but, as on the 26th, Central and North-West India were generally without rain. The chart of the 28th showed that the barometer had fallen rather briskly over the west of the Punjab, and the low pressure area over that Province was more strongly marked, but otherwise the distribution was little changed. The wind remained very variable over the Peninsula, and the only change of importance was the extension north-westward of the easterly current from Bengal. This current now reached as far as Roorkee, and rain was falling as far west as Lucknow. General rain was reported over the Peninsula, over North-East India, and over the Central Provinces; but there was none in North-West India. On the morning of the 29th the distribution of pressure was practically unchanged, and the only alteration of importance in the circulation of the winds was the further extension of the easterly current which had spread up to Lahore and Sialkot. Rain had fallen on and near the North-West Himalayas, but, with this exception, there was no rain over North-West India. There was also no rain over the head of the Peninsula or in Behar, but in all other parts of India scattered showers had fallen. The chart of the 30th showed that the barometer had risen briskly over the Punjab. A large area of uniform and relatively low pressure overlay the Punjab and Gangetic plain, while readings were about equally high in Tenasserim and Malabar. The winds were unaltered generally, and were abnormally light in force. Scattered rainfall had occurred in almost all parts of India, the amounts in some places being large. On the 1st the chart showed that a low pressure area had appeared over the west of the Bay, but in other respects there was no change. The extent of rainfall had decreased considerably; and, while the amounts were much larger on the West Coast, they were generally smaller elsewhere. North-West India and the head of the Peninsula were again practically without rain. The chart of the 2nd still exhibited no general change in either the distribution of pressure or circulation of the winds. Scattered rainfall was reported, except from the greater part of North-West India and of the Gangetic plain; but the amounts, except in a few cases, were small.

Temperature.—The scattered light rainfall described above has not had much effect on the temperature, which, except in Bengal, has been excessive.

The following table shows the variations of the mean temperature from the normal on each day of the week for the principal Provinces of India:

Province.	June.					July.		Mean variation of week.
	26th.	27th.	28th.	29th.	30th.	1st.	2nd.	
	°	°	°	°	°	°	°	°
Burma	+0·4	+0·3	—0·6	+0·3	—0·3	+0·6	+0·5	+0·2
Bengal and Assam . .	—0·7	—0·6	—1·1	—0·2	—1·7	—0·4	—0·1	—0·7
North-West Provinces and Oudh.	+7·4	+7·3	+6·7	+1·7	+1·3	+3·3	+4·7	+4·6
Punjab	+4·9	+6·5	+7·2	+4·8	—2·9	—0·8	+1·2	+3·0
Bombay	+1·9	+2·6	+2·1	+3·1	+2·5	+3·5	+3·6	+2·8
Berar and Central Provinces	+5·3	+5·2	+3·3	+2·3	+1·9	+5·1	+5·3	+4·1
Guzerat and Central India .	+4·5	+4·9	+4·6	+3·8	+3·4	+5·5	+6·7	+4·8
Sind and Rajputana . .	+2·8	+1·5	+0·7	+1·1	+0·9	+0·7	+1·0	+1·2
Madras	+1·3	+0·4	+0·4	+0·7	+0·7	—0·1	—0·2	+0·5
Mean for whole India . .	+3·1	+3·1	+2·6	+2·0	+0·6	+1·9	+2·5	+2·3

The warmest days were the 26th and 27th, when the mean temperature of the whole of India was 3·1° above the normal average; the coolest day was the 30th, when the mean was only 0·6° above the normal. As stated above, all the Provinces, except Bengal-Assam, had a higher temperature than usual, the excess

being about 4½° in the Punjab, Guzerat, Central India, and the Central Provinces, and only 0·2° in Burma. In Bengal-Assam all the days and in Burma and Madras two of the days were cooler than usual, while in all the other Provinces there was a steady excess.

Rain.—The rainfall table at the close of the summary shows that very general rain has fallen throughout India during the week, the only divisions which received actually no rain being Kathiawar and Sind. In the Punjab (South) the average fall for the division for the week was only 0·03 inches, and Central India (East) and Madras (South) received less than one quarter of an inch. With these exceptions, fair to good rain was received. The heaviest rainfall was received in Assam (Surma), where the average fall for the division was 15·18 inches: this was followed by 10 inches in Arakan, by over 7 inches in East and North Bengal, and by over 6 inches in Tenasserim and Malabar. In most of the rainfall divisions of Upper and North-West India the average fall for each division for the week was between ¼ and ½ an inch. The third column of the table shows the variations of the actual from the normal rainfall of the week. In twenty-nine divisions the actual fall was less and in eighteen was more than the normal. The region of deficient rainfall included the greater part of Burma, West Bengal, the Gangetic plain, North-West India, the central parts of the country, and the west of the Peninsula; and the region of excessive rain included Arakan, Bengal Proper, the south of the Peninsula, and Madras. The greatest actual deficiency is reported from the Konkan, where only 1 inch was received instead of the normal 9 inches, but all over the divisions ordinarily served by the monsoon current crossing the Konkan Coast, *viz.*, Guzerat, the Central Provinces, Central India, the East of Rajputana, &c., the fall was throughout very deficient. On the contrary, the Bombay Deccan and almost the whole of the centre, south, and east of the Peninsula had an average or rather excessive fall. The Bay of Bengal branch of the monsoon appears to have advanced up the centre of the Bay, and travelled northward or north-eastward after passing the coast line; for whereas, while in Arakan, Assam, and Bengal Proper all the divisions had excessive rain, all the Burma divisions to the east of Arakan, and practically all the divisions in the Gangetic plain and North-West India, had deficient rain. In a large part of the North-West Provinces and the Punjab the deficiency when compared with the normal was very considerable.

The three concluding columns of the table show the state of the seasonal rainfall. From these it will be seen that over the greater part of the Peninsula, except the West Coast, *viz.*, in Mysore, the Bombay Deccan, Khandeish, the East Coast (North, Central, and South), Hyderabad (South), and Madras (Central and South), the rainfall between May 29th and July 2nd has been heavier than usual, but that in North-Eastern, Northern, North-Western, and Central India and the West Coast, with the exception of Chota Nagpur, the North-West Provinces (Central), and the Punjab (West), the rainfall for the same period has been deficient or just normal. The greatest relative deficiency is in parts of the Punjab and of Rajputana.

Most of the heavy totals received during the week were registered over North-East India.

The following are the more important falls in the different Provinces:

Division.	District.	Station.	Amount.
Central Burma . .	Shwegyin . .	Sudder . .	8·66 inches.
Arakan	Akyab . .	Ditto . .	16·20 ,,
Assam	Khasia Hills .	Cherra . .	43·35 ,,

SIMLA, *7th July, 1892.*

W. L. DALLAS,
Assistant Meteorological Reporter to the Government of India.

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 2nd July.*—Rainfall heavy in the Deccan and on the West Coast; good elsewhere, except in Nellore. June rainfall has generally been up to or in excess of average, except in the Vizagapatam littoral and the West Coast. Heavy rain since the 2nd in the affected parts of the Deccan and Central districts. Prospects have much improved, except in the affected portion of Nellore. Cultivation and sowing are proceeding actively. Water-supply is generally ample. Pasture is springing up, but fodder is still scarce in Bellary, Anantapur, and Nellore. Condition of cattle is improving. Prices of principal food-grains are easier in the Circars and Deccan; easier or stationary on the West Coast, Karnatic, North Arcot, and Salem; rather dearer in the Coimbatore, Trichinopoly, and Southern districts. FAMINE RELIEF: *Numbers on works*:—Deccan 43,254, Karnatic 27,431, and Central 7,950: *Total* 78,635 against 87,143 last week. Decrease in the Deccan general; in the Central districts chiefly in North Arcot. *Numbers on gratuitous relief*:—Deccan 651, Karnatic 238, and Central 151: *Total* 1,0.0 against 1,150 last week; decrease in Kurnool and Salem. Loans for wells:—Deccan Rs. 7,73,000, Karnatic Rs. 4,14,000, and Central Rs. 10,4?,000: *Total* Rs. 22,34,000 disbursed. Wells completed—583, 2,054, and 1,252: wells under construction —6,067, 1,914, and 7,229 in respective blocks. Agriculturists' loans—Rs. 79,000, Rs. 79,000, and Rs. 66,000: *Total* Rs. 2,24,000 disbursed in respective blocks.

Bombay.—*For week ending 6th July.*—Rain moderate and sufficient throughout the Deccan and Karnatak, except in Khandesh, Dharwar, parts of Nasik, and Belgaum; generally slight and deficient in Sind, Konkan, Guzerat, and Kathiawar. Agricultural operations retarded or young seedlings withering in parts of eleven districts. Fodder and water-supply in the Deccan and in the Karnatic have generally improved. Fodder is still scarce in parts of five districts. Cattle are poor in parts of three districts. Prices are generally steady. FAMINE RELIEF: *Numbers on works*:—Bijapur 118, Belgaum 2,517, Dharwar 703, and Kolhapur 6,867: *Total* 10,205 against 11,483 last week.

Bengal.—*For week ending 5th July.*—General rain during the week; especially heavy in the Northern and Eastern districts. More rain is wanted in parts of Western Bengal and in South Behar, Orissa, and Chota Nagpur generally. Winter rice and autumn sowings are nearly complete, and transplanting of seedlings is in progress. Prospects of early crops are generally favourable, especially in the Rajshahi division. The early rice harvest has begun, and new jute is coming into the market. Indigo manufacture has begun in Behar. No material change in prices of food-grains. Fodder and water-supplies are sufficient and cattle are well off. FAMINE RELIEF: *Numbers on works*:—Muzaffarpur 1,433, Darbhanga 12,899, Monghyr 1,755, Bhagalpur 4,516, and

Dinajpur 816: *Total* 21,419, showing a decrease of 14,855 since last week. Decrease of nearly half in Darbhanga is very satisfactory; considerable decrease also in Bhagalpur. There was some increase in Monghyr. In Dinajpur the numbers rose until rain fell on the 1st, since when labourers have been getting employment in the fields, and relief works now closed. *Numbers on gratuitous relief*:—Darbhanga 149 (exclusive of two circles, for which figures have not been received), Monghyr 280, Bhagalpur 1,407: *Total* 1,836, showing a decrease of 801 since last week.

North-Western Provinces and Oudh.—*For week ending 6th July.*—Fair rain has fallen in the Eastern districts. In the Western districts there have been only light local showers. There has been good rain in Almora, but insufficient in Garhwal and Tehri. More rain is urgently needed for the autumn ploughing and sowings which are in progress. Damage to sugarcane by locusts is reported from Benares and injury from drought in Moradabad. Supplies are sufficient, but fodder is getting scarce in Jhansi. Prices are generally steady, but show a tendency to rise in eight districts.

Punjab.—*For week ending 6th July.*—Rain has fallen in all but three districts. Prices are tending to rise in hilly tracts, and also in Kohat; stationary in seven districts, and rising in others. Sowings of autumn crops are in progress in most districts. Rain badly wanted throughout the Province. Wells are drying up in Jullundur, and water is scarce in five other districts. The Sidhnai Canal in Multan is dry; others flowing feebly. In the Simla hills crops show a decided improvement, but in Kangra and Bannu they are suffering from drought and heat. There is cause for anxiety also in the Delhi, Multan, and North-Western districts. Rain has improved the condition of crops in the neighbourhood of Simla, but has not assured prospects. Prospects excellent in western submontane parts of Simla. Cattle are suffering from scarcity of fodder in most districts. Fodder is sufficient in two districts only.

Central Provinces.—*For week ending 6th July.*—Weather cloudy and close. Good rain has fallen in the Chhattisgarh and Nagpur country. Autumn sowing is resumed in Bilaspur, but is seriously retarded in two other districts for want of rain. Sowings are progressing generally. Prospects of rice not good in Bhandara.

Burma.—*For week ending 2nd July.*—Good rain in Lower Burma, but showers light in three districts. Rain fell in all the districts of Upper Burma except Pakokku. Ploughing and sowing of paddy are progressing throughout Lower Burma. Ploughing, sowing, and transplanting of wet-weather paddy in active progress in Upper Burma. Prospects of crop are favourable, but slightly damaged by insects in Pakokku, and from want of rain in Northern Shan States. Planting of hill paddy is progressing in Bhamo. Sowing of maize in Yeu and Magwe, of cotton and sesamum in Sagaing and Myingyan, and of sesamum in Magwe and peas in Myingyan are progressing well. Price of paddy has fallen largely in Tharrawaddy and the Southern Shan States, considerably in Mandalay, and slightly in four other districts. The price of rice has risen slightly in Rangoon. In Upper Burma it has also risen in two districts, but has fallen in one. FAMINE RELIEF: *Numbers on works*:—Shwebo 4,565, Yeu 89, Lower Chindwin 192, Myingyan 436, Meiktila 3,614, and Yamethin 2,128: *Total* 11,024 against 13,853 last week.

Assam.—*For week ending 6th July.*—Weather seasonable. Rain is wanted in Sibsagar. Transplanting of late rice continues. Condition of cattle is fair. Fodder and water are abundant.

Mysore and Coorg.—*For week ending 6th July.*—MYSORE: Rainfall good in three districts. Agricultural operations are in active progress, except in parts of three districts, where more rain is wanted. No material change in prices. FAMINE RELIEF: *Numbers on works*:—Kolar 748, Tumkar 427, Shimoga 49, and Chitaldrug 192: *Total* 1,416 against 1,687 last week.

COORG: Rainfall good. Ploughing of rice fields is in progress. More rain is required for the rice nurseries which are drying up; also for the planting out of coffee. *Ragi* good. Fodder and water-supply for cattle are sufficient. Slight rise in prices.

Berar and Hyderabad.—*For week ending 6th July.*—BERAR: Average rainfall good. Weather warm and cloudy. Sowing of cotton is in progress. *Jowari* (*Sorghum vulgare*) sowing has commenced. Water is scarce in one district and fodder locally insufficient. Cattle are in good condition. Prices are almost steady.

HYDERABAD.—Rainfall good. Sowing for the autumn crop is now in full swing. Prices continue high.

Central India.—*For week ending 6th July.*—Slight rain in three Agencies and Neemuch, but insufficient for agricultural purposes. Heavy rain in Baghelkhand. No rain in the northern and eastern portions of Gwalior and parts of Bhopawar, where first sowings have been damaged. Condition of agricultural stock is generally fair, except in parts of Bhopawar and the Neemuch district. Prices of food-grains are rising in Goona; steady elsewhere. Drinking water is scanty in parts of Bhopawar. Fodder is sufficient, except in Bhopawar.

Rajputana.—*For week ending 6th July.*—Rainfall heavy in Jeypore and moderate elsewhere, except in five Agencies. Average fall half an inch in the Ajmere district. Agricultural operations are going on, except in four Agencies. Standing crops have withered in Meywar. Condition of opium is fair in Meywar. In Ajmere cotton seed twigs are withering for want of rain, and may have to be resown. Fodder crops under wells are being reaped in parts. The autumn crop is germinating in the south-east of Ajmere. Agricultural stock is poor generally. Fodder scarce and dear generally, except in four Agencies. Prices are generally steady, but show a tendency to rise in Ajmere, and have risen in three Agencies. FAMINE RELIEF: *Numbers on works*:—Ajmere-Merwara 40,226, Marwar 4,122, Kishengarh 1,705, and Bikanir 3,048: *Total* 49,101 against 37,302 last week. *On gratuitous relief*:—Ajmere-Merwara 9,430, Marwar 2,819, Kishengarh 180, and Bikanir 1,429: *Total* 13,858 against 15,745 last week. The figures for Ajmere-Merwara are subject to correction, but the increase in numbers on relief is reported to be due to increased local distress and foreign immigration.

Nepal.—*For week ending 30th June.*—Weather cloudy and close. Transplanting of paddy has commenced.

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the week ending at 8 a.m. on Saturday, 9th July 1892.

A very important change of weather has occurred during the past week over India. The area of low pressure which has existed for so long off the West Coast, and to which was attributed the feebleness and interruption of the monsoon current, underwent a sudden alteration about the middle of the week. On the 5th the area began to develop and grow deeper; on the 6th this change was maintained; and on the 7th a well-defined depression apparently existed to the south of the Kathiawar Coast and in about the latitude of Bombay. On the 8th and 9th the disturbance was moving away north-westward. In the rear of the depression the barometer rose, so that steep gradients were developed and a strong rush of monsoon winds occurred, which gave very heavy rain to the West Coast and moderate rain to several other parts of the country. While this was in progress on the West Coast, a slight disturbance was formed over the Bay, and advanced north-westward towards the Orissa and Northern Circars Coasts. In the rear of this disturbance also pressure rose, and, as was the case on the opposite side of the Peninsula, steep gradients were developed and a strong rush of monsoon winds up the Bay followed.

On the 3rd pressure was highest in Tenasserim and lowest over the Punjab. In the intervening region the distribution of pressure was irregular. The winds were southerly over Lower Burma and the head of the Bay and easterly in North Bengal and up the north side of the Gangetic plain, but elsewhere the directions were abnormal and irregular, while the force was generally lighter than usual. Scattered showers of rain were reported from most parts of the country, though less so from North-West India and Madras than elsewhere. The largest falls were reported from parts of North-East India. On the 4th conditions were practically unchanged. Readings were highest in Burma and lowest in the Punjab, and the distribution continued generally irregular. The winds continued abnormal, except at the head of the Bay, and the force was generally very light for the time of year. Rain was less general in North-West India than on the preceding day, but was more general in the east of the Peninsula. Elsewhere, as on the preceding day, scattered showers were reported. North-East India and the south of the Peninsula reported the largest amounts. The chart of the 5th showed that the barometer was falling almost everywhere. Readings remained highest in Burma and lowest in the Punjab, but an important change was commencing on the West Coast. Gradients for westerly winds were appearing in Malabar, while off the Konkan Coasts the low pressure area which had hung about that region for so long had commenced to develop into a cyclonic storm. The winds were still very abnormal in direction, except at the head of the Bay and in parts of Northern India, but there was some tendency to increase in force observable in Malabar. There was still no rain over North-West India, but scattered showers continued elsewhere. In the south of the Peninsula and North Bengal the amounts were fairly heavy. On the 6th the barometer was still falling everywhere. The storm off the Konkan and Kathiawar Coasts was still developing, and a fresh storm was appearing over the east of the Bay in lat. 15°. Readings remained highest in the extreme south and lowest over the Punjab. The gradients for monsoon winds which had previously been confined to Malabar had spread up the West Coast as far as Bombay. The winds were cyclonic on the Bombay Coast and over the Central districts of the Bay, southerly in Lower Bengal, and easterly up the north side of the Gangetic plain. Elsewhere the directions were variable. Rain was general in Lower Burma, in Bengal Proper, and on the West Coast, and scattered showers were reported from other parts of India,

except the north-west. The largest amounts were recorded in North Bengal. The chart of the 7th showed that the depression off the West Coast had become deep, and steep gradients prevailed on its southern and south-eastern sides. Elsewhere there was not much change. A heavy burst of monsoon winds had occurred along the West Coast, and heavy rain was reported there. Heavy rain was also reported from North Bengal. Elsewhere scattered showers had fallen, except in parts of North-West and Central India, where there had been no rain. The depression over the Bay had largely filled up. On the 8th the depression off the West Coast had become still deeper, while pressure had increased over the Peninsula. Hence very steep gradients prevailed along the West Coast, and the burst of strong monsoon winds and heavy rain continued on that Coast. Monsoon conditions were being rapidly established throughout the country, but a large part of North-West and Central India continued without rain. On the 9th the barometer was rising briskly over North-West India, and the depression which had been affecting the weather on the West Coast had moved away. Over the Bay the depression which had been in abeyance during the period of activity of the disturbance on the West Coast had re-developed, and was advancing over Orissa. Monsoon conditions existed generally, but the presence of the depression over the Bay prevented the proper extension of the Bay branch of the monsoon, and comparatively little rain was falling over Northern India, though over the Peninsula and Burma rain was general.

Temperature has been considerably above the normal of the time of year. This excess has been particularly noticeable in North-West and Central India, to which regions the rain had not fairly extended even by the close of the week.

The following table shows the variations of the mean temperature from the normal on each day of the week for the principal Provinces of India :

Province.	3rd.	4th.	5th.	6th.	7th.	8th.	9th.	Mean variation of week.
	°	°	°	°	°	°	°	°
Burma	−0·1	−0·4	+2·5	+3·1	+2·8	+1·5	+0·8	+1·5
Bengal and Assam	0	+1·3	+0·5	+0·2	+1·1	+0·8	−0·4	+0·5
North-West Provinces and Oudh.	+4·4	+4·6	+4·3	+5·1	+7·0	+7·8	+0·6	+4·8
Punjab	+1·9	+5·0	+7·7	+8·3	+8·2	+10·2	+9·1	+7·2
Bombay	+3·3	+3·2	+3·0	+2·0	+2·1	+1·1	+0·1	+2·1
Berar and Central Provinces	+5·9	+4·5	+2·5	+4·5	+6·8	+6·9	+4·3	+5·1
Guzerat and Central India	+6·9	+6·9	+4·4	+5·7	+6·6	+7·3	+4·0	+6·0
Sind and Rajputana	+2·5	+5·4	+6·6	+8·3	+6·2	+8·8	+6·4	+6·3
Madras	−1·0	−1·9	−1·3	−2·3	−1·4	−1·4	−3·0	−1·8
Mean for whole India	+2·6	+3·2	+3·4	+3·9	+4·4	+4·8	+2·4	+3·5

The mean excess for the whole of India was 3·5°, which was 1° more than last week. The warmest day was the 8th, when the general excess was nearly 5°.

In the Punjab, Central India, Sind, Rajputana, and Guzerat the heat was very excessive towards the close of the week, and the maxima reported were most exceptionally high.

Rain.—The rainfall table at the close of the summary shows that during the week under review rain has been received in all the rainfall divisions into which India is divided. In Orissa, in all the Punjab divisions except the Hill districts, in Sind, in Rajputana, in the west of Central India, and in the south of Madras the total average fall for the week was less than half an inch, but in all the other divisions of India effective rainfall has been received. The heaviest average for the week was 18·48 inches in North Bengal: this was followed by 15·24 inches in Assam (Surma), by 15 inches in Malabar, by 10·73 inches in the Konkan, and by 10·45 inches in Coorg. Ordinarily the heaviest rainfall during the week under review is about 11½ inches in Tenasserim, Arakan, and the Konkan, so that the excessive rain in North Bengal, Assam (Surma), Malabar, and Coorg is abnormal. Equally abnormal is the relatively heavy rainfall in Madras and the light rainfall in the Gangetic plain. The third column of the table shows that in nineteen of the rainfall divisions the rainfall of the week was excessive, and that in thirty-one it was deficient. The region of excessive rainfall included the following divisions: both the Assam divisions, North Bengal, North Behar, Malabar, Coorg, Mysore, the Deccan, Khandeish, Berar, the East Coast divisions, Madras (Central and South Central), and Hyderabad. In all the other divisions the fall was deficient. The greatest actual excess was 12 inches in North Madras, followed by 9·39 inches in Coorg and 7·52 inches in Malabar, but in some of the Madras divisions the excess relatively to the average was equally great. The greatest actual deficiency was in Arakan.

The three concluding columns of the table show the state of the rainfall for the period from May 29th to July 9th. They show a considerable deficiency of rain over a large part of North-West India, a considerable excess in Madras, and only small variations elsewhere. The divisions reporting a greater or less excess are the Assam divisions, North Bengal, Orissa, Chota Nagpur, North Behar, the West Punjab, Mysore, the Deccan, Khandeish, the East Coast (North, Central, and South), Hyderabad (South), and Madras (Central), while the divisions which have practically received their normal supply are Central Burma, Central Bengal, South-Central Madras, Coorg, and South Madras. In the remaining divisions there has been greater or less deficiency for the period under review.

Very heavy totals for the week are reported from Northern Bengal and from the West Coast divisions. The following are the more important falls in the different Provinces:—

Division.	District.	Station.	Amount.
Burma	Amherst	Thaton	13·68 inches.
Assam	Khasia Hills	Cherra	54·33 „
	Sylhet	Sunamganj	29·20 „
Bengal	Sonthal Pergunnahs.	Godda	12·25 „
	Jalpaiguri	Sudder	37·01 „
	Rungpur	Nilphamari	32·65 „
Behar	Champaran	Bettiah	11·58 „
Oudh	Sitapur	Sudder	7·81 „
North-West Provinces	Gorakhpur	Parauna	5·91 „
Punjab	Kangra	Sudder	3·25 „
Malabar	South Kanara	Karkal	27·17 „
Mysore	Shimoga	Nagar	19·90 „
Konkan	North Kanara	Bhatkal	24·99 „
Deccan	Kolhapur	Bawda	20·98 „
Central Provinces	Balaghat	Sudder	8·58 „
Guzerat	Broach	Jambusar	6·77 „
Madras	Godavari	Chodavaram	7·30 „
	North Arcot	Wandiwash	12·10 „

SIMLA, *14th July, 1892.*

W. L. DALLAS,
Assistant Meteorological Reporter to the Government of India.

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 9th July.*—Rainfall heavy on the West Coast, the Karnatic, and the Deccan; good in the Circars and Central districts; light in the Southern districts. Rainfall to date is in excess of normal throughout, except in Vizagapatam and Trichinopoly. Ploughing and sowing are proceeding briskly throughout. Standing crops are generally flourishing. Heavy rainfall in North Nellore has greatly improved prospects there. Water-supply is sufficient throughout. Pasture is rapidly improving and stock recovering. General agricultural outlook is favourable. Prices are considerably easier in the Deccan and slightly in the Central districts; stationary elsewhere. FAMINE RELIEF: *Numbers on works*:—Deccan 37,415, Karnatic 21,704, and Central 5,644: *Total* 64,763 against 77,668 last week. Decrease large in Nellore, Bellary, and Salem. *On gratuitous relief*:—Deccan 706, Karnatic 250, and Central 144: *Total* 1,100 against 1,050 last week; increase in Kurnool. Loans for wells:—Deccan Rs. 7,92,000, Karnatic Rs. 4,25,000, and Central Rs. 10,65,000: *Total* Rs. 22,82,000. Wells completed—591, 2,118, and 1,263: wells under construction—6,183, 1,977, and 7,334 in respective blocks. Agriculturists' loans—Rs. 80,000, Rs. 87,000, and Rs. 67,000: *Total* Rs. 2,34,000 in respective blocks.

Bombay.—*For week ending 13th July.*—Good and seasonable rain throughout the Presidency proper. Total fall is insufficient in parts of four districts. Agricultural operations are progressing and young crops thriving, except in parts of Khandesh. River low in Sind and transplantation retarded for want of water. Fodder is scarce in parts of four and water in parts of two districts. Cattle are poor in parts of three districts. Prices are generally steady. FAMINE RELIEF: *Numbers on works*:—Bijapur 92, Belgaum 2,733, Dharwar 376, and Kolhapur 7,074: *Total* 10,275 against 10,205 last week.

Bengal.—*For week ending 12th July.*—There was a strong monsoon current with good general rain over the whole Province during the week. In North Bengal the rainfall was exceptionally heavy. Floods are reported from Dinajpur and Jalpaiguri, but the autumn and jute crops are now strong enough to escape harm. Part of the town of Dinajpur was flooded and some damage caused to property. No loss of life occurred. The winter rice and autumn crops are generally doing well, but more rain is required in some districts in the Burdwan and Presidency divisions for transplantation of seedlings. Prospects of early rice, jute, and sugarcane continue promising. Early rice is being harvested in parts of North and East Bengal, and the new jute is coming into the market in small quantities. The price of rice is still stationary, and shows no signs of falling. In Dinajpur and Jalpaiguri there was a slight rise on account of the heavy rain. Fodder and water are now available in abundance. Cattle are generally in good condition. FAMINE RELIEF: *Numbers*

on works :—Muzaffarpur 145, Darbhanga 9,778, Monghyr 436, and Bhagalpur 3,646: *Total* 14,005, showing a decrease of 7,414 since last week. Considerable decrease is reported from all the districts. In Dinajpur the relief works were closed on the 2nd instant, and in Muzaffarpur they are about to be closed. *Numbers on gratuitous relief* :—Darbhanga 385 (exclusive of one circle, for which no figures have yet been received), Monghyr 287, and Bhagalpur 1,381 : *Total* 2,053, showing an increase of 217 over last week.

North-Western Provinces and Oudh.—*For week ending 13th July.*—Good rain has fallen in the hill districts, and the autumn crop prospects have much improved. In the plains districts there have been showers more or less heavy, which have generally allowed ploughing and sowing to be recommenced; but more rain is urgently needed. Prospects have improved generally. Indigo and sugarcane are doing well. Prices are fairly steady, though they show a tendency to rise in a few places.

Punjab.—*For week ending 13th July.*—Rain has fallen in all but six districts, and the condition of the standing crops has generally been improved. Ploughings and sowings for the autumn crops have also been commenced in most districts. More rain is, however, urgently wanted in five districts, and especially in Multan, where the Sidhnai Canal is almost dry, and other canals are flowing feebly. Wells are still reported to be drying up in Jullundur. The crops in Hazara are suffering from want of rain. The stock of grain and fodder are insufficient in Rawal Pindi. Out of sixteen Simla Hill States, the condition of the people is reported bad in three only. Cattle are reported lean and suffering from want of fodder in six districts; their condition is fair elsewhere. Fodder generally insufficient, but the recent rain has improved prospects. Prices are fluctuating in seven districts, but are stationary elsewhere.

Central Provinces.—*For week ending 13th July.*—Good rain has fallen in five districts. Total rainfall is below average in all districts except Sambalpur. Sowing operations have been resumed in four districts; elsewhere in full progress. Fodder and water-supply have much improved in two districts. Prices are steady.

Burma.—*For week ending 9th July.*—Rain in Lower Burma is seasonable, but in Upper Burma it is wanted in four districts. Ploughing and sowing of wet-weather paddy are progressing favourably throughout Lower Burma. Reaping of dry-weather paddy is progressing in four districts of Upper Burma and the Southern Shan States. Ploughing for and sowing and transplanting of wet-weather paddy are in progress in several districts in Upper Burma. Sowing of cotton and sesamum in Sagaing and of *jowar* in Lower Chindwin are progressing. The price of paddy has risen largely in three districts and slightly in one, while it has fallen considerably in four and slightly in five other districts. The price of rice has risen slightly in Rangoon, while in Upper Burma fluctuations in the price of rice and other food-grains are very slight. FAMINE RELIEF: *Numbers on works* :—Shwebo 2,206 on six works (numbers for two works not reported), Lower Chindwin 330, Meiktila 860, and Yamethin 956 (excluding Yedan group of irrigation works): *Total* 4,352 against 11,024 last week. Relief works in both Yeu and Myingyan were closed on 9th July.

Assam.—*For week ending 12th July.*—Weather rainy. Crop prospects in some districts are unfavourable. Condition of cattle is normal. Fodder and water are plentiful.

Mysore and Coorg.—*For week ending 13th July.*—MYSORE: Rainfall good throughout the State. Sowing operations are in progress. Standing crops have much benefited by recent rain. Prices have slightly risen in one and fallen in another district. FAMINE RELIEF: *Numbers on works* :—Bangalore 33, Kolar 427, Tumkar 468, Shimoga 12, and Chitaldrug 113: *Total* 1,053 against 1,416 last week.

COORG: Rainfall nearly 18 inches and continuous during the week. Operations for planting rice and coffee are in active progress. *Ragi* is thriving. Prices are stationary. Fodder and water-supply for cattle are sufficient.

Berar and Hyderabad.—*For week ending 13th July.*—BERAR: Average rainfall good. Weather warm and cloudy. Sowing of cotton is nearly completed. Sowing of *jowari* (*Sorghum vulgare*) is in progress. Fodder is insufficient locally. Water is deficient in one district. Prices are almost steady. Cattle are in good condition.

HYDERABAD: Moderate rain during the week. Sowing of autumn crop is nearly finished and weeding has commenced. Prices continue high.

Central India.—*For week ending 13th July.*—Prospects in Central India have greatly improved since last report. Rain has fallen everywhere; generally sufficient for agricultural purposes. Young crops have been slightly damaged in some parts. Fodder is scarce in parts of Bhopal and Bhopawar. Cattle continue to be in indifferent condition in two Agencies and Nimach. Prices continue steady, except in Bhopawar, where there is a slight rise.

Rajputana.—*For week ending 13th July.*—Rainfall general; good in parts. Agricultural operations in progress where rain has fallen. More rain is wanted generally. Seed sown in Meywar has been lost for want of rain. In the south of Ajmere and in Merwara the autumn crops are above ground, but are in a precarious state. Agricultural stock is generally poor, and fodder is scarce and dear generally. Prices are generally steady, but are tending to rise in Ajmere, and have risen in four Agencies. FAMINE RELIEF: *Numbers on works* :—Ajmere-Merwara 44,604 (including 4,228 home labour), Marwar (not received), Kishengarh 1,679, and Bikanir 3,342: *Total* 49,625 against 49,101 last week, including Marwar. *On gratuitous relief* :—Ajmere-Merwara 9,000, Marwar (not received), Kishengarh 180, and Bikanir 1,218: *Total* 10,398 against 13,858 last week, including Marwar. The increase of about 4,000 on famine labour in Ajmere-Merwara is due to increased distress owing to postponement of field operations for want of rain, and also to return of immigrants.

Nepal.—*For week ending 7th July.*—Weather cloudy with occasional heavy rain. Prospects are good. Prices are rising.

E. C. BUCK,
Secretary to the Government of India.

SEPARATE REVENUE.
SALT.

SYSTEM OF INDENTING FOR SALT THROUGH THE AGENCY OF THE POST OFFICE.

Simla, the 11th July, 1892.

Read—

Notification in the Department of Revenue, Agriculture and Commerce, No. 257, dated the 6th October 1876.

Notification in the Department of Finance and Commerce, No. 3883, dated the 26th July 1889.

Memorandum by Lala Salig Ram, Superintendent of Post Offices, dated the 7th February 1889.

Letter to the Director General of the Post Office of India, No. 2034, dated the 24th April 1889.

Letter from the Director General of the Post Office of India, No. 10426, dated the 13th February 1890, and enclosures.

Notification in the Finance and Commerce Department, No. 1308, dated the 20th March 1890.

Letter from the Government of Bombay, No. 2692, dated the 18th April 1891, and enclosures.

Letter from the Director General of the Post Office of India, No. 7325, dated the 7th November 1891, and enclosures.

Letter to the Commissioner of Northern India Salt Revenue, No. 4778, dated the 27th November 1891.

Letter from the Commissioner of Northern India Salt Revenue, No. 4-C., dated the 19th January 1892.

RESOLUTION.

To facilitate the supply and cheapen the cost of Sambhar salt, a system was introduced in 1876, under which a trader residing in any town having direct railway communication with Sambhar was permitted, on payment of the duty and price at the nearest treasury, to indent for salt direct from the lake, the Salt Department undertaking to book the consignment to the station named in the indent. The system was subsequently extended to Pachbadra and the Khewra mines, and by the notification of 26th July, 1889 revised rules were laid down for regulating the receipt of indents and the transmission of salt.

2. In February 1889 it was represented to the Government of India that the system, convenient as it was to purchasers residing near district or tahsil treasuries, was in many cases of no benefit to such traders as are not always resident at district or tahsil head-quarters. To afford equal facilities to the latter, it was suggested that traders should be permitted to indent for salt direct from the salt sources on payment of the price and duty into the nearest post office.

3. The suggestion commended itself to the Government of India, the only objection being the payment of very large sums into certain small post offices. The Government of India, however, considered it desirable to try the plan as an experimental measure, and the Director General of the Post Office was instructed

to arrange for a trial of the system in such places as might be considered suitable, and to report the result.

4. The plan was brought into operation from the 1st April 1890, and rules to give it effect were prescribed by the Director General of the Post Office in communication with the Commissioner of Northern India Salt Revenue. It was limited to the salt sources at Sambhar, Pachbadra, and Khewra, the receipt of indents and advance payments on account of salt being restricted to head offices and sub-offices situated at tahsil stations or on the railway or mail cart lines. In April 1891 the Government of Bombay recommended that the system might be extended to Kharaghora salt indented for from places beyond the limits of the Bombay Presidency, but it was considered advisable to await the result of the experiment in respect of Sambhar, Pachbadra, and Khewra salt before sanctioning its extension.

5. The results of the trial of the system during the last two years show that it has been very popular and entirely successful. It has been largely used by traders in preference to the system of payments into treasuries, has created a class of small dealers dealing direct with the salt sources, stimulated greatly the through-traffic sales, and has also been effective in breaking up combinations of middlemen at the salt sources, and in keeping down the price of salt in places where it would have otherwise risen. On the other hand, it has had the effect of transferring to the post offices a considerable portion of the payments formerly made by traders at treasuries and sub-treasuries, the payments at some of the sub-offices being so large that their continuance can hardly be safely permitted.

6. The system having proved so popular and useful, it should be continued, but some of the arrangements in connection with it require modification to prevent the risk mentioned in the foregoing paragraph. It was never intended that at places where treasuries or sub-treasuries exist the post office should take the place of treasuries and sub-treasuries for the receipt of payments on account of salt revenue. The system was intended mainly for the benefit of traders residing in places inconveniently distant from treasuries and sub-treasuries, and it should in future be limited to post offices at places where these do not exist. Post offices where, owing to the proximity of a treasury or sub-treasury, the public already possesses facilities for payment should be excluded from the list of offices authorised to receive payments on account of purchases of salt.

7. For the additional work and responsibility which will devolve on the Post Office from the permanent adoption of the system now sanctioned, the Governor General in Council considers that a charge of eight annas per cent. of the money paid into the post office should be paid by the traders and credited to the Postal Department. The notification of this Department, No. 1308, dated the 20th March 1890, will be modified so as to authorise the levy of this charge.

8. The Director General of the Post Office will now, in communication with the Commissioner, Northern India Salt Revenue, make the arrangements required to give effect to these orders. He will also arrange for the extension of the system to Kharaghora salt as proposed by the Government of Bombay. The Governor General in Council desires to be informed in due course of the arrangements as finally settled.

ORDERED, that the foregoing Resolution be communicated to the Director General of the Post Office of India, to the Commissioner of Northern India Salt Revenue, and to the Government of Bombay.

Also that a copy be forwarded to the Comptroller General for information and to the publisher of the *Gazette of India* for publication in the Supplement to the Gazette.

J. E. O'CONOR,
Asst. Secretary to the Government of India.

GOVERNMENT OF INDIA.

(*a*) Includes the Nalhati State Railway, now amalgamated with the East Indian Railway.
(*b*) Includes the Tirhoot State Railway. Although for convenience classed amongst the State Railways, the Company's section of this line is the property of the Bengal and North-Western Railway Company.
(*c*) Includes the Bhopal-Itársi State Railway.
(*d*) Includes the Amritsar-Pathánkot and Jammu and Kashmir Railways.
(*e*) Although for convenience classed amongst the State Railways, this line is the property of the Bengal Central Railway Company.
(*f*) Includes the Toungoo-Mandalay and Mu Valley Railways.
(*g*) Includes the Wardha Coal, Dhond-Manmád, Khámgaon, and Amráoti State Railways.
(*h*) Includes the Bezváda Extension.
(*i*) Total receipts from 21st April to 30th June 1891.
(*k*) Includes Rs. 2,74,587 in excess of the amount shown in the statement last published due to adjustments up to 30th June 1891 accounted for at the end of the quarter.

F. B. HEBBERT,
Under-Secretary.

SIMLA, *the 14th July, 1892.*

SUPPLEMENT TO

The Gazette of India.

No. 30.] SIMLA, SATURDAY, JULY 23, 1892.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the week ending at 8 a.m. on Saturday, 16th July 1892.

The strongly marked monsoon conditions which had prevailed at the close of the previous week continued at the commencement of the week under review. The depression which had existed over the Bay for some days previously developed suddenly on the 10th, and during the following three days progressed slowly west-north-westward towards the Central and North-West Provinces. Conditions were thus during this period very favourable for rain, and considerable amounts fell in all parts of the country. On the 14th, however, the depression which was then near Allahabad collapsed, and with it disappeared the easterly current which had brought rain from the Bay into Upper India, so that on the 15th and 16th rain to a great extent ceased on the plains of the Punjab and on the west of the North-West Provinces. With the disappearance of the depression the force of the monsoon on the West Coast also decreased, and on Saturday, the 16th, though rain was falling generally in the west of the Peninsula, the central parts of the country, the Gangetic plain, and North-East India, the amounts were not as a rule large, while, as stated above, the centre and east of the Peninsula and the plains of North-West India were without rain.

A

The chart of the 10th showed that the depression over the Bay had increased considerably in intensity and had approached the coast close to Balasore. At the same time a large low pressure area was shown over the Western desert. The highest pressure was reported from Colombo, and the barometric differences between that station and Karachi and Balasore were respectively 0·485″ and 0·528″. The winds were cyclonic around the north-west angle of the Bay, and blew from their normal monsoon directions elsewhere. The force was strong at several western and central stations. The rainfall was very general, the Indus Valley, Western Rajputana, and parts of the Deccan and of South Madras being the only considerable regions reporting no rain. The amounts were heavy on the Bombay Coast, in the neighbourhood of the depression noted above, and at a few scattered stations in other parts of the country. On the 11th the depression from the Bay had reached the neighbourhood of Chaibassa, but otherwise there was little change in the distribution of pressure, and the winds were also unaltered. The extent and amount of rainfall were also similar, the Western desert and parts of South Madras being the only considerable areas without rain. By the 12th the depression from the Bay had reached the neighbourhood of Sambalpur. The barometer had fallen all over Northern India, while it has risen over the Peninsula. Consequently the barometric differences had increased, and a very strong monsoon was blowing into India. Rain was reported from practically all parts of India, the only exceptions being parts of the south and centre of the Peninsula and the extreme north-west of the Punjab. The amounts were large in Sind, the Central and North-West Provinces, Lower Bengal, and Lower Burma; and Murree reported 3½ inches. By the morning of the 13th the depression had reached the neighbourhood of Allahabad and was filling up, while the low pressure area over the Western desert was also collapsing, so that gradients were less steep. A strong monsoon was, however, still blowing, and rain was again falling generally, except in the west of the Punjab and of Rajputana, in Upper Sind, and in the centre and east of the Peninsula. The rainfall in Lower Sind was exceptionally heavy, and the amounts reported from the central stations ranged from half an inch to seven inches. In the east of the Punjab good rain was also received. On the 14th the two low pressure areas recently noticed had coalesced, and formed one large shallow depression extending in a curved line from Karachi as far as Allahabad. The barometer was rising everywhere, and gradients were somewhat slighter. The distribution of rain and the extent of the rainfall area were about the same as on the preceding day, but the amounts were smaller, more particularly in the central parts of the country and in Lower Sind. On the 15th the chart showed a large shallow low pressure area over the Western desert and moderately steep gradients on the West Coast, but relatively to previous days comparatively uniform pressures elsewhere. Monsoon winds were blowing everywhere, but the force was not high, and the easterly current up the north side of the Gangetic plain was very constricted. There was practically no rain over the centre and east of the Peninsula or on the plains of North-West India, but elsewhere the fall was general, though on the whole moderate. On the 16th there was very little change. There was practically no rain in North-West India or in Madras.

Temperature has been slightly below the normal, the mean deficiency for the whole of India being 0·6°.

The following table shows the variations of the mean temperature from the normal on each day of the week for the principal Provinces of India:

Province.	10th.	11th.	12th.	13th.	14th.	15th.	16th.	Mean variation of week.
	°	°	°	°	°	°	°	°
Burma	+0·6	—0·2	—0·5	—0·6	+0·5	+0·3	—0·3	0
Bengal and Assam	—0·4	—0·8	—1·3	—2·3	—2·6	—1·0	—0·7	—1·3
North-West Provinces and Oudh.	—1·4	+0·9	+2·2	+1·3	+0·1	—2·5	—1·5	—0·1
Punjab	—0·3	—1·6	—0·9	—4·0	—3·8	—2·0	+0·8	—1·7
Bombay	—0·1	—0·6	—1·0	+0·4	—0·3	+0·8	+1·4	+0·1
Berar and Central Provinces	+1·7	+0·4	+0·4	—2·9	—5·0	—1·7	+0·4	—1·0
Guzerat and Central India	+1·7	+1·4	+0·5	—2·4	—1·7	—3·6	—2·3	—0·9
Sind and Rajputana	+3·3	—0·6	—0·9	—1·4	—0·4	—0·4	—2·8	—0·5
Madras	—1·8	—1·5	—2·3	—1·8	+0·6	+1·9	+1·5	—0·5
Mean for whole India	+0·4	—0·3	—0·4	—1·5	—1·4	—0·9	—0·4	—0·6

From the above figures it will be seen that the departures from the normal have been small, but that there has been a slight general deficiency.

Rain.—The daily distribution of rain has been described in the earlier portions of the summary, and the concluding table shows the average totals for the week. The first column shows that rain fell in every one of the rainfall divisions during the week. The heaviest average actual was 16·30 inches in Arakan: this was followed by 15·74 inches in Tenasserim, by 11·33 inches in the Konkan, and by 10·01 inches in Coorg. The lightest rainfall was in Madras, the west of Rajputana, and the west of the Punjab. For the week under review the average normal rainfall is heaviest in Tenasserim, 11·41 inches, followed by 11·31 inches in the Konkan and by 10·88 inches in Arakan, while the lightest rainfall is reported normally from Sind, the west of the Punjab, and South Madras. The general distribution of the actual rainfall then differed from the normal distribution principally in the excess of rain in Arakan and Sind and in the deficiency in Rajputana (West) and the centre and east of the Peninsula. The third column of the table shows that in twenty-eight of the rainfall divisions the rainfall of the week was excessive; that in twenty it was deficient; and that in one no comparison is possible. The region of excessive rainfall included the following divisions: All the Burma divisions, East, Deltaic, and Central Bengal, Orissa, Chota Nagpur, North Behar, the Punjab (South, Central, Submontane, North-West, and West), Coorg, the Konkan, the Bombay Deccan, Khandeish, Behar, all the Central Provinces divisions, Guzerat, Kathiawar, Sind, Central India, and Rajputana (East). The region of deficient rain included the Assam divisions, North Bengal, South Behar, all the North-West Provinces divisions, the hill

districts of the Punjab, Malabar, Mysore, all the Madras divisions, and the west of Rajputana. The greatest actual excess was 5·69 inches in the east of the Central Provinces, followed by 5·42 inches in Arakan and 4·33 inches in Tenasserim, but relatively to the average the excess in the Punjab (Submontane and South) and in Sind was as great or greater than in the cases noted above. The greatest actual deficiency was 1·33 inches in Malabar.

The three concluding columns of the table show the actual and normal rainfall for the period May 29th to July 16th and the excess or defect of the actual fall. In the case of thirty divisions the seasonal rainfall has been in defect; in the case of nineteen divisions there has been an excess; and in one division there is no practical difference between the actual and the normal. The divisions with excessive rainfall are Central Burma, Assam (Surma), North Bengal, Orissa, Chota Nagpur, North Behar, the Punjab (Submontane, North-West, and West), Mysore, the Deccan, Khandeish, the Central Provinces (East), Sind, and the East Coast divisions. Elsewhere there has been a greater or less deficiency. In most cases, however, the variations from the normal are comparatively small, the most marked cases of deficiency being in East Bengal, South Behar, Oudh, the North-West Provinces, the Central Punjab, the hill districts of the Punjab, Kathiawar, Central India, and Rajputana.

The following are the principal large totals reported from the different Provinces :

Division.	District.	Station.	Amount.
Tenasserim	Amherst	Sudder	16·66 inches.
Central Burma	Shwegyin	Kyaikto	12·12 ,,
Upper Burma	Magok	Sudder	3·96 ,,
Arakan	Akyab	Maungdaw	24·19 ,,

SIMLA, *21st July, 1892.*

W. L. DALLAS,
Assistant Meteorological Reporter to the Government of India.

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 16th July.*—Rainfall heavy on the West Coast; good in the Circars; but only light and scattered showers elsewhere. Rainfall to date is everywhere sufficient. Cultivation and sowing are progressing satisfactorily, and young crops are doing well. Water-supply for drinking and for cultivation is generally sufficient. Pasture is improving everywhere, and cattle are picking up condition. Prices are considerably easier in Deccan, Nellore, and Salem; slightly in North Arcot and Chingleput; elsewhere almost stationary. FAMINE RELIEF: *Numbers on works*:—Deccan 31,911, Karnatic 17,126, and Central 4,471: *Total* 53,508 against 66,197 last week. Works closed in Anantapur and North Arcot and closure ordered in Coimbatore. *On gratuitous relief*:—Deccan 600, Karnatic 148, and Central 117: *Total* 865 against 1,105 last week. Loans for wells:—Deccan Rs. 8,20,000, Karnatic Rs. 4,27,000, and Central Rs. 10,93,000: *Total* Rs. 23,40,000 disbursed. Wells completed—591, 2,134, and 1,299: wells under construction—6,483, 1,976, and 7,490 in respective blocks. Agriculturists' loans—Rs. 82,000, Rs. 94,000, and Rs. 68,000: *Total* Rs. 2,44,000 disbursed.

Bombay.—*For week ending 20th July.*—Rain throughout the Presidency Proper and Sind; generally sufficient and well distributed. Total fall is insufficient in parts of Nasik and Dharwar; river rising in Sind, and agricultural prospects greatly improved. Sowing and transplantation are progressing generally, and young crops are thriving. Preparations for late crops have commenced in Khandesh and Sholapur. Cattle are poor in parts of two districts. Fodder is scarce in parts of three and water in parts of one district. FAMINE RELIEF: *Numbers on works*:—Bijapur 87, Belgaum 2,055, Dharwar 692, and Kolhapur 5,432: *Total* 8,266 against 10,275 last week.

Bengal.—*For week ending 19th July.*—Moderate monsoon winds continued to blow throughout the week, and rain was general throughout the Province. Reports of early rice and jute crops continue to be favourable, but in North Bengal, where they are being harvested, some damage has been done by the recent floods. On the other hand, transplantation of seedlings has been much facilitated, and the prospects of the winter rice crop are now excellent in nearly all districts. In parts, however, of the Burdwan, Patna, and Chota Nagpur divisions, there is still a demand for more rain for this crop. Recent reports show that considerable damage has been done to roads and bridges by floods in the districts of Dinajpur and Jalpaiguri, and railway communication with the former was rendered impossible. District officers have taken prompt measures to relieve temporary distress, which occurred chiefly in the town of Dinajpur, and to repair communications where broken. The prices of food-grains continue nearly stationary. Fodder and water-supplies are sufficient

and cattle are generally thriving. FAMINE RELIEF: *Numbers on works*:—Darbhanga 3,841, Monghyr 101, and Bhagalpur 3,206: *Total* 7,148, showing a decrease of 6,857 since last week, most of which has occurred in Darbhanga. Some decrease is also reported from Monghyr and Bhagalpur. Relief works in Muzaffarpur are closed. *On gratuitous relief*:—Darbhanga 412, Monghyr 247, and Bhagalpur 1,170: *Total* 1,829, showing a decrease of 224 since last week.

North-Western Provinces and Oudh.—*For week ending 20th July.*—Good and general rain has fallen all over the Provinces, and prospects have much improved. More rain is, however, needed. Autumn sowings are in active progress, and weeding has begun in a few places. Supplies and fodder are sufficient. Prices are generally steady.

Punjab.—*For week ending 20th July.*—Good rain has fallen in all districts except Peshawar, but more rain is required throughout the Province. In the Multan district the Chenab Canals are flowing well, and water has just come to the Sidhnai dam. Ploughing and sowings of autumn crops are in progress in most districts. Crops are favourably affected and their condition improved by recent rain, except in one district and in parts of two others, where prospects are reported to be poor. Stock of grain is insufficient in Rawal Pindi. In two of the Simla Hill States rain is badly wanted; in three people are said to be distressed; and in five others revenue is suspended. Prospects have, however, decidedly improved, and scarcity is disappearing in Kangra. Cattle, however, are still reported to be suffering from want of fodder, which is generally scarce. Prices are rising in three districts, falling in one, and stationary elsewhere.

Central Provinces.—*For week ending 20th July.*—Rainfall general throughout the Province and the fall heavy, particularly in Jubbulpore, which has received over 10 inches. Sowings of rice have commenced in one district, while in two others they are approaching completion. Autumn sowings are completed in two districts; elsewhere in full progress. Prospects are excellent.

Burma.—*For week ending 16th July.*—Rain was seasonable in Lower Burma, but light in Upper Burma; no rain falling in several districts. Ploughing, sowing, and transplanting of wet-weather paddy are progressing throughout the Province. In Shwebo caterpillars have done some damage, and in Yamethin paddy nurseries are withering. In Kyaukse and the Southern Shan States early-paddy crops are being reaped. Sowing of cotton, sesamum, and cereals in progress in some districts. The price of paddy has risen slightly in two districts, while it has fallen largely in three and slightly in two others. The prices of other food-grains show no important fluctuations. FAMINE RELIEF: *Numbers on works*:—Shwebo 2,260, Lower Chindwin 264, and Meiktila 2,122: *Total* 4,646 against 4,352 last week. Relief works in Lower Chindwin were closed on 16th July.

Assam.—*For week ending 19th July.*—Weather seasonable. Floods in parts of Sylhet and Goalpara. Early-rice planting and late-rice reaping continue.

Mysore and Coorg.—*For week ending 20th July.*—MYSORE: Rainfall good in two districts and slight in other parts. Standing crops are good, except

in parts of the Mysore district, where more rain is still wanted. Agricultural operations are progressing. Prices have fallen in one district, but have risen in another slightly. FAMINE RELIEF: *Numbers on works*:—Bangalore 38, Tumkur 442, Mysore 39, Shimoga 46, and Chitaldrug 16: *Total* 581 against 1,053 last week.

COORG: Rainfall over 12 inches. Ploughing and transplanting of rice in progress. Planting of coffee nearly completed. *Ragi* crop promises well. Prices are stationary. Fodder and water for cattle are sufficient.

Berar and Hyderabad.—*For week ending 20th July.*—BERAR: Average rainfall good. Weather cool and cloudy. Sowing of *jowari* (*Sorghum vulgare*) and other autumn crops is in progress. Cotton plants are above ground. Fodder is insufficient in two taluks and water deficient in one district. Cattle in good condition. Prices are almost stationary.

HYDERABAD: Rainfall moderate during the week. Sowing of irrigated crops has commenced and weeding of the autumn crop is in progress. Prices are still high.

Central India.—*For week ending 20th July.*—Rain throughout Central India during the week, but more is wanted in Gwalior territory and in parts of two Agencies. Ploughing and sowing are in progress everywhere, and damaged crops have revived generally. Condition of cattle in Bhopawar is improving, but still indifferent in Bhopal and Nimach. Prices of food-grains have slightly risen in parts of two Agencies, but steady elsewhere.

Rajputana.—*For week ending 20th July.*—Rainfall general and good during the week. In Ajmere-Merwara the fall was over 4½ inches. Agricultural operations are generally satisfactory, but plough cattle are scarce in Ajmere-Merwara. Standing crops fair, but some early sowings lost by delay in rain, especially in Todgarh and Beawar. Prospects, however, are now encouraging in Ajmere-Marwara. Agricultural stock is fair and improving. Pasturage or fodder prospects improving. Prices are generally steady; falling slightly in Ajmere. FAMINE RELIEF: *Numbers on works*:—Ajmere-Merwara 33,214 (including 3,488 home labour), Kishengarh 2,062, Merwar 4,131, and Bikanir 2,971: *Total* 42,378 against 49,625, not including Marwar. *On gratuitous relief*:—Ajmere-Merwara 7,201, Kishengarh 203, Marwar 2,147, and Bikanir 1,214: *Total* 10,765 against 10,398, not including Marwar. The decrease in Ajmere-Merwara is attributable to the recent rainfall and consequent more extensive prosecution of partially suspended field work. Emigrants are steadily returning, both people and cattle. Foreign immigrants are numerous, but will probably now decrease.

Nepal.—*For week ending 14th July.*—Days warm with heavy rain at night. Transplanting of rice completed. Prospects are good.

E. C. BUCK,

Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

No. 28.

Extract from the Proceedings of the Government of India, Revenue and Agricultural Department (Patents),—dated Simla, 13th July, 1892.

Read—

Report on the working of the Office of the Secretary under the Inventions and Designs Act (V of 1888) during the year 1891.

RESOLUTION.

The Inventions and Designs Office continued under the superintendence of the Officer in charge of the Mathematical Instrument Department of the Survey of India during the entire year.

The office was removed in the middle of the year to the new buildings of the Imperial Secretariat, in which a spacious room adjoining the Patents Office has been provided as a Museum, which is fitted with show cases for the permanent exposition of models.

2. The following matters of public interest were dealt with during the year.

Lists of applications and specifications are now drawn up in a form convenient for public inspection. They are arranged alphabetically, and will be found to afford all necessary information regarding an invention from the presentation of the application to the filing of the specification.

Appended to this Resolution will be found correspondence which has passed between the Government of India and Her Majesty's Secretary of State since that published with Revenue and Agricultural Department's Circular No. 532-P., dated 13th March 1890, respecting a proposal submitted by the Associated Chambers of Commerce of the United Kingdom for giving Imperial protection to patents, designs, and trade-marks in the United Kingdom, India, and the Colonies.

The Local Governments and the principal commercial bodies in India were consulted, and were generally of opinion that it would be unwise to include India in the scheme. These views met with the concurrence of the Government of India, and were communicated to Her Majesty's Secretary of State. The letters from the Chambers of Commerce (Calcutta, Bombay, Karachi, and Cawnpore) are included in the published correspondence.

The Upper India Chamber of Commerce suggested that the public convenience would be furthered by supply to the North-Western Provinces Government of a copy of all specifications filed with the Government of India. The request has been acceded to, and specifications in respect to which applications were filed subsequent to the 9th February 1892 are required to be accompanied by five instead of four additional copies, one of which will be sent to the North-Western Provinces Government.

3. *Inventions.*—The number of applications for leave to file specifications rose from 319 in 1890 to 347 in 1891. Of these, 213 were granted, 27 rejected, and 107 remained pending at the close of the year against 176,37 and 106 respectively in the preceding year. Of the number pending, 6 awaited the result of applications filed in England and 101 remained undisposed of from other causes.

The number of specifications amounted to 236, or 44 more than were filed in 1890. They included 16 for the treatment of cotton and fibrous materials, 10 for the treatment of ores, 12 for inventions connected with railways, 9 for punkha-pulling, 6 for milling and cleaning of paddy and other grain, 6 for the manufacture of tea, 5 for the manufacture of indigo, 6 for pumps, and 2 for agricultural implements.

The number of references to experts stood at 149, for 41 only of which had fees to be charged. The number of reference to the Public Works Department amounted to 32.

4. *Designs.*—A marked increase took place in the number of applications for the registration of designs, there having been 171 against 49 in 1890. Of these, 166 were registered.

5. The fees collected rose from Rs. 10,406-10 in 1890 to Rs. 13,762 in the year under report. Of these, Rs. 468 were for copies of specifications and drawings supplied to the public, Rs. 124 for the inspection of specifications, and Rs. 750 for the continuance of exclusive privileges for the full term of fourteen years.

Statistics of the working of the Inventions and Designs Office are given in the appended statement, which also gives the corresponding figures for the preceding two years.

The Government of India have every reason to be satisfied with the working of the Inventions and Designs Act during the year, and to believe that the objects with which it was framed, namely, the provision of facilities for acquiring patent-rights in India with reasonable ease and rapidity and at a moderate cost, are being effectively attained.

ORDER.—Ordered, that the above Resolution be forwarded to the Local Governments and Administrations noted on the margin, and that a copy be published in the Supplement to the *Gazette of India*.

Governments of Madras, Bombay, Bengal, the North-Western Provinces and Oudh, and the Punjab.
Chief Commissioners of the Central Provinces, Burma, Assam, Coorg, and Ajmere.
Resident at Hyderabad.

[True Extract.]

E. C. BUCK,

Secretary to the Government of India.

APPENDIX A.

Statement showing the working of the Office of the Secretary under the Inventions and Designs Act (V of 1888) during the year 1891 as compared with the years 1889 and 1890.

Proposed scheme for giving Imperial protection to Patents, Designs, and Trade-marks in the United Kingdom, India, and the Colonies.

No. 881—118-N., dated Rangoon, the 30th April 1890.

From—J. E. BRIDGES, Esq., Officiating Chief Secretary to the Chief Commissioner of Burma,

To—The Secretary to the Government of India, Revenue and Agricultural Department.

In compliance with the orders contained in your Circular endorsement No. 532—72-2-P., dated 13th March 1890, I am directed to submit a copy of a letter, dated 17th April 1890, from the Secretary to the Rangoon Chamber of Commerce expressing the full agreement of the members of the Chamber in the proposal made by the Associated Chambers of Commerce of the United Kingdom.

Dated Rangoon, the 17th April 1890.

From—J. STUART, Esq., Secretary to the Rangoon Chamber of Commerce,
To—The Under-Secretary to the Chief Commissioner of Burma.

I have the honour to acknowledge receipt of your No. 915—148-N., General Department, dated 31st March 1890, forwarding, for the information of this Chamber, copies of sundry correspondence on the subject of a scheme for giving Imperial protection to patents, designs, and trade-marks in the United Kingdom, India, and the Colonies.

In reply, I am directed to inform you that this Chamber considers the proposal an excellent one, and fully agrees with the views expressed in the memorial on this subject sent by the Associated Chambers of Commerce of the United Kingdom to Her Majesty's Secretary of State for India.

No. 3024, dated Bombay Castle, the 30th July 1890.

From—J. NUGENT, Esq., Chief Secretary to the Government of Bombay,

To—The Secretary to the Government of India, Revenue and Agricultural Department.

As requested in the Resolution of the Government of India, No. 532—72-2-P., dated the 13th March last, I am directed to forward, for the information of the Government of India, copies of the communications noted in the margin, received from the Chambers of Commerce, Bombay, Karachi, and Aden, the Commissioner in Sind, and the Collector of Land Revenue, Customs, and Opium, Bombay, on the subject of the proposed scheme for giving Imperial protection to patents, designs, and trade-marks in the United Kingdom, India, and Colonies.

Letter from the Collector of Land Revenue, Customs, and Opium, Bombay, No. 79-B.I., dated 23rd April 1890.
Letter from the Secretary, Chamber of Commerce, Karachi, dated 5th May 1890.
Letter from the Secretary, Chamber of Commerce, Bombay, dated 19th May 1890, and accompaniments.
Memorandum from the Commissioner in Sind, No. 650, dated 19th May 1890.
Letter from the Honorary Secretary, Chamber of Commerce, Aden, dated 10th June 1890.

No. 79-B.I., dated Bombay, the 23rd April 1890.

From—J. MONTEATH, Esq., Collector of Land Revenue, Customs, and Opium, Bombay,

To—The Chief Secretary to the Government of Bombay.

With reference to Government Resolution No. 1468 of 15th instant, I have the honour to state that there are no records or statistics connected with patents, designs, and trade-marks in any of the offices under my supervision, and I have therefore some difficulty in expressing an opinion on the question

referred. *Primâ facie* there would be an advantage in the adoption of a scheme whereby Imperial protection would be given over the whole of Great Britain and the Colonial and Indian possessions of Her Majesty if it were practicable. There might be no difficulty in applying to all such possessions a uniform law with that object. But there would, it seems to me, be great difficulties in the working of such a law. Before exclusive use of an invention could be allowed, it would be necessary to ascertain whether there had not been in any part of Her Majesty's dominions a prior application to file a similar specification. If all specifications had to be filed in London, there would be a difficulty in determining equitably when an application should be held to have been made, seeing that the time required for an application to reach London is so various. It would also be practicably necessary to administer the law from London, so that the scheme would have to follow instead of preceding one of Imperial federation.

Dated Karachi, the 5th May 1890.

From— S. W. ANDERSON, Esq., Secretary to the Karachi Chamber of Commerce,

To—The Under-Secretary to the Government of Bombay, General Department.

I have the honour to acknowledge receipt of your letter No. 1469 of 1890, dated 15th April, enclosing copy of Resolution of the Government of India, Revenue and Agricultural Department, No. 532—72-2-P., regarding a scheme for giving Imperial protection to patents, designs, and trade-marks in the United Kingdom, India, and the Colonies, which has been duly circulated amongst the members of my Chamber for an expression of their opinion thereon.

At a meeting held on the 28th ultimo, while my Committee approved of giving Imperial protection to patents, designs, and trade-marks, they were of opinion that the present arrangements regarding the registration of patents, designs, and trade-marks in England and her dependencies are very unsatisfactory, and they would approve of action being taken by Government on the lines suggested by the Associated Chambers of the United Kingdom in their memorial to Her Majesty's Secretary of State for India, dated 1st January 1890.

No. 650, dated Karachi, the 19th May 1890.

Memo. by—A. C. TREVOR, Esq., Acting Commissioner in Sind.

With reference to Government Resolution No. 1468 of 16th April 1890 on the subject of giving Imperial protection to patents, designs, and trade-marks in the United Kingdom, India, and the Colonies, the Commissioner in Sind has the honour to state that he is aware of no objection to the extension to India under the safeguards noted in paragraph 2 of the Despatch from Lord Cross, No. 10 (Statistics), dated 23rd January, of any practicable scheme which may be accepted by England and the Colonies, and believes that such an extension would be welcomed by traders and inventors in India.

2. The Secretary of the Karachi Chamber of Commerce reports that the views of the Chamber have already been communicated direct to Government.

Dated Aden, the 10th June 1890.

From—R. S. PHILLPOTT, Esq., Honorary Secretary to the Aden Chamber of Commerce,

To—The Under-Secretary to the Government of Bombay, General Department.

I have the honour to acknowledge receipt of your No. 1469 of 15th April, with copy of Government Resolution, on the subject of a scheme for giving Imperial protection to patents, designs, and trade-marks in the United Kingdom, India, and the Colonies.

I have also to acknowledge your No. 2073 of 27th ultimo.

In reply, I am directed to state that, in the opinion of this Chamber, it would be of great advantage to traders if effect could be given to such a scheme.

Dated Bombay, the 19th May 1890.

From—J. MARSHALL, Esq., Secretary to the Bombay Chamber of Commerce,

To—The Secretary to the Government of Bombay, General Department.

I am directed to acknowledge the receipt of your letter No. 1469 of the 15th ultimo, giving cover to copies of correspondence on the subject of a scheme for Imperial protection to patents, designs, and trade-marks in the United Kingdom, India, and the Colonies on which the opinion of the Chamber is requested. Regarding the matter as one of great importance to merchants and manufacturers in India, a Special Committee was appointed to consider the subject in detail, consisting of the Honourable A. F. Beaufort (of Messrs. Lyon & Co.), Chairman of the Chamber; Messrs. A. Pallis (of Messrs. Ralli Brothers); J. Littleton Symons (of Messrs. Finlay, Muir & Co.); G. Cotton (of Messrs. Greaves, Cotton & Co.); W. R. Macdonell (of Messrs. Wallace & Co.); R. S. Campbell (of Messrs. W. and A. Graham & Co.); and A. Francke (of Messrs. Volkart Brothers), and I have now the honour to wait upon you with their report, which is endorsed by, and has the full approval of, the Chamber.

2. For obvious reasons, the Committee considered it advisable to deal with the proposal under two separate heads, the position of the law in India relating to patents and designs being widely divergent from that affecting trade-marks; the former being under and regulated by special enactments, while the latter are governed by the common law of the country, and do not, as in England, require registration for the purpose of protecting proprietary rights.

3. As regards *patents and designs*, the Committee, after giving the question their most careful consideration, cannot support the proposed scheme. At first sight they admit the proposal of simultaneous registration has apparently much to recommend it, but they consider the advantages likely to result more theoretical than practical. What the difficulties may be in obtaining registration and protection in England and the Colonies the Committee are not in a position to know, nor is it perhaps their province to discuss; but in India the existing law from all they are able to learn works most satisfactorily, being both simple in its procedure and inexpensive in its charges, whether protection be claimed for inventions and designs having their origin within or without the country. These features seem to the Committee to embrace the chief requirements of legislation for patents and designs, and they do not see that any scheme which would give effect to the suggestion of the Associated Chambers of Commerce could possibly improve them. On the contrary, they consider it would be likely to prove more complex and cumbersome in operation and more expensive in cost.

4. In the matter of *trade-marks*, the Committee consider it even less desirable to disturb the existing law, and they feel the greater confidence in expressing this opinion, as they are enabled to do so not only on their own authority, but from the recorded experience and information derived from a previous exhaustive discussion of the entire question by the Chamber. This discussion, which was most instructive in detail and conclusive in its results, originated with a request from the Chamber in 1877 that the Government of India would pass an Act of the Legislature for the registration of trade-marks in India, in response to which Government submitted, for the opinion of the mercantile community, first the draft Bill of 1879, and then in substitution the draft Bill II of 1880. The outcome of this attempted legislation could

not be more clearly expressed than in the words of the then Committee of the Chamber in finally disposing of the question, when they said :—

> "It appears to your Committee that the opinion (Counsel's opinion attached) so expressed is a very valuable one, and points decisively to the conclusion that legislation is not necessary, and might be inconvenient. At present the owner of a recognised trade-mark can obtain protection in the Indian Courts notwithstanding the fact of its being unregistered under the English Act. His proprietary rights are not vitiated in any way even if he has applied for and been refused registration in England, nor does he lose his recourse against a mark infringing his rights notwithstanding that the latter may have been registered under the English Act. Moreover, an Indian Court would not attach any importance to the right of exclusive user of a trade-mark granted by the English Act after a lapse of five years from the date of registration in England beyond accepting that fact as evidence of its existence at the date of registration. The owner of a non-registered mark would only have to prove his prior right to win his case.
>
> "It thus appears to your Committee that while a special Act for India would provide no more satisfactory protection than already seems to exist, the alternative proposal of coming under the English Act would be attended with many disadvantages."

5. For convenience of reference the Committee of the Chamber have had reprinted, and beg to wait upon Government with, copies of the Chamber's letter to the members advising that the proposed legislation should be abandoned, as also Counsel's opinion on the law as affecting trade-marks in India which accompanied that letter. The legal opinion then expressed has been amply borne out by the decision of the Courts, and a perusal of these documents, the Committee consider, inevitably leads to the conclusion that any such scheme of Imperial registration of trade-marks as that under discussion would, even if found practicable of application, of which the Committee entertain grave doubts, prove absolutely disadvantageous and inimical to the proprietary rights of merchants, manufacturers, and others now possessing trade-marks in India.

6. The Committee would accordingly deprecate any support being extended by the Government of India to the proposed scheme for giving Imperial protection to patents, designs, and trade-marks in the United Kingdom, India, and the Colonies.

Dated Bombay, 16th July 1881.

From—J. GORDON, Esq., Secretary to the Bombay Chamber of Commerce,

To—The Members of the Chamber of Commerce.

In September 1877 the Committee of the Chamber submitted to Government the expediency of a measure being introduced into India similar to the English Trade-marks Registration Acts of 1875 and 1876. The Committee considered that the increase in the cotton manufacturers of Bombay rendered such a measure desirable, and it would therefore appear that the protection of Indian manufacturers was the primary object which the Committee had in view when they suggested the measure.

A draft Bill No. I, to be called "The Indian Trade-marks Act, 1879," was accordingly prepared by the Government of India, and forwarded to the Chamber with a request that Government might be favoured with any observations which the Chamber might wish to make on the Bill. A Special Committee was thereupon appointed to consider its provisions. The report of this Special Committee will be found at page 11 of the papers sent herewith. It was with an amendment regarding the fees for the transfers of trade-marks from the English to the Indian register adopted by the Chamber at the Special General Meeting held on 9th September 1879, and the substance of it communicated

to Government. The attention of members is requested to the first paragraph of this report, in which the Special Committee stated that they had discussed the question whether the Bill should apply to trade-marks of goods wherever manufactured, or be applicable only to goods manufactured in India ; and that they had concluded that it was desirable that the Bill should apply to all trade-marks in the broadest sense of the term.

The Bill was thereafter referred by Government to a Select Committee of the Council of the Governor-General, who withdrew the Bill No. I of 1879, and brought forward an amended Bill No. II, to be called "The Indian Trade-marks Act, 1880." This amended Bill, together with the reports thereon of the Selected Committee, dated 28th February 1880, was forwarded to the Chamber with a request that Government might be favoured with its opinion upon it. This Bill was amended so as to give effect to the suggestions of the Select Committee whose report was principally concerned in discussing the important question as to the mode in which trade-marks already registered in England should be dealt with. As in the case of the first Bill, a Special Committee was appointed by the Chamber to consider the amended Bill and the report thereon of the Select Committee. The report of this Special Committee was adopted by the Chamber at the General Meeting held on 3rd August 1880, and the substance of it communicated to Government on the 17th idem. In it the Chamber recommended as the simplest mode of overcoming the difficulty that, instead of English trade-marks being registered here, India should come under the English Act, and Indian trade-marks should be registered at home, applications being forwarded through the Registrar's Office.

The next communication received by the Chamber on the subject was a letter, dated 3rd February last, from the Government of India stating that the members of the Select Committee had considered the opinions received on their report of the 28th February 1880, and sending a statement of the present position of the question as to the best mode of fitting in the Indian system of registration with that established in England. The Select Committee observed with regret that the solution of the question proposed by themselves had failed to commend itself to most of the authorities consulted. They had no wish to press their suggestion, and, if they were to carry out the views expressed in the 14th paragraph of their report, the only course left would be to restore the Bill to its original shape, and require all English trade-marks to be registered afresh in India. But the registration here of all English trade-marks used, or likely to be used, in India appeared to the Select Committee so formidable an undertaking that they were reluctant to adopt any course which would necessitate it as long as there was a prospect of finding any simpler solution of the question. Such a solution would be found if Indian manufacturers would be content to register their marks in England. This course was recommended by the Bengal and Bombay Chambers of Commerce, and also by the Liverpool Chamber, and the Select Committee accordingly deemed it worthy of the most careful consideration. In the event of its being adopted, the legislation required in India would be of the simplest description. As all the work of registration, including the settlement of disputes as to the right to register and claims for the rectification of the register, would be performed in England, all the provisions relating to these subjects would be removed from the Bill, and the Act to be passed here would simply provide—

> *1st.*—That no proceedings should be instituted here for the protection of a trade-mark unless such mark was registered in England as belonging to the plaintiff, or registration was refused in the particular class of cases referred to by 39 & 40 Vict., cap. 33 ;
>
> *2ndly.*—That in all Courts in British India registration in England should be from the first *primâ facie* proof, and after five years' conclusive proof, of the right to a trade-mark.

This last communication was circulated to the members of the Chamber, but before replying to it, and finally committing the Chamber to legislation on this subject, your Committee deemed it desirable to take legal opinion on

certain points which have been suggested to them by the correspondence and discussions which have taken place. The questions submitted for counsel's opinion, with the replies thereto, will be found herewith. It appears to your Committee that the opinion so expressed is a very valuable one, and points decisively to the conclusion that legislation is not necessary and might be inconvenient. At present the owner of a recognised trade-mark can obtain protection in the Indian Courts notwithstanding the fact of its being unregistered under the English Act. His proprietary rights are not vitiated in any way even if he has applied for and been refused registration in England, nor does he lose his recourse against a mark infringing his rights notwithstanding that the latter may have been registered under the English Act. Moreover, an Indian Court would not attach any importance to the right of exclusive user of a trade-mark granted by the English Act after a lapse of five years from the date of registration in England beyond accepting that fact as evidence of its existence at the date of registration. The owner of a non-registered mark would only have to prove his prior right to win his case.

It thus appears to your Committee that while a special Act for India would provide no more satisfactory protection than already seems to exist, the alternative proposal of coming under the English Act would be attended with many disadvantages. They suggest, therefore, that the opinion which the Chamber has received should be forwarded to Government with a recommendation that, as the proposed legislation is apparently surrounded with many difficulties and objections which could not at first be foreseen, it may in the meantime be abandoned.

Case prepared by Messrs. Craigie, Lynch and Owen, Solicitors of the Chamber, under instructions from the Committee, and submitted for Counsel's opinion.

A Bill to provide for the Registration of Indian Trade-marks is now before the Legislative Council of the Governor-General, and the question has arisen as to the best mode of fitting in a system of registration for India with the system already in force in England.

The Bombay Chamber of Commerce have recommended as the best way of overcoming the difficulty that, instead of English trade-marks being registered here in India, the English Act should be made to apply to India, and that Indian trade-marks should be registered in England, applications for registration in England being forwarded through the office of the Registrar in India.

A further reference has, however, been made by the Government of India to the Chamber by letter No. 131, dated 3rd February 1881, copy of which is sent herewith.

Before replying to this letter, the Chamber desire to be advised on the points herewith submitted to Counsel.

Counsel is requested to advice.

1. As the law at present stands, I am of opinion that the owner of a trade-mark can in the Indian Courts obtain protection against an infringement notwithstanding he has not registered in England. The fact that the imitation had been registered in England would make no difference.	1. Whether, as the law at present stands, the owner of a trade-mark recognised in the Indian markets as his trade-mark can, notwithstanding that he may have omitted or neglected to register it under the English Act, obtain protection against the use by any one else of an exact or colourable imitation of his mark, and whether the fact that the imitation had been registered in England would make any difference.

2. He would not lose his right.	2. If the answer to the last question be in the affirmative, whether the owner of a trade-mark would lose his right to protection if he applied for registration in England, and such registration were refused.
3. He can. The English Trade-marks Registration Acts do not apply to India.	3. Can the owner of a mark which is recognized as a trade-mark in India, but which has been refused registration in England, obtain protection for such mark from the Courts in India ?
4. It is impossible to answer this question, as the answer depends entirely upon the provisions of the Act (if any) which may be passed for registering trade-marks in India. What these provisions are going to be, I don't know.	4. If a trade-mark had been registered in India as the property of a certain owner, and another precisely similar mark had been registered in England as the property of another altogether different owner, would the owner of the mark so registered in India be entitled to protection from the Courts in India ?— (*a*) Against the owner of the similar mark registered in England. (*b*) Against all other persons.
5. I am of opinion that the registration for five years in England under the English Trade-marks Act has no effect whatever upon the rights of a person using in the Indian Courts. Section 3 of Act 38 and 39 Vict., cap. 91, only provides that after five years from the date of registration such registration *shall be conclusive evidence* of the right of the person who has registered to the exclusive user of the mark registered. This, however, only applies to the English Courts and not to India. Consequently the Indian Courts would not be precluded from taking evidence as to who was the owner of the trade-mark in question. The fact of registration in England would be evidence that the person who had registered used that mark at the date of registration, but that would not prevent the person who had not registered proving if he could that he had used and become the owner of the trade-mark before the person who had registered. Registration in England, I think, could only be used in the Indian Courts in corroboration of the evidence of the person who had registered to the time when the mark in question was claimed or used by him as his mark.	5. What is the effect (if any) in India of complete registration for a period of five years in England of a trade-mark ? (*a*) Upon the rights of a person who has used the same mark in India for a number of years prior to the registration of such mark in England, but who has taken no steps to obtain registration in England or to oppose the registration there in the name of such registered owner. (*b*) Upon the rights (if any) of all other persons in India.
6. This is a question that I think a merchant is more competent to decide on than a lawyer. For my own part I don't see what substantial benefit a merchant gets from a registration of	6. Whether, having regard to the present state of the law, it is desirable that an Act for the registration of trade-marks in India should be passed ?

trade-marks on the lines of the English Act. Without any Act at all he is in this position: he has only to prove that the mark he seeks protection for has been put on goods which have been, and are being, offered for sale, and his right to that mark is established against the infringer, unless the latter can show that he or some one else has used the mark before, and has not lost the right to use it. No length of user is necessary for the purpose of acquiring property in a trade-mark. See McAndrew *v.* Barrett, 33 L.I., ch. 566, and Maxwell *v.* Hogg, L.R 2, ch. 307, as to how the property in a trade-mark is acquired. Consequently the merchant can now very easily prove his right *primâ facie* to the trade-mark. This is all that he can prove by producing his certificate under the Trade-marks Registration Act for the first five years after registration. After the five years are passed, I don't think the merchant really gets any practical benefit under the Registration Act. The only benefit he gets is that the defendant cannot dispute his right to it. But as the law at present stands, if the merchant had been using his trade-mark for five years, practically the defendant would not dispute his right to it. In fact, the defence in every case is generally that the mark has not been imitated. The Trade-marks Registration Act in my opinion is no protection against imitation at all. The imitator does not want to sue, so he does not care about registering, as he can use his imitation all the same whether registered or not; and, as I have pointed out, I don't think the honest merchant in his suit against the imitator gets any practical benefit. There is not the slightest difficulty, as the law at present stands, of proving your *primâ facie* right to a trade-mark. After a five years' user it would be almost hopeless for a defendant to prove the plaintiff did not own the trade-mark. If, as a matter of fact, other persons were, or claimed to be, entitled to the mark, and it was of any value, long before the five years were over, the registered proprietor would be fighting in court with those persons who by section 5 of 38 and 39 Vic., cap. 91, can apply to rectify the register; and if he was not the owner, he would never succeed in the case of a mark of any value in remaining on the register five years. Again, an Act on the lines of the English Act would deprive a large number of marks, which are now recognized as trade-marks, of the quality of trade-marks. The fees charged for registration are, I should say, much more than an equivalent for any benefit the merchant gets.

7. I think an Act which provided for registration in England would be worse than an Act which provided for registration in India for the following reasons:—(*a*) Any mark used for the first time since 13th August 1875, and which is not registrable under the English Act, will be deprived of all value, as any one will be able to imitate it without being sued. (*b*) The expense and difficulty attending registration of any disputed mark will prevent an Indian merchant from fighting for his rights. He will have to either abandon his mark, or spend far more than it probably is worth to establish his right to it.

7. If the answer to the last question be in the affirmative, is it desirable that such Act should provide merely for the registration in England of Indian trade-marks, or that it should provide for the registration in India of such marks?

8. As the English Trade-mark Registration Act does not extend to China, and the Indian Legislature has no authority to legislate for the Courts there, I am of opinion that the China Court (in the case put) could and would satisfy itself who was the owner of the mark in question quite apart from the registration in India or the registration in England, only using such registration (if at all) as some proof that the mark was at the respective dates of the registration used by the persons who registered. In short, I am of opinion that in the case put registration either in England or India would have, except to the extent I have mentioned, no value at all.

8. If a special Act were passed for India, and a certain mark exactly or very closely resembling a mark already registered under the English Act were registered under it, or *vice versâ*, how could the respective registered owners protect their rights as against each other in a foreign market such as China?

9. I can add nothing to what I have said above except that, if an Act is to be passed, one providing for registration in India, I think, is the only one that could practically be worked.

9. Generally giving any suggestions on the proposed legislation which may occur to counsel.

J. D. INVERARITY.

25th June 1881.

Dated Madras, the 2nd June 1890.

From—The HONOURABLE J. A. BOYSON, Chairman, Chamber of Commerce, Madras,

To—The Chief Secretary to the Government of Madras.

I have the honour to acknowledge receipt of the G. O. of the Madras Government, dated the 3rd April, No. 262, forwarding, for an expression of the Chamber's views, copy of the despatch from the Secretary of State to the Government of India, dated the 23rd January, together with the memorial of the Associated Chambers of Commerce of the United Kingdom, relative to a proposed scheme for giving Imperial protection to patents, designs, and trade-marks in the United Kingdom, India, and the Colonies.

2. I am desired to state that, after due consideration of the memorial, this Chamber regrets its inability to approve of the scheme therein set forth. Had the scheme in question been confined to patents and designs, it would perhaps be more or less practicable. The inclusion, however, of trade-marks is a grave objection to the scheme owing to the practical obstacles which would have to be surmounted, and which, in this Chamber's opinion, are insuperable. For example, one person may have a true claim to a trade-mark in India, another an equally good right to the same in England, and a third in one of the Colonies. The Imperial scheme conferring—if the Chamber rightly interprets the intention of the Associated Chambers—world-wide protection to each would only complicate the situation, and intensify rather than moderate the already sufficiently serious difficulties that have to be confronted to check fraudulent imitations. It is, moreover, felt that the more extensive interests of the mother country, and the tendency that is invariably evinced to regard those interests as paramount, would lead to subordination of India's interests in any question of mutual concession. As far, therefore, as India is concerned, this Chamber submits that trade-marks are sufficiently protected by the Merchandise Marks Act and the Penal Code, and that any scheme similar to that proposed would not only prove prejudicial, but also impracticable. The application of the scheme to patents and designs would, as is stated above, perhaps be more practicable, but the necessity for the step has not in the opinion of this Chamber yet arisen. While, therefore, the Chamber sympathises with the lofty aspirations of the Associated Chambers of Commerce, it does not consider that the interests of India at present demand any change in the existing arrangements for registration of patents and designs.

No. 1125—III-940-A., dated Naini Tal, the 18th August 1890.

From—J. WOODBURN, Esq., Chief Secretary to the Government of the North-Western Provinces and Oudh,

To—The Secretary to the Government of India, Revenue and Agricultural Department.

In continuation of this Office letter No. 933—III-940-A.-5, dated the 14th July 1890, I am directed to submit, for the information of His Excellency the Governor-General in Council, a copy of a letter No. 275-F., dated the 2nd instant, and of its enclosure, being the opinion of the Director of Land Records and Agriculture and the Upper India Chamber of Commerce on the scheme for giving Imperial protection to patents, designs, and trade-marks in the United Kingdom, India, and the Colonies.

2. I am to add that the Lieutenant-Governor and Chief Commissioner hopes to submit a further communication to the Government of India on the subject shortly.

No. 975-F., dated Cawnpore, the 2nd August 1890.

From—The Director of Land Records and Agriculture, North-Western Provinces and Oudh,

To—The Secretary to the Government of the North-Western Provinces and Oudh.

I have the honour, in reply to your letter No. 486—III-940-A., dated 28th March 1890, to submit the opinion of the Chamber of Commerce, Cawnpore, on the scheme for giving Imperial protection to patents, designs, and trade-marks.

2. In my opinion the scheme will inevitably increase the expense and trouble of taking out a patent in this country, even though the inventor limit himself to seeking protection in India only. The Chamber of Commerce complain of the costs at present thrown on an inventor by the obligation incidental to any patent law of ascertaining whether his specification infringes on any existing Indian patents. But if an inventor has also to extend his search to all patents having Imperial protection under the proposed scheme that may have been taken out in the United Kingdom or the Colonies, his task will be very much greater. He may also as the result of his researches find his way

blocked by a patent thus protected which the patentee has taken no steps to make available to the Indian public, though he may have utilized it in the United Kingdom or the Colonies. This last contingency points to some unsoundness in the principle of the scheme. The protection given to an invention by means of a patent ought not to extend beyond the territorial limits within which the inventor may be reasonably presumed to intend to use it for the benefit of the public. In other words, the law of patents is properly a branch of municipal law. To allow his patent to run over a dozen countries, while he only intends to prosecute its advantages in one, is to sacrifice too much to the Imperial idea. If, on the other hand, it is intended that in each country included in the scheme the inventor will be allowed to elect between local and Imperial protection, and will be required to pay higher dues and to satisfy stricter conditions, if he elects the latter, then I fail to see what he gains over his position at present. There is nothing, for instance, to prevent an inventor in England from simultaneously patenting his invention in the United Kingdom under the Parliamentary Statute and in India under the Indian Act, and the expense, so far as India is concerned, is certainly not prohibitive.

3. Regarding the question from the Indian stand-point, I cannot see that there is any call for the scheme. If it would increase the number of inventions specially adapted to India by giving to persons resident in the United Kingdom or the Colonies more inducement than they have at present to study the industrial requirements of this country, this would be a strong argument in its favour. But as an English inventor can at present easily and cheaply protect his invention in India by taking out a patent under the Indian Act, I do not think that India is deprived of the advantages of many possible inventions by the absence of an Imperial patent law. The fact that so far inventors in England take the trouble to legally protect themselves in India, while their inventions are staple commodities of its commerce, shows that the risk of infringement is not serious, and that India in its present industrial stage is an indifferent imitator, but a good customer.

4. With regard to paragraph 5 of the Chamber's letter, I have informed the Secretary that patents registered in India subsequent to November 1887 have been transferred to this Department's office at Cawnpore by order of Government* from the Government Secretariat, and that they may be inspected there during office hours. As they were transferred to this office for the use of the Director in reporting on applications for patent, and not for the use of the public, notice was not given at the time to the Chamber. The value of the collection would be much enhanced if it included copies of the specifications filed previous to November 1887; but I presume that this is impossible.

* No. 1689—III-239, dated 9th August 1889.

Dated Cawnpore, the 2nd July 1890.

From—The Secretary to the Upper India Chamber of Commerce, Cawnpore,

To—The Director of Land Records and Agriculture, North-Western Provinces and Oudh.

I am directed by the Committee to acknowledge the receipt of your letter No. 467-F., dated 18th April, forwarding copy of a Government Resolution, dated 13th March 1890, with reference to a scheme for giving Imperial protection to patents, designs, and trade-marks throughout Great Britain, India, and the British Colonies.

2. In reply, I am to say that the Chamber approves of the suggestion brought forward by the Associated Chamber of Commerce of the United Kingdom, given that, if such a project were carried out, no share in the patent charges of other countries would fall upon inventors in India, and that no increase in expense would be caused to designers and patentees seeking protection in this country only.

3. As far as India is concerned, there is but little doubt that the conditions under which patents are procurable tend to discourage rather than to foster

invention, specially as regards persons possessed of limited means. This is much to be regretted, the field for special, domestic, agricultural, mechanical, and mining contrivances suited to the particular conditions existent in the country being practically unlimited, while chemical investigation and processes, if properly encouraged and protected, might do much in the way of finding uses for, and giving a commercial value to, the infinity of natural products throughout the Peninsula, the possible utility of many of which having as yet not been tested.

4. Not only are the fees deterrently heavy, but the formalities which have to be gone through in taking out a patent are so complicated to the inexperienced that an intending applicant invariably finds himself compelled to employ an agent, whose charges, together with the outlay incurred in furnishing the required number of drawings, copies of designs and specifications, of which four is the minimum number prescribed, &c., not unfrequently exceed the cost of the patent itself. At the same time this expense is susceptible of being still further enhanced by the fee payable in the event of a referee being appointed in terms of section 6 of the Act, clauses 3 and 4.

5. My Committee are, therefore, of opinion that while India would not suffer by being brought within the scope of the scheme in contemplation, subject to the proviso mentioned in paragraph 2 of this letter, the question as to whether the rules of the existing Act do not admit of simplification and the fees of modification should be fully considered. They would also beg leave to suggest the desirability of a more ready means of access to official lists of all patents, designs, and registered trade-marks in force in India.

6. Under the Inventions and Designs Act, V of 1888, clause (2) of section 11, it is provided that one copy of each specification filed shall be sent to each of the Governments of Bombay and of Burma only, and it is not apparent why the North-Western Provinces and the Punjab, and the former of which was included under section 10 of Act XV of 1859, should have been left out in the amended Act. It appears, too, that there is virtually only one patent office in India, *viz.*, at Calcutta, where a complete register of all patents in force in India is available for inspection, although under clause (3) of section 11 of the existing Act "the copies of the specification which are sent under sub-section (2) to the authorities mentioned or referred to in that sub-section shall be open to the inspection of any person at all reasonable times to be appointed by these authorities." Persons out of Calcutta are thus practically debarred from taking the first preliminary and very essential step towards securing a patent, *i.e.*, to ascertain whether any such invention has already been registered, without going to the expense and trouble of making a journey to that town, or of employing an agent there to make the necessary search in the records of the Department.

7. The Committee would therefore further suggest if they are correct in the conclusion they have drawn as to the non-existence elsewhere than in Calcutta of complete registers of patents in force in India that duplicate of the complete register maintained at Calcutta should be kept up at the head-quarters of the Government of Bombay, Burma, the North-Western Provinces, and the Punjab.

No. 1330, dated Calcutta, the 2nd September 1890.

From—P. NOLAN, Esq., Secretary to the Government of Bengal, General (Miscellaneous) Department,

To—The Secretary to the Government of India, Revenue and Agricultural Department.

With reference to the request made in your Circular No. 532—72-2-P., dated the 13th March 1890, I am directed to submit the enclosed copies of letters noted in the margin containing the opinions of the authorities consulted by this Government on the proposed scheme for giving Imperial protection to patents, designs, and trade-marks in the United Kingdom, India, and the Colonies. It will be observed that, while most of the

From the Bengal Chamber of Commerce, No. 612, dated the 30th June 1890.
From the Calcutta Trades Association, dated the 29th July 1890.
From the British Indian Association, No. 25, dated the 23rd August 1890.
From the Director of the Department of Land Records and Agriculture, Bengal, No. 1540, dated the 8th July 1890, and enclosures.

authorities approve of the principle of the proposed scheme, all see grave practical difficulties in the way of giving effect to it. The Lieutenant-Governor would infer that the suggestion of the Associated Chambers of Commerce of the United Kingdom should be worked out in detail and put into the form of a definite scheme. In its present undefined shape there is little chance of its eliciting valuable criticism.

No. 612—90, dated Calcutta, the 30th June 1890.

From—S. E. J. CLARKE, Esq., Secretary to the Bengal Chamber of Commerce,

To—The Secretary to the Government of Bengal, General Department.

I have to acknowledge the receipt of the papers forwarded under cover of your docket No. 568, dated 27th of March last, on the subject of a scheme for giving Imperial protection to patents, designs, and trade-marks in the United Kingdom, India, and the Colonies. A careful consideration of these papers has led the Committee of the Chamber of Commerce to the conclusion that such a scheme could only be extended to India at considerable cost to the Indian revenues, and with very problematical advantage to the Indian public. In their opinion no case has been made out to show the necessity for anything of the kind as regards India, and they are therefore not in favour of the extension of the scheme to this country.

Dated Calcutta, the 29th July 1890.

From—E. HICKIE, Esq., Secretary to the Calcutta Trades Association,

To—The Under-Secretary to the Government of Bengal, General Department.

With reference to your letter No. 570, dated 27th March, I am directed to state that the question of the practicability of securing universal protection for patents, designs, and trade-marks throughout the United Kingdom and British possession was discussed by the Committee of the Trades Association when the Bill for the protection of Inventions and Designs came before them.

2. The difficulties seemed insurmountable and the attendant expenses likely to be high, for in any suggested scheme it was not likely that the payment of fees sanctioned under the Act in India could be made to cover expenses throughout the United Kingdom and the Colonies. There would always besides be considerable delay in the several steps towards securing complete protection, as references to the Patent Offices in each country would be absolutely necessary.

3. To carry out such a scheme as the one proposed by the Associated Chambers of Commerce of the United Kingdom would necessitate the entertainment of increased establishments in many places, the cost of which it would not, in the opinion of the Committee, be proper or fitting to cast upon the general community. The Committee of the Association, therefore, think that, while there is much to recommend the scheme, the practical difficulties in carrying it out seem insuperable.

No. 25, dated Calcutta, the 23rd August 1890.

From—BABÚ RAJ COOMAR SARBADHIKARI, Secretary to the British Indian Association,

To—The Secretary to the Government of Bengal, General Department.

I have the honour to acknowledge the receipt of your memorandum No. 571, dated the 27th March last, giving cover to a Circular of the Government of India, Revenue and Agricultural Department, No. 532—72-2-P., dated the 13th idem, on the subject of a scheme for giving Imperial protection to patents, designs, and trade-marks in the United Kingdom, India, and the Colonies.

The Committee of the British Indian Association, I am instructed to say, have no objections to offer to the scheme prepared by the Associated Chambers of Commerce of the United Kingdom, provided, as has been said by the Secretary of State for India, "that no share of the patent charges of other countries fell upon India, and provided that no increase in expense was caused to inventors or designers seeking protection in India only."

The application made in the applicant's place of origin for protection in other countries under British rule should, my Committee think, be altogether optional; an inventor or designer in the United Kingdom might seek for protection either in India or in the Colonies, or both, and he should bear the expenses of securing such protection. In other words, the Government of the country in which protection is sought should be reimbursed by the inventor or designer the charges incurred for recording or registering the invention, design, or trade-mark. A person seeking protection in India only would thus have no additional expenses to incur for either the United Kingdom or the Colonies wherein he does not want protection.

No. 1540-Agri., dated Calcutta, the 8th July 1890.

From—M. FINUCANE, Esq., Director of the Department of Land Records and Agriculture, Bengal,

To—The Secretary to the Government of Bengal, General Department.

With reference to Mr. Carnduff's No. 569, dated the 27th March 1890, I have the honour to submit copies of letters received from the Agri-Horticultural Society of India and the Calcutta Chamber of Commerce on the proposal to give Imperial protection to patents, designs, and trade-marks in the United Kingdom, India, and the Colonies. The Agri-Horticultural Society think the scheme deserving of warm support, while the Chamber of Commerce are of opinion that no case has been made out for the extension of the scheme to India.

2. In my opinion the principle of the scheme is a good one, but there would be great difficulties in carrying out the scheme in practice.

Dated Calcutta, the 7th June 1890.

From—R. BLECHYNDEN, Esq., Deputy Secretary to the Agri-Horticultural Society in India,

To—The Director of the Department of Land Records and Agriculture, Bengal.

I have the honour to acknowledge the receipt of your No. 923-Agri., dated the 24th April last, requesting the opinion of this Society in respect of the scheme submitted to the Secretary of State for India by the Associated Chamber of Commerce for the Imperial protection to patents, trade-marks, and designs.

2. I am instructed to say that the Council of the Society are of opinion that the general principle of Imperial protection to patents, trade-marks, and designs is deserving of warm support, provided that it would not enhance the present expense of patenting an invention for which protection is desired in India only.

3. I have the honour to submit herewith a letter from Messrs. Cantwell & Co., a firm whose business includes that of a patent agency, whose views on the subject coincide with those taken by this Society.

Dated Calcutta, the 4th June 1890.

From—MESSRS. CANTWELL & Co., Consulting Engineers and Patent Agents,

To—The Secretary to the Agri-Horticultural Society of India.

With reference to the proposal of the British Chambers of Commerce to give Imperial protection to patents, designs, and trade-marks in the United

Kingdom, India, and the Colonies, we have to remark that we consider the proposal, if carried out, would be beneficial to Indian inventors, and we can see no difficulty in carrying it out, providing always that the fees charged in England be not greater than those now charged under the Indian Patent Act. The interests of Indian Patent Agents would, of course, suffer by the change, but that is a secondary consideration.

The procedure necessary to carry out the scheme would be—

(1) To amend English Patent Act, and amended Act to declare retrospectively all existing Indian patents, designs, and trade-marks valid in the United Kingdom and the Colonies, and United Kingdom and Colonial patents, designs, and trade-marks to be valid in India.

(2) Amended Act to fix schedule of Imperial Patent Office fees, at present Indian Patent Office rates, or at lowest of Colonial Patent Office fees.

(3) The Indian Patent Office to become a branch of the Imperial Office, and to be managed by an English Patent Office Examiner and Assistant Examiner with a staff recruited locally; the whole cost of the office to be defrayed by English Exchequer.

(4) The Indian Patent Act to be repealed concurrently with the passing of the Imperial Act in England.

There are other matters of detail which is not necessary to enter into here.

No. 612—90, dated Calcutta, the 30th June 1890.

From—S. E. J. CLARKE, Esq., Secretary, Bengal Chamber of Commerce,

To—The Secretary to the Government of Bengal, General Department.

I have to acknowledge the receipt of the papers forwarded under cover of your docket No. 568, dated 27th of March last, on the subject of a scheme for giving Imperial protection to patents, designs, and trade-marks in the United Kingdom, India, and the Colonies. A careful consideration of these papers has led the Committee of the Chamber of Commerce to the conclusion that such a scheme could only be extended to India at considerable cost to the Indian revenues, and with very problematical advantage to the Indian public. In their opinion no case has been made out to show the necessity for anything of the kind as regards India, and they are therefore not in favour of the extension of the scheme to this country.

No. 1595, dated Allahabad, the 5th December 1890.

From—The Chief Secretary to the Government of the North-Wesetrn Provinces and Oudh,

To—The Secretary to the Government of India, Revenue and Agricultural Department.

In continuation of the correspondence ending with this Office letter No. 1460 of the 7th November last, I am directed to submit, for the information of His Excellency the Governor-General in Council, the enclosed copies of letters* from Messrs. A. Rodgers and W. Bull on the subject of the scheme to give Imperial protection to patents, designs, and trade-marks in the United Kingdom, India, and the Colonies.

* Dated 23rd and 25th September 1890 respectively.

Dated Chupra, the 23rd September 1890.

From—A. RODGERS, Esq., Chupra,

To—The Director of Land Records and Agriculture, North-Western Provinces and Oudh.

Your No. 1099-F. of 1890 (extension to India of patents taken out in England, and *vice versâ*).

I beg to acknowledge the receipt of the above, together with a copy of a letter from the Secretary of State to the Government of India, and, as requested, I have the honour to submit my opinion and experience on the matter under consideration.

I am of opinion that a scheme of Imperial protection is a most desirable arrangement, and that the Indian Government should permit the Revenue and Agricultural Department of India (Patents) to join in all conferences held at Home on the subject, as it is one that is of the last importance to the satisfactory administration of its Patent section and to the Indian and English publics.

The Indian Patent Office by joining the scheme would acquire copies of all British and Colonial patents, and consequently keep in touch and accord with and abreast of the professional and technical judgment and arbitration current in the British Patent Office, which is regarded by all inventors as an umpire office and institution, whose letters patent pass unquestioned by all other Governments.

The late great improvement in the laws of the Indian Patent Office brought about by the Government of India, its Legislative Department, and the Secretary to Government, Revenue and Agricultural Department, and the prompt attention given to every matter coming before it by the officials in charge of it, is greatly appreciated by those coming in contact with it, and it would be a still further boon if the public out here could obtain, through the medium of this energetic department, the very much desired benefit of Imperial protection.

Dated the 25th September 1890.

From—W. BELL, Esq., Tunbridge Wells,

To—The Director of Land Records and Agriculture, North-Western Provinces and Oudh.

I have the honour to acknowledge receipt of your No. 110-F., dated Cawnpore, the 30th August 1890. I desire in reply to say that I think the "proposed scheme for giving Imperial protection to patents, designs, and trade-marks in the United Kingdom, India, and the Colonies" a most desirable one, and that it would be an enormous boon to inventors.

No. 54, dated Simla, the 21st July 1891.

From—The Government of India,

To—The Secretary of State for India.

We have the honour to acknowledge the receipt of Your Lordship's Despatch No. 10 Statistics, dated the 23rd January 1890, transmitting a memorial from the Associated Chambers of Commerce of the United Kingdom, in which they represent the inconvenience caused by the existence of different Patents and Designs laws in India and other parts of the British Empire, and urge the adoption of some scheme whereby Imperial protection over the whole of Great Britain and the Colonial and Indian possessions might be given to patents, designs, and trade-marks.

2. We have carefully considered the proposals made in this memorial in consultation with the Local Governments and commercial bodies in India, and have come to the conclusion that we cannot recommend to Your Lordship the inclusion of British India in any such general scheme.

3. We hold that the recent amendment and simplification of the law relating to Patents by Act V of 1888 sufficiently meets the reasonable demands of all inventors, and we agree with the three leading Chambers of Commerce—those of Calcutta, Madras, and Bombay—that the advantages of introducing such a scheme as that proposed by the Associated Chambers of Commerce of the United Kingdom are open to serious doubt, while it would certainly involve very formidable difficulties of a practical character.

4. We enclose copies of the communications received from the three Chambers just mentioned, and we may add from the experience of our own

Patent Office that a difficulty would be sure to arise out of applications for patents affecting practices in Indian agriculture and manufacture, in connection with which less knowledge exists in the United Kingdom than in India. Applications are frequently made for exclusive privilege in respect to alleged inventions which are simply plagiarisms of processes well-known in India, of which the English Patent Office would know little or nothing. Thus the Indian agriculturist practices many methods of treating fibre, and makes use of many appliances for crushing sugarcane which might be wholly novel in England, and might in consequence be given Imperial protection which would seriously affect the rights of natives of this country. The Government of India have practically accepted the duty of protecting the agricultural and manufacturing classes, who are at present insufficiently educated to guard themselves from wrongful attempts to monopolise contrivances or processes useful to agricultural and manufacturing industries of a character unfamiliar to the English expert, and we are therefore unwilling to accept any proposals which would materially increase that responsibility while lessening our control over the grant of patents. We are accordingly of opinion that it is undesirable to allow the control of patents in India to pass out of the hands of the Indian authorities. We shall, however, be willing to consider any suggestions for the improvement of Act V of 1888 or of the working of our Patent Office.

		1889.	1890.
Applied for ...	...	336	319
Granted ...	...	268	176

5. The number of patents applied for and granted during the last two years is noted on the margin.

6. The question, so far as it regards trade-marks, differs from the question in its application to patents, inventions, and designs, for we have, as Your Lordship is aware, no law in India for the registration of trade-marks and for conferring property in such marks by virtue of registration. Therefore the discussion of the question whether it would be expedient to assent to a scheme proposing that registration of trade-marks in India should confer a property therein in other parts of the British Empire must necessarily be preceded by a discussion of the question whether it is expedient to pass a law providing for the registration of trade-marks in India. We do not propose at present to discuss this question, which has often been under our consideration before. As the Bombay Chamber of Commerce states in the letter which is annexed to this Despatch, the proposal for the enactment of a law for the registration of trade-marks was made by that Chamber in 1877, and after Bills had been prepared and the question fully considered the proposal was finally abandoned with the concurrence of the Chamber in 1881. The papers were published in the Supplement to the *Gazette of India* of the 10th December 1881, and Your Lordship has recently* drawn the attention of the British and Foreign Patents and Trade-Marks Society to them in answer to communications in which the Society made a proposal similar to that which was made by the Bombay Chamber of Commerce in 1877. The question was before us again in 1884, and in our Despatch No. 34 (Judicial), dated the 13th October of that year, we informed Your Lordship's predecessor that we were unable to undertake any obligation involving legislation for the registration of trade-marks.

* Letter from the Under-Secretary of State for India, No. 181-R. & S., dated the 25th February 1891, enclosed in Despatch to the Government of India, No. 14 Statistics, dated the 26th February 1891.

7. As the matter stands at present, trade-marks are protected without registration in India by the common law as well as by the statute law (the Penal Code, the Sea Custom Act, and the Merchandise Marks Act), and we do not think that we need further consider the question of registration. If, however, the Association just referred to should consider a further proposal expedient, we shall be prepared to give the proposal our attention.

8. In any case, however, we are clearly of opinion that the reasons against the adoption of the proposal made with respect to patents, inventions, and designs, which are stated in paragraphs 1-5 of this Despatch, apply equally to trade-marks.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

INDICATES THE ARRANGEMENTS MADE FOR THE DISPLAY OF INDIAN TEA AND ART-WARE AT THE CHICAGO EXHIBITION, AND ASKS THAT ASSISTANCE MAY BE GIVEN, IF REQUIRED, TO MR. TELLERY IN MAKING HIS COLLECTION.

Circular No. $\frac{29}{4}$ (*Museums and Exhibitions*), dated Simla, the 15th July, 1892.

From—SIR E. C. BUCK, KT., C.S.I., Secretary to the Government of India, Revenue and Agricultural Department,

To—All Local Governments and Administrations.

With reference to the Resolution in this Department, No. 23-4, dated 21st June 1892, publishing the official circular of information for foreign exhibitors at the exhibition to be held at Chicago in 1893, I am directed to say that, although the Government of India have decided not to make any official contribution to that exhibition, they have consented to give financial assistance to the Indian Tea Association at Calcutta and to Mr. Tellery, a well-known dealer in Indian art-ware, for the purpose of erecting a tea-room and exhibiting a satisfactory collection of Indian art-ware and fabrics, the latter being partly used for the decoration of the tea-room.

2. The subsidy awarded to the Indian Tea Association is Rs. 40,000 and that to Mr. Tellery Rs. 10,000.

3. The Government of India have adopted this course partly with the object of relieving Local Governments and Administrations and officials throughout the country of the trouble entailed by making collections for an exhibition. The Indian Tea Association will require little or no official assistance beyond the subsidy granted, the recognition of its representative, Mr. R. Blechynden, and the grant to him of credentials to facilitate his mission. And it has been ascertained that Mr. Tellery is in most respects competent to make his collections without the aid of local authorities, but as in some instances their support and assistance is not unlikely to be of service to him, it is requested that divisional and district officials, as well as those connected with museums and art-schools, may be furnished with a copy of this circular in order both that they may be aware of the arrangement which has been made with Mr. Tellery, and that they may be prepared to accord to him any reasonable aid, should he apply for it, which may not inconveniently interfere with their official duties.

Circular No. $\frac{20}{4}$.

Copy forwarded to the Secretary, Indian Tea Association, and to Mr. Tellery for information, and to the Publisher of the *Gazette of India* for publication in the Supplement to the *Gazette of India*.

J. W. P. MUIR-MACKENZIE,
Under-Secretary to the Government of India.

„ IX.—Details of ditto ditto 1880.

OFFICERS IN CHARGE.

2. Mr. Stephen Jacob was Head Commissioner during the whole year. The other Circle offices were in charge of the officers mentioned below:—

Bombay . . Mr. R. Logan was Commissioner from the beginning of the year to the 28th March 1892 except for the period from 8th August to 2nd

December 1891, when Mr. G. H. R. Hart held temporary charge. Mr. A. F. Cox took charge of the office on 29th March 1892.

Madras . . Mr. T. W. Rawlins was Commissioner throughout the year except for the period from 27th August to 24th November 1891, when Mr. C. R. Kiernander held temporary charge.

Rangoon . . Mr. T. H. Biggs was Commissioner from 1st April 1891 to 23rd March 1892. Mr. C. E. Crawley assumed charge of the office from 24th March 1892.

ACCOUNTS AND AUDIT.

3. The monthly audit of the accounts has been duly reported for each office to the Comptroller General, and special audits have also been made of Calcutta for 1890-91, Bombay for 1890-91, and Rangoon for the calendar year 1891 by the Deputy Auditors General.

CIRCULATION.

4. The following figures show the gross and net circulation* at the beginning and end of the year:—

	Gross circulation.	Retired by other offices.	Net circulation.
1st April 1891 . .	₹25,93,44,775	₹24,40,285	₹25,69,04,490
31st March 1892 . .	₹24,40,50,575	₹32,86,490	₹24,07,64,085

The net circulation at the end of the year was less by ₹1,61,40,405 than at the commencement. The highest figures, which were reached in July 1891, were upwards of 27 crores of Rupees, so that between July 1891 and April 1892 the circulation fell by nearly 3 crores.

The circulation on 1st April 1891 was upwards of 60 per cent. in excess of that in April 1890, a rise quite unparalleled in the history of the Department. The rise was due almost entirely to exceptional circumstances, and with their disappearance a considerable reduction in the circulation might have been anticipated. The reduction was, however, very little in excess of 6 per cent.

5. The highest figures touched by the circulation in the past three years were as follows:—

July 1891	₹27,04,07,375
January 1891	₹27,66,02,505
November 1889	₹16,66,77,605

The average net circulation at the end of each month as compared with that of the two preceding years was as follows:—

1891-92	₹25,43,62,371
1890-91	₹22,88,92,275
1889-90	₹16,15,14,963

The average net monthly circulation of 1891-92 was thus upwards of 2½ crores or 11 per cent. in excess of that of the previous year.

6. The variations in the net circulation of each Circle are shown in the following table:—

Last day of	Calcutta.	Allahabad.	Lahore.	Bombay.	Karachi.	Madras.	Calicut.	Rangoon.	Total.
					(Thousands of Rupees.)				
March 1891 . .	9,36,04	98,80	1,45,35	8,87,20	58,10	3,72,06	18,51	52,98	25,69,04
April „ . .	9,16,66	98,42	1,44,16	9,76,73	64,54	3,00,44	22,21	48,31	25,71,47
May „ . .	9,52,48	1,01,83	1,46,41	9,80,62	60,14	3,02,08	27,50	47,03	26,18,04
June „ . .	10,17,57	1,34,03	1,23,78	9,54,67	79,59	2,83,74	28,55	59,49	26,81,42
July „ . .	10,66,28	1,10,59	1,29,70	9,66,33	68,65	2,81,18	30,19	51,15	27,04,07
August „ . .	10,67,66	1,09,14	1,41,85	9,30,77	75,52	2,76,28	33,08	58,74	26,93,04
September „ . .	9,58,17	1,48,76	1,28,77	9,51,26	65,20	2,66,62	32,31	73,18	26,24,27

Average of last twelve figures . .	9,71,76	1,22,57	1,34,17	8,90,04	67,61	2,76,70	22 75	58,02	25,43,62
Average 1890-91 . .	8,72,19	92,38	1,20,46	8,34,53	49,45	2,49,90	20,39	49,62	22,88,92
„ 1889-90 . .	6,50,54	79,26	85,13	5,21,52	41,25	1,96,74	13,47	27,24	16,15,15

* A note is in "Gross circulation" when it is not yet returned to the original office of issue; but if it has meantime been paid off by another office of issue, and is held by it pending return to the original office of issue, then it has ceased to be in "net circulation," though it is still part of the "Gross circulation."

7. The figures in the above table include the amounts in the Reserve Treasuries of Government, which, so far as they consist of notes, are always held in the higher denominations. These balances are excluded in the following table, which gives the monthly net circulation in lakhs of the Calcutta, Bombay, Madras and other Circles for each of the past three years:—

Last day of	Calcutta.			Bombay.			Madras.			Other Circles.			Total.		
	1889-90.	1890-91.	1891-92.	1889-90.	1890-91	1891-92.	1889-90.	1890-91.	1891-92.	1889-90.	1890-91.	1891-92.	1889-90.	1890-91.	1891-92

Total .	...	—1,77	9,15	...	—2,56	...	...	...

9. It was remarked in last year's report that the circumstances of the year had been quite special. There was an enormous increase in the circulation of currency notes, which was shown to be due almost entirely to American legislation regarding silver, and to the consequent import of silver into India in unusually large quantities. Owing to violent fluctuations in exchange, trade was stagnant, the result being that a large proportion of the silver imported was after coinage deposited and left for months in the Currency vaults, its equivalent being represented by an inflation of the cash balances of the Presidency Banks, which chiefly hold their balances in currency notes of large denominations, and as a consequence by a very large increase, particularly in notes of high value, in the Currency circulation.

10. It will be seen from the table in paragraph 8 that the imports of silver continued on a high scale during April 1891, and on a reduced scale until

March 1892, when a large and sudden increase took place. If trade had improved the result would probably have been a large reduction in the Currency circulation during the greater portion of the year. Trade, however, which was only stagnant in 1890-91, became extremely dull and unprofitable during the greater portion of 1891-92. The Bank rate of interest was reduced to 2 per cent. in August 1891, a lower figure than has ever been known in India, and the highest rate of the year, which only lasted for about two months, was 5 per cent. as compared with a maximum rate of 11 per cent. in March 1890. The only Province in which trade was brisk during the year, and that only in the latter part of the year, was Burma. Accordingly, up to July, the cash balances in the Presidency Banks and the Currency circulation continued to increase, the imports of silver being more than were needed to balance the ordinary absorption of rupees. From August a slight improvement in trade was experienced, and the imports of silver were small. Hence the cash balances and the Currency circulation fell. In January there was a considerable improvement in trade, especially in Burma, and therefore, although the imports of silver increased, there was a considerable reduction in the Banks' cash balances and the Currency circulation. The rice season in Burma was, according to the Commissioner, an unusually early one, and the demand for money in January, February, and March was quite exceptional.

11. The tables given in paragraphs 6 and 7 show that the average net circulation in each Circle was greater in 1891-92 than in the previous year. The smallest proportionate increase was in Calicut, the largest in Karachi. Excluding the Reserve Treasury figures, which, as between Calcutta, Madras and Bombay, vary according to the general requirements of the Empire, the net circulation showed the largest increase in Calcutta and the smallest in Bombay.

12. Including the Reserve Treasury figures the highest net circulation during the year was reached in July 1891, and the lowest in January 1892. If the Reserve Treasury figures are excluded the result is the same as regards the highest circulation, but the lowest circulation was reached in March 1892.

13. The fluctuations month by month in the various Circles are somewhat remarkable. From the table in paragraph 7 it will be seen that in Calcutta the highest circulation was in June, July, August; in Bombay in September, October, November; in Madras in June, July and November; and in the other Circles in September to December. These figures are abnormal as compared with previous years, and they probably to a great extent reflect the abnormal conditions of trade during the year.

14. The average circulation at the end of each month calculated on the figures for five years (excluding Reserve Treasury figures) is given below:—

	Average. (In lakhs of Rupees.)		
	1891-92.	1890-91.	1889-90.
April	1,641	1,459	1,389
May	1,681	1,476	1,411
June	1,736	1,498	1,438
July	1,772	1,518	1,448
August	1,783	1,545	1,442
September	1,861	1,629	1,479
October	1,946	1,734	1,547
November	1,977	1,774	1,563
December	1,929	1,734	1,511
January	1,833	1,689	1,479
February	1,769	1,622	1,438
March	1,773	1,623	1,450

The general tendency is to the lowest circulation in April and May and to the highest in October and November, and the above figures confirm this tendency. The figures of the past two years, however, have been quite exceptional, and taken by themselves do not agree exactly with the average deduced from five years' figures.

15. The details of the net circulation of 31st March 1892 for each denomination of notes are as follows:—

	Number of notes for Rupees.								Total.	
	5	10	20	50	100	500	1,000	10,000	Pieces.	Value.
Calcutta	93,688	2,358,994	78,046	52,285	176,281	21,400	28,224	1,826	2,810,744	10,30,45,650
Allahabad	12,585	37,444	18,898	13,641	17,691	3,251	3,573	49	107,727	89,54,875
Lahore	27,139	50,978	31,696	25,369	28,308	5,703	3,273	293	173,259	1,44,83,145
Bombay	278,339	885,902	119,184	80,768	105,563	8,565	20,093	2,379	1,500,793	7,53,94,595
Karachi	5,549	70,643	23,905	7,858	9,196	972	1,589	261	119,973	72,09,775
Madras	45,051	135,053	35,529	23,855	153,834	4,667	2,341	304	405,634	2,68,27,015
Calicut	9,360	9,249	3,457	2,446	3,622	107	52	12	28,305	9,18,430
Rangoon	9,024	22,795	7,899	4,913	10,929	988	887	78	57,513	39,30,600
Total for 31st March 1892	480,735	3,571,058	318,609	216,135	505,924	45,653	60,032	5,202	5,203,348	24,07,64,085
Total for 31st March 1891	528,768	3,300,390	311,755	205,933	465,685	44,983	58,425	7,724	4,923,663	25,69,04,490
Total for 31st March 1890	449,463	2,816,258	270,938	181,819	386,222	34,716	39,398	1,742	4,180,556	15,77,17,805

There was a large increase in the total circulation of ₹10 notes, a smaller but considerable increase in the circulation of ₹100 notes and a small increase in the circulation of ₹20, ₹50, ₹500, and ₹1,000 notes. On the other hand, there was a considerable decrease in the circulation of ₹5 and ₹10,000 notes.

16. Dividing the net circulation between notes of ₹500 and upwards and notes below ₹500, the values at the end of each of the last three years are—

	Notes of ₹100 and under.	Notes of ₹500 and upward.	Total.
	(Thousands of Rupees.)		
1891-92	10,58,86	13,48,78	24,07,64
1890-91	9,87,48	15,81,56	25,69,04
1889-90	8,35,42	7,41,76	15,77,18

The decrease in circulation as compared with the previous year has therefore taken place in notes of the higher values, and is in fact confined to ₹10,000 notes only. It has been stated in former reports that such notes are chiefly, if not entirely held by Banks, large Banking firms and the Reserve Treasuries. The total Reserve Treasury balance on 31st March 1891 was 481 lakhs. On 31st March 1892, it had been reduced to 361 lakhs or by 70 lakhs of rupees. During the same period the total cash balances at the head offices of the Presidency Banks had fallen from 510 to 254 lakhs, a reduction of 256 lakhs. Hence the decrease in circulation of notes of the highest value is fully accounted for.

17. The details of the circulation of notes below ₹500 in value are, if anything, of more interest than those of the higher values. The Banks, Banking firms and the mercantile community generally, as a rule keep a large portion of their funds in high value notes. Such notes do not as a rule travel far from the Presidency towns and the offices of issue. Notes of lower values, especially

those of R100 and under, are however gradually making their way into every corner of the Empire and beyond it into Central Asia, Afghanistan and portions of Africa. Currency notes can or could be a few years ago sold at a premium at Yarkand, and the Povinda traders from Afghanistan frequently take back their earnings from India in the shape of currency notes.

18. For these purposes R10 notes seem to be appreciated more highly than any other denomination. Upwards of 68 per cent. of the entire number of notes in circulation on 31st March last consisted of R10 notes. The next denomination in favour used formerly to be R5 notes and after that R100 notes. But from causes which will presently be noticed (paragraph 19), the circulation of R5 notes has suffered a check, and R100 notes have, next to R10, the largest circulation. The circulation of these notes is, however, less than 10 per cent. of the total, that of R5 notes being about 9 per cent. Thus of the total number of notes in circulation, R5, R10 and R100 notes contribute about 88 per cent. There is, however, a fashion so to speak in the circulation. As regards R5 notes the number of pieces in circulation in Bombay is greater than in all other Circles put together. A few years ago R5 notes were more in favour in Calcutta. The R10 note is the favourite value in the Calcutta Circle, Bombay coming second, but with little more than one-third of the number of pieces. R20 notes circulate most freely in Bombay as do also R50 notes. The number of pieces of R100 notes in circulation is largest in Calcutta, but Madras is a good second. In the smaller Circles similar variations are to be found. A comparatively small number of R5 notes circulate in Karachi, but the number of R5 notes in circulation in Lahore is more than twice as large as that in Allahabad. Similarly the circulation of R50 and R100 notes is comparatively large in Lahore and comparatively small in Karachi and Allahabad.

19. It is extremely difficult to assign any reasons for these variations. Similar variations are, it may be observed, noticeable in the circulation in different Provinces of small silver and copper coins. There can, however, be no doubt that there is a steady tendency to the extended use year by year of notes of small value in payment of small sums. Not only are R5 and R10 notes used more extensively every year in ordinary retail trade transactions, but they are also, especially in Bombay and Calcutta, used largely in payment of wages.

A successful forgery, which is usually attempted in regard to notes of small value and large circulation, leads, however, to an immediate and rapid reduction in circulation. Thus a forgery of R5 notes in Bombay during the year under report was undoubtedly responsible, not only for a check in the former steady increase but also for a reduction in the circulation of these notes by about 46,000 pieces as compared with the previous year. With the arrest and conviction of the forger, the circulation has again begun to increase. A similar forgery of R5 notes in Rangoon reduced the circulation, according to the Commissioner, by upwards of 50 per cent. during the year.

20. The gross value of each denomination of notes of small value in circulation at the end of the last three years is compared below :—

	1889-90.	1890-91.	1891-92.	Percentage of increase in 1891-92 over 1890-91.
	(Thousands of Rupees.)			
R5	22,47	26,43	24,04	—9·9
R10	2,81,63	3,30,04	3,57,11	+8·2
R20	54,19	62,35	63,72	+2·2
R50	90,91	1,02,97	1,08,07	+4 9
R100	3,86,22	4,65,69	5,05,92	+8·6
	8,35,42	9,87,48	10,58,86	

The decrease in regard to the R5 notes was due, as stated above, to forgeries of these notes in Bombay and in Rangoon, details of which will be found in paragraph 61.

21. The average value of each note in circulation in each Circle on the last day of the year compared with the past two years was—

	1891-92.	1890-91.	1889 90.
	R	R	R
Calcutta Circle	37	37	31
Allahabad „	84	98	79
Lahore „	84	99	67
Bombay „	50	58	35
Karachi „	60	53	49
Madras „	66	94	63
Calicut „	32	62	38
Rangoon „	68	78	60
All India „	46·3	52·2	37·7

The reduction in the average value in all India is of course due to the reduction in the circulation of notes of high value already referred to.

22. The reduction in the average value in all circles except Karachi and Calcutta was also chiefly due to the smaller number of R10,000 notes in circulation. Thus in Rangoon only 78 notes of R10,000 each were in circulation at the end of 1891-92 as compared with 228 at the end of 1890-91. In Madras the corresponding figures are 304 and 1,436, and in Allahabad 49 and 124. The steady increase in value in Karachi is due to an increase in the number of high value notes in circulation, accompanied, however, by an increase in the circulation of notes of all values. The general increase in the circulation of the Karachi Circle is very noticeable, and is no doubt connected with the increasing trade of Karachi itself.

ANALYSIS OF CIRCULATION.

23. No special work has been undertaken during the year. In Bombay the small difference which existed at the time of last report between the outstanding balance of R10 notes in circulation and that obtained from the Issue Registers has been cleared, and there is now a complete reconciliation between the Issue Registers and the Ledger, unknown differences excepted, in respect of all denominations of notes except in the case of the abolished sub-circles of Nagpur and Akola which it is intended to reconcile as opportunity offers.

RESERVE.

24. The Reserve upon 31st March 1892 stood as follows :—

	R	a.	p.	R	a.	p.
Silver Coin—						
At Calcutta	2,39,38,758	14	4			
„ Allahabad	2,09,35,335	0	0			
„ Lahore	1,44,16,575	0	0			
„ Bombay	5,73,36,845	12	0			
„ Karachi	63,87,220	0	0			
„ Madras	1,63,31,130	0	0			
„ Calicut	3,68,610	0	0			
„ Rangoon	32,83,920	0	0			
				14,29,88,394	10	4
Small Silver Coin	20,000	0	0			
				20,000	0	0

	₹	a.	p.	₹	a	p.
Silver Bullion—						
At Calcutta . .	77,52,619	5	8			
„ Bombay . . .	1,00,03,071	0	0			
				1,77,55,690	5	8
Invested in Government securities . .	8,00,00,000	0	0			
				8,00,00,000	0	0
Total agreeing with net circulation .				24,07,61,085	0	0

The value of the rupees in the Reserve was less by 3 crores and 60 lakhs than on 31st March 1891, and the value of the small silver coin was less by 3 lakhs and 84 thousand rupees. On the other hand, the silver bullion was considerably over a crore in excess of that in reserve on 31st March 1891 and the investment in Government securities had also increased by a crore of rupees.

The proportion of the Reserve held in coin and bullion to the total net circulation was upwards of 66 per cent.—a percentage which can only be regarded as extremely satisfactory. It has to be observed that this percentage is exclusive of the increase of one crore in the investment. Had this investment not been made, the percentage of silver in reserve to circulation would have amounted to nearly 71 per cent.

25. The half-yearly verifications of the Currency balances were held for all Circles and Sub-Circles on 30th September 1891 and 31st March 1892, and the balances of the last working day of each half-year were verified in accordance with the orders issued on the subject. The half-yearly verifications are conducted by a gazetted officer unconnected with the Currency Department, and in the larger offices, *e.g.*, Bombay, occupy a very considerable time. The verification of the balances, especially in silver, is a work of time and labour, as it is no small task for one officer to satisfy himself regarding the correctness of a rupee balance, which, as in Bombay, amounted to nearly $5\frac{3}{4}$ crores closely packed in treasure vaults.

INVESTMENTS.

26. By Act XV of 1890 the maximum amount, out of the coin and bullion reserve, which may be invested in securities of the Government of India, was raised from 60 millions to 80 millions of rupees. By Notification No. 5900, dated 19th December 1890, the amount to be so invested was at first fixed at 70 millions of rupees, and by Notification No. 4861, dated 3rd December 1891, the full amount allowed by the Act was ordered to be invested, *viz.*, 80 millions of rupees. The investment of this extra crore was effected between February 22nd and March 19th and the actual amount invested was ₹1,00,00,042, for which Government 4 per cent. securities to the nominal value of ₹95,57,700 were purchased, the average cost being a fraction over ₹104-10.

27. The nominal value of the investment was thus raised to ₹8,15,95,000 which was held at a book value of ₹8,00,00,000. The book value thus corresponds exactly with the limit of 80 millions of rupees fixed by the Notification quoted above. The average rate at which the whole investment is held on the books is a little over ₹98 against a present market-rate of about ₹107—12.

28. The investment was effected through the agency of the Bank of Bengal and was carried out with rapidity and with comparatively little effect on the price of Government securities. A little more than half the investment was effected in Calcutta, the balance in Bombay.

PROFITS OF CIRCULATION.

29. The interest realized and credited under the head "Profits on Note circulation" is ₹28,48,045-1-6. It is made up as follows :—

	₹	a.	p.
Interest on ₹7,20,37,300 of 4 per cent. paper held at close of 1890-91	28,81,492	0	0
Interest realized on conversion of 4 per cent. paper purchased for the Currency Investment . .	76	12	9
	28,81,568	12	9
Deduct— Net interest paid on purchases .	33,523	11	3
	28,48,045	1	6

The interest realized is upwards of three lakhs in excess of that realized last year owing to the increase in the Currency Investment from 6 to 7 crores of rupees, and the future interest receipts will be larger by about four lakhs more owing to the increase in the Currency Investment from 7 to 8 crores of rupees (paragraph 26).

ISSUE AND RECEIPT OF NOTES.

30. The following are the gross issues and receipts of the year, the details by Circles being shown in Statement VI :—

	₹	₹
Gross circulation, 1st April 1891		25,93,44,775
ISSUES—		
Over the counter	84,96,80,330	
At Agencies	1,32,74,880	
In remittance transactions { Between Head Offices and Agencies	2,61,09,450	
In remittance transactions { Between Circles	7,56,55,000	
In payment of melting fees . . .	38,725	
In purchase of securities	99,77,155	
		97,47,35,540
		123,40,80,315
RECEIPTS—		
Over the counter	75,25,35,580	
At Agencies	6,45,440	
From other Currency Circles	8,34,55,660	
For Mint Certificates	2,62,23,575	
In remittance transactions { Between Head Offices and Agencies	2,99,53,685	
In remittance transactions { Between Circles	9,71,65,800	
		99,00,29,740
Balance, being gross circulation, March 31st, 1892 (*vide* paragraph 4)		24,40,50,575

31. The Agencies deal exclusively with Treasuries and the bulk of the transactions are in the Punjab. The receipts from other Currency Circles represent the receipt in each Circle of notes belonging to that Circle but cashed in other Circles. The receipts for Mint Certificates are, as explained in last year's report, confined to Bombay.

The remittances are for the most part payments and receipts of one Currency Office, in consideration of receipts or payments at another.

32. The issues and receipts for the last three years are as follows:—

	Issues.	Receipts.
	₹	₹
1891-92	97,47,43,040	99,00,37,240
1890-91	1,03,24,77,750	93,35,27,500
1889-90	93,41,95,680	93,37,97,425

The issues have decreased by about 577 lakhs, and the receipts have increased by about 565 lakhs as compared with the previous year.

The decrease in issues was entirely in issues over the counter, and would have been much greater had it not been that there was an increase under all the other sub-heads.

As regards receipts there was a large increase in receipts over the counter, from other Currency Circles and in remittance transactions between Circles, balanced by a very large reduction, owing to reduced imports of silver, in receipts for Mint Certificates.

33. The aggregate gross issues and receipts of the several denominations of notes at both offices of issue and agencies during the year were as follows:—

	Number of notes for Rupees.								Total	
	5	10	20	50	100	500	1,000	10,000	Number.	Value.
Issues	954,810	5,076,747	593,706	416,272	1,098,643	150,593	277,463	42,389	8,610,623	97,47,43,040
Receipts	1,002,176	4,797,972	585,202	404,966	1,054,118	149,753	275,346	44,946	8,314,479	99,00,37,240
More Issues	...	278,775	8,504	11,306	44,525	840	2,117	...	346,067	1,05,12,630
„ Receipts	47,366	...	...	...	...	...	...	2,557	49,923	2,58,06,830
									Net decrease of Gross Circulation	1,52,94,200

34. The average number of notes that passed over the counters at each Head Office on each working day during the past three years, and the daily average of cancellations are given in the following table:—

	Notes cashed.			Notes issued.			Notes cancelled.		
	1889-90.	1890-91.	1891-92.	1889-90.	1890-91.	1891-92.	1889-90.	1890-91.	1891-92.
At Calcutta	12,426	12,713	13,410	12,879	14,529	15,152	9,185	8,462	8,760
„ Bombay	7,166	6,940	8,203	7,832	8,200	8,524	4,147	5,614	5,544
„ Madras	2,477	2,457	2,592	2,568	2,657	2,635	2,365	2,331	2,586
„ Rangoon	610	645	733	665	758	742	402	425	572

35. The figures show that there is on the whole a steady increase under all heads, and they indicate the magnitude of the operations of the various Currency offices. Thus in 1891-92 the Calcutta office on each working day cashed 13,410 notes, issued 15,152 notes, and went through the various and elaborate processes by which notes are cancelled in respect to 8,760 notes, a total for each day of 37,322 pieces.

It speaks highly in my opinion for the zeal and efficiency of the Currency officials in all offices that such a large amount of work can be carried through day after day with almost unfailing regularity and accuracy.

ENCASHMENT OF FOREIGN NOTES.

36. The following is the foreign note account of the Circles in aggregate:—

	₹	₹
Balance held on 1st April 1891		24,40,285
Received over the counter	8,13,26,865	
From other Circles	41,46,450	
		8,54,73,315
Total		8,79,13,600
Remitted to Circles concerned		8,46,27,110
Balance on 31st March 1892		32,86,490
Total		8,79,13,600

37. The details by Circles of the amount received over the counter, ₹8,13,26,865, in the above statement are as follows:—

Statement of Foreign Circle Notes cashed during the year 1891-92.

Cashed by	Calcutta.	Allahabad.	Lahore.	Bombay.	Akola.	Nagpore.	Karachi.	Madras.	Calicut.	Coconada.	Rangoon.	Total.

Calicut	11,750	605	1,170	2,22,865	...	...	2,345	5,04,945	...	...	4,310	7,47,990
Rangoon	2,070	...	100	1,100	...	...	...	6,810	50	...	...	9,630
Total	1,92,14,920	1,31,90,230	1,29,87,890	2,18,86,905	125	705	16,39,330	1,07,73,730	13,09,340	110	3,33,580	8,13,26,865

The letter (c) indicates the value of foreign notes which were legally encashable, that is, the amounts of Sub-Circle Notes encashed by their respective Head Circles.

And the comparison for the last four years is as follows:—

Other Circle.	₹ 1888-89.	₹ 1889-90.	₹ 1890-91.	₹ 1891-92.
Notes cashed at—				
Calcutta	3,03,23,075	3,54,08,555	4,39,25,700	4,12,97,670
Allahabad	55,06,585	54,37,460	46,92,205	1,60,84,065
Lahore	41,77,715	46,62,845	30,55,615	40,22,880
Bombay	1,33,81,885	1,43,02,185	1,32,03,125	1,50,82,435
Karachi	15,56,695	12,66,840	13,49,405	16,08,185
Madras	41,58,920	39,47,085	26,67,480	24,74,010
Calicut	16,86,720	22,25,325	19,89,945	7,47,990
Rangoon	8,930	28,185	5,510	9,630
	6,08,00,525	6,72,78,480	7,08,88,985	8,13,26,865

38. The total encashment of foreign notes continues to expand rapidly, but the details vary considerably from those of last year. The encashments at Calcutta, Madras, and Calicut show a reduction, as compared with last year; but in the other Circles there is an increase which is especially marked in the case of Allahabad.

The increase in Allahabad is chiefly in Calcutta notes, of which upwards of 131 lakhs were cashed in the year under report, as compared with 27½ lakhs in 1890-91.

The encashment of Bombay notes at Calcutta fell from 266 lakhs in 1890-91 to 184 lakhs in 1891-92. On the other hand, the encashment of Allahabad notes at Calcutta rose from 67 lakhs in 1890-91 to upwards of 118 lakhs in 1891-92.

39. The causes of these variations are not explained in the local reports. Foreign notes are, as is well known, chiefly received in payment of Government dues, and their encashment in any particular Circle usually indicates a demand for coin in that Circle. There is, thus, usually a considerable flow of coin from Bombay to Calcutta, and remittances to Calcutta from Bombay are to a considerable extent made in Bombay notes.

Hence the figures given above tend to show that the demand in Calcutta for money remitted by Bombay was slacker than usual.

There appears, however, to have been a large demand in the North-Western Provinces for coin, which was partly met by a large encashment of Calcutta notes. The demand was apparently of comparatively short duration, and most of the money found its way back to Calcutta. The net difference between the value of Calcutta notes cashed at Allahabad and Allahabad notes cashed at Calcutta was only about 13 lakhs. Last year the difference was the other way. Calcutta cashed 39½ lakhs of Allahabad notes in excess of Calcutta notes cashed at Allahabad. These variations depend, to a considerable extent, on the action of the Bank of Bengal, which usually holds a portion of its Reserve for the sake of convenience in Allahabad and Lahore notes and cashes these notes at Calcutta or Allahabad and Lahore according to its requirements.

ISSUE AND RECEIPT OF COIN.

40. The transactions in coin are as follows (for details by Circles see Statement VII) :—

	Coin. ₹ a. p.	Small Coin. ₹ a. p.
Balance, 1st April 1891 .	17,90,20,790 8 3	4,04,000 0 0
Receipts—

	Coin. ₹ a. p.	Small Coin. ₹ a. p.
Issues—		
Over the counter . .	21,19,54,410 0 0	
At Agencies . . .	4,12,800 0 0	
In remittance transactions—		
Between Head Office and Agencies ₹7,97,82,093 9 6		
Between Circles ₹9,90,41,500 0 0		
	17,88,23,593 9 6	
For Bullion delivered and pre-melting fees . . .	82,586 1 1	
To Small Coin Account . .	2,20,000 0 0	
In purchase of securities . .	22,886 9 8	
To Coin Account . . .	...	6,04,000 0 0
Total Issues .	39,15,16,276 4 3	6,04,000 0 0
Balance, 31st March 1892 (see paragraph 24) . .	14,29,88,394 10 4	20,000 0 0

41. The receipts and issues for the past three years are given below—

	Receipts. ₹	Issues. ₹
1891-92	35,54,83,880	39,15,16,276
1890-91	45,12,29,551	35,57,11,742
1889-90	38,63,19,655	38,58,98,945

42. The receipts over the counter and from the Treasury on account of Mint Certificates show a large decrease, and on the whole the receipts were upwards of 9½ crores below those of the previous year.

On the other hand, the issues of coin over the counter were upwards of 3½ crores in excess of those of the previous year and there was also a considerable increase in remittance transactions. The net result was that while the coin reserve increased last year by 9½ crores, it was reduced during the current year by upwards of 3½ crores.

The result is mainly due to the diminished imports of silver.

STATE OF THE COINAGE.

43. The following table shows the withdrawal of shroff-marked coin from circulation during the year and the remittance of such coin to the Mint :—

	Shroff-marked Coin.				
	Opening balance.	Receipts from the public.	Total.	Remitted to Mints.	Closing balance.
	(Thousands of Rupees.				
India	71	66	1,37	(a) 85	52
Central Provinces . .	15	6	21	17	4
Burma	3	1	4	2	2
Assam	4	7	11	...	11
Bengal	4	7	11	2	9
North-Western Provinces .	13,63	(b) 7,70	21,33	17,70	3,63
Punjab	8,98	10,91	19,89	14,13	5,76
Madras	5	19	24	...	24
Bombay	6	76	82	75	7
Total .	23,69	20,43	44,12	33,64	10,48

(a) Remitted to North-Western Provinces. (b) Includes 85 received from India.

The total amount withdrawn from circulation is almost the same as that in 1890 and 1889. The withdrawals in the Punjab are a little in excess and those in the North-Western Provinces a little less than those of the previous year. The uniformity of the withdrawals and the prevalence of the habit of shroff-marking in the North-Western Provinces and more especially in the Punjab are remarkable, and there appears to be no diminution in the practice.

44. The following statement shows the number of coins cut and broken under the Coinage Act during the calendar year 1891 :—

Name of Province.	Number of Treasuries in which coins were cut.	Believed to have lost by reasonable wear more than 2 per cent. in weight.				Believed to be counterfeit.				Believed to have been reduced in weight otherwise than by reasonable wear.				Considered unfit for further circulation by reason of obliteration of device or for other cause.			
		₹	½₹	¼₹	⅛₹	₹	½₹	¼₹	⅛₹	₹	½₹	¼₹	⅛₹	₹	½₹	¼₹	⅛₹
India	6	2,458	24,432	...	...	685	75	59	49	7,961	1,297	539	158	...	...	...	...
Central Provinces	9	1,342	18	22	40	77	...	...	...	194	2	1	...	...	...	...	...
Burma	...	62	...	...	...	2,644	56	68	33	35	...	...	...	...	...	...	...
Assam	8	76	2	..	...	109	1	...	...	7	...	...	...	...	...	...	...
Bengal	43	1,056	151	...	...	869	20	...	...	713	12	...	...	...	...	...	...
North-Western Provinces	45	21,423	908	...	...	1,261	66	44	105	13,326	649	66	33	...	...	706	5,156
Punjab	21	36	(a) 21,178	...	...	856	12	...	...	1,892	...	...	...	...	...	...	...
Madras	25	19,062	14,024	...	...	463	28	49	61	65	1	...	...	...	...	...	...
Bombay	27	45,943	1,287	...	...	591	42	45	16	1,055	5	...	...	...	...	...	...
Hyderabad	...	...	...	...	...	8	...	...	...	...	...	...	...	...	...	...	...
		91,468	62,000	22	40	7,768	300	264	264	25,348	1,966	606	191	...	...	706	5,156

(a) Includes 21,128 pieces erroneously treated as worn coins instead of shroff-marked.

The number of rupees believed to have lost by reasonable wear more than 2 per cent. in weight is much less than in 1890. The decrease is spread over almost every Province. The withdrawal of ½ rupees, especially in India and Madras, is, however, much larger than in 1890. There is a considerable reduction in counterfeit coin, especially in Burma and Bengal.

The number of rupees reduced in weight otherwise than by reasonable wear shows an increase, especially in the North-Western Provinces and in India. Except in these provinces "sweating" of rupees appears to be very little in vogue.

45. I append the usual statements of whole rupees coined and issued from the Indian Mints from 1835 to 1891 and of the proportion of each of those annual issues found on examination in each district Treasury of a bag of rupees of the coin ordinarily current in each district.

The coinage of 1891 was upwards of 5¼ crores less than that of 1890 and below that of any year since 1886. The total coinage from 1835 to 1891 inclusive amounted to 317¼ crores of rupees.

As might be expected, rupees of the earlier years are diminishing in number. But it is remarkable that, in spite of the large number of rupees coined since that date, 16 per cent. of the coin in actual circulation belongs to the two issues of 1840, and 21 per cent. to the year 1862. India and Burma have the lowest proportion of old coin and the North-Western Provinces and Oudh, the Punjab and Madras the highest proportion.

Statement of whole Rupees coined and issued from the Indian Mints from 1835 to 1891.

	Coined in Calcutta.	Coined in Madras.	Coined in Bombay.	Total coined.

EXCHANGE OF SMALL COIN.

46. The receipts and issues of small change at the Currency offices during the year were as follows:—

	Receipts. ₹ a. p.	Issues. ₹ a. p.	Net Issues. ₹ a. p.
Half Rupees	4,01,479 0 0	13,02,376 8 0	9,00,897 8 0
Quarter Rupees	6,00,701 12 0	18,40,374 8 0	12,39,672 12 0
One-eighth Rupees	3,78,496 8 0	12,87,332 4 0	9,08,835 12 0
Copper	3,99,784 6 0	4,38,624 4 3	38,839 14 3
TOTAL	17,80,461 10 0	48,68,707 8 3	30,88,245 14 3
TOTAL, 1890-91	14,13,178 9 7	43,38,616 15 8	29,25,438 6 1

The receipts and issues, especially the latter, were largely in excess of those of the previous year.

As regards receipts there was an increase, particularly in quarter rupees and copper. The issues also show an increase under every head, but especially in quarter rupees. The net issues of small silver show an increase, but there is a decrease in the net issue of copper.

BULLION.

47. The following figures show the operations of the Bullion Clauses of the Currency Act, that is, the amount of Bullion received by the Mint Masters on account of the Currency offices at Calcutta and Bombay, for the issue of certificates payable at the Currency offices in notes of the circle or coin:—

	Calcutta. ₹ a. p.	Bombay. ₹ a. p.
Balance of Bullion on 1st April 1891	22,18,205 1 5	52,61,536 0 0
Receipts of Bullion—		
April 1891	14,44,718 11 0	1,00,51,827 0 0
May "	5,66,556 6 0	86,94,440 0 0
June "	2,76,252 13 0	11,31,157 0 0
July "	25 3 0	1,01,847 0 0
August "	...	18,073 0 0
September "	16,71,324 12 0	21,477 0 0
October "	6,16,370 6 0	13,30,038 0 0
November "	17,40,558 2 0	4,07,881 0 0
December "	32,14,464 14 0	27,68,761 0 0
January 1892	26,55,537 9 0	56,61,159 0 0
February "	45,10,473 12 0	39,48,042 0 0
March "		96,91,533 0 0
TOTAL OF 12 MONTHS	1,66,98,206 6 0	4,38,26,185 0 0
Additional ₹1 per mille credited on account of melting fees. (Paid out of Currency)	14,973 11 1	38,746 0 0
TOTAL	1,67,13,180 1 1	4,38,64,931 0 0
TOTAL RECEIPTS AND BALANCE	1,89,31,385 2 6	4,91,26,467 0 0
Deduct—Mint certificates realised	1,11,78,765 12 10	3,91,23,396 0 0
Balance	77,52,619 5 8	1,00,03,071 0 0

48. The receipts of bullion for the last five years have been—

	Calcutta.	Bombay.	TOTAL.
	₹	₹	₹
1891-92	1,67,13,180	4,38,64,931	6,05,78,111
1890-91	2,79,94,418	9,24,98,201	12,34,35,995
1889-90	73,22,954	7,07,87,073	7,81,10,027
1888-89	57,28,803	6,10,97,675	6,68,26,478
1887-88	94,57,469	6,42,88,585	7,37,46,054

The receipts were less than half those in the previous year, and below those of any year since 1886-87. The balance of bullion on 31st March 1892 was higher than usual, owing to the very heavy receipts in March.

49. The operation of the Bullion Clauses of the Currency Act is also shown in further detail of the transactions between Mint and Currency in the following figures :—

	Transfers to the Mint of bullion from the Currency Department.			Balance at end of month of bullion paid for by Currency Department and held as part of its reserve.			Balance of bullion held on Treasury account, i.e., the amount by which the deliveries of new coin failed to meet the Mint Certificates payable by Treasury to Currency.

AGENCIES.

50. Under this heading are included the Agencies of the Paper Currency Department, which are opened at certain important stations to afford facilities to the public for exchanging coin for notes or notes for coin, and temporary Currency chests, which are established at Treasuries by the issue of an order to transfer a certain quantity of coin from the Treasury balance to the Currency Department, the transaction being balanced by the transfer at some other station of an equivalent amount of coin or notes from the Currency to the Treasury Department. In the former case what is to all intents and purposes a Sub-Circle is established within a Circle or Sub-Circle. Currency notes belonging to the parent Circle or Sub-Circle after having been marked with a distinguishing number or stamp, are issued by the Currency Agency to the Treasury in exchange for coin, and by the Treasury to the public in payment

of Government dues or in exchange for coin. These notes can then be cashed either at the Head Office of the parent Circle or Sub-Circle, or at the Treasury of issue. In some Provinces these Agencies have developed greatly, notably in the Punjab. Currency notes issued by the Simla, Rawal Pindi, Umballa or Peshawar Agencies are freely received by the public, and as they can be cashed at the Agency of issue and at Lahore itself, they are greatly appreciated and have probably contributed to a large extent to the development of the note circulation in the Punjab, which is much greater than in the more populous and wealthy adjacent Circle which comprises the North-Western Provinces and Oudh. The issue of notes from the Punjab Agencies amounted to upwards of 124 lakhs in 1891-92, an amount far in excess of the combined issues at Agencies in all other Provinces. The other more important Agencies are those at Nagpur, Vizagapatam, and Coconada, and they have practically taken the place of abolished Sub-Circles.

51. The temporary Currency Agencies, or as they may be more conveniently called Currency chests, which are opened for the deposit of surplus Treasury coin, vary in number according as a surplus exists, and they are of course most numerous in Bengal, where the surplus is usually greatest.

52. The total number of these Currency chests at the end of the year was 60 and the total balance of coin deposited in them at the end of the year was upwards of 373 lakhs of rupees distributed as follows :—

	₹
Calcutta Circle	1,28,27,882
Allahabad „	95,88,000
Lahore „	63,46,950
Bombay „	73,19,000
Madras „	4,30,000
Rangoon „	8,15,000
	3,73,26,832

53. The transactions of these Currency chests are expanding rapidly every year. The amount in deposit at the end of the year under report was 64 lakhs in excess of that at the end of the previous year, and it is probable that, owing to their great convenience, a still further increase will take place. It is practically only within the last few years that the system has been developed. Formerly the surplus in a Treasury, in order to be utilised, had either to be moved to a Central Treasury or to head-quarters; and this though it was quite possible that the money might have to be moved back in a few months to the remitting Treasury. Now, however, a surplus which will probably be required later on at a Treasury can be utilised for the general purposes of the Empire even for a month or two. To effect this, two distinct transactions are invariably required.

54. A surplus Treasury in the North-Western Provinces, for example, separates (say) a lakh of rupees in silver from its Treasury balance and transfers the money to the Currency Department. The money is usually placed in a locked chest and the key is kept by the Collector on behalf of the Currency Department. Intimation of the transaction is then telegraphed to the head-quarters of the Circle—*e.g.*, Allahabad or to the Head Commissioner at Calcutta. If to Allahabad, the Deputy Commissioner can on receipt of the telegram either withdraw a lakh in Currency notes or in coin from the

Currency at Allahabad, or from any Currency Agency or chest where the money is available and transfer the amount to any Treasury that may require the money. If intimation is sent to the Head Commissioner, the Head Commissioner can in the same way utilise the lakh of rupees at any station in any part of India where there is a Currency Agency or chest in which money is available and transfer the money to his Treasury balance. It will be seen that the system enables the Comptroller General and the Accountants General to utilise the surplus balances in Treasuries in a remarkable manner to assist Treasuries where money is required, without any actual transfer of coin. The only matter which is absolutely necessary is that the transactions should be carried out in pairs and that the Currency Department must always receive notes or coin, before it pays out notes or coin to the Treasury Department.

CLAIMS ON LOST NOTES.

55. The following is the statement of lost and mutilated notes paid during the year on bond of indemnity :

Nature of Loss.	Number of notes for Rupees								Total	
	5	10	20	50	100	500	1,000	10,000	Number.	Value.
										R
Whole Notes, lost or destroyed .	...	...	...	...	1	...	...	...	1	100
Half Notes . Lost by Post .	13	133	25	57	233	19	11	...	491	48,545
Half Notes . Lost accidentally .	23	81	34	35	147	11	9	...	340	82,555
Mutilated Notes	6	92	10	16	23	2	8	...	157	13,250
1891-92 . .	42	306	69	108	404	32	28	...	989	94,450
1890-91 . .	57	332	93	89	310	40	21	...	942	81,915
1889-90 . .	41	342	74	109	312	43	39	...	960	1,02,255

56. The number does not differ materially from last year except in regard to mutilated notes in which there is a considerable increase. The large number of cases in which parties allow their claims to remain unrealised even after they have proved their title was noticed in last year's report. Further enquiry showed that it was, as might be expected, in notes of low denominations that parties failed to take the final step, the execution of a bond of indemnity, to recover the value of their notes, and it appeared probable that this was caused by the difficulty experienced in obtaining two sureties to the bond in every case no matter what the status of the claimant and the value of the note might be. Under these circumstances, the Government of India were pleased to authorise the Commissioners of Paper Currency (1) to dispense with the sureties altogether in any case in which the value of the half or mutilated notes on which a claim was based does not exceed R100, and (2) to dispense with the certificate as to the sufficiency of the sureties in any case in which the Commissioner thinks their sufficiency may be reasonably assumed.

57. The full effect of these concessions can only be ascertained after the lapse of some little time. I know, however, from personal observation in Bombay that the concessions were appreciated and that several claims on small value notes, *e.g.*, R5 and R10 which had been dropped, were revived and carried to a conclusion.

FRAUD AND FORGERY.

58. Two cases of attempt at fraud are mentioned in the Annual Reports, both in Madras. In one case a fraudulent claim was made on the left and right halves of two notes for R100 each, the corresponding halves of which had been deposited in the Currency Office as a mis-matched note about two years before by another party. After communication with the Police a prosecution was instituted against the fraudulent claimant with the result that he was sentenced to two months' rigorous imprisonment. In the other case a claim was made on the left half of a currency note for R50, the right half of which had been cashed on bond and full value paid to another claimant more than two years before. The claimant was prosecuted and was sentenced to a fine of R60.

59. It has been considered advisable, for want of sufficient material, to abandon the prosecution contemplated in the Allahabad case referred to in paragraph 55 of last year's report.

60. The following cases of forged notes have come to light during the year :—

Of 5-rupee notes 296 pieces.
„ 10 „ „ 18 „
„ 20 „ „ 1 „
„ 500 „ „ 1 „

61. Of the 5-rupee notes four, which are of the $\frac{R}{74}$ series of the Calcutta Circle, apparently belong to the same set, first uttered in 1883-84, mentioned in previous reports.

Ninety-four notes belong to the Bombay forgery discovered and mentioned last year. A considerable number of these notes have been put into circulation, but it is hoped that they have nearly all come in. In connection with these Bombay notes a man named Husein Mahomed who is supposed to have issued them was found uttering several forged R5 notes at Sholapur, and, as reported to the Government of India in this office letter No. 380, dated 19th February 1892, on being tried in December last in the Court of Sessions there, was found guilty and sentenced to transportation for life.

One hundred and ninety-eight notes belong to the Rangoon forgery, the discovery of which has already been reported to the Government of India in this office letter No. 15, dated 16th April 1891. Of these notes two were presented at Calcutta, two at Madras, one at Bombay, and the remainder at Rangoon. Only two notes of this forgery have been presented since July 1891, so that it is probable that most, if not all, of the notes uttered have come in. As has been already stated (paragraph 20), these forgeries had a serious effect on the circulation of R5 notes in Bombay and Burma during the year.

62. Of the 10-rupee notes, 17 are of the series $\frac{R}{86}$ and one of the series $\frac{U}{84}$ mentioned in last year's and previous reports. Thirteen of these notes were presented at Calcutta, three at Lahore, and two at Bombay.

63. The single 20-rupee note mentioned was presented at Calcutta by the Bank of Bengal and appears to belong to the forgery of 1883, of which, as stated in the report for 1889-90, a large number of notes passed into circulation.

64. The 500-rupee note, which is of the same batch as those mentioned in the report for 1889-90, was received by the Paper Currency Office, Bombay, from the Police. A Marwarree named Kaserimal Harchand was found uttering this note and was sentenced by the Bombay High Court to six years' rigorous imprisonment.

65. If the statement made by one of the forgers of this batch that only ten of these notes were forged is correct (see paragraph 51 of the report for 1889-90) only one note of this forgery remains to be accounted for.

66. In connection with one of the 500-rupee notes mentioned in last year's report (a note purporting to be No. $\frac{R}{94}$ 36520), a man, named Damoodar Das, charged with uttering this note at Jeypur in 1889, has been convicted by the Sessions Court, Etawah, and sentenced to five years' rigorous imprisonment and a fine of R2,000.

REMITTANCES OF SILVER.

67. The following is the detail of silver remittances :—

	₹	
Calcutta to Rangoon	15,00,000	
Allahabad to Calcutta	19,02,000	(shroff-marked coin).
Allahabad to Lahore	30,00,000	
Lahore to Calcutta	14,98,000	(shroff-marked coin).
Bombay to Calcutta	50,00,000	
Bombay to Karachi	1,11,78,000	
Bombay to Rangoon	50,00,000	

68. In consequence chiefly of the dulness of trade the remittances from Bombay to Calcutta were on a much smaller scale than usual and no remittance whatever was made from Bombay to Madras. The remittances from Bombay to Karachi were, however, on a larger scale and there was also an increase in the amount sent from Bombay to Rangoon.

69. Had it not been for these increases the storage of the enormous accumulation of silver coin in Bombay would have caused most serious difficulty. As it was, the vaults in the Bombay Castle were full to overflowing, and special arrangements had to be made for the storage of the surplus coin.

TREASURY STATISTICS.

70. The transactions in notes at the several Treasuries in India during 1889-90, 1890-91 and 1891-92 have been as follows :—

	1889-90.	1890-91.	1891-92.
	₹	₹	₹
Receipts from the Public in payment of Government dues	11,91,14,410	11,98,88,748	13,01,84,600
Receipts from the Public in exchange for silver	2,90,98,905	2,91,77,712	3,27,91,825
Receipts from the Public for other notes	25,52,830	24,13,810	24,51,975
TOTAL RECEIPTS	15,07,66,145	15,14,80,270	16,54,28,400
Issues to the Public in payment of Government dues	4,24,04,305	4,42,09,970	5,04,30,910
Issues to the Public in exchange for silver	3,59,20,905	3,68,19,145	4,18,73,290
Issues to the Public for other notes	25,52,830	24,13,810	24,51,975
TOTAL ISSUES	8,08,78,040	8,34,42,925	9,47,56,175

Both the receipts and issues show a large increase. The increase in the issues is an especially satisfactory feature.

71. The total Treasury transactions in notes during the last three years have been as follows (in lakhs of Rupees) :—

	1889-90.	1890-91.	1891-92.
Government of India	423	449	368
Central Provinces	34	46	59
Burma	29	34	55
Assam	58	54	59
Bengal	565	530	588
North-Western Provinces and Oudh	224	205	282
Punjab	326	318	386
Madras	334	359	432
Bombay	317	348	366
Hyderabad	7	6	7
TOTAL	2,317	2,349	2,602

Here, too, the increase in transactions during the year is very marked. It is remarkable that the Punjab transactions now exceed those of Bombay, but the figures of the Currency Offices are of course excluded.

72. The following statement gives details regarding the encashment of notes by Treasuries :—

	1889-90.	1890-91.	1891-92.
Where notes were cashed throughout the year to the extent of the public demand	159	165	164
Where notes were ordinarily cashed, but not always	33	28	48
Where notes were not usually cashed	46	46	31
TOTAL	238	239	243

It is satisfactory to observe that the number of Treasuries where notes are not usually cashed has fallen from 46 to 31. Considering the position of many of our Treasuries, and the difficulty experienced in keeping them supplied with silver, it must be admitted that the number of Treasuries not usually able to cash notes is exceedingly small.

73. Statement V shows the proportion of Treasury and Bank balances which in each Province was held in the form of Currency Notes.

Including Reserve Treasuries the percentage of balances held in notes was :—

	1890.	1891.
Calcutta Circle	35 per cent.	35 per cent.
Bombay „	31 „	41 „
Madras „	28 „	29 „

But if Reserve Treasuries were omitted the figures would be:—

	1890. Balance in		1891. Balance in		Percentage of Notes.	
	Notes.	Cash.	Notes.	Cash.	1890.	1891.
	In thousands of rupees.				Per cent.	Per cent.
Calcutta Circle . . .	23,68	90,10	42,32	1,53,19	21	22
Bombay „	14,26	85,90	17,64	94,75	14	16
Madras „	20,68	1,03,86	21,95	99,97	17	18

RECEIPTS AND EXPENDITURE.

74. The figures of receipts and expenditure given in Statement III are only approximate, as the accounts for 1891-92 are not yet closed. The actual receipts in 1890-91 were less by R350 and the expenditure more by R756 than the approximate figures given in last year's report; details of the differences are given in the foot-note to Statement III. The charges for 1891-92 were less than in the previous year by about R14,000, owing partly to a smaller quantity of note forms having been received from England and to a reduction of expenditure under Repairs to Currency Buildings and Contingencies.

STATEMENTS.

No. I.

Statement of the value of Government Currency Notes in circulation throughout India during 1891-92 and previous years.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the week ending at 8 a.m. on Saturday, 23rd July 1892.

During the week under review strongly marked monsoon conditions have prevailed over the greater part of India, but in the extreme north-west the monsoon current was less felt than in other parts of the country. The monsoon as it crossed the West Coast of India between the stations of Karwar and Karachi was exceptionally strong, and, with this exceptional strength, it passed into the central parts of the country. As a consequence the low pressure area which ordinarily exists over the south of the Gangetic plain was pushed northward to the foot of the hills, and the easterly current which determines the rainfall of Northern India was consequently absent on most days. On the 18th, however, when a small depression appeared over West Bengal, the trough appeared, and rain extended up to Rawal Pindi. This continued till the 20th, after which date the former conditions were established. As is usually the case when rain is plentiful in the north and centre, only slight and scattered showers were received in Madras and the centre of the Peninsula. No storms of any consequence appeared during the week, but two shallow depressions were developed over Bengal—one on the 18th and one on the 22nd.

The chart of the 17th showed the highest pressures in the extreme south and the lowest readings in the extreme north. Gradients were steep, the barometric difference between Colombo and Rawal Pindi being as much as 0·658 inch. The wind was westerly to south-westerly over the greater part of the country, but some easterly and south-easterly breezes were reported from Bengal, Assam, and Burma. There was practically no rain in the Punjab, Sind, or the centre and east of the Peninsula, but elsewhere the fall was general. The only heavy falls were in Lower Burma and North Bengal, where between three and four inches fell. On the following day, the 18th, a small depression had appeared over South-West Bengal, and a trough of relatively low pressure had been developed over the Gangetic plain. Otherwise there was but little change to record.

The easterly current which on the previous day had not extended beyond North Bengal now extended up the Gangetic plain as far as Delhi and Meerut. Elsewhere the westerly and south-westerly current noticed on the previous day continued to blow strongly. Rain had extended slightly into the Punjab and the central parts of the Peninsula, but otherwise the distribution of rain was similar to that recorded on the 17th. Heavyish amounts were falling in South-West Bengal and parts of the North-West Provinces, and moderate amounts in Bombay, the Central Provinces, and Burma. On the 19th the barometer was rising, except over Behar and the North-West Provinces, where there was a slight fall. The depression from West Bengal had moved north-westward to the North-West Provinces and was filling up, while the lowest pressures were reported from Sind. Gradients were steep, and a massive monsoon current was blowing across the Peninsula and the central parts of the country, while a moderate southerly current prevailed over the head of the Bay and Lower Bengal, and a feeble easterly current along the foot of the Himalayas from Sibsagar to Sialkot. There was very little rain over Madras or over Khandeish, Guzerat, Sind, and the Western desert, but in all other parts of India the fall was general. Moderate amounts, varying from $\frac{1}{2}$ inch to 2 inches, were reported. The chart of the 20th showed that, although the barometric changes had been considerable in some parts of the country, the general distribution of pressure was very little altered. Readings were highest in the extreme south and low over the Gangetic plain and the Western desert, the intervening gradients being steep. The wind circulation was also very little changed, except that the easterly current had

become slighter and ceased in Oudh. Rain had ceased in the Punjab, and there were only a few showers in Guzerat and Madras and no rain in Sind. Elsewhere rain was general, and in parts of the North-West Provinces, of the Central Provinces, of Bengal, of Arakan, and of Malabar fairly heavy. On the 21st the depression over the North-West Provinces had disappeared, and pressure decreased from a high pressure area in the extreme south to a low pressure area in the north-west of the Punjab and to a relatively low pressure area over Bengal, where the barometer was falling briskly. Gradients were exceedingly steep, and a very strong monsoon was blowing on the West Coast, across the Peninsula, and in the central parts of the country. Easterly winds were confined to North Bengal, and did not extend up the Gangetic plain. There was practically no rain in North-West India or in the south of Madras, but in all other parts of the country rain was general. The fall was heavy in parts of Burma, of the North-West Provinces, and of Malabar, but elsewhere the amounts were moderate or light. The chart of the 22nd showed that a slight depression had been developed over Bengal, but there was no other important change in the pressure distribution. The winds were irregularly cyclonic over Bengal, variable over the Gangetic plain, and southerly in Burma and North-West India. Elsewhere a strong westerly monsoon was blowing. Rain was still absent from North-West India and the south of Madras, but was general elsewhere. The amounts were not large, except in Lower Burma. The chart of the 23rd showed that the depression over Bengal had developed and commenced to move westward. Easterly winds had extended up the north side of the Gangetic plain, and with this change showers of rain had extended into the north of the Punjab. There was again no rain over the centre of the Peninsula, over South Madras, over Sind, or over Rajputana. The fall was heavy in the neighbourhood of the depression over West Bengal, but was light elsewhere.

Temperature.—The mean temperature of the whole of India for the week was about normal, and, except on the 19th and 20th, when there was a deficiency of about 1°, the daily variations were also small.

The following table shows the variations of the mean temperature from the normal on each day of the week for the principal Provinces of India :

Province.	17th.	18th.	19th.	20th.	21st.	22nd.	23rd.	Mean variation of week.
	°	°	°	°	°	°	°	°
Burma	—0·7	—1·5	—0·6	0	—1·2	—1·5	—2·4	—1·1
Bengal and Assam	—1·4	—2·3	—1·8	—1·1	—0·8	—1·3	—1·6	—1·5
North-West Provinces and Oudh.	—0·5	—0·4	—4·3	—4·1	—2·4	—2·5	—2·6	—2·4
Punjab	+3·9	+3·2	—2·3	—2·1	+1·8	+3·0	—1·1	+0·9
Bombay	+1·6	+0·6	+0·1	—0·2	—0·8	+0·4	+0·7	+0·3
Berar and Central Provinces	+1·2	—0·1	—2·7	—3·2	—1·0	—1·3	—0·8	—1·1
Guzerat and Central India	—1·3	—0·3	—1·0	—0·4	—1·5	—1·1	+1·3	—0·6
Sind and Rajputana	+0·4	+0·6	+0·9	+0·9	+2·2	+2·9	+2·8	+1·5
Madras	+1·6	+2·3	+0·6	+0·8	+0·1	—0·7	—0·3	+0·6
Mean for whole India	+0·5	+0·2	—1·2	—1·0	—0·4	—0·2	—0·4	—0·4

The provincial variations show that the mean temperature had been below the normal over Burma, Bengal, Assam, the North-West Provinces, the Central Provinces, and Central India, and above in the other Provinces. The largest variation was —2·4° in the North-West Provinces, followed by about —1·0° in Burma, Bengal, and the Central Provinces. Elsewhere the variations were less than 1°. The maxima were high in the Punjab at the commencement of the week.

Rain.—Last week rain was reported in all the rainfall divisions. This week it has fallen in all divisions except Sind and Rajputana (West), and the amounts are generally heavier than they were last week. Consequently for the past fortnight there have been good rains throughout the whole country.

The heaviest average fall during the week under review was 21·95 inches in Arakan, followed by 20·91 inches in Coorg, by 13·89 inches in the Central Provinces (East), and by 13·31 inches in Tenasserim. The lightest rainfall reported was in the south of Madras, where the average fall was less than one-tenth of an inch, but in the south, north-west, and west of the Punjab and in Khandeish and Kattiawar the average was only about one-half inch. Under normal conditions the heaviest rain during the present week is in Arakan (12·60 inches), followed by 10·0 inch in Tenasserim and by 9·15 inches in the Konkan, while the smallest normal fall is reported from South Madras. The actual and normal distribution of rain consequently agree in their main characteristics, but the very heavy rain in Coorg and the Central Provinces (East) as well as the amount of the rainfall in Arakan is abnormal.

Of the 49 divisions which received rain, 30 had more than the normal amount and 18 less, while in the case of Upper Burma no comparison is possible. The region of excessive rain included the following divisions, *viz.*:—Tenasserim, Lower Burma, Arakan, all the Bengal and Assam divisions, all the North-West Provinces divisions, the Hill districts of the Punjab, Malabar, Coorg, Mysore, the Bombay Deccan, Berar, the Central Provinces (West and East), Central India (East), the East Coast (North), and Madras (South Central). In the other divisions there was greater or less deficiency. The greatest actual excess was 12·76 inches in Coorg, but in Arakan and the east of the Central Provinces the excess equalled over 9 inches, and in the North-West Provinces varied between 1½ inches and 5¼ inches.

The three concluding columns of the table show the state of the rainfall for the season, *i.e.*, from May 29th to July 23rd. In most parts of the country the actual and normal agree fairly closely, but in parts of West Bengal, of the North-West Provinces, of the west of the Peninsula, of the Central Provinces, and of Madras there has been a considerable excess. All the instances of considerably deficient rainfall are in North-West India, and of these the most important are the Central Punjab, the Hill districts of the Punjab, Kattiawar, Central India (East and West), and Rajputana.

The following are the principal heavy totals for the different Provinces :

Division.	District.	Station.	Amount.
Tenasserim	Amherst	Thatôn	15·68 inches.
Burma	Bassein	Sudder	11·03 ,,
Arakan	Akyab	Maungdaw	24·72 ,,
Assam	Khasia	Cherra	19·03 ,,
Bengal	Chittagong	Cox's Bazar	12·83 ,,
	Darjeeling	Sudder	17·04 ,,
Behar	Darbhanga	Madhubani	10·77 ,,
North-West Provinces	Farukhabad	Tirwa	17·54 ,,
Punjab	Kangra	Sudder	23·53 ,,
	Gurdaspur	Pathankot	5·95 ,,
Malabar	Calicut	Vayitri	31·26 ,,
Mysore	Shimoga	Nagar	35·30 ,,
Deccan	Kolhapur	Bawda	40·24 ,,
Central Provinces	Damoh	Hatta	9·55 ,,
Central India	Sutna	Nagode	9·12 ,,
Madras	Ganjam	Udayagiri	0·08 ,,

Simla, *28th July, 1892.*

W. L. DALLAS,
Assistant Meteorological Reporter to the Government of India.

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 23rd July.*—Rainfall very heavy on the West Coast and Nilgiris; good in the Circars; very little rain elsewhere. Cultivation and sowing are proceeding actively throughout, and young crops are thriving generally. Pasture has much improved everywhere and is sufficient. Condition of cattle in affected parts have improved. Water-supply is sufficient. Prices are slightly easier in the Karnatic; stationary elsewhere. FAMINE RELIEF: *Numbers on works*:—Deccan 28,884, Karnatic 10,963, and Central 3,615: *Total* 43,462 against 53,463 last week. *On gratuitous relief*:—Deccan 447, Karnatic 125, and Central 115: *Total* 687 against 847 last week. Loans for wells disbursed since April 1891:—Deccan Rs. 8,46,000, Karnatic Rs. 4,36,000, and Central Rs. 11,14,000: *Total* Rs. 23,96,000. Wells completed—602, 2,139, and 1,316: wells under construction—6,579, 2,013, and 7,564 in respective blocks. Agriculturists' loans—Rs. 87,000, Rs. 98,000, and Rs. 68,000: *Total* Rs. 2,53,000 disbursed.

Bombay.—*For week ending 27th July.*—Rain throughout the Presidency Proper and Sind, except in Karachi and Kathiawar; generally moderate. Sowing and transplantation are progressing and standing crops are good, but more rain is wanted in parts of eleven districts. Preparations for late crops are progressing in two districts. Fodder is insufficient in parts of five and water in parts of two districts. Cattle are poor in parts of three districts. FAMINE RELIEF: *Numbers on works*:—Bijapur 52, Belgaum 1,447, Dharwar 212, and Kolhapur 2,432: *Total* 4,143 against 8,266 last week. Karnatic districts will be excluded from the affected area from 1st August.

Bengal.—*For week ending 26th July.*—The weather has been of the ordinary monsoon character during the week, and the rainfall has been generally sufficient for agricultural purposes. The prospects of the winter-rice crop continue to be satisfactory. Early-rice and jute are coming to maturity throughout the Province, and a good harvest may be expected. The harvest has begun in the Chittagong, Dacca, Rajshahi, and Bhagalpur divisions. The latest report from Dinajpur states that crops were little damaged by the flood. Prospects in Orissa are good, but temporary distress has been reported from a small area 30 miles square in Cuttack. The Collector has been directed to open relief works. Prices of food-grains are generally stationary. Cattle are in good condition and fodder and water are plentiful. FAMINE RELIEF: *Numbers on works*:—Darbhanga 4,000 and Bhagalpur 2,867: *Total* 6,867, showing a decrease of 281 since last week. Relief works closed in Monghyr. In Darbhanga three relief circles were closed on the 20th instant. *On gratuitous relief*:—Darbhanga 37, Monghyr 230, and Bhagalpur 1,117: *Total* 1,384, showing a decrease of 445 since last week.

North-Western Provinces and Oudh.—*For week ending 27th July.*—There has been general rain throughout the Provinces. The fall has been heaviest in the Eastern, Central, and Hill districts. More rain is required in the Western districts. Prospects have everywhere improved. Autumn sowings and weeding are progressing. Transplantation of rice and cutting of indigo have commenced. Prices are generally steady.

Punjab.—*For week ending 27th July.*—Good rain has fallen in all but two districts, but more rain is still wanted in four districts. All canals are flowing well. Ploughing and sowings of autumn crops are in progress in most districts. Prospects of crops have improved by recent rain, and they are now in good condition. Stock of food-grain is reported insufficient in Rawal Pindi only. In the Native States of Simla people are distressed, but are supporting themselves by labour. The Bilaspur State has distributed 14,000 maunds of stored grain, and the Koti State professes itself ready to help, but reports that no help is required. The revenue demand has been reduced in them. Cattle in most districts are still lean, and are suffering from insufficiency of fodder. Grass is springing up, but dry fodder is scarce in all districts except two. Prices are rising in six districts; stationary elsewhere.

Central Provinces.—*For week ending 27th July.*—Weather generally cloudy and rainy. The rice crop has been slightly damaged in one tahsil and in the lowlands of Sambalpur; otherwise prospects are very good. Weeding operations are progressing under favourable conditions. Prices are steady.

Burma.—*For week ending 23rd July.*—Rainfall throughout Burma has been general. The total fall up to date is above the average, and in Upper Burma the excess is marked and promising, except in Shwebo, where more rain is wanted. Ploughing, sowing, and transplanting of wet-weather paddy are in full progress throughout the Province. Reaping and threshing of dry-weather paddy continue in two districts, and reaping of early wet-weather paddy has begun in another and in the Southern Shan States. Sowing of sesamum, cotton, and *jowar* continues in some parts. The price of paddy is fluctuating in some, but stationary in most districts. In Mandalay there is a considerable fall in the price of rice. The prices of *jowar* and beans are steady, except in five districts, where the fluctuations are marked. FAMINE RELIEF: *Numbers on works*:—Shwebo 1,517, Meiktila 2,126, and Yamethin 1,363: *Total* 5,006 against 4,646 last week.

Assam.—*For week ending 26th July.*—Weather seasonable. Reaping of summer paddy and transplanting of winter paddy continue. Condition of cattle is normal. Fodder is plentiful.

Mysore and Coorg.—*For week ending 27th July.*—MYSORE: Good rain is reported in three districts, but more rain is wanted in parts of two others. Crops and prospects have generally improved, and agricultural operations are in active progress. Prices have fallen in two districts. FAMINE RELIEF: *Numbers on works*:—Bangalore 40, Tumkur 314, and Mysore 83: *Total* 437 against 581 last week.

COORG: Rainfall heavy. Transplanting of rice is in progress, but is retarded in some parts owing to excessive rain and floods. Coffee, cardamom, and *ragi* are in good condition. Prices are stationary. Fodder and water-supply for cattle are sufficient.

HYDERABAD: Rainfall moderate during the week. Sowing of irrigated crops and weeding of autumn crops are in progress. Condition of cattle is improving. Prices continue high.

Berar and Hyderabad.—*For week ending 27th July.*—BERAR: Average rainfall good. Sowing of *jowari* (*Sorghum vulgare*) is in progress. Cotton plants have germinated and are in good condition. Weeding operations have commenced in two districts. Fodder and water are almost sufficient. Prices are steady. Cattle are in good condition.

Central India.—*For week ending 27th July.*—Prospects continue generally good. Sufficient rain has fallen all over, except in parts of Gwalior territory. Fodder in Bhopal is still scanty, but is fast improving. Condition of agricultural stock has improved in Bhopawar, but is still indifferent in Bhopal. Prices of food-grains are rising in the Nimuch district.

Rajputana.—*For week ending 27th July.*—Rainfall general, except in three Agencies. Agricultural operations are generally progressing, but are limited in parts by scarcity and weakness of cattle. In Ajmere standing crops are fair; harvest prospects are also fair, but it is too early to predict the outturn. Agricultural stock is improving generally, but in Marwar cattle suffer for want of fodder and water. Prices are steady in six States; slightly inclined to rise in Ajmere, and have risen in three Agencies. FAMINE RELIEF: *Numbers on works*:—Ajmere-Merwara 34,680 (including 3,736 home labour), Kishengarh 1,921, Marwar (not received), and Bikanir 2,347: *Total* 38,948 against 38,247 last week, excluding Marwar. *On gratuitous relief*:—Ajmere-Merwara 7,149, Kishengarh 203, Marwar (not received), and Bikanir 998: *Total* 8,350 against 8,618 last week, excluding Marwar. The reduction of numbers on works in Ajmere-Merwara which commenced last week was checked during the week under report by the break in the rains and return of labour to the works, chiefly in Merwara. The return of emigrants continues, but immigration of foreigners is ending.

Nepal.—*For week ending 21st July.*—Weather warm and seasonable. Prospects are good.

E. C. BUCK,

Secretary to the Government of India.

Irrigation.

REVIEW OF THE REVENUE AND EXPENDITURE RECORDED UNDER THE HEAD "IRRIGATION WORKS" IN THE ACCOUNTS OF THE GOVERNMENT OF INDIA FOR 1890-91.

No. 177-I., dated Simla, the 26th July, 1892.

RESOLUTION—By the Government of India, Public Works Department.

Read—

Note by R. G. MACDONALD, Esq., Officiating Accountant General, Public Works Department, upon the accounts of Revenue and Expenditure recorded under the head "Irrigation Works" in the accounts of the Government of India for 1890-91.

RESOLUTION.—In Resolution No. 96 A. G., dated 20th April 1892, the Government of India reviewed the note submitted by the Accountant General, Public Works Department, on the Revenue and Expenditure recorded under the head "Civil Works" in the accounts for 1890-91. The note now submitted deals in corresponding detail with the Revenue and Expenditure of Irrigation and Navigation Works for the same period.

2. This exhibition of the financial results of Irrigation and Navigation Works, now brought together in a comprehensive form for the first time, is of great interest and value, and exhibits clearly the very remunerative character of the outlay on such works. In reviewing the figures submitted by the Accountant General, Public Works Department, the Government of India takes the opportunity of stating in a brief and general form (1) the classification of the works for purposes of account; (2) the sources from which funds are provided for their construction and maintenance, and the manner in which the revenue derived from them is accounted for; and (3) the classes into which the works to which the figures relate may be roughly divided from a professional aspect.

3. For purposes of account, Irrigation and Navigation Works are divided into two main classes, Major and Minor.

Major Works again are sub-divided into—

(*a*) Productive Works, which term is applied to projects that are estimated within 10 years after completion to yield a return of at least 4 per cent. on the sum-at-charge, *i.e.*, the direct and indirect capital outlay *plus* the accumulated arrears of simple interest.

(*b*) Protective Works, which do not necessarily fulfil the above conditon, but are undertaken in order to protect certain tracts from famine.

Minor Works of Irrigation and Navigation are again sub-divided into:—

(*a*) Those for which Capital and Revenue accounts are kept.

(*b*) Those for which only Revenue accounts are kept.

(*c*) Those for which neither Capital nor Revenue accounts are kept.

Agricultural Works, which term is applied chiefly to river embankments, are included among Minor Works, and are sub-divided in the same manner.

4. Funds for capital outlay on Major Works are at present provided in all cases from Imperial resources.

In the case of Productive Works, the capital outlay is principally from borrowed money, out of the 350 lakhs which may be spent annually on Railways and Canals not charged to Revenue, of which, however, only 55 lakhs has for the last few years been allotted to Irrigation. These 55 lakhs are supplemented by grants from Imperial Revenues out of the 150 lakhs set aside annually for Famine Protection and Insurance. The revenue outlay on these works is also Imperial, except in Bengal and the North-Western Provinces, where it is Provincial.

For Protective Works the capital outlay also comes out of the provision for Famine Protection and Insurance, the charges on Revenue account being also Imperial.

In the case of Minor Works, the capital outlay is from Imperial Revenues in Rajputana, Baluchistan, Upper Burma, Bombay (except the Gokak Storage Works), and the Punjab. In Lower Burma, Bengal, the North-Western Provinces, and Madras it is Provincial. The revenue outlay follows the same division.

5. Receipts on Revenue account are of two kinds—Direct and Indirect.

Direct receipts consist principally of the occupier's or water-rate levied on irrigated lands and of the owner's rates on the same land, the assessments being made as a rule by the Public Works Department, but the receipts realised in the Revenue Department. They also include realisations on account of the sale of water for sundry purposes, for the water-supply of towns, from plantations and other canal produce, and for water-power, navigation receipts, rents of buildings, fines and miscellaneous, which are all realised in the Public Works Department. Direct receipts are credited to Imperial or Provincial in the same way as the revenue outlay is debited.

Indirect receipts are realised in the Revenue Department, and consist of the share of the enhanced land revenue due to Irrigation, or, in other words, a portion of the increased land assessment that is levied on land brought under the command of an irrigation work. In the case of all Major Works, these receipts are credited to the works in the Finance and Revenue accounts. In some provinces however, and notably in Madras, the water-rates, though separately assessed, are collected with the land revenue, and, in the case of those works for which Capital and Revenue accounts are kept, are also credited as indirect revenue in the Finance and Revenue accounts.

In the case, however, of all Minor Works, no credit is afforded on account of these indirect receipts, which are included in the general land revenue. This is a fact that must be borne in mind in connection with these works, especially those for which Capital accounts are not kept, for which the figures are given in paragraph 39 of the Accountant General's note. These latter works, though individually small, are collectively of very great importance, irrigating a large area and bringing in a considerable revenue. The agricultural prosperity of those portions of the country which are not under the command of the major systems mainly depends on these works.

Indirect receipts are credited to Imperial in all cases, a proportion of the total land revenue which includes these receipts being assigned as the Provincial share under the contract system.

6. From a professional aspect, Irrigation and Navigation Works may be roughly divided as follows:—

(*a*) Perennial canals and channels.
(*b*) Inundation canals and channels.
(*c*) Reservoirs and tanks.
(*d*) Tidal canals.

Tidal canals are naturally for purposes of navigation only. The larger perennial canals combine navigation with irrigation in many cases.

7. A perennial canal is provided, as a rule, with a weir across the river at the canal head, by means of which the level of the river is artificially raised, affording a supply of water to the canal at all seasons. The principal exception to this rule is the Upper Ganges Canal in the North-Western Provinces, where head-works of a temporary nature, which are repaired after the flood season, are found to be sufficient and more economical. The canal itself is provided with head-sluices to regulate the supply entering it.

Perennial canals may be divided into two classes, deltaic and non-deltaic. In deltaic tracts the bed of the river is only slightly below the level of the surrounding country, and its tendency is constantly to rise. Water taken off from a deltaic river by means of a weir is therefore at a higher level than the immediately adjacent cultivation, and can be distributed by gravitation (lift being rarely required) without the intervention of any great length of leading canal. There are six principal examples of this class of canal in India, *viz.*, the Godavari, Krishna, Cauvery, Penner, and Srivaikuntham systems in the Madras Presidency, and the Orissa system in Bengal. The fact of the bed of the river in these deltas being so nearly on the level of the adjacent ground renders the latter extremely liable to flooding, and such rivers have to be kept in control by long lengths of embankment.

Perennial canals that are non-deltaic derive their supply from a river at some upper point of its course, where the bed is well below the surface of the neighbouring country. Water taken into canals at such points has therefore to be carried considerable distances by means of leading channels before it can be distributed by gravitation, or even by the more expensive method of lift, over the surface of the ground. The best examples of this class of canal are in Northern India, *e.g.*, the Sirhind, Chenab, and Western Jumna Canals in the Punjab, and the Upper and Lower Ganges and the Agra and Eastern Jumna Canals in the North-Western Provinces.

8. The sphere of operation of an inundation canal lies in the broad alluvial valleys formed by the larger rivers, which extend for many miles on either side of the existing channels of the rivers, and indicate the limits within which the rivers have at some time wandered. An inundation canal consists of a channel with an open head through which the supply is taken when the river is in flood, a regulator being in some cases provided to moderate the supply during the highest floods: the bed of the canal generally starts at the level of the low supply surface of the river. Inundation canals are cheaper to construct than perennial canals, the cost of head-works being saved. But they are more expensive to maintain owing to the rapid deposit of silt. They are also open to the objection that the supply of water diminishes rapidly as the river falls; and it may thus happen that the supply is insufficient to bring to maturity crops for which water was taken when the canal was running full, while in the rabi or cold-weather season there is little or no supply in the canal. The best examples of inundation canals are the Upper Sutlej, the Lower Sutlej and Chenab, the Muzaffargarh, and Indus Canals in the Punjab and the Indus Canals in Sind.

9. The most important tanks and reservoirs are in the Madras and Bombay Presidencies and in Rajputana. Many of them were in existence before the country came under British rule, but have since been systematically improved and maintained. It is estimated that in the Madras Presidency alone there are not less than 30,000 irrigation tanks.

Some important works of this class have been undertaken under the auspices of the British Government. Among these may be mentioned the reservoir supplying the Mutha Canal and the Bhatghar reservoir supplying the Nira Canal in the Bombay Presidency and the Periyar reservoir now under construction in Madras.

10. Only one tidal canal is included among the Major Works, *viz.*, the Hidgellee Tidal Canal in Bengal. But irrigation is combined with navigation on the Orissa, Midnapore, and Sone Canals in Bengal; on the Upper and Lower Ganges and Agra Canals in the North-Western Provinces; on the Western Jumna and Sirhind Canals in the Punjab; and on the Godavari, Kistna, and Karnul Canals in Madras.

Among Minor Works, the Calcutta and Eastern and the Orissa Coast Canals in Bengal and the Buckingham Canal in Madras are for navigation only.

11. The following figures exhibit the direct capital outlay, the gross revenue receipts and expenditure, the net revenue, and the irrigated area for all the purely irrigation works for which Capital and Revenue accounts are kept:—

Class of work.	Number of works.	Direct Capital outlay to end of 1890-91.	Gross revenue.	Working expenses.	Net revenue.	Irrigated area.	Percentage of net revenue on Capital outlay.
IRRIGATION.		Rx.	Rx.	Rx.	Rx.	Acres.	
I.—Major Works—							
(*a*) Productive.	35	25,465,011	1,985,041	760,493	1,224,548	7,025,621	4·81
Add—On account of old Irrigation in Madras.	...	...	289,700	34,882	254,818	...	...
Total Productive ...	35	25,465,011	2,274,741	795,375	1,479,366	7,025,621	5·80
(*b*) Protective ...	8	1,660,527	38,046	24,893	13,153	146,847	0·79
II.—Minor Works—							
(*a*) Works for which Capital and Revenue accounts are kept.	69	2,607,739	425,063	222,919	202,144	2,102,634	7·75
GRAND TOTAL ...	112	29,733,277	2,737,850	1,043,187	1,694,663	9,275,102	5·69

12. These figures are very instructive. On Productive Works the direct capital outlay to the end of 1890-91 has amounted to Rx. 25,465,011, upon which a net return of 4·81 per cent. is derived, without taking into account the old irrigation in Madras. This old irrigation represents the area included in the present systems that was watered before the existing works were undertaken by the British Government, and for purposes of account the receipts and charges relating to this old irrigation are excluded. The area in question is, however, now watered by the new canals; and it is certain that but for these the supply to it would be most precarious. In dealing, therefore, with the returns due to irrigation in a general form, the figures relating to this area may legitimately be included. Including these figures, the average return from all Productive Works amounts to 5·8 per cent..

It will be understood, however, that these aggregate results include the figures relating to projects, such as the Chenab Canal in the Punjab and the Sangam and Periyar projects in Madras, which were still in various stages of construction during the year under review. The capital outlay on these projects is, of course, unproductive until the works are complete, and the general average of return is reduced in corresponding ratio. The same remark applies to the large addition which has of late years been made to the capital outlay of the Lower Ganges Canal in the North-Western Provinces on account of the new aqueduct over the Kali Nadi at Nadrai, as it will take time before the irrigation can recover from the check caused by the failure of the original aqueduct.

13. The figures in the statement also include those relating to the Orissa project in Bengal and the Karnul Canal in Madras. These two works were first undertaken by companies under a 5 per cent. guarantee from Government, but being entirely unproductive the companies were bought out. The capital outlay on these two projects has amounted to Rx. 4,585,919, on which large outlay there is less than no return, the working expenses during the year under review having exceeded the receipts by Rx. 12,707.

On the other hand, the returns from some of the works are extraordinarily good. Out of 35 irrigation works classed as Productive, 15 yield over 4 per cent. on their capital outlay, ranging from 40·29 per cent. in the case of the Cauvery system in Madras to 4·5 per cent. in the case of the Agra Canal in the North-Western Provinces.

On the whole, the returns from the systems which really fulfil the condition of being productive are more than sufficient to cover the deficits on the systems which, though classed as Productive, do not attain to the necessary

standard. The aggregate profit to the State to the end of 1890-91 on account of the former, after paying 4 per cent. interest on the capital outlay, amounts to Rx. 10,735,022, whereas the deficit on account of the latter, including the accumulated arrears of simple interest, amounts to Rx. 6,620,520. The net profit therefore amounts to Rx. 4,114,502.

14. From Protective Works the return is as yet but small, 0·79 per cent. in the aggregate; but the policy which dictated these works, and which was the outcome of the report of the Famine Commission in 1880, did not contemplate a productive expenditure. The Swat River Canal in the Punjab is, however, an exception, having yielded a return of 4·25 per cent. during the year under review. Moreover, some of the works of this class are incomplete, and one, the Rushikulya Canal in Madras, is not yet in operation.

15. From Minor Irrigation Works the aggregate net revenue during 1890-91 is equivalent to a return of 7·75 per cent. on a capital outlay of Rx. 2,607,739. The most remunerative of the Minor Works are those in Sind, which yielded a return of 24·97 per cent. One of these works, the Ghar Canal gave a return of 102 per cent. The extreme productiveness of these works in Sind is due to the fact that they are mainly inundation canals, upon which the capital outlay is comparatively small.

The Irrawaddy embankments in Lower Burma, which are classed as agricultural works, are also very remunerative, the net return amounting to Rx. 50,244 on a capital outlay of Rx. 305,892, or 16·42 per cent. These embankments protect the surrounding country from the overflow of the river. The embankment of the Ma-ubin island is one of the best examples, and has saved from flooding a large area of land previously uncultivated. The protected land was eagerly taken up, a reduced assessment being charged for the first three or four years, and it now brings in a large revenue.

16. Taking together all the purely Irrigation Works for which Capital and Revenue accounts are kept, and including the figures relating to old irrigation in Madras, the net revenue is equivalent to a return of 5·69 per cent. on the capital outlay: excluding those figures, the return is 4·84 per cent.

17. The area irrigated by the Major and Minor Works during 1890-91 amounted to 9,275,102 acres, or 14,492 square miles. The following figures show the growth of irrigation and revenue in the case of the works classed as Major during a period of five years:—

Year.		Area irrigated in acres.	Gross Revenue in Rx.
1886-87	...	5,292,733	1,813,185
1887-88	...	5,806,043	1,852,298
1888-89	...	6,583,548	2,045,825
1889-90	...	7,047,553	2,137,441
1890-91	...	7,172,468	2,312,787

18. The estimated value of the crops grown under the Major and Minor Works in 1890-91, excluding those in Sind, for which figures are not available, was Rx. 24,554,110, from an area of 7,984,275 acres, giving a value of about Rx. 3·per acre. The estimated value of the produce for one year is thus nearly equal to the whole of the direct capital outlay incurred on the works.

The incidence of assessment in the case of the Major Works is given in paragraph 25 of the Accountant General's note for the different provinces. It averages Rx. 0·31 per acre.

For the Minor Works the incidence of assessment is given in paragraph 37, but the figures require explanation. In the case of Bengal, the rate of revenue per acre works out to Rx. 0·98; but the figures relate to one work only, the Sarun Canal, which is not primarily an irrigation work at all. The water from this canal is used principally for indigo manufacture, a special rate of Rs. 2 per maund being charged. The acreage figures for Rajputana include also much land which is not irrigated directly from the tanks, but from wells in the vicinity which are benefited by percolation from the tanks.

19. The principal crops irrigated in 1890-91 are shown in the following statement:—

Provinces.	Rice.	Wheat.	Jowar (Sorghum vulgare).	Bajra (Panicillaria spicata).	Sugarcane.	Cotton.	Barley.	Indigo.
	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.
Bombay (including Sind)	640,070	192,919	412,632	412,169	6,769	86,468	...	...
Punjab	199,901	1,011,127	160,232	102,891	77,207	273,300	...	...
Bengal	469,311	14,951	...	...	18,190	...	9,314	...
Madras	2,470,341	...	...	51,032	...	...	...	...
North-Western Provinces	167,868	736,297	...	...	198,577	69,887	107,352	224,663
TOTAL	3,947,491	1,955,294	572,864	566,092	300,743	429,655	116,666	224,663

20. The following figures exhibit for the different provinces the percentage on the gross revenue of the cost of the revenue management (which includes collection charges), and of the ordinary up-keep of the Major Works :—

Province.	Revenue management—per cent.	Up-keep per cent.	Total per cent.
Madras	10·3	12·3	22·6
Punjab	13·0	22·0	35·0
Bombay	11·5	24·2	35·7
North-Western Provinces ...	14·3	25·0	39·3
Bengal	33·2	67·1	100·3

The following figures show the total cost of working per acre irrigated in the case of the Major Works :—

	Rx.
Madras	0·08
Bombay	0·08
Punjab	0·11
North-Western Provinces	0·14
Bengal	0·25

Madras occupies the first position in both cases, but the economy in working is partly due to the fact that in Madras the water is not distributed with the same minuteness and precision as in Northern India. The minor distribution is left largely in the hands of the cultivators instead of being at the charge of the officers of the Public Works Department.

21. The figures in the preceding paragraphs relate only to irrigation works for which Capital and Revenue accounts are kept; but it has been explained in paragraph 5 that there is a large class of works for which only Revenue accounts, or neither Capital nor Revenue accounts are kept, and that in the case of these works the share of the land revenue due to irrigation is not separated in the Finance and Revenue accounts, and they therefore get credit only for the direct receipts realised in the Public Works Department. The correct figures for these works not being available, there is no alternative but to exclude them from a general statement of the irrigation operations in India.

It has been said, however, that collectively these works are of very great importance, and in support of this it will suffice to mention that the Muzaffargarh Canals in the Punjab, for which only Revenue accounts are kept, irrigated in 1890-91 no less than 292,878 acres, yielding an irrigation revenue of Rx. 25,766; and that in Sind similar works irrigated 824,844 acres with a gross revenue of Rx. 203,315. In Madras the works for which neither Capital nor Revenue accounts are kept irrigated during 1890-91 an area of first crop of 2,061,891 acres, and of second crop of 684,518 acres, yielding an estimated irrigation revenue of Rx. 635,325. The direct revenue outlay on these works in Madras, including collection charges, amounted to Rx. 159,376, in addition to which there was an outlay of Rx. 66,904 on the Tank Restoration scheme, which has for its object the systematic repair of all the old tanks and channels.

22. The figures for all these works for which Capital accounts are not kept, so far as they are given in the Finance and Revenue accounts, are entered in the statement in paragraph 39 of the Accountant General's note. These figures include agricultural works.

23. The following statement gives some details regarding the hydraulic duty obtained on the principal canals in each province. The figures are taken from Statement I. E. in the Irrigation Revenue Reports.

Provinces.	CANALS.	Length of main canal (miles).	Maximum discharge at head of canals (cubic feet per second).	AVERAGE DISCHARGE AT HEAD OF CANALS (CUBIC FEET PER SECOND). Kharif.	Rabi.	AREA IRRIGATED (ACRES). Kharif.	Rabi.	Total.	Flow.	Lift.	AREA IRRIGATED PER CUBIC FOOT PER SECOND OF AVERAGE DISCHARGE AT HEAD (ACRES). Kharif.	Rabi.

N.B.—The figures in brackets in columns 12 and 13 denote the number of days on which the irrigating duty is calculated.

The results brought out exhibit wide divergences, which may be attributed in part to the canal discharges not being very accurately observed in some cases.

24. Reference has been made so far only to Irrigation Works, or to those in which navigation is combined with irrigation. The Navigation Works proper will now be briefly referred to.

The following statement gives for these works the same particulars as were given in paragraph 11 for the Irrigation Works:

Class of Works.	Number of works.	Direct Capital outlay to end of 1890-91.	Gross revenue.	Working expenses.	Net revenue.	Percentage of net revenue on Capital outlay.
		Rx.	*Rx.*	*Rx.*	*Rx.*	
NAVIGATION.						
I.—Major Works—						
(*a*) Productive ...	1	199,779	2,804	5,197	—2,393	...
II.—Minor Works ...	7	1,687,254	68,060	50,194	17,866	1·06
TOTAL ...	8	1,887,033	70,864	55,391	15,473	0·82

These Navigation Works are not directly remunerative, but they must have largely benefited the parts of the country which they serve. In the case of one only, the Calcutta and Eastern Canals, do the revenue receipts exceed the working expenses. The largest capital outlay has been incurred on the Buckingham Canal in Madras, which was undertaken primarily as a protective work after the famine of 1877-78 in order to connect the Godavari and Kistna Deltas with the southern districts of the province. It is now being completed from Provincial Funds. The capital outlay on it to the end of 1890-91 amounted to Rx. 723,717, and there was a deficit of Rx. 2,577 in the Revenue account. The other navigation works are also Provincial, except the Hidgellee Tidal Canal in Bengal, in which case the funds for its completion are advanced by the Supreme Government on a Provincial guarantee of 4 per cent.

25. The following figures furnish some particulars of the navigation operations on all the canals, including those on which navigation is combined with irrigation:

PROVINCES.	Length of canal open for navigation.	Ton mileage.	Estimated value of cargoes.	Estimated value of rafts.	Number of passengers carried.
1	2	3	4	5	6
	Miles.	*Millions.*	*Thousands of Rx.*	*Thousands of Rx.*	
Punjab	432	2·481	140	126	6,448
Bengal	641	51·941	9,611	66	505,396
Madras	1,232	44·166	6,561	130	519,928
North-Western Provinces	535	7·665	228	20	487
TOTAL ...	1,840	106·253	16,540	342	1,032,259

26. The following statement gives details regarding important irrigation projects that have already been submitted to the Government of India, but upon which work has not been begun:

Name of project.	Amount of estimate (direct outlay).	Ultimate area to be irrigated.	Ultimate estimated revenue after completion.	Percentage of net revenue on direct Capital outlay.
Sanctioned projects.	*Rx.*	*Acres.*	*Rx.*	
Jhelum Canal	1,202,407	423,360	98,794	8·21
Kalingaroyen Channel	82,500	23,000	5,500	6·67
Chenab Canal extension	1,512,891	700,000	273,366	18·07
Project under preparation.				
Lower Ganges Canal—Cawnpore Branch extension	327,000	144,900	38,000	11·62
TOTAL ..	3,124,798	1,291,260	415,660	13·30

All these projects come under the head of Major Works, (*a*) Productive. The Chenab Canal extension project has just been sanctioned by Her Majesty's Secretary of State, and will take precedence of the Jhelum Canal, also in the Punjab, which had been sanctioned in 1888, funds for both projects not being available out of the annual allotment for irrigation.

The Kalingaroyen channel in Madras has also been sanctioned, but the commencement of work on it has been deferred for the same reason.

The Lower Ganges Canal extension project has been submitted to the Government of India by the North-Western Provinces Government, but has been returned for revision.

27. In addition to the above, a large and profitable outlay is contemplated on works in Upper Burma, where scientific irrigation is still in its infancy. The Government of India is also awaiting the receipt of proposals from the Bombay Government for the improvement and extension of irrigation in Sind, upon which subject a Committee assembled in the early part of the current year.

ORDER.—Ordered, that the foregoing, with a copy of the note by the Officiating Accountant General, Public Works Department, be forwarded to the Local Governments and Administrations in the Public Works Department noted on the margin for information.

The Governments of Madras, Bombay, Bengal, the North-Western Provinces and Oudh, and the Punjab.
The Chief Commissioners of the Central Provinces, Burma, Assam, and Coorg.
The Resident at Hyderabad.
The Agents to the Governor General for Central India, Rajputana, and Baluchistan.
The Accountant General, Public Works Department.

Ordered also, that a copy of the Review and note be forwarded to the Revenue and Agricultural and Finance Departments, and that the papers be published in the Supplement to the *Gazette of India*.

Ordered further, that a copy of the Review and note be forwarded to Her Majesty's Secretary of State for India for information.

J. G. FORBES, *Colonel, R.E.*,
Secretary to the Government of India.

Document accompanying.

Note by the Officiating Accountant General, Public Works Department, dated 30th April 1892.

Accompaniment to Public Works Department No. 177 I. of 1892.

Note by R. G. Macdonald, Esq., Officiating Accountant General, Public Works Department, upon the accounts of Revenue and Expenditure of Irrigation Works in India for 1890-91.

The figures in the accounts submitted herewith are based on the Finance and Revenue accounts of the Government of India, and those in this note upon the Administrative accounts of the Public Works Department, Irrigation Branch, the Revenue reports of Irrigation Works, and the annual statement of the financial results of irrigation operations in India prepared for submission to the Secretary of State for India.

2. The irrigation works in India are divided into two main classes, *viz.*, Major Works and Minor Works.

Major Works are subdivided into—

(*a*) Productive Works, the capital of which has been provided from borrowed money; and

(*b*) Protective Works, the capital of which has been provided out of the general revenues of India.

Minor Works are subdivided into—

(*a*) Works for which Capital and Revenue accounts are kept; and

(*b*) Works for which Capital accounts are not kept.

3. Capital and Revenue accounts are kept for all Major Irrigation Works. There are 44 projects falling under this category—*vide* statement given in paragraph 11 below.

Of these, 36 were sanctioned as works expected to be remunerative, *i.e.*, to pay the cost of up-keep and interest on the Capital outlay. They were or are being constructed from funds provided outside the general revenues. The remaining eight projects * were sanctioned as works of protection against famine, and the cost of their construction has been or is being paid for out of the annual grants for Famine Insurance.

* *North-Western Provinces and Oudh*—
1. Betwa Canal.
Punjab—
2. Swat River Canal.
Madras—
3. Rushikulya Project.
Bombay-Deccan and Gujarat—
4. Nira Canal.
5. Mhaswad Tank.
6. Chankapur Tank.
7. Maladevi Tank.
8. † Gokak Canal, 1st section.

† Now classed as a minor work and combined with Gokak Storage Works.

4. The works classed as Minor Irrigation Works are numerous. Capital and Revenue accounts are kept for 76 projects falling under this category; for the others one account only of receipts and charges for each work or group of works is kept.

5. The general results of works for which Capital and Revenue accounts are kept are as follows:

	Major Works. *Rx.*	Minor Works. *Rx.*	Total. *Rx.*
Capital outlay—			
During 1890-91 ...	578,876	69,865	648,741
To end of 1890-91 ...	27,325,317	4,294,993	31,620,310
Revenue Account, 1890-91—			
Gross Revenue ...	2,025,891	493,123	2,519,014
Maintenance and working...	790,583	273,113	1,063,696
Net Revenue	1,235,308	220,010	1,455,318
Interest	1,081,435		
Net profit ...	153,873		
Percentage of net Revenue of the year on the Capital outlay to end of the year ...	4·52	5·12	4·60

6. The above results show that during 1890-91 the Minor Irrigation Works for which Capital and Revenue accounts are kept proved to be more remunerative than Major Works.

This is principally due to the fact that the Capital outlay on Major Works includes outlay on projects which are now under construction, and which are not yet earning revenue. Some projects also which have been recently opened for irrigation are not yet earning the full amount of revenue expected from them owing to the distributaries and minor channels not having been completed.

Of the 44 Major Works rather more than half were in an unfinished state at the end of 1890-91, whereas most of the Minor Works (except in Bombay) were completed and were earning the full revenue expected of them.

7. The receipts and charges of the year 1890-91 on Revenue account, exclusive of outlay on construction of Minor Works (classed in Financial accounts as expenditure against Revenue), are detailed in the following statement by funds and provinces.

1890-91.

8. From the above table it will be seen that after paying interest on borrowed money expended in the construction of Major Irrigation Works, the h ghest net profits are obtained from Madras. Next follow the Punjab, the North-Western Provinces and Oudh, and Bombay. The loss on Major Irrigation Works in Bengal is explained in paragraph 18 below.

9. The most prominent feature in the above table, in addition to the financial results in each province, is the extent to which in the several provinces the Irrigation Works have been provincialized.

In Bengal the whole of the Major and Minor Works are Provincial. In Lower Burma there are no Major Works, but all Minor Works are Provincial. In the North-Western Provinces and Oudh all works are Provincial, except the Betwa Canal, which is a protective irrigation work.

In the Punjab, Rajputana, and Baluchistan all works remain Imperial, as is the case also in Bombay, with the exception of one project, the Gokak Canal, 1st section, and Storage Works, which is Provincial.

In Madras the Minor Works are Provincial, but the Major Works still remain Imperial.

10. One result of provincializing the Minor Works in Madras, which was done with effect from the commencement of 1887-88, is that whereas in 1886-87, when the major portion of the grants had to be obtained from the Government of India, the amount available for this service was Rx. 299,380,* in 1890-91 the Provincial grant was Rx. 366,000 and the outlay Rx. 354,634.

	Rx.
* Imperial	252,830
Provincial	46,550
	299,380

Bombay and the Punjab are the only great provinces which have still come practically to no arrangement for the acceptance of provincial responsibility for their irrigation works.

Major Works.

11. The following statement shows in detail the financial results of individual Major Irrigation Works during and to the end of 1890-91.

(b) This is now classed as a minor work and combined with Gokak Storage Works.

NOTE. The figures of "Gross Revenue" and "Maintenance and Working" differ from those in the Finance and Revenue accounts of the Government of India in the following respects :—

(1) In this statement, cash refunds of revenue are treated as reductions of revenue, whereas in the Finance and Revenue accounts they are added to working expenses ; and

(2) In this statement, the collection charges in the Civil Departments in Madras and Bombay are added to maintenance and working, whereas in the Finance and Revenue accounts they are deducted from the gross revenue.

12. It will be observed from the foregoing statement that taken collectively the Major Works fulfil the required conditions of productive public works, *i.e.*, they pay more than the interest on their Capital outlay, notwithstanding that, as stated above, rather more than half of these works were still incomplete at the end of 1890-91, and therefore were not earning the amount of revenue expected from them.

13. Taken collectively by provinces, the percentages of net revenue on the Capital outlay of Major Works is as follows for 1890-91 :

1.	Bombay—Sind	7·51
2.	Madras	7·01
3.	Punjab	6·34
4.	North-Western Provinces and Oudh	5·38
5.	Bombay-Deccan and Gujarat	1·11
6.	Bengal	*Nil.*
	TOTAL ...	4·52

14. The systems which in 1890-91 paid over 4 per cent. are arranged below in the order of the rate paid :

1.	Cauvery Delta System	40·29
2.	Eastern Jumna Canal	24·09
3.	Godavari Delta System	14·84
4.	Kistna Delta System	14·38
5.	Sidhnai Canal	11·74
6.	Western Jumna Canal	10·03
7.	Desert Canal	9·81
8.	Begari Canal	9·67
9.	Unharwah Canal	9·05
10.	Bari Doab Canal	8·67
11.	Ganges Canal	7·82
12.	Penner Anicut System	6·61
13.	Eastern Nara Works	6·18
14.	Sirhind Canal	4·96
15.	Agra Canal	4·50
16.	Swat River Canal	4·25

The Swat River Canal was sanctioned as a protective irrigation work, and it is satisfactory to find that it is paying more than 4 per cent. on its Capital outlay.

15. The systems that have up to the end of 1890-91 paid off the accumulative interest on their capital cost are arranged in the following order :

		Surplus. Rx.
1.	Western Jumna Canal	3,121,533
2.	Godavari Delta System	2,528,123
3.	Cauvery Delta System	1,763,842
4.	Eastern Jumna Canal	1,490,570
5.	Kistna Delta System	1,193,557
6.	Bari Doab Canal	250,147
7.	Begari Canal	139,790
8.	Desert Canal	89,038
9.	Penner Anicut System	80,246
10.	Ganges Canal	38,173
11.	Sidhnai Canal	27,133
12.	Unharwah Canal.	11,558
13.	Srivaikuntham Anicut	1,312
	This represents to end of 1890-91 a net profit to the State on these systems of	10,735,022
	The charge to the State on other Major Works is ...	7,221,949
	Leaving a net profit to date on all Major Works of ...	3,513,073

16. Excluding canals in Bengal and in the Deccan and Gujarat, the Betwa Canal in the North-Western Provinces and Oudh, the Karnul Canal in Madras, all of which are unremunerative, and excluding also all works which have not yet been completed, or which have not yet commenced to yield revenue, the following statement shows to the end of each year for the last six years the net charge to the State on projects which eventually are expected to pay off the accumulated interest on their Capital cost :

	Date of completion.	1885-86.	1886-87.	1887-88.	1888-89.	1889-90.	1890-91.

17. The above shows that during the year 1890-91 the Agra, Sirhind, and Swat River Canals commenced to wipe off their debts, and that in the case of the Eastern Nara Works in Sind, the debt has been steadily decreasing since 1886-87, although these works are not yet entirely complete.

The increasing loss to the State on the Lower Ganges Canal is due to the destruction of the original Kalinadi aqueduct in 1884, and to the heavy expenditure incurred on the construction of a new aqueduct at Nadrai, now completed. It is therefore anticipated that the loss will gradually disappear.

The other works mentioned in above statement are not of great importance.

18. It is very doubtful whether the canals in Bengal will ever become remunerative. The non-productiveness of the Sone Canals is mainly due to the permanent settlement, owing to which the land revenue cannot be influenced by irrigation. They must be looked on as a protection against occasional drought and famine rather than a possible source of profit to Government. Taken collectively, the gross revenue of all the Major Works in Bengal during 1890-91 did not quite cover their maintenance and working.

The Orissa project, which consists of the Orissa, Midnapore, and Tidal Canals, was commenced by the East Indian Irrigation and Canal Company in November 1863, and by the end of 1865 water became available for irrigation. It was purchased by the Government of India in November 1868.

19. In Bombay (Deccan and Gujarat) almost all the works constructed out of funds "not charged to Revenue" (previously called Productive Public Works) were allowed to be commenced from borrowed money before the introduction of the rules laying down conditions which must be fulfilled before a work may be admitted to this category. As some of these works cannot pay the interest on the Capital outlay, and in some cases not even their up-keep and working expenses, the present Capital outlay upon them is being met from ordinary revenues.

The Karnul Canal in Madras was constructed under a five per cent. guarantee of interest by the Madras Irrigation and Canal Company; and as in the Company's hands it failed to pay even its maintenance and working expenses, it was purchased by the Government of India in 1882. It does not promise to be ever a financial success, as the Capital outlay has been so heavy.

21. The sources of revenue from Major Works during 1890-91 are exhibited in the following statement in comparison with those of the previous four years:

		Irrigation Revenue.												Totals of previous four years.			
		Share of enhanced land revenue due to irrigation works.	Water-rates.	Owners' rates on irrigated lands.	Sale of water.	Water-supply of towns.	Plantations.	Other canal produce.	Water-power.	Navigation receipts.	Rents of buildings.	Fines.	Miscellaneous.	Total.	1889-90.	1888-89.	1887-88.	1886-87.

22. The foregoing table shows that taken collectively the revenue from all Major Irrigation Works is steadily on the increase year by year. The province showing the largest increase is the Punjab, where the revenue has increased from Rx. 319,298 in 1886-87 to Rx. 583,045 in 1890-91.

In Bengal there was a falling-off in 1887-88 due to an agitation against the irrigation system of the Sone Canals. This led to the appointment of a Commission to enquire into the complaints, in consequence of which the rate-payers withheld payment of demands in the hope of obtaining remissions. In 1890-91 there was also a falling-off of revenue due to seasonable and abundant rainfall, which reduced the necessity for canal irrigation.

This also was the cause of the decrease in revenue in the North-Western Provinces and Oudh during 1887-88.

The decrease in revenue in Bombay during 1890-91 occurred chiefly on the Eastern Nara Works, and is attributed to a large area having been left fallow owing to over-cultivation in the previous year.

23. In Madras the water-rates are separately assessed in most cases, but are treated in the accounts as a portion of the land revenue due to irrigation works, except in the case of the Karnul Canal, where the water-rate is collected separately. In the North-Western Provinces and Oudh and in the Punjab there is an additional rate called "Owner's rate." This is imposed on owners of canal irrigated lands in respect of the benefit which they derive from such irrigation.

24. The annual increase in revenue derived from Major Works is due partly to the development of irrigation on canals that have been completed, and partly to the opening of additional lengths of canals. This is shown in the following statement, which exhibits for each Major Work during the last five years the gross revenue, the irrigated area, and the mileage of canals completed at the end of each year.

Major Works.	Gross Revenue in Rx.					Irrigated Area in Acres.					Mileage in Operation (including Distributaries).

25. The rates charged per irrigated acre vary considerably in different provinces, as will be seen from Appendix A of this note.

In the following table, which gives the rate per acre irrigated during 1890-91, the Irrigation revenue is the share of enhanced land revenue due to Irrigation, *plus* water-rates and owners' rates :

Provinces.	Irrigation revenue (assessed.)	Irrigated acreage.	Rate of revenue per acre.
	Rx.	*Acres.*	*Rx.*
North-Western Provinces and Oudh ...	652,499	1,887,777	·35
Madras	800,622	2,346,732	·34
Punjab	574,905	1,826,106	·31
Bombay	(*a*) 127,277	568,538	·22
Bengal	98,520	543,315	·18
TOTAL ...	2,253,823	7,172,468	·31

(*a*) Represents actual collections. The figures of assessment are not yet available.

26. The charges for maintenance and working for the year 1890-91 are detailed in the following statement and compared with the outlay of the previous four years. There is a very considerable sum charged to Revenue in connection with extensions and improvements, a portion of which would be charged to Capital in the case of Railways. This amount was Rx. 61,926 in 1890-91.

It will be observed that in Bengal the charges for maintenance and working have been on the decrease during the last four years, while in other provinces there has been a steady annual increase, due naturally to extended operations.

	Extensions and improvements.	Maintenance and repairs.	Establishment.	Tools and plant.	Profit and loss.	Suspense.	Total.	Totals of previous four years. 1889-90.	1888-89.	1887-88.	1886-87.

27. Combining the figures given in the foregoing statement with those of irrigated acreage given in paragraph 24, the cost of maintenance and working per irrigated acre in the different provinces during the past five years and the percentages of maintenance and working on gross revenue are as follows:

Cost of maintenance and working per irrigated acre.

Provinces.	1886-87.	1887-88.	1888-89.	1889-90.	1890-91.	Remarks.
	Rx.	*Rx.*	*Rx.*	*Rx.*	*Rx.*	
1. Madras	·07	·08	·07	·07	·08	
2. Bombay	·09	·08	·07	·07	·08	
3. Punjab	·13	·12	·11	·11	·11	
4. North-Western Provinces and Oudh ...	·17	·16	·17	·14	·14	
5. Bengal	·32	·30	·24	·24	·25	Excluding maintenance of Tidal Canal.

Percentages of maintenance and working on gross revenue.

1. Madras	21·9	21·9	21·3	20·9	22·6
2. Bombay	41·1	39·4	33·2	34·5	35·7
3. Punjab	42·0	40·0	42·5	39·9	35·0
4. North-Western Provinces and Oudh ...	40·2	44·2	45·3	44·2	39·3
5. Bengal	96·1	136·8	101·7	89·0	100·3

28. The above tables show that Madras stands well to the fore in economy of working. Then follow Bombay, Punjab, North-Western Provinces and Oudh, and lastly Bengal, where the maintenance charges are far higher than in the other provinces.

It should, however, be noted that the rates shown against Madras are calculated on total receipts and charges, *i.e.*, inclusive of those on account of old irrigation works. But as the revenue due to these works is treated in the Finance and Revenue accounts of the Government of India as land revenue, and is not credited to the Irrigation Branch of the Public Works Department, no charges are made on account of its collection by the Civil Department. If an addition is made to the cost of maintenance and working on account of the collection of old revenue, the rates shown against Madras will be somewhat increased.

29. The percentages of the cost of Revenue management on the revenue collected in the different provinces during the five years ending 1890-91 were as follows:

Provinces.	1886-87.	1887-88.	1888-89.	1889-90.	1890-91.	Remarks.
	Rx.	*Rx.*	*Rx.*	*Rx.*	*Rx.*	
1. Madras	10·2	10·3	10·4	10·3	10·3

3. North-Western Provinces and Oudh.	13·7	14·7	13·6	13·5	14·3	
4. Punjab	13·9	13·7	15·0	15·1	13·0	
5. Bengal	24·4	38·2	30·7	28·5	33·2	

MINOR WORKS.

Works for which Capital and Revenue accounts are kept.

30. The works of this class are generally of less magnitude than those classified as Major Works. They are also of a more varied character, comprising perennial canals, inundation canals, navigation canals, reservoirs or tanks, large and small embankments, &c. Some of these works were originated by native rulers, and were taken up and improved by the British Government, *e.g.*, the inundation canals of the Punjab and Sind and the tanks in Rajputana. The highly remunerative results of such works are partly due to the fact that their Capital accounts do not take cognisance of the value of the works when they were first acquired by the British Government. On the other hand, these works have been extended and improved by the British Government, and in some cases lines of embankment in connection with inundation canals are maintained at the expense of the canals.

31. The following statement shows in detail the financial results of Minor Works for which Capital and Revenue accounts are kept during and up to the end of the year 1890-91:

Number of works.	Minor Works.	Capital outlay to end of 1890-91.	Revenue Account for 1890-91.				Revenue Account to end of 1890-91.		
			Gross revenue.	Working expenses.	Net revenue.	Percentage of net revenue on Capital outlay.	Gross revenue.	Working expenses.	Net revenue.

(a) Includes Rx. 2,287, outlay from contributions.

(b) ,, ,, 1,006 ,, ,, ,,

(c) ,, ,, 1,913 ,, ,, ,,

(d) No information is available. The figures given in the Administrative accounts include maintenance charges of old works, of which there is no record of the capital outlay. The revenue derived from these works is not credited to the canals, but are treated in the Finance and Revenue accounts of the Empire as land revenue.

32. It will be observed from the above that taken collectively the best paying systems are the inundation canals in Sind, which returned during 1890-91 a profit of 24·97 per cent. of net revenue on the booked capital outlay. The Irrawaddy embankments in Lower Burma yielded a revenue of 16·42 per cent. on their capital cost. Of these works, the net revenue up to date is more than double the capital expended on them. Next come the inundation canals of the Punjab, which show similarly a percentage of 14·46. One system alone, *viz.*, the Lower Sutlej, returned a profit during 1890-91 of no less than 193·13 per cent.

The Calcutta and Eastern Canals in Bengal, a system of navigation channels, partly natural and partly artificial, were worked at a profit of 4·11 per cent. during 1890-91. The net revenue earned by these canals to the end of 1890-91 is more than $2\frac{1}{2}$ times the amount of the capital outlay upon them.

The tanks in Rajputana pay collectively 4·15 per cent., and their net revenue up to date amounts to 65 per cent. of their capital outlay.

The works in Baluchistan have barely had time to yield any net revenue. They have only recently been completed.

The canals and other irrigation works in the North-Western Provinces and Oudh show a profit of 4 per cent. during 1890-91, and have to the end of that year realized a net revenue of more than 75 per cent. of their capital cost.

In the Deccan and Gujarat the numerous small works are unremunerative. They barely pay their working expenses, and there is very little hope of marked improvement.

The largest work in this class is the Buckingham Canal in Madras, a navigation channel started as a famine relief work in 1876. During 1890-91 there was a loss of Rx. 2,577 in working this canal, but when quite completed it is expected to earn rather more than its working expenses, which is but a poor financial result.

33. The sources of revenue derived from Minor Works for which Capital and Revenue accounts are kept during 1890-91 are detailed in the following statement, and compared with the revenue of the previous four years:

Minor Works.	Irrigation Revenue.											Totals of previous four years.			
	Share of enhanced land revenue due to Irrigation Works.	Water-rates.	Owners' rates.	Sale of water.	Water-supply of towns.	Plantations.	Other canal produce.	Water-power.	Navigation receipts.	Rents of buildings.	Fines.	Miscellaneous.	Total.	1889-90.	1888-89.	1887-88.	1886-87.

Total for 1890-91 ...	343,786	37,833	1,317	249	1,101	—507	3,613	2,279	67,050	369	335	35,698	493,123	426,199	432,409	402,018	375,355
1889-90 ...	288,953	32,223	1,180	216	1,154	2,422	4,173	2,685	62,841	454	220	29,678	426,195				
1888-89 ...	286,923	29,647	1,204	328	1,170	1,492	5,336	2,241	70,632	498	381	32,557	432,469				
1887-86 ...	261,032	26,776	1,065	164	966	1,656	3,222	2,476	69,472	432	447	34,310	403,018				
1886-87 ...	247,474	25,580	1,156	151	1,225	935	3,953	3,352	56,430	464	456	34,879	375,355				

34. It will be seen from the above that there has been on the whole a steady annual increase in the revenue derived from Minor Works during the last five years, and this is specially noticeable in Bombay, where the revenue has increased from Rx. 96,151 in 1886-87 to Rx. 144,195 in 1890-91. In some provinces the revenue remains comparatively stationary; in others there are considerable fluctuations.

About three-fourths of the revenue is due to "Share of enhanced land revenue," and it may be here noted that in the case of Minor Works this source of revenue is not credited to Irrigation in the Finance and Revenue accounts of the Empire, but is included under the general head of Land Revenue. For administrative purposes, however, the share of enhanced land revenue due to Irrigation, the particulars of which are communicated by the Revenue authorities of each province, is taken to account.

35. The working expenses of the year 1890-91 and of the previous four years are shown in the following statement:

Minor Works.		Extensions and improvements.	Maintenance and repairs.	Establishment.	Totals of previous four years.				Total.	Suspense.	Profit and loss.	Tools and plant.
					1889-90.	1888-89.	1887-88.	1886-87.				
		Rx.	Rx.	Rx.	Rx.	Rx.	Rx.	Rx.	Rx.	Rx.	Rx.	Rx.

1888-89	...	19,837	131,238	77,830	...	...	...	...	234,651	102	2	5,642
1887-88	...	21,697	126,126	76,147	...	...	...	...	227,705	—6	23	3,718
1886-87	...	19,166	111,899	65,579	...	...	...	...	198,802	—38	79	2,117

Here also there is a large outlay on extensions and improvements charged upon Revenue, a part of which in the case of railways would have been charged to Capital.

36. The annual increase in the outlay on maintenance and working of all works in this class taken collectively is closely commensurate with the annual increase in the revenue derived from these works. This is shown in the following table, which gives the percentages of expenditure on revenue in each province during the past five years. The percentages vary considerably in different provinces, but on the total the percentage of expenditure on revenue remains year by year almost stationary:

Provinces.	1886-87.		1887-88.		1888-89.		1889-90.		1890-91.

* Due to a transfer of old outlay from Revenue to Capital.

37. The rates per irrigated acre in the different provinces during the year 1890-91 were as follows :

	Irrigation revenue (assessed.)	Irrigated acreage.	Rate of revenue per acre.
	Rx.	*Acres.*	*Rx.*
Bengal	2,185	2,226	·98
Baluchistan	1,621	2,657	·61
Rajputana	11,523	28,517	·40
Madras	121,450	421,043	·29
North-Western Provinces and Oudh ...	22,803	126,337	·18
Bombay	(*a*) 144,195	798,180	·18
Punjab	67,449	723,674	·09
TOTAL ...	371,226	2,102,634	·18
Lower Burma	67,392	...	...
TOTAL ...	438,618	...	...

(*a*) Represents actual collections. The figures of assessments are not yet available.

No acreage is quoted against Lower Burma, as the works concerned are only river embankments.

In Baluchistan the revenue is collected in kind on the so-called "*batai*" system, and is assessed at $\frac{1}{4}$ of the produce, except in the case of the Shadezai people, who pay only an eighth share.

Under present arrangements a very large amount of irrigation revenue in the Punjab is treated in the accounts as miscellaneous revenue under the heads "Statute labour" and "Clearance rate." The amount for 1890-91 is Rx. 34,037. If this sum were added to the irrigation revenue in the above statement, the rate per irrigated acre would be raised from ·09 to ·14.

Works for which Capital accounts are not kept.

38. The works classed under this head, although generally of small importance in themselves, are of considerable value to the country both from an agricultural and financial point of view. They mostly existed in one shape or other before they were taken up by the British Government. Consequently the original cost of the major portion of them is not known, and Capital accounts are not kept for them.

The irrigation revenue due to these works is collected with the land revenue, and is credited to that head in the Finance and Revenue accounts of the Empire.

There is, however, certain miscellaneous revenue derived from these works, which is collected partly by the Revenue Department and partly by the Public Works Department, and which is credited in the Public Works accounts.

Of the total amount thus realized in 1890-91, *viz.*, Rx. 58,134, the collections in the Revenue Department amounted to Rx. 21,186 and in the Public Works Department to Rx. 36,948.

39. The receipts and expenditure on account of these works during 1890-91, as recorded in the Finance and Revenue accounts, are shown in the following statement in comparison with the transactions of the previous four years :

Works for which Capital accounts are not kept.

40. The share of enhanced land revenue due to irrigation by the Muzaffargarh Canals in the Punjab amounts to Rx. 25,766; but as information regarding this source of revenue is not obtainable in connection with other works under this head, it has not been included in the above statement.

41. Under this head appears at present the only irrigation works in Upper Burma. No Imperial Revenue has hitherto been credited to Government in the accounts of the Public Works Department. Whatever revenue may be due to irrigation from old Burmese works has since the annexation of Upper Burma been credited to "Land Revenue" in the accounts of the Civil Department.

SIMLA;
The 30th April 1892.

R. G. MACDONALD,
Officiating Accountant General,
Public Works Department.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

RAILWAY STATISTICS.

(*a*) Includes the Bhopal-Itársi State Railway.
(*b*) Includes the Tirhoot State Railway. Although for convenience classed amongst the State Railways, the Company's section of this line is the property of the Bengal and North-Western Railway Company.
(*c*) Includes the Jammu and Kashmir Railway.
(*d*) Although for convenience classed amongst the State Railways, this line is the property of the Bengal Central Railway Company.
(*e*) Includes the Mu Valley State Railway.
(*f*) Includes the Wardha Coal, Dhond-Manmád, Khámgaon, and Amráoti State Railways.
(*g*) Includes the Bezváda Extension.
(*h*) Total receipts from 21st April to 18th July 1891.

SIMLA, *the 28th July, 1892.*

F. B. HEBBERT, *M.I.C.E.,*
Under-Secretary.

Printed and published for the GOVERNMENT OF INDIA *at the* GOVERNMENT CENTRAL PRINTING OFFICE, *Simla.*

SUPPLEMENT TO

The Gazette of India.

No. 32.} CALCUTTA, SATURDAY, AUGUST 6, 1892.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

FINANCE AND COMMERCE DEPARTMENT.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the week ending at 8 a.m. on Saturday, July 30th, 1892.

There has been no important change in the weather during the week under review. The monsoon has blown strongly throughout the greater part of the Indian region and from the normal directions. The distribution of pressure has been regular, and such as is associated with general monsoon weather; but the barometric difference between the north and south has been less than usual on most days. It will be remembered that during the previous week North-Western India even relatively to the average was less under the influence of the monsoon current than other parts of India. This condition was entirely changed during the week under review. The cyclonic storm which had appeared over Bengal last week advanced north-westward during the present week, and reached North-West India by the 25th. From that date till the close of the week it hung about the Western desert, and was accompanied with most exceptional rain over the extreme north-west of India.

The chart of Sunday, July 24th, showed that the depression which had appeared over Bengal at the close of the preceding week had commenced a west-north-westerly advance. The centre at 8 A.M. was close to Sutna, and a well-marked cyclonic circulation of the wind existed around the depression. Northerly winds prevailed in the Punjab, but, except in the Punjab and in the neighbourhood of the depression, the wind directions were fairly normal.

Rain was very general, except over a large part of North-West India and of the centre of the Peninsula, where there was either no rain or only scattered falls. At Pachmarhi 7 inches of rain had fallen, and generally in the Central Provinces and the North-West Provinces the amounts recorded were between 2 inches and 3 inches, but in other parts of India the falls were small or moderate. The chart of the 25th showed that the depression previously noticed had continued to advance west-north-westward, and that the centre was close to Jeypore. Light variable winds were reported from the Punjab, and some other slight changes in the wind direction were introduced by the north-westerly movement of the depression, but on the whole the circulation was little changed. Rain had extended into Rajputana, but the greater part of the Punjab, of Sind, and of the centre of the Peninsula was without rain. Elsewhere rain was general, the fall being moderately heavy in parts of the Central Provinces, of Malabar, and of Burma. By the morning of the 26th the depression had reached the Indus Valley, while at the same time a second and very slight depression had appeared over the head of the Bay. Variable and light breezes prevailed over North-East India and westerly to southerly winds over the Bay and Burma, while a massive south-westerly current blew across the West Coast and into the central parts of the country and the Gangetic plain, where it met with a south-easterly current blowing along the foot of the hills. Rain had been very general, and had been heavy in Rajputana, and rather heavy in parts of Guzerat and of Malabar. On the 27th both depressions were still shown—one over the Indus Valley and Western desert, and the other over the head of the Bay. The barometer was, however, rising everywhere—most in the north—and gradients were slighter. A well-marked cyclonic circulation of the winds prevailed over North-West India, and an irregular cyclonic circulation over the Bay. Elsewhere the directions were fairly normal. Rain had again fallen very generally. The amounts were on the whole moderate, but were heavier than usual in the extreme north-west. On the morning of the 28th the depression noticed over the Bay on the preceding day had advanced over the land, and the barometer was falling over the Central Provinces. There was no other change. Rain was reported from nearly all parts of the country. The amounts were moderate generally, but were heavier than usual in the extreme north-west, and at Multan the fall amounted

to the exceptional amount of 6·87 inches. The chart of the 29th showed that the depression which was crossing the Orissa Coast on the preceding day had reached the North-West Provinces and Bundelkhand, but beyond this movement there had been no important change. The wind directions were somewhat irregular over part of North-Western and Central India, but were from the normal monsoon quarters elsewhere. The rainfall was again exceedingly general, the amounts being exceptionally large in the Indus Valley, fairly large on the West Coast, and moderate elsewhere. On the 30th the chart showed a slight depression over the Western desert, an area of relative depression over the Gangetic plain, and an area of high pressure in the extreme south. Gradients were moderate and the monsoon was about normal, except at the head of the Bay, where the wind force was light. Rain had to a great extent ceased in North-West India, in Madras, and in other parts of India. Though the fall was general, the amounts were light.

Temperature.—Owing to the steady and continuous rainfall the mean temperature has been low, the average diurnal deficiency for the whole of India being 0·8°.

The following table shows the variations of the mean temperature from the normal on each day of the week for the principal Provinces of India:

Province.	24th.	25th.	26th.	27th.	28th.	29th.	30th.	Mean variation of week.
	°	°	°	°	°	°	°	°
Burma	—0·5	—0·7	—1·2	—1·5	—0·2	+0·8	+0·1	—0·5
Bengal and Assam	—1·3	—0·4	—0·5	+0·5	+2·0	+0·7	+0·5	+0·2
North-West Provinces and Oudh.	—1·9	—0·8	—2·2	—2·1	—0·2	+0·6	+2·1	—0·6
Punjab	—3·7	—0·6	+0·1	—5·1	—6·6	—8·0	—3·6	—3·9
Bombay	+1·0	—0·1	0	+0·3	—0·2	—0·8	—0·5	0
Berar and Central Provinces	—1·7	—3·8	+0·1	+1·7	+2·0	+1·4	+1·5	+0·2
Guzerat and Central India	+1·0	—0·7	—2·1	—0·9	+0·1	+0·3	+1·5	—0·1
Sind and Rajputana	+1·6	+0·6	—2·9	—3·6	—2·5	—2·3	—0·3	—1·3
Madras	+0·5	+0·4	+0·4	+1·0	—1·1	—2·1	—1.0	—0·3
Mean for whole India	—0·6	—0·7	—0·9	—1·1	—1·2	—1·0	0	—0·8

On the last two days of the week, when the amount of rainfall began to fall off somewhat, the mean temperature rose above the normal average over North-Eastern and Central India, and the mean temperature of the whole country was normal on the 30th. On all the other days the mean temperature was lower than usual. On the 29th and 30th the maxima recorded in the Punjab were exceptionally low.

Rain.—During the week under review rain has fallen in each one of the Indian rainfall divisions. In the actual distribution the rainfall ranges from 13·11 inches in Malabar, about 9 inches in Coorg, the Konkan, and Tenasserim, and about 7 inches in Assam (Surma) to about ½ an inch in Madras and Khandeish. According to the normal distribution, the rainfall should range from 10 inches in Tenasserim and Arakan and 7 inches in Coorg and the Konkan to about ½ inches in Madras, Sind, and the west of the Punjab. The principal differences between the normal and actual distribution are then the excess in Malabar, Sind, and the Punjab and the deficiency in Arakan. The main body of the monsoon

current appears to have entered the Indian region on the West Coast and passed into the central and north-western parts of the country, while the Bay current was abnormally weak; hence the east of India, including Madras, Bengal, and Arakan, had less rain than usual, while the West Coast, the Central divisions, and the North-West divisions had more. The third column of the table shows that twenty of the rainfall divisions received excessive and twenty-nine deficient rainfall, while one received exactly the normal amount, and in another no comparison is possible. The greatest actual excess was 7·19 inches in Malabar, followed by 4·40 inches in the Punjab (West), while the greatest actual deficiency was 7·20 inches in Arakan. Relatively to the normal the greatest excess was in the Indus Valley, the division of Punjab (West) having received over seven times and Sind nearly six times the normal amount. In the Assam Valley, Bengal, the Gangetic plain, and a large part of Madras the deficiency relatively to the average was considerable.

The three concluding columns of the table show the state of the seasonal rainfall, *i.e.*, the actual and normal rainfall for the two months from May 29th to July 30th. In no less than seventeen divisions the rainfall for that period has been normal, *i.e.*, the variation is less than 10 per cent.; in twenty the rainfall has been excessive, that is, has varied by 10 per cent. or more from the normal; and in thirteen it has been deficient. In the Punjab (West) and in Sind the variation shows a very large excess. The deficiency is nowhere very large, but in Rajputana (West) it amounts to 47 per cent., in Guzerat and Kathiawar to 22 per cent., in the Hill districts of the Punjab to 28 per cent., and in East Bengal to 26 per cent.

The following is a statement of the principal large totals during the week in the different divisions:

Division.	District.	Station.	Amount.
Tenasserim	Amherst	Thatôn	11·19 inches.
Burma	Shwegyin	Kyaikto	11·19 „
Assam	Sylhet	Sudder	14·51 „
Bengal	Tipperah	Agartala	5·10 „
	Darjeeling	Kurseong	8·53 „
Behar	Shahabad	Bhabhua	3·83 „
North-West Provinces	Jaunpur	Mariahu	7·78 „
	Dehra Dun	Kalsi	7·52 „
Punjab	Kangra	Sudder	13·03 „
	Dera Ismail Khan	Bhakkar	14·25 „
Malabar	Calicut	Tellicherry	27·63 „
Mysore	Shimoga	Nagar	34·10 „
Konkan	North Kanara	Honawar	14·56 „
Deccan	Kolhapur	Bawda	23·30 „
Central Provinces	Hoshangabad	Sohagpur	14·81 „
Guzerat	Surat	Pardi	9·16 „
Kathiawar	Cutch	Sudder	4·42 „
Sind	Karachi	Kotri	9·76 „
Central India	Bhopal	Sudder	12·51 „
Rajputana	Ajmir	Harmara	8·59 „
Madras	Vizagapatam	Sudder	7·51 „

SIMLA, *4th August, 1892.*

W. L. DALLAS,
Assistant Meteorological Reporter to the Government of India.

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 30th July.*—Rainfall very heavy on the West Coast; good in the Circars, parts of the Karnatic and Central districts, and in the Tanjore and Bellary districts; light scattered showers elsewhere. The July rainfall, though light for the last three weeks, except on the West Coast and the Circars, is generally in excess of the average, except in the South and in Trichinopoly and Coimbatore, where the fall is always moderate. Rainfall to date is generally sufficient, though more rain is now wanted in the Deccan, Central, South, and parts of Nellore. Agricultural operations are proceeding briskly, and standing crops are generally doing well. Water-supply is sufficient. Pasturage and condition of cattle in affected parts are improving. General prospects are favourable. Prices are nearly stationary; slightly easier in the Central and Karnatic; rather high in the South and Deccan. FAMINE RELIEF: *Numbers on works:*—Deccan 25,489, Karnatic 12,861, and Central 2,959: *Total* 41,309 against 42,789 last week. Increase of 2,586 in Nellore owing to the resumption of works in one taluk temporarily suspended last week. *On gratuitous relief:*—Deccan 420, Karnatic 121, and Central 102: *Total* 643 against 687 last week. Loans for wells disbursed:—Deccan Rs. 8,66,000, Karnatic Rs. 4,42,000, and Central Rs. 12,25,000: *Total* Rs. 25,33,000. Wells completed—611, 2,160, and 1,321: wells under construction—6,598, 2,033, and 7,738 in respective blocks. Agriculturists' loans—Rs. 93,000, Rs. 99,000, and Rs. 68,800: *Total* Rs. 2,60,000 disbursed.

Bombay.—*For week ending 3rd August.*—Rain throughout the Presidency Proper and Sind, except Karachi; good in Sind, Konkan, Gujarat, and Kathiawar; moderate or slight in Deccan and Karnatic. More rain wanted urgently in parts of seven districts. Young crops are thriving, except in parts of three districts. Sowing and transplantation of early crops are progressing. Preparations for late crops in parts of four districts. Fodder is scarce in parts of three and cattle distressed in parts of two districts. FAMINE RELIEF: *Numbers on works:*—Bijapur 53, Belgaum 553, Dharwar 140, and Kolhapur 86: *Total* 832 against 4,143 last week.

Bengal.—*For week ending 2nd August.*—Rainfall this week has been light in most places. The fine weather has benefited the early-rice crop, and the prospects of all crops continue generally satisfactory. More rain is wanted in parts of four divisions to assist transplantation of winter rice, which is being pushed on. Early-rice and jute are being harvested in many districts, and the manufacture of indigo is in progress. Telegraphic reports have been received of floods in Cuttack and Puri. Some damage has been caused in Cuttack to crops and houses, and several breaches in canal

embankments and roads have occurred. Full details not yet to hand. No further information received about the distress reported last week. Prices continue generally stationary, with a slight tendency to fall in some districts. Fodder and water supplies are plentiful and cattle are in good condition. FAMINE RELIEF: *Numbers on works*:—Bhagalpur 2,147. *On gratuitous relief*:—Monghyr 229 and Bhagalpur 948: *Total* 1,177 against 1,384 last week. Numbers relieved in Bhagalpur diminishing. In Darbhanga all works closed and gratuitous relief stopped.

North-Western Provinces and Oudh.—*For week ending 3rd August.*—The continued moderate rainfall has greatly benefited the crops, and prospects are everywhere favourable. In Almora the early crops are coming into ear, and in Garhwal one of the smaller millets is expected to ripen in a fortnight. Sowings are practically finished. Weeding and transplanting of rice are in progress. Supplies are ample and prices fairly steady.

Punjab.—*For week ending 3rd August.*—Good rain has fallen in all but three districts as well as in the Simla Hill States, but more rain is still wanted at Umballa for rice sowings. All canals are flowing well. Sowings of autumn crops are in progress in most districts, and have been completed in some. Prospects of crops are much improved by the recent rain. Condition of sugarcane and cotton is good. In the Hill States of Simla people continue distressed, and will be so till the maize crop ripens. Many States have supplied grain or cash to their subjects, while some have suspended the collection of revenue. Heavy rains have damaged the crops throughout the Dera Ismail Khan district, and the embankments there have been washed away. Cattle are generally in fair condition. Fodder is scarce in several districts, but grass has now sprung up, and prospects have improved by the recent rainfall. In other districts fodder is sufficient. Prices are rising in three districts; stationary elsewhere.

Central Provinces.—*For week ending 3rd August.*—Rainy weather has continued, and the deficiency on account of its late commencement has everywhere been nearly, if not quite, made good. Hoshangabad and Bilaspur have received more and Sambalpur much more than the average; but the weather has not been unfavourable for weeding, and prospects continue excellent, save in part of one district, where the rice has been injured by heavy rain, and fields are being resown.

Burma.—*For week ending 30th July.*—LOWER BURMA: Rain during the week general and sufficient. Ploughing, sowing, and transplanting are in progress, and crop prospects are everywhere favourable. Slight damage from insects is reported from one district.

UPPER BURMA: There has been general rain during the week, but more is still required in some districts. In Mandalay dry-weather paddy is being reaped, and in all districts ploughing, sowing, and transplanting of wet-weather paddy are in progress. Rice, cotton, sesamum, and *jowar* are generally progressing favourably, but beans, sesamum, and maize are withering in parts. Nurseries in the north of the Southern Shan States destroyed from want of rain. Maize in large quantities is coming into the market in Yamethin. The price of paddy has risen largely in three districts; elsewhere fluctuations are small. The price of rice has decreased in three districts, while it has risen in five others. FAMINE RELIEF: *Numbers on works*:—Shwebo 1,415.

Assam.—*For week ending 2nd August.*—Weather warm. Harvesting of summer paddy and transplanting of late rice continue. Condition of cattle normal. Fodder and water abundant.

Mysore and Coorg.—*For week ending 3rd August.*—MYSORE: Rainfall general and good in two districts. Standing crops good, except in parts of one district, where more rain is still wanted. No material change in prices. FAMINE RELIEF: *Numbers on works*:—Bangalore 45.

COORG: Rainfall good. Transplanting of rice is in progress. *Ragi*, coffee, and cardamoms are in good condition. Prices are stationary. Forage and water for cattle are sufficient.

Berar and Hyderabad.—*For week ending 23rd July.*—BERAR: Average rainfall good. Weather cool and cloudy. Standing autumn crops are in good condition. Weeding operations continue throughout the Province. Fodder is insufficient in one taluk and water in another. Cattle are in good condition. Land is under preparation for spring crops in two districts. Prices stationary.

HYDERABAD: Report not received.

Central India.—*For week ending 3rd August.*—Rainfall in Central India is sufficient for agricultural purposes, except in parts of the Nimuch district. Standing crops are generally good, except in Bhopawar. Agricultural stock continues weak in Bhopal, but is in good condition elsewhere. Fodder is sufficient. Prices of food-grains are high in Nimuch; steady elsewhere.

Rajputana.—*For week ending 3rd August.*—Rainfall general and good. The Ajmere district had over 4 inches. Agricultural operations are progressing satisfactorily, and standing crops and harvest prospects are favourable throughout Rajputana. Agricultural stock is improving generally, except in two Agencies, but many deaths of cattle are still reported in Ajmere-Merwara. Pasturage or fodder prospects are improving. Prices generally steady. FAMINE RELIEF: *Numbers on works*:—Ajmere-Merwara 26,018 (including 3,055 home labour), Marwar 4,282, Kishengarh 1,086, and Bikanir (report not received): *Total* 31,386 against 36,601, excluding Marwar and Bikanir. *On gratuitous relief*:—Ajmere-Merwara 5,861, Marwar 2,036, Kishengarh 157, and Bikanir (report not received): *Total* 8,054 against 7,352, excluding Marwar and Bikanir. The decrease of 9,950 in Ajmere-Merwara compared with the last report is chiefly in the Ajmere Collectorate, and is mainly attributable to good rain. The figures for home labour are subject to revision.

Nepal.—*For week ending 28th July.*—Weather seasonable. State and prospects of the crops are good.

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Note on Agricultural Conditions and Prospects in India for the month of June.

1. In the earlier part of the month the continued weakness of the monsoon current caused anxiety regarding the prospects in Behar, the Punjab, Ajmere, and Rajputana. But conditions changed towards the end of the month, and agricultural prospects are now satisfactory throughout India.

Under these circumstances it is considered sufficient to publish the usual conspectus of the relief operations in each Province during June :—

Province.	Number of affected districts.	Area, square miles.	Population.	Affected area, square miles.	Population of affected area.	Number on relief works on last day of June 1892.	Number on gratuitous relief on same date.
Madras	8	50,216	11,311,000	17,645	2,571,000	77,668	1,050
Bombay	3	12,343	2,199,000	8,169	1,240,000	3,035	...
Bengal	6	23,640	13,081,000	4,493	1,432,000	36,813	4,004
North-Western Provinces and Oudh.	3	12,077	875,000	(*a*) 942½	427,000	...	...
Burma	7	25,158	1,391,000	3,382	173,000	(*b*)9,805	1,835
Ajmere-Merwara ...	2	2,711	542,000	2,702	494,000	32,672	8,049
Rajputana ...	4	76,650	3,598,000	45,825	1,798,000	9,314	4,390
Mysore	...	27,936½	4,944,000	622	106,000	1,579	206
Hyderabad ...	11	82,694	11,537,000	...	957,000	3,657	...
Kolhapur and Southern Mahratta Country.	9	6,740	1,600,000	2,519	471,000	7,767	...
Tehri (Garhwal) ...	...	4,180	241,000	400	30,000	...	..
TOTAL ...	53	333,345½	51,319,000	86,699½	9,699,000	182,310	19,535

(*a*) Affected area of two districts (Almora and Dehra Dun) only.
(*b*) Including numbers on certain Government irrigation works not now classed as relief-works.

2. The following table shows the programme of works available for relief purposes; the expenditure on relief-works, gratuitous relief, and advances to cultivators; and the amount of revenue suspended :—

Province.	Number of districts.	Maximum number for whom relief is expected to be required in case of serious famine.	Number for whom relief was provided in gazetted programme of relief works for 3 months.	Number for whom relief can be provided by works remaining on programme on date of report.	Expenditure on relief-works and gratuitous relief since 1st April 1891 to end of month under report.	Advances since 1st April 1891 to end of month under report.	Revenue suspended since commencement of scarcity.
					Rs.	Rs.	Rs.
Madras	8	1,131,100	1,710,300	1,266,100	13,72,000	26,40,000	30,98,000
Bombay	3	180,000	68,319	79,658	69,000	6,12,000	18,000
Bengal	6	398,431	2,976,069	2,196,531	3,83,093	1,24,472	...
Burma	9	679,354	250,172	241,802	14,23,513	4,23,744	(*a*) 7,90,000
Ajmere-Merwara ...	2	85,000	91,463	82,690	8,60,000	5,01,000	8,000
North-Western Provinces and Oudh.	3	60,000	...	...	...	35,707	6,000
Punjab	...	...	...	...	...	...	(*b*) 4,00,000

(*a*) Thathameda or house-tax actually remitted.
(*b*) Rough estimate.

3. The abnormal character of the death-rate in one district in Bengal is attributable mainly to fever and cholera, and is in no case directly traceable to famine. A rise in the death-rate in the hill districts of the North-Western Provinces and Punjab was distinctly due to cholera.

E. C. BUCK,

SIMLA, *the 5th August, 1892.* *Secretary to the Government of India.*

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the week ending at 8 a.m. on Saturday, August 6th, 1892.

During the week under review uninterrupted monsoon conditions have prevailed throughout the Indian region. There has been no cyclonic storm of any importance in any part of the country, and there have in consequence been very few cases of heavy concentrated rainfall over limited regions; but the distribution of pressure and the circulation of the winds have been such as are associated with well distributed constant rainfall. Pressure has been throughout highest in the extreme south, lowest in the extreme north-west, and relatively low over the Gangetic plain. The wind has been westerly over the Peninsula and central parts of India, southerly over Burma, the head of the Bay, and Lower Bengal, and easterly up the north side of the Gangetic plain. Rain has fallen generally, and the mean temperature has been low in nearly all Provinces.

The chart for Sunday, July 31st, showed that the barometer was falling everywhere, the change being brisk in the north. A large shallow low pressure area existed over Northern Indian, whence readings steadily increased to a high pressure area in the south. The wind was westerly across the Peninsula, southerly over Burma and the head of the Bay, and very variable within the low pressure area noticed above. Rain was falling very generally, the only considerable regions where rain was absent being Orissa, the South Karnatic, and the Indus Valley. Four inches were reported from Bikanir, and several falls exceeding two inches had been measured in different parts of the country. On August 1st the barometer was still falling, except in parts of Burma, of the Peninsula, and of Behar, but the general distribution was unchanged. The normal easterly wind had re-appeared up the Gangetic plain, and elsewhere

the wind blew from the ordinary monsoon directions. The force was lighter than usual over the Bay. Rain was again very general, but over a large part of Bengal the amounts received were abnormally small. In the Western Punjab and in Sind the weather was fine. The fall was on the whole moderate, though there were a few instances of largish amounts. The chart of the 2nd showed small barometric changes, except in Bengal, where pressure had decreased briskly. The distribution was practically unaltered, and normal monsoon winds prevailed generally. Rain had continued to fall in all parts of the Indian region, except the extreme north-west. The amounts were again moderate or small, with a few scattered patches of heavier rain. On the 3rd the barometer was still falling over Northern India and Burma, but had begun to rise in the south. The general distribution and the circulation of the winds were unchanged, and the force of the monsoon was low over the Bay. There was no rain over the centre and east of the Peninsula or in the Indus Valley or Guzerat, but elsewhere the fall was general. A few scattered heavy falls were reported, but on the whole the amounts were moderate. By the morning of the 4th the rise of pressure which had commenced on the previous day over the Peninsula had extended to almost all parts of India, but there was still no change in the general distribution. The winds were also little altered. There was still no rain over the centre and east of the Peninsula, but rain had extended to the north of the Indus Valley, and a very heavy fall had occurred at Peshawar. Large falls were also reported from Jeypore and from some places in Burma. On the 5th a well defined depression had appeared over Rajputana, and the barometer had fallen there, though it had risen elsewhere. Rain was reported from all parts of the country, except the east of the Peninsula, Sind, and Guzerat. Heavyish amounts were reported from the east of Rajputana and moderate amounts elsewhere. By the morning of the 6th the depression from East Rajputana had advanced into the Indus Valley, and had carried rain into Baluchistan. Rain had also extended across the Peninsula to the East Coast, but with these exceptions the changes were very slight. The heaviest falls (between 1½ and 2½ inches) were reported from Guzerat and the north of Bengal.

Temperature.—As was the case last week, the steady and continuous rain has occasioned low temperatures throughout the country. The mean diurnal deficiency for the whole of India has been 1·3°, which is 0·5° greater than was the deficiency last week :

Province.	July.	August.						Mean variation of week.
	31st.	1st.	2nd.	3rd.	4th.	5th.	6th.	
	°	°	°	°	°	°	°	°
Burma	+0·1	—0·8	—2·1	—0·9	—2·1	—2·1	—1·0	—1·3
Bengal and Assam . .	+0·8	—0·4	—1·6	—2·8	—3·0	—2·4	—2·1	—1·6
North-West Provinces and Oudh.	+0·8	—0·6	—1·2	—2·3	—3·9	—2·5	—1·6	—1·6
Punjab	—3·0	—1·9	—3·7	—5·0	—6·2	—6·8	—4·4	—4·4
Bombay	+0·2	—0·6	—1·3	+0·2	+0·1	+1·1	+0·9	+0·1

Guzerat and Central India .	+0·7	—0·1	+1·3	—1·4	—3·6	—2·1	—1·3	—0·9
Sind and Rajputana . .	0	+1·3	+1·2	+0·6	—2·3	—2·4	—2·9	—0·6
Madras	+0·5	+0·3	—1·1	—0·9	+0·9	+0·5	—0·8	—0·1
Mean for whole India . .	+0·1	—0·6	—1·1	—1·8	—2·5	—2·1	—1·5	—1·3

The above table shows that only on the 31st July was the general temperature above the normal, and then only by a trifling amount. On August 1st the mean fell below the normal, and the amount of deficiency increased until the 4th, when it amounted to 2½°, after which it decreased again to 1½°. The provincial variations show that the greatest defect was in the Punjab, where the deficiency for the week was 4½°, and where on the 4th and 5th the defect was 6½°.

Rain.—The table at the close of the summary shows that during the week under review rain has fallen in all the rainfall divisions throughout India. The actual average rainfall of the different divisions ranges from 10·84 inches in Arakan, 9·42 inches in Tenasserim, and 8·53 inches in the Hill districts of the Punjab to 0·74 inch in Sind and to 0·25 inch in South Madras. The normal average rainfall of the different divisions ranges from 9·40 inches in Tenasserim, 9·27 inches in Arakan, and 7·10 inches in the Konkan to 0·55 inch in the west of the Punjab, to 0·57 inch in Sind, and to 0·40 inch in the south of Madras. Thus the actual and normal rainfall of the week under review agree fairly closely, the most important differences being the excess over the Hill districts of the Punjab and the deficiency in the Konkan. The third column of the table shows that of the fifty rainfall divisions where a comparison is possible, thirty-two received more than the usual amount, seventeen less than usual, and that one division had exactly the normal. The greatest actual excess was 3·96 inches in Rajputana (East) and Central India (West), followed by 3·32 inches in Rajputana (West), by 2·72 inches in the Punjab (North-West), by 2·54 inches in the Hill districts of the Punjab, and by 2·49 inches in Berar. The region of deficient rainfall included the following districts :—Lower and Central Burma, East Bengal, Chota Nagpur, Mysore, the Konkan, the Bombay Deccan, Kathiawar, the East Coast districts, and Madras (South Central Central, and South). In all other parts of India the rainfall was in excess.

The three concluding columns of the table show the state of the seasonal rainfall, *i.e.*, the actual and normal average rainfall for the different divisions, and the excess or defect of the former compared with the latter. Accepting the conclusion that a variation of less than 20 per cent. in either direction implies that the rainfall of the division has been about normal, the last column of the table shows that in thirty-five of the divisions the total rainfall for the season has been approximately normal; that in three it has been deficient; and that in twelve it has been excessive.

The following are the principal large totals in the different divisions :

Division.	District.	Station.	Amount.
Burma	Amherst . .	Thatôn . .	11·25 inches.
	Akyab . .	Minbya . .	14·82 „

SIMLA, *11th August, 1892.*

W. L. DALLAS,
Assistant Meteorological Reporter to the Government of India.

J. W. P. MUIR-MACKENZIE,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 6th August.*—Rainfall continued heavy on the West Coast, and good in the greater part of the Circars; moderate in parts of the Karnatic; light or no rain elsewhere. Rainfall of the season up to date is generally in excess of the average, and materially deficient only in Trichinopoly; but for the last four weeks it has been very deficient in parts of the Kistna, Deccan, and Karnatic districts, Trichinopoly, and the South, and in these parts further rain was much wanted at the end of the week. Good rain reported on the 7th and 8th in parts of Nellore, Deccan, and Salem has relieved anxiety considerably. Ploughing and sowing continue brisk, and young crops are thriving generally, though they require rain urgently in parts. Pasture and water are sufficient. Condition of cattle is generally good and improving. Prices are very high still and almost stationary, though slightly easier in the Karnatic, Central, and Southern districts. FAMINE RELIEF: *Numbers on works*:—Deccan 22,648, Karnatic 5,931, and Central 1,899: *Total* 30,478 against 37,378, the corrected figures for last week. *On gratuitous relief*:—Deccan 405, Karnatic 128, and Central 87: *Total* 620 against 643 last week. Loans for wells disbursed:—Deccan Rs. 8,77,000, Karnatic Rs. 4,46,000, and Central Rs. 11,78,000: *Total* Rs. 25,01,000. Wells completed—622, 2,248, and 1,368: wells under construction—6,677, 2,070, and 7,824 in respective blocks. Agriculturists' loans disbursed—Rs. 96,000, Rs. 1,14,000, and Rs. 69,000 in respective blocks.

Bombay.—*For week ending 10th August.*—Rain throughout the Presidency; generally good or moderate. Total fall is insufficient in parts of seven districts of the Deccan and Karnatak. Standing crops are flourishing, except in parts of two districts. Sowing and transplantation of early crops and preparations for late crops are progressing. Fodder is scarce in parts of five districts. Fodder supply and agricultural stock have improved by recent rain in Sind. Kolhapur excluded from affected area.

Bengal.—*For week ending 9th August.*—There was general rain over the entire Province until the 7th, when a break set in. Transplantation of winter-rice is generally well forward, but in some parts of the Burdwan, Chota Nagpur, and Patna divisions more rain is still required. Prospects of autumn crops are good. Early-rice and jute being harvested in Bengal Proper, and good reports continue to be received. Sugarcane is doing well, and the yield of indigo is expected to be fair. The floods in Cuttack and Puri are subsiding, and the damage is not likely to be great. No marked change in prices of food-grains. Fodder and water are plentiful, and cattle everywhere in good condition. FAMINE RELIEF: *Numbers on works*:—Bhagalpur 2,025 against 2,147 last week. *On gratuitous relief*:—Monghyr 224 and Bhagalpur 831: *Total* 1,055, showing a decrease of 122 since last week

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 6th August.*—Rainfall continued heavy on the West Coast, and good in the greater part of the Circars; moderate in parts of the Karnatic; light or no rain elsewhere. Rainfall of the season up to date is generally in excess of the average, and materially deficient only in Trichinopoly; but for the last four weeks it has been very deficient in parts of the Kistna, Deccan, and Karnatic districts, Trichinopoly, and the South, and in these parts further rain was much wanted at the end of the week. Good rain reported on the 7th and 8th in parts of Nellore, Deccan, and Salem has relieved anxiety considerably. Ploughing and sowing continue brisk, and young crops are thriving generally, though they require rain urgently in parts. Pasture and water are sufficient. Condition of cattle is generally good and improving. Prices are very high still and almost stationary, though slightly easier in the Karnatic, Central, and Southern districts. FAMINE RELIEF: *Numbers on works*:—Deccan 22,648, Karnatic 5,931, and Central 1,899: *Total* 30,478 against 37,378, the corrected figures for last week. *On gratuitous relief*:—Deccan 405, Karnatic 128, and Central 87: *Total* 620 against 643 last week. Loans for wells disbursed:—Deccan Rs. 8,77,000, Karnatic Rs. 4,46,000, and Central Rs. 11,78,000: *Total* Rs. 25,01,000. Wells completed—622, 2,248, and 1,368: wells under construction—6,677, 2,070, and 7,824 in respective blocks. Agriculturists' loans disbursed—Rs. 96,000, Rs. 1,14,000, and Rs. 69,000 in respective blocks.

Bombay.—*For week ending 10th August.*—Rain throughout the Presidency; generally good or moderate. Total fall is insufficient in parts of seven districts of the Deccan and Karnatak. Standing crops are flourishing, except in parts of two districts. Sowing and transplantation of early crops and preparations for late crops are progressing. Fodder is scarce in parts of five districts. Fodder supply and agricultural stock have improved by recent rain in Sind. Kolhapur excluded from affected area.

Bengal.—*For week ending 9th August.*—There was general rain over the entire Province until the 7th, when a break set in. Transplantation of winter-rice is generally well forward, but in some parts of the Burdwan, Chota Nagpur, and Patna divisions more rain is still required. Prospects of autumn crops are good. Early-rice and jute being harvested in Bengal Proper, and good reports continue to be received. Sugarcane is doing well, and the yield of indigo is expected to be fair. The floods in Cuttack and Puri are subsiding, and the damage is not likely to be great. No marked change in prices of food-grains. Fodder and water are plentiful, and cattle everywhere in good condition. FAMINE RELIEF: *Numbers on works*:—Bhagalpur 2,025 against 2,147 last week. *On gratuitous relief*:—Monghyr 224 and Bhagalpur 831: *Total* 1,055, showing a decrease of 122 since last week.

North-Western Provinces and Oudh.—*For week ending 10th August.*—Monsoon weather continues, and crop prospects everywhere satisfactory. Transplanting and weeding of rice in progress. In Almora the cutting of early-crops has begun. Prices generally stationary.

Punjab.—*For week ending 10th August.*—Good rainfall throughout the Province, but more rain is still wanted for rice sowings in Umballa. Sowings of autumn crop are in progress, but they are delayed owing to heavy rains in parts of some districts. Weeding has commenced in Jullundur. Prospects of standing crops have generally much improved, except in two districts, where the crops have suffered on account of heavy rains. In Hazara, if excessive rainfall continues, the crops on low-lying lands will suffer. In the hills near and below Simla an excellent crop is anticipated. Condition of cattle is fair throughout the Province. Fodder is sufficient in all but five districts, but green grass is now available in these tracts Prices rising in four districts, falling in two others, and stationary elsewhere.

Central Provinces.—*For week ending 10th August.*—Cloudy weather has prevailed during the week, but the rainfall has generally been light, except in the Northern districts and Bilaspur. Weeding in progress, and prospects continue excellent.

Burma.—*For week ending 6th August.*—LOWER BURMA: Rain general in all districts. Ploughing, sowing, and transplanting are in progress everywhere. UPPER BURMA: Reaping and threshing of dry-weather paddy in progress in three districts and finished in another. Ploughing, sowing, and transplanting of hot-weather paddy and ploughing and sowing of *jowar* and maize are also progressing. Cotton and sesamum crops fair in the western sub-division of Lower Chindwin, but the latter crop is suffering from drought in some parts. Prospects good in seven districts and fair in Minbu, but more rain is still required in that district and in Shwebo. Rain is also badly wanted for standing crops in Meiktila and in parts of Yamethin. On the whole prospects are fair. The price of paddy has risen considerably in one and fallen in another district; otherwise changes are unimportant. Numbers on relief works in Shwebo not reported.

Assam.—*For week ending 9th August.*—Weather seasonable. Reaping of early and transplanting of late rice continue. Tea doing well. Condition of cattle normal. Fodder and water abundant.

Mysore and Coorg.—*For week ending 10th August.*—MYSORE: Rainfall general throughout the State. Standing crops in good condition, except in parts of one district, where more rain is still needed. Prices have fallen in two districts. FAMINE RELIEF: *Numbers on works*:—Tumkur 219.

COORG: Rainfall good. Transplanting of rice still continues. All standing crops are in good condition. Prices stationary. Fodder and water for cattle sufficient.

Berar and Hyderabad.—*For week ending 10th August.*—BERAR: Average rainfall good. Weather cool and cloudy. Weeding operations continue.

Autumn crops in good condition. Water and fodder insufficient in two taluks. Cattle healthy. Prices almost steady.

HYDERABAD: Rainfall good. Sowing of irrigated crops and weeding of autumn crops continue. Cattle improving. Prices continue high.

Central India.—*For week ending 10th August.*—Rainfall general, except in Bhopal, where there has been a much needed break. Ploughing and sowing completed in Gwalior and approaching completion or in progress elsewhere. Damage from the long break to the standing crops in parts of Bhopawar is estimated at 50 per cent., and more rain is required in that Agency. Condition of agricultural stock is good. Prices steady.

Rajputana.—*For week ending 10th August.*—Good rainfall throughout Rajputana. Jeypore had over 13 inches and Ajmere-Merwara had over 6½ inches above the normal in parts, and well distributed over the district. Agricultural operations satisfactory. Standing crops and harvest prospects generally good, but in Ajmere-Merwara crops damaged in parts by excessive rain. The prospects of the cotton crop are good in Ajmere-Merwara and food-stocks sufficient. Agricultural stock is generally fair and is improving. Pasture or fodder sufficient, except in Meywar. Prices generally steady. FAMINE RELIEF: *Numbers on works*:—Ajmere-Merwara 21,308 (including 2,766 home labour), Marwar (report not received), Kishengarh 794, and Bikanir 1,215: *Total* 23,317 against 27,104 last week (excluding Marwar). *On gratuitous relief*:—Ajmere-Merwara 4,051, Marwar (report not received), Kishengarh 142, and Bikanir 497: *Total* 4,690 against 6,018 last week (excluding Marwar). Excepting ordinary labour, famine relief recipients in Ajmere-Merwara show a decrease of 7,435 as compared with last week.

Nepal.—*For week ending 4th August.*—Weather showery. Outturn of Indian-corn on low lands is good. Rice prospects are good, but high prices still prevail.

J. W. P. MUIR-MACKENZIE,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

RAILWAY STATISTICS.

No. XVI OF 1892-93.

STATEMENT OF APPROXIMATE GROSS EARNINGS OF INDIAN RAILWAYS.

N.B.—As regards the figures in column *Total Receipts from 1st April 1892*, audited figures have been used as far as possible.

Railway.	Average earnings per mile per week in 1891-92.	Week ending 1st August 1891. Mean mileage worked.	Earnings. Total.	Earnings. Per mile open per week.	Week ending 30th July 1892. Mean mileage worked.	Earnings. Total.	Earnings. Per mile open per week.	Earnings from 1st April to 1st August 1891.	Earnings from 1st April to 30th July 1892.	Increases in 1892-93.	Decreases in 1892-93.

* Excess due to supply from the Waghad Tank.
† Balance from storage.
† Excess is due to the back water having been admitted into the Canal owing to the temporary earthen dam raised above the weir.
(1) The Executive Engineer states that the river is gauged about 2 miles above the head-works where the river flows over sand. It is not possible to gauge the flow accurately through the sand; hence the apparent discrepancy.
(2) When the discharge on the river has been less than the discharge of the Canal, the proportion of water available has been taken to be 1.
(3) In same instances the discharge in the Canal is shown to be greater than that in the river. This is due partly to the existence of the springs between the point where the river is gauged and the head of the Canal, and partly to water being stored up by the river dam.
(4) For the Ghatprabha the divisions from October to December and January to March are more suitable, as from the beginning of January all the flow is used, but during October and November the discharge is larger than required.

The figures from October to December are :—		The figures from January to March are :—

Note.—Balance from storage left in tank on 31st March, 211 millions only.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Brief Memorandum on the weather in India during the months of June and July and probabilities of the rains during the months of August and September 1892.

In the forecast issued in the beginning of June it was stated that the monsoon forecasts as at present issued necessarily left out of consideration two important factors on which the agricultural value of the monsoon rainfall largely depends, *viz.* :

1st.—The probability of the occurrence of a prolonged break in the rains in July or August.

2nd.—The probability of the unusually early termination of the rains in Upper India or in Bengal.

It was stated in the forecast that "it should be used with even greater caution than in previous years for two reasons. The first is that the strength of the Bombay current depends in part upon the pressure conditions in the Arabian Sea as well as the land conditions, and the former are at present unknown. The second reason is that in a year like the present, when the abnormal features and conditions are so marked as to make it unique in many respects, there is a much greater possibility than usual of the introduction of actions on the large scale which might modify the meteorological conditions in India very largely during the rains, and the subsequent distribution of rainfall. It is, for example, possible that, as in 1880, there might not only be heavy rain in the Hill districts, but that heavy and continuous snow might fall on the higher elevations; and, if that occurred, there would be a prolonged break in the rains in August, which would largely diminish the seasonal rainfall in Northern India, and increase it in Southern India. The chances against the occurrence of this appeared in May to be about 3 to 1."

In the present memorandum a brief statement is given, first, of the weather and snowfall in the mountain areas to the north-west of India during the past two months of June and July; secondly, of the character of the monsoon rains and weather during the same period; and, thirdly, an attempt to estimate the probable character of the rainfall of August and September based on these data.

A. Information respecting snowfall in the North-West Himalayas and Afghan mountains in May, June, and July 1892.

The following gives a statement of the whole of the information received on this point:

I.—MOUNTAINS BORDERING DERA ISMAIL KHAN.

The Deputy Commissioner, Dera Ismail Khan, states that no snow fell on the ranges along the border of his district—not even on the higher ranges of the Takht-i-Suleiman or Pir Ghal mountains—during the months of June and July.

II.—AFGHAN MOUNTAIN DISTRICTS.

Colonel R. Warburton, Political Officer, Khyber Pass, has sent the following interesting information respecting the snowfall on the mountains west of Kohat:

"About the 24th or 25th of May last a severe storm came on from west, and a heavy fall of snow was reported to have taken place on the Sufed Koh Range. It is stated that snow falling at this time of the year on the Sufed Koh. Range has never been heard of before in the memory even of the oldest man. For days after, and even now, some of the tops of the Sufed Koh still remain white. No snow fell on the hills of the Khyber Range or Tirah."

III.—THE PUNJAB AND KASHMIR HIMALAYAS.

(*a*) *Kashmir.*—The following account of a heavy local precipitation in the Kashmir Himalayas is extracted from a letter received from F. B. Shawe, Esq., dated Leh, 14th June:

"From April 21st to April 28th I was travelling in two valleys leading north from the hills dividing Ladak and Kashmir and meeting at Kargil, situated about half-way between Leh and Srinagar. During all these days there was incessant rain, heavy low-lying clouds driving down the valleys before a strong wind. On April 29th in Dras, near the Zoji pass, there was a peculiarly luminous white fog all day, the sun being nearly invisible. Objects did not cast any shadow, the light appearing to come from all parts. The natives stated that the rain was quite abnormal, and the fog seemed to be quite an unknown occurrence—at least a fog of this peculiar description. On my arrival in Srinagar I was informed that no rain had fallen on the days in question, but that heavy dust clouds from the Punjab had hung over the country. Returning here I find that no rainfall to speak of was registered at the time."

The Assistant Commissioner, Murree, writes on the 28th July: "It is reported that there has recently been a 6 feet fall of snow on the high mountains beyond Kashmir."

(*b*) *Lahoul.*—The Reverend A. W. Heyde, Superintendent of the Kyelang Observatory, writing on the 17th June, describes the weather during May and June in Lahoul in the following terms:

"The weather here has been peculiar during May and June up to date. The month of May was warm, very dry, and the sky nearly always misty or hazy owing perhaps to duststorms in the plains, whence much dust may have been driven by the wind even so far as Lahoul.

"But a great change took place in the beginning of June. On the 5th and 6th of this month fully 2 inches (2·18″) of rain fell at Kyelang, the hills from 12,000 feet upwards being thickly covered with snow. After that till to-day it has always been cloudy, the clouds very low, and hanging about as if we were going to have a regular rainy season in Lahoul, which is not what we wish for. Now and then it rains, though only little, down in the valley, but the quantity of snow which falls on the hills from 13,000 feet upwards seems to be much greater than that of the rain below. Since this wet weather has set in, the temperature of course has become low. The maximum of to-day was only 56·5°, though before the rain it rose to 79·0°. So much rain in the first-half of June in Lahoul is unusual, but it has done a great deal of good to the crops, which at present look very promising."

(*c*) *Kangra.*—The Assistant Commissioner, Kulu, gives the following information of the depth of snow on the higher passes from 25th of May:

Tahsil.	Name of pass.	Elevation.	Depth of snow on		
			25th May.	9th July.	16th July.
		Feet.			
Kulu	Rotang	13,000	1 foot	½ foot	¾ foot.
	Hamta	14,500	½ ,,	¼ ,,	*Nil.*
	Barsai	?	½ ,,	*Nil*	*Nil.*
	Jagatsukh	?	*Nil*	*Nil*	¼ foot.
	Chandarkhani	?	*Nil*	¼ ,,	¼ ,,
Plach	Sirikhand	15,000	4 feet	*Nil*	1 ,,
	Gargarasan	17,000	1 foot	,,	*Nil.*
	Tirath	?	1 ,,	,,	*Nil.*

Summary of information.—The preceding information appears to indicate that, although there have been heavy local falls (as on the Sufed Koh at the end of May and in North Kashmir in July), there has been no heavy general and extensive snowfall. This is further confirmed by the appearance of the snows from Simla and by the Punjab Irrigation Report of the 30th June, which states that the water during the month of June was "extraordinarily low in the Jumna," and was "so abnormally low in the Sutlej and Chenab" that the dependent canals were not able to supply the water required for irrigating the crops.

It is hence almost certain that the depth of snow accumulation on the higher ranges and the extent of surface covered with snow were very much less than usual at the beginning of June, and that there has been no heavy general snowfall up to the present time. The snow accumulation in the North-West Himalayan area was hence at the end of July almost certainly below the normal to a very unusual extent.

Chief features of the meteorology of India in June and July.—In the forecast issued in the first week of June it was pointed out that an unusually dry cold weather in Northern India had been followed by a more severe and intense hot weather in March, April, and May than usual. The conditions were stated to be almost unique in character, and such as would very probably initiate stronger monsoon currents than usual (more especially from the Arabian Sea). It was also stated that the first great advance of monsoon winds and rainfall would very probably occur somewhat earlier than usual, but that it would probably be followed by a partial break in the rains lasting until the third or fourth week of June, after which the rains would set in vigorously. These inferences have been fully realised up to the present date, with the exception that the partial break in the rains was more prolonged and complete than was anticipated. It has, however, formed a very satisfactory feature of the monsoon, as favourable, general, and moderately heavy rain occurred during that period in the Deccan and Madras generally, which terminated the drought and partial famine that had prevailed during the past twelve months in the northern and central districts of Madras, *i.e.*, Bellary, Cuddapah, Nellore, Salem, Coimbatore, &c.

The following gives a brief summary of the weather in June and July 1892:

June.—The meteorological conditions in India at the end of May were favourable for the advance of the monsoon on the Arabian Sea. The first great advance occurred in the last week of May. This advance gave rise to a cyclonic storm which formed off the coast of the Konkan, and marched west-north-westward across the northern half of the Arabian Sea. After the disappearance of this storm monsoon winds extended gradually over the whole of India, except West Rajputana, Sind, and the West and Central Punjab. Moderate to heavy rain was received in the Peninsula and the Gangetic plain during the first week of June. This was chiefly due to the Bombay current. A cyclonic storm of considerable intensity formed at the head of the Bay on the 7th and 8th, which advanced during the next five days into the south-eastern districts of the North-West Provinces, and broke up there on the 14th. It gave a very heavy burst of rain to Bengal, the Gangetic Plain, and Central India. Light to moderate rain fell during the next two or three days, but the monsoon currents decreased in strength and became very unsteady, and on the 19th they had withdrawn from the whole of North-West and Central India. The break in the rains became gradually more pronounced, and from the 21st until the 28th rain was almost confined to Burma and North-Eastern India, and was light and partial. The Bay current strengthened on the 29th and 30th, and gave light to moderate rain to Northern India, but there were no indications of change on the Bombay coast. The winds there indicated the continued existence in the centre of the Arabian Sea of a shallow depression which failed to develop, and this is confirmed by an examination of the available marine data, which further show that weather was very unusual in the northern half of the Arabian Sea. Light variable winds with fine and generally clear weather prevailed in the north, and centre and moderate monsoon winds to the south of Lat. 14° or 15° N. The Deccan and Southern India received almost daily showers during this period (usually accompanying thunderstorms), which gave much larger totals for the month than usual.

III.—THE PUNJAB AND KASHMIR HIMALAYAS.

(*a*) *Kashmir.*—The following account of a heavy local precipitation in the Kashmir Himalayas is extracted from a letter received from F. B. Shawe, Esq., dated Leh, 14th June:

"From April 21st to April 28th I was travelling in two valleys leading north from the hills dividing Ladak and Kashmir and meeting at Kargil, situated about half-way between Leh and Srinagar. During all these days there was incessant rain, heavy low-lying clouds driving down the valleys before a strong wind. On April 29th in Dras, near the Zoji pass, there was a peculiarly luminous white fog all day, the sun being nearly invisible. Objects did not cast any shadow, the light appearing to come from all parts. The natives stated that the rain was quite abnormal, and the fog seemed to be quite an unknown occurrence—at least a fog of this peculiar description. On my arrival in Srinagar I was informed that no rain had fallen on the days in question, but that heavy dust clouds from the Punjab had hung over the country. Returning here I find that no rainfall to speak of was registered at the time."

The Assistant Commissioner, Murree, writes on the 28th July: "It is reported that there has recently been a 6 feet fall of snow on the high mountains beyond Kashmir."

(*b*) *Lahoul.*—The Reverend A. W. Heyde, Superintendent of the Kyelang Observatory, writing on the 17th June, describes the weather during May and June in Lahoul in the following terms:

"The weather here has been peculiar during May and June up to date. The month of May was warm, very dry, and the sky nearly always misty or hazy owing perhaps to duststorms in the plains, whence much dust may have been driven by the wind even so far as Lahoul.

"But a great change took place in the beginning of June. On the 5th and 6th of this month fully 2 inches (2·18″) of rain fell at Kyelang, the hills from 12,000 feet upwards being thickly covered with snow. After that till to-day it has always been cloudy, the clouds very low, and hanging about as if we were going to have a regular rainy season in Lahoul, which is not what we wish for. Now and then it rains, though only little, down in the valley, but the quantity of snow which falls on the hills from 13,000 feet upwards seems to be much greater than that of the rain below. Since this wet weather has set in, the temperature of course has become low. The maximum of to-day was only 56·5°, though before the rain it rose to 79·0°. So much rain in the first-half of June in Lahoul is unusual, but it has done a great deal of good to the crops, which at present look very promising."

(*c*) *Kangra.*—The Assistant Commissioner, Kulu, gives the following information of the depth of snow on the higher passes from 25th of May:

Tahsil.	Name of pass.	Elevation.	Depth of snow on		
			25th May.	9th July.	16th July.
		Feet.			
Kulu . .	Rotang	13,000	1 foot	½ foot	¾ foot.
	Hamta	14,500	½ ,,	¼ ,,	*Nil.*
	Barsai	?	½ ,,	*Nil*	*Nil.*
	Jagatsukh . . .	?	*Nil*	*Nil*	¼ foot.
	Chandarkhani . . .	?	*Nil*	¼ ,,	¼ ,,
Plach . .	Sirikhand . . .	15,000	4 feet	*Nil*	1 ,,
	Gargarasan . . .	17,000	1 foot	,,	*Nil.*
	Tirath	?	1 ,,	,,	*Nil.*

Summary of information.—The preceding information appears to indicate that, although there have been heavy local falls (as on the Sufed Koh at the end of May and in North Kashmir in July), there has been no heavy general and extensive snowfall. This is further confirmed by the appearance of the snows from Simla and by the Punjab Irrigation Report of the 30th June, which states that the water during the month of June was "extraordinarily low in the Jumna," and was "so abnormally low in the Sutlej and Chenab" that the dependent canals were not able to supply the water required for irrigating the crops.

It is hence almost certain that the depth of snow accumulation on the higher ranges and the extent of surface covered with snow were very much less than usual at the beginning of June, and that there has been no heavy general snowfall up to the present time. The snow accumulation in the North-West Himalayan area was hence at the end of July almost certainly below the normal to a very unusual extent.

Chief features of the meteorology of India in June and July.—In the forecast issued in the first week of June it was pointed out that an unusually dry cold weather in Northern India had been followed by a more severe and intense hot weather in March, April, and May than usual. The conditions were stated to be almost unique in character, and such as would very probably initiate stronger monsoon currents than usual (more especially from the Arabian Sea). It was also stated that the first great advance of monsoon winds and rainfall would very probably occur somewhat earlier than usual, but that it would probably be followed by a partial break in the rains lasting until the third or fourth week of June, after which the rains would set in vigorously. These inferences have been fully realised up to the present date, with the exception that the partial break in the rains was more prolonged and complete than was anticipated. It has, however, formed a very satisfactory feature of the monsoon, as favourable, general, and moderately heavy rain occurred during that period in the Deccan and Madras generally, which terminated the drought and partial famine that had prevailed during the past twelve months in the northern and central districts of Madras, *i.e.*, Bellary, Cuddapah, Nellore, Salem, Coimbatore, &c.

The following gives a brief summary of the weather in June and July 1892:

June.—The meteorological conditions in India at the end of May were favourable for the advance of the monsoon on the Arabian Sea. The first great advance occurred in the last week of May. This advance gave rise to a cyclonic storm which formed off the coast of the Konkan, and marched west-north-westward across the northern half of the Arabian Sea. After the disappearance of this storm monsoon winds extended gradually over the whole of India, except West Rajputana, Sind, and the West and Central Punjab. Moderate to heavy rain was received in the Peninsula and the Gangetic plain during the first week of June. This was chiefly due to the Bombay current. A cyclonic storm of considerable intensity formed at the head of the Bay on the 7th and 8th, which advanced during the next five days into the south-eastern districts of the North-West Provinces, and broke up there on the 14th. It gave a very heavy burst of rain to Bengal, the Gangetic Plain, and Central India. Light to moderate rain fell during the next two or three days, but the monsoon currents decreased in strength and became very unsteady, and on the 19th they had withdrawn from the whole of North-West and Central India. The break in the rains became gradually more pronounced, and from the 21st until the 28th rain was almost confined to Burma and North-Eastern India, and was light and partial. The Bay current strengthened on the 29th and 30th, and gave light to moderate rain to Northern India, but there were no indications of change on the Bombay coast. The winds there indicated the continued existence in the centre of the Arabian Sea of a shallow depression which failed to develop, and this is confirmed by an examination of the available marine data, which further show that weather was very unusual in the northern half of the Arabian Sea. Light variable winds with fine and generally clear weather prevailed in the north, and centre and moderate monsoon winds to the south of Lat. 14° or 15° N. The Deccan and Southern India received almost daily showers during this period (usually accompanying thunderstorms), which gave much larger totals for the month than usual.

In consequence of the prevalence of south-west monsoon winds and the occurrence of heavy rain over nearly the whole of India during the first-half of the month, followed by a return to hot weather conditions during the second-half of the month, the mean temperature, pressure, and humidity conditions differed little from the normal. The most remarkable feature of the meteorology of the month was the very abnormal weather conditions in the Arabian Sea, which prevented the advance of monsoon winds to Northern India, and gave moderate and unsteady monsoon winds and frequent rain to Southern India and the South Deccan in June.

July.—No large change occurred during the first week of July. A moderately strong monsoon blew at the head of the Bay, which was chiefly diverted at this time to North Bengal and Assam, and these areas received excessive rain from the 5th to the 9th. For example, Jalpaiguri had 15·88 inches on the 8th. During this period, from the 5th to the 9th, heavy rain set in on the West Coast and extended rapidly northwards, and winds strengthened rapidly and shifted to their normal monsoon directions. This was followed by the gradual extension of cloud and rain over the interior, and on the 9th rain was falling in all districts, except the West Punjab and Rajputana and Sind. During the remainder of the month the monsoon currents (more especially the Bombay current) prevailed with unusual strength and steadiness. A shallow cyclonic storm formed in West Bengal on the 21st. It drifted slowly westwards (with a slight northing) through Central Rajputana to Sind, and determined the first heavy burst of rain to Rajputana, Sind, and the West Punjab. From that date to the present time (8th August) the monsoon currents have not only had their fullest extension to the North and West Punjab and Sind, but rainfall has been determined to the interior, and more especially to Upper India, at the expense of the coast districts.

The present season up to date has hence been marked by a more widely distributed and less unequal and partial distribution of rainfall than usual, and by especially favourable rainfall in all those districts which have suffered from deficient rainfall during the past twelve months. It is unique with respect to the remarkably heavy rainfall it has given to West Punjab, Sind, and the greater part of Rajputana.

The following gives rainfall data for the period of nearly six weeks from the 1st July to 8th August :

District.	Station.	Rainfall.		
		Actual rainfall, 1st July to 8th August 1892.	Normal rainfall, 1st July to 8th August.	Ratio of actual to normal.
West Punjab	Peshawar	19·18	1·76	10·9
	Khushab	11·80	3·38	3·5
	Dera Ismail Khan	9·82	2·99	3·3
	Mooltan	13·37	2·68	5·0
Sind	Hyderabad	9·69	4·00	2·4
	Kurrachee	11·51	4·25	2·7
	Jacobabad	3·69	2·28	1·6
Rajputana	Jeypore	27·94	11·69	2·4
	Sambhar	15·47	9·83	1·6
	Ajmere	9·21	10·48	0·9
	Bikanir	8·90	4·46	2·0
	Deesa	20·42	13·22	1·5

The heaviest total rainfall of the two months July and August since 1853 at Peshawar was 13·41 inches in 1878, at Mooltan since 1862 9·24 inches in 1863, and at Dera Ismail Khan since 1862 12·18 inches in 1882.

It may be noted that the mean pressure of July for the whole of India was ·035 inch below the normal. Pressure was locally in excess in Burma, North-East India, and the eastern half of the Peninsula, and was in defect in North-West India and the western half of the Peninsula, West Rajputana, Kathiawar, and Sind. The local pressure anomalies were less than ·02 inch, except in the following cases :

Kurrachee	−·023″
Surat	−·026″
Bombay	−·022″

and perhaps locally at—

Ludhiana	−·029″
Lucknow	−·028″
Sibsagar	−·024″
Burdwan	+·021″
Chittagong	+·025″

The local anomalies were hence in all cases small and of comparatively little importance.

It has already been shown that the rainfall of the past two months has been not only unusually favourably distributed, but that it has been in some respects, more especially the excessive rain in the West Punjab and Sind, almost, if not quite, unique. The years in which the rainfall in North-West India and (probably) the meteorological conditions were similar to some extent with those of the present year are 1866, 1869, 1878, 1882, and to a less extent 1881 and 1886. The information for several of these years is too limited to be of any value for comparison, and of the other years the meteorological conditions differ so considerably as to make a comparison of doubtful validity.

The following appear to be the chief inferences which can be drawn respecting the rainfall distribution in India during the next two or three months based on the snowfall information and the weather conditions in India in June and July and a comparison with previous years, so far as that is possible :—

1st.—It is very probable that there will be no prolonged general break in the rains in Northern and Central India during the month of August, and hence that the monsoon currents will prevail with at least normal average strength during the months of August and September.

2nd.—It is probable that the rains will not cease unusually early in September in North-West India, and hence that the Punjab and Rajputana will probably receive moderate rain in September. The probability of moderate rain in October is doubtful in the Punjab.

3rd.—It is probable that Bengal and Behar will as a whole obtain favourable rain in September and October.

4th.—It may be noted that, although the indications are as yet too slight to enable this to be estimated properly, it is probable the Madras Coast districts (more especially the southern districts) will receive at least normal rainfall in the period October to December, and that the rainfall may be in slight to moderate defect in the interior districts of Central and South Madras. The distribution of rainfall due to the retreating south-west monsoon appears to be chiefly due to the pressure changes which occur in the last fortnight of September and the first fortnight of October, and it is

at present not possible to forecast these changes except in a very doubtful manner. In the year which most nearly resembles the present, the Deccan as well as Southern India received in the whole very favourable rain in October and November. The conditions of the present year are unique. It is, however, probable (chances about 2 to 1) that the Deccan as well as Southern India will continue to receive favourable rain until the end of the present south-west monsoon period, in November or December.

5th.—It may also be noted that it is probable (chances at least 3 to 1), so far as can at present be judged, the cold weather rains in Northern India will be below the normal. This estimate, however, may be largely modified by the conditions and general pressure changes of the next four months (*i.e.*, August to November).

JOHN ELIOT,
Meteorological Reporter to the Government of India.

SIMLA, *the 8th August, 1892.*

J. W. P. MUIR-MACKENZIE,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the week ending at 8 a.m. on Saturday, August 13th, 1892.

As has been the case during the past few weeks, very well-marked monsoon conditions have prevailed throughout the Indian region. During the whole week pressure has been highest in the extreme south, lowest over the Western desert, and relatively low over the Gangetic plain. Hence the distribution has been such as is characteristic of, and most favourable to, a full extension of the monsoon, and the current has consequently spread to all parts of India. There have been no storms during the week, and the rainfall, though locally heavy in a few places, has been in general well and fairly uniformly distributed. Gradients were generally moderate, and the monsoon both at the head of the Bay and on the west side of Peninsula has on most days been moderate in force.

On the 7th the barometer was rising almost everywhere, but the changes were on the whole small. Readings were highest over the south of the Bay, lowest over Sind and the north-west of the Punjab, and relatively low over the Gangetic plain. The winds were normal in direction in almost all parts of the country, and rainfall was reported from nearly every station. The amounts were largest in North Bengal.

On the 8th the barometer was rising, except in Burma, Assam, and North Bengal. The highest pressure lay over the south-east of the Bay, the lowest over the Western desert, while relatively low readings were reported over the Gangetic plain. The winds blew from their normal monsoon directions, except at a few places on the West Coast. The force was moderate both at Saugor Island and Bombay. In general the rainfall was exceedingly well distributed, but in parts of West Bengal, of Lower Burma, and of the Indus Valley there was either no rain or only scattered showers. At Peshawar 5·33 inches of rain had fallen, and at several stations in the Gangetic plain the amounts were fairly heavy. In Madras the rainfall was exceptionally general.

The chart of the 9th showed that the barometer was still rising very generally, and that the distribution of pressure was very little changed. Southerly winds were again reported from the North Konkan and Kathiawar, but the directions elsewhere remained about normal. The force had risen somewhat at Saugor Island and fallen at Bombay. Rain had fallen off in Bengal—none having fallen in South-West and West Bengal—in the Circars, and in the inland parts of the east of the Peninsula, but elsewhere the fall continued general. At Silchar and at few places on the West Coast and in North-West India the amounts exceeded 2 inches, while at Goa the fall equalled 6·20 inches and at Mormugao 3·30 inches. On the 10th the barometer was still rising slowly over the greater part of the country, except the north-west, and there was again very little alteration in the general distribution. Gradients were slight, except across Guzerat, Rajputana, and the east of the Punjab, where they were moderate. Westerly winds had extended into the Gangetic plain displacing the easterly current which had previously prevailed there, and the wind in North Bombay had shifted round to west again. With these exceptions, the wind directions were very little altered. Rain had to a great extent ceased over a large part of North-West India, and was only scattered over the east of the Peninsula and a considerable portion of Bengal. In Behar, however, rain had recommenced, and 5 inches was reported from Patna, and in other parts of India moderate general rain continued. On the 11th the only really important change was the reappearance of the area of relatively low pressure over the Gangetic plain, and with it the increase in the volume of the easterly current along the line of the Himalayas. Pressure was highest in the extreme south and lowest over Sind, and gradients were very slight over Southern India. Rain was altogether absent from a large part of North-West India, but was very general throughout

the remainder of the Indian region. The fall was light in Bengal, heavy on the West Coast, and moderately heavy elsewhere. On the 12th pressure was rising over North-West, Central, and Southern India, and falling in the north-east. The distribution of pressure and the circulation of the winds were little changed. Rain had extended to Rajputana and the north of the Punjab, and had ceased in South-West Bengal and the north of Madras. Elsewhere the fall continued general, and was heavy or moderately heavy in North Bengal and parts of the Peninsula. On the 13th the barometer was rising, except in Burma and the Punjab; but the changes were small, and the general conditions were again unaltered. The winds over the greater part of the country were fairly normal in direction; but in Burma there were tendencies to cyclonic movements, and over the Gangetic plain the directions were variable. The monsoon was lighter than usual on both sides of India. There was no rain in the Indus Valley, South-West Bengal, the Northern Circars, or the Coromandel Coast, but in all other parts of India the fall was general and the amounts moderately large.

Temperature.—The general and continuous rain of the past two weeks has exercised a steady influence on the temperature, the mean for the whole of India having been 1·3° below the normal average last week and 1·2° below during the week under review.

The following table shows the variations of the mean temperature from the normal on each day of the week for the principal Provinces of India:

Province.	7th.	8th.	9th.	10th.	11th.	12th.	13th.	Mean variation of week.
	°	°	°	°	°	°	°	°
Burma	+0·4	+1·1	+1·3	+1·7	+1·2	+0·9	+1·3	+1·2
Bengal and Assam	−2·0	−0·8	−0·1	−1·2	−0·9	+0·5	−1·2	−0·8
North-West Provinces and Oudh.	−1·7	−3·0	−2·6	−3·5	−3·2	−2·2	−0·9	−2·4

Mean for whole India	−1·6	−1·9	−1·5	−0·7	−1·1	−1·2	−0·6	−1·2

On each day of the week the mean temperature was below the normal, the greatest defect being on the 8th. The provincial variations show an excess of 1·1° in Burma and of 0·4° in Central India and Guzerat, and a deficiency in all the other Provinces. The greatest abnormal deficiency was in the Punjab, where the rainfall relatively to the normal was heavier and more widely extended than in any other Province.

Rain is reported from every division except Rajputana (West), and this exception is probably due to the non-arrival of the telegram, as rain was reported at Bikanir in the Daily Weather Report of the 13th. The actual average distribution of rain was as follows:

The heaviest amount received was 10·32 inches in the Konkan, followed by 9·39 inches in North Bengal, by 9·28 inches in Assam (Surma), by 6·68 inches in

the Hill districts of the Punjab, and by 6·04 inches in Oudh (South). The smallest amounts recorded were 0·50 inch in Orissa, 0·74 inch in Kathiawar, 0·94 inch in Upper Burma, and 1·02 inch in Mysore. The normal average distribution is as follows: The heaviest amounts are 9 inches in Tenasserim and Akyab, 8 inches in Assam (Surma), and 5 inches in the Hill districts of the Punjab, Coorg, and the Konkan; while the smallest amounts are recorded in the Punjab (South and West), the Bombay Deccan and Khandeish, Sind, and Madras (South). There are thus considerable differences between the actual and normal distribution of rainfall, the most marked being the deficiency in the Burma divisions, in Coorg, and in South-West Bengal, and the excess in Upper India, in the Konkan, and in Madras. Of the fifty divisions in which a comparison is possible, only sixteen had less than the usual fall of the week. In all the other divisions there was an excess. The region of deficient rainfall included the following divisions: All the Burma divisions, Deltaic and Central Bengal, Orissa, Chota Nagpur, Coorg, Mysore, Central Provinces (East), Guzerat, Kathiawar, Rajputana (West), and the East Coast (North *a*). The greatest actual deficiency was in Tenasserim, where less than one quarter of the usual fall was recorded. The greatest actual excess was 4·33 inches in the Konkan, followed by 4·05 inches in North Bengal, by 3·73 inches in the Central Punjab, by 3·35 inches in the Submontane division of the Punjab, and by 3·25 inches in Oudh (South).

The three concluding columns of the table show the state of the seasonal rainfall, *i.e.*, the total actual and normal rainfall for the period May 29th to August 13th, and the excess or defect of the former compared with the latter expressed as a percentage. Accepting that a variation of less than 20 per cent. implies a normal fall, the concluding column shows that twenty-nine of the fifty divisions have had satisfactory rains up to date; that nineteen have had an excess; and that two have had a deficiency. The divisions with a deficiency are East Bengal and Kathiawar, and those with an excess are North Bengal, the North-West Provinces (East, Central, and West), Oudh (South), the Punjab (South, North-West, and West), the Bombay Deccan, Khandeish, Berar, the Central Provinces (East), Sind, Rajputana (East), and Central India (West), the East Coast (North, Central, and South), Hyderabad (South), and Madras (Central). The greatest excess relative to the average is in the Punjab (West) and Sind.

The following are the principal large totals in the different divisions:

Division.	District.	Station.	Amount.
Burma	Maubin	Sudder	6·74 inches.
Assam	Khasia Hills	Cherra	30·19 „
Bengal	Cooch Behar	Sudder	19·62 „
	Jalpaiguri	Alipur	22·67 „
Behar	Patna	Sudder	8·44 „
North-West Provinces	Sultanpur	Musafirkhana	11·70 „

SIMLA, *18th August, 1892.*

W. L. DALLAS,
Assistant Meteorological Reporter to the Government of India.

J. W. P. MUIR-MACKENZIE,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 13th August.*—Rainfall heavy on the West Coast and good elsewhere, except in parts of Ganjam, Vizagapatam, Bellary, and Tinnevelly. This rain has relieved all present anxiety and effected great improvement in prospects. Cultivation and sowing proceeding apace and crops thriving almost everywhere. Pasture and water abundant for cattle. Prices of principal food-grains much easier in Deccan, and slightly easier in the Central districts, Karnatic, and the Circars, except Ganjam; almost stationary elsewhere. FAMINE RELIEF: *Numbers on works*:—Deccan 20,033, Karnatic 3,673, and Central districts 879: *Total* 24,585 against 30,304 last week. Remaining works in Salem will close on 20th. *On gratuitous relief*:—Deccan 389, Karnatic 121, and Central districts 74: *Total* 584 against 589 last week. Loans for wells disbursed:—Deccan Rs. 8,88,000, Karnatic Rs. 4,50,000, and Central districts Rs. 11,97,000: *Total* Rs. 25,35,000. Wells completed—622, 2,261, and 1,394: wells under construction—6,738, 2,077, and 7,854 in respective blocks. Agriculturists' loans disbursed—Rs. 97,000, Rs. 1,16,000, and Rs. 69,000 in respective blocks.

Bombay.—*For week ending 17th August.*—Rain throughout the Presidency; generally good or moderate. Total fall is insufficient in parts of four districts. Standing crops blighted in parts of one district, and damaged by excessive rain or water from breaches in canals in parts of Sind; otherwise good. Sowing and transplantation of early crops and preparations for late crops are progressing in a few districts. Fodder and water-supply and agricultural stock generally good.

Bengal.—*For week ending 16th August.*—Rainfall heavy in Behar and Northern Bengal; elsewhere rain has been general, except in South-West Bengal and Orissa. Winter rice has suffered in parts of the Burdwan, Orissa, and Chota Nagpur divisions. Prospects of all autumn crops are satisfactory. Early-rice and jute being harvested, except in the western districts, and outturn reported to be good. *Mahwa* and *makai* are coming into the market. The outturn of indigo in Monghyr and Purneah is poor. Sugarcane is generally a promising crop. In Cuttack the extent of damage done to the crops by the recent flood has not been fully ascertained. Prices continue fairly stationary, but in Gaya, Darbhanga, and Muzaffarpur a slight fall has been reported during the week. Condition of cattle generally good and supply of fodder and water sufficient. FAMINE RELIEF: *Numbers on works*:—Bhagalpur 1,456 against 2,025 in previous week. *On gratuitous relief*:—Bhagalpur 729 against 831 in previous week.

North-Western Provinces and Oudh.—*For week ending 17th August.*—Good rain has fallen during the week, and a break is needed to admit of sowing

and weeding. Crops are flourishing everywhere. In Almora the autumn crops are coming into ear and the early millets are ripening. Prices generally steady.

Punjab.—*For week ending 17th August.*—Heavy rain has fallen all over the Province; a break is now required. Sowings of autumn crops in progress. Owing to heavy rains maize sowing not yet effected in parts; the sowing of other crops is also delayed. Prospects have improved by recent rain, except in Peshawar. Standing crops are now flourishing, except on swampy lands in one district, and the condition of the crop in the Simla Hill States is reported to be excellent. Heavy floods in the rivers have damaged the crops near their banks in four districts, and in Bannu the floods have swept away some houses and cattle. Winged locusts have appeared in parts of the Dera Ismail Khan district. Condition of cattle is reported fair in all districts. Dry fodder is insufficient and scarce in some districts, but green grass is plentiful everywhere. Prices rising in four districts, falling in two others, and stationary elsewhere.

Central Provinces.—*For week ending 17th August.*—Heavy rain has fallen in the Nerbudda Valley districts, but in the Southern and Eastern districts the fall has been comparatively light, and in Chanda more rain is required for rice transplantation. Ploughing for the autumn sowings is commencing. Prospects generally continue good.

Burma.—*For week ending 13th August.*—LOWER BURMA: Ploughing and transplanting in progress; plants healthy, but crops slightly damaged in parts of one district.

UPPER BURMA: Ploughing, sowing, and transplanting for wet-weather paddy in progress. Millets being sown in five districts. Prospects have improved in Shwebo, crops throughout the district being reported healthy. Crops generally in good condition, but more rain is wanted in three districts. Paddy nurseries withering throughout Meiktila. The early sesamum crop is very poor in parts of one district. FAMINE RELIEF: *Numbers on works*:—Shwebo not reported.

Assam.—*For week ending 16th August.*—Weather seasonable. Reaping of early and transplanting of late rice continue. Fodder abundant.

Mysore and Coorg.—*For week ending 17th August.*—MYSORE: Rainfall general and good in parts of one district. Crops good. Prospects much improved. No material change in prices.

COORG: Rainfall good. Transplanting of rice nearly completed; other crops in good condition. Prices stationary. Fodder and water for cattle sufficient.

Berar and Hyderabad.—*For week ending 17th August.*—BERAR: Rainfall good. Weather cool and cloudy. Autumn crops in good condition. Weeding in progress. Fodder sufficient. Prices almost steady. Cattle healthy.

HYDERABAD: Rainfall good. Sowing season ended. Prospects generally favourable. Prices still high.

Central India.—*For week ending 17th August.*—Rainfall sufficient for agricultural purposes, except near Neemuch. In Western Malwa the rain is excellent for standing crops and grass, but much more is wanted for winter crops. Condition of crops good everywhere. Weeding and ploughing in progress in all parts. Cattle in good condition, except in parts of Bhopal and near Neemuch. Fodder plentiful. Prices of food-grains steady.

Rajputana.—*For week ending 17th August.*—Rainfall good and sufficient throughout Rajputana, but in Marwar there was no rain during the week. Agricultural operations satisfactory. Standing crops and harvest prospects generally good, but in the Ajmere district crops damaged in parts by excessive rain and partially by insects. In Kerowli prospects of cotton fair. In Ajmere-Merwara agricultural stock is generally fair and improving. Pasturage or fodder generally sufficient. Prices falling. FAMINE RELIEF: *Numbers on works*:—Ajmere-Merwara 16,803 (including 5,699 on ordinary public works and 2,580 on village relief), Marwar 4,210, Kishengarh 615, and Bikanir 871: *Total* 22,499 against 23,317 last week (excluding Marwar). *On gratuitous relief*:—Ajmere-Merwara 2,858, Marwar 1,891, Kishengarh 140, and Bikanir 383: *Total* 5,272 against 4,690 last week (excluding Marwar). Excluding number on ordinary labour (5,699), famine relief recipients in Ajmere-Merwara show a decrease of 6,567 as compared with last week.

Nepal.—*For week ending 11th August.*—Heavy bursts of rain throughout the week. Prospects good.

J. W. P. MUIR-MACKENZIE,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

MARINE DEPARTMENT.

The following is published for general information:

No. 825, dated Simla, the 13th August, 1892.

STORES.

CONTRACTS.

RESOLUTION—By the Government of India, Marine Department.

Read the undermentioned papers relative to the execution of contracts on behalf of the Secretary of State for India in Council for supplies and services required on account of the Royal Indian Marine and the Indian Troop Service:

To Solicitor to the Government of India, No. 585, dated 9th June 1892.
From Solicitor to the Government of India, No. 617, dated 7th July 1892.

OBSERVATION.—The Government of India having recently had under review the question as to the officers who should be empowered to sign contracts on behalf of the Secretary of State for India in Council, the subject has been considered in relation to the execution of such documents on account of the Royal Indian Marine and the Indian Troop Service.

RESOLUTION.—In exercise of the powers conferred by the 33 and 34 Victoria, Chapter 59, section 2, the Governor-General in Council is pleased to declare that the undermentioned contracts on account of the Royal Indian Marine and Indian Troop Service may be executed on behalf of the Secretary of State for India in Council as follows:

No.	Nature of contract.	For what dockyard.	By whom to be executed.
1	For conveyance of troops, military stores, &c.	...	Secretary to the Government of India, Marine Department.
2	Supply of miscellaneous marine stores ...	Bombay ...	Director of the Royal Indian Marine.
3	Ditto ditto ...	Kidderpore ...	Deputy Director of the Royal Indian Marine.
4	Provisions and medical comforts ...	Bombay ...	Director of the Royal Indian Marine.
5	Ditto ditto ...	Kidderpore ...	Deputy Director of the Royal Indian Marine.
6	Sailmaking ...	Bombay ...	Director of the Royal Indian Marine.
7	Ditto ...	Kidderpore ...	Deputy Director of the Royal Indian Marine.
8	Mess stores, Indian Troop Service ...	Bombay ...	Resident Transport Officer.
9	Washing troop bedding, Indian Troop Service.	Ditto ...	Ditto.
10	Labour ...	Kidderpore ...	Deputy Director of the Royal Indian Marine.
11	Manufacture of coir rope ...		
12	Supply of coal, country (Bengal) ...		
13	Rivetting work ...		
14	Scraper establishment ...		
15	Disposal of empty casks returned from Royal Navy vessels.	Bombay ...	Director of the Royal Indian Marine.
16	Charter parties (hire of transport and for conveyance of troops, &c.)	Bombay and Kidderpore.	Director of the Royal Indian Marine, and Deputy Director of the Royal Indian Marine.
17	Agreements for temporary employment of engineers, engine drivers, and gunners.	Ditto ...	Ditto ditto.

ORDER.—Ordered, that the above resolution be communicated to the Home, Finance, and Legislative Departments of the Government of India, and to the departments and officers concerned, for information and guidance; and further that it be published in the *Gazette of India*.

E. H. H. COLLEN,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

ACCOUNT.

General.

REVIEW OF PROVINCIAL CIVIL WORKS BUDGET ESTIMATES OF EXPENDITURE FOR 1892-93.

No. 209-A.-G., dated Simla, the 8th August, 1892.

RESOLUTION—By the Government of India, Public Works Department.

Read—

Public Works Department Code, Volume II, Chapter XV, paragraphs 42 and 43.
Finance Department Resolution No. 1142, dated 17th March 1892.

RESOLUTION.—Under the rules regulating the administration by Local Governments and Administrations of Provincial Revenues and Expenditure, the Government of India is required to exercise a general control over the expenditure on Public Works from Provincial and Incorporated Local Funds. The funds set aside for outlay on Provincial Civil Works under the control of Public Works Officers during 1892-93, the first year of a new provincial contract, are analysed in the following paragraphs.

A separate review of the expenditure by Public Works Officers on Civil Works from Incorporated Local Funds will issue in due course.

2. In the following table the grants for 1892-93 are compared with the outlay on Provincial Civil Works during the five years ending 1890-91, and the Revised Estimate for 1891-92:

Province.	Outlay on Civil Works, Provincial.					Revised Estimate, 1891-92.	Budget Estimate, 1892-93.
	1886-87.	1887-88.	1888-89.	1889-90.	1890-91.		
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Central Provinces	13,84,540	12,00,180	11,57,180	18,13,670	17,81,650	19,50,000	18,00,000
Lower Burma	11,85,670	11,13,300	11,81,020	14,79,500	20,26,100	23,91,000	27,00,000
Assam	6,10,170	5,52,880	5,94,370	6,82,480	11,43,710	11,38,000	13,72,000
Bengal	33,85,400	27,01,070	39,04,300	31,24,010	35,06,060	37,43,000	29,71,000
North-Western Provinces and Oudh	27,93,790	27,32,780	25,73,470	25,93,010	30,44,260	40,47,000	31,50,000
Punjab	25,47,080	23,16,540	23,53,370	28,60,070	29,23,260	33,50,000	31,00,000
Madras	21,76,000	19,42,590	20,74,410	23,70,310	24,89,200	29,00,000	23,00,000
Bombay	47,20,700	40,33,990	36,77,270	36,34,100	40,17,090	40,94,000	32,14,000
Grand Total ...	1,93,10,400	1,67,43,310	1,75,14,290	1,84,57,050	2,08,02,330	2,35,13,000	2,06,07,000

The grants are generally in excess of the amounts spent on Provincial Civil Works under Public Works Officers during the five years ending 1890-91, but in Bengal and Bombay the allotments have been considerably curtailed.

3. The objects and services upon which the Local Governments propose to spend the money available in the current year are:

(In lakhs and thousands.)

No original works of any magnitude are to be commenced during the current year; the details of the provincial estimates show that only two works costing Rs. 50,000 or over are to be begun.

4. The percentage which the outlay on repairs and establishment bears to the total grant available for expenditure is noted below. The names of the provinces are arranged in the order of smallness of percentage under "Repairs" and "Establishment":

Repairs.

Civil Buildings.

	Percentage of total grant.
Central Provinces	2·78
Assam	5·02
Lower Burma	6·11
Madras	7·39
Punjab	8·65
North-Western Provinces and Oudh	10·00
Bombay	10·95
Bengal	13·46

Communications.

	Percentage of total grant.
Madras	5·00
Bengal	17·47
Central Provinces	22·23
Lower Burma	22·30
Assam	23·11
Punjab	27·58
Bombay	27·82
North-Western Provinces and Oudh	29·86

Miscellaneous Public Improvements.

8. In the undermentioned provinces allotments are made for original works for which estimates have not been sanctioned. The number of works and the aggregate amounts are noted against each :

Name of Province.	Number of Works.	Amount.
		Rs.
Central Provinces	33	3,46,100
Lower Burma	52	5,32,680
Assam	30	2,93,750
Bengal	36	4,22,000
North-Western Provinces and Oudh	28	1,51,730
Punjab	35	5,72,400
Madras	23	3,11,000
Bombay	2	87,300

It is understood that no outlay on works will be permitted by Local Governments and Administrations until estimates have been sanctioned by competent authority.

9. The following works are provided for in connection with the residences of Governors, Lieutenant-Governors, and Chief Commissioners :

Province.	Station.	Nature of Work.	Total estimated cost.	Allotment for 1892-93.
			Rs.	*Rs.*
Lower Burma ...	Rangoon ...	New Government House	4,64,471	1,42,000
Assam ...	Shillong ...	Roofing with corrugated iron the cottage and out-houses of Government house.	...	6,000
Bengal	Darjeeling ...	Constructing a Darbar Hall	14,992	2,800
Ditto ...	Ditto ...	Constructing corridor, bridge, &c., near Darbar Hall.	...	11,400
Madras	Ootacamund ...	Additions and improvements to Government House.	7,79,150	10,000
Bombay	Bombay ...	Servants' quarters, Government House, Malabar Point.	37,500	37,300

Corridor, bridge, &c., near Darbar Hall, Darjeeling.—This appears to be a part of the main project for the provision of a Darbar Hall at Darjeeling estimated to cost Rs. 14,992, and on which Rs. 2,800 remains to be spent in 1892-93. If the corridor, bridge, &c., is to be treated as a part of the main work, the total outlay will exceed the limit of Rs. 15,000 laid down in Public Works Department Code, Vol. II, Chapter XV., paragraph 190-A. Further information on this point should be submitted to the Government of India.

10. The provision of house accommodation for officials, exclusive of buildings in progress at the end of 1891-92, is as follows:

Province.	Station.	Nature of Work.	Estimated cost.	Provision in 1892-93.
			Rs.	*Rs.*
Central Provinces ...	Nagpur ...	Constructing Warders' quarters, Central Jail.	3,809	3,800
Ditto ...	Wardha ...	Constructing quarters for Warders ...	3,636	4,000
Ditto ...	Jubbulpore ...	Constructing quarters for Warder guard ...	5,241	6,000
Ditto ...	Rajpur ...	Constructing quarters for 10 Warders ...	...	3,000
Ditto ...	Bilaspur ...	Constructing quarters in two blocks for Warders.	...	5,000
Ditto ...	Nagpur ...	Quarters for City Superintendent of Police	...	5,500
Ditto ...	Jubbulpore ...	Quarters for European Constable in Civil Lines.	...	4,000
Burma	Rangoon	Quarters for the Foremen, Rangoon Jail Press.	...	2,600
Ditto	Ditto ...	Clerks' quarters, Rangoon Jail (re-construction).	...	3,000
Ditto	Thatôn ...	Quarters for Sub-Divisional Officer ...	...	6,000
Assam	Hailákándi ...	Constructing pucca building for the Sub-Deputy Collector and Civil Nazir.	...	6,800
Ditto	Habiganj ..	Constructing Sub-Divisional Officer's residence.	10,350	9,000
Ditto	Kohima ...	Constructing quarters for Assistant Engineer.	...	5,750
Bengal	Tangail ...	Constructing Sub-Divisional Officer's residence.	4,022	4,000
Ditto	Netrokona ...	Constructing Sub-Divisional Officer's residence and providing a corrugated iron roof to the Sub-Divisional Office.	...	7,200
Ditto	Howrah ...	Constructing a parsonage	...	15,000
Ditto	Bhagalpur ...	Constructing quarters for three subordinates in the Central Jail.	...	7,500
Ditto	Boalia ...	Constructing quarters for five subordinates in the Central Jail.	...	8,000
Ditto	Noakhali ...	Constructing an official residence with out-offices for District Superintendent of Police.	...	7,000
Ditto	Darbhanga ...	Constructing a residence for the Collector...	...	24,000
Ditto	Ditto ...	Constructing a residence for the Civil Surgeon.	...	6,000
North-Western Provinces and Oudh.	Aligarh ...	Constructing officials' quarters in the Jail at Aligarh.	4,486	2,800
Ditto ditto ...	Benares ...	Constructing a block of 8 officials' quarters in the Central Prison at Benares.	5,376	2,400
Ditto ditto ...	Pilibhit ...	Construction of quarters for the Reserve Inspector.	3,250	3,250
Ditto ditto ...	Fatehpur ...	Construction of new quarters for the Reserve Inspector.	5,000	5,000

In considering proposals for the construction of quarters for public servants, Local Governments and Administrations should restrict the provision to the cases specified in Vol. I, Public Works Department Code, Chapter XI,

paragraph 15. The Government of India will be glad to have further information as to the circumstances under which residences are to be provided for the Collector and Civil Surgeon at Darbhanga. Under Vol. I, Chapter XI, paragraph 16, all proposals for the construction of residences for officials not entitled to quarters at civil stations or cantonments already formed, or in the process of formation, should be referred to the Government of India for orders.

11. The attention of the Local Governments and Administrations concerned is invited to the following remarks on the details of the estimates for original works:

BURMA.

(i) *Second roof over public offices, Rangoon, Rs. 15,300.*—If these are the public offices nearing completion, the additional work should be provided for as a part of the main project originally estimated to cost Rs. 5,32,325.

NORTH-WESTERN PROVINCES AND OUDH.

(ii) *Registration of road traffic, Rs. 3,000.*—It is not evident why this outlay is provided for under the head "Civil Works."

PUNJAB.

iii.—Under the head Miscellaneous Public Improvements, the Government of the Punjab has provided Rs. 20,000 for widening the Mall at Lahore. This appears to be a work which should have been undertaken at the charge of the Municipality.

The Governments of Madras and Bombay, Bengal, the North-Western Provinces and Oudh, and the Punjab.
The Chief Commissioners of the Central Provinces, Burma, and Assam.
The Accountant General, Public Works Department.

ORDER.—Ordered, that the foregoing be communicated to the Local Governments and Administrations noted in the margin for information and guidance.

Ordered also, that a copy be forwarded to the Finance Department for information, and that it be published in the *Gazette of India*.

F. L. O'CALLAGHAN,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

ACCOUNT.

General.

REVIEW OF BUDGET ESTIMATES OF EXPENDITURE FROM INCORPORATED LOCAL FUNDS ON CIVIL WORKS FOR 1892-93.

No. 211-A.-G., dated Simla, the 9th August, 1892.

RESOLUTION—By the Government of India, Public Works Department.

Read—

Public Works Department Resolution No. 209 A. G., dated 8th August 1892.

RESOLUTION.—A review of the Provincial Civil Works Budget Estimates for 1892-93 has already been issued. This review refers to *Civil Works* under the control of Public Works officers, the outlay on which is met from *Incorporated Local Funds*. The outlay on Public Works under district boards, which is not administered directly by the Public Works Department, is excluded, because it does not appear in the Public Works, but in the Civil estimates. This outlay amounts in Madras to Rs. 12,62,000 and in Bengal to Rs. 44,7 ,000.

2. The following statement shows the grants of the year contrasted with the actual outlay during the five years ending 1891-92, and with the Revised Estimate for 1891-92:

Province.	Outlay on Civil Works, Incorporated Local					Revised Estimate, 1891-92.	Budget Estimate, 1892-93.
	1887-88.	1888-89.	1889-90.	1890-91.	1891-92.

8. In the undermentioned provinces allotments are made for original works for which estimates have not been formally sanctioned by district boards and other authorities. The number of works and the aggregate amounts are noted against each :

Name of Province.	Number of Works.	Amount.
		Rs.
Coorg	3	4,200
Central Provinces	13	1,20,000
Upper Burma	3	21,000
Lower Burma	16	1,21,000
Assam	29	1,25,000
North-Western Provinces and Oudh	32	1,20,260
Punjab	29	1,33,840
Bombay	53	1,61,010

It is understood that no outlay on these works will be permitted until the plans and estimates have been sanctioned by competent authority.

9. No provision has been made for house-accommodation for officials during 1892-93, except in Bombay ,where it is proposed to provide hospital assistants' quarters at Taloda and Shirpur at a cost of Rs. 4,510.

10. In the Central Provinces provision to the extent of Rs. 5,000 has been made from Incorporated Local Funds for the construction of a town-hall at Bilaspur. The charge is one which should apparently be met from Municipal Funds.

The Governments of Madras, Bombay, Bengal, the North-Western Provinces and Oudh, and the Punjab.
The Chief Commissioners of the Central Provinces, Burma, Assam, and Coorg.
The Agents to the Governor General for Central India and Rajputana.
The Accountant General, Public Works Department.

ORDER—Ordered, that the foregoing be communicated to the Local Governments and Administrations noted in the margin for information and guidance.

Ordered also, that a copy be forwarded to the Finance Department for information, and that it be published in the *Gazette of India*.

F. L. O'CALLAGHAN,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

CIVIL WORKS.

Irrigation.

REVIEW OF THE REVENUE REPORT OF IRRIGATION WORKS IN SIND FOR 1890-91.

No. 197-I., dated Simla, the 16th August, 1892.

RESOLUTION—By the Government of India, Public Works Department.

Read—

Letter No. 425 I., dated the 2nd July 1892, from the Government of Bombay, forwarding the Revenue Report of the Irrigation Department in Sind for 1890-91, with a memorandum by the Commissioner in Sind and the Resolution of the Government of Bombay on the subject.

OBSERVATIONS.—The number of works in Sind for which Capital and Revenue Accounts are kept is eleven, as stated in paragraph 1 of the Review of the Report of 1889-90. The Capital outlay during and up to the end of 1890-91 is shewn in the following statement :

	Number of works.	During the year 1890-91.						Total direct and indirect to end of 1890-91.
		Works.	Establishment.	Tools and Plant.	Total direct charges.	Indirect charges.	Total direct and indirect charges.	
	1	2	3	4	5	6	7	8
		Rs.	*Rs.*	*Rs.*	*Rs.*	*Rs.*	*Rs.*	*Rs.*
MAJOR WORKS.								
Irrigation Works not charged against Revenue (Account head 49) ...	4	63,661	14,698	1,028	79,387	2,058	81,445	85,88,747
MINOR WORKS AND NAVIGATION.								
Works of which Capital and Revenue Accounts are kept (Account head 43)	7	17,474	3,495	...	20,969	489	21,458	33,50,533
TOTAL ...	11	81,135	18,193	1,028	1,00,356	2,547	1,02,903	1,19,39,280

2. Capital outlay was incurred on two works only—the Eastern Nara system and the Fuleli Canal. On the former it amounted to Rs. 81,445, the principal works executed being the construction of a regulator on the Nara Canal and the embankment of the right bank of the Nara from Kipra to the head of the Thar Canal. On the Fuleli Canal the Capital outlay amounted to Rs. 21,458, the principal work being the excavation of an escape channel.

3. The construction estimates of two canals, the Begari and Unharwah, were closed with effect from the end of the year under review. The following are the financial results of these two canals to the end of 1890-91 :

Canal.	Capital outlay.	Net revenue.	Simple interest.	Net profit.
	Rs.	*Rs.*	*Rs.*	*Rs.*
Begari ...	16,73,079	24,93,298	11,50,217	13,43,081
Unharwah ...	3,39,128	1,91,760	78,298	1,13,462

It is said that some further outlay on the Unharwah will be necessary under the rules for Open Canal outlay.

4. The following figures give the mileage of canals and bunds for the whole of the province:

	1889-90.	1890-91.
Canals	5,924	5,944
Bunds	653	653

5. The actual financial results of the year for the works for which Capital and Revenue Accounts are kept are shown in detail in the following statement. The aggregate figures for the works for which only Revenue Accounts are kept are also given:

Canal.	Total Direct and Indirect Capital outlay to end of 1890-91.	Gross Revenue collected. Irrigation Revenue.	Miscellaneous Receipts.	Total.	Working Expenses. Direct.	Indirect.	Total.	Net actual Revenue.	Deduct average Net Revenue before Improvements.	Balance or Net Revenue due to Capital Expenditure.	Percentage of Net Revenue on Capital outlay.
1	2	3	4	5	6	7	8	9	10	11	12

* Separate figures are not available.
† Exclusive of a decrease of Rs 1,402 in the suspense balances.

6. The gross revenue collected from the Major Works was less by Rs. 1,22,996 than during the previous year, the falling off being attributed to the less favourable character of the inundation, to floods, and to the fact of the Begari and Unharwah Canals having worked badly. The maintenance of the Major Works cost Rs. 12,703 less than in 1889-90, but the percentage of return fell from 8·54 to 7·18.

On the other hand, the net revenue derived from the Minor Works for which Capital and Revenue Accounts are kept showed an improvement of Rs. 57,875.

7. The interest charges for the year on the four Major Works amounted to Rs. 3,30,616, and to the end of the year to Rs, 57,26,994. The balance of receipts to the end of the year after meeting the interest charges was Rs. 18,18,474.

8. In the reviews of the reports for the two previous years the Government of India drew attention to the fact that while the figures representing the working expenses were for the official year, those representing the collections were partly for the official year and partly for the revenue year which ends on July 31st, and it was suggested that figures for identical periods might be made available. The matter has been under investigation by the Bombay Government, but the result of enquiries made has been to show that in order to obtain figures exhibiting the irrigation share of the land revenue for the financial year a large outlay for additional establishment would be required, and the figures would not be absolutely accurate. For these reasons the Bombay Government in letter No. 62 A. I.—623, dated 19th April 1892, said that any change in the direction indicated appeared undesirable. The Government of India concurs in this view, and the question need not be further pursued.

9. The following statement gives the assessed revenue for the year, and compares it with the irrigated area. Of the assessed revenue, 90 per cent. is the water share and 10 per cent. the land share:

Canal.	Area irrigated. 1890-91. Government land.	Jaghir.	Total.	1889-90. Government land.	Jaghir.	Total.	Assessed water-rates. 1890-91. Government land.	Jaghir.	1889-90. Government land.	Jaghir.	Rate per acre irrigated. 1890-91. Government land.	Jaghir.	1889-90. Government land.	Jaghir.

10. The area assessed for irrigation showed a falling-off of 146,346 acres compared with the previous year. There was a reduction of 154,647 acres in the area of Government land cultivated and an increase of 8,301 acres in the area of jaghir land. The inundation was fair, the maximum height reached on the Bukkur gauge on the Indus being 16 feet at the end of August; but the river fell early in September. The only breaches in the river embankments were in Shahbandar District. The rainfall was more abundant than during the previous year, and was well distributed.

11. The following figures exhibit the areas cultivated under kharif and rabi crops respectively:

	Kharif acres.	Rabi acres.
Government land	1,596,939	358,218
Jaghir	203,341	44,975
TOTAL ...	1,800,280	403,193

12. Of the total jaghir cultivation, 63,744 acres were in Khelat territory and 184,572 acres in Sind. The total assessment for the year on jaghir land amounted to Rs. 1,33,044. If this land had been assessed at the full rates levied on Government land, the assessment would have been Rs. 6,22,394, as shown by the Superintending Engineer in paragraph 11 of his report. The difference of assessment amounted therefore to Rs. 4,89,350 against Rs. 4,25,126 in the previous year.

The balance of jaghir assessment remaining unrealised at the beginning of the year amounted to Rs. 27,127. This had increased by the close of the year to Rs. 39,180. The increase occurred principally in Khelat, and is attributed partly to an increase in the demand, and partly to the fact that the collection establishment was for some time engaged in census work.

13. The following statement exhibits the distribution of the outlay on Revenue account:

Canal.	1890-91. New works and Repairs.	1890-91. Establishment.	1890-91. Tools and Plant.	1890-91. Indirect charges.	1890-91. Total.	1889-90. Total.
1	2	3	4	5	6	7
Major Works.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Irrigation Works not charged against Revenue—						
Desert Canal	28,294	22,830	220	1,209	52,553	52,325
Unharwah	8,851	6,786	87	328	16,052	16,003

Total ...	4,93,221	3,33,649	2,489	19,515	8,48,874	8,36,946
Per acre irrigated ...	...	...	...	...	0·66	0·61
Minor Works.						
Works of which only Revenue accounts are kept ...	6,55,500	3,48,206	1,513	...	10,05,219	10,20,136
Per acre irrigated ...	...	...	...	...	1·10	1·05
Agricultural Works	1,81,214	50,387	2,152	...	2,33,753	1,91,333

14. The separation of the outlay on Agricultural Works from that on Irrigation Works proper, to which reference was made in paragraph 12 of the Review on the Report for 1889-90, has now been carried into effect in the general statement furnished by the Examiner of Public Works Accounts and in the tables in the Resolution of the Bombay Government on the report. But in the tables appended to the Superintending Engineer's report—and in the majority of the tables in that report this separation is not effected—the figures relating to Major and Minor Works for which Capital and Revenue Accounts are kept, Minor Works for which only Revenue Accounts are kept, and Agricultural Works being all intermingled, the division drawn being that of canal districts. The report is, however, mainly a financial review of the operations of the year, and for the sake of clearness, and in order to permit of comparison with the Irrigation Revenue Reports from other Provinces, it is desirable that the figures should be classified according to the financial heads of account. This distinction is observed in the Irrigation Revenue Report prepared annually for the Bombay Presidency, excluding Sind; and the Governor General in Council would be glad if future reports for Sind were to be prepared on that model.

15. The expenditure on new works charged to the Revenue Account amounted to Rs. 3,52,620, of which Rs. 1,78,549 was on the excavation of the Pritchard Canal and Rs. 73,567 on the construction of the new loop to the Kashmor bund. The Pritchard Canal was opened in July 1890, but owing to a change in the course of the river a large amount of silt was swept into it, and it was therefore of but little use. The Kashmor bund was completed at a total cost of Rs. 1,81,666, but shortly after completion the river, after having come within 170 feet of the toe of the bund, suddenly took a course several miles to the east.

The principal expenditure on repairs was on account of silt clearance and repairs to bunds, and amounted to Rs. 4,80,213 and Rs. 1,26,909 respectively.

16. The establishment charges were divided as follows:—

		Rs.
Major and Minor Works for which Capital and Revenue Accounts are kept.	Direction	22,595
	Executive	91,517
	Share of collection charges ...	2,19,537
	TOTAL ...	3,33,649
Minor Works for which only Revenue Accounts are kept.	Direction	1,46,573*
	Executive	
	Share of collection charges ...	2,01,633
	TOTAL ...	3,48,206
Agricultural works ...	Direction	49,556*
	Executive	
	Share of collection charges ...	831
		50,387

17. The percentage on the gross revenue of the cost of revenue management (including collection charges) was 8·61 for the works for which Capital and Revenue Accounts are kept, the percentage of the cost of up-keep, excluding indirect charges, being 22·60, making a total of 31·21 per cent. The cost of working per acre irrigated by the same works amounted to Rs. 0·66.

18. The expenditure on supervising and watch and ward (abkalani) establishment, which is separately charged against repairs, amounted to Rs. 1,76,101, which is Rs. 5,501 less than during the previous year.

19. The principal crops irrigated during the kharif season were:—

	Acres.
Jowár (*Sorghum vulgare*)	342,139
Bájra (*Panicillaria spicata*)	263,883
Rice	446,674
Other crops	196,601

*Details not available.

The area irrigated by flow was 820,227 acres and by lift 429,070 acres. The area irrigated by the larger canals per cubic foot of supply ranged from 54 acres in the case of the Begari to 32 acres in that of the Ghar canal.

20. The remissions granted during the year amounted to Rs. 67,845, which is much less than the average. The demands on Government land outstanding at the end of the year were Rs. 85,467.

21. The occupancy rights in 35,207 acres were sold during the year, realising Rs. 1,10,532, 4 per cent. on the irrigation share ($\frac{9}{10}$) of which was credited to the canals, and amounted to Rs. 3,979. The total credit from this source amounted to Rs. 15,066.

22. There was an expenditure of Rs. 2,926 debited to the Karachi Canals under the head Agricultural Works principally on account of the mathematical instrument depôt at Karachi.

23. The report was received by the Government of India on July 8th, which is nearly a month later than that for the previous year. The Government of India has repeatedly drawn attention to the late submission of the report, and the special attention of the Government of Bombay is again invited to this point.

24. The report contains much interesting information, but, in addition to the revision in arrangement referred to in paragraph 14, the attention of the Bombay Government is invited to the fact that the statements prescribed in Resolution No. 166 I. of 11th July 1885 are not fully furnished, and of those that are furnished, Statement III C, giving the demands and realizations of the year on account of works for which Capital and Revenue Accounts are kept, appears to include the figures relating to jaghir land only. Statements IA, I and II D (these are navigation statements, and are not required for Sind), I—IVE, and IF have been omitted. Most of the information required for the preparation of these statements is given in the various tables appended to the Superintending Engineer's report, and there should be no difficulty in obtaining such figures as are not already given, as is done in other Provinces. The Government of India, therefore, requests that the Government of Bombay will endeavour to arrange to have all these statements (except I and IID) submitted in full either with the report for 1891-92, or, if that is not possible, with the report for the succeeding year.

25. In paragraph 3 of his note on the Report the Commissioner in Sind observes that the maintenance of the irrigation revenue in Sind at its present high figure, in spite of difficulties caused by the Indus being untrained and uncontrolled, and of damages by floods, is a very satisfactory index of the gradual extension of sure and permanent as opposed to risky cultivation. The Government of Bombay endorses this view, and is of opinion that "taking a broad view of the situation, the results of the year under report are the most satisfactory Sind irrigation has ever exhibited." The Governor General in Council is glad to receive these assurances of the steady development of irrigation in Sind, and concurs in the remark of the Bombay Government that the results of the year are creditable to the Superintending Engineer, Mr. Thompson, and to the officers of the Revenue and the Public Works Departments in Sind.

ORDER.—Ordered, that a copy of this Review, of the Report, and of the Resolution by the Government of Bombay be forwarded to the Revenue and Agricultural Department for information.

Ordered also, that a copy of this Review be forwarded to the Government of Bombay for information, and that copies of this Review, of the Report, and of the Resolution by the Government of Bombay be forwarded to the Governments noted in the margin in the Public Works Department for information.

The Governments of Madras, Bengal, the North-Western Provinces and Oudh, and the Punjab.

Ordered further, that this Review be published in the Supplement to the *Gazette of India*, and that copies of this Review be forwarded to Her Majesty's Secretary of State for India.

F. J. HOME, *Colonel, R.E.*,
Deputy Secretary to the Government of India.

CALCUTTA,
The 26th July 1892.

G. C. MACONCHY,
Under-Secy. to the Govt. of Bengal, P. W. Dept.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the week ending at 8 a.m. on Saturday, August 20th, 1892.

During the week under review, though monsoon conditions have continued uninterruptedly over the greater part of the Indian region, the current has not been so strong as of late, and in two regions there occurred during the week a cessation of rainfall which appeared to betoken a weakness of the general monsoon current. Quite early in the period under review the isobaric lines over the Bay opened out in a manner which indicated the presence of low pressures over the centre of the Bay. Into this area of relatively low pressure the monsoon current coming up the Bay was drawn, and as a consequence penetrated in only a very feeble manner into Bengal; hence rain fell off in that Province, so that on the 14th, 15th, and 16th the rainfall record showed only a light and scattered fall. On the 17th the monsoon began to blow slightly stronger at the head of the Bay, and rain in Bengal became heavier and more general; but accompanying this change in North-East India there occurred a change of the opposite character in North-West India, where the monsoon current commenced to thin off. On the 18th, 19th, and 20th hardly any rain fell over North-West India. Over the Peninsula, the central parts of India, and over Burma the rain has been fairly continuous, and, though the amounts have on the whole been light or moderate, there have occurred several instances of heavy local downpours.

The chart of the 14th showed a fairly normal distribution of pressure. Readings were highest in the extreme south and lowest over the Western desert, while relatively low pressures existed over the Gangetic plain and with slight depressions—one off the Circars Coast, and one over Lower Burma. The winds were north-westerly on the Circars Coast and at some stations in Lower Burma, but elsewhere blew from the normal directions. Rain had fallen very generally, and had been heavy in the Punjab. On the morning of the 15th the depression from Lower Burma had advanced westward into the Bay and coalesced with the depression previously existing there, but in other respects there was little or no change. The winds were light and irregular around the Bay area, but continued fairly normal elsewhere. No rain had fallen around the north of the Bay or over the greater part of Bengal, but elsewhere rain continued general, and in the Punjab the fall remained heavy. By the morning of the 16th the shallow depression over the Bay had more or less disappeared, and rain was more general in Bengal, while, on the contrary, in the west of the Punjab there was a slight falling off. In other parts of the country rain was very general, and at Sialkot and some other north-western stations the amounts were heavy. On the 17th the general distribution was fairly normal and regular, pressure decreasing from a high pressure area in the extreme south-east to a low pressure area in the extreme north-west. Readings were, however, more uniform than usual over Northern India. There was little or no rain over Sind, Western Rajputana, and the Punjab, but in other parts of India rain was reported from almost every station, the amounts

being large on the West Coast. On the 18th there was no general change to record, except that rain had decreased over Bengal. On the 19th the distribution of pressure and the winds were generally unchanged, but the amount of rainfall had decreased throughout the greater part of India, and the fall was only heavy at a few places. On the 20th the barometer was rising over the North-West Provinces and falling elsewhere, but there was still very little general change. No rain had fallen over the Punjab plains, Western Rajputana, or Sind, and very little over the centre and east of the Peninsula. Elsewhere the fall was general, and, as on the preceding day, was heavy in a few places.

Temperature.—Owing to the partial cessation of rain in North-East India in the beginning of the week and in North-West India at the end of the week, the temperature over those regions rose somewhat, and the general temperature of the whole of India for the week shows a mean diurnal deficiency of only 0·3°:

Province.	14th.	15th.	16th.	17th.	18th.	19th.	20th.	Mean variation of week.
	°	°	°	°	°	°	°	°
Burma	+1·8	+2·2	+0·7	+2·4	+1·7	+2·5	+0·7	+1·7
Bengal and Assam	0	+1·5	+0·9	−0·2	+0·7	+1·4	+0·5	+0·7
North-West Provinces and Oudh.	−2·7	−3·2	−1·4	−1·7	−2·4	+0·3	+0·1	−1·6
Punjab	−5·4	−6·1	−6·0	−5·4	−3·1	−1·2	+1·2	−3·7
Bombay	+0·1	0	−0·7	−0·9	−1·0	+0·7	+0·9	−0·2
Central Provinces and Berar	−2·0	−1·9	+0·3	−0·2	−0·7	+1·8	+2·1	−0·1
Central India and Guzerat	−0·7	−1·6	−0·8	+0·8	+1·2	+1·1	+1·7	+0·2
Sind and Rajputana	+0·8	+0·8	+0·1	+0·8	+1·3	+1·3	+0·5	+0·8
Madras	−0·8	−1·0	−1·5	−2·2	−0·8	+0·7	+0·5	−0·7
Mean for whole India	−1·0	−1·0	−0·9	−0·7	−0·4	+1·0	+0·9	−0·3

The above table shows that from the 14th to the 18th the mean temperature of India was below the normal, and that on the 19th and 20th it was about 1° above. The provincial variations show an excess of temperature in Burma, Bengal, Assam, Central India, Guzerat, Sind, and Rajputana, and a deficiency elsewhere. In the Punjab this deficiency amounted to nearly 4° and in the North-West Provinces to 1½°, but in the other Provinces the variations were small.

Rain.—The rainfall table at the close of the summary shows that another week of general rain has been experienced, every division in India recording rain of greater or less amount. The only divisions in which the average actual rainfall has been less than an inch during the week are Deltaic Bengal, Orissa, the West Punjab, Khandeish, and Sind. The distribution shown by the column of actual rainfall is as follows:—The heaviest average amounts are 7·27 inches in the Konkan, 7·05 inches in Tenasserim, 5·90 inches in Malabar, 5·84 inches

in the Hill districts of the Punjab, 5 inches in Hyderabad (South), and 4·71 inches in Assam (Surma), while the lightest average amounts are 0·04 inch in Sind, 0·58 inch in the west of the Punjab, 0·87 inch in Deltaic Bengal, 0·93 inch in Orissa, and 0·99 inch in Khandeish. From the column of normal average rainfall it will be seen that the heaviest average amounts are 8·11 inches in Tenasserim, 7·74 inches in Assam (Surma), 6·66 inches in Arakan, and 6·43 inches in the Konkan, while the lightest average amounts are 0·26 inch in Sind, 0·39 inch in South Madras, 0·43 inch in the west of the Punjab, and 0·64 inch in the south of the Punjab. The most noticeable differences then between the average actual and average normal rainfall in the divisions are the excess over the Peninsula, the Punjab, and the Gangetic plain and the deficiency over North-East India—particularly Assam, Lower Bengal, Orissa, and Arakan. Of the fifty divisions for which a comparison is possible, thirty had more and twenty less than the normal rainfall of the week. The greatest actual excesses were 3·67 inches in Hyderabad (South), 2·18 inches in the Central Provinces (West), 1·93 inches in the Hill districts of the Punjab, 1·89 inches in the Central, and 1·88 in the South divisions of the Punjab. The greatest actual deficiences were 3·38 inches in Arakan, 3·03 inches in Assam (Surma), 2·95 inches in East Bengal, and 2·10 inches in Deltaic Bengal.

The three concluding columns of the table show the state of the seasonal rainfall, that is, the actual and normal rainfall for the period May 29th to August 20th, and the difference of the former from the latter expressed as a percentage. Accepting the opinion that a difference of less than 20 per cent. in either direction implies that the rainfall of the division is normal, the final column shows that only in two divisions, *viz.*, Deltaic and Eastern Bengal, is the seasonal rainfall deficient, and that in nineteen it is excessive. The greatest excess is in the south and west of the Punjab and in Sind, but in parts of Madras the rainfall has been much heavier than usual.

The following are the principal large totals in the different divisions:

Division.	District.	Station.	Amount.
Burma	Amherst	Thatôn	9·77 inches.
Assam	Sylhet	Sunamganj	17·39 „
Bengal	Moorshedabad	Lalgola	7·80 „
	Jalpaiguri	Falakata	8·64 „
Behar	Purneah	Kishanganj	10·98 „
North-West Provinces	Meerut	Sardhana	9·00 „
	Dehra Dun	Kalsi	13·12 „
Punjab	Umballa	Naraingarh	8·69 „
	Gujrat	Kharian	13·76 „
Malabar	South Kanara	Coondapur	12·75 „
Mysore	Tumkur	Gubbi	5·00 „
Deccan	Kolhapur	Bawda	22·01 „
Central Provinces	Nagpur	Umrer	9·26 „
Guzerat	Kaira	Borsad	8·18 „
Rajputana	Dholpur	Bari	3·09 „
Madras	Kistna	Sudder	8·22 „

PROVINCE.	DIVISION.	Rainfall data for week ending August 20th. Average actual rainfall of division.	Average normal rainfall of division.	Excess or defect in inches.	Rainfall data from May 29th to August 20th, 1892. Average actual rainfall of season to date.	Average normal rainfall since May 29th to August 20th.	Excess or defect of (seasonal) rainfall expressed as a percentage.

SIMLA, *25th August, 1892.*

W. L. DALLAS,
Assistant Meteorological Reporter to the Government of India.

J. W. P. MUIR-MACKENZIE,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 20th August.*—Rainfall heavy in parts of Kistna, Deccan districts, Karnatic, and the West Coast; good elsewhere, except in small portions of Ganjam, Vizagapatam, and Madura; in Tinnevelly the fall to date generally ample and timely. Cultivation everywhere progressing favourably and crops flourishing. Harvest begun in Central and Western districts; outturn fair to good. Pasture abundant and water-supply sufficient. General prospects very favourable. Prices much easier in Deccan and Central and Southern districts; easier in Circars; almost stationary elsewhere. FAMINE RELIEF: *Numbers on works*:—Deccan 15,799; Karnatic 1,441: *Total* 17,240 against 24,585 last week. Works closed in Salem. *On gratuitous relief*:—Deccan 392, Karnatic 163, and Central districts 72: *Total* 627 against 583 last week. Loans for wells disbursed:—Deccan Rs. 9,03,000, Karnatic Rs. 4,55,000, and Central districts Rs. 12,15,000: *Total* Rs. 25,73,000. Wells completed—626, 2,262, and 1,462: wells under construction—6,768, 2,087, and 7,930 in respective blocks. Agriculturists' loans disbursed—Rs. 1,01,000, Rs. 1,21,000, and Rs. 70,000 in respective blocks.

Bombay.—*For week ending 24th August.*—Rain throughout the Presidency Proper and in parts of Upper Sind; generally good or moderate. More rain wanted in parts of four districts. Standing crops blighted in parts of Satara and submerged by floods in parts of Sind; otherwise good. Sowing and transplantation of early-crops nearly completed. Preparations for late-crops progressing in four districts. Cotton sowing commenced in three districts. Fodder sufficient, except in parts of two districts. Agricultural stock generally good.

Bengal.—*For week ending 23rd August.*—Rainfall irregular in amount and unequally distributed. Prospects of winter rice continue generally favourable. More rain required in some parts of the Burdwan, Presidency, and Chota Nagpur divisions. In Orissa and Chittagong the rainfall is much below average. All autumn crops and sugarcane are promising. Reports of the early-rice and jute harvest now in progress continue good. Harvesting of *Eleusine coracana* and Indian-corn has also begun. Prices remain almost stationary. Fodder and water-supply are sufficient and cattle in good condition. FAMINE RELIEF: *Numbers on works*:—Bhagalpur 718 against 1,456 in previous report. *On gratuitous relief*:—Monghyr 209 against 224, and Bhagalpur 651 against 729, in previous report.

North-Western Provinces and Oudh.—*For week ending 24th August.*—Good rain has fallen everywhere, and a break is now needed. Agricultural operations are hindered in some places owing to heavy rain. Crops are doing well, and prospects are favourable. In the hill districts the early crops are ripening, and will soon be available. Prices are fairly steady.

Punjab.—*For week ending 24th August.*—Rainfall good all over the Province. Sowings of autumn crops in progress in most districts and completed in some. Weeding operations going on. Condition of standing crops generally good; they have, however, been damaged by overflowing of the rivers or excessive rain in some districts. Stock of grain insufficient in Rawal Pindi. Locusts are said to be depositing eggs in parts of the Dera Ismail Khan district. Condition of cattle good throughout. Dry fodder is scarce in two districts, but green grass is plentiful everywhere. Prices rising in three districts, falling in one, and stationary elsewhere.

Central Provinces.—*For week ending 24th August.*—Heavy rain has fallen generally during the week, and in some places a break is required for weeding. This is particularly the case in the Nimar and part of the Seoni district. In Bilaspur excessive rain has caused damage to rice on hilly land, but prospects as a whole continue very good.

Burma.—*For week ending 20th August.*—LOWER BURMA: Ploughing and transplanting in progress generally; completed in one district. Crop prospects favourable. Slight damage from insects reported from one district. UPPER BURMA: Wet-weather paddy being transplanted in all districts. In Shwebo millets have been gathered, but the outturn is small. In four other districts early sesamum is being reaped. Prospects of the crop are good in seven districts, but more rain is wanted in places. In parts of the Myingyan and Minbu districts the sesamum crops have failed. All districts have received some rain during the week, and on the whole prospects are very fair. The price of paddy has declined in two districts and risen in one; elsewhere prices are stationary. FAMINE RELIEF: *Numbers on works*:—Works still open in Shwebo, but numbers not reported.

Assam.—*For week ending 23rd August.*—Weather seasonable. Transplanting of late-rice continues. Fodder and water plentiful.

Mysore and Coorg.—*For week ending 24th August.*—MYSORE: Rainfall general. Standing crops in good condition. Prospects favourable. Prices fallen in two districts. FAMINE RELIEF:—*Numbers on works*:—Tumkur 197.

COORG: Rainfall good. Crops in good condition. Prices stationary. Water and fodder for cattle sufficient.

Berar and Hyderabad.—*For week ending 24th August.*—BERAR: Average rainfall good. Weather cool and cloudy. Autumn crops in good condition, except in two taluks, where crops have been damaged by excessive rain. Weeding in progress. Fodder sufficient. Cattle healthy. Prices stationary.

HYDERABAD: Rain during week over 2 inches. Standing autumn crops are in good condition, and weeding of irrigated crops in progress. Tanks have received sufficient quantity of water. Prices falling.

Central India.—*For week ending 24th August.*—Rain generally sufficient for agricultural purposes. Condition of agricultural stock improved in the Neemuch district, but continues poor in Bhopal. Weeding and ploughing continue in all parts. Fodder good and plentiful. Prices steady.

Rajputana.—*For week ending 24th August.*—Rainfall good and general. Agricultural operations progressing, and standing crops generally very satisfactory, except in places in the Ajmere district, where the maize and cotton crops have partly suffered from excessive rain. Harvest prospects fair; an average outturn is expected in Ajmere-Merwara. Agricultural stock much improved. Pasturage sufficient throughout, but dry fodder scarce. Prices steady in Ajmere; falling in Merwara. Famine-affected areas in Ajmere-Merwara decreasing, but precise details not available. FAMINE RELIEF: *Numbers on works*:—Ajmere-Merwara 14,226, Marwar 4,223, Kishengarh (report not received), and Bikanir 610: *Total* 19,059 against 21,884 last week (excluding Kishengarh). *On gratuitous relief*:—Ajmere-Merwara 2,729, Marwar 2,096, Kishengarh (report not received), and Bikanir 166: *Total* 4,991 against 5,132 last week (excluding Kishengarh).

Nepal.—*For week ending 18th August.*—Weather close, warm, and showery. Prospects of crops good.

J. W. P. MUIR-MACKENZIE,
Offg. Secretary to the Government of India.

* In addition to this amount Rs. 16,05,769 was incurred on account of land for the railway, while in the hands of the Company and charged to General Revenues.

† Converted at the contract rates of exchange.

‡ Although for convenience classed among State railways, this line is the property of the Bengal Central railway Company, Limited.

§ This line is the joint property of the British Government and the Bhopal State. The net earnings are divided between the British Government and Bhopal State in proportion to the capital contributed by each. The British Government has contributed Rs. 15,13,568 towards construction; the balance being found by the Bhopal State.

‖ Exclusive of Rs. 41,029 charged to capital.

** Bareli-Rampur-Moradabad railway only.

(a) Working expenses include share of surplus profits paid to the Bombay, Baroda and Central India railway Company, during 1891 Rs. 8,78,835, to end of 1891, Rs. 42,96,942.
(b) Includes Rs. 11,88,73,361 being Capital outlay incurred by the late Sind, Punjab and Delhi railway Company on final heads of account up to 31st December 1885.
(c) Excludes outlay on Bolan temporary line charged to the Military Department, amounting to Rs. 34,54,457.
(d) Includes annuity charges.
(e) Includes Rs. 48,53,830 expended by Government on the Katni-Umaria railway up to the 31st March 1888.
(f) Excludes the net receipts accruing to the Mysore State to 30th June 1886, amounting to Rs. 7,33,828.
(g) Excludes charges affecting the Mysore State to 30th June 1886, amounting to Rs. 12,61,970.
(h) Excludes £750,000 amount paid up and withdrawn by the Company under the old contract, prior to 1st July 1885. The expenditure is, however, included in column V.
(i) Loss to the State under the terms of the new contract. The amount does not include interest advanced to the Company under the old contract.
(k) Working expenses include surplus profits and contribution to Provident Fund paid to the Company, during 1891 Rs. 2,58,845, to end of 1891, Rs. 3,90,026.
(l) Includes Rs. 1,65,75,084 expended by Government on the Bellary-Kistna railway up to 31st December 1891.
(m) Includes Rs. 20,405 on account of interest on overdrawn Capital.
(n) Working expenses include surplus profits and contribution to Provident Fund paid to the Southern Mahratta railway Company, during 1891 Rs. 96,004, to end of 1891, Rs. 2,81,899.
(o) Working expenses include share of transfer of this line to Southern Mahratta railway is recoverable from the Mysore Durbar.
(p) The net charge for interest on Capital outlay since date of transfer of this line to Southern Mahratta railway is recoverable from the Mysore Durbar.
(q) The expenditure in this column does not take to account a sum of Rs. 7,27,797 borne by Government on account of land charges prior to 1st July 1885, on which the capitalized value and revenue lost to the State amounted to Rs. 4,511.
(r) Working expenses include the share of net earnings paid to the Company during 1891, Rs. 73,429.
(s) Includes Rs. 2,00,06,968 net loss on old South Indian Guaranteed Company up to 31st December 1890.
(t) Excludes Rs. 15,64,171 debited to Land and Control in respect of Company up to 31st December 1890.
(u) Excludes Rs. 5,45,654 debited to Land and Control in respect of Company up to 31st December 1890.
(v) Excludes Rs. 25,019, spent on line under construction.
(w) Excludes outlay on Tawi bridge.
(x) The open line is worked by the Burma State railway—Mandalay section.
(y) Includes Rs. 2,04,188, value of Mu Valley railway stores, for rolling stock for that line.
(z) Includes 97·28 miles of the old Quetta loop which is being reconstructed on a new alignment, 12·60 miles of home line constructed, but not worked, and the Jammu and Kashmir railway (British section).

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the week ending at 8 a.m. on Saturday, August 27th, 1892.

Over Guzerat, Sind, the west of Rajputana, and the south and west of the Punjab the monsoon current, though fairly strong, has been generally rainless; but in all other parts of India ordinary monsoon conditions have prevailed, and the weather has been steadily rainy. From the 21st to the 25th the force was generally light, more especially on the West Coast, and, though patches of heavy rain fell, the general rainfall of the country was light or moderate. After the 25th, however, the gradients increased, the wind rose steadily along the west coast of India, and the rainfall became heavier. This was particularly the case on the Konkan Coast and in the North-West Provinces, where falls of between 4 and 7 inches were recorded on the last two days of the week. Owing to the lightness of the rainfall during the earlier part of the week, there occurred a rise of temperature over a large part of India, and the mean temperature was about normal over nearly the whole country.

On the 21st pressure was highest over the extreme south of the Indian region, lowest over the Indus Valley, and relatively low over the west of Bengal and the east of the Central Provinces. The barometer was rising, except across the head of the Peninsula. The slight depression which had developed off the Circars Coast had passed inland, and the centre lay near Sambalpur. The winds exhibited the ordinary monsoon circulation, but the force was lower than usual on both sides of India. There was practically no rain over Guzerat, Sind, Rajputana, or the Punjab to the west of Ludhiana, but in all other parts of India the rainfall was general. The heaviest falls were 3 inches and above at Bhamo, Cochin, and Gopalpore; 2 inches and above at Benares and Ludhiana. At all other stations the amounts were moderate or small. On the morning of the 22nd the depression which lay over Western Bengal had disappeared, and a fresh shallow depression had appeared off the Circars Coast; but this was the only change of importance. Gradients were somewhat slighter, but the winds had increased in force both on the West Coast and at the head of the Bay. The directions on the east coast of the Peninsula were slightly affected by the depression above noticed, but elsewhere the general circulation remained normal. The rainfall was the same as on the previous day, being very general, except in parts of North-West India. At Sibsagar 4 inches were received, and at Tounghoo, Akyab, and Neemuch 2 inches and over; but these were the largest amounts. The chart of the 23rd showed that practically no change had occurred in the distribution of pressure. The shallow depression off the Madras Coast still kept about the same position and the same intensity. The wind had shifted to south on the Konkan Coast and remained feebly cyclonic on the Madras Coast, but was otherwise little changed. There had been a slight extension of rainfall into the North Punjab, and the rainfall was generally somewhat heavier along the line of the hills; but, with these exceptions, the general conditions were unaltered. The heaviest amounts were 3 inches and above at Jalpaiguri and Umballa, and 2 inches and above at Kindat, Darjeeling, and Calicut. On the 24th the depression from the East Coast commenced a westerly movement into the Peninsula, and the highest pressures were reported from Burma; but there was no other change of importance. The winds over the greater part of the Peninsula were affected by the advance of the depression, the directions on the West Coast becoming variable, and those over the centre and east of the Peninsula feebly cyclonic. Elsewhere the general circulation remained unchanged. The only important change in the rainfall conditions was the increased rainfall over the south of the Peninsula—a change also due to the westerly advance of the depression. The heaviest amounts recorded were 2 inches and above at Kindat, Silchar, Sialkot, and Trichinopoly. On the

25th the barometer was falling over North-East India and rising elsewhere, and the depression from the Bay, the centre of which lay apparently near Hyderabad (Deccan), had nearly filled up. Pressure remained highest in Tenasserim. The winds were variable and feebly cyclonic over the Peninsula, and generally southerly to south-westerly elsewhere. There was no rain in the north of the Bombay Presidency or in the Indus Valley, but in other parts of India the fall was very general. It was again heaviest along and over the hills, the following being the heaviest amounts:—Five inches and above at Chakrata and Mussoorie, 4 inches and above at Mount Abu, 3 inches at Rawal Pindi, and 2 inches at Dinajpur. On the 26th the barometer was falling in the north and rising in the south, so that gradients were increasing. The wind was still variable and feebly cyclonic over the Peninsula, and generally southerly (south-west to south-east) elsewhere. The general distribution of rainfall was the same as on the preceding day, but the area of heaviest fall had been transferred to the West Coast. The following were the principal amounts:—Seven inches at Mormugao, 5 inches at Dhubri, and 2 inches and over at Darjeeling, Dinajpur, Bahraich, Meerut, Karwar, and Madras. The chart of the 27th showed a further barometric fall in North-West India and a further rise in the south, so that gradients had become very steep. The wind had risen and shifted to its normal monsoon direction along the West Coast, but was still light at the head of the Bay. There was practically no rain over the greater part of North-West India, and only light scattered showers over Lower Bengal; but elsewhere the fall continued general, and over the North-West Provinces and along the West Coast heavy. Seven inches was received at Bahraich, 5 inches at Bareilly, 4 inches and above at Goa, Karwar, and Mangalore, and 3 inches and above at Patna, Dehra Dun, Mormugao, Ratnagiri, and Bombay.

Temperature.—The mean diurnal variation for the whole of India for the week under review was + 0·2°, so that on the average for the whole country there was a rise of ½° as compared with last week.

The following table shows the variations of the mean temperature from the normal on each day of the week for the principal Provinces of India:

Province.	21st.	22nd.	23rd.	24th.	25th.	26th.	27th.	Mean variation of week.
	°	°	°	°	°	°	°	°
Burma	−0·3	−0·2	−0·2	+0·8	+0·4	+0·9	+1·5	+0·4
Bengal and Assam	+1·1	+0·8	−0·7	−1·4	−0·6	−0·7	−2·1	−0·5
North-West Provinces and Oudh.	−0·4	+1·3	+2·3	−1·2	−1·7	−1·0	−2·6	−0·5
Punjab	+1·4	+1·5	+0·8	+0·8	−0·8	−0·9	+0·7	+0·5
Bombay	+0·5	−0·7	−0·4	+0·8	+0·7	+0·7	−1·0	+0·1
Central Provinces and Berar	+0·8	−1·0	+1·2	+2·0	+1·4	+2·5	+1·6	+1·2
Central India and Guzerat	+1·8	+1·1	+1·3	+0·6	−0·2	+1·6	+1·9	+1·2
Sind and Rajputana	+1·9	+0·4	+1·9	+1·8	+1·2	+0·9	+1·4	+1·4
Madras	−0·2	−2·1	−2·3	−2·1	−2·2	−1·1	−0·9	−1·6
Mean for whole India	+0·7	+0·1	+0·4	+0·2	−0·2	+0·3	+0·1	+0·2

The above figures show that the general temperature of India has been nearly normal throughout.

Rain.—The daily distribution of rain has been described in the earlier portions of the summary, and the totals for the week are given in the concluding table. In every division of India some rain has been received, though in Sind and the west of the Punjab the average fall for the week was of no practical importance, amounting in the former division to only 0·01 inch, and in the latter to only 0·03 inch. The distribution of the actual average rainfall according to the average in the different divisions was as follows:—The heaviest amounts were 9·33 inches in Assam (Surma), 8·83 inches in North Bengal, 7·14 inches in the Konkan, and over 6 inches in Behar (North), in the Punjab Hill districts, and in Malabar; while the smallest average amounts are 0·36 inch in Kathiawar, 0·03 inch in the Punjab (West), and 0·01 inch in Sind. The distribution of rainfall according to the normal differs considerably from that given by the actual averages. Thus the heaviest normal amounts are 7·96 inches in Tenasserim, 6·68 inches in Arakan, 6·15 inches in Assam (Surma), 4·58 inches in the Konkan, 4·22 inches in Coorg, and 4·19 inches in North Bengal, as in the actuals the lowest amounts are found over the extreme north-west of India. The principal differences between the actual and normal distributions are then the large deficiency over Burma, the large excess over Assam and North Bengal; and the minor differences are the general excess over the Gangetic plain and Madras, and the deficiency over the central parts of the country.

The third column of the table shows that of the fifty divisions where a comparison is possible, no fewer than thirty had more rain than usual during the week, and only eighteen had less. The region of deficient fall embraced the following divisions, *viz.*, all the Burma divisions, East, Deltaic, and Central Bengal, Orissa, Chota Nagpur, the Punjab (South and West), the Central Provinces (Central and East), Guzerat, Kathiawar, Sind, the East Coast (North (*a*)), and Madras (South). In all the other divisions there was an excess. The greatest actual deficiency was 5·78 inches in Tenasserim and the greatest actual excess was 4·64 inches in North Bengal. Relatively to the normal, however, the excess in Madras was as great as, or greater than, in any other part of India.

The three final columns of the table show the state of the seasonal rainfall, that is, the actual and normal rainfall of the period May 29th to August 27th, and the excess or defect of the former compared with the latter. Accepting that a variation of less than 20 per cent. in either direction implies a normal rainfall, the last column shows that Burma, East Bengal, Assam (Brahmaputra), Deltaic Bengal, Central Bengal, Orissa, Chota Nagpur, Behar (South), the Punjab Hill districts, Malabar, Madras (South Central), Coorg, Mysore, the Konkan, the Central Provinces (West and Central), Guzerat, Kathiawar, Central India (East), and Rajputana (West) have all received their normal amount. In the divisions of East Bengal, Deltaic Bengal, and the East Coast (North (*a*)) there has been a deficiency, while in all the remaining divisions there has been an excess. This excess has been most marked in the Indus Valley and in parts of Madras and of the Gangetic plain.

The following are the largest amounts recorded in the different divisions during the week:

Division.	District.	Station.	Amount.
Burma	Shwegyin	Sudder	6·11 inches.
Assam	Khasia Hills	Cherra	24·12 „
Bengal	Backerganj	Patuakhali	7·11 „
	Jalpaiguri	Falakata	15·30 „
Behar	Patna	Dinapur	9·16 „
	Champaran	Bagaha	13·08 „
North-West Provinces	Bahraich	Sudder	14·43 „
	Garhwal	Kotdwara	16·51 „
Punjab	Umballa	Naraingarh	12·31 „
	Kangra	Palampur	15·50 „
Malabar	South Kanara	Hosdrug	16·53 „
Konkan	Thana	Bassein	17·44 „
Deccan	Kolhapur	Bawda	18·96 „
Central Provinces	Hoshangabad	Harda	6·55 „
Madras	Nellore	Ongole	12·30 „
	Chingleput	Sudder	8·26 „

Simla, *1st September, 1892.*

W. L. DALLAS,
Assistant Meteorological Reporter to the Government of India.

J. W. P. MUIR-MACKENZIE,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 27th August.*—Rainfall very heavy in Karnatic and on the West Coast; good in the Circars, Deccan, and Central districts; moderate in the Southern districts. August rainfall exceptionally heavy in Karnatic and Deccan and continues now, doing injury in parts. Cultivation proceeding briskly everywhere. Crops generally thriving, but need fine weather in parts. Fair to good harvest of early-crops proceeding. Pasture and water-supply ample. Condition of cattle good. Prices much cheaper in Deccan; cheaper elsewhere, though the fall in the Circars and the West Coast districts is slight. FAMINE RELIEF: *Numbers on works*:—Deccan 13,234; Karnatic 425: *Total* 13,659 against 18,146, the revised figures for last week. *On gratuitous relief*:—Deccan 320; Karnatic 136: *Total* 456 against 625 last week. All relief closed in the Central districts. Loans for wells disbursed:—Deccan Rs. 9,15,000, Karnatic Rs. 4,58,000, and Central districts Rs. 12,32,000: *Total* Rs. 26,05,000. Wells completed—631, 2,323 and 1,553; under construction—6,803, 2,036, and 8,017 in respective blocks. Agriculturists' loans disbursed—Rs. 10,20,000, Rs. 1,21,000, and Rs. 71,000 in respective blocks.

Bombay.—*For week ending 31st August.*—Rain throughout the Presidency Proper and in one district of Sind; generally good, but more rain wanted in parts of six districts. Cotton in parts of Broach and Baroda damaged by heavy rain; standing crops otherwise good, except where flooded in Sind. Transplantation of early-crops and preparation for late-crops progressing in several districts, and cotton sowing in progress in Karnatak and Kathiawar. Fodder sufficient and agricultural stock good.

Bengal.—*For week ending 30th August.*—Rainfall fairly general over the whole Province; heavy in North Bengal and Behar. Transplanting of winter rice is being rapidly completed, but in some parts of the Burdwan, Presidency, Orissa, and Chota Nagpur divisions more rain is much wanted. Harvesting of early-rice and jute still proceeding and outturn good. Harvesting of autumn crops in Behar has generally begun, and prospects are favourable. Prices are beginning to fall in some of the Behar districts; elsewhere almost stationary. Supply of fodder and water ample, and condition of cattle good. All relief operations in Monghyr and Bhagalpur have been closed. Latest report from Cuttack shows that some distress prevails in the inundated tract in the south-east of the district.

North-Western Provinces and Oudh.—*For week ending 31st August.*—The continued heavy rain has done injury to crops in some districts, and is retarding ploughing for the autumn crop. A break is now much needed. Prospects, however, are good. Prices generally steady, but show a tendency to rise in a few places.

Punjab.—*For week ending 31st August.*—Rain has fallen in all but three districts. Sowings of autumn crops completed in most districts. Weeding operations going on. Ploughings and sowings of spring crops commenced. Standing crops in good condition, except in one district. Some crops are reported to have been damaged in Multan by overflowing of river, by excessive rain in two other districts, and by insects in one district. Locusts appeared in Jhelum and Rawal Pindi, and deposited eggs in the latter district; the eggs were destroyed. Cattle are in good condition throughout the Province. Dry fodder scarce in some districts, but green grass is plentiful throughout. Prices rising in five districts, but generally stationary elsewhere.

Central Provinces.—*For week ending 31st August.*—Weather has continued rainy and cloudy, but more rain is required for the rice crops in Sambalpur, while a break is needed in two other districts, where the young crops are suffering from excessive moisture. In Raipur insects are injuring rice; elsewhere prospects continue good.

Burma.—*For week ending 27th August.*—LOWER BURMA: Ploughing, sowing, and transplanting in progress, but finished in some districts. Standing crops thriving everywhere, except in part of one district, where a small area has been destroyed by floods, and in another district, where slight damage from insects is reported. UPPER BURMA: All districts have received good rain during the week. Agricultural operations are progressing favourably and prospects are generally good, but more rain is still wanted in parts of the Shwebo district. Sesamum has been injured by excessive rain in places. The price of paddy has risen in eight districts, but has decreased in Bhamo and the Southern Shan States. FAMINE RELIEF: Works still open in Shwebo, but numbers not reported.

Assam.—*For week ending 30th August.*—Weather rainy. Transplanting of winter paddy continues. Fodder and water plentiful.

Mysore and Coorg.—*For week ending 31st August.*—MYSORE: Rainfall good in one district. Crops and prospects good. Prices fallen in one district. FAMINE RELIEF: *Numbers on works:*—Tumkur 173 against 197 last week.

COORG: Rainfall heavy. Standing crops in good condition. Prices stationary. Water and forage sufficient for cattle.

Berar and Hyderabad.—*For week ending 31st August.*—BERAR: Rainfall good. Weather cool and cloudy. Standing crops in good condition, except cotton and millets, which have been injured on account of excessive rainfall almost everywhere. Weeding continues. Fodder and water sufficient. Cattle healthy. Prices almost stationary.

HYDERABAD: Rain during week over 3 inches. Standing autumn crops are thriving. Sowing of irrigated crops finished. Prices unchanged.

Central India.—*For week ending 31st August.*—Rain throughout Central India; a break is wanted in Bundelkhand, where ploughing and weeding operations are impeded owing to excessive rain. Crops in parts of Bhopal

also slightly damaged by rain. More rain is, however, still wanted in parts for tanks and wells. Cattle generally in good condition. Pasturage plentiful. Prices of food-grains slightly fallen in one Agency, but risen in another; elsewhere steady.

Rajputana.—*For week ending 31st August.*—Good rainfall during the week. Agricultural operations generally satisfactory. Standing crops and harvests prospects good. An average outturn is expected in Sirohi and Ajmere-Merwara. Excessive rain has caused slight damage to crops in parts. Agricultural stock generally in good condition. Pasturage sufficient throughout, but dry fodder not procurable in Ajmere-Merwara. Prices falling in five States; elsewhere steady. Area affected in Ajmere-Merwara has decreased. FAMINE RELIEF: *Numbers on works:*—Ajmere-Merwara 11,758 against 14,226 last week. Marwar report not received. *On gratuitous relief:*—Ajmere-Merwara 2,421 against 2,729 last week; Kishengarh 42; and Marwar, report not received.

Nepal.—*For week ending 25th August.*—Weather rainy during the week. Prospects good.

J. W. P. MUIR-MACKENZIE,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Note on Agricultural Conditions and Prospects in India for the month of July.

The favourable character of the season announced last month has been fully maintained. Below are given the usual tabular statements, from which it will be seen that by the end of July the number of persons in receipt of relief had, except in Madras, Ajmere-Merwara, and Rajputana, dwindled to trifling proportions. The decrease has continued steadily since, and the last traces of anxiety have been removed in the provinces just named as exceptional by the occurrence of abundant rain just at the time when the pasture and young autumn-crops stood most in need of it.

I.

II.

Table showing the programme of works available for relief purposes; the expenditure on relief-works, gratuitous relief, and advances to cultivators; and the amount of revenue suspended.

Province.	Number of districts.	Maximum number for whom relief is expected to be required in case of serious famine.	Number for whom relief was provided in gazetted programme of relief-works for three months.	Number for whom relief can be provided by works remaining on programme on date of report.	Expenditure on relief-works and gratuitous relief since 1st April 1891 to end of month under report.	Advances since 1st April 1891 to end of month under report.	Revenue suspended since commencement of scarcity.
					Rs.	Rs.	Rs.

(a) Thathameda or house-tax actually remitted.
(b) Rough estimate.

2. The manner in which the crisis in its varying degrees of severity has been met in the Provinces and Native States affected is a source of cordial satisfaction. The local officials have everywhere exhibited energy and resource, and have received constant sympathy and support from the superior officers and Heads of the Administration. The Durbars of Native States have also without exception shown commendable readiness to adopt the measures required for the relief of their people. Remarkable illustration has been obtained of the value for purposes of famine administration of those Codes of executive orders which were framed after the last great famine upon the principles and recommendations embodied in the report of the Famine Commission.

3. The areas simultaneously assailed by the recent scarcity were unusually extensive, and over considerable portions of them the failure of rain and the consequent shortness of the harvests have not been equalled since 1876-77. Nevertheless, as gauged by the numbers in receipt of relief, the recorded mortality and the reports of the physical condition of the people, the suffering, and pressure have not been excessive. Prices throughout have been considerably lower than those of the corresponding months in 1876-77. These satisfactory features are chiefly attributable to the great improvement in communications by road and rail which has taken place during the intervening fifteen years. The effect of these protective measures will be permanent, and justifies the expectation that scarcities in the future will usually resemble the present comparatively mild visitation rather than the appalling calamities of earlier years. A succession of bad seasons over any widespread area must always be productive of severe distress, but the experience which has now been gained of famine administration will enable Local Governments to take timely and effective measures for its alleviation.

J. W. P. MUIR-MACKENZIE,
Offg. Secretary to the Government of India.

SIMLA, *30th August, 1892.*

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

STATISTICS.

IMPORTS OF COTTON, WHEAT, LINSEED, AND INDIGO.

Statement showing in maunds the imports of Cotton, Wheat, Linseed, and Indigo by rail and river into Calcutta, Bombay Town, and Karachi during the month of June 1892, and from 1st January 1892 to 30th June 1892, compared with the corresponding periods of the years 1890 and 1891.

ACCOUNT.
Railway.

GUARANTEED RAILWAYS.

Synopsis of transactions for and to the end of the year 1891.

No. 522-A.-R., dated Simla, the 24th August, 1892.

RESOLUTION—By the Government of India, Public Works Department.

Read again—

Public Works Department Resolution No. 571 A.R., dated 30th October 1891.

Read also the following:

Note by **R. G. MACDONALD, Esq.**, Officiating Accountant General, Public Works Department, No. 752 R., dated 5th August 1892.

I beg to lay before the Government of India the usual synopsis of transactions of Guaranteed Railways for and to end of the year 1891.

2. The subscribed Capital on 31st December 1891 of the several Railway Companies bears interest as shown below:

Railway.	Capital bearing interest at 3½%	3¼%	4%	4½%	4¾%	5%	Premium on stock.	Discount on stock.	Total Capital raised.
	£	£	£	£	£	£	£	£	£
Madras	462,200	237,800	...	500,000	999,960	8,757,670	12,014	...	10,969,644
Bombay, Baroda and Central India ..	1,338,500	...	...	...	...	7,560,300	18,419	...	8,807,219
Great Indian Peninsula ...	1,866,100	845,200	2,701,450	...	...	20,000,000	290,074	225,891	25,476,933
(1) Total to end of 1891 ...	3,666,800	1,083,000	2,701,450	500,000	999,960	36,307,970	320,507	225,891	45,253,796
(2) Ditto ditto 1890 ...	2,250,000	1,871,500	2,701,450	500,000	999,960	36,307,970	334,507	239,891	44,725,496
(3) Ditto ditto 1889 ...	1,074,000	2,873,600	2,803,650	500,000	999,960	36,307,970	342,007	247,391	44,653,796
(4) Ditto ditto 1888 ...	364,000	3,033,600	2,803,650	500,000	999,960	36,307,970	341,589	247,391	44,103,378
(5) Ditto ditto 1887 ...	100,000	2,239,000	3,872,450	500,000	999,960	36,307,970	341,589	247,391	44,103,378
(1) Compared with (2) Increase ...	13,16,800	...	...	...	...	...	...	...	528,300
(2) Decrease ...	...	788,500	...	...	...	...	14,000	14,000	...

3. The following table shows the growth of the Capital account of the Guaranteed Railways during the last five years, the net increase to the aggregate subscribed Capital during that period being £2,382,718:

Total Capital subscribed. Year.	Amount.	Increase.	Decrease.	Remarks.
	£	£	£	
To end of 1887	44,103,578	1,232,500	...	
„ 1888	44,103,378	...	200	
„ 1889	44,653,796	550,418	...	
„ 1890	44,725,496	71,700	...	
„ 1891	45,253,796	528,300	...	
		2,382,918	200	
Net Increase ...	...	2,382,718		

D

Capital Outlay.

4. The aggregate outlay finally charged off to "Construction" has stood at the end of each of the last five years as follows:

	£	Increase. £
To end of 1887	42,705,347	116,590
„ 1888	43,158,362	453,015
„ 1889	43,472,608	314,246
„ 1890	43,715,546	242,938
„ 1891	44,015,818	300,272
Increase in five years		1,427,061

5. The expenditure charged to "Construction" on the open lines of railway during and to end of the year gives the following as the cost per mile:

Railway.	Construction expenditure per open mile.		Remarks.
	During 1891.	To end of 1891.	
	Rs.	Rs.	
Madras	1,554·04	1,88,502·75	
Bombay, Baroda and Central India	1,201·70	2,11,118·90	
Great Indian Peninsula	1,120·99	2,10,591·54	
Average outlay	1,276·41	1,87,105·49	

Capital locked up in stores.

6. The subjoined table shows the fluctuations in the value of stores in stock during the past five years. The figures in antique represent increases of stock:

Railway.	Reduction in stock.					Total reduction in five years.
	1887.	1888.	1889.	1890.	1891.	
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Madras	6,76,873	17,704	3,72,462	9,68,360	56,105	1,54,284
Bombay, Baroda and Central India	4,31,054	5,90,250	2,76,488	18,918	3,25,769	4,38,015
Great Indian Peninsula ...	3,76,850	9,60,488	8,63,904	10,85,851	16,41,978	15,29,770
Total ...	11,21,977	3,87,942	2,15,003	20,72,629	20,23,752	13,46,069

7. The reduction during 1891 in the store balance on the Bombay, Baroda and Central India railway is attributed to the heavy traffic worked, and to the requirements of the period having been met from stores in hand whilst the purchases were restricted, and that on the Great Indian Peninsula railway is explained to be due to Home indents having been very strictly scrutinised and purchase of English stores restricted in consequence of heavy purchases in 1890. The larger consumption of stores by revenue owing to the traffic during the year under review being unprecedentedly heavy has contributed to the reduction to a certain extent.

8. On 31st December 1891 the value of the stores in stock on Guaranteed Railways exceeded the limits provisionally assigned for Capital to be locked up in stores to the following extent:

Railway.	Limit assigned.	Stock in hand.	Excess.
	Rs. Lakhs.	Rs. Lakhs.	Rs. Lakhs.
Madras	22½	30	7½
Bombay, Baroda and Central India	21½	31½	10
Great Indian Peninsula	63	63¾	¾
Total ...	107	125¼	18¼

Revenue Account.

9. Excluding the Oudh and Rohilkhand and South Indian Railways, which have now become State lines, the gross earnings, working expenses, and net earnings of all the Guaranteed Railways during the last five years have been as under:

Year.	Gross earnings.	Working expenses.	Net earnings.
	Rs.	Rs.	Rs.
1887	6,02,64,859	2,90,89,895	3,11,74,964
1888	6,23,29,206	2,99,09,247	3,24,19,959
1889	5,94,14,079	3,00,48,931	2,93,65,148
1890	6,05,91,746	2,94,21,830	3,11,69,916
1891	6,87,37,790	3,31,02,310	3,56,35,480

10. For the year 1891 the net earnings amounted to ...

	Rs.	Rs.
		3,56,35,480
Deduct—		
Interest charged on overdrawn capital ...	3,46,025	
Moiety of surplus profits due to shareholders	69,95,356	
Contributions to Provident Fund ...	2,53,122	
		75,94,503
The net receipts by Government due to its connection with the Guaranteed Railways may be stated at		2,80,40,977

11. The results of the working of the Guaranteed Railways for the year 1891, based on the contract rates of exchange, is shown in the following table, as also the percentage of interest and net profits on the Capital received. The figures in antique represent gain :

Railway.	Net earnings after deducting payments on account of moiety of Surplus Profits and contribution to the Provident Fund and interest on overdrawn Capital.	Guaranteed interest.	Loss to State.			Per cent. of interest paid on total Capital received.	Per cent. of Net Earnings realised during 1891 on Capital received.
			Amount.	Per open mile.	Per cent. of guaranteed interest.		
	Rs.	Rs.	Rs.	Rs.			
Madras	38,97,577	57,53,788	18,55,909	2,211·26	32·26	3·81	2·26
Bombay, Baroda and Central India ...	62,20,309	44,14,501	18,06,3 48	4,116·75	40·92	4·60	6·47
Great Indian Peninsula	1,79,22,191	1,29,54,775	49,67,416	3,865·97	38·34	4·66	6·45
Total, 1891 ...	2,80,40,077	2,31,23,122	49,17,955	1,916·81	21·27	4·08	5·08
1890 ...	2,63,90,419	2,33,52,427	30,37,992	1,183·79	13·01	4·79	5·41
1889 ...	2,49,51,530	2,31,91,534	17,59,996	685·81	7·59	4·76	5·13
1888 ...	2,65,83,703	2,31,11,537	34,72,165	1,352·98	15·02	4·80	5·53
1887 ...	2,54,82,835	2,30,17,336	24,65,499	961·17	10·71	4·78	5·30

12. The actual loss to the State during the last five years due to its connection with the Guaranteed Railways, if the payments in England on account of guaranteed interest are converted at the average rates of exchange for the different years, is shewn in the following statements :

Year.	Net earnings—vide para. 11	Guaranteed Interest at contract rates.	Loss to State based on preceding column.	Guaranteed Interest at the average rate of the year.	Loss to State based on preceding column.	Loss involved in fall in exchange, being difference between columns 4 and 3.
	1	2	3	4	5	6
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
1887	2,54,82,835	2,30,17,336	24,65,499	2,96,18,658	41,35,823	66,01,322

The Gazette of India.

No. 37.] SIMLA, SATURDAY, SEPTEMBER 10, 1892.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the week ending at 8 a.m. on Saturday, September 3rd, 1892.

Over the greater part of India ordinary monsoon weather has prevailed, but in North-West India, except on the hills, the wind has been variable and light, and the weather fine with passing clouds. The principal features of the weather have been the exceptionally heavy rain on the West Coast and the appearance over the Bay of two depressions. These two depressions advanced from the Bay into the Central Provinces, and occasioned considerable rainfall over the Peninsula, the central parts of the country, and North-East India. At the same time pressure has been very steady between 29·80 inches and 29·85 inches in the extreme south, so that as the depressions developed over the north of the Bay and the Central Provinces, gradients over the south of the Indian region became steep, and the monsoon blew strongly.

On the 28th low pressure areas were shown over Sind, over the west of the North-West Provinces, and over the Northern Circars, while readings were highest in the extreme south. The winds blew from about the normal directions, except in the neighbourhoods of the three depressions noticed above, where cyclonic movements were developed. There had been no rain over Sind, Rajputana, and the south of the Punjab, but elsewhere the fall was general, and along the West Coast and at some stations in Northern India heavy. The chart

of the 29th showed that the barometer was falling across the head of the Peninsula, but was rising elsewhere. The depression over the west of the North-West Province had disappeared, and that off the Circars Coast had travelled somewhat to the northward, but in other respects the distribution of pressure was little changed. The winds had become light and variable over the Gangetic plain and North-West India, but were generally little altered. There had been no rain of importance over Sind, Rajputana, and the Punjab, but in all the other provinces a further general fall had occurred, though, except in the west of the Peninsula, in Tenasserim, and at one or two northern stations, the amounts were not large. The chart of the 30th showed that the barometer was still rising, except over the Bay area, where a fall was in progress, due to the development of the depression which had advanced along the Circars Coast. The centre lay apparently to the south of False Point. The barometer was steady in the extreme south, and steepish gradients and strongish monsoon winds prevailed over the Peninsula and the Bay. In the Punjab northerly winds had sprung up, and at the head of the Bay there existed a well marked cyclonic circulation. With these exceptions, the directions were about normal. Rain had ceased over a large part of Bengal and decreased in amount over Tenasserim, but otherwise there was little change. On the morning of the 31st August the barometer was rising over the Peninsula, but was falling elsewhere, and the depression noticed over the head of the Bay had crossed the coast, and was advancing west-north-westward to the east of the Central Provinces. Gradients remained steep over the Bay, and a fresh monsoon was blowing there. The wind was cyclonic over Bengal, the North-West, and Central Provinces, and fairly normal elsewhere, the northerly breezes in the Punjab having given way. Scattered slight rainfall was reported from Northern India, from Bengal to the Punjab, but in the south and centre, except in South Madras, rain was general. The amounts had fallen off somewhat on the West Coast. The chart of the 1st September showed that the depression from the Bay was advancing very slowly, and that the centre was approaching Jubbulpore. The barometer was falling everywhere, the change being brisk across the head of the Peninsula. Gradients were steep on the southern side of the depression, and a strong monsoon was blowing. There had been no rain over South Madras or North-West India, and only scattered falls over Bengal and the North-West Provinces, but elsewhere the rainfall was general, and in the Central Provinces, the Konkan, and Tenasserim heavy. On the morning of the 2nd, while the depression noticed on the preceding day still existed close to Jubbulpore, a fresh depression had appeared over the head of the Bay. The barometer was falling almost everywhere, and gradients remained steep over the Peninsula and the Bay. The winds showed cyclonic movements in the neighbourhoods of the low pressure areas, but elsewhere the directions were very regular, a westerly wind prevailing over the Peninsula and west of the Bay, a southerly wind over Burma and the east of the Bay, a south-easterly wind in Bengal, and an easterly wind up the Gangetic plain. Rain was reported from almost all parts of the country, except North-West India and South Madras. The chart of the 3rd showed that the small depression from the north of the Bay had advanced quickly north-westward, and coalesced with the larger depression over the central parts of the country. The winds in almost all parts of India were influenced by this depression and circulated around it. The rainfall was scattered and light over North Bengal and

the Gangetic plain, and altogether absent from a large part of the Peninsula and of North-West India, but was general elsewhere. The fall was very heavy in Orissa, and moderately heavy on the Konkan Coast.

Temperature.—Owing to the comparatively light rainfall in Bengal and the Gangetic plain, the mean temperature of that region was normal, while, owing to the absence of rain in Guzerat, Sind, and Rajputana, there was an excess of temperature. In all the other provinces the rainfall was heavy, and the mean temperature consequently low. This was particularly the case in Bombay. The following table shows the variations of the mean temperature from the normal on each day of the week for the principal provinces of India:

Province.	August				September			Mean variation of week.
	28th.	29th.	30th.	31st.	1st.	2nd.	3rd.	
	°	°	°	°	°	°	°	°
Burma	+1·1	—1·7	—1·4	—1·4	—2·3	—2·5	—1·2	—1·3
Bengal and Assam	—0·8	—0·2	+0·2	+0·6	+0·6	—0·7	—0·6	—0·1
North-West Provinces and Oudh.	—3·5	—1·2	0	+0·1	+2·0	+1·4	+0·8	—0·1
Punjab	—1·4	—4·7	—1·7	—1·1	+0·3	+0·2	+1·2	—1·0
Bombay	—1·8	—1·9	—2·5	—1·9	—3·0	—2·0	—2·4	—2·2
Central Provinces and Berar	+0·6	+0·4	+1·4	+1·3	—0·2	—2·3	—1·7	—0·1
Central India and Guzerat	—0·3	+1·0	+1·3	+1·5	+1·7	+1·8	—0·2	+1·0
Sind and Rajputana	+1·5	+1·1	+1·6	+2·7	+3·3	+3·7	+3·0	+2·4
Madras	—2·2	—3·8	—2·3	—1·9	—1·7	—1·1	—0·5	—1·9
Mean for whole India	—0·8	—1·2	—0·4	0	+0·1	—0·2	—0·2	—0·4

The above figures show that for the whole of India on the mean of the week there has been an average diurnal deficiency of 0·4°. On the first two days the general temperature of India was about 1° below the normal, but on the remaining five days it was about the average.

Rain.—The table with which the summary concludes shows that during the week under review rain has fallen in all the divisions of India, except Sind and Rajputana. In the south, central, north-west, and west divisions of the Punjab, and in the south of the Peninsula, the average actual rainfall has been less than one inch, but in all other parts of India it has exceeded that amount. The distribution of the actual average rainfall is as follows: The highest average is 23·34 inches in the Konkan, followed by 21·23 inches in Tenasserim, by 9·43 inches in Arakan, and by over 6 inches in Assam (Surma), Orissa, and Guzerat; while the lowest actual averages are those given above. The distribution of the normal average rainfall is as follows: The highest average is 7·35 inches in Tenasserim, followed by 6 inches in Arakan and Assam (Surma), and by over 4 inches in Lower Burma, North Bengal, and the Konkan. The lowest normal average is 0·34 inches in the west of the Punjab.

The most pronounced variations between the actual and normal average rainfalls of the different divisions are the exceptional heaviness of the rainfall in the Konkan and Guzerat, the large excess in Tenasserim and Arakan, and the lightness of the rainfall in the south of Madras. The third column of the table shows that of the fifty divisions, twenty-five had more and twenty-five had less than the normal amount for the week. The region of excessive rain included all the Burma divisions, Orissa, Behar (South), Oudh (North and South), the Punjab (Hill District and West), Coorg, the Konkan, Deccan, Khandeish, all the Central Provinces divisions, Guzerat, Katthiawar, Central India (East), the East Coast (North), Hyderabad (South), and Madras (Central); while the region of deficient rain included Assam, Lower Bengal, Chota Nagpur, Behar (North), all the North-West Provinces divisions, most of the Punjab divisions, Malabar, Madras (South Central), Mysore, Rajputana, and the south of the Carnatic. The greatest actual excesses were 18·86 inches in the Konkan (where the rainfall was five times the normal) and 13·88 inches in Tenasserim. The largest deficiency was 2·28 inches in North Bengal.

The three concluding columns of the table show the total average rainfall from May 29th to September 3rd, the normal average rainfall for the same period, and finally the variation of the former from the latter expressed as a percentage. Taking a variation of less than 20 per cent. as representing that the rainfall of the division has been normal, the final column shows that only in two divisions has the rainfall been deficient. These divisions are Eastern and Deltaic Bengal, and in them the total rainfall has only been about three-fourths of the average. All over the Peninsula, the central parts of the country, and North-West India the rainfall has been generally excessive, the greatest excess being in Western Punjab and in Sind.

The following are the largest amounts recorded in the different divisions during the week. The falls in parts of the Konkan and of Guzerat are very remarkable, that at Pen (Colaba) being 39·20 inches, or an average of 5·60 inches per diem:

Division.	District.	Station.	Amount.
Burma	Amherst	Thatôn	21·73 inches.
Assam	Khasia Hills	Cherra	10·97 "
Bengal	Jalpaiguri	Bhagatpur	12·26 "
	Cuttack	False Point	10·10 "
North-West Provinces	Kheri	Nighasin	13·75 "
	Garhwal	Kotdwara	12·84 "
Punjab	Gurdaspur	Pathankot	7·08 "
	Kangra	Sudder	5·69 "
Malabar	South Kanara	Beltangadi	11·02 "
Konkan	Colaba	Pen	39·20 "
Deccan	Kolhapur	Bawda	17·10 "
Central Provinces	Nimar	Sudder	10·42 "
Guzerat	Surat	Pardi	22·71 "
Madras	Ganjam	Rambha	5·13 "
	Kurnool	Atmakur	5·96 "

SIMLA, *8th September, 1892.*

W. L. DALLAS,
Assistant Meteorological Reporter to the Government of India.

J. W. P. MUIR-MACKENZIE,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 3rd September.*—Rainfall heavy on the West Coast, Circars, and Deccan, except Cuddapah; moderate in the Karnatic and Central districts; scanty in Southern districts. Bright sunshine wanted in the Deccan and Karnatic. Cultivation and sowing proceeding. Standing crops fair, but damaged by excessive rain in parts. Harvest of early crops continues; outturn fair. Pasturage and water-supply ample. Condition of cattle favourable. Prices much cheaper in the Circars; cheaper in the Deccan and Central districts; slightly easier in the Karnatic and West Coast districts; stationary elsewhere. FAMINE RELIEF: *Numbers on works*:—Deccan districts 8,819 against 13,234 last week. Works closed elsewhere. Works in Bellary close on the 7th; in Kurnool and Cuddapah on the 15th. *On gratuitous relief*:—Deccan 258 and Karnatic 28: *Total* 286 against 397 last week. Kitchen closed in Bellary; remainder will close on the 15th, when all relief ceases. Loans for wells disbursed:—Deccan Rs. 9,27,000, Karnatic Rs. 4,63,000, and Central districts Rs. 12,60,000: *Total* Rs. 26,50,000. Wells completed—631, 2,393, and 1,596; under construction—6,829, 1,868, and 8,087 in respective blocks. Agriculturists' loans disbursed—Rs. 1,02,000, Rs. 1,22,000, and Rs. 72,000 in respective blocks.

Bombay.—*For week ending 7th September.*—Rain throughout the Presidency Proper; heavy in Gujarat and Konkan; good and generally sufficient in the Deccan and Karnatak. Standing crops injured by excessive rain in parts of four districts; otherwise thriving. Harvesting of early crops commenced in two districts; preparations for late crops progressing in eight and cotton sowing going on in three districts. Fodder supply sufficient and agricultural stock good.

Bengal.—*For week ending 6th September.*—Rain has been general, but is still insufficient in the Burdwan and Chota Nagpur divisions. In Orissa crops have much benefited by the heavy rain and prospects have improved, but more rain is wanted in Puri; elsewhere the prospects of the winter rice crop continue favourable. Harvesting of early rice and jute not yet completed. Autumn harvest in progress, and prospects at present good. In Behar some damage will be caused by floods unless the water subsides quickly. Prices of food-grains falling slowly in Behar; elsewhere stationary. Fodder and water-supplies are sufficient and cattle are generally well off.

North-Western Provinces and Oudh.—*For week ending 7th September.*—The rainfall has been less during the week, and occasional breaks have much benefited the crops. Injury to crops by inundations is reported from a few districts; otherwise prospects are good. Ploughing for the spring harvest is in active progress. Prices generally steady, but show a tendency to fall in some places.

Punjab.—*For week ending 7th September.*—Rain has fallen in all but four districts. Weeding of the autumn crop is nearly finished; ploughing and sowing for spring crops going on. Standing crops are flourishing and their prospects are reported very good, except in parts of one district. Water damaging the crops on low-lands in Sialkot. Young locusts have appeared in parts of Rawal Pindi and Dera Ismail Khan, but steps have been taken for their destruction. Condition of cattle is improving in two districts, and is reported to be good elsewhere. Fodder is generally sufficient. Prices rising in two districts; stationary elsewhere.

Central Provinces.—*For week ending 7th September.*—Rainy weather has prevailed during the week with high west winds. In the rice districts prospects continue very good, though damage by insects is reported from part of one district. Cotton and millets are suffering from excessive moisture, especially in the Nimar district, where the rainfall has been abnormally large, and a break is much needed.

Burma.—*For week ending 3rd September.*—LOWER BURMA: Transplanting in progress, and standing crops everywhere healthy. Slight damage has been caused by insects in parts of two districts. UPPER BURMA: Prospects are generally good in most districts. Transplanting half finished in Shwebo. Sesamum and maize being reaped, and cotton picking commenced in some districts. Paddy nurseries have failed in one district for want of rain. Standing crops in good condition, but more rain badly wanted in Minbu and Magwè. In Meiktila the late-sown sesamum and maize have completely failed in the Wundwin sub-division and parts of Meiktila and Mahlaing, and there is some distress in consequence. More rain wanted for paddy in one district. The price of paddy has risen largely in Shwegyin; elsewhere in Lower Burma fluctuations are slight. Prices in Upper Burma have decreased considerably in two districts; slightly in three others; elsewhere stationary. FAMINE RELIEF: Works still open in Shwebo, but numbers not reported.

Assam.—*For week ending 7th September.*—Weather seasonable. Transplanting of late-rice continues. Fodder abundant.

Mysore and Coorg.—*For week ending 7th September.*—MYSORE: Rainfall good in one district. Standing crops in good condition. Sowing operations nearly completed, and prospects generally favourable. Prices risen in one district.

COORG: Rainfall good. Crops in good condition. Picking of cardamom commenced in some parts. Prices stationary. Fodder and water for cattle sufficient.

Berar and Hyderabad.—*For week ending 7th September.*—BERAR: Average rainfall good. Weather cloudy and rainy. Autumn crops damaged by excessive rain and weeding retarded. Fodder sufficient. Prices almost stationary.

HYDERABAD: Rainfall good. Tanks are now full; no need of more rain, which would injure standing crops, though it might benefit the coming irrigated

crops. Slight rise in prices—*jowar* 14¾, *tur* 11½, *moong* 9¾, and gram 10 seers per halli sicca rupee.

Central India.—*For week ending 7th September.*—Rain throughout Central India, but a much needed break has occurred in Bundelkhand, and sowing and ploughing operations have been resumed. Crops in parts have much improved. Condition of pasturage and cattle generally good. Prices of food-grains steady.

Rajputana.—*For week ending 7th September.*—Rainfall heavy at Abu, but moderate elsewhere. Agricultural operations generally satisfactory. Weeding in progress, and land being prepared for spring crops in some parts of Bikanir. Standing crops flourishing throughout, and harvest prospects good. An average outturn is expected in Sirohi and Ajmere-Merwara. Maize and cotton suffering much from excessive rain in parts. Agricultural stock generally in good condition. Pasturage sufficient throughout, but dry fodder almost unprocurable everywhere. Prices steady in nine States, falling in five, and risen in one. Area affected in Ajmere-Merwara decreasing. FAMINE RELIEF: *Numbers on works*:—Ajmere-Merwara 8,866 against 11,758 last week. *On gratuitous relief*:—Ajmere-Merwara 1,636 against 2,421 last week; Kishengarh 42; Marwar, report not received.

Nepal.—*For week ending 1st September.*—Rainfall to date is above the average. Prospects good.

J. W. P. MUIR-MACKENZIE,
Offg. Secretary to the Government of India.

Printed and published for the GOVERNMENT OF INDIA *at the* GOVERNMENT CENTRAL PRINTING OFFICE, *Simla.*

SUPPLEMENT TO

The Gazette of India.

No. 38.} CALCUTTA, SATURDAY, SEPTEMBER 17, 1892.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

Calcutta, 14th September 1892.

J. F. FINLAY,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the week ending at 8 a.m. on Saturday, September 10th, 1892.

During the week under review the weather throughout the greater part of the Indian region has been under the influence of two cyclonic storms which, developing over the Bay, have passed through the central parts of the country, and have given cyclonic weather over a very large part of India. The regions most influenced by these storms were the head of the Bay, the head of the Peninsula, Guzerat, and South Rajputana, and here heavy rain and strong winds were experienced. Other parts of India were more or less beyond their influence, so that in the Peninsula only moderate showers were received, and in the extreme north-west of India the weather was fine. The effect of the storms on the winds was to produce a circulation such as prevails during the height of the monsoon, with a cyclonic movement in the immediate neighbourhood of the storms in addition.

It will be remembered that at the close of last week a depression lay over the central parts of the country. The chart of the 4th showed that this depression had passed slowly in a westerly or west-north-westerly direction, and that the centre lay between Indore and Neemuch. The barometer was rising over Southern and Eastern India, rapidly immediately in the rear of the depression, and was falling over North-West India. The wind was westerly over the Peninsula, southerly over the Bay, Burma, and Bengal, and easterly up the Gangetic plain, while close to the centre there existed a complete cyclonic circulation. There was very little rain in the centre and east of the Peninsula, and none in Sind, the west of Rajputana, and the greater part of the Punjab. Elsewhere the fall was general, and in Arakan and the immediate neighbourhood of the depression was heavy. On the following day, the 5th, the chart showed that the depression had continued its slow westerly advance, and the centre lay close to Mount Abu. The barometer had fallen briskly over the Western desert, and a fresh fall had commenced in Burma, but elsewhere pressure was increasing. The wind directions were generally the same as those recorded on the 4th, except that the cyclonic circulation had progressed westward with the storm. Rain had spread to almost all parts of Rajputana, but, with this exception, the distribution of rainfall was the same as on the previous day. In the vicinity of the storm the amounts were large. On the 6th the weather was in a very unsettled state. The depression which had been traced to the neighbourhood of Mount Abu had begun to move northward across Rajputana, while at the same time a shallow depression had appeared over Lower Bengal, and a third depression was entering the Bay from Burma. Owing to this complicated distribution of pressure the wind direction varied a good deal. There was again very little rain over Madras and none over the extreme north-west of India, but elsewhere the fall remained general. Mount Abu had received 15·90 inches, Deesa 5·87 inches, and Simla 4·62 inches; but in other parts of India the fall was moderate. The chart of the 7th showed that the storm over Rajputana had continued its northerly movement, and that the centre was close to Bikanir. At the same time the depression which was passing out from Burma into the Bay had advanced north-westward towards the head of the Bay and had coalesced with the shallow low pressure area over Bengal. The wind was now cyclonic over both North-West and North-East India and westerly across the Peninsula and the central parts of the country. Rain had ceased over the Gangetic plain and almost ceased over Bengal, while the weather remained fine over the east of the Peninsula and the extreme north-west of India. A further fall of 8·74 inches was reported from Mount Abu, and in Tenasserim and the North-West

Himalayas the amounts were considerable. On the 8th the depression over North-West India was filling up, while that over the head of the Bay, on the contrary, was developing. Steep gradients prevailed over the Bay. The principal characteristics of the wind circulation were the same as on the preceding day. Rain had become general over Madras, so that the chart showed general rain over Burma, the Peninsula, the Central Provinces, and Rajputana, and fine weather over Sind, the Punjab, the Gangetic plain, and Bengal. The heaviest falls were at Sambhar and Moulmein. By the morning of the 9th the depression in North-West India had practically disappeared, while that over the Bay had continued to develop while it advanced slowly north-westward towards the Orissa Coast. A well-marked cyclonic circulation prevailed around the depression, and over a large part of the country the winds were more or less influenced by the presence of the storm. All over the north of the Bay and the surrounding regions rain was falling—in some places moderately heavily, but in other parts of India only scattered showers were received. Early on the morning of the 10th the depression crossed the coast, and at 8 A.M. the centre lay between Cuttack and Sambalpur. The wind was variable over North-West India, but elsewhere it was more or less influenced by the storm in the Bay and circulated cyclonically around it. With the movement inland of the depression the monsoon winds of the Bay rushed northward into Bengal, &c., and carried rain up the Gangetic plain as far as Agra. Rain was general, except over North-West India, the amounts being considerable in Tenasserim and parts of the east of the Peninsula.

Temperature.—The effect of the general rainfall is strongly shown in the temperature returns for the week. The mean temperature for the whole of India for the week showed a mean diurnal deficiency of 1·2° compared with the normal average. The following table shows the variations of the mean temperature from the normal on each day of the week for the principal Provinces of India :

Provinces.	4th.	5th.	6th.	7th.	8th.	9th.	10th.	Mean variation of week.
	°	°	°	°	°	°	°	°
Burma	−2·0	−2·2	−1·7	−1·7	−2·3	−1·9	−1·9	−2·0
Bengal and Assam	−0·6	−0·6	−0·1	+1·0	+1·3	+1·1	−1·0	+0·2
North-West Provinces and Oudh.	+0·2	−0·7	−1·5	−1·0	−0·8	+0·3	+0·4	−0·4
Punjab	+1·2	+1·3	−1·1	−3·8	−1·9	−0·2	−0·8	−0·8
Bombay	−2·4	−1·6	−1·2	−0·5	−0·8	−0 3	−0·7	−1·1
Central Provinces and Berar	−2·4	−4·2	−2·4	−2·4	−1·4	−3·0	−1·6	−2·5
Central India and Guzerat	−0·7	−1·9	−3·5	−3·7	−2·9	−2·6	−1·1	−2·3
Sind and Rajputana	+2·7	+1·0	−1·7	−3·1	−3·1	−1·9	−0·9	−1·0
Madras	−0·3	−0·5	0	+0·2	+0 1	−1·8	−2·1	−0·6
Mean for whole India	−0·5	−1·0	−1·5	−1·7	−1·3	−1·1	−1·1	−1·2

On each day the mean temperature of the whole country was lower than usual, the greatest deficiency being on the 7th. All the provincial variations, except those for Bengal and Assam, showed a deficiency, the amount being between 2° and 2½° over Burma, Central Provinces, Central India, and Guzerat.

Rain.—With the exception of Madras (South) and Sind, all the divisions have received rain. The heaviest average fall during the week was 21·84 inches

in Tenasserim, followed by 7·01 inches in Guzerat, by 6·27 inches in Arakan, and 5·48 inches in the Konkan; while the smallest average amounts were in the centre, north-west, and west of the Punjab and in Madras (South Central). The column of normal falls shows that ordinarily rain is received in all the divisions, the heaviest amounts being in Tenasserim and Assam (Surma) and the lightest in Sind and parts of the Punjab. There was thus a fairly close agreement between the actual and average distribution of rain.

The third column of the table shows that of the 50 divisions where comparison is possible, nineteen had more and thirty-one had less than the average fall. Hence the rainfall of the week under review was less heavy than that of its predecessor, when exactly half had excessive rain. The region of excess included Burma, Orissa, Chota Nagpur, the Punjab (South, Submontane, and Hill districts), the west of the Peninsula, Guzerat, Central India, Rajputana, the Circars, and Hyderabad. The greatest actual excess was 13·94 inches in Tenasserim, but the excess was also very considerable relatively to the average in Guzerat, Rajputana (West), and North Madras. The greatest deficiency was in Assam (Surma). This distribution of rainfall was due to the progress of the depressions noted in the first part of the summary, the excess in the Bay area being due to the heavy rainfall which accompanied the development of the disturbance over the Bay, and the excess over Guzerat and Rajputana to the effect of the depression which curved slowly to north over that region.

The concluding columns of the table show the state of the seasonal rainfall. Assuming that a departure of less than 20 per cent. from the normal implies an average rainfall, it will be seen that only in Deltaic and Eastern Bengal has there been any deficiency. In all other parts of India the monsoon rainfall of 1892 has equalled or exceeded the average. The greatest excess is still shown over the Indus Valley.

The following are the largest amounts recorded in the different divisions during the week. The most abnormal amounts were received in Guzerat and neighbouring regions :

Division.	District.	Station.	Amount.
Burma	Amherst	Sudder	24·99 inches.
	Shwegyin	Kyaikto	14·33 „
Assam	Lakhimpur	Sudder	7·19 „
Bengal	Dumka	Jamtara	4·77 „
	Darjeeling	Silliguri	5·94 „
	Puri	Sudder	7·04 „
North-West Provinces	Dehra Dun	Kalsi	5·45 „
Punjab	Ludhiana	Samrala	11·74 „
	Simla	Sudder	6·15 „
Malabar	South Kanara	Beltangadi	8·55 „
Mysore	Shimoga	Nagar	20·40 „
Konkan	Ratnagiri	Sangameshwar	11·34 „
Deccan	Kolhapur	Bawda	21·81 „
Central Provinces	Narsinghpur	Sudder	7·11 „
Guzerat	Surat	Pardi	17·48 „
Rajputana	Ajmere	Dawer	11·60 „
Madras	Ganjam	Ichapur	6·10 „

Simla, *15th September, 1892.*

W. L. DALLAS,
Assistant Meteorological Reporter to the Government of India.

J. W. P. MUIR-MACKENZIE,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 10th September.*—Rainfall heavy in Ganjam and South Canara, moderate in the remainder of the Circars, Deccan, Karnatic, and West Coast districts and North Arcot, and slight in rest of the Central and Southern districts. More rain wanted in Coimbatore and the Southern districts. Cultivation still proceeding actively. Standing crops generally thriving, but excessive rain has done some damage in the Deccan and Karnatic. Harvest of early crops continues; outturn fair. Water-supply and pasture ample and condition of cattle good. Prices much cheaper in the Circars; cheaper in Carnatic and Central districts; nearly stationary elsewhere. FAMINE RELIEF: *Numbers on works*:—Kurnool and Cuddapah 4,773; works closed elsewhere. All kitchens closed.

Bombay.—*For week ending 14th September.*—Rain throughout the Presidency Proper and in one district of Sind; generally good or moderate, but excessive and injurious to crops in parts of Gujarat and Deccan. Standing crops otherwise good. Preparations for late crops progressing in several districts, but retarded in parts by heavy rain. Prices generally steady. Agricultural stock good and fodder sufficient.

Bengal.—*For week ending 13th September.*—General rain over the whole Province, but in most districts the falls were light. Prospects of winter-rice continue satisfactory, except in four districts, where the crop is seriously threatened unless ample rain is soon received. In Midnapur and Hooghly reports show improvement, but much rice-land still remains to be planted. Early-rice and jute harvests approaching completion. Harvesting of other autumn crops proceeding. Floods in Behar have subsided and caused no damage to the crops, except in a tract roughly estimated at 30 square miles in the Saran district. Prices of rice are generally steady, but the appearance of the new early-rice crops has somewhat lowered the market in some districts. In two districts prices show a tendency to rise. Supply of fodder and water sufficient in all districts and cattle reported healthy.

North-Western Provinces and Oudh.—*For week ending 14th September.*—Comparatively light rain has fallen during the week, and prospects continue favourable. Crops on low-lying land in one division have suffered. Harvesting of the autumn crops has begun in some districts, and ploughing for the spring harvest is in progress. Supplies are abundant and prices fairly steady.

Punjab.—*For week ending 14th September.*—Rain has fallen in all but three districts. Ploughings for spring crops going on. Autumn crops are ripening, and their condition is reported generally good. Maize and sugarcane

crops have been affected by blight in parts of Lahore. Young locusts appeared in parts of Rawalpindi and Dera Ismail Khan, but steps have been taken for their destruction. No damage is reported to have been done. Condition of cattle is reported to be good generally. Fodder sufficient throughout the Province. Prices rising in three districts; falling in one; stationary elsewhere.

Central Provinces.—*For week ending 14th September.*—Rain with high wind has continued, and the weather has been unusually cool. In the rice districts prospects are very favourable, the only qualification being that excessive rain has caused damage in part of the Bilaspur district. The accounts of the cotton and *jowari* crops are less hopeful; weeding has been impeded, and the plants are generally suffering. A break is very much needed, especially in the Nimar, Wardah, and Nagpur districts.

Burma.—*For week ending 10th September.*—LOWER BURMA: Transplanting finished or in progress everywhere. Standing crops in good condition. UPPER BURMA: Transplanting in progress generally. Prospects good in eleven districts. In Shwebo transplanting only proceeding slowly owing to want of rain, and in Yeu crops are said to be in good condition, but only a 10-anna or, with favourable rain during the next three weeks, a 12-anna crop is expected. More rain is wanted in some districts. On the whole prospects in Upper Burma are very fair. The fluctuations in the price of paddy are not noteworthy. No relief works in progress.

Assam.—*For week ending 13th September.*—Weather seasonable. Transplanting of late-rice nearly over. Fodder and water plentiful.

Mysore and Coorg.—*For week ending 14th September.*—MYSORE: Rainfall good in one district. Crops good, except in parts of one district, where more rain is wanted. Prospects favourable. No material change in prices.

COORG: Rainfall good. *Eleusine coracana* being cut in places. Rice and coffee crops in good condition. Prices stationary. Fodder and water-supply for cattle sufficient.

Berar and Hyderabad.—*For week ending 14th September.*—BERAR: Average rainfall good. Weather cool and cloudy. Autumn crops damaged by excessive rain, except in one district. Weeding operations stopped in places. Fodder sufficient. Prices almost steady. Condition of cattle good.

HYDERABAD: Excessive rain injuring autumn crops. Weeding of irrigated crops continues. Prices falling slightly.

Central India.—*For week ending 14th September.*—Rain throughout Central India. Weeding operations hindered in three States, where crops are suffering from excess of rain. Condition of crops bad in Goona, fair in Bhopal, and good elsewhere. Pasturage and agricultural stock good. Prices of food-grains fairly steady.

Rajputana.—*For week ending 14th September.*—Good rainfall, except in Bikanir; a break is needed. Agricultural operations generally satisfactory. Weeding in progress and land being prepared for spring crops in some places.

In Bikanir standing crops in excellent condition throughout. In parts of Merwara maize has been partly harvested. Good harvest prospects. An average outturn is expected in Sirohi and Ajmere-Merwara. Crops damaged in places by excessive rain. Agricultural stock generally in good condition. Pasturage sufficient throughout, but no dry fodder available. Prices steady in seven States, falling in four, and rising in one. Area affected in Ajmere-Merwara considerably decreased. FAMINE RELIEF: *Numbers on works*:—Ajmere-Merwara 7,282 against 8,866 last week; Marwar (week ending 7th September) 4,118. *On gratuitous relief*:—Ajmere-Merwara 972 against 1,636 last week; Kishengarh 37; and Marwar (week ending 7th September) 1,698.

Nepal.—*For week ending 8th September.*—Weather close and warm. Early-rice is being harvested.

J. W. P. MUIR-MACKENZIE,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the week ending at 8 a.m. on Saturday, September 17th, 1892.

The weather over India during the week under review has been under two sets of conditions. From the 11th to the 14th a depression was crossing the central parts of the country and advancing towards North-West India. During the period covered by the existence of this depression the weather over the greater part of India was of the ordinary monsoon type. The winds blew from the westward across the Peninsula, from the southward over the Bay area, and from the south-eastward and eastward up the Gangetic plain. There was little or no rain over the extreme north-west of India or in Madras, but elsewhere rain was general, and in places fairly heavy. On the 15th the depression broke up, and on the 16th a new disturbance began to develop over the Bay. With this change in the distribution of pressure there occurred a considerable change in the weather. The monsoon current fell off and became variable on the West Coast, and the rainfall ceased over a large part of the country; on the other hand, the wind shifted to north-east on a large part of the Madras Coast, and the weather, which had previously been fine there, changed to rain.

The chart of the 11th showed that the depression which had crossed the Orissa Coast at the close of the previous week had its centre between Jubbulpore and Raipur at 8 A.M. The wind circulated round the depression with the ordinary cyclonic directions, while rain was reported from the greater part of India. In Madras, however, there was very little rain, as the westerly wind reached that Province relatively dry. In North-West India a different set of conditions prevailed. The winds were light and variable and the weather dry. On the 12th the depression had reached Central India, and the centre lay

between Indore and Jhansi. The winds and general weather were unchanged. There was no rain in Madras and hardly any in North-West India, but elsewhere rain was general, and in the neighbourhood of the storm heavy. The chart of the 13th showed that the depression was still advancing north-west and carrying rain with it. On the other hand, the monsoon current had fallen lighter and become less regular on the West Coast, and rain there was decreasing. In Madras there was again no rain. By the morning of the 14th the depression had reached the south of the Punjab, and in the front of the storm centre, *i.e.*, in the west of the North-West Provinces and the east of the Punjab, there had occurred a heavy fall of rain. In other parts of India, on the contrary, though the winds were generally from monsoon directions, the weather was on the whole fair, with only passing showers. On the 15th the barometer was rising, except in parts of Madras, and the depression had practically filled up. The chart showed that further heavy rain had fallen over the same district of North-West India, in which it had been heavy on the preceding day, and that in other parts of the country only scattered showers had again been received. On the 16th a further change occurred The rainfall ceased to a considerable extent over that portion of North-West India where the fall had previously been heavy, and the general rainfall of the country was scattered and on the whole light. Over the Bay area a change in the contrary direction had occurred. A well-defined depression had appeared there. The wind all round the Bay had become cyclonic, and rain was falling from Diamond Island round to Nellore. On the 17th the barometer was falling, except in Bengal and Burma, but the general conditions of the pressure distribution were little altered. The depression was intensifying somewhat over the Bay, and the wind directions over the greater part of the country were influenced by this disturbance. Rain was exceptionally general, the only parts of the Indian region in which it had not been received being the west of the Punjab, Rajputana, Guzerat, and Sind. In some parts of the Peninsula and of the Central Provinces the amounts were fairly heavy.

Temperature:—Owing to the general character of the rainfall, the mean temperature of the Indian region has been everywhere low. The following table shows the variations of the mean temperature from the normal on each day of the week for the principal Provinces of India:

Province.	11th.	12th.	13th.	14th.	15th.	16th.	17th.	Mean variation of week.
	°	°	°	°	°	°	°	°
Burma	−2·4	−0·5	+1·9	+2·3	+1·8	+1·6	+1·7	+0·9
Bengal and Assam	−0·5	−1·6	−0·2	+1·0	+2·0	+2·1	+1·3	+0·6
North-West Provinces and Oudh.	−0·9	+0·5	−0·2	−0·9	−1·1	−0·4	−0·2	−0·5
Punjab	−0·4	−0·6	+0·4	−3·3	−4·2	−2·6	−1·1	−1·7
Bombay	−1·6	−3·2	−1·8	−0·8	−0·8	+0·4	−1·4	−1·3
Central Provinces and Berar	−1·0	−4·6	−4·9	−1·6	−0·3	+0·3	−0·5	−1·8
Central India and Guzerat	+0·5	−1·6	−2·4	−1·1	−0·3	−0·5	−0·2	−0·8
Sind and Rajputana	−0·1	+0·7	−0·6	−1·7	−1·2	−0·7	+0·8	−0·4
Madras	−2·5	−1·2	−0·3	0	+1·2	+0·7	−0·9	−0·4
Mean for whole India	−1·0	−1·3	−0·9	−0·7	−0·3	+0·1	−0·1	−0·6

The mean temperature of the whole of India for the week shows a mean diurnal deficiency of 0·6° compared with normal average. On each day, except the 16th, the mean temperature of the whole country was lower than usual by amounts varying between 1·3° and 0·1°. The provincial variations show a slight excess in Burma and Bengal and a deficiency elsewhere.

Rain has again fallen in all the divisions of India, except Rajputana (West), Sind, and Madras (South). The amounts received range from 7·78 inches in Tenasserim to only 0·03 inch in the Punjab (West). The returns of average normal rainfall show that in ordinary years rain is received in all the divisions, but the general distribution is the same in the normal as in the actual rainfall, the largest normal amount being 7·08 inches in Tenasserim and the smallest 0·09 inch in Sind. The third column of the table shows that of the fifty divisions into which India is divided, nineteen received more and thirty-one less than the normal amount. The regions of more or less excessive rainfall included the following divisions:—Tenasserim and Lower Burma; the Central, West, and Submontane divisions of the North-West Provinces; the South, Central, Submontane, and Hill divisions of the Punjab; Khandeish, all the Central Provinces divisions, Central India and the east of Rajputana, the East Coast (North), and the south of Hyderabad. All the other divisions had less than the usual amount of rain. The greatest absolute excess was 4·55 inches in the submontane division of the Punjab, and the greatest absolute deficiency 5·80 inches in Arakan. Except in Arakan and parts of Bengal and of the Peninsula, the deficiency relatively to the average was comparatively unimportant.

The three concluding columns of the table show the state of the seasonal rainfall, *i.e.*, the actual and normal rainfall for the monsoon period, May 29th to September 17th, and the excess or deficiency of the former compared with the latter represented as a percentage. Assuming that a departure of less than 20 per cent. from the normal implies that the rainfall of the division has been about equal to the ordinary requirements, the concluding column of the table shows that only in Eastern and Deltaic Bengal has the rainfall of the season been deficient. The deficiency in this part of the country is best exemplified by the rainfall at Cherrapunji, where the total fall of the week was only 0·50 inch. In most of the other divisions the fall has been about the average, but in Oudh, the Punjab (South, Submontane, North-West, and West), in the Bombay Deccan, in Khandeish, in Berar, in the Central Provinces (East), in Sind, in Hyderabad (South), in Madras (Central), and in the East Coast (Central) the fall for the season has been excessive.

The following are the largest total amounts recorded in the different divisions during the week:

Division.	District.	Station.	Amount.
Burma	Amherst	Thatôn	10·81 inches.
	Pegu	Sudder	6·08 ,,
Assam	Sylhet	Ditto	3·24 ,,
Bengal	Noakhali	Ditto	2·83 ,,
	Darjeeling	Kurseong	8·24 ,,
North-West Provinces	Etah	Sudder	5·04 ,,
	Dehra Dun	Kalsi	9·77 ,,
Punjab	Karnal	Sudder	9·20 ,,
	Jullunder	Nawashahr	15·43 ,,

SIMLA, *22nd September, 1892.*

W. L. DALLAS,
Assistant Meteorological Reporter to the Government of India.

J. W. P. MUIR-MACKENZIE,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week enaing 17th September.*—Rainfall continued heavy on the West Coast, Circars, and parts of Deccan; light in Karnatic; very little rain in the Central and Southern districts. Recent rainfall has been excessive in the Deccan, but deficient in the Southern districts. Sowings being pushed forward generally. In seven recently-affected districts sowings reported up to August 4·8 million acres against 3·4 million, average. Standing crops generally thriving, but sunshine needed in the Deccan, and rain required urgently in the Southern districts. Harvest of early crops proceeding; outturn generally fair and in some places good. Pasture and water abundant. Condition of cattle good. Prices cheaper in Karnatic and fallen slightly in Circars, but nearly stationary elsewhere. All relief closed.

Bombay.—*For week ending 21st September.*—Fair rain throughout the Presidency Proper and in one district of Sind. Standing crops injured by excessive rain in parts of three districts, and by insects, blight, or stormy weather in parts of Sind. Prospects otherwise good. Preparations for late crops progressing in several districts, but retarded in parts owing to excessive-rain. Harvesting of early crops progressing in four districts. Agricultural stock good and fodder sufficient.

Bengal.—*For week ending 17th September.*—Rain has fallen in almost all districts during the week, but the falls have been generally light. General prospects of the winter-rice crop continue favourable, except in four districts, where the rainfall has been deficient. More rain is also required in the districts of the Presidency division and in Tipperah and Balasore. Autumn and jute harvests are nearly over, and are generally yielding a good outturn; in some districts, however, the autumn rice is reported to be below the average. The following estimates of the outturn of the autumn harvest are given:—Bankura 10 annas, Midnapur-Ghatal 10 annas, Hooghly 8 annas, Khulna 12 annas, Chittagong 18 annas, Mymensingh 8 annas, Dinajpur 18 annas, Pabna 12 annas, Jalpaiguri 13 annas, Malda 20 annas, Darbhanga 16 annas, Champaran 16 annas, Cuttack 12 annas, Palamau 16 annas, Singhbhum 14 to 16 annas, and Manbhum 12 annas. In Saran about 130 square miles along the Gogra flooded and nearly all crops lost. Price of rice fallen in some districts owing to the appearance of the new early-rice crops into the market. Fodder and water-supplies are generally sufficient, and cattle are in good condition.

North-Western Provinces and Oudh.—*For week ending 21st September.*—The rainfall during the week has been light. Occasional breaks have done much benefit to the crops, and prospects are good. Early-autumn crop being harvested, and ploughing for the spring harvest in progress. Prices fluctuating.

Punjab.—*For week ending 21st September.*—Rain has fallen in all but five districts. Canals in Mooltan flowing feebly. Irrigation of autumn crops

in progress. Ploughings and sowings for spring crops going on. Standing crops are flourishing. Young locusts have appeared in parts of Rawal Pindi and Dera Ismail Khan, but no damage is reported to have been done. Cattle are generally in good condition. Fodder is reported to be sufficient throughout the Province. Prices falling in one district, rising in three others, and stationary elsewhere.

Central Provinces.—*For week ending 21st September.*—There have been very heavy falls of rain during the week, but they were local in extent, and a break seems to have commenced. It is urgently required for the millet and cotton crops, which have suffered considerably in four districts. The rice crop continues to promise very well, but more rain is wanted in one district. Locusts have appeared in part of the Chanda district. Fodder continues plentiful.

Burma.—*For week ending 17th September.*—LOWER BURMA: Transplanting nearly finished. Prospects favourable in all districts. UPPER BURMA: Transplanting progressing everywhere, except in Shwebo, where it is prevented by want of rain. Sesamum being sown in one district, and the early crop is being reaped in two others. Cotton picking in progress in Myingyan. Millets being sown in four districts. Prospects of standing crops are generally favourable, but more rain is wanted in seven districts. In parts of the Southern Shan States great failure of crops has occurred owing to want of rain. The price of paddy has fallen considerably in three districts and risen in one; elsewhere fluctuations are small.

Assam.—*For week ending 20th September.*—Rain wanted in two districts. Transplanting of winter-paddy almost over. Condition of cattle fair. Fodder sufficient.

Mysore and Coorg.—*For week ending 21st September.*—MYSORE: Rainfall general, but slight. Crops good, except in parts of one district, where more rain is wanted. Prospects favourable. Prices slightly fallen in one district.

COORG: Rainfall good. Standing crops generally good. Rice slightly damaged in parts by insects. Reaping of *Eleusine coracana* and cardamom picking commenced. Fodder and water-supply ample.

Berar and Hyderabad.—*For week ending 21st September.*—BERAR: Average rainfall over 5 inches. Weather cloudy and rainy. Autumn crops damaged by excessive rain. Weeding retarded. Fodder sufficient. Prices almost stationary.

HYDERABAD: Rain during week good. Damage to autumn and irrigated crops by excessive rain is feared. Prices steady.

Central India.—*For week ending 21st September.*—Rain general. Breaks much needed in Bhopal, Western Malwa, Bhopawar, and Goona, where crops have suffered from excessive rain, and ploughing and weeding operations interrupted. Condition of agricultural stock and fodder generally good in all parts. Prices high in Bhopal; steady in other Agencies.

Rajputana.—*For week ending 21st September.*—Except in Marwar, the rainfall has been general and moderate, but in parts excessive. Agricultural operations and standing crops generally satisfactory, and harvest prospects good. Autumn crops have suffered from excessive rain in parts of Ajmere-Merwara and five States. Cattle generally in good condition. Pasturage sufficient throughout. Prices steady in seven States and falling in four others. Area affected by scarcity in Ajmere-Merwara considerably decreased. FAMINE RELIEF: *Numbers on works*:—Ajmere-Merwara 6,468 against 7,282 last week; Marwar (report not received). *On gratuitous relief*:—Ajmere-Merwara 789 against 972 last week; Kishengarh 33; Marwar (report not received). Government relief in Ajmere has nearly closed, and a large reduction is expected early in Merwara.

Nepal.—*For week ending 15th September.*—Occasional thundershowers. Prospects favourable.

J. W. P. MUIR-MACKENZIE,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

RAILWAY STATISTICS.

No. XXII of 1892-93.

STATEMENT OF APPROXIMATE GROSS EARNINGS OF INDIAN RAILWAYS.

N.B.—As regards the figures in column *Total Receipts from 1st April 1892*, audited figures have been used as far as possible.

Railway.	Average earnings per mile per week in 1891-92.	Week ending 12th September 1891. Mean mileage worked.	Earnings. Total.	Earnings. Per mile open per week.	Week ending 10th September 1892. Mean mileage worked.	Earnings. Total.	Earnings. Per mile open per week.	Earnings from 1st April to 12th September 1891.	Earnings from 1st April to 10th September 1892.	Increases in 1892-93.	Decreases in 1892-93.

Note by the Director General of Railways, No. 342 Stat., dated the 13th August 1892, with abstract returns of accidents to trains, etc., on the open lines of railways in India for the twelve months ending the 31st December 1891.

OBSERVATIONS.—The following summary gives the total number of accidents to trains, rolling stock, permanent-way, etc., for the twelve months ending the 31st December 1891 distributed under the classification adopted in abstract No. 4 of the returns :—

Summary of accidents to trains, rolling stock, etc.

Serial No.	Classes of Accidents.	Average number of accidents during the two previous years.	TWELVE MONTHS ENDING THE 31st DECEMBER 1891. Numbers. Accidents reported to Local Governments under section 83 of the Indian Railways Act (IX of 1890).	Numbers. Other accidents.	Numbers. Total.	Number of passengers and others. Killed.	Number of passengers and others. Injured.	Number of servants. Killed.	Number of servants. Injured.	Total all classes. Killed.	Total all classes. Injured.
1	Collisions between passenger trains or parts of passenger trains	6	6	10	16	42	52	4	2	46	54
2	Collisions between passenger trains and goods or mineral trains, engines, and vehicles standing foul of the line	41	22	35	57	...	11	...	8	...	19
3	Collisions between goods trains or parts of goods trains	87	14	95	109	...	1	3	24	3	25
4	Collisions between light engines	13	1	20	21	...	...	...	2	...	2
5	Passenger trains or parts of passenger trains leaving the rails	65	25	72	97	...	3	1	2	1	5
6	Goods trains or parts of goods trains, engines, etc., leaving the rails	302	25	299	324	...	...	1	29	1	29
7	Trains or engines travelling in the wrong direction through points	51	4	53	57	...	...	...	2	...	2
8	Trains running into stations or sidings at too high a speed	7	...	5	5	...	...	...	...	...	...
9	Trains running over cattle on the line	1,374	6	1,831	1,837	(a) 1	(b) 1	1	...	2	1
10	Trains running over obstructions on the line	141	12	181	193	(b) 5	(b) 4	6	2	11	6
11	Trains running through gates at level-crossings	50	2	59	61	(b) 2	(b) 4	1	...	3	4
11	The bursting of boilers of engines	...	...	1	1	...	...	...	...	...	...
12 (a)	The bursting of tubes, etc., of engines	106	...	138	138	...	...	...	...	...	...
13	The failure of machinery, springs, etc., of engines	297	...	427	427	...	...	...	4	...	4

(a) Not a passenger, but a cattle driver.
(b) Not passengers, but cartmen.

Serial No.	Classes of Accidents.	Average number of accidents during the two previous years.	TWELVE MONTHS ENDING THE 31st DECEMBER 1891. Numbers. (a) Not a passenger, but a cattle driver.
(b) Not a passenger, but an infant of a gangman.
(c) Of these, one was not a passenger.
(d) Of these, nine were not passengers.
(e) Of these, eleven were not passengers.

2. As compared with the average of the two previous years, the number of accidents to trains, rolling stock, permanent-way, etc., during the twelve months ending the 31st December 1891 shows an increase of 848, or 24·59 per cent., with an increase of 1,260·73 miles, or 8·02 per cent., in the mean mileage worked, and of 8,255,395 miles, or 15·75 per cent., in the train-mileage run.

Principal variations as compared with the average of the two previous years.

3. The principal variations occurred under "Collisions between passenger trains and goods or mineral trains, engines, and vehicles standing foul of the line," 57 against 41; "Collisions between goods trains or parts of goods trains," 109 against 87; "Passenger trains or parts of passenger trains leaving the rails," 97 against 65; "Trains running over cattle on the line," 1,837 against 1,374; "Trains running over obstructions on the line," 193 against 141; "The bursting of tubes, etc., of engines," 138 against 106; "The failure of machinery, springs, etc., of engines," 427 against 297; "The failure of axles," 62 against 77; "The flooding of portions of permanent-way," 54 against 122; "Slips in cuttings or embankments," 82 against 43; "Fire at stations, or involving injury to bridges or viaducts," 72 against 43; and "Other accidents," 257 against 205.

4. The increase under "Collisions between passenger trains and goods or mineral trains, engines, and vehicles standing foul of the line" was chiefly due to the numbers recorded on the East Indian and Eastern Bengal state railways having risen from 4 and 7 to 12 and 11 respectively.

5. "Collisions between goods trains or parts of goods trains" shewed an increase of 22 accidents. The chief variations were increases of 14 on the North Western railway, 7 on the Eastern Bengal state railway, and 5 on the Rajputana-Malwa railway, and a decrease of 7 on the Madras railway.

6. There was an increase of 32 accidents under "Passenger trains or parts of passenger trains leaving the rails," of which 12 occurred on the South Indian railway and 11 on the North Western railway.

7. The number of cattle accidents was largest on the Southern Mahratta railway, *viz.*, 355; next to that line comes the South Indian railway with 269; then the North Western railway with 173, the Rajputana-Malwa railway with 167, the Eastern Bengal state railway with 136, the Madras railway with 116, the East Indian railway with 107, and the Oudh and Rohilkhand railway with 102.

As compared with the average of the two previous years, there were increases of 14 accidents on the South Indian railway, 128 on the Southern Mahratta railway, 49 on the North Western railway, 41 on the Madras railway, 30 on the Oudh and Rohilkhand railway, 29 on the Bengal-Nagpur railway, 26 on the East Indian railway, and 22 on the Rajputana-Malwa railway, and decreases of 22 on the Eastern Bengal State railway, 11 on the Indian Midland railway, and 10 on the Bengal and North Western railway including the Tirhoot section.

In relation to the train-mileage run, however, the number was highest, on the Dibru-Sadiya railway, which gave an average of 1 accident in 4,133 train-miles, the Southern Mahratta railway coming next with an average of 1 in 6,913; then the Nizam's Guaranteed State, the Nalháti, the South Indian, and the Rohilkhand-Kumaun railway with averages of 1 in 8,211, 1 in 8,893, 1 in 10,807, and 1 in 12,942 respectively. The lowest number recorded relatively to train-mileage run was on the Bombay, Baroda and Central India railway, *viz.*, 1 in 200,638, the Great Indian Peninsula coming next with an average of 1 in 182,772; then the Burma railway with 1 in 119,799, the East Indian with 1 in 89,745, the North Western with 1 in 53,965, and the Bengal and North Western railway, including the Tirhoot section, with 1 in 45,207.

8. Of the increase of 52 accidents under "Trains running over obstructions on the line," 44 took place on the Eastern Bengal State railway alone.

9. Under "The bursting of tubes, etc., of engines" there was an increase of 32 accidents, of which 9 occurred on the South Indian railway and 8 each on the Bengal-Nagpur and Southern Mahratta railways.

10. The number of accidents from "Failure of machinery, springs, etc., of engines" increased chiefly on the North Western railway, 99 against 59; on the Bengal-Nagpur railway, 38 against 10; on the Indian Midland railway, 26 against 9; on the East Indian railway, 26 against 10; and on the Southern Mahratta railway, 42 against 28.

11. The cases of "Failure of axles" were less by 15. The number decreased from 58 to 12 on the Rajputana-Malwa railway, but increased from 1 to 9 on the Bengal and North Western railway, including the Tirhoot section, from *nil* to 5 on the Thaton-Duyinzaik railway, and from *nil* to 4 on each of the East Indian and North Western railways.

12. The decrease under "The flooding of portions of permanent-way" was chiefly owing to the number of accidents having fallen from 40 to 15 on the North Western railway, from 20 to 1 on the Eastern Bengal state railway, and from 16 to 6 on the Southern Mahratta railway.

13. Of the increase of 39 in the number of "Slips in cuttings or embankments," 20 occurred on the North Western railway, 9 on the Bengal-Nagpur railway, and 4 each on the Southern Mahratta and Great Indian Peninsula railways.

14. The accidents from "Fire at stations, or involving injury to bridges or viaducts," increased by 29, of which 40 against 15 occurred on the Eastern Bengal state railway.

15. Under "Other accidents," the noticeable variations were increases of 55 on the North Western railway, 16 on the Bengal-Nagpur railway, 15 on the East Indian railway, and 14 on the Burma state railway, and a decrease of 49 on the Bombay, Baroda and Central India railway.

16. The accidents under "Collisions between passenger trains or parts of passenger trains" numbered 16 against 6, of which there were increases of two each on the Rajputana-Malwa, Eastern Bengal, and Burma state railways.

17. There was an increase of 22 under "Goods trains or parts of goods trains, engines, etc., leaving the rails." The principal variations were increases of 18 on the South Indian railway, of 17 on the North Western railway, of 12 on the Bengal-Nagpur railway, and of 11 on the Burma state railway, and decreases of 16 on the Jorhat railway, of 11 on the Madras railway, and of 7 each on the Southern Mahratta and Darjeeling-Himalayan railways.

18. Of the increase of 11 accidents under "Trains running through gates at level-crossings," 10 occurred on the South Indian railway.

Casualties to passengers, servants, and others not included in para. 1 as compared with the average of the two previous years.

19. The casualties to passengers and servants in the employ of railways or of contractors from accidents not coming under the classification adopted in paragraph 1 were in the case of passengers 65 killed and 212 injured against 44 killed and 140 injured, and in the case of servants 156 killed and 529 injured against 149 killed and 535 injured. (For details, *vide* abstract No. 2.)

Total casualties from all causes.

20. The total casualties to persons from all causes, including trespassers, cases of suicide, etc., were 645 killed and 1,084 injured against 494 killed and 900 injured, the average of the two preceding years. (For details, *vide* abstract No. 2.)

Casualties in yards, workshops, etc.

21. In addition to the above, 62 persons were reported to have been killed and 204 injured in yards, workshops, etc., and 1,016 persons to have died in carriages and at stations from causes unconnected with the working of trains.

22. Abstract No. 5 shews for the year 1891 as compared with ten previous years the proportion of passengers killed and injured while travelling on the several railways open for traffic in India from causes beyond their own control.

23. Abstract No. 6 shews the number of enquiries into train accidents on the several railways open for traffic in India classified under certain heads for the year 1891 as compared with the previous year.

24. The accidents *for the fourth quarter of 1891* are dealt with in the following note:

Note on accidents of the 4th quarter of 1891.

Casualties resulting from accidents to trains, rolling stock, etc., for the 4th quarter of 1891.

The following table gives the number of accidents as classified in paragraph 1 of the previous note, which resulted in loss of, or injury to, life and limb, and shews the railways on which they occurred:—

RAILWAY.	Number of accidents during the 4th quarter of 1891.	PASSENGERS AND OTHERS.		SERVANTS.		TOTAL.	
		Killed.	Injured.	Killed.	Injured.	Killed.	Injured.
East Indian	3	...	1	...	2	...	3

2. *East Indian railway.*—On the 30th October 1891 the engine of the up loop mail in backing on to the train at Sahebgunge was put on a wrong line and collided with several wagons. The shunter was slightly injured.

On the 15th November 1891 an engine, whilst shunting another engine in the locomotive yard at Burdwan, became uncoupled. The latter collided with another engine standing over an ashpit, and forced it through the dead buffer. A fireman was seriously injured and some rolling stock was considerably damaged.

On the 26th November 1891 a collision took place at the Naihâti station between a Hooghly branch train and certain wagons of the Eastern Bengal state railway owing to the carelessness of the driver of the branch train. A passenger was slightly injured and the vehicles and dead buffer considerably damaged.

3. *Rajputana-Malwa railway.*—On the 24th December 1891 an engine, whilst shunting at Agra Fort, collided with a wagon. A khalasi was slightly injured.

4. *Southern Mahratta railway.*—On the 11th October 1891 the engine tender and seven wagons of a special goods were derailed at Savalyapuram while passing over the facing points owing to the pointsman having shifted the lever after the engine had passed over. A fireman was killed.

On the 12th October 1891 a down special mixed collided with an up special at mile 277-21 between Yeliyur and French Rocks owing to the station master of Yeliyur having started the former train without line clear, and given a line clear to French Rocks for the latter. Two firemen and three passengers were killed and a driver, a fireman, and 11 passengers injured. The permanent-way and rolling stock were also greatly damaged. ***A detailed report of this accident will be found in appendix A to the abstract return of accidents.***

On the 18th December 1891 a bullock cart was run over by the engine of a down mixed train at mileage 330 between Nandyál and Gázulapalli. The cartman had his skull fractured, from the effects of which he subsequently died.

5. *South Indian railway.*—On the 9th October 1891 a ballast train, whilst being shunted at Pákala, collided with some trucks in a siding, and a brakevan and two vehicles were derailed. Two cooly women were slightly injured.

6. *North Western railway.*—On the 13th November 1891 No. 4 down Calcutta mail collided with the shunting engine at Ráwalpindi through the carelessness of the driver of the mail train. Seven passengers were slightly injured and the rolling stock and permanent-way seriously damaged. The driver was prosecuted, and sentenced to pay a fine of R200.

On the 17th November 1891 a collision took place at Harappa between a material train and some loaded material trucks. The accident was caused by the carelessness of both locomotive and traffic staff. Ten coolies were slightly injured.

On the 5th December 1891, owing to the carelessness of the assistant station master of Satghara, No. 1 up Calcutta mail came into violent collision with No. 8 down mail at 4¼ miles from Okára. Thirty-nine passengers and two railway servants were killed and 27 passengers injured. There was also considerable damage to rolling stock. The assistant station master was prosecuted, and sentenced to thirteen months' rigorous imprisonment and a fine of R100. ***A detailed report of this accident will be found in appendix C to the abstract return of accidents.***

On the 17th December 1891 a water-tank wagon, whilst being hand-shunted was blown away iron Golra yard and collided with a ballast train at mile $\frac{1003}{8}$. A jemadar in trying to prevent the wagon from running away was slightly injured.

7. *Eastern Bengal state railway.*—On the 6th October 1891 the whistle and spectacle glass of the engine of a mixed train were broken between Tolly's Nullah and Dock Junction No. 1 by pieces of broken bricks thrown by some persons unknown. A fireman was hurt on the left eye by one of the pieces of brick.

On the 15th November 1891 the engine and a low-sided truck attached to 55 up mail were derailed at the facing points of Dharlla through the carelessness of the pointsman. The driver was slightly injured.

On the 19th November 1891 an engine, whilst placing some wagons on the river front line at Chitpore, struck against a truck which was being loaded. A cooly was slightly hurt.

On the 22nd November 1891 a trolly was run over by an engine at mile 146 between Pauchooria and Rajbári. The accident was caused by the lights of the engine and trolly having been obstructed. The supervising station master, who was on the trolly, had his leg cut off.

8. *Burma state railway.*—On the 2nd December 1891 a down mail collided with an up mixed at Singaing owing to the pointsman having reversed the points. Four passengers were slightly injured.

9. *Great Indian Peninsula railway.*—On the 16th October 1891 two wagons of a ballast train were derailed on a temporary road at mileage 277¾, near Bhusával, owing to the outer rail having sunk on account of the settling down of the bank. Twenty-seven coolies were injured and rolling stock and permanent-way damaged.

On the 5th November 1891, owing to the failure of the tyre of the left leading wheel of the front engine at mileage 509, near Kháprí, on the Nágpur branch, two engines and eleven vehicles of a down passenger were derailed and ran down a bank 8 feet high. Twelve passengers (all soldiers) and six railway servants were killed and 40 passengers injured. Permanent-way and rolling stock were also considerably damaged. *A detailed report of this accident will be found in appendix B to the abstract return of accidents.*

On the 6th November 1891 a down mixed train, while standing on the line at Victoria terminus, ran violently into the buffer stops owing to some loaded wagons having been fly-shunted against the train. Two passengers and a railway servant were slightly injured.

On the 16th December 1891 a bullock cart was run over by an up goods train at a gate at mileage 441 near Ráichur cantonment. The bullock was killed and the cartman seriously injured, from the effects of which he subsequently died. The gateman, who was at fault, was prosecuted and sentenced to three months' simple imprisonment and a fine of R200, or, in default, a further term of simple imprisonment for three months.

On the 9th December 1891 the door of a 3rd class carriage of an up passenger train having come in contact with a down local train was broken between Victoria terminus and Masjid stations. Two passengers, one in each train, were injured.

RESOLUTION.—The Government of India notices that with an increase of 1,260·73 miles, or 8·02 per cent., in the mean mileage worked, and of 8,255,395 miles, or 15·75 per cent,, in the train-mileage run, the number of accidents to trains, rolling stock, permanent-way, etc., on Indian railways shows an increase of 848, or 24·59 per cent., as compared with the average of the two previous years.

2. The numbers of passengers killed and injured by accidents to trains, etc., were 56 and 135 respectively against 14 and 90, the average of the two previous years; while the numbers of passengers killed and injured from causes other than accidents to trains, etc., were 65 and 212 respectively against 44 and 140. It is observed that the increase in the casualties from train accidents was in a great measure due to the serious accidents which occurred at Kháprí

on the Great Indian Peninsula railway and at Okára on the North Western railway, detailed reports of which are given in appendices B and C.

3. Out of a total of 122,611,345 passengers travelling, there were 121 killed and 347 injured, or an average of 1 in 1,013,317 killed and of 1 in 353,347 injured.

The proportion of passengers killed and injured by train accidents from causes beyond their own control as compared with the numbers travelling was 1 killed out of 2,189,488 and 1 injured out of 908,232.

4. The casualties to servants in the employ of railways or of contractors from accidents to trains, etc., were 27 killed and 94 injured against 9 and 30 respectively in the two preceding years. From causes other than accidents to trains, etc., the casualties were 156 killed and 529 injured against an average of 149 killed and 535 injured.

5. With the increases of 8·02 per cent. in the mean mileage worked and of 15·75 per cent. in the train-mileage run, it is observed that the total numbers of casualties from all causes over the whole of the Indian Railway system as compared with the average of the two previous years increased under killed from 494 to 645, or by 30·57 per cent., and under injured from 900 to 1,084, or by 20·44 per cent.

ORDER.—Ordered, that this Resolution, with the abstract returns, be communicated for information to the Local Governments, Administrations, and Officers noted in the margin.

The Governments of Madras, Bombay, Bengal, North-Western Provinces and Oudh, and the Punjab.
The Chief Commissioners of the Central Provinces, Burma and Assam.
The Resident at Hyderabad.
The Resident in Mysore.
The Agents to the Governor General for Rajputana, Central India, and Baluchistan.
The Director General of Railways.
The Consulting Engineer to the Government of India for Railways, Calcutta, Central Division, and Lucknow.

Ordered also, that copies be forwarded for the information of Her Majesty's Government.

Ordered further, that this Resolution, with the abstract returns, be published in the Supplement to the *Gazette of India*.

F. B. HEBBERT, *M. Inst. C.E.*,
Under Secretary.

Documents accompanying.

Abstract returns of accidents for the twelve months ending the 31st December 1891.

Enclosure to P. W. D. No. 402 R. Stat., dated 31st August 1892.

ABSTRACT No. 1.

GENERAL TOTAL.

NUMBER of PERSONS reported, during the TWELVE months ending 31st December 1891, as KILLED or INJURED on ALL RAILWAYS open for TRAFFIC in INDIA, distinguishing between PASSENGERS, RAILWAY SERVANTS, and OTHER PERSONS; and distinguishing also, in the case of the two former classes, between ACCIDENTS caused by ACCIDENTS to TRAINS, ROLLING STOCK, PERMANENT-WAY, etc., and ACCIDENTS happening otherwise.

	Killed.	Injured.	Remarks.
PASSENGERS :—			
From accidents to trains, rolling stock, permanent-way, etc.	56	135	
By accidents from other causes, including accidents from their own want of caution or misconduct	65	212	
SERVANTS :—			
From accidents to trains, rolling stock, permanent-way, etc.	27	94	
By accidents from other causes, including accidents from their own want of caution or misconduct	156	529	
OTHER PERSONS :—			
Whilst passing over railways at level-crossings	17	16	
Trespassers	236	82	
Suicides	66	...	
Miscellaneous, not included in either of the above	22	16	
TOTAL	645	1,084	

ABSTRACT

No. 2.

NUMBER of PERSONS reported, during the TWELVE months ending 31st December 1891, as KILLED or INJURED in INDIA by PASSENGERS, RAILWAY SERVANTS, and OTHER PERSONS, and classifying, as far as practicable, the TRAVELLING of TRAINS or the MOVEMENT of VEHICLES used exclusively upon RAILWAYS, distinguishing between the nature and causes of the accidents occasioning the death or injury.

| Serial Number. | RAILWAYS. | PASSENGERS. | | |

ABSTRACT No. 3.

ACCIDENTS TO TRAINS, ROLLING STOCK, PERMANENT-WAY, etc., reported during the twelve months ending 31st December 1891, as having occurred on the several railways open for traffic in INDIA, distinguishing the different classes of accidents and the number of passengers and others and of railway servants KILLED or INJURED in each class of accident.

	I.—East Indian.(a)									III.—Bengal-Nagpur.									IV.—Indian Midland.(b)									X.—Bengal and North Western— {Tirhoot section. {Company's section.

ABSTRACT No. 6.

STATEMENT showing the NUMBER of ENQUIRIES into TRAIN ACCIDENTS on the SEVERAL RAILWAYS open for TRAFFIC in INDIA, classified under certain heads for the year 1891, as compared with previous year.

Class of accident.	1890.	1891.
A.—From engines or vehicles meeting with obstruction, or leaving the rails in consequence of obstructions, or from defects in connection with the permanent-way or works .	53	77
B.—From boiler explosions, failures of axles, wheels, or tyres, or from other defects in the rolling stock	47	99
C.—From trains entering stations at too great speed	...	...
D.—From collisions between engines and trains following one another on the same line of rails, excepting at junctions, stations, or sidings	6	4
E.—From collisions at junctions	...	7
F.—From collisions within fixed signals at stations or sidings	23	16
G.—From collisions between engines or trains meeting in opposite directions . . .	6	17
H.—From collisions at level-crossings of two railways	...	...
I.—From engines or trains being wrongly run or turned into sidings, or otherwise through facing points	18	16
J.—On inclines	...	...
K.—From trains on fire	1	5
L.—Miscellaneous	16	21
TOTAL .	170	262

APPENDIX A.

REPORT by CAPTAIN A. D. G. SHELLEY, R.E., GOVERNMENT INSPECTOR for RAILWAYS, on the collision which occurred on 12th October 1891, between YELIYUR and FRENCH ROCKS, on the MYSORE RAILWAY.

I have the honour to submit, for the information of the Government of India, the following report on the collision which occurred on the Mysore state railway on 12th October 1891.

2. At about 0-30 on the morning of 12th October 1891, a Special Down Mixed train booked to leave Bangalore for Mysore at 15-25, and No. 9 Up Dasara Special billed to leave Mysore at 22-0, came into collision at mile $\frac{57}{64}$, between Yeliyur and French Rocks stations on the Mysore state railway. Five persons were killed, thirteen injured, and the rolling stock of both trains greatly damaged.

3. The 15-25 Down Special, which was conveying a portion of Fillis' Circus troupe, was timed to cross the No. 9 Up Dasara Special at Paschamvahini. The train had a late start of two hours from Bangalore and reached Mandya (the station before Yeliyur) about 2½ hours late, where it was delayed about 53 minutes owing to inattention at Yeliyur to the telegraph. The train left Mandya at 23-36, and arrived at Yeliyur at 23-58 where No. 7 Up Dasara Special was crossed. At about 0-10 the train left for French Rocks.

4. The No. 9 Up Special was timed to leave Mysore at 22-0, but starting 25 minutes late did not reach French Rocks until 23-46 where, after a detention of about 26 minutes, it left for Yeliyur.

5. The 15-25 train was composed of the following stock:

Engine No. 211.	1 Third class carriage.
7 High-sided wagons.	3 Second class carriages.
3 Covered goods wagons.	1 First class carriage.
1 Third class carriage.	1 Second class carriage.
4 Covered goods wagons.	1 Brake-van.

6. No. 9 Up train was composed of the following engines and vehicles:

2 Engines Nos. 215 and 216.	1 Brake-van.
1 Third class brake carriage.	6 Covered goods wagons.
1 Horse box.	1 Low-sided truck.
4 Low-sided trucks.	10 Covered goods wagons.
2 High-sided wagons.	1 Brake-van.

DESCRIPTION.

7. The accident occurred on an embankment, and on a curve of 1,200 feet radius, 580 feet from the Mysore end of a grade of $\frac{1}{75}$ rising towards Bangalore, and of 1,375 feet total length. The grade is followed on the Mysore side by 367 feet of level, succeeded by 1,800 feet on a gradient of $\frac{1}{125}$. The view on the curve is limited to about 480 feet by intercepting trees, and as the night was rainy and very dark it is doubtful whether the drivers of the two trains could have had time to do much towards averting the collision. It is estimated that neither train could have been travelling at more than 12 miles an hour, as the 15-25 Special was descending the grade cautiously owing to a bogie wagon running hot and the No. 9 Up was on an ascending grade of $\frac{1}{75}$.

8. The force of the collision was largely increased by two engines being attached to No. 9 train, an engine being worked back light.

9. The injured railway servants and passengers were taken into Mysore by Dr. Benson, and placed in the hospital; they received every care and are doing well.

10. The Station Master at Yeliyur was Seetaramier, a relieving man, who took charge about midday on the 11th October, from Narasima Charry, the permanent incumbent, who had reported sick. There was also at the station an Assisting Signaller named B. Rama Rao.

11. The Station Master on duty at French Rocks was P. Gopalasamy Naidu and he was assisted in telegraph working by Signaller Shaikh Abdul Kadar.

12. For further information, *vide* enclosures Nos. 1 and 2 on pages 28 and 29.

EVIDENCE.

Station staff at Yeliyur.

13. *M. R. Narasima Charry* states—I am permanent Station Master of Yeliyur. On the 11th October about midday I was relieved by Seetaramier, Relieving Station Master, and I returned to my house where I lay sick. After the passing of 82 Down between 19 and 20 hours, Seetaramier came to my house and asked for a meal. My wife prepared the meal and gave it to him. I never saw him afterwards. Sometime during the night a Pointsman, Sidayen Kopal Deva, came to my house and called me. I opened the door. He told me a collision had taken place. I went to the station and found Relieving Signaller Rama Rao, Lippert, Police Constable, Subbannah, and a Pointsman (I do not know which Pointsman); they told me about the collision. I made enquiry about Seetaramier. The Pointsman, J Deva, said he had seen him wandering here and there with a Hand Signal Lamp, and now he could not be found. Rama Rao was sending the telegram about the collision, but he was too sick to complete it and went outside to vomit. Then I sent the message and took charge. A train came afterwards from Mandya at 3.35. I received this train and returned it to Mandya under instructions from the Assistant Traffic Manager. The drafts shown me as having been filled up in anticipation of trains were written by Krishnama Charry. He is a relative of mine and lives at Mysore. He was at the station on the night of the collision (in my house). He is about 12 years of age. He is living at Madder Hosa Agrarum, care of Appacharu Ranga Iyengar. I did not tell the Pointsman to remove the lamp from the South Distant Signal. I sent for the boy Krishnama Charry to stay with me during Dasara. Relieving Station Master Seetaramier appeared to be all right when I saw him in the evening. He appeared to be an intelligent man and acquainted with the work. I did not make any enquiry of French Rocks about 9 Up starting. It is not the practice at my station to give any particular form of answer when it is not intended to give Line Clear for a train for which Line Clear is asked. I ask Line Clear for my train if it has prior right to the section.

I did come to the station before Lippert arrived with the news of the collision. I was called by the Pointsman, who said Seetaramier was not to be found. I don't remember whether I worked at the Telegraph Instruments or not.

I don't remember where Rama Rao was, as I was not in proper senses, being sick. He may have been moving about. I don't remember whether I received the intimation of arrival of 7 Up from Mandya when Lippert came with the news of the accident. I examined the Train Register Book but did not look at the Train messages.

14. *B. Rama Rao* states—I am Relieving Signaller. I arrived at Yeliyur on the afternoon of the 10th of October by No. 8 Down. On the 11th of October I came on duty at Yeliyur at 6 o'clock A.M., and left at 22-30. During the time, I was occupied as follows:—From 6 o'clock to 13 o'clock I was attending to telegraph, giving and receiving Line Clear messages. The messages were signed by the permanent Station Master. I wrote the messages under his direction as he was sick and lying down in the Office. The permanent Station Master's name is Narasima Charry. His telegraphic initials were M. R. N. From 13 o'clock to 22-30 I was looking after coaching work, and during this time I did not touch the Telegraph Instruments. The Telegraph was during this time attended to by the Relieving Station Master Seetaramier, who relieved the Station Master on arrival of 77 Up at about 13 o'clock. At about 22-30, I lay down to sleep in the Telegraph Office. I don't know when I awoke, but I awoke feeling sick and had to go out to vomit. When I awoke and passed out of the Office there was no one present. I met a Policeman named Subbannah outside and asked him to accompany me as it was dark. He accompanied me, and when I was returning I met the Relieving Station Master Seetaramier with a Hand Signal Lamp in his hands going in the direction of the points at the French Rocks end of the station. I asked him where he was going; he said to attend to the calls of nature, and he asked me to go with him. I said I could not, as I was too unwell. This is the last time I saw him that night or since. When I returned to the Office I lay awake talking to the Policeman for some time. While the Policeman was sitting with me I must have fallen asleep, as the next thing that I knew was that Lippert, the Under-Guard of the 15-25 Down Special, had come to say that a collision had occurred. When I awoke Lippert was in the Office. No one awoke me before this to tell me the Down Special was started without Line Clear. I was not awake when No. 7 Up and 15-25 Down Special were at the station. I did not offer to assist the Station Master to get Line Clear for either of these trains. The Relieving Station Master was wearing a red cap over his ears and a dark jacket over a white garment when he told me to go to bed at about 22-30 (when he relieved me of the Coaching work). The permanent Station Master was not at the station when I returned from attending to the calls of nature. He was I believe in his quarters.

A reference to the Diary of the Yeliyur Station of the 11th instant shows that the clock on that date was correct.

15. *Sidayan Kopal Deva* states—I am Pointsman at Yeliyur. I have been about six years Pointsman at the station. I was on duty on the night of the 11th October. I took my meals at 18 o'clock. The Station Master on duty after that time was Seetaramier. I was in charge of the North points. After I took my meals I passed two Down trains and one Up train. I remember two trains at the station at one time about midnight. One train arrived from Mysore and was received on the siding. It came in first. The other from Bangalore came in afterwards on the Platform line. The Station Master did not come to the points when the Down train was coming in. I stopped half-an-hour at the points after passing the train. It was raining. I passed the Up train over the points before going to the station. When I arrived on the platform the Police Constable Subbannah called me and told me to look for the Relieving Station Master as the Telegraph Instrument was ticking. I went to the permanent Station Master's house and awoke him and asked him where Seetaramier was. He said that he was not there but he himself came to the station. At the time I did not know of an accident, and there was no one on the platform but Police Constable Subbannah. The permanent Station Master went into the Telegraph Office. I remained outside. I did not know who else was in the Office. I did not look. The permanent Station Master was in the Office some time. I was talking to Police Constable Subbannah and after a time, about 15 minutes, I can't tell properly, I saw a light in the south distance. It was coming towards the station. It turned out to be a European Ticket Collector with news of the accident.

The European went into the Telegraph Office and was speaking to the Station Master. I am sure the Station Master was in the Office when the European arrived. He had been in the Office 15 or 30 minutes before the European arrived. I did not tell the Station Master about the collision when I called him as I did not know of it myself. The first person who told the Station Master of the collision was the European.

16. *Erally Devah*—I am Pointsman in charge of South points at Yeliyur and have been about eight years in the service.

I was on duty on the night of 11th and 12th October; Seetaramier was Station Master on duty. I took my meals after 20 o'clock. I passed the Passenger train No. 82 Down and after that there were two trains which came to the station about midnight, one from Bangalore and one from Mysore. The latter came in first. They stayed at the station some time. I remained at my points after passing the train from Mysore until the passage of the train from Bangalore to French Rocks. After the train passed, Relieving Station Master came to my points and said I should keep a Danger Signal at the points for a train that was expected from Mandya side. He went away and I saw him no more. After some

time I saw a European coming with a lamp towards the station. I followed him to the station because I concluded that something was wrong. I remained at the station till a train came from Mandya, when I went to the points, but as the train did not pass I went and removed the lamp from the Semaphore and took it to the station. This is all I know.

17. *Subbannah* states—I am Constable at Yeliyur, No. 183. I remember the night of the 11th October. I was on the station all night. I remember Seetaramier and Rama Rao going to the Station Master Narasima Charry's house at about 21 o'clock. They returned separately one after the other in about 15 or 20 minutes. Seetaramier was dressed with a white Dhotur, black waistcoat and a red cap over his ears. R. Rama Rao was dressed with a white shirt, and a white cloth was hanging over his shoulders. He was bare-headed. They went into the Telegraph Office. About 12 o'clock midnight a train arrived from French Rocks and another from Mandya. I was standing near the office, the Relieving Station Master Seetaramier was on the platform. Rama Rao was lying on the floor of the Office; Seetaramier did not go towards the north end of the platform. He stood in one place until after the arrival of the train from Mandya, when he went into the Office. He did not go into the Office after the arrival of the train from French Rocks. When he went into the Office he was followed by the Guard of the train from Mysore. I believe Rama Rao was in the Office. I did not see him then, but he did not come out of the Office after he went in after the supper. After the train started for Mysore, Rama Rao came out of the Office and vomitted; the train was then near the Distant Signal; when Rama Rao was vomitting, Seetaramier was in the Office. I saw him. I was standing a short distance from the Office. I was walking about and passed the Office and could see inside. Rama Rao asked me for water to wash his mouth, I gave it to him and he went into the Office, but he returned a short time after and vomitted again. Seetaramier was still in the Office. After Rama Rao vomitted the second time, he asked me to accompany him to the pool near the South points. I went with Rama Rao, after he washed his mouth, we both returned; and on our way we met Seetaramier somewhere between the points and the platform. He had on a Dhotur, a small dark waist-coat, and piece of white cloth over his shoulders, the same red woollen cap over his ears, and he had a Hand Signal Lamp in his hands. Rama Rao turned back and walked with him towards the points, I proceeded to the station; when we met Seetaramier, the latter called Rama Rao who turned back with him. When I turned to look after them they were walking together at a distance of about 30 yards. I heard no conversation passing between them; Rama Rao came back to the station alone a little while afterwards. I asked him why Seetaramier called him, he said to accompany him to the jungle where he was going to relieve nature, and he said he had told Seetaramier he was not well enough to walk with him. Seetaramier returned to the station but did not stop. He passed the station building on the ballast and went in the direction of the North points. I did not address Seetaramier as he was passing, nor did he address me. This was the last time I saw him. He never returned. Rama Rao was lying down on the Office floor. I went and sat down for some time, and hearing the Telegraph Instrument ticking; I called out to the Pointsman at the North points to tell the Relieving Station Master to come. I waited some time the Relieving Station Master did not come, but the Pointsman came, I asked him where the Relieving Station Master was; he said he had not seen him. I insisted that the Relieving Station Master had gone to his points, but he again said he had not seen him. I told the Pointsman (his name was Siddayen Kopal Deva) to see if the Relieving Station Master was in the Station Master's house, and he went; at this time no one had arrived with the news of the accident. I am sure of this. Narasima Charry came and directed me and the Pointsman to go and look for Seetaramier, as he said he had perhaps fallen owing to the ground being slippery. Before we left to search for Seetaramier, I saw Narasima Charry on a chair in the Telegraph Office. At this time I also noticed Signaller Rama Rao getting up. He was wearing a white cloth over his head and body; we searched all about the station but we did not find Seetaramier. As we were returning, we noticed a light coming from the direction of French Rocks, beyond the the Distant Signal. When we arrived on the platform, Narasima Charry and Rama Rao came out and were looking in the direction of the light. We all supposed it was Seetaramier coming, but it turned out to be a European with news of the collision. After the European came, Seetaramier's box was found open; it contained cloth, I did not hear that any money had been taken from the box. It was about 1 o'clock when Narasima Charry came with Kopal Deva; a long time elapsed between the first occasion on which Rama Rao came out to vomit after the 15-25 Down Special left and the arrival of the European with the news of the accident. I did not see Rama Rao working the Instrument at any time.

Station staff at French Rocks.

18. *Gopalsawmy Naidu, Station Master, French Rocks*, states—I was the Station Master in charge of French Rocks station on the night of the 11-12th of October 1891. I received due notice of the running of the following trains:—

(1) No. 7 Up Extra Dasara train.
(2) No. 9 do. do.
(3) 15-25 Down Special Mixed, and
(4) Another Down Special Mixed which was notified to run "Under Ballast regulations."

No. 7 Up arrived at my station at 22-27. I received Line Clear for it to Yeliyur and started it at 22-30.

After 7 Up started I was asked for and gave Line Clear for No. 9 Up from Seringapatam. No. 9 Up arrived at my station at 23-47. I waited for some time and then asked Yeliyur if No. 7 Up had arrived, but called ten minutes before getting an answer. Yeliyur (Relieving Station Master) answered and said 7 Up had not arrived. About 20 minutes later, Yeliyur called French Rocks and offered a T. X. R. message: my Signaller was at the Instrument; he received the message. The message shown me as Exhibit* A is the message that was received. It was the intimation of the arrival of No. 7 Up at Yeliyur. I acknowledged the intimation and in the acknowledgment, asked for Line Clear for No. 9 Up as

* Not printed.

per Exhibit* B. I have only initialled the message. I know that I am required under the rules to sign in full. The message was sent by my Signaller Syed Abdul Kader. The answer from Yeliyur came at once and was received by my Signaller. The answer was that line was clear for No. 9 Up, see Exhibit* C. I asked Yeliyur, after I give Line Clear to Seringapatam for No. 9 Up, where the 15-25 Down Special was, and he said it was between Maddur and Mandya. I did not after this make any enquiry about the 15-25 Down Special. No. 9 Up was standing at my station about 23 minutes. The Guard of No. 9 Up on arrival asked me where the 15-25 Down Special was, and I informed him. I made no enquiries in the Guard's presence about the 15-25 Special. When I made my enquiries about the 15-25 Special, No. 9 Up was whistling for signals to come into my station. I started No. 9 Up at 0-10. The Driver of No. 9 Up was in my Office. Before Line Clear was obtained, he asked me why his train was being detained. He did not ask me as to the whereabouts of 15-25 Down Special. He asked the Guard this question. I did not communicate with Yeliyur after No. 9 Up left, nor did Yeliyur communicate with me, nor did Yeliyur call me on the Instrument. After I got the Line Clear for No. 9 Up, no communication took place between my station and Yeliyur for about 40 minutes. After this interval, Yeliyur called French Rocks. I was myself at the Instrument. I answered and asked him, "what?" He then gave his initials (M. R. N.), asked me where is No. 9 Up? "Have you started No. 9 Up?" I replied, "started already." He then told me the Relieving Station Master started the 15-25 Down Special, that the porters had come to his house to tell him. He stopped communicating with me for about 5 minutes, when he called me again and said the Relieving Station Master started the 15-25 Special, and he is not to be found at the station. I am perfectly certain; it was not an hour after No. 9 Up left that this communication took place between me and the permanent Station Master of Yeliyur (M. R. N.).

I see a message, Exhibit* D from Station Master, Yelivur, on a Down green form, intimating arrival of No. 7 Up train at Yeliyur. I acknowledge to have received the message. It is a correct copy except as to the number. The number received by me was 1 and not 17. I see the message, Exhibit* E on a Down green form, the received draft of a message purporting to be my acknowledgment of arrival of No. 7 Up at Yeliyur. This is not correct. It is worded:

"No. 17. Your No. 17. I understand No. 7 Up Dasara train has arrived."

The message I sent was as worded in Exhibit* B. I see copy of a message, Exhibit* F, on a Down green form purporting to be copy of the received draft of a message from me acknowledging the intimation of arrival of No. 7 Up and giving Line Clear for the 15-25 Down Special. This message was not sent by me.

I see the following drafts of messages on Down green forms:—

EXHIBIT* G.—Purporting to be an enquiry from Yeliyur for Line Clear for the 15-25 Down Special Mixed to French Rocks on 11th October.

EXHIBIT* H.—Purporting to be my answer to Yeliyur that "Line is clear" for the 15-25 Down Special of 11th October.

EXHIBIT* I.—Purporting to be my intimation of arrival of 15-25 Down Special at French Rocks, dated 11th October.

EXHIBIT* K.—Purporting to be Yeliyur Station Master's acknowledgment of intimation of arrival of 15-25 Down Special at my station, dated 11th October.

I did not receive messages according to Exhibits* G and K, nor did I send messages according to Exhibits* H. and I. I did not give Line Clear for the 15-25 Down Special of October 11th. I see Line Clear Ticket No. 1914, French Rocks to Yeliyur, for No. 9 Up. The signature on this ticket is mine. I produce my Diary for the 11th of October. It shews that my clock was correct on that date.

I make it a practice to inform the next station when a train has left, and I informed Yeliyur, on the night of the 11th October, when No. 9 Up left my station. Yeliyur also advised me of departure of trains on the 11th October according to practice, but no advice was received about 15-25 Down Special. I see Exhibit* C C. It is the copy of the "Line is Clear" message given by me to the Guard of 9 Up on the 11th October. I see that it does not agree with the original received draft in the following particulars:

It shews Code time 0-9 instead of 0-8.
Time received at 0-10 instead of 0-9.
Words 25 instead of 22.
Date 11-10-91 instead of 12-10-91.
Signaller M. R. N. instead of S. R.

I did not notice the differences owing to pressure of work. I was closing my cash to send it in by the morning's Mixed train and was making out my Weekly Returns as well. The signature at the foot of the message is mine.

19. *Syed Abdul Kadar* states—I am a Signaller at French Rocks. I was on duty on the night of the 11-12th October. I remember No. 9 Up arriving at French Rocks. The Chief Guard Chinniah and Under-Guard Narayen Rao came to the Telegraph Office and asked for Line Clear for their train to Yeliyur. The Station Master was also there. The Station Master said that he had just asked Yeliyur, before arrival of No. 9 Up, if No. 7 Up had arrived, and was told not yet.

It was I who asked Yeliyur about 7 Up. The initials of the Signaller given me from Yeliyur were S. R. or B. R. I don't remember which. The Signaller gave me his full name afterwards as Seetaramier. The Chief and Under-Guard of 9 Up and the Station Master Gopalsawmy Naidu and myself talked together for some time. Presently Yeliyur called and gave me a message. Exhibit* A is the message. It is marked as containing 17 words but only contains 16. I did not detect the difference at the time. I gave the message, Exhibit* A, to the Station Master, and he ordered me to write out a message.

I see Exhibit* B. This is the message I wrote out. The Station Master signed it at once, and I called Yeliyur and got him at once. He gave his initials S. R., but I asked him for his name, and he then gave "Station Master". I thereupon signalled the message and the reply came at once according to Exhibit* C. This message is marked as containing 22 words, it actually contains 23.

* Not printed.

I did not check the number of words. I shewed Exhibit* C to the Station Master. He ordered me to write out a Line Clear Ticket, and I did so. I see Exhibit* M. This is the ticket I made out. After 9 Up left, I left the Office and did not return again until after 5 in the morning. I had no communication with Yeliyur after I received Exhibit* C. I was relieved by the Station Master in charge of the Instrument.

I see Exhibit* C C. It is in my handwriting, and is the copy of the Line Clear message made out for the Guard.

I now notice the following differences between it and the original draft:

It is coded 0-9 instead of 0-8.
Dated 11-10-91 instead 12-10-91.
Shews 25 words instead of 22.
Received time 0-10 instead of 0-9.
Signaller M. R. N. of Yeliyur instead of S. R. of Yeliyur.

The original message was received by me, Exhibit* marked C is the one. It is correct. Exhibit* marked C C. is wrong. I copied the body of Exhibit* C C. from the original Exhibit* C, but the preamble I wrote from memory and must in that way have made the mistakes pointed out. I cannot account for the discrepancies in any other way.

20. *Pointsman Ramasawmy* states—I came back to the station from the Seringapatam side points after receiving the No. 9 Up train and went to sleep in front of the Telegraph Office on the platform. The Guard and Driver of the train and the Station Master were all in the Telegraph Office. I know nothing more of what took place in the Telegraph Office.

21. *Pointsman Karrya* states—I am in charge of the North Points, French Rocks. I went to the points as soon as the No. 9 Up train left Seringapatam and returned to the station after passing the train over the points. I do not know what took place in the Telegraph Office.

22. *Porter M. Krishna Rao* states—No. 9 Up came and stopped here about 30 minutes. The Guard and Driver of the above train and the Station Master were talking together. We were all asleep on the platform during the time the train was standing on the platform and know nothing more of what happened in the Telegraph Office.

23. *Porter Hutcha of French Rocks* states—I was at the station on the night of the 11th of October. I do not know that anything unusual happened in the Telegraph Office on the occasion of 9 Up being at the station. I saw the Driver and the Guard and Station Master talking together in the Telegraph Office.

[*Porter Rungan of French Rocks gives similar evidence.*]

Train staff of No. 15-25 Special.

24. *Driver Fox* states—I was Driver of the 15-25 Down Special from Bangalore to Mysore on the 11th of October. The train was running late. I stopped at Mandya about 37 minutes. I asked the reason of the detention and was informed by the Station Master, Mandya, that the Yeliyur Station Master was telling him that 7 Up was on the line between Yeliyur and Mandya. The Station Master, Mandya, could not understand this and asked Yeliyur where 7 Up was. Yeliyur Station Master then told him that the train had not yet arrived at Yeliyur. The Station Master, Mandya, found fault with him for saying such things and asked for Line Clear for my train. Line Clear was given, and I started from Mandya, I do not remember when I arrived at Yeliyur, but when I sighted the Distant Signal it was at danger, and I slowed down. 7 Up was coming in; the signal was lowered for me, and I came in on the platform on the Main line. 7 Up was then standing on the siding. I saw the Relieving Station Master at the outer facing points as my engine was passing; he held up a lamp, and I recognized him by the light. I told the Fireman to fire up and that I would go and enquire where 9 Up was. The Station Master and the Guard of my train came to the Telegraph Office together.

The Station Master had a red woollen nightcap on, pulled over his forehead and ears and something round his neck. Besides myself, the Station Master and the Guard of my train, there were in the Office the two Guards of No. 7 Up and the Under-Guard of my train and a Brahmin, whom I took for the Assistant Station Master. The Station Master was making out the Line Clear documents for No. 7 Up. He was about to give the Guard of 7 Up a Line Clear Ticket on a green form when his attention was called to the mistake. He appeared to get confused when the other Brahmin intervened and said he would block the Line. I do not know which section he wanted to block, but he advised the Station Master not to get excited. The Station Master would not let him block the line. When I first went into the Office I asked the Station Master where I was to cross 9 Up. He enquired why I wanted to ask the question as the train was standing at his station. I corrected him, and pointed out that the train standing at his station was No. 7 Up. He then said I would cross No. 9 Up at French Rocks. I left the Office about the time that the Station Master and the Assistant Station Master were talking about blocking the line as I saw there was confusion and thought it better to go away. I told the Guard of my train to bring me the Line Clear Ticket. I did not see the Station Master again. He appeared to be sober when I saw him. The Line Clear Ticket was brought to me by the Chief Guard. I was on the engine at the time. The Ticket, Exhibit* L, is the ticket that was handed to me by the Guard. The train was standing at Yeliyur about 35 minutes. I saw a Pointsman at the Facing points coming in and another at Trailing points going out and two Porters who came to ask me where the Circus Lions were. The signals were all lighted. No shunting was done by either my train or 7 Up. It was raining when I left Yeliyur, and the night was very dark. Nothing unusual happened until I got over the bank about 4 miles from Yeliyur. Then I saw lights (red, green and white); I whistled for Brakes, put on my steam and hand-brakes and reversed the lever. Steam was already shut off (on topping the bank). I ran about 100 yards after putting on the brakes before the collision occurred. The speed of my train was about 10 miles an hour when I first sighted the other train. The speed could not have been higher because I was obliged to run steadily down banks owing to the bogie giving trouble. It was running hot. I did not hear the engines of the other train whistling. I know nothing more of the circumstances of the collision as I was thrown off my engine. When I first saw the light I thought for

* Not printed.

a moment it was a Gangman's light as it was white, but seeing sparks I knew it was an engine and took the action previously stated.

Examined again.—I cannot recognize the man I said in my former statement I thought was the Assistant Station Master. I see the person now before me [Rama Rao]. I cannot recognize who he is and don't know whether he was in the Office or not. Thangavaloo was in the Office at the same time that the Driver and Guard of 7 Up were there. The person who offered to assist the Station Master with the Line Clear work got up from the floor and stood behind the Station Master. He was wearing a white cloth around his head and was enveloped in a sheet although I cannot now identify the man. I am positive, he was not the permanent Station Master, nor was he the Guard of 7 Up, Venkoba Rao, nor yet Thangavaloo, the Brakesman of 15-25 Down Special. I came to the Telegraph Office shortly after my train arrived. I remained there inside the Office until the Line Clear Ticket was made out for my train. The man I have described was standing up in the Office all the time. This was about 15 minutes. He did not go out during the interval. There was a bed in a corner on the floor. It was not occupied. Guard Babaloomiah was sitting on the arm of a chair with his face towards the door at about a yard from the door. I am positive Thangavaloo was in the Office all the time that I was there. Guard Babaloomiah asked Thangavaloo in my hearing in the Yeliyur Office to write his name for his (Babaloomiah's) Journal, as he was a new man and he (Babaloomiah) could not spell it and that he might not find him in the morning. I am certain of this. Thangavaloo got up and wrote his name and remained standing. I have no reason to think that the offer to assist the Station Master on the part of the person enveloped in a sheet, was not heard by every other person in the room. We were all standing close to each other near the table. The person referred to spoke in Canarese. I understand a little Canarese, and I understood he wanted to help the Station Master in the Line Clear work, because he stretched out his hand and touched the Instrument but was pushed away by the Relieving Station Master with some sort of a grunt of disapproval. I was standing leaning against the table with my back to the door and between Babaloomiah and the door. I was quite close to the Instruments (overlooking them). It is utterly impossible for me to have made any mistake as to any person I saw touching the Instrument.

The man in the white sheet was standing up in the Office when Venkoba Rao, the Chief Guard of 7 Up was in the Office. Venkoba Rao was standing facing the man in the white sheet and must have seen him. I am perfectly certain that the remark to the Station Master not to be excited or words to this effect was made by the man in the white sheet and not by Venkoba Rao. I cannot describe the man in the white sheet as the sheet was close up around his head. I saw only his nose and eyes and a small part of his face. I have seen the permanent Station Master Narasima Charry. I know him well; he is a young fair Brahmin.

Re-examined.—I did not notice the time the collision took place as I was injured. My watch I believe was given to Turner Royle. I did not notice particularly what the Station Master, Yeliyur, did with the Telegraph Instruments after 7 Up left, but I am sure he did not work it continuously, he did not tap more than once or twice, he was writing out a Line Clear message, but no instrument was ticking at the time. I believe that Venkoba Rao is giving an incorrect statement as to the person in the white sheet standing up in the Office; as to the best of my judgment it was impossible for him not to have noticed the man standing just behind the Station Master in the middle of the room with his arms folded.* Thangavaloo may not have noticed him if he went out.

* Note by Investigating Officers.

This is an attitude frequently assumed by Rama Rao, who was never before seen by Driver Fox and may be considered a conclusive mark of identification.

25. *G. Rodrigues (1st Fireman)* states—I remember my train stopping at Mandya. It stopped there about 30 minutes. On approaching Yeliyur my Driver whistled for the signal. He slowed into the station. I did not notice if there was anybody at the points as I was attending to the injector, which was giving trouble. We came to a stand on the Platform line. I saw a train in the siding shortly after we arrived, but I did not notice whether it was standing there when we arrived or whether it came in after we arrived. The Driver told me to fire up and he would go and see about Line Clear. He came back after a time and asked me to hurry up. A few minutes later the Line Clear Ticket was brought. I did not see the person who brought the ticket. Nothing unusual happened until we topped the bank approaching the site of the accident. The Driver whistled for brakes to control the train going down the bank and immediately afterwards whistled again and shouted out that there was a train in sight; I looked up and saw the lights ahead and the collision happened at once. I did not hear any whistling from the engine of 9 Up.

26. *Shamsoodeen* states—I was 2nd Fireman of 15-25 Down Special, Bangalore to Mysore, on the night of the 11th of October. We were detained some time at Mandya. I don't know how long. When approaching Yeliyur I heard my Driver whistling for signals. We did not stop, we ran slowly into the station over the Main or Platform Line. I saw a man I thought was the Station Master standing about the middle of the platform. He was wearing a black coat and a white puggree. He was standing with a Hand Signal Lamp in his hand. He called out to my Driver and said "why are you late." I am not sure that he was Station Master. When we came to a stand I was told to look round the engine, and I did so. The night was dark and it was raining after leaving Yeliyur. I noticed nothing until we were some miles out of Yeliyur; suddenly the Driver called out "gharry, gharry," gave three whistles, and put on the steam brake. I was putting on the hand brake and then the collision took place. I first saw the light of the Up train about half the distance between 2 telegraph posts. I was thrown against the firebox door.

I saw a Pointsman at the North points at Yeliyur as we passed. I saw no one else between that spot and the platform when I saw the man already described.

27. *Guard Babaloomiah* states—I was Chief Guard in charge of the Down Special booked to leave Bangalore City at 15-25 for Mysore on the 11th of October. We left Bangalore City at 17-25 and arrived at Mandya at 22-43 (having started

late and lost time on the road). We stopped altogether 53 minutes at Mandya. The detention was for Line Clear. I was in the Telegraph Office waiting for Line Clear. The Station Master was calling Yeliyur at intervals and at last got an answer. I do not know what passed on the Instrument between Yeliyur and Mandya. Driver Fox of my train was also present in the Telegraph Office. Nobody else was there. After the detention stated above the Line Clear Message and Ticket was made out and given me. I gave the Ticket to the Driver, and we walked up together towards the engine, and the train started. On nearing Yeliyur the Driver whistled for the signals. It was not given at once, and the Driver slowed down and gradually drew into the station on the platform line after the signal was given. We arrived at Yeliyur at 23-58. 7 Up was standing on the siding cap; when I came out of my brake-van, I saw the Station Master at the Mandya end of the platform, and we both walked together towards the Telegraph Office. He was dressed in a long black coat and he had a black woollen cap pulled over his ears and over the head exposing only his face, and over this was a white puggree. No conversation took place between us on the platform. When we entered the Telegraph Office we found the Driver and Chief Guard of 7 Up there. I am certain that the Driver of 7 Up was in the Telegraph Office when I entered it. Driver Fox of my train came afterwards. He and the Driver of 7 Up remained in the Office together. I did not see the Yeliyur Signaller Rama Rao, nor did I see any one lying on the floor asleep. Immediately on reaching the Telegraph Office I asked the Station Master why he detained my train at Mandya. He said I did not detain your train at Mandya and he denied having been called by Mandya. He went to the Telegraph Instrument on the right hand side facing the table and commenced to work. He wrote out a Line Clear Ticket on red paper and Line Clear message on green paper. He handed both to the Guard of 7 Up. The Guard immediately pointed out that the Line Clear message was written on a wrong form. The Station Master took back the message and rewrote it on a red form. The Guard of 7 Up asked him why he gave him a wrong form. He did not answer at first but eventually said it was a mistake. When I spoke to him about detaining my train at Mandya he appeared to be "gabra."

I did not see any person offering to assist the Relieving Station Master to get Line Clear. I am sure I did not see any person at this juncture other than those already named. The Driver and Guard of 7 Up left the Office, and the Station Master ordered a porter to give the starting bell for 7 Up, and the train started. I remained in the Telegraph Office with the Driver of my train. The Station Master went to the same Instrument (the right hand Instrument). I am sure of this. He tapped for some time and after the tapping was over he wrote on a green message form. He wrote the whole message out at once. He did not write at the same time the Instrument was clicking. After writing the message he made an entry in the Train Register Book. He wrote only one message, and this he gave me. I recognize Exhibit* F as the message in question. No other message was written [*corrects himself*], I cannot say whether the Station Master wrote one or two messages. He wrote the Line Clear Ticket after the message. I say this although I see the time on the Line Clear Ticket is 0-7, and the time on the Line Clear message given me is 0-8. I asked the Station Master where No. 9 Up was. He said it was at French Rocks. I asked the question when I had got the Line Clear Ticket in my hand I did not compare the Line Clear Ticket with the Line Clear message. I gave the ticket to the Driver. The Driver and I walked together to the engine. I gave the ticket to the Driver at the engine The Station Master gave the order for the starting bell as I was returning towards my brake-van. He was outside on the platform at the time. I do not remember the exact place where he was standing. The train started at 0-9. It was raining when we left Yeliyur, and the night was dark. Nothing happened until we got to the incline approaching the site of accident. The Driver then whistled for brakes. I applied my brake, and the train ran on for about half a mile, then the Driver again whistled for brakes. I screwed my brake on harder and immediately I felt a shock from the collision. I saw no lights.

28. *Under-Guard H. Lippert* states—I was Under-Guard of 15-25 Down Special. I remember the train stopping at Mandya. I did not go into the Telegraph Office. I don't know how long it stopped. On approaching Yeliyur the Driver whistled for signals. The train slowed down and gradually drew into the station on the platform line. I saw a man standing on the platform, but I did not recognize him. He was wearing a white cloth and a small red cap; I can't describe it. No. 7 Up was standing on the siding. I did not get out of my van. 7 Up left first. Our train stopped at Yeliyur about 15 minutes. I saw Driver Fox of our train returning to his engine. I also saw the Chief Guard of my train coming from the engine with a paper in his hand. The night was dark and it was raining. I noticed nothing on the way until we had got some miles out of Yeliyur, when I heard one whistle, about ten minutes afterwards I heard three whistles. I put on my brake and looked out and seeing a red light approaching, I opened the door and jumped out. The collision then happened. I was sent with a message of advice about the accident to Yeliyur about half an hour after the collision. I ran and walked all the way. I met no one but gangmen until I arrived at the outermost points; here a Pointsman was standing seeing me running with the gangman who had accompanied me, he followed us to the station. I saw or met no one else until I came to the platform when I found a policeman standing not far from the Station Office. I enquired after the Station Master. He said the Station Master was not there and referred me to the Signaller, whom I found asleep on the floor. I awoke him and asked him to send the message. He got up and sent about half of it when he became sick and went out to vomit. Meanwhile the permanent Station Master came, and I asked him to send the message. He told me that the Relieving Station Master had run away with the Hand Signal Lamp and some money from his own box. He did not say who had told him. He told me that the 15-25 Down Special had been started by the Relieving station Master. I got signature for the message and returned to the scene of collision. I heard the Signaller vomitting outside. He came back to the Office while I was there and while the permanent Station Master was there. I cannot recognise either the Pointsman or the policeman I saw, as it was dark.

* Not printed.

29. *Brakesman, Thungaraiu* states—I was Brakesman of the 15-25 Special from Bangalore to Mysore on the night of the 11th October. We were detained some time at Mandya. I don't know why. We approached Yeliyur cautiously. 7 Up was standing on the siding when we arrived. I left my van at Yeliyur and went to see Circus people. I did not go to the Telegraph Office and know nothing of what happened at Yeliyur, except that we stayed some time there about 5 or 10 minutes. Some miles out of Yeliyur there was a collision. The night was dark, and it was drizzling. I heard three whistles for brakes. I put on my brake and train ran for a minute or two, then there was more whistling and I felt a shock and the train stopped. I looked at my watch, which was keeping good time and it was 1-25. I looked at my watch about 15 minutes after the collision took place. I have heard what Driver Fox has said about my being present in the Yeliyur Telegraph Office all the time. This is incorrect. I was never in the Telegraph Office at any time. I was attending to the Circus people giving them drinking water. I went to close the carriage doors that were open. I went to the filter stand near the Telegraph Office to deposit the tin pot and was standing for a few minutes close to the door of the Telegraph Office. I also saw the Relieving Station Master. I did not see any one else nor did I hear anything. My Guard did not ask me to write my name at Yeliyur. He asked me for my name at Bangalore as he was a new man this side. I could not say if there were any others in the Telegraph Office besides those named as they were all crowded together around the Telegraph Instrument.

Re-examined.—I have since seen Driver Fox and he has re-called to my mind that I was asked by the Chief Guard Babaloomiah to write my name at Yeliyur. I saw some one lying on a bed in the Telegraph Office, but I took no notice of him. I saw Guard Babaloomiah hand the Line Clear Ticket to Driver Fox.

When the train was leaving Yeliyur, I saw the Relieving Station Master. He was dressed in a dark Railway uniform coat and red nightcap.

I looked about for about ten minutes and took some roof lamps for the carriages to see the wounded, and after that I started for Yeliyur. I followed Lippert. He was about a mile ahead of me. I went under orders of my Chief Guard, who had not given correct information to Lippert, and he sent me with further revised information. I met on my way two gang coolies and a maistry and between the South points and the crossing a Policeman. I did not speak to the Policeman I went on and saw permanent Station Master Narasima Charry on the platform. I saw Lippert also on the platform. I saw nobody else. Narasima Charry told me that he was sick, that he had been relieved by Seetaramier that day and that Seetaramier had "bolted." He said Seetaramier must have thought 7 Up was 9 Up and through this misunderstanding had started 15-25 Down Special. He took me into the Office and showed me Seetaramier's box from which he said Seetaramier had taken some money before he had absconded.

Train staff of No. 9 Up.

30. *Driver T. Boye* states—I was Driver of No. 9 Up Extra (Train Engine), which left Mysore on the night of the 11th October. I arrived at French Rocks about 0-5. I went to the stations to enquire about Line Clear and was told by the Guard that No. 7 Up had not arrived at Yeliyur. I was not in the Office when the Line Clear messages for my train were written, nor when the Line Clear Ticket was written. I was outside, and the Line Clear Ticket was given me by the Guard outside. I left French Rocks at 0-15. It was raining, and the night was dark; nothing unusual happened until we were about seven miles out of French Rocks. There were a curve and a bank about here. I told the Fireman to fire up, so that we could get over the bank, and as it was down hill afterwards we would roll down to Yeliyur. Saying this I turned round and saw the head lights of an engine. I whistled for brakes and shut off steam and was about to reverse the lever when the collision occurred. I did not hear the engine of the other train whistling. I saw the Station Master, French Rocks, when I went to the Telegraph Office; he was all right. I believe the speed of my train was 18 miles an hour immediately before the collision. One of my Firemen was killed and the other died a few hours afterwards. I was thrown off the engine. I do not know at what time the accident occurred.

31. *Driver Royle* states—I was Driver of the second Engine on No. 9 Up Extra train that left Mysore on the night of the 11th October; my Firemen were Rungasawmy and Darmalingum. I do not remember at what time the train arrived at French Rocks. I did not leave my engine at the station. We stopped at French Rocks about 25 minutes. The Guard said we were waiting for Line Clear. After we left French Rocks nothing unusual happened until we were about 6 miles out of French Rocks. At this place I heard a whistle for brakes from the engine in front, three sharp whistles. One of my Firemen was firing and the other was handing him the wood. I shut off steam and looked out. I did not put on my brakes. The collision took place at once. It was raining when we left French Rocks and continued raining up to the site of the collision. The night was dark and I saw nothing before the collision took place. I only heard the first engine of my train whistle. The speed of the train before the collision was from 11 to 12 miles an hour. I do not know the time the collision took place.

32. *Fireman Rangasawmy* states—I was the first Fireman of the extra engine attached to No. 9 Up Extra train that left Mysore on the night of the 11th October. We stopped at French Rocks about 15 minutes; nothing unusual happened till we arrived at the site of the collision. Before the collision I heard three whistles from the first or Train Engine. I was firing at the time. I shut the firebox door and looked out, I then received a shock, my Driver was thrown out, my second Fireman attempted to put on the hand brakes but was thrown down, I frequently looked out after firing between French Rocks and the site of collision, but saw nothing. The night was dark, and it was raining.

33. *Darmalingam, 2nd Fireman*, corroborates Rungasawmy.

34. *Guard B. Chinniah* states—I was Chief Guard of No. 9 Up Extra train Dasara, Time Table, dated September 1891, and left Mysore 22-25, the train being booked to leave at 22 o'clock of 11th October. The train arrived at French Rocks at 23-46. It was booked to arrive at 23-21. It was

detained at French Rocks altogether 29 minutes waiting for Line Clear. 7 Up was said to be on the section in advance. I had a copy of the notice for the 15-25 Down Special Mixed train. According to the notice I was booked to cross 15-25 Down Special at Paschamvahini.

I thought there were no trains to cross at French Rocks, but I enquired of the Station Master where the 15-25 Special was, and he replied that Yeliyur Station Master had informed him that she was between Maddur and Mandya. The Station Master gave me the Line Clear Ticket and copy of the Line Clear message. I signed the Train Register Book and handed the Line Clear ticket to the Driver. The Driver was waiting with me in the Telegraph Office. Besides the Station Master, myself, and the Driver, there was my Under-guard and the Signaller in the Office. The Driver made no enquiries of the Station Master. We left French Rocks at 0-15. When we left French Rocks it was raining and the night was dark. The Driver and myself and Under-guard exchanged signals at the outermost points and about 6¼ miles out of French Rocks, I heard the engine whistling for brakes.

I applied my brakes and soon after (about two minutes) I felt a severe shock and was thrown forward in my brake-van and the train stopped. I think the train was running at 11 miles an hour when I heard the engine whistling for brakes. I realised no diminution of speed after the engine whistled. I looked out on the right hand side when the engine whistled and I put on the brake, but saw nothing. I felt the first shock as I was looking out and felt another as I was drawing my head in again.

The Station Master and the Signaller at French Rocks were wide awake and apparently sober when we left French Rocks. My train consisted of 27 vehicles including 1 3rd Class Brake Carriage, 2 Brake-vans, 15 Empty Covered Goods, 6 Low-sided Empties, 2 High-sided Empties, and 1 High-sided Bogie.

There were, as far as I can remember, 8 3rd Class passengers in the Brake Carriage besides my Under-guard, Narayen Rao, and a Brakesman who was returning to the Head-quarters as passenger. The 3rd Class Brake Carriage was next the engine. No passengers in this carriage were killed or injured. Under-guard Narayen Rao was slightly hurt. The Driver of the first or Train Engine was Boye, and his Firemen were Madura and Abdulla. The Driver and Fireman of the Second Engine were respectively Royle, Rangasawmy and Dharmalingam. The staff of both engines appeared sober at French Rocks.

I see Exhibit* C C. It is the copy of the "Line is Clear" message given me by the Station Master of French Rocks for my train No. 9 Up on the morning of the 12th October. I observe that it is wrongly dated and that the time does not agree with that entered on the Line Clear Ticket, 0-10 being the time shown on the message as its received time against 0-9 entered on the Line Clear Ticket. I did not compare the copy with the original as laid down in the rule.

35. *Narayen Rao, Under-Guard of 9 Up of 11th October*, states—Our train arrived at French Rocks at 23-46 and left at 0-13. While the train was at French Rocks, I went into the Telegraph Office and enquired why we were being detained. The Station Master said "No. 7 Up has not yet arrived at Yeliyur." Besides the Station Master and myself, there were also in the Office, Signaller Syed Abdul Kadar and Guard Chinniah. After a time I heard the Telegraph Instrument clicking. Signaller Abdul Kadar took a message form on red paper and was writing while the Instrument was clicking. The message was a short one two or three lines (Exhibit* C is very likely the one). I did not see any message sent by French Rocks. I was not paying close attention to the messages sent and received. I heard my Guard ask the Station Master where the 15-25 Down Special was, and I heard the Station Master say that Yeliyur Station Master had stated that it was between Maddur and Mandya. Nothing happened after we left French Rocks until I heard three whistles for brakes some miles from French Rocks. I got up and screwed on my brake one or two turns when I received a shock and was thrown on the floor. I am sure that between the whistling and the shock only a second elapsed. My brake carriage was next to the second engine. There were about 7 passengers in the carriage in which I was travelling. None of them got injured except a few scratches.

36. *J. Kelly* states—I was spare Guard returning as passenger in No. 9 Up. I was asleep. I know nothing of the circumstances in connection with the collision except that I was thrown down from the seat on which I was lying, when the collision occurred.

Train staff of No. 7 Up.

37. *Driver E. Boye* states—I was Driver of No. 7 Up Extra train that left Mysore for Bangalore on the night of the 11th October. I arrived at Yeliyur about 1 o'clock. When I was coming into Yeliyur the 15-25 Down Special was in sight and soon after my train came to a stand. The 15-25 Down Special came in on the platform line. My train was kept waiting about 30 minutes after the Down Special arrived. I went to the Telegraph Office to enquire what was the matter. The Station Master, the Chief Guard of 15-25 Special, and the Guard of my train were in the Office, nobody else was there. I did not see Driver Fox of the Down Special nor the Brahmin Signaller when I was in the Office. I asked the Guard what the matter was and he told me the Station Master was busy with the Line Clear. Nothing more happened, and I left the Telegraph Office. I did not see anything wrong about the Relieving Station Master. I know him well. He was working at Seringapatam before he went to Yeliyur. He was wearing a white cloth around his head when I saw him in the Telegraph Office. I did not speak to him. Shortly after the Line Clear Ticket was brought to me, I started the train. I know nothing more of what happened at Yeliyur on the night in question. My Fireman did not leave the engine.

38. *J. Nelson, 1st Fireman*,—Corroborates Driver E. Boye as to the 15-25 Down Special being in sight when his train arrived. Did not leave the engine and knows nothing of what occurred in the Telegraph Office.

39. *R. Hessing, 2nd Fireman, corroborates 1st Fireman as to position of 15-25 Down Special and* states:—I saw the Relieving Station Master on the platform as the engine was passing. He had a black coat on and a white head dress; it looked like cloth, I know him. He was standing opposite the Station Master's Office and the light was

* Not printed.

shining on him. I saw some one going towards the points but did not recognize the person. Our train stopped a good while at the station. My Driver went to the platform after the 15-25 Down Special arrived and came back in a few minutes. The Line Clear Ticket was brought by the Guard of our train. The signals were all lighted. I know nothing more of what happened at Yeliyur on the night in question.

40. *L. Venkoba Rao* states—I was Chief Guard of No. 7 Up and arrived at Yeliyur at 23-39. When I arrived I did not see the 15-25 Down Special. She came in about 15 minutes after my arrival. I am sure of this. The Down Special was not in sight when my train arrived. The Station Master spoke to me about my train being late for about three minutes and then he went in the direction of the North points. He was dressed in a uniform coat and a red woollen night-cap (monkey cap). He was sober and on the alert, he was an intelligent man. I have known him for four years. After the arrival of the 15-25 Special I was in the Telegraph Office. My Driver Boye came and also the Driver and Guard of the Down Special. The Station Master and Guard of the Down Special came into the Office together. The Guard of the Down Special was telling him that he was detained at Mandya for 30 minutes and he would book time against him. The Relieving Station Master did not say much; he merely said all Guards were booking time against him. He commenced to work on the Instrument and then he made out Line Clear message for my train. He wrote the Line Clear message on a green form instead of a red one, and I refused to take it. He took it back and wrote it out on a proper form. He told me to start the train. The bell was not rung as it was a goods train. My train left at midnight exactly according to my watch. I compared my watch with the message and noticed that the message was timed 6 minutes ahead of my time. I omitted to call the Station Master's attention to the discrepancy.

Rama Rao was sleeping in a corner on the floor on a tarpaulin. The time when I saw the Relieving Station Master making a mistake about the form, I told him to be careful and write patiently. He was in a great hurry having run some distance along the platform before coming in. He wrote the messages as he was working the Instrument. No mention was made in my hearing as to the whereabouts of 9 Up. I did not see any boy at the station. I only saw the persons already named.

Re-examined.—I have heard what Fox has said about a man in a white sheet. I did not see such a man nor did I hear any one offering to signal trains. The Signaller Rama Rao and I knew each other when we were boys. I met him again at Gadag several times. We have always been on friendly terms.

41. *Under-Guard Mahomed Surver* states—I was Under-Guard of the 7 Up E. Train from Mysore to Bangalore City on night of the 11th October. I do not remember at what time our train arrived nor when it left Yeliyur. 15-25 Down Special was not at the station when we arrived. It came about 15 minutes afterwards. I went to the station platform a few minutes before it arrived. I saw the Station Master on duty. He was dressed in a black coat and red woollen cap. He was talking with the Guard of my train. I saw the Driver of my train, the Driver and the Guard of the 15-25 Down Special (after it arrived) on the platform. I do not know what took place in the Telegraph Office or what else occurred at Yeliyur on the night in question.

42. *Krishnamah Charry* states—I am the brother-in-law of the Station Master, Yeliyur, Narasima Charry. I am 12 years of age. I was staying with my brother-in-law at Yeliyur for a few days. I was with him on the night of the 11th October. He was ill and lying down in the house. At about 8 o'clock Station Master, Seetaramier, and Rama Rao came and had meals with my sister and brother-in-law and after that they left. I did not see Seetaramier after that. I went to sleep at about 7-30 P.M. I was awakened some time in the night by a person calling for my brother-in-law, I think it was Constable Subbanah. I did not see him. I heard his voice. My brother-in-law got up and went to the station. I don't know of anything else that happened that night. I heard of the collision in the morning about 4 o'clock when I awoke. I copied some Line Clear messages for my brother-in-law in the Telegraph Office before he went sick on the 10th. I do not know Morse telegraphy. Seetaramier and Rama Rao were sober. I did not see them drinking anything intoxicating at supper. I know nothing more.

Conclusion.

43. The accident appears to have been caused by Seetaramier, the Relieving Station Master of Yeliyur, having given Line Clear to French Rocks for No. 9 Up Dasara train, and having started the 15-25 Special from Yeliyur without Line Clear. This conclusion is further supported by the disappearance of Seetaramier before news of the collision had reached Yeliyur. The Guard of the 15-25 Special was also to blame in failing to compare his copy of the Line Clear message, with the original received draft which should have been in the possession of Station Master, and B. Chinniah the Chief Guard of No. 9 Up is in fault for not detecting the discrepancies between his copy and the original of the Line Clear message.

44. The facts in support of No. 9 Up Dasara train having been started from French Rocks on the authority of a duly received Line Clear message from Yeliyur are—

(*a*) The French Rocks Line Clear messages are practically in order.

(*b*) No. 9 Up Dasara train was detained about 25 minutes waiting for Line Clear for Yeliyur. Had it been intended to despatch the train without Line Clear, there was no reason for the delay.

(*c*) The despatch of No. 9 Up was known at Yeliyur before intelligence of the disaster could have reached.

45. That the 15-25 Special left Yeliyur without Line Clear is probable for the following reasons:—

(*a*) The train had been detained at Mandya about 53 minutes owing to Seetaramier's inattention to the Telegraph Instrument and the Guard had threatened to book time. It was

therefore an object to hasten the despatch of the train, which could be done by not waiting for Line Clear and regularizing afterwards

(*b*) No records of the Line Clear messages can be found either at French Rocks, or at Yeliyur. Had these messages passed, the Yeliyur draft would have been forthcoming valuable exculpating evidence.

46. There is no evidence to show that B. Rama Rao, Signaller at Yeliyur, was in any way responsible for the disaster, though there is grave reason to doubt whether he was so utterly ignorant of everything that occurred in the Booking Office after 10-30 P. M. as he endeavoured to prove.

47. The enquiry brought to light certain irregularities which appear to be frequently committed by the employés, *viz.*:

(*a*) Failure on the part of a Guard to compare his copy of the "line is clear" message with the Station Master's original draft.

(*b*) Failure on the part of all concerned to check the number of words in a message with the signalled number.

(*c*) The practice of writing out Line Clear messages in advance.

48. On a line the Block signalling of which is worked on some portions with Morse and on others with Block Instruments, and on which Guards are liable to be transferred from a Block Instrument section to a Morse-worked length, the omission to compare the copy with the original of the "line is clear" draft, is from force of habit a not unnatural error. The object in supplying the Guard with a copy of the Line Clear draft, and in making him compare the copy with the original, appears to be useful only in the detection of obvious errors, and as a check against after-alteration on the part of the Station Master. No guarantee is given to the Guard that the message purporting to have been received, has ever really passed. The procedure in question is I believe not universally followed, on other lines, but if the Southern Maharatta Railway authorities desire to ensure the Guards reading the "line is clear" messages, the duty of making the copy should fall on the Guard and not on the Station Master, and the drafts should be interchanged.

49. The failure to ascertain whether the number of words in a message agrees with the signalled number removes a most important check on the accuracy of the message. The omission of one word might reverse the meaning of the communication.

50. The practice of preparing Line Clear messages in advance might be checked by issuing the form consecutively numbered and bound up in a book. This is compulsory in "line clear and caution message working," and the procedure should I consider be extended to the "Absolute Block" system. The introduction of this practice would to a great extent prevent the waste of message forms, which, judging from the number of destroyed forms found in the booking office, and cinerator at Yeliyur, would be a desirable economy.

51. The question of the low pay of the Station Master at Yeliyur has been referred to in many of the public prints. Yeliyur is a third class station at which the mail trains are not timed to stop, and the salary of the Station Master when compared with the wages of men holding similar charges on other lines does not appear small. Of necessity in a country like India, where fares are low, the wages of the railway staff must be small, and natives are the only persons who can afford to accept the inferior and low-paid posts; such men cannot be expected to have the same intelligence, reliability, and readiness of resource as the more highly-paid European, and consequently an Indian railway cannot be worked with the same immunity from accident as a line on which a higher class of Station Master is to be found. The principal means of guarding against accidents which must be relied on in this country are careful supervision and inspection on the part of the controlling staff, and the introduction of the best type of Intruments requiring the joint action and concurrence of two persons, and further safeguarded as far as possible by automatic check. On the Mysore State Railway where Block-working is carried on by means of Morse Telegraph Instruments, the control imposed on the action of Station Masters is not so rigid as it might be. The system if properly worked is an absolute protection against collisions between stations, but owing to the absence of visual check shewing the state of the section with respect to trains, faulty action on the part of a Station Master, either in misreading a message, or in sending a wrong one is not brought to notice. I strongly recommend that the employment of Block Instrument of the type used on other portions of the Southern Mahratta Railway system be extended to the Mysore State Railway. It is very desirable that one standard manner of Block-working be in force over the whole of Southern Mahratta Railway system, and that the checks furnished by the Block Instrument be availed of. Cost has hitherto prevented the introduction of the Block Instrument, but it has proved ill-advised economy, as in the case of the present collision the damage to rolling-stock alone is estimated at R50,000, to say nothing of the amount of compensation that may be exacted from the Company. Out of the 1,333½ miles comprising the Southern Mahratta Railway system, 762 miles appear to be worked with Block Instruments, and 57 ½ miles with Morse sounders. I believe a solitary case has occurred of the Block Instrument being tampered with, but the committal of the double error of two trains being so started as to cause collision should, with the additional check of the Guard's inspection of the Instrument, be impossible.

52. It should be noticed that the Train Register Book at Yeliyur was in the present case apparently used to jot down the times connected with the departure of the 15-25 Special necessary for the after-fabrication of the Line Clear messages. As all the information required by the Traffic Department is entered on the Message drafts, the utility of the Register is, with Morse working, questionable.

53. Finally, I consider that the exact wording of all messages required in the Block-signalling should be rigidly laid down in the Working Rules. In particular the procedure to be followed when Line Clear is refused ought to be very clearly fixed. With the carelessness that now exists in checking the number of words in a Message draft, care should be taken that a message worded "Line is not clear" is never sent, as the omission of the word *not* would be most serious.

BANGALORE, *23rd October 1891.*

Report of the joint departmental committee on the collision between the 15-25 down special mixed train and No. 9 Up E. train between Yeliyur and French Rocks at mile 277-21 on the morning of 19th October 1891.

We have jointly enquired into the matter. The following witnesses were examined:—

1. M. R. Narasima Charry—Substantive Station Master. Yeliyur.
2. B. Rama Rao—Signaller. Do.
3. Siddiah Koppal Deva—Pointsman. Do.
4. Erally Deva—Pointsman. Do.
5. Subbannah—Police Constable. Do.
6. P. Gopalasawmy Naidu—Station Master. French Rocks.
7. Syed Abdul Kader—Signaller. Do.
8. Ramasawmy—Pointsman. Do.
9. Kariah—Pointsman. Do.
10. Kistna Rao—Porter. Do.
11. Hutcha—Porter. Do.
12. H. Fox—Driver of the 15-25 Down Special.
13. Rodrigues—1st Fireman. Do.
14. Sumsudeen—2nd Fireman. Do.
15. Babaloomiah—Chief Guard. Do.
16. Lippert—Under-Guard. Do.
17. Thungavaloo—Brakesman. Do.
18. T. Boye—Driver of No. 9 Up E. train.
19. Royle—Driver of extra engine attached to No. 9 Up E. train.
20. Rungasawmy—1st Fireman of No. 9 Up E. train.
21. Durmalingam—2nd Fireman. Do.
22. Chinniah—Chief Guard. Do.
23. Narayen Rao—Under-Guard. Do.
24. Kelly—Spare Guard returning as passenger with No. 9 Up E. train.
25. E. Boye—Driver of No. 7 Up E. train.
26. J. Nelson—1st Fireman. Do.
27. R. Hessing—2nd Fireman Do.
28. Venkoba Rao—Chief Guard. Do.
29. Mahomed Surver—Brakesman. Do.
30. Kristnama Charry, a relative of the permanent Station Master, Yeliyur.

2. The 15-25 train was a Special Mixed Train conveying part of Fillis' Circus from Bangalore City to Mysore and was composed of the following engine and vehicles:—

Engine No. 211.	1 Third class carriage.
7 High-sided wagons.	3 Second class carriages.
3 Covered goods wagons.	1 First class carriage.
1 Third class carriage.	1 Second class carriage.
4 Covered goods wagons.	1 Brake-van.

This train was booked to cross 7 Up at Seringapatam and 9 Up at Paschamvahini. It left Bangalore City at 17-25 and, losing time on the way, it arrived at Mandya at 22-48 and had to wait there about fifty-three minutes, for Line Clear, owing to inattention to the telegraph at Yeliyur. Leaving Mandya at 23-36 it arrived at Yeliyur at 23-58, where No. 7 Up E. train was waiting. The Guard received what was supposed to be copy of the "Line is Clear" message (enclosure marked Exhibit* F) and the Line Clear Ticket (enclosure marked Exhibit* L.) to French Rocks and the train started at 0-10

3. The 9 Up E. train was booked to leave Mysore at 22 o'clock. It was composed of the following engines and vehicles:—

2 Engines—Nos. 215 and 216.	1 Brake-van.
1 Third class brake carriage.	5 Covered goods wagons.
1 Horse box.	1 Low-sided truck.
4 Low-sided trucks.	10 Covered goods wagons.
2 High-sided wagons.	1 Brake-van.

It had a late start of 25 minutes and arrived at French Rocks at 23-46. After a detention of 26 minutes the Guard was given a copy of the "Line is Clear" message and the Line Clear Ticket (enclosures marked Exhibit* C C, and Exhibit* M) to Yeliyur, and the train started at 0-15.

It came into collision with the 15-25 Down Special at mile 277-21 on a curve, where the view was intercepted by trees and on a gradient of 1 in 70. Five persons were killed and thirteen injured and much damage was done to stock. Statements of the killed and injured and of the damage to stock are annexed Enclosures Nos. 2 and 1 on pages 29 and 28.

The actual time of the collision cannot be determined with any certainty; it probably occurred between 0-28 and 0-45.

4. The Station Master on duty at Yeliyur was Seetaramier, a Relieving Station Master, who arrived at Yeliyur about midday on the 11th and took charge of the Station from Narasima Charry, the permanent Station Master, who had reported sick. There was also at the station a Signaller named B. Rama Rao, who had been sent to assist the Station Master during the Dasara.

5. The Station Master on duty at French Rocks was P Gopalasawmy Naidu, and he was assisted in the telegraph work by Signaller Shaikh Abdul Kadar.

6. The time borne by the copy of the "Line is Clear" message given by the Station Master, Yeliyur, to the Guard of 15-25 train is 0-8 and the time borne by the Line Clear Ticket is 0-7.

7. The time borne by the copy of the "Line is Clear" message given by the Station Master, French Rocks, to the Guard of the 9 Up E. train is 0-10, while the time borne by the Line Clear Ticket is 0-9.

* Not printed.

8. The entries in the Train Register Book at Yeliyur as regards the passage of the 15-25 Special are as follow :—

Received application for Line Clear from Mandya	23 0
Gave Line Clear	23 2
Train arrived	*Not entered.*
Cleared line	*Not entered.*
Applied to French Rocks for Line Clear	0 5
Obtained Line Clear	0 7
Train left	*Not entered.*

but there is no trace of the original received draft of the "Line is Clear" message *as given to the Guard.*

9. The entries in the Train Register Book at French Rocks as regards the passage of No. 9 Up over the French Rocks—Yeliyur section—are as follows :—

Station Master's authority to apply for Line Clear to Yeliyur	0 7
Applied for Line Clear to Yeliyur	0 8
Obtained Line Clear from Yeliyur	0 9
Train left for Yeliyur	0 10

and Guard's copy of the "Line is Clear" message is supported by the original received draft, (enclosure marked Exhibit* C). The entries in the original and the copy differ to some extent. The differences will be explained further on.

10. There is no record at Yeliyur to show that the "Line Clear" was either asked for or given for No. 9 Up E. train to proceed to Yeliyur, and there is no record at French Rocks to show that "Line Clear" was either asked for or given for the 15-25 Down Special to proceed to French Rocks.

11. The Train Register Book and the received draft of the "Line is Clear" message at French Rocks are properly entered up, and no irregularities are discernible except the difference in the preamble of the copy as given to the Guard. (See Enclosure* CC.) These are explained by the Signaller having, as he says, copied that part of the message from memory and by the Station Master in his confidence that the message was correctly received trusting to his Signaller to copy it out correctly.

12. Unlike those at French Rocks, the Train Register Book and original drafts of the train signalling messages at Yeliyur display grave irregularities.

The Train Register Book does not as already mentioned show the time of arrival of the 15-25 Special from Mandya, nor does it show that the line was cleared back to Mandya after arrival of the train.

The original draft of the "Line is Clear" message, for No. 7 Up to Mandya (the train that crossed the 15-25 Special at Yeliyur) is written on a Down green form instead of on an Up red one. All the message drafts in connection with the passage of the 15-25 Down Special from Yeliyur to French Rocks have been written out as in anticipation of the train arriving safely at French Rocks, but they bear no Code time nor the time of receipt or despatch. The number of words entered as composing each message does not correspond with the actual number of words in each message, and the train is shown as running "under Ballast regulations" instead of as a timed train.

In the same way some of the messages prescribed for the 7 Up E. train also appear to have been written out in advance of receipt or despatch, and the "Line is Clear" message for the train from Yeliyur to Mandya is written so as to read that the "Line is Clear from *Mandya to Yeliyur.*"

Even the times that are entered in the Train Register Book cannot be depended upon. They read—

0—6 acknowledged arrival of 7 Up and applied for Line Clear to French Rocks for 15-25 Special.
0—6 applied to Mandya for Line Clear for 7 Up.
0—7 obtained Line Clear from French Rocks for 15-25 Special.
0—8 obtained Line Clear from Mandya for 7 Up.

As these operations entail the sending and receiving of four messages containing altogether about 150 words and the writing out of them all, as well as the copying of some of them in duplicate for the Guards and the making out of a Line Clear Ticket in original and counterfoil, it is evident that it was not possible for the work to be done in the time recorded.

Finding.

13. The entries in the Train Register Books and the Line Clear message draft at Yeliyur are in the handwriting of Relieving Station Master Seetaramier. It was suggested during the enquiry that Signaller Rama Rao might have been concerned in signalling the trains on the night in question. That he was present in the Office there can be no doubt, but there is no proof that he was taking any part in the work. Therefore, we consider that Seetaramier is solely responsible for what occurred at Yeliyur in connection with the collision, and we further consider that the balance of the evidence, documentary and otherwise, goes to convict Seetaramier of starting the 15-25 Down Special without having previously obtained "Line Clear" from French Rocks, and of having given "Line Clear" to French Rocks, for 9 Up either before the 15-25 Special had started or afterwards, and we think that the fact of his absconding shortly after the 15-25 Special had started, confirms the finding.

We find also that the Chief Guards of the 15-25 Down Special and the 9 Up E train were guilty of neglect of duty in not examining the original drafts of the "Line is Clear" messages and in not detecting the discrepancies in time in the copies of the "Line is Clear" messages and the Line Clear Tickets (*vide* rule 97 of the Working Time Book), and that the Drivers of the 9 Up E. train and the 15-25

* Not printed.

Special were guilty of a breach of rule No. 264 of the General Rules and Regulations in leaving their engines to go to the Telegraph Office at French Rocks and Yeliyur respectively.

List of persons killed and wounded.

KILLED.

No.	Name.	Age.	Occupation.	Place of Residence.	Nature of wound.
1	Abdul Kader	Not ascertained.	Fireman	Mandya	Fracture of lower jaw.
2	Madurai		Do.	Kodial, Seringapatam	Fracture of spine (Dorsal region).
3	Gooty		Wife of Nanjagowda, Passenger		Fracture of left clavicle, contusion on right hand.
4	Soobramania		Passenger		Wound on the right knee.
5	Sidda		Do.		Contusion on the chest.

WOUNDED.

No.	Name.	Age.	Occupation.	Place of Residence.	Nature of wound.
1	Venkatah	60	Weaver	Donasamundrane Anekal Taluq	Ditto
2	Doorgah	45	Toddy drawer	Kandalli, Mandya Taluq	Wound on the scalp.
3	Nanjah	40	Do.	Naragaloo do.	Compound fracture of both bones of right leg and wound on the forehead.
4	Rangah	12	*Nil*	Naragaloo Do.	Bruise on the right knee.
5	Veeranny	30	Cooly	Madras	Wounds on the face and scalp.
6	Chewdah	25	Pot maker	Yearly, Mandya Taluq	Wound on the forehead.
7	Linga Charry	20	Goldsmith	Naragaloo do.	Simple fracture of both bones of both legs.
8	Nanjappah	35	Clerk	Bangalore	Wounds on the right arm and on the left forearm.
9	Venkatramiah	30	Shanbagh	Chickaballapura	
10	H. Fox	28	Driver	Bangalore	
11	Rodrigues	21	1st Fireman	Do.	
12	Siddah	3	*Nil*	Mandya	
13	Eramah	40	*Nil*	Do.	

Signed, as to wounded, by
T. V. ARAMUGUM,
Asst. Surgeon, Civil Hospital, Mysore.

APPENDIX B.

REPORT by LIEUTENANT-COLONEL T. GRACEY, R.E., SENIOR GOVERNMNET INSPECTOR OF RAILWAYS, CENTRAL CIRCLE, on the accident which occurred on the 5th November 1891 to the passenger train, on the NAGPUR BRANCH of the GREAT INDIAN PENINSULA RAILWAY, between KHÁPRI and BORI STATIONS.

In compliance with the orders contained in Circular No. 111(Railway), dated 7th January 1881, I have the honour to report that I attended the departmental enquiry into the accident which occurred to the passenger train on the Nágpur branch of the Great Indian Peninsula railway, at mile 509, near Khápri Station, on the 5th November 1891, and that I also visited the scene of the accident the day upon which it occurred

2. I submit herewith a copy of the evidence given to the officers who held the joint enquiry and also their report and finding, with which I agree.

3. The down passenger train from Bhusával to Nágpur consisting of—

2 Engines.	1 First class carriage.
1 Brake-van.	1 Second class ,,
1 Luggage van.	1 First class ,,
4 Second class carriages.	1 Postal van.
1 Horse box.	5 Third class carriages.
4 Third class carriages.	1 Luggage van.
1 First class saloon.	1 Brake-van

in the order named, left Bori 25 minutes late on the morning of the 5th November, and after passing mile 509, the tyre of the left-hand leading wheel of the front engine broke on a down grade of 1 in 150. The engine and train then ran on on the metals for 929 feet when the leading engine left the rails and the succeeding engine and vehicles followed it. The two engines and 11 first vehicles in the train ran down the bank and were heaped up one on the top of the other, the next six vehicles left the rails but were not completely overturned, and the last six vehicles remained on the line. It does not appear that the train was running with excessive speed at the time of the accident.

4. The two Parsee drivers of the engines with their two firemen were killed and also the greaser on the rear engine, whilst the greaser of the front engine escaped. The guard in the leading brake was killed. Out of 95 soldiers who occupied the 2nd class carriages, 5 were killed on the spot, 4 died on the way to Kamptee and 3 at Kamptee, or 12 deaths in all, and 25 were seriously injured. Three native passengers were rather seriously injured and 12 slightly—all the remaining passengers escaped unhurt.

5. As already stated I agree with the finding of the Joint Committee, but I would invite especial attention to the following points:—

(a) It appears from the evidence that the duty of inspecting and tapping engine wheels on the Great Indian Peninsula Railway is entrusted to the driver only, and that this duty is very imperfectly performed. If the tyre in question had been properly inspected by a competent person before leaving the shed, it is probable that its looseness would have been detected, as from the thick coating of oil on the tyre, and liner, and also from the worn appearance of the threads of the screws of the nuts, I am of opinion that the tyre must have appeared very loose and badly fitting before leaving the shed.

(b) The use of lining between the tyre of the wheel and the felloe appears to me most undesirable, and should, I think, be entirely prohibited in engines attached to passenger trains.

(c) It appears from Dr. Harris's evidence that there are no instruments or appliances of any kind in the Railway Hospital, and in case of even the simplest accident everything has to be obtained from the Mayo Hospital. It is desirable that the Company should provide emergency cases of instruments to be kept at their principal dispensaries and sent out with the "break down trains."

Joint enquiry held at Nágpur on the 7th and 8th November 1891, to ascertain the cause of the derailment of 35 Down Passenger Train, at mileage 509-10, between Bori and Khápri on the Nágpur Branch on 5th idem.

PRESENT:

MR. C. H. DEWEY, Acting District Traffic Superintendent.
,, F. C. FOWLE, ,, Engineer.
,, S. BROOKS, Acting Assistant Locomotive Superintendent.

ALSO ATTENDED—

COLONEL GRACEY, Government Inspector.
MR. WARDEN, Deputy Consulting Engineer, Bombay.
,, HALLETT, Assistant Superintendent of Police, Nágpur.
,, E. W. KELLY, Passenger Superintendent, G. I. P. Ry.

DESCRIPTION.

No. 35. Down Passenger Train arrived at Badnera on 5th instant at 8-25, or 15 minutes late, with one engine and eighteen vehicles, including the saloon and first class in which the Commander-in-Chief of the Bombay Army and staff were travelling to Nágpur. At this station four seconds, containing 95 soldiers belonging to the North Lancashire Regiment stationed at Kamptee, and a road van with their

baggage and arms, were attached immediately behind the front brake. The train then consisted of the following vehicles in the order given :—

Front Brake	No. 1044	Saloon	No. 499
Luggage van	,, 4092	First class	,, 1241
Second class	,, 997	Second class	,, 77
,,	,, 1140	First ,,	,, 1111
,,	,, 1020	Postal van	,, 85
,,	,, 84	Third class	,, 851
Horse box, I. M. Railway	No. 330	,,	,, 188
Third class	No. 717	,,	,, 1248
,,	,, 127	,,	,, 335
,,	,, 196	,,	,, 829
,,	,, 297	Luggage van	,, 4561

Rear Brake No. 1353

making 23 vehicles in all, and in consequence of the load being more by seven than that for one engine, a second engine was attached and the train left 30 minutes late.

2. The train staff consisted of Furdonjee Framjee, Driver; Nusserwanjee Shawpurjee, Fireman, and Umrita Vishnoo, Agwalla. } Of leading engine No. 209 Q. Type.

Jamsetjee Burjorjee, Driver; Dadabhoy Cursetjee, Fireman; Ramlal Kallian, Agwalla. } Of second engine No. 213 Q. Type.

S. Bailey, Head Guard, and G. Keenan, Second Guard.

3. This train arrived and left Bori 25 minutes late. Immediately after passing mileage 509 the leading engine was derailed, and after running about 369 feet on the ballast, ran down the left bank, dragging the second engine and succeeding vehicles after it.

4. The sketch put in by Mr. Tisdall, Resident Engineer, copy of which is attached hereto, gives the distances of the chief points in connection with the accident, from which it will be seen that the tyre of the left leading wheel of the front engine broke at a distance of 321 feet before reaching the 509th mile post, and that the derailment occurred at a distance of 608 feet after passing the 509th mile post. The engine therefore ran on the rails without the tyre on the wheel for a total distance of 929 feet before becoming derailed. The six rear vehicles were not derailed. The four next vehicles, being a third class, postal van, first class, and second class carriages, were derailed but did not run down the bank, and were afterwards re-railed and taken to Bori. The first class No. 1241, in rear of the Commander-in Chief's Saloon No. 499, and the Saloon were partially down the bank, and considerably damaged, but not smashed up, the Commander-in-Chief and his staff fortunately escaping unhurt. The whole of the rest of the train, consisting of 11 vehicles and the two engines, went down the bank, and were more or less completely broken up, and jammed together within a distance of about 100 feet. The Company's telegraph wires were also broken, through communication being thus cut off.

5. From Surgeon Major Harris's evidence it will be seen that 5 soldiers were killed at the time of the accident, 4 died on the the way to, and at, Kamptee, and 1 the next day, making 10 in all. Since then information by telegram, dated 8th instant, has been received from the Officer Commanding at Kamptee, stating that 2 other soldiers have died since, and that there were 25 other serious cases, but all these doing well.

Of the native passengers only 3 were seriously injured, who are being treated in the Mayo Hospital and also 12 others slightly so. These last declined to be attended to, and on reaching Nágpur by the special went away. A list giving the names and injuries of these is put in by Mr. Craggs, the Railway Police Inspector.

Of the train staff all except the second Guard and one native Agwalla were killed in the accident.

6. The first intimation of the accident was carried by a Permanent-way gang-man to the Khápri Station Master, who wired his all concerned message timed seven hours. Subsequently the second Guard, Keenan, sent on all concerned message at 6-45, and despatched it by another gang-man to Khápri Station which is timed 7-40 from that station. On receipt of the first message by Mr. Haller, the Nágpur Station Master, at about 7-20, he at once ordered a break down assistance train, and sent for Surgeon Major Harris, the Apothecary attached to the Bengal-Nágpur railway Dispensary, the Assistant Surgeon of the Mayo Hospital, and the Military Apothecary in the Sitabuldi Fort. The latter arrived first, and the first special was immediately started at 8-10 accompanied by the Station Master, the Railway Police Inspector, 3 Constables and the Agent and Chief Engineer, Bengal-Nágpur Railway, who was waiting on the platform to meet the Commander-in-Chief.

7. Instructions were left by the Station Master for another special to follow with further medical assistance and the Resident Engineer. The Permanent-way Inspector had previously left by lorry, and reached the scene of the accident just before the special which arrived there at about 8-40.

8 The second special left Nágpur about 40 minutes after, with Dr. Harris, the House Surgeon, Mayo Hospital, the Government Apothecary Mr. Murphy, the Resident Engineers, and the Assistant Superintendent of Police.

9. A special from Wardha with the Civil Surgeon, Dr. Mitchell, and a brake down gang arrived on the spot at 11-20, and the special from Badnera with the Company's Apothecary, Assistant Locomotive Superintendent, District Traffic Superintendent, and break down party arrived at 14-15.

10. Medical assistance was, however, rendered immediately after the accident by the Surgeon and Apothecary, who were travelling in the train in charge of the detachment of troops from Badnera.

11. The first special with all the European troops, including the wounded and dead in medical charge of the Military and Civil Surgeons, returned to Nágpur at 11-30, and were sent on to Kamptee in the same vehicles by the Kamptee local at 12 noon.

12. The Commander-in-Chief and his staff elected to remain behind, and came on by the next special, arriving at Nágpur at about 3-30.

13. It will be seen by the above that all possible steps were taken for rendering medical and other assistance; but we have to point out from the evidence given by Surgeon Major Harris, who is also the Railway Surgeon for the district up to Badnera, that some delay was caused in consequence of proper instruments and appliances not having been provided in the Company's Dispensary, these having to be collected from the Mayo Hospital and Government Dispensary.

14. We would here wish to record the willing and energetic action taken by all the Company's staff who were present to render assistance in extricating the dead and wounded, removing the *debris*, and clearing the road, etc., unremittingly throughout the day until traffic was restored at 10 P.M.

15. The derailed vehicles which were re-railed and run into Bori left the permanent-way clear at 20-30 for completing the repairs, which were effected at 22 hours by making a small diversion round some of the vehicles which fouled the straight line.

16. The list of damages to the permanent-way is put in by Mr. Tisdall. Besides broken chairs, little damage was done, except at the portion where the two engines turned to run down the bank. Here the road was completely torn away for a distance of about 50 yards.

17. Near the place where the broken pieces of tyre were found a rail on the left-hand side was found to be broken vertically through, at a distance of 2 feet from the rail joint and 9 inches from the chair. The top table of the rail at the point of fracture showed a fresh indentation as if it had received a vertical blow, and the edge of one of the portions of the fractured tyre also shows a clear mark of having struck the top table of the rail. These two marks fairly correspond with each other, and lead to the conclusion that the rail was broken by the blow it received from the edge of the broken tyre.

18. Immediately below the fracture in the rail, a portion of the stud fastening the tyre to the felloe was found and the ballast also at this point was scooped out on the outside of the rail, probably by being struck by the flying portions of the tyre.

19. All the broken pieces of the tyre were found on the left-hand side of the line within a distance of about 150 feet from this point, the largest one being 75 feet away from the rail.

20. The fractured edges of the broken rail were perfectly sharp and clear when discovered, though it had then been passed over five or six times by engines and other vehicles showing that the two parts of the rail could not at any time have moved vertically relatively to one another to any appreciable extent. There is, therefore, no ground for the supposition that the tyre was broken by the rail being broken first.

21. The tyre is flawed by being honey-combed internally, and apparently more or less throughout the tyre, as each section shows signs of it. At its worst part the flaw may be roughly stated to be about 1¼ by 1 inch. It was probably at this part that the tyre first broke.

22. Between the tyre and the felloe, liners had been inserted, and the fact that these were covered with oil in some places thickly, while at others they showed signs of being compressed, goes to show that the tyre and felloe were not closely and evenly fitted together.

23. The maker's name on the tyre is "Vickers"—and date, March 1866.

24. The road was made clear for trains by 10 P.M.

EVIDENCE.

25. *Umrita Vishnoo* states—I am an Agwalla, and was on engine 209, the leading one, on the morning of the accident. After leaving Bori I was breaking coal when I heard a sound of something breaking. I did not at this time feel any jerk, but did so immediately afterwards. I stood up then and so did the driver. We had barely done so when the accident occurred. After this I knew nothing as I became insensible. I came to the shed before the fireman and driver on this night at Badnera. The former cleaned the brasses and oiled the engine as usual; and the latter looked round it. I did not notice any one tap the wheels, and neither do I remember any one doing so on any occasion before this.

26. *G. Keevan* states—I am a guard, and have been 4½ years as such. I was running as second guard with 35 Down Passenger Train from Badnera to Nágpur on the 5th instant. The train was late leaving Badnera, but cannot say how much. I don't know whether it was so leaving Bori. After leaving Bori I did not notice that the train was going at a higher speed than usual. Just before the accident occurred the train was still running at ordinary speed. My brake was not on. I was signing my summaries immediately before the accident. The engines did not whistle. I was knocked off my seat and rendered insensible for about five minutes; after recovering I got out of the brake and went to examine the nature of the accident. I did not feel any jerk before being knocked off the seat. I wrote out at 6-45 the all concerned message and sent it to Khápri by a gangman. I was riding in the rear brake. The accident occurred about 6-30. I looked at my watch. I have most of my time been running as second on the passenger train.

27. *Mahadeo Khandoo* states—I am a keyman in the Engineering Department. On the morning of the accident I left my house before it occurred to examine the keys, and on doing so I also examined the rails on the right-hand side going to Bori. I had passed the mileage before the accident occurred. Everything was found by me in good order.

When the train passed me it was, in my opinion, going much faster than usual. I have been a little over three years in the service, and two months as a keyman.

28. *Unoos Mansing* states—I am a Permanent-way Mucoadum. On the morning of the accident I left to go over my length, starting about half past 5, and walked along the right-hand side of the line towards Nágpur and saw nothing wrong with the road or rails. I passed the scene of the accident by about a mile. I heard the telegraph wires make a noise, and saw some smoke at the side of the line and went back to see what was the matter, as I saw it was the train. I then, on finding out what was the matter, sent a man to Khápri to give information to the Station Master. I have been over 20 years in the service, and in the Engineering Department.

29. *John Edwards* states—I am Permanent-way Inspector from Nágpur to Sindi and have been nearly six years in the service as such. I was on the platform at Nágpur Station on the morning of the accident and heard from Mr. Haller, the Station Master, of it. I then at once proceeded on my lorry to the scene and on arriving there commenced assisting to extricate the injured passengers from underneath the *debris*. After this I examined the road to ascertain the cause of the derailment, but could find none. I subsequently, on hearing from Mr. Wynne, went to look for the broken tyre in company with Mr. Bedford, the Locomotive Foreman. I found the first piece of it 1,158 feet from the end of the rear brake. The next or largest piece I found 75 feet from the right-hand rail facing Bori and out in the field. This was 1,096 feet from the same brake. On my examining the road I did not notice the rail broken. I heard of it for the first time from Mr. Tisdall; I took the rail out at once. This was about 5 or so in the evening. In the meantime five or six engines must have passed over it. Where the rail was broken there was a hole in the ballast and the chair some 7 inches beyond in Nágpur direction was partly broken, cracked right through.

The road was made right for trains to run at 22 that evening.

30. *Mr. H. Haller* states—I am Station Master at Nágpur, and have been 15 years in the service. Finding the 35 Down Passenger Train was late, I went to the Telegraph Office to ascertain the cause, and while there, a message was received from Khápri Station Master, stating that the engine of the Passenger Train had been derailed and that he was informed of this by a gangman. This was about 7-30. I at once ordered a special break down assistance train to be got ready. At the same time I sent Ticket Collectors Proctor and Dean for Dr. Harris, the Mayo Hospital House Surgeon, and the Apothecary at the Bengal-Nágpur Railway Dispensary. I also asked Captain Thomas, Deputy Assistant Adjutant General, to send a man to Sitabuldi Fort for the Military Apothecary. By this time a telegram had been received from the second Guard of the train, stating that the two engines and nine carriages were completely derailed, Permanent-way damaged, and several passengers badly injured. I left on the special at 8-13 for the scene of the accident with Mr. Wynne, the Agent of the Bengal-Nágpur Railway, the Fort Government Apothecary, Mr. Bedford, Locomotive Foreman, and Mr. Cragg, Police Inspector, with some police constables. I took all the available carriages in the yard, namely, eight and two brakes, also all the station Hamals. I reached the spot a little after 8-40, and as soon as I got out one of the Military officers asked who was in charge of the train, and I replied I was. I was then taken to the Commander-in-Chief who asked me to devote my whole attention to the injured, and this I did.

After the wounded, dead and other soldiers were put into the special, I started for Nágpur. Before starting I asked the Commander-in-Chief if he wanted to go with the train, and he said he would prefer remaining behind, and that I was to hurry on with the wounded. The train arrived at Nágpur about 11-20, and was sent in to Kamptee at once. I returned with another special carriage and brought in all the remaining passengers. The trains that ran during the night before the accident were 88 Up and 65 Down Goods and 70 Up Passenger.

31. *Mr. Wynne, Agent and Chief Engineer, Bengal-Nágpur Railway*, states—After arriving about half-past 9 at the scene of the accident in the first relief train, I proceeded to try and see what was the cause of the accident. I walked along the line and found that the derailment had occurred at a distance of about 75 paces from the rear brake van. I marked the exact spot where the left-hand wheel of the engine had left the rails on the outside, and then tried to find the place where the flange had mounted the rail, examining, at the same time, the state of the road at the place where the wheel had left the rail. I tried the keys and other fastenings and found them all right. The sleepers were in good order. The road appeared to be in proper gauge, but I had no means of measuring it. But altogether I came to the conclusion that the derailment could not have been due to any fault in the road. After searching for some time I could not find the place where the flange had mounted the rail. I then came to the conclusion that the accident was probably due to a broken axle of tyre. I then went back straight to examine the leading engine and saw at once that the left-hand tyre of the leading wheel was missing. This seemed to me to be the cause of the accident, and I pointed it out to the Permanent-way-Inspector who was present.

In reply to a question by Colonel Gracey, Mr. Wynne stated "I am of opinion that the flaw in the tyre was not alone sufficient to account for its breaking."

Q. Have you formed any theory to account for the tyre breaking?

A. I think it was due to the bursting of the flawed tyre owing to its being too slack on the felloe.

Q. Do you think the road was in good order where the derailment occurred?

A. Yes, I think it was in good order.

Q. Do you give your opinion as a Locomotive expert?

A. I am not a Mechanical Engineer.

32. *Mr. F. Bedford* states—I am Locomotive Foreman at Nágpur, and have been 25 years in the service. I left by the first special for the scene of the accident shortly after 8, and on arrival I assisted in releasing the dead and injured passengers from underneath the *debris*. Afterwards I noticed that the left-hand leading wheel tyre of engine 209, the leading one, was missing. I then walked along the line with the Permanent-Way Inspector, Mr. Edwards, to find out where the wheel had mounted the rail. This spot we marked, and went further, and beyond this at a distance of 1,158 feet from the end of rear brake of the derailed train, I found one piece of the tyre at the foot of the bank, and the remaining three pieces were found 1,096 feet from the same brake. I never left the scene of the accident till within a short time of the road being put right for trains to pass.

In my opinion, as this is a steel tyre, the extreme cold of that night partly accounts for the breakage. It is the duty of the driver to examine his engine before starting, but there is no specific instructions that any one is to tap the wheels. I cannot say whether it is customary on this Railway to put liners between the tyre and the felloe.

Questions by Colonel Gracey.

Q. You observed that the liner was covered with oil and grease, do you not think that that is evidence that the tyre was not sufficiently tight on the felloe?

A. I cannot say.

Q. Would the fact of the tyre being loose be detected by tapping it?

A. Yes, it would sound different.

33. *Surgeon-Major G. Harris* states—I am Civil Surgeon at Nágpur and also Surgeon for the Great Indian Peninsula Railway Company. I received intimation of the accident at about 8-40 when at the Lunatic Asylum. I went at once to the Station Government Dispensary, so that I could pick up Mr. Murphy, the Apothecary, and such instruments and appliances as I could get there. At the Dispensary I met Mr. Tisdall, who also told me of the accident and asked me to come on as soon as possible. Having received telegrams asking me to bring as much medical assistance as I could, I stopped at the Bengal-Nágpur Dispensary and brought on the Assistant Surgeon there, telling him to go on to the Mayo Hospital and bring the Assistant Surgeon with the capital case, chloroform, etc. I could bring nothing from the Great Indian Peninsula Dispensary, as there are no instruments there at all of any kind, not even a pocket case. Everything was at the station shortly after 9-30, and the train started immediately after this. On arrival at the scene of the accident I was informed that five European soldiers were dead and one died almost immediately after I had arrived. I ascertained that there were about 30 soldiers wounded. All were extricated except one from the *debris*, and he was got out shortly after I came. He was lying close to the boiler. Amongst the natives I saw the bodies of both engine drivers, both firemen, and an agwalla. I heard that the Head Guard of the train, Bailey, had been killed, but did not see his body. When I got to the scene I ascertained that the wounded had been attended to by the Surgeon and Apothecary, who were with the detachment.

Three natives who were seriously injured are now in the Mayo Hospital. On arrival at the scene I found five European soldiers dead, one died almost immediately I reached, three died on the way and at Kamptee and one died the next day, making ten in all. I am informed that two more are likely to die. I think there was some delay caused by the Great Indian Peninsula Railway Dispensary not being provided with instruments, and I am of opinion that at all important stations the Railway Dispensaries should be well provided with instruments and appliances to meet the contingencies arising out of accidents. I am satisfied that the Railway Company did everything that was possible for the rescue and comfort of the injured.

I am in medical charge of the line up to Badnera, but if a serious accident were to occur, I would have to borrow everything in the way of important instruments and appliances from the Mayo Hospital.

34. *Mr. C. E. Tisdall* states—I am Resident Engineer at Nágpur. I left the station with Dr. Harris in the 2nd special and arrived at the scene of the accident about quarter past 10. Mr. Wynne drew my attention to the left-hand tyre of the leading wheel of the front engine being off. After seeing to the removal of the last wounded man and a couple of dead bodies, I gave the Permanent-way Inspector orders to assist in clearing away some of the carriages, so that he could get on with the repairs to the road and told him to look for the broken tyre but not to move it. I then returned to Nágpur with the train conveying the dead and wounded, got the necessary materials loaded in wagons, and returned to the scene of the accident and superintended generally. Mr. Edwards, the Permanent-way Inspector, informed me that he had found the pieces of the broken tyre. I then took some measurements, and put in a sketch.* While I was taking these measurements, I noticed Colonel Gracey, and Colonel Scott, Deputy Commissioner, on the ground. We walked up the road examining and found the broken rail. I remained on the spot till the road was put right at 22, and then returned to Nágpur. At Khápri I issued a caution order for trains to proceed at 4 miles an hour between 509 and 509¼ miles.

After considering some time and closely examining the broken rail and broken tyre, I have come to the conclusion that the rail was broken by receiving a heavy vertical blow from the tyre which had already been fractured. I arrived at this conclusion by comparing the bruise on the fractured rail with that on one of the broken pieces of the tyre.

I put in a list of the damages to the Permanent-way.

Damage to road.

Rails broken and twisted	No.	5
Sleepers broken	„	50
Chairs do.	„	128
Fish-plates broken	„	4
„ bolts „	„	14
Spikes broken about	„	150

35. *Mr. Myers* states—I am an Assistant Station Master at Badnera, and have been 17 years in the traffic Department. I was on duty when 35 Down Passenger arrived on morning of 5th. The train was 15 minutes late in arriving. After its arrival I told the Muccadum not to do any shunting till I had seen the luggage put into the front brake-van. I desired the Muccadum to unhook from the horse box and go ahead and attach the four troop carriages and a foot-board road van. I then went back to see about putting in some luggage into the rear brake, and while doing so I heard Head Guard Bailey sing out to the Muccadum to unhook; when I returned the shunting was finished, and I found that the troop carriages had been attached in front of the horse box. I was going to alter this by putting the horse box in front, but Guard Bailey told me not to do so, as it would only cause the train to be much later than it was, and that he would change it at Wardha. I therefore allowed the train to start formed in this way. The train left 30 minutes late.

The train was formed as under when leaving Badnera, reckoning from the engines:—

1 Front brake.
1 Foot-board road van.
4 Seconds.
1 Horse box.
4 Thirds.
2 Saloons.
1 Second.
1 First.
1 Post van.
5 Thirds.
1 F. B. R. Van.
1 Brake.

23 Vehicles in all.

vide page 37.

36. *Mr. S. Brooks* states:—I am Acting Assistant Locomotive Superintendent, Badnera.

Questions by Colonel Gracey.

Q. Whose place is it to examine engines before the Driver takes charge? should the wheels be tapped? and, if so, by whom?

A. There is no particular person told off to examine the engine unless the in-coming driver has booked any repairs requiring doing. It is no one's duty in the shed to tap wheels. The man who turns the engine takes over charge from the in-coming driver and sees that the fire and water are all right, but it is not this man's duty to examine the working parts of the engine, to see that everything is right and in good order.

Q. Is it the driver's place to tap the wheels?

A. Yes, it is, but I don't say that they do so always.

Q. When was the wheel put under the engine?

A. On the 13th August last.

Q. Do you know the maker's name of the tyre?

A. No, I don't.

Q. Has the tyre been re-turned? if so, when and where?

A. It has been, but I don't know when or where.

Q. Is it usual to put liners between the tyre and felloe on the Great Indian Peninsula railway?

A. Yes, it is in cases when tyres are re-fitted on old wheels.

Q. Do you consider from the appearance of the tyre that it was at the time of the accident loose?

A. No, I do not.

Q. If not, how do you account for the oil between the felloe, tyre and wheel, which is thick in some places?

A. I account for this because the liner is not all the way round, and the tyre not gripping firmly all round the wheel.

Q. Can you tell us the original thickness of the tyre and its present thickness?

A. The present is about an inch and seven-eighths. The original thickness is supposed to be two and five-eighths.

Q. What is the minimum thickness allowed on the Great Indian Peninsula?

A. I think it is an inch.

Q. What would be the effect of the tyre being loose?

A. The bolts would be sheared off. I have seen an engine coming in with the driving wheel tyre loose and bolts completely cut off.

Q. Do you think the flaw in the tyre alone sufficient to cause it to break?

A. No, I do'nt without something else to help it to go.

I put in a list of the damages to the engines and rolling stock.

List of engines and coaching vehicles damaged seriously or totally smashed in the accident, on the 5th instant, by 35 down passenger.

Two engines, 209 and 213, with tenders, completely smashed.

First class carriage No. 1241, "F" Type, seriously damaged.

Reserved 499—Under-frame separated from body and smashed. Body seriously damaged.

Third class carriage 127, "F" Type, smashed.

Second class No. 1020, "H" Type, under-frame separated from body and damaged. Body seriously damaged.

Third class No. 717, "F" Type, smashed.

Brake van No. 1044, Type not known, totally smashed.

Second class No. 997, "H" Type, totally smashed.

Third class No. 196, "B" Type, smashed.

Third class 297, "F" Type, smashed.

Indian Midland railway horse box No. 530 totally smashed.

Two second class carriages and road van, number not known (near pilot engine), totally smashed.

Two third class carriages, Nos. 829 and 851, "F" Type, damaged.

(Sd.) J. DELAHAUNT,
Head Carriage Examiner.

Nágpur, dated 8th November 1891.

37. *Mr. Craggs* states:—I am the Police Inspector for the Great Indian Peninsula railway at Nágpur. I accompanied the first special leaving Nágpur for the scene of accident soon after 8 on 5th instant, taking three constables. I made enquiries about the passengers injured, and put in a list giving the names of those who stated they had received injuries in the accident. Most of the injuries were of a trifling nature, all those who were not seriously hurt would not wait to be attended to by the Medical Officers at the place, but proceeded to Nágpur by the special and then went away. There were altogether 15 injured. The three who were seriously wounded were taken to the Mayo Hospital and are there still.

NOTE.—A telegram from the Officer Commanding at Kamptee, dated 8th instant, 1-10 A.M., was put in as follows regarding the European soldiers:—

Twelve deaths up to date and 25 other serious cases all doing well.

8th November 1891. (Sd.) C. H. DEWEY.

List of passengers who received slight injuries in the accident on the 5th November 1891.

1. Peerbux, bhistee.
2. Turmaloo, coolie.
3. Set Luchmi, wife of above.
4. Set Kishni, Dhani.
5. Narayen, Dher.
6. Raghooloo.

Were in one compartment, received slight injuries about the head and legs.

7. Chintamon, Station Master of Tumsar Road station, slight injuries about the face.
8. Kaniahlall, right arm slightlyhurt.
9. Beharilal, slight injury to head.
10. Bhuchoo, „ to hand.
11. Bhoodoo, syce, foot hurt.
12. Set Parbatti, left foot hurt.
13. Gopal Ramchunder Kango, clerk of Ralli Brothers, dislocated ankle.
14. Pachoo, severe bruise on leg.
15. Babu Mia, fracture of arm and ribs.

38. *Mr. Murrell* states:—I am Locomotive Foreman at Badnera and have been about 21 years in the service. I saw engine 209 in the shed at Badnera on the morning of the 4th instant, and again in the afternoon, but did not examine it.

It is not usual for any in the shed to examine engines It is the drivers' duty to do so. It is usual for careful drivers to tap the wheels of their engines either in the shed or on the road.

39. *Dhunjeebhoy Sorabjee* states:—I am an engine turner at Badnera and have been five years in the service. I was on duty in the shed from 22 hours on 4th to 6 on 5th instant. About a quarter of an hour before the engine 209 left the shed to work 35 Down Passenger, the Driver Furdonjee Framjee came and I saw him tap the wheels. I was near my table close by ab ut 10 feet away. Every Driver taps the wheels of his engine before leaving. I have myself always seen them do it.

Finding.

We are of opinion that the derailment and fracture of the rail were due to fracture of the tyre of the left leading wheel of the front engine.

This was probably due to an internal flaw and partly to defective fit of the tyre.

SKETCH PLAN.

of

Scene of accident on morning of November 5th, 1891, between Khápri and Bori stations on the Nágpur branch of the Great Indian Peninsula railway.

DOWN GRADIENT 1 IN 150.

APPENDIX C.

REPORT by G. V. MARTYN, Esq., A.M.I.C.E., GOVERNMENT INSPECTOR FOR RAILWAYS, dated the 5th March 1892, on the collision which occurred on the 5th December 1891 between SATGHARA and OKÁRA STATIONS on the NORTH WESTERN RAILWAY.

I have the honour to submit, for the information of Government, the following report on the disastrous collision which took place on the 5th December between Satghara and Okára Stations on the North Western railway.

2. In this case, No. 8 Down Calcutta Mail from Lahore, while running between Satghara and Okára, came into collision at about 1-20 o'clock with No. 1 Up Mail coming from the opposite direction. No. 8 Down Mail should, according to schedule time, have left Wán Rádharám station at 0-17, and at the timed speed of 30 miles per hour, it should have run through Satghara at 0-38 and reached Okára at 0-58, where it would cross No. 1 Up Mail. On the 5th December it left Wán Rádharam 29 minutes late, or at 0-46, and making up no time reached Satghara at 1-7. The Driver finding the line clear on the post by the facing points picked it up and proceeded on his way. Meanwhile a line clear for the Up Mail had already been given by the Assistant Station Master, Satghara, to Okára, and before the error could be corrected the Up Train left Okára and came into violent collision with the Down Mail at mile 747-12.

3. The composition of the trains was as follows:

No. 8 Down.

			Tons. Cwt.
Engine No. 81 and tender	(K. S. Class)	weighing	55 0
Brake-van	No. 2368	,,	8 4

4. Engine No. 81 of the Down Train was fitted with a steam brake and with a hand-brake on the tender. The Up Train Engine No. 82 had no steam brake, but there was a hand-brake which was fitted on the tender only. Both engines were manned by European Drivers, and there was a European Guard in the rear brake of each train.

5. Being absent from Lahore on inspection duty, I could not reach the scene of the occurrence until the morning of the 7th December. I then learnt that the Manager had determined on not holding a departmental enquiry, as there was a *primâ facie* case of negligence against the Assistant Station Master, Satghara, who was to be prosecuted before the Magistrate of Montgomery. The trial commenced on the 15th December and judgment was given on the 7th January. I was present throughout the proceedings, but as copies of the evidence did not reach me until the 29th February I was unable to submit this report earlier. The evidence and the Magistrate's judgment attached were printed at the Manager's office, and it is considered unnecessary to reprint the former in this report, as in its present form it seems to suit all purposes.

6. There were 34 persons killed on the spot, including the Second Guard (Jowand Lal) and a Fireman of the Down train. Of 34 injured, 3 are reported to have died subsequently. No European passengers were hurt.*

7. A statement is appended (*vide* enclosure No. 1 on page 40) showing the damage to rolling stock and permanent-way. The front brake and 3rd class carriage of Down Mail and the front brake, one 3rd class and bogie carriage of Up Mail were totally destroyed. Both engines were badly damaged.

8. Through communication was suspended until 22 hours on the 6th, by which time a diversion was put in and through traffic resumed.

DESCRIPTION.

9. Satghara is a small station at mile 753 (reckoning from Kurrachee), and Okára which is on the down or Mooltan side of it, is 10 miles distant. Between these two points the line is straight and the gradients are slight, falling towards Okára, the difference in level between the two stations being 15 feet. At the point at which the collision occurred the gradient is 1 in 6,072.

10. The following distances at Satghara are to be noted:—

Centre of platform to up facing points	709 feet.
Do. do. down do.	840 ,,
Length of platform	259 ,,

The platform is on the main line, and between its upper end and the facing points there is a blind siding. The Station House is not on the platform, but retired 78 feet away from it. The main signal is on the platform and directly in front of the station building and close by are fixed the windlasses of the Distant Signals. The line clear post at the upper or Lahore end is 13 feet from the facing points.

* Later report shows that four more persons died subsequently from the effects of the injuries received.

CONCLUSION.

11. This disastrous accident was brought about by Gurmukh Rai, the Assistant Station Master at Satghara, having allowed two trains coming from opposite directions to run on the same section at the same time, by which they came into violent collision. The facts of the case appear to be as follows:—

No. 8 Down Mail was due to leave Wán Rádharám (the next station on the up or Lahore side of Satghara and 10¼ miles distant) at 0-17 and to pass through Satghara at 0-38 without stopping. At 0-10 on the 5th December, Gurmukh Rai commenced the usual procedure connecting with authorizing the Down Mail to run through Satghara, by asking the next station in advance (Okára) for line clear for that train and at 0-20 he received it. At 0-58 he recorded having received notice from Wán Rádharám that the Down Mail had left that station at 0-46. Having already despatched the sweeper to the facing points with the line clears, he called guard Renben of No. 39 Up Goods, then waiting in the station, to accompany him to the points, but hearing the telegraph instrument working, he went back to his office and received a message from Okára proposing that the line clear for No. 8 Down should be cancelled and that a line clear for No. 1 Up should be granted instead. This unfortunately Gurmukh Rai agreed to at 1-6 or 20 minutes after No. 8 Down had left Wán Rádharám. The time allowed for the Down Mail to run from Wán Rádharám to Satghara is 21 minutes, so that at 1-6 it must have been in sight and not half a mile away. By 1-7 when Gurmukh Rai had completed the formalities connected with the granting of a line clear for No. 1 Up, the Down Train was passing the Home Signal in Satghara Station, the Driver and Guard having picked up line clears at the facing points and the Distant and Home Signals having been lowered for them. On hearing the train passing Gurmukh Rai realized the mistake he had made and endeavoured to rectify matters by ordering a man to run after it and stop it. The only means open to him of preventing a disaster was to telegraph at once to Okára in the hope that the Up Mail had not left that station. This Guard Renben did for him, but unluckily there was no one at the Okára instrument at the time, the Assistant Station Master being out on the platform arranging for the despatch of the Up Mail which did not start till 1-13.

12. The point at which the collision occurred is 5½ miles from Satghara and 4½ from Okára. The actual time at which the accident took place is not recorded, but assuming the Down train was travelling at an average speed of 25 miles an hour, it would arrive at mile 747-12 at 1-20. By this calculation the Up train would have been travelling at an average speed of 38¼ miles an hour. Driver Field of the Down train says he slowed his engine down to 10 or 12 miles an hour before the collision took place, and the evidence regarding the Up train shows that the engine of that train was not reversed until the last moment. Hence I think that the Up train was probably travelling 30 and the Down train 15 miles an hour when they struck at about 1-20 o'clock.

13. The work of rescuing the wounded and removing the dead occupied such a long time and the duty was so arduous as to engross the attention of the Railway authorities, and hence no measurements are forthcoming showing the positions of the different vehicles after the collision. From enquiries, however, it appears the following was the condition of the two trains:—

No. 8 Down Engine derailed and heavily damaged. Brake No. 2368 and 3rd Class No. 977 totally smashed. The rest of the train was saved owing to a coupling (apparently between carriages Nos. 977 and 1233) giving way.

No. 1 Up Engine not derailed and not so much damaged as that on the Down train. Brake No. 2687, 3rd No. 921 and bogie No. 1559 totally smashed.

14. The body of the bogie carriage is stated to have left its frame and telescoped the vehicles in front. At the same time it acted as a buffer to those behind and probably prevented other vehicles being wrecked. This is a point worthy of note and is a strong argument against placing bogie carriages in any other position than the front of a train.

15. With regard to the brake power, it is necessary to draw attention to the fact that the Up Engine had only a hand brake which was fitted on the tender. The distance within which a train of given weight can be brought to rest by a given number of brakes is in proportion to the square of the speed. Hence a train travelling 40 miles an hour would require four times the brake power of one travelling at half that speed. Although nothing less than automatic continuous brakes would have prevented this collision taking place, it is probable that it would have been considerably mitigated had there been a steam brake on the Engine.

16. The Magistrate in his judgment having dealt with the evidence, it would be superfluous to review it in this report. With regard to the charge of overwork, brought forward by Gurmukh Rai in his defence, I think that when the Station Master of Satghara applied for assistance, action should have been promptly taken by the Traffic Department, either to supply a signaller or an enquiry should have been made on the spot to ascertain if there were any real grounds for the complaint of overwork.

17. Respecting the Rules, I would draw attention to the evidence of Pir Khan, the Station Master of Gamber, wherein he says that no Station Master can act exactly up to Rules. In practice, one of the first objects of Station Masters is to get the traffic through, as they are liable to be fined for delays, and as far as my experience goes, many of the collisions at stations are due to the Rules being relaxed in order to minimize delays.

18. Gurmukh Rai, having been found guilty of negligence, was sentenced by the Magistrate to one* month's imprisonment and a fine of R100. His record shows that he passed an examination on the 22nd April 1890 for the post of Assistant Station Master, and he is, in my opinion, a more than ordinarily intelligent man of his class. His offence was one of gross carelessness, and however perfect rules may be, they cannot prevent accidents in which every known precaution is overlooked or neglected.

* On appeal to the Chief Court of the Punjab, the sentence passed by the Lower Courts was enhanced to one year's further rigorous imprisonment (*vide* judgment printed as enclosure No. 2 on pages 41-42.)

Enclosure No. 2 to Appendix C.

Judgment of the Chief Court, Punjab, dated 6th May 1892, enhancing the sentence passed by the Lower Courts (vide *paragraph 18 of Mr. Martyn's report*) *to one year's further rigorous imprisonment.*

This case on the revision side has arisen out of the disastrous railway accident which occurred between the stations of Satghara and Okára on the North Western railway between one and two o'clock in the morning of the 5th December last. The accused Gurmukh Rai, Assistant Station Master at Satghara, was convicted by the Magistrate of the Montgomery District, under Section 101 of the Indian Railways' Act (1890), of negligence endangering the safety of passengers travelling by the two mail trains which collided, and was sentenced to one month's rigorous imprisonment and R100 fine on the 7th January. This conviction was appealed to the Sessions Judge of Mooltan, who upheld it by order passed on the 1st March 1892.

There is an application on the one hand by Government to enhance the sentence on the ground that it is grossly inadequate, and there is a counter application by the accused to have it quashed on the ground that according to the facts as found by the Sessions Judge, which in one important matter are at variance with those found by the Magistrate, the conviction is not maintainable.

It was contended on the one side that we ought to accept the facts as found by the Sessions Judge; and on the other it was candidly admitted that if the facts were as found by the Sessions Judge the accused was entitled to be acquitted, and it was urged that they ought to be examined.

Under the circumstances we determined to look into the matter in dispute, with a view to deciding which of the Lower Courts had arrived at the correct conclusion.

The trains which collided were those known as the No. 8 Down Calcutta Mail on its way from Lahore to Mooltan, and the No. 1 Calcutta Up Mail travelling in the reverse direction, which in the ordinary course should have crossed at Okára, but which that night were arranged to cross at Satghara. The details preceding the collision are clearly, succinctly, and, it is believed, correctly given in the following paragraph, from the Sessions Judge's judgment.

"At ten minutes past twelve, the prisoner Gurmukh Rai demanded 'Line clear' for the 8 Down Mail from Okára (that is from the authorities there).

At twenty minutes past twelve, the Station Master of Okára wired 'Line clear' for the 8 Down Mail, but the 8 Down Mail was running late. At one o'clock after midnight, the Station Master of Okára requested that the 'Line clear' given by him at 12-20 A.M. for the 8 Down be cancelled. The prisoner received this telegram at 1-2 A.M. Before this the prisoner had received a telegram from "Wán Rádharám" (the station on the Lahore side) "to the effect that the 8 Down Mail had started at 12-46 A.M. from Wán Rádharám to the Satghara station.

By the ordinary speed of a Mail train the distance between Wán Rádharám and the Satghara station is covered in twenty-one minutes, and according to this calculation the prisoner knew that the 8 Down must reach Satghara at 1-7 A.M., provided that it could not arrive earlier in order to make up the time. At 1-5 A.M., the prisoner without taking back the 'Line Clear' he had written after receiving the message at 12-20 A.M. from the Station Master, Okára, from the sweeper by whose hand it was sent out, and cancelling the same wired to Okára that the Line Clear given by him (rather received by him) for the 8 Down was cancelled, that the train would accordingly be stopped there, and that the line was clear for the 1 Up. The 8 Down Mail, passed the Satghara station at 1-7 A.M. without stopping there; and on the other hand, 1 Up Mail which had reached Okára as usual at 1-5 A.M., started for Satghara at 1-18. Thus both the Mail trains came into collision between the stations of Satghara and Okára. We must suppose that in all these times there is a certain possible small error due to errors of different clocks and watches.

Now the Assistant Station Master's mistake and negligence, if any, is practically his permitting the Okára train to start before he had taken effective steps to detain the train coming from Lahore. He could have detained it effectively by not issuing a Line Clear to the Lahore train, and also, it is said, if he had taken care to place the signals at Satghara so as to prevent it passing.

(1) The Magistrate and the Sessions Judge have concurred in holding that the accused was to blame, and that he transgressed rules by issuing the new Line Clear to Okára for the Up train, while the Line Clear which he meant to issue to the Down train, but which he had resolved to withdraw, was not in his power. (2) They have disagreed as to the state of the signals when the Down train passed through, the Magistrate holding that they permitted the train to pass and the Sessions Judge the contrary. (3) They have agreed that the Assistant Station Master was overworked, and taking this into account they have concurred in inflicting what for such offence must be regarded as hardly anything more than a nominal punishment.

With regard to matter (1) we are of opinion, although it was unnecessary for us to examine the matter, that the courts below are undoubtedly right. The accused attempted to prove that the Line Clear was not delivered to the Guard and Driver of the Down train, but was forcibly taken from the sweeper who had the Line Clears in two hoops, which are placed in a standard to be removed by the officials in passing without his consent. It is exceedingly improbable that this was or could be done in a pitch dark night seeing that the usual arrangement is to take the hoops from the post. If they were taken from the sweeper's hand, it was because they were sent to be given. With regard to this point and the next point, there are two parties among the witnesses: the witnesses on the passing train and the station witnesses. They have their own interests to serve in the matter for most part. One witness, the Guard Renben, who was with a waiting goods train possibly wavered in his evidence as to the state of the signals, although his evidence is not very clear. The normal condition of the signals is at danger. They are lowered to let a train pass, and immediately the engine is passed they are, according to rule, raised. In this matter we incline to the opinion held by the Magistrate that the station signal

was not against the Lahore train when it passed through, and this is our opinion, not because the witnesses on the one side are three Europeans, an Assistant Locomotive Superintendent, a Driver and a Guard; and because the witnesses on the other side are natives. We think we are justified in holding that the former travelling by signals on a pitch dark night would not disregard signals considering the habit they must necessarily have of attending to them, and with regard to their own safety; and also because it is improbable that the Driver would commit a serious irregularity in the presence of an officer. Another and a very strong reason for believing the train witnesses and disbelieving the station ones is that the latter have undoubtedly given false evidence in our opinion, with regard to the forcible taking of the Line Clear orders, and this is why we referred to this matter, and because throughout the case, for the defence there are clear traces of the immediate attempt to concoct a false defence. This is clearly revealed in accused's statement.

He said "When Okára sent cancellation inquiry to me, I was on platform end from which gari was coming, shouted out Jamadar stop gari and bring sweeper with both Line Clears, etc., etc." Now the fact is, that when this inquiry came, the accused could be nowhere save at the telegraph instrument because he is his own signaller.

There is the strongest probability that he did not realize the critical position as to time, and that he replied to Okára before even he moved from the instrument thinking there was plenty of time to make everything right afterwards. As the Line Clear was not got back, there is very strong reason for believing that neither were the signals set to bar the train from Lahore passing. If, however, this were a doubtful conclusion we should still hold that the Assistant Station Master's disregard of rule in letting the Line Clears out of his power, and acting as if he had them in it, was the origin and main cause of the disaster, and we are unable to accept the admission of the prosecution that the accused might be acquitted if the Sessions Judge's opinion as to the state of the signals were accepted. If the officials did disregard danger signals, they were emboldened to do so by the Line Clears at the same moment handed to them. If it be a fact that these officials did disregard the danger signals and if their conduct led to a disaster, which otherwise would not have occurred, they ought to be convicted and punished as the Sessions Judge proposes, but their misconduct (if any) is in our opinion no reason for condoning that of the accused which is established.

We must add with regard to the evidence of those European witnesses that all the arguments adduced to prove it untrustworthy were entirely inconclusive.

There remains the question of overwork, with regard to which the Lower Courts have concurred. After careful examination of the matter we are satisfied that their findings on this point are incorrect, and opposed to the evidence. The Assistant Station Master does duty from 6 P.M. to 6 A.M. when he is relieved by the Station Master. Within that time he had to pass, on the night in question which is the important thing, some ten trains. On other nights and at other seasons, there might be a few more. All the evidence and the accused's own letters which we have admitted on the record go to show that there is very little goods or passenger traffic at Satghara, and that this passing of trains is the chief work. We find intervals of two hours at a time in which no train passes, and there is at no time such quick succession as to cause any one attending to business to get confused or to lose his head. The work of giving tickets at such a place at night where ordinarily only two trains stop at night, cannot be a serious matter. The accused may have done some work during the day at accounts or the like to oblige the Station Master, but it is shown that this work was purely voluntary. The Magistrate and Sessions Judge appear to have been misled by a letter addressed to the Deputy Traffic Superintendent by the Station Master on the 29th October, complaining of overwork and asking for a signaller. It is clear that this pressure was only during the day, and owing to the passing of material trains for ballasting the line and that the accused's work was practically unaffected by it. It is clear that if the signaller had been appointed by the date of the accident he would not have relieved the accused of any work. There is nothing to show that prior to the passing of the train the accused was in any confusion or perplexity. There is nothing to show rush or hurry. The tone of the evidence of various witnesses displays rather a slow humdrum state of existence. The passing of the train was enough to appal any one responsible for the awful business, but the accused was as nearly equal to the emergency as any one could be expected to be.

The menial staff was very shortly after ready to make statements, which we find to be lying statements, at least as regards the delivery of the Line Clear and an opening for another defence was made by the despatch of a telegram to Okára, dated 1-10 A.M., which if correctly timed might have prevented the Okára train starting, but which was doubtless mistimed, for it only reached Okára at 1-30. This shewed no want of selfpossession. We are therefore entirely satisfied that this plea in mitigation fails.

It must be disappointing to the accused after standing a trial and undergoing a sentence to be again called in question regarding the same offence, and this is a matter of which we are justified in taking into consideration in awarding an enhanced sentence, and we accordingly do so. We think in the present case it is no sufficient reason, as the accused's counsel urged, for allowing the case to drop. Even the accused himself is responsible for keeping the litigation alive by filing his own application for revision. The offence was one for which a very servere sentence is called for, both as punishment to the offender himself and for warning to others. Our order is that the sentence already passed be enhanced by one year's further rigorous imprisonment, and we direct that the accused be taken into custody, that he may undergo the sentence

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the week ending at 8 a.m. on Saturday, September 24th, 1892.

There has been somewhat less rain over a considerable part of India during the week under review than in preceding weeks, but the weather has been far from settled. Both at the commencement and at the close of the period there occurred a burst of rain which embraced nearly the whole country, but during the middle portion of the week the weather was fair over a large part of Northern India, including Bengal, the Gangetic plain, the Punjab plains, Rajputana, and Sind. Over the Bay a well defined and at times rather deep depression has existed, and this has rendered the weather over the Bay area and the Peninsula very unsettled and rainy. The depression does not appear to have crossed the coast, but seemingly filled up over the Bay, where a very rapid barometric rise occurred on the 22nd and 23rd. In addition to the disturbance over the Bay, a shallow depression appeared over the northern portions of the Bombay Presidency on the 21st, and remained in that region until the close of the week. This disturbance occasioned heavy rain over the districts affected.

The chart of the 18th showed that the barometer was falling over the Indian region, except North-West India. The fall was brisk over North-East India, and a large shallow depression existed over the Bay. Readings were highest in Malabar and the south of the Bay, and gradients were moderate in that region, though very slight elsewhere. The winds were cyclonic around the Bay, westerly across the Peninsula, and easterly or variable over Northern India. There had been no rain in Sind, Guzerat, or the west of the Punjab, and only light scattered showers over North-East India and the Gangetic plain. Elsewhere the fall had been general, and in parts of the North-West Provinces, of the Punjab, and of Rajputana exceptionally heavy for the season. On the 19th the distribution of pressure was very little changed. The depression still existed over the Bay with moderately steep gradients on its southern and south-eastern sides. In Northern and Central India pressure was very uniform. The winds had shifted to the northward and westward over Northern India, but were elsewhere little changed. There was hardly any rain over Northern India or the greater part of Burma, but in the Peninsula and Lower Burma the fall continued general. On the 20th the barometer was falling, except in Burma and Bengal, and the depression over the Bay had become more pronounced. Gradients were steep over the Bay, but in other parts of the Indian region pressure remained uniform. The winds had become light and variable on the west coast, but elsewhere the directions were about the same as on the preceding day. There was again no rain of importance over Northern India; and in the Peninsula, though the fall continued general, the amounts, except at a few western stations, were lighter than on the 19th. On the 21st pressure was increasing, except at a few places in Madras. Within the area of depression over the Bay, however, pressure had been steady, and this, combined with the brisk barometric rise in surrounding regions, had produced much steeper gradients over the Bay. A slight shallow depression had also appeared over the Konkan, Guzerat, and Sind. Elsewhere readings were very uniform. On the morning of the 22nd the chart showed that the depression previously noticed over the Bay had filled up, and a very rapid increase of pressure had occurred over Madras. In other parts of India the barometer had risen

more or less briskly, except at a few stations in Berar, the Deccan, and North Konkan, where pressure was affected by the slight depression noticed over that region on the 21st. The winds were variable and generally light, except on the Circars Coast. There was a little more rain over Burma and Bengal, but over the greater part of Northern India only a few scattered showers were reported. Over the Peninsula the rainfall continued general, and at Malegaon the fall was heavy. On the 23rd the barometer was falling in North-West and Central India and still rising elsewhere. Pressure was lowest over the northern portions of the Bombay Presidency, and a small centre of depression had been developed over the Gulf of Cambay. The winds were cyclonic in that neighbourhood, and easterly winds were re-appearing up the Gangetic plain. In other places the directions were rather variable. There was very little rain in Madras, but there had been some extension of rain in Northern India, and in Kathiawar the fall was heavy. On the 23rd the small depression previously noticed over the Gulf of Cambay was shown over Lower Sind, but there was little other change. The winds were southerly to westerly over the greater part of the country, and there had occurred a considerable extension of rainfall, so that Behar, Malabar, and the extreme north-west of India were the only regions where rain had not fallen. In several places the falls were large.

Temperature.—The cessation of the rainfall over the northern portions of India during the middle days of the week exercised a marked influence on the temperature, and the mean temperature of the whole of India was relatively to the average nearly 1° higher than it was during the previous week. The following table shows the variations of the mean temperature from the normal on each day of the week for the principal provinces of India :—

Province	18th	19th	20th	21st	22nd	23rd	24th	Mean variation of week.
	°	°	°	°	°	°	°	°
Burma	+1·5	+1·0	+2·3	+1·4	+0·8	+0·7	+0·7	+1·2
Bengal and Assam	+1·7	+2·2	+2·2	+2·5	+0·2	+0·1	+0·2	+1·3
North-West Provinces and Oudh.	—1·5	0	+1·1	+1·0	+2·2	+1·0	+0·0	+0·9
Punjab	—3·3	—4·0	—0·9	+0·4	+0·4	+0·5	—0·5	—1·1
Bombay	—1·0	—2·0	—1·8	—0·8	0	0·5	0·2	—1·0
Central Provinces and Berar	—0·5	+0·7	+1·2	+1·2	+1·8	+1·0	+1·1	+1·0
Central India and Guzerat	+0·2	—0·1	+1·4	+1·1	+2·2	+1·1	—0·9	+0·8
Sind and Rajputana	+0·4	—0·2	+0·9	+1·8	+2·8	+2·6	+0·6	+1·3
Madras	—1·2	—1·3	—1·3	—1·0	—2·2	—0·3	—1·3	—1·4
Mean for whole India	—0·5	—0·4	+0·6	+0·8	+0·9	+0·8	+0·1	+0·3

In the Peninsula and the Punjab the mean temperature was below the normal average, but in all other parts it was above, the greatest abnormal excess being in North-East India.

Rain.—The table at the close of the summary shows that rain has fallen during the week in all the divisions of India, the average actual fall ranging from 5·05 inches in the East Coast (North *a*) division to only 0·03 in Sind. The other divisions in which the fall was heavy are the East Coast (Central) with a fall of 4·81 inches, Kathiawar with a fall of 4·65 inches, Khandeish with a fall of 4·42 inches, and the Konkan with a fall of 4·05 inches. The divisions within with the average actual fall of the week was less than one quarter of an inch are Oudh (South), the North-West Provinces (Central), the Punjab (West), and Sind. According to the normals, the rainfall of the week under review should be heaviest in Tenasserim, Assam (Surma), North Bengal, and the Konkan, and lightest in the Punjab (West and South), Rajputana (West), and Sind. In the last named division no rain is expected. Consequently the principal difference between the actual and normal distribution of rain exists in the lightness of the rainfall in North-East India and Burma and its heaviness on the Madras Coast, in Kathiawar, and in Khandeish. These exceptionally heavy falls were due, as explained in the former part of the summary, to the effect of the two depressions which affected those regions. The third column of the table shows that of the fifty divisions into which India is divided, twenty-eight had less and twenty-two had more than the usual amount of the week. The region of excessive rain included the following divisions: The North-West Provinces (West), the Punjab (South, Central, Submontane, Hill districts, and West), the Bombay Deccan, Khandeish, Berar, Guzerat, Kathiawar, Sind, Central India, Rajputana, and all the Madras divisions, except the South Central. In all other parts of India the rainfall was more or less in defect. The greatest actual excess was 3·75 inches in the East Coast (Central), and the greatest actual deficiency was 2·12 inches in Tenasserim.

The three concluding columns of the table show the actual and normal rainfall for the whole period from May 29th to September 24th, 1892, and the difference of the former above or below the latter expressed as a percentage. The most marked feature presented by these columns is the general deficiency over Burma and North-East India and the general excess elsewhere. Assuming that a departure of less than 20 per cent from the normal implies that the rainfall of the division has been about equal to the normal requirements, the last column shows that in East Bengal, in Deltaic Bengal, and in Central Bengal the rainfall of the present monsoon period has been deficient, while in all the other divisions it has equalled or exceeded the average. The greatest excess has been in the west of the Punjab, but in the south and submontane districts of the Punjab, in the Deccan, Khandeish, Berar, Sind, Hyderabad, and the East Coast (Central) the fall for the season has been largely in excess of the normal.

The following are the largest total amounts recorded in the different divisions during the week:

Division.	District.	Station.	Amount.
Burma	Henzada	Zalun	13·80 inches.
Assam	Sylhet	Sudder	7·08 "
Bengal	Chittagong	Ditto	5·53 "
North-West Provinces	Muttra	Ditto	5·28 "
Punjab	Rohtak	Gohana	4·98 "
Malabar	South Kanara	Coondapur	6·49 "
Konkan	Thana	Dahanu	12·12 "
Deccan	Kolhapur	Bawda	17·10 "
Khandeish	Khandeish	Pachora	10·25 "
Berar	Basim	Pusad	7·63 "
Guzerat	Surat	Bardoli	7·64 "
Central India	Bhopal	Bhilsa	4·09 "
Rajputana	Ajmere	Bhinai	15·93 "
Madras	Vizagapatam	Salur	13·20 "
Ditto	Kistna	Dachepalle	10·09 "

more or less briskly, except at a few stations in Berar, the Deccan, and North Konkan, where pressure was affected by the slight depression noticed over that region on the 21st. The winds were variable and generally light, except on the Circars Coast. There was a little more rain over Burma and Bengal, but over the greater part of Northern India only a few scattered showers were reported. Over the Peninsula the rainfall continued general, and at Malegaon the fall was heavy. On the 23rd the barometer was falling in North-West and Central India and still rising elsewhere. Pressure was lowest over the northern portions of the Bombay Presidency, and a small centre of depression had been developed over the Gulf of Cambay. The winds were cyclonic in that neighbourhood, and easterly winds were re-appearing up the Gangetic plain. In other places the directions were rather variable. There was very little rain in Madras, but there had been some extension of rain in Northern India, and in Kathiawar the fall was heavy. On the 23rd the small depression previously noticed over the Gulf of Cambay was shown over Lower Sind, but there was little other change. The winds were southerly to westerly over the greater part of the country, and there had occurred a considerable extension of rainfall, so that Behar, Malabar, and the extreme north-west of India were the only regions where rain had not fallen. In several places the falls were large.

Temperature.—The cessation of the rainfall over the northern portions of India during the middle days of the week exercised a marked influence on the temperature, and the mean temperature of the whole of India was relatively to the average nearly 1° higher than it was during the previous week. The following table shows the variations of the mean temperature from the normal on each day of the week for the principal provinces of India:—

Province.	18th.	19th.	20th.	21st.	22nd.	23rd.	24th.	Mean variation of week.
	°	°	°	°	°	°	°	°
Burma	+1·5	+1·0	+2·3	+1·4	+0·8	+0·7	+0·7	+1·2
Bengal and Assam	+1·7	+2·2	+2·2	+2·5	+0·2	+0·1	+0·2	+1·3
North-West Provinces and Oudh.	—1·5	0	+1·1	+1·9	+2·2	+1·9	+0·9	+0·9
Punjab	—3·3	—4·0	—0·9	+0·4	+0·4	+0·5	—0·5	—1·1
Bombay	—1·9	—3·0	—1·8	—0·8	0	—0·5	—0·2	—1·0
Central Provinces and Berar	—0·5	+0·7	+1·2	+1·2	+1·8	+1·0	+1·4	+1·0
Central India and Guzerat	+0·2	—0·1	+1·4	+1·1	+2·2	+1·4	—0·9	+0·8
Sind and Rajputana	+0·4	—0·2	+0·9	+1·8	+2·8	+2·6	+0·6	+1·3

Mean for whole India	—0·5	—0·4	+0·6	+0·8	+0·9	+0·8	+0·1	+0·3

In the Peninsula and the Punjab the mean temperature was below the normal average, but in all other parts it was above, the greatest abnormal excess being in North-East India.

Rain.—The table at the close of the summary shows that rain has fallen during the week in all the divisions of India, the average actual fall ranging from 5·05 inches in the East Coast (North *a*) division to only 0·03 in Sind. The other divisions in which the fall was heavy are the East Coast (Central) with a fall of 4·81 inches, Kathiawar with a fall of 4·65 inches, Khandeish

with a fall of 4·42 inches, and the Konkan with a fall of 4·05 inches. The divisions within with the average actual fall of the week was less than one quarter of an inch are Oudh (South), the North-West Provinces (Central), the Punjab (West), and Sind. According to the normals, the rainfall of the week under review should be heaviest in Tenasserim, Assam (Surma), North Bengal, and the Konkan, and lightest in the Punjab (West and South), Rajputana (West), and Sind. In the last named division no rain is expected. Consequently the principal difference between the actual and normal distribution of rain exists in the lightness of the rainfall in North-East India and Burma and its heaviness on the Madras Coast, in Kathiawar, and in Khandeish. These exceptionally heavy falls were due, as explained in the former part of the summary, to the effect of the two depressions which affected those regions. The third column of the table shows that of the fifty divisions into which India is divided, twenty-eight had less and twenty-two had more than the usual amount of the week. The region of excessive rain included the following divisions: The North-West Provinces (West), the Punjab (South, Central, Submontane, Hill districts, and West), the Bombay Deccan, Khandeish, Berar, Guzerat, Kathiawar, Sind, Central India, Rajputana, and all the Madras divisions, except the South Central. In all other parts of India the rainfall was more or less in defect. The greatest actual excess was 3·75 inches in the East Coast (Central), and the greatest actual deficiency was 2·12 inches in Tenasserim.

The three concluding columns of the table show the actual and normal rainfall for the whole period from May 29th to September 24th, 1892, and the difference of the former above or below the latter expressed as a percentage. The most marked feature presented by these columns is the general deficiency over Burma and North-East India and the general excess elsewhere. Assuming that a departure of less than 20 per cent from the normal implies that the rainfall of the division has been about equal to the normal requirements, the last column shows that in East Bengal, in Deltaic Bengal, and in Central Bengal the rainfall of the present monsoon period has been deficient, while in all the other divisions it has equalled or exceeded the average. The greatest excess has been in the west of the Punjab, but in the south and submontane districts of the Punjab, in the Deccan, Khandeish, Berar, Sind, Hyderabad, and the East Coast (Central) the fall for the season has been largely in excess of the normal.

The following are the largest total amounts recorded in the different divisions during the week:

Division.	District.	Station.	Amount.
Burma	Henzada	Zalun	13·80 inches.
Assam	Sylhet	Sudder	7·08 „
Bengal	Chittagong	Ditto	5·53 „
North-West Provinces	Muttra	Ditto	5·28 „
Punjab	Rohtak	Gohana	4·98 „
Malabar	South Kanara	Coondapur	6·49 „
Konkan	Thana	Dahanu	12·12 „
Deccan	Kolhapur	Bawda	17·10 „
Khandeish	Khandeish	Pachora	10·25 „
Berar	Basim	Pusad	7·63 „
Guzerat	Surat	Bardoli	7·64 „
Central India	Bhopal	Bhilsa	4·09 „
Rajputana	Ajmere	Bhinai	15·93 „
Madras	Vizagapatam	Salur	13·20 „
Ditto	Kistna	Dachepalle	10·09 „

SIMLA, *29th September, 1892.*

W. L. DALLAS,
Assistant Meteorological Reporter to the Government of India.

J. W. P. MUIR-MACKENZIE,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 24th September.*—Rainfall very heavy in the Circars and the greater part of the Deccan; heavy in most of the Karnatic districts; moderate in the remainder and in the Central and Western districts; fair in Madura; no rain in Tinnevelly; fall excessive in parts of the Circars, Deccan, and Karnatic. Cultivation and sowing still proceeding briskly. Standing crops generally good, though somewhat damaged by excessive rain in parts and by continued want of rain in the south. Harvest continues; outturn fully average. Pasture and water-supply ample. Prices of principal food-grains much cheaper in the Circars; slightly cheaper in the Karnatic and Central districts; easier in the Southern and Western districts; and nearly stationary elsewhere.

Bombay.—*For week ending 28th September.*—Rain throughout the Presidency Proper and in one district of Sind; excessive and injurious to standing crops, especially cotton in parts of three districts. Crops also damaged by rats, locusts, or other insects in parts of Sind and Bijapur. Prospects otherwise good. Preparation for late crops progressing in several districts, but retarded in parts owing to excessive rain. Harvesting of early crops progressing in five districts. Prices generally steady. Agricultural stock good and fodder sufficient.

Bengal.—*For week ending 24th September.*—Rainfall of the week has been fairly general, but too light in most parts of the province; more rain is now required in several districts. Condition of the winter-rice crop is generally satisfactory, except in four districts, where sufficient rain has not yet fallen. The Burdwan report shows some improvement during the week. Harvesting of all autumn crops and jute nearly finished. Cultivation for the spring harvest has begun. Prices of rice are generally high and almost stationary; but those of Indian-corn and *Eleusine coracana* have fallen considerably. Cattle are generally doing well, and there is an ample supply of fodder and water in almost all districts.

North-Western Provinces and Oudh.—*For week ending 28th September.*—The rainfall during the week has been generally light, except in two districts. Prospects are favourable everywhere. Harvesting of autumn crops in progress; outturn good. Ground for the spring harvest being prepared, and sowings begun in some districts. Prices fairly steady.

Punjab.—*For week ending 28th September.*—Rain has fallen in all but four districts. Canals flowing in Multan. Ploughings and sowings for spring crops in progress, but more rain wanted in three districts. Condition of standing crops good. Locusts appeared in parts of the Ferozepore, Rawalpindi, and Dera Ismail Khan districts, but have done no damage; measures are being taken for their destruction. Cattle are generally in good condition, and fodder is reported to be sufficient throughout the province. Prices rising in two districts, falling in two others, and stationary elsewhere.

Central Provinces.—*For week ending 28th September.*—The break in the weather which set in during the past week has continued during the week under report, and has proved beneficial to standing crops. It did not, however, set in early enough to save the sesamum and cotton crops in Hoshangabad. Elsewhere agricultural prospects are very favourable. Sowings of winter crops commenced in one district and in part of another.

Burma.—*For week ending 24th September.*—LOWER BURMA: Transplanting nearly completed. Standing crops everywhere in good condition. UPPER BURMA: Transplanting of wet-weather paddy in progress generally. Reaping of early wet-weather paddy completed in two districts and in progress in three others. One-third of this crop has failed in Shwebo for want of rain. Cotton being picked in two districts and sowing of millets in progress. Prospects of standing crops are good, but more rain is wanted in places. Four-fifths of the paddy crops in the Sadaung township and in part of Sagaing have failed for want of rain; elsewhere in that district prospects are favourable. A fair outturn of all crops is expected. The price of paddy has decreased considerably in four districts and slightly in two, while it has risen in three others.

Assam.—*For week ending 27th September.*—Weather seasonable. Transplanting of late-rice over. Condition of cattle fair. Fodder and water sufficient.

Mysore and Coorg.—*For week ending 28th September.*—MYSORE: Rainfall general. Standing crops good, except in parts of one district, where more rain is still wanted. *Eleusine coracana* harvested in parts. Prices fallen in two districts.

COORG: Rainfall fair. Standing crops in good condition; reaping of *Eleusine coracana* and picking of cardamom in progress. Slight fall in prices. Water and fodder for cattle sufficient.

Berar and Hyderabad.—*For week ending 28th September.*—BERAR: Average rainfall good. Weather cool and cloudy. Autumn crops damaged owing to excessive rain. Weeding progressing in three districts. Land under preparation for the spring harvest in one district. Fodder and water sufficient. Cattle in good condition. Prices almost stationary.

HYDERABAD: Rainfall good during the week. Excessive rain is spoiling the autumn crops. Tanks and wells full. Grass plentiful. Prices steady.

Central India.—*For week ending 28th September.*—Rain general. Agricultural operations continue, except in Goona, where rain has been excessive. Condition of standing crops generally good, except in Goona. Pasturage good and sufficient. Agricultural stock in good condition, except in parts of Bhopal. Prices generally steady.

Rajputana.—*For week ending 28th September.*—Ten States and Ajmere district report rather more rain than is wanted; hence autumn crops have suffered. Agricultural prospects, however, generally good; millets and maize being harvested in Ulwar and Merwara. Ploughing for the spring harvest in progress in Merwara and Bikanir. Cattle in excellent condition and pasturage abundant throughout. Prices steady in nine States, falling in four others, and rising in one. FAMINE RELIEF: *Numbers on works*:—Ajmere-Merwara, 3,258 (mostly in Merwara) against 6,468 last week; Marwar (report not received). *On gratuitous relief*:—Ajmere-Merwara 652 against 789 last week; Kishengarh, 37; Marwar (report not received).

Nepal.—*For week ending 22nd September.*—Weather fine with occasional showers. Prospects favourable.

J. W. P. MUIR-MACKENZIE,
Offg. Secretary to the Government of India.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the week ending at 8 a.m. on Saturday, October 1st, 1892.

A great change has occurred in the weather over India during the week under review. On Sunday, the 25th September, rain was falling over by far the greater part of the country, only a small portion of North-West India and of the Gangetic plain being without rain. On the following day, Monday, the 26th, the rain had ceased, and the weather cleared over the Punjab, Rajputana, Sind, and Guzerat, while the rainfall had become more scattered over a large part of the country. From this day onward the rainfall area steadily contracted, and the fine weather area steadily expanded until by the close of the week rain was confined to Burma, Bengal Proper, and the coasts of the Peninsula. At the same time the wind shifted to the westward down the Gangetic plain and in West Bengal and became variable elsewhere, so that it was only in North-East India that the influence of the monsoon current was still felt. In the earlier part of the week the temperature changes were irregular; but as the sky cleared a fall set in, and at the close of the week the mean temperature was about 2° lower than usual in all provinces.

The chart of the 25th showed a low pressure area over the Gangetic plain, and a second over the Western desert, while readings were highest in the extreme south. The winds varied a good deal in direction, but were on the whole light in force. Rain had fallen very generally. The Indus Valley, Western Rajputana, Sind, Guzerat, and part of the Gangetic plain were without rain, but elsewhere the fall was general, and in places heavy. On the morning of the 26th the distribution of pressure was the same as that on the preceding day, readings being low over the Western desert and over the Gangetic plain and high in the extreme south. Gradients were very slight, and the most important feature in the weather was the appearance of a fresh westerly current down the Gangetic plain and the improvement of the weather in North-West India

which had accompanied the appearance of this wind. There was no rain in North-West India, but elsewhere the fall was still general, and in parts of Burma and Assam heavy. On the 27th there was still no important change in the distribution of pressure, but the westerly wind over North-Western India had become stronger and more general, and the area of fine weather had correspondingly increased. There had been no rain over the Punjab, Rajputana, Sind, Guzerat, the north of Bombay, most of the Central Stations, or in the North-West Provinces as far east as Allahabad. Elsewhere rain had been fairly general—more particularly in Burma and Bengal. The chart of the 28th showed that the barometer was rising everywhere, but still there was no important change in the distribution. The winds were north-westerly and westerly over the greater part of the country, but were southerly and south-easterly in Burma and Bengal. A further extension of fine weather had occurred, and rain was confined to Burma, Bengal, and the southern half of the Peninsula, except for a few scattered showers in the central parts of the country. On the 29th the barometer was still rising steadily, except in Bengal, where there had been some fall. The low pressure area which had been formerly over the Gangetic plain had moved eastward to Bengal, but otherwise there had been little change. The wind remained north-westerly and westerly over the greater part of the country, except North-East India, where the southerly and south-easterly winds of the monsoon continued to blow. The showers in the central parts of the country had ceased, and the only rainfall was in the north-east of India and the south of the Peninsula. On the 30th the barometric rise had ceased and been succeeded by a fall which was greatest in Bengal. In consequence gradients had increased over the Bay, but elsewhere the distribution was little changed. Rain continued general in Burma and Bengal, but in the Peninsula only scattered showers had fallen, and elsewhere there was no rain. The amounts were considerable at Poona, Akyab, and Burdwan. By the morning of the 1st the barometer was rising again, except in Bengal, and gradients remained rather steep over the Bay. Showers continued to fall over North-East India and the Peninsula. The amounts were generally small, except at Poona, Akyab, and in Assam.

Temperature has been low throughout the week over the greater part of the country. The following table shows the variations of the mean temperature from the normal on each day of the week for the principal provinces of India:

Province.	September.						October.	Mean variation of week.
	25th.	26th.	27th.	28th.	29th.	30th.	1st.	
	°	°	°	°	°	°	°	°
Burma	—0·7	—1·6	—0·9	—1·7	—2·0	—2·2	—2·0	—1·6
Bengal and Assam	—0·4	—0·8	—0·7	0	—0·4	—1·4	—2·0	—0·8
North-West Provinces and Oudh.	—0·9	—1·8	—2·1	—1·2	—1·2	—2·2	—2·1	—1·6
Punjab	—4·1	—4·2	—2·3	—2·1	—1·7	—2·5	—2·6	—2·8
Bombay	—0·2	—0·1	—0·7	—0·3	—0·9	—0·9	—1·8	—0·7
Central Provinces and Berar	+1·3	+0·2	—2·3	—0·5	—0·6	—1·1	—1·5	—0·6
Central India and Guzerat	—0·4	—1·1	—1·5	—1·2	—1·9	—1·8	—2·8	—1·5
Sind and Rajputana	—1·3	—0·4	+1·4	+1·7	+0·2	—0·4	—2·0	—0·1
Madras	—1·5	—2·6	—1·4	—1·0	—1·7	—1·7	—1·7	—1·7
Mean for whole India	—0·9	—1·4	—1·2	—0·7	—1·1	—1·6	—2·1	—1·3

On each day of the week the mean temperature of the whole of India was below the normal, the deficiency ranging from 0·7° on the 28th to 2·1° on October 1st; while the mean diurnal deficiency for the week for India was 1·3°. The provincial variations show that in Bengal, Bombay, the Central Provinces, Sind, and Rajputana the mean temperature was about normal (less than—1·0°), but in the other provinces there was a deficiency, which was as much as 2·8° in the Punjab.

Rain.—It was noticed in the earlier part of the summary that on the first day of the week rainfall was very widely distributed throughout the country. Owing to this general fall, every division in India, except Sind, received some rain during the week. After the first day the rainfall area steadily decreased, and it was only in North-East India and in parts of the Peninsula that the fall continued till the close of the period under review. In consequence it is only in these two regions that the rainfall has been at all heavy. As mentioned above, Sind received no rain, and in the following divisions the total average fall of the week was less than half an inch:—North-West Provinces (East, Central, and Submontane), Oudh (South and North), the Punjab (South, Central, North-West, and West), Khandeish, Guzerat, Kathiawar, Rajputana (West), and Madras (South). On the other hand, heavy average falls were received in Assam (Surma), (16·58 inches), in Arakan (10·44 inches), and in Tenasserim (6·81 inches). On the whole the actual and normal distribution of rainfall agreed fairly closely, but the heavy rainfall characteristic of North-East India was somewhat heavier than usual, while the light rainfall of North-West India was somewhat lighter than usual. Hence, though the contrast between North-East and North-West India was greater than the average, still the relative distribution was such as is normally the case.

The third column of the table shows that out of the fifty rainfall divisions, twenty-five received more and twenty-three less rain than is normally the case, while two divisions showed no variation. The region of excessive rain included all the Burma divisions, the Assam divisions, Eastern, Deltaic, Central, and North Bengal, Chota Nagpur, the North-West Provinces (West), the Punjab (Submontane and Hills), Malabar, the Deccan, the Central Provinces (West), Rajputana, Central India (West), and all the Madras divisions, except the South and South Central. In other parts of India there was a deficiency. The greatest actual excess was 11·94 inches in Assam (Surma); the greatest actual deficiency was 1·72 inch in Behar (North).

The three concluding columns of the table show the actual and the normal rainfall for the period from May 29th to October 1st, 1892, and the difference of the former compared with the latter expressed as a percentage. The most marked feature presented by these columns is the general slight deficiency of rain over North-East India and the excess elsewhere. Assuming that a departure of less than 20 per cent. from the normal implies that the rainfall of the division has been about equal to the normal requirements, the last column shows that only in East and Deltaic Bengal and Madras (South) has the rainfall of the period been seriously deficient, though over Burma and Bengal generally the rainfall has been slightly lower than usual, and compared with other parts of the country has been largely deficient.

The following are the largest total amounts recorded in the different divisions during the week:

Division.	District.	Station.	Amount.
Burma	Shwegyin	Sudder	11·04 inches.
Arakan	Akyab	Ditto	15·37 „
Assam	Khasia Hills	Cherra	38·38 „
Bengal	Chittagong	Sudder	11·19 „
	Jalpaiguri	Bhagatpur	12·85 „
North-West Provinces	Sultanpur	Amethi	2·74 „
Punjab	Gurgaon	Ferozepore	2·20 „
Malabar	South Kanara	Coondapur	5·81 „
Konkan	Ratnagiri	Malwan	14·98 „
Deccan	Kolhapur	Bawda	10·20 „
Central Provinces	Nagpur	Ramtek	3·15 „
Madras	North Arcot	Wandiwash	10·15 „
	South Arcot	Tindivanam	10·08 „

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 1st October.*—Rainfall heavy in the Circars and Karnatic; seasonable amount elsewhere, except in parts of the Central and Southern districts. September rainfall has been above average in the Circars and Karnatic, but deficient in the Central and Southern districts. Rainfall from June to September greatly above average, except in the Central and Southern districts, but deficiency nowhere serious, though rain is now wanted in parts of latter sections. Agricultural operations proceeding actively. Standing crops thriving, though sunshine needed in Deccan. Harvest of early crops progressing; outturn average, except in the Southern districts, where it is poor. Water and pasture abundant and cattle in good condition. Prices generally cheaper, except in the Deccan, Kistna, Godavari, and Coimbatore districts. General prospects favourable.

Bombay.—*For week ending 5th October.*—Rain throughout the Presidency Proper, except in Kathiawar and parts of Guzerat; generally moderate or slight. Standing crops improving in parts of Guzerat and Deccan owing to break in the weather. Crops damaged by locusts in parts of Sind. Prospects generally favourable. Harvesting of early and sowing of late crops progressing in several districts. Agricultural stock good and fodder sufficient.

Bengal.—*For week ending 1st October.*—General rain over almost the whole of the Province, and the falls in some of the districts were exceptionally heavy. The rain has been of great benefit to the winter-rice crop, which is generally doing well. More rain is required in some parts of Behar. In Burdwan and Bankura the condition of the rice crops is now somewhat better, but in Midnapur and Hooghly, where heavy rain still holds off, not much improvement has occurred. Harvesting of autumn crops nearly over, and cultivation and sowing of cold weather crops in fair progress. Prices remain almost stationary, with a tendency to fall in some districts. Cattle are in good condition, and plenty of fodder and water is available for them at present.

North-Western Provinces and Oudh.—*For week ending 5th October.*—Rainfall over an inch in one district, and light showers in some of the Eastern and Central districts and in Saharanpur. More rain is needed in two districts for cultivation for the spring harvest. On high lands harvesting of the autumn crop continues, and operations for the spring crops are in active progress. Sowings have begun in some districts. Crop prospects good everywhere. Slight injury to rice by insects reported from two districts. Prices generally steady and show a falling tendency.

Punjab.—*For week ending 5th October.*—Rain has fallen in all but four districts. Harvesting of inferior autumn crops commenced. Sugarcane and cotton weeding going on. Ploughing and sowings of spring crops are in progress. Prospects of standing crops good, but more rain is required in two districts. Maize crop blighted in parts of one district. Flight of locusts passed through one tehsil of Dera Ismail Khan without doing damage. Condition of cattle is generally good. Pasturage and fodder are sufficient throughout the Province. Prices unsettled in one district, falling in another, and stationary elsewhere.

Central Provinces.—*For week ending 5th October.*—Weather has continued to be clear throughout the week, and has enabled the cultivators to push

on with the weeding of fields and preparing land for sowings of winter crops. In the Northern and Eastern districts sowings of winter crops have commenced. Rice is being reaped in Chanda, and a 10-anna outturn is anticipated.

Burma.—*For week ending 1st October.*—LOWER BURMA: Transplanting nearly finished. Standing crops in good condition everywhere, except in Thayetmyo, where they are suffering from want of rain. In Toungoo crops on about 100 acres have been destroyed by floods, and in Tavoy slight damage has been caused by insects. UPPER BURMA: Transplanting of wet-weather paddy completed in two districts and in progress elsewhere. Early wet-weather paddy being reaped in five districts. Standing crops are generally in good condition, but more rain is still wanted for the crops in several places. Peas and beans destroyed by fly blight in Lower Chindwin. The price of paddy has risen in two districts and decreased in four others.

Assam.—*For week ending 4th October.*—Weather seasonable. Prospects of crops good. Ploughing for mustard begun. Condition of cattle normal. Fodder sufficient.

Mysore and Coorg.—*For week ending 5th October.*—MYSORE: Crops good, except in parts of two districts, where more rain is needed for dry crops. Prospects generally favourable. No material change in prices.

COORG: Rainfall fair. Standing crops in good condition. Reaping of *Eleusine coracana* and picking of cardamom in progress. Slight fall in price of food-grains. Fodder and water for cattle sufficient.

Berar and Hyderabad.—*For week ending 5th October.*—BERAR: Weather temperate. Weeding continues in three districts. Land under preparation for ensuing winter crops. Standing autumn crops damaged by excessive September rain. Fodder sufficient. Cattle healthy. Prices almost steady.

HYDERABAD: Rain over 3 inches during the week. Harvesting of autumn crops begun. Irrigated crops thriving. Prices stationary.

Central India.—*For week ending 5th October.*—Slight rain in Bhopawar and Bundelkhand. The rainfall during the season has been sufficient everywhere. Condition of crops and cattle generally good. Sowings for the spring crops begun in parts. Prices of food-grains generally steady.

Rajputana.—*For week ending 5th October.*—Rainfall generally light and moderate. Autumn crops partially damaged in three States and in Ajmere-Merwara; agricultural prospects otherwise generally satisfactory. Reaping of autumn crops commenced in Sirohi and Merwara, and ploughing and sowing for the spring harvest in progress. Cattle in good condition. Pasturage plentiful throughout. Prices steady in nine States and fluctuating in others. FAMINE RELIEF: In Merwara 331 labourers on works and 623 persons receiving gratuitous relief. Relief works finally closed on 27th September in Ajmere district.

Nepal.—*For week ending 29th September.*—Weather bright and warm. Prospects of crops good.

J. W. P. MUIR-MACKENZIE,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Circular No. $\frac{36}{126}$.

Extract from the Proceedings of the Government of India, in the Revenue and Agricultural Department (Agriculture),—dated Simla, the 3rd October, 1892.

Read—

Circular Resolution of the Government of India, No. 20-F., dated 21st August 1891, communicating remarks on the Report of the Forest School, Debra Dun, for 1890-91.

Read also—

Report of the Board of Control for the Forest School, Dehra Dun, assembled in March 1892.

Letter of the Inspector-General of Forests, No. 292, dated 30th April 1892, submitting the above report.

Report of the Forest School for 1891-92.

Letter of the Inspector-General of Forests, No. 669, dated the 10th August 1892, submitting the above report.

RESOLUTION.

The Administration Report of the Imperial Forest School for 1891-92 records the following among other changes in the permanent School and Teaching Staff:—Mr. A. Smythies, B.A., Indian Forest Service, has become Deputy Director, *vice* Mr. E. E. Fernandez, appointed Conservator of Forests, Baroda State. Mr. A. F. Gradon, Indian Forest Service, has assumed the new post of Second Instructor, which was created during the year. A second new appointment sanctioned in the year under report was that of Vernacular Instructor.

2. The number of students attending the School during 1891-92 was 78, of whom 55 came from Provinces and 9 from Native States and Ceylon, while 14 were private students.

3. In the final examinations held in March last 20 students gained the certificate of Forestry by the higher standard and 10 by the lower standard.

4. The recommendations embodied by the Board of Control in their report, read in the preamble, have been duly considered by the Government of India.

5. The Director of Public Instruction, North-Western Provinces and Oudh, has been consulted with reference to the Board's proposal for the preparation of a special Mathematical text-book, and the matter is under consideration. Arrangements have been made for the revision of the Zoology syllabus; and, with the permission of the Trustees of the Indian Museum, Mr. Cotes, Assistant Superintendent, will undertake the preparation of a Manual of Forest Zoology on the lines laid down by the Board of Control.

6. The proposals of the Board regarding the future recruitment of candidates for the Provincial Forest Service have been referred to the Local Governments for their opinions. The Governor-General in Council agrees in the view that, as the school training for the Forest Service involves a special and technical course of instruction which is not useful for other professions, the competitive examination should take place before entrance into the School rather than at the end of the course. He also approves the suggestion that the co-operation of the masters of schools and colleges should be secured in the

selection of suitable candidates. In the opinion of the Government of India, it is advisable that each Local Government should reserve to itself, or to the Provincial Conservators, some freedom in the selection of the students most adapted for the Forest Service by caste, character, and physique, and that the nominations should not be based entirely upon the number of marks awarded on the examination papers. Local Governments have, therefore, been informed that it will be open to them to rule that at the competitive examinations special consideration will be given, either by award of marks or in such other manner as they think fit, to School certificates or special notes of recommendation by Heads and Principals of Schools and Colleges as well as to physical qualifications. Although the proposals of the Board are directed mainly to the measures which appear to be necessary for securing a class of natives of pure Asiatic descent superior to the general average of those who now apply for admission to the School and to the Provincial Forest Service, the Government of India wish it to be understood that they have no desire to discourage the appointment or nomination to the Provincial Forest Service of suitable and deserving Anglo-Indians and Eurasians who are eligible as statutory natives.

7. The Secretary of State was urged in May last to take early steps to give the Board the services of a lecturer in Agricultural Chemistry. Intimation has been received that His Lordship has sanctioned the appointment of an Assistant Agricultural Chemist, and the gentleman who may be selected will probably arrive in India in November, when his services will be made available to the School.

8. The Board's proposals for the construction of new quarters for students at the Forest School have been accepted, and instructions have been issued for the work to be taken in hand without delay. The construction of a gymnasium with the requisite apparatus has been sanctioned at a cost of Rs. 1,200.

ORDER.—Ordered, that copy of the above Resolution be published in the Supplement to the *Gazette of India*, and that copies be forwarded for information to the Local Governments and Administrations noted in the margin,* to the Department of Finance and Commerce and the Comptroller and Auditor General; also to the Inspector-General of Forests for information, and for communication to the Director of the Forest School and to the Superintendent of Forest Surveys.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the week ending at 8 a.m. on Saturday, October 8th, 1892.

The fine weather which had set in over a large part of India during the previous week continued and extended during the week under review. Last week, it will be remembered, though the monsoon current had withdrawn from all parts of North-West and Central India and the Gangetic plain, it still prevailed over Burma, Bengal (Proper), and part of the Peninsula, and rain even at the close of the week was moderately general over those regions. During the present week this has been changed. As early as the 2nd nothing more than scattered showers were received over the Peninsula; but in Burma and Bengal the wind was still southerly, and rain was fairly general. By the 4th rain had ceased in Bengal, but still continued in Burma. On the 5th the wind had shifted to north in Burma, and practically all the rainfall recorded over the Indian region on this day was due to showery weather, and from this date until the close of the week the weather was very fine throughout nearly the whole of the Indian region.

The chart of Sunday, October the 2nd, showed shallow low pressure areas—one over the Western desert, and a second over Bengal, Behar, and Oudh. Readings were highest in the south-east of the Bay, but were uniform and relatively high over the west and centre of the Peninsula, the west of the Central Provinces, and Central India. The wind was westerly over the Gangetic plain and variable over the Peninsula, but in Burma and Bengal the southerly and south-easterly winds of the retreating south-westerly monsoon still prevailed. Rain was general in Burma and Bengal, and a few showers were reported from the west and south of the Peninsula. On the Arakan Coast the rainfall had been heavy. On the 3rd the lowest pressure was still reported from Bengal, but the highest pressures were shown over the north of the Bombay Presidency, the barometer having fallen over the Bay. The wind was westerly down the Gangetic plain and across the central parts of the country, southerly in Burma, and very variable elsewhere. Rain had fallen generally in Burma and Assam, and scattered showers were reported from parts of Bengal and of the Peninsula. The amounts were nowhere large. The chart of the 4th showed that the barometer was giving way briskly to rapidly over the whole of India. Readings were low in Oudh and the west of the Punjab, and high over the central parts of the country, the west of the Peninsula, and the south of the Bay. The wind had become north-east in Arakan and was shifting round in Lower Burma, but elsewhere the general directions were little altered. Rain continued to fall generally in Lower Burma, and showers were also general in the south of the Peninsula, but elsewhere any rainfall was very widely scattered. The chart of the 5th showed shallow low pressure areas over Burma and the north of the Bay on the one hand, and over the Western desert on the other; while between the two, *i.e.*, over the Peninsula and central parts of the country, very uniform, but slightly higher, pressures prevailed. The wind had shifted to north in Burma, but otherwise there was very little

change to record. A few showers were reported from North-East India and from the west of the Peninsula. On the 6th the barometer was rising everywhere—in most places briskly; but the general distribution and the winds were very similar to those reported on the preceding day. A little rain has fallen on the North-East Himalayas, in Tenasserim, and along the West Coast. The amounts were generally small. On the 7th the chart still showed the same general distribution of pressure. Shallow low pressure areas overlay North-East India and North-West India, while relatively high pressures were shown in the intervening space. The winds were generally between west and north, and were light in force. Rain had fallen in Tenasserim and the south of the Peninsula, but there was hardly any elsewhere. On the 8th the only important change was the advance westward or south-westward of the low pressure area over North-East India. North-easterly winds were appearing over Assam, North Bengal, and the West Coast; but elsewhere the directions were generally between west and north.

Temperature.—The clear-up in the weather has been accompanied with a general fall of temperature, the decrease being most marked in the Punjab, the Central Provinces, Central India, and Guzerat. The following table shows the variations of the mean temperature from the normal on each day of the week for the principal Provinces of India:

Province.	2nd.	3rd.	4th.	5th.	6th.	7th.	8th.	Mean variation of week.
	°	°	°	°	°	°	°	°
Burma	−1·7	−1·5	−1·0	−0·6	−1·3	−0·6	−0·2	−1·0
Bengal and Assam	−1·9	−0·8	−1·0	−2·0	−1·9	−1·9	−2·1	−1·7
North-West Provinces and Oudh.	−2·5	−2·0	−3·0	−2·5	−1·8	−0·8	+0·2	−1·8
Punjab	−3·9	−3·9	−3·6	−2·6	−1·5	+0·2	+0·3	−2·1
Bombay	−2·4	−1·1	+0·1	+1·1	+0·7	+0·5	−0·2	−0·2
Central Provinces and Berar	−1·8	−2·2	−2·4	−1·9	−1·3	−1·4	−0·8	−1·7
Central India and Guzerat	−3·3	−3·7	−3·4	−3·7	−3·3	−2·5	−1·7	−3·1
Sind and Rajputana	−2·8	−2·7	−2·4	−1·8	−1·0	−0·7	+1·6	−1·4
Madras	−1·0	−0·5	−0·1	−0·2	−0·3	−1·2	−1·7	−0·7
Mean for whole India	−2·4	−2·0	−1·9	−1·6	−1·3	−0·9	−0·5	−1·5

On each day of the week the mean temperature of the whole of India was below the average, the mean diurnal deficiency of the week for the whole country being 1½°.

Rain.—The table at the close of the present summary exhibits great difference in the distribution of rain as compared with that shown in last week's summary. During last week every division in India, except Sind, received rain; while, on the contrary, in the present week no less than twenty divisions have had no rain, while seven more had an average fall for the division of less than one-tenth of an inch. The regions which received absolutely no rain, or less rain

than one-tenth, included the following divisions:—The divisions in the west and south-west of Bengal, all the North-West Provinces and Punjab divisions, the Central Provinces divisions, Guzerat, Kathiawar, Sind, Central India, Rajputana, and the inland division of the East Coast. In other parts of India in greater or less amount was received. The heaviest average actual fall was 3·03 inches in Tenasserim, followed by over 2 inches in Lower Burma and Arakan, and by over 1 inch in Central Burma, East Bengal, Assam (Surma), Madras (South Central), Coorg, and Madras (South). According to the normal distribution of rainfall, Sind is the only division in which rain is not ordinarily received during the week under review, while the divisions which ordinarily receive the heaviest falls are Arakan, Assam (Surma), and Coorg. Hence the third column of the table shows a very general deficiency of rain throughout India, the only divisions recording an excess being Tenasserim, Lower Burma, Madras (South Central), and Madras (South). The greatest absolute deficiency was 1·87 inches in North Bengal.

The three concluding columns of the table show the actual and the normal rainfall for the period from May 29th to October the 8th, and the difference of the former compared with the latter expressed as a percentage. The very general dryness of the week under review has had the effect of somewhat diminishing the amount of excess which prevailed in the majority of divisions last week, and of increasing the amount of defect which then prevailed in a few divisions in North-East India. Otherwise there has been very little change, and the slight deficiency over North-East India and the general excess elsewhere remains the most marked feature in the rainfall distribution just as it did last week. Assuming that a departure of less than 20 per cent. from the average implies that the rainfall of the division has been about equal to the normal requirements, the last column shows that only in East, Deltaic, and Central Bengal has the rainfall of the season been deficient. In all other divisions the amount received has equalled or exceeded the average.

The following are the largest total amounts recorded in the different divisions during the week. As might be expected from a general consideration of the rainfall of the week, the amounts are nowhere very large:

Division.	District.	Station.	Amount.
Tenasserim	Amherst	Thatôn	4·34 inches.
Assam	Khasia Hills	Cherra	2·70 "
Bengal	Chittagong	Sudder	4·22 "
Malabar	Travancore	Alleppy	2·45 "
Mysore	Kolar	Bowringpet	4·05 "
Konkan	Colaba	Roha	4·10 "
Deccan	Dharwar	Hubli	4·20 "
Madras	North Arcot	Wandiwash	6·10 "
	Trichinopoly	Turaiyur	4·99 "
	Nilgiris	Kotagiri	7·10 "

PROVINCE.	DIVISION.	Rainfall data for week ending October 8th.			Rainfall data from May 29th to October 8th, 1892.		
		Average actual rainfall of division.	Average normal rainfall of division.	Excess or defect in inches.	Average actual rainfall of season to date.	Average normal rainfall since May 29th to October 8th.	Excess or defect of (seasonal) rainfall expressed as a percentage.

SIMLA, *13th October, 1892.*

W. L. DALLAS,
Assistant Meteorological Reporter to the Government of India.

J. W. P. MUIR-MACKENZIE,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 8th October.*—Rainfall good in the greater part of the Southern and Central districts; moderate in the Circars and on the West Coast; very little in the Deccan and Karnatic. This break in the rains is most beneficial, and the very recent fall in the South has greatly improved prospects there. Sowings proceeding actively. Standing crops generally good. Harvest of early crops progressing; outturn generally average. Pasture and water abundant and condition of cattle good. Prices fallen considerably in the Central districts and Karnatic; much easier in the Deccan and Circars; no change elsewhere. General prospects very favourable.

Bombay.—*For week ending 12th October.*—Rain in parts of thirteen districts, generally slight. Standing crops injured by rats, locusts, or other insects in parts of Sind, and by the late excessive rain in parts of five districts. Prospects otherwise good. Harvesting of early and sowing of late crops progressing generally. Agricultural stock good and fodder sufficient.

Bengal.—*For week ending 8th October.*—General rain fell during the week in South-West, North, and East Bengal; no rain in Orissa, Behar, and Chota Nagpur, except very slight falls in Purneah, Muzaffarpur, and Manbhum. Reports of the winter-rice crop continue generally satisfactory, but more rain is required, especially in Burdwan, Midnapur, Hooghly, and Behar. In Burdwan the winter-rice has been greatly benefited by the rain of the previous week, but more rain is still required. Cultivation for the spring crops is generally well forward, and sowing of pulses and other earlier crops has begun. Prices stationary. Fodder and water supplies generally sufficient and cattle in good condition.

North-Western Provinces and Oudh.—*For week ending 12th October.*—Showers in two districts; no rain elsewhere. More rain is needed for the sowings which are in progress for the spring harvest. Prospects are generally good. Prices are fluctuating.

Punjab.—*For week ending 12th October.*—No rain. Harvesting of autumn crops and picking of cotton commenced. Ploughing and sowing for spring crops going on. More rain wanted in parts of Dera Ismail Khan. Condition and prospects of standing crops reported good. Young locusts appeared in parts of Ferozepore and Dera Ismail Khan, but steps have been taken for their destruction. Maize and *jowar* crops blighted in parts of Lahore. Condition of cattle reported good throughout the province. Fodder is sufficient in all districts. Prices rising in three districts, falling in one, and stationary elsewhere.

Central Provinces.—*For week ending 12th October.*—The weather has continued to be clear during the week, and the break has improved prospects of the standing crops. In the case of cotton a full average outturn is expected. Some rain is still required, especially in the Nagpur country, for the standing crops and for ploughing operations.

Burma.—*For week ending 8th October.*—LOWER BURMA: Transplanting nearly finished. Standing crops in good condition everywhere, except in Thayetmyo, where they are suffering from want of rain. In Tavoy slight damage has

been caused by insects. UPPER BURMA: Transplanting of wet-weather paddy in progress. As a rule standing crops are in good condition, but more rain is wanted in nearly all districts. In Shwebo some of the transplanted plants have withered, and in parts of Myingyan *jowar* and paddy are withering from want of rain. A large quantity of paddy on islands near Mandalay has been destroyed owing to the sudden rise of the Irrawaddy. Crops in Bhamo and Sagaing are submerged, and damage is feared to crops on low-lands in Minbu. In the Southern Shan States standing crops are flourishing, but some damage has been caused by floods. The price of paddy has risen largely in one district and fallen considerably in another; elsewhere fluctuations are small.

Assam.—*For week ending 11th October.*—Weather seasonable. General prospects of crops favourable. Ploughing for mustard continues. Condition of cattle normal.

Mysore and Coorg.—*For week ending 12th October.*—MYSORE: Rainfall general, but slight. Standing crops in good condition. *Eleusine coracana* harvested in parts. Prospects favourable, but more rain is required in parts of three districts. Prices fallen in one district.

COORG: Rainfall slight. Rice and coffee crops in good condition. Reaping of *Eleusine coracana* and picking of cardamom in progress. Prices stationary. Fodder and water for cattle sufficient.

Berar and Hyderabad.—*For week ending 12th October.*—BERAR: Weather temperate. Cotton in flower. Autumn crop in one taluka reported hopeless. Ploughing for the spring harvest continues. Weeding in progress. Fodder sufficient. Cattle healthy. Prices almost stationary.

HYDERABAD: Rain during the week moderate. Harvesting of autumn crops continues. Irrigated crops in good condition. Owing to excessive rain, the autumn crops have suffered. Prices fallen slightly.

Central India.—*For week ending 12th October.*—Rain everywhere sufficient. Ploughing for spring crops in progress in all parts. Crops fair in Gwalior, Goona, and Bhopal; good elsewhere. Agricultural stock in good condition. Fodder good and sufficient. Prices high, but steady.

Rajputana.—*For week ending 12th October.*—No rain during the week. Reaping of autumn crops continues. Ploughing and sowing for the spring harvest in progress. Harvest prospects generally good. Cattle in good condition. Pasturage plentiful throughout. Prices steady in eight States, risen in two others, and fluctuating elsewhere. FAMINE RELIEF: In Merwara 83 persons on works and 192 receiving gratuitous relief. Relief works practically closed in Merwara and Marwar.

Nepal.—*For week ending 6th October.*—Weather fine. Rice harvest in progress.

Telegraph.

REVIEW OF THE ADMINISTRATION REPORT OF THE INDIAN TELEGRAPH DEPARTMENT FOR THE YEAR 1891-92.

No. 236-T., dated Simla, the 13th October, 1892.

RESOLUTION—By the Government of India, Public Works Department.

Read—

Letter from the Director General of Telegraphs, No. 43 T., dated the 3rd September 1892, and its enclosure, the Administration Report of the Indian Telegraph Department for the year 1891-92.

OBSERVATIONS.—The Administration Report of the Indian Telegraph Department deals with the whole of the operations under the control of the Director General, with the exception of those relating to the Indo-European Department, the Report on which will be separately submitted and reviewed.

2. The expenditure of the year charged to Capital Account amounted to Rs. 19,42,128. Rs. 15,47,523 were spent on new lines, Rs. 71,926 on buildings, and Rs. 99,803 on apparatus and plant. The Capital outlay to the close of the year under review amounted to Rs. 5,21,83,804, divided as follows:

	Rs.	Percentage of net total.
Lines	3,89,55,979	74·6
Buildings	55,71,972	10·7
Apparatus and Plant	20,26,932	3·9
Stores and Suspense	35,10,283	6·8
Exchange on expenditure in England previous to 1887-88	24,09,440	4·6
	5,24,74,606	
Deduct—		
Receipts on Capital Account (including interest on Workshop Capital)	2,90,802	0·6
TOTAL	5,21,83,804	

3. The additions made to the system during the year comprised 1,555 miles of line and 6,647 miles of wire and about two miles of cable.

4. The following statement shows for a period of five years the progress that has been made in extending telegraphic communication:

	Capital expenditure.	Miles of line.	Miles of wire.	Miles of cable.	Departmental and Postal combined Telegraph Offices opened.
	Rs.				
Up to beginning of 1887-88 . . .	4,22,53,970	30,034	86,890	196	699
During 1887-88 . .	27,64,500	1,860	6,627	30	46
„ 1888-89 . .	16,38,755	1,568	6,137	1	52
„ 1889-90 . .	16,75,871	1,817	6,435	0	83
„ 1890-91 . .	19,68,580	1,791	7,373	21	69
„ 1891-92 . .	19,12,128	1,555	6,647	2	52
To end of 1891-92 .	5,21,83,804	38,625	1,20,159	253	1,001

5. The operations of the Department during the year under review were extremely satisfactory. The Revenue receipts amounted to Rs. 74,30,092, an increase of Rs. 6,01,237 over the figures for the previous year. The Revenue expenditure amounted to Rs. 48,31,295, an increase of only Rs. 1,45,493. The net receipts amounted to Rs. 25,95,797, showing an improvement of Rs. 4,55,744, and yielded a return of 4·97 per cent. on the Capital outlay. The Revenue receipts include Rs. 15,02,293 on account of State messages and Rs. 49,807 on account of news-free and other *pro formâ* revenue. The receipts on account of State messages may properly be included in estimating the return on Capital outlay of the Department, but the *pro formâ* revenue should be excluded.

6. The Revenue receipts are made up as follows:

	Rs.
Message revenue, including State messages	56,78,572
News-free and *pro formâ* revenue	49,807
Rent of lines, &c., on railways and canals	14,93,802
Rent of private lines, &c.	1,58,615
Sale of books, gazettes, &c.	19,097
Miscellaneous	30,199
TOTAL . .	74,30,092

7. The following statement summarises the Revenue receipts and charges during the last five years:

Year.	Gross Receipts.	Charges.	Net Receipts.	Percentage of Net to Gross receipts.	Dividend on Capital.
	Rs.	Rs.	Rs.		
1887-88 . . .	66,28,660	42,92,248	23,36,412	35·2	5·46
1888-89 . . .	63,22,476	43,42,231	19,80,245	31·3	4·45
1889-90 . . .	66,30,978	45,36,446	20,94,532	31·5	4·34
1890-91 . . .	68,28,855	46,88,802	21,40,053	31·3	4·26
1891-92 . . .	74,30,092	48,34,295	25,95,797	34·9	4·97

8. The following figures show for the last two years the division of the traffic between State and Private and between Inland and Foreign messages respectively:

Class of Telegram.	1890-91.		1891-92.	
	No.	Value.	No.	Value.
		Rs.		Rs.
State Inland	552,436	10,56,108	661,904	14,54,770
„ Foreign	6,026	37,199	6,404	48,476
Total State . .	558,462	10,93,307	668,308	15,03,246
Private Inland	2,365,028	24,53,288	2,627,108	26,95,428
„ Foreign	483,610	16,27,411	513,282	14,84,055
Total Private . .	2,848,638	40,80,699	3,140,390	41,79,483
GRAND TOTAL . .	3,407,100	51,74,006	3,808,998	56,82,729*

* Includes Rs. 1,157, Provincial receipts.

The State Inland telegrams exhibit an increase of 109,468 in number and of Rs. 3,98,662 in value, which is attributed to the outbreak in Manipur and to the other military expeditions.

The Private Inland telegrams increased 262,380 in number and Rs. 2,42,140 in value, equivalent to 11·09 and 9·87 per cent. respectively. During the past ten years the number of messages has increased by about 120 per cent. and their value by nearly 100 per cent.

In Foreign Private telegrams there was an increase over the figures for the previous year of 29,530 in messages and of 506,230 in words, a word being the unit of charge. The receipts, however, were less by Rs. 1,43,356, the reduction being caused by the lower tariff introduced from 1st May 1891 as regards traffic to and from Australia, and from 1st July 1891 as regards trans-Indian traffic for all other countries. The total reduction in tariff made was from 9*s.* 4*d.* to 4*s.* a word for messages between Europe and Australia, for which India accepted as her share a reduction from 75 centimes to 35 centimes in the transit rate.

9. The following table gives the percentages of traffic in number and value due to each class of message:

Class of Telegram.	INLAND.		FOREIGN.		TOTAL.	
	No.	Value.	No.	Value.	No.	Value.
		Rs.		Rs.		Rs.
State	17·38	25·60	·17	·85	17·55	26·45
Private	68·98	47·43	13·47	26·12	82·45	73·55
TOTAL ...	86·36	73·03	13·64	26·97	100·00	100·00

10. The following figures show the division of the Inland traffic into the three classes of Urgent, Ordinary, and Deferred during the last two years:

	Percentages.					
	Urgent.		Ordinary.		Deferred.	
	1891-92	1890-91.	1891-92	1890-91.	1891-92	1890-91.
State	13·55	10·99	19·03	20·18	67·42	68·83
Private	5·48	5·85	43·08	43·76	51·44	50·39
Press	5·76	7·25	24·93	26·54	69·31	66·21

11. The growth of Inland private traffic in a period of ten years is shown by the following figures:

	Number of messages	Value. Rs.
1882-83	1,189,137	13,86,630
1891-92	2,627,108	26,95,428
Increase	1,437,971	13,08,798

12. The following statement gives the distribution of the Revenue charges during the last five years under the principal heads:

Year.	Line Maintenance.				Signalling.			
	Establishment.	Repairs to lines and buildings.	Office stores and miscellaneous.	Total.	Establishment.	Repairs to buildings.	Office stores and miscellaneous.	Total.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
1887-88 ...	7,98,937	3,41,746	67,797	12,08,480	28,84,040	49,343	1,50,415	30,83,768
1888-89 ...	8,02,521	3,30,880	60,690	12,03,091	29,22,850	51,591	1,64,699	31,39,140
1889-90 ...	8,22,820	3,03,551	69,851	12,86,222	30,15,465	64,818	1,69,941	32,50,224
1890-91 ...	8,53,782	4,29,575	58,760	13,42,117	31,18,427	64,777	1,63,481	33,46,685
1891-92 ...	8,79,200	3,70,357	72,080	13,21,637	32,45,159	64,596	2,02,603	35,12,658

13. The strength of the signalling establishment amounted at the close of the year to 2,872, of whom 1,550 were departmental officers, 357 British military signallers, and 935 postal clerks. The net increase during the year to the number of postal telegraph offices amounted to 65, and the number of such offices stood at 754 at the close of the year.

14. The average speed of transmission improved on nearly all the main lines of communication.

The number of complaints received was 1,045, equivalent to 0·025 of the total number of messages, of which 542 were admitted. Of those admitted, 178 applied to non-delivery, 146 to delay, and 173 to mistakes. The number of messages that for various causes could not be delivered amounted to 13,899, equivalent to 0·308 of the total number received for transmission.

15. The total number of interruptions to communications amounted to 2,108, which is rather more than during the previous year, but the average and total duration of the interruptions was less.

The value of the remittances made by telegraphic money orders rose to Rs. 96,333.

The Inland press telegrams sent numbered 26,167, of the value of Rs. 96,521—a large increase over the previous year's figures. The Foreign press messages numbered 2,982, and the Indian share of the charges thereon amounted to Rs. 16,758.

16. No great novelty in the shape of electrical improvements was introduced during the year. Experiments were made with "dry" batteries and for the extension of the system of duplex and quadruplex telegraphy over long distances.

17. The employment of the telephone increased. At the end of the year 1891 there were 1,076 subscribers and 1,186 exchange connections to the Telephone Companies at Bombay, Calcutta, Karachi, Madras, Moulmein, and Rangoon. There were also 16 exchanges and 141 exchange connections under the control of the Telegraph Department.

18. The services of the officers of the Telegraph Department were utilised in the various military expeditions that took place during the year under review, and received the approval of the military authorities. Among the officers whose services were specially noticed may be mentioned Mr. R. C. Barker, C.I.E., in connexion with the Hazara expedition, and Mr. O. Burne in connexion with the field operations, Miranzai. The Director General of Telegraphs observes that much of the credit for the arrangements connected with these operations was due to Mr. Bignell, Chief Superintendent of the Punjab Division. On the North-East Frontier and in Upper Burma much excellent work was also done in the face of great difficulties due to physical and climatic causes. The Department had to lament the death in Manipur of Mr. W. B. Melville, Superintendent of the Assam Division, who was murdered by the Manipuris during the outbreak in March 1891.

19. The Administration Report was received from the Director General of Telegraphs on 5th September, or considerably earlier than on any previous occasion. It has been correctly and succinctly prepared, and furnishes a record of progress that does great credit to the Director General and to the officers of the Department subordinate to him. The report is usefully illustrated by means of a map.

ORDER.—Ordered, that a copy of this Review, and of the Report, be forwarded to the Secretary of State and to the Local Governments and Administrations noted on the margin, and to the Government of Ceylon for information.

The Governments of Madras, Bombay, Bengal, the North-Western Provinces and Oudh, and the Punjab.
The Chief Commissioners of the Central Provinces, Burma, Assam, and Coorg.
The Residents at Hyderabad and in Mysore.
The Agents to the Governor General in Central India, Rajputana, and Baluchistan.

Also that a copy of the Review be forwarded to the Director General of Telegraphs for information.

Also that a copy of the Review, and of the Report and Appendices A, B, and F, be forwarded to the Home Department of the Government of India for information, and the Review published in the Supplement to the *Gazette of India*.

F. L. O'CALLAGHAN,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

HOME DEPARTMENT.

ALLOTMENT OF GENTLEMEN APPOINTED TO THE INDIAN CIVIL SERVICE.

No. 1 Estbs.
468-505.

Extract from the Proceedings of the Government of India in the Home Department (Establishments),—under date Simla, the 21st October, 1892.

RESOLUTION.

THE undermentioned gentlemen have recently been appointed in England to the Indian Civil Service (Bengal Presidency) in the order specified below:

Mr. J. A. Norrie, North-Western Provinces and Oudh, Punjab, and Central Provinces.
" F. Littlewood ditto.
" T. W. Morris ditto.
" C. M. King ditto.
" J. C. Faunthorpe ditto.
" H. R. C. Dobbs ditto.
" Mohammad Yusuf, Burma.
" C. E. Crawford, North-Western Provinces and Oudh, Punjab, and Central Provinces.
" S. C. Mukerjee, Bengal, Lower Provinces.
" H. F. Samman ditto.
" C. A. Barron, North-Western Provinces and Oudh, Punjab, and Central Provinces.
" W. B. Thomson, Bengal, Lower Provinces.
" G. R. Dampier, North-Western Provinces and Oudh, Punjab, and Central Provinces.
" R. E. V. Arbuthnot, Burma.
" G. D. Madgavkar ditto.
" R. B. Hughes, Bengal, Lower Provinces.
" W. F. Grahame, Burma.
" A. E. English ditto.
" C. L. Dundas, North-Western Provinces and Oudh, Punjab, and Central Provinces.

Mr. J. H. Kerr, Bengal, Lower Provinces.
" J. R. Pearson, North-Western Provinces and Oudh, Punjab, and Central Provinces.
" E. A. Kendall ditto.
" C. P. Beachcroft, Bengal, Lower Provinces.
" J. T. Rankin ditto.
" A. B. Fforde, North-Western Provinces and Oudh, Punjab, and Central Provinces.
" W. F. Rice, Burma.
" A. B. Kettlewell, North-Western Provinces and Oudh, Punjab, and Central Provinces.
" A. M. Brigstocke ditto.
" J. A. Ezechiel, Bengal, Lower Provinces.
" R. Parry, Burma.
" E. R. K. Blenkinsop, North-Western Provinces and Oudh, Punjab, and Central Provinces.

2. The Governor General in Council has been pleased to attach the above mentioned gentlemen to the Province specified opposite each name as follows:—

Mr. S. C. Mukerjee	... ...	Bengal.
" H. F. Samman	... ...	
" W. B. Thomson	... ...	
" R. B. Hughes	... ...	
" J. H. Kerr	... ...	
" C. P. Beachcroft	... ...	
" J. T. Rankin	... ...	
" J. A. Ezechiel	... ...	Assam.
" J. A. Norrie	... ...	North-Western Provinces and Oudh.
" T. W. Morris	... ...	
" J. C. Faunthorpe	... ...	
" H. R. C. Dobbs	... ...	
" C. E. Crawford	... ...	
" G. R. Dampier	... ...	
" J. R. Pearson	... ...	
" E. A. Kendall	... ...	
" A. B. Fforde	... ...	
" F. Littlewood	... ...	Punjab.
" C. M. King	... ...	
" C. A. Barron	... ...	
" C. L. Dundas	... ...	
" A. B. Kettlewell	... ...	
" A. M. Brigstocke	... ...	Central Provinces.
" E. R. K. Blenkinsop	... ...	
" M. Yusuf	... ...	Burma.
" R. E. V. Arbuthnot	... ...	
" G. D. Madgavkar	... ...	
" W. F. Grahame	... ...	
" A. E. English	... ...	
" W. F. Rice	... ...	
" R. Parry	... ...	

3. The Governor General in Council is further pleased to direct that the gentlemen posted to the Lower Provinces of Bengal shall, on arrival at Calcutta, report themselves to the Chief Secretary to the Government of Bengal. Should any of them land in Bombay, they should enquire of the Secretary to the Government of Bombay whether any orders are awaiting them from the Government of Bengal. The officer posted to Assam should report his arrival by telegraph from the port of arrival to the Secretary to the Chief Commissioner of that Province at Shillong, by whom he will be instructed to which portion of the Province to proceed. The officers posted to Burma should proceed to Rangoon and report themselves to the Chief Secretary to the Chief Commissioner of that Province.

4. The officers posted to the North-Western Provinces and Oudh should report themselves to the Chief Secretary to the Government of the North-Western Provinces and Oudh, Allahabad. The officers posted to the Punjab should telegraph from Bombay to the Chief Secretary to the Government of the Punjab, Lahore, for orders as to their destination in the event of their not finding instructions awaiting their arrival at Bombay. The officers posted to the Central Provinces should report by telegraph from Bombay their arrival to the Secretary to the Chief Commissioner of those Provinces at Nagpur, by whom they will be instructed to which portion of the Province to proceed.

5. Local Governments and Administrations are requested to inform the Government of India of the date on which the gentlemen in question so report themselves. Should any officer attached to one of the Upper Provinces in India wish to exchange with an officer of his year attached to another of those Provinces, he is at liberty to do so; but he must report to the Government of India in the Home Department for previous sanction any arrangement of the kind he may be able to effect.

ORDER.—Ordered, that a copy of this Resolution be forwarded to the Governments of Bengal and the Punjab for information and guidance, with the intimation that Mr. C. M. King, who has been posted to the Punjab, has been permitted by the Secretary of State to proceed to Calcutta instead of to Bombay, the usual post of debarkation of Civil Servants posted to the Northern Provinces; that a copy be forwarded to the Government of the North-Western Provinces and Oudh and the Chief Commissioners of Burma, the Central Provinces, and Assam for information and guidance; and that it be published in the Supplement to the *Gazette of India*.

Ordered also, that a copy of this Resolution be forwarded to each of the gentlemen named therein.

[True Extract.]

P. G. MELITUS,

Offg. Deputy Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the week ending at 8 a.m. on Saturday, October 15th, 1892.

The most important feature in the weather during the week under review has been the appearance of the north-east monsoon rainfall on the Madras Coast. On the 9th and 10th October fine weather with only light scattered showers prevailed throughout the Indian region, but on the 11th rain commenced on the Orissa and Circars Coasts. At first this rainfall was very light, but on the 12th it became heavier, and extended southward as far as Madras. From this date until the close of the week, while the weather improved on the Circars Coasts, the rainfall steadily extended over the south-east, south, and west of the Peninsula, and was heavy at several southern stations. During the greater part of the week, though the oscillations of pressure were considerable, the general distribution altered very little, readings being high over the central parts of the country and Eastern Rajputana and low over the Bay. From the 9th until the 14th there was but little sign of that rapid recovery of pressure which ordinarily takes place at this season in North-West India, and which transforms this region into the area of highest pressure throughout the Indian region. On the 15th, however, this rise took place. The barometer rose as much as 0·164 inch at Peshawar and over 0·100 inch at Rawal Pindi and Dera Ismail Khan. The change to cold weather conditions was thus carried out. The wind throughout the week has been generally light and on the whole from the northward, but just before the commencement of the rainfall on the Madras Coast on the 11th the force of the wind rose at Cocanada, &c., and at the close of the week a strong easterly wind prevailed at Diamond Island. The mean temperature was normal in most parts of India, but in Madras there occurred a brisk fall after the rain set in, and the general temperature of that Province was lower than usual.

The chart of the 9th showed that the barometer was rising, except over the Peninsula. Pressure was generally very uniform, but readings were relatively high over the North-West Provinces and the central parts of the country, and relatively low over the Bay on the one side and over the Western desert on the other. Calms were numerous, and the winds were generally very variable in direction. In Lower Burma moderate showers were fairly general, but in other parts of the Indian region only a few scattered showers were reported, and the sky was almost everywhere nearly clear. On the morning of the 10th the most important change shown was the continued brisk rise of the barometer in the north-west. In consequence the area of highest pressure was shown along the foot of the North-West Himalayas, and pressure differences were slightly greater than on the preceding day. In other respects there was very little change in the general distribution. Northerly winds prevailed over the Bay and north-easterly winds over the central parts of the country and the West Coast. Elsewhere calms and variable breezes continued. A few scattered showers gave the only rainfall reported throughout the whole area of the chart, and the sky generally was almost clear of cloud. On the 11th the barometer was rising or steady, except in Madras and the North Konkan, where there was a slight fall. Readings were highest over Eastern Rajputana, and were relatively low over the Bay, off the Bombay Coast, and over the Punjab and Sind. The differences were, however, still small. The winds were little changed, except that on the West Coast the directions had become more variable, and on the Madras Coast the force was increasing. Rain in small amounts had fallen over the north-west of the Bay, and a few scattered showers were reported from other parts of India. On the 12th the barometer was rising, except over the Gangetic plain and the south of the Peninsula, but the changes were generally small. The only change in the general distribution of pressure was the appearance of high readings over the hills. The wind was northerly (north-east, north, and north-west) over Bengal and the Bay area and north-easterly over the Central

Provinces, but varied a good deal in direction elsewhere. The force remained fresh at some Madras Coast stations. Rain was falling along the coast from False Point southward to Madras, and there were a few showers in other parts of the country. The heaviest falls were at Masulipatam, Rajahmundry and Cocanada. On the 13th there was still no practical change in the distribution of pressure or the direction of the winds, but there has been a considerable extension of the rainfall area over the Peninsula. Rain now prevailed from Cocanada southward to Negapatam, across the south of the Peninsula, and northward along the West Coast as far as Karwar. The amounts were considerable over the Carnatic. On the 14th the barometer was falling almost everywhere. A well defined low pressure area existed over the Andaman Sea, and readings were also probably low over off the Madras Coast and off the Malabar Coast, while elsewhere readings were uniform and relatively high. Northerly to easterly winds prevailed generally, and the force was moderate, except at Diamond Island, where under the influence of the depression the force was rising. Rain was general all over the south of the Peninsula, the amounts being considerable in the south. On the 15th the barometer was rising generally, the change being rapid in the north-west. The most important alterations were the production of a high pressure area in the north-west and the passage westward of the depression which on the preceding day lay over the Andaman Sea. The winds were little changed, and rain continued general over the greater part of the Peninsula. The amounts were heaviest in the extreme south.

Temperature.—As a general rule the variations of the mean temperature from the average of the season in all parts of India have been small. The following table shows the variations of the mean temperature from the normal on each day of the week for the principal Provinces of India:

Province.	9th.	10th.	11th.	12th.	13th.	14th.	15th.	Mean variation of week.
Burma	−0·4	+0·1	+0·7	+1·9	+0·5	−1·1	−1·0	+0·1
Bengal and Assam	−2·0	−1·0	+0·1	+0·4	+0·6	+0·1	+0·5	−0·2
North-West Provinces and Oudh.	+0·3	0	+0·2	+1·2	+1·1	+0·7	−0·2	+0·5
Punjab	+1·2	+2·0	+0·5	+1·2	+0·7	+0·2	−0·6	+0·7
Bombay	0	0	+1·2	+0·7	+0·6	+1·1	0	+0·5
Central Provinces and Berar	+0·2	+0·5	+0·2	−0·2	+1·4	+1·3	+0·7	+0·6
Central India and Guzerat	−0·5	−0·3	−0·1	−0·4	−0·2	+0·6	+1·0	0
Sind and Rajputana	+0·8	+0·5	+0·7	+1·4	+1·6	+1·6	+0·5	+1·0
Madras	−2·0	−1·4	−0·2	+0·1	−0·9	−2·0	−1·6	−1·1
Mean for whole India	−0·3	0	+0·4	+0·7	+0·6	+0·3	−0·1	+0·2

The mean variation of the whole of India for the week was only +0·2°, and on most days of the week the difference of the average from the normal was less that ½°. The provincial variations show that over Madras there has been a mean diurnal deficiency of 1·1° for the week and in Sind and Rajputana a mean diurnal excess of 1·0°; but, with these exceptions, the variations for the week have been less than 1°.

Rain.—With the returns of the present week the rainfall returns of the monsoon season of 1892 come to a close, and it may be interesting to refer briefly to the general progress of the monsoon. The period commenced on May 29th, but previously to that date there had occurred an incursion of monsoon winds and a burst of what was undoubtedly monsoon rainfall over a large part of the country. The premature incursion of the monsoon was followed by a marked

withdrawal, and during June the rainfall, except in Madras and the centre of the Peninsula, was lighter than usual. On July 2nd only twelve out of fifty divisions into which India is divided had an excess of rain, and in nearly all the other divisions there was a deficiency, which in the north-west was large. During July, however, a considerable improvement occurred, and at the close of that month the greater part of the country had received a normal or excessive fall. In Sind and the Punjab the excess was very large, and in part of the Peninsula it was considerable. During August the rainfall continued heavy, except over Bengal, where a steady decrease in the amount of rain received set in. After the middle of September the rains finally ceased. The cessation was carried out more suddenly than usual, and, instead of the gradual retreat of the rains from North-West India eastward, rain ceased almost as completely and suddenly in North-East India as in North-West India. In consequence the deficiency was already appearing over North-East India even as early as the end of August, has been much intensified during the past three weeks, and over Eastern, Deltaic, and Central Bengal, as well as in Assam and parts of Burma, is now more or less considerable.

During the past week nearly the whole of Northern and Central India, including Assam, Bengal, Chota Nagpur, Behar, the North-West Provinces and Oudh, the Punjab (except the North-Western districts), Sind, Kathiawar, Guzerat, Rajputana (West), and Central India, have had either practically or actually no rain. Lower Burma has had light showers, but the total rainfall for the week is considerably in defect. Central Burma and Arakan obtained about half their normal amounts, Lower Burma about 20 per cent. of its normal, and Tenasserim practically none (*i.e.*, an average of less than a tenth of an inch).

The retreating south-west monsoon humid current in the Bay has given general moderate rain during the week to the Orissa and Madras Coast districts, which have hence received somewhat larger amounts than the normal fall of the week. The excess was small, except in Madras (South), which obtained an average of 2·84 inches, or 1·6 inches in excess of the normal. The West Coast districts have had light to moderate showers during the week, but the rainfall in that area as well as in the Deccan was below the normal by amounts varying from 10 to 50 per cent.

The three concluding columns of the table give comparative rainfall data for the fifty-two meteorological districts for the whole south-west monsoon period. The data show that the rainfall of the period was unusually favourably distributed, all districts, with the exception of Arakan, East, Deltaic, and Central Bengal, Orissa, and South Behar, receiving normal or excess rainfall. The deficiency averaged 29 per cent. in East Bengal, 26 per cent. in Deltaic Bengal, 22 per cent. in Central Bengal, 14 per cent. in Orissa, and 13 per cent. in South Behar and Arakan.

The average total rainfall of the period was practically normal in the following areas, in which the variation was less than 10 per cent:—Burma, North Behar, the North-West Provinces and Oudh, Kathiawar, Guzerat, Central Provinces, Coorg, Mysore, and Malabar. It was more or less considerably in excess in Madras (more especially the central districts), Rajputana, Sind, Khandeish, Berar, Bombay, Deccan, and the Punjab, including all those districts which have suffered from drought during the previous two years. The most remarkable feature of the monsoon has been the excessive fall in the North-West and Central Punjab, Sind, and West Rajputana. Thus Sind received an average of 8·65 or 4·33 inches, or 100 per cent. above its normal amount, and the West Punjab 12·63 or 7·01 inches, or 125 per cent. in excess.

The following gives the largest total amounts received during the week as reported in the rainfall telegrams of the week:

Division.	District.	Station.	Amount.
East Coast (South)	Trichinopoly	Musiri	9·37 inches.
Madras (South)	Madura	Melur	11·38 "
East Coast (North)	Godavari	Sivakodu	8·70 "
	Vizagapatam	Waltair	6·78 "
Madras (South Central)	Nilgiris	Kodanad	7·54 "
East Coast (South)	Tanjore	Arantangi	6·65 "
Do. (Central)	Nellore	Iskapally	6·65 "

PROVINCE.	DIVISION.	Rainfall data for week ending October 15th. Average actual rainfall of division.	Average normal rainfall of division.	Excess or defect in inches.	Rainfall data from May 29th to October 15th, 1892. Average actual rainfall of season to date.	Average normal rainfall since May 29th to October 15th.	Excess or defect of (seasonal) rainfall expressed as a percentage.

SIMLA, *20th October, 1892.*

JOHN ELIOT,
Meteorological Reporter to the Government of India.

J. W. P. MUIR-MACKENZIE,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 15th October.*—Rainfall good on the West Coast, Central, and all the East Coast districts, except Ganjam, Vizagapatam, and Tinnevelly, where it is moderate, as in the Deccan districts. Agricultural operations proceeding actively throughout, and prospects much improved in the Southern districts after recent rain. Harvest of early crops progressing; outturn fully average. Pasture and water-supply ample. Prices easier generally.

Bombay.—*For week ending 19th October.*—Report not received.

Bengal.—*For week ending 15th October.*—Rain during the week in Orissa and Chittagong, and also a few showers in South-West Bengal, Bankura, Singhbhum, and Manbhum; no rain elsewhere. Autumn crops being harvested with good outturn. Prospects of winter rice generally good, but in Midnapur, Hooghly, Burdwan, and parts of Behar more rain is wanted, both for this crop and for preparing land for the spring harvest. Prices stationary on the whole. Cattle in good condition. Fodder and water-supply abundant.

North-Western Provinces and Oudh.—*For week ending 19th October.*—The weather has been clear during the week. Rain is urgently needed for the rice crops, and generally for sowings which are going on. Harvesting of autumn crops in active progress. Prospects good. Prices are fairly steady.

Punjab.—*For week ending 19th October.*—Slight rain has fallen in the Rawalpindi and Peshawar districts. Harvesting of autumn crops in progress. Cotton picking commenced in most districts. Sowings of spring crops going on. More rain wanted in Shahpur. Condition and prospects of standing crops are reported good. Young locusts appeared in parts of four districts, and steps were taken for their destruction; they have also laid eggs in Hissar, but were destroyed. Maize and *jowar* crops in parts of Lahore blighted, and other crops have been damaged by insects. Condition of stock is generally good. Fodder sufficient throughout the Province. Prices rising in one, falling in three districts, and stationary elsewhere.

Central Provinces.—*For week ending 19th October.*—The weather has been cloudy during the latter part of the week. Rain required for rice crops in Raipur and Bilaspur and for winter sowings generally. Harvesting of autumn crops continues in places. Prospects favourable.

Burma.—*For week ending 15th October.*—LOWER BURMA: Transplanting finished. Crop prospects good everywhere, except in Thayetmyo, where rain is required. UPPER BURMA: Transplanting nearly finished. Hill paddy being reaped in Katha and Ruby Mines. Early wet-weather paddy being reaped in two districts. Cotton picking and reaping of sesamum completed. Late sesamum and peas being sown in some districts. Standing crops are good in nine districts, but more rain is wanted in parts of three districts. Great damage has been caused by floods to crops on low-lands and islands in Bhamo, Sagaing, Upper Chindwin, Lower Chindwin, Myingyan, and Pakokku, and some damage in eastern sub-division, Southern Shan States. The rice crop has totally failed

in Shwebo and the Wundwin sub-division of Meiktila, and other crops in imminent danger. Rain is badly wanted nearly all over Upper Burma. The price of paddy has decreased largely in three districts, increased largely in one; elsewhere fluctuations unimportant.

Assam.—*For week ending 18th October.*—Weather seasonable. Ploughing for mustard continues. Pulses being sown. Fodder and water sufficient. Condition of cattle normal.

Mysore and Coorg.—*For week ending 19th October.*—MYSORE: Rainfall good in the Mysore district; slight in other parts. Crops and prospects good. No change in prices.

COORG: Rainfall 4 inches 24 cents. Standing crops in good condition. Reaping of *Eleusine coracana* nearly completed. Picking of cardamom in progress. Prices stationary. Fodder and water-supply sufficient.

Berar and Hyderabad.—*For week ending 19th October.*—BERAR: Slight rain. Weather cold and cloudy. Cotton in flower and pods. *Jowari* in ear. Autumn crops improving. Weeding in progress. Cattle healthy. Fodder sufficient. Water deficient for cattle in parts of Dariapur taluka. Preparation of land for winter crops continues. Prices almost stationary.

HYDERABAD: Moderate rain during the week. Harvesting of autumn crops in progress. Irrigated crops in good condition. Land being prepared for sowing of spring crops. Prices steady.

Central India.—*For week ending 19th October.*—Some rain in West Malwa. Condition of crops, fodder, and agricultural stock continue to be generally good. The autumn harvest has been damaged in some places, but is generally fair. Prices steady. Weather warm, but favourable for agricultural operations.

Rajputana.—*For week ending 19th October.*—Rain in Ulwar and Abu. Reaping of autumn crops and ploughing and sowing for the spring harvest continue. Crops partially damaged in Kerowlee. Agricultural prospects generally good. Cattle generally in good condition. Pasturage plentiful throughout. Prices steady in eight States, falling in one, and fluctuating elsewhere. Relief works closed in Merwara. Gratuitous relief in Ajmere 44; Merwara *nil.*

Nepal.—*For week ending 13th October.*—Days warm; nights chilly. Harvesting of rice in progress.

J. W. P. MUIR-MACKENZIE,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Circular No. 32-F.

Extract from the Proceedings of the Government of India in the Revenue and Agricultural Department (Forests),—dated Simla, the 7th October, 1892.

Read the following despatch from Her Majesty's Secretary of State forwarding copies of the Regulations for 1893 of the Forest Service Branch in Cooper's Hill College :

No. 64 (Revenue), dated London, 4th August 1892.

From—The Secretary of State for India,
To—The Government of India.

I forward herewith, for the information of Your Excellency's Government, 10 copies of the Prospectus of the Indian Forest Service for 1893.

REGULATIONS

FOR THE

FOREST SERVICE BRANCH

OF THE

ROYAL INDIAN ENGINEERING COLLEGE, COOPER'S HILL.

[Post Town, Staines; Railway Station, Egham ; Telegraph Station, Englefield Green.]

STAFF OF THE COLLEGE.*

President, General Sir ALEXANDER TAYLOR, G.C.B., R.E.
Secretary, Lieutenant-Colonel W. J. BOYES.
Bursar, J. P. PASCO, Esq., R.N., Retired.
Chaplain, Rev. C. CROSLEGH, D.D.

Engineering Branch.

Assistant Professor of Engineering, A. H. HEATH, Esq., Assoc. Mem. Inst. C.E.
Professor of Surveying, Major-General E. H. COURTNEY, R.E.
Instructor in Geometrical Drawing, [Vacant].
Lecturer in Accounts, J. C. HURST, Esq.
Instructor in Freehand Drawing, RUSSELL DOWSON, Esq.

Mathematical Branch.

Professor of Applied Mathematics, G. M. MINCHIN, Esq., M.A.
Professor of Pure Mathematics, A. LODGE FEREDAY, Esq., M.A., Fellow of St. John's College, Oxon.

Natural Science Branch.

Professor of Chemistry, HERBERT MCLEOD, Esq., F.R.S.
Professor of Physics, W. N. STOCKER, Esq., M.A., Fellow of Brasenose College, Oxon.
Lecturer in Geology and Mineralogy, Professor H. G. SEELEY, F.R.S.

Forestry Branch.

Principal Professor of Forestry, W. SCHLICH, Esq., Ph.D., C.I.E., late Inspector-General of Forests to the Government of India.
Assistant Professor of Forestry, W. R. FISHER, Esq., B.A., late Conservator of Forests, Northern India.

* The staff of the College is only given in so far as it concerns the Forest Service Branch.

Professor of Botany, H. MARSHALL WARD, Esq., M.A., S.D., F.R.S., F.L.S., Fellow of Christ's College, Cambridge.

Lecturer on Entomology, W. F. H. BLANDFORD, Esq., M.A., Fellow of Christ's College, Cambridge.

Lecturer on Chemistry of Soils and Vegetation, A. H. CHURCH, Esq., M.A., F.R.S.

Instructor in German, T. H. DITTEL, Esq.

Lecturer on Forest Law, B. H. BADEN POWELL, Esq., C.I.E., late of the Indian Civil Service.

Director of Practical Study in Forestry on the Continent, Sir DIETRICH BRANDIS, K.C.I.E., Ph.D., F.R.S., late Inspector-General of Forests to the Government of India.*

[*The arrangements hereinafter described are subject to revision under the orders of the Secretary of State for India.*]

1. The Royal Indian Engineering College is primarily maintained, under the orders of the Secretary of State for India in Council, for the education of candidates for the service of Government in the India Public Works, Telegraph, and Forest Departments; but it is open, to the extent of the accommodation available, to all persons desirous of following the course of study pursued in it.

INDIA FOREST DEPARTMENT APPOINTMENTS.

2. The examination usually takes place in June of each year.

3. The number of candidates to be selected annually varies according to the requirements of the Forest Service in India. The figures as regards each particular year will be advertised from time to time. *In 1893 there will be 9 appointments offered for competition.*

4. Candidates for the Indian Forest Department are selected under the following arrangements :

(*a*) An applicant must be a natural-born British subject, and must be above 17 and under 20 years of age on the 1st June of the year in which he competes for an appointment. He must be unmarried, and if he marries before reaching India he will forfeit his appointment.

(*b*) An applicant must send† to the Revenue Department of the India Office on or before the 1st day of May of the year in which he proposes to compete—

(1) His name and parentage, a certificate or other satisfactory evidence of the date of his birth, and the written consent of parent or guardian that his name should be recorded as a candidate.

(2) A statement of the places of education at which he may have been, accompanied by testimonials of good conduct, during the last four years.

(*c*) Applicants will have to appear before a Medical Board‡ at the India Office, particular stress being laid upon good vision and hearing. A physical test will also be imposed so as to ensure the selection of persons of active habits and powers of endurance.

(*d*) The applicants who have successfully passed the medical examination and the physical test will be required to undergo an examination before the Civil

* Sir D. Brandis is not on the staff of the College.

† There is no form of application. The documents specified in clauses (1) and (2) should be enclosed in a covering letter addressed to the Secretary, Revenue Department, India Office, London.

‡ With a view to prevent parents and guardians from incurring the inconvenience and expense of preparing candidates who may be physically unfit for the Forest Service, it is suggested that, before any such preparation is begun, candidates be submitted to examination by the medical adviser of the family, or any other qualified medical practitioner, with regard to the following points :—

(1) A weak constitution.
(2) Defective vision.
(3) Impaired hearing.
(4) The existence of any congenital defect.

It is to be understood that this private examination is merely suggested to lessen the chances of disappointment, and that it is by no means intended to take the place of, or to influence in any way, the official examination.

On the subject of the standard of eyesight required for the Indian services, a pamphlet has been published, under the authority of the Secretary of State in Council, by Messrs. Churchill and Sons, 11, New Burlington Street.

Service Commissioners* in the following subjects (Classes I to III), marks being assigned as follows:

CLASS I.—OBLIGATORY SUBJECTS.†

	Marks.	
1. Mathematics (lower), *viz.*, Algebra up to and including the Binomial Theorem; the theory and the use of logarithms; Euclid, Books I to IV and VI; Plane Trigonometry up to and including the Solution of Triangles and Mensuration	2,500	In each of these subjects a candidate must obtain not less than one-third of full marks in order to qualify.
2. English Composition	1,000	
3. German (400 for colloquial)	2,000	

CLASS II.—OPTIONAL SUBJECTS.†

4. Mathematics (higher), including Analytical Geometry, Conic Sections, Statics, and Dynamics ..	2,000	A candidate may take any two, but not more than two, of the optional subjects. Under "Optional Subjects" Nos. 9, 10, 11, and 12, the examination will be partly practical.
5. French (400 for colloquial)	2,000	
6. Latin	2,000	
7. Greek	2,000	
8. English History. There will be set one general paper; one paper limited to a fixed period, which will be from the year 1702 to the year 1760 for the examination of 1893	2,000	
9. Botany, *viz.*, the elementary parts of Vegetable Morphology, Histology, and Physiology, and the principles of a natural system of classification as illustrated by the more important British natural orders. Candidates will be required to describe plants in technical language. Questions will not be set on Vegetable Palæontology or on the geographical distribution of plants	2,000	
10. Chemistry, *viz.*, the Elements of Inorganic Chemistry ...	2,000	
11. Physics: Elementary properties of Electricity, Magnetism, Heat, Light, and Sound	2,000	
12. Physical Geography and Geology, chiefly Economic; including the recognition of the more familiar minerals and rocks, and their properties and uses ...	2,000	

CLASS III.—ADDITIONAL SUBJECTS.

13. Freehand Drawing	500	Either or both of these subjects may be taken in addition to the obligatory and the two optional subjects.
14. Geometrical Drawing	300	

(*e*) From the competitors who attain the above-mentioned minima of marks in obligatory subjects and satisfy the requisite conditions in other respects, the Secretary of State will select candidates in order of merit as probationers to enter the College, where they will be further trained for the Forest Service of India.

(*f*) If the full number of competent probationers required in any year cannot be obtained from the persons so examined, the Secretary of State reserves a discretion to fill up the deficiency by selecting any other person or persons who may satisfy the authorities of the College that he or they are properly qualified to become probationers for the Forest Service.

5. The course of study for candidates for the India Forest Service extends over about three years, divided into nine terms. During eight terms the candidates will prosecute their studies at the College, and during the remaining term they will visit, under suitable supervision, such British or Continental forests as may be selected for the purpose. Excursions will also be made for purposes of instruction, both during term time and during part of the vacations. The cost of all such tours or excursions is borne by the Secretary of State (see paragraph 9).

6. Each annual session begins in September, and is divided into three terms, with vacations of about four weeks at Christmas, two weeks at Easter, and eight weeks in the summer.

7. A charge of 61*l.* for each of the first eight terms and 60*l.* for the ninth term is made for each student. The amount must be paid terminally in advance to the Bank of England. Receivable orders, with full directions as to the mode of payment, will be forwarded from the India Office to the parents or guardians shortly before the fees fall due. A student will not be allowed to come into residence until his fee has been paid.

8. A deposit of 5*l.* is required to be paid by each student on admission to the College as caution money to cover charges incurred by him for damage to books, instruments, &c., or any College bills outstanding on leaving the College. Any balance over and above

* A fee of 4*l.* is required, which can be paid by means of a stamp of that amount. Instructions on this point will be issued to candidates the day before the examination.

† Attention is invited to the appended Syllabus giving further details regarding the extent and character of the examination.

such charges will be repaid. This deposit is to be paid with the fee for the first term, making the total payment on that occasion 66*l.*

9. The foregoing payments cover all charges for tuition, board according to the College tariff, lodging with washing, and ordinary medical attendance while in residence at the College. When students are on tour and during the course of practical instruction, whether in Great Britain or on the Continent, the Secretary of State will defray the expenses of (1) board, lodging, and washing (the maximum expenditure on such account being 10*s.* per diem); (2) travelling expenses; and (3) fees to local Forest officers, &c.

Students are required to provide their own class books and drawing instruments. Drawing paper, drawing boards, and surveying instruments are provided by the College.

10. The prescribed course of study at present comprises the following subjects:

I.—*Auxiliary Subjects.*

1. Geometrical Drawing.
2. Freehand Drawing.
3. Surveying.
4. Forest Engineering.
5. Accounts.
6. German.
7. Mechanics.
8. Physics.
9. Chemistry.
10. Geology and Mineralogy.
11. Entomology.
12. Botany.
13. Drill and Gymnastics.

II.—*Forestry, Theoretical and Practical, in all its branches.*

11. Every student is required to conform to the College rules, to exhibit due diligence in his studies throughout the course, and to give evidence of satisfactory progress in such manner as may be required, failing which, or in the event of serious misconduct, he will be liable to be removed from the College, or to be sent back from the forest tour, which may entail the loss of his appointment.

12. During the course of study, the proficiency of the students will be tested by periodical examinations, and on the termination of their studies there will be a final examination. Each student may also, at the discretion of the Secretary of State for India, be required to appear before the Medical Board at the expiration of the first year of residence at the College, and, should the result be unsatisfactory, he cannot claim to be allowed to complete the course.

13. The subjects enumerated in paragraph 10 are grouped in certain main branches of study,* and a fixed minimum of qualification is required in each branch and in the subjects taught during the forest tours, as well as a certain minimum for all branches taken together. Students who obtain these minima will receive the College diploma in Forestry.

14. Candidates who have obtained this diploma and are found to be of sound constitution and free from physical defects which would render them unsuitable for employment in the Forest Department (the final decision on which points will rest with the Secretary of State for India) will be appointed Assistant Conservators in the Forest Department of India in the order of their standing at the end of the final examination. They will be allowed before leaving the College to choose the provinces in which they desire to be first employed according to the order in which they pass out of the College. But this choice can only be exercised according to the available vacancies in the different provinces, and on the understanding that officers are at all times liable to be transferred from one province to another at the pleasure of the Government of India.

15. Within a month of his nomination as Assistant Conservator, each nominee must sign articles of agreement describing the terms and conditions of his appointment; he must embark for India when required to do so by the Secretary of State, and will be provided with a free passage. Failure to embark at the stated time will, in the absence of satisfactory explanation, lead to forfeiture of appointment.

16. The pay of an Assistant Conservator of Forests will begin from the date of arrival in India. Probationers who acquit themselves creditably during their course at Cooper's Hill College will begin on a salary of Rs. 350 a month. It will, however, rest with the President of the College, in consultation with the Principal Professor of Forestry, to decide whether any of the probationers, though they have obtained the College diploma in Forestry, have failed to deserve that rate of initial salary. Such probationers, if any, will begin on a salary of Rs. 250 a month; and this difference of salary will continue until the first departmental examination is passed in India.

17. Promotion, leave, and pension will be regulated by the rules of the Service for the time being. A copy of the Regulations relative to these matters can be seen on application either at the Library or the Record Department of the India Office. The

* For details, see Royal Indian Engineering College Calendar.

principal rules, however, are contained in the Abstract of the Civil Service Regulations, as given in the "India Office List" or the "India List," published respectively by Messrs. Harrison and Sons, 59, Pall Mall, and Messrs. W. H. Allen & Co., 13, Waterloo Place, S. W., either of which can be procured through any bookseller.

18. Every candidate before proceeding to India will be required to furnish to the President of the College satisfactory evidence of his competency in riding.

General Rules.

19. Chemical, physical, and botanical laboratories, a forestry museum, a forest nursery, a library and gymnasium are attached to the College. Means are also provided for the practice of photography. Students making use of the laboratories are supplied with the needful apparatus.

20. The responsibility for the discipline and management of the College and for the superintendence of the studies is vested in the President under the control of the Secretary of State for India.

21. The students are distributed in divisions under personal charge of one of the Professors or Instructors selected by the President; such tutor being responsible for exercising the proper degree of personal supervision over each student in his division, and for conducting necessary correspondence with the student's parents or guardians.

22. Each student residing in the College is provided with a separate room, and with fuel and light, also with the necessary attendance. Furniture and bedding are supplied by the College, but students are required to provide their own towels and bed linen. Meals are taken in hall. Wine and beer are not included in the ordinary fare, but can be obtained from the College cellar at fixed prices.

23. A chapel is attached to the College which the students residing in the College are expected to attend, unless specially exempted.

24. Every student will be required to go through a course of gymnastics and also of military exercises, including the use of the rifle.

25. Students are required to wear academical dress under such regulations as may be prescribed from time to time.

Students not nominated for the Indian Forest Service, but desirous of obtaining a Diploma in Forestry from Cooper's Hill College.

26. Students not nominated for the Indian Forest Service may be received into the College as far as the available accommodation permits. Such students may pass through the course of instruction prescribed for the nominees of the Indian Forest Service as detailed above, or they may be permitted to participate in the instruction given in certain subjects only. On attaining the prescribed minima of marks in the several branches of study and in totals as laid down above, they will receive, as the case may require, either the College diploma in Forestry or special certificates showing in what subjects they have followed the instruction, and with what result.

27. Candidates who desire to be admitted under paragraph 26 may submit the necessary application at any time, but not later than the 15th day of June of the year named for admission, except with the special permission of the President. The application must be made on the prescribed forms, which can be obtained from the Secretary of the College.

28. Candidates whose applications are found satisfactory as to character and in other respects will be required to undergo an examination, to be held at the College, about the last week in June of the year for admission. The object of the examination will be to ascertain whether the candidate is qualified to follow the course of instruction with advantage (or certain parts of it, as the case may be). Candidates who do not come up to the required standard will not be admitted to the College.

The President may dispense with the whole or any portion of this examination in the case of a candidate who produces an University diploma or other similar certificate granted by a recognized examining body.

29. Candidates admitted to the College under paragraph 26, who propose to pass through the full prescribed course of study, will be required to pay the same fees in every respect as those paid by the nominees for the Indian Forest Service. Candidates who do not become resident, and are admitted only to certain subjects of study, will be required to pay the fees which may be fixed in each special case in consideration of the extent of their studies. The candidates of both classes will be required to abide by the general rules of the College.

India Office,

June 1892.

FOREST EXAMINATION.

Syllabus showing the extent and character of the Forest Examination.

In a letter addressed to the Civil Service Commissioners on the subject of the examinations for admission into the Royal Military Academy, Woolwich, and the Royal Military College Sandhurst, the Director-General of Military Education observes:—"The main object to be borne in mind with reference to the Entrance Examination is to secure a youth who has had a thoroughly well-grounded liberal education as an English gentleman. Any curriculum which renders those who are unsuccessful unfit for other professions is greatly to be deprecated." The Regulations for the Forest Examination, which follow the lines of the Sandhurst Examination, are intended to provide a test that the candidates have received such an education as is indicated in these words. By these Regulations certain of the subjects specified are prescribed as obligatory for all competitors, while in the choice of the subjects described as optional allowance is made for varieties of taste and inclination in each candidate. In view of the influence which the Regulations must necessarily exercise on the education of candidates for admission to the public service, the Civil Service Commissioners deem it expedient to specify with more fullness than in the Regulations themselves the character of the examination which the candidates will be called upon to undertake.

Class I.

(Obligatory Subjects).

Mathematics.—The extent of the examination will be as defined in the Regulations.

English Composition.—An Essay to be written on one of several subjects specified by the Civil Service Commissioners on their examination paper.

German.—There will be translations of unseen passages from German into English and from English into German; the knowledge of pronunciation will be tested by dictation and the *vivâ voce* examination. The passages for translation will be taken mainly from standard authors (Schiller, Lessing, Alexander v. Humboldt, Ranke, &c.), and a few simple questions may be asked on the passages set, as to the structure and character of the language, and allusions of obvious and general interest.

Class II.

(Optional Subjects.)

Higher Mathematics.—The extent of the examination will be as defined in the Regulations.

Latin.—Passages will be set for translation into English selected from the authors usually read in schools. Passages from English authors will be given for translation into Latin prose and verse, but candidates will be allowed in the place of verse composition to answer questions of a simple character which will test whether they possess a fundamental knowledge of the grammar of the language and such an elementary acquaintance with Roman History as is required for the intelligent study of the books they have read.

Greek.—Passages will be set for translation into English from the authors usually read in schools, and in other respects the examination will proceed on the same lines as in Latin.

French.—The passages for translation will be taken from standard authors (Corneille, Madame de Sévigné, Guizot, Taine, &c.), and in other respects the examination will proceed on the same lines as in German.

English History.—The general paper in this subject will test whether the candidates are accurately acquainted with the facts of English History, and also possess an intelligent knowledge of the meaning of the facts. The paper on the fixed period will, of course, require from the candidates more minute knowledge than the general paper.

Botany, Chemistry, Physics, Physical Geography, and Geology.—The standard of examination in these subjects will be such as may be reasonably expected from the education given at schools possessing appliances for practical instruction, such as a Laboratory, &c. A considerable portion of the marks will be allotted for the proficiency shown in the practical part of the examination.

GENERAL.

Handwriting.—In estimating the papers of candidates, a limited number of marks, namely 100 out of the maximum allotted to each subject, is held to be assignable for handwriting.

ORDER.—Ordered, that a copy be forwarded for information to the Governments of Madras and Bombay, the Local Governments and Administrations noted in the margin, the Inspector-General of Forests, and the Comptroller and Auditor General.

Bengal.	Assam.
North-Western Provinces and Oudh.	Coorg.
Punjab.	Ajmere.
Central Provinces.	Andamans.
Burma.	Hyderabad.

Ordered also, that a copy be forwarded to the Foreign Department for communication to the Agent to the Governor General in Baluchistan, and that these papers be published in the Supplement to the *Gazette of India*.

[True Extract.]

E. D. MACLAGAN,

Offg. Under-Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the week ending at 8 a.m. on Saturday, October 22nd, 1892.

With the report of the present week a new rainfall period commences. The period runs from October 16th to December 31st, and the principal rainfall of the period occurs over the Bay area, including Lower Burma, Lower Bengal, and the east and south of the Peninsula. The rainfall of this region during the period quoted is ordinarily attributable to two causes: the first is the recurving of the south-west monsoon current over the Bay by which most of the rainfall is directed to the Carnatic Coast; the second is the appearance and advance of cyclonic storms over the Bay. The rainfall attributable to the latter cause is more widely spread, and more irregular than that attributable to the former, as it depends on the course and intensity of the various storms.

During the week under review two storms have crossed the Bay and the Peninsula. The first appeared over the Andaman Sea at the close of the previous week, and struck the Madras Coast on the 17th; the second appeared over the Andaman Sea on the 18th, and struck the Madras Coast on the 20th. The former was slight, but gave heavy rain to Madras: the latter was more severe, and gave both heavy rain and strong winds to the east of the Peninsula. Both appear in a modified form to have crossed the Peninsula, and the rainfall due to them was widely distributed throughout Southern and Central India. In Northern India the weather has been steadily fine.

The chart of the 16th showed a brisk to moderate fall of the barometer over the Peninsula and a rise elsewhere. Pressure was highest over Northern India and lowest over the west of the Bay, where a shallow depression existed. The winds in Madras formed part of a cyclonic circulation around this depression, but elsewhere they were variable and light. Rain was falling on the Circars Coast, and in the south-west, south, and centre of the Peninsula, but the weather was fine elsewhere. On the 17th the shallow depression which on the previous day lay over the west of the Bay crossed the Madras Coast, and the barometer fell briskly over the Peninsula. The winds over the Peninsula and the Bay showed an irregular cyclonic circulation, but all over Northern India, where pressure was high and rising, the wind was north-easterly or calms prevailed. A fresh and brisk barometric fall had occurred at Tavoy pointing to the advance of the second depression. Rain was reported from the east and south of the Peninsula, the amounts on the Circars Coast being very and on the Malabar Coast moderately heavy. The depression which occasioned the brisk barometric fall at Tavoy on the 17th had reached the Andaman Sea on the 18th, where it was developing, while a well marked low pressure area was shown off the West Coast of the Peninsula. Two well defined cyclonic circulations existed—one covering the south and west of the Peninsula and the neighbouring portions of the Arabian Sea; the latter the Bay area; while in Northern India calms continued to predominate. More or less heavy rain was falling all over the Peninsula, and showers were extending to the Central Provinces. On the 19th the depression on the West Coast was moving away north-westward, while that over the Bay was advancing westward. Consequently, while the barometer was falling in Madras, it was rising more or less briskly elsewhere. In Northern India calms and variable breezes prevailed, while elsewhere cyclonic circulations existed under the influence of the two storms. Rain had ceased a good deal over the east of the Peninsula, but continued general in the west as well as over the Central Provinces, Guzerat, &c. The chart of the 20th showed that the depression which had been crossing the Bay had struck the Madras Coast near Masulipatam. The storm was small, but of considerable

intensity, and a strong cyclonic circulation of the winds prevailed around it. The storm had occasioned a general fall of the barometer, except over the Eastern Peninsula, where a recovery was in progress. Heavy rain had fallen at Masulipatam and moderate rain to the north of the storm, but in other parts of Southern and Central India only scattered showers were reported, and in Northern India there was no rain. On the 21st the depression was crossing the Peninsula and the barometer was falling, except on the Madras Coast. The winds over a large part of the Indian region were more or less connected with the storm, and circulated cyclonically around it. Rain was falling all over the Peninsula, Burma, and Lower Bengal, and showers were reported from some central stations. Elsewhere the weather was fine. On the 22nd the storm had largely disappeared, though there still existed a slight residual depression over the Deccan. The barometer was, however, still falling generally, and pressure was very low for the season. The winds were variable. There was no rain over North-Western and Central India, but elsewhere rain was more or less general, and on parts of the West Coast and in Arakan was heavy.

Temperature.—The following table shows the variations of the mean temperature from the normal on each day of the week for the principal provinces of India:

Province.	16th.	17th.	18th.	19th.	20th.	21st.	22nd.	Mean variation of week.
Burma	—0·8	—0·1	+1·1	+0·2	+0·4	—1·0	—2·0	—0·3
Bengal and Assam	+0·8	+0·7	+0·8	+0·7	+0·5	—0·4	0	+0·4
North-West Provinces and Oudh	—1·4	—1·5	—1·9	—0·9	—0·5	—1·3	—1·8	—1·3
Punjab	—1·9	—2·8	—3·3	—3·6	—2·7	—2·0	—2·5	—2·7
Bombay	+0·3	+0·2	—0·5	—0·5	+0·4	—0·2	—0·6	—0·1
Central Provinces and Berar	—0·3	+0·1	+1·5	+1·9	+2·3	+2·0	+2·4	+1·4
Central India and Guzerat	—0·4	—1·8	+0·7	—0·3	—2·5	+0·7	+0·7	—0·4
Sind and Rajputana	—1·2	—1·8	—2·4	—1·4	—0·4	—2·3	—1·5	—1·6
Madras	—0·5	—1·7	—1·9	—0·2	0	—0·9	+0·2	—0·7
Mean for whole India	—0·6	—1·0	—0·7	—0·5	—0·3	—0·6	—0·6	—0·6

In most provinces the variations were small and regular. In Bengal, Assam, the Central Provinces, and Berar the variations showed a slight excess of temperature for the week, but all the other provinces showed a deficiency, which was greatest in the Punjab, Sind, and Rajputana.

Rain.—The rainfall table at the close of the summary shows that there has been no rain over Chota Nagpur, Behar, the North-West Provinces, the Punjab, Sind, and Rajputana (West), and practically none in the east of the Central Provinces. In all the other divisions there has been more or less rain, the average rainfall of the divisions ranging from 8·19 inches in Malabar to 0·14 inch in Rajputana (East) and Central India (West). Under normal conditions rain is expected in all divisions during the week under review, the normal average rainfall ranging from 2·82 inches in Malabar to 0·02 inch in the Punjab (West). The relative actual distribution of rainfall hence agreed fairly well with the normal, but the contrast was greater than usual; the rainfall in Malabar being considerably greater than the normal, while that in North-

Western and Central India was less than the normal. The third column of the table shows that in thirty-three of the rainfall divisions the rainfall was lighter than usual, and in seventeen it was heavier than usual. The greatest excess was 5·37 inches in Malabar, followed by 3·32 inches in the East Coast (North), by 3·15 inches in Hyderabad (South), by 2·97 inches in Arakan, and by 2·42 inches in the Bombay Deccan. The greatest deficiency was 1·23 inches in Tenasserim, followed by 1·16 inch in the East Coast (South).

As the week under review is the first week of a new rainfall period, the information contained in the three concluding columns of the table merely gives in another form the information contained in the three first columns.

They show that compared with the normal there has been a very large excess of rain in Guzerat, Kathiawar, the greater part of the Peninsula, and around the north of the Bay, and a deficiency elsewhere. The variations are everywhere large—a result due to the very abnormal conditions of weather which have prevailed over the country during the week.

The following gives the largest total amounts received during the week as reported in the rainfall telegrams of the week:

Division.	District.	Station.	Amount.
Arakan	Akyab	Sudder	11·24 inches.
Assam	Cachar	Silchar	5·80 „
Bengal (Deltaic)	Howrah	Sudder	4·52 „
Orissa	Balasore	Ditto	3·39 „
Malabar	Travancore	Quilon	20·20 „
Konkan	North Kanara	Ankola	10·59 „
Deccan	Dharwar	Navalgund	9·07 „
Guzerat	Surat	Jalalpur	3·20 „
Kathiawar	Cutch	Sudder	2·14 „
East Coast	Godavari	Prattipedu	17·11 „
	Kistna	Sudder	10·05 „

SIMLA, *27th October, 1892.*

W. L. DALLAS,
Asst. Meteorological Reporter to the Government of India.

J. W. P. MUIR-MACKENZIE,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 22nd October.*—Rainfall heavy in the Circars, parts of the Deccan, in Nellore, and on the West Coast; moderate elsewhere. Cultivation and sowings progressing. Up to September dry sowings 20 and wet 17 per cent. above average for period. Crops generally thriving, though slightly damaged in parts by excessive rain. Harvest of early crops continues favourable. Pasture and water-supply ample. Cattle in good condition. Prices of principal food-grains cheaper in the Central districts; slightly easier in the Circars, Karnatic, and on the West Coast; stationary elsewhere. General prospects favourable.

Bombay.—*For week ending 26th October.*—Rain general throughout the Presidency Proper, except in Panch Mahals; heavy in parts of Deccan and Karnatak. Standing crops damaged by excessive rain in parts of five districts and by locusts in parts of Sind; otherwise good. Harvesting of early and sowing of late crops progressing generally, but retarded owing to excessive rain in parts of three districts. Fodder sufficient. Agricultural stock good.

Bengal.—*For week ending 22nd October.*—Fairly general rain has fallen in Orissa, East Bengal, and the Sonthal Parganas in South-West Bengal. The 24-Parganas and Hooghly received moderate rain; the other districts comparatively little. There was also slight rain in North Bengal. Where received, this rain has benefited the winter rice and facilitated the preparation of land for the spring and cold weather crops. Want of rain is causing anxiety in Behar, except Purneah, and in the greater part of the Burdwan division, and the winter rice in those tracts will suffer severely and spring sowings be retarded unless an early fall is received. Rain deficient also in Chota Nagpur. Prices generally stationary with a slight tendency to rise in four districts. Condition of cattle good and supply of fodder and water sufficient.

North-Western Provinces and Oudh.—*For week ending 26th October.*—Weather clear. Rain much needed for late-rice crops. Sowings for spring crops in progress, but retarded owing to failure of the rains. Irrigation in progress. Harvesting of autumn crops continues. Prospects generally good. Prices steady.

Punjab.—*For week ending 26th October.*—Rainfall *nil.* Harvesting of autumn crops going on; it has been completed in one district. Sowings of spring crops in progress. More rain is wanted at Shahpur. Condition of standing crops is generally good; only an average outturn is expected in Lahore and Shahpur. Locusts appeared in parts of Hissar. Most of the young locusts in parts of Ferozepore have been destroyed. In parts of Lahore the sugarcane crop has been damaged by insects and maize and *jowar* by blight. Condition of cattle is generally good. Fodder sufficient in all districts. Prices stationary.

Central Provinces.—*For week ending 26th October.*—Rainfall over 2 inches in two districts; slight elsewhere. The rain has been very beneficial for *jowar* and cotton and for winter sowings. Rain much wanted for rice crops in Bilaspur. Prospects continue favourable. Prices falling in one district.

Burma.—*For week ending 22nd October.*—LOWER BURMA: Crop prospects good everywhere, except in Thayetmyo, where rain is required. UPPER BURMA: This week's reports are more favourable. Standing crops as a rule are in good condition, and the damage from floods not so great as was anticipated. In Shwebo, however, crops may be said to have practically failed, as also in Wundwin and some circles of Meiktila and Pindale. Prospects in a small area in Myingyan are bad. More rain is required for paddy in four districts. The price of paddy has declined in four districts and risen in three others.

Assam.—*For week ending 25th October.*—Weather seasonable. General prospects of crops good. Ploughing for mustard continues. Condition of cattle normal. Fodder sufficient.

Mysore and Coorg.—*For week ending 26th October.*—MYSORE: Rainfall general and good. Standing crops in good condition. Prospects favourable, except in parts of two districts, where more rain is wanted. Prices slightly fallen in one district.

COORG: Rainfall moderate. Rice and coffee crops in good condition. *Eleusine coracana* reaped and stacked. Cardamom picking continues. Prices of food-grains stationary. Fodder and water sufficient for cattle.

Berar and Hyderabad.—*For week ending 26th October.*—BERAR: Average rainfall moderate. Weather cool and cloudy. Autumn crop improving. Weeding in progress. Cotton in pod, *jowar* in ear, and sesamum in flower. In Akola picking of cotton commenced. Sowing of spring crops continues. Water and fodder abundant. Cattle healthy. Prices generally steady.

HYDERABAD: Rain during the week 3 inches. Harvesting of autumn crops continues. Owing to the excessive rainfall the crops have suffered much in some places. Irrigated crops are in good condition. Sowing of spring crops commenced. Prices steady.

Central India.—*For week ending 26th October.*—Weather cloudy. Some rain in Bhopal and Bhopawar. Sowing for spring crops in progress. Harvesting of autumn crops nearly completed in Bhopawar. Outturn of the autumn harvest in Gwalior expected to be below average, but condition of crops, fodder, and agricultural stock continues generally good. Prices high in Bhopal and Western Malwa; steady elsewhere.

Rajputana.—*For week ending 26th October.*—Rain over 1 inch in Harowti; slight in Abu. Reaping of autumn crops and sowing of spring crops in progress. Harvest prospects generally good. Locusts have appeared in some villages of Bikanir, but have not done much injury. Agricultural stock in good condition and pasturage plentiful. Prices steady in nine States, falling in two others, and fluctuating elsewhere.

Nepal.—*For week ending 20th October.*—Weather getting appreciably colder daily. Rice harvest is still being gathered.

J. W. P. MUIR-MACKENZIE,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA

FINANCE AND COMMERCE DEPARTMENT.

STATISTICS AND COMMERCE.
STATISTICS.

RESOLUTION.

Simla, the 27th October, 1892.

Read the following communications submitting the reports of Registrars of Joint Stock Companies on the working of the Indian Companies Act, VI of 1882, during the official year 1891-92 :

From the Government of Madras, No 1067, dated the 8th June 1892.

From the Government of Bombay, No. 5908, dated the 20th July 1892.

From the Government of Bengal, No 2202-P., dated the 23rd June, and No. 3001-P., dated the 2nd September 1892.

From the Government of the North-Western Provinces and Oudh, No. 537—VII—117-B., dated the 20th June 1892, and No. 666—VII—117-B., dated the 20th July 1892.

From the Government of the Punjab, No. 34, dated the 7th May 1892.

From the Chief Commissioner, Central Provinces, No. 4126, dated the 21st June 1892.

From the Chief Commissioner, Burma, No 134—1-T-13, dated the 7th May 1892.

From the Chief Commissioner, Assam, No. 4222-G., dated the 18th May 1892.

From the Secretary for Berar to the Resident at Hyderabad, No. 169, dated the 23rd June 1892.

From the Resident in Mysore, Nos. 2149—53-5 and 3025—53-5, dated respectively the 27th June and the 13th September 1892.

RESOLUTION.—At the close of 1890-91 there were 928 joint stock companies in existence registered under the Indian Companies Act. They possessed a total nominal capital of Rx 35,058,776, the actual (paid-up) capital being Rx. 24,458,445. The capital of 42 of these companies was increased in 1891-92 nominally by about Rx. 510,539, the actual figures, however, not being reported in most cases ; while 85, with a paid-up capital of about Rx. 107,160, so far as reported, ceased to work.

During 1891-92 the number of companies registered was 107, their nominal capital being Rx. 1,689,764 ; the paid-up capital cannot be completely stated, the amount not having been as yet reported in several cases.

At the close of 1891-92 there existed 950 companies whose nominal capital was Rx. 36,023,838, the actual capital, so far as reported, being Rx. 26,585,026. This gives an increase in the year in the paid-up capital of Rx. 2,126,581, or a little under 9 per cent. The table in the next paragraph shews that the greatest part of this increase, namely, Rx. 1,579,709, occurred in Bengal. A considerable proportion of this sum (Rx. 611,000) represents infructuous speculation in mining for gold, and another considerable sum (Rx. 562,500) represents an increase in the capital of the Hongkong and Shanghai Banking Corporation. The increase in capital of industrial companies in Bengal either newly started or already established is comparatively small, amounting to Rx. 406,209, of which about Rx. 245,000 was invested in tea.

2. The following table shews the number of companies and the amount of paid-up capital in each of the provinces in the last two years :

Province.	Number of Companies.		Paid-up capital.		Increase or Decrease per cent. in capital in 1891-92.	Provincial proportion of paid up capital to all paid-up capital in 1891-92.
	1890-91.	1891-92.	1890-91.	1891-92.		
			Rx.	Rx.		
Bengal	308	322	10,150,052	11,720,761	+16	44·1
Bombay	216	229	10,560,715	10,788,771	+ 2	40·6
Madras	215	203	1,724,157	1,907,387	+11	7·2

TOTAL ...	928	950	24,458,445	26,585,026	+8·7	...

* Not reported.

3. Of the whole invested capital Bengal has 44 per cent. and Bombay about 40½ per cent. In Madras the number of companies is not much less than in Bombay, but the capital invested is not more than about one-sixth of the capital invested in either Bengal or Bombay. More than two-thirds of these Madras companies are money-lending concerns with an average capital of less than fifty thousand rupees each.

4. The following table shews the distribution of the aggregate capital in the principal classes of joint-stock enterprise :

Companies.		Number.	Nominal capital.	Paid-up capital.
			Rx.	Rx.
Banking, Loan, and Insurance	Banking and loan	259	5,816,762	* 3,733,293

Tea and other Planting Companies.	Tea	144	4,390,908	3,643,834
	Coffee and chinchona	5	42,500	38,129
	Others	9	98,500	63,100
	Total ...	158	4,531,908	3,750,263
Mining and quarrying		57	2,776,250	1,615,895
Ice manufacture		12	254,750	197,183
Sugar manufacture		2	212,500	100,636
Breweries		3	170,000	164,540
Others		32	1,111,100	901,985
GRAND TOTAL ...		950	36,023,838	26,585,026

About 45 per cent. of the paid-up capital is invested in mills and presses chiefly for working or pressing cotton, jute, wool, and silk. The greater number of these are registered in Bombay, that Presidency representing under this head a paid-up capital of Rx. 8,270,309, or over two-thirds of the whole, most of it invested in cotton mills and presses. Rx. 2,228,849 represent the paid-up capital invested in mills and presses registered in Bengal, a large number of them being jute mills and presses.

The paid-up capital invested in banking or loan companies amounts to Rx. 3,939,167, of which Rx. 2,409,499 are in companies registered in Bengal and Rx. 790,248 in Madras.

Trading companies have a paid-up capital of Rx. 3,792,520, of which Rx 891,165 are invested in coasting and river steamer companies and about Rx. 959,000 in railways and tramways. The bulk of the railway and tramway capital is invested in the Bombay tramways (Rx. 309,645), the Darjeeling-Himalayan Railway (Rx. 175,000), the Tarkessar Railway (Rx. 175,000), the Nilgiri Railway (Rx. 182,500), the Rangoon Steam Tramway (Rx. 60,000), and the Deoghur Railway (Rx. 27,500).

In tea, coffee, and other plantations Rx. 3,750,263 of paid-up capital are invested, of which Rx. 3,577,512 are held in Bengal, most of the tea companies being registered in Calcutta

Of the Rx. 1,615,895 invested in mining and quarrying companies, Rx. 1,393,647 are in companies registered in Bengal, Rx. 591,380 being invested in coal-mining companies and about Rx. 720,000 in gold-mining companies.

5. The figures below compare the paid-up capital of each of the last two years under each of the principal groups:

	Paid up in— 1890-91.	1891-92.
	Rx.	Rx.
Banking and loan	3,095,893	3,733,293
Merchants and traders	1,840,508	1,839,937
Mills for cotton, jute, wool, silk, and hemp...	9,828,272	10,281,544
Cotton and jute presses	1,320,258	1,334,697
Tea	3,456,251	3,646,834
Mining and quarrying	915,706	1,615,895
Navigation	919,662	891,165
Railways and tramways	874,641	958,958

The capital invested in mills (mainly cotton mills) increased by 4·6 per cent. and in railways and tramways by 9·6 per cent. In mining and quarrying the increase was as much as 76·5 per cent., due to the addition of paid-up capital reported during the year by 12 out of the 46 gold-mining companies registered in Bengal in 1890-91. The increase of about 21 per cent. in banking and loan companies is mainly due to the Hongkong and Shanghai Banking Corporation (Calcutta) having increased its paid-up capital by about Rx. 562,000 during the year. In tea there was an increase of about 5·6 per cent. Under other heads there was no material increase of capital, and in some there was a decrease.

6. The following table shows the number of companies under each category during the last five years:

Companies.		1887-88.	1888-89.	1889-90.	1890-91.	1891-92.
Banking, Loan, and Insurance.	Banking and loan ...	362	314	291	275	259
	Insurance	17	17	16	13	14

	Mills for working cotton, jute, wool, silk, hemp, etc.	50	58	61	63	63
	Cotton and jute screws and presses.	60	63	68	76	83
	Other mills and presses ...	27	30	30	27	31
	Total ...	198	219	225	233	245
Tea and other Planting Companies.	Tea	127	129	133	140	144
	Coffee	7	7	7	6	5
	Chinchona					
	Others	7	9	4	8	9
	Total ...	141	145	144	154	158
Mining and quarrying		23	20	21	63	57
Ice manufacture		12	13	13	12	12
Sugar manufacture		1	1	1	2	2
Breweries		3	3	3	3	3
Others		13	14	20	24	32
	Grand Total ...	910	895	886	940	956

The classification in the foregoing table of "cotton mills," "jute mills," and "mills for working cotton, jute, wool, silk, hemp, etc.," is taken from the Articles of Association; but of the mills in the last of these three groups, the largest number are cotton mills.

7. The following table shews, so far as reported, the total number of joint stock companies at work in India with their nominal and paid-up capital at the end of each of the last ten years:

Years.	Companies at work.	Nominal capital.	Paid-up capital.	Increase or Decrease of paid-up capital.
		Rx.	Rx.	Rx.
1882-83	547	22,170,180	17,015,904	+1,557,900 = 10 %
1883-84	649	26,673,438	18,750,611	+1,734,707 = 10 ,,
1884-85	696	27,887,691	20,635,844	+1,885,233 = 10 ,,
1885-86	805	28,543,437	21,002,568	+ 366,724 = 2 ,,
1886-87	888	29,136,165	21,380,442	+ 377,874 = 2 ,,
1887-88	910	30,254,284	22,326,192	+ 945,750 = 4 ,,
1888-89	895	31,339,845	22,997,508	+ 671,316 = 3 ,,
1889-90	886	32,321,731	23,684,202	+ 686,694 = 3 ,,
1890-91	928	35,058,776	24,458,445	+ 774,243 = 3 ,,
1891-92	950	36,023,838	26,585,026	+2,126,581 = 9 ,,

8. The statistics of companies limited by guarantee, so far as they go, shew that there were 48 such companies at the close of 1890-91, eighteen out of the total number being in the Madras Presidency, mostly small benefit societies of speculative character and ephemeral existence. A great number of these companies was started in 1885-86 in Madras, collapsing after a year or two, and only 11 out of the 18 were in existence at the end of 1891-92. Of the whole number in India, 10 ceased to work in 1891-92, and 6 new companies being added, there were 44 such companies at the close of the year.

9. The fees realized and the expenditure in each Province last year were—

Province.	Fees.	Expenditure.
	Rs. A. P.	Rs. A. P.
Bengal	12,418 14 0	660 0 0

SUPPLEMENT TO

The Gazette of India.

No. 45.] SIMLA, SATURDAY, NOVEMBER 5, 1892.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the week ending at 8 a.m. on Saturday, October 29th, 1892.

The weather during the week under review has been similar in its more important characteristics to that which prevailed during the previous week. Areas of depression have crossed the Bay and the Peninsula, and have given very unsettled rainy weather to North-East India, the Peninsula, and the central parts of the country. These depressions considered barometrically have been much slighter than those of the preceding week, but they have nevertheless given heavy rain over Southern India, but more particularly to the Madras Coast between Gopalpore and Madras. In North-West India the weather has been throughout fine, and on the West Coast, though the winds have been abnormal and conditions at times threatening, the weather, though very rainy, has not been disturbed by any considerable storm.

On the 23rd the chart showed relatively high pressures over Northern India and in the extreme south, while a broad band of relatively low readings lay over the head and centre of the Peninsula and part of the Bay. The lowest pressures within this band were shown over the region represented by the stations of Sholapur, Ratnagiri, and Goa, where the residual depression of the disturbance of the previous week was shown. The winds were variable, but were generally westerly in the south, easterly in the north, and irregularly cyclonic in the neighbourhood of the residual depression noticed above. The force was fresh at a few stations in the east and west of the Peninsula. Rain had fallen at all stations in Burma, at most stations in the Peninsula (except the South Karnatic), and at a few stations in the Central Provinces and in Bengal. The amounts were large at the mid-West Coast stations; moderate or small elsewhere. On the 24th the barometer was rising, except in parts of North-East India. The slight depression noticed on the previous day had advanced north-westward and lay off the Bombay Coast. In other respects the distribution of pressure was little changed. Calms prevailed over North-West India and an easterly to north-easterly current of air over the Gangetic plain and the central parts of the

country, but elsewhere the directions were very variable. Rain had extended somewhat in the Central Provinces, but otherwise the rainfall distribution was similar to that reported on the 23rd, though the amounts were less heavy on the West Coast. The heaviest falls were—Poona, 5·87 inches; Cuttack, 3·54 inches. On the 25th pressure was falling generally, and was much below the normal average. Shallow areas of depression were shown over the northern parts of the Bombay Presidency, over the west of the Punjab, and over the Karnatic, while readings were highest in Tenasserim. The pressure differences were generally small. The winds were very variable. Rain had fallen over the west of the Peninsula, and showers, often of considerable amount, had fallen in parts of Madras and of the north-east of India. On the 26th the distribution of pressure had reverted to that which prevailed at the commencement of the week, *viz.*, high pressures over Northern and Southern India with an intervening broad band of low pressure. A depression was apparently developing over the Andaman Sea, and the wind was fresh from north-east at Diamond Island. The winds generally were little changed. Rain had ceased on the Konkan Coast, but there had been a considerable extension of rainfall over other parts of the Peninsula as well as in the central parts of the country and North-East India. The chart of the 27th showed relatively high pressures over Burma and the whole of Northern India, and relatively low pressures over the Peninsula and the Bay. A depression was crossing the Bay, and the wind at Diamond Island was fresh from east-south-east. The wind was northerly on the west side of the Bay and easterly at the central stations. Showers of rain were reported from Bengal and the east and west of the Peninsula. On the morning of the 28th the barometer was falling over Madras and rising elsewhere. The depression which was crossing the Bay was approaching the Madras Coast, and there was a difference of 0·276 inch of pressure between Eastern Rajputana and the Central Madras Coast. The wind was cyclonic around the Bay and more or less easterly elsewhere. Heavy rain had fallen along the Madras Coast and showers over the central parts of the Peninsula, the Central Provinces, and North-East India. The chart of the 29th showed that the centre of the depression had struck the Madras Coast close to Nellore. The barometer was falling, except on the extreme north-west, and gradients remained steep. The winds were variable in the north-west, but were more or less cyclonic elsewhere. The force was still strong on the Madras Coast. Rain was falling all over the Peninsula, heavily in North Madras, and a few local showers were reported from other parts of India.

Temperature.—The following table shows the variations of the mean temperature from the normal on each day of the week for the principal Provinces of India.

Province.	23rd.	24th.	25th.	26th.	27th.	28th.	29th.	Mean variation of week.
	°	°	°	°	°	°	°	°
Burma	−2·4	−0·8	−0·5	−0·5	−0·2	+0·2	+0·5	−0·5
Bengal and Assam	+0·7	+1·3	+1·7	−0·3	−0·5	+1·0	+2·1	+0·9
North-West Provinces and Oudh.	−1·4	−1·0	−1·1	−1·2	−1·3	−1·3	+0·7	−0·9
Punjab	−1·8	−1·4	−1·7	−1·0	−0·8	−0·4	−0·3	−1·1
Bombay	−0·9	−1·2	−1·6	−1·0	−1·5	−0·8	+0·4	−0·9
Central Provinces and Berar	+2·8	+3·2	−1·5	−1·9	−2·5	0	+3·8	+0·6
Central India and Guzerat	−0·6	−1·5	−4·1	−3·9	−3·4	−0·3	+2·3	−1·6
Sind and Rajputana	−1·9	−2·3	−2·6	−1·8	−2·7	−1·0	−0·2	−1·8
Madras	+0·7	+1·3	+0·8	+1·2	+0·2	+0·2	−0·4	+0·6
Mean for whole India	−0·5	−0·3	−1·2	−1·2	−1·4	−0·3	+1·0	−0·5

In most parts of the country the temperature of the week has been low, and for the whole of India for the whole week there has been a deficiency of ½°. In the Central Provinces and Bengal, however, where the sky has been cloudy, the minima have been unusually high, and in South Madras the maxima have been high; and these districts have had a slight excess of temperature, but in all the other Provinces there has been a deficiency.

Rain.—The rainfall table at the close of the summary shows that during the week there was practically no rain received over the Gangetic plain, the Punjab, Rajputana, Central India, Sind, Kathiawar, and Guzerat, but that more or less fell in all other parts of the Indian region. Thus, while nineteen divisions received either no rain or average amounts of less than one-tenth of an inch, thirty-two divisions received effective rainfall. According to the normal rain should be received during the week in all divisions, except the Punjab, South and Central, so that on the whole the rainfall has been somewhat less widely distributed than usual during the week. The heaviest average actual rainfall was 6·65 inches in the East Coast (North), followed by 5·04 inches in Berar, by 4·99 inches in the East Coast (Central), and by 4·05 inches in Malabar. The heaviest average normal rainfall of the week is 1·73 inches in Coorg, followed by 1·87 inches in the East Coast (South), by 1·75 inches in the East Coast (North), and by 1·73 inches in Malabar. Hence, though the rainfall was less widely distributed than usual, it is evident that over those regions where rain was received the amount was greatly in excess of the normal.

The third column of the table shows that the rainfall of the week was in excess in Lower Burma and Arakan, in Assam (Surma), in Eastern, Deltaic, and Central Bengal, in Orissa and Chota Nagpur, in Malabar, the Konkan, the Bombay Deccan, Khandeish, Berar, the Central Provinces, Central India, (East), Hyderabad (South), and the East Coast, except the south. The greatest excess was over the east of the Peninsula, but in the central parts of the country, in Malabar, and in East Bengal the excess was also very large.

The three concluding columns of the table show the state of the rainfall for the past two weeks. In Arakan, Assam (Surma), East and Deltaic Bengal, Orissa, the greater part of the Peninsula (except the extreme south and south-east) the rainfall of the period has been largely in excess, while over most of the region, where the rainfall has been deficient, the amount expected is ordinarily so small that its absence is not important.

The following gives the largest total amounts received during the week as reported in the rainfall telegrams of the week:

Division.	District.	Station.	Amount.
Arakan	Akyab	Sudder	4·04 inches.
East Bengal	Chittagong	Cox's Bazar	7·88 „
Central Bengal	Bankura	Raipur	6·05 „
Malabar	South Kanara	Udipi	8·49 „
Madras	Nilgiris	Kaity	4·10 „
Konkan	North Kanara	Honavar	9·08 „
Deccan	Kolhapur	Bawda	10·03 „
Khandeish	Ahmednagar	Shevgaon	8·89 „
Berar	Basim	Pusad	9·31 „
Central Provinces	Seoni	Sudder	5·70 „
East Coast	Godavari	Narsapur	15·50 „
	Nellore	Udayagiri	10·10 „

SIMLA, *3rd November, 1892.*

W. L. DALLAS,
Asst. Meteorological Reporter to the Government of India.

J. W. P. MUIR-MACKENZIE,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 29th October.*—Rainfall very heavy in the Deccan, southern parts of the Circars, and on the West Coast, moderate in the Karnatic districts, and light in the Central and Southern districts. Sowings still continue. Crops generally thriving, but damaged somewhat by excessive rain in Godavari, Kistna, and parts of the Deccan. Harvest of early crops continues; outturn about average. Water-supply ample. Pasture abundant and condition of cattle good. Prices generally easier, but still largely above normal rates for October. General prospects very favourable.

Bombay.—*For week ending 2nd November.*—Rainfall slight in parts of Guzerat and Sind; heavy in parts of Konkan and throughout the Deccan and Karnatak. Standing crops damaged by rain in parts of eleven districts and by locusts or other insects in parts of Sind. Harvesting of early and sowing of late crops retarded by rain in parts of eight districts; progressing elsewhere. Agricultural stock good and fodder sufficient.

Bengal.—*For week ending 29th October.*—Rainfall during the week has been general and well distributed, except in parts of Behar; elsewhere prospects of winter rice much improved and spring sowings now in full progress. Prices are almost stationary. Cattle generally in good condition and supply of fodder and water abundant. In Mymensingh some temporary distress has been caused by the high price of rice in parts, which may last till the winter rice is cut. Gratuitous relief is being given to aged and infirm persons from funds provided by the District Board.

North-Western Provinces and Oudh.—*For week ending 2nd November.*—Weather generally clear; cloudy in a few places. Rain is urgently needed for rice in the Eastern and Central districts. Prospects fairly good. Prices generally steady, but have fallen in a few districts.

Punjab.—*For week ending 2nd November.*—Rainfall *nil.* Harvesting of autumn crops and sowings of spring crops over in some, though still in progress in other, districts. More rain is wanted in Shahpur. Condition and prospects of standing crops are generally good. Outturn is said to be average in Lahore and under average in Shahpur. Young locusts are being destroyed in Hissar; they are entering Ferozepore from the Bikanir State, but vigorous measures are being taken for their destruction. Some of the crops in Lahore have been damaged by blight and insects. Condition of cattle is generally good. Fodder sufficient throughout the Province. Prices unsettled in one district, falling in another, and stationary elsewhere.

Central Provinces.—*For week ending 2nd November.*—Heavy rain in three districts; elsewhere moderate to slight showers. Recent rain has injured cotton in Seoni, *juar* and cotton in Nagpur, and rice in Chanda and Raipur, while in other districts it has benefited standing crops, and has tended to expand winter sowings.

Burma.—*For week ending 29th October.*—LOWER BURMA: Crop prospects good in all districts, except Thayetmyo, where more rain is required. Crops have failed over a small area in Tavoy from want of timely rain. UPPER BURMA: Heavy rain has fallen during the week in eight districts, and some

damage has been caused by floods in four districts. Prospects in Shwebo and Meiktila are much the same as reported last week, and rain is urgently needed over the whole of the latter district. In other districts prospects generally fair, but in Yamethin, although the *juar* crop is good, the paddy crop will fail over a considerable area. In Myingyan prospects are bad. The price of paddy has risen in one district and decreased largely in two others; elsewhere fluctuations unimportant.

Assam.—*For week ending 1st November.*—Weather wet. Mustard sowing begun. Prospects of crops generally good. Condition of cattle normal. Fodder sufficient.

Mysore and Coorg.—*For week ending 2nd November.*—MYSORE: Rainfall slight. Crops and prospects good, but more rain is still required in parts of two districts. Prices fallen in one and risen slightly in another district.

COORG: Rainfall slight. Standing crops in good condition. Coffee ripening in some parts. Cardamom picking in progress. Prices stationary. Water and forage for cattle sufficient.

Berar and Hyderabad.—*For week ending 2nd November.*—BERAR: Average rainfall over 4 inches. Weather cold and cloudy. Standing autumn crops benefited in parts by recent rain, but cotton, where ready for picking, has suffered. Spring sowings retarded, and in places wheat and linseed will have to be resown. Cattle in good condition. Fodder and water sufficient. Prices steady.

HYDERABAD: Rainfall good. Harvesting of autumn crops continues. Irrigated crops in good condition. Sowing of spring crops in progress. Prices generally steady.

Central India.—*For week ending 2nd November.*—Rain in parts of two Agencies. Land being prepared for spring sowings. Autumn crops being harvested. A fair outturn expected in all parts, except in Gwalior. Condition of agricultural stock good, except in parts of Bhopal. Fodder sufficient. Prices continue steady.

Rajputana.—*For week ending 2nd November.*—No rain during the week. Reaping of autumn crops and sowing for the spring harvest still continue. Harvest prospects generally good. Agricultural stock in good condition. Pasturage plentiful. Prices steady in ten States, fallen in one, and fluctuating elsewhere.

Nepal.—*For week ending 27th October.*—Weather fair. Rice harvest approaching completion.

J. W. P. MUIR-MACKENZIE,
Offg. Secretary to the Government of India.

(a) Not a passenger.
(b) Of these, one was not a passenger.

2. As compared with the average of the two corresponding quarters of 1890 and 1891, the number of accidents to trains, rolling stock, permanent-way, etc., during the first quarter of 1892, shews an increase of 220 or 26·00 per cent., with an increase of 1,113 miles, or 6·84 per cent. in the mean mileage worked, and of 1,617,754 miles, or 11·02 per cent. in the train-mileage run.

Principal variations as compared with the average of the corresponding quarters of 1890 and 1891.

3. The chief increases occurred under "Collisions between light engines" 18 against 3; "Goods trains or parts of goods trains, engines, etc., leaving the rails," 100 against 74; "Trains or engines travelling in the wrong direction through points," 25 against 11; "Trains running over cattle on the line," 392 against 296; "The failure of machinery, springs, etc., of engines," 126 against 100; "Fire in trains," 73 against 54; and "Other accidents," 72 against 48.

4. The increase under "Collisions between light engines" was chiefly due to the numbers recorded on the East Indian and North Western railways having risen from 1 to 9 and *nil* to 3 respectively.

5. "Goods trains or parts of goods trains, engines, etc., leaving the rails" shewed an increase of 26 accidents. The chief variations were increases of 27 on the South Indian railway and 6 on the North Western railway, and a decrease of 7 on the Bengal and North Western railway including the Tirhoot section.

6. Of the increase of 14 accidents under "Trains or engines travelling in the wrong direction through points," 7 occurred on the East Indian railway and 5 on the Bengal-Nágpur railway.

7. The number of cattle accidents was largest on the Southern Mahratta railway, *viz.*, 122; next to that line comes the South Indian railway with 61; then the Eastern Bengal state railway with 36, the Madras railway with 26, the Great Indian Peninsula railway with 22, and the East Indian and Rajputana-Malwa railways with 19 each.

As compared with the average of the corresponding quarters of the two previous years, the chief increases occurred on the Southern Mahratta and South Indian railways, *viz.*, 61 and 32 accidents respectively.

In relation to train-mileage run, however, the number was highest on the Dibru-Sudiya railway, which gave an average of 1 accident in 2,877 train-miles, the Southern Mahratta railway coming next with an average of 1 in 4,093; then the Jorhát, the Nizam's Guaranteed State, the South Indian and the Eastern Bengal state railway with averages of 1 in 6,806, 1 in 11,350, 1 in 12,293, and 1 in 22,350, respectively. The lowest number recorded relatively to train-mileage run was on the Bombay, Baroda and Central India railway, *viz.*, 1 in 654,769, the Indian Midland railway coming next with an average of 1 in 242,374; then the North Western railway with 1 in 150,871, the Great Indian Peninsula railway with 1 in 138,770, the East Indian railway with 1 in 131,767, and the Bengal and North Western railway, including the Tirhoot section, with 1 in 125,003.

8. Under "The failure of machinery, springs, etc., of engines," the principal variations were increases of 16 accidents on the North Western railway, of 11 each on the East Indian and Bengal-Nágpur railways, and a decrease of 17 on the Nizam's Guaranteed State railway.

9. The cases of "Fire in trains" were more by 19, of which 35 against 19 occurred on the Great Indian Peninsula railway.

10. "Other accidents" shewed an increase of 24, of which 23 occurred on the East Indian railway.

11. The accidents under "Passenger trains or parts of passenger trains, leaving the rails" numbered 22 against 14, of which 7 against *nil* were recorded on the East Indian railway alone.

12. The casualties to passengers and servants in the employ of railways or of contractors, from accidents not coming under the classification adopted in paragraph 1, were, in the case of passengers, 15 killed and 32 injured, against 16 killed and 32 injured, and, in the case of servants, 43 killed and 147 injured, against 32 killed and 117 injured (for details, *vide* abstract No. 2).

Casualties to passengers and servants, not included in para. 1, as compared with the average of the corresponding quarters of 1890 and 1891.

13. The total casualties to persons from all causes, including trespassers, cases of suicide, etc., were 132 killed and 219 injured, against 131 killed and 189 injured, the average of the corresponding quarters of the two preceding years for details, *vide* abstract No. 2).

Total casualties from all causes.

14. In addition to the above, 28 persons were reported to have been killed and 42 injured in yards, workshops, etc., and 346 persons to have died in carriages and at stations from causes unconnected with the working of trains.

Casualties in yards, workshops, etc.

15. The following table gives, for *the first quarter of 1892*, the number of accidents as classified in paragraph 1, which resulted in loss of, or injury to, life and limb, and shews the railways on which they occurred :

Casualties resulting from accidents to trains, rolling stock, etc., for the 1st quarter of 1892.

Railway.	Number of accidents during the 1st quarter of 1892.	Passengers and others.		Servants.		Total.	
		Killed.	Injured.	Killed.	Injured.	Killed.	Injured.

16. *Bengal-Nágpur railway.*—On the 10th January 1892, a collision took place at Chakardharpore between a down goods and an up mail train. The accident was principally due to the assistant station master having allowed shunting to take place after line-clear had been given for the in-coming mail train. A passenger was injured.

On the 9th March 1892, a shunting engine with a horse-box and two wagons collided with the brake-van of an up goods train at Chakardharpore through the carelessness of the pointsmen. A pointsman—the man at fault—was killed and another seriously injured.

17. *Bengal and North-Western railway.*—A trollyman, while bringing a trolly on the main line at Bunwárchak, was hurt by the trolly having run against a truck which was standing on the line.

18. *Rajputana-Malwa railway.*—On the 21st January 1892, a collision took place between an up mail and a down goods train at mileage 272-4 between Ajmere and Madár stations owing to the carelessness of the sub-assistant station master. Two passengers were slightly injured and five railway servants killed and two seriously injured. There was also considerable damage to rolling stock. The sub-assistant station master who was at fault was prosecuted

and sentenced to pay a fine of ₹50. A *detailed report of this accident will be found in the appendix to the abstract return of accidents.*

On the 26th March 1892, a down special passenger collided with another down special at Ratika Nagla owing to one train having been admitted to the station while the other was standing foul of the points. Three passengers were killed. The station master who was at fault was prosecuted and sentenced to one year's rigourous imprisonment.

19. *Southern Mahratta railway.*—On the 22nd March 1892, a shunting engine, while going to shed at Gadag, ran on to the platform line and collided with a down mixed train standing there. The accident was due to the points not having been properly set. A pointsman was slightly injured.

20. *South Indian railway.*—On the 26th February 1892, while the engine and front portion of an up mixed train were shunting at the Nillikuppam station, an up material special collided with the rear portion of the train owing to the driver of the material special having run past the danger signal. Three passengers were injured.

21. *North Western railway.*—On the 3rd March 1892, a collision took place between an up goods and a down goods train at Wán Rádharám through the carelessness of the points jemadar. A fireman was slightly hurt. The jemadar has been dismissed.

On the 10th March 1892, a down special empty train entered Gujránwála station against signals and collided with a down goods train. A fireman was slightly injured, and the rolling stock considerably damaged. The driver of the special empty, through whose carelessness the accident occurred, was prosecuted, but was acquitted by the District Magistrate, Lahore.

On the 18th March 1892, the bunder local train while coming to Sehwan was put on two lines, and a brake-van was derailed and a third class carriage overturned. The accident was owing to the points jemadar not having held the points lever. One passenger was killed and two slightly injured. Permanent-way and rolling stock were also damaged.

On the 31st March 1892, a material trolly was derailed at mileage 468 between Tandúrí and Babar Kach stations, and a contractor's cooly who was on the trolly received serious injuries which ended fatally.

22. *Great Indian Peninsula railway.*—On the 5th February 1892, an up mixed came in against signals and collided with a ballast engine at Wardha. Two wagons were smashed and two damaged. A railway servant was also slightly injured.

On the 23rd February 1892, a cart was run over by a special goods train at a level-crossing near Shegaon. The accident was caused by the carelessness of the gateman, who had fallen asleep, leaving the gates open. One bullock was killed, and the cartman received severe injuries which resulted in death.

On the 24th February 1892, a brake-van whilst being hand-shunted into the up yard at Kására collided with an engine, and the pointsman, who was in the brake-van, was injured.

On the 12th March 1892, certain wagons of a ballast train were derailed while shunting at Tápti, owing to the points having been reversed. A ballast cooly woman, in jumping from one of the derailed wagons, was slightly injured.

On the 15th March 1892, while an up special goods was being placed in a siding at Diva to allow a mail train to pass, the rear brake of the former train capsized and two wagons derailed. The accident was due to the carelessness of the muccadum. The guard of the brake, in jumping out, was slightly injured, and the rolling stock and permanent-way considerably damaged.

On the 31st March 1892, a brake-van collided with two machine-brakes on the ghât line yard at Kására through the carelessness of the pointsman. A brakesman was slightly injured.

23. *The Gaekwar's Dabhoi railway.*—On the 11th March 1892, a salt wagon whilst being hand-shunted at Miyágám ran over a closed point through the

neglect of the shunting staff. A contractor's cooly, who was standing on the wagon, was injured.

The Governments of Madras, Bombay, Bengal, North-Western Provinces and Oudh, and the Punjab.
The Chief Commissioners of the Central Provinces, Burma, and Assam.
The Resident at Hyderabad.
The Resident in Mysore.
The Agents to the Governor General for Rajputana, Central India, and Baluchistan.
The Director General of Railways.
The Consulting Engineers to the Government of India for Railways, Calcutta, Central Division, Lucknow, and Assam.

ORDER—Ordered, that the above note with the abstract returns, be communicated for information to the local governments and administrations, and to the officers noted in the margin.

Ordered also, that copies be forwarded for the information of Her Majesty's Government.

Ordered further, that the note, with the abstract returns, be published in the supplement to the *Gazette of India*.

F. B. HEBBERT, *M. Inst. C.E.*,
Under-Secretary.

Documents accompanying.

Abstract returns of accidents for the three months ending the 31st March 1892.

ABSTRACT No. 1.

GENERAL TOTAL.

NUMBER of PERSONS reported, during the THREE MONTHS ending the 31st March 1892, as KILLED or INJURED on ALL RAILWAYS open for TRAFFIC in INDIA, distinguishing between PASSENGERS, RAILWAY SERVANTS and OTHER PERSONS; and distinguishing also, in the case of the two former classes, between ACCIDENTS caused by ACCIDENTS to TRAINS, ROLLING STOCK, PERMANENT-WAY, etc., and ACCIDENTS happening otherwise.

	Killed.	Injured.
PASSENGERS:—		
From accidents to trains, rolling stock, permanent-way, etc.	4	8
By accidents from other causes, including accidents from their own want of caution or misconduct	15	32
SERVANTS:—		
From accidents to trains, rolling stock, permanent-way, etc.	7	13
By accidents from other causes, including accidents from their own want of caution or misconduct	43	147
OTHER PERSONS:—		
Whilst passing over railways at level-crossings	6	3
Trespassers	39	10
Suicides	15	2
Miscellaneous, not included in either of the above	3	4
TOTAL	132	219

ABSTRACT

No. 2.

NUMBER of PERSONS reported, during the THREE MONTHS ending 31st March 1892, as KILLED or INJURED in INDIA by the RAILWAY SERVANTS, and OTHER PERSONS, and classifying, as far as practicable,

TRAVELLING of TRAINS or the MOVEMENT of VEHICLES used exclusively upon RAILWAYS, distinguishing between PASSENGERS, the nature and causes of the ACCIDENTS occasioning the DEATH or INJURY.

| Serial No. | RAILWAYS. | PASSENGERS. | | | | | | | | | | | | | | | | | | | | | | SERVANTS. | | | | | | | | | | | | | | | | | | | | | | OTHERS. | | | | | | | | | | | | | | | | | | | | | | TOTAL, ALL CLASSES. | | Serial No. |
|---|---|---

ABSTRACT No. 3.

ACCIDENTS to TRAINS, ROLLING STOCK, PERMANENT-WAY, &c., reported during the THREE MONTHS ending 31st March 1892, as having occurred on the several RAILWAYS open for TRAFFIC in INDIA, distinguishing the different classes of ACCIDENTS and the number of PASSENGERS AND OTHERS and of RAILWAY SERVANTS KILLED or INJURED in each class of accident.

(a) Not a passenger.

(b) Of these, one was not a passenger.

APPENDIX.

REPORT by LIEUT.-COL. T. B. B. SAVI, R.E., GOVERNMENT INSPECTOR for RAILWAYS, JHANSI, dated the 16th February 1892, on the collision which occurred on the 21st January 1892 between the No. 1 up mail and No. 58 down goods trains between AJMERE and MADAR STATIONS on the RAJPUTANA-MALWA RAILWAY.

In this case the No. 58 down goods (consisting of engine, three loaded wagons and one brake-van) left Ajmere at 2-59 and about 7 or 8 minutes afterwards came into collision with the No. 1 up mail (consisting of engine and 16 vehicles as shown in the evidence of guard Cline) which had run through Madár station about 2 minutes before the accident occurred.

2. The casualties were confined to the railway staff, only two passengers being slightly injured. Of the mail train the driver and native fireman were severely injured, the khallasi died very soon after the collision and the 2nd guard on the 25th January. The driver and native fireman of the goods train were killed and the khallasi died soon after the accident.

3. Both the engines were almost entirely wrecked, the front brake-van, two luggage vans next the engine and a composite 1st and 2nd class carriage were completely destroyed, and some of the other vehicles were more or less damaged.

Description of locality.

4. The distance between Ajmere and Madár stations is 4¼ miles; the facing points at Madàr, where the driver and guard of the No. 1 up mail picked up the line clear tickets, are at mile 270-16, that is, about one mile and a half from the place where the accident occurred, which was at mile 272-4, that is, at the 4th telegraph post, or about 350 yards beyond the 272nd milestone.

5. At the latter place the line is level for about 350 yards, with gradients of 1 in 150 rising towards Madár on one side and falling in the opposite direction.

6. About 600 yards from the place where the accident occurred the line in the direction of Madár for about 240 yards is in a cutting through some high ground which entirely obstructs the view in that direction. Owing to this high ground and the trees along the line there is a clear view of less than a quarter of a mile towards Madár from the site of the accident, but towards Ajmere the view extends to about ¾ of a mile. As the two trains were approaching towards one another at the rate of probably 50 miles an hour, they must have collided almost immediateley after the lights on one engine would have been visible to the men on the other engine.

7. At the joint enquiry the following evidence was taken down:

EVIDENCE.

Solomon Jah, assistant station master, Ajmere.—I have been here in that position since June 1887. I was on duty last night. No. 2 down mail was running 1 hour 19 minutes late; on her departure at 2-26 I told Sheo Narayen, sub-assistant station master, to ask Madár for line clear for No. 58 down goods on the arrival of down mail at Madár. I told him verbally; I wrote nothing in the book. He has been in the habit of asking line clear without my orders. I then went out to enquire if No. 58 down goods was ready, and the train clerk said it was not ready, so I came back to the office and found Sheo Narayen was not there, so I called out to the signaller on duty, Sobaram. I asked him if he had signalled enquiry to Madár, and he said yes. I then asked if he had received the line clear, he said no. I then told him that the up mail was due at Madár, that if Madár gave line clear for 58 down there was nothing to be said, but if he cancelled the enquiry and asked for line clear for the up mail to send word to me immediately, and I went to the yard to see if No. 58 was ready or not, and I found that she was—but the engine was not attached. I then went back to the office; I asked the same signaller if he had obtained line clear, and he said yes, and I went to wake up the guard of No. 58, who was asleep in the train clerk's office. I sent the second guard to fetch the engine and took the head guard with me to the office, and I sent for the line clear and it was brought. I entered the time 2-50 A.M., and and I gave it to the guard in the office; he read it, signed for it and went out. About 2 or 3 minutes afterwards I followed him and went to No. 58 down. I found the shunting engine shunting in front, and the engine of No. 58 down was not yet on. I stopped the shunting and brought the engine. I then looked at my watch and saw it was 2-59 and I altered the "time of departure" on the line clear in pencil and initialled the correction. I told the driver not to lose time, but to go sharp as the up mail was due and must not be detained. The train then started. I immediately returned to the office to give departure to Madár. I took about two minutes to walk to the office. When I got to the office, Abdulla khallasi told me that the up mail had left Madár, and going to the telegraph office, from which all messages are sent, I asked Sheo Narayen if it was a fact that he had given line clear and that the train had left; he said "yes;" and when I asked him, why, he said I thought you had detained No. 58 down, because it was not ready. I did not look in the book to see if the

departure of the up mail had been signalled, but I told the signaller Sobaram to enquire from Madár if she had actually left, and if not, to ask Madár to stop her—he signalled something. I do not understand signalling, and Madár replied "just passed" so the signaller told me. No record was kept. There is an order directing that copies of all messages connected with train working should be kept. I ran out of the office to warn the staff to keep a line clear in the yard in case of the return of any engine or train. I then waited for a few minutes, and when I saw no sign of any engine or train coming, I sent one of my pointsmen towards Madár, at 4-10. A memo. was sent to me by the head guard of the goods train to the effect that one up mail had collided with No. 58 down.

All this time I had not looked at the train message register. Directly I got the memo., I woke up Mr. Priestley, and gave a memo. to the head constable to arrest Sheo Narayen.

I do not know how long Sheo Narayen was away from the office as mentioned above.

I gave Sheo Narayen no instructions about the up mail. The only orders I gave Sheo Narayen were about No. 58 down goods. After returning the last time to the office after I had warned the staff to keep a road clear, I questioned Sobaram, signaller, why he signalled line clear for the up mail when he knew that I had got line clear for 58 down, and he said that he did not signal it, but that Sheo Narayen had signalled it. Then I asked why he had not stopped Sheo Narayen, and he said that he had spoken to him, but that Sheo Narayen would not take any notice.

Sheo Narayen had no authority to give "line clear" without my directions. I do not know of any case in which a sub-assistant station master has given line clear without my orders. I am positive that there is an order directing a sub-assistant station master not to give "line clear" without the orders of the station master on duty, and that is the practice. At present these orders are not hung up either in my office or the signaller's office. If the sub-assistant station master wishes to give a line clear and I am in the office, I give my orders verbally to him; if I am not in the office, then he sends either a memo. or the train message book, and if I initial the book or the memo. he gives line clear accordingly. Sometimes I give the sub-assistant station master orders in advance about certain trains, and in that case he can and does act on them. I gave the sub-assistant station master no orders about the detention of No. 58 down goods or the cancellation of its line clear. I am generally on duty 12 hours, sometimes 13 hours, and all the time I give authority for all "line clears;" for a goods train the sub-assistant station master signs the line clear, and sometimes starts the train. I signed the line clear for No. 58 down goods.

Mahomed Hussain Khan.—Five years' service. Last night I was head guard of No. 58 down goods. My load consisted of 3 loaded and one brake. We left Ajmere at 2-59 A.M., 39 minutes late. Mr. Jah gave me the line clear and said we were to cross No. 1 up mail at Madár. I gave the line clear to the driver and the driver Joseph started. I heard no danger whistle, except that just before the accident I heard some whistle. I think it was given by my driver. I looked out to see what had happened, and at that moment the collision occurred. My train was going fast, about 18 or 20 miles.

Hugh Robert Cline.—I am head guard, 13 years' service. On the morning of 21st I was head guard of No. 1 up mail, riding in the rear brake-van. My train was composed as under:

1 Engine No. 393; driver Stone.
2 Luggage vans.
1 Brake-van.
1 Composite, 1st and 2nd.
1 Postal and intermediate.
1 Intermediate.
1 Second class.
1 First class.
1 Luggage van.
4 Third class carriages.
2 Bogie thirds.
1 Rear brake-van.

Sixteen vehicles equal to 18, a full load being 20. We ran through Madár station. I looked at the time, it was 3-6. It was a moonlight night, but cloudy, but it was not very dark. After passing Madár, about ¾ mile, I heard the whistle sounded 3 times sharply as a danger signal. I immediately put on the brake, and whilst I was doing it the collision happened. I was thrown against the brake partition. On recovering I looked at my watch and it was exactly 3-8. I had set my watch right that day by Bándikui time. Just before hearing the danger signals my train was I think going about 20 to 24 miles an hour. The collision happened at mileage $\frac{272}{4}$.

Sobaram, son of Ganesh Ram.—I am a signaller at Ajmere station; I have been five years in the service. I have been relieving assistant station master. I am now signaller. I came on duty at 22 hours on the night of the 20th. Sheo Narayen sent me the train message book from his office by a khallasi with line clear enquiry No. 5 for No. 58 down goods. This message is signed by Sheo Narayen; I signalled it then, and there is my signature. I signalled it at 2-33; at 2-40 I received message No. 4 from Madár to the effect that 2 down mail had arrived and that the line was clear for No. 58 down goods, and that it was to be sent sharp. I then wrote out both sides down line clear No. 224, dated 21st January 1892, at 2 hours 40 minutes, and having done this I sent both the train message book and the line clear book to the station master's office. After a few minutes Mr. Jah came into my office and asked me where the up mail was, and I said that there was no news of her yet, and he then went out; about 10 minutes after I received message No. 5 from Madár (2-54 A.M.) asking Ajmere to cancel his No. 3 and Ajmere No. 5 (above) and to give line clear for No. 1 up mail which had left Ládpura at 2-51 and to detain No. 58 down goods if not ready, concluding by saying that 2 down mail had arrived there

(This message clearly wrong as it refers to Madár's No. 3 instead of No. 4 as it should.)

I then passed the book by the hands of a khallasi to Sheo Narayen, who was sitting in the same room about two yards off.

The time entered as "time seen by station master" is not in my handwriting. The khallasi brought the book back to me and it had the message No. 6 acknowledging Madár's No. 5, and saying that No. 58 down had been detained and that line was clear for No. 1 up mail. The time of receipt (evidently altered) 22-58 and the signature of the signaller are in Sheo Narayen's handwriting. When I got the book I called Madár on the instrument, and whilst I was doing so I mentioned to Sheo Narayen that line clear had already been given for No. 58 down goods; he gave no reply and I then signalled the message at 3 o'clock. Sheo Narayen then went out and then came back at once and asked me if I had signalled the line clear for the mail, and on my saying I had, he said all right. After a few minutes I received message No. 16 from Madár at 3-6, saying that the mail had left Madár at 3-4; I then told the khallasi to ring the bell. Almost immediately Mr. Jah came into the room and said "I have started No. 58 down," "there will be trouble;" when Mr. Jah came, Sheo Narayen was in the room. After this Mr. Jah went out and then came back and told me to inform Madár that the goods had left from here and to send a man out from the other side, and both I and Sheo Narayen told Madár on the instrument. I sent no message about stopping the mail. The name of the khallasi by whose hand I passed the train message to Sheo Narayen was Buldeo.

At the time I sent the line clear ticket and the train message book about No. 58 down, Sheo Narayen was not in my office; a short time after this Sheo Narayen and Mr. Jah came into the office together, and Mr. Jah asked me if line clear had been asked for the mail, and I said it had not yet been asked; Mr. Jah then left my office and Sheo Narayen stopped there. Mr. Jah gave no orders before leaving the office. He was seated at the table quite close to me and was awake.

The train message book remained in the station master's office from the time when I sent it with the line clear for No. 58 down, till Madár began to roll for enquiring about the line clear for No. 1 up mail, when I sent for it in order to enter the message. I did not get back the line clear book till Mr. Jah brought it back when he came into the office after I had sent the khallasi to ring the warning bell for the departure of the up mail from Madár.

Sheo Narayen.—I am sub-assistant station master at Ajmere: I have 10 years' service; I have been ever 18 months at Ajmere, all the time as sub-assistant station master. I am under the orders of the station master and assistant station master. There is a copy of traffic manual, Part I, in the office. I can see it whenever I want to. It is my duty to know it and I do know it. The rules for line clear working are in it, and I know them. I was on duty on the night of 20th, morning of 21st; I came on duty at 20 o'clock on 20th; I had gone off duty at 8 o'clock on 20th. There is another sub-assistant station master at Ajmere. He and I take night duty on alternate weeks.

On the morning of 21st, I at 2-30 authorised the sending of message No. 5 to Madár asking if line was clear for No. 58 down goods. I sent this message by Mr. Jah's orders. It is the practice always to take the orders of the assistant station master on duty before sending messages, either asking or giving line clear, but not as regards departure messages. I do not know what Madár replied. At 2-56 (those figures are in my handwriting). I saw message No. 5 from Madár asking Ajmere to cancel Madár's No. 3 and Ajmere's No. 5, and asking if line was clear for No. 1 up mail, left Ládpura at 2-51, and asking that No. 58 down goods might be detained if she was not ready, and adding that No. 2 down mail had arrived.

I did not look to see what Madár's No. 3,* *because I knew it was* (I now see that Madár's No. 3 is giving) line clear for No. 2 down mail. There is nothing in it about No. 58 down goods. I did not know that a line clear had been issued for No. 58 down goods.

* The words within parentheses were corrected to those in italics by Sheo Narayen on 29th February 1892, when this statement was signed by him in presence of Government Inspector for Railways, Jhánsi.

I did not think what Madár wanted to cancel; I simply took it as cancelling my enquiry No. 5.

I then at 2-58 wrote out message No. 6 to Madár to the effect that No. 58 was detained at Ajmere and that line was clear for No. 1 up mail. I gave the book back to the khallasi who had given it to me, and I saw the khallasi give it to signaller Sobaram. Sobaram said nothing to me, and I do not know if he sent the message.

Before I signed message No. 6, I had taken Mr. Jah's orders. Before the receipt of message No. 5, Mr. Jah had come into the office some time after signalling the enquiry for No. 58 down, and after enquiring for No. 1 up mail, he said, "In case Madár asks line clear for No. 1 up mail† *give it and 58 will be detained here* (detain 58 here because we have not got 58 ready)." This was in the hearing of Sobaram and the signaller in charge, Rada Kishen.

† The words within parentheses were corrected to those in italics by Sheo Narayen on 29th February 1892, when this statement was signed by him in presence of Government Inspector for Railways, Jhánsi.

I issued No. 6 solely on these verbal orders and I neither sent Mr. Jah the book, nor did I send him any memo.

Before issuing telegram No. 6 I did not search the book to see whether an answer had been received to message No. 5 or whether Madár had in fact given line clear for No. 58 down.

Samuel Timothy, station master at Ajmere.—Thirteen years' service. I have been station master at Ajmere a little over 5 years. The practice at Ajmere is for the sub-assistant station master to consult the assistant station master on duty before he either enquires for line clear or gives a line clear. If they are together, he takes verbal orders; if the assistant station master is in the yard, the sub-assistant station master in case of out-going trains goes himself or sends a khallasi with a

verbal message to ask if the train is ready; and in cases in which he has to give line clear, he either goes personally or sends the train message book to enquire if line clear may be given, or in some cases he sends a memo. on a slip of paper, but never a verbal message. If the assistant station master were going into the yard and expecting a train from another station, he might say to the sub-assistant station master that if such a station asks a line clear for such a train, you can give it, and in that case the sub-assistant station master would be justified in giving the line clear without further reference. I have always found Sheo Narayen careless and he cannot keep up at night. I have had no occasion to report him.

Conclusion.

8. From the foregoing evidence it appears that on the departure of the No. 2 down mail which was running late, the sub-assistant station master at Ajmere was verbally instructed by the assistant station master on duty to obtain line clear from the station master at Madár for the No. 58 down goods train on the arrival of the above down mail at Madár. This was done and the message No. 4, sent in reply to the enquiry and giving line clear for No 58 down goods, was received from Madár at 2-40 by the signaller on duty at Ajmere who prepared and sent the line clear ticket for the No. 58 down goods train to the office of the assistant station master. The latter obtained this line clear ticket at 2-50 and started off the No. 58 down goods about 2-59. While the assistant station master was thus engaged, the signaller on duty received at 2-54 a message No. 5 from the station master at Madár, asking for his line clear message No. 4 (not No. 3) to be cancelled and No. 58 down goods to be detained at Ajmere, and for line clear to be given for the No. 1 up mail, which he stated in this message had left Akhri at 2-31 (not Ládpura at 2-51).

9. This message No. 5 was taken to the sub-assistant station master, who at 2-58, without reference to the assistant station master on duty, wrote out a reply to the effect that No. 58 down goods train would be detained at Ajmere and that line was clear for the No. 1 up mail. The station master at Madár consequently allowed the No. 1 up mail to run through Madár when the No. 58 down goods was on its way to that station, and thus the two trains came into collision about 2 or 3 minutes after the No. 1 up mail had passed through Madár and about a mile and a half from that station.

10. The collision is therefore primarily due to the neglect of duty on the part of the sub-assistant station master on duty, in not making sure that the No. 58 down goods train had been detained, and for giving line clear for the No. 1 up mail without first obtaining the orders of the assistant station master on duty, and before he had cancelled the line clear ticket given for the No. 58 down goods train.

11. The sub-assistant station master, however, states that he knew nothing about message No. 4; and this may be true, and also his statement, which is supported by that of the signaller on duty, that No. 3 and not No. 4 was the number of the message referred to by the station master at Madár in his message No. 5 asking for line clear for the No. 1 up mail, and for No. 58 down goods train to be detained at Ajmere. But the station master at Madár in this message No. 5, according to his own statement and the train message register kept by him, informed the station master at Ajmere that the No. 1 up mail had left Akhri (which is the second station from Madár and 7¾ miles from it) at 2-31, and he did not telegraph anything about Ládpura (which is the next station to and 4¼ miles from Madár), as stated by both the signaller on duty and the sub-assistant station master. The evidence of these two last cannot therefore be depended upon with regard to the wording of No. 5 message.

12. The train staff of both the mail and goods trains are free from all blame, and the collision must have taken place almost immediately after the lights on the one engine could possibly have been visible to the men on the other engine.

13. The responsibility for allowing the No. 1 up mail to run through Madár station appears to rest between the assistant and sub-assistant station masters on duty at Ajmere; but it seems to me that the station master at Madár can hardly be absolved from all blame because he accepted a line clear message which was not strictly in accordance with the prescribed form.

14. In Part I of the Rajputana-Malwa Railway Traffic Manual, as corrected by memo. No. 12 of 1890, there is the following rule on the subject of quotation of the number of previous messages:

"*Para. 132.*—In all replies to train messages of whatever description, or references to former train messages, the number of message that is replied to or referred to must be given."

This rule was not, it seems to me, carried out in this case; and although it is impossible to say whether the accident would not have occurred if it had been strictly observed, still I think it is worthy of consideration whether it would not be advisable to issue some further instructions (1) strictly prohibiting the sending and accepting of train messages of fewer words than prescribed in the traffic manual, and (2) requiring the correction of any error in the quotation of the numbers of the train messages that are referred to in the reply before the latter is accepted. The first suggestion is no doubt supposed to be understood by all station masters, but I can find no definite rule about it in the traffic manual; and the second suggestion appears to me especially required in all cases, such as this one, when a line clear message is given and afterwards cancelled for any reason.

Finding.

15. The finding of the joint enquiry, which was commenced on the same day as the accident occurred and completed on the following day, was as follows:

"We are of opinion that the accident was caused by disregard of orders for line clear working, and that Sheo Narayen should be prosecuted for endangering the safety of life and property by giving line clear to Madár for the No. 1 up mail of January 21st, contrary to rules."

Sheo Narayen has since been sentenced to pay a fine of 50 rupees.

GOVERNMENT OF INDIA.

HOME DEPARTMENT.

REVIEW OF THE RESULTS OF THE MEASURES ADOPTED FOR THE EXTERMINATION OF WILD ANIMALS AND VENOMOUS SNAKES DURING THE YEAR 1891.

No. 17 Public. / 2183-2193

Extract from the Proceedings of the Government of India in the Home Department (Public),—dated Simla, the 10th November, 1892.

Read—

Home Department Resolution No 25/1056-67, dated the 15th October 1891, reviewing the reports on the results of the measures adopted for exterminating wild animals and poisonous snakes in British India during the year 1890.

Read also the following letters from Local Governments and Administrations submitting returns for the year 1891:—

From the Government of Madras, No. 470-A., dated 10th May 1892, and enclosures; also endorsements Nos. 2395-A. and 2607-A., dated 16th and 27th May 1892 respectively.

From the Government of Bombay, No. 2589, dated 27th July 1892, and enclosures.

From the Government of Bengal, No. 414-J.D., dated 10th September 1892, and enclosure.

From the Government of the North-Western Provinces and Oudh, No. 1326, dated 15th June 1892, and enclosures.

From the Government of the Punjab, No. 459, dated 19th April 1892, and enclosures.

From the Chief Commissioner, Central Provinces, No. 3111, dated 11th May 1892, and enclosures, and letter No. 4033, dated 16th June 1892.

From the Chief Commissioner of Burma, No. 473—1W-4, dated 23rd April 1892, and enclosures.

From the Chief Commissioner of Assam, No. 2797-G., dated 8th April 1892, and enclosures.

From the Chief Commissioner of Coorg, No. 494/455-85-E-2., dated 25th March 1892, and enclosures.

From the Resident at Hyderabad, No. 79, dated 8th April 1892, and enclosures.

From the Chief Commissioner of Ajmere-Merwara, No. 430, dated 29th April 1892, and enclosure.

From the Resident in Mysore, No. 334/23-6, dated 3rd February 1892, and enclosure.

RESOLUTION.

The Reports on the measures adopted for the extermination of wild beasts and venomous snakes are now submitted annually in accordance with the orders issued in paragraph 9 of the Resolution of the Government of India in the Home Department, No. 40--2374-2386, dated the 4th December 1890. The statistics for the preceding decade were examined in detail in that Resolution. In the present Resolution the Government of India will briefly review the results reported for the year 1891.

2. The mortality caused by wild animals in the different Provinces is compared with that reported during the previous year in the following figures:—

Province—	Number of persons killed during: 1890.	1891.
Madras	196	279
Bombay	47	80
Bengal	1,301	1,584
North-Western Provinces and Oudh	228	236
Punjab	31	65
Central Provinces	368	310
Burma	36	121
Assam	201	200
Coorg	0	3
Hyderabad Assigned Districts	26	29
Ajmere and Merwara	6	4
TOTAL ...	2,440	2,911

In the previous year the record of the number of persons killed by wild beasts showed a decrease from 2,724 in 1889 to 2,440. The Government of India regret to observe that there has been a considerable increase during the

year under review. This result is due partly to the fact that the deaths from this cause reported from Upper Burma have been included in the returns for the first time during the year under review, but chiefly to the great increase in the mortality reported from the Lower Provinces of Bengal. A considerably larger number of deaths were returned from the Madras Presidency also. The Provinces in which the loss of life was highest in proportion to population were, as in the previous year, Assam (1 to 27,120), the Central Provinces (1 to 34,757), and Bengal (1 to 44,765). The mortality was again lowest in proportion to population in the Punjab (1 to 320,108) and in Bombay (1 to 235,335). The average result for all the Provinces taken together is a mortality of one person to every 74,697 of the population calculated according to the census of 1891 as compared with one person to every 88,392 in the previous year.

3. There was a marked increase in the number of persons destroyed by tigers and leopards during the year; 979 deaths were caused by tigers and 314 by leopards in 1891 as compared with 798 and 179 in 1890. In Bengal the number of persons killed by tigers rose from 350 to 492. In the Lohardaga and Hazáribágh districts alone there were 205 deaths. The Local Government explains this as follows:—"This mortality is reported to be due to a family of man-eating tigers which haunt the neighbourhood of Tandwa in Hazáribágh. Every effort has been made to secure the destruction of the animals, but the Commissioner reports that the repeated attempts of local shikaris, encouraged by the offer of a reward of Rs. 200 for each tiger, and expeditions undertaken by European sportsmen, have been alike unsuccessful. A reward of Rs. 100 has now been offered for every tiger killed in the immediate neighbourhood of Tandwa and a reward of Rs. 200 for every tiger destroyed over a human kill." The number of persons killed by leopards in Bengal rose from 71 in the previous year to 179, the increase being due to the ravages of a man-eating leopard in the Rajshahi district which is said to have caused 96 deaths. A reward of Rs. 100 was offered, and this animal has been destroyed since the close of the year. The increased mortality in the Madras Presidency appears to have been mainly due to man-eating tigers in the Ganjam and Vizagapatam districts. Special rewards of Rs. 500 and Rs. 200 have been offered under the orders of Government for two notorious man-eaters. The substantial decrease in the mortality reported from the Central Provinces is stated to be due to the death or destruction of several man-eating tigers and to the extermination of the pack of wolves referred to in last year's Report. The Government of India are glad to observe that the Chief Commissioner has found that the system of offering special rewards to effect the destruction of animals known to be specially dangerous has worked with success.

4. The number of cattle returned as destroyed by wild animals was 70,816 compared with 68,483 in the previous year. Of these deaths, 53,615, or 76 per cent., are attributed to tigers and leopards. These figures, however, are of doubtful accuracy, and further comment is needless with regard to them.

5. There was a noticeable increase in the number of wild animals destroyed, which rose from 14,755 in 1890 to 16,518. This was accompanied by a rise from Rs. 96,470 to Rs. 1,06,478 in the total amount paid as rewards for their destruction. In Bengal, however, the number of animals destroyed fell from 5,311 to 4,882, while the amount of rewards remained almost stationary; only 1,077 tigers and leopards were killed in this Province compared with 1,167 in the year before. A large increase is reported in the number of wolves destroyed in the North-Western Provinces and Oudh (1,688 to 1,928). In reviewing the last year's Reports, the Government of India insisted (among other measures) on the importance of providing for the timely offer of special rewards in the case of wild animals which have begun to take human life or to destroy cattle, and it was suggested for consideration whether Revenue and Police officers in the outlying parts of a district might not be authorized under certain restrictions to grant rewards. It is satisfactory that these instructions have been generally kept in view by Local Governments and Administrations, especially in those Provinces where the loss of life caused by wild beasts is largest proportionately to population. In the Central Provinces and Assam the amount of rewards, special and general, paid for the destruction of wild animals increased considerably. In Bengal additional facilities have been afforded to the people for obtaining rewards, and all sub-divisional officers have been authorized to grant

rewards on application made to them. In the North-Western Provinces and Oudh the Local Government has empowered selected Tahsildars to disburse rewards. In Burma similar power has been conferred upon township officers. In Assam all Tahsildars and Mauzadars selected by the Deputy Commissioners have been authorized to grant certificates on which rewards are to be paid. In the Central Provinces the Chief Commissioner had in the previous year authorized Deputy Commissioners to empower Tahsildars and Station-house officers to grant rewards. From the reports submitted next year it will be possible to pronounce an opinion as to the extent to which these measures have been attended with success.

6. The number of gun-licenses returned as held under the Indian Arms Act free of cost for the destruction of wild animals has largely increased—from 59,051 in 1890 to 69,133. The increases occurred chiefly in the Madras and Bombay Presidencies and the North-Western Provinces and Oudh. It is not clear, however, that the last three columns in the statement appended to this Resolution are correctly filled in in all Provinces. They should show only the number of guns for which licenses are issued free of charge in Form XI of the forms prescribed in the Arms Act Rules for the express purpose of destroying wild animals or protecting crops. The ordinary sporting licenses in Form VIII, which are issued in large numbers on the payment of a trifling fee, should not be included in the statement.

7. The total number of persons killed by snakes during the year was 21,389 as compared with 21,361 in 1890. As usual, the greater part of the mortality occurred in Bengal and in the North-Western Provinces and Oudh, 47 per cent. of the total number of deaths being reported from the former and 25 per cent. from the latter Province. The large increase in the mortality returned from Burma is due to the inclusion for the first time of the figures for Upper Burma, where 132 deaths occurred.

The details of the mortality under this head in each Province during the last two years are compared below:—

Province—	Number of persons killed by snakes during: 1890.	1891.
Madras	1,424	1,433
Bombay	1,075	1,187
Bengal	10,483	10,031
North-Western Provinces and Oudh	5,798	6,013
Punjab	834	799
Central Provinces	1,041	1,099
Burma	223	418
Assam	214	209
Coorg	0	4
Hyderabad Assigned Districts	191	145
Ajmere and Merwara	78	51
TOTAL ...	21,361	21,389

The Provinces which showed the greatest loss of life from snake-bite in proportion to population were Bengal (1 to 7,069), the North-Western Provinces and Oudh (1 to 7,084), and the Central Provinces (1 to 9,804). The lowest mortality (excluding Coorg) is reported from the Punjab (1 to 26,041), Assam (1 to 25,953), and Madras (1 to 24,837). The net result is that one person to every 10,166 of the population died from snake-bite during the year as compared with one person to every 10,155 in 1890.

8. The total number of cattle reported to have been killed by snakes was 3,658 as compared with 3,948 in 1890. But these figures are obviously unreliable. In Bengal and the North-Western Provinces and Oudh for instance, where the human mortality from the same cause is so great, only 409 and 210 head of cattle are returned as having been killed by snakes in 1891.

9. The total number of snakes returned as destroyed during the year fell from 512,099 to 85,159, and the amount of the rewards paid for their destruction from Rs 18,914 to Rs. 9,163. This falling-off is almost entirely due to the figures returned from the Bombay Presidency, where only 2,803 snakes are

shown to have been killed against 406,092 in the previous year, and only Rs. 44-12-6 were paid as rewards as compared with Rs. 7,136-2-2 in 1890. The Bombay Government have directed special inquiry into these extraordinary results, and the Government of India will await the explanation. At the same time there can be little doubt that the returns for previous years were open to much suspicion; in 1890, for instance, four-fifths of the total number of snakes returned as killed in British India were reported to have been killed in the Bombay Presidency, and probably a very large number of harmless snakes were included in the returns. The Government of India will also be glad to learn the reasons which have led to the reduction of the rate of reward for *phursas* in the Satara district from six pies (which seems a sufficiently low limit) to one pie. A reward of one pie cannot have any effect, and might as well be discontinued.

10. The question of the measures which should be adopted for reducing the loss of life caused by venomous snakes is one of considerable difficulty. The Government of India are aware that an organized system of rewards everywhere has been advocated by a high authority on the subject, but they are constrained to adhere to the view expressed in their Resolution of the 4th December 1890 that experience has shown that no system of granting rewards for the destruction of snakes is likely to have any appreciable effect on the mortality from snake-bite. At the same time the Governor General in Council does not desire to direct the discontinuance of rewards for snakes destroyed, but will leave it entirely to Local Governments and Administrations to decide whether they should be granted either generally or in particular localities. The North-Western Provinces and Oudh appear to be the only Province in which rewards for snakes have been completely discontinued. His Honour the Lieutenant-Governor suggests that as rewards are not now paid, and it is therefore impossible to report the number of snakes destroyed, these statistics should in future be excluded from the returns. The Government of India are, however, unwilling to sanction this proposal. As rewards are paid in other Provinces, it is desirable that some record should be kept of the number of snakes for the destruction of which payments were made; and even in the North-Western Provinces and Oudh, although the system of rewards has been generally discontinued, it may be thought desirable at any time to revive it in particular municipalities or other areas in which it is considered that the payment of rewards is likely to prove efficacious. While on this subject, the Government of India desire again to invite the attention of Local Governments and Administrations to the suggestion at the end of paragraph 8 of the Resolution of the 4th December 1890 that pictures of poisonous snakes should be circulated in the districts where these reptiles are common, so that there may be no difficulty in identifying those snakes which are poisonous.

11. In the Resolutions of 4th December 1890 and of 15th October 1891 the Government of India suggested that steps should be taken to remove the jungle and under-growth in and around villages both for sanitary reasons, and also with the object of destroying the cover for snakes in inhabited sites, where they are most dangerous to human life. It is too early to expect any definite results from the trial of the measure, but the Government of India desire to express their satisfaction that the matter is receiving attention at the hands of Local Governments and Administrations.

12. The usual statement showing the results reported during the year under review is appended to this Resolution.

ORDER.—Ordered, that a copy of this Resolution be forwarded to Local Governments and Administrations for information and guidance, and that it be published in the *Gazette of India* for general information.

Also that a copy be communicated to the Foreign Department.

GOVERNMENT OF INDIA.

HOME DEPARTMENT.

REVIEW OF THE REPORTS ON THE ADMINISTRATION OF THE JAILS IN THE SEVERAL PROVINCES OF BRITISH INDIA FOR THE YEAR 1891.

No. $\frac{12 \text{ Jails}}{635-646}$.

Extract from the Proceedings of the Government of India in the Home Department (Jails),—under date Simla, the 11th November, 1892.

Read again—

The Reports on the Administration of Jails in the several Provinces of British India for the year 1890, the orders of the Local Governments and Administrations thereon, and Home Department Resolution No. $\frac{5 \text{ Jails}}{606-617}$, dated the 16th October 1891, and accompaniments.

Despatch to the Secretary of State, No. 35 $\frac{\text{Judicial}}{\text{Jails}}$, dated the 28th October 1891.

Read also—

The Reports on the Administration of Jails of the several Provinces of British India for the year 1891, with the orders of the Local Governments and Administrations thereon.

RESOLUTION.

The Provincial Reports on the Administration of Jails for the calendar year 1891 were received by the Government of India, with the Resolutions recorded on them by Local Governments and Administrations, on the dates noted in the marginal statement. They were on the whole submitted with creditable punctuality, the prescribed date being the 1st June. The Report of one Province only was delayed beyond the month in which it was due.

Province.	Date of receipt by the Government of India of the reports for—	
	1890.	1891.
Madras	29th July 1891 ...	7th June 1892.
Bombay	2nd July 1891 ..	24th June 1892.
Bengal	4th June 1891 ...	6th June 1892.
North-Western Provinces and Oudh.	21st July 1891 ...	1st August 1892.
Punjab	4th June 1891 ...	28th May 1892.
Central Provinces ...	6th July 1891 ...	27th May 1892.
Burma	6th June 1891 ...	3rd June 1892.
Assam	28th April 1891 ...	2nd May 1892.
Coorg	11th May 1891	13th June 1892.
Hyderabad ...	23rd June 1891 ..	31st May 1892.

2. The Report of the Commissioners, Drs. Walker and Lethbridge, who were deputed in 1888-89 to inquire into the working of the jails in the larger Provinces of India, has now been fully considered by the Government of India in communication with Local Governments and Administrations. Before passing orders it was thought desirable to convene a Conference of jail experts from the several Provinces to consider (among other matters) the best means of devising a uniform code of jail offences and punishments to be adopted in all Provinces, and a uniform system of marks counting towards remission of sentence. The Conference met in Calcutta and submitted its recommendations towards the close of the last cold weather. The Government of India have decided generally to accept its suggestions, and have recently addressed Local Governments and Administrations, placing before them their matured views and orders on every branch of jail administration. The exhaustive Report of the Commissioners and the orders thereon, which review in detail the conclusions and recommendations of Drs. Walker and Lethbridge, will form a standard manual of reference in all matters relating to jail discipline and management.

3. Statement No. 1 attached to this Resolution contains a general summary of the distribution of prisoners of all classes confined in the jails of British India during the years 1890 and 1891. The number of central (36) and district jails (199) remained the same during the year under review as in 1890. The number of subordinate jails and lock-ups decreased from 510 to 508. The year opened with a total jail population of 89,802 as compared with 87,923.

at the beginning of 1890. There was an increase in the number of prisoners received during the year in the jails of the following Provinces: Madras (67,381 to 75,562); Bombay (52,538 to 53,540); Bengal (80,959 to 87,925); the North-Western Provinces and Oudh (102,926 to 110,743); the Punjab (48,935 to 53,080); the Central Provinces (14,001 to 14,386); Assam (8,149 to 9,437); and Hyderabad (2,337 to 3,225). The number of prisoners received into the jails in Burma decreased from 27,111 to 25,346, and in Coorg from 1,035 to 960. The total number of prisoners in all the Provinces during the year was 524,006, consisting of 499,092 males and 24,914 females, as compared with 493,295 (469,910 males and 23,385 females) in the preceding year. The number of prisoners discharged from all causes during the year under review was 428,362 as compared with 403,521 discharged in 1890; and the number left in jail on the 31st December 1891 was 95,644, as compared with 89,774 remaining on the 31st December 1890. The daily average number of prisoners was 92,969·15 in 1891 against 87,991·45 in 1890.

4. The statistics relating to convicts are shown in statement No. 2. There were 83,264 convicts in jail at the commencement of the year as compared with 81,626 at the commencement of 1890. The numbers of male and female convicts admitted during the year were 168,805 and 10,763 respectively as compared with 157,925 and 9,899 admitted in 1890. The aggregate number of convicts in confinement was thus 262,832 (249,301 males and 13,531 females) in 1891 against 249,450 (236,878 males and 12,572 females) in 1890. The releases from jail during the year amounted to 170,761 as compared with 162,547 in the preceding year. Of the former number, 12,019 (11,677 males and 342 females) were set free on appeal; 146,773 (136,859 males and 9,914 females) worked out their sentences; 11,313 (11,062 males and 251 females) earned their release under the remission rules; and 656 (638 males and 18 females) were granted their liberty by order of Government. It is noticeable that out of the 202 convicts released on the ground of sickness, 105 were set free in Bengal alone. It appears that the large number of releases in this case is attributable to the revised rules 487 and 488 of the Bengal Jail Code, which were framed in consequence of the views expressed by His Honour the Lieutenant-Governor in the Resolution on the Provincial Jail Administration Report of 1890 on the subject of the release of moribund prisoners. These rules apply to two classes of prisoners, namely—(1) those who are almost certain to die, and who are released from motives of humanity, not in the hope that they may recover, but in order that they may have the comfort of dying at home; (2) those who are likely to die if detained in jail, but have a chance of recovery if released. The orders regarding the second class of prisoners are in accordance with the rule laid down in paragraph 28 of Home Department Resolution No. 326 (Jails), dated the 5th September 1888, to the effect that "a convict should be released on the ground of sickness only when it is believed that he will have a chance of recovering outside while he will have none in the jail." It was pointed out that ordinarily, if the jail hospitals were properly maintained and supervised, the chance of recovery within a jail should be greater than it was outside it; but that there might be cases in which the surroundings of jail life might affect a sick prisoner injuriously. The Government of India have, however, no objection to the rules framed by the Bengal Government in respect of both the classes of prisoners described above, provided that all releases in prospect of death (not of recovery) are entered as "deaths" in the mortality statistics of the jails concerned. Other Local Governments and Administrations have been informed accordingly. Of the 454 convicts released by order of Government on grounds other than sickness, 408, as compared with 1,534 in the preceding year, were liberated by the Chief Commissioner of Burma. This number (408) represents the balance of the prisoners sentenced for offences of a political nature, to whom it was decided to extend the clemency of Government in 1890, but who were not released in that year pending a report on their conduct in jail, or because they were unable to find the security required.

It was noticed in the Resolution reviewing the Jail Reports for 1890 that the number of convicts transported to Port Blair, or from Burma to Indian jails, had fallen from 2,140 in 1889 to 1,279. The decrease was chiefly due to the smaller number of Burmese convicts deported as the result of the gradual pacification of that Province, but partly also to the provisional orders of the Government of India, which have since been confirmed

in Home Department Resolution No. $\frac{10\ P.R.}{850\text{-}64\text{-}A.}$, dated the 15th August 1891, restricting (except in the case of Burma) the deportation of convicts to the Andamans to convicts under sentence of transportation for life. No male term-convicts are now sent from India to the Andamans. In the year under review the number deported to the Andamans, or from Burma to jails in India, fell to 922 (868 males and 54 females). The decrease was most marked in the case of Burma, from which Province only 75 convicts were deported to Port Blair and 40 to Indian jails as compared with 357 deported in the previous year to Port Blair and 160 to jails in India. The large increase in the number of convicts deported from Madras in 1891 (155 as compared with 76 in 1890) was due to a change of system under recent orders directing the deportation of convicts from Bombay and the Berars *viâ* Madras instead of *viâ* Calcutta as heretofore.

The extent to which the jail population of the year was reduced by transfers to Lunatic Asylums, escapes, executions, and deaths is compared below with the corresponding figures for 1890:—

	1890.	1891.
Number transferred to Lunatic Asylums	39	61
„ escaped	69	120
Number who died	2,526	2,623
Number executed	357	386

The number of convicts who effected their escape during the year was considerably greater than in 1890. Including the cases of convicts who escaped, but were re-captured during the year, the largest number of escapes occurred in the Madras Presidency (45), and the next largest in Assam (31) and Bombay (28). In Madras the number of escapes in 1891 exceeded the record of the past ten years. The Government of India observe that the best means of preventing escapes is engaging the attention of the Inspector-General of Jails, and will form the subject of a separate report to the Local Government. In the Resolution issued last year the Government of India expressed their opinion that the proper remedy against escapes was to insist on strict vigilance on the part of the warders. The question of rendering more efficient the system of guarding prisoners, whether within the jail or extra-murally employed, and of improving the personnel of the warder and guard establishment, has been discussed in detail in the Jail Committee's Report. The orders of the Government of India on these points have now been communicated to Local Governments and Administrations.

The number of convicts remaining in jail at the close of the year was 88,361 (85,480 males and 2,881 females) compared with 83,251 (80,483 males and 2,768 females) in 1890. Of these, as in 1890, the largest number was in the North-Western Provinces and Oudh (26,886). Bengal comes next with 15,429, and then the Punjab with 11,650. The daily average number of convicts was 85,536·50 in 1891 as compared with 81,189·32 in 1890.

5. Statement No. 3 contains statistics regarding the religion or nationality, age, and previous occupation of the convicts admitted into jail during the year. The number of Europeans and Eurasians (641) was less than in 1890 (962). The number of Native Christians increased slightly from 1,091 to 1,119. There was an increase of 2,251 convicts among Muhammadans, of 8,687 among Hindus and Sikhs, of 994 among Buddhists and Jains, and of 118 among all other classes. The proportion borne by the convicts of the several religions to the total convict population and to the total population of their own class in India in the years 1890 and 1891 is shown below:

Religion.	Ratio per mille of each class of convicts admitted to—				Remarks.
	Total convict population.		Total free population of each class.		
	1890.	1891.	1890.	1891.	
Christians	12·2	9·8	1·7	0·7	
Muhammadans	266·1	261·2	0·9	0·8	
Hindus and Sikhs	633·0	639·9	0·7	0·5	
Buddhists and Jains	69·6	70·6	3·0	1·4	
All other classes	19·1	18·5	0·5	0·3	

The figures for the two years given above are not, however, strictly comparable, as the ratio to total free population in 1890 is calculated on the results of the census of 1881, and that for 1891 on those of the census of that year.

The following table shows the distribution of the convicts admitted to jail in 1890 and 1891 among the four main age-periods :—

	Number of convicts admitted.	
	1890.	1891.
Under 16 years of age	2,057	2,091
From 16 to 40 years	135,683	145,264
From 40 to 60 years	27,284	29,038
Over 60 years	2,807	3,195

There was a large increase in the number of convicts between the ages of 16 and 40. The number of juvenile offenders has increased slightly—from 2,057 in 1890 to 2,091 in 1891; but these figures do not include the boys sent to Reformatory Schools.

The following is a brief summary of the working of these schools during the year. Thirty-five boys were admitted into the Chingleput Reformatory School in the Madras Presidency, and the number on the rolls at the close of the year was 151 as compared with 136 at the close of 1890. Reports regarding 26 boys discharged from the school were received by the Superintendent, which showed that 20 were well conducted, three had emigrated, one had been sent back to the Reformatory, and two were earning their living, but their conduct was not satisfactory. Of the 20 pupils who were well reported on and the two who were earning their living, seven were pursuing the trade learnt in school and three were following occupations rendered easy by their school training. There were 64 boys in the Yeraoda Reformatory School in the Bombay Presidency at the beginning of the year, and 41 (the same number as in 1890) were admitted in the course of the year. Twenty boys were released during the year, two were transferred to jail to undergo their sentence, and three died, leaving 80 boys in the institution at the end of the year. Reports regarding 45 boys discharged from the school showed that 13 were following the trades taught in the Reformatory, two were attending school, 18 were otherwise employed, two were returned as doubtful, one was out of employ, two had been sent to jail, and seven were not traceable. There were 135 boys in the Alipore Reformatory School in Bengal at the commencement of the year and 150 on the rolls on the 31st December 1891. Reports on 65 released boys stated that 50 bore good characters, 11 had been re-convicted and sent to jail, two bore bad characters, and two had died. Since the opening of this institution 242 boys have been discharged, of whom 164 are favourably reported on, 37 have been subsequently convicted and sent to jail, and 41 are viewed with suspicion. In the Hazaribagh Reformatory School there were 301 boys on the 31st December. Reports from Magistrates of Districts on the conduct of released youths show that 59 were well conducted, 19 were not traceable, five were in jail, and five were viewed with suspicion. The new Reformatory School at Bareilly has accommodation for 232 boys, and there were 128 on the rolls on the 31st December 1891. The Reformatory School at Jubbulpore in the Central Provinces was opened on the 1st June 1891, and 41 boys are now confined in it. There were 75 boys in the Paungdè Reformatory School in Burma on the 31st December 1891. Altogether there were 815 juveniles in Reformatory Schools at the beginning of the year and 926 at its close; and the several reports show that the working of these institutions has on the whole been satisfactory.

No Reformatory School has yet been established in the Punjab, but the Government of India are glad to find that the Lieutenant-Governor is strongly impressed with the necessity of providing an institution of this character, and trust that His Honour will be in a position to dispose of this question soon. Assam, Coorg, and Hyderabad are the only other Provinces in which there is no Reformatory School for the confinement of juvenile offenders. A proposal was made by the Assam Administration in 1889, and accepted by the Bengal Government, that juveniles from Assam should be received in the school at

Alipore, but in consequence of a legal difficulty it had to be postponed pending the amendment of the Reformatory Schools Act, V of 1876. In Coorg the matter is of no practical importance. The Resident at Hyderabad is considering the advisability of establishing a special reformatory for the Hyderabad Assigned Districts and Secunderabad.

As in 1890, there was a large increase in the number of convicts who previous to conviction were engaged in agricultural pursuits and of those earning their living by miscellaneous employment. The following table classifies according to their previous occupation the male convicts admitted to jail in 1890 and 1891 :—

	1890.	1891.
Employed under Government or Municipal or other local authorities	4,565	4,607
Professional persons	6,787	6,655
Persons in service or performing personal offices ...	13,583	14,713
Persons engaged in agriculture and with animals ...	84,077	90,795
Persons engaged in commerce and trade ...	7,304	7,253
Persons employed in mechanical arts, manufactures, engineering operations, &c.	6,238	6,729
Miscellaneous persons not classed otherwise ...	35,377	38,067

The condition of the female convicts is shown by the following figures :—

	1890.	1891.
Married	6,113	6,702
Unmarried	475	490
Widows	2,913	3,140
Prostitutes	400	437

6. The following statement contrasts the distribution of the convicts admitted into jail during the past two years according to the length of their sentences :—

	Number of admissions.		Ratio per cent. on total admissions.	
	1890.	1891.	1890.	1891.
Not exceeding one month	59,009	64,253	35·16	35·77
Above one month and not exceeding three months	34,114	34,914	20·33	19·44
Above three months and not exceeding six months	28,825	31,533	17·18	17·55
Above six months and not exceeding one year ...	22,094	23,811	13·16	13·26
Above one year and not exceeding two years ...	12,965	14,296	7·73	7·97
Above two years and not exceeding five years ...	6,568	6,479	3·91	3·61
Above five years and not exceeding ten years ...	1,564	1,770	0·93	0·99
Exceeding ten years	76	93	0·05	0·06
Transportation (*a*) for life	1,232	1,101	0·73	0·62
Transportation (*b*) for a term	828	787	0·49	0·43
Sentenced to death	556	551	0·33	0·30

The principal increase was in sentences of imprisonment for terms not exceeding one month. Altogether 154,511 convicts, or 86·03 per cent. of the

entire number, were sentenced to imprisonment for periods less than one year. There were fewer sentences of transportation than in the previous year, although the number of re-convicted criminals increased slightly (20,558 to 20,803). The figures seem to show that many habitual criminals who might appropriately have been sentenced to transportation escaped with sentences of imprisonment. The question of more effectually dealing with habitual criminals is, however, under separate consideration, and the Government of India will content themselves on this occasion with inviting the renewed attention of Local Governments and Administrations to the remarks in paragraphs 5 and 6 of Home Department Circular No. $\frac{1 \text{ Police}}{418-20}$, dated the 31st May 1890.

7. Of the convicts admitted to jail during the year (179,588), 13,366 had been previously convicted once, 4,139 twice, and 3,298 more than twice. The percentage (11·58) of convicts previously convicted fell below the percentage in 1890 (12·24); but the general ratio was exceeded in the Bombay Presidency (15·02), the Punjab (14·42), the Central Provinces (15·09), Burma (18·23), and Hyderabad (14·55). Of the 2,091 juveniles admitted into jail, 174 or 8·32 per cent. had been previously convicted, a ratio lower than that reported in 1890 (10·48 per cent.). The results of the identification of habitual criminals in jails appear on the whole to be far from satisfactory. In the Resolution reviewing the Provincial Jail Reports for 1890 the anthropometric system for identifying old offenders was commended to Local Governments and Administrations. The Government of India are glad to observe that the matter has been seriously taken in hand in several Provinces. In Bengal the Bertillon system of measurement was introduced under the supervision of the Police Department, and great progress was made during the year in elaborating a scheme for its proper working. Steps have also been taken for introducing the system in the Madras Presidency, the North-Western Provinces and Oudh, the Punjab, the Central Provinces, and Burma. In a circular recently issued the Government of India have requested other Local Governments and Administrations to consider the advisability of taking similar action.

8. Statement No. 6 shows the employment of convicts in jail. The average number sentenced to labour on working days rose from 77,347 in 1890 to 81,549 in 1891; 2,991 convicts on the average were on the sick list and 6,913 convalescent and infirm. The balance available for labour was 71,645 against 68,017 in the previous year. These prisoners were employed as follows:—

	Average number employed.
Unremunerative labour	1,507
Prison officers	3,875
Prison servants	8,434
Gardening	5,596
Preparation of articles for consumption in jails ...	11,306
Jail repairs	3,454
Jail buildings	5,052
Manufactures	31,903
Labour under the Public Works Department ...	2,012
Labour under Municipalities, &c.	2,568

9. Statement No. 7 shows offences committed by, and punishments inflicted on, convicts in jail. The total number of offences rose from 95,146 in 1890 to 99,601 in 1891. The most noticeable increases occurred in the North-Western Provinces and Oudh (8,018 to 10,534) and in Burma (24,375 to 25,938). In Bombay, the Punjab, Assam and Coorg there was a decrease. There was a slight increase in the number of criminal offences, from 440 in 1890 to 483 in 1891, due chiefly to the large increase (39 to 101) reported from Burma. Offences connected with forbidden indulgences or the possession of forbidden articles rose from 10,686 to 12,084, Bengal, the Punjab, and Burma contributing chiefly towards the increase. Breaches of jail rules relating to work declined from 51,598 to 49,416, the decrease being fairly general, except in the Madras Presidency and the North-Western Provinces and Oudh. Offences against prison discipline other than those relating to work increased from 32,422 to

37,618, the largest increases being returned from Bombay, Bengal, the North-Western Provinces and Oudh, and Burma.

The aggregate number of punishments inflicted during the year was 99,578 as compared with 95,136 in 1890. This increase was distributed over every head of punishment, except corporal punishments, as shown below:—

	1890.	1891.
Punishments inflicted by criminal courts ...	466	528
Sol tary confinement	8,194	9,727
Reduced diet	10,885	10,909
Solitary confinement with reduced diet ...	7,085	8,819
Corporal punishments	2,178	2,108
Other punishments	66,328	67,487

It should, however, be noticed that although the total number of punishments was higher in 1891 than in 1890, the daily average number of convicts being greater, the ratio per cent. of punishments to the average strength of convicts was lower than in the previous year. It is also satisfactory that the proportion of whippings to the total number of other punishments inflicted on male prisoners fell from 2·4 to 2·2 per cent. On the other hand, the Government of India regret to observe an increased resort to the punishment of solitary confinement combined with reduced diet, especially in Burma and the North-Western Provinces and Oudh.

The attention of the Government of India has been for some time directed to the differences of system prevailing in different Provinces in the matter of jail discipline and punishments. This question was referred for inquiry to Drs. Walker and Lethbridge, and has been fully dealt with in their report. The conclusion arrived at by the Government of India is that as the criminal law under which offenders are sentenced to imprisonment is the same all over India, it is desirable that uniformity of discipline should be established within the jails, so that the same sentence may everywhere carry with it the same degree of punishment. This is impossible so long as there are separate rules in each Province regarding the offences for which convicts may be punished, the punishments which may be inflicted on them, and the manner in which such punishments shall be registered. To remove these local variations, a Conference, referred to in paragraph 2 of this Resolution, was assembled in January last consisting of the heads of the jail administration in the several Provinces. They have prepared a scheme of jail offences and punishments to be applied to all Provinces in which offences have been classified, and the punishments appropriate to each class of offence have, as far as possible, been defined. The necessary legislation to give effect to the scheme will be undertaken in due course. It will be an essential part of the new arrangements that every offence and punishment, however trivial, shall find a record in the statistics of jail administration of each Province.

10. The number of convicts released during the year who gained remission of sentence under the mark system was 11,147 as compared with 10,814 in the previous year. The number who came under the mark system, but failed to earn any remission, was only 32. The maximum gratuity earned by any convict released during the year was Rs. 50 as compared with a maximum of Rs. 60 earned in 1890. For the same reasons which render it desirable that there should be one set of rules governing the classification of jail offences and the infliction of punishments in jails, the Government of India have decided that there shall be a uniform system throughout India for the award of marks to convicts for industry and good conduct; they have also made the mark system applicable to all convicts sentenced to one year and upwards; hitherto the limit has been two years. The Conference referred to in the last paragraph have prepared a scheme for this purpose to which early effect will be given. The Government of India have also directed that the marks earned by convicts shall be taken into consideration, not only in calculating the period of sentence to be remitted, but also with reference to the grant of prison privileges and the selection of convicts for promotion to any grade of prison officer.

11. Of the 163,447 convicts imprisoned during the year, 142,593 were unable to read or write, 16,299 were able to read and write a little, and 4,555 could read and write well. The daily average number under instruction declined from

3,029 in 1890 to 2,361 in 1891. Out of 2,804 convicts released during the year who had been under instruction in jail, 530 were still unable to read and write, and 1,540 were only able to read and write a little. These results are far from satisfactory, and justify the conclusion arrived at by the Government of India, when reviewing the Jail Reports for 1890, that the attempt to educate adult convicts should be abandoned. Orders have issued accordingly. As regards juvenile prisoners, it is hoped that in time most of them who are imprisoned for a period sufficiently long to enable them to profit by instruction will be transferred to Reformatory Schools, but for the present the Government of India have laid down a rule that all prisoners under the age of 18 who are in Central or District Jails under sentences of a year or more should be brought under instruction, not only in reading and writing, but also, if possible, in some simple handicraft; and that arrangements should be made, as far as practicable, to concentrate such prisoners in jails where facilities exist for instructing them.

12. The gross expenditure on jails increased from Rs. 52,81,288 in 1890 to Rs. 54,78,045 in the year under review. The total cost per head of average strength, however, fell from Rs. 60-4-0 to Rs. 59-2-10. It was again lowest in the North-Western Provinces and Oudh (Rs. 43-10-5) and (excluding Coorg) highest in Assam (Rs. 80-15-11). The average cost for all Provinces was made up of the following items: Rations, Rs. 25-1-1; Establishments, Rs. 20-14-11; Police guards, Rs. 2-12-4; Hospital charges, Rs. 1-13-7; Clothing, Rs. 3-1-3; and Contingencies, Rs. 5-9-4.

The average cost of rations per head of prisoners increased from Rs. 24-11-10 to Rs. 25-1-1. Excluding Coorg, it was highest in Assam (Rs. 33-12-1); in Burma it was Rs. 32-3-5, in Madras Rs. 27-13-8, in Bombay Rs. 27-2-2; it still continues lowest in the North-Western Provinces and Oudh (Rs. 21-8-6). The total cost of establishments rose from Rs. 19,34,817 in 1890 to Rs. 19,37,791 in 1891. There was an increase of expenditure under this head in Bengal, the Punjab, the Central Provinces, the Hyderabad Assigned Districts, and Coorg. In the other Provinces the expenditure decreased. The total charge on account of Police guards fell from Rs. 2,71,557 in 1890 to Rs. 2,56,896 in 1891, and it is hoped that the expenditure under this head will decrease still further from year to year, *pari passu* with an advance in efficiency, as the existing Police guards are replaced by Jail Warder guards in accordance with the orders which have just been issued by the Government of India. Hospital charges rose from Rs. 1,67,921 in 1890 to Rs. 1,71,560 in 1891. Excluding Coorg, the cost per head of daily average strength was highest in Bengal (Rs. 3-1-5); but the increased cost in this Province was in some measure due to the increase in the daily average number sick and also to the higher prices prevailing during the year. In the North-Western Provinces and Oudh there was a marked increase in the hospital charges, from Rs. 28,190 in 1890 to Rs. 34,941 in 1891; this is partly accounted for by the outbreak of cholera in a larger number of jails during the year. The total charge for clothing in the several Provinces also increased from Rs. 2,79,011 to Rs. 2,83,904. The total charge for contingencies, which had fallen from Rs. 4,92,412 in 1889 to Rs. 4,70,115 in 1890, rose in 1891 to Rs. 5,17,211. Excluding Coorg, Burma was the only Province which showed a lower expenditure than in the previous year, all other Provinces having a large increase under this head. It is, however, impossible to institute any comparison between the several Provinces in this matter owing to the widely different systems in force of classifying items under "contingencies." The Government of India have consulted Local Governments and Administrations on the subject, and are considering the practicability of determining the items which should properly be classed under this head.

13. The gross cost of maintaining prisoners (Rs. 54,78,045) was reduced by Rs. 13,71,328-13-0, the total amount of their cash earnings, and the net cost to Government was Rs. 41,06,716-3-0 as compared with Rs. 42,72,249-3-0 in the previous year. The increase in cash earnings (Rs. 3,62,290) is very satisfactory. In Bengal the amount realized under this head rose from Rs. 1,50,842 in 1890 to Rs. 3,14,020 in 1891. In Burma the income from this source amounted to Rs. 3,22,733. The average net cost of maintaining a prisoner in India in 1891 was Rs. 44-5-10 against Rs. 48-11-10 in 1890. It was lowest in Burma (Rs. 36-14-4) and highest in the Madras Presidency (Rs. 60-14-6). The

following statement compares the average cost in the several Provinces in 1890 and 1891:—

	1890. Rs. A. P.	1891. Rs. A. P.
Burma	42 13 5	36 14 4
Central Provinces	41 5 1	37 8 4
North-Western Provinces and Oudh ...	38 10 11	37 10 0
Punjab	49 2 1	46 8 4
Coorg	52 1 0	46 13 8
Bengal	60 7 11	48 4 9
Bombay	49 8 2	48 6 6
Hyderabad Assigned Districts	51 7 8	52 6 6
Assam	54 0 3	58 1 10
Madras	66 12 0	60 14 6

14. The health of the jail population during the year was on the whole satisfactory. The total number admitted into hospital was 90,932 compared with 100,113 in 1890; the daily average number sick was 3,183·25 in 1890 and 3,122·25 in 1891; and the aggregate number of deaths was 2,806 in 1891 as compared with 2,689 in the preceding year. The proportion to average strength of admissions into hospital, of the daily average number sick, and of deaths was lower than in 1890, as will be seen from the following figures:—

	Ratio per mille of daily average strength. 1890.	1891.
Admissions into hospital throughout the year ...	1,142·34	978·57
Daily average number sick	36·32	33·60
Deaths from all causes	30·68	30·19

Of the 177,622 prisoners discharged during the year (including 5,620 of whom details are not available), 96,721 had gained weight, 36,069 had neither gained nor lost, and 39,212 had lost weight during their confinement in jail.

The deaths from fevers, cholera, and bowel-complaints (dysentery and diarrhœa) in all jails during 1890 and 1891 are thus contrasted:—

	1890.	1891.
Fevers	238	261
Cholera	146	344
Bowel-complaints	867	738

The following statement compares the aggregate number of deaths in the jails of each Province in 1890 and 1891 and the ratio of mortality in each year, and contrasts the ratios per mille of deaths in jails with the average maximum and minimum death-rates reported among the free population:—

		Number of deaths in jails.	Ratio per mille of deaths in jails to average strength.	Ratio per mille of deaths among the free population.	Highest ratio of deaths among the free population.	Lowest ratio of deaths among the free population.
Madras	1890	213	23·85	22·8	42·7	13·4

* Lower Burma only.

In the Resolution of the 17th October 1890 reviewing the Jail Reports for 1889 it was remarked that the defects in the registration of the mortality among the free population deprived the above statement of much of its value for purposes of comparison. It was at the same time pointed out that the amount of mortality in jails, the statistics regarding which are no doubt recorded with absolute accuracy, is not swelled by the infant mortality which prevails to so

great an extent among the free population; and the Government of India expressed their opinion that when the mortality in a jail exceeds considerably that recorded among the free population in the neighbourhood, this result must be presumed to be due to defects either in the jail buildings or the sanitary arrangements at the jails. Judged from the point of view of the above remarks, it is satisfactory to find that in those Provinces in which the registration of vital statistics among the general population has made some approach towards accuracy—the North-Western Provinces and Oudh, the Punjab, the Central Provinces, and the Hyderabad Assigned Districts—the death-rate of the jails for the past two years has been appreciably below that reported among the free population. On the other hand, the Government of India notice with regret that there has been a considerable increase in the mortality in the Madras Jails during 1891, and a still higher increase in Assam.

15. In the Madras Presidency the rise in the death-rate was chiefly caused by the greater prevalence of cholera and bowel-complaints, which together accounted for 101 more deaths than in the preceding year; but, even excluding cholera, there were 257 deaths (26·17 per mille) as compared with 191 (21·39) in 1890. Cholera was epidemic in all Central Jails except Rajahmundry and Salem. The proportion of prisoners admitted to hospital and on the daily sick list was less than that reported in 1890; but it is not clear how far this result is attributable to a change of system, that is to say, to the treatment as out-patients of prisoners in trivial cases which were formerly admitted into hospital. The Government of India are glad to observe that the unfavourable statistics of the year are engaging the attention of the Local Government and the Inspector-General.

The statistics of the Bombay Presidency call for no special remarks.

The health statistics of prisoners in Bengal were in all respects more favourable than in the preceding year. As observed in paragraph 4 of this Resolution, however, no less than 105 convicts were released during the year on the ground of sickness; and it can hardly be doubted that, but for these releases, the mortality would have been higher. Cholera, fevers, and respiratory complaints were more fatal than in 1890. There were 12 cases and 11 deaths from cerebro-spinal fever in the Alipore Jail; this disease appears to be confined to three jails in the Province, and the Government of India would be glad to hear that some result has attended the deliberations of the Committee appointed by the Bengal Government to investigate its origin and causes.

The general health of the prisoners in the jails of the North-Western Provinces and Oudh improved considerably during the year under review. In the Punjab the health of the prisoners was, on the whole, satisfactory.

The rise in the prison mortality of the Central Provinces from 21·49 in the previous year to 27·06 per mille is attributed in some degree to the bad state of health of the prisoners on conviction; but it is a matter for regret that such removable causes as overcrowding and dampness should have been present in some jails. The Chief Commissioner should consider the best means of remedying these defects.

The statistics for Burma show an increase in the death-rate, but a marked reduction in the proportion of prisoners admitted to hospital and on the sick list. The increased mortality was mainly due to the prevalence in Lower Burma of cholera, especially at the Toungoo and Moulmein jails, and in Upper Burma of respiratory diseases, especially at Mandalay and Myingyan.

The health of the prisoners in the jails of Assam was very unsatisfactory during the year. Cholera and bowel-complaints chiefly accounted for the rise in the death-rate; the latter class of diseases appears to have prevailed in all jails. The special causes of increased mortality during the year have formed the subject of separate correspondence with the Chief Commissioner.

In Berar the health of the prison population continued satisfactory.

ORDER.—Ordered, that copy of this Resolution be forwarded to all Local Governments and Administrations for information and guidance, and to the Department of Finance and Commerce for information.

Ordered also, that this Resolution be published in the Supplement to the *Gazette of India*.

[True Extract.]

C. J. LYALL,
Secretary to the Government of India.

Statements appended to Home Department Resolution No. $\frac{12 \text{ Jails}}{635-646}$, dated the 11th November, 1892.

* The jails in Madras, Bengal, and Burma are guarded by warder guards.
† Excluding the cost of convicts in the North Lushai Hills Police Jail.
‡ In calculating the cost per head, the average strength of the Criminal Leper Ward (18·77) is excluded, the charges of this institution not having been adjusted during the year.
§ Reserve warder guards were substituted for Police guards in district jails on the 1st November.

C. J. LYALL,

Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the week ending at 8 a.m. on Saturday, November 5th, 1892.

During the week under review a considerable change in the weather has been carried out over a large part of India. Since the beginning of the month the weather has been in a more or less unsettled state over the southern half of the Indian region, though over the northern half the weather has been fine and the barometer relatively high. Within the present week the high pressures and fine weather have extended slowly, and at the close of the period the barometer read above the normal average, except at a few of the most eastern stations, while the winds had taken up their normal cold weather circulation, and rain had almost ceased. This change was carried out very slowly. From October 30th to November 2nd conditions were very unsettled throughout North-Eastern and Central India and the Peninsula; and though no storm of any consequence affected the weather, yet heavy local falls of rain were reported within the region mentioned above. On the 3rd the amount of rain sensibly decreased, though the area of country over which rain was received had not diminished much. On the 4th both the rainfall area and the amount of rain had decreased, and on the 5th the only rainfall was a few light showers over North-East India and the extreme south of the Peninsula.

On the 3rd pressure was relatively high in the extreme north and extreme south of the Indian region, while a band of low pressure, within which a small depression existed, stretched across the central parts of the Peninsula. The winds were very variable. An irregular cyclonic circulation existed over the central parts of the Peninsula, but in all other parts of India the directions were very variable. The force was moderate. Rain was more or less general over Burma, Bengal, the Central Provinces, and the Peninsula. Heavy amounts were reported from the stations in Orissa, the Circars, and the Central Peninsula, but elsewhere the fall was only moderate or light. On the following day, the 31st October, the general distribution of pressure was unaltered. Readings remained highest in the extreme north and extreme south and lowest over the central parts of the Peninsula; but, owing to the barometric changes in different parts of the country, the pressure differences were much less, and the distinctive features of the distribution less pronounced. The winds were easterly over Bengal and the central parts of the country; very variable elsewhere. Rain had ceased in Lower Burma, but remained more or less general over Bengal and a large part of the Central Provinces and of the Peninsula. In some places the amounts were still fairly large. On November 1st the distribution of pressure had again assumed more pronounced features without altering its general characteristics. Readings were highest along the line of the Himalayas and over the south of the Bay, and were lowest over the Circars, Orissa, and South-West Bengal. Gradients were moderately steep over the Bay and over Bengal, but great uniformity of pressure existed over North-Western and Central India and the west of the Peninsula. Winds were feebly cyclonic around the low pressure area noticed above, and a well marked easterly current of air prevailed up the north side of the Gangetic plain; but elsewhere the directions were still variable. Rain was falling in Upper Burma, Assam, Lower Bengal, and over a large part of Central and Southern India. The amounts were large in the neighbourhood of the above mentioned depression, but moderate or light in other localities. The chart of the 2nd showed that pressure was highest over the extreme south of the Bay. A large shallow depression covered the Bay area and Lower and Western Bengal, while a second depression existed off the Bombay Coast, and a third depression over Western Rajputana. The winds were even more variable than on the previous days.

Rain was falling generally in Burma, Assam, Bengal, Orissa, and the west of the Peninsula, while scattered and on the whole light showers had fallen in the North-West and Central Provinces and parts of Madras. In Eastern and Lower Bengal the fall was very, and on parts of the West Coast moderately, heavy. On the 3rd the barometer was rising everywhere, the change, except in the south and north-east, being generally brisk. Pressure had become very uniform, but readings were slightly higher in North-West India and slightly lower over the Bay than elsewhere. The winds were irregularly cyclonic around the Bay area and very variable elsewhere. Rain continued to fall in Burma, Assam, Lower Bengal, and the west of the Peninsula, but the amounts were small. The chart of the 4th showed that the barometer had continued to rise. The change was brisk to rapid, except in the extreme east and north-east, and a large high pressure area had been formed in the north-west. Readings were still lowest over the Bay, and an irregular cyclonic circulation of the winds continued to blow around that area. The normal north-west current down the Gangetic plain was beginning to appear, while in other parts of the country there were many instances of northern and north-eastern winds. Showers of small amount had fallen over Burma and the southern half of the Peninsula. On the 5th the barometer was falling slowly over the west of the Peninsula and in parts of Lower Burma, but was still rising elsewhere. The high pressure area in the north-west had increased and intensified, while readings were low over the south-east of the Bay and off the west coast of the Peninsula. The wind currents blew from the normal cold weather directions, and, except for a few showers in North-East India and the south of the Peninsula, the weather was fine.

Temperature.—The following table shows the variations of the mean temperature from the normal on each day of the week for the principal Provinces of India:

Province.	October.		November.					Mean variation of week.
	30th.	31st.	1st.	2nd.	3rd.	4th.	5th.	
	°	°	°	°	°	°	°	°
Burma	−0·6	+0·2	+0·1	−0·3	−1·0	−1·0	−0·5	−0·4
Bengal and Assam	+2·6	−0·2	−1·6	+3·1	−1·2	+0·3	−0·1	+0·4
North-West Provinces and Oudh.	+0·6	+1·0	+2·8	+2·0	+1·9	+1·4	+0·1	+1·4
Punjab	−0·4	−0·3	−0·4	+1·0	+0·5	0	−0·5	0
Bombay	+0·4	−0·3	+0·4	−1·7	−2·0	+2·3	−0·4	−0·8
Central Provinces and Berar	+3·1	+2·9	+3·1	+2·6	+2·3	+2·0	+1·6	+2·5
Central India and Guzerat	+2·7	+2·6	+2·2	+0·3	−2·9	−1·8	−0·5	+0·4
Sind and Rajputana	−0·8	+0·1	+1·0	+0·1	−0·7	−0·4	−2·0	−0·4
Madras	0	+0·4	+1·3	+2·0	+2·4	+2·7	+2·0	+1·5
Mean for whole India	+0·8	+0·7	+1·0	+1·0	−0·1	+0·1	0	+0·5

On five days of the week the general temperature of India exceeded the normal. On one day it exactly equalled the normal, and on the remaining day there was a trifling deficiency. The mean for the whole week for the whole of India was ½° above the average. The provincial variations show that in the Central Provinces the mean was 2½° and in the North-West Provinces and Madras 1½° above the average; but in the other Provinces the variations were very small. In the Central Provinces the excess was due to the very high night temperatures.

Rain.—The table at the close of the summary shows that in nine of the rainfall divisions, *viz.*, the North-West Provinces (West and Submontane), the Punjab (South, Central, Submontane, and West), Sind, Rajputana, and Central India (West), there was no rainfall during the week under review, and that in eight more divisions, *viz.*, North Bengal, North Behar, North Oudh, the North-West Provinces (Central), the Punjab (North-West), Guzerat, Kathiawar, and Central India (East), the average fall of the division was less than one-tenth of an inch during the week. In all the other divisions effective rain was received. The heaviest average actual fall for the week was 4·15 inches in the East Coast (North), followed by 4·07 inches in Deltaic Bengal and by 3·98 inches in Eastern Bengal. The column of average normal rainfall for the week shows that all over the Gangetic plain and North-West India the average rainfall of the different divisions is small—less than one-tenth of an inch,—so that in this respect the normal and the actual distribution agree fairly well; but the heaviest normal rainfalls are 2·70 inches in the East Coast (South), followed by 2·42 inches in the East Coast (Central). Hence the excessive rainfall in Deltaic and Eastern Bengal and around the head of the Bay generally was very abnormal.

The third column of the table shows that twenty-nine divisions, or rather more than half, had heavier rain than usual during the week; that most of the remainder had less than usual; and that in two there was no departure from the average. The excess was generally reported from Burma, Bengal, the east of the North-Western Provinces, the east and west of the Peninsula, and the Central Provinces. The greatest excess was 3·68 inches in Deltaic Bengal, followed by 3·37 inches in Hyderabad (South). The greatest deficiency was 2·17 inches in the East Coast (South). Hence this column shows that the rainfall was largely diverted to the north of the Bay, and that the Carnatic had much less than usual.

The final three columns of the table show the actual and normal rainfall for the period October 16th to November 5th, and the excess or defect of the former from the latter expressed as a percentage. There has been a considerable excess over Arakan, Bengal, the west of the Peninsula, the central parts of the country, and the East Coast, and a general deficiency elsewhere. The deficiency over the Gangetic plain and North-Western India is, however, of small importance, as the anticipated rainfall of this season in this locality is small.

The following gives the largest total amounts received during the week as reported in the rainfall telegrams of the week:

Division.	District.	Station.	Amount.
Lower Burma	Pegu	Kyauktan	6·96 inches.
East Bengal	Dacca	Sudder	8 96 „
Deltaic Bengal	Jessore	Ditto	10·11 „
Orissa	Puri	Ditto	6·07 „
Malabar	Calicut	Tellicherry	6·93 „
Mysore	Bangalore	Devanhalli	4·75 „
Konkan	Ratnagiri	Devgad	9·74 „
Deccan	Belgaum	Sudder	7·16 „
Central Bengal (East)	Sambalpur	Bargarh	7·10 „
East Coast (North)	Godavari	Tuni	17·00 „
Ditto (Central)	Nellore	Ongole	6·40 „
Madras (Central)	Bellary	Harpanahalli	6·30 „

SIMLA, *10th November, 1892.*

W. L. DALLAS,
Asst. Meteorological Reporter to the Government of India.

J. W. P. MUIR-MACKENZIE,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 5th November.*—Rainfall very heavy in the greater part of the Circars; heavy in the remainder, in the northern part of the Deccan districts, and on the West Coast; light in the Karnatic and in the Central and Southern districts. Cultivation still active, and sowings going forward generally. Standing crops are generally good, but damaged by excessive rain in the Circars and parts of the Deccan. They need rain in the southern parts of the Central and Karnatic districts. Harvest of early crops still continues favourable. Pasture and water abundant and condition of cattle good. Price of food-grains generally easier, though heavy rain and floods have caused slight rise in four districts. General prospects favourable.

Bombay.—*For week ending 9th November.*—Rain heavy in two and moderate or slight in twelve districts. Standing crops damaged by the late excessive rain in parts of nine districts and by locusts or blight in parts of Sind. Reaping of early and sowing of late crops retarded by rain in parts of Bijapur, but progressing elsewhere. Prospects of early crops generally fair. Agricultural stock good and fodder sufficient.

Bengal.—*For week ending 5th November.*—At the beginning of the week there was heavy rainfall in East and South-West Bengal, Orissa, and Chota Nagpur, and light rain in South Behar and North Bengal. Elsewhere little or no rain. Weather now fine over the Province. Prospects of *aman* improved in Burdwan division and generally good, except in parts of Behar, where the crop has suffered from continued drought. *Rabi* and *poppy* sowings in progress. Prices remain almost stationary. In Mymensingh price of rice falling and prospects of *aman* excellent. Supply of fodder and water ample. Cattle in good condition. Two hundred and sixty-four destitute persons are receiving gratuitous relief in the Diamond Harbour sub-division under section 21-A, Famine Code. Distress slight and passing. No cause for apprehension.

North-Western Provinces and Oudh.—*For week ending 9th November.*—Slight showers have fallen in the Central districts, but more rain is required to ensure proper germination of the *rabi*. In the Eastern districts rain is urgently needed for late rice, which is drying for want of moisture. Irrigation of crops going on. Prospects generally favourable. Prices fairly steady and show a tendency to fall in some districts.

Punjab.—*For week ending 9th November.*—Slight rain has fallen in the Rawal Pindi district. Prices unsettled in one district, falling in another, rising in two, and stationary elsewhere. Harvesting of autumn crops in progress in most, though completed in some, districts. Sowings of spring crops going on. Crops outturn and prospects are generally reported good. Outturn is said to be an average one in Lahore. Locusts are entering Ferozepore from Bikanir side, and have done some damage; but prompt measures have been taken for their destruction. They have been destroyed in Hissar. Some of the crops have been damaged by blight and insects in Lahore, and some are dried up in parts of Shahpur. Cattle are generally reported in good condition. Fodder sufficient throughout the Province.

Central Provinces.—*For week ending 9th November.*—Not received.

Burma.—*For week ending 5th November.*—LOWER BURMA: Prospects unchanged. Upper Burma: Some damage has been caused by heavy rain and floods in six districts. Crops have failed in several circles of the Gangaw subdivision of Pakokku district. The paddy crops in Yamethin will fail if rain does not fall within a week. Crops prospects generally in Upper Burma are fair, and no material change has taken place during the week.

Assam.—*For week ending 8th November.*—Weather seasonable. Mustard sowing continues. Prospects of crops generally good. Condition of cattle normal. Fodder and water sufficient.

Mysore and Coorg.—*For week ending 9th November.*—MYSORE: Rain 0·69 inch in civil and military station. More rain wanted in three districts. Crops and prospects generally good. Extensive *corocana* harvested in parts. Prices risen in Bangalore district.

COORG: Rainfall 0·18 inch. Standing crops in good condition. Picking of cardamoms still in progress. Coffee ripening. Prices stationary. Fodder and water-supply sufficient.

Berar and Hyderabad.—*For week ending 9th November.*—BERAR: Average rainfall 0·43 inch. Weather cool and cloudy. *Kharif* crops in good condition, except in parts of Basim and Buldana. Picking of cotton commenced in Basim and Amraoti. *Rabi* sowings in progress, except in Pusad and Ellichpur. Fodder and water sufficient. Cattle healthy. Prices almost stationary, but risen in Wun. Akola report not received.

HYDERABAD: Rain during week 4·32 inches; total since 1st January 51·63 inches. Sowing of *rabi* crops in progress. *Abi* crops in good condition. General health good. Prices—wheat 9¼, coarse rice 9⅛, white *juar* 14⅝, yellow *juar* 18, and *tur* 11¼ seers per *halli sicca* rupee.

Central India.—*For week ending 9th November.*—Slight showers during the week in one Agency. *Kharif* crops being harvested and *rabi* sowings in progress. Opium sowings commenced in Western Malwa, Bhopawar, Neemuch, and in parts of Gwalior territory. Condition of agricultural stock generally good. Pasturage good and sufficient. Prices of food-grains rising in Goona and steady elsewhere.

Rajputana.—*For week ending 9th November.*—No rain. Reaping of *kharif* crops and sowings for *rabi* still continue. Harvest prospects generally good. Pasturage and fodder sufficient. Prices falling in six States, steady in five, rising in one, and fluctuating elsewhere.

Nepal.—*For week ending 3rd November.*—Not received.

SUPPLEMENT TO

The Gazette of India.

No. 47.} CALCUTTA, SATURDAY, NOVEMBER 19, 1892.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 12th November.*—Rainfall fair near coast from Cuddalore southwards; scarcely any rain elsewhere except showers on West Coast. Holding off of rains being felt in Carnatic and south, and crops reported to be withering in parts. Cessation of rain in Circars and Deccan beneficial. Cultivation and sowing still active, and standing crops generally thriving. Early harvest continues favourable. Pasture and water generally abundant, but supply of water for irrigation deficient in Carnatic. Cattle in good condition Prices easier in Deccan and on West Coast, almost stationary in Carnatic, slightly higher in Circars, Central and Southern districts.

Bombay.—*For week ending 16th November.*—Slight rain in parts of five districts. Standing crops suffering from effects of late excessive rain in parts of five and damaged by locusts or other insects in parts of two districts. Harvesting of early and sowing of late crops progressing generally. Prices generally steady. Agricultural stock good and fodder sufficient.

Bengal.—*For week ending 12th November.*—No rain fell during the week, and the cold weather has set in. Reports of the winter rice crop continue generally satisfactory over the whole province, except in parts of Behar where no improvement has occurred. In Burdwan, Midnapore, and Hooghly the crop was much benefited by the last rain. Spring and poppy sowings are in progress, and conditions generally favourable, but more moisture required in Patna and Dur-

bhanga. Prices are generally steady, but show a tendency to fall in the eastern districts and elsewhere. In Mymensingh the price of rice has further fallen, and new rice will shortly be in the market. Three hundred and sixty-one persons received gratuitous relief in the Diamond Habour Sub-Division of the 24-Parganas district, against 264 in the preceding week. Fodder and water-supplies are sufficient, and cattle doing well.

North-Western Provinces and Oudh.—*For week ending 16th November.*—Weather clear. Spring sowings almost completed and poppy sowing commenced. Rice crops suffering for want of rain in places. Irrigation in full progress. Prices generally steady and have fallen in a few districts.

Punjab.—*For week ending 16th November.*—Rainfall *nil*. Harvesting of autumn crops in progress; sowing of spring crops going on. Condition and prospects of standing crops are good. Outturn of rice and cotton is reported good, and that of maize and *moth* below the average in Lahore Locusts again appeared in parts of the Hissar district. Condition of cattle is generally reported good. Fodder generally sufficient. Prices rising in one district, falling in another, stationary elsewhere.

Central Provinces.—*For week ending 9th November.*—The clouds have now cleared and bright weather has set in. The recent heavy rain has been of great benefit to the rice crop which will yield satisfactorily; the other autumn crops have also been generally improved, save in Nimar where the total rainfall up to date is 14 inches over the average. Some portion of the earlier spring sowing has been damaged and re-sowing will be necessary, but generally the rain has been of far more good than harm to the spring crop.

For week ending 16th November.—Clear weather has continued. The prospects of the autumn crops are generally excellent. Cotton and *jowar* promising as well as rice—a combination which rarely happens. The sowing of the spring crops has in places been delayed by the October rain, and here and there it has been necessary to resow fields sown before the rain fell. But the seed has everywhere germinated well, and the outlook is very satisfactory for the spring as well as the autumn harvests.

Burma.—*For week ending 12th November.*—LOWER BURMA: Prospects continue good. Early paddy being reaped in two districts. UPPER BURMA: No important change in crop prospects has taken place during the week. Some damage has been caused by floods in Mandalay and Bhamo. Rain is badly wanted in four districts. The paddy crop in Yamethin is in a critical condition.

Assam.—*For week ending 16th November.*—Weather dry. Mustard sowing continues. Crop prospects generally good. Condition of cattle normal. Fodder and water sufficient.

Mysore and Coorg.—*For week ending 16th November.*—MYSORE: Crops good except in parts of three districts where more rain is wanted. Prospects generally favourable. Prices fallen in one district.

COORG: No rain. Rice crops in good condition. Coffee ripening. Cardamom-picking nearly completed. Prices stationary. Fodder and water-supply sufficient.

Berar and Hyderabad.—*For week ending 16th November.*—BERAR: No rain. Weather cold Autumn crops in good condition except in parts of Buldana. Picking of cotton commenced throughout the province. Spring sowings except wheat completed. Fodder and water sufficient. Prices almost stationary.

HYDERABAD:—Rain moderate during week. Harvesting of irrigated crops commenced. Sowing of spring crops in progress. Prices steady.

Central India.—*For week ending 16th November.*—No rain during week Spring sowings progressing, but winter rain is required in Bundelkhund. Autumn crops being harvested; expected outturn fairly good. Cotton being collected in Bhopawar. Condition of agricultural stock good except in part of Bhopal. Prices of food-grains slightly lower in Neemuch; steady elsewhere.

Rajputana.—*For week ending 16th November.*—Reaping of autumn crops and sowings for the spring crops still continue. Harvest prospects generally good. Pasturage and fodder sufficient. Prices steady in eight States, falling in three others, risen in one, and fluctuating elsewhere.

Nepal.—*For week ending 3rd November.*—Weather fair. Harvesting of rice completed; outturn excellent.

For week ending 10th November:—Weather fair.

J. W. P. MUIR-MACKENZIE,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

FINANCE AND COMMERCE DEPARTMENT.

No. 48.} CALCUTTA, SATURDAY, NOVEMBER 26, 1892.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for week ending at 8 a.m. on Saturday, November 12th, 1892.

The week under review has been one of steady fine weather throughout nearly the whole of the Indian region. Pressure has been generally highest over the Central Provinces and Eastern Rajputana, and lowest over Lower Burma, the extreme south of the Peninsula and on occasions over the extreme north-west of India. The pressure differences have, however, on each day, been small and the winds have been light, blowing with a feeble anticyclonic circulation out from and around the central high pressure area. Over the regions where pressure has been low the weather has, at times, been slightly unsettled, and light, scattered showers have fallen, but with these exceptions there has been no rain throughout the week. The clear cloudless weather has been accompanied with much radiation, and the night temperatures have been steadily and largely lower than usual. The day temperatures have also been below the normal in the majority of cases, but the abnormal deficiency has been less marked and less universal than was the case with the night temperatures.

The chart of the 6th showed a high pressure area over the south of the Punjab, Rajputana, and Central India, while relatively low readings were reported from Burma, the Bay, and the south of the Peninsula. The winds were anticyclonic, blowing from north-west down the Gangetic plain, from north over the Bay area, and from east in the Central Provinces and the centre and west of the Peninsula. The force was generally moderate or light. Rain had fallen over the west and south of the Peninsula, at Colombo, at one or two stations in

Madras and Burma and at Gnatong. The chart of the 7th showed that the high pressure area had moved south-eastward, and that it covered Rajputana, Guzerat, Central India, the Central Provinces and part of the Nizam's dominions. The positions of the low pressure areas were generally the same as on the 6th. The winds were practically unchanged. Rain had still further decreased, and the only falls were a few scattered showers in the Peninsula and Burma, the heaviest being 0·34 inch at Tounghoo. On the 8th a shallow low pressure area had appeared over the western desert, but otherwise the pressure conditions were unchanged. The wind had become easterly at some Punjab stations, but elsewhere the ordinary cold weather circulation was maintained The weather was very fine generally, but showers had occurred at Bassein, Theyetmyo, Gnatong, Wellington, Mangalore and Cochin. By the morning of the 9th the feeble low pressure area which had been shown over the western desert on the 8th had reached the east of the Punjab and west of the North-Western Provinces, but there had occurred no other change. Calms had succeeded the easterly winds in the Punjab, and variable breezes were reported from the Gangetic plain. Showers had fallen over Lower Burma and the south of the Peninsula and at Roorkee and Srinagar. The chart of the 10th showed that the low pressure area had continued its easterly advance and lay over North Bihar. A large high pressure area overlay North-Western and Central India and the centre of the Peninsula, while readings remained low in Burma and the south and west of the Peninsula. The wind directions were fairly normal. Heavy rain had fallen at Tavoy, and moderate rain at Negapatam, and showers at a few other places. By the 11th the shallow low pressure area had disappeared and pressure decreased steadily from Rajputana to Burma. The differences were, however, somewhat greater. The winds remained anticyclonic. The weather was very fine generally, but showers had occurred at Rangoon and at a few places in the south of the Peninsula. On Saturday, the 12th, pressure was increasing except in the North-West, but the distribution was unaltered. The wind directions were practically the same as on the 11th and the weather was very fine. Light showers had, however, occurred at Colombo, Moulmein and Tavoy.

Temperature.—The following table shows the variations of the mean temperature from the normal on each day of the week for the principal Provinces of India :—

Province.	6th.	7th.	8th.	9th.	10th.	11th.	12th.	Mean variation of week.
	°	°	°	°	°	°	°	
Burma	+0·2	+0·2	+0·6	+0·4	+0·5	+0·9	+0·9	+0·5
Bengal and Assam	—1·8	—3·0	—3·8	—3·9	—2·9	—2·1	—1·9	—2·8
North-Western Provinces and Oudh	—1·3	—2·6	—3·0	—0·2	+0·8	—0·5	—0·9	—1·1
Punjab	—2·0	—2·8	—0·7	+0·3	—0·9	—1·6	—0·9	—1·2
Bombay	+0·7	+1·1	+0·7	—1·0	—1·9	—3·1	—4·0	—1·1
Central Provinces and Berar	+1·5	—1·6	—2·9	—3·5	—3·2	—2·9	—3·4	—2·3
Central India and Guzerat	—1·1	—2·4	—2·6	—1·6	—1·5	—1·6	—3·0	—2·0
Sind and Rajputana	—2·8	—1·7	+0·4	—0·3	—1·2	—2·7	—1·1	—1·3
Madras	+1·2	+0·8	+0·1	—1·1	—1·4	—2·7	—2·2	—0·8
MEAN FOR WHOLE INDIA	—0·6	—1·3	—1·2	—1·2	—1·3	—1·8	—1·8	—1·3

As stated above, the temperature has been generally low, and the above table shows that for the whole of India for the whole week there has been a mean deficiency of 1·3°. In Burma the temperature was slightly above the normal on each day, and in the North-Western Provinces, the Punjab, Bombay, the Central Provinces, Sind, Rajputana, and Madras, there were some days on which it was slightly in excess, but, as a general rule, there was considerable and general deficiency.

Rain.—The rainfall table at the close of the summary shows that in no less than thirty-five of the rainfall divisions absolutely no rain was received during the week under review, and that in seven more the average actual fall during the same period was less than one-tenth of an inch. The remaining divisions which received efficient rain, were Tenasserim, Lower and Central Burma, Arakan, Malabar, the Konkan, the Bombay Deccan, the East Coast (South) and Madras (South). The heaviest average actual rainfall was 1·48 inch in Malabar followed by 1·24 inch in Tenasserim. The column of average normal rainfall shows that it is only in five of the rainfall divisions that absolutely no rain is expected during the week, hence it follows that the third column of the table shows a deficiency in the great majority of the divisions; in fact, the only cases of excess are the divisions of Malabar and Tenasserim. The largest deficiencies are reported from the southern divisions of Madras, where the rainfall of the north-east monsoon is ordinarily fairly heavy, and from Arakan.

The three concluding columns of the table showing the actual and normal average rainfall of the period, October 16th to November 12th, exhibit an excess of rain in Arakan, East and Deltaic Bengal, Assam (Surma), Orissa, Chota Nagpur, the west of the Peninsula, the central parts of the country, Guzerat, Kathiawar, and the Madras divisions, except Madras, South-Central and South, and the East Coast South. The greatest excess is in Hyderabad and Kathiawar.

The following gives the largest total amounts received during the week as reported in the rainfall telegrams of the week. As might be anticipated from the foregoing statement of the rainfall conditions, the amounts are nowhere large :—

Division.	District.	Station.	Amount. Inches.
Tenasserim	Amherst	Thatôn	1·35
Central Burma	Henzada	Zalun	1·32
Malabar	Travancore	Kottayam	5·18
Konkan	Ratnagiri	Malvan	1·54
Deccan	Kolhapur	Baroda	1·18
East Coast (North)	Godavary	Prattipadu	5·40
„ (South)	Tanjore	Vedarniem	3·70
Madras (South)	Tinnevelly	Radhapuram	4·25

Provinces.	Division.	Rainfall data for week ending November 12th, 1892. Average actual rainfall of Division.	Average normal rainfall of Division.	Excess or defect in inches.	Rainfall data from Oct. 16th to November 12th, 1892. Average actual rainfall of season to date.	Average normal rainfall, October 16th to November 12th. W. L. DALLAS,
Assistant Meteorological Reporter to the Government of India.

Simla, the 17th November, 1892.

J. W. P. MUIR-MACKENZIE,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 19th November.*—Except a few light scattered showers and a moderate fall at Madras there has been no rain during the week. Want of rain is being seriously felt in the Carnatic, Southern and Central districts where crops are withering and tank-supply failing in parts. In the Deccan and North Coast districts cessation of rainfall continues to improve crops and prospects, although previous excessive rain damaged crops considerably. Harvest of early crops continues; outturn generally average. Pasture and water for cattle abundant. Condition of cattle good. Prices stationary in Circars and on West Coast; easier in the Deccan except in Cuddapah; rising elsewhere. Rain urgently required over southern half of Presidency.

Bombay.—*For week ending 23rd November.*—Harvesting of early and sowing of late crops progressing in several districts. Standing crops injured by locusts or other insects in parts of Sind; elsewhere they are in good condition, except *bajra* in Nasik and cotton in Dharwar which are suffering from effects of late excessive rain. Fodder sufficient. Agricultural stock healthy. Prices generally steady.

Bengal.—*For week ending 19th November.*—The weather has been fine. No rain fell during the week. The winter rice harvest has begun, and a good outturn continues to be anticipated except in Burdwan and parts of Bihar. The spring crops are doing well, and the prospects of the poppy and tobacco crops are also favourable. Prices are falling in several districts with the appearance of new rice in the market. In Mymensingh the price of rice has fallen to an average of 10 seers per rupee, and in the Netrokona Sub-division where distress was felt, it is now 12 seers per rupee. Gratuitous relief was given to 386 persons in the Diamond Harbour Sub-division of the 24-Parganas district, against 361 in the previous week. Cattle are generally in good condition, and there is plenty of fodder everywhere.

North-Western Provinces and Oudh.—*For week ending 23rd November.*—The weather continues fine. Harvesting of autumn crops approaching completion. Spring and poppy sowings doing well. Irrigation of crops in active progress. Prospects favourable. Prices generally steady.

Punjab.—*For week ending 23rd November.*—Rainfall *nil.* Harvesting of autumn crops going on; sowings of spring crops in progress, except in Rawalpindi where they have been stopped for want of rain. Condition of standing crops and prospects of spring crops good. Probable outturn of rice and cotton crops good, but that of maize and *moth* below the average in Lahore. Locusts have appeared in Hissar, but no damage is reported to have been done. They are still entering Ferozepore from the Bikanir State. Measures for their destruction continue to be taken. Condition of cattle generally good. Fodder sufficient throughout the province. Poppy sowings going on in Lahore. Prices rising in five districts, but generally stationary elsewhere.

Central Provinces.—*For week ending 23rd November.*—Prospects remain unchanged. The spring crop sowings are approaching completion. Rice harvesting has commenced in two districts. Cotton-picking continues and is giving a satisfactory outturn.

Burma.—*For week ending 19th November.*—LOWER BURMA: Early paddy being reaped in three districts, and is ripening in two others. Crops are generally

suffering from want of rain, and in the Tavoy district they are also suffering from the attack of insects. On the sea-board parts of Amherst slight damage has been done by sea water ; otherwise crop prospects are excellent. UPPER BURMA: More rain wanted in five districts. In parts of three others the paddy crops have suffered more or less from floods and other causes. The condition of the crops in Meiktila and Yamethin is critical; ploughing and sowing of gram and wheat progressing in these districts. Elsewhere crops are doing well, and reaping of wet-weather paddy, sesamum, cotton and jowar continues.

Assam.—*For week ending 22nd November.*—Weather seasonable. Mustard sowing continues. Reaping of winter paddy begun. Condition of cattle normal. Fodder and water sufficient.

Mysore and Coorg.—*For week ending 23rd November.*—MYSORE: More rain wanted in parts of four districts. Crops and prospects generally good. Prices risen in one district.

COORG: Rainfall *nil.* Prospects of rice crops continue good. Picking of coffee commenced, and of cardamoms almost completed. Prices stationary. Fodder and water-supply sufficient for cattle.

Berar and Hyderabad.—*For week ending 23rd November.*—BERAR: Weather fair and cold. Autumn crops good except in Buldana. Picking of cotton continues. Cutting of *jowar* (*Sorghum vulgare*) commenced in one taluk. Sowing of spring crops almost completed, except wheat which is still being sown in three districts. Standing spring crops thriving. Fodder and water sufficient. Cattle healthy. Prices almost stationary.

HYDERABAD: No rain during week. Harvesting of autumn crops finished. Sowing of spring crops continues. Lands are being prepared for the sowing of hot-weather crops. Prices fluctuating.

Central India.—*For week ending 23rd November.*—Harvesting of autumn crops continues, and a good outturn is expected. Spring crop sowings also in progress. Condition of agricultural stock generally good, and pasturage sufficient. Prices of food-grains steady. Opium prospects appear good.

Rajputana.—*For week ending 23rd November.*—Agricultural operations satisfactory except in Ajmere-Merwara, where there is an epidemic of fever and comparative paucity of cattle. Standing crops satisfactory Spring sowings continue in parts. Harvest prospects generally good. Cattle in good condition. Pasturage and fodder sufficient. Prices steady in ten States, rising in one, falling in two others, and fluctuating elsewhere.

Nepal.—*For week ending 17th November.*—Weather fine; prospects of crops normal.

J. W. P. MUIR-MACKENZIE,
Offg. Secretary to the Government of India.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the week ending at 8 a.m. on Saturday, November 19th, 1892.

Throughout the whole week very quiet settled weather has prevailed over the Indian region. The barometer has changed considerably from day to day, but these changes have been fairly uniform, and, as a general rule, the general distribution of pressure has changed very little during the week. In the earlier days pressure was highest over the central parts of the country, and was relatively low over North-Western India, but during the latter half of the week the barometer rose over North-Western India, and the area of highest pressure extended north-westward to the Punjab, so that the whole of North-Western and Central India was included in the high pressure area, but with this exception there was very little change to record. The winds were anti-cyclonic and were light in force, while the temperature was generally below the normal.

On the 13th, pressure was highest at the central stations, low over the south of the Bay and off the Malabar coast. The winds were variable over the Punjab and blew from about the normal directions elsewhere. The weather was fine, and the only rainfall was a shower at Colombo. The chart of the 14th showed that pressure was changing slowly and that the general distribution was practically unaltered. Calms prevailed very largely over the Gangetic plain, but otherwise the wind directions were little changed and were fairly normal. The general weather remained fine and the only rainfall reported was at Trivandrum and Colombo. On the morning of the 15th the barometer was rising practically everywhere. The rise had been greater over North-Western and Central India than elsewhere, hence gradients had increased and the winds, which still retained the same general directions, were inclined to freshen. The sky was somewhat more cloudy over Burma and the south of the Peninsula, and showers were reported from Tavoy, Moulmein, Diamond Island, Cuddalore, Negapatam

and Colombo. The amounts were in all cases small. On the 16th the barometer was falling except in the east of the Peninsula. A large high pressure area covered North-Western and Central India, and moderate gradients existed over the Peninsula. The lowest pressures were reported from the south of the Bay. Calms prevailed over a large part of the Gangetic plain and of the Punjab and northerly to easterly winds elsewhere. Rain had fallen at Moulmein, Madras, Cuddalore, Negapatam, Wellington and Colombo. The chart of the 17th exhibited the same general distribution of pressure as that of the 16th, but gradients were somewhat steeper. Calms prevailed over the Punjab and an anti cyclonic circulation of the winds elsewhere. Showers had fallen in Lower Burma and at one or two places in the south of the Peninsula. On the 18th the barometer was still falling, but the change was uniform and the distribution of pressure little altered. The winds were also practically the same, and the only rainfall was at Cochin and Colombo. On the 19th pressure was still giving way over North-Western India and over the east of the Peninsula, but elsewhere a recovery had commenced. These changes had not affected the general distribution, and the winds, except on the east coast of the Peninsula, where the direction had shifted to north-west, were also unaltered. The only rainfall was at Colombo.

Temperature.—The following table shows the variations of the mean temperature from the normal on each day of the week for the principal Provinces of India:—

Province.	13th.	14th.	15th.	16th.	17th.	18th.	19th.	Mean variation of week.
	°	°	°	°	°	°	°	°
Burma	+0·8	+0·9	−1·0	+0·4	+0·7	+1·7	+2·1	+0·8
Bengal and Assam	−2·1	−2·5	−1·3	−1·0	−1·3	−1·2	−0·9	−1·5
North-Western Provinces and Oudh	−1·6	−1·3	−0·5	−0·1	−0·1	+0·5	+0·8	−0·3
Punjab	−0·4	+0·7	+0·1	+0·7	+0·9	+2·1	+2·1	+0·9
Bombay	−3·6	−3·3	−3·3	−3·0	−3·3	−2·8	−2·2	−3·1
Central Provinces and Berar	−3·9	−3·6	−3·3	−3·7	−2·8	−1·8	−1·4	−2·9
Central India and Guzerat	−3·0	−2·9	−2·2	−1·6	−1·8	−0·7	−0·3	−1·8
Sind and Rajputana	−0·6	+0·4	+0·8	+0·8	+0·7	+1·6	+0·7	+0·6
Madras	−2·4	−1·8	−0·2	−0·8	−0·8	−1·4	−1·2	−1·2
MEAN FOR WHOLE INDIA	−1·9	−1·5	−1·2	−0·9	−0·9	−0·2	0	−0·9

In Burma, the Punjab, Sind and Rajputana the mean temperature of the week was slightly above the normal, but in all the other Provinces the mean temperature was in defect, the deficiency ranging from 3°·0 over Bombay and the Central Provinces to only 0°·3 in the North-Western Provinces.

For the whole of India the comparative coolness of the weather steadily decreased as the week progressed, the mean deficiency of the 13th having been 1°·9, while on the 19th there was no departure from the normal.

Rain.—The rainfall table at the close shows that rain was received during the week only in eight divisions, *viz.*, Tenasserim, Lower and Central Burma, Oudh (North), Malabar, Madras (South Central and South), and the East Coast (South). The average actual rainfall received varied from 0·83″ in Tenasserim to 0·03″ in Oudh (North). Over Behar and the greater part of the North-Western Provinces no rain is anticipated during the present week, but elsewhere showers of moderate or small amount are expected, hence the third column of the table shows a deficiency of rainfall over the greater part of the country. The only cases of excess were Tenasserim and Oudh (North), where, in each case, no rain is expected.

The three concluding columns of the table show that for the period, October 16th to November 19th, more rain than usual has been received in Arakan, East and Deltaic Bengal, Assam (Surma), Orissa, Chota Nagpur, Malabar, the west of the Peninsula, the Central Divisions, Kathiawar and the east and centre of the Peninsula.

The only heavy fall of rain recorded was 4·60 inches at Allepy.

Provinces.	Division.	Rainfall data for week ending 19th November. Average actual rainfall of Division.	Average normal rainfall of Division.	Excess or defect in inches.	Rainfall data from 16th October to 19th November 1892. Average actual rainfall of season to date.	Average normal rainfall, since October 16th to November 19th.	Excess or defect of (seasonal) rainfall expressed as a percentage.

W. L. DALLAS,
Assistant Meteorological Reporter to the Government of India.

Simla, the 24th November, 1892.

J. W. P. MUIR-MACKENZIE,
Officiating Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 26th November.*—Light showers in parts of the West Coast, Southern districts and Nilgiris, and a few places in Coimbatore, Trichinopoly and South Arcot. None elsewhere. Rainfall last four weeks extremely deficient except in the Circars and West Coast, and want of rain causing anxiety in Carnatic, Southern and parts of Central districts. Supplies of irrigation water failing, and crops are withering in many places. Sowings continue in parts, and in the Circars, Deccan and West Coast districts crops are flourishing; harvesting of early crops continues favourable in these parts, but the outturn is very moderate or poor in the Central, Carnatic and Southern districts. Pasture, fodder and drinking water sufficient. Condition of cattle good. Prices risen sharply in Southern and Central districts and South Arcot, and somewhat in remainder of Carnatic; stationary elsewhere. Continued holding off of rains causing serious damage in southern half of the Presidency.

Bombay.—*For week ending 30th November.*—Harvesting of early and sowing of late crops progressing generally. Opium sowing in Baroda commenced: late sowings in parts of Karachi damaged by insects or frost. Standing crops otherwise good except *bajri* in Nasik and cotton in Dharwar, which have suffered from effects of the late heavy rain. Prices generally steady. Agricultural stock good. Fodder sufficient.

Bengal.—*For week ending 26th November.*—There has been no rain during the week. The winter rice harvest is in progress, and the outturn is generally expected to be satisfactory except in some of the Western and Central districts of Bengal, parts of Behar and Chota Nagpur. The spring and poppy sowings are nearly over, and prospects range from very good to fair. In Patna, Darbhanga and Champaran a little rain is required for the spring crops. New rice is coming into the market and prices show a tendency to fall. Fodder and water supplies are generally sufficient and cattle are doing well. In the Diamond-Harbour Sub-division of the 24-Parganas district, 416 persons were in receipt of gratuitous relief against 386 in the previous week. Some anxiety is also felt in regard to the Dantun and Egra thanas of the Midnapore district, owing to the failure of the local winter rice crop.

North-Western Provinces and Oudh.—*For week ending 30th November.*—Weather seasonable. Rain would be beneficial to the spring sowings which are germinating. Irrigation in progress. Pressing of sugarcane commenced. Poppy sowings nearly finished. Prospects fair. Prices fairly steady, but falling in some districts.

Punjab.—*For week ending 30th November.*—Slight rain has fallen in Rawalpindi district. Reaping and threshing of autumn crops proceeding, and sowing of spring crops in progress, but has stopped for want of sufficient rain in Rawalpindi. Spring crops sown, have germinated and are promising. Probable outturn of the rice and cotton crops good, but of maize and other crops below average in Lahore, and reported to be about average in Dera Ismail Khan. Locusts appeared in Hissar and are being destroyed. Condition of cattle is generally reported good. Fodder sufficient throughout the Province. Poppy crop is growing well in the Lahore district. Prices unsettled in one district, rising in two others, and stationary elsewhere.

Central Provinces.—*For week ending 30th November.*—Prospects unchanged and continue excellent. Harvesting of autumn crops in full swing. Spring crop sowings almost completed.

Burma.—*For week ending 26th November.*—LOWER BURMA: In Thayetmyo crops still suffering from want of rain. In Amherst slight damage has been caused by sea water; otherwise crop prospects continue good. Reaping of early paddy progressing in one district and commenced in three others. UPPER BURMA: More rain wanted in Shwebo, Lower Chindwin, Pakokku, Minbu, and Yamethin. In Bhamo, Shwebo, Lower Chindwin, and Southern Shan States crops have suffered more or less from floods and other causes. In Meiktila the rice crop in the affected area is a complete failure. *Jowar (sorghum vulgare)* crops indifferent; otherwise crop prospects generally very good.

Assam.—*For week ending 29th November.*—Weather seasonable. Reaping of late rice begun. Mustard sowing continues. Condition of cattle normal. Fodder abundant.

Mysore and Coorg.—*For week ending 30th November.*—Crops in good condition except in parts of Bangalore, Hassan and Chitaldroog districts, where they are withering for want of more rain. Prospects generally favourable. Prices risen in the Kolar district.

COORG: Rainfall *nil.* Rice crop thriving. Coffee picking in progress. Prices stationary. Water and forage for cattle sufficient.

Berar and Hyderabad.—*For week ending 30th November.*—BERAR: Weather clear and cold. Standing autumn crops in good condition, except in Buldana. Picking of cotton and cutting of early *jowari (sorghum vulgare)* in progress. Sowing of wheat continues in Buldana and Wun. Fodder and water sufficient. Cattle healthy. Prices almost steady.

HYDERABAD: No rain during the week. Harvesting of autumn crops finished. Sowing of spring crops in progress. Land being prepared for sowing the hot-weather crops. Prices—wheat 9, coarse rice 9½, white *jowar* 15¾, yellow *jowar* 16½ and *tur* 11½ seers per current rupee.

Central India.—*For week ending 30th November.*—No rain. Winter rain needed in Bundelkhand Agency for spring crops. Autumn crops being still harvested in most parts and a fairly good outturn is expected, except in one district of Gwalior. Land being prepared in Bhopal for opium; sowing continued in Bhopawar: condition of opium in other parts good. Condition of agricultural stock and pasturage continue good. Prices of food-grains generally steady.

Rajputana.—*For week ending 30th November.*—Agricultural operations and standing crops satisfactory. Harvest prospects generally good. Condition of cattle good. Pasturage and fodder sufficient. Prices steady in eight States, falling in four, and fluctuating elsewhere.

Nepal.—*For week ending 24th November.*—Weather fine. Prospects of crops normal.

J. W. P. MUIR-MACKENZIE,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Horse-Breeding and Agricultural Stock.

NOTE BY THE INSPECTOR GENERAL OF THE CIVIL VETERINARY DEPARTMENT REGARDING THE OBJECTS AND ADVANTAGES OF THE BABUGARH INSTRUCTION FARM.

No. 2807-26, dated Calcutta, the 1st December, 1892.

The following note by the Inspector General, Civil Veterinary Department, regarding the Instruction Farm, Civil Veterinary Department, Babugarh Depôt, near Hapur, North-Western Provinces, is published for general information

J. W. P. MUIR-MACKENZIE,
Offg. Secretary to the Govt. of India,
Revenue and Agricultural Department.

NOTE.

The Instruction Farm at Babugarh has been establishd under the orders of the Government* of India with the view of affording practical instruction in the following subjects:—

* Revenue and Agricultural Department letter No. 1842-26, dated 11th August 1892.

(*a*) The management of horse stock in the stables, and the due care and farm working of stud horses and mares kept for breeding purposes.

(*b*) The cultivation of forage crops of kinds suitable and easily obtainable at a moderate cost for the feeding of horse stock.

2. It has been, and is in India, the custom to use only horned cattle for agricultural and ordinary cart purposes, and so the demand for horses for draught work has been but limited, except for hackney carriages in towns, and for dâk carraige and *ekka* purposes where railways are not available. Hence the breeding of horse stock has been chiefly confined to meet demands for horses required for army purposes and Native States.

3. To allow of horse-breeding in any country proving remunerative, there must be one or two factors in operation, either—

A—that pasture lands of good class are available at little or no rent, and so brood mares and young stock can be bred and reared at a very trifling cost; or

B—that brood mares are employed in agricultural work, at which their cost of keep is fully defrayed by the results of their working, and thus the stock produced from them yield, by their sale, a profit.

4. As pasture land suitable for horses breeding is only obtainable in most districts to a very limited extent, moreover, as the so-called pasture lands of India are as a rule not duly cultivated, but the grasses found on them are often of an inferior kind, it cannot be expected that horse-breeding can be followed in India under the conditions noted at *A*.

5. Therefore, to allow of horse-breeding being adopted as remunerative, it is essential that brood mares be employed at agricultural or cart work, and this slow work is suitable for mares kept for breeding purposes. Indeed, mares thus employed prove more sure breeders, and produce better stock than other mares simply kept for brood and given no work.

6. In India horses are used for such draught work as bullocks cannot perform in sufficiently quick time, and it is well known they can satisfactorily do fast work under the tropical sun of India. It may therefore be expected that they will prove no less efficient in the performance of the slower work of carting and of the farm.

7. Granted that the bullock is good for agricultural purposes, still it must be remembered that he yields no produce. It is not intended to urge the *general* substitution of horse and mare power in lieu of bullock power; but it is desirable to explain that in districts where horses are found to thrive and do well that the employment of mares and stallions for farm and cart work, and at the same time using them for breeding purposes, will be found profitable.

8. As practical evidence that horse-breeding, conducted on the lines indicated, is profitable, it may be mentioned that at the Civil Veterinary Department Depôt Farm at Babugarh horse and mare power only are used for all agricultural work, such as ploughing, harrowing, water-lifting, and carting. No bullock is employed, and it is found that stallions and mares perform the work as well as, and at a quicker rate than, bullocks. The mares having regularly steady and slow work yield good produce.

9. The instruction afforded, as above indicated, will convince agriculturists that horse stock can be used for all work now done by bullocks, and that by employing horse and mare power additional profit results.

10. The native farmer rightly, conservative as he is in not adopting new lines unless they prove paying, will, by witnessing the farm cultivation of the Babugarh Depôt, become assured that he can safely and profitably use horses and mares just as well as bullocks for cultivating his farm and for all carting purposes necessary in taking produce to and from markets.

11. Thus it is desirable to allow Native Chiefs, Zamindars and others to have the opportunity of seeing every kind of farm work performed by horse, mare, mule, and donkey power, and so induce them to employ such labour instead of bullocks.

12. It may be hoped, in course of time, that horse stock will become generally used for the farm purposes for which bullocks are now exclusively employed; that thus horse, pony, and mule-breeding will spread and the supply of horse stock will increase, and that the necessity at present existing of importing, for State purposes, thousands of horses annually at a great cost, will no longer remain, but the lakhs of rupees now sent out of India to foreign countries for imported horse stock will be distributed amongst the horse, pony and mule-breeders of India.

In several countries of Europe both bullock and horse power are used in agricultural and cart work; but gradually mare power is becoming more generally employed for reasons above explained. In Hungary four horses and mares may be often seen treading out the corn in the same way that bullocks do in India.

13. At first sight it may be thought that the natives of India will never give up using bullocks for farm and carting work; but it is well known that a native will, when convinced of a new line of action in any trade being profitable, accept and adopt it.

14. The Instruction Farm is being worked with the view of showing and proving to native farmers and horse employers that by using mare power profit assuredly results. When a native sees that a horse-mare or pony-mare can do farm work as well as a bullock, and he likewise notes that the mares are either in foal or have foals at foot, and that the produce is saleable at good market prices, he will admit that the practice is sound.

15. It is therefore urged that every inducement should be offered to allow of the satisfactory results of cultivating and carting by horse and mare power at the Civil Veterinary Department, Babugarh Depôt Farm, becoming generally known and spread throughout the horse-breeding districts of India. In other districts, where the indigenous horse and donkey does not exist, being without the horse-breeding zone, indeed having a climate unsuitable for horse stock, bullock power is generally available, and of course should be employed in lieu, as horses will not work satisfactorily in the climate and on the soil of lands of such districts.

16. It is therefore advisable to introduce horse and mare farm working in those districts only where horses are found to be easily and satisfactorily bred and reared.

17. A most important subject in connection with horse-breeding is the liberal feeding with proper kinds of forage and grains of the young stock, so as to give them every chance of growing into strong and useful animals. Horses, like other stock, are found stunted or well grown according to the manner in which they are fed and reared; hence we find the ordinary country "tatoo," the result of being reared on scant and very often innutritious grass lands; and on the other hand, the large and well developed Punjab horse, which has for generations been from infancy well fed, in order to be developed and made fit for war purposes. The food given to bullocks during dry months will, as a rule, do for horses. An agricultural bullock duly fed on dry *churri* cut up in short pieces and mixed with the usual amount of soaked grain, also bhoosa, is found to keep in good condition. A horse or mare similarly fed will also do well. In Sind and other very dry climates, where green and dry grass cannot be obtained for horse stock, *churri* and bhoosa as above noted are always given.

18. So the instruction afforded at the Depôt Farm in ploughing, ridging, harrowing, manuring, water-lifting, and the due sowing and cultivating of forage crops and grains by horse and mare power in an easy and satisfactory manner, with the view of obtaining good and heavy forage crops, is the most important adjunct to horse-breeding.

19. The methods of grass and forage cultivation found most productive are practically carried out on the farm, and the crops obtained can be seen, weighed, and thus judged of.

20 Local Governments and Administrations are invited to be so good as to allow Native Chiefs, Wards, farmers, and members of district boards, also revenue officials, to have an opportunity of visiting the Babugarh Civil Veterinary Department Instruction Farm at the times when classes are held for the demonstration of the following subjects:—

I.—Stable management.
II.—Management of stud stallions, brood mares and young stock, and the system of utilising them for agricultural purposes.
III.—Forage crop cultivation, *viz.*:—Lucerne, guinea grass, impey, dub, carrots, oats, barley, etc., etc.
IV.—Irrigation by horse, mare, mule, and donkey power.

21. It has been arranged that these classes will be held from 8th to 16th August, and from 24th December to 1st January every year, when practical instruction will be given by the Civil Veterinary Department officers on the above subjects.

22. The lectures on stable management, and the management of stud stallions, brood mares and stock, will be delivered in the stables and paddocks, and practical instruction in the forage crop cultivation will be given in the fields on the farm.

FINANCE AND COMMERCE DEPARTMENT.

STATISTICS AND COMMERCE.

Customs.

PROCEEDINGS UNDER THE INDIAN MERCHANDISE MARKS ACT, 1889, DURING THE YEAR 1891-92.

No. 269 S., dated Calcutta, 29th November 1892.

RESOLUTION—By the Government of India, Finance and Commerce Department.

READ the following reports on the proceedings taken by Customs officials under the Indian Merchandise Marks Act, 1889, during the year 1891-92:—

From the Chief Commissioner of Burma, No. 403—1C.—1, dated the 20th May 1892.
To " " " " 2304, " 2nd June 1892.
From the Government of Bengal, No. 101 T. F., dated the 23rd May 1892.
From the Government of Madras, No. 3562, dated the 5th August 1892.
From the Government of Bombay, No. 8307, dated the 19th October 1892.

RESOLUTION.—The reports from Bombay and Karachi, which were submitted to the Local Government on the 17th and 24th June, were not sent to the Government of India until the 19th October. In accordance with the first paragraph of the Resolution of the 27th January 1892, No. 23 S., the Government of Bombay should arrange to place the reports in possession of the Government of India by the 1st August.

2. There were altogether, during the year, 894 cases of detention under the Merchandise Marks Act, compared with 1,133 in the previous year. Five hundred cases, being 44 per cent. of the whole, were under clause (*f*) of section 10, sub-section (2) of the Act, which requires all piece goods to be stamped with their length. In 1890-91 such cases formed 59 per cent. of the whole. There were 262 cases of counterfeit trade marks or false trade descriptions, and 132 cases of non description of foreign origin, against 332 and 135 respectively in the preceding year.

3. The following table shews for each of the chief ports the number of detentions under the Act in the last two years:—

PORT.	Number of cases in which detention was ordered.		Detention followed by confiscation.		DETENTION FOLLOWED BY RELEASE.				Detention ordered on information received.		Detention ordered without information.	
					With fine.		Without fine.					
	1890-91.	1891-92.	1890-91.	1891-92.	1890-91.	1891-92.	1890-91.	1891-92.	1890-91.	1891 92.	1890-91.	1891-92.
Calcutta	302	454	1	4	67	92	234	351	...	2	302	452
Madras	4	16	...	2	1	5	3	9	2	1	2	15
Rangoon	2	36	...	...	...	22	2	14	...	1	2	35
Bombay	681	262	1	...	280	131	450	131	...	...	681	262
Karachi	144	126	...	...	95	68	49	58	...	...	144	126
TOTAL	1,133	894	2	6	393	318	738	563	2	4	1,131	890

In many cases ignorance of the requirements of the Act was pleaded, but the Customs officials properly declined to admit the plea.

4. The Government of Bombay refers, for the orders of the Government of India, a question raised by the Commissioner in Sind in connection with the mention of the country of origin of the goods. Four cases are referred to—

(1) relating to two consignments of glass beads from Trieste, in which the goods were described as "made in Bohemia." The importers were warned, but the goods were allowed to pass as Bohemia was considered a sufficient indication of the country of origin;

(2) a consignment of German brandy, in which Hamburg was mentioned, but not specifically stated as being the place of origin of the goods. The importer was fined R10, and the goods were allowed to pass after the bottles had been labelled with the name of the place of origin;

(3) a consignment of French brandy similarly labelled with the word Bordeaux. The importers were fined R5 and permitted to remove the goods after due stamping;

(4) a consignment of petroleum from Batoum, marked "Batoum." This was deemed a sufficient indication of the country of origin, and the goods were passed with a warning to the importers.

5. In the first of these cases the detention and warning were unnecessary, the mention of Bohemia, or of Hungary, being a full compliance with the requirement of the law that the country of origin should be stated. In the other three cases the law was not complied with, but the manner in which such cases are dealt with must depend upon the circumstances of each case. No fine need be inflicted, nor is it necessary to insist on the specification of the country, where brandy marked as from Bordeaux comes from Bordeaux or some other French port, and there is no reason to suppose that it is other than French brandy, for no importer of French brandy would deliberately leave room for doubt whether or not his brandy was really French.

In the case of Russian oil the law should be enforced by requiring the specification of the country, and in the case of liquors from Hamburg also the law should be strictly enforced. If bars of iron or steel have English words stamped thereon, and they are not of English origin, the Collector should require the country of origin to be stamped on them.

ORDER.—Ordered, that the foregoing Resolution and the papers read in the preamble be published in the Supplement to the *Gazette of India* for general information, and that copy be forwarded to the Governments of Madras, Bombay, and Bengal, and the Chief Commissioner of Burma.

STEPHEN JACOB,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

FINANCE AND COMMERCE DEPARTMENT.

Annexure to Resolution No. 269 S., dated the 29th November 1892.

Reports on the Proceedings taken by Customs officials under the Indian Merchandise Marks Act, IV of 1889, during the year 1891-92.

BURMA.

No. 403—1 C.-1 (Sep. Rev.), dated 20th May 1892.

From—F. C. GATES, Esq., Officiating Secretary to the Chief Commissioner, Burma,
To—The Secretary to the Government of India, FINANCE AND COMMERCE DEPARTMENT.

With reference to paragraph 4 of the enclosure to Finance and Commerce Department letter No. 295 S., dated the 28th November 1890, I am directed to submit, for the information of the Government of India, a copy of letter No. 21—8, dated the 28th April 1892, from the Chief Collector of Customs, Burma, to the Financial Commissioner, with its annexure, being the report on the working of the Indian Merchandise Marks Act, 1889, in this province during the year 1891-92.

2. The report calls for no special remark except as regards the seizure of "margarine" which was imported by a German firm with the false trade description "choice selected butter." The Officiating Chief Commissioner has doubts as to the adequacy of the punishment ultimately inflicted (on appeal) by the Financial Commissioner, and he would be glad to receive the orders of the Government of India as to the action which should be taken in future similar cases.

No. 21—8, dated 28th April 1892.

From—The Chief Collector of Customs, Burma,
To—The Secretary to the Financial Commissioner, Burma.

I have the honour to forward herewith a statement showing the number of cases dealt with in Burma under the Merchandise Marks Act of 1889 during the year 1891-92.

2. The total was 36, of which only one was brought about by information received by this Department, the remainder being detections by the Customs officers in their examination of goods before giving delivery.

3. The most important detention was that of a large consignment of butter imported from Switzerland. The consignment consisted of 155 cases containing in all 7,440 tins, 7,440lb, and was declared in the customs bill of entry as butter and valued at R7,440. Each tin was labelled "selected butter of choicest quality." A sample was submitted to the Chemical Examiner who, after testing it, reported that it was not butter at all, but "margarine." The whole consignment was confiscated. The importers appealed against this decision and have been allowed to pass the "margarine" on payment of a fine of R500, the original labels to be obliterated and replaced, under customs supervision, by new ones bearing the word "margarine."

4. Twenty-nine detentions were ordered of piece goods not stamped with the length in accordance with section 10, sub-section 2, clause (*f*) of the Act. In the majority of cases the omission was due to ignorance of the law, the importers being itinerant Chinese traders with small lots of silk cloths manufactured in the interior of China. A nominal fine was as a rule imposed and the goods allowed to pass after the length had been stamped on the pieces.

5. In four instances spirits in bottles imported from Hamburg bore labels on which there was either no indication of country of manufacture, or if the indication was given the size of the letters was not according to the requirements of the Act. The labels were properly stamped in the Custom House and the consignments allowed to pass.

6. Under the head of "False trade description," there were three detentions ordered. One was that of the butter referred to in paragraph 3 of this letter. In the second case a quantity of cotton thread of country manufacture on cards was brought in by a native trader, and it was found to measure considerably less than the number of yards marked on each card. The importer was fined and allowed to pass his thread after the cards had been destroyed. The third case occurred at Moulmein where 19 packages of sewing machines were imported from Bremen, and on examination were found to contain 12 sewing machines described as "Saxonia Regia, Singer Noar Machine, Dresden" on metal labels and 2 sewing machines described as "Beste Deutche Singer Machine Gesetzlich Deponirt" also on metal labels. The name "Singer" was effaced from the labels and the machines allowed to pass.

7. There is very little friction in carrying out the provisions of the Act, importers having had time to become acquainted with its requirements and to advise their correspondents in

Europe. The large quantity of merchandise of European manufacture that finds its way to Burma from India has already undergone Customs supervision either at Calcutta or Bombay, and has invariably been found to be marked according to law. Goods from China are also coming in properly stamped and marked.

Statement shewing the number of cases dealt with under the Indian Merchandise Marks Act during the year 1891-92.

CUSTOM HOUSE;
The 28th April 1892.

E. DARLINGTON,
Chief Collector of Customs, Burma.

No. 2304, dated 2nd June 1892.

From—J. E. O'CONOR, Esq., Assistant Secretary to the Government of India,
FINANCE AND COMMERCE DEPARTMENT,

To—The Chief Commissioner, Burma.

I am directed to acknowledge the receipt of your letter, dated the 20th May 1892, No 403—1 C.-1, transmitting the report on the working of the Indian Merchandise Marks Act (IV of 1889) in Burma.

2. In reply to the question raised in paragraph 2 of your letter under acknowledgment regarding the adequacy of the punishment (a fine of ₹500) inflicted on the importers of a consignment of margarine with the false trade description of "choice selected butter," I am to state that in the opinion of the Government of India the punishment in this case was clearly inadequate.

BENGAL.

No. 101 T. F., dated 23rd May 1892.

From—H. H. RISLEY, Esq., C.I.E., Offg. Secy. to the Govt. of Bengal, Financial Dept.,
To—The Secretary to the Government of India, FINANCE AND COMMERCE DEPARTMENT.

In accordance with the orders conveyed in paragraph 4 of the enclosure of your letter No. 295 S., dated the 28th November 1890, I am directed to submit the accompanying copy of a letter* from the Board of Revenue and of its enclosure from the Collector of Customs, Calcutta, reporting on the working of the Merchandise Marks Act, IV of 1889, at this port for the year 1891-92. No proceedings were taken under the Act by the Collectors of Customs at Chittagong, Naraingunge, or the Orissa ports during the year.

* No. 372 B., dated 11th May 1892.

No. 372 B., dated 11th May 1892.

From—T. INGLIS, Esq., Officiating Secretary to the Board of Revenue, Lower Provinces,
To—The Secretary to the Government of Bengal, Financial Department.

With reference to Government Order No. 670 S. R., dated 11th February 1892, I am directed to submit the accompanying copy of a report No. 165, dated 30th ultimo, on the proceedings of the Collector of Customs, Calcutta, under the Merchandise Marks Act, IV of 1889, for the year 1891-92. No proceedings were taken under the Act by the Collectors of Customs at Chittagong, Naraingunge, or the Orissa ports during the year.

No. 165, dated 30th April 1892.

From—C. R. MARRIOTT, Esq., Officiating Collector of Customs, Calcutta,
To—The Secretary to the Board of Revenue, Lower Provinces.

With reference to your docket No. 305 B. of 20th December 1890, I have the honour to forward herewith the yearly report on the working of the Merchandise Marks Act at this port.

2. There were 454 cases of detention against 302 last year. The large majority of these cases fall under clause (*f*) of section 18 being cases of unstamped or insufficiently-stamped piece goods. At the beginning of the year these goods were almost invariably passed without fine on their being properly stamped. This was owing to the fact that for a time such goods, if imported for retail, were deemed not to be liable under the Act. A reasonable time was, therefore, allowed before inflicting a fine. Now, however, that no excuse of ignorance of the Act can be put forward, a slight fine is imposed in nearly every case. Altogether, out of 392 such cases, 71 have been met with fine, the rest of the goods passed on stamping.

3. In two cases information has been given of counterfeit trade marks. Both have been made the subject of a prosecution, and in both the defendants were heavily fined by the Magistrate. In three other instances goods have been detained on account of a counterfeit of Rodgers and Sons' trade mark.

4. Thirty-four cases fall under the head of false trade description. The majority of these were Austrian or German-made shawls on all of which Hindi numerals had been marked after the manner of Indian manufacturers. Some also bore the emblems of Indian deities. The importers were heavily fined and the marks removed before the shawls were permitted to pass. In one case where the marks consisted of numerals only, the importers appealed but with no other result than a modification of the fine. It was obvious that the European manufacturers could have no motive in marking with Hindi numerals save to create a belief that the goods were of Indian make.

5. The first of these seizures was made on information; the informer was desirous that his name should not appear in the matter at all. He was himself subsequently fined for importing similar shawls, similarly marked.

6. An importation of 400 barrels "Portland" cement was received from Belgium, the country of origin being marked on the labels, but in scarcely visible characters. It was argued that Portland cement described a kind of cement not necessarily British. The goods were, however, not passed until the words "made in Belgium" had been stamped in large characters on the labels.

7. A case in which goods described as hollands were found to be largely composed of cotton was referred for the opinion of the Chamber of Commerce as to whether they were rightly so described. The Chamber in their turn referred it to the Manchester Chamber who decided that such goods, though not made of flax, had gained a prescriptive right to the name of hollands. The goods were accordingly passed.

8. German wines are frequently imported as sherry, champagne, port, etc. All such have been compelled to stamp the labels with the country of origin. A consignment of brandy from the firm of J. Cotton & Co. was labelled as manufactured in France, but the bill of entry declared it to be of German manufacture. The invoice confirmed this statement, and the brandy was detained until some further evidence as to its French manufacture and as to the firm of J. Cotton & Co. was given.

9. The Chamber of Commerce reported that piece goods were being imported from Bombay at lengths not corresponding to the stamp. If this be the case, it should be detected before they are passed out of the mills from which they came. Some consignments were, however, detained by the Customs and measured, but no false stamping was detected.

10. It has not been the practice in this port to detain and examine or measure any goods regarding which there is no information laid or good ground for suspicion. Such action is liable to entail hardship and deteriorate the value of goods so treated, while to make such examination effectual it would be absolutely necessary to increase the appraising staff who are already overworked. Thus piece goods are practically not opened nor examined, the samples are taken as showing correctly the marking. Whether the marking is correct as to lengths is a matter left for those concerned in the trade. They can give information if any goods are sold of short measurement; still, leaving the initiative to them appears from the experience of two years to be tantamount to allowing the law in that respect to be a dead letter, but I do not consider it the duty of the Customs authorities to undertake the work of detection, and if it were, the staff, as I have said, is insufficient to make the work effective.

11. If private individuals or the trading community do not think it worth the time and trouble to search out and denounce offences under the Act, still less is it incumbent on the Customs authorities to undertake increased work and incur odium for delays and damage by endeavouring to discover frauds. Until traders as a body give their assistance or until Government accept the responsibility and expense of searching out and prosecuting frauds, the Act may easily be evaded, stamps, labels, numbers, etc., being added after goods have passed the Customs.

12. If the Act is to be made effective for the protection of the ignorant purchaser and, as a consequence, honest trade (for traders being experts are not directly defrauded), it will be necessary for the Government to supplement action at the time of importation by further action before or after sale. No dealer in articles such as, for example, the German-made shawls mentioned above, was deceived by them, but the retail purchaser was no doubt deceived, and thus the local manufacture suffers, unable to cope with dishonesty on one side and ignorance on the other, allied to drive it off the field.

A statement is appended giving the figures required by the last paragraph of the Government of India instructions forwarded to the Board with No. C. 1A.—1-16 of 8th December 1890.

Statement showing the number of cases dealt with under the Indian Merchandise Marks Act during the official year 1891-92.

No. 1297 G., dated 13th June 1892.

From—W. P. AUSTIN, Esq., Collector of Sea Customs, Madras,

To—The Secretary to the Commissioner of Salt, Abkari, and Separate Revenue, Madras.

Adverting to Board's Proceedings No. 86 (Separate Revenue), dated 11th February 1892, I have the honour to submit the annual report on the administration of the Merchandise Marks Act, IV of 1889, at this port during the year 1891-92.

2. I enclose a statement in the prescribed form showing the number of cases dealt with during the year under review. There were about 300 cases in which packages were opened and examined at the Custom House for the purposes of the Act, and out of those 14 in which goods were detained in consequence of infringement of the Act being discovered in the course of such examination. In one case detention was ordered in consequence of information given and in pursuance of criminal proceedings instituted in the Magistrate's Court by one of the local firms.

3. Twelve of the 14 cases referred to above consisted of the importation of unstamped or partially-stamped piece goods, and in the remaining two cases goods were marked with the name of a British trader, the place of manufacture being omitted to be indicated on the labels in one, and insufficiently shown by means of detached labels with obscure printing in the other. In the case in which criminal proceedings were instituted the importers were charged with using a false trade mark.

4. The piece goods detained consisted of cotton, silks, and woollens which were either not stamped at all or had their lengths marked on tickets attached, and with the exception of one case in which the goods were confiscated, being of trifling value, they were all passed after the requirements of the law had been duly complied with and the payment of the penalties which it was considered necessary to impose. The two cases in which the description of the goods on the labels were not accompanied by a definite indication of origin consisted of liquors, and these were allowed to be passed on the objectionable labels being removed from the bottles. The particulars are as follows:—

Certain cases purporting to contain brandy bearing labels indicative of English origin were imported by a native from Egypt without the place of manufacture being given, and as the importer was not in a position to state where the liquor was manufactured, the consignment was allowed to be cleared on the importer agreeing to remove the labels.

In the second case a small consignment of whiskey was sent out for commission sale from Hamburg to a European firm here with labels having the words "*Fine Old Highland Whiskey—Chas. McBride & Co., Aberdeen*" printed in bold type, the country of origin ("Manufactured in Germany") being indicated by means of small detached labels round the necks of the bottles. As it was clearly intended by this to lead purchasers believe that the whiskey was

manufatured in Scotland, I intended taking serious notice of the case, but the firm having readily admitted its inability to defend the use of the combined labels and the consignment not having been sent out to its order, I accepted its proposal to remove the large labels which were calculated to deceive before allowing delivery to be taken. The case before the Presidency Magistrate was in respect of three consignments consisting of 33 cases of mulls valued, I believe, at over ₹10,000. The suit was instituted at the instance of Messrs. Binny & Co. as agents for Messrs. J. and A. Leigh of Preston, and the importer having pleaded guilty to the charge of using a false trade mark on the goods in question, the magistrate ordered their forfeiture under section 9 of the Merchandise Marks Act and sentenced the offender to simple imprisonment for three months in addition to bearing the cost of the prosecution. The offence appears to have consisted in the goods in question being stamped with the words "Ishashi Mull" in Tamil by which name and description the mulls manufactured by Messrs. Preston and imported by Messrs. Finny & Co. are known in the local market, although their mulls are not so marked. Notwithstanding the fact that the trade marks in both cases were not the same, it was apparent that the intention of the importer, by the use of the words referred to above on the cloth imported by him, was to cause purchasers to believe that they were the same mulls as those sold by Messrs. Binny & Co. which have earned a reputation for themselves in the local market. I may state that the shippers of these confiscated mulls, Messrs. Maudley & Co., of Manchester, have since applied to the High Court for a revision of judgment through their local agent, in respect of the magistrate's order adjudging forfeiture of their goods, but the High Court has dismissed the application on the ground that the agent had no *locus standi* and that the shippers were not parties to the case. The goods are to be sold on behalf of Government.

5. Generally speaking, importers of piece goods have complied with the law as regards stamping, and I find that the few cases where the requirement was not observed related to petty imports made by shop-keepers and tailors. Continental manufacturers appear also to be exercising due care in marking their goods in accordance with the provisions of the Act, and it must be admitted that the requirements of the law have the effect of protecting the interests of both the British trader and the consumer in India, but much remains to be done yet to put a check on dishonest and fraudulent practices of the trade in India, for, when once the goods leave the Custom House, the owner finds himself at liberty to remove or add any description he chooses, and although he would be amenable to the law for it, I am afraid that very few of such cases ever come to light.

6. In conclusion, I would point out that the introduction of the Act has largely increased the work of the office, especially in the appraisers' department, where packages selected for examination have to be opened and examined in detail, and with the limited establishment it is often found difficult to cope with the work satisfactorily. The present establishment consists of only three clerks, costing altogether ₹95.

Cochin	1	...	...	1	...	1

Remarks.—Towards the end of the year under report two consignments of Cognac imported from London and bearing labels "P and L" on the bottles were found in the godowns of Messrs. Peirce, Leslie & Co. at Cochin. The labels simply indicated the name of the firm, but not of the place of manufacture. The consignments were consequently detained under section 18 (*e*) of the Sea Customs Act, 1878, but were delivered to Messrs. Peirce, Leslie & Co. under the orders of the Deputy Collector, Cochin, after having fresh labels affixed thereto. This was the only instance which occurred under the Merchandise Marks Act in this district.

RESOLUTION.—The reports of the Collectors of Maritime Districts on the administration of the Merchandise Marks Act, IV of 1889, during 1891-92 are submitted to Government. Proceedings were taken under the Act in the Madras and Malabar districts only.

2. The total number of cases of detention of goods under the Act during the year under report was 16. Of these, 1 was under 18 (*d*) of the Sea Customs Act as modified by section 10 of the Merchandise Marks Act, 3 under 18 (*e*), and 12 under 18 (*f*), which requires all piece goods to be stamped with their length.

3. The following table shows the particulars of detentions :—

Port.	Detentions ordered.	Detentions followed by confiscation.	Detentions followed by release.		Detentions ordered on information received.	Detentions ordered without information.
			With fine.	Without fine.		
Madras	15	2	5	8	1	14
Cochin	1	...	...	1	...	1
TOTAL . .	16	2	5	9	1	15

4. The Collector of Sea Customs, Madras, is apprehensive that owners of goods may evade the provisions of the Act by removing or adding to descriptions of goods after they have been cleared from the Custom House. Such cases may no doubt occur, but it is for the offender's trade rivals to bring any malpractice to notice.

5. The Collector further reports that the introduction of the Act has largely increased the work of his office, and that it is found difficult to cope with it satisfactorily. He should apply separately for an increase of establishment if he can justify it by statistics showing appreciable increase of work.

Order thereon by the Government of Madras.

Ordered to be forwarded to the Government of India.

No. 3562A.

Copy to the Government of India, Finance and Commerce Department.

BOMBAY AND SIND.

No. 8307, dated 19th October 1892.

From—T. D. MACKENZIE, Esq., Chief Secretary to the Government of Bombay,

To—The Secretary to the Government of India, FINANCE AND COMMERCE DEPARTMENT.

With reference to Mr. Assistant Secretary O'Conor's letter No. 4051 S., dated 5th instant, I am directed to forward herewith, for the information of the Government of India, the reports received from the Collectors of Customs, Bombay and Karachi, on the working of the Merchandise Marks Act, IV of 1889, during the year 1891-92, and the statements accompanying them, together with a memorandum from the Commissioner in Sind, No. 3215, dated 30th July 1892, and a copy of the Resolution No. 8306 of to-day's date passed by this Government on these papers, and to solicit the orders of the Government of India on the point referred to in paragraph 2 of the Resolution.

Extract from the Proceedings of the Government of Bombay, Revenue Department,—No. 8306, dated 19th October 1892.

Read—

Memorandum from the Commissioner of Customs, Salt, Opium, and Abkari, No. 3011, dated 21st June 1892, submitting a letter No. 4992 C., dated 17th idem, from the Collector of Land Revenue, Customs, and Opium, Bombay, who forwards the report for the official year 1891-92 on the administration of the Merchandise Marks Act, No. IV of 1889, at the Port of Bombay.

Memorandum from the Commissioner in Sind, No. 3215, dated 30th July 1892, submitting the report No. 1033, dated 24th June 1892, from the Collector of Customs, Karachi, on the working of the Merchandise Marks Act, IV of 1889, for the year 1891-92 at the Port of Karachi.

Letter from the Government of India, Finance and Commerce Department, No. 3390 S., dated 17th August 1892.

Letter from the Government of India, Finance and Commerce Department, No. 4051 S., dated 5th October 1892.

RESOLUTION.—The results recorded in the reports submitted by the Collectors of Customs, Bombay and Karachi, on the working of the Merchandise Marks Act during the year 1891-92 are satisfactory, and show that the requirements of the Act are now generally known and understood by the public, and that great care is taken by the Customs officials, both at Bombay and Karachi, in administering its provisions. The number of cases of breaches of the provisions of the Act dealt with both at Bombay and Karachi was 388, being considerably less than the number (825) dealt with in the preceding year.

2. The Collector of Customs, Karachi, in paragraph 3 (*u*) of his report states that two consignments of glass beads from Trieste had on the packets containing the beads the following label :—

"Made in Bohemia, 12 bunches six diamond-cut silver beads";

but that as "Bohemia" was considered sufficient indication of the country of origin, the goods were in both cases allowed to pass with a warning to the importers. The Commissioner in Sind, however, observes that it is not clear that a warning was needed in the case, and is of opinion that an article is as properly marked if labelled "made in Hanover" or "made in Prussia," as "made in Germany," and requests the orders of Government on this point. Section 10, clause (1) of Act IV of 1889 required both the place and the country of origin to be indicated on the label, but the provisions of that Act have been amended by Act IX of 1891, and under section 8 of the latter Act the country of origin need only be indicated on the label. The view taken by the Collector of Customs, Karachi, appears thus to conform to the strict letter of the rule, but the remarks made by the Commissioner are also worthy of notice and the point should be referred to the Government of India for orders.

3. It should be pointed out to the Commissioner in Sind that in accordance with paragraph 3 of Government Resolution No. 1027, dated 10th February 1892, the report of the Collector of Customs, Karachi, should have reached Government by the 1st of July.

4. The reports and the statements accompanying them, together with the memorandum from the Commissioner in Sind, No. 3215, dated 30th July 1892, and a copy of this Resolution should be forwarded to the Government of India for information.

No. 4992 C., dated 17th June 1892.

From—J. M. CAMPBELL, Esq., C.I.E., Collector of Land Revenue, Customs, and Opium, Bombay,

To—The Commissioner of Customs, Salt, Opium, and Abkari, Bombay.

I have the honour to submit the Second Annual Report for the official year 1891-92 on the administration of the Merchandise Marks Act which came into operation on the 1st April 1889.

The accompanying statement, marked A, has been prepared in accordance with the instructions of the Government of India communicated in Government Resolution No. 8960 of the 15th December 1890 in the Revenue Department. It shows that the total of cases under the Merchandise Marks Act dealt with during the year was 262 against 681 in the previous year. For easy comparison statement A shews the figures for each of the years 1890-91 and 1891-92.

In the year under report 180 infringements of clause (*d*) of section 18, 42 under clause (*e*) and 40 under clause (*f*) of Act VIII of 1878, as amended by the Merchandise Marks Act, were detected. Of the 262 cases shewn in statement A fines were inflicted in 131 cases. In the remaining 131 cases the goods under detention were passed without penalties, as the requirements of the Act were held to have been partly or fully complied with.

Except one which infringed both section 18, clause (*e*) of the Customs Act, and section 4 (1) of the Merchandise Marks Act, all the cases adjudicated were under section 18, clauses (*d*), (*e*) and (*f*) of Act VIII of 1878.

Under clause (*d*) of section 18, no cases occurred of importation of goods with false trade marks. On the other hand, several cases of false trade descriptions were detected chiefly as regards number, weight or measure, place of manufacture, and material.

Other false trade descriptions consisted of the application to goods of descriptive expressions in languages (mostly English and Gujarati) other than those of the country of origin.

The marked decline in the number of cases under each of the clauses (*d*), (*e*) and (*f*) of section 18 of the Act is, I believe, due to the fact that the requirements of the Act are now generally known and understood.

The annexed comparative statement, marked B, shews that of the 262 seizures 179 were adjudicated by the Collector, 4 by the First Assistant Collector, and 79 by the Assistant Collector in charge Docks Custom House. No decision has been made the subject of an appeal, though in some cases, on applications and explanations from parties concerned, decisions have been reconsidered. The total recoveries under fines and redemption penalties amounted to ₹2,740.

During the year 3,766 packages of goods, 4,627 bundles of steel, and 2,600 bars of iron were detained. The annexed statement C shews in detail the disposal of the detained packages.

In only two cases, both of them of German shawls with Indian devices, have heavy fines been inflicted. In one case a ₹300 substantive and a ₹300 redemption fine were paid; in the other a ₹100 substantive fine only was paid, and instead of a ₹500 redemption fine the goods were re-exported.

The accompanying statement, marked D, shews that during the year 3,676 unstamped pieces of piece-goods of the value of ₹27,013-10-11 from foreign ports were passed on stamping each piece with its length on standard yards as required by section 10, clause (*f*) of the Act. It

will be noticed that the number of irregularities under clause (*f*) is much smaller than in the previous year.

During the year none of the cases has been either so important or so different from those detailed in last year's report as to make desirable any separate summary of cases.

I would express regret that I have failed to take advantage of the sanction which Government were pleased to accord to the suggestion in last year's report that cognizance should be taken of breaches of the Act detected in Bombay city. The matter has not been lost sight of and certain reported infringements of the Act are under consideration. The difficulty found in taking action has been partly the necessity of securing for the first prosecution a case of importance and one in which the infringement of the Act resulted in injury or loss to some considerable section of the public. My information also is that the sanction granted by Government and its publication both in the European and native papers have had a considerable deterrent effect, and that especially in the matters of length and weight traders have deemed it advisable to remove misleading labels.

No. 3011, dated 21st June 1892.

Endorsed by the Commissioner of Customs, Salt, Opium, and Abkari, Bombay.

Submitted to Government in the Revenue Department, with reference to Resolution No. 1027, dated the 10th February last.

APPENDIX A.

Administration of the Merchandise Marks Act (details required under Government of India's letter No. 295 S. of 28th November 1890).

Year.	Detentions under section 18, Clause (*d*).	Detentions under section 18, Clause (*e*).	Detentions under section 18, Clause (*f*).	Total of Columns 2 to 4.	Confiscations.	Releases: With fine.	Releases: Without fine.	Detention on information.	Detentions without information.	Remarks.
1890-91	268	88	325	681	1	230	450	...	681	(*d*) In four cases reshipment was allowed, in one as an alternative to confiscation and in three as an alternative to correction of packages. (*B*) Of three cases in which reshipment was ordered, in two the goods were reshipped, in the third they were destroyed.
1891-92	180*	42†	40	262	...	131(*A*)	131(*B*)	...	262	

* These include 11 cases which infringed clause (*c*) also.
† These include a case which infringed section 8 (1) also.

BOMBAY CUSTOM HOUSE;
The 17th June 1892.

J. M. CAMPBELL,
Collector of Land Revenue, Customs, and Opium.

APPENDIX B.

Disposal of cases under the Merchandise Marks Act by officers exercising powers under section 182 of Act VIII of 1878.

Official year.	Cases disposed of: By the Collector.	By the First Assistant Collector	By the Assistant Collector in charge Docks Custom House.	Total of columns 2 to 4.	Total penalties under clause 8 of section 167 of the Customs Act.(*d*) R	a.	p.	Total fines in lieu of confiscation under clause 8, section 167 of the Sea Customs Act.(*d*) R	a.	p.
1890-91	(*a*) 590	7	84	681	2,958	0	0	3,731 (*c*)	0	0
1891-92	(*a*) 179	(*b*) 4	79	262	2,132	0	0	608	0	0

(*a*) These include 325 and 35 cases respectively, in which under the general orders of the Collector piece goods were passed on the stamping of length without the submission of a separate report in each case. Of the 179 cases in 1891-92, one was in respect of the overstamping of the weight on packets of brass chains.

(*b*) The four cases disposed of by the First Assistant Collector were in respect of goods imported by Foreign Parcel Post. As they were first offences, the importers were let off with a warning and the goods passed on removing the objectionable labels or marks.

(*c*) In one case the importers elected to reship instead of redeeming for home consumption on payment of a penalty of R500.

(*d*). The penalties and fines in lieu of confiscation are the amounts recovered.

BOMBAY CUSTOM HOUSE;
The 17th June 1892.

J. M. CAMPBELL,
Collector of Land Revenue, Customs, and Opium.

BOMBAY CUSTOM HOUSE;
The 17th June 1892.

J. M. CAMPBELL,
Collector of Land Revenue, Customs, and Opium.

No. 1033, dated 24th June 1892.

From—R. N. COGHLAN, Esq., Collector of Customs, Karachi,

To—The Commissioner in Sind.

I have the honour to submit statement showing the number of cases dealt with under section 18 of the Sea Customs Act, VIII of 1878, as amended by the Indian Merchandise Marks Act, IV of 1889, during the year 1891-92, together with my report on the working of the Act, agreeably to paragraph 1 of Bombay Government Resolution No. 7387 of the 27th October 1891, received under your endorsement No. 5178, dated 11th November 1891.

2. In the year under report there were in the aggregate 126 cases disposed of under the Act, namely,—

39 under clause (*d*);
60 under clause (*e*); and
27 under clause (*f*).

3. The 39 cases coming under clause (*d*) were dealt with as follows:—

In 16 the importers were permitted to stamp the name of the country of produce of goods from foreign ports bearing English descriptions on payment of small fines, and in the other 23 cases the goods were passed after compliance with the requirements of the Act and the importers warned. The facts connected with the various cases of infringements of the Act, which came before me for disposal, are as follows:—

(*a*) Five consignments of lime-juice were imported from London; the bottles were labelled to the effect that the contents were entirely free from alcohol. On examination, however, they were not found to be free from spirits. In three cases importers explained that they were ignorant of the cause of the false

description shewn on the bottles, being only clearing agents for the owners who were up-country. In two instances the goods were imported by the consignees for sale here; these importers in submitting an explanation stated they were unaware of the fact that the lime-juice contained spirits, and that they would be careful in future. In four instances the importers were allowed to remove the labels on payment of small fines. In one instance the quantity of spirit being only 1 per cent. no action was taken in the matter.

A consignment of 12 time-pieces was imperted here from London. These time-pieces were of American manufacture, and ten out of the twelve had "Seth Thomas, U. S. A." and the other two "Time flies away." There was no indication on the latter two of the country of origin, and the importers explained, as they were only clearing agents for the owner, they could not account for the omission; the time-pieces were allowed to be marked as required by law on payment of a small fine.

(*c*) Two consignments of sewing machines from America. These were shipped from Liverpool for this port. The machines were marked "N. Y. Favourite and patented October 8th, 1878; July 6th, 1880; September 22nd, 1885; October 19th, 1887."

In these instances the letters "N. Y" were considered sufficient indication of the country of origin, and the goods were allowed to pass.

(*d*) Two consignments of German beer imported from London. In one consignment the bottles were labelled—

"Amers foortsche Baiersch bier brouwerij (coat of arms) Pilsener Export."

The importers explained that they were merely agents and not the owners, and were consequently unable to explain why the name of the country of origin was omitted. Under the circumstances they were permitted to stamp the bottles as required by law on payment of a fine of ₹5 and to remove the goods which they did. In the other case there were only two cases of samples of beer having labels with description of contents in the English language, being samples; the words "Bohemian Brewery" and "Berlin" on the labels were considered sufficient and goods passed.

(*e*) Two consignments of brandy—one of 100 cases German brandy from Hamburg, and the other French brandy from Liverpool. The consignment of German brandy bore the following labels on bottles:—

"Fine Old Hambro Brandy, T. Grose, Hamburg."

The importer explained that he was ignorant of the requirements of the law, and would see that future consignments were duly marked as required. This explanation was considered unsatisfactory, and the importer permitted to remove his goods after labelling the bottles with the name of the country of origin and payment of a fine of ₹10.

The consignment of 100 cases French brandy had the bottles labelled as under:—

"Please destroy the label on emptying the contents. Fine Old Cognac. J. B. Valle & Co., Bordeaux. Established 1858."

Being merely clearing agents the importers stated they could not account for the omission of the name of the country of produce; they were fined ₹5 and permitted to remove the goods after due stamping.

(*f*) One consignment of 81,000 cases petroleum from Batoum. The cases were marked—

"65lbs nett. Highest refined and Fire-tested Petroleum. The united exporters of ✡ Batoum. Registered Trade Mark."

In this case the name Batoum was deemed sufficient indication of the country of origin and the oil passed with a warning to the importers.

(*g*) Nine consignments of Austrian sugar imported from Bremen and Hamburg. All these had English letters on the bags denoting the quality or description of the sugar. In five instances the importers were allowed to pass their sugar after they were duly marked with the name of the country of produce, and in the other four the importers' explanation not having been considered satisfactory they were permitted to stamp their bags on payment of a penalty of ₹5 in each case.

(*h*) One consignment of 30 cases port imported from London. The seals on the bottles had the description of contents in the English language. The importers stated in explanation that it was an error on the part of their London agents. This explanation not being deemed satisfactory they were fined ₹5 and permitted to duly label the bottles, after which they were passed.

(*i*) One consignment of accordeons from Hamburg. The accordeons were labelled with the description in the English language. This description was considered as intended only for identifying the articles for the convenience of dealers and shop-keepers and they were, in accordance with instructions received with B. G. Resolution No. 8960, dated 15th December 1890, passed without stamping.

(*j*) One consignment of tobacco imported from America. These 10 cases were shipped from Liverpool. The cases were marked—"Belle of Viginia, Manufactured by David Dunlop, Petersburgh, U. A."

The importers explained that this was their first consignment, and they were not aware of the requirements of the law. This explanation was accepted as the letters U.A. were considered sufficient indication of the country of manufacture, namely, United States of America.

(*k*) One was a consignment of gold and silver thread, valued at ₹1,170, imported from Trieste *viâ* Bombay. The packets containing the thread were marked "gold thread." The omission to show the name of the country of origin is explained by the importers to be due to oversight on the part of the shippers. This explanation was not accepted, and importers were fined ₹10 and were allowed to remove the goods after being duly stamped.

(*l*) There were two consignments of window-glass from Antwerp—one was a consignment of 250 cases. These cases were marked in the English language, "glass, this side up, patent $\overset{B}{<}_{G}\overset{G}{>}$ Karachi." The importers explained that the omission of the name of the country of origin was an oversight. The cases were allowed to pass after they were duly marked with the name of the country of manufacture. The other consignment of 34 cases window-glass were marked "blue," "green", "ruby" and "enamelled" in the English language. The importers could not satisfactorily explain why the name of the country of manufacture was omitted; they were therefore fined ₹5 and the cases passed after they were stamped as required by law.

(*m*) One consignment of 50 cases candles was imported from Antwerp. The packets of candles were marked—"De Roubaix Jenar & Co.'s superfine stearine candles, solely manufactured at their works at Brussels."

The importers stated that as the candles were manufactured at "Brussels," that name was shown on the packets. The candles were passed, as Brussels was considered sufficient indication of the country of origin.

(*n*) One consignment of 25 cases aromatic schnapps was imported from London. The liquor, though manufactured in Holland, had labels affixed to the bottles showing the description of the contents in the English language without indicating the country of origin. The importer having satisfactorily explained the omission was permitted to remove the goods after the bottles were duly stamped as required by the Act.

(*o*) One consignment of three bales pot-paper was imported from Trieste *viâ* Bombay. The packet of the paper had wrappers which were marked "made in Austria"; the sheets of paper bore the impression of an anchor and the English words "trade mark." The country of origin shown on the wrappers was considered sufficient, the goods were accordingly allowed to pass.

(*p*) One was a consignment of razors, 24 dozens, from Antwerp; of these 3 dozens were found to have the following inscription on the blades:—"Henry Kaufman & Sons, † Cutlers of Superior Razors, * nearHigh Street, Solingen."

The wrappers, however, had the name of the country of manufacture. The importers stated in explanation that the omission was an oversight; the goods were accordingly passed with a warning.

(*q*) One consignment of hardware and one of zinc sheets were imported from Antwerp. These had English descriptions on the goods; the importer having satisfactorily accounted for the omission of the name of the country of manufacture, the goods were allowed to pass with a warning.

(*r*) A consignment of two cases cigars were imported from Antwerp; the boxes had labels bearing English names. The importers stated they were unable to explain the omission of the name of the country of origin as they were only clearing the cases for the owners; they were fined ₹5 and allowed to remove the goods after the boxes were stamped as required by law.

(*s*) One consignment of three cases champagne was imported from London; the bottles had labels descriptive of the contents in the English language. The importers having satisfactorily accounted for the omission of the name of the country of origin, the goods were allowed to pass after they were duly stamped.

(*t*) One consignment of one case buttons (shirting) imported from Hamburg. The cards to which the buttons were affixed had the description of the article in the English language. The importers explained that this was their first consignment of these goods, and that they would take such action in the matter as would ensure further shipments being properly marked; they were permitted to remove the goods on payment of a small fine and after the goods were duly marked as required by law.

(*u*) Two consignments of glass beads from Trieste. Both these consisting of two and three cases, respectively, had on the packets of glass beads the following label:—"Made in Bohemia, 12 Bunches six diamond-cut silver beads."

The importers in both cases were warned, and the goods allowed to pass as "Bohemia" was considered sufficient indication of the country of origin.

4. There were 60 cases coming under clause (*e*), *viz.*,—

(*a*) One consignment of marsala, madeira, sherry, port, and champagne imported from Liverpool; the bottles of the wine had labels affixed with the description of

the wine and bore the name of traders in the United Kingdom. The importers having satisfactorily explained the cause of omission of the country of origin the goods were allowed to pass after they were stamped.

(*b*) One consignment of claret, sherry, port, and vermouth from London, bearing similar labels and particulars as the above consignment, was also allowed removal after due stamping.

(*c*) One consignment of champagne and still hock, one of champagne, port, and sherry, and two of champagne and still hock from London. These bottles had, besides the description of the wine, the names of the dealers or traders in the United Kingdom or British India. In the first two cases, the importers were cautioned and the goods allowed to pass after due stamping; in the latter cases, the importers were fined R5 in each case and allowed to remove the goods after they were labelled as required by law.

(*d*) Two of claret from Bordeaux and one from Liverpool. In the first two cases, the bottles had the description of the claret on the seals, and the labels had the names of either British or British Indian dealers. The importers having explained that it was an omission on the part of the shippers, the goods were allowed to pass, the word "Bordeaux" having been considered sufficient indication of the country of origin. In the other case of claret from Liverpool the bottles were similarly labelled. Importers' explanation being considered satisfactory, the goods were passed after due stamping

(*e*) Six consignments of champagne were imported from London. In one case of 7 cases the importer having satisfactorily explained the omission of the name of the country of produce, the goods were allowed to pass. In another case of 20 cases, the explanation tendered was considered satisfactory as the word "Reims" was deemed sufficient indication of the country of origin and the goods were allowed to pass. In the remaining four cases of 34, 16, 15, and 20 cases the importers were fined and goods passed after due compliance with the requirements of the Act.

(*f*) There were four consignments of 25 cases, 5 cases, 2 hhds. and 2 cases of port wine from London and Glasgow. The 25 cases from London were allowed to pass after due stamping after warning the importer of the requirements of the Act. The 5 cases from Glasgow and 2 hhds. and 2 cases from London were allowed to be removed on the importer's paying small fines and after the goods were marked with the name of the country of produce.

(*g*) Four consignments of still hock from London consisting of 40 cases, 18 cases, 6 cases and 15 cases, all bearing names of British Indian dealers. The 40 cases were passed, the words "Reims" being considered sufficient indication of the country of origin. In the other cases the importers were fined R5, R6, and R5, respectively, and after the goods were marked as required by the Act they were allowed to pass.

(*h*) One was a consignment of 150 cases beer and one of 10 cases mineral water from Antwerp. Both these consignments had labels affixed to the bottles describing the contents in the English language, and showing the names of British Indian dealers. In the former case, being the first offence the importer was cautioned and the 150 cases beer allowed to pass after they were marked. The mineral water was allowed removal on importers paying a fine of R5 and labelling the bottles with the name of the country of origin.

(*i*) Ten hhds. of gin and 16 hhds. of brandy were imported from Hamburg; both these consignments were marked with the names of British Indian dealers. The importers stated in explanation that as the spirits were not sold in bulk, but after bottling, they did not consider it necessary to mark the casks with the name of the country of origin; the importers were fined and permitted to remove the casks after they were properly marked.

(*j*) The following consignments were imported from Antwerp:—Five of nails consisting of 130, 250, 125, 102 and 30 kegs, respectively, and marked with the initials of the names of British or British Indian traders. The 250 kegs were allowed to be removed after they were duly stamped, and the others were passed without stamping, importers having been warned to have their future consignments marked as required by law.

(*k*) Two of zinc perforated sheets comprising 4 and 2 casks, respectively. The casks bore the initials of the names of British Indian dealers. The four casks were passed without being stamped, importer being warned of the requirements of the Act, and the two casks were passed after they were stamped and the importer had paid a fine.

(*l*) One of 892 bars and bundles of iron. These were marked with the initials of the names of the British or British Indian dealers. These were passed without stamping with a warning to the importers.

(*m*) One of 37 beams of steel joists and one of 6 cases of bentwood furniture were also passed without stamping with a similar warning to the importers, having been similarly marked as the above.

(*n*) Two of 12 barrels and 10 barrels of rosin, respectively. The importers not having satisfactorily explained the reason of the omission of the name of the country of origin, while the names of British Indian dealers were shown on the casks, on payment of a fine of R5 in each case I allowed removal of the goods after due compliance with the requirements of the Act.

(*o*) One of three packages enamelled ware, one of 390 iron girders, one of 152 steel beam and one of 33 casks of alizarine. All these bore the initials of the names of British or British Indian dealers. In the case of the enamelled ware, the importer was fined and allowed to remove his goods after stamping. The iron girders were allowed to be stamped before removal was permitted. In the case of the steel beams the importers were fined R5 and allowed the option of removing the goods after stamping. As regards the casks of alizarine, these were marked in the English language with the names of the importers and showed the indication of the country of origin, namely, "made in Germany," in the same language; but besides this the casks were marked with the name of a native dealer of this port in the Guzarati language, but without showing in the same language the name of the country of manufacture; the importers were cautioned and allowed to remove the casks after they were marked.

(*p*) Eight of glass-ware marked with the names of British or British Indian dealers. These comprised 14 cases, 4 cases, 4 cases, 7, 5 2, 10 and 7 cases. The first two items were passed without stamping after warning the importers. In the other six cases the importers were fined and the goods were allowed to be removed after they were marked with the name of the country of origin.

(*q*) Eight bags of sugar from Hamburg marked with letters indicating in the English language the description and quality of the sugar, and the initials of the name of firms in British India. The consignments comprised 450, 300, 50, 575, 50, 1400, 2900, and 300 bags, respectively. The first three items were allowed to be removed after the importers had stamped the bags as required by law; the 575 and 50 bags were passed without stamping with a warning to the importers. In the remaining three cases, the importers explained that the shippers were not aware that such goods as bags of sugar required the name of the country of origin to be shown on the bags. This explanation having been considered unsatisfactory, they were fined R5 in each case and permitted to remove the goods after the bags were marked with the name of the country of produce.

5. Under clause (*f*) there were 27 cases, *viz.*,—

(*a*) Seven of consignments of woollen shawls—one was from London, one from Liverpool, three from Bremen, and two from Hamburg.

In the first case, the importers having explained that they were only agents for the owners, and that they were not aware of the infringement, the goods, namely, one case containing 120 shawls, value R420, were allowed to pass on payment of a fine after the shawls were stamped with their lengths. In the second case, the importers stated that the shawls were shipped on consignment without order, and to stamp these shawls would spoil the value and entail heavy loss from handling, and that they would only be sold as a job lot. This explanation not having been considered satisfactory, the importers were fined R5 and the goods, namely, 8 cases containing 150 shawls, value R3,100, allowed to be removed after they were marked with their lengths.

The third item consisted of one case shawls, 120 in number, R360; two cases shawls, 299 in number, R960, and one case shawls, 171 in number, R400, respectively. The importers in explanation stated that they were merely clearing agents for the owners and did not know nor could explain the cause of omission of lengths unless that the shippers were of the opinion that lengths on shawls were not required, and that they would apprise them to send out goods duly marked as required by the Act. The importers were allowed to remove the goods after they were duly stamped and on payment of fines. The two consignments from Hamburg consisted of two cases Cashmere shawls, 125 pieces, value R635, and two cases shawls, 202 pieces, value R909. Both these consignments were passed without requiring the lengths to be stamped on the pieces.

Since these cases occurred Bombay Government Resolution No. 337, dated 16th January 1892, was received, under which shawls are not to be stamped.

(*b*) Six of consignments of woollen piece goods—

(1) two from London;
(2) one from Bremen;
(3) one from Liverpool;
(4) one from Antwerp; and
(5) one from Marseilles.

All these consignments had not their lengths stamped on the pieces. The importers were permitted in all cases save (4) to remove the goods after they were duly marked and on payment of fines. In this (4) case there being only one piece without having its length marked, the importer was permitted to mark it when it was passed.

(*c*) twelve of consignments of cotton coloured piece goods—

two from Hamburg;
four from Persian Gulf ports; and
six from London.

In the two instances of piece goods imported from Hamburg the importers were allowed to stamp lengths on the pieces on payment of small fines. In the case of goods from the

Persian Gulf ports in three instances the goods were permitted to be marked with their lengths on payment of fines. In the fourth instance, the goods having been exported from this port and subsequently re-imported, they were allowed to pass and the importers warned.

In the six consignments from London on all of which the lengths were omitted, the owners of one explained that it was an omission on the part of the shippers, and that they were taking measures to prevent a recurrence; they were fined ₹5 and goods passed after they were stamped. In the other five the importers stated that they were merely acting as agents for the owners and were not aware of the infringement; they were allowed the option of removing the goods on payment of small fines after due stamping of the goods.

(*d*) Of scarves there were two consignments from Bremen—one consisted of a case containing 30 pieces and the other of a case with 48 pieces. The importers explained they were not aware of the cause of omission on the part of the shippers, as they were only acting as agents, but presumed the shippers considered the marking unnecessary. The importers were permitted to remove the goods after they were duly stamped and on payment of a fine of ₹5 in each case.

6. During the year under review no appeals were preferred against the orders of the Collector.

7. There is a decrease of 18 cases compared with last year and of 80 in the number of infringements under clause (*f*), which must be regarded as an indication of the requirements of the Indian Merchandise Marks Act having become more generally known to the public here and shippers abroad.

8. I had only one instance of a consignment of five cases of cotton white piece goods, the lengths of which were marked on the inner fold of the pieces. In this case the importers were duly warned and the goods allowed to pass.

9. I am glad to be able to observe that I have not had a single case under any of the clauses of section 18, wherein deliberate fraud was attempted.

Statement showing the number of cases dealt with under Section 18 of the Sea Customs Act, VIII of 1878, as amended by the Indian Merchandise Marks Act, IV of 1889, from 1st April 1891 to 31st March 1892.

KARACHI CUSTOM HOUSE;
The 16th June 1892.

R. N. COGHLAN,
Collector of Customs.

No. 3215, dated 30th July 1892.

Memo. by—COLONEL R. J. CRAWFORD, Acting Commissioner in Sind.

The accompanying report on the working of the Indian Merchandise Marks Act, IV of 1889, submitted by the Collector of Customs, Karachi, for the year 1891-92 is submitted to Government in reference to their Resolution No. 7387 of 27th October 1891.

No. 1033 of 24th June 1892.

2. Further information asked for in respect of certain cases is subjoined below :—

(1) Case (*e*) under clause (*d*), paragraph 3 of the Collector's letter, and case (*d*), clause (*e*), paragraph 4 of the Collector's letter.

In both cases the name of the country of origin was omitted, but in one the importers were fined ₹10 and ₹5, whereas in the other they were excused. The explanation of the different treatment is that in the former case the consignments were large and valuable, and in the latter they were small and a caution as to the requirements of the law was considered sufficient.

(2) Case (*e*), clause (*d*), paragraph 3 of the Collector's letter (French brandy), and case (*f*), clause (*d*), paragraph 3 of the Collector's letter (petroleum).

In the first case Bordeaux was not considered as a sufficient indication of the name of the country of origin, whereas in the latter "Batoum" was. The following is the Collector's explanation:—

"Under section 18 of the Sea Customs Act, VIII of 1878, clauses (*d*) and (*e*), when goods of foreign manufacture bear trade description or manufacturer's name in the English language, or the names of traders or dealers in the United Kingdom or British India, the *country* of origin has to be shown on such goods, and not the name of the *place*.

"In the case of kerosine oil imported from Batoum, as it was the first offence on the part of the importer, the goods were passed as a special case without being stamped.

"Kerosine oil is imported from two places only, namely, Batoum which is well known to be in Asiatic Russia and from America; there was no reason to suppose that the oil from Batoum was of British origin."

(3) On an enquiry whether "Bordeaux" was not a sufficient indication of the name of the country of origin, the Collector states:—

The word "Bordeaux" on a bottle is not sufficient indication under section 10, clause (1) of Act IV of 1889. The law, as it formerly stood, required both the *place* and the country to be indicated on the label, but since the Act was amended by Act IX of 1891, the country of origin only is now required, and unless it is indicated always it would be difficult to enforce compliance with the Acts."

(4) Case (*k*) under clause (*d*), paragraph 3 of the Collector's letter (two consignments of glass beads from Trieste).

It is not clear that a warning was needed in this case. The Collector states that "made in Bohemia" on the label was not sufficient according to law, and that it should have been "made in Austria." In the Commissioner's opinion this view cannot be sustained, and he would request the orders of Government on the point. It seems to him that an article is as properly marked if labelled "made in Hanover" or "made in Prussia" as "made in Germany." Properly speaking Bohemia is a province of the "Austro-Hungarian Empire," not of Austria.

(5) Case (*l*), clause (*c*), paragraph 4 of the Collector's letter.

The Commissioner was not sure whether it was possible to insist on bars and bundles of iron being stamped with the country of origin. But the Collector explains that this is the fact, and that this requirement of the law is insisted on at the Bombay Custom House, the procedure at which is invariably followed at Karachi as far as possible

(6) Case (*j*), clause (*d*), paragraph 3 of Collector's letter.

VA. stands for Virginia, not for United States of America. This has been pointed out to the Collector.

3. Government will recognise that care and attention are paid to the enforcement of the Act in Karachi.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

RAILWAY STATISTICS.

No. XXXII OF 1892-93.

STATEMENT OF APPROXIMATE GROSS EARNINGS OF INDIAN RAILWAYS.

N. B.—As regards the figures in column *Total Receipts from 1st April 1892*, audited figures have been used as far as possible.

The Gazette of India.

No. 50.} CALCUTTA, SATURDAY, DECEMBER 10, 1892.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for week ending at 8 a.m. on Saturday, November 26th, 1892.

The weather charts for the week, November 20th to November 26th, again show very quiet, fine weather prevailing throughout the whole of the Indian region. On most days of the week pressure has been highest over the central parts of the country, but occasionally owing to a brisk barometric rise in the north-west, the high pressure area has extended in that direction and has covered the whole of North-Western and Central India. Pressure has been lowest over the south-east of the Bay and over the Arabian Sea off the west coast of the Peninsula. The barometric difference between the areas of high and low pressure has altered from day to day, the barometric gradient being at times moderately steep, and at others very slight, and with these changes the force of the wind has also altered slightly, but on the whole both the general distribution of pressure and the circulation of the wind has been very steady throughout the week. The temperature has varied considerably both in North-West India and in Burma, but elsewhere the changes have been small, and the mean result for the whole of India for the week has been a very slight departure from the normal.

On Sunday, November 20th, the barometer was falling fairly briskly in Sind where a shallow depression had appeared. Elsewhere the changes were small. Pressure was highest in Eastern Rajputana, lowest in Lower Burma and Ceylon. Calms prevailed over a large part of Northern and Central India, northerly winds over the Bay, and easterly winds on the west coast. The only rainfall was a light shower at Negapatam. On the 21st, pressure was falling almost

everywhere, but the general distribution was little changed. Readings were highest over the central parts of the country and lowest within a shallow depression overlying Tenasserim and the south of the Bay. The wind was westerly in the Gangetic plain, but otherwise the directions were unaltered. Rain was slightly more general, light showers having fallen at Tavoy, Moulmein, Rawalpindi, Peshawar, Colombo, Trivandrum, Negapatam, and Tinnevelly. On the 22nd, the barometer was still falling except in North-West India where a recovery had set in. Pressure was highest in the north-west of the Punjab, but the high pressure area over the central parts of the country, though of less intensity than on the preceding days, still existed. Calms prevailed over the Punjab, but elsewhere there was no change in the general circulation of the winds. Rain had fallen at Peshawar, Colombo, Wellington, Cochin, Cuddalore, Trichnopoly, Negapatam, and Tinnevelly. The chart of the 23rd showed that the barometer was rising over North East India and the East of the Peninsula and was falling elsewhere. The fall had been brisk over the Punjab and a feeble depression had replaced the high pressure area previously reported from North-West India. Consequently the high pressure area over the central parts of the country had again risen to importance. The wind circulated anti-cyclonically around this area, blowing from the westward down the Gangetic plain, from the northward over the Bay area, and from the eastward in Western India. Light showers had fallen at Moulmein, Colombo, Wellington, Coimbatore and Tinnevelly. On the 24th the barometer was rising everywhere. The rise had been very rapid over North-West India and a high pressure area had again formed over that region and extended south eastward so as to include the permanent high pressure area of the central parts of the country. Readings were lowest in Malabar and Burma, but the barometric differences were small. Calms and variable breezes prevailed within the high pressure area but elsewhere the wind circulation was unaltered. The only rainfall was a shower at Colombo. On the 25th the barometric changes reported were generally small and irregular and the distribution was practically the same as on the preceding day. The winds exhibited a well marked anticyclonic ciculation. There was no rain. The chart of the 26th showed that pressure changes continued small, and there was again no general alteration in the distribution. Calms prevailed over North-West India and anticyclonic winds elsewhere. There was again no rain.

Temperature.—The following table shows the variations of the mean temperature from the normal on each day of the week for the principal provinces of India :—

PROVINCE.	20th.	21st.	22nd.	23rd.	24th.	25th.	26th.	Mean variation of week.
	°	°	°	°	°	°	°	°
Burma	+1·3	+0·5	−0·1	−0·9	−2·3	−2·8	−2·2	−0·9
Bengal and Assam . .	−0·9	−0·9	−1·1	−1·5	−0·4	−0·5	−1·8	−1·0
North-Western Provinces and Oudh	+1·0	+1·0	+2·5	+3·1	+2·4	+1·6	−1·0	+1·5
Punjab	+2·7	+5·2	+3·5	+0·8	+0·7	−0·1	−0·9	+1·7
Bombay	−1·6	−1·1	−1·3	−1·1	−1·4	−1·0	−0·8	−1·2
Central Provinces and Berar	−0·7	−0·2	+0·9	+1·4	+1·9	+1·7	+1·8	+1·0
Central India and Guzerat .	+0·5	+0·9	+1·4	+1·5	+1·6	+0·5	−1·2	+0·7
Sind and Rajputana . .	+2·6	+4·5	+2·4	+2·6	+2·9	+0·9	−1·8	+2·0
Madras	−0·4	+0·2	−0·9	−1·1	−1·4	−1·1	−1·1	−0·8
MEAN FOR WHOLE INDIA .	+0·5	+1·1	+0·8	+0·5	+0·4	−0·1	−1·0	+0·3

The mean variation of the whole of India for the week was only +0°·3. From the 20th to the 24th the mean slightly exceeded the average, but on the 25th and 26th, the weather was slightly cooler than usual. The provincial returns show that in Burma Bengal, Assam, Bombay, and Madras, the temperature of the week was below the average, and that in the other provinces it was above. Relatively to the average the warmest region was North West India, while the coolest was Bombay. Between the 20th and the 25th a well-marked cold wave entered Northern India from the westward and advanced eastward as far as the North-Western Provinces, but on the 26th it suddenly disappeared.

Rain.—The rainfall table at the close shows that rain fell during the week only in ten of the rainfall divisions, and in the case of four of these, the average actual rainfall of each division was less than one-tenth of an inch These four divisions were Tenasserim, Central Burma, the hill districts of the Punjab and Coorg, while the other six divisions which received an average actual rainfall of an amount varying from one-tenth of an inch to four-tenths of an inch were Lower Burma, North-West Punjab, Malabar, Madras (South-central), East Coast (South), and Madras (South).

In Tenasserim no rainfall is expected during the week under review, and hence in this division there is an excess of 00·5 inch, but in every other case there is a deficiency.

The three concluding columns of the table giving the actual and normal rainfall for the period, October 16th to November 26th, show a considerable deficiency of rainfall over a large part of the country, but except in the south of the Peninsula the deficiency is of comparatively little importance as the amount expected is small. In Madras (South-central) the total received during the period was 3·38 inches against an average of 7·78 inches; in Madras (South) the amount received was only 2·60 inches as against 9·02 inches anticipated; in the East Coast (South) 3·27 inches has been received, while 12·70 inches is expected. Hence in this region the deficiency is large.

In parts of Madras moderate falls were received as the following statement shows :—

Division.	District.	Station.	Amount. Inches.
Madras (S. C.)	Coimbatore	Pallachi	2·48
Ditto	Nilgiris	Coonoor	3·62
East Coast (S.)	Tanjore	Tranquebar	2·10

Provinces.	Division.	Rainfall data for week ending November 26th, 1892. Average actual rainfall of Division.	Average normal rainfall of Division.	Excess or defect in inches.	Rainfall data from Oct. 16th to November 26th, 1892. Average actual rainfall of season to date.	Average normal rainfall, October 16th to November 26th.	Excess or defect of (seasonal) rainfall expressed as a percentage.

J. W. P. MUIR-MACKENZIE,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 3rd December.*—Light showers generally in the Carnatic from Nellore to Tanjore and a few scattered falls elsewhere in the southern half of the Presidency. None elsewhere. Sowings retarded owing to drought. Standing crops good in the Circars, Deccan and the West Coast, but suffering from drought in the Carnatic, Central and Southern Districts. Harvest proceeding. Outturn average to good in former, poor to moderate in latter groups. Water-supply for drinking abundant, but for irrigation scanty and insufficient throughout the Carnatic and Southern Districts. Pasture and fodder available. Condition of cattle good. Prices stationary in the Circars, Deccan and West Coast, but risen very sharply in all other districts. Over the greater part of the Carnatic, Southern and Central Districts, the continued absence of heavy rain is causing very serious damage. Rainfall of October was generally light, and over the greater part of the area the fall of the last four weeks is much less than one inch, whilst usual fall of the Carnatic is about 10, and of the Southern Districts 6 inches during the period.

Bombay.—*For week ending 7th December.*—*Jowari* and cotton in parts of Bijapur blighted, and wheat in one taluka of Thar and Parkar damaged by locusts: standing crops otherwise good, except *bajri* in Nasik and cotton in parts of Dharwar. Harvesting of early and sowing of late crops progressing. Cotton-picking continues in three districts, and opium sowing in Baroda. Fodder sufficient. Agricultural stock good. Prices generally steady.

Bengal.—*For week ending 3rd December.*—Rain fell in the districts of Jalpaiguri and Darjeeling on the 27th November, and in the former was accompanied by hail which did slight damage to the standing crops. Elsewhere there was no rain. No change has occurred in the prospects of the winter rice crop. The progress of the harvest is satisfactory throughout the Province, both in the districts as to which more favourable anticipations of the outturn have been formed and in those for which the estimates are less favourable, *viz.*, parts of Burdwan, Bankura, Midnapore, Hooghly, and Shahabad. The prospects of the cold-weather crops, including poppy and tobacco, are promising, but more moisture is required for these crops in Behar. Heavy dews are reported from some places. Prices of rice are falling in many districts. Cattle are healthy, and fodder and water plentiful.

North-Western Provinces and Oudh.—*For week ending 7th December.*—Weather seasonable. Rain still needed in places. Poppy-sowings completed. Irrigation of spring crops and poppy continues Pressing of sugarcane in progress. Prospects generally favourable. A flight of locusts passed over Meerut, from east to west, but no damage has been reported. Prices fairly steady.

Punjab.—*For week ending 7th December.*—Slight rain has fallen in six districts. Harvesting of autumn crops nearly completed. Cotton-picking continues. Sugarcane being pressed. Sowing of spring crops in progress: it has been stopped in Rawalpindi for want of rain. Outturn of the autumn crops is reported an average one in Lahore and Rawalpindi. Condition and prospects of spring crops are fair throughout. Condition of cattle is generally reported good. Fodder is said to be sufficient in all districts, except in parts of Dera Ismail Khan. The poppy crop is growing well in parts of Lahore. Prices unsettled in one district, rising in one, falling in two others, and stationary elsewhere.

Central Provinces—*For week ending 7th December.*—Weather clear and cold. Harvesting of autumn crops continues. Spring crops in excellent condition. Fodder sufficient. Prices stationary.

Burma.—*For week ending 3rd December.*—LOWER BURMA: In Thayetmyo crops are poor; in Amherst slight damage has been done by sea water; in Tavoy, 2,710 acres have been damaged by various causes: in all other districts crop prospects are excellent. Reaping progressing. UPPER BURMA: More rain is needed in Pakokku, Minbu, and Magwe. In parts of Bhamo crops have been damaged by floods and vermin. The condition of crops in Yamethin is critical. In the Wundwin sub-division of the Meiktila district, rice crops have failed, and *jowar* is indifferent. In Shwebo, owing to want of rain, there has been no sowing of crops. Crop prospects elsewhere good.

Assam.—*For week ending 7th December.*—Weather seasonable. Harvesting of winter paddy continues. Prospects of standing crops good. Condition of cattle normal. Fodder and water sufficient.

Mysore and Coorg.—*For week ending 7th December.—Mysore:* Crops generally require more rain. Prospects favourable. Prices risen in the Bangalore and Tumkur districts.

COORG: Rainfall *nil.* Rice crop maturing. Coffee-picking in progress. Prices stationary. Fodder and water for cattle sufficient.

Berar and Hyderabad.—*For week ending 7th December.—Berar:* Weather fair and cool. Autumn crops in good condition. Spring sowings almost completed and young crops promise well. Fodder and water sufficient. Cattle healthy. Prices almost stationary.

HYDERABAD: No rain during the week. Harvesting of autumn crops in progress. Sowing of spring crops continues and lands under preparation for hot-weather crops. Prices—wheat 9, coarse rice 9¼, white *juar* 15¾, yellow *juar* 18¼, and *tur* 10 seers per current rupee.

Central India.—*For week ending 7th December.*—*Jowar* and cotton harvesting in progress in most parts of Central India. Outturn expected good. Spring sowings still continue in some parts. Condition of crops good, but no winter rain has fallen in Bundelkhand. Agricultural stock and pasturage in good condition. Opium being sown in Bhopawar and germinating in Bhopal. Condition of crops in other Agencies good. Prices of food grains generally steady.

Rajputana.—*For week ending 7th December.*—Agricultural operations and standing crops satisfactory. Harvests generally good. Condition of cattle good. Some cattle-disease in parts of Ulwar. Pasturage or fodder sufficient. Prices steady in nine States, falling in four, rising in one, and fluctuating elsewhere.

Nepal.—*For week ending 1st December.*—Very slight rain. Weather fine and cold. Prospects of crops good.

FINANCE AND COMMERCE DEPARTMENT.

SEPARATE REVENUE.

Post Office.

Savings Bank.

REPORT ON THE OPERATIONS OF THE SAVINGS BANKS IN INDIA FOR THE YEAR 1891-92.

No. 4890-A., dated Calcutta, the 7th December 1892.

ORDER—By the Government of India, Finance and Commerce Department.

READ—

Report by the Comptroller and Auditor General on the operations of the Savings Banks in India for the year 1891-92.

No. 30, dated Calcutta, the 24th November 1892.

From—The Comptroller and Auditor General,

To—The Secretary to the Government of India, Finance and Commerce Department.

I have the honour to submit the annual report on the operations of the Savings Banks in India during the year 1891-92.

2. These Banks continue to be of two classes, *viz.*, Banks open to the public and Service institutions. The former comprise Presidency and Post Office Banks and the latter State Railway Provident Institutions, the Civil Engineers' Provident Fund and the Military Banks. The State Railway Provident Institutions are for the benefit of the non-pensionable employees of the State Railways, the Civil Engineers' Provident Fund for the benefit of the Officers of Public Works and Telegraph Departments, and the Military Banks for the non-commissioned officers and privates of British regiments.

3. I annex the usual statements marked I to VII, containing the accounts and statistics of the year. The principal features of these accounts are summarised as follows:—On the 31st March 1892 there were 6,642 Government Savings Banks in India containing 528,752 accounts which earned from Government ₹30,55,069 in the shape of interest and possessed balances at their credit aggregating ₹8,88,59,118. In addition to these balances, Government held on behalf of depositors Government Promissory Notes of the nominal value of ₹4,38,900, and sold for, and returned to, depositors during the year Promissory Notes amounting to ₹1,34,200.

4. There has been no change in the total number of Banks though there are slight variations in the details. There has, however, been an increase of 53,423 in the number of depositors and of ₹82,36,698 in the balance at credit at the close of the year as compared with 1890-91, and during the year under review the receipts, withdrawals and interest exceeded those of the previous year by ₹1,38,58,000, ₹1,09,11,000, and ₹2,57,134 respectively. The effects of the reduction of the maximum limit of annual deposits on the total receipts have been nearly counterbalanced by the steady growth in the number of depositors, and the total receipts of the year under review were the highest on record except those of the years 1886-87 and 1888-89.

5. The transactions of the several classes of Banks are shown in the following table:—

Description of Banks.	Number of Banks.	Number of Depositors.	Interest earned.	Bank balances.	Nominal value of Government Promissory Notes.	
					Returned and sold.	Held for Depositors.
			₹	₹	₹	₹
Presidency, Calcutta . .	1	11,062	87,331	24,99,984	500	29,900
„ Madras . .	1	2,959	17,863	5,51,308	7,000	16,000
„ Bombay . .	1	25,124	2,69,223	75,60,590	6,000	23,800
Railway . . .	11	13,605	1,52,762	45,93,559	...	1,000
Civil Engineers . . .	1	599	70,275	19,57,623	...	...
Military	175	11,950	48,707	11,02,895	...	...
Post Office . . .	6,452	463,453	24,08,908	7,05,93,159	1,20,700	3,68,200
Total .	6,642	528,752	30,55,069	8,88,59,118	1,34,200	4,38,900

6. The subjoined statement compares the figures for the year under report with those of the previous year for each class of Bank. The Presidency Bank, Calcutta, shows a decrease in the number of accounts and an increase in the amount of balance. The Banks at Madras and Bombay show an increase in both respects. The Railway Banks lost in the number of banks and of accounts, but gained largely in the amount of balance. The Civil Engineers' Provident Fund shows steady progress both in the number of accounts and the amount of balance. The Military Banks show a large decrease both in the number of accounts and the balances, though the number of banks has increased by 5. For the first time since their institution there has been a falling off in the number of Post Office Banks, the decrease being, however, only 3; but the steady growth both in the number of depositors and the bank balances continues. There is no reason to suppose that the limit in regard to the number of depositors and in the bank balances in the Post Office Savings Banks has been reached, and it is probable that these banks will continue their steady growth in popularity for a considerable period.

Increase or decrease in 1891-92, as compared with 1890-91.

7. The new investment in Government Promissory Notes amounted to only ₹1,33,500 as against ₹2,51,100 in the preceding year, but owing to larger receipts from depositors and smaller withdrawals the closing balance of securities in the custody of Government was somewhat larger than in the preceding year. The high price of Government paper ruling throughout the year has evidently acted as a check on investments, and the same cause has also without doubt had a considerable effect in increasing the cash deposited during the year.

8. Statement VII gives particulars by provinces of the classification of the depositors and their balances for Presidency and Post Office Savings Banks combined. It will be observed that the growth of the depositors' balances is spread over all the provinces, though it is largest in Bengal and Bombay. As might be expected, the professional classes, especially those having a fixed income and comprising Government servants form a large proportion of the depositors, while the smallest proportion is that of the agricultural class. Owing however to the large number of depositors classed as "indefinite or non-productive" it is doubtful whether any safe conclusions can be drawn from the classification of depositors.

9. My ledgers relating to the Civil Engineers' Provident Fund have been agreed with the accounts kept by the Examiner of Accounts, Military Works, but the figures for the year 1891-92 are subject to correction on the closing of the Finance and Revenue Accounts which will remain open up to February next.

Statement I.

Number of Working Banks and of the Depositors therein on the 31st March 1892.

SUPPLEMENT TO

The Gazette of India.

No. 51.} CALCUTTA, SATURDAY, DECEMBER 17, 1892.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the week ending at 8 a.m. on Saturday, December 3rd, 1892.

Strongly marked anticyclonic conditions have prevailed throughout the Indian region during the week under review. Pressure has been steadily highest over North-Western India and the central parts of the country, and lowest over the Arabian Sea off the Malabar Coast and the south of the Bay. Towards the close of the week unsettled weather appeared both in Madras and in North-West India. In both regions rain fell and the wind directions were changed, but the disturbance was not sufficient to alter the general distribution of pressure as described above. The winds were anticyclonic throughout the greater part of the country during the week, but in the north-west of the Punjab and in Baluchistan and on the Madras Coast, at the close of the week slight cyclonic movements were reported. The rain which fell in the extreme north-west of India and in the south of the Peninsula was slight.

On the 27th the pressure changes were small except in Sind and Kathiawar where a brisk fall had occurred. Readings were highest over Rajputana and adjacent districts and lowest in Malabar and over the south of the Bay. Pressure was generally below the average. The wind was fairly normal in direction and force, but at Diamond Inland a strong north-north-east wind

was blowing. Snow had fallen at Gnatong and slight rain showers at Diamond Island, Bassein, Rangoon, Darjeeling, Jalpaiguri, and Colombo. On the 28th the barometer was rising except in Burma, and the pressure generally was about normal. The wind remained strong at Diamond Island and it was evident that some slight disturbance existed to the north of the Andaman Islands. Showers had again fallen at Diamond Island, Bassein, Rangoon, Silchar, Gnatong, and Jalpaiguri. The chart of the 29th showed a barometric fall over the Punjab, the west of the North-Western Provinces, Northern Rajputana, South-West Bengal and Lower Burma, and a rise elsewhere. The general distribution of pressure was unchanged, and the only points of importance were the relatively low readings existing over Northern India and the slight disturbance near the Andaman Islands. The wind had drawn towards North-West on the west side of the Bay, and was still strong from the north-eastward at Diamond Island. A few drops of rain were reported from Diamond Island and Bassein. On the 30th the pressure changes were slight except in Sind where the barometer had fallen rapidly. The tendency was, however, downward almost everywhere. Pressure was below the normal average except in the west, south, and centre of the Peninsula. The winds were generally unchanged in direction, but the force was rising around the Bay. The disturbed weather near Diamond Island continued. Slight rain had fallen at Quetta, Tounghoo, and Diamond Island. The chart of the 1st December showed a barometric rise everywhere, and pressure exceeded the normal average in all districts except Lower Sind and Lower Burma where there was some deficiency. Pressure was highest in the Punjab and lowest over the Bay. The wind had shifted to east-north-east at Diamond Island and the area of disturbed weather near that station had apparently commenced a westerly advance. The winds had shifted to east and south-east at some stations on the plains and hills of the Punjab, and a partial cyclonic circulation was shown over the Bay. The force remained strong at Diamond Island and was fresh at several stations. Chaman, Quetta, and Trevandrum reported light rain showers, and Gnatong a snowstorm. On the 2nd the changes of the barometer were again generally small and irregular, the more important being a rise over North-Eastern India and a fall on the Madras Coast. The wind was irregularly cyclonic and fresh in force over the centre and south of the Bay, and rain had commenced at Madras where also the sea was rough. Strongish winds prevailed on the North-West Frontiers of India and heavyish rain had fallen at Chaman and Quetta and slight rain at Montgomery, Dera Ismail Khan, Multan, and Srinagar. On the 3rd the barometer was rising almost everywhere, the rise being brisk to rapid in the north-west. The disturbance over the Bay had apparently filled up and pressure decreased steadily from a high pressure area in the north-west to a low pressure area in the extreme south. The winds were irregular and strong in places, over Madras and over the Punjab and its neighbourhood, but elsewhere the ordinary anticyclonic directions prevailed. Showers of rain were reported over the Punjab, Baluchistan, and the south of the Peninsula, the largest amounts being reported from Baluchistan.

Temperature.—The following table shows the variations of the mean temperature from the normal on each day of the week for the principal Provinces of India:—

Province.	27th.	28th.	29th.	30th.	1st.	2nd.	3rd.	Mean variation of week.
Burma	−0·4	−2·7	−1·7	+0·3	−0·3	−0·5	−0·2	−0·8
Bengal and Assam	−2·4	−3·1	−1·8	−0·8	−0·2	−1·2	−2·4	−1·7
North-Western Provinces and Oudh	−3·0	−3·4	−2·4	−2·5	−2·3	−1·1	+0·4	−2·0
Punjab	−0·8	−0·4	−1·5	+0·7	+1·5	+2·7	−0·3	+0·3
Bombay	−1·1	−1·3	−1·5	−2·2	−3·0	−3·1	−0·8	−1·9
Berar and Central Provinces	−0·1	−2·1	−4·5	−5·1	−3·6	−1·8	−0·4	−2·5
Guzerat and Central India	−2·6	−3·0	−3·2	−4·1	−3·3	−1·6	−0·7	−2·6
Sind and Rajputana	−2·2	−2·4	−2·9	−1·8	+1·1	−0·4	−1·6	−1·5
Madras	−1·0	−1·3	−0·6	−1·3	−2·0	+0·4	+1·9	−0·6
Mean for whole India	−1·5	−2·2	−2·2	−1·9	−1·3	−0·7	−0·5	−1·5

The above shows a general deficiency for the whole of India for the week of 1½°. On the 28th, 29th, and 30th the general defect for all Provinces was about 2°, on the 27th November and 1st December the deficiency was about 1½°, and on the ramaining two days was about ½°. The provincial returns show a deficiency of 2½° at the more central stations, of 2° in the North-Western Provinces and Bombay, of 1½° in Bengal, Sind, and Rajputana, and of less than 1° in Burma and Madras. In the Punjab there was a slight excess. The excess in the last-named province was due to the high minimum temperatures which accompanied the cloudy nights due to the slightly disturbed weather at the close of the week.

Rain.—The concluding table shows that rain has been received in fifteen only of the rainfall divisions, and of these fifteen divisions, no less than ten had an average actual rainfall for the division of less than one-tenth of an inch. The five divisions which received one-tenth or over were Lower Burma, the hill districts of the Punjab, the west of the Punjab, and the East Coast, Central and South, and with these exceptions there was practically no rain throughout. The third column of the table shows that even this slight rainfall was in excess of the normal in Lower Burma, in Assam (Surma), and in the hill districts, the north-west and the west of the Punjab, but elsewhere the fall was deficient. It is, however, only in the Carnatic that rainfall of any importance is anticipated during the week under review, and it is only in the three following divisions, *viz.*, the East Coast (Central and South) and Madras (South) that the existing shortness of the rainfall is of great importance.

The information given in the three final columns of the table is practically the same as that given by the same columns in last week's table, *viz.*, a rather serious deficiency in Southern and Central Madras and Mysore, a comparatively unimportant deficiency over Nothern India, and a considerable excess elsewhere.

No heavy falls occurred during the week.

Provinces.	Division.	Rainfall data for week ending 3rd December.			Rainfall data from 16th October to 3rd December 1892.		
		Average actual rainfall of Division.	Average normal rainfall of Division.	Excess or defect in inches.	Average actual rainfall of season to date.	Average normal rainfall, 16th October to 3rd December.	Excess or defect of (seasonal) rainfall expressed as a per-centage.

Officiating Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 10th December.*—Moderate showers in Carnatic and Central districts and Nilgiris, light and scattered in Southern districts. The rain has done some good, but was too little to save much of the crops. Ordinary sowings retarded. Standing crops thriving in Circars, Deccan, and West Coast, suffering very severely in Carnatic and Southern and somewhat in Central districts. Harvesting of early crops continues: yield fully average in Circars and Deccan, very moderate in Southern, Central and Carnatic. Water-supply for drinking ample, for irrigation very scanty in southern half of the Presidency. Pasture land fodder generally abundant, but pasture growing scarce in the Southern districts. Condition of cattle good. Prices stationary Circars, Deccan, and West Coast, rise continued in Carnatic, Central and Southern districts, except in Coimbatore and Madura where rates rather easier, though still double normal rates. Deficiency of rainfall last six weeks 10 to 12 inches Carnatic and Tanjore, 6 inches Madura and Tinnevelly, and upwards 3·5 inches Central districts, usual fall being upwards 12 Carnatic and Tanjore, 7 Madura and Tinnevelly, and 4 to 9 Central districts. This great and continued deficiency causing increasing damage, and great loss of crop anticipated.

Bombay.—*For week ending 14th December.*—Late crops blighted and cotton damaged by winds in parts of Bijapur. Standing crops otherwise good except *bajri* in Nasik. Harvesting of early and sowing of late crops progressing in a few districts. Cotton-picking continues in two districts and opium sowing in Baroda. Prices generally steady. Agricultural stock good. Fodder sufficient.

Bengal.—*For week ending 10th December.*—There was no rain in the Province during the week with the exception of a few light showers in the districts of Jalpaiguri and Darjeeling. The winter rice harvest is in full progress, and a good outturn continues to be generally anticipated, but reports from Burdwan, Bankura, Midnapore, and Hooghly indicate a poor harvest in parts of those districts. The spring crops are doing well, but rain would be beneficial in some districts in Behar. Sugarcane-pressing has begun in several districts. Poppy is a promising crop, except in the unirrigated tracts of Muzaffarpur, where the sowings have failed almost entirely for want of moisture. The prospects of the tobacco crop are also favourable. Prices of rice continue easy with a tendency to fall as new rice comes into the market. Cattle are in good condition, and fodder and water supplies sufficient. There is no longer any distress in the Diamond Harbour sub-division, where the winter rice is a bumper crop. The distribution of gratuitous relief has ceased.

North-Western Provinces and Oudh.—*For week ending 14th December.*—Except in Ballia where there has been slight rain, the weather has been fine though generally cloudy. A fall of rain would greatly benefit the young crops. Irrigation in progress and prospects generally good. Sugarcane-pressing going on. Locusts appeared in parts of the Fyzabad and Saharanpur districts, but no damage has been reported. Prices on the whole fairly steady.

Punjab.—*For week ending 14th December.*—Slight rain in a part of the Mooltan district only. Sowing of spring crops continues and rain urgently needed in Umballa and Lahore. Sugarcane being pressed. Condition and prospects of spring crops reported good in all districts except Rawalpindi, where they are average. Cattle said to be in good condition throughout the Province. Fodder sufficient in all districts except in parts of Dera Ismail Khan. Poppy crops

flourishing in Lahore. Prices unsettled in two districts, rising in one and stationary elsewhere.

Central Provinces.—*For week ending 14th December.*—Weather cloudy and cool. Reaping of rice in Bilaspur and of *juar* in Nagpur and Wardha in progress. In Chanda, Raipur, and Sambalpur threshing of rice continues. Winter crops thriving. In the Harda tahsil insects have attacked the young wheat crops.

Burma.—*For week ending 10th December.*—LOWER BURMA: Crop prospects continue good in all districts except Thayetmyo, where an 8 anna crop is expected. Reaping in progress everywhere. UPPER BURMA: No rain has fallen during the week, and little change has taken place in crop prospects. In Bhamo damage has been caused by caterpillars and rats, and in two circles of Shwebo by elephants. In two townships of Myingyan the *jowar* crop is withering and the late millet crop is poor. Dry-weather crops in Legain township and Salin sub-division, Minbu district, have failed largely from want of rain. Prospects in Meiktila and Yamethin are bad, but in other districts they are good. Early paddy is being reaped in all districts, and in Meiktila wheat is being sown. The price of paddy has fallen considerably in Rangoon and the Upper Chindwin.

Assam.—*For week ending 13th December.*—Weather cool. Reaping of winter paddy continues. Prospects of crops generally good. Condition of cattle normal. Fodder sufficient.

Berar and Hyderabad.—*For week ending 14th December.*—BERAR: Weather fair and cool. Autumn crops in good condition, some being cut. First picking of cotton almost finished; second picking commenced. In Ellichpur sowing of spring crops almost completed. Present spring crops good. Fodder and water sufficient. Cattle healthy. Prices almost stationary.

HYDERABAD: No rain during week. Sowing of spring crops in progress. Harvesting of autumn crops continues. Lands are being prepared for hot-weather sowings. Prices:—wheat 9, coarse rice 9¼, white *juar* 15⅝, yellow *juar* 18¼, and *tur* 10 seers per current rupee.

Mysore and Coorg.—*For week ending 14th December.*—MYSORE: Crops and prospects generally fair, but more rain is wanted especially in parts of the Mysore, Hassan, and Chitaldroog districts. Prices fallen in the Bangalore and risen in the Hassan district and parts of Mysore.

COORG: Rainfall *nil*. Rice crop ripening. Coffee-picking continues. Prices stationary. Fodder and water for cattle sufficient.

Central India.—*For week ending 14th December.*—Harvesting of autumn crops still continues in four Agencies and has been completed elsewhere. Outturn generally good. Spring sowings in progress in four Agencies and completed in Gwalior and Bundelkhand, where the winter rain still holds off. Condition of agricultural stock and pasturage good in all parts. No change in prices of food-grains. Weather cloudy and warm.

Rajputana.—*For week ending 14th December.*—Agricultural operations satisfactory. Standing crops good. Harvest prospects generally good. Cotton crops slightly damaged in Ajmere district by frost. Cattle in good condition. Pasturage or fodder sufficient. Prices steady in nine States, falling in three, rising in two, and fluctuating elsewhere.

Nepal.—*For week ending 8th December.*—Weather fine with passing clouds. Wheat and peas germinating.

J. W. P. MUIR-MACKENZIE,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

REVIEW OF THE ADMINISTRATION REPORT OF THE METEROLOGICAL DEPARTMENT FOR THE YEAR 1891-92.

Extract from the Proceedings of the Government of India, Revenue and Agricultural Department,—No. 59, dated Calcutta, the 9th December 1892.

Meteorology.

READ—

Letter from the Meteorological Reporter to the Government of India, No. 4410, dated 22nd October 1892, submitting the Annual Report on the Administration of the Meteorological Department for the year 1891-92.

RESOLUTION.

1. The number of observatories in charge of the Meteorological Department has increased from 154 in 1889-90 and 159 in 1890-91 to 165 in the year under report. Two old observatories—at Zanzibar and at Camorta in the Nicobars—resumed operations during the year, and two new stations were started at Tinnevelly and Bijapur.

2. During the present year sanction has been given for the establishment of fourteen more observatories, of which four or five will be in Upper Burma and seven or eight on the North-West Frontier and in Persia. The latter will be of especial value in connection with the storms to which the cold weather rains of Northern India and the snowfall of the Himalayas owe their existence. The seven new stations in Hyderabad and the new station at Srinagar in Kashmir, to which allusion was made in last year's review, commenced recording observations in the autumn of 1892. The opening in the spring of 1892 of the first class observatory at Bangalore has been followed up by the organization of a complete battery of stations for the Mysore State under the superintendence of a special department in charge of a skilled officer. This undertaking on the part of the Durbar is likely to be of considerable practical value in a part of the Deccan peculiarly liable to drought. The voluntary observatories continued to do good work, and the best acknowledgments of the Government of India are due to the observers at those stations.

3. Satisfactory progress has been made in supplying the Symons' gauge for ordinary rainfall observations in Madras, the North-Western Provinces, and Native States. The Local Governments and Administrations have also circulated the instructions prepared by the Meteorological Reporter for the fixing of the gauges, record of the rainfall, and inspection of gauge-stations. The degree of interest taken by District Officers in inspection work is, however, by no means uniformly satisfactory. As compared with the importance of securing a correct registration of rainfall, especially in insecure tracts, the time and trouble entailed by inspections are insignificant. The Government of India, therefore, trust that Provincial authorities will take measures, wherever this has not already been done, to ensure a regular and sufficient inspection of gauge-stations by local officers, and the supply to the Meteorological Reporter of a sufficient number of the duplicate reports, alluded to in paragraph 25 of his report, to enable him to judge of the efficiency with which the rainfall record is being maintained.

4. The tabulation and publication of rainfall data have received considerable attention during the year, and the acknowledgments of the Government of India are due to the Provincial Governments which have cordially responded to the proposals for publication of monthly statements of rainfall in forms suggested by the Meteorological Department. The year's results are now comprehended in a single volume showing a most complete and valuable record of rainfall over a large tropical area.

The Reporter has made an interesting comparison between the forecast of the rainfall of the south-west monsoon issued by him on June 6th, 1891, with the actual data subsequently obtained, from which it appears that the general character of the forecast was borne out by the results. His observations on the subject are repeated below—

"The delay in the establishment of the monsoon and the large deficiency in Rajputana were fully anticipated. The deficiency in Bengal was due to the great indraught to the sink in the North-Western Provinces and Central Provinces. This was not anticipated so fully as it might and probably would have been, if the indications of the existence of this sink had been stronger and more decided than they were when the forecast was drawn up, and if the accuracy of the barometric data employed were not occasionally very doubtful."

The Government of India are confident that the value of these forecasts will increase markedly from year to year as the data available become more numerous.

5. Flood-warnings continued to be furnished with useful results. A new departure, also, was made by the organization of an arrangement for the issue of weather warnings to troops in the field: and an experimental trial was given to the system during the Black Mountain expedition of April and May 1891 and the Cavalry Camp held at Aligarh in December 1891.

6. An unprecedented amount of valuable work was done in the collection of special storm observations and of marine data from ships' logs and the Government of India have recently sanctioned the publication of these in a suitable form. Record is given of 22 storms as against 10 in the previous year, and the arrangements for storm-warnings, which remain practically unaltered, have proved thoroughly efficient. The services rendered by the Telegraph Department in this connection are especially noted by Mr. Eliot and merit the best thanks of the Goverment of India.

Mr. Eliot has explained the circumstances attending the loss of the *Enterprise* and the *Coleroon* in the cyclone of November 1891, and his explanation renders it very doubtful whether, considering the course and suddenness of the storm, telegraphic communication with the Andamans would have prevented the disaster. It seems clear that no sensible increase in protection to the Port of Calcutta would be gained thereby—a much more desirable undertaking for this object being the construction of a cable from the Eastern Channel Lightship to Saugor Island. With reference to a suggestion from the Calcutta Chamber of Commerce, the Government of India have expressed their inability in the present state of the finances to entertain the proposal for the connection of Port Blair with the mainland by cable, which would have entailed an expenditure of over 15 lakhs of rupees.

7. The Government of India are glad to notice the efficiency of the inspections and the large number of instruments verified during the year. The actinometric observations at Simla and meteorological observations in forests respecting the influence of their growth on rainfall were satisfactorily continued. The Seismic experiments in Assam have again proved useless, and it is for consideration whether they should not now be dropped. The annual weather review has been abandoned for a monthly review which supplies information more promptly and at more suitable intervals; and the publications of the Department generally record a considerable amount of valuable work.

8. The thanks of the Government of India are again due to the Imperial Reporter, to his Assistants, and to the Provincial Reporters for the excellence which continues to characterize their work, as well as for the increased practical value which it assumes year by year under the guidance of Mr. Eliot.

ORDER.—Ordered, that the foregoing Resolution be forwarded for communication to the several Departments of the Government of India, to Local Governments and Administrations, to the Director General of Telegraphs, to the Surveyor General of India, to the Surgeon General with the Government of India, and to the Metrological Reporter to the Government of India.

Ordered also, that it be published in the Supplement to the *Gazette of India*.

J. W. P. MUIR-MACKENZIE,
Offg. Secretary to the Government of India.

SUPPLEMENT TO

The Gazette of India.

No. 52.} CALCUTTA, SATURDAY, DECEMBER 24, 1892.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the week ending at 8 a.m. on Saturday, December 10th, 1892.

The rainfall, which accompanied the advance of the depression across the Bay which was noticed in last week's summary, continued over the south of the Peninsula during the first two days of the week under review, but on the 6th the rainfall ceased and the weather became fine. On the 4th there were also light showers over the North-Western Himalayas, and throughout the whole week light showers occurred on and near the Eastern Himalayas. With these exceptions the weather was fine all over the country. The distribution of pressure was of the ordinary anticyclonic character. Pressure was steadily high over North-Western and Central India, and low over the Arabian Sea off the Malabar Coast and over the south of the Bay. Gradients were very slight over Northern and Central India, but occasionally became rather steep over the Bay and the east and west sides of the Peninsula. The wind varied between north-west and south-east at some stations in North-Western India, on the North-Western Himalayas and in Baluchistan during the week, but elsewhere the directions were steady and the winds blew from the normal anticyclonic directions. Temperature fell briskly towards the close of the week.

On the 4th pressure was rising over the Peninsula and the Central Provinces,

and falling elsewhere. Readings were highest over the western desert and lowest over Malabar, Ceylon, and the south of the Bay, the pressure difference being 0·318″. South-east and south-west winds were reported from the stations in the extreme north-west. Elsewhere the directions were about normal. Over the Peninsula the force was fresh. Rain was falling over the Carnatic, from Cuddapah and Nellore southward, and also at Wellington, Coimbatore, and Cochin. The heaviest amounts were 1·62″ at Cuddalore, 1·24″ at Wellington, and 1·04″ at Coimbatore. At the stations in Baluchistan and the North-Western Himalayas light showers had also occurred, and at Gnatong a snow-storm was reported. On the 5th pressure was falling everywhere, but the distribution was little changed except that, owing to the excess of fall in the north, gradients had become slighter. The wind had shifted round to north-west, on the North-Western Himalayas, and the force had decreased on the Madras Coast, but otherwise the wind was almost unaltered. Rain still fell in the extreme south, but the amounts were small and the rainfall area was contracting. At Gnatong further slight snow was reported. The chart of the 6th showed that pressure was still decreasing. The general distribution was unaltered, but gradients were slighter than on the previous day. The winds, though still preserving their general anticyclonic circulation, were becoming variable in direction in several parts of the country. The force was almost everywhere moderate or light. Showers were reported from Diamond Island, Sibsagar, Darjeeling, and Jalpaiguri and further snow from Gnatong. Elsewhere the weather was very fine and the sky practically cloudless. The next day, the 7th, a recovery of pressure had commenced. The rise was greatest in the north-west, and in consequence gradients showed a tendency to increase. The winds were generally unaltered in direction, but showed a slight increase in force. Light rain had again fallen at Diamond Island, Sibsagar, and Darjeeling, and snow at Gnatong. On the 8th a feeble depression was shown over the Andaman Sea, and the barometer was falling in Burma and the central parts of the Peninsula, though elsewhere the rise noticed on the preceding day continued. The wind was northerly in Lower Burma and was backing to north-west on the Madras Coast, but elsewhere there was no important change. Light snow had fallen at Gnatong, and light rain at Sibsagar. On the 9th the barometer was falling over the greater part of the country, the change being rapid in Sind. The shallow depression still existed over the Andaman Sea, and the general conditions were the same as on the preceding day. The winds were also unchanged. Light snow was again reported from Gnatong, but there was no rain at any station. The chart of the 10th showed that pressure was increasing over a large part of North-Western India and also in Lower Burma, but was still decreasing elsewhere. The depression which had previously existed over the Andaman Sea had commenced to move and was travelling west-south-west towards Ceylon. Gradients were moderate over the Bay. The wind had shifted to north-east in Lower Burma, but the directions elsewhere were unchanged. Snow continued at Gnatong, but there was no rain anywhere.

Temperature.—During the whole of the earlier part of the week the mean temperature over the greater part of India approximated closely to the average, but towards the close a brisk fall set in, and the weather became abnormally cool. This coolness first showed itself in Sind and Rajputana, and thence spread eastward across Northern and Central India.

The following table shows the variations of the mean temperature from the normal on each day of the week for the principal provinces of India :—

Province.	4th.	5th.	6th.	7th.	8th.	9th.	10th.	Mean variation of week.
	°	°	°	°	°	°	°	°
Burma	−0·7	0	−0·3	−0·3	−1·6	−3·0	−2·8	−1·2
Bengal and Assam	−1·6	−0·6	−0·2	−0·7	−1·6	−2·9	−4·1	−1·7
North-Western Provinces and Oudh	+2·6	+1·7	+1·5	+0·9	−1·2	−3·1	−4·1	−0·2
Punjab	−1·0	+0·9	+1·7	−0·7	−2·1	−3·1	−2·8	−1·0
Bombay	+1·5	+0·9	−0·1	−0·3	+0·2	−0·8	−1·4	0
Central Provinces and Berar	+0·7	+1·2	+0·9	+3·1	+3·4	−1·1	+0·1	+1·2
Central India and Guzerat	+0·1	+0·2	+1·0	+2.5	−1·9	−3·2	−2·5	−0·5
Sind and Rajputana	−0·4	+0·2	+2·4	+0·9	−3·9	−4·4	−3·6	−1·3
Madras	+2·4	+0·5	−0 6	−1·4	−1·4	−0·7	−1·3	−0·4
Mean for whole India	+0·4	+0·6	+0·7	+0·4	−1·1	−2·5	−2·5	−0·6

From the 4th to the 7th the mean temperature was very nearly normal, the variations for the whole of India for each day showing an excess of about ½°. On the 8th the temperature began to fall, and on the 9th and 10th the mean deficiency was 2½°. During these three days the minima were exceptionally low throughout almost the whole country.

Rain.—The rainfall table at the close shows that rain has been received during the week in only eleven of the rainfall divisions, and that of these eleven divisions no less than six had an average actual rainfall for the week of less than one-tenth of an inch. The divisions which received over one-tenth of an inch were :—Assam (Brahmaputra), Bengal (North), Madras (South Central and South), and the East Coast (South). The heaviest average falls received were 0·58 inch in Madras (South Central) and 0·41 inch in Madras (South). Three divisions, *viz.*, Assam (Brahmaputra), Bengal (North), and Madras (South Central) had slightly more than the normal amount, while in all other parts of the Indian region the fall was below the average. In most parts of India the deficiency was small and comparatively unimportant, as the anticipated rainfall during the week under review is small, but in the East Coast (South) the amount was nearly one inch, in Madras (South) three-quarters of an inch and in the East Coast (North) over half an inch in defect.

The three concluding columns of the table exhibit no important alteration as compared with last week. In the south of the Peninsula, *viz.*, in divisions Madras (South), East Coast (South), Mysore and Madras (South Central), the rainfall is from 50% to 75% short of the normal, and as the rainfall in this region and at this season is considerable and very important, this deficiency is serious. In other parts of India, though the percentage variations from the normal average exhibit very large departures, the excess or deficiency is of less importance as the anticipated rainfall is small.

Provinces.	Division.	Rainfall data for week ending 10th December.			Rainfall data from 16th Oct. to 10th Dec. 1892.		
		Average actual rainfall of Division.	Average normal rainfall of Division.	Excess or defect in inches.	Average actual rainfall of season to date.	Average normal rainfall since 16th October to 10th December.	Excess or defect of (seasonal) rainfall expressed as a percentage.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 17th December.*—Rainfall good in Carnatic and moderate in parts of Deccan, Central and Southern districts. It has greatly revived standing crops, but more rain is urgently required over the southern half of the Presidency. Usual sowings in south greatly retarded. Favourable harvest in Deccan and Circars continues, but in southern half of Presidency early crops yielding a poor outturn. Water-supply for drinking ample, but very deficient for agriculture in Southern districts. Pasture and fodder generally sufficient, and cattle in good condition in most parts. Prices risen generally aud sharply in Southern districts, especially in Madura and Tinnevelly where prices of dry grains are more than double normal rates. General prospect somewhat improved by recent rainfall, but much more required to relieve anxiety regarding Southern districts.

Bombay.—*For week ending 21st December.*—Slight rain in parts of Kanara. Late crops damaged by locusts or other insects in parts of Sind. Gram and *tur* (cajanus indicus) in parts of Bijapur, and exotic cotton in parts of Dharwar injured by blight, and cotton in parts of Bijapur by unfavourable winds. Standing crops otherwise good, except *jowari* (sorghum vulgare) in Sholapur and Bijapur which has suffered from effects of late excessive rain. Harvesting of early and sowing of late crops continues in a few districts. Poppy-sowing progressing in Baroda. Prices generally steady. Agricultural stock good. Fodder sufficient.

Bengal.—*For week ending 17th December.*—No rain fell during the week. Weather seasonably cold and dry. The *aman* harvest continues and is almost completed in some districts. There has been no change in the prospects, and reports are generally favourable except as to parts of the Burdwan, Bankura, Midnapore, and Hooghly districts. The condition of the *rabi* crops is satisfactory. Some rain would be beneficial in the districts of the Patna Division. Poppy is a promising crop except on the unirrigated tracts of Muzaffarpur. Tobacco is also flourishing. Sugarcane-pressing is in progress in some districts, and the earlier pulses and potatoes are being gathered. Prices of rice remained almost stationary in most districts. Where any movement was observed, the tendency was towards a decline. Cattle are doing well, and fodder and water are plentiful.

North-Western Provinces and Oudh.—*For week ending 21st December.*—Weather clear and cold. Prospects of spring crops and of poppy fair. Irrigation going on, but rain much needed for unirrigated crops. Slight injury to the pulse *arhar* (cajanus indicus), by frost, is reported from Cawnpore and Bareilly. Locusts appeared in the Meerut tahsil, but no damage is reported. Prices are generally steady, but show a tendency to rise in Partabgurh and Banda.

Punjab.—*For week ending 21st December.*—Slight rain has fallen in parts of Jullundur, Ferozepore, Amritsar, and Rawalpindi districts. Late sowings of spring crops in progress. Rain beginning to be urgently needed for this crop in Amballa, Sialkot, and Lahore. Sugarcane being pressed in Sialkot. Condition and prospects of spring crops good in all districts except Rawalpindi, where they are average. Growing wheat has commenced to suffer from drought in Sialkot. Condition of cattle is good throughout the Province. Fodder is said to be sufficient in all districts except Rawalpindi and Dera Ismail Khan, where it is insufficient in the former and decreasing in parts of the latter district.

The poppy crop is flourishing. Prices are unsettled in two districts, rising in one, but are stationary elsewhere.

Central Provinces.—*For week ending 21st December.*—Weather clear and cold, but cloudy in the first portion of the week. Prospects excellent, fodder and water sufficient.

Burma.—*For week ending 17th December.*—LOWER BURMA: Crop prospects continue good in all districts. In Thayetmyo the outturn is now estimated at ten annas. Reaping still progressing everywhere. UPPER BURMA: No rain has fallen during the week. Crop prospects remain unchanged in Myingyan and mainland. Crops in the Pagan sub-division are poor from want of rain. Crops have failed to a considerable extent in the Legaing township and Salin sub-division of the Minbu district for want of rain. No report received from Meiktila. In the Southern Shan States slight damage has been done to crops by floods: in other districts prospects are good. Reaping of early paddy is progressing in all districts, and the cultivation of dry-weather paddy has commenced in some districts. The price of paddy has fallen largely in Prome, Shwebo, and Lower Chindwin, and considerably in Pakokku and Magwe, and has risen materially in Rangoon and Kyaukse; elsewhere the variations in prices are unimportant.

Assam.—*For week ending 20th December.*—Weather seasonable. Reaping of late rice continues. Prospects good. Condition of cattle normal. Fodder and water sufficient.

Berar and Hyderabad.—*For week ending 21st December.*—BERAR: Weather fair and cool. Autumn crops in good condition. Picking of cotton, and reaping and threshing of *jowari* (sorghum vulgare) continues Spring sowings completed and spring crops good. Linseed and gram in flower in Amraoti. Fodder and water sufficient. Cattle healthy. Prices almost stationary.

HYDERABAD: No rain during the week. Harvesting of autumn crops finished, sowing of hot-weather crops commenced. Prices:—wheat 9, coarse rice 9½, white juar 15¾, yellow juar 20, and tur 10¾ seers per current rupee.

Mysore and Coorg.—*For week ending 21st December.*—MYSORE: Rainfall 20 cents Civil and Military Station. Slight rain elsewhere. Standing crops good except in parts of Hassan and Chitaldroog districts, where more rain is wanted. Prospects generally favourable. Prices risen in the Hassan and Chitaldroog districts.

COORG: Rainfall *nil*. Reaping of the rice crop commenced. Picking of coffee in progress. Prices stationary. Water and fodder for cattle sufficient.

Central India.—*For week ending 21st December.*—No rain in Central India during the week. Harvesting of autumn crops continues. Threshing operations commenced in Bhopawar. Spring sowings completed. Sugarcane being planted in Bhopal, and crops in good condition. Condition of agricultural stock generally good. Prices of food-grains generally steady, but high.

Rajputana.—*For week ending 21st December.*—Rainfall 71 cents in Marwar. Agricultural operations satisfactory, except in Beawar, for want of manure and plough oxen. Standing crops good. Harvest prospects generally good. Cotton crops damaged in the Ajmere and Kerowlee districts by frost. Cattle in good condition. Pasturage or fodder sufficient. Prices steady in ten States, falling in four, and rising in three.

Nepal.—*For week ending 15th December.*—No rain. Weather cloudy. Prices slightly fallen.

J. W. P. MUIR-MACKENZIE,
Offg. Secretary to the Government of India.

SUPPLEMENT TO

The Gazette of India.

No. 53.} CALCUTTA, SATURDAY, DECEMBER 31, 1892.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the week ending at 8 a.m. on Saturday, December 18th, 1892.

During the week under review the weather has been feebly unsettled over a considerable part of the Indian region, and at different times two slight depressions appeared, one over North-Western and one over Southern India. Both depressions occasioned some rainfall in their neighbourhoods and both modified to a certain extent the general distribution of pressure, but neither was sufficiently important to occasion any considerable change. Throughout the whole week pressure remained steadily highest over Northern and steadily lowest over Southern India. From day to day the pressure differences between these two regions changed considerably, but the main feature of the distribution was unaltered. The winds were consequently on the whole anticyclonic, blowing from north-west down the Gangetic Plain, from north over the Bay area and from east over the west of the Peninsula. On the occasion of the appearance of the two depressions, noticed above, cyclonic movements were developed around them, but these winds were purely local. The weather was generally cooler than usual, the cloudy state of the sky resulting from the unsettled conditions producing low day temperatures very generally.

A

On the 11th pressure was rising almost everywhere. Pressure was highest over the Punjab, Rajputana and Central India, and lowest in Ceylon. The weather was undisturbed, and while calms and variable breezes prevailed over a large part of Northern India, the normal anticyclonic circulation was reported elsewhere. There was very little cloud and no rain anywhere. On the 12th the barometer was still rising everywhere, and the general conditions and distribution were unchanged. Gradients were moderately steep over the Bay and the west of the Peninsula. The winds were also unaltered. The sky was more cloudy very generally, but again no rain was reported from any station. On the following day, the 13th, the barometer had commenced to fall except over North-Western India and Lower Burma where the rise still continued. The distribution of pressure was unchanged, readings remaining highest over North-Western India and lowest in Ceylon, uniform over Northern India, but with rather large differences over the Bay and the west of the Peninsula. Calms prevailed in the north, northerly winds over the Bay, and easterly winds over the west of the Peninsula. There was again a fair amount of cloud, but less than on the preceding day. There was no rain. On the 14th the barometer was falling everywhere except Tenasserim, the change being brisk over North-Western India and Baluchistan. Readings were highest over the north-west of the Punjab, but from the barometric fall along the frontier it appeared that the weather was unsettled in that region and a few drops of rain had fallen at Cherat. The winds were generally unchanged and there was a good deal of cloud over a large part of Northern India. The chart of the 15th showed that pressure was increasing except in the north of the Punjab where a fall was taking place. Pressure was high and very uniform over Northern India, decreased southward, and was lowest in Malabar. The wind was rising in force on both sides of the Bay, and rain had begun to fall at Madras showing that an area of feebly unsettled weather was crossing the Bay. On the 16th the barometer was falling over the region represented by the stations of Roorkee, Dehra Dun, and Mussurie, and also over the centre of the Peninsula, but was rising elsewhere. A small depression lay over the North-Western Himalayas near Dehra Dun, and the weather was disturbed on the East Coast of the Peninsula. In both regions some rain had fallen, in the latter rather heavily. On the 17th the depression over the North-Western Himalayas had disappeared, and the barometer had risen briskly over the north-west of India. Pressure had also risen over the east of the Peninsula, but had fallen elsewhere. Gradients were very steep over the northern part of the Bombay Presidency, and strongish easterly winds were reported there. Rain had fallen in scattered showers over part of the Punjab and of the North-Western Himalayas, and fairly general rain had occurred over a considerable part of Madras.

Temperature.—Except in the Central Provinces and Bombay the general temperature has been low, but the defect gradually decreased as the week advanced. The following table shows the variations of the mean temperature

from the normal on each day of the week for the principal provinces of India :—

Province.	11th.	12th.	13th.	14th.	15th.	16th.	17th.	Mean variation of week.
	°	°	°	°	°	°	°	°
Burma	−2·9	−2·2	−1·6	−0·5	−1·1	−1·8	−1·4	−1·6
Bengal and Assam	−4·6	−3·8	−3·3	−2·8	−2·0	−1·1	−0·1	−2·5
North-Western Provinces and Oudh	−4·7	−4·3	−4·2	−4·2	−2·1	−2·1	0	−3·1
Punjab	−4·9	−3·4	−3·8	−3·9	−3·0	−1·6	−3·0	−3·4
Bombay	−0·5	+0·3	+0·3	−0·4	−0·7	+0·2	+2·2	+0·2
Central Provinces and Berar	+1·9	+3·9	+4·0	+3·9	+2·9	+2·8	+3·1	+3·2
Central India and Guzerat	−1·9	+1·2	−0·4	−0·4	+1·8	+0·3	+1·1	+0·2
Sind and Rajputana	−4·6	−3·2	−4·0	−3·1	−2·4	−0·6	−1·9	−2·8
Madras	−1·4	−1·4	−2·1	−1·6	−1·8	+1·0	+2·5	−0·7
Mean for whole India	−2·6	−1·4	−1·7	−1·4	−0·9	−0·3	+0·3	−1·2

The above shows that the mean deficiency for the whole of India for the week was 1°·2. The amount of deficiency was 2°·6 on the 11th, and decreased to 1°·4 on the 14th and to 0°·3 on the 16th, while on the following day the deficiency was replaced by a trifling excess. The Central Provinces had a mean excess of 3°·2 for the week, while Bombay and Central India had a trifling excess of 0°·2. In all the other Provinces there was a deficiency which was greatest in North-Western India.

Rain.—Has fallen during the week in the Punjab, the west of Rajputana, and the south of the Peninsula, the actual number of divisions recording rain being thirteen. Of these thirteen, six had less than one-tenth of an inch as the average actual rainfall of the division, while in the remaining seven the amounts received ranged from 0·12″ in Mysore to 0·95″ in the East Coast (South). In all other parts of the Indian region no rain whatever was received. Madras (South Central and Central) and the East Coast (Central) received a trifle more rain than is usually recorded during the week under review, but all the other divisions recorded less. The three concluding columns of the table exhibit very similar conditions to those recorded last week. In Mysore, Madras (South Central and South), and the East Coast (South) the rainfall is absolutely and relatively to the average considerably short of the normal, while in other parts of the country, though the variations from the normal are frequently large, the absolute variations are comparatively small as the anticipated rainfall at this season is small.

Provinces.	Division.	Rainfall data for week ending 17th December.			Rainfall data from 16th October to 17th December 1892.		
		Average actual rainfall of Division.	Average normal rainfall of Division.	Excess or defect in inches.	Average actual rainfall of season to date.	Average normal rainfall, 16th October to 17th December.	Excess or defect of (seasonal) rainfall expressed as a per-centage.

W. L. DALLAS,
Assistant Meteorological Reporter to the Government of India.

Simla, the 22nd December 1892.

J. W. P. MUIR-MACKENZIE,
Officiating Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 24th December.*—Some heavy falls of rain in Tanjore and Nellore near coast, but elsewhere in nine southern districts week's rainfall below average, and only sufficient to just keep alive the standing crops. Supplies of irrigation water very scanty in southern half of Presidency, where heavy rain urgently required to replenish supplies. Showers in Tinnevelly have allowed renewal of sowings, which are very backward. Harvest in Deccan and Circars continues favourable, but early crops now being reaped in Central Carnatic and Southern districts are poor. Pasture and fodder generally sufficient. Prices very slightly easier in Southern, Central and Carnatic districts; almost stationary in the Circars; rather dearer elsewhere. No material change in prospects.

Bombay.—*For week ending 28th December.*—Slight rain in parts of Satara and Dharwar. Standing crops injured by locusts or other insects in parts of Sind, and by unfavourable winds or blight in parts of Bijapur and Dharwar, otherwise good, except *jowari* (Sorghum vulgare) in Sholapur. Harvesting of early crops progressing in six and sowing of late crops in eight districts. Poppy cultivation continues in Baroda and cotton-picking in three districts. Fodder sufficient. Agricultural stock generally healthy.

Bengal.—*For week ending 24th December.*—There was no rain during the week with the exception of a few light showers in the districts of Darjeeling and Jalpaiguri. The rice harvest continues and approaches completion. The outturn, as previously reported, will be generally satisfactory except in parts of Burdwan, Bankura, Midnapore and Hooghly. In parts of Burdwan and Hooghly, the crop is reported to have failed almost entirely. Reports continue to speak well of the spring crops, but a little rain would be useful in Behar. Poppy and tobacco are promising crops, as also is *ganja* in Rajshahi. Sugarcane is being pressed in some districts, and the earlier pulses and potatoes are being gathered. No important change in the price of rice has been reported. Fodder and water-supplies are sufficient, and cattle healthy.

North-Western Provinces and Oudh.—*For week ending 28th December.*—Weather cold and occasionally cloudy. Rain much needed. Irrigation for spring crops in active progress and poppy crop promising. Sugarcane pressing is proceeding. Prospects fair. Some damage to crops by frost is reported from the Cawnpore and Agra districts. Supplies are ample and prices generally stationary.

Punjab.—*For week ending 28th December.*—Rainfall *nil.* Autumn crops being reaped in Ferozepore. Sugarcane being pressed in Sialkot. Sowing of spring crops continues. Rain is urgently wanted for these crops. Condition and prospects of growing crops are reported good in all districts except Rawalpindi, where they are average. They are now suffering from drought in most districts. Condition of cattle is generally reported good. Fodder is said to be sufficient in all districts except Rawalpindi, Dera Ismail Khan and Peshawar, where it is scarce. Prices rising in two districts, falling in two others, and stationary elsewhere.

Burma.—*For week ending 24th December.*—Lower Burma: Prospects unchanged. Reaping in progress everywhere and nearly completed in some districts. Upper Burma: No rain has fallen during the week, and no material change has taken place in crop prospects. Reaping of wet weather paddy pro-

gressing and dry weather cultivation commencing. The price of paddy has declined largely in Tharrawaddy and considerably in Bhamo and Katha. Elsewhere fluctuations are small. Numbers on relief works—Meiktila, 1,169.

Central Provinces.—*For week ending 28th December.*—Weather occasionally cloudy with slight rain in three districts. Insects doing a little damage to linseed and *tur* (*Cajanus indicus*) in parts of a few districts; otherwise prospects continue favorable.

Assam.—*For week ending 25th December.*—Weather seasonable. Harvesting of winter paddy continues. General prospects of crops good. Condition of cattle normal. Fodder and water sufficient.

Berar and Hyderabad.—*For week ending 28th December.*—BERAR: Weather fair and cool. Reaping and threshing of *jowari* (Sorghum vulgare) continue. Second and third picking of cotton in progress. Spring crops good. Fodder and water sufficient. Cattle healthy. Prices almost stationary.

HYDERABAD: No rain during week. Sowing of hot-weather crops in progress. Standing crops in good condition. Prices:—wheat 8¾, coarse rice 9½, white *juar* 14¾, yellow *juar* 19¼, and *tur* 10½ seers per current rupee.

Mysore and Coorg.—*For week ending 28th December.*—MYSORE: Standing crops good, except in Mysore, Hassan and part of Chitaldrug districts, where more rain is wanted. Prospects generally favourable. Prices risen in the Bangalore, Kolar and Hassan districts.

COORG: Rainfall *nil*. Reaping of rice and picking of coffee in progress. Prices stationary. Fodder and water for cattle sufficient.

Central India.—*For week ending 28th December.*—Rain in Gwalior, Bhopawar and Indore, none in Bundelkhand where it is needed. Autumn operations still in progress in some parts. Spring sowings completed in most parts of Central India, in progress in other parts. Cotton cultivation and threshing in progress in Bhopawar. Condition of agricultural stock, pasturage and opium good. Prices of food-grains continue steady.

Rajputana.—*For week ending 28th December.*—Rainfall 1·31 inches in Bickaneer. Agricultural operations satisfactory. Spring sowings completed. Standing crops good. Winter rain wanted in Ulwar. Harvest prospects generally good. Cotton slightly damaged in Merwara and Kerowlie by frost. Cattle in good condition. Pasturage or fodder sufficient. Prices steady in twelve States, rising in two, and fluctuating elsewhere.

Nepal.—*For week ending 22nd December.*—No rain. Mornings foggy and days cloudy. Condition of crops normal. Prices steady.

J. W. P. MUIR-MACKENZIE,
Offg. Secretary to the Government of India.
