Assam.—*For week ending 8th August.*—Weather seasonable. Floods subsiding. Harvesting of early and transplanting of late rice continue. Condition of cattle fair. Fodder insufficient in the Surma Valley.

Mysore and Coorg.—*For week ending 9th August.*—MYSORE: Rainfall good in parts of two districts, where more rain is still required. Crops and prospects good. Sowing operations almost completed. Prices slightly fallen in one district and rising in another.

COORG: Rainfall good. Ploughing of rice fields completed and transplanting of paddy approaching completion. Coffee planting also nearly completed. Prices stationary. Water and fodder for cattle sufficient.

Berar and Hyderabad.—*For week ending 9th August.*—BERAR: Rainfall good. Weather cool and cloudy. Standing crops in good condition. Land being prepared for next spring crops. Sowings continue. Weeding operations in progress. Fodder and water sufficient. Prices stationary.

HYDERABAD: Rainfall good. Weeding of autumn crops and irrigated paddy in progress. Standing crops thriving. Fodder plentiful. Prices continue steady.

Central India.—*For week ending 9th August.*—Rain fell throughout Central India during the week. Ploughing and weeding in progress in all parts, except in Goona, where operations have been stopped on account of rain. The probable outturn of the crops will be generally good. Cattle in good condition in all parts. Pasturage sufficient. Prices steady.

Rajputana.—*For week ending 9th August.*—Rainfall good in parts. Agricultural operations satisfactory, except in Kerowlee, owing to want of rain. Condition of standing crops and cattle generally good. Pasturage or fodder sufficient. Prices falling in two States, rising in two, fluctuating in three, and steady elsewhere.

Kashmir.—*For week ending 8th August.*—Weather fine. Standing autumn crops generally in good condition. Prices stationary.

Nepal.—*For week ending 5th August.*—Frequent showers. Indian-corn being harvested; outturn good.

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

No. 10/74.

Extract from the Proceedings of the Government of India in the Revenue and Agricultural Department (Surveys),—dated Simla, the 31st July, 1893.

Read again—

Resolution No. 3-74-A. of 8th March 1893 regarding the reorganization and recruitment of the Geological Survey Department.

RESOLUTION.

Resolved that—

The last sentence of the first clause of the Revised Conditions appended to the above Resolution, stating that "the rates of pay for natives of India appointed to any of the above posts will be two-thirds of the full scale of pay," be cancelled.

ORDER.—Ordered, that a copy of the foregoing Resolution be forwarded to the Local Governments and Administrations marginally noted; to the Director of the Geological Survey Department, and to the Financial and Home Departments for information, and that it be published in the Supplement to the *Gazette of India*.

PUBLIC WORKS DEPARTMENT.

RAILWAY STATISTICS.

RETURNS OF ACCIDENTS ON INDIAN RAILWAYS FOR THE TWELVE MONTHS ENDING THE 31st DECEMBER, 1892.

No. 300 R. Stat., dated Simla, the 3rd August, 1893.

ORDER—By the Government of India, Public Works Department.

Read again—

Public Works Department Resolution No. 402 R. Stat., dated the 31st August, 1892.

Read also—

Note by the Director General of Railways, No. 331 Statistics, dated the 26th July, 1893, with abstract returns of accidents to trains, etc., on the open lines of railways in India for the twelve months ending the 31st December, 1892.

OBSERVATIONS.—The following summary gives the total number of accidents to trains, rolling-stock, permanent-way, etc., for the twelve months ending the 31st December, 1892, distributed under the classification adopted in a abstract No. 4 of the returns:—

Summary of accidents to trains, rolling-stock, etc.

Serial No.	Classes of Accidents.	Number of accidents during the year 1891. Accidents reported to Local Governments under section 83 of the Indian Railways Act (IX of 1890).	Other accidents.	Total	Twelve months ending the 31st December, 1892. Number. Accidents reported to Local Governments under section 83 of the Indian Railways Act (IX of 1890).	Other accidents.	Total	Number of passengers and others. Killed.	Injured.	Number of servants. Killed.	Injured.	Total all classes. Killed.	Injured.

(a) Not passengers.
(b) Of these two were not passengers.
(c) Of these three were not passengers.
(d) Of these nine were not passengers.
(e) Of these eleven were not passengers.

* Excludes the figures for the Cherra-Companyganj and Thatôn-Duyinzáik railways, which are now treated as steam tramways.

2. As compared with 1891, the number of accidents to trains, rolling-stock, permanent-way, etc., during the year 1892, shows a decrease of 12 or of 0·28 per cent., with an increase of 655·09 miles or of 3·86 per cent. in the mean mileage worked, and a decrease of 131,079 miles or of 0·22 per cent. in the train-milage run.

Principal variations as compared with 1891.

3. The chief variations occurred under "Collisions between goods trains or parts of goods trains," 77 against 109; "Collisions between light engines," 42 against 21; "Goods trains or parts of goods trains, engines, etc., leaving the rails," 402 against 322; "Trains or engines travelling in the wrong direction through points," 79 against 57; "Trains running over cattle on the line," 1,824 against 1,837; "Trains running over obstructions on the line," 118 against 193; "The bursting of tubes, etc., of engines," 103 against 138; "The failure of machinery, springs, etc., of engines," 462 against 427; "The failure of couplings," 210 against 182; "Broken rails," 75 against 50; "The flooding of portions of permanent-way," 126 against 54; "Slips in cuttings or embankments," 27 against 82; "Fire at stations, or involving injury to bridges or viaducts," 43 against 72; and "Other accidents," 221 against 257.

4. Under "Collisions between goods trains or parts of goods trains," there was a decrease of 32 accidents, *viz.*, 3 under "Serious," and 29 under "Minor." The decrease under "Serious" was due to the number on the South Indian railway having fallen from 4 to 1, while that under "Minor" was chiefly due to a decrease of 9 on the Eastern Bengal (state) railway, of 8 on the North Western (state) railway, and of 7 each on the Rajputana-Malwa state and the Southern Mahratta railways, against an increase of 4 each on the Bengal-Nágpur and the Oudh and Rohilkhand (state) railways.

5. The increase under "Collisions between light engines" was chiefly due to the numbers recorded on the East Indian, the North Western (state), and the Bengal-Nágpur railways having risen from 7 to 16, from 4 to 8 and from *nil* to 3 respectively. Of the increase of 3 accidents under "Serious," the East Indian and the Bengal-Nágpur railways accounted for one each.

6. "Goods trains or parts of goods trains, engines, etc., leaving the rails" showed an increase of 80 accidents, made up of a decrease of 7 under "Serious" and an increase of 87 under "Minor." The decrease under "Serious" was chiefly due to a reduction of 3 each on the North Western (state) and the Nizam's Guaranteed State railways, while the increase under "Minor" was mainly owing to the number recorded on the East Indian railway having risen from 26 to 99.

7. The increase under "Trains or engines travelling in the wrong direction through points" was chiefly contributed by the East Indian railway, on which the number rose from 5 to 22.

8. The number of cattle accidents was largest on the Southern Mahratta railway, *viz.*, 427; next to that line comes the South Indian railway with 247; then the Rajputana-Malwa state railway with 162; the North Western (state) railway with 135; the Eastern Bengal (state) railway with 134; the East Indian railway with 116; the Oudh and Rohilkhand (state) railway with 103; and the Madras railway with 92.

As compared with the corresponding period of the previous year, the chief variations were an increase of 72 on the Southern Mahratta railway, and decreases of 38 and 24 on the North Western (state) and the Madras railways respectively.

In relation to train-mileage run, the number was highest on the Southern Mahratta railway, which gave an average of 1 accident in 5,608 train-miles, the Dibru-Sadiya railway coming next with an average of 1 in 6,510; then the Nizam's Guaranteed State, the Jorhát, the South Indian and the Rohilkund and Kumaon railways with averages of 1 in 8,729, 1 in 11,427, 1 in 13,270 and 1 in 17,679 respectively. The lowest number recorded relatively to train-mileage run was on the Bombay, Baroda and Central India railway, *viz.*, 1 in 150,419; the Great Indian Peninsula railway coming next with an average of 1 in 148,266; then the Gaekwar's Dabhoi railway with 1 in 89,141; the East Indian railway with 1 in 87,108; the Burma (state) railway with 1 in 61,431; and the North Wertern (state) railway with 1 in 60,061.

9. The decrease of 75 accidents under "Trains running over obstructions on the line" was mainly due to there having been 55 less on the Eastern Ben-

gal (state) railway, 7 less on the Southern Mahratta railway, and 5 less on the North Western (state) railway. The decrease of 55 on the Eastern Bengal (state) railway was made up of three under "Serious" and 52 under "Minor."

10. Under "The bursting of tubes, etc., of engines," there was a noticeable decrease of 30 accidents on the South Indian railway.

11. "The failure of machinery, springs, etc., of engines" showed an increase of 53 accidents on the East Indian railway, of 20 on the Great Indian Peninsula railway, and of 11 each on the Bombay, Baroda and Central India and the Burma (state) railways, and a decrease of 26 on the Nizam's Guaranteed State railway, of 25 on the South Indian railway, and of 11 on the Southern Mahratta railway.

12. The increase under "The failure of couplings" was due to the number recorded on the Rajputana-Malwa state railway having risen from 34 to 65.

13. Of the increase of 25 accidents under "Broken rails," the Bengal-Nágpur and the Rajputana-Malwa state railways were responsible for 13 and 7 respectively.

14. Under the head "The flooding of portions of permanent-way," there was an increase of 72, of which 24 cases are recorded under "Serious" and 48 under "Minor." Under "Serious" the principal variations were increases of 15 on the North Western railway, of 7 on the Eastern Bengal (state) railway, and of 6 on the Nizam's Guaranteed state railway, and a decrease of 2 each on the Bombay, Baroda and Central India and the Bhávnagar-Gondal-Junágarh-Porbandar railways; while under "Minor" the increases were chiefly contributed by the Jodhpore-Bickaneer, the Southern Mahratta and the Rajputana-Malwa state railways, on which the numbers rose from 3 to 19, 5 to 18, and 3 to 15 respectively.

15. Under "Slips in cuttings or embankments," there was a decrease of 55 accidents, made up of an increase of 3 under "Serious" and a decrease of 58 under "Minor." The increase under "Serious" was due entirely to 7 accidents having been recorded under this head on the Bengal-Nágpur railway against *nil* during 1891; while the decrease under "Minor" was owing principally to the numbers recorded on the Bengal-Nágpur, the North Western (state) and the Great Indian Peninsula railways having fallen off from 29 to 3, 19 to 9, and 11 to 1 respectively.

16. Under "Fire at stations, or involving injury to bridges or viaducts," the accidents numbered 43 against 72, of which 12 against 40 took place on the Eastern Bengal (state) railway alone.

17. The cases recorded under the head "Other accidents" decreased chiefly on the North Western (state) railway, 42 against 76; on the Bombay, Baroda and Central India railway, 5 against 21; on the Burma (state) railway, 2 against 18; and on the Great Indian Peninsula railway, 4 against 16; but increased principally on the East Indian railway, *viz.*, 75 against 23.

18. Of the 10 cases of "Serious" accidents from "The failure of tunnels, bridges, viaducts, culverts, etc.," 8 occurred on the Eastern Bengal (state) railway alone.

19. The casualties to passengers, and to servants in the employ of railways or of contractors from accidents not coming under the classification adopted in paragraph 1, were, as compared with 1891, in the case of passengers, 55 killed and 139 injured against 65 killed and 212 injured, and, in the case of servants, 193 killed and 589 injured against 156 killed and 529 injured. (For details, *vide* abstract No. 2.)

Casualties to passengers and servants not included in paragraph 1.

20. The mean mileage open, train-mileage run, and the number of passengers were 17,625·72, 60,505,076, and 127,230,914 against 16,970·63,* 60,636,155,* and 122,611,345* respectively during the previous year. The number of accidents per 1,000 train-miles was 0·07.

Out of a total of 127,230,914 passengers travelling, 8 passengers were killed and 42 injured by accidents to trains as classified in paragraph 1. This gives an average of 1 killed in 15,903,864, while the total number of killed and injured, *viz.*, 50, gives an average of one casualty in 2,544,618 persons travelling and an average of one in 105,314,583 miles travelled.

Including casualties to passengers from causes other than accidents to trains, rolling-stock, etc. (*vide* paragraph 19), the total numbers of passengers

* Excludes the figures for the Cherra-Companyganj and Thatôn-Duyinzáik railways, which are now reated as steam tramways.

killed and injured were 63 and 181 respectively, giving an average of one killed in 2,019,538, and one injured in 702,933, or an average, on the total number of killed and injured, of one casualty in 521,438 passengers travelling.

21. The total casualties to persons from all causes, including trespassers, cases of suicide, etc., were 624 killed and 930 injured against 645 killed and 1,084 injured during 1891. (For details, *vide* abstract No. 2.)

Total casualties from all causes.

22. In addition to the above, 77 persons were reported to have been killed and 197 injured in yards, workshops, etc., and 956 persons to have died in carriages and at stations from causes unconnected with the working of trains.

Casualties in yards, workshops, etc.

23. Abstract No. 5 shows for the year 1892, as compared with ten previous years, the proportion of passengers killed and injured while travelling on the several railways open for traffic in India from causes beyond their own control.

24. Abstract No. 6 shows the number of enquiries into train accidents on the several railways open for traffic in India classified under certain heads for the year 1892 as compared with two previous years.

25. The accidents *for the 4th quarter of 1892* are dealt with in the following note:

Note on accidents for the 4th quarter of 1892.

The following table gives the number of accidents as classified in paragraph 1 of the previous note, which resulted in loss of, or injury to, life and limb, and shows the railways on which they occurred:

Casualties resulting from accidents to trains, rolling-stock, etc., for the 4th quarter of 1892.

RAILWAY.	Number of accidents during the 4th quarter of 1892.	Passengers and others.		Servants.		Total.

Total of the corresponding quarter of 1891	...	56	94	11	50	67	144

2. *North Western (state) railway.*—On the 28th October, 1892, the level-crossing gate at Ráwalpindi was smashed by a shunting engine. The gateman, who was to blame, was severely injured.

3. *Oudh and Rohilkhand (state) railway.*—On the 27th December, 1892, a level-crossing gate near Sháhjahánpur was run through by No. 2 mail train. The gateman was injured.

4. *Eastern Bengal (state) railway.*—On the 10th December, 1892, an up special goods train collided with a shunting engine in the Kaunia yard through the carelessness of the driver. Two railway servants were injured.

On the 18th December, 1892, a collision took place in the locomotive yard at Calcutta between two light engines through the carelessness of the shunter. Two railway servants were slightly injured.

5. *Great Indian Peninsula railway.*—On the 5th December, 1892, a down passenger train, while passing out of the station yard at Lonávla, collided with a shunting engine which was taking water from a water-crane near a cross-over road. The accident was due to no notice having been issued by the Engineering Department regarding an alteration which was being made at the time in the position of the cross-over road. A passenger was slightly hurt.

On the 20th December, 1892, an up goods train, while coming out of shed at Nágpur, collided with a wagon standing foul of the crossing, through the carelessness of the pointsman. A fireman was slightly injured.

On the 27th December, 1892, a down mail train was admitted on to the wrong line at mile 479½ near Bágrá and collided with some uncoupled wagons which were being loaded by coolies. One cooly was killed and three others injured. The station master, muccadum, and the pointsman in fault were prosecuted.

6. *Bombay, Baroda and Central India railway.*—On the 12th November, 1892, at Ahmedabad, the engine of an up mail train, while running round to the tail end of the train, was admitted into a wrong siding and collided with five wagons standing there. A railway servant was injured.

7. *Bengal and North-Western railway.*—On the 15th October, 1892, a buffalo was knocked down by an up mixed train at mileage 53-10 between Daronda and Chainwa stations. Certain vehicles of the train were derailed and seriously damaged and the lamp-man accompanying the train was seriously injured.

8. *Rajputana-Malwa railway.*—On the 11th November, 1892, a camel was knocked off the line at mile 138-20 near Sirsa on the Rewári-Ferozepore section. The accident was due to the animal having taken fright on the approach of the train and jumped over the fencing. The rider of the camel was slightly injured.

9. *Southern Mahratta railway.*—On the 11th October, 1892, an up goods train collided with a light trolly at mile 218-17, between Bidadi and Kengeri stations. The accident was due to the trolly not having been properly protected by signals. The trolly was smashed and the time-keeper who was riding on it was killed.

RESOLUTION.—The Government of India notices that with an increase of 655·09 miles, or 3·86 per cent., in the mean mileage worked, and a decrease of 131,079 miles, or 0·22 per cent., in the train-mileage run, the number of accidents to trains, rolling-stock, permanent-way, etc., on Indian railways shows a decrease of 12, or 0·28 per cent., as compared with the previous year.

2. The numbers of passengers killed and injured by accidents to trains, etc., were 8 and 42 respectively against 56 and 135 during 1891; while the numbers of passengers killed and injured from causes other than accidents to trains, etc., were 55 and 139 respectively against 65 and 212.

3. Out of a total of 127,230,914 passengers travelling, there were 63 killed and 181 injured, or an average of 1 killed in 2,019,538 and of 1 injured in 702,933.

The proportion of passengers killed and injured by train accidents from causes beyond their own control as compared with the numbers travelling was 1 killed out of 15,903,864 and 1 injured out of 3,029,307.

4. The casualties to servants in the employ of railways or of contractors from accidents to trains, etc., were 19 killed and 48 injured against 27 and 94 respectively in the preceding year. From causes other than accidents to trains, etc., the casualties were 193 killed and 589 injured against 156 killed and 529 injured.

5. With an increase of 3·86 per cent. in the mean mileage worked and a decrease of 0·22 per cent. in the train-mileage run, it is observed that the total numbers of casualties from all causes over the whole of the Indian railway system as compared with the previous year decreased under killed from 645 to 624 or by 3·26 per cent., and under injured from 1,084 to 930, or by 14·21 per cent.

ORDER.—Ordered, that this Resolution, with the abstract returns, be communicated for information to the Local Governments and Administrations, and to the Officers noted in the margin.

The Governments of Madras, Bombay, Bengal, North-Western Provinces and Oudh, and the Punjab.
The Chief Commissioners of the Central Provinces, Burma, and Assam.
The Resident at Hyderabad.
The Resident in Mysore.
The Agents to the Governor General for Rajputana, Central India, and Baluchistan.
The Director General of Railways.
The Consulting Engineers to the Government of India for Railways, Calcutta, Central Division, Lucknow, and Assam.

Ordered also, that copies be forwarded for the information of Her Majesty's Government.

Ordered further, that this Resolution, with the abstract returns, be published in the Supplement to the *Gazette of India*.

F. B. HEBBERT.
Under Secretary.

Documents accompanying.

Abstract returns of accidents for the twelve months ending the 31st December, 1892.

ABSTRACT No. 1.

GENERAL TOTAL.

NUMBER of PERSONS reported, during the TWELVE MONTHS ending 31st December 1892, as KILLED or INJURED on ALL RAILWAYS open for TRAFFIC in INDIA, distinguishing between PASSENGERS, RAILWAY SERVANTS, and OTHER PERSONS; and distinguishing also, in the case of the two former classes, between ACCIDENTS caused by ACCIDENTS to TRAINS, ROLLING-STOCK, PERMANENT-WAY, etc., and ACCIDENTS happening otherwise.

	Killed.	Injured.	Remarks.
PASSENGERS:—			
From accidents to trains, rolling-stock, permanent-way, etc.	8	42	
By accidents from other causes, including accidents from their own want of caution or misconduct	55	139	
SERVANTS:—			
From accidents to trains, rolling-stock, permanent-way, etc.	19	48	
By accidents from other causes, including accidents from their own want of caution or misconduct	193	589	
OTHER PERSONS:—			
Whilst passing over railways at level-crossings	24	15	
Trespassers	263	81	
Suicides	53	4	
Miscellaneous, not included in either of the above	9	12	
TOTAL	624	930	

ABSTRACT

NUMBER of PERSONS reported, during the TWELVE MONTHS ending 31st December 1892, as KILLED or INJURED in INDIA by the RAILWAY SERVANTS, and OTHER PERSONS, and classifying, as far as practicable,

No. 2.

ABSTRACT No. 6.

STATEMENT showing the NUMBER of enquiries into TRAIN ACCIDENTS on the SEVERAL RAILWAYS open for TRAFFIC in INDIA, classified under certain heads for the year 1892, as compared with two previous years.

Class of accident.	1890.	1891.	1892.
A.—From engines or vehicles meeting with obstructions, or leaving the rails in consequence of obstructions, or from defects in connection with the permanent-way or works	53	77	23
B.—From boiler explosions, failures of axles, wheels, or tyres, or from other defects in the rolling-stock	47	99	58
C.—From trains entering stations at too great speed	...	...	...
D.—From collisions between engines and trains following one another on the same line of rails, excepting at junctions, stations, or sidings . .	6	4	...
E.—From collisions at junctions	...	7	3
F.—From collisions within fixed signals at stations or sidings . . .	23	16	10
G.—From collisions between engines or trains meeting in opposite directions	6	17	19
H.—From collisions at level-crossings of two railways	...	...	...
I.—From engines or trains being wrongly run or turned into sidings, or otherwise through facing points	18	16	21
J.—On inclines	...	...	...
K.—From trains on fire	1	5	1
L.—Miscellaneous	16	21	7
TOTAL .	170	262	142

FINANCE AND COMMERCE DEPARTMENT
(*Statistical Branch*)
Calcutta, 16th August 1893.

J. F. FINLAY,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the week ending at 8 a.m. on Saturday, August 12th, 1893.

The strongly marked monsoon conditions which prevailed during the previous week continued during the week under review until the last day, when the distribution of pressure and the winds showed a disposition to change. In consequence rain has been very general throughout the country. The rainfall brought up by the Arabian Sea current has not been heavy, but that due to the Bay of Bengal current has been heavy and exceptionally general. At first the heaviest amounts were reported from Lower Burma, but as the week advanced the area of heaviest fall moved northward, and was reported about the middle of the week from Arakan and South-East Bengal, and at the close of the week from North Bengal. The general rainfall has been accompanied with a general depression of temperature, and the mean temperature of the whole country for the whole week was $\frac{1}{2}^{\circ}$ below the normal average.

On Sunday, August 6th, pressure was lowest over the Indus Valley, relatively low within a trough lying along the south of the Gangetic plain, and highest in Malabar and Ceylon. The pressure difference between Malabar and the Indus Valley was 0·483 inch, which was greater than usual. The winds were moderate to strong in force, and blew from the normal monsoon directions. Rain had fallen generally along the West Coast, over the Central Provinces, and over Burma, and scattered showers had occurred over Bengal and the North-West Provinces. There was no rain over North-Western India to the west of Roorkee. Dehra Dun reported 5·84 inches, Bassein and Rangoon over 3 inches, Tavoy and Chaibassa over 2 inches, and several stations over 1 inch. On the 7th the only important change was the appearance of a shallow depression over South-West Bengal, Ganjam, and the north-west of the Bay. Pressure had increased over North-Western India, and the pressure difference between Malabar and the Indus Valley had decreased to 0·387 inch. The winds were feebly cyclonic in the neighbourhood of the depression, but elsewhere normal monsoon winds continued. Rain had extended north-westward, and was reported as far west as the stations in the Indus Valley. Sind and parts of the Gangetic plain and of the east of the Peninsula had no rain, but elsewhere the fall was very general. Diamond Island had received 4·65 inches, Rawalpindi 3·11 inches, and Saugor Island 2·77 inches, while several places had over 1 inch. The chart of the 8th showed that the shallow depression noticed above was drifting slowly up the Gangetic plain. Pressure was falling throughout the greater part of India, but was rising briskly in Burma. The pressure difference between Malabar and the Indus Valley was 0·403 inch, but the steepest gradients were shown over the northern half of the Bay. Monsoon winds prevailed everywhere, and the force at the head of the Bay was strong. Rain had fallen very generally, except over the Western desert, and over parts of the centre and east of the Peninsula. Akyab reported 2·85 inches, Bhamo 2·56 inches, and Cuttack 2·08 inches, while several places had more than 1 inch. By the morning of the 9th the depression had reached the neighbourhood of Allahabad, and was apparently filling up, as pressure was increasing everywhere. The pressure difference between Malabar and the Indus Valley was 0·396 inch, but the steepest gradients were again shown over the Bay of Bengal. The winds were normal in direction, but were stronger than usual, and at Saugor Island were blowing a fresh gale. Rain continued to fall very generally. Darjeeling had received 5·50 inches, Dacca 4·61 inches, Chittagong 3·82 inches, Barisal 2·71 inches, Saugor 2·53 inches, Roorkee 2·12 inches, Gnatong 2·05 inches, and several stations over 1·0 inch. On the 10th the depression over the Gangetic plain had disappeared, and the barometer was still rising, except in Burma. Gradients over the

Bay had decreased, and the pressure difference between Malabar and the Indus Valley had been reduced to 0·361 inch. The easterly current up the Gangetic plain had broken up, but elsewhere the winds continued to blow from normal monsoon directions. The force was still strong to a gale over the head of the Bay. Rain continued to fall very generally, and the amounts were still heavy over North Bengal. Dhubri reported 4·15 inches, Mymensingh 3·87 inches, Sutna 3·18 inches, Gnatong 3·08 inches, and Rangoon, Darjeeling, Dinajpur, and Karwar over 2 inches. On the 11th pressure decreased steadily from Ceylon to the Punjab, the pressure difference between Malabar and the Indus Valley being 0·450 inch, which was considerably greater than usual. The wind was southerly over Burma and Bengal and variable over the Punjab, but elsewhere the direction was westerly. The force remained fresh to strong. The amount of rain was falling off more particularly over the Peninsula and North-Western India, where only scattered showers were reported. In North Bengal the fall continued heavy. Jalpaiguri reported 5·09 inches, Moulmein 3·38 inches, Salem 3·07 inches, Balasore 3·02 inches, Patna 2·32 inches, Darbhanga 2·29 inches, and several stations over 1 inch. On Saturday, the 12th, pressure was falling over the south of the Peninsula and Lower Burma and rising elsewhere—briskly in the north-west. Hence, although the general distribution was unchanged, gradients had been still further reduced, and the pressure difference between Malabar and the Indus Valley was 0·391 inch. The winds were little changed. There was very little rain in Upper Burma, the Peninsula, and North-Western India, but elsewhere the fall continued general, and in North Bengal were still heavy. Jalpaiguri reported 5·18 inches, Darjeeling 2·42 inches, Darbhanga 2·35 inches, and several stations over 1 inch.

Temperature.—Accompanying the general rainfall, there has been a very general depression of temperature. As noted above, the rain did not extend fully to North-Western India during the first one or two days of the week; hence the Punjab, Sind, and Rajputana on the 6th and Sind and Rajputana on the 6th, 7th and 8th had an excess of heat, but at other times the heat was generally less than usual.

The following table shows the variations of the mean temperature from the normal on each day of the week for the different Provinces of India:

Province.	August.							Mean variation of week.
	6th.	7th.	8th.	9th.	10th.	11th.	12th.	
	°	°	°	°	°	°	°	°
Burma	−1·3	−0·2	−1·4	−0·5	+1·5	+1·4	+2·6	+0·3
Bengal and Assam	−0·2	+0·5	−0·3	−2·7	−2·3	−1·0	−2·0	−1·1
North-Western Provinces and Oudh.	−0·3	−1·8	+2·2	+0·3	−2·5	−2·6	−3·0	−1·1
Punjab	+3·5	0	−1·2	−1·2	−2·3	−2·3	−1·8	−0·8
Bombay	+0·7	+0·4	−0·6	−1·2	−0·3	+0·3	+0·2	−0·1
Central Provinces and Berar	−0·3	−0·7	−2·0	−2·9	−3·1	−2·8	−3·5	−2·2
Central India and Guzerat	−1·6	+0·4	+1·2	+0·2	−1·5	−2·1	−2·3	−0·8
Sind and Rajputana	+3·7	+3·5	+2·1	+1·2	−0·6	−1·2	−0·9	+1·1
Madras	−0·3	−0·3	−1·0	−0·7	+1·0	−0·7	+0·5	−0·2
Mean for whole of India	+0·4	+0·2	−0·1	−0·8	−1·1	−1·2	−1·1	−0·5

The above figures show that for the whole of India the mean temperature of the week has been ½° below the normal, and that the mean temperature of all the Provinces, except Sind, Rajputana, and Burma, was less than usual. On the 6th and 7th, owing to the excessive heat prevailing in the north-west, the mean temperature of the whole of India slightly exceeded the average, but on all the other days the heat was below the average.

Rain.—The table at the close of the summary shows that effective rain has been received during the week in all the rainfall divisions, except Madras (Central) and East Coast (Central), where the average actual rainfall of the

division was 0·06 inch and 0·09 inch respectively. The heaviest average actual fall for the week reported was 20·08 inches in Assam (Surma). This was followed by 9·52 inches in North Bengal, by 8·98 inches in Arakan, by 8·90 inches in Tenasserim, and by 8·68 inches in East Bengal. The lightest average rainfall was in the two divisions noted above. According to the normal figures, the heaviest rainfall during the week under review is 9·78 inches in Tenasserim, followed by 9·04 inches in Arakan and by 8·58 inches in Assam (Surma), while the lightest rainfall is in Madras (South). There is thus a general agreement in the distribution of rainfall between the actual and normal values, though the fall has been heavier than usual in Assam, and lighter than usual in Burma. The third column of the table shows that in twenty-two of the rainfall divisions the rainfall of the past week has been excessive, and that in twenty-nine it has been deficient. The region of excessive rain included all the Bengal and Assam divisions, the North-West Provinces (East), both the Oudh divisions, the Punjab (North-West), the Konkan, the Deccan, Khandeish, Berar, the Central Provinces (West), and the Central India and Rajputana divisions. In all the other divisions the fall was deficient. The largest actual excess was 11·50 inches in Assam (Surma), and the largest actual deficiency was 4·17 inches in Coorg. Relatively to the normal the largest excess was in Rajputana (West), where the actual average rainfall was nearly eight times the normal average.

The three concluding columns of the table show the average actual and average normal rainfall for the monsoon period running from May 28th to August 12th. On the whole the rainfall for that period has been excessive, but in the following divisions, *viz.*, Central Burma, Arakan, Assam (Brahmaputra), the North-West Provinces (Submontane, Central, and West), the Punjab (South, Central, Hills, and West), Malabar, Madras (South-Central), Mysore, the Konkan, Berar, Central Provinces (West and Central), Guzerat, Kathiawar, Central India (East), Rajputana (East), and Central India (West), the East Coast (North and Central), and Madras (Central) the total rainfall has been approximately normal, while in Tenasserim and Lower Burma, in Orissa, and in Coorg the total rainfall has been deficient.

The following gives the largest total amounts received during the week as reported in the rainfall telegrams of the week:

Division.	District.	Station.	Amount.
Tenasserim	Amherst	Thaton	11·14 inches.
Lower Burma	Maubin	Pantanaw	16·20 „
Arakan	Akyab	Minbya	10·67 „
East Bengal	Noakhali	Feni	21·25 „
Assam	Khasia Hills	Cherra	70·00 „
North Bengal	Darjeeling	Sudder	19·47 „
North-Western Provinces.	Mirzapur	Robertsganj	8·55 „
Ditto	Garhwal	Joshimath	10·59 „
Punjab	Kangra	Sudder	9·36 „
Ditto	Jhelum	Ditto	4·96 „
Malabar	South Kanara	Beltangadi	6·69 „
Konkan	Colaba	Karjat	14·51 „
Deccan	Kolhapur	Bavda	15·38 „
Guzerat	Surat	Bulsar	6·52 „
Central India	Bhopal	Bhilsa	9·55 „
Rajputana	Jodhpur	Sudder	5·61 „
East Coast	North Arcot	Polur	3·00 „

Simla, *17th August, 1893.*

W. L. DALLAS,
Asst. Meteorological Reporter to the Government of India.

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 12th August.*—Rainfall good on the West Coast and in greater part of the Circars as well as in some other parts, but in the Southern, Central, Carnatic, and Deccan districts and in Kistna generally only scattered showers have fallen, and more rain is wanted in parts. Agricultural operations actively proceeding, and standing crops thriving almost everywhere. Water, pasturage, and fodder generally ample, and condition of cattle good. Prices generally very slightly easier, but still very high, especially in the southern half of the Presidency.

Bombay.—*For week ending 16th August.*—Rain more or less throughout the Presidency, but deficient in ten districts. Young crops injured by rats or insects in parts of seven, and withering for want of rain in parts of two, districts. Agricultural operations progressing generally, and transplantation in progress in parts of six districts, but retarded for want of rain in two districts. Prices steady, except in parts of two districts. Agricultural stock good and fodder sufficient, except in parts of one district.

Bengal.—*For week ending 16th August.*—Rain has been general during the week, the falls being heavy and much above the normal in East and North Bengal and North Behar. Condition and prospects of the crops are generally good, except in the Eastern districts of Bengal, parts of Midnapur, the 24-Parganas and Khulna, and some of the districts of North Behar, where prospects of the autumn and winter crops have been adversely affected by excessive rain and floods. In Hazaribagh, Palamau, and Manbhum the autumn crops have suffered. Early rice and jute are being harvested, and transplanting of winter rice is almost over. Prices of common rice are almost stationary. Cattle are generally reported well. Water is everywhere plentiful and the supply of fodder sufficient, except in Noakhali.

North-Western Provinces and Oudh.—*For week ending 16th August.*—The weather has been generally favourable for the crops, although heavy rain has fallen in many districts. Reaping of early autumn crops has begun, and sowing of the winter crops are in progress. Prospects are favourable everywhere, and a good outturn is anticipated. Fields are being prepared for the spring sowings in places. Supplies ample and fodder and water abundant. Prices fairly steady, and show a falling tendency.

Punjab.—*For week ending 16th August.*—Rain has fallen in all but two districts. More rain wanted in Hissar and Sialkot. Sowings of autumn crops nearly over; weeding in progress. Ploughings for spring crops commenced. Prospects of standing crops are reported good to average; the crops are now well advanced and flourishing. Locusts appeared in parts of Ferozepore, but were destroyed. Field rats have done some damage to the young crops in parts of the Umballa district. Most of the crops have been damaged by heavy floods in the low-lands of the Mooltan and Shahpur districts. Cattle are generally in good condition. Fodder sufficient throughout the province. Prices unsettled in one district, rising in two others, falling in another, and stationary elsewhere.

Central Provinces.—*For week ending 16th August.*—Weather occasionally cloudy and close, with moderate falls of rain in the Northern districts. More rain needed in two districts. Prospects of autumn crops favourable. Weeding operations continue. Prices easy.

Burma.—*For week ending 12th August.*—In Lower Burma the rainfall was sufficient. Agricultural operations are progressing satisfactorily, and the crop prospects are good. Rain fell in all but three districts of Upper Burma, but the falls were light in most districts. Agricultural operations generally are progressing, but are delayed in Shwebo and Yeu by want of rain. Crop prospects in most districts are good, but in Shwebo and Yeu and part of Lower Chindwin the crops are withering owing to want of rain, while in Myingyan and Pakokko some damage has been done by floods. The price of paddy has fallen in three districts and risen in three others.

Assam.—*For week ending 15th August.*—In the Surma Valley fodder is scarce, and the prospects of crops unsatisfactory owing to heavy floods. In the rest of the province the rainfall is normal and the prospects of the crops good. Condition of cattle normal.

Mysore and Coorg.—*For week ending 16th August.*—MYSORE: Good rain in two districts. Standing crops in good condition. Prospects generally favourable, but more rain is wanted in parts of four districts. Prices fallen in one district.

COORG: Rainfall moderate. Transplanting of paddy nearly completed. Coffee planting completed. More rain is needed for both rice and coffee. Slight rise in prices. Water and fodder for cattle sufficient.

Berar and Hyderabad.—*For week ending 16th August.*—BERAR: Rainfall good. Weather cool and cloudy. Standing crops in go od condition Land under preparation for ensuing spring crops. Sowings continue. Weeding operations in progress. Fodder and water sufficient. Prices almost steady.

HYDERABAD: Rainfall moderate. Weeding of autumn crops and of irrigated paddy in progress. Standing crops in one taluk totally blighted in several places by disease. Prices steady.

Central India.—*For week ending 16th August.*—Rain has fallen throughout Central India, but there are signs of another break in Indore. Sowing recommenced in Goona, completed in Gwalior, and almost finished in Bhopawar. Weeding in progress in other parts. Crops slightly damaged by insects in part of Bhopal and by excessive rain in part of Bhopawar. Condition of cattle generally good. Prices of food-grains slightly falling in Bhopal and Bundelkhund, fluctuating in Bhopawar, and steady in other parts.

Rajputana.—*For week ending 16th August.*—Rainfall generally good throughout Rajputana. Agricultural operations, standing crops, and condition of cattle generally satisfactory. Pasturage or fodder sufficient. Prices falling in three States, fluctuating in one, and steady elsewhere.

Kashmir.—*For week ending 15th August.*—Autumn crops in good condition. Weather still fine. Prices stationary.

Nepal.—*For week ending 12th August.*—Heavy showers daily. Weather cool. Prospects of crops very good.

E. C. BUCK,
Secretary to the Government of India.

SUPPLEMENT TO

The Gazette of India.

No. 34.} SIMLA, SATURDAY, AUGUST 26, 1893.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the week ending at 8 a.m. on Saturday, August 19th, 1893.

The past week has been one of generally light monsoon rainfall. The ordinary distribution of pressure has been somewhat modified, the area of lowest pressure having been located close to or actually over the hills. Hence there has been no easterly current up the Gangetic plain, and the weather in Upper India has been fine. At the same time the monsoon current on the West Coast of the Peninsula has been lighter than usual, and the rainfall over the Peninsula has been also light. In consequence of this the temperature has been generally higher than usual—more particularly in Burma.

On the 13th pressure was rising, except in Burma, where there was a brisk fall. Pressure was lowest over the Western desert and along the foot of the North-West Himalayas. From this region the barometer readings rose steadily, and were highest over Malabar and Ceylon. A slight depression was also shown over Central Burma. The winds were irregularly cyclonic over Burma and variable over the Punjab. Elsewhere the directions were generally westerly (between south-west and north-west). Rain had fallen generally in Burma and Bengal and as scattered showers in most other places, though over a large part of North-Western India there had been no rain. On Monday, the 14th, pressure was decreasing everywhere, but the chart showed no important change in the distribution. The area of low pressure continued to lie close to the line of the

Himalayas, and westerly winds were blowing over the greater part of the country. The feeble depression over Burma was unchanged. Scattered showers, generally of small amount, were reported from Burma, Bengal, and the Peninsula, and elsewhere there was no rain. Chittagong reported 3·85 inches, Akyab 2·40 inches, Moulmein 2·1° inches, Mymensing 1·93 inch, Silchar 1·83 inch, and Balasore 1·47 inch. These were the heaviest amounts. On the 15th the barometer was rising, except over the Peninsula and the Punjab, but the changes had not materially affected the general distribution. The prevailing current of air was from the westward, except in Burma, Assam, and the east of Bengal, where southerly and variable winds were reported. Rain had fallen at most stations in North Bengal, in Assam, in Burma, and on the West Coast, but elsewhere the weather was fine with a few scattered showers. Moulmein reported 3 inches, Gnatong 2·74 inches, Jalpaiguri 1·93 inch, and Tavoy 1·19 inch. In all other places the amounts were small. The chart of the 16th showed that pressure was falling over the southern and rising over the northern half of India. The lowest pressure lay over the Punjab, but there was also a feeble depression over the north of the Bay. The pressure differences were small, and the winds were generally lighter than usual. The winds were irregularly cyclonic over the north of the Bay area; generally westerly and north-westerly elsewhere. The force was lighter than usual. The distribution of rain was similar to that reported on the 15th, only a few scattered showers being reported, except over the west of the Peninsula, Burma, and parts of Bengal, where the fall was fairly general. Tavoy reported 2·63 inches, Bassein 1·64 inch, Moulmein 1·02 inch, Chakrata 1·76 inch, Mercara 1·00 inch, and Negapatam 1·18 inch. On the 17th the barometer was rising over North-Western India and over Burma and falling in other parts of the country. The depression over the north of the Bay had changed very little, and the pressure differences remained small. The winds were very variable over North-Eastern and North-Western India, but were generally westerly over the centre and south. Showery weather was reported over a large part of the country, but the amounts were generally small. Tavoy, Saugor Island, Chittagong, Chakrata, Bombay, Ahmednagar, Gopalpur, and Negapatam had between 1 and 2 inches, but elsewhere the amounts were less than 1 inch. On the 18th the distribution of pressure had undergone an important change, a trough of low pressure running from the low pressure area over the Bay north-westward to the Punjab. On the northern and north-eastern side of this trough easterly winds had been established extending as far west as Roorkee. In Burma variable breezes continued, and in other parts of the country the directions remained generally westerly. General showers were reported from the Peninsula and North-Eastern India, but elsewhere there was no rain. Moulmein and Kurnool reported over 2 inches and several stations over 1 inch. On the 19th the distribution of pressure showed very little change, the alterations of the barometer having been small and irregular. The easterly current over Bengal and the north of the Gangetic plain continued. Elsewhere the winds remained westerly and north-westerly. Showery weather had extended, but there was still no rain over North-Western India. Mussoorie had received over 3 inches and Neemuch, Hyderabad (Deccan), and Gopalpur over 1 inch. Elsewhere the amounts were small.

Temperature.—The general decrease in the amount of rainfall has been accompanied with an increase in the temperature over India. Last week the mean temperature of the whole country was ½° below the normal average, and this week the mean is nearly ½° above, showing a rise relatively to the normal of nearly 1·0°.

The following table shows the variations of the mean temperature from the normal on each day of the week for the different Provinces of India:

Province.	August 1893.							Mean variation of week.
	13th.	14th.	15th.	16th.	17th.	18th.	19th.	
	°	°	°	°	°	°	°	°
Burma	+2·4	+2·3	+2·1	+1·6	+2·7	+2·2	+2·2	+2·2
Bengal and Assam	—1·5	—0·3	+0·8	+0·8	+1·5	+1·2	+0·8	+0·5
North-Western Provinces and Oudh	—1·4	—1·1	+0·1	+0·4	+0·7	+2·1	+3·6	+0·6
Punjab	—4·4	—2·7	—0·7	—0·1	—0·7	—1·0	—0·5	—1·4
Bombay	+0·9	+1·2	+1·3	+1·0	+0·1	+0·7	+1·2	+0·9
Central Provinces and Berar	—1·6	—1·3	—1·0	+0·1	+1·2	+2·2	+3·2	+0·4
Central India and Guzerat	—1·5	—1·7	—0·7	—0·2	+0·4	—0·1	+2·1	—0·2
Sind and Rajputana	—1·5	—0·6	—0·8	—0·5	—0·4	+0·8	+2·7	0
Madras	+1·1	+1·3	+2·5	+1·8	+1·6	—0·2	—1·9	+0·9
Mean for whole of India	—0·8	—0·3	+0·4	+0·5	+0·8	+0·9	+1·5	+0·4

The above figures show that on the 13th and 14th the mean temperature of India was slightly below the average, and that on the other days of the week it was above. The warmest day was the 19th. The figures for the Provinces show that in Sind and Rajputana the mean temperature was exactly normal, in Guzerat and Central India slightly below the normal, and in the Punjab 1½° below, but that in all other Provinces the heat was somewhat greater than usual.

Rain.—The table at the close of the summary shows that during the week under review rain fell in all the Provinces, except Sind and Rajputana (West). In the case of several divisions—as, for example, the North-West Provinces (Central), the Punjab (South, Central, and Hill Districts), and Rajputana (East) and Central India (West)—the average actual rainfall of each division was less than one-tenth of an inch, but in all the other divisions the rainfall, though generally lighter than usual, was effective. The heaviest average actual fall was 8·19 inches in Tenasserim: this was followed by 4·49 inches in Assam (Surma), by 3·30 inches in North Bengal, and by 2·97 inches in Assam (Brahmaputra). The lightest rainfall reported was shown in the divisions noted above. According to the normal distribution for the week under review, the heaviest normal average fall is 8·11 inches in Tenasserim: this is followed by 7·74 inches in Assam (Surma), by 6·68 inches in Arakan, by 6·43 inches in the Konkan, and by 5·88 inches in Coorg. The lightest average normal rainfall is 0·26 inch in Sind. It will be seen from the above that on the whole the average actual and average normal distribution of rainfall agreed fairly well,—*i.e.*, the heaviest fall was in Tenasserim, the lightest in Sind, &c.; but the minor differences were considerable, such, for example, as the deficient rain in Coorg and the Konkan. The third column of the table shows that over by far the greater part of the country the rainfall has been largely short of the average. Only in six divisions, *viz.*, Tenasserim, the East Coast (North and South), Hyderabad (South), and Madras (Central and South), was there any excess. In all the other divisions there was a deficiency. The deficiency was as much as 4·75 inches in the Konkan, 3·94 inches

in Coorg, and 3·83 inches in the Hill Districts of the Punjab, and over 2 inches in many divisions. The most important case of excess was 1·38 inch in Hyderabad (South).

The three concluding columns of the table show the state of the seasonal fall of rain, *i.e.*, the actual rainfall for the period May 28th to August 19th, 1893, and the normal rainfall for that period. From these columns it appears that in Tenasserim, Lower Burma, Orissa, Coorg, Mysore, and the Central Provinces (West) the rainfall has been short (a deficiency of 20 per cent. and above); in Central Burma, Arakan, Assam (Brahmaputra), the North-West Provinces (Submontane, Central, and West), the Punjab (South, Central, Hill Districts, and West), Malabar, Madras (South-Central), the Konkan, Berar, the Central Provinces (Central and East), Guzerat, Kathiawar, Central India (East), Rajputana (East) and Central India (West), the East Coast (North *a*), Madras (Central), and the East Coast (Central) the rainfall has been approximately normal (variations + or — less than 20 per cent.), and that in all the remaining divisions it has been excessive.

The following gives the largest total amounts received during the week as reported in the rainfall telegrams of the week:

Division.	District.	Station.	Amount.
Tenasserim	Amherst	Sudder	9·07 inches.
East Bengal	Noakhali	Feni	7·28 ,,
Assam	Sylhet	Karimganj	9·19 ,,
North Bengal	Jalpaiguri	Bhagatpur	17·69 ,,
Bihar	Purneah	Arrareah	5·08 ,,
Oudh	Hardoi	Shahabad	3·23 ,,
North-Western Provinces.	Aligarh	Khair	3·60 ,,
Punjab	Kohat	Thal	1·45 ,,
Malabar	South Kanara	Udipi	3·02 ,,
Madras	Salem	Yercaud	5·84 ,,
Konkan	Ratnagiri	Vengurla	6·15 ,,
Deccan	Kolhapur	Bavda	5·60 ,,
East Coast	Ganjam	Rambha	5·42 ,,
Ditto	South Arcot	Tindivanam	4·49 ,,

SIMLA, *24th August, 1893.*

W. L. DALLAS,
Asst. Meteorological Reporter to the Government of India.

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 19th August.*—Rainfall good and of seasonable amount almost throughout the Presidency, though rather light in parts of the Central, Southern, and West Coast districts. Cultivation proceeding favourably and standing crops flourishing. Harvest in progress in parts with fair outturn. Pasture and fodder sufficient. Condition of cattle good. Prices fluctuating slightly, but still near former high rates.

Bombay.—*For week ending 23rd August.*—River low in Sind. Rain more or less throughout the Presidency Proper, but generally deficient. Standing crops withering for want of rain in parts of four, and damaged by rats or insects in parts of eight, districts. Sowing and transplantation of early crops completed, except in a few districts. Preparations for late crops progressing in two districts. Prices generally steady. Fodder sufficient. Agricultural stock good.

Bengal.—*For week ending 19th August.*—The rainfall during the week has been generally light and scattered, and the fine weather has proved beneficial to the crops. Transplanting of winter rice is being rapidly completed, and the autumn rice and jute harvests are in progress. Prospects are favourable in five divisions, fair in the Presidency division, and from fair to moderate in three other divisions. Floods are reported from Tipperah, Darbhanga, Muzaffarpur, and Champaran. Damage has been caused to the autumn and winter rice, but its extent has not yet been fully ascertained. In the Bil country, a small tract on the borders of Faridpur and Backergunge, the unusually early and rapid rise of the water prevented sowing or destroyed the young rice, and apprehensions of distress requiring relief are entertained. The population affected is about fifty thousand. Test works have been opened, and subscriptions are being collected for the relief of invalids. Prices have risen in the eastern districts, but elsewhere are generally stationary. Cattle are suffering from want of fodder in the flooded tracts; elsewhere they are in good condition.

North-Western Provinces and Oudh.—*For week ending 23rd August.*—The weather has been generally clear during the week, although showers have fallen in some places. More rain is needed, especially for the rice crops. Prospects so far are favourable. Preparation of land for the spring crops is in progress. Supplies ample and fodder sufficient. Prices stationary.

Punjab.—*For week ending 23rd August.*—Rain has fallen in parts of six districts, but more rain is urgently wanted in most districts. Sowings of autumn crops going on. Weedings of standing crops commenced; the condition of the crops is generally good to average, except that of those destroyed by floods in the Shahpur district. Ploughings for spring crops in progress. Prospects are at present fair, but want of rain is beginning to cause damage. Cattle generally in good condition. Fodder sufficient in all districts, except in parts of Mooltan. Prices rising in two districts and stationary elsewhere.

Central Provinces.—*For week ending 23rd August.*—Prospects have been improved by the rainy weather of the last two days, and continue favourable, except in the rice country of the Waingunga Valley and in parts of Chhattisgarh, where the rainfall has been insufficient.

Burma.—*For week ending 19th August.*—In Lower Burma agricultural operations are progressing satisfactorily, and standing crops are in good condition. In two districts inundations have submerged considerable areas of paddy cultivation, which in all probability will be destroyed. The rainfall was sufficient in all districts. In Upper Burma agricultural operations are progressing satisfactorily. Rain has fallen in all districts, but more rain is required in Yeu and Shwebo. Slight damage has been done to crops by floods in four districts. Crop prospects are generally good. In the Southern Shan States agricultural operations have been suspended owing to want of rain. In Lower Burma, except for a slight rise in Prome, the price of paddy is stationary. In Upper Burma there have been slight increases in three districts and considerable increases in two others.

Assam.—*For week ending 22nd August.*—Floods have occurred in parts of the Brahmaputra Valley, but are subsiding in the Surma Valley. Prospects of crops, condition of cattle, and supply of fodder unsatisfactory in the flooded tracts, but good elsewhere.

Mysore and Coorg.—*For week ending 23rd August.*—MYSORE: Rainfall slight throughout. Standing crops in good condition. Prospects generally favourable, but more rain is badly wanted in parts of four districts. Prices risen in two districts and fallen in one.

COORG: Rainfall good. Transplanting of paddy approaching completion, but more rain is needed for rice and ceffee. Slight rise in prices. Water and fodder for cattle ample.

Berar and Hyderabad.—*For week ending 23rd August.*—BERAR: Rainfall moderate. Weather warm and cloudy. Standing crops in good condition. Land being prepared for next spring crops. Sowings nearly completed; weeding operations continue. Fodder and water sufficient. Prices almost stationary.

HYDERABAD: Rainfall good during the week. Weeding of the hot-weather crops continues. Sowing of irrigated crops continues in one taluk only, but is finished in other localities. Fodder plentiful. Prices stationary.

Central India.—*For week ending 23rd August.*—There appears to have been a slight break in the rains during the week in parts of Central India. More rain is required in Baghelkhand. Agricultural operations in progress in all parts. Indian-corn slightly damaged by excessive rain in Bhopawar, but crops in other parts are in good condition, and the outturn expected will be generally good. Agricultural stock in good condition. Prices of food-grains slightly fallen in Bhopal, fluctuating in Bhopawar, but steady elsewhere.

Rajputana.—*For week ending 23rd August.*—Fair rain in Bickaneer and slight rain in Meywar and Sirohi. Agricultural operations and standing crops generally satisfactory. Condition of cattle generally good. Pasturage or fodder sufficient. Prices falling in one State, rising in two others, fluctuating in one, and steady elsewhere.

Kashmir.—*For week ending 22nd August.*—Weather fine. Ploughing for the spring crops commenced. Autumn crops in good condition. Prices stationary.

Nepal.—*For week ending 19th August.*—Weather seasonable. Prospects of the rice crop are very good.

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Circular No. $\frac{51}{51}$.

Extract from the Proceedings of the Government of India in the Revenue and Agricultural Department (Museums and Exhibitions),—dated Simla, the 24th August 1893.

RESOLUTION.

Read the following—

General notice regarding the Antwerp International Exhibition of 1894.

ANTWERP INTERNATIONAL EXHIBITION OF 1894 UNDER THE HIGH PATRONAGE OF HIS MAJESTY THE KING OF THE BELGIANS.

HONORARY PRESIDENT—HIS ROYAL HIGHNESS THE COUNT OF FLANDERS.

FOREIGN SECTIONS.

GENERAL NOTICE.

(*Taken from the General Rules.*)

The Antwerp International Exhibition will include all Industrial, Scientific, and Artistic Productions, as well as all Commercial Produce. It will comprise Maritime, Colonial, and African Sections; also an Exhibition of Military Art.

Simultaneously with the General Exhibition, the Antwerp Royal Society of Fine Arts will hold a special exhibition of Painting, Sculpture, Engraving, and Architecture, to which Artists of all countries are invited to contribute.

It is also intended to hold a series of shows and exhibits of Live Stock, Agricultural Products, Flowers, Fruit, etc.

The Exhibition will be inaugurated May 5th, 1894, and will remain open for six full months, closing at latest on November 12th, 1894.

It will be located in the new quarter of the city, in close vicinity of the Scheldt and the new maritime installations, and will be connected with the principal railways.

It will cover in one enclosure an area of about 200 acres, including (1) a Palace of Fine Arts; (2) several Halls, covering about 120,000 square yards of ground, and intended for exhibiting Industrial and Commercial products, Machinery, Electric appliances, etc. These halls will be built of iron and steel and will be roofed with zinc.

A Board of Directors conduct the business of the Antwerp International Exhibition Company and decide all matters of Administration and Finance.

An Executive Committee under the honorary Presidency of Baron Osy van Zegwaart, Governor of the Province of Antwerp, and M. Jan Van Ryswyck, Burgomaster of the city, and under the effective Presidency of Count de Pret Roose de Calesberg, Member of the Senate, has charge of the organisation and management of all Exhibits in the different departments.

By Decrees, dated 11th March 1893, Royal Commissions of the Belgian and Foreign Sections have been instituted under the honorary Presidency of His Royal Highness the Count of Flanders; also a Commissariat General of the Government and General Commissions of the Belgian and Foreign Sections.

The Belgian Commission is presided over by M. Leon De Bruyn, Minister of Agriculture, Industry, and Public Works.

The Foreign Commission under the Presidency of M. Valère Mabille has for its object to encourage and facilitate the co-operation of Foreign Exhibitors.

The Commissariat General of the Government, whose head-quarters are at the *Palais des Académies* in Brussels, is conducted by Count Hyppolyte d'Ursel, who represents the Government at the Antwerp International Exhibition, and is the official referee between the Executive Committee of the Company and the Commissaries of the Belgian and Foreign Sections, also between the latter and the Foreign Commissaries

delegated with the Exhibition, in all matters where the interests of Foreign Exhibitors are concerned.

The Commissary General of Foreign Sections, M. Vercruysen-Brack, Member of the Senate, co-operates with the Commissary General of the Government in all negociations with Foreign Countries, especially as regards the appointment of the Commissaries of the Foreign Sections.

The Foreign Governments have been officially advised of the formation of this International Exhibition; they have been invited to appoint their official Commissaries to represent them.

Committees for furthering the objects of the Exhibition may be formed in the principal cities or towns of the world under approval of the Belgian Government, and with the co-operation of its Diplomatic and Consular Agents abroad.

Where no official Commissary has been appointed, Foreign Exhibitors may be represented by a private Committee or its delegate.

All products will be divided into classes, as per summary hereafter given, and will be exhibited in accordance with this classification in all the separate sections.

In the Halls for Machinery and Electricity the products of each country will be exhibited together as far as the distribution of motive power will allow.

The charge for space in the different compartments, including general decoration of the halls, and the reception of goods, has been established according to position as follows:—

I.—HALLS OF INDUSTRY.

Collective space.

Ground space.	(*a*) Depth not exceeding 1 metre— *Per lineal metre, frontage*	fr.	60
	(*b*) Depth exceeding 1 metre— *Per square metre, ground surface*	,,	60
Wall space	(*c*) *Per lineal metre, frontage*	,,	60

The charge for collective space allotted will in no case be less than ... ... ,, 60

Detached spaces.

(*a*) Measured at the greatest dimension, the smallest being below 1 metre—
Per lineal metre, frontage ... ... ,, 90

(*b*) Both dimensions exceeding 1 metre—
Per square metre, ground surface ... ... ,, 90

The charge for detached space allotted will in no case be less than ... ... ,, 90

CENTRAL GALLERIES.

In the Central Galleries the charge will be	Collective space— *Per square metre*...	,,	90
	Detached spaces— *Per square metre*...	,,	130
Charge for rooms having at least 5 metres frontage and 5 metres depth.	Single frontage— *Per square metre*...	,,	70
	Corner frontage— *Per square metre*...	,,	90

The allotted space will be measured at the greatest length and width above the floor.

II.—HALLS OF MACHINERY AND ELECTRICITY.

For all non-working Machinery and Exhibits of any height.

(*a*) The depth not exceeding 1 metre—
Per lineal metre, frontage ... ... fr. 60

(*b*) The depth exceeding 1 metre—
Per square metre, ground surface ... ... ,, 60

The charge for space in this department will in no case be less than ... ... ,, 60

C

For all working machinery, receiving its motive power from steam, water, gas, electricity, or general transmission, and working at least five hours daily and four days weekly, *the above charges will be reduced one half.*

The allotted spaces will be measured at the greatest length and width above the floor.

III.—MARITIME INSTALLATIONS, GARDENS, SHEDS, AND TENTS.

Of whatever height.

(*a*) The depth not exceeding 1 metre—

Per lineal metre, frontage ... ... fr. 25

(*b*) The depth exceeding 1 metre—

Per square metre, ground surface ... ... „ 25

The charge for space in this department will in no case be less than .. .. „ 25

For space allotted under sheds or tents, the above charges will be increased by fr. 5, per metre.

For large spaces taken in the Halls of Gardens by the different Countries, special terms will be arranged through the intervention of the Commissary General of the Belgian Government.

Foreign goods arriving by the Belgian State Railways will be returned carriage free over the same lines. Negociations have been opened with the private companies and the foreign lines in connexion with the Belgian State Railways to obtain the same terms from them.

Most of the regular lines of steamers will take goods for the Antwerp Exhibition at reduced rates of freight.

The Antwerp International Exhibition Company undertakes the handling of goods within the Exhibition, free of charge, on all packages received not later than April 15th, 1894, and not exceeding 1,500 kilos in weight. This includes the delivery of the packages on the space allotted, and the eventual re-loading on the railway trucks, within the limits of the Exhibition.

Empty packages will be stored at a low rate, and brought back for repacking at the close of the Exhibition.

The Executive Committee will arrange special terms for handling Goods and storing Empties with all Countries officially represented.

The general decoration of the Exhibition Halls will be carried out at the expense of the Company; all private and special decorations will be at the expense of Exhibition singly or collectively.

Strict watch and guard will be established to prevent goods being stolen, strayed, or damaged, without, however, any responsibility being incurred by the Company in this respect.

All Exhibitors will be free to appoint at their own expense and under their own responsibility any number of private Inspectors from a list approved by the Company.

The Exhibitors, whether singly or collectively, are responsible for the whole charge for rent; for the supply, fixing, and decoration of all and any special appliances they may require, such as partitions, screens, extra ceilings, stands, raised flooring, extra foundations for heavy exhibits; also for the packing, laying out, and repacking of their goods, rent for storage of empties, etc.

Exhibitors requiring steam, water, gas, or electricity must declare in their application for space the hourly quantity they require. It will be supplied as per tariff.

When motive power is required, the intended rate of speed must also be indicated.

In the Halls of Machinery, motive power will be obtainable per special tariff, and will be supplied from the main shaft for general transmission.

Intermediate transmission will be at the expense of Exhibitors; the foundations and all special appliances will also be at their cost.

A copy of the particular rules and regulations further relating to this department will be sent on application.

Articles of every day sale, also those manufactured on the spot, may be sold and delivered to visitors on payment of a percentage to be fixed by agreement; but such sales may not take place in the Halls without a special and written consent of the Executive Committee. A special convention will regulate the sale of refreshments in the gardens and grounds of the Exhibition.

An International Jury of Awards will be formed, the members of which will be appointed by their respective Governments; this Jury will be organised and presided over by the Commissary General of the Belgian Government, who will also propose for appointment by the Belgian Government members of the Jury from among the delegates of countries not officially represented.

The Jury will officiate as soon as possible. The Awards will consist of Medals or Diplomas of First Class; Diplomas of Gold, Silver, and Bronze Medals, and of Honourable Mention.

All foreign goods will be admitted to the Exhibition in bond, paying no duty of any kind if re-exported.

All inventions, patents, drawings, models, trade-marks, etc., exhibited will be placed under the immediate protection of the Belgian Government, and all rights of property in them will be effectually secured.

The Executive Committee will issue an official and complete catalogue methodically arranged and containing the name and address of each exhibitor, with particulars as to trade, place of production, etc. Foreign sections will have the right of issuing at their own expense their special catalogues and of selling them within their respective limits.

The issue of tickets for the Lottery authorised by the Belgian Government may extend over several series of one million tickets each; the prizes to be purchased exclusively from Exhibitors. The issue of the first series of tickets will be authorised before the opening of the Exhibition.

Printed forms of application for space are supplied by the Executive Committee *or by the Commissariats of Countries officially represented.* These forms must be signed, and addressed prepaid to the official Commissariat of the Country to which the intending Exhibitor belongs, or to the Executive Committee of the Exhibition, No. *9, Rue Gérard, Antwerp*, not later than October 1st, 1893, for all countries not officially represented.

All goods exhibited at the World's Fair, Chicago, which may be destined for the Antwerp Exhibition, will on arrival be stored free of charge *in the Halls, and as near as possible to their definite places.*

Arrêté, en séance du Conseil d'Administration,

à Anvers, le 25 Mai 1893.

L'Administrateur Secrétaire,
HENRI BELIARD.

L'Administrateur Président,
Comte PRET ROOSE de GALESBERG.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the week ending at 8 a.m. on Saturday, August 26th, 1893.

Ordinary monsoon conditions of moderate intensity have prevailed throughout the Indian region during the week under review. Pressure has been steadily high over Malabar, Ceylon, and the south of the Bay, steadily low over the Punjab, and moderately low over the north of the Bay and over the Gangetic plain. The steepness of the barometric gradient has varied from day to day, but on the whole the pressure differences have been moderate, and the wind which has blown from the normal monsoon directions has been moderate to fresh. The heat has been somewhat greater than usual, except over the Peninsula, where the mean temperature has been about normal.

On the 20th the barometer was falling everywhere. The general distribution of pressure and the circulation of the winds were fairly normal, and rain was reported from most parts of the country, except North-Western India and the south of the Carnatic. The amounts of rainfall were generally small, but Mussoorie has received 2·92 inches, Silchar 2·26 inches, and Moulmein, Dehra Dun, Chakrata, Sholapur, and Bellary over one inch. On the 21st pressure was still falling, except in Upper Burma and part of the Peninsula. The general distribution was very little changed, except that a shallow depression had appeared over Lower Burma. The winds were irregularly cyclonic over Burma, and elsewhere blew from about the normal monsoon directions. The force was fresh over a large part of the country. There was no rain over North-Western India, but in all other districts rain had fallen more or less generally, and in several places was heavy: thus Moulmein reported 7·74 inches, Raichur 4·91 inches, Kurnool 3·25 inches, and Minbu, Cawnpore, Raipur, and Hyderabad (Deccan) over 2 inches. The chart of the 22nd showed that pressure was increasing over a large part of Western India and over Burma and was decreasing elsewhere. The shallow depression which was crossing Burma on the morning of the 21st had passed out into the Bay, but otherwise the general distribution was unchanged. Readings were lowest over the Punjab, relatively low over the Gangetic plain and the Bay, and highest in Malabar and Ceylon. The gradient had increased. The winds were irregularly cyclonic around the Bay, but continued to blow from the normal monsoon directions elsewhere, though on the West Coast the winds were perhaps more northerly than usual. By the morning of the 23rd the depression which was crossing the Bay had reached the Orissa and Ganjam coasts. Pressure was falling over the Peninsula, the Central Provinces, the Gangetic plain, and Bengal, and rising elsewhere. The baric gradient was steep over the Peninsula and the Bay. Cyclonic winds prevailed over a large part of the country, circulating around the depression noticed above. Over North-Western India and the west of the Peninsula, however, numerous calms were reported. There was still very little rain over North-Western India, but in all other parts of the Indian region the fall was very general. Akyab reported 4·80 inches, Cawnpore 2·97 inches, Cuttack 2·50 inches, Bhamo 2·15 inches, and Hazaribagh 2·04 inches, while several stations had more than

1 inch. The chart of the 24th showed that the depression which had crossed the Bay had reached the Central Provinces, and that the barometer was falling over the central and north-western parts of the country. Cyclonic winds continued to prevail around the depression and normal monsoon winds elsewhere. The only rainfall over North-Western India was still light and scattered, but in other parts of India the fall was very general. Pachmarhi reported 3·41 inches, Raipur and Mercara 2·80 inches, Lashio 2·59 inches, Mangalore 2·23 inches, and Khammamett 2·07 inches, while at several stations the fall was over 1 inch. On the 25th the barometer was rising over the Peninsula and Bengal and falling elsewhere. The depression was stationary over the central parts of the country and the general distribution was unaltered. The winds were about normal. Rain had been very general, except over the Punjab plains and Sind; but the amounts, except on the West Coast, were falling lighter. Silchar reported 3·27 inches, Goa 3·25 inches, Mormugao 2·29 inches, Mercara 2·19 inches, Tavoy 2·17 inches, and a few places over 1 inch. On the 26th the barometer was rising generally and the depression had become slighter. There was no other change. Rain had extended somewhat in North-Western India and remained fairly general elsewhere. The fall continued, however, to grow lighter. The heaviest fall was 1·75 inches at Bikanir, followed by 1·64 inches at Mercara, by 1·50 inches at Akola, by 1·29 inches at Darjeeling, by 1·21 inches at Neemuch, and by 1·02 inches at Mangalore and Pachmarhi.

Temperature.—Notwithstanding the very general rainfall, temperature has been very generally higher than usual. The most marked excess was, of course, over North-Western India, where the rainfall was lightest, but the mean temperature of the whole of India for the whole week was 1½° above the normal.

The following table shows the variations of the mean temperature from the normal on each day of the week for the different Provinces of India:

Province.	August 1893.							Mean variation of week.
	20th.	21st.	22nd.	23rd.	24th.	25th.	26th.	
	°	°	°	°	°	°	°	°
Burma	+3·1	+0·9	−0·9	+0·2	+0·5	+1·3	+0·5	+9·8
Bengal and Assam	+1·1	+2·0	+1·8	+1·8	+0·9	+0·4	+1·2	+1·3
North-Western Provinces and Oudh.	0	+1·7	+3·3	+2·2	+1·0	+1·9	+2·3	+1·8
Punjab	+1·6	+3·0	+4·0	+2·7	+4·1	+4·4	+3·3	+3·3
Bombay	+1·5	+1·3	+0·4	−1·0	−0·5	−1·0	−0·5	0
Central Provinces and Berar	+3·9	+3·8	+2·7	+0·2	−2·2	−1·3	−1·6	+0·8
Central India and Guzerat	+3·6	+3·8	+2·6	+1·5	+1·2	+1·7	+0·3	+2·1
Sind and Rajputana	+2·9	+4·2	+2·6	+1·6	+2·7	+3·3	+3·7	+3·0
Madras	−0·8	+0·2	−0·1	−0·6	−2·6	−1·9	−0·2	−0·9
Mean for whole of India	**+1·9**	**+2·3**	**+1·8**	**+1·0**	**+0·6**	**+1·0**	**+1·0**	**+1·4**

These figures show that on each day of the week the mean temperature of the whole country has been above the normal, the excess ranging from 2·3° on the 21st to 0·6° on the 24th. In Bombay the mean temperature of the week exactly equalled the normal and in Madras it was nearly 1·0° below, but over Burma and Northern and Central India there was a general excess.

Rain.—During the week under review rain has fallen in all parts of the Indian region, and, except in the Punjab (West), Kathiawar, and Sind, the fall has been effective—that is, the average actual rainfall of each division for the week has exceeded one-tenth of an inch. The heaviest average actual fall reported was 11·68 inches in Tenasserim. This was followed by 6·40 inches in the East Coast (North *a*), by 5·72 inches in Coorg, by 5·32 inches in Hyderabad (South), and by 4·94 inches in Berar, while the lightest rainfall during the week was reported from the three divisions noticed above. Normally the heaviest rainfall during the present week is 7·96 inches in Tenasserim, followed by 6·15 inches in Assam (Surma), by 5·88 inches in Coorg, and by 5·73 inches in Arakan, while the lightest rainfall is normally reported from Sind. There is thus a certain amount of similarity between the actual and normal rainfall, but the heavy rainfall in the East Coast (North *a*) and in the Berars and Central Provinces is exceptional. The third column of the table shows that rain has been short over by far the greater part of the country, the only places where there has been any excess being the following thirteen divisions, *viz.*, Tenasserim, Malabar, the Bombay Deccan, Berar, the Central Provinces divisions, Central India (East), the East Coast (North and *a*), Hyderabad (South), Madras (Central), and the East Coast (Central). The greatest excess is 4¼ inches over the East Coast (North *a*), followed by 3¾ inches in Tenasserim and Hyderabad (South). The greatest actual defect is 2½ inches in Assam (Surma) and the Hill Districts of the Punjab.

The three concluding columns of the table show the average actual rainfall from May 28th to August 26th, 1893, the normal average rainfall for the same period, and the difference between the two. In Lower Burma, Orissa, Coorg, and Mysore the rainfall for the season has been deficient, but in all other parts of the country the rainfall has been about or above the average.

The following gives the largest total amounts received during the week as reported in the rainfall telegrams of the week:

Division.	District.	Station.	Amount.
Tenasserim	Amherst	Thaton	11·76 inches.
Central Burma	Shwegyin	Kyaikto	9·27 „
East Bengal	Mymensingh	Kishorganj	5·59 „
North Bengal	Jalpaiguri	Bhagatpur	10·16 „
North-Western Provinces.	Azamgarh	Sagri	5·95 „
Ditto	Cawnpore	Sudder	5·23 „
Punjab	Jullundur	Nawashahr	2·11 „
Ditto	Kangra	Sudder	2·14 „
Malabar	South Kanara	Karikal	9·83 „
Coorg	Mercara	Sudder	9·98 „
Deccan	Kolhapur	Bavda	11·99 „
Berar	Amraoti	Murtazapur	12·36 „
Central India	Bhopal	Sudder	9·26 „
East Coast	Kistna	Dachepalle	6·55 „

Simla, *31st August, 1893.*

W. L. DALLAS,
Asst. Meteorological Reporter to the Government of India.

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 26th August.*—Rainfall good on the West Coast and Nilgiris and in the Circars and Deccan; moderate in parts of the Karnatic; and only light scattered showers elsewhere. Want of rain is being felt in the Southern districts, but generally sowings are proceeding seasonably and standing crops flourishing. Early sown crops have been harvested with fair to average outturn. Water-supply, pasturage, and fodder generally sufficient, and the condition of cattle is good. General prospects good. Prices very slightly easier in some Southern, Karnatic, and Deccan districts, and generally stationary elsewhere.

Bombay.—*For week ending 30th August.*—River continues low in Sind. Rain more or less throughout the Presidency Proper and in one district of Sind; generally beneficial to standing crops, but more rain is required, especially in the Deccan, Karnatic, and Sind. Standing crops withering for want of rain in parts of three, damaged by excessive rain in parts of one, and by rats or insects in parts of seven districts. Sowing and transplantation of early crops completed, except in parts of six districts. Transplantation retarded for want of water in parts of two districts. Preparations for late crops progressing in two districts. Prices steady, except in parts of two districts. Fodder sufficient, except in one district. Agricultural stock good.

Bengal.—*For week ending 26th August.*—Local showers, usually light, fell, except for two days in the middle of the week, when there was fairly general rain. The present fine weather is very favourable to the crops in East Bengal and North Behar. The floods are subsiding and retransplanting of winter rice is being resorted to where possible. Enquiries are being made in Darbhanga, Muzaffarpur, Champaran, Backergunge, Faridpur, and Chittagong with a view to ascertain the amount of damage done by the floods and to concert measures of relief if necessary. In Tipperah it is reported that the raiyats will sustain a serious loss and that agricultural loans may be required. Prices have risen in the Eastern districts; elsewhere stationary. Cattle are in good condition, except in the flooded tracts, where sufficient fodder is not available.

North-Western Provinces and Oudh.—*For week ending 30th August.*—In several districts heavy rain has fallen, while in others there have been only slight showers. In the latter more rain is urgently needed for the crops. Prospects continue favourable. Harvesting of early crops in progress. Supplies and fodder ample. Prices show a falling tendency.

Punjab.—*For week ending 30th August.*—Rain fell in six districts. Sowings of autumn crops nearly over. Ploughings for spring crops in progress. Condition of standing crops is generally reported average; the crops are withering

for want of rain, which is urgently required throughout the province. Cattle are said to be in good condition. Fodder sufficient in all districts, except Shahpur and parts of Multan, where it is scarce. Prices unsettled in two districts, falling in one, and stationary elsewhere.

Central Provinces.—*For week ending 30th August.*—The heavy rain which has fallen during the past week seems to have been beneficial everywhere, and especially in the rice districts to the south, where rain was badly required. Prospects in the southern districts have greatly improved, and are elsewhere very favourable.

Burma.—*For week ending 26th August.*—In Lower Burma agricultural operations are progressing satisfactorily. The rainfall is ample and standing crops generally are in good condition, but some damage from floods is reported from the Hanthawaddy and Tharrawaddy districts. Rain fell in all districts of Upper Burma. Ploughing and sowing of paddy and other crops are progressing, but in Shwebo cultivation is still delayed owing to want of sufficient rain. Early sesamum is being reaped in several districts. The crop prospect generally is good, but more rain is wanted in Shwebo and Yeu, while some damage has been caused by floods in Bhamo and the Lower Chindwin. The price of paddy has risen in Thayetmyo and has fallen in Henzada and Bhamo.

Assam.—*For week ending 29th August.*—Weather seasonable in the plains districts. Transplanting of late rice continues. Fodder insufficient. Prospects of crops improving as floods subside.

Mysore and Coorg.—*For week ending 30th August.*—MYSORE: Rainfall slight throughout Mysore. Standing crops in good condition, except in two districts, where they are withering. Prospects generally favourable, but more rain is much needed in parts of five districts. Prices risen in Kolar; no change elsewhere.

COORG: Heavy rain beneficial to all crops. Picking of cardamoms commenced in some parts. Fodder and water for cattle sufficient. Prices stationary.

Berar and Hyderabad.—*For week ending 30th August.*—BERAR: Rainfall good. Weather cool. Standing crops in good condition. Land under preparation for ensuing spring crops. Sowings almost completed and weeding operations in progress. Fodder and water sufficient. Cattle healthy. Prices almost stationary.

HYDERABAD: Rainfall good during week. Weeding of hot-weather crops still continues. Sowing of irrigated crops finished and weeding commenced. Standing crops in one taluka damaged by excessive rainfall. Prices steady.

Central India.—*For week ending 30th August.*—Rain fell during the week in all parts of Central India, but more rain is required in Baghelkhand and in parts of Gwalior. Weeding operations in progress in all parts. Condition of standing crops generally good, but Indian-corn in parts of Bhopawar has been partially damaged by excessive rain. Condition of agricultural stock generally

good. Pasturage good and sufficient. Prices of food-grains falling in Bhopal, but steady elsewhere.

Rajputana.—*For week ending 30th August.*—Rainfall slight in parts, but good in four States. Agricultural operations, standing crops, and condition of cattle generally satisfactory. Harvest much damaged in Pertabgarh by heavy rain in July last. Pasturage or fodder sufficient. Prices falling in three States, rising in one, fluctuating in one, and steady elsewhere.

Kashmir.—*For week ending 29th August.*—Autumn crops in good condition. Slight rainfall in Muzaffarabad. Ploughings for the spring crops going on. Prices stationary.

Nepal.—*For week ending 26th August.*—Heavy thunderstorms. Prospects continue very good. Prices falling.

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

No. $\frac{35}{33}$

RESOLUTION.

The measures necessitated by the failure of harvests in 1891-92 brought to the notice of the Government of India certain defects in the sanctioned Famine Codes. Towards the close of the period of scarcity some of the questions which were considered to need discussion were referred to Local Governments in the Resolution quoted in the preamble, and their reports have now been received. The following orders are based on the information contained in the reports and on the experience gained in various Provinces during the progress of famine operations.

The subjects dealt with in Famine Codes fall under two heads: (i) the duties of officials *in ordinary times*, such as the supply of information regarding the condition of their charges, and the maintenance of programmes of famine relief works; and (ii) measures required *during famine*, such as the submission of special reports, the management of relief-works, the grant of gratuitous relief, the classification of labour, and the scale of wages.

2. As regards the duties to be performed during ordinary seasons, satisfactory arrangements have now been made in all Provinces for the supply of punctual information and the maintenance of efficient programmes of relief. But the scheme of district analysis explained in this Department's Resolution No. 6—340-50-G., dated 8th December 1881, which involves a careful study of tracts subject to scarcity, has not yet been fully worked out, and the attention of Local Governments has been separately drawn to this subject.

3. The system hitherto prescribed of relief during actual famine is in general conformity with that recommended by the Famine Commissioners in 1879-80, and will not be subjected to any alteration which will materially affect the policy advocated by them. But the Famine Codes in which effect is given to the system are found on examination to require important modifications in detail owing to economic and administrative changes which have taken place during the last eleven years.

The conspicuous improvement in communications throughout India is the most important of the modifying factors. There can be no doubt that in spite of the widespread character of the recent distress, which extended through

Bengal, Burma, Madras, Bombay, Rajputana, Hyderabad, and Mysore, its acuteness nowhere approached that of the great famines of previous years; and although this was partly due to the greater severity of droughts in earlier famines, there is evidence to show that it was also attributable in large measure to the low range of prices, which was the direct result of the extension in recent years of communication by rail and road.

Another important change has been the development of the Local Board system. This has led to the general employment in some form or other of professional agency in the supervision of nearly all works which may be accepted as useful for purposes of famine relief. The distinction between professional and civil agency works is now, therefore, no longer necessary, and is indeed confusing.

The experience of officers administering relief has at the same time brought to notice various circumstances calling for modification in the Codes. It has been found, for instance, that the terms "piece-work" and "task-work" are used with little precision; that the absence of a definite limit to the calculation of the wage which can be earned by the best class of labourers has led to abuses; that differences of opinion as to the wage have distracted the attention of officers engaged on relief operations; that the day-of-rest recommended by the Famine Commissioners is not ordinarily required; and that, except in severe famine, dependants and children may best be relieved by payment to the persons who are responsible for their protection.

4. In view of the above considerations, revised orders are necessary for the amendment of all Famine Codes, and the following instructions, which indicate the main points on which uniformity of practice appears to be essential, are accordingly issued for guidance. The Codes when revised in conformity therewith should be submitted to the Government of India for approval.

5. *The classification of works.*—Works will be primarily distinguished as 'ordinary' and 'relief.'

Ordinary works are those on which labourers are employed in the ordinary manner at the rates prevailing in the labour market, and which are not brought under Famine Code rules. Although it may be desirable, as suggested by the Famine Commissioners as well as in paragraph 21 of the Resolution No. 44 of 9th June 1883, to expand as a temporary measure the ordinary works in tracts where distress is commencing, the additional works thus undertaken must not be confounded with relief-works. When it has been decided that relief-works should be opened, the whole or part of an ordinary work may, as pointed out in the Resolution of 17th March 1892, be converted into a relief-work and brought under the provisions of the Code. But it must be borne in mind that the provisions of this Resolution do not apply to ordinary works.

See Annexure A.

Relief-works are those on which wages are given at special rates, and which are brought under Famine Code rules. The main distinction between an ordinary work and a relief-work is that on the former unlimited piece-work is permitted at ordinary rates, whereas on the latter only limited tasks at reduced rates are allowed.

Relief-works will be divided into two classes—'small' and 'large.' The terms 'professional agency' and 'civil agency' will be definitely abandoned.

The first step towards the above division has been made in the Bengal Code, in which civil agency works are described as those which employ small numbers of unskilled labourers and do not require professional supervision, and professional agency works as those which employ large bodies of labourers, of whom some will generally be skilled, and which require professional supervision. In view of the fact, however, that discretion must be left to Local Governments to decide as to the character of the supervision, and that small works may be placed under a professional engineer, any such reference to the character of the supervision as that which finds place in the Bengal rules seems inconvenient.

For executive purposes there seems indeed little need now for any classification of works. But for purposes of reports the distinction between large and small works must still be retained in order that conclusions may be formed both

as to the character of the relief proposed or accorded in different Provinces, and as to the extent to which Local Governments have followed the principle laid down in paragraph 21 of the Resolution of the 9th June 1883, *viz.*, that while in the later stage of a famine 'large works' will be the backbone of the system of relief, 'small works' should be utilized to the utmost in the early days of a scarcity.

As a guide to the classification of works under the heads of 'large' and 'small,' the following definitions may be observed :

I.—Large works are works calculated to provide simultaneous employment for three months to at least 1,000 persons.

II.—All other works are small works.

The supervision exercised in either large or small works should, as far as possible, be professional.

6. *The classification of persons employed on relief-works.*—The classification must be uniform in all the Provincial Codes ; in other words, 'classes' must be described in the same terms. Of the various classifications which have been proposed, that laid down in the Government of India's Resolution No. 6—44 of the 17th March 1892 appears to be the best, and the objection raised that it implies a knowledge of the past history of each person employed is one which applies at least as strongly to all other suggested classifications.

See Annexure B.

Persons on relief works will accordingly be classed as—

(*A*) Able-bodied persons accustomed to labour of the kind required on ordinary works.

(*B*) Able-bodied persons accustomed to labour, but not to labour of the kind required on ordinary works.

(*C*) Able-bodied persons not accustomed to labour.

(*D*) Persons not able-bodied, but fit for light employment on relief-works.

Or more briefly as—

(*A*) Professional labourers.

(*B*) Labourers, but not professional.

(*C*) Able-bodied, but not labourers.

(*D*) Weakly.

Only A labourers are, as a rule, employed on ordinary works, and they receive wages according to the state of the labour market. On relief-works labourers of all four classes may be employed, and will receive the wages fixed for each class. The general term used in this Resolution, and to be adopted hereafter in all Famine Codes, for persons employed on relief-works will be 'relief-workers.'

7. *Piece-work and task-work.*—Some confusion has occurred in dealing with this subject in consequence of the absence in previous Codes of any precise definition of these terms. The term piece-work, as ordinarily used, implies not only that the work performed is paid for by results, but also that it is not subject to any other limit than the actual capacity of able-bodied labourers to perform it. Piece-work in famine operations must, on the other hand, be limited by the estimated (not the actual) capacity of those employed, whether able-bodied or not. Piece-work thus restricted by an estimate of a maximum limit becomes virtually a task. It will be paid for by results, but the results are never allowed to exceed a certain quantity.

The maximum amount of work allotted to a particular class of relief-workers will be described in future as the *task* allotted for the class in question, and the term 'piece-work' will be abandoned. For, although payment will be dependent on results in the sense that short work will entail short payment, the Government of India are of opinion that it will be convenient to avoid the use of the term 'piece-work' in connection with any form of labour imposed for purposes of famine relief.

The principles on which the maximum task should be fixed are explained in the Resolution of the 17th March 1892. In accordance with these, the task for class A labourers will be equal to the amount of work usually performed by able-bodied labourers

See Annexure C.

on ordinary works, and it will rest with the local authorities to determine what this is. The task for class B will be from 10 to 15 per cent., and that for class C about 25 per cent. below the A task. The task for class D will be determined by the local authorities according to circumstances, but should be such as to give weakly relief-workers a reasonable amount of healthy employment.

In Appendix I to this Resolution will be found an extract showing the formulæ adopted in Bengal for calculating the amount of task in earthwork, and it is suggested that similar formulæ may in other provinces be usefully worked out for the guidance of officers in charge of relief-works.

A relief-worker may, at the discretion of the officer in charge of the work, be transferred from one class to another.

8. *Employment of gangs.*—Experience during the recent famine has shown that the system advocated in section 44 of the Provisional Famine Code of 1883 of forming relief-workers into gangs has proved successful. Relief-workers, therefore, after being duly classified, should as a rule be formed into gangs. A task may then be prescribed for each gang, and on the performance of it in whole or in part each member of the gang shall be entitled to the wage prescribed for his class in whole or in part in proportion to the amount of the task performed by the whole gang.

9. *The minimum ration.*—The sufficiency of the subsistence ration prescribed in section 128 of the Provisional Code has been recently questioned. The ration was determined in 1883 after consultation with medical experts and after careful comparison with standards adopted in jails and elsewhere ; wages based strictly upon it were during the recent scarcity found sufficient. When in some Provinces in which wages had exceeded the value of the Provisional Code rations steps were taken either spontaneously or at the instance of the Government of India to reduce them to the prescribed standard, the change was not followed by any deterioration in the health and strength of the relief-workers. There seems, therefore, to be no reason for abandoning the ration fixed in section 128 of the Provisional Code.

The local authorities may be left to determine whether the fourth item of the ration should be ghi or oil, but should ordinarily select the cheaper ; they will also determine the proportion of condiments to vegetables in the last item.

10. *The minimum wage.*—In exceptional cases, as when the items constituting the ration cannot be bought in the local market and the only grain procurable is that imported by Government, it will be advisable to issue the whole or a part of the ration in kind. But ordinarily payment to relief-workers should be made in cash.

In section 130 of the Provisional Code the minimum wage is defined as the amount of money which at current rates will be sufficient to purchase a minimum ration ; that is to say, the amount of money which will purchase a minimum ration at the market rates current at the time for the various items of which it is composed.

The minimum wage may also be defined as the amount of money sufficient at current rates to purchase the grain-equivalent of the minimum ration. By the term 'grain-equivalent' is meant the amount of grain of which the value is in ordinary times equivalent to the total value of the various items of the ration. In other words, the various items of the minimum ration are, as a matter of convenience, reduced to a single basis, and expressed in terms of a staple grain, the value of which represents the minimum wage.

11. *The grain-equivalent of the minimum wage.*—It is open to Local Governments either to prescribe the calculation of wages in the manner indicated by section 130 of the Provisional Code or to adopt the alternative method described in the last part of the preceding paragraph, subject to the following instructions.

The grain selected as a basis for calculation should in every case be the staple or staples in ordinary consumption in the affected tracts, and not the more expensive classes of grain which, though occasionally consumed in times

of plenty, are abandoned for cheaper grains as soon as pressure sets in. After a careful review of the statistics indicating the relations existing at various times in each Province between the price of the staple grain and the prices of other items of the ration, the Governor General in Council is satisfied that the cost of the other items in the minimum adult male ration will seldom, if ever, be found to be more than three-fourths of the cost of the grain item. The value of the minimum ration for an adult male will therefore be found to be fully represented by $1\frac{3}{4}$ lbs. of the grain or grains ordinarily consumed; and this estimate allows for a moderate 'margin' above a subsistence ration. The grain-equivalent of the ration thus estimated should not be exceeded in the rules of any Code without further reference to the Supreme Government. The data upon which the grain-equivalent of the ration has been calculated are set forth in Appendix II attached to this Resolution.

The above conclusion is founded on the assumption that the price of grain fluctuates with sufficient regularity in proportion to the price of the other items of the ration. Statistics prove that the prices of some of the minor items of the ration do not as a rule rise so quickly as the price of the staple grains; but this circumstance would only involve a slight increase in the 'margin' of the wage when scarcity intensifies, and perhaps a corresponding decrease when scarcity declines. His Excellency the Governor General in Council does not regard this result as a serious disadvantage. In cases where the assumption would lead to a material diminution in the margin or to an extravagant expansion of it, recourse may be had to the method of calculation indicated in section 130 of the Provisional Code.

12. *Wages in terms of the grain-equivalent expressed in pounds.*—Taking the standard rate laid down in the preceding paragraph as a basis of calculation, the wages prescribed for the various classes of relief-workers are as follows:—

ADULT MALES:

Maximum ...	Class A.—The money value of	$2\frac{5}{8}$	lbs. of grain.	
	„ B. „	$2\frac{3}{8}$	„	„
	„ C. „	2	„	„
	„ D. „	$1\frac{3}{4}$	„	„
Minimum ...	All classes „	$1\frac{3}{4}$	„	„

ADULT FEMALES:

Maximum ...	Class A.—The money value of	$2\frac{3}{8}$	lbs. of grain.	
	„ B. „	$2\frac{1}{4}$	„	„
	„ C. „	$1\frac{7}{8}$	„	„
	„ D. „	$1\frac{7}{16}$	„	„
Minimum ...	All classes „	$1\frac{7}{16}$	„	„

CHILDREN:

Wages or allowances for children will be determined on a consideration of their ages, their powers of work, and their requirements. The wages or allowances should not be less than one-quarter or more than three-quarters of the wages allowed for adult males.

13. *Corresponding wages expressed in chitaks.*—The conversion of the ration into wage at each serious change in the price of grain will be facilitated by appending to the Codes appropriate tables or 'ready-reckoners,' in which the money value of the ration at different rates will be shown in even pies or paisas.

In transmuting into native weights the English standards given in the last two paragraphs, a pound may be reckoned as the half of a Government sír, *i.e.* as 8 chitaks. In view of the fact that the Government sír is the 40th part of a maund, which is equivalent to something over 82 English pounds, this method of

conversion will add about $2\frac{1}{2}$ per cent. to the value of the wage reckoned in lbs. The wages as expressed in terms of chitaks will accordingly be—

ADULT MALES:

Maximum ...	Class A.—The money value of	21	chitaks of grain.	
	„ B. „	19	„	„
	„ C. „	16	„	„
	„ D. „	14	„	„
Minimum ...	All classes „	14	„	„

ADULT FEMALES:

Maximum ...	Class A.—The money value of	19	chitaks of grain.	
	„ B. „	17	„	„
	„ C. „	15	„	„
	„ D. „	13	„	„
Minimum ...	All classes „	13	„	„

14. *The day of rest.*—The Famine Commissioners at page 43 of Part I of their Report recommended the grant of wages without work for one day in the week. In making this recommendation the Commission had in view the low condition to which the people had been reduced by the exceptionally severe famine of 1876-77. During the recent scarcity, however, it was only in one Province found advisable to remit work for one day in the week.

It will now be left to Local Governments to decide with regard to the condition of the people whether, in order to enable them to remain in health and strength, it is necessary to close work for one day in the week. If work is stopped by order, all persons employed shall be allowed for that day the minimum wage. Otherwise work shall be performed and paid for on Sundays as on other days, or, if not performed, shall not be paid for.

15. *The relief of children and dependants.*—The system favoured by the Famine Commission and adopted hitherto in the various Codes has been one of separate relief by distribution of grain or of cooked food in kitchens. During the last scarcity, however, it was represented from more than one Province that relief can be most conveniently afforded by means of allowances to the working members of the family; and that although it is possible that in a very severe famine the able-bodied adults cannot be trusted with special allowances for dependants and children, yet that this is not the case under ordinary circumstances.

While for many reasons the Government of India prefer that the former system should be continued wherever practicable, Local Governments are left free to adopt the latter whenever they are satisfied that it will combine efficiency of relief with the minimum of expenditure. If this course be followed, the officer in charge of the work must before granting any allowances to relief-workers in respect of adult dependants ascertain beyond reasonable doubt that such dependants are both unable to work and really depend on the worker to whom the allowance is granted. All allowances given either to or on account of non-working children must be shown in the accounts as "gratuitous relief." The number of dependants and non-working children for whom allowances are granted must also be shown in the monthly reports, and special explanation should be required from officers in charge of works whenever the number of such dependants exceeds 10 per cent. of the number of persons employed; it should then be considered whether it would not be advisable to substitute a system of separate relief for dependants.

16. In re-casting the Codes, a uniform system of division into Chapters must be followed, and in Appendix III of this Resolution will be found the headings of Chapters which the Government of India wish to be adopted. The revised Codes must embody the instructions contained in the present Resolution and also, so far as they are not superseded by present orders, the instructions communicated in the

No. 63—77, dated 19th December 1889.
No. 25— 1, dated 10th September 1891.
No. 5—48, dated 2nd March 1892.
No. 6—44, dated 17th March 1892.
No. 7—48, dated 18th March 1892.
No. 8—52, dated 21st March 1892.

circulars marginally noted. They should, moreover, after being approved by the Government of India, be carefully indexed.

17. The revised Codes will in no case provide for the notification in the Provincial Gazettes of the commencement or cessation of famine.

18. Codes revised in accordance with the orders conveyed in this Resolution should be submitted for the approval of the Government of India not later than the 1st of April 1894.

ORDER.—Ordered, that a copy of the above Resolution be forwarded to the Local Governments and Administrations noted in the margin for information and guidance, and that it be published for general information in the Supplement to the *Gazette of India*.

Government of Madras.
" Bombay.
" Bengal.
" the North-Western Provinces and Oudh.
Government of the Punjab.
Chief Commissioner of the Central Provinces.
Chief Commissioner of Burma.
" " Assam.
" " Coorg.
" " Ajmere.
Resident at Hyderabad.

Ordered also, that a copy be forwarded to the Foreign Department for information and communication to Political Officers in Native States, and to the Finance and Public Works Departments for information.

[True Extract.]

E. C. BUCK,
Secretary to the Government of India.

APPENDIX I.

Extract from a Resolution by the Government of Bengal, No. 737-T. R., dated Darjeeling, the 5th October 1892.

* * * * * * * * * * * * *

10. The following formula has worked out well as regards all road work, and also in tank work where the lead is short. It is, however, a little too liberal where the lead is long, and in such cases has had to be reduced. For all other works it is fair.

$R = W\left(A + \frac{L + 50}{12{\cdot}5}\right)$ in which—

R=the rate per 1,000 cubic feet, lift not exceeding 5 feet.

W=the daily wage, as calculated under Chapter XIV of the Famine Code (see Appendix I).

A=a co-efficient varying from 6·66 for soft to 10 for hard soil, which can be dug with a *kodali*.

L=the lead in feet taken in multiples of 50 feet, as 100, 150, 200, &c.

As an example, let it be assumed that in a certain case the daily wage is 5 pice; that the soil is soft, in which case A=6·66; and that the lead is 100 feet; then—

$R = 5\ (6{\cdot}66 + \frac{100 + 50}{12{\cdot}5}) = 93{\cdot}3$ pice = Rs. 1-7-4 per 1,000 cubic feet. Here it would suffice to fix the rate at Rs. 1-8 per 1,000 cubic feet.

The formula is based on the assumption that—

(1) a man can cut 100 cubic feet of hard soil a day; 150 of soft soil;

(2) a man can carry 125 cubic feet of soil for 50 feet in a day with a five-foot lift;

(3) he can carry the same quantity for an additional 100 feet in another day.

Allowing for a woman doing a little less carrying than a man, the following rule may be laid down:—

A man and a woman working together can cut and carry 100 cubic feet for a 50-foot lead, and a man and two women can do the same for a 150-foot lead. Therefore, the piece-work rate for 100 cubic feet should be the maximum ration wages for a man and woman for a 50-foot lead, and similar wages for a man and two women for a lead exceeding 50 feet, or a lift exceeding 5 feet.

11. In the case of task-work, which is only permitted for persons of a slightly inferior physique, it will be necessary to allow a further margin: for instance, it might be said that 100 cubic feet is the daily task for one man and two women (or a man, a woman, and a child), and a similar addition should be made for any increase in the lead. Each labourer should be made to perform a certain amount of task-work each day before the wage is paid.

APPENDIX II.

1. The following table indicates the data upon which the grain-equivalents prescribed in paragraph 12 have been calculated. The price of grain assumed in this table is that of 12 sírs to the rupee:—

Item.	Rate per rupee assumed.		Minimum ration for adult male.			Maximum ration for adult male.		
	In sírs.	In lbs. at 2 lbs. = 1 sir.	Weight in ounces allowed by Provisional Code.	Price of each item in annas.	Price in annas of (1) grain, and (2) other items.	Weight in ounces allowed by Provisional Code.	Price of each item in annas.	Price in annas of (1) grain, and (2) other items.
GRAIN ...	12	24	16	$\frac{2}{3}$	$\frac{2}{3}$ or ·666	24	1	1
OTHER ITEMS. Pulse ...	12	24	2	$\frac{1}{12}$	$\frac{59}{240}$ or ·246	4	$\frac{1}{6}$	$\frac{17}{30}$ or ·566
OTHER ITEMS. Salt ...	10	20	$\frac{1}{3}$	$\frac{1}{60}$		$\frac{1}{2}$	$\frac{1}{40}$	
OTHER ITEMS. Ghi ...	2	4	$\frac{1}{3}$	$\frac{1}{12}$		1	$\frac{1}{4}$	
OTHER ITEMS. Condiments and vegetables.	4	8	$\frac{1}{2}$	$\frac{1}{16}$		1	$\frac{1}{8}$	

2. The above table shows that the proportion between the total price of the other items of the *minimum ration* for adult males and the price of the grain item is when grain is at 12 sírs represented by the ratio of ·246 to ·666 or 369 to 1,000. The proportion assumed in the Resolution is $\frac{3}{4}$ to 1 or 750 to 1,000, so that ample margin is left for fuel, &c., and for fluctuation in prices. Instead of a grain-equivalent of something **slightly over 1⅛lbs., the Resolution prescribes one of 1½lbs.**

3. Similarly, the proportion between the total price of the other items of the *maximum ration* for adult males and the price of the grain item is when grain is at 12 sírs represented by the ratio of ·566 to 1 or 566 to 1,000, whereas the Resolution assumes a proportion of 750 to 1,000. The table indicates a grain-equivalent of 2⅝lbs. in place of which the Resolution has prescribed a grain-equivalent of 2⅞ lbs.

4. In the rations both maximum and minimum for adult females the "other items" are the same as in those for adult men, the grain item alone differing.

The grain item of the *minimum ration* for adult females is 14 oz., which, at 12 sírs to the rupee, would cost $\frac{7}{12}$ths or ·583 of an anna. The relation between the price of the other items and that of the grain item may, therefore, be represented by the ratio of ·246 to ·583 or 422 to 1,000. This would give a grain-equivalent of 1¼lbs. against $1\frac{7}{16}$lbs. allowed by the Resolution.

The *maximum ration* for adult females is 20 oz., which at 12 sírs would cost $\frac{5}{6}$ or ·833 annas. The relation between the price of the other items and that of the grain item may, therefore, be represented by the ratio of ·566 to ·833 or 679 to 1,000. This would give a grain-equivalent of something under 2 lbs. against one of 2⅞ lbs. allowed by the Resolution.

APPENDIX III.

Headings of Chapters in Provincial Famine Codes.

PREVIOUS TO FAMINE.

(I) Duties of Revenue and Village officers (*a*) in ordinary times (*e.g.*, collection of information and preparation for famine; reports of prices and crops; programme of famine relief works, including railways; duties of Director, Commissioner, district officers, engineers, &c.)

(II) (*b*) when serious scarcity is imminent (*e.g.*, urgent reports by village and district officers; duties of officers as above).

DURING FAMINE.

(III) Duties of superior Revenue and Engineer officers (*e.g.*, Quarterly programme reports; Commissioner; Chief Engineer; budgets; tools; Director).

(IV) Circle organization and duties of circle officers (*e.g.*, division of districts; inspectors; village agency; grain contractors; reports; starving wanderers; emigrants).

(V) Gratuitous relief.

(VI) Famine relief works.

(VII) Wages and rations.

(VIII) Poor-house.

(IX) Kitchens for children.

(X) Other measures of relief.

(XI) Measures for the protection of cattle.

(XII) Utilization of forests.

(XIII) Duties of police.

(XIV) Duties of medical officers.

(XV) Accounts.

Appendices.

No rules are laid down for the headings of appendices, but the appendices attached to Codes will appropriately include—

(*a*) A list of reports and returns due to the Government of India both before and during famine;

(*b*) A ready reckoner, if prescribed, for calculating the money value of rations at varying prices;

(*c*) Formulæ, if prescribed, for calculating tasks.

The following will be substituted for columns 4 to 6 of Form C and for columns 3 to 5 of Form D prescribed by Circular No. 8—52 of 21st March 1892:

NUMBER OF PERSONS PROVIDED FOR BY RELIEF WORKS DAILY FOR THREE MONTHS.

	Small works.	
Large works.	For relief of agricultural population in neighbourhood of villages.	Others.
4	5	6

Extracts from Government of India Resolution No. 6—44, dated 17th March 1892.

ANNEXURE A.

8. In order, on the one hand, to secure the object which the framers of the Code had in view of preventing any undue restriction on the progress of a public work which is required as such independently of its use as a relief-work, and, on the other, to prevent any transgression of the principles of the Code, which requires that no remuneration should be given to a labourer on a relief-work materially in excess of the amount sufficient to maintain health and strength, it is desirable that, where this has not already been done, a rule to the following effect should be incorporated in the Provincial Code:

When a public work for which provision had already been made in the ordinary Public Works Budget of the year is included in the sanctioned list of Professional Agency works, the Local Government shall decide, in the event of its being utilised as a relief-work, whether any portion of it is of such a character, or requires to be executed with such urgency, as to demand the employment of ordinary public works labour at full piece-work rates. Such portion shall be separated from the portion utilised as a relief-work, and shall not be opened to labourers admitted on the work simply for purposes of relief. On the portion retained as a relief-work, the wages of able-bodied labourers, however skilled, shall not exceed the amount in money which is equivalent to a little more than the full famine wage.

ANNEXURE B.

5. Relief-works were in this Code required to be distinguished as—

(i) Civil Agency works; and

(ii) Professional Agency works;

the former whether professionally managed or not being under the control of the district authority, and the latter under the control of the Public Works Department. Labourers were, reading sections 39 and 71 together, divided into four classes—

A.—Able-bodied persons accustomed to labour of the kind required at works coming under class II.

B.—Able-bodied persons accustomed to labour, but not to labour of the kind required on works under class II.

C.—Able-bodied persons not accustomed to labour.

D.—Persons not able-bodied, but fit for light employment of the kind required at works of class I.

Labourers of class A were (sections 71 and 72 of the Code) eligible for employment on Professional Agency works and for treatment as ordinary able-bodied labourers in public works. All others were to be dealt with under the rules for Civil Agency works.

ANNEXURE C.

6. Chapter X of the Provisional Code, which dealt with wages and rations on relief-works, prescribed a "full ration" sufficient to keep able-bodied labourers in health and strength, leaving it to Local Governments to suggest such modifications as might be required by the circumstances of each province. The "full wage" was defined as the amount of money which at the current prices is sufficient to purchase a "full ration." Section 132 laid down that payment for labour on Professional Agency works might be made at the rate ordinarily given under the rules in force in the Public Works Department, provided that the sum which a labourer can ordinarily be expected to earn by a fair day's labour shall in no case be less than the "full wage." This rule applied to labourers of Class A only, since all other labourers were brought by section 72 of the Code under the rules for Civil Agency Works. It will be observed, however, that the wording of the rule prescribed the "full wage" as a minimum only, and placed no restriction on the amount which might be earned by a class A labourer at departmental rates for piece-work. An opening was thus left for a departure from the intention of the Famine Commissioners that even skilful and able-bodied labourers should only receive "a little more than the ordinary wage," which would, in the terms of the Provisional Famine Codes, mean "a little more than the full wage." The object of the framers of the Code was, however, not to controvert the principles laid down by the Famine Commissioners and accepted by the Government of India, but to prevent undue restriction being placed on the progress of Public Works, of which, for special reasons, the early completion might be desirable. This has not been generally understood. Consequently, the result of the absence of any positive restriction on the wages of class A labourers has sometimes been that on earth-work, which is, wherever it can be provided, the most usual as it is the most appropriate relief-work, ordinary agricultural labourers have been considered to be sufficiently accustomed to the kind of labour required at the work to entitle them to be brought under class A, and to be given any amount of piece-work that the Public Works officer in charge of the work might deem to be desirable to secure the rapid and effective progress of the work itself. The principles laid down by the Famine Commissioners have thus been transgressed.

7. It has, on the other hand, occurred that the intention of the Famine Commissioners that all skilful and able-bodied labourers should, for the reasons given in the passage quoted in paragraph 2 of this Resolution, receive a small margin above the full famine wage has not been sufficiently appreciated; nor was this intention explained with sufficient distinctness in the Provisional Famine Code. The opportunity is now taken to give clear expression to the opinion of the Government of India that this consideration should be applied to all labourers of class A, and, subject to the remarks regarding the classification of ordinary cultivators which are made below in paragraph 10 of this Resolution, also to labourers of class B; money-wages and tasks being so adjusted from time to time as to admit of the labourers receiving "a little more than" the equivalent of the "full ration" of the Code.

GOVERNMENT OF INDIA.

(*a*) Includes the Bezváda-Godaveri section of the East Coast (state) railway.
(*b*) Includes the Godhra-Rutlam railway.
(*c*) Includes the Guntakal-Mysore frontier section from 1st April 1893.
(*d*) Includes the Tirhoot state railway. Although for convenience classed amongst the state railways, the company's section of this line is the property of the Bengal and North Western railway company.
(*e*) Includes the Jammu and Kashmir and the Hyderabad-Umarkot railways.
(*f*) Although for convenience classed amongst the state railways, this line is the property of the Bengal Central railway company.
(*g*) Total receipts from 15th July to 19th August 1893.
(*h*) Includes the Wardha Coal, Dhond-Manmád, Khámgaon, and Amráoti railways.
(*i*) Includes the Bangalore-Nanjangúd and the Bangalore-Mysore frontier sections.
(*j*) Total receipts from 12th April to 19th August 1893.

F. B. HEBBERT,
Under-Secretary.

HOME DEPARTMENT.

RULES FOR THE GUIDANCE OF INDIAN GOVERNMENT SCHOLARS IN ENGLAND.

PUBLIC.
No. 78.

INDIA OFFICE;
London, 27th July, 1893.

To His Excellency the Most Honourable the Governor General of India in Council.

MY LORD MARQUIS,—With reference to my predecessor's Despatch No. 122, dated the 7th of November 1889, I forward, for the information of Your Excellency in Council, 25 copies of amended rules for the guidance of Indian Government Scholars in this country.

I have, &c.,

KIMBERLEY.

RULES FOR INDIAN GOVERNMENT SCHOLARS IN ENGLAND.

(As amended by Secretary of State in Council, 11th July 1893.)

1. Every scholar shall, on reaching England, at once present himself at the India Office, and report his arrival in writing.

2. Every scholar shall, without any unnecessary delay, inform the Secretary of State to which University he intends to proceed, and shall at once take steps to enter himself at the College he has selected.

3. Every scholar shall, within four weeks of reaching England, submit for the approval of the Secretary of State a statement showing the general course of study he proposes to follow; and the course approved shall not be changed without the sanction of the Secretary of State.

4. Every scholar shall, at the end of each term of residence at a University, submit to the Secretary of State a certificate from the proper College or University authority showing that his residence, conduct, and progress in study have been satisfactory during the term.

5. Every scholar shall at all times obey such instructions as he may receive from the Secretary of State.

6. Subject to a due compliance with the above conditions, the allowance, at the rate of £200 a year for three years, will be paid quarterly in advance by the India Office, commencing from the date of the scholar's reporting his arrival in England; but this allowance shall be reduced by the amount of any other sum which may become payable to him out of the revenues of India in respect of residence at a University during the same period or any part of it.

7. Every scholar will forfeit his scholarship who, not being disabled by illness or prevented by any other cause which the Secretary of State may consider sufficient, fails to complete a residence of three years in England according to the terms and conditions approved by the Secretary of State under Rule 3, or who is guilty of misconduct or disregard of the orders of the Secretary of State. If a scholarship be forfeited, the scholar will lose his claim to a free return passage to India, and will further become liable to refund the cost of his free passage to England.

8. The scholars will be under the special supervision and charge of the Political Aide-de-Camp to the Secretary of State, through whom the necessary orders will be given, and to whom all reports and other communications respecting them should be sent.

C. J. LYALL,

Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the week ending at 8 a.m. on Saturday, September 2nd, 1893.

Monsoon weather has prevailed steadily over the Indian region during the week under review. At first these conditions were of slight intensity, and the rainfall, though fairly general, did not extend much into North-Western India, and was only moderate or light over the greater part of the country. On the 1st and 2nd of September, however, a well defined cyclonic storm appeared over the Bay, barometric gradients increased, and rain extended quickly over the Punjab as far west as Rawalpindi and Murree. During the greater part of the week the mean temperature ranged above the normal average, but on Saturday, the 2nd, a considerable fall occurred over part of Northern and Central India as well as over Madras, and the mean temperature fell below the normal.

The chart of the 27th showed the normal monsoon distribution of pressure. Readings were highest over Malabar and Ceylon, lowest over the Indus Valley, and relatively low over the South Gangetic plain, the Central Provinces, and North Madras. The winds were westerly over the Peninsula, variable within the relatively low pressure area, and easterly over Northern India. The weather was fair to showery over Northern India and Madras, but elsewhere rain was general. The following were the principal amounts: Khammamett, 3·53 inches; Saugor, 3·21 inches; Nagpur, 2·86 inches; Akyab, 2·12 inches; and numerous stations with over 1 inch. On the morning of the 28th the barometer was rising over the Punjab and Madras and falling elsewhere, but the general distribution of pressure and the general circulation of the winds were unchanged. Rain had extended into the north of the Punjab, but in other parts of North-Western India as well as in Madras hardly any rain had been received. Elsewhere the fall was general, and in several places moderately heavy. Surat reported 4·50 inches, Silchar 3·24 inches, Chakrata 2·90 inches, Bhamo and Saugor 2·44 inches, Dehra Dun 2·28 inches, Ajmere 2·16 inches, and several stations over 1 inch. On the 29th the barometer was falling, except at some stations in the central parts of the country and in North Bombay. The area of relatively low pressure over the central parts of the country had contracted and moved somewhat northward, but otherwise there was no important change in the distribution. The winds were westerly over the greater part of the country, but irregularly easterly up the Gangetic plain. Rain was fairly general, except in the Punjab, Western Rajputana, Sind, and Madras, where hardly any had fallen. Diamond Island, Tavoy, Ratnagiri, and Sambhar received over 2 inches, and several stations over 1 inch. On the 30th pressure continued to fall, except at some stations in the Central Provinces and North Bombay, where the barometer still rose. The general distribution of pressure and the winds were little changed. Showery weather prevailed over the greater part of the country, except North-Western India and the South Carnatic, where the weather was fair. The rainfall amounts were generally small, the heaviest being 2·49 inches at Moulmein, 2·46 inches at Tavoy, 1·98 inches at

Jhansi, and 1·68 inches at Mount Abu. The chart of the 31st showed that pressure was rising along the foot of the Himalayas from Assam to the North-West Provinces, but was falling elsewhere. The general distribution was fairly normal, but the barometric differences were increasing, and the winds which blew from the normal monsoon directions were rising. The area which received rain was about the same as on the preceding day, but the amounts were larger. Tavoy had received 6·91 inches, Moulmein 5·00 inches, Diamond Island 3·34 inches, Raipur 3·30 inches, Seoni 2·95 inches, Karwar 2·65 inches, and several stations over 1 inch. On the 1st a well defined depression had appeared over the head of the Bay and the barometer had fallen, except in the south of the Peninsula. Gradients had increased considerably over the Peninsula and the Bay, and a strongish monsoon was blowing, except in the neighbourhood of the depression, where the winds were cyclonic. Rain had extended to the north of the Punjab and to Madras, and showers were reported from most parts of the country, except Bengal and part of North-Western India. Moulmein had received 7 inches, Bassein, Mormugao, Karwar, and Indore over 2 inches, and several stations over 1 inch. On the 2nd the barometer was rising over the extreme south of the Peninsula and in Burma, but was still falling elsewhere. The depression over the head of the Bay had not moved much, but it had become deeper, and steep gradients prevailed over the greater part of the country. The winds blew from the normal monsoon directions, except at the head of the Bay, where they were cyclonic. Rain had fallen very generally, except in part of North-Western India and of Madras, and the amounts in Orissa and the Central Provinces were heavy. Jubbulpore received over 5 inches; Akyab, False Point, and Murree over 3 inches; and Balasore, Sutna, Chanda, Pachmarhi, and Hoshangabad 2 inches or over.

Temperature.—The following table shows the variations of the mean temperature from the normal on each day of the week for the different Provinces of India:

Province.	August 1893.					September 1893.		Mean variation of week.
	27th.	28th.	29th.	30th.	31st.	1st.	2nd.	
	°	°	°	°	°	°	°	°
Burma	+0·4	+0·2	—0·4	+1·0	+0·5	—0·9	—1·8	—0·1
Bengal and Assam	+1·5	+0·8	+0·8	+1·4	+1·9	+2·1	+1·9	+1·5
North-Western Provinces and Oudh.	+1·8	+0·9	+1·1	+1·7	+2·3	+1·3	—1·3	+1·1
Punjab	+2·7	+0·2	—1·2	+2·5	+4·4	+4·0	+1·8	+2·1
Bombay	+0·4	—1·9	—2·3	—0·4	+0·7	—0·4	—0·5	—0·6
Central Provinces and Berar	—0·1	—1·9	—2·2	—0·8	—0·3	—1·0	—2·0	—1·2
Central India and Guzerat	+1·0	+0·4	+1·2	+0·1	+1·2	+0·7	—0·8	+0·5
Sind and Rajputana	+3·2	+2·6	+0·5	+1·4	+2·2	+1·6	+0·7	+1·7
Madras	—0·4	—1·4	+0·1	+0·6	+0·2	+0·1	—2·0	—0·4
Mean for whole of India	+1·2	0	—0·3	+0·8	+1·4	+0·8	—0·3	+0·5

The variations were irregular. On the 27th, the 30th, the 31st of August, and the 1st of September the mean temperature of the whole of India was above the normal average, while on the other days it was below. The provincial variations show that in Burma, Bombay, the Central Provinces, and Madras the heat

during the week was less than usual, while in the other Provinces it was more than usual. The hottest place relatively to the average was the Punjab.

Rain.—The closing table shows that during the week rain has fallen in all the rainfall divisions, except Sind and Madras (South). The heaviest average actual rainfall reported in any division was 19·32 inches in Tenasserim. This was followed by 6·32 inches in Arakan, by 6·29 inches in Lower Burma, and by 5·72 inches in the Konkan, while the lightest fall reported was 0·03 inch in the West Punjab. According to the normal distribution, the average rainfall should range from 7·35 inches in Tenasserim, 6·49 inches in Assam (Surma), 6·13 inches in Arakan, and 5·46 inches in Coorg to 0·14 inch in Sind, and 0·34 inch in the West Punjab. Except for the very heavy rainfall in Tenasserim, the distribution of the actual and normal average rainfall agreed fairly closely. The third column of the table shows a good deal of irregularity in the amount of rain received as compared with the normal. Twenty-two divisions reported an excess and twenty-eight a deficiency of rain, while in the hill districts of the Punjab the actual average rainfall exactly equalled the normal average. The region of excessive rain included all the Burma divisions, Orissa, Oudh (South), the North-West Provinces (West and Submontane), the Punjab (Central), the Konkan, Khandeish, all the Central Provinces divisions, Guzerat, the Central India, and Rajputana divisions, the East Coast (North), and Hyderabad (South). In all the other divisions the rainfall was deficient. The greatest actual excess was 11·97 inches in Tenasserim, and the greatest actual defect was 2·17 inches in Assam (Surma) and 2·15 inches in Coorg.

The three concluding columns of the table give the actual total rainfall from May 28th to September 2nd, 1893, and the normal total rainfall for the same period. Over the greater part of the country the rainfall has been about normal.

The following gives the largest total amounts received during the week as reported in the rainfall telegrams of the week:

Division.	District.	Station.	Amount.
Tenasserim	Amherst	Thaton	20·34 inches.
Central Burma	Shwegyin	Sudder	17·32 „
Arakan	Akyab	Ditto	7·42 „
Assam	Sylhet	Karimganj	9·19 „
North Bengal	Jalpaiguri	Bhagatpur	11·70 „
Oudh	Rae Bareli	Sudder	16·92 „
Punjab	Rohtak	Ditto	6·60 „
Malabar	South Kanara	Coondapoor	8·43 „
Deccan	Kolhapur	Bavda	14·15 „
Central Provinces	Bhandara	Sakoli	9·09 „
Central India (East)	Bhopal	Maksudangarh	8·12 „

Asst. Meteorological Reporter to the Government of India.

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 2nd September.*—Rainfall fair on the West Coast and in the Circars; light in the Deccan and Karnatic; little or no rain in the Central and Southern districts. Rainfall to date up to or over average, except in the Karnatic, in Tinnevelly, and Malabar, though deficiency nowhere great. Rain wanted almost throughout the southern half of the Presidency. Cultivation and sowing proceeding generally, and, except in the more southerly districts, supplies, irrigation, and water ample. Standing crops generally flourishing, but need rain in parts. Fair harvest of early crops being gathered. Pasture growing scarce in parts, but fodder generally sufficient, and condition of cattle good. Prices steady, but very high almost everywhere.

Bombay.—*For week ending 6th September.*—River still low, and want of water much felt in Sind. Rain throughout the Presidency Proper beneficial to standing crops. More rain is required in parts of the Deccan, Karnatic, and Kathiawar. Standing crops withering for want of rain in parts of nine, and damaged by rats or insects in parts of six, districts. Sowing continues in four districts and transplantation in one. Preparation of land for late crops progressing in six districts. Prices steady, except in two districts. Fodder sufficient, except in one district. Agricultural stock good.

Bengal.—*For week ending 2nd September.*—There was general, but usually light, rain over the greater part of the province during the week. In Behar the falls were scanty, and more rain is wanted in parts. Prospects of crops are generally good, except in the flooded tracts of Behar and Eastern Bengal. In these tracts the winter rice crop is said to be somewhat improving with the subsidence of the floods, but the loss of the early rice, jute, and other autumn crops is considerable. Early rice and jute have also been much damaged in parts of the 24-Parganas, Nadia, Khulna, and Pubna. Prices of common rice are steady, and in the eastern districts abnormally high. Cattle are generally in good condition, and the fodder supply is sufficient, except in the flooded localities.

North-Western Provinces and Oudh.—*For week ending 6th September.*—Rain has been general, and towards the end of the week very heavy in several districts. Prospects have much improved everywhere, but damage by flooding is reported in one district. Early crops are being harvested. Weeding of cotton and rice crops in progress. Supplies ample. Prices show a falling tendency.

Punjab.—*For week ending 6th September.*—Rain has fallen in all but five districts. Sowings of autumn crops finished. Irrigation of crops by wells in progress. Ploughings for spring crops going on. Condition of standing crops is generally fair, but more rain is still needed in some districts. The cotton

crop is suffering for want of rain in Dera Ismail Khan. Sugarcane and maize have been injured in parts of Lahore and millet (*Penicillaria spicata*) in Dera Ismail Khan by insects. Cattle generally in good condition. Fodder sufficient in all districts, except Shahpur, where it is scarce. Prices unsettled in one district, falling in two others, and stationary elsewhere.

Central Provinces.—*For week ending 6th September.*—Heavy rain has continued during the week. It has been of great benefit in the rice districts, and does not appear to have generally caused any injury as yet to the cotton and millet crops, though in places the *jowar* (*Sorghum vulgare*) crop is suffering from swamping. Reports continue favourable.

Burma.—*For week ending 2nd September.*—In Lower Burma agricultural operations are progressing satisfactorily, and transplanting in some districts is nearly finished. There has been ample rain, and the standing crops continue in good condition, except that considerable damage has been caused by floods in Hanthawaddy and Tharrawaddy. Rain fell generally in Upper Burma, where ploughing and sowing of wet weather paddy and millets continue, while sesamum and early paddy are being reaped. The crop prospect has improved and is generally good, but some damage by floods is reported from Bhamo, and more rain is required in two other districts. The price of paddy rose in three districts and fell in four others.

Assam.—*For week ending 5th September.*—Weather seasonable. Prospects fair. Transplanting of winter paddy continues in the plains districts. Condition of cattle and supply of fodder normal.

Mysore and Coorg.—*For week ending 6th September.*—MYSORE: Rainfall good in parts of two districts; slight rain elsewhere. Standing crops withering, except in four districts. Prospects favourable, but more rain is needed. No marked change in prices.

COORG: Rainfall good. Rice, *ragi* (*Eleusine coracana*), and coffee crops in good condition. Picking of cardamoms in progress in one taluk only. Fodder and water for cattle ample. Slight rise in prices.

Berar and Hyderabad.—*For week ending 6th September.*—BERAR: Rainfall good. Weather cool and cloudy. Standing crops in good condition. Land under preparation for next spring crops. Weeding operations in progress. Fodder and water sufficient. Prices steady. Cattle healthy.

HYDERABAD: Rainfall good. Weeding of autumn crops and irrigated paddy in progress. Sowing of spring crops continues. Tanks have received sufficient quantity of water. Prices steady.

Central India.—*For week ending 6th September.*—Rainfall during the week throughout Central India. Sufficient rain has now fallen in Baghelkhand, but more is still required in parts of Gwalior. Agricultural operations continue in most parts. Land in Bundelkhand is being prepared for the spring crops. Standing crops generally in good condition, but Indian-corn in parts of Bhopawar and the Neemuch district has been partially destroyed by excessive rain. Cattle in good condition. Prices of food-grains falling in Bhopal and parts of Bhopawar, rising in the Neemuch district, and steady elsewhere.

Rajputana.—*For week ending 6th September.*—Rainfall generally good throughout Rajputana, except in Bhurtpore. Agricultural operations, standing crops, and cattle generally satisfactory. Pasturage or fodder sufficient. Prices falling in five States, fluctuating in one, and steady elsewhere.

Kashmir.—*For week ending 5th September.*—Slight rainfall has done good to crops. Spring sowings commenced. Maize crop almost ready for reaping. Prices stationary.

Nepal.—*For week ending 2nd September.*—Days clear: slight showers at night. Prospects very good.

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

RAILWAY STATISTICS.

STATEMENT OF GROSS EARNINGS OF INDIAN RAILWAYS FROM 1ST JULY TO 27TH AUGUST 1892, AND FROM 1ST JULY TO 26TH AUGUST 1893.

N.B.—As regards the figures in column *Total Receipts from 1st July 1893*, audited figures have been used as far as possible.

Railway.	Average earnings per mile per week during the 2nd-half of 1893.	Week ending 27th August 1892. Mean mileage worked.	Earnings. Total.	Per mile open per week.	Week ending 26th August 1893. Mean mileage worked.	Earnings. Total.	Per mile open per week.	Earnings from 1st July to 27th August 1892.	Earnings from 1st July to 26th August 1893.	Increases during the 2nd-half of 1893.	Decreases during the 2nd-half of 1893.

3. The following table shows the growth of the Capital account of the Guaranteed Railways during the last five years, the net increase to the aggregate subscribed Capital during that period being £1,250,218:

Year.	Total Capital subscribed. Amount.	Increase.	Decrease.	Remarks.
	£	£	£	
To end of 1888	44,103,378	...	200	
„ 1889	44,653,796	550,418	...	
„ 1890	44,725,496	71,700	...	
„ 1891	45,253,796	528,300	...	
„ 1892	45,353,796	100,000	...	
		1,250,418	200	
Net Increase ...	...	1,250,218		

Capital Outlay.

4. The aggregate outlay finally charged off to "Construction" has stood at the end of each of the last five years as follows:

		Increase.
	£	£
To end of 1888	43,158,362	453,015
„ 1889	43,472,608	314,246
„ 1890	43,715,546	242,938
„ 1891	44,015,818	300,272
„ 1892	44,188,000	172,182
Increase in five years		1,482,653

5. The expenditure charged to "Construction" during and to end of the year gives the following as the cost of open lines per mile:

Railway.	Construction expenditure per open mile. During 1892.	To end of 1892.	Remarks.
	Rs.	Rs.	
Madras	784·54	1,39,298·83	
Bombay, Baroda and Central India	763·08	2,11,881·98	
Great Indian Peninsula	687·87	2,11,519·99	
Average outlay	732·37	1,87,950·20	

The cost expressed in rupees is as regards payments in England at the contract rates of exchange, which for many years have been higher than the actual rates, and consequently the cost is understated by the difference.

Capital locked up in stores.

6. The subjoined table shows the fluctuations in the value of stores in stock during the past five years. The figures in antique represent increases of stock:

Railway.	Reduction in stock. 1888.	1889.	1890.	1891.	1892.	Total reduction in five years.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Madras	17,701	3,72,463	9,68,360	56,105	60,783	4,61,305
Bombay, Baroda and Central India	5,90,250	2,76,438	18,918	3,25,769	3,73,517	3,66,556
Great Indian Peninsula ...	9,60,488	8,63,904	10,85,351	16,41,878	11,25,422	17,78,533
Total ...	3,87,942	2,15,003	20,72,629	20,23,752	15,59,722	16,83,784

7. The reduction in the stores balances during the year 1892 occurs mainly on the Bombay, Baroda and Central India and Great Indian Peninsula Railways. The decrease on the Bombay, Baroda and Central India Railway is attributed to large issues of permanent-way material and bridge work for repairs of damages caused by floods, to the abnormal issue of iron work and other stores for repairs of carriages and wagons and renewal of 100 covered steel wagons, and to large sales of permanent-way material and other stores to the Rajputana-Malwa and Godhra-Rutlam Railways. The reduction on the Great Indian Peninsula Railway is said to be due to careful scrutiny of Home indents and to the sale of old stock.

8. On 31st December 1892 the value of the stores in stock on Guaranteed Railways exceeded the limits provisionally assigned for Capital to be locked up in stores to the following extent :

Railway.	Limit assigned.	Stock in hand.	Excess.
	Rs. Lakhs.	Rs. Lakhs.	Rs. Lakhs.
Madras	22⅝	29¼	6¼
Bombay, Baroda and Central India	21½	28	6½
Great Indian Peninsula	63	52½	−10½
TOTAL ...	107	109¼	2¼

Revenue accounts.

9. Excluding the Oudh and Rohilkhand and South Indian Railways, which have now become State lines, the gross earnings, working expenses, and net earnings of the Guaranteed Railways during the last five years have been as under :

Year.	Gross earnings.	Working expenses	Net earnings.
	Rs.	Rs.	Rs.
1888	6,23,29,206	2,99,09,247	3,24,19,959
1889	5,91,14,079	3,00,48,931	2,93,65,148
1890	6,05,91,746	2,94,21,830	3,11,69,916
1891	6,87,37,790	3,31,02,310	3,56,35,480
1892	6,45,34,775	3,11,40,766	3,33,94,009

10. For the year 1892 the net earnings amounted to ... Rs. 3,33,94,009

Deduct—

	Rs.	Rs.
Interest on overdrawn capital	2,065	
Moiety of surplus profits to shareholders ...	56,00,261	
Contributions to Provident Fund	2,23,448	
Amount payable by the Great Indian Peninsula Railway Company on account of rent of leased lines...	5,29,160	
Irrecoverable outstanding earnings written off ...	23,212	
		63,78,146
Net receipts by Government		2,70,15,863

11. The results of the working of the Guaranteed Railways for the year 1892, based on the contract rates of exchange, is shown in the following table, as also the percentage of interest and net profits on the Capital received. The figures in antique represent gain :

Railway.	Net receipts after deducting from net earnings payments on account of moiety of Surplus Profits and contribution to the Provident Fund and interest on overdrawn Capital.	Guaranteed interest at contract rates.	Loss to State. Amount.	Loss to State. Per open mile.	Loss to State. Per cent. of guaranteed interest.	Per cent. of interest paid on total Capital received.	Per cent. of Net Earnings realised during 1892 on Capital received.
	Rs.	Rs.	Rs.	Rs.	*Loss.*

SUPPLEMENT TO

The Gazette of India.

No. 37.] CALCUTTA, SATURDAY, SEPTEMBER 16, 1893.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

RAILWAY STATISTICS.

RESULTS OF THE WORKING OF CONTINUOUS AUTOMATIC BRAKES IN USE ON RAILWAYS IN INDIA DURING THE SIX MONTHS ENDED THE 31st DECEMBER, 1892.

No. 359 R. Stat., dated Simla, the 5th September, 1893.

Read again—

Public Works Department letter No. 62R. Stat., dated the 19th October 1891.

Read also—

Endorsement No. 327 Stat., dated the 25th July, 1893, from the Director General of Railways, forwarding tables Nos. I and II showing the railways on which continuous automatic brakes were in use, the number of rolling-stock fitted with the brakes, and the results of their working during the six months ended the 31st December, 1892.

ORDER.—Ordered that tables Nos. I and II be forwarded, for information, to the Local Governments and Administrations, and to the officers noted in the margin.

The Governments of Madras, Bombay, Bengal, the North-Western Provinces and Oudh, and the Punjab.
The Chief Commissioners of the Central Provinces, Burma, and Assam.
The Resident at Hyderabad.
The Resident in Mysore.
The Agents to the Governor General for Central India, Rajputana, and Baluchistan.
The Director General of Railways.
The Consulting Engineers to the Government of India for Railways, Calcutta, Central Division, Lucknow, and Assam.

Ordered also that copies be forwarded for the information of Her Majesty's Government.

Further, that this order with the tables be published in the Supplement to the *Gazette of India*.

F. B. HEBBERT,
Under Secretary.

Documents accompanying.

Tables Nos. I and II showing the railways on which continuous automatic brakes were in use, the number of rolling-stock fitted with the brakes, and the results of their working during the six months ended the 31st December, 1892.

TABLE No. I.

Statement showing the Indian railways on which continuous automatic brakes were in use on the 31st December, 1892, the description and number of rolling-stock and the mileage run by trains fitted with the brakes.

Railways (including branch lines worked).	Locomotives fitted.	Vehicles. Braked.	Vehicles. Piped.	Number of miles run by trains fitted.	Proportion per cent. Of vehicles piped or fitted on total.	Proportion per cent. Of mileage run by trains fitted on total train-mileage.	Remarks.
STANDARD GAUGE.							
State lines worked by the State.							
North Western (State)	199	(a) 1,222	68	(b)	10·65	...	(a) Includes 30 vehicles made over to the Mushkaf-Bolán railway. (b) *Vide* "Remarks" in column 5 of table No. II.

Eastern Bengal (state)	10	88	12	149,840	4·22	13·58	
Line worked by guaranteed company.							
Great Indian Peninsula	66	159	50	293,448	2·17	7·14	

TABLE No. II.

Statement showing for the six months ending 31st December, 1892, all cases in which the continuous automatic brakes failed to act when required to be brought into action, or caused delay in the working of trains.

1	2	3	4	5
Railway.	Name or description of brakes which failed or caused delay in the instances specified in column 4.	Date of failure.	Instances under the three following heads separately, of— (i) Failure or partial failure to act when required in case of an accident to a train, or a collision between trains being imminent. (ii) Failure or partial failure to act under ordinary circumstances to stop a train when required. (iii) Delay in the working of trains in consequence of defects in, or improper action of, the brakes, distinguishing whether they arose from neglect or inexperience of servants, or failure of machinery or material.	Number of miles run by trains fitted with each description of continuous automatic brake.
Standard gauge. **State lines worked by the State.**				
North Western (state)	Vacuum Automatic.	12th October, 1892	(iii) Failure of material.—Universal hose coupling pipe broken.	Mileage has not been recorded, as the vehicles did not run continuously on trains fitted throughout with the brake. In future the mileage will be recorded as accurately as possible.
		10th December, 1892.	(iii) Failure of material.—Five minutes lost between Sirhind and Sarái Banjára in order to secure brake-tie rod, in consequence of arm of brake shaft having broken.	
		31st December, 1892.	(iii) Neglect of servants—Sixteen minutes lost at Sarái Banjára in disconnecting and adjusting rod of front brake-van.	
Oudh and Rohilkhand (state).	Vacuum Automatic.	27th August, 1892	(iii) Neglect of servants.—No. 1 up mail, Sháhjahánpur to Chandausi, was delayed fifteen minutes between Basháratganj and Aonla, owing to flange of the universal coupling plug on engine No. 132 having broken.	
		24th September, 1892.	(iii) Failure of machinery.—When No. 1 up mail, Chandausi to Saháranpur, was approaching Nagína station, the lever of the bottom damper of engine No. 127 broke and wrenched the left hand canvas pipe off engine cylinder. No delay.	
		7th October, 1892	(iii) Failure of machinery.—Brake-van No. 618 on No. 2 down mail, Saháranpur to Chandausi, was unable to maintain vacuum owing to joint of vacuum gauge pipe having given way and admitted air. No delay.	
		7th November, 1892.	(iii) Failure of material.—Twelve minutes' delay between miles 361 and 362 to No. 2 down mail, owing to dummy bracket having broken and universal coupling on engine No. 130 having been crushed by running over a buffalo.	167,076
		15th November, 1892.	(iii) Failure of material.—No. 2 down mail, Sháhjahánpur to Lucknow, was delayed twelve minutes at Sandila, owing to one brake block hanger pin on brake-van No. 616 having broken.	
		7th December, 1892.	(iii) Failure of material.—No. 1 up mail, Lucknow to Sháhjahánpur, was delayed seven minutes at Rosa in order to release the brake in consequence of the coupling pipes leaking between 3rd class female carriage No. 173 and postal van No. 450.	
Eastern Bengal (state)	Vacuum Automatic.	...	No failure or delay.	149,840
Line worked by guaranteed company.				
Great Indian Peninsula.	Vacuum Automatic.	2nd July, 1892 .	(iii) Failure of machinery.—Four minutes' delay occurred at Lonávla in detaching the tender of engine No. 535 of No. 20 up passenger train, owing to the India rubber rolling rings of both tender cylinders having twisted and become jammed.	
		14th September, 1892.	(iii) Failure of material.—Small India rubber pipe leading to brake cylinder of road van No. 6533 on 149 down passenger broke in halves. Fifteen minutes' delay occurred in starting from Victoria terminus for ascertaining the cause of leakage and plugging up the pipe.	293,448
		23rd December, 1892.	(iii) Inexperience of servants.—The driver created a higher vacuum on journey with 162 up passenger than he was able to maintain. Twenty minutes and two minutes' delay at Shelárvádi and Talegaon respectively, as the driver was unable to release the brakes to start.

GOVERNMENT OF INDIA.

HOME DEPARTMENT.

REPORT OF THE ROYAL COMMISSION ON THE BLIND, THE DEAF AND DUMB, AND IDIOTS AND IMBECILES.

No. $\frac{8 \text{ Education}}{296-306}$.

Extract from the Proceedings of the Government of India in the Home Department (Education),—under date Simla, the 13th September, 1893.

Read—

Despatch from the Secretary of State, No. 87 (Public), dated the 15th August 1889, forwarding a copy of a letter, dated the 16th July 1889, from Lord Egerton of Tatton, together with the Report of the Royal Commission on the Blind, the Deaf and Dumb, and Idiots and Imbeciles;

Home Department Circular Nos. 498—505, dated the 26th October 1889; and

The replies of Local Governments and Administrations to the above-quoted Circular.

RESOLUTION.

With his Despatch of the 15th August 1889, the Secretary of State forwarded for the consideration of the Government of India the Report of the Royal Commission on the Blind, the Deaf and Dumb, and Idiots and Imbeciles. The views and recommendations of the Commission, briefly stated, were as follows:—

(1) that it is more advantageous for the local Authority or the State to expend its funds in educating the blind than to have to support them through life in idleness or to allow them to live on charity;

(2) that the parents of the blind, the deaf and dumb, and educable idiots should pay for their education to the extent of their ability;

(3) that the blind should be compelled to attend school from the age of 5 years to the age of 16;

(4) that the deaf and dumb should be compelled to attend school till they attained the age of 16 years, and should be educated on the purely oral system; and

(5) that power should be taken to ascertain whether imbeciles are educable or not, and to provide for such of them as are educable being sent to suitable institutions for their education.

In circulating the Secretary of State's Despatch and the Report of the Royal Commission with the Home Department letter of the 26th October 1889 cited in the preamble, Local Governments and Administrations were asked to state

their opinion as to the extent to which the conclusions of the Royal Commission were applicable to the classes referred to in India.

2. Before coming to a final decision, the Government of India have awaited the publication of the returns of the census taken in 1891; these returns show that out of a population of 274,373,929, the numbers in each of these unfortunate classes are—idiots and persons of unsound mind, 74,289; congenital deaf-mutes, 196,861; blind persons, 458,868.

3. Local Governments and Administrations are unanimous in agreeing that the recommendations of the Royal Commission are unsuitable for India. The family system in India has caused it to be generally recognized as an obligation by all able-bodied persons to provide for the support of those members of their families who, from congenital or other defects, are unable to earn their own livelihood. The State has, moreover, not yet succeeded in securing instruction in the rudiments of learning for those classes who suffer from no natural disqualification. As general primary education is still so backward among the masses, the Government of India consider that it would be premature to incur expenditure in endeavouring to train persons who at the best could only very imperfectly respond to the efforts made on their behalf, and whose education would be exceptionally expensive. The Government of India have therefore decided that the assistance of Government in this direction should for the present be limited to grants-in-aid of public or private charity.

ORDER.—Ordered, that a copy of this Resolution be communicated to all Local Governments and Administrations for information, and that it be published in the Supplement to the *Gazette of India* for general information.

[True Extract.]

C. J. LYALL,

Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the week ending at 8 a.m. on Saturday, September 9th, 1893.

Very unsettled weather has prevailed throughout the greater part of the Indian region during most of the week under review. The cyclonic storm which appeared over the Bay at the close of the previous week travelled from the Bay north-westward and passed into the North-West Himalayas. It occasioned very general rain during its passage. After it disappeared the barometer rose, the barometric differences became much slighter, and the weather became much finer. On the 8th, however, a fresh barometric fall appeared over Bengal and the Bay, and during the 8th and 9th a fresh storm developed at the head of the Bay. As this storm increased in intensity, barometric gradients increased, the wind rose, and rainy weather prevailed, except in the extreme north of the country. In the interval between the two storms temperature rose, and on the 6th and 7th the heat was greater than usual in most Provinces of India, but during the rainy periods which accompanied the passage of the first and the appearance of the second storm the mean temperature of India was lower than usual.

The chart of the 3rd showed that the cyclonic storm which had developed over the head of the Bay at the close of the last week had commenced to move north-westward, and had crossed the coast close to Balasore. The storm was fairly deep, the abnormal depression of the barometer near the centre being about 0·35 inch. The barometer was falling, except in parts of North-East, of North-West, and of North India, and gradients were steep very generally. The winds were cyclonic in the neighbourhood of the depression, and blew from the normal monsoon directions elsewhere. There had been no rain over the south of the Punjab, Western Rajputana, Sind, or the South Carnatic, but elsewhere rain had been general, and in the neighbourhood of the depression heavy. Balasore reported 4·47 inches, Cuttack 3·67 inches, False Point 3·42 inches, Darjeeling 2·32 inches, and many stations over 1 inch. By 8 A.M. on 4th September the cyclonic storm had reached the neighbourhood of Allahabad. The barometer was falling over the North-West Provinces, but was rising elsewhere. Gradients were less steep than on the preceding day. The winds were cyclonic near the storm and blew from the ordinary directions elsewhere. The rainfall distribution was similar to that reported on the preceding day, except that there had been some increase in the extent of rainfall over the Punjab, and that the region of heaviest fall had been transferred from Lower Bengal to the North-West Provinces. Cawnpore had received 6·00 inches, Karwar 4·21 inches, Allahabad 3·91 inches, Lucknow 2·63 inches, Tavoy 2·59 inches, Gnatong 2·38 inches, Saugor 2·35 inches, Mussoorie 2·09 inches, and several stations over 1 inch. On the 5th the cyclonic storm lay between Delhi and Meerut. The storm was filling up and the barometer was rising almost everywhere. A fresh fall had, however, appeared over Burma. Gradients had still further decreased, and the winds were rather variable over a large part of the country. There was very little rain over the west of the Punjab, Sind, Guzerat, and Madras, but elsewhere the fall continued fairly general, and in the neighbourhood of the depression the amounts were heavy. Ranikhet reported 6·36 inches, Lucknow 5·55 inches, Umballa 3·00 inches, Roorkee 2·44 inches, Mercara 2·36 inches, Chakrata 2·28 inches, and several stations over 1 inch. By the morning of the 6th the storm had disappeared across the North-West Himalayas, and an area of relatively high pressure had been established over the north of the Punjab. The barometric fall noticed over Burma on the 5th was passing out into the Bay, and pressure was recovering over Tenasserim. Gradients were slight, and the winds, which were rather variable,

were generally light. Rain had fallen generally over Burma, over and at the foot of the North-West Himalayas, and along the West Coast, but elsewhere only scattered showers had occurred. Moulmein had received 3·70 inches, Tavoy 2·24 inches, and Ranikhet 2·07 inches; but these were the only important falls. On the 7th pressure was decreasing, except over the south of the Peninsula and in Burma. Pressure was lowest over the west of the Punjab and highest over the south of the Bay. The wind was generally between south and west. Light showers had fallen over the Indian Peninsula, moderate rain in Burma, and heavy rain in North Bengal. Jalpaiguri reported 7·65 inches, Kendat 3·85 inches, and Tavoy 2·98 inches. On the 8th the barometer was falling, except over North Bengal and the south of the Peninsula. Gradients had increased, and a fresh cyclonic storm was developing over the Bay. The winds were rising in force, and blew from monsoon directions, except at the head of the Bay, where the directions were irregular. There was no rain over North-Western India, the South Carnatic, or parts of Lower Bengal, but elsewhere the weather was rainy. The amounts were not, however, heavy, the largest being 2·77 inches at Tavoy, 2·44 inches at Silchar, and 2·10 inches at Fort Stedman. The chart of the 9th showed that the barometer was falling everywhere—most in the north; that gradients had increased considerably; and that the cyclonic storm at the head of the Bay was developing into an important disturbance. The winds were cyclonic around the Bay, and blew from normal monsoon directions elsewhere. There was still very little rain over North-Western India, but in all other places the fall was general. Moulmein had received 4·38 inches, Nowgong 3·89 inches, Akyab 3·29 inches, Jubbulpore 3·08 inches, Tavoy 2·94 inches, Dehra Dun 2·72 inches, Murree 2·35 inches, Hazaribagh 2·23 inches, and several stations over 1 inch.

Temperature.—The following table shows the variations of the mean temperature from the normal on each day of the week for the different Provinces of India:

Province.	September 1893.							Mean variation of week.
	3rd.	4th.	5th.	6th.	7th.	8th.	9th.	
	°	°	°	°	°	°	°	°
Burma	−0·3	−0·5	+1·6	+1·6	+0·9	−1·5	−2·2	−0·1
Bengal and Assam	+0·5	+0·1	+0·8	+2·3	+1·4	−1·2	−0·4	+0·5
North-Western Provinces and Oudh.	−1·3	−3·2	−4·9	−2·3	+0·3	+1·4	−1·8	−1·7
Punjab	−0·3	−3·6	−3·5	−3·8	−1·0	+2·1	+3·2	−1·0
Bombay	+0·1	−1·0	−0·4	+0·3	+0·9	−1·8	−1·5	−0·4
Central Provinces and Berar	−3·5	−3·2	−5·6	+0·6	+2·1	+0·3	−1·4	−1·5
Central India and Guzerat	−0·8	+0·1	−0·6	+0·2	+1·4	+1·4	−0·4	+0·2
Sind and Rajputana	−0·2	−0·1	0	+1·0	+1·6	+0·2	−1·0	+0·2
Madras	−2·5	−1·7	+0·3	+1·5	+1·4	−1·5	−1·5	−0·6
Mean for whole of India	−0·9	−1·4	−1·4	+0·2	+1·0	−0·1	−0·8	−0·5

On the 6th and 7th the mean temperature of the whole of India was slightly above the normal average, but on all other days it was below, the abnormal deficiency ranging from 1·4° on the 4th and 5th to only 0·1° on the 8th. The provincial variations show that the mean temperature of the week for the North-West Provinces and the Central Provinces was 1½°, and that for the Punjab was 1·0° below the average, but in all the other Provinces the average variations for the week were very small, though on particular days during the week there were instances of considerable departures both above and below the normal.

Rain.—The concluding table shows that the rainfall throughout India during the week has been generally similar to that reported last week, except that relatively to the normal it has been on the whole somewhat heavier. Sind and

Rajputana (West) were the only divisions which received no rain, more or less falling in all other parts of the country. The heaviest average actual rainfall was 13·46 inches in Tenasserim, followed by 6·50 inches in the East Coast (North *a*) and by 6·01 inches in Oudh (South), while the lightest average actual rainfall was 0·05 inch in Kathiawar. According to the normal, the heaviest average rainfall should be 7·90 inches in Tenasserim, followed by 7·14 inches in Assam (Surma) and 5·22 inches in Arakan, while the lightest normal average rainfall is 0·26 inch in Sind. The principal difference then between the normal and actual average rainfall consists in the excess in Tenasserim and Oudh and the deficiency in Assam. The third column of the table shows that the actual average rainfall was in excess of the normal average in twenty-eight of the rainfall divisions and in defect in twenty-three divisions. The greatest actual excess was 5·56 inches in Tenasserim and the greatest actual deficiency was 3·53 inches in Assam (Surma). The regions where the rainfall was excessive included the following divisions, *viz.*: Tenasserim, Lower and Central Burma, Orissa, Chota Nagpur, both the Behar divisions, all the North-West Provinces divisions, the Central, Submontane, and Hill divisions of the Punjab, Malabar, Coorg, the Konkan, the Deccan, the East and Central divisions of the Central Provinces, Central India (East), the East Coast (North and Central), and Hyderabad (South). In all the remaining divisions the fall was deficient.

The three concluding columns of the table show the actual rainfall from May 28th to September 9th of 1893, the normal rainfall for the same period, and the difference between the two. In Lower Burma, in Coorg, and in Mysore the rainfall has been in defect; in Assam (Surma), in Chota Nagpur, in the North-West Provinces (East), in Oudh (North and South), in the Punjab (North-West), in the Deccan, in Khandeish, in Rajputana (West), in the East Coast (North), and in Hyderabad (South) it has been excessive, while in all the other divisions it has been approximately normal.

The following gives the largest total amounts received during the week as reported in the rainfall telegrams of the week:

Division.	District.	Station.	Amount.
Tenasserim	Amherst	Thaton	16·41 inches.
Central Burma	Shwegyin	Kyaikto	15·15 „

Simla, *14th September, 1893.*

W. L. DALLAS,
Asst. Meteorological Reporter to the Government of India.

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 9th September.*—Rainfall good on the West Coast and in the Circars; light rain elsewhere. Want of rain is felt in the Southern and Central districts, and is beginning to affect cultivation in some of them. Standing crops generally good, but require more rain in parts. Harvest of early crops continues. Fodder is generally available, but pasture is getting scarce in parts. Condition of cattle generally good. Prices continue very high with an upward tendency in a few of the Southern and Central districts.

Bombay.—*For week ending 13th September.*—Want of water still felt in parts of Sind. Rain almost throughout the Presidency Proper; slight in Guzerat; moderate and beneficial to standing crops elsewhere. More rain is required in parts of the Deccan, Karnatic, and Kathiawar. Standing crops withering for want of rain in parts of five, and damaged by rats or insects in parts of four, districts. Sowing of early or late crops continues in six districts and transplantation in one. Prices steady and fodder sufficient, except in two districts. Agricultural stock generally good.

Bengal.—*For week ending 9th September.*—There has been general rain over the whole Province during the week. It has done good to the winter rice, which is now nearly all transplanted. Harvesting of early rice, jute, and other autumn crops is almost finished, and preparation of lands for spring sowings has begun. Prospects are generally favourable, except, as previously reported, in the flooded tracts of East Bengal and Behar. Distress is reported in a portion of Backergunge, where relief operations will soon be undertaken. In Faridpur three thanas will soon be in need of relief works. Agricultural loans have been sanctioned according to requirements in the tracts affected. Reports from Muzaffarpur and Champaran show that the condition of the people in the flooded tracts is not so bad as at first anticipated, and there appear to be no signs of immediate distress. Prices have risen in the eastern districts, but are almost stationary in Behar and elsewhere. Fodder is not yet sufficient in the flooded tracts of East Bengal.

North-Western Provinces and Oudh.—*For week ending 13th September.*—Rain has been general and rather heavy in some districts. Crops have greatly benefited, and prospects are good everywhere. Supplies sufficient. Prices show a falling tendency.

Punjab.—*For week ending 13th September.*—Rain has fallen in all but two districts. Irrigation of autumn crops by wells continues. Ploughings and sowings for spring crops in progress in some districts. Condition of standing crops is generally good. Prospects average in most districts. Crops withering for want of rain in Hissar and Sialkot, and rain is required in other

districts also. Sugarcane and maize in parts of Lahore and *jowar* (*Holcus sorghum*) and *bajra* (*Penicillaria spicata*) in parts of Dera Ismail Khan have been damaged by insects. Condition of cattle good. Fodder sufficient in all districts, except Sialkot and parts of Multan and Shahpur, where it is getting scarce. Prices unsettled in one district and stationary elsewhere.

Central Provinces.—*For week ending 13th September.*—Rainfall heavy in two districts; elsewhere moderate to light rainfall. Standing crops in good condition. Weeding operations progressing. Land being prepared for winter sowings in places. Prices steady.

Burma.—*For week ending 9th September.*—In Lower Burma agricultural operations are progressing satisfactorily, and transplanting is nearly finished in some districts. In Hanthawaddy and Tharrawaddy considerable areas under paddy cultivation are under water, and will probably be destroyed. Slight damage has also been done by floods to the crops in Bassein. Rainfall ample in Upper Burma. Agricultural operations for wet-weather cultivation are progressing satisfactorily. Reaping of early paddy and of sesamum progressing. Maize being reaped in Magwe. Crop prospects are generally good, but in Yeu, although prospects have improved, rain is still wanted, and in Shwebo, where the rainfall is inappreciable, the crop prospects are unsatisfactory. In Pakokku, owing to heavy and constant rain, some nurseries are under water. In Kyaukse some damage may be caused by the overflow of the Zawgyi river. Slight damage has been done to crops by floods and rain in Katha and Magwe. In Lower Burma the price of paddy has risen slightly in three districts, and in Upper Burma it has risen considerably in the Southern Shan States and fallen in five other districts.

Assam.—*For week ending 12th September.*—Weather seasonable. Transplanting of winter paddy nearly over. Condition of cattle and supply of fodder normal. Water sufficient.

Mysore and Coorg.—*For week ending 13th September.*—MYSORE: Rainfall good in parts of two districts; slight in other parts. More rain is wanted throughout the State. Prices risen in Kolar.

COORG: Rainfall good. Rice and coffee crops in good condition. The *ragi* (*Eleusine coracana*) crop is ripening. Picking of cardamoms continues. Prices stationary. Fodder and water for cattle ample.

Berar and Hyderabad.—*For week ending 13th September.*—BERAR: Rainfall good. Weather cool and cloudy. Standing crops in good condition. Land being prepared for ensuing spring crops. Weeding operations in progress. Fodder and water sufficient. Cattle healthy. Prices almost stationary.

HYDERABAD: Rainfall good. Weeding of autumn crops and irrigated paddy continues. Sowing of spring crops in progress. Prices stationary.

Central India.—*For week ending 13th September.*—Rain general throughout Central India, but more rain is required in parts of Gwalior. Agricultural

operations in progress in all parts. Land being prepared for spring sowings. Standing crops in good condition, except in West Malwa and the Neemuch district, where Indian-corn has been partially damaged by rain. Prices of food-grains falling in Gwalior, Bhopal, and Goona, and steady in other parts.

Rajputana.—*For week ending 13th September.*—Slight rain in parts. Good rain in six States. Agricultural operations, standing crops, and cattle generally satisfactory. Pasturage or fodder sufficient. Prices fluctuating in two States, falling in four others, and steady elsewhere.

Kashmir.—*For week ending 12th September.*—Moderate rain during the week. Rice crops in good condition and ready for harvesting. Prices stationary.

Nepal.—*For week ending 9th September.*—Weather warm and sultry. Harvesting of upland rice commenced. Prospects of crops good.

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

(*a*) Includes the Bezváda-Godaveri section of the East Coast (state) railway.
(*b*) Includes the Godhra-Rutlam railway.
(*c*) Includes the Guntakal-Mysore frontier section from 1st April 1893.
(*d*) Includes the Tirhoot state railway. Although for convenience classed amongst the state railways, the company's section of this line is the property of the Bengal and North Western railway company.
(*e*) Includes the Jammu and Kashmir and the Hyderabad-Umarkot railways.
(*f*) Although for convenience classed amongst the state railways, this line is the property of the Bengal Central railway company.
(*g*) Total receipts from 15th July to 2nd September 1893.
(*h*) Includes the Wardha Coal, Dhond-Manmád, Khámgaon, and Amráoti railways.
(*i*) Includes the Bangalore-Nanjangúd and the Bangalore-Mysore frontier sections.
(*j*) Total receipts from 15th April to 2nd September 1893.

F. B. HEBBERT,
Under-Secretary.

Simla, the 14th September, 1893.

SUPPLEMENT TO

The Gazette of India.

No. 38.] CALCUTTA, SATURDAY, SEPTEMBER 23, 1893.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

Weather Review of India for the week ending at 8 a.m. on Saturday, September 16th, 1893.

The main feature in the meteorology of the week has been the history of a cyclonic storm which had formed in the north of the Bay of Bengal at the close of the previous week. It intensified slowly, and crossed the South Bengal Coast between Saugor Island and Balasore on the morning of the 11th, and advanced steadily at the rate of about 8 to 10 miles an hour in a west-north-westerly direction till on the 16th its centre was over the Western desert to the north-west of Mount Abu and Deesa. After leaving the Bay, it rapidly decreased in intensity, and on the 14th it was of comparatively little importance; but between the 14th and 15th it suddenly increased in intensity to a very marked degree, and became nearly as intense as when it left the Bay, and it continued almost equally intense on the 16th. It had given the usual phenomena of strong winds of cyclonic direction in its neighbourhood, and this circulation affected the winds over the greater part of India almost throughout the week. At first the storm only brought up moderate rain, which was fairly general; but when it increased in intensity on the 15th, it commenced to give exceptionally heavy local rain in its neighbourhood, but the general rain accompanying it was still only light to moderate in amount. With the advance of the storm inland at the beginning of the week, a wave of monsoon winds followed it, and these winds advanced from both the Bay of Bengal and the Arabian Sea; and hence the general weather conditions throughout the week had been of monsoon character, the monsoon conditions being much more strongly developed than is usual in the middle of September.

At the close of the previous week a barometric depression or cyclonic storm had developed at the head of the Bay of Bengal, and on the 9th the centre was to the east of False Point. From the 9th to the 10th the storm slowly developed, the fall of pressure round the north-west angle of the Bay equalling about 0·04 inch, while pressure was rising over a large part of Bengal and over Assam and Burma, and a very rapid increase of pressure had taken place over parts of North-Western India, though a slow fall was reported over the Peninsula. This brought the storm into decidedly greater prominence, and it was the dominant feature in the meteorology of the 10th. The storm had also moved slowly in a north-westerly direction from the 9th to the 10th, and its centre was to the north-east of False Point, and rather close to the land. Round the north-west angle of the Bay the pressures recorded were from a fifth to a quarter of an inch in defect, and baric gradients in the rear of the storm were decidedly steep. Rainfall was to a great extent absent in West Bengal, Bihar, and the North-Western Provinces, or over the area in front of the storm, while rain was falling in East Bengal and Burma, and rather numerous showers were received in other districts. On the morning of the 11th the storm was passing inland, the centre lying between Saugor Island and Balasore, where a pressure of about 29·29 inches was recorded at 8 A.M. Pressure had fallen by 0·16 inch at these two stations, so that it is probable the storm had again intensified as well as moved nearer to these stations, and pressure at Saugor Island was 0·38 inch in defect. Pressure, on the other hand, had again risen moderately to rather rapidly over the whole of the Indian area which was not being affected by the storm, and hence the storm on this day was very pronounced. The storm was giving moderate to strong winds over North-Eastern India, and the cyclonic circulation indeed affected all districts, except North-Western and Western India. The storm gave heavy rain in its inland passage, Saugor Island reporting 6 inches, Balasore, False Point, and Bassein from 3 to 4 inches, and many stations an inch and upwards. In the rear of the storm a heavy wave of monsoon winds was advancing up the Bay of Bengal,

giving heavy rain to Burma, and Akyab on the 11th reported 8·61 inches and Moulmein 6·00 inches. Moderate rain was also falling in the Central Provinces and in the west and south of the Peninsula, but over North-Western and Northern India rainfall had to a great extent ceased. On the morning of the 12th the centre of the storm was in the south-west of Chota Nagpur, and, though it was filling up, it was still an important depression. It had, therefore, moved roughly about 250 miles in a west-north-westerly direction in the 24 hours from 8 A.M. of the 11th to the 12th, or at the rate of about 10 miles an hour. The cyclonic circulation of winds round the storm centre was very definite, and practically the winds over the whole of India formed part of this circulation, and winds at the stations near the storm were fairly strong, Hazaribagh, for instance, reporting 29 miles an hour. On the 12th general and moderately heavy rain was received in Bengal and the Central Provinces and also in Burma and the south of the Peninsula, but little rain fell elsewhere. The heaviest rainfall reported on this day was 2·91 inches at Chaibassa. On the 13th the storm had again moved in a west-north-westerly direction, and its centre was between Sutna and Jubbulpore, the defect of pressure at these stations equalling only 0·2 inch, or half that which had been registered on the 10th at Saugor Island and Balasore, so that it was clear the storm was decreasing rapidly in intensity, and had partly filled up. It had also moved in the 24 hours over a distance of roughly 250 miles, or at the rate of about 10 miles an hour. The cyclonic circulation of winds was less strong, and only moderate winds were blowing near the storm, while the winds in North-Western and Southern India were unaffected by the circulation. Moderate general rain had now extended to the North-Western Provinces, and rainfall was becoming fairly general over India, except in Madras, Sind, Rajputana, and the Punjab, where local rain only was reported. The heaviest falls reported on this day were 7·63 inches at Vizagapatam, between 3 and 4 inches at Rangoon, Sutna, and Gopalpur, and between 2 and 3 inches at Mandalay, Cuttack, and Cuddalore, so that the falls in the neighbourhood of the storm were not very heavy, and also pointed to the decrease in the intensity of the storm.

On the 14th the centre of the depression was between Saugor and Neemuch, where pressure was from 0·05 inch to 0·08 inch in defect. The centre had therefore again moved about 200 miles in a westerly or west-north-westerly direction, or at the rate of perhaps 8 miles an hour. Pressure had fallen slowly only in the area over which the storm had advanced, while pressure was rising rather rapidly over the remainder of India, and was indeed generally in large excess, except over the area occupied by the storm. A moderate cyclonic circulation of winds was accompanying the small storm, and winds in North-Western and Southern India were quite unaffected by it, and were of normal character. Rain was again fairly general, except in the Punjab, Sind, and in parts of Madras, and the heaviest falls reported were 5·40 inches at Vizagapatam and 3·70 inches at Nowgong. On the 15th a great change had taken place in the character of the storm. The centre had again moved in a west-north-westerly direction over nearly 200 miles, or at the rate of about 8 miles an hour, and it was near Mount Abu and Deesa and to the north-east of these stations. Instead, however, of the barometric depression at the centre equalling about a tenth of an inch, the defect registered at Mount Abu and Deesa equalled nearly a quarter of an inch, and with this increase in the strength of the storm very heavy rain began to fall near its centre, Mount Abu reporting 8·17 inches on the 15th. Over India generally, however, rainfall was smaller in amount, and was confined to Rajputana, Central Provinces, and Central India, and parts of Madras, Bombay, and Punjab. On the 16th, or the last day of the week, the position of the storm centre is difficult to determine, as it was over the Western desert; but it was to the north-west of Deesa and Mount Abu instead of to the north-east, as on the previous day, and it was therefore probably still travelling in a west-north-westerly direction; but it had not advanced very far, as the defect at Mount Abu and Dessa was still nearly 0·2 inch. It was again giving exceedingly heavy rain, Mount Abu reporting 15·51 inches on the morning of the 16th and Dessa 13·76 inches, and fairly general rain was falling over India, except in the Punjab and over parts of Madras and Bombay. The cyclonic circulation of winds in connection with the storm was strong, Mount Abu reporting a wind velocity of 27 miles and Deesa 33 miles,

and this circulation affected the winds of all districts, except the south of the Peninsula and North-Eastern India, where winds were normal.

Temperature.—The following table shows the variation of the mean temperature from the normal on each day of the week for the different Provinces of India. Temperature, it will be seen, has been in defect of the normal practically throughout the week in all districts, except the Punjab, Sind, Rajputana, and Bombay, by amounts averaging about half to one degree:

Province.	September 1893.							Mean variation of week.

Rain.—The concluding table shows that rain has been received during the week in every district except Sind. The falls were in moderately large excess in Burma, Central Provinces, Guzerat, Central India, and Rajputana, and in small or moderate excess in Bengal and in the hill and north-west districts of the Punjab, but elsewhere the falls have been defective during the week. The defects have been large in Assam, particularly in the Burma district, and considerable in the Madras Presidency, in Mysore, the Deccan, Khandesh, Oudh, and the Submontane districts of the Punjab and North-Western Provinces.

The heaviest average actual rainfall of 12·13 inches has been received in Tenasserim, while Arakan has registered 9·70 inches, and average falls of about 6 inches have been received in Lower Burma, Deltaic Bengal, Orissa, Chota Nagpur, and Central India (East); while, on the other hand, average falls of only half an inch or less have been recorded in Assam (Surma), Oudh (North), Punjab (South, Submontane, and West), Bombay Deccan, Hyderabad (South), Madras (Central), and East Coast (Central).

The third column of the table shows that out of 51 districts the falls were in defect in 28 and in excess in 23 only. The defect during the week has exceeded 50 per cent. of the normal fall in the following districts: Assam (Surma, defect 95 per cent.), Assam (Brahmaputra), North Bengal, North Bihar, Oudh (North), North-Western Provinces (Submontane *a*), Punjab (Submontane), Mysore, Bombay Deccan, Khandeish, Sind, Hyderabad (South), Madras (Central), and East Coast (Central). It will be seen in the case of the first seven of these districts that they represent practically the whole of the area at the foot of the Himalayas, while the other stations represent the centre and north of the Peninsula. This distribution of the defective rainfall is easily explained by the course taken by the cyclonic storm, which travelled from the north-west angle of the Bay to Rajputana; and, as is usual in such cases, the storm more or less concentrated the rainfall over its immediate path, while by the indraught towards the storm the rain-bearing current was prevented from reaching the areas to the north and south of the path; and hence the areas abovementioned received very defective rainfall throughout the week.

The three concluding columns of the table show the actual rainfall for the south-west monsoon period (*i. e.*, from the end of May) compared with the normal rainfall up to the 16th September. For this period out of 51 districts 31 have received falls larger than usual, while the remaining 20 districts show defective falls, but the only cases where the defects shown are at all large are Coorg and Mysore, while moderate defects are registered in Lower Burma, North-Western Provinces (Submontane *a*), the west of the Punjab (defect 14 per cent.), Malabar, Central Provinces (West), and Kathiawar.

The following statement shows the largest total amounts received at single stations in various districts during the week, as reported in the rainfall telegrams :

Division.	District.	Station.	Amount.
Tenasserim . .	Amherst . .	Thaton . .	12·30 inches.

Simla, *16th September, 1893.*

ALEX. PEDLER,
Offg. Meteorological Reporter to the Government of India.

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 16th September.*—Rainfall good on the West Coast, Nilgiris, and in the two Northern districts of the Karnatic. Light rain in Godavari, Kistna, and parts of Central and Southern districts; elsewhere only scattered showers. Want of rain continues to be felt, and water-supply for irrigation is getting insufficient in parts of the Karnatic, the Central, and Southern districts. Standing crops generally good, but dry crops in parts of the above districts are suffering for want of rain. Fodder is generally available, but pasture is getting scarce in parts. Condition of cattle is generally good. Prices continue very high, but are slightly easier in the Southern districts.

Bombay.—*For week ending 20th September.*—Rain throughout the Presidency; slight in Sind; more rain required in the Deccan and Karnatak. Standing crops withering for want of rain or damaged by excessive rain, blight, or rats in parts of four districts. Preparations for late crops continue in nine districts. Reaping of early crops progressing in two districts. Prices steady, except in two districts. Fodder sufficient. Agricultural stock good.

Bengal.—*For week ending 16th September.*—There was general rain during the week, the falls being heavy in South-West Bengal, Orissa, and Chota Nagpur. More rain is wanted in parts of North Bihar. Prospects of standing crops show a slight improvement and are generally good, except in the flooded tracts in Darbhanga and Muzaffarpur. Fresh seedlings of rice are being planted where the water has sufficiently subsided. The autumn harvest, which is nearly completed, has suffered from excessive rain in some districts, and in the flooded tracts in Bihar the outturn will be poor. Prices are steady. A slight fall is reported from some districts owing to the appearance of new autumn rice in the market. Cattle are generally in good condition, except in parts of Noakhali, Tipperah, Dacca, and Faridpur, where want of sufficient fodder is felt. Test relief works will again be tried at minimum wages in the affected area in Faridpur and Backergunge; if necessary, test works will also be opened in the Dacca district.

North-Western Provinces and Oudh.—*For week ending 20th September.*—Weather generally cloudy, and rain in most districts. The falls were heaviest in the Central and Submontane districts. Prospects good everywhere. Autumn crops are being reaped, and preparations for the spring sowings are in active progress. Supplies ample. Prices continue to fall.

Punjab.—*For week ending 20th September.*—Rain fell throughout the Province. Ploughing for spring crops commenced. Condition of standing crops is generally reported good and prospects average. In some districts crops withering for want of rain. More rain is wanted in Hissar, Lahore, Shahpur, and Dera Ismail Khan. Some autumn crops in parts of Dera Ismail Khan and Rawalpindi have been damaged by insects. Cattle are generally reported to be in good condition. Fodder sufficient in all districts, except Shahpur, where it is scarce. Prices fluctuating in Peshawar, falling in Delhi, Jullundur, Ferozepore, and Amritsar, and stationary elsewhere.

Central Provinces.—*For week ending 20th September.*—Weather generally cloudy with frequent showers of rain. Rice has been attacked by rust in one district and by blight in another; other autumn crops are doing well. Preparation of land for winter sowings in progress. Fodder ample.

Burma.—*For week ending 16th September.*—In Lower Burma the rainfall was ample. Transplanting generally is finished, but fields which had been damaged by floods are now being replanted in Hanthawaddy, Tharrawaddy, and Thongwa, as the floods have partially subsided. Standing crops generally are good. In Upper Burma rain fell in all districts, and sowing and transplanting of late paddy continue, while early paddy and sesamum are being reaped, and in Myingyan cotton is being picked. Crops generally are in good condition, but more rain is required in Shwebo and Yeu, while damage has been done by floods in Kyaukse. The price of paddy rose in Rangoon, Tharrawaddy, Pakôkku, and Mandalay, and fell in the Upper Chindwin and in the Southern Shan States.

Assam.—*For week ending 19th September.*—Weather seasonable. Transplanting of winter paddy over. Prospects fair. Condition of cattle and supply of fodder normal. Water sufficient.

Mysore and Coorg.—*For week ending 20th September.*—MYSORE: Rainfall good in parts of Bangalore, Tumkur, Kadur, and Shimoga; slight elsewhere. Standing crops withering, except in Hassan, Kadur, and Shimoga. Prices stationary. Prospects favourable, but more rain is needed.

COORG: Rainfall moderate. Rice and coffee crops continue in good condition. Picking of cardamoms in progress. Prices stationary. Fodder and water for cattle ample.

Berar and Hyderabad.—*For week ending 20th September.*—BERAR: Rainfall good. Weather cool and cloudy. Standing crops in good condition, except in Basim taluka, where the cotton crop has suffered from excessive rain. Land being prepared for the ensuing spring crops. Weeding operations in progress. Fodder and water sufficient. Cattle healthy. Prices almost steady.

HYDERABAD: Rainfall moderate. Standing autumn crops being spoiled by heavy rainfall. Sowing of spring crops continues. Prices stationary.

Central India.—*For week ending 20th September.*—Rain general throughout Central India; excessive in Baghelkhand. Agricultural operations in progress in all parts. Land being prepared for the spring sowings. Standing crops good in all parts, except in Baghelkhand and parts of Bhopawar. *Jowar* (*Sorghum vulgare*) damaged to some extent in Western Malwa by excessive rain. Prices of food-grains falling in Gwalior, slightly rising in Bhopal, and steady elsewhere.

Rajputana.—*For week ending 20th September.*—Rainfall generally good throughout Rajputana. Standing crops and cattle generally satisfactory, though in some parts damage to crops from excessive rain is reported. Pasturage or fodder sufficient. Prices falling in six States and steady elsewhere.

Kashmir.—*For week ending 19th September.*—Rainfall moderate. Reaping of rice and maize crops commenced. Prices stationary.

Nepal.—*For week ending 16th September.*—Slight rain. Weather seasonable. Upland rice being rapidly harvested. Outturn good.

E. C. BUCK,

Secretary to the Government of India.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the week ending at 8 a.m. on Saturday, September 23rd, 1893.

The main features in the meteorology of the week have been connected with the history of two cyclonic storms. The first storm had been in existence throughout the previous week, and on the last day of that week it was to the north-west of Mount Abu and Deesa, and had been previously moving in a west-north-westerly direction at the rate of 8 or 10 miles an hour. From the beginning of the present week the storm commenced to recurve, and moved first in a northerly, and then in a north-easterly direction. While recurving, it moved very slowly, perhaps at the rate of 1 to 3 miles an hour ; but when it had taken up its north-easterly course, it again moved at nearly the rate of 10 miles an hour, and passed close to Sirsa and Ludhiana, and into the hills to the west of Simla, where it broke up between the 19th and 20th. The storm gave strong winds and heavy rain in its neighbourhood almost throughout its existence, and behind it a moderate inrush of monsoon winds took place, so that during this period south-west monsoon weather again prevailed generally over India.

On the day the first storm broke up in the Himalayas—that is, on the 20th—another small storm developed in the north of the Bay of Bengal, and this steadily increased in intensity up till the close of the week, when it crossed the coast moving in a westerly or west-north-westerly direction, and on the morning of the 23rd was a short distance to the south-east of Cuttack. This also was a rather severe storm, and by the indraught towards it the monsoon winds were prevented from reaching the greater part of India from the 20th to the 23rd, though the storm gave heavy rain in Orissa, Bengal, and Burma. Thus

during the last three days of the week little rain fell over the greater part of India, except to the north and east of the storm.

On the 16th September, or the last day of the previous week, the cyclonic storm which had travelled across India from the head of the Bay of Bengal was still moving in a west-north-westerly direction, though its rate of advance had become slower, and at 8 A.M. of the 16th the centre of the small storm was to the north-west of Deesa and Mount Abu, or to the south-west of Bikanir. It was a considerable storm, and still formed the dominant feature in the meteorology of India on this day. On the 17th pressure was falling over the Punjab and locally at Bikanir and Hyderabad, while it was rising over Central and Western India and the remainder of Northern India, though a slight fall was in progress over the Bay of Bengal and at the adjacent coast stations. The storm on this day was to the west-south-west or south-west of Bikanir, and had moved only very slowly in a northerly direction since the previous day. It cannot have advanced more than about 80 miles in the 24 hours, or at the rate of 3 miles an hour on this day, instead of at the rate of 8 or 10 miles on the previous days. This again is an instance of the fact that when a cyclonic storm recurves, its velocity of advance is much retarded. The storm still formed the main feature in the meteorology of the 17th, and it was giving very heavy rain over the area affected by it, Mount Abu reporting 9·20 inches and Deesa 3·07 inches. Mount Abu had thus received a rainfall in connection with this storm of 32·88 inches within three days. On the 18th the storm was rather close to Bikanir, but the centre was still to the south or south-west of that station, so that it had advanced in a northerly, or perhaps even a north-north-easterly, direction during the previous day, and at an even slower rate of speed than on the previous day—probably at only about a mile an hour. Pressure had continued to fall moderately in the Punjab and over parts of Sind and Rajputana, while a slow fall had taken place over the remainder of India. The storm was still influential, and pressure was in defect over North-Western India by amounts ranging up probably to about a quarter of an inch at Bikanir, while over the Peninsula and North-Eastern India pressure was in moderate excess. The storm was still giving heavy rain over the area affected by it, and Mount Abu had again received 9·20 inches, making the large total of 42·08 inches of rain within four days. Fairly general rain was also being received over India owing to the monsoon currents brought up in the rear of the storm, except in parts of the Peninsula, the North-Western and Central Provinces, and the west and south of the Punjab. On the 19th the storm had moved rapidly in a north-easterly direction, and its centre was between Ludhiana and Sirsa, so that it had advanced over at least 200 to 250 miles, or again at the rate of nearly 10 miles an hour, as contrasted with about one mile an hour on the previous day. This again illustrates the fact that after a storm has finished recurving (during which process it moves very slowly), it again quickly increases in the rapidity of its advance. The storm was still deep on the 19th, and the defect of pressure at Ludhiana and Sirsa equalled about a fifth of an inch, though the strength of the cyclonic circulation of winds accompanying the storm was not very great. The storm had given moderate to heavy rain to all districts, except the south of the Peninsula and Bombay, many stations near the storm centre reporting two and three inches on the 19th. The rainfall on this day had extended over the Punjab as far as Mooltan, which received 0·62 inch. From the 19th to the 20th the storm continued its north-easterly movement and broke up in the hills to the west of Simla, and on the morning of the 20th there was no indication of its existence. A very rapid increase of pressure then occurred over North-Western India, the increase at Ludhiana equalling 0·236 inch, and with this rapid increase pressure became in excess of the normal, except at the extreme western stations, over the south of the Peninsula, and over the Bay of Bengal. The storm in breaking up had again given heavy rain over North-Western India, and general rain was received in the Punjab, except at the extreme western stations. Chakrata received 5·40 inches, Umballa and Mussoorie more than 3 inches, Dehra Dun, Sialkot, and Ranikhet more than 2 inches, Meerut, Roorkee, Ludhiana, Rawal Pindi, and Simla more than 1 inch, Delhi ·085 inch, and Lahore 0·42 inch. Thus this storm brought up a large amount of rainfall

in its actual track, and gave good general rain to the greater part of the Punjab, while the monsoon currents flowing in behind it gave also good general rain to the greater part of Northern and Central India.

On the 20th, or the day on which the storm in North-Western India disappeared, a small barometric depression, or the commencement of another storm, made its appearance in the north of the Bay of Bengal, but it was on this day very feeble. On the 21st pressure was rising moderately to rapidly over North-Western India, while it was falling elsewhere, the fall being moderate in Bengal and at the head of the Bay, so that the barometric depression over the north of the Bay became more pronounced, and on this day it probably existed as a definite storm, though of slight importance, off the South Orissa Coast. On the 22nd a rapid fall of pressure had taken place in connection with the small storm, the fall at False Point equalling 0·103 inch; a small fall had also taken place over the Peninsula and Northern India, and a rather rapid increase in East Bengal and Burma. The small storm was very well defined on this day, and had a centre a short distance to the south-east of False Point, where pressure was 0·185 inch in defect. It was also clear that the storm on this day was beginning to move in a westerly or west-north-westerly direction. This storm again formed the dominant feature in the meteorology of the 22nd, and it was giving moderate to heavy rain in Orissa, Bengal and Burma, and over parts of the Central Provinces, while from the indraught towards the storm, which drew away the monsoon winds towards the storm area, the remainder of India was almost rainless. On the 23rd, or the last day of the week under review, the centre of the small storm had crossed the coast to the south of False Point, probably near Pooree, and had advanced to the south-east of Cuttack, where the very low pressure of 29·186 inches was reported—a pressure no less than 0·508 inch below the normal. It was therefore a storm of very considerable intensity, and was giving a very strong cyclonic circulation of winds, and rather heavy weather was experienced in the Bay of Bengal From the 22nd to the 23rd the movement of the storm was slow, probably not more than 2 or 3 miles an hour, and in a westerly or west-north-westerly direction. The strong cyclonic circulation of winds which accompanied the storm affected the wind circulation over practically the whole of India. On the 23rd heavy rain was reported in Orissa, Bengal, and Burma, and moderate rain in the eastern districts of the Central Provinces, while showers due to the disturbed weather caused by the storm were occurring in other districts.

Temperature.—The following table shows the variation of the mean temperature from the normal on each day of the week for the different Provinces of India. Temperature, it will be seen, has been in defect practically throughout the week in every district. The defect has been largest in the Punjab, where it has equalled 4°, and the mean defect for the whole of India for the week has been 1·8°.

Rainfall.—The concluding table shows that rain has been received during the week in every division of India. The falls have been comparatively large in

all districts, except in Bombay, the Malabar Coast districts, Madras (except the north-eastern sections), Berar, Khandeish, Guzerat, Kathiawar, and over parts of the North-Western and Central Provinces and Oudh, where somewhat defective falls have been received. The defects have been largest in the districts of Malabar, Madras (South Central), Madras (South), Coorg, Mysore, Bombay Deccan, Khandeish, Guzerat, and Kathiawar, where the actual falls have been less than half the usual amounts. On the other hand, large excess falls, where the amounts have been twice as large as usual, have occurred during the week in North Behar, South Punjab, Central Punjab, Submontane Punjab, North-West Punjab, West Punjab, East Central Provinces, Rajputana, West Central India, and Madras East Coast (North *a*), and over the whole of the Punjab the falls have varied from about three to ten or twenty times as large as usual. Indeed, the heaviest actual rainfall for the week has occurred in the Submontane districts of the Punjab, where an average of no less than 7·59 inches has fallen, against a normal fall of 0·70 inch. The hill districts of the Punjab have also received a fall of 6·58 inches against the usual amount of 1·18 inches. The Madras East Coast (North *a*) has also received the heavy fall of 7·30 inches, and Tenasserim has received an average fall of 6·31 inches. The smallest falls have been received in the districts of Madras (South and South Central), Mysore, Kathiawar, and Sind, where the falls have been less than a quarter of an inch, and in Malabar, Bombay Deccan, Khandeish, and Madras (East Coast South), where the falls have been less than half an inch. Of the 51 districts into which India has been divided, the falls during the past week were in excess in 26 districts and in defect in 25; but the excess falls have decidedly more than counterbalanced the defective falls, and the fall for the week has been unusually heavy.

The last column of the table gives the comparisons between the actual rainfall in the present year with the fall in normal years of the south-west monsoon season from the 28th May up to the 23rd of September. It will be seen again that out of the 51 rainfall divisions, the falls have been in excess of the normal in 35 districts and in defect in 15 districts, while the fall has been normal in one (Arakan). The divisions in which the falls have been rather largely defective up to date are Coorg, Mysore, and Kathiawar, while they have been moderately defective in Lower Burma, North-West Provinces (Submontane *a*), Malabar, and Central Provinces (West). On the other hand, the falls up to date have been excessive in West Rajputana, North-West Punjab, and Hyderabad (South).

The following statement shows the largest amounts of rain received at single stations in various districts during the week as reported in the rainfall telegrams:

Division.	District.	Station.	Amount.
Tenasserim	Amherst	Thaton	7·43 inches.
Assam	Goalpara	Goalpara	7·59 ,,
North Bengal	Jalpaiguri	Bhagatpur	8·87 ,,

SIMLA, *28th September, 1893.*

ALEX. PEDLER,
Offg. Meteorological Reporter to the Government of India.

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 23rd September.*—Rainfall good in the Circars, and moderate, though partial, in the Deccan and Karnatic. Generally little or no rain in the Central, Western, and Southern districts, though fair rain in some parts of Tanjore. Sowings being retarded and standing crops suffering for want of rain in many districts. Early crop harvest proceeding with fair outturn. Fodder is sufficient, but pasture is growing scarce in many parts Prices almost stationary in the Circars and on the West Coast, but have risen generally elsewhere.

Bombay.—*For week ending 27th September.*—Rain throughout the Presidency, but more is required, especially in the Deccan and Karnatak. Standing crops withering for want of moisture and damaged by excessive rain or rats in parts of six districts. Preparations for, and sowing of, late crops continue in nine districts. Reaping of early crops progressing in three districts. Prices steady, except in two districts. Fodder sufficient. Agricultural stock good.

Bengal.—*For week ending 23rd September.*—There has been good general rain over the whole Province during the week. Prospects of standing crops continue to be generally promising, except as previously reported, in the flooded parts of Eastern Bengal and Bihar. In Darbhanga and Muzaffarpur the work of retransplantation is proceeding. The autumn harvest is almost over. Jute is being steeped and washed. In many districts lands are being prepared for the early spring sowings which have begun in some districts. Prices are steady, but in some of the Bihar districts a slight tendency to fall is reported. Cattle are generally in good condition, and the fodder supply is sufficient, except in parts of East Bengal.

North-Western Provinces and Oudh.—*For week ending 27th September.*—Rain has fallen in almost all reporting districts; the falls were heaviest in the Central and Submontane districts. Prospects everywhere favourable. Harvesting of the autumn crops is in progress, and the ground is being prepared for the spring sowings. Supplies and fodder plentiful. Prices falling.

Punjab.—*For week ending 27th September.*—Rain has fallen in all districts except Sialkot. Harvesting of autumn crops commenced in Umballa. Ploughings for spring crops in progress. Crops are generally reported to be in good condition; prospects average in some districts. Crops suffering for want of rain in parts of Dera Ismail Khan. Condition of cattle is generally good. Fodder sufficient in all districts except Shahpur, where it is scarce. Prices unsettled in one district, falling in three others, and stationary elsewhere.

Central Provinces.—*For week ending 27th September.*—Weather alternately clear and cloudy with heavy falls of rain in the Chhattisgarh country. Excessive rain in Sambalpur has checked the growth of the crops, and in Chanda *jowar* (*Sorghum vulgare*) has suffered from the same cause. Sowing of winter crops begun in Nagpur. Fodder plentiful.

Burma.—*For week ending 23rd September.*—In Lower Burma the rainfall was sufficient. Transplanting almost completed; replanting of areas damaged by floods in Hanthawaddy, Tharrawaddy and Thongwa progressing. Early crops on hills in Toungoo being reaped. Slight damage done to crops in parts of the Shwegyin district, but elsewhere standing crops are generally good. In Upper Burma rain fell in all districts. Sowing and transplanting of wet-weather paddy continue. Early paddy reaped in Kyaukse, and reaping in progress in three other districts. Sesamum is being reaped and cotton is being picked. Crops are generally good, and, owing to the fair rainfall, the crop prospects in Shwebo have slightly improved; but rain is still wanted in parts of that district and in Yeu for the plants in nurseries. Slight damage has been done to crops in Myingyan and Kyaukse by floods and in Minbu by excessive rain. In Lower Burma the price of paddy has risen slightly in three districts and fallen considerably in one; while in Upper Burma it has risen in four districts and fallen slightly in one.

Assam.—*For week ending 26th September.*—Weather seasonable. Crop prospects favourable. Transplanting of late rice finished. Fodder insufficient in the Surma Valley, but sufficient in the Assam Valley. Condition of cattle normal.

Mysore and Coorg.—*For week ending 27th September.*—MYSORE: Standing crops withering, except in Hassan and Shimoga and part of Chitaldrug. Prices risen in all but two districts. Prospects favourable, but rain is much needed.

COORG: Rainfall moderate. Rice and coffee crops continue in good condition. *Ragi* (*Eleusine coracana*) crop ripening. Picking of cardamom continues. Slight rise in prices. Fodder and water for cattle ample.

Berar and Hyderabad.—*For week ending 27th September.*—BERAR: Rainfall good. Weather cool and cloudy. Standing crops in good condition. Cotton in flower and pods in some places. Land under preparation for next spring crops. Weeding operations continue. Fodder and water sufficient. Cattle healthy. Prices almost stationary.

HYDERABAD: Rainfall good. Weeding of irrigated crops in progress. Sowing of spring crops continues. Prices stationary.

Central India.—*For week ending 27th September.*—Rain general throughout Central India; more than sufficient in Baghelkhand. Agricultural operations in progress in all parts. Land is being prepared for spring sowings in Bundelkhand and Bhopawar. Standing crops good in all parts, but damaged in Baghelkhand by rain and storms and in parts of Bhopawar, where *jowar* (*Sorghum vulgare*) has been damaged slightly by insects. Prices of food-grains falling in Gwalior, rising in Bhopal, fluctuating in parts of Bhopawar, and steady elsewhere.

Rajputana.—*For week ending 27th September.*—Good rain in Marwar; slight elsewhere. Agricultural operations, standing crops, and cattle generally satisfactory. Crops damaged in parts by excessive rain. Pasturage or fodder sufficient. Prices falling in four States, fluctuating in one, and steady elsewhere.

Kashmir.—*For week ending 26th September.*—Rainfall moderate. Reaping of rice and maize crops in progress. Prices stationary.

Nepal.—*For week ending 23rd September.*—Slight showers. Prospects good. Prices stationary.

GOVERNMENT OF INDIA.

FINANCE AND COMMERCE DEPARTMENT.

STATISTICS AND COMMERCE.

STATISTICS.

Simla, the 27th September, 1893.

Read the following communications submitting the reports of Registrars of Joint Stock Companies on the working of the Indian Companies Act, VI of 1882, during the official year 1892-93:

From the Government of Madras, No. 1184, dated the 12th June 1893.
From the Government of Bombay, No. 5483, dated the 29th July 1893.
From the Government of Bengal, No. 2071-P., dated the 1st July 1893.
From the Government of the North-Western Provinces and Oudh, No. 496—VII—117-B., dated the 30th June 1893.
From the Government of the Panjab, No. 37, dated the 19th June 1893.
From the Chief Commissioner, Central Provinces, No. C—41, dated the 1st July 1893.
From the Chief Commissioner, Burma, No. 649—1-T-3, dated the 30th June 1893.
From the Chief Commissioner, Assam, No. 860-Misc.—4779-G., dated the 9th May 1893.
From the Chief Commissioner, Ajmere-Merwara, No. 648—817, dated the 21st June 1893.
From the Chief Commissioner, Coorg, No. 1131—85-86, dated the 24th July 1893.
From the Secretary for Berar to the Resident at Hyderabad, No. 178, dated the 26th June 1893.
From the Resident in Mysore, No. 2314—53-85 and No. 2870—53-85, dated respectively the 8th July and the 22nd August 1893.

RESOLUTION.—At the close of 1891-92 there were 950 joint stock companies in existence registered under the Indian Companies Act. They possessed a total nominal capital of Rx. 36,023,238, the actual (paid up) capital being Rx. 26,585,481. The capital of 89 of these companies was increased in 1892-93 nominally by about Rx. 207,698, and actually by about Rx. 492,388; while 69, with a paid-up capital of about Rx. 820,444, ceased to work.

During 1892-93 the number of companies registered was 71, their nominal capital being Rx. 1,134,437; the paid-up capital cannot be completely stated, the amount not having been as yet reported in several cases.

At the close of 1892-93 there existed 956 companies whose nominal capital was Rx. 35,372,842, the actual capital, so far as reported, being Rx. 26,793,186. This gives an increase in the year in the paid-up capital of Rx. 207,705, or ·78 per cent. The table in the next paragraph shews that the greatest part of this increase, namely, Rx. 180,890, occurred in Bengal. Small increases occurred in all the other Provinces, with the exception of Bombay, where there was a decrease of Rx. 114,698.

2. The following table shews the number of companies and the amount of paid-up capital in each of the provinces in the last two years:

Province.	Number of Companies.		Paid-up capital.		Increase or decrease per cent. in capital in 1892-93.	Provincial proportion of paid-up capital to all paid-up capital in 1892-93.
	1891-92.	1892-93.	1891-92.	1892-93.		
			Rx.	Rx.		
Bengal	322	325	11,729,761	11,910,651	+ 2	44·5

* Not reported.

C

3. Of the whole invested capital, Bengal has 44½ per cent. and Bombay about 40 per cent. In Madras the number of companies is large, but the capital invested is not more than about one-sixth of the capital invested in either Bengal or Bombay. Two-thirds of these Madras companies are money-lending concerns, each trading on a very small capital.

4. The following table shews the distribution of the aggregate capital in the principal classes of joint-stock enterprise:

Companies.		Number.	Nominal capital.	Paid-up capital.
			Rx.	Rx.
Banking, Loan, and Insurance	Banking and loan	256	5,762,787	3,749,863
	Insurance	8	469,500	79,306
	Total ...	264	6,232,287	3,829,169
Trading	Merchants and traders	117	2,642,602	1,863,652
	Navigation	7	1,031,500	873,940
	Railways and tramways ...	10	1,137,000	979,582
	Co-operative associations... ...	24	73,640	51,395
	Shipping, landing, and warehousing ...	5	73,000	56,889
	Total ...	163	4,957,742	3,825,458
Mills and Presses ...	Cotton mills	59	5,780,225	4,965,026
	Jute mills	12	1,688,000	1,209,485
	Mills for cotton, jute, wool, silk, hemp, &c.	68	5,462,450	4,188,952
	Cotton and jute screws and presses ...	87	1,534,550	1,374,081
	Other mills and presses	37	881,280	547,460
	Total ...	263	15,346,505	12,285,004
Tea and other Planting Companies.	Tea	142	4,332,908	3,636,898
	Coffee and chinchona	5	42,500	38,339
	Others	10	108,500	95,628
	Total ...	157	4,483,908	3,770,865
Mining and quarrying		54	2,578,250	1,661,160
Ice manufacture		12	235,050	186,387
Sugar manufacture		3	227,500	162,204
Breweries		3	170,000	169,540
Others		37	1,141,600	903,399
	Grand Total ...	956	35,372,842	26,793,186

Nearly 46 per cent. of the paid-up capital is invested in mills and presses chiefly for working or pressing cotton, jute, wool, and silk. The greater number of these are registered in Bombay, that Presidency representing under this head a paid-up capital of Rx. 8,289,710, or over two-thirds of the whole, most of it invested in cotton mills and presses. Rx. 2,332,205 represent the paid-up capital invested in mills and presses registered in Bengal, a large number of them being jute mills and presses.

The paid-up capital invested in banking or loan companies amounts to Rx. 3,829,169, of which Rx. 2,368,482 are in companies registered in Bengal and Rx. 793,322 in Madras.

Trading companies have a paid-up capital of Rx. 3,825,458, of which Rx. 873,940 are invested in coasting and river steamer companies, and about Rx. 979,582 in railways and tramways. The bulk of the railway and tramway capital is invested in the Bombay tramways (Rx. 309,800), the Darjeeling-Himalayan Railway (Rx. 175,000), the Tarkessar Railway (Rx. 175,000), the Nilgiri Railway (Rx. 182,500), the Rangoon Steam Tramway (Rx. 60,000), and the Deoghur Railway (Rx. 27,500).

In tea, coffee, and other plantations Rx. 3,770,865 of paid-up capital are invested, of which Rx. 3,597,675 are held in Bengal, most of the tea companies being registered in Calcutta.

Of the Rx. 1,661,160 invested in mining and quarrying companies, Rx. 1,422,122 are in companies registered in Bengal, Rx. 611,070 being invested in coal-mining companies, and about Rx. 680,000 in gold-mining companies.

5. The figures below compare the paid-up capital of each of the last two years under each of the principal groups:

	Paid up in—	
	1891-92.	1892-93.
	Rx.	Rx.
Banking and loan	3,733,293	3,749,863
Merchants and traders	1,839,937	1,863,652
Mills for cotton, jute, wool, silk, and hemp	10,281,999	10,363,463
Cotton and jute presses	1,334,697	1,374,081
Tea	3,648,834	3,636,898
Mining and quarrying	1,615,895	1,661,160
Navigation	891,165	873,940
Railways and tramways	958,958	979,582

The capital invested in mills (mainly cotton mills) increased by less than one per cent., and in railways and tramways by 2·15 per cent. In mining and quarrying the increase was 2·8 per cent. In tea there was a fractional decrease. Under other heads there was no material increase of capital, and in some there was a decrease. On the whole the year shews hardly any expansion of joint-stock enterprise.

6. The following table shows the number of companies under each category during the last five years:

Companies.		1888-89.	1889-90.	1890-91.	1891-92.	1892-93.
Banking, Loan, and Insurance.	Banking and loan ...	314	291	275	259	256
	Insurance	17	16	13	14	8
	Total ...	331	307	288	273	264
Trading	Merchants and traders ...	105	108	107	119	117
	Navigation	7	9	7	8	7
	Railways and tramways ...	12	12	11	11	10
	Co-operative associations ...	20	18	18	24	24
	Shipping, landing, and warehousing.	5	5	6	6	5
	Total	149	152	149	168	163
Mills and Presses ...	Cotton mills	58	56	56	57	59
	Jute mills	10	10	11	11	12
	Mills for working cotton, jute, wool, silk, hemp, etc.	58	61	63	63	68
	Cotton and jute screws and presses.	63	68	76	83	87
	Other mills and presses ...	30	30	27	31	37
	Total ...	219	225	233	245	263
Tea and other Planting Companies.	Tea	129	133	140	144	142
	Coffee and chinchona ...	7	7	6	5	5
	Others	9	4	8	9	10
	Total ...	145	144	154	158	157
Mining and quarrying		20	21	63	57	54
Ice manufacture		13	13	12	12	12
Sugar manufacture		1	1	2	2	3
Breweries		3	3	3	3	3
Others		14	20	24	32	37
	Grand Total ...	895	886	928	950	956

The classification in the foregoing table of "cotton mills," "jute mills," and "mills for working cotton, jute, wool, silk, hemp, etc.," is taken from the Articles of Association; but of the mills in the last of these three groups, the largest number are cotton mills.

7. The following table shews, so far as reported, the total number of joint stock companies at work in India with their nominal and paid-up capital at the end of each of the last ten years:

Years.	Companies at work	Nominal capital.	Paid-up capital.	Increase or decrease of paid-up capital.
		Rx.	Rx.	Rx.
1883-84	649	26,673,438	18,750,611	+1,734,707 = 10 %
1884-85	696	27,887,691	20,635,844	+1,885,233 = 10 ,,
1885-86	805	28,543,437	21,002,568	+ 366,724 = 2 ,,
1886-87	888	29,136,165	21,380,442	+ 377,874 = 2 ,,
1887-88	910	30,254,284	22,326,192	+ 945,750 = 4 ,,
1888-89	895	31,339,845	22,997,508	+ 671,316 = 3 ,,
1889-90	886	32,321,731	23,684,202	+ 686,694 = 3 ,,
1890-91	928	35,058,776	24,458,445	+ 774,243 = 3 ,,
1891-92	950	36,023,238	26,585,481	+2,127,036 = 9 ,,
1892-93	956	35,372,842	26,793,186	+ 207,705 = 0·78 ,,

8. The statistics of companies limited by guarantee, so far as they go, shew that there were 25 such companies at the close of 1891-92; 3 ceased to work in 1892-93, and 4 new companies being added, there were 26 such companies at the close of the year.

9. The fees realized and the expenditure in each province last year were—

Province.	Fees.	Expenditure.
	Rs. A. P.	Rs. A. P.
Bengal	8,533 12 0	683 8 5

(*a*) Includes the Bezváda-Godaveri section of the East Coast (state) railway.
(*b*) Includes the Godhra-Rutlam railway.
(*c*) Includes the Guntakal-Mysore frontier section from 1st April 1893.
(*d*) Includes the Tirhoot state railway. Although for convenience classed amongst the state railways, the company's section of this line is the property of the Bengal and North Western railway company.
(*e*) Includes the Jammu and Kashmir and the Hyderabad-Umarkot railways.
(*f*) Although for convenience classed amongst the state railways, this line is the property of the Bengal Central railway company.
(*g*) Total receipts from 15th July to 16th September 1893.
(*h*) Includes the Wardha Coal, Dhond-Manmád, Khámgaon, and Amraoti railways.
(*i*) Includes the Bangalore-Nanjangúd and the Bangalore-Mysore frontier sections.
(*j*) Total receipts from 12th April to 16th September 1893.

F. B. HEBBERT,
Under-Secretary.

SIMLA, *the 28th September, 1893.*

Printed and published for the GOVERNMENT OF INDIA, *at the* GOVERNMENT CENTRAL PRINTING OFFICE, *Simla.*

SUPPLEMENT TO

The Gazette of India.

No. 40.} CALCUTTA, SATURDAY, OCTOBER 7, 1893.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

FINANCE AND COMMERCE DEPARTMENT.

GOVERNMENT OF INDIA.

HOME DEPARTMENT.

REVIEW OF THE RESULTS OF THE MEASURES ADOPTED FOR THE EXTERMINATION OF WILD ANIMALS AND VENOMOUS SNAKES DURING THE YEAR 1892.

No. $\frac{33 \text{ Public}}{1465-1474}$.

Extract from the Proceedings of the Government of India in the Home Department (Public),—dated Simla, the 4th October, 1893.

Read—

Home Department Resolution No. $\frac{17 \text{ Public}}{2183-2193}$, dated the 10th November 1892, reviewing the reports on the results of the measures adopted for exterminating wild animals and poisonous snakes in British India during the year 1891.

Read also the following letters from Local Governments and Administrations submitting returns for the year 1892:

From the Government of Madras, No. 468-A., dated the 1st June 1893, and annexures; also endorsement No. 2075-A., dated 6th June 1893.
From the Government of Bombay, No. 2995, dated the 25th August 1893, and enclosures.
From the Government of Bengal, No. 2487-J., dated the 30th May 1893, and enclosure.
From the Government of the North-Western Provinces and Oudh, No. 1733, dated the 17th July 1893, and enclosures.
From the Government of the Punjab, No. 741, dated the 1st July 1893, and enclosures.
From the Chief Commissioner of the Central Provinces, No. 3645, dated the 13th May 1893, and enclosures.
From the Chief Commissioner of Burma, No. 844—1 W-1, dated the 29th April 1893, and enclosure.
From the Chief Commissioner of Assam, No. $\frac{456 \text{ Mis.}}{5316}$ G., dated the 6th April 1893, and enclosures.
From the Chief Commissioner of Coorg, No. $\frac{96}{455-85}$, dated the 21st January 1893, and enclosures.
From the Resident at Hyderabad, Nos. 110 and 140, dated the 8th April 1893 and the 20th May 1893, and enclosures.
From the Chief Commissioner of Ajmere-Merwara, No. 347, dated the 29th March 1893, and enclosure.
From the Resident in Mysore, No. $\frac{487}{23-88}$, dated the 8th February 1893, and enclosure.

RESOLUTION.

The usual statement showing the mortality caused by wild animals and venomous snakes during the year 1892, and particulars of the measures taken during the year for the destruction of such animals and snakes, is appended to this Resolution.

2. The loss of human life caused by wild animals during 1892 is compared below with that reported during 1891:

Province.	No. of persons killed during: 1891.	1892.
Madras	229 (*a*)	316
Bombay	80	48
Bengal	1,584	1,664
North-Western Provinces and Oudh	236	233
Punjab	65	56
Central Provinces	310	317
Burma	121	85
Assam	200	209
Coorg	3	1
Hyderabad Assigned Districts	29	31
Ajmere and Merwara	4	3
TOTAL ...	2,861	2,963

(*a*) Revised figure furnished by the Madras Government.

The figures shown under 1891 differ slightly from those entered in the Resolution of the Government of India dated the 10th November 1892, corrections having been reported in the figures for the Madras Presidency. The Provinces in which the loss of life from this cause was highest in proportion to population in 1892 were, as usual, Assam, the Central Provinces, and the Lower Provinces of Bengal; the mortality in these Provinces was one in 25,996, one in 34,020, and one in 42,877 of the population respectively. The average result for all the Provinces taken together was a mortality of one person in every 74,677 of the population as compared with one person to every 77,339 in 1891. This result differs but little from that reported ten years ago; the proportion in 1882 having been one person killed to every 76,303 of the population, and in 1881 one person to every 72,124.

3. Altogether 19,025 deaths of human beings from snake-bite were reported in 1892 as compared with 21,389 deaths in 1891. As in previous years, the largest number of deaths from this cause occurred in Lower Bengal and the North-Western Provinces and Oudh, but in both these Provinces there was a considerable decrease in the mortality reported. The average result for all Provinces is that one person in every 11,630 of the population died from snake-bite during 1892 as compared with one person in every 10,345 in 1891. Details for each Province are shown in the following figures:

Province.	No. of persons killed by snakes during: 1891.	1892.
Madras	... 1,433	1,455
Bombay	... 1,187	1,038
Bengal	... 10,031	9,120
North-Western Provinces and Oudh	... 6,013	4,566
Punjab	.. 799	871
Central Provinces	... 1,099	999
Burma	... 418	543
Assam	... 209	208
Coorg	... 4	0
Hyderabad Assigned Districts	... 145	189
Ajmere and Merwara	... 51	35
Bangalore	... 0	1
TOTAL ...	21,389	19,025

It is satisfactory that the number of deaths from snake-bite in 1892 is considerably less than that reported in any of the last three years; in 1889 and 1890 the number of deaths amounted to 22,480 and 21,361 respectively, but the average number of deaths a year between 1879 and 1888 was 19,686. The decrease in 1892 can, at present only, be regarded as accidental and temporary.

Altogether 81,668 head of cattle are reported to have been destroyed by wild beasts and snakes as compared with 70,822 in 1891; but these figures can hardly be accepted as having much value.

4. The number of wild beasts destroyed is returned at 15,988 as compared with 16,518 in 1891; the total amounts paid as rewards for their destruction was Rs. 1,07,974 against Rs. 1,06,478 in 1891. The number of snakes returned as destroyed in 1892 was 84,789 as compared with 85,159 in 1891; and the amount of the rewards paid for their destruction was Rs. 9,741 as compared with Rs. 9,163. The statistics of the destruction of snakes are not of much practical value; but it is noticed that in the Bombay Presidency the number of snakes killed in 1889 and 1890 was returned as over 400,000, while in 1892 the number, exclusive of 6,900 snakes killed in Sind without reward, has fallen to 292. Nearly all this decrease has taken place in the Satara and Ratnagiri districts; and it is said to be due to the reduction from six pies to one pie of the reward for *phursas* in Satara, and in Ratnagiri to the grant of rewards for the destruction of snakes being restricted to the months immediately preceding the breeding season. These

changes in the system of granting rewards have, it is explained, discouraged professional snake-catchers from going into the jungle and seeking out snakes, especially during the month immediately following the breeding season, when the young snakes are helpless and less poisonous and can be caught with comparatively little trouble.

5. The number of gun-licenses issued free of cost for the purpose of destroying wild animals remained about the same as in the previous year—69,310 as compared with 69,133. These figures, of course, only include licenses issued expressly for the purpose of destroying wild animals and protecting crops; they do not include the ordinary licenses, which are issued in large numbers on payment of a very small fee.

6. The measures which should be taken for reducing the lamentable mortality caused by wild beasts and snakes have been described at length in the Resolutions issued by the Government of India in the last three years; and there is nothing new to be said. As regards the prevention of mortality by wild beasts, the measures recommended by the Government of India, briefly stated, are that all possible facilities should be given for obtaining rewards for wild beasts killed, and that Police or Revenue officers in outlying parts of a district should, where practicable, be empowered to grant rewards; that arrangements should be made for the timely offer of special rewards in the case of animals which have begun to take human life or even to make a practice of attacking cattle; that shooting parties should be encouraged and assisted by local officers, especially in the killing of animals which have shown destructive tendencies; and that licenses under the Arms Act should be freely given. The reports show that these recommendations have been kept in view by Local Governments and Administrations; and it does not appear practicable to take any further general measures for reducing the mortality from this cause. The number of human beings killed by wild beasts, moreover, though it appears large in the aggregate, is comparatively small relatively to population.

7. The mortality from snake-bite is far greater, and more difficult for the authorities to deal with. In the Resolution dated the 4th December 1890, the Government of India reviewed in detail the measures which had been adopted under this head in previous years, and came to the conclusion that no system of granting rewards for snakes was likely to have any appreciable effect in reducing the mortality from snake-bite. Much good can be done by removing the jungle and undergrowth which afford cover for snakes in village sites. This measure was recommended by the Government of India in 1890, and it is now engaging the attention of Local Governments and Administrations; in order that it may be carried out on a basis likely to be successful, it is desirable that those villages in particular should be singled out for the experiment in which deaths have actually occurred from snake-bite on the village site, and it contains any dense jungle and undergrowth which is readily removable. In last year's Resolution it was suggested that pictures of poisonous snakes should be procured and circulated in districts where such snakes are common, so that the people might learn to know and readily identify those snakes which are really poisonous. Applications have been received from several Local Governments in reply to this suggestion, and will be forwarded to the Secretary of State in due course, with a request that the pictures asked for may be struck off and sent out. The Government of India will also be ready to forward to the Secretary of State any applications which private gentlemen may desire to make for these pictures: such applications should be submitted through the Local Government. For the rest, the Government of India must leave it to the people themselves to take such steps as are practicable for destroying snakes and diminishing the mortality from snake-bite. Although the Government of India are not prepared to press Local Governments and Administrations to adopt any general system of giving rewards for snakes, it is possible that in some localities a system of rewards will be found to be efficacious. In such cases the Local Governments and Administrations have entire discretion to grant, or to authorize or encourage local bodies to grant, money rewards for snakes destroyed. In the Bombay Presidency it appears that the reduction of the amounts granted and other restrictions in the system of rewards have actually had the effect of discouraging people who formerly made a practice of destroying poisonous

snakes; and it is for consideration whether the former system of rewards should not be reverted to, wholly or with modifications, in that Presidency or in any other localities in which similar changes may have been made with the same result. This and similar questions, however, can in all cases be best decided by the Local Governments and officers on the spot.

ORDER.—Ordered, that a copy of this Resolution be forwarded to Local Governments and Administrations for information and guidance, and that it be published in the *Gazette of India* for general information.

Also that a copy be communicated to the Foreign Department.

[True Extract.]

C. J. LYALL,

Secretary to the Government of India.

Statement showing the results of the measures adopted in British India with the view of exterminating wild animals and venomous snakes during the years 1891 and 1892.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the week ending at 8 a.m. on Saturday, September 30th, 1893.

The main feature in the meteorology of the week has been connected with the small cyclonic storm which had formed in the Bay of Bengal at the close of the previous week, and which on the last day of that week had crossed the Orissa Coast and was near Cuttack. It continued its advance in a west-north-westerly direction at the rate of about 8 miles an hour, and reached the Central Provinces to the north-west of Sambalpur on Sunday, the 24th. It then recurved and advanced in a northerly direction at the rate of rather more than 10 miles an hour, and on the 25th was between Benares and Patna, and, continuing its northerly advance, it broke up in the Himalayas to the west of Katmandu between the 25th and 26th. It gave heavy rain to the whole of North-Eastern India, and the rainfall extended to the eastern districts of the North-Western Provinces, and during its advance it gave strong winds and bad weather generally to North-Eastern India. After the storm had broken up, the disturbed conditions due to it began to disappear, perhaps a little more slowly than usual. Pressure rose over Northern and North-Western India, and the pressure distribution became that which marks the conclusion of the south-west monsoon season, but rather hastened by the existence of a barometric depression over Burma. Hence dry north-westerly and westerly winds quickly set in over Northern India, and the moist air or monsoon current retreated southwards, and at the close of the week fine settled weather had set in over Northern India, though the monsoon currents were still affecting Burma and the Peninsula as well as parts of Bengal and Assam.

On the 23rd September, or the last day of the previous week, a small cyclonic storm which had formed in the Bay of Bengal off the Orissa coast had advanced in a westerly direction, and its centre was at a short distance to the south-east of Cuttack, where the very low pressure of 29·186 inches was reported—a pressure of no less than 0·508 inch below the normal. The storm was accompanied by a very strong cyclonic circulation of winds, and it was giving decidedly bad weather in the north of the Bay of Bengal, and also over Orissa and the neighbouring parts of South-West Bengal. From the 23rd to the 24th the storm continued to advance in a west-north-westerly direction, and at 8 A.M. on the latter date its centre was at a short distance to the north-west of Sambalpur, and it had therefore travelled over about 200 to 220 miles in twenty-four hours, or at the rate of 8 or 9 miles an hour, which was in decided contrast to the rate of advance on the previous day, when it only equalled 2 or 3 miles an hour. The cyclonic circulation of winds was still strong, but it is probable the storm was commencing to fill up, as the defect in pressure at Sambalpur was only a quarter of an inch instead of half an inch on the previous day. The storm, however, still formed the dominant feature in the meteorology of India, and was causing pressure to fall moderately to rapidly in all districts, except in its rear, and it had given general rain in Bengal and the eastern districts of the North-Western and Central Provinces, while moderate rain was falling in Bombay and showers in most other Provinces, except in the north-western districts of India. The direction of advance of the storm changed from the 24th to the 25th, and became almost northerly instead of west-north-westerly, and at 8 A.M. of the 25th the storm was between Benares and Patna, where the pressure was rather more than a quarter of an inch in defect, and hence the intensity of the storm was about the same as on the previous day. The storm had again advanced about 250 miles in a northerly direction, or at the rate of a little more than 10 miles an hour. The cyclonic circulation of winds was still perfect and winds were strong, Patna reporting an average wind velocity of 22 miles an hour, Durbhanga 20 miles, and Hazaribagh 19 miles. Again the weather of India depended mainly on the storm, for pressure was falling rapidly over Northern India and rising to the south of the storm area, while general rain had occurred in Bengal and the eastern districts of the North-Western Provinces and showers in all districts, except North-Western and

Southern India (coast districts excepted). The heaviest falls reported on this day were 5·16 inches at Purneah, 4·51 inches at Darjiling, and falls of 2 to 4 inches at Jalpaiguri, Gnatong, Burdwan, Dhubri, Benares, and Gorakhpur. On this day the storm continued its northerly advance into the Himalayas, passing into them to the west of Katmandu, and on the morning of the 26th there was no sign of its existence. A very rapid increase of pressure had taken place at all except the eastern stations, though pressure still remained in moderate defect over Northern and North-Western India, while it was in excess over the Peninsula. Pressure had, however, again fallen over Burma, and a low pressure area was developing over Upper Burma. In breaking up the storm had given heavy rain in North Bengal, Bihar, and the eastern districts of the North-Western Provinces, Darjiling reporting 6·18 inches, Gnatong 4·60 inches, Dinajpur 4·10 inches, Purneah 3·68 inches, and Bogra 3·10 inches; and falls of about 2 to 3 inches were received at Jalpaiguri, Durbhanga, Gorakhpur, and Allahabad. With the disappearance of the storm, winds were becoming more normal and usually varied between north-west and south-west, except in or near the Himalayas, and in parts of the Punjab, Bengal, and Burma. The increase of pressure continued on the 27th, except over Burma, Bengal, Assam, and the Central Provinces; and the disturbed conditions following the breaking up of the storm continued to exist over North-Eastern India, though even there they were rapidly disappearing, while over North-Western and Central India fine settled weather was commencing. The rainfall reported on the 27th was confined to the northern and eastern districts of Bengal and to Assam, where it was rather heavy; but showers were falling in other districts, except in North-Western India, and rainfall was also recommencing over the Peninsula. The pressure changes on the 28th, 29th, and 30th resulted in the establishment of moderately high pressure, when pressure became in excess by about a twentieth of an inch over the whole of Northern, North-Western, Western, and Central India, while it was in rather large defect (0·13 inch) in the south of Burma, and small defects were registered in the south of the Peninsula. With this distribution of pressure a steady westerly and north-westerly wind current set in over practically the whole of India, except near the depression in Burma. The moist air current brought up by the storm therefore retreated from Northern India, and hence skies rapidly cleared and rainfall ceased, except in Burma and over the Peninsula, and at the end of the week the south-west monsoon current had withdrawn from the whole of Northern India, except over parts of Bengal, Central Provinces, &c. Fine settled weather therefore prevailed over practically the whole of Northern India at the close of the week.

Temperature.—The following table shows the variation of the mean temperature from the normal on each day of the week for the different Provinces of India. Temperature, it will be seen, has been in defect on each day of the week, the usual defect being slightly larger than a degree, and for the whole week the average defect has been 1·2°. The defects have been largest in Bengal, Assam, the North-Western Provinces and Oudh, where they have been undoubtedly due to the heavy rainfall caused by the small storm, while rather large defects have also been registered in Central India and Guzerat:

Province.	September 1893.							Mean variation of week.
	24th.	25th.	26th.	27th.	28th.	29th.	30th.	
	°	°	°	°	°	°	°	°

Rainfall.—The rainfall which has fallen during the week has been brought mainly by the action of the small cyclonic storm which has been previously described, and by the monsoon currents blowing in its rear. The storm did not reach further north than the eastern and central portions of the North-Western Provinces. Hence the districts north-west of this area have received no rain, and the concluding table shows that during the week the whole of the Punjab (except the Hill Districts), the Western and Submontane (*b*) districts of the North-Western Provinces, Sind, and Rajputana (West) have received practically no rain, while the falls have been very small and unimportant in Berar and the Central Provinces (West). In other cases also the falls have been very light during the week, and this has been the case in Coorg, Malabar, Upper Burma, Guzerat, and Central India (East). The general falls during the week have also been small compared to the normal in Burma, Bombay and Malabar Coast districts, and Central Provinces. Excluding the districts above noted, in which there was practically no rain at all during the week, the falls have been more than 50 per cent. in defect of the normal in Arakan, Malabar, Coorg, Konkan, Bombay Deccan, Khandeish, Berar, Central Provinces (West and Central), and Guzerat. On the other hand, the falls in Bengal, Assam (Brahmaputra), the eastern districts of the Central Provinces, Oudh, and over parts of Madras have been in excess of the normal, and the falls have been more than twice as heavy as usual in North Bengal, South and North Bihar, and North-Western Provinces (East and Submontane *a*). The heaviest average falls in any district are 10·05 inches in North Bengal (6·08 inches in excess), 6·24 inches in North Bihar, and falls of 3½ to 4 inches in Assam (Surma Division), Central Bengal, and North-Western Provinces (East and Submontane *a*). Out of the 51 rainfall districts into which India is divided, 28 have received defective falls during the week under review and 23 excessive falls.

The falls during the week have not made any important alteration in the distribution of the monsoon rainfall up to date, and of the 51 rainfall districts the falls from 28th May to the 30th September have been in excess of the normal in 33 districts and in defect in 17 districts, while one district (West Punjab) has received a normal fall. The falls have, as shown in the last column of the rainfall table, been more than 50 per cent. in excess in North-West Punjab, West Rajputana, and Hyderabad (South), while they have been in defect by 10 per cent. and upwards in Lower Burma, Malabar, Mysore (29 per cent.), Konkan, Central Provinces (West), and Kathiawar.

The following statement shows the largest amounts of rain received at single stations in various districts during the week as reported in the rainfall telegrams:

Division.	District.	Station.	Amount.
East Bengal	Backerganj	Bhola	7·23 inches.
Assam (Surma)	Khasia and Jaintia Hills.	Cherra Punji	10·20 ,,

SIMLA, *5th October, 1893.*

ALEX. PEDLER,
Offg. Meteorological Reporter to the Government of India.

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 30th September.*—Rainfall good in the greater part of the Circars and the Deccan, Karnatic, and Central districts; moderate or partial elsewhere. Fall to date nowhere seriously deficient, and in the Circars it is well over the average. The recent rainfall has done much good to the standing crops and stimulated sowings, which are now proceeding briskly. Standing crops recovering. Irrigation supplies improving. Harvest proceeding with fair to average outturn. Pasture scarce in parts, but fodder available generally, and condition of cattle good. Prices generally slightly dearer, save in Ganjam, Vizagapatam, Chingleput, Tanjore, and South Canara, where they are stationary or easier. Rates still very high, except in two Northern districts.

Bombay.—*For week ending 4th October.*—Rain generally slight or moderate throughout the Presidency Proper; beneficial to crops in the Deccan and Karnatak, but more rain is still wanted in parts. Standing crops withering for want of moisture and damaged by unfavourable winds, insects, or smut in parts of five districts. Preparations for late crops continue in six, and sowing in four, districts. Reaping of early crops progressing in eight districts. Prices steady, except in two districts. Fodder sufficient and agricultural stock good.

Bengal.—*For week ending 30th September.*—The rainfall during the week has been general, and heavy in the Northern districts. All standing crops, except those in the inundated tracts of East Bengal and Behar, are doing well. Floods are again reported from Champarun, but the water is subsiding rapidly, and not much damage is apprehended. The autumn harvest is practically finished, and lands are being prepared for the spring crops. Pulses and other early spring crops are being sown. No important change in prices of food-grains. In Faridpur the price of common rice has fallen, imports being plentiful. Fodder is still insufficient in the flooded tracts of East Bengal; elsewhere the supply is plentiful. Cattle are generally reported well. In the Madaripur sub-division of Faridpur the number of persons receiving gratuitous relief during the week ending 21st September was 132, including 6 men, 65 women, and 61 children.

North-Western Provinces and Oudh.—*For week ending 4th October.*—Rainfall somewhat heavy in the Eastern districts and light showers in the Central districts; otherwise the weather has been generally clear. Prospects of autumn crops good. Sowings for the spring crops have begun in some districts. Supplies ample. Prices fairly steady.

Punjab.—*For week ending 4th October.*—Slight rain has fallen in one district only. Harvesting of autumn crops commenced in Rawal Pindi. Ploughings for and sowings of spring crops in progress. Condition of standing crops is generally good; prospects average in some districts. The *bajra* crop (*Penicillaria spicata*) is suffering for want of rain in parts of Dera Ismail Khan. Cattle are generally in good condition. Fodder sufficient in all districts, except in parts of Multan and Shahpur. Prices rising in one district, fluctuating in one, falling in three others, and stationary elsewhere.

Central Provinces.—*For week ending 4th October.*—Weather clear and warm. Autumn crops in excellent condition. Sowing of winter crops progressing in places. Fodder plentiful. Prices steady.

Burma.—*For week ending 30th September.*—In Lower Burma the rainfall was lighter than of late, but was sufficient. Transplanting is nearly completed, and the crop prospect is good. In Upper Burma the rainfall generally was light, and at the head-quarters of nine districts there was no rain at all. Sesamum and early paddy are being reaped and sowing of other crops is progressing, except in Shwebo, where transplanting is delayed for want of rain. The crop prospect generally is good, except in Shwebo, where rain is very much needed; and more rain is also required in Yeu. The price of paddy has risen in six districts and has fallen in five others.

Assam.—*For week ending 3rd October.*—Weather hot. Reaping of early and transplanting of late rice finished. Fodder and water sufficient. Tea flourishing.

Mysore and Coorg.—*For week ending 4th October.*—MYSORE: Rainfall good in four districts; slight elsewhere. Standing crops in good condition. Prices fallen in two districts and slightly risen elsewhere. Prospects favourable.

COORG: Rainfall slight. Rice and coffee crops thriving. Reaping of *ragi* (*Eleusine coracana*) and picking of cardamom in progress. Prices rising. Water and fodder for cattle sufficient.

Berar and Hyderabad.—*For week ending 4th October.*—BERAR: Rainfall moderate. Weather cool and cloudy. Standing crops in good condition. Cotton in pod. Land under preparation for ensuing spring crops. Weeding operations continue. Fodder and water sufficient. Prices stationary.

HYDERABAD: Rainfall good during the week. Standing irrigated crops in good condition. Excessive rain has spoiled the autumn crops in two talukas. Prices stationary.

Central India.—*For week ending 4th October.*—There has been a break in the rains, except in Bhopal and Bhopawar. Agricultural operations in progress in all parts. Land being prepared for spring sowings in Bhopal, Bundelkhand, and Bhopawar. Standing crops generally good, except in parts of Gwalior and in Baghelkhand, where they have been damaged by rain. Prices falling in Gwalior and Goona, rising in Bhopal, and steady elsewhere.

Rajputana.—*For week ending 4th October.*—Good rain in parts of Bikanir; very little rain elsewhere. Agricultural operations, standing crops, and cattle generally satisfactory. Reaping of the autumn crops and ploughing for spring crops commenced in parts. Harvest prospects good. Indian-corn damaged by excessive rain in parts of Kherwara and Pertabgarh. Pasturage or fodder sufficient. Prices falling in four States, rising in one, and steady elsewhere.

Kashmir.—*For week ending 3rd October.*—Weather fine. Rice and maize crops being cut. Prices stationary.

Nepal.—*For week ending 30th September.*—Very heavy rain at commencement of week injured the up-land rice, which was ripe and partially cut. Low-land rice was, however, not affected, and the prospects of the harvest are on the whole, good. Prices have fallen slightly.

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Circular No. $\frac{59}{73}$.

Extract from the Proceedings of the Government of India in the Revenue and Agricultural Department (Museums and Exhibitions),—under date Simla, the 3rd October, 1893.

RESOLUTION.

Read the following papers:

1. Despatch from Her Majesty's Secretary of State for India, No. 9, dated 20th January 1887, and enclosures.
2. Despatch to Her Majesty's Secretary of State for India, No. 8, dated 1st November 1887.
3. Despatch from Her Majesty's Secretary of State for India, No. 25, dated 29th March 1888.
4. Despatch from Her Majesty's Secretary of State for India, No. 60, dated 10th July 1890, and enclosures.
5. Despatch from Her Majesty's Secretary of State for India, No. 13, dated 26th February 1891, and enclosures.
6. Despatch to Her Majesty's Secretary of State for India, No. 52, dated 30th June 1891.
7. Circular to Local Governments and Administrations, No. $\frac{7}{71}$, dated 17th July 1891.
8. Despatch from Her Majesty's Secretary of State for India, No. 63, dated 17th September 1891.
9. Circular to Local Governments and Administrations, No. $\frac{25}{71}$, dated 24th October 1891.
10. Despatch to Her Majesty's Secretary of State for India, No. 10, dated 10th February 1892.
11. Despatch from Her Majesty's Secretary of State for India, No. 24, dated 14th April 1892.
12. Circular to Local Governments and Administrations, No. 25, dated 24th June 1892.
13. Circular to Local Governments and Administrations, No. $\frac{30}{15}$, dated 16th July 1892.

Many enquiries having been received by the Government of India on the subject, the following explanation of the constitution and objects of the Imperial Institute is published for general information.

2. In December 1886 an organising Committee appointed by His Royal Highness the Prince of Wales, with Lord Herschell as President, submitted their report, copies of which were received by the Government of India and circulated to Local Governments and Administrations in February 1887.

3. Lord Herschell's Committee recommended that the Institute should comprise two sections—one for the United Kingdom, the other for the Colonies and India. They explained in the 9th and following paragraphs of their report that—

"(9) the object of the Colonial and Indian Section will be to illustrate the great commercial and industrial resources of the Colonies and India, and to spread a knowledge of their progress and social condition.

"(10) To this end provision should be made for—

(1) the display in an adequate manner of the best natural and manufactured products of the Colonies and India, and, in connection with this, the circulation of typical collections throughout the United Kingdom;

(2) a hall for the discussion of Colonial and Indian subjects, and for receptions connected with the Colonies and India;

(3) the formation of Colonial and Indian libraries, and establishing in connection therewith reading, news, and intelligence rooms;

(4) the incorporation in some form into the proposed Institute of the Royal Colonial Institute and Royal Asiatic Society if, as is hoped, it be possible to bring about such a union;

(5) the collection and diffusion of the fullest information in regard to the industrial and material condition of the Colonies, so as to enable intending emigrants to acquire all requisite knowledge. Such information might be advantageously supplemented by simple and practical instruction. An emigration office of this character should be in correspondence with the provincial towns, either through the free libraries or by other means, so that information may be readily accessible to the people. These objects would be greatly facilitated if, as may be hoped, the Government should consent to the transfer to the buildings of the Institute of the recently formed Emigration Department, which would, by a close connection with the Institute, largely increase its usefulness.

"11. Facilities might be afforded for the exhibition of works of Colonial and Indian Art.

"12. It is also considered desirable that means should be provided, not for a general exhibition, but for occasional special exhibitions of Colonial and Indian produce and manufactures. At one time a particular Colony or portion of the Empire may desire to show its progress; at another time a general comparison of particular industries may be useful. Whilst the permanent galleries would exhibit the usual commercial or industrial products of the several Colonies and India, the occasional exhibitions would stimulate and enlist the sympathies of Colonial and Indian producers, and keep up an active co-operation with the industrial classes of this country."

4. The Colonial and Indian Section has since the date of the Committee's report been subdivided into sections for each Colony, and there is now a distinct section for India, which, for the purposes of this Resolution, will be referred to as "the Indian Section."

The scope of the Indian Section has been enlarged by the introduction of arrangements for the teaching of Oriental languages thus described in the Year Book of the Institute for 1892:

"In 1887 it was suggested that a School of Modern Oriental Studies should be established as a branch of the Institute in imitation of the very efficient establishments of this kind which are carried on with Government resources in France, Germany, and Austria. The promulgation of thsi proposal led to negotiation with the authorities of University College and King's College, London, which resulted in their co-operation with the Institute in the establishment of the School. A Special Committee having been appointed to organise a system of work, it was arranged that classes for instruction in the Oriental languages required by students qualifying for examinations for the Indian Civil Service should be held at University College, while Modern Oriental languages, other than the Indian languages, should be taught at King's College, and that the Imperial Institute should undertake the general administrative and financial work. The School was officially opened in January 1890, when an inaugural address was delivered by Professor Max Müller at the Royal Institution in the presence of His Royal Highness the Prince of Wales. The daughters of the late Colonel W. J. Ouseley (Bengal Army) have established and endowed in his memory three scholarships in Arabic and Persian in connection with the School, each one of the value of not less than £50 per annum."

Since 1887 subscriptions to the amount of £ 101,550 have been raised in this country, and constitute more than one quarter of the total subscriptions received from all sources by the Managing Committee in London. The entire sum contributed has been utilized partly for the constitution of a permanent endowment fund, which amounted in 1892 to £ 141,520, and partly for the construction of the building.

The Institute, of which the foundation stone was laid by the Queen on the 4th of July 1887, was formally opened by Her Majesty on the 10th May 1893.

5. It was originally intended that a Committee of the Indian Section should be formed in India with the Viceroy as President, and in 1887 the names of members were forwarded to the Secretary of State. This scheme was, however, superseded by the constitution framed in 1890, in pursuance of the charter granted to the Institute in May 1888, under which the Institute is controlled by a governing body or general Council of not less than 120 members or governors, of whom 15 are appointed to represent India. The Indian Governors may be selected in such manner as the Governor-General in Council for the time being may direct.

6. The following rules have been prescribed for the appointment of the Indian representatives:

Three are to be appointed annually by the Governor-General in Council; six by the Provinces, including Native States, in rotation; four by the Chambers of Commerce in rotation; and two by Native institutions: provided that no representative can be appointed who will not be resident in England during his term of office.

The term of office commences and ends on the 23rd of July, but a fresh nomination may be made at any intervening date in the event of office being vacated by the return of a member to India or for any other reason.

The Native States and Associations to be represented each year will be selected by the Government of India after ascertaining what eligible candidates are resident in England, and after correspondence with the rulers of the Native States and with the Native institutions concerned.

Provinces and Chambers of Commerce, in the order below prescribed for the next three years, will forward to the Secretary in the Department of Revenue and Agriculture the names of proposed representatives on or before the 1st of June. In each case three names may be submitted in the order in which it is desired that the offer of a governorship for the ensuing year may be made to the nominees. If no one of the nominees accept, the Government of India will select a representative. If no communication is received before the 1st of June from any Province or Chamber of Commerce entitled to a nomination, either the offer will be made to any existing representative, or a representative will be selected by the Government of India.

The following is the rotation prescribed for the next three years:

	1893-94.	1894-95.	1895-96.
Provincial representatives.	Madras.	Burma.	Bengal.

7. The Members of the Indian Section of the governing body in 1892-93 were:

On behalf of the Government of India—

W. T. Thiselton Dyer, Esq., C.I.E., C.M.G., F.R.S.

General James T. Walker, R.E., C.B., LL.D. (late Surveyor-General of India).

George Watt, Esq., M.B., C.I.E. (Reporter on Economic Products to the Government of India).

On behalf of Provinces and Native States—

Madras—David F. Carmichael, Esq. (late Madras Civil Service).

Bengal—Philip Nolan, Esq. (Secretary to the Government of Bengal).

North-Western Provinces and Oudh—W. S. Halsey, Esq. (late Bengal Civil Service).

Punjab—Baden H. Baden-Powell, Esq., C.I.E. (late Bengal Civil Service).

Native States (Jeypur)—Surgeon-Lieutenant-Colonel T. H. Hendley, C.I.E. (Residency Surgeon, Jeypur).

On behalf of Indian Chambers of Commerce—

Bombay—Sir Frank Forbes Adam, C.I.E. (of Messrs. Graham & Co., Manchester).

Rangoon—James Annan Bryce, Esq. (of Messrs. Wallace Brothers).

Madras—George G. Arbuthnot, Esq.

Calcutta—Sir Alexander Wilson, Kt. (of Messrs. Matheson & Co., London).

On behalf of Indian Institutions—

Poona Sarvajanik Sabha—Dadabhai Naoroji, Esq., M.P.

Bengal British Indian Association—Sir William Wilson Hunter, K.C.S.I., C.I.E.

8. Fellows of the Imperial Institute are elected under rules, of which a copy is appended to this Resolution, and which explain the conditions and privileges attached to Fellowship. Application for election as Fellow, or for any information that may be required regarding the Institute, should be made to the Secretary, Imperial Institute, South Kensington.

9. The Government of India have decided that the most effective way in which the Imperial Institute can be made to serve the interests of India is to utilise it both for the purpose of attracting attention to the various economic products of India, especially those which are little known, and for obtaining through the agency of the governing body the trial or analysis by experts of products more or less new to commerce. The objects held in view will be more fully gathered from the following explanation embodied in the preface to the series of Commercial Handbooks which are provided to the Institute by the Department of Economic Products:

"The Government of India have arranged to provide to the Imperial Institute for the illustration of the Economic Products of India—

(A) a descriptive catalogue or dictionary;

(B) an index collection of all products;

(C) a commercial collection of special products;

(D) a hand-book descriptive of C.

A. The descriptive catalogue has been completed, and is termed the "Dictionary of the Economic Products of India." The compilation has occupied eight years, and has been made under the editorship of Dr. G. Watt, C.I.E., Reporter on Economic Products to the Government of India. It has been confined to the collection of facts and statistics available up to the date of the publication of the work.

To each product there is assigned in the dictionary a separate number, which will be permanently maintained for purposes of reference.

B. The index collection will, when completed, comprise small samples of every economic product of India, which will bear the same numbers as those assigned to the products in the dictionary.

C. The commercial collections are on a larger scale. The number of products of which a collection is provided each year will be limited to about 20.

Each collection will comprise as complete a set of specimens of the product in its raw and manufactured state as is necessary for the fulfilment of the objects with which the commercial collections and hand-books are provided.

D. The hand-books will supply, in a separate pamphlet for each product, the information contained in the dictionary, amplified by supplementary facts and statistics, and illustrated by maps, diagrams, photographs, etc.

The objects of the commercial collections and hand-books which accompany them are:

(1) To secure, while each collection is being made for the Institute, a thorough and special investigation in India through which fresh information regarding the product concerned not contained in the dictionary may be obtained.

(2) To illustrate the dictionary in a manner more complete than can be effected by the index collection.

(3) In the case of products which are not generally known—

(*a*) to bring them to the notice of those interested;

(*b*) to indicate the extent to which and conditions under which they are procurable;

(*c*) to ascertain their commercial value;

(*d*) to secure, through the governing body of the Institute and commercial experts whom they may consult, such special trial or analysis of them as can be more effectually made in England than in India."

The initial cost of the collections has been met from a special grant of Rs. 10,000. An annual grant of £600 is provided for the maintenance and completion of the existing collections, and a further grant of £400 again is allowed for the salary of the official Curator. Rs. 4,000 are also contributed annually by Local Governments towards the collection of products for the Institute. The Indian Section is under the general superintendence of Sir F. Abel, Secretary to the Institute, and the collections are under the charge of Mr. J. R. Royle, C.I.E., of the India Office, who has been appointed official Curator of the Indian Courts.

10. The index collection has reached an advanced stage.

Commercial collections have, under the direction of Mr. E. Thurston, Officiating Reporter on Economic Products, been already provided for the representation of the following products:

1. Padauk timber.
2. Ipecacuanha.
3. Podophyllum emodi.
4. Sida fibre.
5. Jute.
6. Ál (Morinda) dye.
7. Resin and turpentine from Indian pines.
8. Iron, southern districts of Madras.
9. Coal.
10. Adhatoda vasica.
11. Linseed.
12. Fibres for brush making.
13. Cutch.
14. Kút (Ooplate).
15. Turpeth (Indian jalap).
16. Kaméla dye.
17. Garjan and in oils.
18. Jalap.
19. Mica.
20. Castor oil.
21. Gingelly or sesame oil.

Collections of the following are in progress:

22. "East Indian walnut timber" (Albizzia Lebbek.)
23. Silk.
24. Ground-nut.
25. Barley.
26. India-rubber.
27. Rose wood (*Dalbergia latifolia*).
28. Soapstone (Steatite).
29. Chaulmugra oil.
30. Salep.

Hand-books issued under the editorship of Mr. Thurston have accompanied the twenty-one commercial collections already sent to England, and hand-books descriptive of the collections in progress are in course of preparation. These may be purchased for a nominal price either at the Imperial Institute, at the office of the Reporter on Economic Products in Calcutta, or from the Superintendent of Government Printing, Calcutta.

11. Galleries have been provided in the Institute building, in which the index collections are arranged in such a way as to be easily studied by interested visitors, and there are also working rooms for detailed examination of the commercial collections by those connected with the trades to which they appertain.

12. Special arrangements have since the opening of the Institute been set on foot, under the direction of Sir Frederick Abel, with the object of facilitating the trial and analysis of commercial products by experts either at the Institute itself, where rooms and laboratories have been provided for the purpose, or in local manufactories, chemical works, and other appropriate places. Dr. Theodore Cooke, C.I.E., late Principal of the College of Science, Poona, has recently been appointed as Technical Sub-Director of the Institute and to supervise arrangements for securing the investigation of new products from India and the Colonies.

13. All correspondence in India connected with the collections supplied to the Institute is conducted by the Reporter on Economic Products, to whose office at the Indian Museum, Calcutta, all enquiries or letters on the subject should be addressed.

14. The names of Governors appointed for the Indian Section for the year 1893-94 will be published shortly in the Gazette of the Government of India.

ORDER.—Ordered, that the above be published for general information in the Supplement to the *Gazette of India*, and that copies be forwarded to the several Local Governments and Administrations for information and publication in the local Gazette, and to the Chambers of Commerce noted on the margin.

APPENDIX.

ELECTION, SUBSCRIPTIONS, AND PRIVILEGES OF FELLOWS OF THE IMPERIAL INSTITUTE.

I.—As to Privileges of Fellows.

Every Fellow elected in the manner provided by the Regulations approved under the Charter of Incorporation shall, during the continuance of his Fellowship, be entitled to attach to his name the distinctive designation " F. I. Inst."

Every Fellow upon his election shall receive a diploma or other emblem of his Fellowship.

Fellows shall be entitled to the Annual Report of the Institute and to publications issued from time to time by the Institute, subject to such arrangements as may be made by the Executive Council as to the delivery or transmission of the same.

Fellows shall have access to the Commercial and Industrial Collections on two days in the week when they are *not* open to the public, and shall on any one of those days have the privilege of introducing two visitors to the Collections.

A special Refreshment Department, including Smoking Room, will be provided for the use of Fellows, to which they will be entitled on any day to introduce two visitors.

The accommodation provided for the use of Fellows will include a Post Office and *Poste Restante*, Telegraph, Telephone, and Messenger Departments, Cloak Room and Parcels Office, and a Private Lavatory.

Fellows will have the free use of the Library, the News Room and Reference Department connected therewith, the Map Room, Reading Rooms, Writing Room, and Conference Rooms, and shall be entitled to introduce one visitor on any day to these rooms. The Conference Rooms will include Special Rooms for the Australasian, the North American, and the African Colonies, for India, and for the Crown Colonies. Facilities will be afforded to Fellows at moderate charges for holding business Conferences at the Institute, involving the exclusive occupation of a room for specified periods, with or without clerical assistance.

Fellows will be entitled to admission to special conferences, addresses, discussions, or lectures under regulations to be determined upon by the Council, and will have the privilege of introducing visitors in conformity with those regulations.

The Commercial Intelligence or Information Department will be open to Fellows between the hours of 10 A.M. and 1 P.M. and 2 P.M., and 4 P.M. on Mondays to Fridays inclusive, and between 10 A.M. and noon on Saturdays.

Facilities will be afforded to Fellows to inspect or to specially examine, or to be supplied with, samples of materials and products included in the collections, under regulations and conditions to be determined by the Council, and, if necessary, upon payment of such fees as will compensate the Institute for any loss or special outlay connected with such inspection, for which special localities and appliances will be provided.

II.—As to Proposal and Election of Fellows.

(Abstract of Regulations.)

A Candidate for admission as an Ordinary Fellow must be proposed and seconded by two Fellows from personal knowledge; such proposal, which shall specify the rank, profession or occupation, and place of abode of the Candidate, must in addition be signed by two Fellows at least.

The certificate of proposal thus filled up, as soon as it has been delivered to the Secretary, shall, be exhibited in a conspicuous place in one or other of the public rooms of the Institute for at least one week previous to the date of election.

Candidates proposed as Fellows shall from time to time be submitted for election at a meeting of the Executive Council in accordance with the prescribed Regulations.

III.—As to Subscriptions to be Paid by Fellows.

(Abstract of Regulations.)

The annual subscription to the Institute shall, subject to the provisions contained in the Regulations next following, be *Two Pounds*. From and after such date, as may be appointed by the Executive Council, an Entrance Fee may be imposed.

Any Fellow who intends to be absent from the United Kingdom during the whole time for which the annual subscription is payable shall, on his giving due notice in writing to the Secretary of such intention, pay an annual subscription of *One Pound* only during the continuance of such absence. If such Fellow returns to the United Kingdom, he may, on communicating the fact in writing to the Secretary, and on paying such sum as may be required to make up his subscription for the current year to the full amount of *Two Pounds*, be re-admitted to all the privileges of the Institute.

Any Fellow who at the time of his election is resident out of the United Kingdom shall pay an annual subscription of *One Pound* only during the continuance of such residence. If such Fellow comes to the United Kingdom, he may, on communicating the fact in writing to the Secretary, avail himself, for a period not exceeding three months from the date of his arrival, of all the privileges of the Institute. If he resides within the United Kingdom beyond that period, he will be required to make up his subscription for the current year to the full amount of *Two Pounds*.

A newly-elected Fellow shall not be entitled to exercise any of the privileges of a Fellow until he has paid his first year's subscription, or entrance fee and first year's subscription, as the case may be, or as compounded as hereinafter provided.

All subscriptions, after the subscription due at election, shall be payable on the 1st January in each year.

When a Candidate becomes a fellow late in the year, the Executive Council may remit the whole or such part as they may think just of his subscription for the current year.

Any Fellow may compound for his subscription and become a Life Fellow, either as his entrance by the payment of *Twenty Pounds*, or after the payment of five or more annual subscriptions by the payment of *Fifteen Pounds*.

Note.—In conformity with clause 67 of the Constitution approved by Royal Warrant, the Executive Council may from time to time repeal, alter, or add to these Rules respecting the subscriptions and privileges of Fellows.

No. 4329-Statis.

GOVERNMENT OF INDIA.

FINANCE AND COMMERCE DEPARTMENT.

STATISTICS AND COMMERCE.

STATISTICS.

PROCEEDINGS UNDER THE INDIAN MERCHANDISE MARKS ACT, 1889, IN 1892-93.

Simla, the 6th October, 1893.

Read the following reports on the proceedings taken by customs officials under the Indian Merchandise Marks Act, 1889, during the year 1892-93:

From the Chief Commissioner of Burma, No. 674—1-C.-2, dated the 30th May 1893.

From the Government of Bengal, No. 232-T. F., dated the 3rd July 1893.

From the Government of Bombay, No. 5704, dated the 7th August 1893.

From the Government of Madras, No. 2907-A Mis., dated the 7th August 1893.

RESOLUTION.—There were altogether 1,208 cases of detention under the Act compared with 894 in the preceding year and 1,133 in 1890-91. Of these, 457, being 38 per cent. of the whole, were under clause (*f*) of section 10, sub-section (2), of the Act, which requires all piece-goods to be stamped with their lengths. In 1891-92 such cases formed 56 per cent. of the whole. There were 395 cases of counterfeit trade marks or false trade descriptions and 356 cases of non-description of foreign origin against 262 and 132 respectively in the preceding year.

2. The following table shews for each of the chief ports the number of detentions under the Act in the last three years:

Port.		Number of cases in which detention was ordered.	Detention followed by confiscation.	Detention		Detention ordered on information received.	Detention ordered without information.
				Followed by release.			
				With fine.	Without fine.		
Calcutta	1890-91	302	1	67	234	...	302
	1891-92	454	4	92	351	2	452
	1892-93	344	8	285	43	2	342
Madras	1890-91	4	...	1	3	2	2
	1891-92	16	2	5	9	1	15
	1892-93	29	1	14	14	...	29
Rangoon	1890-91	2	...	...	2	...	2
	1891-92	36	...	22	14	1	35
	1892-93	23	1	21	2	...	23
Bombay	1890-91	681	1	230	450	...	681
	1891-92	262	...	131	131	...	262
	1892-93	447	4	357	86	...	447
Karachi	1890-91	144	...	95	49	...	144
	1891-92	126	...	68	58	...	126
	1892-93	365	1	167	197	...	365
Total	1890-91	1,133	2	393	738	2	1,131
	1891-92	894	6	318	563	4	890
	1892-93	1,208	15	844	342	2	1,206

3. The reports do not call for special notice. The Act appears to have been administered by the officials who are charged with enforcing its provisions on the whole with care and discretion. The proposal of the Collector of Customs, Calcutta, to so amend clause *e* (1) of section 10 as to require that the indication of the country of origin shall be placed on the label describing the goods, and not on a separate label, will be carried into effect when the Act next comes under amendment.

ORDER.—Ordered, that the foregoing Resolution and the papers read in the preamble be published in the Supplement to the *Gazette of India* for general information, and that copy be forwarded to the Governments of Madras, Bombay, and Bengal, and the Chief Commissioner of Burma.

J. F. FINLAY,

Secretary to the Government of India.

Annexure to Resolution No. 4329-Statis., dated the 6th October 1893.

Reports on the Proceedings taken by Customs Officials under the Indian Merchandise Marks Act, IV of 1889, during the year 1892-93.

BURMA.

No. 674—1 C.-2, dated 30th May 1893.

From—C. G. BAYNE, Esq., I.C.S., Revenue Secretary to the Chief Commissioner of Burma,

To—The Secretary to the Government of India, Finance and Commerce Department.

With reference to paragraph 4 of the enclosure to Finance and Commerce Department letter No. 295-S., dated the 28th November 1890, I am directed to submit, for the information of the Government of India, a copy of letter No. 24—8, dated the 17th April 1893, from the Chief Collector of Customs, Burma, to the Financial Commissioner, with its annexures, reporting on the working of the Indian Merchandise Marks Act, 1889, in this province for the year 1892-93. There is the report calling for special remark.

No. 24—8, dated 17th April 1893.

From—The Chief Collector of Customs, Burma,

To—The Secretary to the Financial Commissioner, Burma.

I have the honour to submit the following report on the administration of the Merchandise Marks Act of 1889 during the year 1892-93, with a statement showing the number of cases dealt with under the Act, *viz.*, 23 against 36 in the year preceding.

2. There were 13 infringements of section 10 of the Act (amendment of the Sea Customs Act of 1878), sub-section (2), and 9 of the same section under clause (1), and one case of "false trade description."

3. No information in regard to these cases was received by this department, all the detections having been made by the Customs staff in their examination of goods before giving delivery.

4. In the cases of goods not stamped with the length in accordance with section 10, sub-section (2), clause (*f*) (i), in two it was not considered necessary to inflict a fine, but in the remaining eleven fines were imposed. The goods in each case were passed after having been properly stamped.

5. The "false trade description" was in the matter of a consignment of margarine from Trieste *vid* Penang. It consisted of five cases containing 500 tins (500 lbs.), and was valued in the Customs bill-of-entry at Rs. 450. On the cases being opened, the tins were found to bear a label with the following words :

Sixhouse Butter Cie.
Selected Butter
of
Choicest quality.
Real Austrian produce.

As the article had been declared as "margarine" in the Customs bill-of-entry, a tin was forwarded to the Chemical Examiner for analysis, and he reported that he "found the sample to be margarine and to contain practically no butter." The description on the tins "selected butter" was therefore a "false trade description" within the meaning of the Merchandise Marks Act, section 2, clause 3, and a breach of that Act and of the Customs Act, section 18 (*d*), as amended by section 10 of the Merchandise Marks Act. The consignment was confiscated and the importers given the option, under section 183 of the Customs Act, of paying a fine of Rs. 250 in lieu of confiscation. The fine has not yet been paid.

6. The nine detentions ordered under section 10, clause (1) (2), were as follows :

(*a*) In connection with the large trade in matches from Japan, three consignments *vid* the Straits infringed the Act; in two no indication of the country of manufacture was given ; and in the third the indication was given, but the letters were not large and conspicuous enough to meet the provisions of the Act. A penalty was imposed in each case, and the matches allowed to be re-exported to the Straits, as it was found almost impossible to stamp every packet and box without rendering the goods unmerchantable.

(*b*) Three consignments of liquors from Germany did not bear a clear indication of the name of the country of manufacture. The importers were fined, and the indication required under the Act was duly stamped on each bottle, before the goods were passed.

(*c*) The remaining three cases were—

(i) A large consignment of enamelled ware of Austrian manufacture was received, consisting of 40 packages containing 1,000 dozen of enamelled soup plates It arrived from Hamburg *vid* Liverpool. Each plate bore the name of the importer, who is a dealer or trader in this place, but no indication as to place of origin. A fine of Rs. 25 was imposed, and the goods allowed to pass after every plate had been labelled "Made in Austria."

(ii) Forty cases containing 6,000 tins of biscuits arrived from Hamburg. The biscuits were of German manufacture, and the tins were labelled "P. W. Gaedke-People's mixed —Hamburg." As the name "Hamburg" was not deemed sufficient, a fine of Rs. 25 was imposed, and the biscuits were passed after every tin had been stamped "Made in Germany."

(iii) Nine hundred and fifty casks of Portland cement were imported from Marseilles. The cement was of French manufacture. Each cask bore on one end a label with the words "Portland Cement" in large characters and the name "Marseilles" underneath in much smaller letters. On the other end was a label containing the trade mark and the name of the importers in Burmese characters, but no indication of the place of manufacture in the same language. A fine was imposed, and the goods passed after every cask had been marked in English "Made in France" in letters as large and as conspicuous as those in the name "Portland Cement" and in Burmese characters to the same effect.

Statement showing the number of cases dealt with under the Indian Merchandise Marks Act during the years 1891-92 and 1892-93.

RANGOON; *The 17th April 1893.*

E. DARLINGTON,
Chief Collector of Customs, Burma.

BENGAL.

No. 232-T.F., dated 3rd July 1893.

From—J. A. BOURDILLON, Esq., Officiating Secretary to the Government of Bengal, Financial Department,

To—The Secretary to the Government of India, Finance and Commerce Department.

In accordance with the orders conveyed in paragraph 4 of the enclosure of your letter No. 295-S., dated the 28th November 1890, I am directed to submit the accompanying copy of a letter* from the Board of Revenue, and of its enclosure from the Collector of Customs, Calcutta, reporting on the working of the Merchandise Marks Act, IV of 1889, at this port

* No. 532-B., dated 23rd June 1893.

for the year 1892-93. No proceedings were taken under the Act by the Collectors of Customs at Chittagong, Naraingunge, or the Orissa ports during the year.

2. The Lieutenant-Governor desires me to request that the amendment of the law proposed by the Collector of Customs, Calcutta, in paragraph 4 of his letter may be considered when the Act next comes under revision.

3. I am further to request that the Board's suggestion to replace the names in the Collector's report by asterisks, should his letter be published, may be complied with.

No. 532-B, dated 23rd June 1893.

From—L. P. SHIRRES, Esq., Officiating Secretary to the Board of Revenue, Lower Provinces,

To—The Secretary to the Government of Bengal, Financial Department.

With reference to Government Order No. C.-1A—1-16, dated the 8th December 1890, and paragraph 4 of the instructions of the Government of India therein enclosed, I am directed by the Board of Revenue to submit, for the information of Government, the accompanying copy of a report No. 195, dated 1st May 1893, from the Collector of Customs, Calcutta, on the proceedings taken by him under the Merchandise Marks Act, IV of 1889, during the year 1892-93, and to observe as follows.

2. The statement made in paragraph 2 of the Collector's report that the Board have ruled that the marking of the number of yards without the word "yards" is not an infringement of the Act is due to a misapprehension, as will be seen from the Board's letter to Government, No. 161-B., dated 16th February 1893, and the Advocate-General's opinion therein enclosed. The Collector of Customs has been directed accordingly.

3. As regards the amendment of the law proposed by the Collector in his paragraph 4, I am to say that the Superintendent and Remembrancer of Legal Affairs has been consulted on the subject, and is of opinion that the alteration suggested by the Collector, in view of the sort of fraud described, is a useful one. The Board recommend that the Collector's proposal may be noted and given effect to when the amendment of the Act is next undertaken.

4. With reference to the statement made in paragraph 5, that of the six different cases of cutlery detained as bearing marks in imitation of * * * * 's trade mark, five were allowed to be reshipped and one was released, the Collector has since explained that the one case of cutlery was released because it appeared that a suit was pending in the High Court, Bombay, regarding the infringement of Messrs. * * * 's trade mark, and that the Bombay Customs authorities were admitting the goods. In the five remaining cases the non-admission of the knives was considered a sufficient penalty, and reshipment was accordingly allowed. The goods could not be admitted under a fine in lieu of confiscation, and the destruction of the property appeared in each case too severe a measure.

5. From the reports received from the outports, it appears that no proceedings were taken under the Act by the Collectors of Customs at those places during the year under report.

6. If this letter and the Collector's report are published, I am to suggest that the names mentioned in them should be replaced by asterisks.

No. 195, dated 1st May 1893.

From—C. R. MARRIOTT, Esq., Collector of Customs, Calcutta,

To—The Secretary to the Board of Revenue, Lower Provinces.

I have the honour to submit the annual report on the working of the Merchandise Marks Act.

2. The figures appended show 344 cases dealt with as against 454 in the preceding year. Of these 302 were cases of unstamped or insufficiently stamped piece-goods, of which only 25 were released without fine, or about one-twelfth of the total number. The Act having now been in force for so long a period, a small fine was regularly imposed in these cases. The number released would have been still less had not the Board of Revenue been of opinion that the marking of the number of yards without the word "yards" was not an infringement of the Act. It may not be so, but it will now be always open to the importer to say that the number which is marked on the cloth is not the number of yards, but a particular number given according to trade practice to a particular kind of piece-goods. Thus, if 45 is a mark on piece-goods, and the piece is found subsequently to be 42 yards only, it may be pleaded that this is not the length, but a kind of mark which is common in this trade. Of course in that case it should have been detained as not marked with the length at all, but the Customs staff is insufficient to detain and measure all such, even were it desirable to do so.

3. In two cases only was information given from outside. One of these was successful, the other unsuccessful. The first related to Burmese mineral oil, which was being imported in old American and Russian oil tins. The importer was fined and compelled to erase all Russian and American indications.

4. In the case of wines, liquors, etc., it is a very common practice to have a label "made in Germany," "made in Holland," etc., distinct from the label describing the goods, manufacturer's name, etc. Of course the application of a little water will remove these as soon as they have passed the Customs. By a very strict reading of the words "accompanied by a definite indication" in section 10, clause (*e*) (1), it might be considered that such a separate label is excluded, but I doubt whether these words would in law justify a detention where the counter-indication of origin is given on a separate label. The law should, in my opinion, be amended by the addition of some such word as "inseparably" before the words "accompanied by a definite indication."

5. The following are the facts of some of the other cases dealt with:

German sherry.—There was an importation of two casks sherry *ex* S.S. *Benares* by Messrs. * * * & Co. The importers declared in bill-of-entry that the liquor was of German manufacture, but the casks bore no indication as to the place of origin. The sherry was allowed to be passed after having been put into bottles and labelled "Made in Germany."

Merino.—Mr. * * imported two cases merino *ex Rudesheimer*, and attempted to pass the goods on production of samples bearing the lengths in yards, but on examination the goods were found to bear no stamp at all indicating their lengths in yards. This was distinctly an attempt to deceive and obtain delivery of the goods contrary to the provisions of the Merchandise Marks Act. A penalty of Rs. 400 was imposed in lieu of confiscation, and the goods were passed after their lengths in yards had been stamped on them.

Cutlery.—There were six different consignments of cutlery detained as bearing marks in imitation of * * 's trade mark. Of these five were allowed to be reshipped and one released.

CALCUTTA;
The 1st May 1893.

C. R. MARRIOTT,
Collector of Customs.

BOMBAY AND SIND.

No. 5704, dated 7th August 1893.

From—W. L. HARVEY, Esq., I.C.S., Under-Secretary to the Government of Bombay, Revenue Department,

To—The Secretary to the Government of India, Finance and Commerce Department.

I am directed to forward herewith, for the information of the Government of India, a copy of the papers noted in the margin, containing the reports received from the Collectors of Customs, Bombay and Karachi, on the working of the Merchandise Marks Act, IV of 1889, during the year 1892-93, together with a copy of the Resolution No. 5703 of to-day's date recorded thereon by this Government.

Memorandum from the Commissioner of Customs, Salt, Opium, and Abkari, No. 3322, dated 1st July 1893, and its accompaniments.
Memorandum from the Commissioner in Sind, No. 2853, dated 22nd July 1893, and its accompaniments.

Extract from the Proceedings of the Government of Bombay, Revenue Department,—No. 5703, dated 7th August 1893.

Read—

Memorandum from the Commissioner of Customs, Salt, Opium, and Abkari, No. 3322, dated 1st July 1893,—Submitting a report No. C.-5210, dated 30th June 1893, from the Collector of Land Revenue, Customs, and Opium, Bombay, on the administration of the Indian Merchandise Marks Act, IV of 1889.

Read—

Memorandum from the Commissioner in Sind, No. 2853, dated 22nd July 1893,—Submitting letters Nos. 1046 and 1227, dated 14th June and 17th July 1893, respectively, from the Collector of Customs and Salt Revenue in Sind, reporting on the working of the Indian Merchandise Marks Act, IV of 1889.

RESOLUTION.—The reports submitted by the Collectors of Customs, Bombay and Karachi, on the working of the Merchandise Marks Act during the year 1892-93 are interesting, and show that the Act is being worked carefully and beneficially to the public.

2. The number of cases of breaches of the provisions of the Act dealt with both at Bombay and Karachi in 1892-93 was 812, being considerably greater then the number (388) dealt with in the preceding year, though a little less than the number (825) dealt with in 1890-91.

3. Government notice with pleasure the commendations bestowed by the Collector of Customs, Bombay, and the Commissioner of Customs, Salt, Opium, and Abkari on Messrs. Jehangir Dosabhai Framji and Young.

4. A copy of the papers and of this Resolution should be forwarded to the Government of India for information.

No. 5210-C., dated 30th June 1893.

From—J. M. CAMPBELL, Esq., C.S., C.I.E., Collector of Land Revenue, Customs, and Opium, Bombay,

To—The Commissioner of Customs, Salt, Opium, and Abkari, Bombay.

I have the honour to submit the Annual Report for the official year 1892-93, being the third Annual Report on the administration of the Indian Merchandise Marks Act which came into operation on the 1st of April 1889.

2. The accompanying statement marked A has been prepared in accordance with the instructions of the Government of India communicated in Government Resolution, Revenue Department, No. 8960, dated 15th December 1890. It shows that the total number of cases under the Merchandise Marks Act during the year was 447 against 262 in the previous year. For easy comparison statement A shows the figures for each of the years 1891-92 and 1892-93.

3. In the year under report 260 infringements of clause (*d*), 99 under clause (*e*), and 88 under clause (*f*) of section 18 of Act VIII of 1878, as amended by the Merchandise Marks Act, were detected. Of the 447 cases shown in statement A, fines and confiscations were inflicted in 361 cases. In the remaining 86 cases the goods under detention were passed without penalty, as the requirements of the Act were held to have been partly or fully complied with.

4. Except 13 cases which infringed both clauses (*d*) and (*e*) of section 18 of the Customs Act, and 3 which infringed both clause (*e*) and section 4 (1) of the Merchandise Marks Act, all the cases adjudicated were under clauses (*d*), (*e*), or (*f*) of section 18.

5. Under clause (*d*) of section 18 no cases occurred of importation of goods with false trade marks. On the other hand, several cases of false trade description were detected chiefly as regards place of manufacture, material, number, weight, or measure. Other false trade descriptions consisted of the application to goods of descriptive expressions in languages (mostly English) other than those of the country of origin.

6. The annexed comparative statement marked B shows that of the 447 seizures, 305 was adjudicated by the Collector, 11 by the 1st Assistant Collector, and 131 by the Assistant Collector in charge Docks, Custom House. Only five decisions were made the subject of appeals—one to the Commissioner from the Collector's decision, and four to the Collector from the Assistant Collector in charge Docks, Custom House. The result of these appeals was that the order passed in each case was confirmed by the appellate authority. The total recoveries under fines and redemptions amounted to Rs. 6,727.

7. During the year 8,393 packages of different kinds of goods, 17,843 bundles of steel and white wooden boards, 17,684 bars of iron, and 1,075 slabs of tin and copper were detained. The annexed statement C shows in detail the disposal of the detained packages.

8. During the year in 88 cases the length of piece goods was not stamped upon the pieces as required by clause (*f*) of section 18 of the Customs Act as amended by the Merchandise Marks Act. In some of these cases no fines were inflicted; in all the pieces were required to be stamped with their length in standard yards before they were allowed to be cleared from the Custom House.

9. The following are among the more important cases decided during the year:—

(1) Messrs. * * * , clearing agents for * * * * * , an up-country European firm, imported a consignment of German cigars in boxes elaborately prepared to deceive buyers into the belief that the cigars were Havanas. The care to perfect the imitation went so far as to affix to each box an imitation Spanish stamp. The name of the importers and other descriptions were conspicuously and indelibly stamped into the wood, but the "Made in Germany," which was in small rubber-stamped letters, was neither shown in a sufficient number of places nor in a permanent way. As the one removable stamp of origin could not be held to be more than a pretence, a fine of Rs. 200 was inflicted and every false trade description applied to each box was ordered to be accompanied by an indelible and conspicuous stamp of the country of origin.

(2) Messrs. * * * * * * * * , of Bombay, imported from Tellicherry a large consignment consisting of 10,509 tins of Indian sardines cured and tinned in Mahé in Southern India. Of these 3,700 tins bore expressions which unmistakably conveyed a false indication of origin. They were marked "Sardines à l'huile, A. Bustamente and Co., Maracaibo." As Maracaibo is a place in Venezuela in South America, the application of this name to sardines caught in Indian waters and packed in India constituted a case of false trade description. The remaining 6,800 tins bore French expressions, which, in the absence of a definite indication of origin, were also misleading. The get up of all the tins was creditable to the factory in Mahé. The tins so closely resembled French sardine tins as to be likely to deceive any one but an expert. The whole consignment was confiscated subject to a redemption of Rs. 200, provided it was reshipped to Mahé for repacking in tins marked in accordance with the provisions of the Merchandise Marks Act. The redemption penalty was paid and the consignment shipped to Mahé.

(3) Messrs. * * * * , of Bombay, imported six cases of varnish from Antwerp. The tins were marked "Carriage Copal Varnish, Stobbs, Wilson, and Pollard Works, London, E." As the consignment was originally shipped at Antwerp, the labels created some suspicion. The invoice was dated London and signed Hunter & Co. On being asked for an explanation, the importers declared their inability to state whether the varnish was foreign or English. After some delay they produced a letter from Messrs. Stobbs, Wilson, and Pollard to Messrs. Hunter & Co., in which they stated that, as the varnishes were prepared in Belgium from their own recipe in exactly the same way as varnishes manufactured by them in England, they thought they could apply their own name to the goods. The reason why they were made in Belgium was because they could be made cheaper there than at their own works in England. They further regretted that they had omitted to mark the tins "Belgium make." The explanation was far from satisfactory. Without any reasonable doubt the shippers intended to pass the varnish as English, manufactured by the firm of Messrs. Stobbs, Wilson, and Pollard at their works in London. The whole consignment was confiscated, but was allowed to be redeemed on payment of a penalty of Rs. 300, provided the words "Works, London," were removed and "Made in Belgium" stamped on each tin.

(4) Mr. * * * , of Bombay, imported from Boulogne seven cases of the vermifuge drug santonine. A sample forwarded for analysis to the Chemical Analyser to Government was found to contain 90 per cent. of boracic acid and only 10 per cent. of pure santonine. The analysis disclosed a most serious fraud upon the public. The importer could give no satisfactory explanation. There was no doubt as to his guilty knowledge, as he was paying about one-third the price of the genuine article. The importer was fined Rs. 300 and the seven cases were confiscated. The importer was given the option of redeeming the cases for reshipment to France on payment of a penalty equal to the value of the goods. Of this he did not avail himself. The importer appealed from the Collector's decision to the Commissioner, who declined to interfere with the Collector's orders.

(5) In two similar cases of adulterated santonine fines of Rs. 300 were adjudged and the goods confiscated, redemption for reshipment being allowed on payment of penalties amounting to the value of the goods. As the option of redemption was not availed of, the goods in both cases became forfeited to Government.

(6) Mr. * * * , of Bombay, imported one case of spoons from Antwerp which, though manufactured in Germany, were stamped "Hills Menke & Co., Birmingham," the paper boxes containing the spoon being labelled "Made in Germany." The importer stated that, but for the labels on the boxes, he would have taken the spoons to be of English manufacture on account of the name and because Birmingham was stamped on each spoon. He referred the Customs Department to the European firm through whom the goods were ordered. The European firm admitted the spoons were of German manufacture. They said the stamping was due to some mistake on the part of the German manufacturers. The Custom House was unable to accept the view that the stamping of the spoons in Germany was not arranged with the object of enabling German spoons to pass as English spoons. The spoons were accordingly confiscated subject to a redemption payment of the value of the goods, namely, Rs. 225, the name of Messrs. Hills Menke & Co., and Birmingham being ordered to be removed before passing the consignment into town. The importer did not redeem the consignment, which was eventually forfeited to Government.

(7) During the year several cases occurred of the importation of what was called "almond oil." This oil on analysis proved to be not genuine almond, but peach-stone oil. Fines were inflicted in all these cases with the result that none other than the genuine article is now imported under the name of "almond oil," the other qualities being imported under the names of "impure almond oil" and "oil amygdali Persic," the latter meaning "peach-stone oil." Some consignments are now imported with the strange title "best impure almond

oil." It may be remarked that the Courts have held that the application of the word "best" to even the worst goods does not amount to a false trade description within the meaning of the Merchandise Marks Act

10. A large number of short measures in oils and turpentine were discovered during the year. These and similar irregularities have raised the detections to a higher total than in the preceding year.

11. During the year the Abkari Department, under the Indian Merchandise Marks Act, instituted one criminal prosecution against a Parsi wine merchant named Pestonjee Manockjee in respect of certain German port wine bottled by him in Bombay, and marked "Best Spanish Port, London, bottled by Fd. Paullock & Co." etc. The wine was originally imported from Hamburg in casks which were marked "Made in Germany." The invoices for the wine also bore the statement that the wine was German made. This wine was sold by the importers to Pestonjee Manockjee as port wine at the low price of Rs. 1-6 per gallon, exclusive of duty.

12. The prosecution contended that Pestonjee Manockjee was not justified in styling the wine in question Spanish port. Three charges were framed against the accused—

(1) making use of a false mark under section 488 of the Indian Penal Code;
(2) applying a false trade description under section 6 of the Indian Merchandise Marks Act; and
(3) selling goods to which a false trade description had been applied under section 7 of the same Act.

The magistrate held that the first charge was not proved, as there was no clear or distinct evidence to show where the wine was made, and there was evidence that Spanish wine was shipped from Hamburg; that the wine in question had the flavour of Tarragona wine, and that it arrived in Bombay in casks apparently of Spanish make. He therefore considered that there was a reasonable doubt as to whether the wine was not of Spanish production, and accordingly gave the benefit of the doubt to the accused. As to the second charge, the magistrate, for reasons given, held that though the accused had technically applied a false trade description to the wine by placing upon the bottles the words "Spanish port," he had acted without intention to defraud. He was therefore acquitted on the second charge. As regards the third charge, the magistrate said that the description "London, bottled by Fd. Paullock & Co.," was no doubt false, but that it appeared from the evidence that it had been the practice for some years to bottle wines and spirits in Bombay, and mark them in such a way as to give them the appearance of having been bottled in Europe. In consideration of this circumstance, as well as of the fact that the accused had, as provided in section 7, proved (*a*) that having taken all reasonable precautions against committing an offence against this section, he had at the time of the commission of the alleged offence no reason to suspect the genuineness of the trade description, and (*b*) that on demand made by or on behalf of the prosecutor he gave all the information in his power with respect to the persons from whom he obtained such goods or things, the magistrate held that there was nothing to show that the accused did not otherwise act innocently, section 7 (*c*). The accused was accordingly also acquitted on the third charge.

13. The case was a strong one. It was very carefully prepared by the Assistant Collector, Mr. Almon, and was conducted by the Government Solicitor. The result seems to show that, under the law as it stands, it will be exceedingly difficult, if not impossible, to have offenders punished in Criminal Courts for violating the provisions of the Merchandise Marks Act. At the same time, the prosecution has not been without effect. It has attracted the attention of bottlers, and has caused greatly increased care in the choice of the inscriptions applied to the capsules and labels of wines and spirits bottled in Bombay.

14. Having regard to the limited staff of Customs Examiners, I venture to hope that Government may be pleased to consider the past year's administration of the Merchandise Marks Act satisfactory. The care taken both by the First Assistant Collector, Prince's Dock, Mr. Jehangir Dosabhai Framji, and by the Assistant Collector, Mr. Young, seems to me to have secured the valuable objects for which the Act was passed without giving cause to any reasonable complaint that the provisions and restrictions of the Act interfered with legitimate trade.

APPENDIX A.

Administration of the Merchandise Marks Act (details required under Government of India's letter No. 295-S., dated 28th November 1890).

Year.	NUMBER OF CASES IN WHICH DETENTION WAS ORDERED.			Total of columns 2 to 4.	Detention followed by confiscation.	DETENTION FOLLOWED BY RELEASE.		Detention on information.	Detention without information.	REMARKS.

BOMBAY;
The 30th June 1893.

J. M. CAMPBELL,
Collector of Land Revenue, Customs, and Opium.

No. 3322, dated 1st July 1893.

Endorsed by the Commissioner of Customs, Salt, Opium, and Abkari, Bombay.

Submitted to Government in the Revenue Department.

The report is very interesting, and shows that the Act has been worked carefully and beneficially to the public, without interfering with honest and legitimate trade. Credit is due to the officers named by Mr. Campbell for the way in which they have done difficult and responsible work.

No. 1046, dated 14th June 1893.

From—R. N. COGHLAN, Esq., Collector of Customs, Karachi,

To—The Commissioner in Sind, Karachi.

I have the honour to submit my third annual report on the working of the Indian Merchandise Marks Act, IV of 1889, together with a statement of the cases disposed of during the past year 1892-93.

2. The total number of cases dealt with during the year under review were 365 against 126 in the year previous, *viz.* :—

Under clause (*d*)	97
Under clause (*e*)	236
Under clause (*f*)	32

3. The cases under clause (*d*) were mostly those of omissions to mark the country of origin on goods of foreign produce showing description of the articles in the English language.

Of the few cases of importance, I give details below. The rest were of the ordinary kind, *viz.*, foreign goods bearing English descriptions without showing origin.

There were a few consignments of imitation gold thread, imitation gold wire, and imitation silver thread and wire.

These were all the produce of Germany. All the packets were falsely marked as "gold thread," "gold wire," "silver thread," and "silver wire." The importers were fined and allowed to correctly mark the goods before they passed.

There was a consignment of 30 cases German bitters from Hamburg labelled with description of contents in the English and Spanish languages. These labels were conspicuously stamped in red ink "Angostura Bitters." The bottles were besides put up exactly in the same manner as Angostura Bitters by Dr. Siegert. The origin, however, was omitted. I ordered the confiscation of the consignment as being one of false trade description, giving the consignees option of redeeming the goods on payment of a fine of Rs. 250 within three months from date of the order. The consignees did not avail themselves of the redemption offered. The goods were consequently forfeited to Government.

Two consignments of German whisky and port and sherry—namely, 100 cases whisky and 20 cases port and sherry—were imported from Hamburg; the labels affixed to the bottles were in English, and the whisky was stated to have been distilled in the "Glen Bollin" distillery. The wines, besides being labelled with description in English, showed the names of Spanish and Portuguese dealers with their places of business in Spain and Portugal. Both the whisky and the wines were, however, stamped "bottled in Germany." As the labels on the bottles were clearly intended to deceive the public into the belief that the goods were the produce of the country of which they were not, I directed the consignee to correctly mark the goods on payment of a fine before they were passed.

One consignment of needles from Antwerp. The tins containing the needles were marked 10,000, but the actual number in each was found to be only 9,000. The importers were fined Rs. 10, and permitted to redeem the goods on payment of a further fine of Rs. 10, when, after correctly stamping the goods, they were passed.

4. The infringements under clause (*e*) were of the application of the names of British or British Indian dealers to goods of foreign manufacture. With the exception of a few in the vernacular language, almost all the names were shewn in English.

The increase in the number of cases this year is accounted for by the inclusion of infringements under clause (*e*) in respect of consignments of iron and other metals and packages of goods in bulk imported from foreign countries having been dealt with under the Act. These were marked with the names of British or British Indian dealers, but did not show origin. In the years previous such goods were passed unnoticed.

There were no cases under this head during the year requiring special mention. They were all of the description referred to in my last report.

5. There were 32 cases under clause (*f*) of omissions to mark or of improperly marked piece-goods as regards lengths. By improper marking I mean the lengths were marked in chalk which was easily removable. In eleven cases I imposed a nominal fine previous to allowing the pieces to be properly marked. In the rest of the cases the pieces were stamped and passed or passed with a warning.

Statement showing the number of cases dealt with under section 18 of the Sea Customs Act, VIII of 1878, as amended by the Indian Merchandise Marks Act, IV of 1889, during 1892-93.

Number of cases detained.	Clause and section under which detention was ordered.	Detention followed by confiscation.	Detention followed by release with or without fine.	Detention ordered on information received.	Detention ordered without information.

KARACHI;
The 14th June 1893.

R. N. COGHLAN,
Collector of Customs.

No. 2853, dated 22nd July 1893.

Endorsed by the Commissioner in Sind.

Submitted to Government with a further report of the Collector. It is a pity that the number of cases has increased, but it is hoped that merchants will gradually realise the points to be borne in mind, and cases of absolute misdescription, such as described by the Collector, were rightly punished. Rather more than half the cases were let off without payment of a fine.

No. 1227, dated 17th July 1893.

From—R. N. COGHLAN, Esq., Collector of Customs, Karachi,

To—The Commissioner in Sind.

With reference to your memorandum No. 2479 of the 28th ultimo, I have the honour to append a statement in the form asked for, showing the number of cases in which fine was inflicted, and in which the goods were released without fine.

In the year previous the marking of bars, rods, rails, plates, and sheets of iron, steel, etc., was not at first enforced, as it was thought the law did not apply to such articles. The letters or initials shown on the bars, etc., were considered as marks of identification of goods of the different shippers, and were passed as such. On a reference to the Bombay Custom House last year, it was ascertained that the omission of origin on bars of iron, etc., so marked was treated as an infringement of the Act. I therefore adopted the practice here. This view of the question was confirmed by Government of India Resolution No. 269-S., dated the 29th November 1892, Finance and Commerce Department.

The bars, rods, etc., were marked with the initials of British or British Indian dealers without showing country of origin thereon. Under section 18, clause (*e*), of the Sea Customs Act, VIII of 1878, as amended by the Indian Merchandise Marks Act, IV of 1889, goods of foreign produce having applied thereto any name or trade mark of any manufacturer, dealer, or trader in the United Kingdom or British India not accompanied by a definite indication of the country of origin are prohibited import. Under this rule bars, etc., of iron or other metals coming from Belgium or other continental ports, if marked with the names "Cosser & Co.," would require the country of origin to be also marked thereon. The stamp "Cosser & Co." would lead to the presumption that the iron was of British manufacture, and, as it was not so, the country of origin must necessarily be declared.

Statement showing the number of cases dealt with under section 18 of the Sea Customs Act, VIII of 1878, as amended by the Indian Merchandise Marks Act, IV of 1889, during 1892-93.

Number of cases detained.	Clause and section under which detention was ordered.	Detention followed by confiscation.	Detention followed by release with or without fine.		Detention ordered on information received.	Detention ordered without information.

KARACHI;
The 17th July 1893.

R. N. COGHLAN,
Collector of Customs.

MADRAS.

Extract from the Proceedings of the Government of Madras, Revenue Department,—No. 2907-Mis., dated 7th August 1893.

Read—

Proceedings of the Board of Revenue, Separate Revenue, No. 298, dated 7th July 1893.

Read the following—

Letter from J. STURROCK, Esq., Acting Collector of Sea Customs, Madras, to the Secretary to the Commissioner of Salt, Abkari and Separate Revenue, No. 934-G., dated 6th June 1893.

I have the honour to submit the third annual report for the year 1892-93 on the administration of the Merchandise Marks Act at this port, together with a statement in the prescribed form showing the number of cases dealt with under section 18 of the Sea Customs Act as amended by Act IV of 1889.

2. In about 312 instances in which packages were opened and examined at the Custom House for the purposes of the Act, there were 16 in which infringements of the provisions of the law were detected and the goods detained. Of these eleven consisted of unstamped or irregularly stamped piece-goods in contravention of the provisions of clause (*f*), four of omissions to clearly indicate the country of origin as required by clause (*e*), and one of a false trade description under clause (*d*) of section 18 of the Sea Customs Act.

3. In three of the eleven cases falling under clause (*f*), it was probably intended to defeat the object of the law by marking the lengths on small strips of cloth (easily removable) attached to the pieces instead of on the pieces themselves. In all these as well as in seven of the eight cases under that clause small fines were imposed, and the goods allowed to pass on their being properly stamped at the Custom House. The remaining case was disposed of with a warning.

4. The four cases under clause (*e*) related solely to goods manufactured out of the United Kingdom and described in the English language without any qualification as to the country of origin. The description in three of these cases was not of a very marked character, and no penalties were therefore levied, but the importers were required to remove the objectionable words or to supply the omissions before removing the goods. In the fourth case, which consisted of samples of brandy, the importer, a native, elected to abandon the goods rather than have any trouble about them.

5. The case under clause (*d*) was one of a false trade description, in which a small consignment of almond oil was imported labelled "Ol. Amygd. dule exot," which is the foreign oil of almonds, and as such not genuine. The consignee was, however, allowed to pass it on, adding the word "Persica" to the description given on the label, so as to remove all doubts regarding the quality of the oil.

6. In conclusion, I would remark that the offences against the Act during the year under report were neither serious nor numerous, which shows that the law is better understood, and that efforts are made to respect its requirements. The penalties were in no case unduly severe, and on the whole the Act has worked smoothly.

Statement showing the number of cases dealt with under the Merchandise Marks Act during the year 1892-93.

Number of cases in which detention was ordered.				Number of cases in which detention was followed by confiscation.	Number of cases in which detention was followed by release.		Number of cases in which detention was ordered on information received.	Number of cases in which detention was ordered without information.
Under section 18, clause (*d*).	Under section 18, clause (*e*).	Under section 18, clause (*f*).	Total.		With fine.	Without fine.

Read also the following—

Letter from H. M. WINTERBOTHAM, Esq., Acting Collector of Tanjore, to the Secretary to the Commissioner of Salt, Abkari, and Separate Revenue, No. 63-S. R., dated 25th June 1893.

With reference to Board's Proceedings, dated 30th January 1891, No. 29-S.R., and 11th February 1892, No. 86-S.R., I have the honour to report on the working of the Indian Merchandise Marks Act for the year 1892-93.

2. No instance has occurred of any goods being imported bearing a counterfeit trade mark or a false trade description; nor was any instance discovered of goods marked with the purpose of deceiving people into the belief that they were of English or British Indian manufacture.

3. There is at Negapatam a curious trade in cotton piece-goods with Penang and Singapore, which is of the following character: Cambric of a fine texture, in pieces 12 yards long and about 42 inches wide, is imported by steamer into Negapatam from Penang and Singapore. At Negapatam the cloth is dyed in indigo, and re-exported to Penang and Singapore, where it is said to be in demand as clothing for the Chinese. The trade appears to be chiefly in the hands of three native firms. During the past year 298 cases of cambric, containing each 200 pieces of 12 yards, were imported. The whole of this cambric is said to be of English manufacture, and as regards most of the consignments there is no doubt about the matter. In most instances each piece bears—

(1) The stamp of the manufacturer: and place of manufacture: thus, "Thos. G. Hill & Co., Manchester."
(2) The trade mark; thus, three elephants and the words "Registered trade mark No. 24398."
(3) The name of a firm in Penang or Singapore: thus, "Sandilands Battery & Co., Penang."
(4) The length in yards.
(5) Certain inscriptions which I cannot read in Hindustani and Chinese.

4 The cambric in 41 of the cases or boxes bore neither the place of manufacture nor the length of each piece. In 16 boxes the cambric was marked with the length, but was not stamped with the place of manufacture. In 7 boxes the pieces were not stamped with their length in yards. All the above 64 boxes were detained pending inquiry into the place of manufacture. In regard to several consignments, copies of the English invoice were produced or inquiry showed that there was no reason to doubt that the cambric was English.

5. In one instance the consignee of 5 boxes, in which the cambric pieces bore trade marks, but were not stamped with the length, was fined Rs. 10 by the Head Assistant Collector (Mr. Francis), and on a repetition of the offence in respect of 10 boxes, the same man was fined Rs. 100 by the Head Assistant Collector (Mr. Miller). In another instance the consignee of 15 boxes was fined Rs. 50 by the latter officer for a similar offence. I have examined the records of these cases, and do not see that any fraudulent intention was established, but the consignees were not in a position to show where the goods were manufactured. In the above instances the piece-goods were allowed by the Head Assistant Collector to be dyed and re-exported to Penang. In the remaining instances the consignees were allowed to stamp the pieces with the length thereof and to remove them with a warning.

6. In two instances in which the place of manufacture appear doubtful, the consignees were required to produce the English invoices, and have not yet done so. I forward herewith, for the inspection of the Board, the stamped portion of a piece from each of the said two consignments.

One of them bears the stamps "Boustead & Co., Penang and Singapore," and "E. Birch & Co., Manchester," but the number of the trade mark (apparently a bustard) is not given. There is a ticket gummed on to the piece bearing a trade mark of four anchors with number 24,001.

The other bears an inscription in Chinese, Hindustani, and Tamil: the Tamil reads "Uttanbarg Brothers & Co."

The native importers have not yet been able to produce evidence that these piece-goods were manufactured in the United Kingdom. There is no doubt that they were meant to be dyed and re-exported; and if any deception was intended, the persons deceived must be the Chinese who use the dyed article.

Whether the Chinese have any preference for cambric of Madras manufacture, and suppose this dyed cambric to be of Madras origin, I do not know.

7. Enclosed is a statement giving in a tabular form the information required by paragraph 4 of the instructions printed on page 1 of Board's Proceedings No. 29, dated 30th January 1891, Separate Revenue. The merchants are now acquainted with the requirements of the Act, and infringements of its provisions are in future not likely to be numerous.

I regret that heavy work and the inquiries which I have had to make have caused a delay which ought not to have occurred.

Statement showing particulars referred to in paragraph 4 of the instructions contained in Board's Proceedings, No. 29, dated 30th January 1891.

Number of cases in which detention was ordered under clause (*f*) (a), section 10, Act IV of 1889.	Number of cases in which detention was followed by confiscation.	Number of cases in which detention was followed by release with or without a fine.		Number of cases in which detention was ordered on information received.	Number of cases in which detention was ordered without information.

Statement showing the detention of goods under the Indian Merchandise Marks Act, 1889, in the district of Malabar during the year 1892-93.

PORT.	Number of cases in which detention was ordered.	Detention followed by confiscation.	DETENTION FOLLOWED BY RELEASE.		Detention ordered on information received.	Detention ordered without information.	REMARKS.
			With fine.	Without fine.			
Tellicherry ...	1	...	1	...	...	1	In March last 15 dozen bottles of country castor-oil shown in an import manifest from Bombay were short delivered at Tellicherry, the quantity actually landed being only 30 bottles. Of these bottles, 10 bore English trade marks "J. T. Morton, London." These were old castor-oil bottles of English manufacture from which labels had not been removed. The consignment was consequently detained, but was released under the orders of the Deputy Collector in charge of Customs after removing the labels and after levying a penalty of Rs. 50 under article 37 of section 167 of the Sea Customs Act.
Cochin ...	1	...	...	1	...	1	In November 1892, a consignment of brandy landed by Messrs. * * & Co. at Cochin was detained under section 18 of the Sea Customs Act by the Superintendent of Customs because the label had no indication as to the place of manufacture. The label contained the following words: "Old Stock, Trade mark, Fauslin Freres Cognac," and in the corner "Déposé." The goods were released under the orders of the Collector, as under section 18 goods can be detained only if they bear any name or trade mark purporting to be a colorable imitation of the name of trade mark of any person who is a manufacturer, dealer, or trader in the United Kingdom or in British India. This is not the case in the present instance. Moreover, under paragraph 2 of the Executive Instructions communicated in Board's Proceedings, dated 30th January 1891, No. 29, the goods should not have been detained, the manufacturer's name and trade description being expressed in French, not English.
TOTAL ...	2	...	1	1	...	2	

RESOLUTION.—The reports of the Collector of Sea Customs, Madras, and of the Collectors of Tanjore and Malabar on the administration of the Merchandise Marks Act, IV of 1889, during 1892-93 are submitted to Government. There were no detentions under the Act in the other districts.

2. The total number of cases of detention of goods under the Act during the year under report was 29. Of these, 2 were under section 18, clause (*d*), of the Sea Customs Act as amended by section 10 of the Merchandise Marks Act, 5 under 18 (*e*), and 22 under 18 (*f*), which requires all piece-goods to be stamped with their length.

3. The following statement shows the particulars of detention:

Districts and ports.	Detentions ordered.	Detentions followed by confiscation.	DETENTIONS FOLLOWED BY RELEASE.		Detentions ordered on information received.	Detentions ordered without information.
			With fine.	Without fine.		
Madras	16	1	10	5	...	16
Tanjore (Negapatam)	11	...	3	8	...	11
Malabar (Tellicherry)	1	...	1	...	...	1
(Cochin)	1	...	...	1	...	1
TOTAL ...	29	1	14	14	...	29

4. The number of detentions under clause (*f*) is large as compared with those under the other clauses. In 8 out of the 11 cases in Madras under clause (*f*), the lengths were marked on small strips of cloth easily removable attached to the pieces instead of on the pieces themselves. In 10 cases small fines were levied, and in the remaining case a warning was considered sufficient.

5. In Tanjore cambric of a fine texture, which is said to be of English manufacture, is imported from Penang and Singapore, is dyed at Negapatam in indigo, and re-exported to the same settlements for use as clothing by the Chinese. It is to such consignments as the above that the eleven cases of detention shown against Negapatam refer. As the Collector states that he does not see that any fraudulent intention was established in the three cases in which the importers were punished with fine, the fines Rs. 100 and Rs. 50 in two cases appear to be heavy. His attention is drawn in this connection to the correspondence contained in G. O., dated 11th October 1889, No. 828 (Revenue), communicated to Collectors in Board's Proceedings, dated 15th October 1889, No. 375.

Order thereon by the Government of Madras.

Ordered to be forwarded to the Government of India.

Copy to the Government of India, Finance and Commerce Department.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the week ending at 8 a.m. on Saturday, October 7th, 1893.

At the close of the previous week fine settled weather had set in over the whole of Northern and North-Western India, where usually light and rather dry westerly and north-westerly winds were blowing, while the humid monsoon currents were still affecting Burma, the neighbouring parts of Assam and Bengal, and the south and west of the Peninsula, over which areas fairly general rain was still falling. These conditions have continued practically throughout the present week, the only exception being that in the earlier part of the week the pressure changes transferred the area of lowest pressure, which had previously been over Burma, to the Punjab, and perhaps also partly over the Himalayas, and a largely defective pressure was recorded on the 3rd over Northern India and in the hills. Conditions therefore became slightly disturbed over Northern India at this period, and a few local storms occurred in Northern and Central India; and in the case of some of these storms in the hills they were accompanied with hail, Simla experiencing a rather heavy hail storm. A rapid increase of pressure however, which took place over Northern India on the 4th, quickly restored the normal conditions of pressure, and with this again fine settled weather set in over Northern and North-Western India. Practically throughout the week, however, **rain has been falling in Burma and over the south and west of the Peninsula.**

On October 1st, or the first day of the week under review, pressure was rising briskly over Burma and slowly over the remainder of India, except in Bengal and at some of the north-western stations. This change made the low pressure area which had existed over Burma rather less prominent than it was; but pressure was still rather largely below the normal over Eastern and North-Eastern India, while it was in excess elsewhere. With these conditions rainfall continued fairly general in Burma and over the south of the Peninsula, while showers were also falling in Madras and Bombay. On the 2nd a rapid fall of pressure had occurred in the Punjab and North-Western Provinces and a brisk to moderate fall elsewhere, the fall being smallest over Burma; and pressure became in defect of the normal in all districts, the defect exceeding a tenth of an inch in Eastern and North-Eastern India, and also along the foot of the Himalayas and in the Punjab. The area of rainfall on the 2nd was nearly the same as on the previous day, the rainfall being decidedly heavy in Burma. A further brisk fall of pressure had occurred on the 3rd in the Punjab, Sind, and Rajputana and a slow fall elsewhere, and the area of lowest pressure was transferred to the Punjab, while comparatively high pressures were reported in the south and west of the Peninsula; but the differences of pressure over India were small. Pressure had, however, become very considerable below the normal, the defect being largest at the northern stations and along the base of the Himalayas, equalling no less than 0·18 inch at Dera Ismail Khan and Sibsagar. Conditions therefore became distinctly less settled than they were, and there was a considerable increase in cloud proportion over Northern India. Heavy rain continued in Burma and numerous showers in Bombay, Madras, and the extreme south of the Peninsula. On the 4th a brisk increase of pressure had taken place over the Punjab and in Assam and a moderate increase elsewhere, except at a few stations on the

West Coast of the Peninsula, where a slight fall was reported. Pressure was decidedly uniform, though there were three centres of comparatively low pressure—one in the Punjab, another close to the Himalayas, and the third over South Bengal. Conditions continued, therefore, rather disturbed, and in addition to the general rain in Burma and in the south and west of the Peninsula local showers, accompanying small local storms, occurred in some of the districts of Northern India, Rawal Pindi reporting a thunderstorm with hail, and one or two other stations thunderstorms. On the 5th a rapid increase of pressure had occurred over the Punjab and a brisk rise over Northern India generally, while the increase was small over the Peninsula and in Burma. The abnormal pressure distribution which obtained on the 4th therefore had practically disappeared, and pressure was nearly normal; but the disturbed conditions which had been in existence on the 4th had again given local storms over Northern India, and Simla during a rather severe hailstorm had received 1·06 inches of hail and rain. General rain had also been received over Burma and in the south and west of the Peninsula and at some stations in South-East Bengal. Somewhat numerous showers were also reported in the Central Provinces. On the 6th the changes of pressure were small and the distribution continued nearly normal. Fine settled weather therefore again set in over Northern and North-Western India, and rainfall was confined to Burma and to the west of the Peninsula and Madras. Again on the 7th the changes of pressure were extremely small, and the general weather conditions were quite unchanged. Throughout the week, therefore, the monsoon current has only been affecting Burma and the south and west of the Peninsula, which districts have therefore received heavy rain, while over the remainder of India, except for a brief period of slightly disturbed weather in the middle of the week, weather has been fine and settled throughout the period under review.

Temperature.—The following table shows the variation of the mean temperature from the normal on each day of the week for the different Provinces of India. Temperature, it will be seen, has been in small defect practically throughout the week, and for the whole week the average defect has been 0·5°. The defects, however, have been principally confined to Sind, Rajputana, Central India, Guzerat, North-Western Provinces and Oudh, while the other provinces have recorded nearly normal temperatures:

Rainfall—Has been rather heavy in Burma and in the west and south of the Peninsula, while moderate rain has been received in Assam, East and South Bengal, and also in Rajputana (West), Guzerat, Berar, and parts of the western and central districts of the Central Provinces. The North-Western Provinces and Oudh, the Punjab (except the Hill Districts), the Central Provinces (East), Kathiawar, Sind, Central India, and Hyderabad (South) have, on the other hand, received practically no rain during the week. The falls have been decidedly heavy in Tenasserim, which has received an average amount of 7·87 inches, or 3·37 inches more than usual. Falls exceeding three inches have been registered in Lower Burma, Upper Burma, and Mysore, and of more than two inches in Central Burma, Arakan, Eastern Bengal, and Coorg; while out of the 52 divisions sending in reports, no less than 31 have received no rain at all, or falls averaging about a quarter of an inch or less. In a few cases the falls have been much heavier than usual for the time of year, and falls were more than 50 per cent. in excess in Tenasserim, Punjab (Hill Districts), Madras (South Central), Mysore, Rajputana (West), and Madras (South). In the following divisions the falls have also been in excess, but the excess amounts have been comparatively small:—Central Burma, Eastern Bengal, Coorg, Rajputana (East), Central India (West), and Madras (Central). In all other divisions the falls have been smaller than usual. In many divisions, however, the normal rainfall at this period is very small, so that the comparative or entire absence of rainfall is probably not very important; but in the following districts moderate rain is usually received at this season, though very little has fallen during the week under review, and the falls have been less than 25 per cent. of the usual amount. Assam (Brahmaputra), Central Bengal, North Bengal, Orissa, Chota Nagpur, Bihar, North-Western Provinces, Central Provinces, Madras, East Coast (Central, North, and North), and Hyderabad (South).

The last column of the rainfall table shows the comparison of the total rainfall during the present monsoon season from May 28th up to October 7th with the fall for the same period in normal years. It will be seen that out of 51 divisions for which normals are known the monsoon rainfall of 1893 has been in excess in 32 divisions and in defect in 18 divisions, while it has been normal in amount in one division. The excess has been largest in West Rajputana (97 per cent.), in North-West Punjab (68 per cent.), and South Hyderabad (63 per cent.), while the defects have been largest in Coorg (35 per cent.), Kathiawar (20 per cent.), Malabar (19 per cent.), and Mysore (17 per cent.)

The following statement shows the largest amounts of rain received at single stations in various districts during the week as reported in the rainfall telegrams:

Division.	District.	Station.	Amount.
Tenasserim	Amherst	Amherst	7·98 inches.
Lower Burma	Pegu	Kyauktan	5·03 "
Central Burma	Thayetmyo	Thayetmyo	5·58 "
Upper Burma	Pakokku	Pakokku	7·79 "
East Bengal	Chittagong	Chittagong	8·54 "
Madras (South Central)	Salem	Pennagaram	5·55 "
Ditto	Nilgiris	Ootacamund	4·49 "
Mysore	Mysore	Seringapatam	6·25 "
Ditto	Bangalore	Closepett	8·10 "
Ditto	Chitaldrug	Holalakere	5·84 "
Ditto	Tumkur	Tiptur	7·00 "
Bombay (Deccan)	Kolhapur	Baroda	5·61 "
Madras (Central).	Bellary	Kudligi	6·34 "
Ditto	Cuddapah	Piler	5·75 "
Ditto (East Coast, South).	Trichinopoly	Turaiyur	5·05 "

SIMLA, *12th October, 1893.*

ALEX. PEDLER,
Offg. Meteorological Reporter to the Government of India.

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 7th October.*—Rainfall moderate in the Deccan and the Central, Southern, and West Coast districts; light in the Circars and Carnatic. Rain wanted in the Carnatic and Deccan districts, where some crops are suffering; elsewhere sowings proceeding very generally and standing crops are fair. Harvest of early crop proceeding with fair outturn. Pasturage and fodder generally sufficient. Prices almost stationary, but slightly easier in some of the Central and Southern districts.

Bombay.—*For week ending 11th October.*—Rain throughout the Presidency Proper; slight or moderate in Gujarat and the Konkan; generally good and beneficial to the crops in the Deccan and Karnatak; but more rain is still required in parts. Standing crops withering for want of moisture and damaged by rust, insects, or rats in parts of four districts. Preparations for late crops continue in six, and sowing in eight, districts. Reaping of early crops progressing in thirteen districts. Picking of cotton commenced in two districts. Fodder sufficient and agricultural stock in good condition. Prices steady, except in one district.

Bengal.—*For week ending 7th October.*—There was little rain during the week, and the fine weather has proved beneficial. Prospects of winter rice and other standing crops continue favourable, and reports from the tracts where floods occurred in Behar show improvement. Cultivation for the spring crops is well forward. Prices are generally steady, and show a slight tendency to fall in East Bengal. Cattle are in good condition, but the fodder supply is insufficient in parts of East Bengal. In the Madaripur sub-division of Faridpur 519 persons, including 26 men, 219 women, and 274 children, received gratuitous relief during the week, against 957 persons, including 20 men, 479 women, and 458 children in the previous week. Gratuitous relief from private subscriptions is also being given in the Munshiganj and Manikganj sub-divisions of Dacca.

North-Western Provinces and Oudh.—*For week ending 11th October.*—Weather clear. Prospects everywhere good. Autumn crops being harvested. Spring sowings in active progress. Supplies abundant. Prices generally steady.

Punjab.—*For week ending 11th October.*—Slight rain has fallen in four districts only. Harvesting of autumn crops begun in three districts. Ploughing and sowing of spring crops in progress. Condition of standing crops is generally good, except in parts of Dera Ismail Khan. Slight damage is reported by floods in parts of Ferozepore. Cattle are generally reported to be in good condition. Fodder sufficient in all districts, except in parts of Mooltan. Prices fluctuating in two districts, falling in three others, and stationary elsewhere.

Central Provinces.—*For week ending 11th October.*—Weather generally clear and warm with slight falls of rain. Autumn crops in good condition, and a few more showers would be most beneficial to the rice crops and to the crops on high-lands. Sowing of winter crops progressing in places. Prices inclined to fall.

Burma.—*For week ending 7th October.*—In Lower Burma the rainfall was sufficient. Replanting continues in parts of three districts, in which the first crop was destroyed by floods. The crop prospect generally is good. The rainfall throughout Upper Burma was heavy. Ploughing and sowing of wet-weather crops continue. The crop prospect generally is good, the improvement being most marked in Shwebo and Yeu. The price of paddy has risen in four districts and fallen in one district.

Assam.—*For week ending 10th October.*—Weather seasonable. Prospects of crops good. Fodder insufficient in Sylhet. Tea blighted in Cachar.

Mysore and Coorg.—*For week ending 11th October.*—MYSORE: Rainfall general and good. Standing crops in good condition. Prospects favourable. Prices slightly fallen.

COORG: Rainfall good. Standing crops in good condition. Reaping of *ragi* (*Eleusine coracana*) and picking of cardamom continue. Water and fodder for cattle sufficient. Prices stationary.

Berar and Hyderabad.—*For week ending 11th October.*—BERAR: Rainfall moderate. Weather cool and pleasant. Standing crops in good condition. Land being prepared for the next spring crop and sowings commenced. Weeding operations continue. Fodder and water sufficient. Prices steady.

HYDERABAD: Rainfall moderate. Weeding of irrigated crops continues. Standing crops in good condition. Prices stationary.

Central India.—*For week ending 11th October.*—There has been slight rain in Gwalior and Bhopal territory during the week, but the south-west monsoon appears to have closed throughout Central India. The rainfall has been generally sufficient, and the crops appear to be in good condition in all parts, except Baghelkhand, where they were slightly damaged by excessive rain. Cattle in good condition. Pasturage good and sufficient. Prices of food-grains falling in Gwalior and steady in other parts.

Rajputana.—*For week ending 11th October.*—Rainfall slight in parts. Agricultural operations, standing crops, and cattle generally satisfactory. Reaping of autumn crops and ploughing for spring crops continue in parts. Harvest prospects good. Indian corn rotted in Pertabgarh. Pasturage or fodder sufficient. Prices fallen in five States, fluctuating in one, and steady elsewhere.

Kashmir.—*For week ending 10th October.*—Weather fine. Reaping of maize crops finished. Rice being cut. Prices stationary.

Nepal.—*For week ending 7th October.*—Weather fine. The outturn of low-land rice which is being harvested is very good.

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Circular No. $\frac{61}{58}$ MET.

Extract from the Proceedings of the Government of India in the Revenue and Agricultural Department (Meteorology),—dated Simla, the 6th October, 1893.

Read—

Letter from the Meteorological Reporter to the Government of India, No. 4098, dated 11th September 1893, submitting the Annual Report on the Administration of the Meteorological Department for the year 1892-93.

RESOLUTION.

During the year Mr. H. F. Blanford, who retired in 1889 after controlling the Department for 15 years, died in England. His services to meteorological science in this country, which were acknowledged on his retirement, only ceased with his life, for he continued to work enthusiastically for the Department until the end. The Government of India deplore the loss of so valuable a worker, whose labours have greatly improved the knowledge of the weather and climate of India, and whose work, both as the administrator of the Indian Meteorological Department and as an independent investigator, has given him a prominent place amongst meteorologists.

2. The number of observatories in charge of the Meteorological Department has risen from 154 in 1889-90 to 174 in 1892-93. The 'battery' of observations in the Mysore State referred to last year was completed by the establishment of three second-class stations at Chitaldrug, Mysore, and Hassan. Ten of the fourteen observatories sanctioned in the previous year were established during the year under report in the North-Western Provinces and Oudh, in Burma, on the North-West Frontier, and in Persia. Arrangements were also made to obtain meteorological observations from Muscat and several stations on the Indo-European line of telegraph. In connection with these latter stations the officers of the Telegraph Department rendered cordial and useful help, and the thanks of the Government of India are due to them as well as to the officers of the Survey Department who have permitted the establishment of observatories both at the tidal stations of Muscat and Minicoy and at the Trigonometrical Office in Dehra Dun. The observatories maintained by Municipalities did good work, and the Government of India would be glad to see this class of observatories extended.

3. With the co-operation of the Foreign Department it has been possible to extend the area of snowfall registration, and the intelligence now received gives fairly comprehensive and accurate information regarding the Eastern and Western Himalayan region, Lower Thibet, Afghanistan, and Baluchistan. The valuable information recorded last cold weather by 25 observers regarding the character

and distribution of the snowfall was of considerable service in the preparation of a forecast of the south-west monsoon for the present summer.

4. The registration of rainfall continued to receive attention. Native States have been supplied with 81 rain-gauges during the year and British Provinces with 130. The local reports indicate an improvement as regards the inspections of rain-gauge stations by District Officers. The Government of India trust that this improvement will continue, and that provincial authorities will endeavour to secure systematic and adequate inspections. Credit is due to the officers of the Meteorological Department itself for the active inspection conducted by them.

5. A more than usual amount of work was done under the head of Marine Meteorology. Data from ships' logs are now collected systematically and published as promptly as circumstances allow, and a daily chart is issued which includes the marine area. It is hoped that valuable information will thus be recorded regarding the early stages of meteorological change which are not indicated by coast or inland observations taken in India.

6. The Government of India recognise the value of the estimates obtained from short forecasts of the autumn rains and of the cold weather rains and snowfall. The anticipations in the forecasts of the year under report were on the whole in satisfactory accordance with actual results. In regard to the winter forecasts, Mr. Eliot remarks:—"The methods of forecasting the cold weather rainfall have not been fully worked out, but much attention is being devoted by the department to the conditions of its occurrence in the hope that it may be possible to issue useful forecasts of the rainfall of that period."

7. Storm and flood warnings were found useful and efficient. Telegrams were sent daily to the Camp of Exercise at Muridki, and the report on the experiment warrants the belief that telegraphic information of the kind would be of practical use to troops in the field. The warning of seaports was for the most part timely and satisfactory. Attention is being specially devoted to this subject, and particularly to the improvement of the code of signals. The assistance already given in the development of sea-warnings by shipowners and masters and the marine authorities merits the thanks of Government.

8. The Government of India are glad to notice the large amount of inspection done during the year and the continued improvement in the condition of the observatories, as well as the arrangements made during the year in the Provinces for the publication of rainfall data. The weather was unfavourable for actinometric work at Simla. The meteorological observations in forests were continued as in previous years, and the data for the past six years will, it is hoped, shortly be reported upon by the Meteorological Reporter of the North-Western Provinces and Oudh.

9. As usual, the publications of the department record much valuable work. Arrangements which were made to publish the meteorological observations taken at Trevandrum by the late Mr. Allen Broun from 1853 to 1864 are progressing satisfactorily, and the first of the publications will probably be issued next year. The monthly weather review has not issued as punctually as might be desired,

but there have been difficulties in the way of its publication, and the Meteorological Reporter is doing his best to ensure its prompt issue in future.

10. The thanks of the Government of India are again due to Mr. Eliot, to his assistants, and to the Provincial Reporters for the work done.

ORDER.—Ordered, that the foregoing Resolution be forwarded to the several departments of the Government of India; to Local Governments and Administrations; to the Director General of Telegraphs; to the Surveyor General of India; to the Surgeon General with the Government of India; and to the Meteorological Reporter to the Government of India.

Ordered also, that it be published in the Supplement to the *Gazette of India*.

[True Extract.]

E. C. BUCK,

Secretary to the Government of India.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

RAILWAY STATISTICS.

STATEMENT OF APPROXIMATE GROSS EARNINGS OF INDIAN RAILWAYS FROM 1ST JULY TO 1ST OCTOBER 1892, AND FROM 1ST JULY TO 30TH SEPTEMBER 1893.

N.B.—As regards the figures in column *Total Receipts from 1st July 1893*, audited figures have been used as far as possible.

Railway.	Average earnings per mile per week during the 2nd-half of 1892.	Week ending 1st October 1892. Mean mileage worked.	Earnings. Total.	Per mile open per week.	Week ending 30th September 1893. Mean mileage worked.	Earnings. Total.	Per mile open per week.	Earnings from 1st July to 1st October 1892.	Earnings from 1st July to 30th September 1893.	Increases during the 2nd-half of 1893.	Decreases during the 2nd-half of 1893.

J. F. FINLAY,
Secretary to the Government of India.

FINANCE AND COMMERCE DEPARTMENT
(*Statistical Branch*).

GOVERNMENT OF INDIA.

HOME DEPARTMENT.

POSTING OF CIVIL SERVANTS WHO HAVE BEEN APPOINTED IN ENGLAND TO THE BENGAL PRESIDENCY.

No. $\frac{\text{1 Estabts.}}{533-563}$.

Extract from the Proceedings of the Government of India in the Home Department (Establishments),—dated Simla, the 17th October, 1893.

RESOLUTION.

The undermentioned gentlemen have recently been appointed in England to the Indian Civil Service (Bengal Presidency) in the order specified below:

Mr. S. R. Daniels, North-Western Provinces and Oudh, Punjab, and Central Provinces.
„ T. Millar, North-Western Provinces and Oudh, Punjab, and Central Provinces.
„ A. C. Walker, North-Western Provinces and Oudh, Punjab, and Central Provinces.
„ W. J. D. Burkitt, North-Western Provinces and Oudh, Punjab, and Central Provinces.
„ S. Palit, Bengal, Lower Provinces.
„ A. W. McNair, North-Western Provinces and Oudh, Punjab, and Central Provinces.
„ W. A. LeRossignol, North-Western Provinces and Oudh, Punjab, and Central Provinces.
„ E. R. Abbott, North-Western Provinces and Oudh, Punjab, and Central Provinces.
„ M. F. Gauntlett, Bengal, Lower Provinces.
„ **F. F. Lyall, Bengal, Lower Provinces.**
„ D. Lyle, North-Western Provinces and Oudh, Punjab, and Central Provinces.
„ B. C. Sen, Bengal, Lower Provinces.
„ G. A. Paterson, North-Western Provinces and Oudh, Punjab, and Central Provinces.
„ R. V. Russell, North-Western Provinces and Oudh, Punjab, and Central Provinces.
„ F. E. Jackson, Bengal, Lower Provinces.
„ C. L. S. Russell, Bengal, Lower Provinces.
W. Carr, Burma.
„ A. T. Holme, North-Western Provinces and Oudh, Punjab, and Central Provinces.
„ R. C. Hamilton, Bengal, Lower Provinces.
„ G. W. Dawson, Burma.
„ G. Balthasar, Bengal, Lower Provinces.
„ H. F. Hallifax, North-Western Provinces and Oudh, Punjab, and Central Provinces.
„ **C. H. Harrison, North-Western Provinces and Oudh, Punjab, and Central Provinces.**
„ L. E. P. Gaskin, North-Western Provinces and Oudh, Punjab, and Central Provinces.

2. The Governor General in Council has been pleased to attach the above-mentioned gentlemen to the Province specified opposite each name as follows:

Mr. S. Palit.
„ M. F. Gauntlett.
„ F. F. Lyall.
„ B. C. Sen.
„ F. E. Jackson.
„ C. L. S. Russell. } Bengal.
„ R. C. Hamilton.
„ G. Balthasar. } Assam.

A

Mr. S. R. Daniels. „ A. C. Walker. „ W. J. D. Burkitt. „ A. W. McNair. „ D. Lyle. „ G. A. Paterson. „ A. T. Holme.	North-Western Provinces and Oudh.
„ T. Millar. „ W. A. LeRossignol. „ E. R. Abbott. „ C. H. Harrison.	Punjab.
„ R. V. Russell. „ H. F. Hallifax. „ L. E. P. Gaskin.	Central Provinces.
„ W. Carr. „ G. W. Dawson.	Burma.

The names of the officers noted in the margin have been included in this Resolution subject to their passing the examination in riding, and that of Mr. Balthasar subject to his passing a medical examination.

Mr. F. E. Jackson.
„ W. J. D. Burkitt.
„ E. R. Abbott.
„ A. T. Holme.
„ W. A. LeRossignol.

3. The Governor General in Council is further pleased to direct that the gentlemen posted to the Lower Provinces of Bengal shall, on arrival at Calcutta, report themselves to the Chief Secretary to the Government of Bengal. Should any of them land in Bombay, they should enquire of the Secretary to the Government of Bombay whether any orders are awaiting them from the Government of Bengal. The officers posted to Assam should report their arrival by telegraph from the port of arrival to the Secretary to the Chief Commissioner of that Province at Shillong, by whom they will be instructed to which portion of the Province to proceed. The officers posted to Burma should proceed to Rangoon, and report themselves to the Chief Secretary to the Chief Commissioner of that Province.

4. The officers posted to the North-Western Provinces and Oudh should report themselves to the Chief Secretary to the Government of the North-Western Provinces and Oudh, Allahabad. The officers posted to the Punjab should telegraph from Bombay to the Chief Secretary to the Government of the Punjab, Lahore, for orders as to their destination in the event of their not finding instructions awaiting their arrival at Bombay. The officers posted to the Central Provinces should report by telegraph from Bombay their arrival to the Secretary to the Chief Commissioner of those Provinces at Nagpur, by whom they will be instructed to which portion of the Province to proceed.

5. Local Governments and Administrations are requested to inform the Government of India of the date on wh. h the gentlemen in question so report themselves. Should any officer attached to one of the Upper Provinces in India wish to exchange with an officer of his year attached to another of those Provinces, he is at liberty to do so; but he must report to the Government of India in the Home Department for previous sanction any arrangement of the kind he may be able to effect.

ORDER.—Ordered, that a copy of this Resolution be forwarded to the Governments of Bengal, the North-Western Provinces and Oudh, and the Punjab, and the Chief Commissioners of the Central Provinces, Burma, and Assam, for information and guidance, with the intimation that, in accordance with the decision of Her Majesty's Secretary of State for India, the gentlemen who have now been appointed will rank below the candidates selected at the open competition of 1892. Also that the Resolution be published in the Supplement to the *Gazette of India*, and that a copy be forwarded to each of the gentlemen named therein.

[True Extract.]

C. J. LYALL,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the week ending at 8 a.m. on Saturday, October 14th, 1893.

The main feature in the metecrology of the period under review was the alteration of the pressure distribution at the commencement of the week to that which usually obtains immediately before the commencement of the Madras rains. This distribution steadily developed and became more pronounced until the 10th, from which date heavy rain commenced along the East Coast of the Peninsula, and gradually extended over the whole of the Madras Presidency. The setting in of the rains over Madras was also accompanied by the development of a small barometric depression which existed over the central districts of Madras for the second half of the week. This caused weather to be decidedly disturbed, and gave heavy rain to the whole of the northern and central parts of the Peninsula. Disturbed conditions also set in over the Arabian Sea during the last two or three days of the week; but as the disturbed conditions were at some little distance from the land, and as they subsequently apparently advanced in a north-westerly direction and passed away, it is impossible to say whether they were due to a definite storm or not, or whether there was merely an area of squally, unsettled weather. Over Eastern and North-Eastern India showery weather with heavily clouded skies has prevailed throughout the week, but in Northern and North-Western India weather has continued fine and settled with almost cloudless skies throughout the week.

On 8th October, or the first day of the week under review, pressure was rising generally over Northern India and falling over the Peninsula, and the principal effect of the changes was to cause the area of lowest pressure to retreat southwards down the Bay to the neighbourhood of the Madras Coast, but with this exception conditions were almost unchanged. Fine weather continued in Northern and North-Western India, while rain was falling on the west and south of the Peninsula and in Burma. On the 9th this distribution of pressure continued, and pressure had become in defect of the normal along the Madras Coast and over the southern half of the Bay by more than a twentieth of an inch, while the defects were smaller elsewhere. This distribution of pressure usually immediately precedes the setting in of the Madras rains, and on the 10th this distribution had become more pronounced, and pressure was in defect by amounts ranging up to more than a tenth of an inch at Bangalore and Cuddapah. On the 10th also the Madras rains began to set in feebly, and rain became fairly general along the East Coast of the Peninsula, though it had not penetrated inland to any great extent. Rain also continued to fall in Burma, and rather numerous showers were reported in Bengal and Bombay. On the 11th pressure continued to fall moderately over the Peninsula, and particularly over Madras and the Deccan, and pressure became in defect over the Peninsula by amounts ranging up to 0·13 inch at Cuddapah and Bangalore, while much smaller defects were generally reported over Northern and Eastern India. The area of rainfall, therefore, extended, and rain fell over the whole of Madras and the south of the Peninsula, and at many stations the falls were decidedly heavy. Conditions were to a great extent unchanged on the 12th, and heavy rain was reported in Madras and the south and west of the Peninsula, while over the greater part of the remainder of India weather continued fine, except over Burma and Bengal, where numerous showers were again reported. On the 13th the conditions over Northern India and over the Bay of Bengal continued unchanged. Over Madras the depression deepened and a distinct low pressure area appeared near Kurnool, where pressure was nearly 0·15 inch in defect, and hence heavy rain fell over Madras and the south and west of the Peninsula. The principal changes had, however, occurred in the Arabian Sea. Pressure had become very low (nearly 0·1 inch in defect) along the West Coast, and it was also very uniform from Mangalore to Karachi. Rather strong north-east winds set in at Karachi,

and strong south-westerly winds were reported in Ceylon, while many stations on the coast showed indraught towards the Arabian Sea notwithstanding the depression which existed near Kurnool. The indications can only be explained by the existence of disturbed weather in the Arabian Sea; but whether the disturbance was merely an area of squally, unsettled weather, or whether a storm had formed, has not been yet ascertained. On the 14th again these conditions along the west coast of the Peninsula were quite as strongly developed as on the 13th. Strong north-easterly winds continued to blow at Karachi and strong winds in the south of the Arabian Sea, while pressure continued low off the Bombay Coast, and winds also showed indraught towards the Arabian Sea. The depression over the land area had advanced to the Deccan, where Hyderabad showed a pressure of 0·151 inch below the normal. With these conditions rain continued general over the south and west of the Peninsula, and at several stations it was particularly heavy, Mormugao reporting 6·37 inches and Goa 5·80 inches. Showers were also being received in Burma and rather numerous showers in Bengal.

During the whole of the week, therefore, weather has continued fine and settled in North-Western and Northern India, while showery weather has prevailed in Burma and parts of Bengal. The rains also set in over Madras about the 10th, and heavy rain was received during the remainder of the week over that area. The rains accompanied the development of a low pressure area over Madras, and this continued to exist till the close of the week. On the Arabian Sea also for the last two days of the week weather was very disturbed, and it is highly probable that a small storm or an area of squally or perhaps stormy weather existed at some considerable distance from the coast.

Temperature.—The following table shows the variation of the mean temperature from the normal on each day of the week for the different Provinces of India. Temperature, it will be seen, was practically normal during the first four days of the week, and about half a degree in defect for the last three days, so that for the whole week there has been an average defect of 0·3°. The largest defects have been registered in Sind, Rajputana, and the Punjab, where they vary from 1° to 2°; while, on the other hand, slight excess temperatures have been registered in Bengal, Assam, Central Provinces, and Berar:

Province.	October 1893.							Mean variation of week.
	8th.	9th.	10th.	11th.	12th.	13th.	14th.

Mean for whole of India	—0·2	0	0	—0·2	—0·5	—0·5	—0·6	—0·3

Rainfall.—As stated in the previous sections, rainfall during the week under review has been confined practically to Madras, Bombay and Malabar Coast districts, Burma, Bengal, and Assam. Moderate showers have also been received in Berar and the Central Provinces, but the remaining Provinces have been almost absolutely rainless, and, with the exception of a slight shower reported at Budhiada in the Hissar District in the south of the Punjab, the whole of the Punjab, Sind, Rajputana, Guzerat, Kathiawar, Central India, and the North-Western Provinces and Oudh have been quite rainless.

With the setting in of the Madras rains from the middle of the week, decidedly heavy rain has been received over the southern half of the Peninsula. Thus

there has been an average fall of 5 inches in Coorg and of 4·54 inches in Malabar, and one of 4·29 inches in the Bombay Deccan. Mysore has also received 3·42 inches, and falls of two to three inches have been reported generally from the Madras districts. Moderately heavy falls have also been registered in parts of Burma and Bengal, and in the divisions of Tenasserim, Assam (Surma and Brahmaputra), and Deltaic Bengal the falls have also averaged between two and three inches. Compared with the normal rainfall for the week, the falls in Assam, Bengal proper (excluding Bihar, Orissa, and Chota Nagpur), the Bombay and Malabar Coast districts, Berar, and the whole of Madras, except parts of the southern districts, have received falls rather considerably larger than usual. Indeed, in the following divisions the falls have been more than twice as heavy as usual:—Assam (Brahmaputra), Deltaic Bengal, Coorg, Mysore, Bombay Deccan, Berar, Hyderabad (South), and Madras (Central). Excluding the Punjab, Sind, Rajputana, Central India, and Kathiawar, where very little rain usually falls at this season, and indeed where the fall in normal years is less than a fifth of an inch in the week, out of the remaining 40 divisions the falls have been in excess of the normal amounts in 21 divisions and in defect in 19 divisions.

The last column of the rainfall table shows the comparison of the actual rainfall of the present monsoon season from the 28th May to October 14th with the fall in normal years. It will be seen that out of 51 divisions the falls have been in excess in 33 divisions, below the normal in 17 divisions, and exactly normal in one. The largest defects are shown in Coorg (32 per cent.), Kathiawar (21 per cent.), Malabar (17 per cent.), and in the Western districts of the Central Provinces (15 per cent.).

The following table will show the heaviest falls which have been reported during the week, the figures given representing the total rainfall for the week at the stations named:—

Division.	District.	Station.	Amount.
East Bengal	Mymensing	Jamalpur	6·06 inches.
Assam (Brahmaputra)	Lakhimpur	Dibrugarh	6·19 ,,
Bengal (Central)	Bankura	Raipur	8·65 ,,
Ditto	Bogra	Sherpur	6·02 ,,
Orissa	Cuttack	False Point	6·09 ,,
Malabar	Calicut	Tellicherry	6·53 ,,
Ditto	Travancore	Cottayam	7·12 ,,
Mysore	Mysore	Yedatore	6·53 ,,

SIMLA, *19th October, 1893.*

ALEX. PEDLER,
Offg. Meteorological Reporter to the Government of India.

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 14th October.*—Rainfall good to heavy throughout the Presidency, except in Tinnevelly, where the fall was moderate. This fall of rain has greatly improved general prospects. Irrigation and water-supply now generally sufficient. Sowings proceeding briskly. Standing crops improving and generally fair. Harvest of the early crop continues to give fair to average outturn. Pasture improving. Fodder available and condition of cattle good. Prices show very little change, but are slightly easier in the Central districts.

Bombay.—*For week ending 18th October.*—Rain generally good and beneficial to crops in the Deccan and Karnatak; moderate in Konkan. Standing crops withering for want of moisture and damaged by insects, blight, or rats in parts of five districts. Preparations for late crops continue in thirteen, and reaping of early crops progressing in seventeen, districts. Prices steady, except in two districts. Fodder sufficient. Agricultural stock good.

Bengal.—*For week ending 14th October.*—There has been scattered rain in nearly all districts, except in the Patna division, where no rain has fallen. Reports regarding the standing crops continue generally favourable, and the crops in the flooded tracts of the Chittagong and Patna divisions have improved. Steeping of jute is still going on in some districts. Cultivation of spring crop lands is in progress, and early spring crops are being sown. The price of common rice is steady. Cattle are doing well and the fodder supply is sufficient, except in parts of East Bengal. In the Madaripur sub-division 392 persons, comprising 216 men, 96 women, and 80 children, received gratuitous relief during the week. In Backergunge small agricultural advances are being given to those who are in need, and subscriptions are being raised for the relief of the disabled poor.

North-Western Provinces and Oudh.—*For week ending 18th October.*—Heavy rain has fallen in some districts and light showers in nearly all others. Prospects are still good everywhere. Harvesting of autumn crops and winter sowings continue. Supplies ample. Prices generally steady.

Punjab.—*For week ending 18th October.*—No rain during the week. Harvesting of autumn crops going on in several districts. Ploughing for and sowings of spring crops in progress. Condition of standing crops is generally reported good, but more rain is wanted in Shahpur. Crops near the banks of the Sutlej have been damaged by floods in the Ferozepore district. Condition of cattle is generally reported good. Fodder sufficient in all districts, except in parts of Mooltan and Shahpur. Prices fluctuating in one district, falling in four others, and stationary elsewhere.

Central Provinces.—*For week ending 18th October.*—Heavy showers of rain have fallen in the Nagpur country; elsewhere there have been moderate to

light showers. More rain wanted in Khandwa, where a small shower only has fallen during the week. Standing crops benefited by recent rain. Cotton pickings commenced in parts of the Wardha district.

Burma.—*For week ending 14th October.*—In Lower Burma the rainfall was sufficient and the crop prospect is good. In Upper Burma rain fell in all districts. Ploughing, sowing, and transplanting are progressing, and early paddy, millets, and maize are being reaped. Standing crops generally promise well, but in Shwebo the rainfall is still insufficient. The price of paddy has risen in three districts and has fallen in one.

Assam.—*For week ending 17th October.*—Weather seasonable. Prospects of crops in general good. Condition of cattle fair. Fodder and water plentiful.

Mysore and Coorg.—*For week ending 18th October.*—MYSORE: Rainfall good and general. Standing crops in good condition. *Ragi* (*Eleusine coracana*) harvested in parts of two districts. Prices slightly fallen. Prospects favourable.

COORG: Rainfall moderate. Rice and coffee crops in good condition. *Ragi* (*Eleusine coracana*) reaping and cardamom picking progressing. Prices stationary. Water and fodder sufficient for cattle.

Berar and Hyderabad.—*For week ending 18th October.*—BERAR: Rainfall moderate. Weather clear, but occasionally cloudy. Autumn crops in good condition. Picking of cotton commenced in two districts. Land being prepared for winter crops. Sowings of spring crops continue. Weeding operations in progress. Fodder and water sufficient. Prices almost stationary.

HYDERABAD: Rainfall heavy. Harvesting of autumn crops commenced. Standing irrigated paddy crops in good condition. Spring crops are being spoiled by the recent excessive rainfall.

Central India.—*For week ending 18th October.*—Rainfall good in the Gwalior and Bundelkhand districts. Rain has been sufficient in all parts of Central India. Autumn crops being harvested in Gwalior and Bundelkhand. Spring sowings in progress in other parts of Central India. Crops in good condition in all parts, except Baghelkhand, where they have been slightly damaged by rain. Pasturage good and sufficient everywhere. Prices of food grains falling in Gwalior and Bhopal; steady in other parts.

Rajputana.—*For week ending 18th October.*—No rain during the week. Reaping of autumn crops and ploughing for and sowing of spring crops continue in parts. Agricultural operations, standing crops, and cattle generally satisfactory. Harvest prospects good. Pasturage or fodder sufficient. Prices falling in four States, fluctuating in one, and steady elsewhere.

Kashmir.—*For week ending 17th October.*—Weather fine. Spring sowing commenced. Prices stationary.

Nepal.—*For week ending 14th October.*—Weather fine. Prospects very good.

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Circular No. $\frac{63}{50}$ MET.

Extract from the Proceedings of the Government of India in the Revenue and Agricultural Department (Meteorology),—dated Simla, the 16th October, 1893.

Read—

Despatch No. 28 (Public—Records), dated 27th July 1893, from the Secretary of State for India, enclosing a copy of a letter from the President of the Alpine Club, regarding the observation of the movements of glaciers.

RESOLUTION.

A request has been submitted through Her Majesty's Secretary of State for India from the President of the Alpine Club inviting the co-operation of the Government of India in obtaining a record of observation on the movements of glaciers in the Himalayan Range in supplement to a similar record maintained of the movements of glaciers in Europe. The letter from the President is accompanied by a memorandum of hints for observers which has recently been issued by the Alpine Club.

The Government of India accept the view that the suggested record may prove of importance to Geological and Meteorological science, and are desirous that the co-operation of officials and others who are stationed in or near the snows, or who may visit from time to time the glacial regions of the Himalayas, should be invited.

A copy of the Alpine Club's memorandum is accordingly published below; and copies of this resolution and of the memorandum of instructions will be forwarded to the Meteorological Reporter, the Director, Geological Survey, the Military and Foreign Departments, the Governments of the Punjab, North-Western Provinces and Oudh, and Bengal for distribution to such officers as may be in a position to supply the requisite information. Any data obtained by observers should be forwarded direct to the Meteorological Reporter to the Government of India, Simla; and the Meteorological Reporter is requested to compile from time to time the information which he receives and to forward the results to the Director, Geological Survey, for information, and to the Government of India (Revenue and Agricultural Department) for communication to the Alpine Club.

Ordered, that a copy of the above Resolution be forwarded to the Foreign and Military Departments of the Government of India; the Governments of the Punjab, North-Western Provinces and Oudh, and Bengal; the Meteorological Reporter to the Government of India; and the Director, Geological Survey, for information.

Ordered also, that it be published in the Supplement to the *Gazette of India*.

[True Extract.]
E. C. BUCK,
Secretary to the Government of India.

APPENDIX.

Memorandum on Glacier Observation issued by the Alpine Club, June 1893.

The recent movements of glaciers may be noted by the following signs:—

When the ice is advancing, the glaciers generally have a more convex outline, the icefalls are more broken into towers and spires, and piles of fresh rubbish are found shot over the grass of the lower moraines. Moraines which have been comparatively recently deposited by advancing ice are disturbed, show cracks, and are obviously being pushed forward or aside by the glacier.

When the ice is in retreat, the marks of its further recent extension are seen fringing the glacier both at the end and sides in their lower portions; the glacier fails to fill its former bed, and bare stony tracts, often interspersed with pools or lakelets, lie between the end of the glacier and the mounds of recent terminal moraines.

Where a glacier has retreated to any considerable extent, careful observations of the form of its bed are of value. What is the nature of the rock-surfaces exposed—convex or concave? Are they rubbed smooth on their leesides? How far have the contours of the cliffs or slopes, or the sides of any gorge, been modified where they have been subjected to ice-friction? Is there any evidence that the ice has flowed over large boulders or loose soils, such as gravel, without disturbing them? How has it affected rocks of different hardness—for instance, veins of quartz in a less hard rock? Generally, do the appearances indicate that the glacier has excavated, or only abraded and polished its bed; that it has scooped out new rock-basins, or only cleaned out, scratched, and preserved from filling-up by alluvial deposits or earthslips existing basins? What is the general character of the valley-bottom and slopes above and below the most conspicuous ancient moraines?

The depth of mountain lakes and the position of the point of greatest depth should be ascertained wherever possible. The marginal rock-structure of lake basins, particularly near their outlet, is of some importance with a view to ascertaining whether they are true rock-basins, or whether they are reservoirs formed by ancient moraines, earthslips, or alluvial deposits.

The traveller or surveyor should, if possible, paint a mark and date on any conspicuous rock *in situ* parallel with the termination of the glacier at the time of his visit, marking the distance in yards of the ice from it. The next visitor will then be able to measure the movement that has taken place since his predecessor's visit. Leaving out of question elaborate trigonometrical methods—such, for instance, as have been carried out on the Rhône glacier in Switzerland—the following plan gives very valuable results, and demands no other instruments than a small jar of paint, a brush, a measuring-tape, and a pocket-compass. To ascertain the recent retreat of a glacier, measure the distance from the end of the ice in front of the longitudinal axis of the glacier to the most advanced terminal moraine where vegetation first shows itself. The bare ground recently left by glaciers is easily recognisable. The diminution of volume is best measured by ascertaining the height of bare soil left on the sides of the lateral moraines in the portion of the glacier within the zone of vegetation. All photographic representations of the glacier end and of the ground which has been freed from the glacier ice are of great value. Those will be of most service that show the position of the glacier-snout with relation to some conspicuous rock or other feature in the local scenery. Each photograph should be dated, and the bearings and distance of the camera with reference to any such feature accurately noted.

It is very important to investigate the state of various glaciers as regards advance or retreat. Neighbouring glaciers often furnish very different results in this respect owing to the fact that steep glaciers anticipate in their oscillations those the beds of which are less inclined. To ascertain the oscillations of glaciers, it is necessary to fix the actual position of the ice-snout at the end of the glacier with the greatest accuracy. Two methods can be employed for this purpose, either of which may be selected according to circumstances. Paint some signs on large boulders, not too far from the end of the glacier, and measure their distance from it by a tape (Richter's system); or build a low wall of stones of a few yards in length, and say 15 to 20 inches in height, some distance from the ice-end, and measure this distance (Gosset's system). It is to be recommended that the stones of these walls should also be painted. If the traveller himself returns after some interval—even after only two or three weeks—he will be able to judge of the movement of the glacier, and he will have laid down a basis for future observations by future travellers.

One of the results most to be desired is an exact knowledge of the dates—

(i) of the maximum extension of the ice;
(ii) of the commencement of retreat;
(iii) of the minimum;
(iv) of the commencement of fresh increase.

In dealing with a mountain group, therefore, the traveller should note (where he can get the information as to the past) the date of the commencement of the actual movement of *each glacier*, and in all cases whether the ice is in advance, or retreat, or stationary. Of course the rate of forward movement or velocity of the ice and the oscillations in the extension of the ice must be kept carefully distinct.

Should time and circumstances permit, a series of observations of the velocity of the ice is of value. These may be made after Tyndall's method by planting a line of sticks across the glacier, or by painting marks on boulders, the position of which relatively to ascertained points on the mountain side has been accurately fixed. The size of the glacier—that is, the area of its basin and its length—as well as the slope of its bed above, as well as at the point measured, should be noted. The rate of movement of the ice appears to be connected both with the volume of the glacier and the inclination of its bed.

Letter to the Banks, 21st July 1893.
Letter from the Banks, 24th July 1893, with enclosure.

2. It is desirable in my opinion that in any settlement of this question the Exchange Banks should as far as possible be protected from actual loss if you are satisfied that the shipments were made in good faith in the ordinary course of business. Some disturbance and dislocation of trade must necessarily ensue upon a measure so important and far-reaching as the closing of the mints; but it is not wise in my opinion to aggravate these evils or to intensify the opposition in some quarters to the action of your Government.

Dated 26th June 1893.

From—W. BEARNSHALL, Esq., Manager, Agra Bank, Limited, and six other Banks,
To—The Secretary of State for India.

We have heard by telegram from our Indian Agents that the mints have ceased to receive silver for coinage, but we feel assured that the Indian Banks as regards all silver which has been already shipped in the usual course of business will be allowed to convert such shipments into rupees upon the conditions which have hitherto existed. If our expectations be not fulfilled, we need hardly point out, apart from the question of the great loss which would necessarily arise from our inability to turn the metal into money, that contracts for bills on Europe have been made in India, to provide for which these shipments have been made.

We may justly say that we have been financing the trade of India during the sitting of Lord Herschell's Committee on the usual lines without engaging in speculation either in one direction or the other as to what the issue of that Commission might be, and we therefore think that we are justified in looking for reasonable protection and consideration when a radical change of this kind is introduced. If it became known that the Banks might find difficulty in consequence of a legislative enactment in implementing those contracts, a grave feeling of distrust might be engendered in the minds of natives and others which at this critical moment might produce serious results such as we are convinced the Government of India could not have contemplated.

For Your Lordship's guidance we may mention that we estimate the amount of silver at present in the hands of the Banks in transit to India from this country and from Australia and China to be not far short of 1,500,000*l.*, representing Rs. 2¼ crores.

In the full expectation that the Banks need feel no anxiety regarding the course of action which will be taken in respect of these silver shipments *en route* to India, we have, &c., &c.

Dated 3rd July 1893.

From—SIR A. GODLEY, C.B., Under-Secretary of State for India,

To—The Manager of the Chartered Bank of India, Australia, and China, London.

In reply to the letter dated the 26th of June addressed by seven Exchange Banks to the Secretary of State in Council respecting the admission to coinage of silver shipped from England to India before the date of the closing of the mints, I am directed to inform you that the matter has been left to the discretion of the Government of India, and that a telegram expressing the purport of the letter from the Banks was sent to the Viceroy on the same day. A reply has now been received stating that the Government of India have offered to consider each case on its merits, and that an assurance has been given that *bonâ fide* shippers will be protected from any heavy loss.

Dated 12th July 1893.

From—SIR A. GODLEY, C.B., Under-Secretary of State for India,

To—The Manager of the Chartered Bank of India, Australia, and China, London.

In continuation of my letter dated the 3rd instant, I am directed to inform you that a telegram has been received from the Viceroy stating that orders have been issued for the payment to the respective Banks of the value of the silver which was in transit on the 26th of June last at the price actually paid, the sterling or dollar value being converted into rupees at the telegraphic rate of exchange on the day of payment.

Dated 15th July 1893.

From—THOMAS FORREST, Esq., Manager, Chartered Bank of India, Australia, and China, London, and six other Banks,

To—The Secretary of State for India.

The undermentioned Banks desire to bring before Your Lordship the serious loss which they will unavoidably sustain by the recent enactment of the Government of India closing the mints against public coinage unless the Government reconsiders its decision to exclude the silver, which on the 26th of June last, the date of the enactment, was in transit to India in the ordinary course of banking business, and which amounts in the aggregate to close on 1,500,000*l.*

Upon this subject the Banks would refer Your Lordship to their communication of that date, and would urge the following considerations:—

The silver in question was not purchased by any of the Banks by way of speculation, but solely to fulfil obligations for the negotiation of sterling bills and for other arbitrary *gold* operations entered into in India previous to, or concurrently with, such purchases, and in the ordinary course of business which has always been pursued by the Banks. They desire to impress upon Your Lordship that the purchase and shipment of the silver merely completed operations already entered into, and that thereafter the Banks had no interest, so far as that silver was concerned, in the subsequent rise or fall in Indian Exchange.

If the Banks are not allowed to have this silver converted into rupees on the terms existing previous to the 26th of June, but are forced to accept the proposal made to them by the Government of India, the actual loss to them in the aggregate will not be less than 120,000*l.*

Although the banks were aware of the possibility that the Committee on Indian Currency under the presidency of the Lord Chancellor might suggest some change, they would submit to Your Lordship that they, on whom it may be said the burden of financing the external trade of India falls, had only two alternatives before them during the protracted sitting of the Committee,—on the one hand, to continue their business in the usual way, relying on due protection being extended to shipments in transit, or, on the other hand, to abandon the purchase of silver altogether during the eight months occupied by the Committee's deliberations, the latter course involving the complete disorganization during that period of the whole foreign trade, not only of India, but of all other silver-using countries. In this view, and in view also of the uncertainty as to what the Committee's recommendations might be, there can be only one opinion that the first was the only proper course for the Banks to adopt. They therefore continued their ordinary course of business, relying on due consideration and protection being afforded them in whatever changes might be made. Adopting the language of the Right Honourable the Prime Minister in the House of Commons on the 26th of June, they followed this course "in the faith which they reposed in the existing public arrangements."

Another ground on which they based their trust is the principle laid down in the Indian Contract Act, where the incidence, if any, of new or increased import duties falls on the buyer or recipient of the goods, the latter being, they contend, in the case of silver, the Government itself, by its mints, which undertook to receive and coin silver in consideration of a seignorage of 2 per cent.

As regards "existing public arrangements," none could be more definite than the obligation of the Indian mints to coin all silver tendered to them. But practically the whole of the silver tendered for coinage comes from abroad, and takes several weeks to arrive. It is a necessity of the situation, therefore, that there must always be a large amount of silver in transit, unless, as has already been pointed out, the commerce of India was to be disorganized by a total cessation of purchases, and under such circumstances for the Government of India to shut out from the mints *bonâ fide* shipments of silver while passing an Act which at once reduced the value of that silver in the markets of the world by 15 per cent. is a step which we think it will be difficult to justify.

The Banks are satisfied that the Government of India's proposal, which would have the effect of inflicting a fine for the benefit of the Government of about 8 per cent. on all silver in transit on the 26th of June, can only be the result of a misapprehension, and that the real position has only to be explained to the Government to avert from the Banks the penalty which is now suggested. They repeat, therefore, that the silver shipments in transit on the 26th of June were in no sense a speculation in exchange, but that the silver was purchased and shipped to close up transactions concurrently entered into in India in the ordinary course of their business. They feel very keenly therefore that, while pursuing their business in a *bonâ fide* way, ministering to the requirements of the commerce of India in which the Indian Government itself is so deeply concerned, that Government should seek to inflict upon them an injury so great and so totally undeserved.

The Banks are in hope that Your Lordship will use your best efforts to avert from them the serious and unexpected loss with which they are threatened, and by representing the matter in its true light to the Government of India secure for them the coinage of the silver in transit on the 26th of June on the old terms.

The matter is one of great and pressing moment, and the Banks beg that Your Lordship will be pleased to receive a deputation from them at the earliest time convenient to Your Lordship, when they will be glad to have the opportunity of affording Your Lordship any further explanations you may desire.

Dated 20th July 1893.

From—THOMAS FORREST, Esq., Manager, Chartered Bank of India, Australia, and China, London,

To—The Secretary of State for India.

With the view of making you acquainted with the further proceedings of the Indian Banks in the matter of their shipments since the date of their memorial to Your Lordship of the 15th instant, I beg to send you copy of a telegram which was despatched yesterday evening, on behalf of the Banks generally, by the National Bank of India to their Manager in Calcutta:

The Exchange Banks have agreed to advise Indian Government as follows:—In view of urgent need of funds, the Banks compelled accept Government offer, reserving right of petition for redress. Advise Banks each to advise Government accordingly.

The Banks have taken this action in order that no embarrassment may arise from the lock-up of such a large amount as 1,500,000*l.* But they trust that Your Lordship will recognize that they have only acquiesced in the Government proposal, because, looking to the magnitude of the interests involved, they could not afford to risk the consequences of rejecting it, however harsh it might appear to them. And they further hope that Your Lordship will not allow their acceptance to prejudice their claim to have the matter reconsidered by the Indian Government in the light of their recent memorial.

Dated 21st July 1893.

From—SIR A. GODLEY, C.B., Under-Secretary of State for India,

To—The Manager, Chartered Bank of India, Australia and China, London.

I am directed by the Secretary of State for India in Council to acknowledge the receipt of your letters dated the 15th and 20th instant, respecting the terms upon which the silver in transit to India on the 26th of June has been admitted to coinage.

In reply, I am desired to say that the correspondence will be forwarded to the Government of India, to whose discretion you were informed in my letter of the 3rd instant that the matter had been left.

Dated 24th July 1893.

From—THOMAS FORREST, Esq., Manager, Chartered Bank of India, Australia, and China, London, and five other Banks,

To—The Financial Secretary, India Office.

We observe a statement in the *Times* correspondent's Simla telegram of the 23rd instant to the following effect:

The Banks are continuing to depress the gold price of the rupee in order to induce the Government to give better terms with the result that the rate has been run down during the week from 1*s.* 3 11/32*d.* to 1*s.* 3 1/16*d.*

We desire to give this statement, which is calculated to seriously prejudice the cause of the Banks with the Government of India, themost emphatic contradiction. There has been no combination or thought of combination on the part of the Banks to influence exchange either in one direction or the other, and the Banks have no other wish than to act fairly and honourably towards the Government in all matters affecting the settlement of the questions now pending. We believe that the recent fall in exchange is due to perfectly natural causes, which it is not necessary to discuss here, and in all probability there will be many fluctuations in rates before the trade of India adapts itself to the altered conditions.

We are wiring Mr. Toomey, the Calcutta Manager of the National Bank of India, Limited, who has gone to Simla, to give full explanations regarding our silver shipments to assure the Indian Government that there is no foundation for the statement of the *Times;* and as evidence of our earnest desire to avoid giving the smallest ground for such an injurious imputation, we take the liberty of annexing for your information an extract from the National Bank of India's letter of the 21st instant to Mr. Toomey.

We shall be obliged by your kindly forwarding this communication to the Right Honourable Lord Kimberley.

Extract from the National Bank of India's letter to Mr. Toomey, dated 21st July 1893.

"Among other questions on which it may be necessary for you to negotiate with the Government of India is that of the rate of exchange at which the Banks are to be paid for their silver. The Government's original proposal was for payment at the telegraphic transfer rate on London from day to day as the silver is coined. Last week they made an offer of a fixed rate of 1*s.* 3$\frac{3}{4}$*d.*, which, however, the Banks did not accept. But while considering 1*s.* 3$\frac{3}{4}$*d.* too high, we think there are decided advantages in favour of a fixed rate if a satisfactory agreement can be come to on the point. With a rate that is to fluctuate from day to day, we feel there will always be a suspicion on the part of the Government that the Banks are manipulating rates in their own favour, and, however groundless such a suspicion might be, it could not fail to embitter our negotiations with the Government on the larger question. We think it very important therefore that all grounds for a suspicion of this kind should be removed, which can only be done by the Government and the Banks, without prejudice to the larger question, agreeing to an equitable fixed rate. At present we should consider 1*s.* 3$\frac{3}{4}$*d.* a fair rate, but the matter is one on* which we shall require to consult the other Banks, and we think it probable that by the beginning of the week we may be wiring you something on the subject. In any case we trust the Banks will be careful to give the Government no ground for imagining that they are giving any artificial bias to exchange in their own favour."

No. 307, dated 20th September 1893.

From—The Government of India,

To—The Secretary of State for India.

We have the honour to acknowledge Your Lordship's Despatch of the 27th July 1893, No. 149 (Financial), transmitting copy of correspondence with the Exchange Banks touching the terms on which we agreed to receive at the mints the silver belonging to them which was in transit to India on the 26th June 1893.

2. Your Lordship has sent these papers for our information with an expression of your opinion that the Exchange Banks should as far as possible be protected from actual loss if we are satisfied that their shipments of silver were made in good faith and in the ordinary course of business, because, though some disturbance and dislocation of trade must necessarily ensue upon such a measure as that of closing the mints, it is not wise to aggravate those evils or to intensify opposition to the measure. At the same time we understand from Your Lordship's communications to the Banks of the 3rd and 21st July and from paragraph 1 of the Despatch under reply that the settlement of the matter has been left to our discretion, and that the expression of this opinion does not imply a direction.

3. The matter has now been finally settled by the receipt at the mints of all the silver which was in transit on the 26th June, so far as it did not suit the Banks to dispose of it otherwise, and payment has been made for it on the terms communicated by Your Lordship to the Banks in Sir A. Godley's letter of the 12th July. We now therefore proceed to state our view of the case and the actual results of the transaction.

4. When appeals were made to us immediately after the closing of the mints to receive for coinage the silver then in transit, it seemed to us expedient to consider whether or not the shipments were speculative, and to treat each case on its merits. But it almost at once became apparent that it was not possible to prove by documentary evidence, such as would be required if we rejected some appeals and admitted others, that any shipment was simply speculative. We therefore refrained from pressing any enquiry into this feature of the case, and decided to treat the applications solely with reference to considerations of public policy and without any reference to the objects of the Banks in importing the silver.

5. In our view the Banks had no equitable right or claim to special treatment of their silver. Their case was in principle analogous to that of dealers in other commodities whose trade might be interrupted by an import duty or by prohibition imposed by the State for reasons of general policy. There was no reason for treating the Banks differently from other traders, and when they asked us in December 1892 for an assurance that, in the event of the closure of the mints, silver contracted for by them before the closure would be admitted to coinage, we declined to give them any such assurance.

6. Nevertheless, we decided to buy their silver in transit at the price at which it had been bought in London, because we were informed that a considerable portion of the capital of some of the Banks was locked up in the large purchases of silver in transit on the date of the closure of the mints, and that, if we refused to accept the bullion, there was a probability that it might be practically unsaleable with the result of endangering the stability of some of the Banks, and thus producing a stringency, if not a panic, in Indian mercantile circles, which might disastrously affect firms and individuals having no connection with these transactions in silver. The closing of the mints had already caused a serious dislocation in our trade relations with China and other silver countries, and we considered that it would be expedient at such a time to waive the question of principle for the purpose of preventing additional and serious disorganisation. Acting on this view, and on this view alone, we decided to buy the silver owned by the Banks, though we considered that the Banks had no more claim to be compensated than the owners of silver in other countries or the holders of silver securities whose property was depreciated by the legislation of the 26th June, or than the owners of any other commodity whose trade might be interfered with by the action of the State taken in the general interest.

7. We offered to take the silver at the price actually paid for it by the owners, converted at the telegraphic rate of exchange of the day on which payment was made. The Banks objected to this condition as involving unequal rates of payment, and we then offered them the option of taking payment at the fixed rate of 1*s.* 3$\frac{3}{4}$*d.* to the rupee. To this also the Banks objected, but offered to take payment at the rate of 1*s.* 3$\frac{1}{2}$*d.* to the rupee. As the Banks professed to make this offer under pressure of want of funds and subject to their right of appeal, we adhered to our original proposal, and the payments have been made at the telegraphic rate of exchange of the day on which each mint certificate was presented for payment. As matters have turned out, owing to the fall of exchange subsequent to the issue of our orders allowing the receipt of this silver at the mints, payment has been made to the Banks at the average rate of 1*s.* 3·053*d.* Appended to this despatch is a statement from which Your Lordship will see that the payment to the Banks amounted to Rs. 1,80,73,289, and that if they had received the mint outturn, as claimed by them, they would have received Rs. 1,87,84,317. They received therefore Rs. 7,11,028, or 3·77 per cent. less than they would have got if the mints had been open.

8. The loss to Government, on the other hand, has been direct and material. This silver was not wanted for currency, and its reception has enabled the Banks to dispense with the purchase of Council bills, and to keep the rate of exchange low until its absorption in the currency. If we had wanted silver for coinage, we could have bought it at a rate of 33$\frac{1}{2}$*d.* instead of the rate (approximately 38*d.*) which we paid to the Banks. The purchase would have cost us on the whole in sterling £995,285 instead of the £1,133,610 which we actually paid, so that the State has in fact directly lost 13·89 per cent. on the transaction in addition

to the other losses occasioned by an addition to the rupee currency which was under the circumstances of the case unnecessary and mischievous, and by the exercise of the power given to the Banks to dispense with the purchase of Council Bills.

9. We have in the 4th paragraph of this despatch stated that we refrained from trying to obtain proof of the speculative or non-speculative character of these shipments of silver. But we desire to say here that we have little doubt that at least some of them were speculative. The reasons which have led us to this conclusion are these :—

(1) The shipments were far in excess of any that have ever before been received at the same season of the year.

(2) They were made between the date when it was announced that the Indian Currency Committee had signed and presented their report and the date of the closing of the mints.

(3) It was known on the Continent that the Committee had recommended the closing of the mints, for the *Frankfürter Zeitung* accurately stated on the 7th June the main features of the recommendations made by the Committee, and it is probable that the facts were also known in London. We append an extract from the *Statist* of the 10th June, from which it appears that speculation by the Banks was then proceeding.

(4) In anticipation of some such action large speculative purchases of Government securities were made in India for London, paper to the amount of Rs. 72,62,600 having been enfaced in June, though the movement for months previous to June had been in the opposite direction, from London to India.

(5) The price of enfaced paper in London never went higher than £63¼ in April and May, and was mostly lower than that figure. As soon as it was known that the report of the Indian Currency Committee had been signed, the price rose, standing at £64 on the 3rd of June, at £66 on the 7th, and £67 on the 17th. After the legislation of 26th June it rose further to £69⅝, and after reaching £71 stood at £70 on the 30th June. There was no other cause for the increase in price from the beginning of June than speculation in anticipation of legislation.

(6) There is little doubt that a considerable proportion of the silver imported by the Banks was for the payment of the price of the paper thus speculatively transferred to London in preference to the purchase of Council drafts which at that time were costing more than silver.

(7) That the Banks did not want the money in India for trade purposes is apparent from the facts that they proposed that we should pay it in sterling in London instead of in silver in India, and that, having received it in India, they were unable to use it, as may be inferred from the fact that the currency note circulation which on the 7th June was 2,530 lakhs rose on the 30th June to 2,649 lakhs, and on the 22nd August to 2,757 lakhs—an increase of 227 lakhs in twelve weeks. Further, during the whole time since the 26th June down to the present date the Indian money market has been very easy, with abundant supplies.

10. All these circumstances seem to us to point to the fact that some of the shipments of silver made in June were speculative, and that they were not made in furtherance of ordinary trade requirements. Considering all the facts, we are now disposed to think that our apprehensions in regard to the possible impairment of the stability of any of the Banks concerned were perhaps unnecessary, and that we might have refrained from securing to the Banks immunity to a large extent from loss on their imports of silver. We consider that the Banks have been treated with great and perhaps unnecessary liberality, and we should not on any account consent to make them any additional concession.

11. We venture here to dissent from the proposition implied in the last clause of the 2nd paragraph of Your Lordship's despatch. We agree with Your Lordship that it would not be wise to aggravate the evils that must necessarily ensue upon a measure so important and far-reaching as the closing of the mints; but we are unable to see that the acceptance of this principle would justify us in granting at the expense of the tax-payer compensation to one class of the community which is denied to all other classes who have suffered from the same cause; and we cannot think that there would be any justification in either principle or expediency in applying the public revenues for the purpose of moderating or terminating the opposition of interested parties to legislative measures taken in the public interest with the support of a majority of the community. If our action in taking over the silver in question is to be justified, it must be on the ground that a refusal to do so would have seriously embarrassed the Banks, and that such embarrassment would have produced at a critical period an amount of loss to the general public which it was worth while to avoid by accepting a considerable charge on the public revenues. We did not undertake to make good to the Banks the whole cost of the silver, because this was not necessary for the purpose we had in view, and because we thought it undesirable that any encouragement should be given to the idea that speculation might be undertaken in view of a possible change in the law with a prospect of complete immunity at the cost of the State if the speculation proved to be unprofitable.

12. As the matter is of some public importance, we consider it desirable to publish the correspondence connected with these transactions, including the present despatch, and we propose to do so in due course after its receipt by Your Lordship.

Statement showing the quantity of silver in transit on the 26th June 1893 taken over by Government, and the price paid for it.

—	1	2	3	4	5	6	7
	TOTAL QUANTITY TAKEN OVER.						
	Standard ounces.	Indian standard tolas.	Sterling price.	Rupee equivalent paid.	Total number of rupees at mint outturn which owners would have received if mints had not been closed.	Price the Government would have paid, assuming it wanted to buy silver for coinage.	Remarks.
			£	Rs.	*	£	
Exchange Banks, Bombay.	6,863,268	1,84,68,424	1,091,016	1,74,09,722	1,80,80,587	† 995,285	From the figures in columns (4) and (5), the loss to the Exchange Banks appears to be 3·77 per cent., while the figures in columns (3) and (6) indicate a loss to Government of 13·89 per cent.
Exchange Banks, Calcutta.	267,131	7,18,825	42,594	6,63,567	* 7,03,730		
TOTAL ...	7,130,399	1,91,87,249	1,133,610	1,80,73,289	1,87,84,317	995,285	

* These have been arrived at as follows :—

(1) 1,84,68,424 standard tolas *minus* 2·1 per cent. on account of seignorage and coinage charges = 1,84,68,424 — 3,87,837 = 1,80,80,587.

(2) 7,18,825 standard tolas *minus* 2·1 per cent. = 718,825 — 15,095 = 7,03,730.

† This figure is obtained at the rate of 33½*d.* per ounce of silver, which is about the average (33·554) of the rates of July and August 1893, and is also the rate quoted on the 1st July.

Extract from the Statist *of 10th June 1893, page 616.*

Silver.—We referred last week to the stagnant condition of the silver market in the face of an active speculation in rupee paper on surmises as to what may be the recommendation of Lord Herschell's Committee. The speculative activity in rupee paper has this week extended to exchange, and the price of standard bars has been dragged up by an advance in exchange. Before the India Council allotment the quotation had advanced from 37 $\frac{13}{16}$*d.* to 37 $\frac{15}{16}$ *d.*, and after the allotment there was a further advance to 38$\frac{1}{16}$*d.* per oz. It is to be noticed that the Banks only paid this price for immediate delivery, the quotation for forward business being lower. In offering the higher price for silver, the

Banks, of course, did so in the belief that should an import duty be imposed upon silver, or should the Indian mints be closed, such a measure will not affect specie already shipped. To-day the price relapsed $\frac{1}{4}d.$ per ounce. Mexican dollars have been less active, and have not responded to the advance in silver. The quotation is $37\frac{3}{8}d.$ per ounce, which is nearer the melting value of the coins than it has been for some time past. Below we give the closing quotations for bar silver in London and in New York during the past week :—

	June	...	2	3	5	6	7	8	9
	London standard	...	$37\frac{13}{16}d.$	$37\frac{7}{8}d.$	$37\frac{7}{8}d.$	$37\frac{15}{16}d.$	$38\frac{1}{4}d.$	$38\frac{1}{2}d.$	$38\frac{1}{4}d.$
* Opening price.	New York fine	...	$82\frac{1}{8}$	$82\frac{3}{4}$	$82\frac{1}{2}$	$82\frac{3}{4}$	83	$83\frac{1}{4}$	$8\frac{1}{2}$*

Dated 10th December 1892.

From—The Exchange Banks Association,

To—The Secretary to the Government of India, Finance and Commerce Department.

We, the undersigned Agents and Managers of the Exchange Banks, desire to draw the attention of His Excellency the Viceroy to a serious difficulty which may arise in regard to contracts for the purchase of silver should any law be passed without due notice closing the Indian mints to free coinage of silver. For should such a law come into operation at any time before the Banks had received delivery of the silver they had purchased under forward contracts, they would run the risk of having to resell at a loss in London.

In the face of such a risk the Banks will naturally avoid such contracts, but in doing so they cannot avoid contracting the finance of the sea-borne trade, and may possibly thereby hamper the operations of that trade. We beg, therefore, respectfully to suggest that His Excellency should at once give us some assurance that any silver contracted for before the issue of an order to close the mints to free coinage of silver shall be admitted for coinage.

Our reason for taking the present opportunity for tendering this suggestion is that the speeches of Mr. Bertram Currie and of others representing England at the International Conference appear to indicate that, in the event of no agreement being come to thereat, the closure of the Indian mints to free coinage of silver will almost certainly result.

No. 4985, dated 13th December 1892.

From—S. JACOB, Esq., Officiating Secretary to the Government of India, Finance and Commerce Department,

To—The Agent, Chartered Mercantile Bank of India, London, and China, Calcutta.

I am directed to acknowledge receipt of the letter of 10th instant signed by you and by the Managers of some other Exchange Banks suggesting that the Government of India should give an assurance that, in the event of the Indian mints being closed to the free coinage of silver, all silver contracted for before the issue of an order to close the mints to free coinage of silver shall be admitted for coinage,

2. In reply, I am to say that the Government of India is of opinion that it would not be in the public interest to enter on a discussion at the present moment of the measures which might be adopted if it were decided to close the Indian mints to the free coinage of silver, and the Governor General in Council fears, therefore, that it is impossible to give the assurance for which you ask.

Dated 27th June 1893.

Telegram from—The Agent, Chartered Bank of India, Australia, and China, and other Exchange Banks, Bombay,

To—The Secretary to the Government of India, Finance and Commerce Department.

We respectfully enquire what are the intentions of Government regarding silver arrived and in transit. Enormous loss will be sustained unless received by mint for coinage. Solicit favour early reply by wire.

Dated 28th June 1893.

Telegram from—The Agent, Chartered Bank of India, Australia, and China, Calcutta,

To—The Secretary to the Government of India, Finance and Commerce Department.

The Exchange Banks, Calcutta, respectfully request that orders may be issued to accept at mints silver arrived and afloat up to Monday last. They submit that these shipments have been made in the ordinary course of trade to finance their usual business, and, with no notice of intentions to close mints, the Banks had no reason to expect that silver would be dealt with in any but usual way. If silver refused, great injury inflicted and heavy

losses sustained, which Banks submit they should not be called upon to suffer. Such losses estimated at two hundred and fifty thousand pounds sterling, probably more. Signed by the following Banks :—Agra Bank, Bank of China, Chartered Bank, Comptoir National, Delhi Bank, Hong Kong Bank, Imperial of Persia, Mercantile of India, National of India.

Dated 28th June 1893.

Telegram from—The Secretary, Chamber of Commerce, Bombay,

To—The Secretary to the Government of India, Finance and Commerce Department.

At a special meeting of Committee held this morning to consider position of Exchange Banks with reference to silver bullion arrived and in transit prior to passing of Special Act on Monday, it was resolved that the Committee of Chamber should respectfully address Government in support of the Banks' claim that silver be admitted to free coinage. The information placed at disposal of Chamber by the Banks goes to show that the silver in question has been bought and shipped to meet the legitimate requirements of trade and not for purposes of speculation. This being so, Committee are of opinion that Banks have an equitable claim to have their silver admitted to free coinage. The existing position is causing considerable disturbance to trade, which will be intensified should Government adhere to their refusal to accept this silver at the mint.

No. 2714-A., dated 28th June 1893.

Telegram from—The Secretary to the Government of India, Finance and Commerce Department,

To—The Agent, Chartered Bank of Inbia, Australia, and China, $\frac{\text{Bombay}}{\text{Calcutta}}$.

Your telegram of $\frac{27\text{th}}{28\text{th}}$. Government of India regret prospect of loss to shippers of silver, but mints are now closed to free coinage, and Government of India obviously cannot undertake to make good all losses which this step may occasion. If any holder of silver thinks he has a claim to special treatment, he should submit his case to Government of India, giving full particulars and stating amount of silver, date and place of purchase, price paid, date of shipment, date of probable arrival in India, and expense incurred. It will save time if simultaneously a copy of statement of claim is given to the Accountant General, Bombay, or in Calcutta to the Comptroller General.

[Communicated to the Comptroller General and Accountant General, Bombay, by telegraph.]

Dated 28th June 1893.

Telegram from—The Secretary to the Government of India, Finance and Commerce Department,

To—The Comptroller General, Calcutta.

It is said that 1½ millions sterling worth of silver is on its way to India. This silver cannot be sent to the mints, is doubtless unsaleable at the present time, and probably advances could not now be obtained on it.

Is there any risk that this state of things will endanger the stability of any of the Exchange Banks or give rise to panic? You may consult Cruickshank. Bear in mind critical state of things in China trade, and telegraph reply urgent.

Dated 29th June 1893.

Telegram from The Comptroller General, Calcutta,

To—The Seeretary to the Government of India, Finance and Commerce Department.

Your telegram arrived after ten last night. After consulting Cruickshank I think that, unless Government take over the Exchange Banks' silver on some terms or other, there is great risk of endangering stability of some of Exchange Banks and causing panic. Cruickshank could not tell the extent to which various Banks are interested in the silver afloat, but doubtless some Banks are concerned in very large amounts. The loss on these amounts, as far as present price of silver is concerned, is not very serious ; and if the silver were saleable here at that price, there would be no great risk of imperiling stability of the Exchange Banks or of disturbing market by refusing to take over the silver; but the price of silver is falling daily. This silver will be almost certainly unsaleable here at any price ; and if it had to be re-shipped to England or China, the Banks' resources would be indefinitely locked up, and the ultimate loss would be something very considerable—possibly one-fifth or more of the original price. The Banks will be at the same time suffering severe strain owing to the state of affairs in China, and the result might be therefore very probably such a loss of confidence as to cause run on any Bank incurring much loss on its silver, thus endangering stability.

Dated 29th June 1893.

Telegram from—The Agent, Chartered Bank of India, Australia, and China, and other Exchange Banks, Bombay,

To—The Secretary to the Government of India, Finance and Commerce Department.

Your telegram yesterday. Statements as suggested being prepared, but will take some days to obtain exact details. Meantime the Banks are prepared to prove that all their silver arrived and in transit has been bought for legitimate trade purposes before the action of Government in closing the mints. Banks would be glad to receive some assurance from Government that on the above fact being proved to the satisfaction of Government, the silver in question would be accepted for coinage. Solicit favour of reply.

You need not inspect the books of National Bank.

Dated 30th June 1893.

From—JOHN STIVEN, Esq., Agent, Chartered Bank of India, Australia, and China, Bombay,

To—The Secretary to the Government of India, Finance and Commerce Department.

I have the honour to annex copies of telegrams which have been interchanged between us in connection with the silver arrived and in transit belonging to this Bank and to other Exchange Banks.

I beg to submit that the claim of the Banks that the silver be admitted to free coinage is just and equitable, the silver having been purchased in the ordinary course of business as conducted by the Banks ever since they were established. The Banks are prepared to prove that the shipments were not speculative, but were covered from day to day by purchases of merchants' bills here and by other legitimate business in exactly the same way as their large purchases of Council bills and transfers were covered.

Although it is scarcely within the Banks' province to go beyond their own case in this letter, I venture to urge that their case is quite different from that of silver bullion hoarders and ornament wearers in this country.

It has never been the custom for the Banks to store silver. Their custom has been to send all silver into the mint directly it was imported after satisfying the requirements of the native buyers. As regards the hoarders and ornament wearers, it is conceivable that they may eventually suffer no great loss through the closing of the Indian mints, for it may be found that the effect of the Act passed on Monday will be to close a large number of silver mines, and the value of silver in India may in course of time recover to some extent, especially if importation should be prohibited.

It is earnestly hoped that the Indian Government will give the case of the Exchange Banks their favourable consideration.

In compliance with your suggestion, each Bank is sending in the particulars required by Government, and is furnishing copies to the Comptroller General in Calcutta and to the Accountant General in Bombay.

Dated 29th June 1893.

From—The Hon'ble J. A. Boyson, Chairman, Chamber of Commerce. Madras,

To—The Secretary to the Government of India, Finance and Commerce Department.

I have the honour to direct your attention to the grave anxiety which prevails in commercial and banking circles throughout India in consequence of the sudden determination of Government to close the mints to silver and the refusal of the mints to receive the silver bullion tendered on the morning of the 26th instant. Not only has this shipment been shut out, but shipments made to the East prior to the announcement of Government are thereby excluded from the benefits of free coinage. These shipments of silver were to provide funds for paying for produce bills on this side, and were entered into legitimately in the course of trade and not for any speculative purposes. It was anticipated that in any determination by Government regarding silver, all metal *en route* to the East would be received for coinage in the usual way. By Government refusing to receive this bullion, the evils of the situation would be greatly intensified, an enormous loss would accrue to the Exchange Banks, and serious complications follow. But the Chamber feels sure that it must be the wish of Government to minimise such evils resulting from the new and sudden departure from a silver to a gold basis. And as it has been expressly stated in the Imperial Parliament by the Prime Minister that the Government of India may, if it thinks fit, receive such silver bullion to free coinage, the Chamber respectfully solicits that Government may see fit to exercise this discretion in favour of the Banks, and in doing so not only save the Banks from a heavy loss, but also avert a grave crisis and afford general relief to the trade and commerce of the country.

Dated 3rd July 1893.

From—John Marshall, Esq., Secretary, Chamber of Commerce, Bombay,

To—The Secretary to the Government of India, Finance and Commerce Department.

I have the honour, by direction, to confirm the telegram despatched to you on the 28th ultimo, as per copy annexed, respectfully submitting that, in the opinion of the Committee of the Chamber, the Exchange Banks had an equitable claim on Government to have their silver bullion arrived in or in transit to India at the time of the passing of the Special Act to amend the Indian Coinage Act of 1870 and the Indian Paper Currency Act of 1882 admitted to free coinage on the same terms as would have been available to them before that Act had become law.

2. As shortly stated in the telegram, the main reason which induced the Committee to support the claims of the Banks, after a very careful consideration of the matter in all its bearings, was the fact that the information placed at their disposal by the Banks went to show that the silver in question had been bought and shipped to meet the legitimate requirements of trade and not for purposes of speculation; and if this can be proved to the satisfaction of Government, the Committee venture to think that the Banks are justified in claiming to be placed in the same position as they would have been in if the Special Act had not been passed, and not to any lesser measure of compensation.

3. My Committee have no objection to offer either as to the secrecy observed by Government regarding their intentions or the promptitude with which they were carried into effect; on the contrary, they freely acknowledge that, granted the measure was advisable in the interests of the country at large, it was incumbent on Government to pass it into law in such a manner as to prevent their action being anticipated and trade disorganised by speculation. This, so far as it lay within the power of the Government of India, was effectually accomplished, as, notwithstanding persistent rumours as to the closing of the mints against silver and a strong speculative demand for Government paper in London during the previous three weeks, which naturally exercised a strengthening effect on exchange, the sterling value of the rupee in Bombay and Calcutta at the very moment the amending Bill was being passed by the Council of His Excellency the Viceroy in Simla stood at 1*s.* $3\frac{5}{32}$*d.*

4. It must be admitted there was nothing in this position which would have warranted the Banks in anticipating the immediate closing of the mints; on the contrary, with the exception of unauthorised and irresponsible rumours, on which no prudent men of business would have been justified in acting, everything pointed in the opposite direction, or at all events warranted the belief that no action would be taken without safeguarding the interest of legitimate traders.

5. So recently as 16th June Her Majesty's Under-Secretary of State for India had stated in Parliament, in reply to a question by Sir W. Houldsworth, "that an Act of the Council of India would be required before the Indian mints could be closed, but pending this the Government could extend the period for certificates for the delivery of silver coin." This, if it meant anything at all, could only be interpreted as indicating that if the Indian mints were closed against free coinage, it would only be in such a manner and under such precautions as would protect legitimate and innocent importers of silver from being subjected to unexpected loss, and was certainly so interpreted at the time by the mercantile community here.

6. Unless, therefore, the entire trade of the country was to be so materially restricted as to be practically brought to a stand-still for an indefinite period, the Banks were not only justified, but their obligations to their constituents—the mercantile community—compelled them to go on purchasing bills so long as they could do so without undue speculative risk; or, in other words, so long as they could simultaneously lay down funds for the purpose by the purchase of Council drafts or silver; and this they contend is precisely what they have done, neither more nor less.

7. The comparatively large amount of silver arrived and afloat at the time of the closing of the mints, when the export season is undoubtedly drawing to a close, might at first sight appear scarcely in accordance with this contention; but the heavy sales of Government paper to London must be taken into account, and the broad fact remains that the Banks are in a position to show that their silver purchases were, when the Act was passed, covered by bills payable in Europe bought on this side.

8. Nor in this connection must the important point be lost sight of that the heavy imports of silver were not made at the expense of a diminished demand for the Secretary of State's bills on India. The claims of the Banks to the fullest consideration on the part of Government might to some extent have been prejudiced had it been apparent that they were only buying silver as a means of remittance to the exclusion of Council drafts; but this objection vanishes when it is seen that the Secretary of State has been able to sell by drafts and transfers between 1st April and 30th June a total of Rs. 9,32,57,187, or an average of Rs. 71,73,629 per week, as against the nominal offering of Rs. 60,00,000 per week.

9. The Committee of the Chamber are aware from what has transpired through the public press and elsewhere that in the interval which has elapsed since the despatch of their telegram, Government have indicated their willingness to consider the claims the Banks may submit; and this assurance has already exercised a favourable effect on trade, which otherwise showed symptoms of possible serious disturbance as the result of the refusal to receive the silver at the mints. And my Committee now venture to hope that, for the reasons they have the honour to advance, His Excellency the Governor General in Council may be pleased to afford the further relief which would ensue from admitting the bullion in question to free coinage, to which they consider the Banks and other importers in a similar position can in all fairness lay claim.

10. With reference to the position of the latter, the Committee take the liberty of appending herewith representations received from Messrs. E. D. Sassoon & Co. and Messrs. David Sassoon & Co. respecting the effect the closing of the mints will exercise on their remittances from China for proceeds of cotton goods and yarns and opium shipped by them; and the Committee would respectfully submit that their case may be dealt with by Government on the same basis as may be ultimately conceded to the Exchange Banks.

11. Although not directly bearing on the question at issue as between the importers of silver and Government, the Committee of the Chamber would take the liberty of pointing out that the decision arrived at may be not without important influence on the successful operation or otherwise of the new Act in attracting gold to the Government treasury. The Act, it is authoritatively stated, is merely provisional, and at no distant date it may be found expedient to fix another and a lower rupee value to the sovereign. Should, therefore, the decision of Government in regard to the silver at present shut out from the mints be adverse, importers of gold will have no guarantee that they may not find themselves any day in a similar position, and the sovereigns they had bought on the assumption that they would purchase Rs. 15 might on arrival prove to be worth only Rs 13-8-0. That the existence of this possibility would add prejudicially to the ultimate object Government have in view can scarcely be gainsaid, and, whatever be the eventual decision arrived at on the subject-matter of this representation, my Committee would respectfully suggest that, in the event of any change being hereafter announced on the rupee rate fixed for gold, not less than a month's notice should be given before such alteration takes effect.

No. 2937-A., dated 10th July 1893.

From—The Secretary to the Government of India, Finance and Commerce Department,

To—The Agent, Chartered Bank of India, Australia, and China (as representing the Exchange Banks).

In continuation of previous correspondence, I am directed to address you as follows on the subject of the silver shipped for India on or before the 26th June, which was not in time to be received in the mints for coinage under sections 19 to 26 of the Coinage Act, 1870, before their repeal by the Coinage and Paper Currency Act, 1893.

2. I am directed to say that orders will be passed on each claim separately, and that the quantity of silver covered by each claim which may be accepted by the orders passed

with reference to it will be received by the mints: the Mint Master will, after premelting and assaying in the usual manner, furnish to the Bank concerned a certificate of the amount of silver of standard fineness received by him; and the Accountant General, Bombay, in Bombay, or the Comptroller General in Calcutta will on that certificate pay to the Bank concerned the number of rupees which is equivalent to the sterling value (or dollar value where bought for dollars) of the quantity of silver at the price paid by the Bank for the silver on its purchase, converted at the telegraphic rate of exchange between rupees and sterling (or between rupees and dollars) quoted by the Bank of Bombay for Bombay or the Bank of Bengal for Calcutta on the day of payment. The amount payable on each certificate will be paid either on presentation or after such interval of time as the Comptroller General may from time to time prescribe.

3. The following claims have been accepted by the Government of India, namely:

Name of Bank.	Quantity of silver in ounces of standard fineness (as stated in the claim).	Price paid per standard ounce.
Hong Kong and Shanghai Bank (Calcutta Agency)	32,680	38 3/8 d.
Imperial Bank of Persia (Bombay Agency)	63,934	37 7/8 d.
Comptoir National d'Escompte de Paris (Bombay Agency) . . .	79,789	38 1/4 d.

These amounts may now be presented to the mint. The amounts included in claims of Exchange Banks which still remain to be verified and accepted may also be presented to the mints on the same conditions on the Banks giving proof to the Mint Master that the vessel in which they were shipped for India sailed from the port of departure on or before the 26th June last. The acceptance of these amounts by the Mint Masters will be subject to the orders to be passed regarding each. Orders on each claim will be passed as soon as the necessary particulars and explanations have been fully furnished.

4. I am to say that the Bombay Mint will receive the silver at the rate of only three lakhs of tolas a day and the Calcutta Mint at the rate of only two and a half lakhs of tolas a day, and to request that the Banks may arrange among themselves in what order their several consignments of silver should be presented to the Mints at Calcutta and Bombay, so that the quantities presented each day may not exceed three lakhs of tolas at Bombay and two and a half lakhs of tolas at Calcutta. The Mint Masters should be informed of the arrangements made in this respect, and of the quantity which will be tendered daily by each Bank at each mint up to the aggregates mentioned above.

No. 2936-A., dated 10th July 1893.

From—The Secretary to the Government of India, Finance and Commerce Department,

To—The Mint Master, $\frac{\text{Bombay}}{\text{Calcutta}}$.

I am directed to enclose copy of a letter addressed this day to the Exchange Banks on the subject of the silver belonging to them which was in transit for India on 26th June last.

2. You will observe that you may now receive all silver included in claims made by any of the Exchange Banks for shipments by them, provided that the vessel in which the consignment was shipped for India sailed from the port of departure on or before the 26th June last. Your acceptance of amounts, regarding which separate orders have not been passed by the Government of India, will be subject to the orders to be passed regarding them.

3. The aggregate amounts to be received in a day at the too mints have been fixed at three lakhs for Bombay and two and a half lakhs for Calcutta. If you can conveniently, without incurring extra expenditure, receive a larger amount daily, you may inform the Exchange Banks accordingly and report to the Government of India.

4. You should proceed to coin into rupees the silver you receive under these orders with as little delay as possible.

5. Copies of this letter and of the letter to the Exchange Banks have been sent to the Accountant General, Bombay, and to the Comptroller General. A copy of the letter sent to the Comptroller General is enclosed.

No. 2935-A., dated 10th July 1893.

From—The Secretary to the Government of India, Finance and Commerce Department,

To—The Comptroller and Auditor General.

I am directed to forward copies of letters addressed this day to the Exchange Banks and the Mint Masters on the subject of the silver belonging to the Exchange Banks which was in transit on the 26th June last.

2. You will see that the Mint Masters have been authorised, subject to the orders to be issued on each separate claim, to receive the silver of the Exchange Banks, and that you and the Accountant General, Bombay, are to pay on the Mint certificate of outturn the number of rupees which is equivalent to the sterling (or dollar) value of the quantity of silver mentioned in the certificate at the price paid by the Banks for the silver on its purchase, converted at the telegraphic rate of exchange quoted by the Bank of Bengal for Calcutta and by the Bank of Bombay for Bombay on the day of payment. The price paid by the Banks on purchase will be mentioned in each case in the orders issued on the claim.

3. It is left to you to decide both for Bombay and Calcutta whether it is necessary to interpose an interval between the presentation and the payment of the Mint certificates. I am directed to say that it is the desire of the Government of India that the certificates should, if possible, be paid on presentation; but the state of the balances in the Reserve Treasuries, Bombay and Calcutta, may render it necessary to make the certificates payable some days after the date of presentation; and you should issue orders stating the number of days if you consider that course necessary.

4. Copies of this letter and of the letters to the Exchange Banks and the Mint Masters have been sent to the Accountant General, Bombay.

Dated 13th July 1893.

Telegram from—The Agent, Chartered Bank of India, Australia, and China, and other Exchange Banks, Bombay,

To—The Secretary to the Government of India, Finance and Commerce Department.

Letter 10th received. We must refer to our head offices for instructions. Please explain whether the rate of exchange offered is that ruling when silver was paid for in London or that which may be ruling when Government pays in India. Please telegraph reply.

Dated 13th July 1893.

Telegram from—The Accountant General, Bombay,

To—The Secretary to the Government of India, Finance and Commerce Department.

Agents of National, Chartered, Hong Kong, and Mercantile Banks have jointly visited me to-day to point out that payment at telegraphic rate on date of payment will produce inequality in their treatment, as rate may vary daily. They deprecate delay till after coinage, and suggest bullion being made currency bullion and three-quarters of its invoice value being advanced at once from currency reserve or sterling payment in part or whole at Banks' option in London if possible. I add that mercantile feeling here is much opposed to your arrangement, as it makes it the Banks' interest to depress exchange.

No. 3031-A., dated 14th July 1893.

Telegram from—The Secretary to the Government of India, Finance and Commerce Department,

To—The Agent, Chartered Bank of India, Australia, and China, Bombay.

Your telegram of 13th. The rate of exchange mentioned in my letter of 10th is the rate of the day on which the amount due on the Mint certificate is paid to the Bank concerned by the Comptroller General or the Accountant General.

With reference to the representation made by Bank Agents to the Accountant General on the 13th, Government regrets that no advance can be made on bullion presented to mints.

To remove the inequality of treatment between different Banks complained of as resulting from the orders of 10th, Government is willing to allow any Bank to elect a fixed rate of 15 pence 3 farthings sterling exchange and the demand rate yesterday in Calcutta for dollar exchange instead of the rate ruling on day of payment of claim. Such election must cover the whole of the silver comprised in the claims of the Bank concerned. Any Bank electing that fixed rate should communicate its election by telegram not later than Tuesday.

Please communicate the substance of this telegram to the Calcutta Branches.

Dated 15th July 1893.

From—A. C. MARSHALL, Esq., Agent, Chartered Bank of India, Australia, and China, Calcutta,

To—The Secretary to the Government of India, Finance and Commerce Department.

I have the honour to acknowledge receipt of your letter No. 2937-A. of the 10th instant addressed to this Bank as representing the Exchange Banks.

A copy thereof has been handed to the Managers of the other Banks, and I am directed to inform you that the terms offered by the Government of India for the silver and dollars *en route* to India on or before 26th June have been transmitted by telegram to their London offices

I am also requested to point out that the proposals do not protect the Banks from considerable loss, but, on the contrary, they inflict a very serious loss of from 7 to 8 per cent. on silver and dollars purchased in London, and of from 10 to 15 per cent. on shipments from China, Japan, and the Straits.

Dated 18th July 1893.

Telegram from—The Agent, Chartered Bank of India, Australia, and China, and other Exchange Banks, Bombay,

To—The Secretary to the Government of India, Finance and Commerce Department.

Kindly keep offer open pending arrival of Banks' representative from Calcutta. Expect leaving for Simla to-night.

Dated 20th July 1893.

Telegram from—The Agent, Chartered Bank of India, Australia, and China, and other Exchange Banks, Bombay,

To—The Secretary to the Government of India, Finance and Commerce Department.

In view of urgent need of funds, Banks are compelled to accept Government's offer, reserving right of petition for redress. Letters follow from Banks interested.

No. 3141-A., dated 21st July 1893.

From—The Secretary to the Government of India, Finance and Commerce Department,

To—The Agent, Chartered Bank of India, Australia, and China, Bombay.

Your telegram of 20th. Government understands the Banks to mean that they make over their silver to it on the terms offered, but with the reservation that by so making over their silver they are not to be precluded from trying to convince Government that it ought to give them better terms. On this understanding the Comptroller General and Accountant General have been instructed to receive Banks' silver subject to orders in each case. Do any Banks wish to elect fixed rate of one and three pence three farthings offered on 14th?

Dated 18th July 1893.

From—The Agent, Chartered Bank of India, Australia, and China, Bombay,

To—The Secretary to the Government of India, Finance and Commerce Department.

I have the honour to acknowledge the receipt of your No. 2937-A. of 10th instant, No. 2987-A. of 12th instant, and of No. 3031-A. of 14th instant, and to confirm the following telegrams despatched in connection with the matter in question:

On 13th instant—

Letter 10th received. We must refer to our head offices for instructions. Please explain whether the rate of exchange offered is that ruling when silver was paid for in London or that which may be ruling when Government pays in India. Please telegraph reply.

On 18th instant—

Kindly keep offer open pending arrival of Banks' representative from Calcutta. Expect leaving for Simla to-night.

The Banks are still waiting for instructions from their head offices, and at present I would only mention that they are greatly disappointed with the offer which has been received from Government. The Banks have invited a thorough examination into the merits of their claim, and, with a view to afford Government every information which may be desired, it has been considered advisable that one of the Calcutta Bank Managers should proceed to Simla. I am not yet in a position to say whether it will be convenient for him to go.

Dated 22nd July 1893.

Telegram from—The Agent, Chartered Bank of India, Australia, and China, and other Exchange Banks, Bombay,

To—The Secretary to the Government of India, Finance and Commerce Department.

Unless Indian Government will fix one shilling and three pence half-penny per rupee, the Exchange Banks prefer daily current rates: this without prejudice to appeal for redress.

Dated 20th July 1893,

From—JOHN STIVEN, Esq., Agent, Chartered Bank of India, Australia, and China, Bombay,

To—The Secretary to the Government of India, Finance and Commerce Department.

Acting on instructions received from London, I have to-day telegraphed you as follows:

In view of urgent need of funds, Banks are compelled to accept Government's offer, reserving right of petition for redress. Letters follow from Banks interested.

In confirming this message, I have the honour to state that the rate of exchange current to-day for telegraphic transfers on London is 1*s.* $3\frac{9}{16}$*d.*, or $\frac{3}{16}$*d.* lower than that offered to us by Government.

After the Banks have ascertained the extent of their losses, they will send in a petition for redress, and will endeavour to lay their case more fully before Government in the hope that more liberal terms will be conceded.

Dated 26th July 1893.

From—J. A. TOOMEY, Esq.,

To—The Secretary to the Government of India, Finance and Commerce Department.

As the Agent acting on behalf of the owners of the silver *en route* to India at the time the mints were closed, I have the honour to place the following statement before you for the information of the Government of India.

As I explained to the Finance Minister at an interview on 24th instant, I have received a telegram from London giving the following points from a memorial which the Exchange Banks had prepared for the Secretary of State for India in Council:

Firstly.—The silver was not purchased on speculation, but to cover concurrent Indian sterling operations, such silver not benefiting by the rise which has since taken place in exchange.

That the loss to the Exchange Banks on the Indian Government terms totals £120,000.

Secondly.—There were only two courses possible for the Exchange Banks during the protracted sitting of Lord Herschell's Committee—either to conduct business on the usual lines, relying on protection in respect to transit shipments, or to abandon silver altogether during the whole period, thus involving the upsetting of the Indian trade.

Clearly, the first was the only proper course to pursue, and this the Exchange Banks did, relying on protection in the event of change; also relying on the principle of the Indian Contract Act, making incidence of fresh duties on transit goods fall on the buyer or recipient; in the latter case the silver was intended for the mint which undertook to coin silver for 2 per cent.

Thirdly.—The mint, a public institution, bound to coin all silver offered. But all silver tendered comes from outside, taking weeks to arrive; necessity, therefore, of always having large amount in transit, unless trade upset by cessation of purchases. The Indian Government bound to recognise this and admit *bonâ fide* shipments. Excluding these, while passing an Act lowering the value 15 per cent., unjustifiable.

Lastly.—The Exchange Banks are satisfied that the action of the Indian Government has been due to a misapprehension, and they repeat that the purchases were not speculative.

The Exchange Banks feel keenly that, while pursuing their ordinary business in a *bonâ fide* way, the Indian Government should seek to inflict such serious and undeserved injury.

I have only to add that should any information be desired in addition to that which I gave to the Finance Minister on 24th instant, I shall be happy to furnish it before leaving Simla.

No. 3272-A., dated 28th July 1893.

From—The Secretary to the Government of India, Finance and Commerce Department,

To—J. A. TOOMEY, Esq.

I am directed to acknowledge the receipt of your letter of the 26th instant, in which, as representative of the Exchange Banks who are owners of silver in transit to India on the 26th June, you summarise the purport of a memorial from the Exchange Banks to the Secretary of State for India which they have prepared appealing against the decision of the Government of India in regard to the terms on which the Government consented to accept the silver at the mints.

2. In reply to the last paragraph of your letter I am to state that the Government of India does not for the present require any information additional to that which you have already furnished.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

RAILWAY STATISTICS.

STATEMENT OF APPROXIMATE GROSS EARNINGS OF INDIAN RAILWAYS FROM 1ST JULY TO 8TH OCTOBER 1892, AND FROM 1ST JULY TO 7TH OCTOBER 1893.

N.B.—As regards the figures in column *Total Receipts from 1st July 1893*, audited figures have been used as far as possible.

Railway.	Average earnings per mile per week during the 2nd-half of 1892.	Week ending 8th October 1892. Mean mileage worked.	Earnings. Total.	Per mile open per week.	Week ending 7th October 1893. Mean mileage worked.	Earnings. Total.	Per mile open per week.	Earnings from 1st July to 8th October 1892.	Earnings from 1st July to 7th October 1893.	Increases during the 2nd-half of 1893.	Decreases during the 2nd-half of 1893.

	Average of the corresponding periods of 1891 and 1892	...	...	...	34	934	968	4	12	8	15	12	27

2. As compared with the average of the two corresponding quarters of 1891 and 1892, the number of accidents to trains, rolling stock, permanent-way, etc., during the quarter ending the 31st March, 1893, shows a decrease of 9 or of 0·93 per cent., with increases of 854·46 miles or of 5·03 per cent. in the mean mileage worked, and of 574,761 miles or of 3·64 per cent. in the train-mileage run.

Principal variations as compared with the average of the corresponding periods of 1891 and 1892.

3. The chief variations occurred under "Collisions between passenger trains and goods or mineral trains, engines and vehicles standing foul of the line," 9 against 20; "Goods trains or parts of goods trains, engines, etc., leaving the rails," 91 against 80; "Trains running over cattle on the line," 335 against 360; "The bursting of tubes, etc., of engines," 61 against 31; "The failure of couplings," 62 against 52; "Fire in trains," 35 against 62; and "Other accidents," 50 against 60.

4. Under "Collisions between passenger trains and goods or mineral trains, engines and vehicles standing foul of the line," there was a decrease of 11 accidents, *viz.*, 1 under "Serious" and 10 under "Minor." The decrease under "Minor" was chiefly due to the numbers recorded on the Eastern Bengal (state) and the Burma (state) railways, having fallen from 5 and 4 to *nil* and 1 respectively.

5. "Goods trains or parts of goods trains, engines, etc., leaving the rails" showed an increase of 11 accidents, made up of an increase of 2 under "Serious" and of 9 under "Minor." Under "Serious" there was an increase of one each on the Nizam's Guaranteed State and the Southern Mahratta railways, while under "Minor" the principal variations were an increase of 18 on the East Indian railway and a decrease of 5 on the Eastern Bengal (state) railway.

(a) Not passengers.

6. The number of cattle accidents was largest on the Southern Mahratta railway, *viz.*, 87; next to that line comes the South Indian railway with 68; then the Eastern Bengal (state) railway with 41; the North Western (state) railway with 19; the Rajputana-Malwa and the Great Indian Peninsula railways with 18 each; and the East Indian, the Madras and the Nizam's Guaranteed State railways with 12 each.

As compared with the average of the corresponding periods of two previous years, the chief variations were an increase of 20 on the South Indian railway, and decreases of 15 on the Madras railway, of 14 on the Southern Mahratta railway, and of 4 each on the East Indian and the North Western (state) railways.

In relation train-mileage run, the number was highest on the Dibru-Sadiya railway, which gave an average of 1 accident in 6,035 train-miles, the Southern Mahratta railway comming next with an average of 1 in 8,271; then the South Indian, the Nizam's Guaranteed State, the Darjeeling-Himalayan and the Eastern Bengal (state) railways with averages of 1 in 11,899, 1 in 13,028, 1 in 19,320 and 1 in 19,471 respectively. The lowest number recorded relatively to train-mileage run was on the Bombay, Baroda and Central India railway, *viz.*, 1 in 632,140; the Indian Midland railway coming next with an average of 1 in 434,489; then the East Indian railway with 1 in 211,757; the Great Indian Peninsula railway with 1 in 163,645; the North Western (state) railway with 1 in 117,337 and the Oudh and Rohilkhand (state) railway with 1 in 114,932.

7. Under "The bursting of tubes, etc., of engines," there were noticeable increases of 13, 8 and 7 accidents on the Great Indian Peninsula, the Southern Mahratta and the Nizam's Guaranteed State railways, respectively.

8. The increase under "The failure of couplings" was chiefly due to the number recorded on the Rajputana-Malwa railway having risen from 10 to 19.

9. Of the decrease of 27 accidents under "Fire in trains," the Great Indian Peninsula and the Southern Mahratta railways accounted for 16 and 5 respectively.

10. Under the head "Other accidents," the cases numbered 50 against 60, of which 5 against 15 took place on the East Indian railway alone.

Casualties to passengers and servants not included in paragraph 1.

11. The casualties to passengers, and to servants in the employ of railways or of contractors from accidents not coming under the classification adopted in paragraph 1, were, as compared with the average of the corresponding periods of 1891 and 1892, in the case of passengers, 13 killed and 34 injured against 18 killed and 34 injured, and, in the case of servants, 44 killed and 129 injured against 37 killed and 132 injured. (For details, *vide* abstract No. 2.)

12. The mean mileage open, train mileage run, and the number of passengers are 17,849·46, 16,382,345 and 32,160,815 against 16,995·00, 15,807,584 and 28,778,349 respectively, the average of the corresponding periods of two previous years. The number of accidents per 1,000 train-miles was 0·06.

Out of a total of 32,160,815 passengers travelling, only 16 passengers were injured by accidents to trains as classified in paragraph 1. This gives an average of one casualty in 2,010,051 persons travelling and an average of one in 92,181,427 miles travelled.

Including casualties to passengers from causes other than accidents to trains, rolling stock, etc. (*vide* paragraph 11), the total numbers of passengers killed and injured were 13 and 50 respectively, giving an average of one killed in 2,473,909, and one injured in 643,216, or an average, on the total number of killed and injured, of one in 510,489 passengers travelling.

Total casualties from all causes.

13. The total casualties to persons from all causes, including trespassers, cases of suicide, etc., were 149 killed and 213 injured against 143 killed and 212 injured, the average of the two corresponding quarters of 1891 and 1892. (For details, *vide* abstract No. 2.)

Casualties in yards, workshops, etc.

14. In addition to the above, 9 persons were reported to have been killed and 61 injured in yards, workshops, etc., and 157 persons to have died in carriages and at stations from causes unconnected with the working of trains.

Casualties resulting from accidents to trains, rolling stock, etc., for the 1st quarter of 1893.

15. The following table gives, *for the 1st quarter of 1893*, the number of accidents as classified in paragraph 1, which resulted in loss of, or injury to, life and limb, and shows the railways on which they occurred:

RAILWAY.	Number of accidents during the 1st quarter of 1893.	PASSENGERS AND OTHERS.		SERVANTS.		TOTAL.	
		Killed.	Injured.	Killed.	Injured.	Killed.	Injured.
North Western (state) . . .	2	2	2	...	...	2	2
Eastern Bengal (state) . . .	1	...	6	...	...	...	6
Great Indian Peninsula . . .	3	...	...	1	4	1	4
Bombay, Baroda and Central India .	1	...	...	...	1	...	1
Rajputana-Malwa	1	...	...	...	1	...	1
South Indian	1	...	1	...	...	...	1
Burma (state)	1	...	7	...	2	...	9
TOTAL .	...	2	16	1	8	3	24
Average of the two corresponding quarters of 1891 and 1892 . . .	...	4	12	8	15	12	27

16. *North Western (state) railway.*—On the 12th March, 1893, a down local train, while leaving the Lahore yard, collided with a 10-ton crane. The accident was due to the carelessness of the Loco-fitter in having allowed the crane end to stand foul of the crossing. Two passengers were slightly injured.

On the 26th March, 1893, a fire broke out in a cooly's quarters at Gidubandar. The accident was attributed to sparks from the cook room. A woman and a child were burnt to death.

17. *Eastern Bengal (state) railway.*—On the 25th February, 1893, the engine of a down passenger train ran against the dead buffer of the down passenger platform at Sealdah. Six passengers were slightly injured.

18. *Great Indian Peninsula railway.*—On the 17th February, 1893, the engine of an up goods train collided with the buffer stop at Bhusával, and was derailed. The guard was slightly injured.

On the same date, the level-crossing gate at Jalgaon was run through by an up goods train. The gateman, to whose neglect the accident was due, was injured.

On the 20th March, 1893, at mileage 395-20 the engine of a passenger train which had been disabled at mile 393-18, south-east line, and was being pulled to Yádgeri, ran into a trolly, proceeding from Yádgeri to the scene of the first accident, owing to the trolly not having been properly protected by signals. The trollyman was killed and two other railway servants injured.

19. *Bombay, Baroda and Central India railway.*—On the 2nd January, 1893, a gate at mileage 315¼ between Sábarmati and Ahmedabad was run through by a down goods train, owing to the gate having been closed across the line. The gateman, in attempting to open the gate when too late, was severely injured.

20. *Rajputana-Malwa railway.*—On the 17th March, 1893, a brake, while shunting, collided with a wagon standing foul of the crossing through the carelessness of the shunter. The shunter was seriously injured.

21. *South Indian railway.*—On the 22nd March, 1893, the roof of a third class carriage of a mixed train caught fire between Ambatúrai and Dindigul stations. The accident was caused by sparks from the engine. A passenger was injured.

22. *Burma (state) railway.*—On the 20th February, 1893, a collision took place between a down mail and an up mixed train which was standing at the Thabyedaung station, owing to the points having been wrongly set and the driver having run at too high a speed. Seven passengers and two railway servants were slightly injured. There was also damage to rolling stock.

ORDER.—Ordered, that the above note, with the abstract returns, be communicated for information to the Local Governments and Administrations, and to the Officers noted in the margin.

The Governments of Madras, Bombay, Bengal, North-Western Provinces and Oudh, and the Punjab.
The Chief Commissioners of the Central Provinces, Burma, and Assam.
The Resident at Hyderabad.
The Resident in Mysore.
The Agents to the Governor-General for Rajputana, Central India, and Beluchistan.
The Director General of Railways.
The Consulting Engineers to the Government of India for Railways, Calcutta, Central Division, Lucknow, and Assam.

Ordered also, that copies be forwarded for the information of Her Majesty's Government.

Ordered further, that this note, with the abstract returns, be published in the Supplement to the *Gazette of India*.

F. B. HEBBERT,
Under Secretary.

Documents accompanying.

Abstract returns of accidents for the three months ending the 31st March, 1893.

ABSTRACT No. 1.

GENERAL TOTAL.

NUMBER of PERSONS reported, during the THREE MONTHS ending the 31st March 1893, as KILLED or INJURED on ALL RAILWAYS open for TRAFFIC in INDIA, distinguishing between PASSENGERS, RAILWAY SERVANTS, and OTHER PERSONS; and distinguishing also, in the case of the two former classes, between ACCIDENTS caused by ACCIDENTS to TRAINS, ROLLING-STOCK, PERMANENT-WAY, etc., and ACCIDENTS happening otherwise.

	Killed.	Injured.	
PASSENGERS:—			
From accidents to trains, rolling-stock, permanent-way, etc.	...	16	
By accidents from other causes, including accidents from their own want of caution or misconduct	13	34	
SERVANTS:—			
From accidents to trains, rolling-stock, permanent-way, etc.	1	8	
By accidents from other causes, including accidents from their own want of caution or misconduct	44	129	
OTHER PERSONS:—			
Whilst passing over railways at level-crossings	2	3	
Trespassers	67	21	
Suicides	19	1	
Miscellaneous, not included in either of the above	3	1	
TOTAL	149	213	

ABSTRACT

NUMBER of PERSONS reported, during the THREE MONTHS ending the 31st March 1893, as KILLED or INJURED in INDIA by the RAILWAY SERVANTS, and OTHER PERSONS, and classifying, as far as practicable,

No. 2.

TRAVELLING of TRAINS or the MOVEMENT of VEHICLES used exclusively upon RAILWAYS, distinguishing between PASSENGERS, the nature and causes of the ACCIDENTS occasioning the DEATH or INJURY.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the week ending at 8 a.m. on Saturday, October 21st, 1893.

During the first half of the week under review the principal feature in the weather was the shallow disturbance which at first lay over the centre of the Peninsula, and subsequently passed northward and disappeared among the Kumaun Himalayas. The depression gave rain to the greater part of the Peninsula on the 15th; and as the storm advanced northward this rainfall extended, and on the 17th and 18th covered the whole of the Peninsula, the central parts of the country, the North-West Provinces, and a large part of North-Eastern India. On the 19th the depression had practically disappeared, and rain was ceasing over the Peninsula and the central parts of the country, though still continuing over Bengal and the North-West Provinces. On the same day, the 19th, a storm was developing over the Andaman sea, and during the 20th and 21st this storm travelled on a curved course through north-west and north over the head of the Bay. Gales prevailed over the east of the Bay, and the weather was rainy over North-Eastern India, but over other parts of the country which were outside the influence of the storm the weather was very fine. Temperature has been low for the season throughout the whole of the Indian area during the entire week. The greatest defect was on the 17th and 18th, when the rainfall was most general, and amounted to as much as 3·6° for the whole country.

On October the 15th pressure was decreasing across the centre of the Peninsula, but was increasing in all other places. A shallow depression existed over the region represented by the stations of Chanda, Cuddapah, Secunderabad, and Vizagapatam, while pressure was high over North-Western and North-Eastern India and Ceylon. Winds were feebly cyclonic over the Peninsula and the Bay, and were north-easterly in most other places. Rain had fallen over Burma, the Peninsula, and at several places in the Central Provinces and in the Gangetic plain. The amounts recorded exceeded 2 inches at Moulmein, Calicut, and Nagpur and 1 inch at Amraoti and Salem, but elsewhere the amounts were small. On the 16th pressure was giving way, except over North-Eastern India, where there had been a slight rise. The depression over Madras had hardly changed its position, but had developed slightly in intensity. Gradients were hence steeper than on the preceding day, but otherwise the general conditions were very little altered. The winds were cyclonic over a large part of the country, circulating around the Madras

low pressure area, but the forces were everywhere moderate or light. Rain was falling in all parts of the Indian region, except North-Western India, the Konkan, Khandeish, and the South Karnatic. The amounts were generally moderate or small, but Akyab and Masulipatam reported over 2 inches, and False Point, Dacca, Balasore, Allahabad, Gorakhpur, Jhansi, Nowgong, Saugor, Calicut, Karwar, and Mormugao between 1 and 2 inches. On Tuesday, October the 17th, the depression had commenced a northerly movement, and the centre of depression apparently lay between Nagpur and Raipur. The barometer had consequently fallen over the North-West and Central Provinces, while it had risen elsewhere. Except over North-Western India, the winds were largely governed by the depression, and circulated cyclonically around it. Several stations reported rather strong winds. The rainfall distribution was very similar to that reported on the preceding day, but the amounts were larger in many parts of the country, more especially over the North-West Provinces. Thus Gopalpur reported over 3 inches, Hazaribagh, Cuttack, Dehra Dun, and Mussoorie over 2 inches, and many stations more than 1 inch.

The chart of the 18th showed that the barometer had fallen briskly or rapidly over the North-West Provinces and the Punjab, and that the depression had continued to advance northward. The centre on this day was close to Lucknow, where the barometer was in defect by about one-sixth of an inch. The winds over a large part of North-Western India showed a fairly well marked indraught towards the depression over the North-West Provinces, while elsewhere the directions were more or less variable. In Burma a separate and distinct barometric fall had commenced. Rain had to a great extent ceased over the Peninsula and the central parts of the country, but in Bengal and the North-West Provinces the fall continued, though less heavily than on the preceding day. On the morning of Thursday, the 19th, the depression had practically disappeared and the barometer was rising, except in Burma. Pressure was generally very uniform. The wind directions were very variable and the force generally light. Showers of rain were reported from the east of the Peninsula, from Bengal, from the Gangetic plain, and from the Kumaun Himalayas. Trichinopoly and Gorakhpur had received over 4 inches, Gnatong and Darjeeling over 3 inches, and Patna and Ranikhet over 2 inches, but elsewhere the amounts were small. On the 20th pressure was rising almost everywhere. Readings were generally uniform, but from the observations around the Bay it was evident that a moderately severe depression existed over the east of the Bay. At Diamond Island the wind was blowing with a velocity of 27 miles per hour. Rain had fallen fairly generally in Bengal, and a few showers had occurred around the Bay and in Upper India. Purneah received over 2 inches and Durbhanga, Mymensing, Gnatong, Dinajpur, Bogra, Darjeeling, and Wellington over 1 inch. On the 21st the principal feature in the weather was the cyclonic storm over the head of the Bay. This depression, though apparently rather severe, had only very slightly influenced the barometer which was rising in most parts of the country. Pressure, except over the Bay area, was very uniform. Winds were cyclonic around the Bay and variable elsewhere. At Diamond Island the velocity averaged 24 miles per hour. Rain, which was generally light or moderate, was confined to North-Eastern India and to a few places in the Peninsula. Sibsagar had received over 2 inches and Mymensing, Dacca, and Masulipatam over 1 inch.

Temperature.—The following table shows the variation of the mean temperature from the normal on each day of the week for the different Provinces of India:

Province.	October 1893.							Mean variation of week.
	15th.	16th.	17th.	18th.	19th.	20th.	21st.	
	°	°	°	°	°	°	°	°
Burma	+0·5	—1·3	—1·5	—0·9	—0·3	—0·6	—1·4	—0·8
Bengal and Assam	+1·5	+0·8	—0·8	—1·3	—1·1	—1·2	—1·6	—0·5
North-Western Provinces and Oudh.	+0·8	—0·4	—3·4	—5·5	—4·9	—3·9	—3·4	—3·0
Punjab	—4·0	—4·6	—4·2	—6·4	—4·7	—3·6	—2·6	—4·3
Bombay	—1·2	+0·2	—1·5	—4·1	—4·2	—3·8	—2·7	—2·5
Central Provinces and Berar	+0·3	+0·4	—1·0	—2·6	—4·5	—5·0	—5·4	—2·5
Central India and Guzerat	+1·1	—2·2	—3·8	—5·1	—5·4	—5·5	—4·6	—3·6
Sind and Rajputana	—3·3	—3·1	—6·0	—5·8	—4·6	—1·2	—1·0	—3·6
Madras	—1·3	—1·8	—1·6	—0·9	+0·5	+0·2	—0·3	—0·7
Mean for whole of India	—0·6	—1·3	—2·6	—3·6	—3·2	—2·7	—2·6	—2·4

From the above it will be seen that throughout the whole country and during the whole week the heat has been less than usual. In North-Eastern and Central India on the 15th and 16th and in Madras on the 19th and 20th the mean temperature slightly exceeded the normal, but these were the only exceptions to the general depression of temperature. The coldest day was the 18th, when the general temperature of the whole of India was 3·6° below the normal.

Rain.—The rainfall table at the close of the summary shows that during the week there has been actually or practically no rain over the Punjab, Rajputana, Sind, Guzerat, and Kathiawar, but that in all the other divisions rain has been general, and over the North-West and Central Provinces and part of Bengal exceptionally heavy. Within the divisions where there has been no rain, the normal rainfall of the week is so small that its absence is of no importance. The most marked feature in the rainfall distribution is the very large excess reported from the North-West Provinces and part of Bengal. This excess is due to the action of the cyclonic storm which passed northward from the Madras Presidency into the North-West Provinces between the 15th and the 19th. As the storm advanced, the wind shifted into the eastward, and, bringing up moisture from the Bay of Bengal, occasioned heavy rain all over the divisions traversed by it. Thus the average total rainfall of the week for the divisions Orissa, Chota Nagpur, Bihar, the North-West Provinces (East, Central, and Submontane), and Oudh (North and South) was 4·69 inches as against 0·35 inch, which is the average fall expected over these divisions during the week under review. In East, North, and Deltaic Bengal, Assam, and Arakan the rainfall was affected by the same causes and was also excessive, but to a smaller extent. Burma, which lay outside the influence of the depression, had less rain than usual. The west and centre of the Peninsula were also beyond the influence of the depression, and the total rainfall of the week for the divisions in that region was also less than is usually the case. The northern portions of the east of the Peninsula, *viz.*, the divisions of the East Coast (North), Hyderabad (South), and Madras (Central), lay under the depression as it developed during

the first two days of the week, and received more than the usual amount of rain; but the Southern divisions, *viz.*, the East Coast (Central and South) and Madras (South), had in consequence of the position of the depression experienced steady south-westerly and southerly winds instead of the normal north-easterly winds, and the rainfall was abnormally light. The Central Provinces, Berar, and Central India lay in the direct path of the depression as it travelled northward, and the rainfall over that region was excessive. The greatest absolute excess was 7·72 inches in the North-West Provinces (Submontane *a*), followed by 5·31 inches in Orissa, by 5·03 inches in Bihar (North), and by 4·59 inches in Oudh (North.)

With the present week a fresh rainfall period commences, and the information in the three concluding columns of the table show in another form the same information as that given in the three first columns.

The following table shows the heaviest falls which have been reported during the week, the figures given representing the total rainfall for the week at the stations named:

Division.	District.	Station.	Amount.
East Bengal	Mymensing	Sudder	5·30 inches.
Assam	Sylhet	South Sylhet	5·57 "
Orissa	Puri	Sudder	12·46 "
Bihar	Muzaffarpur	Ditto	11·73 "
Oudh	Gonda	Utroula	10·65 "
North-Western Provinces.	Gorakhpur	Sudder	12·90 "
Konkan	North Kanara	Ankola	8·25 "
Central Provinces	Nagpur	Umrer	11·00 "
East Coast	Ganjam	Purshottapur	13·45 "
Ditto	Trichinopoly	Musiri	7·25 "

SIMLA, *26th October, 1893.*

W. L. DALLAS,
Asst. Meteorological Reporter to the Government of India.

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 21st October.*—Rainfall heavy in the Circars, Deccan, and West Coast districts; elsewhere generally only scattered showers. No rain in extreme south. Sowings still proceeding briskly, and standing crops generally flourishing, though rain is wanted in many of the Southern districts. Harvest progresses with fair to average outturn. Pasture and fodder sufficient, and condition of cattle generally good. Prices very nearly stationary at a high level, except in Madras, where they are cheaper.

Bombay.—*For week ending 25th October.*—Rain generally good and beneficial to crops in the Karnatak; moderate or slight rain in the Deccan and Konkan. More rain is urgently required for late sowings, which are retarded in two districts of the Deccan. Standing crops damaged by insects, blight, or rats in parts of three districts; otherwise good. Preparations for late crops and reaping of early crops progressing generally. Cotton picking continues in one district. Prices steady, except in two districts. Fodder sufficient and agricultural stock good.

Bengal.—*For week ending 21st October.*—There was rain in all districts during the week. Rice and standing crops were benefited, but in Bihar and other parts, where the falls were heavy, cultivation of the spring crops was retarded and the early spring sowings were somewhat injured. Rice is coming into ear. Prices of common rice show very little change, but are slightly easier in the Eastern districts. The condition of cattle is generally good. Fodder is sufficient, except in parts of East Bengal. In the Madaripur sub-division 308 persons, including 145 men, 87 women, and 76 children, received gratuitous relief during the week.

North-Western Provinces and Oudh.—*For week ending 25th October.*—All reporting districts, except Saharanpur, have had rain. The falls were heavy in Gorakhpur, Partabgarh, Fyzabad, and Benares, where standing crops, and spring crops where sown, have been damaged. No harm done to sugarcane. Districts in the Allahabad division and Bundelkhand also report slight damage. Fields are being prepared for spring crops. Elsewhere prospects are good. Prices generally stationary.

Punjab.—*For week ending 25th October.*—No rain. Harvesting of autumn crops going on. Sowings of spring crops in progress. Crops are generally in good condition and the outturn fair; but they have been injured by field rats in two tahsils of Lahore. Cattle generally in good condition. Fodder sufficient in all districts, except in Shahpur and parts of Mooltan. Prices unsettled in one district, falling in five others, and stationary elsewhere.

Central Provinces.—*For week ending 25th October.*—Weather generally fine and clear, except in Bhandara, where showery weather prevailed at the beginning of the week. Reaping of autumn crops in progress in five districts.

Recent rain has damaged rice previously cut and stocked. Sowings of winter crops in progress. Prices steady. Fodder plentiful.

Burma.—*For week ending 21st October.*—In Lower Burma the rainfall was sufficient and the crop prospect is good. In Upper Burma rain fell in all districts, except Bhamo, Katha, and the Upper Chindwin. Reaping of early crops is progressing generally, and ploughing for late paddy and other crops continues. Standing crops generally are in good condition, but more rain is still required in parts of Shwebo, while in two other districts sesamum has been damaged by heavy rain. The price of paddy has risen in two districts and has fallen in four others.

Assam.—*For week ending 20th October.*—Weather wet. Prospects of standing crops good. Condition of cattle fair. Fodder and water plentiful.

Mysore and Coorg.—*For week ending 25th October.*—MYSORE: Rainfall good in parts. Standing crops in good condition. *Ragi* (*Eleusine coracana*) harvested in parts of four districts. Prices slightly fallen.

COORG: Rainfall moderate. Standing crops in good condition. Coffee ripening. Reaping of *ragi* (*Eleusine coracana*) completed. Picking of cardamom continues. Water and fodder for cattle sufficient. Prices stationary.

Berar and Hyderabad.—*For week ending 25th October.*—BERAR: Rainfall heavy. Weather cool. Crops in fairly good condition, but damaged in parts of two districts by heavy rain. Spring sowings in progress. Weeding operations concluded, except in two districts. Sufficiency of fodder and water continues. Cattle healthy. Prices stationary.

HYDERABAD: Rainfall fair during the week. Harvesting of autumn crops and of irrigated crops commenced. Spring crops being spoiled by excessive rain. Prices stationary.

Central India.—*For week ending 25th October.*—Slight rain in Bhopal and Bundelkhund Agencies during the week. The rainfall this season seems to be more than sufficient in some parts, but is generally sufficient all over. Crops partly damaged by insects in Goona. Condition of agricultural stock generally good. Prices of food-grains falling in Gwalior and steady elsewhere.

Rajputana.—*For week ending 25th October.*—Very little rain in parts of Dholepore and Bhurtpore; no rain elsewhere. Reaping of autumn crops and ploughing for and sowing of spring crops continue in parts. Agricultural operations, standing crops, and cattle generally satisfactory. Harvest prospects good. Cotton and maize crops damaged in parts of Ajmere and Merwara. Pasturage or fodder sufficient. Prices rising in three States, falling in three, fluctuating in one, and steady elsewhere.

Kashmir.—*For week ending 24th October.*—Report not received.

Nepal.—*For week ending 21st October.*—The low-land rice which was being harvested is somewhat injured by the heavy rain which fell during the week.

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

STATISTICS.

IMPORTS OF COTTON, WHEAT, LINSEED, AND INDIGO.

Statement showing in maunds the imports of Cotton, Wheat, Linseed, and Indigo by rail and river into Calcutta, Bombay Town and Karachi during the month of August 1893, and from 1st January to 31st August 1893, compared with the corresponding periods of the years 1891 and 1892.

J. F. FINLAY,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the week ending at 8 a.m. on Saturday, October 28th, 1893.

During the week under review the weather has been unsettled and stormy over North-Eastern India and the east of the Bay, but has been fine and settled with anti-cyclonic conditions of pressure and of winds in other parts of the Indian region. The cyclonic storm which was traversing the Bay at the close of the previous week struck the coast between Jessore and Chittagong early on Sunday morning. The storm was of moderate intensity, but the surrounding winds were strong, and the storm occasioned considerable damage. On Monday, October 23rd, pressure began to give way again over Tenasserim and the Malay Peninsula, and a fresh depression entered the Bay between the 23rd and the 25th. This storm, like its predecessor, moved round in its passage over the Bay through north and north-east, and on the morning of the 28th it lay off Diamond Island as it travelled northward. It occasioned a severe gale at Diamond Island and general rain over Burma. Notwithstanding the generally fine weather which has prevailed, except in North-Eastern India at the commencement and end of the week, the mean temperature of the Indian region has been low, and the mean temperature of the whole country for the whole week **was nearly 1½° below the average.**

On Sunday, October 22nd, the principal feature in the weather was the cyclonic storm which was passing over South-East Bengal on an easterly or north-easterly track. The centre lay apparently between Chittagong and Jessore, and the abnormal depression of the barometer near the centre was probably fully a quarter of an inch. Strong cyclonic winds prevailed over North-Eastern India, and showers were very general in that region, the principal amounts being 2¾ inches at Chittagong, 2⅓ inches at Barisal and Akyab, and 1½ inches at Mandalay. Except in North-Eastern India, fairly normal conditions prevailed, and the weather was fine, except in the south of the Peninsula, where some showers had fallen, of which the heaviest were reported from Mangalore (0·70 inch) and Mercara (0·68 inch). On the morning of the 23rd the barometer was rising almost everywhere. The rise had been very fast over Bengal, and the depression noticed near Chittagong had wholly disappeared. **Pressure was high over part of North-Western India and over the Assam Valley and low over Burma,** but the pressure differences were small. The winds were northerly over the Bay area and easterly to north-easterly over the centre and west of the Peninsula. A few generally light showers were reported from North-Eastern India and the east and south of the Peninsula. The heaviest amounts registered were 2·66 inches in Silchar, 2·29 inches at Wellington, 1·85 inches at Calicut, and 1·60 inches at Cocanada. On the 24th the only really important change in the barometer was a brisk fall, which was in progress over Burma, and which heralded the approach of a fresh depression to the Bay. In other parts of the country slight anti-cyclonic conditions prevailed. A few light showers were reported from North-Eastern

India and fairly general showers from the south of the Peninsula, but the amounts only in two cases exceeded ½ an inch. On the morning of the 25th pressure was decreasing almost everywhere, and a well defined cyclonic storm overlay the Andaman Sea. The winds were irregularly cyclonic over the Bay area, and fairly normal in direction elsewhere. The force was rising at Diamond Island. The only rainfall reported was over the southern half of the Peninsula, where showers varying from 0·01 inch to 1·75 inch had occurred. The chart of the 26th showed that the depression had moved very slowly westward, and was apparently unchanged in intensity. Pressure was still falling, except over North-Western India and over Upper Burma. The winds were practically unchanged. Rain had fallen at Chittagong and Cuttack and over the south of the Peninsula, but the amounts were everywhere small. On the 27th the storm still lay off Diamond Island, but the direction of advance of the disturbance had apparently changed to north, while the storm itself was growing deeper. Elsewhere the barometric changes were unimportant. The wind had increased to a gale from east at Diamond Island, and strong winds were probably blowing all round the disturbance. Elsewhere the winds were light and fairly normal in direction. Light rain had fallen at Diamond Island, Thayetmyo, Gopalpur, and in the south of the Peninsula. The chart of the 28th showed that the cyclonic storm was travelling northward outside Diamond Island, where the wind had shifted to south-south-east, and was blowing a strong gale. The storm had increased to a considerable disturbance. Elsewhere the changes were comparatively unimportant and pressure was uniform and the winds light. Rain had been general in Burma, and local showers had fallen at a few stations in other parts of the country.

Temperature.—The following table shows the variation of the mean temperature from the normal on each day of the week for the different Provinces of India:

Province.	October 1893.							Mean variation of week.
	22nd.	23rd.	24th.	25th.	26th.	27th.	28th.	
	°	°	°	°	°	°	°	°
Burma	—1·8	—2·0	—1·2	—0·6	—0·8	—2·0	—3·5	—1·7
Bengal and Assam	—2·7	—3·0	—2·6	—0·9	—0·5	—0·4	+0·2	—1·4
North-Western Provinces and Oudh.	—2·4	—2·0	—1·3	—0·6	—0·3	—0·4	—0·1	—1·0
Punjab	—1·0	—1·2	—0·2	+0·6	+2·3	+1·8	+1·5	+0·5
Bombay	—2·5	—2·4	—1·9	—1·5	—0·8	—1·5	—0·8	—1·6
Central Provinces and Berar	—3·6	—3·8	—3·8	—2·9	—0·6	—0·7	—1·6	—2·4
Central India and Guzerat	—4·0	—3·8	—3·0	—2·9	—2·2	—2·3	—2·0	—2·9
Sind and Rajputana	—1·2	—1·6	—1·2	—0·3	—0·2	+0·2	+0·5	—0·5
Madras	—0·3	—0·4	—0·3	—0·1	—0·3	—0·8	—1·2	—0·5
Mean for whole of India	—2·2	—2·2	—1·7	—1·0	—0·4	—0·7	—0·8	—1·3

From the above it will be seen that the mean temperature of the whole country for each day throughout the week has been below the normal, the deficiency ranging from 2·2° on the 22nd and 23rd to 0·4° on the 26th. The provincial variations show that this depression of temperature was common to the whole country, except the Punjab, and was greatest in the central parts of the country.

In the Punjab from the 25th to the 28th, in Sind and Rajputana on the 27th and 28th, and in Bengal on the 28th the mean temperature was slightly above the normal, but these were the only instances of excessive temperature.

Rain.—The rainfall table at the conclusion of the summary shows that rain during the week has been practically confined to North-Eastern India and to the south of the Peninsula. In the former region the rainfall was due to the action of the two depressions noticed in the first part of the summary, and was heaviest in the places and districts which lay closest to the tracks of the two storms. In the latter region the rainfall was due to the north-easterly winds which were for a time established in the interval between the dispersion of the first and the appearance of the second storm. The table shows that of the fifty-two rainfall divisions, thirty-one held absolutely or practically no rain during the week. These thirty-one divisions included the following regions: North Bengal, Orissa, Chota Nagpur, the North-West Provinces, the Punjab, the Konkan, the Deccan, Khandeish, Berar, the Central Provinces, Guzerat, Kathiawar, Sind, Central India, Rajputana, part of Ganjam, and yderabad (South). In all other parts of the country effective rainfall was received. The heaviest average actual rainfall for any division was 4·00 inches in Arakan, followed by 3·18 inches in Coorg, by 2·86 inches in Madras (South-Central), and by 2·69 inches in East Bengal. Assam (Surma), Malabar, the East Coast (South), and Madras (South) all had an average fall per division of over 1 inch. Arakan, East Bengal, Assam (Surma), and Madras (South-Central) had an excess of rain as compared with the normal average for the week, but in all other divisions there was a deficiency.

The three concluding columns of the table show that since the 15th of October the total rainfall has been excessive over Arakan, Bengal, Assam, the Gangetic plain, and the central parts of the country. The most important rainfall at the season is, of course, that which falls in the Karnatic, and for the past fortnight this rainfall has been largely in defect, except in part of Ganjam.

The following table shows the principal heavy falls which have been reported during the week, the figures given representing the total rainfall for the week at the stations named:

Division.	District.	Station.	Amount.
Upper Burma	Pakokla	Sudder	3·92 inches.
Arakan	Akyab	Maungdaw	7·24 ,,
Bengal	Chittagong	Cox's Bazaar	4·11 ,,
Assam	Khasia Hills	Sudder	5·25 ,,
Malabar	Travancore	Alleppy	4·80 ,,
Madras	Nilgiris	Kotagiri	9·13 ,,
Mysore	Bangalore	Channapatna	4·16 ,,
East Coast	North Arcot	Pallmaner	6·65 ,,

PROVINCE.	DIVISION.	Rainfall data for week ending October 28th, 1893.			Rainfall data from October 15th to October 28th, 1893.		
		Average actual rainfall of division.	Average normal rainfall of division.	Excess or defect in inches.	Average actual rainfall of season to date.	Average normal rainfall, October 15th to October 28th.	Excess or defect of (seasonal) rainfall expressed as a percentage.

Simla, *2nd November, 1893.*

W. L. DALLAS,
Asst. Meteorological Reporter to the Government of India.

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 28th October.*—Rainfall good in the Central districts and moderate in the Southern and Western districts and Carnatic and Circars; showers in parts of the Deccan. The recent rainfall is deficient in the Southern and Carnatic districts, where heavy rain is now overdue. Sowings continue generally, and standing crops are in fair condition. Harvest of early crops continues; outturn average. Pasture and fodder sufficient and condition of cattle good. Prices fluctuating slightly at previous high level, but rather easier in the Deccan, and rather dearer in the Southern districts.

Bombay.—*For week ending 1st November.*—Slight rain in Belgaum and Dharwar; more rain is required for the late crops in parts of the Deccan. Standing crops withering for want of rain or damaged by excessive moisture, rust, rats, or insects in parts of six districts. Cotton in part of Broach diseased; crops otherwise good. Preparations for late and reaping of early crops progressing generally, except in one district, where sowing is retarded for want of rain. Cotton picking continues in two districts. Prices steady. Fodder sufficient and agricultural stock good.

Bengal.—*For week ending 28th October.*—General rain fell in East Bengal on the first two days of the week, and light showers in other parts of Bengal and Orissa. In Behar and Chota Nagpur no rain fell. On the 22nd October a severe cyclone was felt in the districts of Chittagong, Noakhali, Tipperah, and Backergunge. Little damage was done to the crops, except in the littoral tracts of Noakhali, where also some loss of cattle occurred. Reports of the rice and other standing crops continue generally favourable, and the fine weather has facilitated cultivation for spring sowings. Prices of common rice are almost stationary. Fodder supply is generally sufficient. Cattle are generally reported in good condition. In the Madaripur sub-division 255 persons, including 78 men, 81 women, and 96 children, received gratuitous relief during the week.

North-Western Provinces and Oudh.—*For week ending 1st November.*—The weather has been fine and clear during the week. Autumn crop being harvested and a good outturn is expected. Sowings for the winter crop are in active progress. Fields injured by the late heavy rain are being resown. Sugarcane pressing begun in parts. Supplies ample. Prices fairly steady.

Punjab.—*For week ending 1st November.*—Reaping and threshing of autumn crops in progress. Sowings of spring crops going on. Outturn of autumn crops and prospects of spring crops are generally reported good. Crops are said to have been injured by field rats in parts of Lahore. Cattle are generally in good condition. Fodder sufficient in all districts, except Shahpur and part of Multan. Prices falling in five districts; stationary elsewhere.

Central Provinces.—*For week ending 1st November.*—Weather seasonable. Sowings of winter crops in progress. Harvesting of autumn crops continues. In Nimar the sesamum crops are reported to have been damaged by insects; elsewhere prospects continue favourable.

Burma.—*For week ending 28th October.*—In Lower Burma the crop prospects are good. Reaping of early paddy has commenced in three districts. In Upper Burma rain fell in all districts and the crop prospect generally is good, but more rain is required in Shwebo, while owing to excessive rain cotton, maize, and sesamum have been damaged in Sagaing, and *jowar* (*sorghum vulgare*) and sesamum in Pakokku. The price of paddy has risen in two districts and has fallen in three others.

Assam.—*For week ending 31st October.*—Weather seasonable. Prospects of crops generally good. Condition of cattle fair. Fodder and water sufficient.

Mysore and Coorg.—*For week ending 1st November.*—MYSORE: Moderate fall of rain all over the State. Standing crops in good condition. *Ragi* (*Eleusine coracana*) harvested in parts. Prices have fallen in Kolar; stationary elsewhere.

COORG: Rainfall moderate. Rice crop in good condition. Coffee ripening. Cardamom picking continues. Prices stationary. Water and fodder for cattle sufficient.

Berar and Hyderabad.—*For week ending 1st November.*—BERAR: Weather cool. Crops generally in satisfactory condition. Sesamum crop in one taluk damaged by insects. Sowing for the spring crops still in progress. Weeding operations in two districts not yet completed. Fodder and water sufficient. Prices steady.

HYDERABAD: No rain during the week. Harvesting of paddy crops in progress. Prices stationary.

Central India.—*For week ending 2nd November.*—No rain fell in any part of Central India during the week. Sowing of spring crops commenced in Gwalior and Neemuch districts; in progress in other parts. Standing crops generally in good condition, except in Baghelkhand and Goona. Condition of cattle generally good. Pasturage good and sufficient in all parts. Prices falling in Gwalior, Bhopal, and Goona; steady elsewhere. Opium sowing commenced in the Neemuch district.

Rajputana.—*For week ending 1st November.*—Harvesting of autumn crops still continues in parts, and prospects generally good. Agricultural operations for the spring crops in progress. Cattle and pasturage or fodder generally good and sufficient. Prices fluctuating in three States, rising in one, falling in another, and steady elsewhere.

Kashmir.—*For week ending 31st October.*—Report not received.

Nepal.—*For week ending 28th October.*—Harvesting of rice nearly finished; outturn good.

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

No. $\frac{15}{342}$.

Extract from the Proceedings of the Government of India in the Revenue and Agricultural Department (Revenue),—dated Simla, the 26th October, 1893.

Read again—

Resolution of the Government of India in the Revenue and Agricultural Department, No. 6—340—50-G., dated 8th December 1881, regarding the purposes and duties of Agricultural Departments in India.

RESOLUTION.

Circumstances having occurred during the last few years which indicate that in more than one Province the functions of the Department of Land Records and Agriculture as a Department of Land Records have not been fully understood, the Government of India desire that the following explanation of their views and intentions in connection with this subject should be communicated to all Local Governments and Administrations.

2. The formation of the Departments was first required by the Resolution of the 8th December 1881, in which the general scheme under which effect was to be given to the recommendations of the Famine Commissioners was laid down. In the 7th paragraph it was advised that the new Departments should be in some form connected with settlement administration with the view of maintaining up to date the land-records upon which settlements were made. But it was expressly stated that—

> "It is neither necessary nor advisable that the new Department should either exercise independent authority or should interfere with the responsibility of the local officials who are at present charged with the duty of maintaining any system of agricultural records and observation. The Department may undoubtedly be utilized by the governing authorities in assisting them to control and maintain any organization required for the continuous supply of agricultural information, yet its chief duty will be to deduce from the facts and figures thus supplied those conclusions or suggestions which the Famine Commissioners have shown to be necessary to the administration of a Province."

3. The Government of India apprehend that, notwithstanding the clear injunction that no interfering authority was to be exercised by the new Department, yet that the use of the word 'control' may have led to a misapprehension on the subject. Their intention was that the Department should control the scheme under which land-records are maintained, but not the establishments or agency responsible for maintaining them. When, however, the Departments were first organized, the Directors were in some Provinces allowed to assume considerable authority over the district establishments, and they have even been permitted by some recent Provincial rules to require the punishment or dismissal of officials on the land-record staff. In such cases it has become necessary for the Government of India to request the alteration of the rules with the object of securing to the district and divisional authorities the full executive control over the establishments with which it was not intended to interfere.

4. The functions of the Director in connection with land-records may be classed under three heads—

I.—Organization.

II.—Inspection.

III.—Collation of results.

Under the first head it is his duty to bring before the superior revenue authorities proposals for the maintenance of maps and records in the most efficient and economical manner. The main objects with which land-records, including maps, are required to be kept up to date are—

(*a*) to simplify and cheapen periodical settlement operations;

(*b*) to provide a record-of-rights for the protection of all who hold interests in land;

(*c*) to reduce, simplify, and cheapen litigation in the Revenue and Civil Courts; and

(*d*) to provide statistics necessary for sound administration in all matters connected with the land.

It is the duty of the Director both to advise the superior revenue authorities under what arrangements these objects can best be attained, or in what manner the land-records establishments should be organized, trained, and tested so as to ensure the required results, and to point out from time to time any defects in the system which may have already been adopted.

5. Under the second head, Inspection, it is the duty of the Director to inspect the land-records staff and their work in each district, and to bring to the notice of the district officer any irregularities in practice, or any shortcomings on the part of the officials whose work has been inspected. In some Provinces in which there is a Divisional as well as a District Officer it has been found a convenient practice for the Director to submit his inspection notes to the latter officer, who forwards them to the Commissioner, with any orders which he, the District Officer, may pass thereon. The Director himself is debarred from issuing any orders other than such verbal instructions and explanations on technical matters as he may communicate to the officials whose work he inspects.

Similar functions would be exercised by any Assistants to the Director. The Government of India, however, would prefer that functions of this kind should be assigned to those officials only who are of sufficient rank and status to be recognized as acting on behalf of the Director rather than as his subordinates, and that other inspecting officers, if above the position of District Inspectors, should be subordinate to the Commissioner or other controlling revenue authority rather than to the Director himself. It is apprehended that otherwise the authority of Divisional Officers may be weakened, and that proper relations between the Director and District Officers may be disturbed.

6. Under the third head little explanation of the duties of the Director is needed. The main objects which the collection of agricultural statistics was intended by the Famine Commissioners to secure must be prominently held in view. These are fully stated in the 8th, 9th, and 10th paragraphs of the Resolution of 1881, and have in subsequent resolutions and correspondence been summed up under the term 'district analysis.' In this, as in other branches of their work, no control can be exercised by the Director over the District and Divisional staff beyond drawing the attention of the authorities to any errors or shortcomings in the statistics and returns supplied to his office in accordance with rules sanctioned by the Local Government, or to any defects in agricultural circumstances and conditions which may appear to call for preventive or remedial action. His chief duty is to see that full effect is given to the instructions of Her Majesty's Secretary of State quoted in the 1st paragraph of the Resolution, *viz.*:—

"To secure the more complete and systematic ascertaining and rendering available of the statistics of vital, agricultural, and economic facts for every part of India in order that Government and its officers may always be in possession of an adequate knowledge of the actual condition of the country, its population, and resources."

7. In conclusion, it is requested that a statement showing the staff employed under the direct orders of the Director of the Land Records Department and the rules prescribed for the control of the establishments connected with land-records may be submitted to the Government of India before the 1st of January next with an explanation of any departure from the principles laid down in this Resolution.

8. Nothing in this Resolution is intended to affect the duties or position of the Director of Land Records if, in addition to the office of Directorship, he is entrusted with the control of settlements in the separate capacity of Settlement Commissioner.

Secretary to Government of Madras.
" " " Bombay.
" " " Bengal.
" " " the North-Western Provinces and Oudh.
" " " the Punjab.
Chief Commissioner, Central Provinces.

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

HOME DEPARTMENT.

ORDERS LAYING DOWN THE PRINCIPLE TO BE OBSERVED IN REGULATING THE DISTINCTION BETWEEN GAZETTED AND NON-GAZETTED OFFICERS.

No. 35 Public / 1701—1718

Extract from the Proceedings of the Government of India in the Home Department (Public),—under date Simla, the 8th November, 1893.

Read—

Home Department Circular letter No. 1—112—21, dated the 15th February 1889.

Also replies of Local Governments and Administrations to the above Circular.

RESOLUTION.

As there appeared to be no uniform practice in regard to the gazetting of appointments of uncovenanted officers, the Government of India took into consideration the question whether it was possible to prescribe any general principle for determining whether an appointment should be treated as gazetted or not, and the authority under whose orders it should be gazetted. With this object Local Governments and Administrations were asked in the Circular letter cited above for information as to the practice prevailing in the several Provinces in this respect, and whether the practice was based on any general principle. From the replies received from Local Governments it appears that, although no general principle has been prescribed to regulate the distinction between gazetted and non-gazetted appointments, the term "gazetted officer" is generally held to apply to an officer whose appointment is gazetted by Government and not by the Head of a Department.

2. After giving careful consideration to the subject, the Governor General in Council is of opinion that the broad line of demarcation between gazetted and non-gazetted officers should be that which separates the Provincial from the

Subordinate Service; and that all officers belonging to the Provincial Service (including Munsifs, except in the Punjab and the Central Provinces, where these officers are placed in the Subordinate Service) should be held to be gazetted officers within the meaning of the Civil Service Regulations; while members of the Subordinate Service should not come within that category, even if their appointments are published in the Gazette. His Excellency in Council accordingly directs that as a general rule, and except in very special cases, such as that of Munsifs in the Madras Presidency, who are gazetted by the High Court, all appointments which it is decided to include in the Provincial Service shall be gazetted by the Local Government, and shall be held to be gazetted offices within the meaning of the Civil Service Regulations; while those in the Subordinate Service shall, if gazetted at all, be gazetted by the Heads of Departments who have the power to make them under the orders of the Local Government. In Provinces where the powers delegated to Heads of Departments elsewhere in respect of the latter class of appointments are exercised by the Head of the Administration himself, appointments of officers in the Subordinate Service shall, if gazetted, be notified in that part of the Gazette in which notifications of Heads of Departments appear. Thus Tahsildars would be gazetted in the North-Western Provinces and Oudh by the Board of Revenue and in the Punjab by the Financial Commissioners, while Mamlatdars would be gazetted in Bombay by the Commissioners. On the other hand, in Bengal and the Central Provinces, where the corresponding class of officers (Sub-Deputy Collectors and Tahsildars) are appointed by the Head of the Administration himself, the appointments, though gazetted under the orders of the Local Government, will be notified under a separate heading relating to the Subordinate Service, together with appointments made by Heads of Departments.

The case of officers serving in other Departments, such as Medical, Registration, Police or Jails, should be governed by the same rule; that is to say, where Government makes the appointment it should gazette, and only appointments so made should be recognised as gazetted appointments within the meaning of the Civil Service Regulations; in other cases Heads of Departments should gazette appointments of officers subordinate to them subject to the orders of the Local Government as to any limit which it may think it expedient to lay down.

3. The Governor General in Council at the same time desires that it may be clearly understood that notifications investing officers with powers under different Acts, in order that the Courts may take judicial cognizance of them, do not constitute the persons invested with such powers "gazetted officers" within the meaning of the Civil Service Regulations.

1. Director-General of the Post Office.
2. Commissioner of Northern India, Salt Revenue Department.
3. Surveyor-General of India.
4. Director-General of the Geological Survey of India.
5. Inspector-General of Forests.
6. Director-General of Railways.
7. Director-General of Telegraphs.
8. Accountant-General, Public Works Department.
9. Surgeon-General with the Government of India.
10. Director-General of Military Works.

4. It is the practice for the Heads of Imperial Departments named in the margin to issue notifications relating to officers serving under them in Part II of the *Gazette of India*. The orders contained in the present Resolution are not intended to take away these powers; nor do they render officers so gazetted non-gazetted officers.

ORDER.—Ordered, that a copy of this Resolution be forwarded to Local Governments and Administrations for information and guidance; that a copy be forwarded to all Departments of the Government of India for information; and that it be published in the *Gazette of India* for general information.

[True Extract.]

C. J. LYALL,

Secretary to the Government of India.

GOVERNMENT OF INDIA.

HOME DEPARTMENT.

REVIEW OF THE REPORTS ON THE ADMINISTRATION OF THE JAILS IN THE SEVERAL PROVINCES OF BRITISH INDIA FOR THE YEAR 1892.

No. $\frac{14 \text{ Jails}}{612-623}$.

Extract from the Proceedings of the Government of India in the Home Department (Jails),—under date Simla, the 4th November, 1893.

Read again—

The Reports on the Administration of Jails in the several Provinces of British India for the year 1891, the orders of the Local Governments and Administrations thereon, and Home Department Resolution No. $\frac{12\text{-Jails}}{635-46}$, dated the 11th November 1892, and accompaniments.

Despatch to the Secretary of State, No. 29 $\frac{\text{Judicial}}{\text{Jails}}$, dated the 7th December 1892.

Read also—

The Reports on the Administration of Jails in the several Provinces of British India for the year 1892, with the orders of the Local Governments and Administrations thereon.

RESOLUTION.

The Provincial Reports on the Administration of Jails for the calendar year 1892, which are due on the 1st June, were received by the Government of India on the dates noted in the marginal statement. As in the previous year, they were on the whole submitted punctually, the Report from the North-Western Provinces and Oudh being again a marked exception.

Province.	Date of receipt by the Government of India of the Reports for—	
	1891.	1892.
Madras	7th June 1892	7th June 1893.
Bombay	24th June 1892	30th June 1893.
Bengal	6th June 1892	8th June 1893.
N.-W. Provinces and Oudh ...	1st August 1892	1st September 1893.
Punjab	28th May 1892	31st May 1893.
Central Provinces	27th May 1892	7th June 1893.
Burma	3rd June 1892	2nd June 1893.
Assam	2nd May 1892	29th May 1893.
Coorg	13th June 1892	28th June 1893.
Hyderabad	31st May 1892	22nd May 1893.

2. The general distribution of prisoners of all classes confined in the jails of British India during 1891 and 1892 is shown in Statement No. I attached to this Resolution. There was a slight increase in the number of central and district jails (from 36 to 37, and 199 to 202, respectively) during the year under report, but the number of subordinate jails and lock-ups (502) was less than in 1891 (508). At the beginning of the year the jail population stood at 95,616 against 89,802 at the beginning of 1891. There was a rise in the number of prisoners admitted during the year in the Madras Presidency (from 75,562 to 87,658), in Bengal (from 87,925 to 95,523), in Burma (from 25,346 to 27,405), in the Punjab (from 53,080 to 53,386), in the Hyderabad Assigned Districts (from 3,225 to 3,544), and in Coorg (from 960 to 1,080). In the remaining Provinces the number of admissions was less than in the previous year, and the greatest decrease occurred in the North-Western Provinces and Oudh (from 110,743 to 93,325). There were in all 533,011 prisoners (508,002 males and 25,009 females) in jail in 1892 against 524,006 (499,092 males and 24,914 females) in 1891. The number of prisoners discharged from all causes during the year was 437,843 (415,863 males and 21,980 females), as compared with 428,362 (406,595 males and 21,767 females) discharged in the preceding year. The year closed with a somewhat smaller jail population (95,168, of whom 92,139 were males and 3,029 females) than 1891 (95,644, of whom 92,497 were males and 3,147 females). The total daily average number of prisoners was 96,202·83 (93,060·75 males and 3,142·08 females), as compared with 92,969·15 (89,858·96 males and 3,110·19 females) in 1891.

3. Statement No. 2 contains the statistics relating to convicts. The year opened with a convict population of 88,429 (85,548 males and 2,881 females),

or 5,165 in excess of the previous year. The numbers admitted during the year were 172,504 males and 11,180 females, as compared with 168,805 males and 10,763 females received during 1891. The total number of convicts was thus 272,113 (258,052 males and 14,061 females), while in 1891 the number was 262,832 (249,301 males and 13,531 females).

The following is a statement of releases made during the year :—

	Males.	Females.
On appeal	12,190	330
On expiry of sentence	144,638	10,517
Under remission rules	11,400	261
By order of Government	381	15
TOTAL ...	168,609	11,123

Of those released by order of Government, 230 (of whom 7 were females) were set free on account of sickness. These numbers include those who were discharged from jail (1) as affording the only chance of their recovery, and (2) when there was no chance of their recovery, to allow them to die among their friends. The latter class of prisoners are, under the orders conveyed in Home Department Circular No. $\frac{\text{S-Jails}}{400-69}$, dated the 8th August 1892, shown as deaths in the Statements appended to the Reports. The number of prisoners released on account of sickness by the Government of Bengal rose from 105 to 140, and is far in excess of similar numbers for other Provinces (where, however, the orders allowing releases of the second class were not received till the latter part of the year). Of the 166 convicts liberated by Government on grounds other than ill-health, 118 (against 408 in 1891, and 1,534 in 1890) had their sentences remitted by the Chief Commissioner of Burma. During the year 726 convicts (including 73 females) were transported beyond the seas; 61 (2 females) were transferred to lunatic asylums; 120 (1 female) escaped; 342 (11 females) were executed; and 3,086 (92 females) died. The number left on the rolls on the 31st December 1892 was 88,570 (85,789 males and 2,781 females), as compared with 88,361 (85,480 males and 2,881 females) on the rolls on 31st December 1891. The largest number was again in the North-Western Provinces and Oudh (24,685). In Bengal there were 16,648; in the Punjab, 12,077; in Burma, 11,587; in Madras, 9,673; and in Bombay, 7,207. The daily average number in jail in 1892 and 1891 was, respectively, 88,801·33 and 85,536·50.

There has been a steady decrease in the number of convicts deported to the Andamans, or from Burma to Indian jails, from 1,279 in 1890 to 922 in 1891 and 726 in the year under review. The reasons for the decline were stated in paragraph 4 of the Resolution of the Government of India on the Provincial Reports for 1891; briefly stated they are (1) the pacification of Burma, and (2) the retention in Central Jails of all convicts sentenced to transportation for a term of years only and not for life. The falling off in 1892 was most marked in the case of prisoners deported from Bengal; this was due to the orders, noticed last year, under which prisoners from Bombay and the Berars embark at Madras instead of at Calcutta; the number of prisoners sentenced in Bengal and deported increased from 90 in 1891 to 104 in 1892.

The number of prisoners transported to the Andamans rose in Berar from 6 to 52. Some of these were dacoits of the Hyderabad border; and these with others planned the serious outbreak and attempt to escape which took place at the Akola Jail on the 11th July 1892. The outbreak was suppressed with the loss of the lives of 4 of the convicts. The establishment of a Central Jail at Amraoti is under consideration, partly in consequence of this affair. A still more serious outbreak took place in Burma at the Akyab Jail on 3rd March; the convicts murdered the European jailor, and six of them were killed or wounded by gunshots before the disturbance was quelled.

The Government of India observe with regret that the number of prisoners who effected their escape (120) was as high as it was in 1891. The number of escapes was again highest in the Madras Presidency (51), and showed an increase even over the number in the preceding year, which was the highest recorded for nine years previously. These facts seem to point to the conclusion

that the system of guarding prisoners is defective, and the Madras Government are inclined to think that the increased number of escapes is due to the removal of fetters from extra-mural gangs. As observed by the Local Government, the orders in paragraph 26 of the Home Department Resolution No. $\frac{\text{10-Jails}}{610-623}$, dated the 9th November 1892, sanction a discretion being given to the Inspector-General of Jails to order the use of light fetters for any extra-mural gang for which he thinks them necessary. Local Governments and Administrations were also authorized in general terms to allow local officers a discretion in the matter if they thought it indispensable to do so. The Governor General in Council trusts that when the necessary steps under these orders have been taken, and any other precautions which may suggest themselves have been carried out, the number of escapes in the Madras Presidency will be much reduced. In Assam, where also extra-mural labour obtains largely, a number of prisoners escaped; most of them, however, were recaptured. Several prisoners effected their escape also in the Bombay Presidency (14), Bengal (14), the Punjab (14), and the Central Provinces (12). Of the total number of escaped prisoners 48 were recaptured, and the number at large at the end of the year was 72. Thirty-eight of the 51 prisoners who escaped in Madras were recaptured. Attention is invited in this connection to the correspondence ending with the Home Department orders Nos. 852—61, dated the 11th June 1883, in which it was laid down that only those convicts who escaped during the year and were not recaptured before its close should be shown in column 12 of Statement I (Judicial), appended to the Provincial Jail Reports. Local Governments and Administrations are desired to ensure that no other escapes but these are shown in column 12 of the Statement, as the inclusion of others renders the return inaccurate.

4. The religion or nationality, age, education, and previous occupation of the convicts admitted into jail during the year are shown in Statement No. 3. Information regarding their education has for the first time been incorporated in this Statement, Statement No. 14, which dealt with this subject, having been discontinued (*vide* the instructions conveyed in paragraph 25 of Home Department Resolution No. $\frac{\text{10-Jails}}{610-23}$ of the 9th November 1892 relative to discontinuing Statement VII appended to the Provincial Reports). It has not been possible, however, to adopt the headings prescribed in the orders of November 1892, as most Local Governments and Administrations have retained the old headings in the Reports for 1892. In the Provincial Reports for 1893 two years' figures should be given, in the form prescribed in paragraph 25 of the Resolution of 9th November last. The number of Europeans and Eurasians imprisoned rose from 443 and 198, respectively, in 1891, to 718 and 245 in 1892. There was also an increase in the number of Native Christians (from 1,119 to 1,429); of Muhammadans (from 46,904 to 47,384); Hindus and Sikhs (from 114,920 to 117,964); and "other classes" (from 3,328 to 3,487). The number of Buddhists and Jains diminished from 12,676 to 12,461. The following table compares the proportion of convicts of each religion to the total convict population and to the total free population of their respective persuasions :—

Religion.	Ratio per mille of each class of convicts admitted to—			
	Total convict population.		Total free population of each class.	
	1891.	1892.	1891.	1892.
Christians	9·8	13·0	0·7	1·0
Muhammadans	261·2	258·0	0·8	0·8
Hindus and Sikhs	639·9	642·2	0·5	0·5
Buddhists and Jains	70·6	67·8	1·4	1·4
All other classes	18·5	19·0	0·3	0·3

The distribution of the convicts among the four main age-periods is shown in the following statement:—

	No. of convicts admitted.	
	1891.	1892.
Under 16 years of age	2,091	2,232
From 16 to 40 years	145,264	147,394
From 40 to 60 years	29,038	30,918
Over 60 years	3,195	3,144

The greatest increase (2,130) was among prisoners from 16 to 40 years of age, but the highest proportionate increase took place among those from 40 to 60 years of age (1880), and among boys under 16 years of age (141). The figures for boys do not include boys admitted into Reformatory Schools, the working of which institutions during the past year will now be briefly reviewed.

The Reformatory School at Chingleput in the Madras Presidency had been a little over five years in existence on the 31st December last. There were 153 pupils on the roll at the close of the year, against 151 at the close of 1891; the same number were admitted as in the previous year (35). Of the 57 pupils who have been discharged since the opening of the School, 38 were reported by District Magistrates and other officers to be well conducted, 7 had not yet been reported on, 3 had emigrated to Bombay, Ceylon or Rangoon, 2 could not be traced, 2 had died, the conduct of 2 was not satisfactory, and 3 had relapsed into bad conduct. The following is an account of the occupations of the 38 discharged pupils who were doing well:—

Pursuing the trade learnt in school	12
Pursuing occupations in which the discipline and training received in the school are of service	13
Pursuing occupations followed prior to conviction	13
TOTAL ...	38

The number of punishments inflicted rose from 198 in 1891 to 270 in 1892. The increase was due to the refractory character of some of the boys admitted during the year. It is noticed that more than a third of the pupils were studying English, and that there was a general improvement in their health.

At the Yeraoda Reformatory School the year opened with 80 boys on the rolls. Thirty-six were admitted during the year, and 11 quitted the School—2 on transfer to the Ahmedabad Jail, 2 on release after appeal, and 7 on the expiry of their sentences. There were thus 105 left in the School at the end of the year. Out of 61 boys released from the School, 13 were following the trades taught in it, 15 were labourers, 8 were otherwise employed, 2 were attending School, 1 had died, and 1 was unemployed. The condition of 12 has not been traced, while 9 have relapsed into crime and been confined in jail. The general unhealthiness of the year much affected the School, no fewer than 156 cases, or more than double the number in the previous year, being treated in the Reformatory Hospital. There were, however, no deaths among the boys.

The Reformatory Schools at Alipore and Hazaribagh in Bengal continued to be satisfactorily worked during the year. There were 150 boys in the Alipore School at the beginning of the year, 62 were admitted during the year, and 27 were released. There were thus 185 on the roll at the end of the year, of whom 81 were Hindus, 103 Muhammadans, and 1 a Native Christian. There were no escapes and no deaths during the year. Out of 263 boys released since the opening of the institution, 38 have subsequently been sent to jail and 42 have bad characters, while 183 are well reported on. Only 29 are following the trade learnt in the Reformatory, but, as observed by the Local Government, the explanation of this fact lies in the caste prejudices and social customs which compel boys on their discharge to follow the occupations of their parents. These are more numerous than it is practicable to teach in the Reformatory. Sixty-nine boys were received into the Hazaribagh School during the year, making, with an initial number on June 1st of 301, a total of 370. Of these, 66 were released and 3 died, leaving 301 in the School at the end of the year. Of

the 3 deaths one was accidental, caused by drowning; due notice has been taken of the negligence of the subordinate officials. Arrangements for training the lads in gymnastics have now been made at both Alipore and Hazaribagh, and this will probably promote the health of the boys.

The Reformatory School at Bareilly was only established in 1889; it contained 128 boys at the beginning of the year, and there were 48 admissions. Thirteen boys were retransferred to jails and 11 were released, leaving 152 boys in the School on the 31st December 1892. The trades taught are shoemaking, cane-work, blacksmith's work, carpentry, and tailoring; but all the boys are also trained to ordinary agricultural work. The conduct and health of the boys were good, and favourable reports are received of the lads hitherto discharged.

In the Jubbulpore Reformatory, which was opened so recently as June 1891, there were 39 boys at the end of January, and 57 at the end of December 1892. Many of them were engaged in tailoring in connection with the tent-making industry, and some worked at carpentry and in the blacksmiths' shop. The record of health was good, and fair progress was made in education.

There were 75 boys in the Paungdè Reformatory (which was established in 1882) on the 1st January 1892, 43 were admitted during the year, and 42 were discharged. There were no deaths, and 41 boys passed by one or other of the educational standards when examined by the Deputy Inspector of Schools. The total cost of the Reformatory was Rs. 9,321, and the net cost of maintaining each boy was Rs. 125-8. The reports received about most of the lads who have been discharged are satisfactory. A new Reformatory is about to be built at Insein, where it is expected that the boys will be under better supervision.

There was no Reformatory School in the Punjab up to the end of 1892, but it has since been decided to build one, and the Local Government has under discussion the selection of a suitable site. The total number of juveniles detained in Reformatory Schools at the close of the year was 1,029, as compared with 926 at the end of 1891.

The several reports on the working of these institutions are in the main satisfactory.

Of the 183,688 convicts imprisoned during the year, 5,289 were able to read and write well, and 16,036 could read only or read and write a little, while 143,212 were illiterate. Prisoners in subsidiary Jails have not been included in the Education figures of Madras and Coorg. The endeavour to educate adult convicts has been abandoned, and attempts at education are now restricted to such prisoners under the age of 18 as are not transferred to Reformatory Schools. They are instructed, not only in reading and writing, but also, where possible, in some simple handicraft.

There was an increase, as compared with 1891, of 4,977 among males who, previous to conviction, were engaged in agriculture and with animals; of 855 among those who were in service or performing personal offices; and of 812 among those who were engaged in commerce and trade. The following figures give the classification of male prisoners in 1891 and 1892 according to their occupation previous to admission into jail:—

	1891.	1892.
Employed under Government or municipal or other local authorities	4,607	4,379
Professional persons	6,655	6,163
In service or performing personal offices ...	14,713	15,568
Engaged in agriculture or with animals ...	90,795	95,772
Engaged in commerce and trade	7,253	8,065
Employed in mechanical arts, manufactures, engineering operations, &c.	6,729	6,459
Engaged in miscellaneous pursuits ...	38,067	36,093

In the case of female convicts, the largest actual increase was among married women; but the largest proportionate increase occurred among those returned as unmarried. The condition of the females received into jail in 1891 and 1892 is shewn below:—

	1891.	1892.
Married	6,702	6,973
Unmarried	490	539
Widows	3,140	3,299
Prostitutes	437	378

5. The distribution of the convicts admitted into jail during the past two years according to the length of their sentences is stated below:—

	No. of admissions.		Ratio per cent. on total admissions.	
	1891.	1892.	1891.	1892.
Not exceeding one month	64,253	67,957	35·77	37·00
Above one month and not exceeding three months...	34,914	36,140	19·44	19·67
Above three months and not exceeding six months...	31,533	31,721	17·55	17·27
Above six months and not exceeding one year ...	23,811	23,602	13·26	12·85
Above one year and not exceeding two years ...	14,296	13,596	7·97	7·40
Above two years and not exceeding five years ...	6,479	6,642	3·61	3·62
Above five years and not exceeding ten years ...	1,770	1,812	0·99	0·99
Exceeding ten years	93	97	0·06	0·05
Transportation ... (*a*) for life ...	1,101	896	0·62	0·49
Transportation ... (*b*) for a term ...	787	644	0·43	0·35
Sentenced to death	551	569	0·30	0·31

As in 1891, the increase lay chiefly among prisoners whose sentences did not exceed one month, there being more than one-third of the whole number of convicts. The great majority of the convicts admitted (159,420, or 86·79 per cent.) were persons sentenced to imprisonment not exceeding one year. The number of prisoners sentenced to transportation declined from 1,888 to 1,540, although the number of re-convicted criminals increased slightly—from 20,803 to 21,026. It seems likely that some habituals who might properly have been transported were sentenced to terms of imprisonment, but now that term convicts (except from Burma) are no longer sent to the Andamans, many Courts have doubtless discontinued passing sentences of transportation for a term of years. As has been already observed, the number of persons transported to the Andamans rose in Berar from 6 to 52.

6. Of the 183,688 convicts admitted during the year, 13,824 (7·52 per cent.) had been previously convicted once; 4,035 (2·19 per cent.) had been previously convicted twice, and 3,167 (1·72 per cent.) more than twice. The ratio per cent. (11·45) of re-convicted criminals to the total number admitted was lower than in 1891 (11·58); but the general ratio was exceeded in Burma (18·77), the Central Provinces (16·55), Bombay (15·09) and the Punjab (13·83). There was an increase in the number of juveniles received (2,232) as compared with 1891 (2,091), the largest number being contributed, as in the previous year, from the Madras Presidency (727). The percentage of the number admitted who had been previously convicted was also slightly higher (8·73) than in 1891 (8·32). The ratios in each case were: Madras 5·91; Bombay 7·20; Bengal 6·62; the North-Western Provinces and Oudh 16·94; the Punjab 4·19; the Central Provinces 14·17; Burma 20·0; Hyderabad Assigned Districts 7·14. In Assam and Coorg none of the juveniles had been previously convicted.

The attempts which have been made in the several Provinces to ensure the recognition of habitual offenders have not hitherto had very encouraging results. In the Madras Presidency the Bertillon system of measurement was not brought into working order during the year in any of the jails. In the Bombay Presidency, it is reported that considerable progress has been made in the matter of the identification of old offenders, the number of prisoners classified by Courts on conviction as habituals being 1,015 against 651 in 1891. It is not clear, however, what system is employed in that Presidency for identifying convicts. In Bengal further progress was made in improving and extending the anthropometrical system, but as yet it has not been long enough in use to afford any practical test of its value (in regard to which, however, the Governor General in Council entertains no doubt), and no re-conviction was proved by its help during the year. The system had not yet been introduced into the North-Western Provinces and Oudh, but the Inspector-General of Jails has been asked by the Local Government to submit definite proposals for its working before the close of the current year. The introduction of the system into the Punjab has been delayed owing to the defective construction of some of the instruments in use, but it is stated that it will be introduced into the Police training school at Phillour as soon as the new instruments can be obtained. The experiments made in Burma with the Bertillon system were attended with satisfactory results, and it has been decided to introduce it also into Assam, where instruments are shortly expected. The remaining Provinces do not refer to this mode of identifying habitual offenders.

7. The employment of convicts in jail is shown in Statement No. 6. The average number sentenced to labour was 84,632·98, as compared with 81,549·67 in 1891. Deducting from these the average number sick (3,528·52), and convalescent and infirm (6,859·83), the prisoners available for labour aggregated 74,244·63, against 71,645·33 in the previous year. They were employed in the following manner during the year under report:

	Average No. employed.
Unremunerative labour	1,678
Prison officers	4,191
Prison servants	8,609
Gardening	5,865
Preparation of articles for consumption in jails ...	11,947
Jail repairs	3,664
Jail buildings	4,843
Manufactures	33,501
Labour under the Public Works Department ...	1,650
Labour under Municipalities, &c.	2,587

In connection with the District Jail, Lucknow, dairy has been established with satisfactory results. Jail dairies have also been developed in Lower Bengal.

8. Statement No. 7 shows the offences committed by convicts and the punishments inflicted on them during the year. The number of recorded offences has increased from 95,146 in 1890 and 99,601 in 1891 to 112,857 in 1892. The increase in 1892 is distributed over all Provinces, except the North-Western Provinces and Oudh and Coorg. There was a rise in the number of criminal offences (from 483 in 1891 to 524 in 1892). Offences connected with smoking or the possession of forbidden articles rose from 12,084 to 13,831, Bengal and the Punjab contributing chiefly towards the increase. The number of offences relating to work (57,456) was 8,040 in excess of the number in 1891. The principal increases occurred in Bengal (4,301), the Central Provinces (1,582), Burma (1,465), the Madras Presidency (1,080), and the Bombay Presidency (281). Other offences against prison discipline also rose, from 37,618 to 41,046, the increase being shared by the majority of Provinces.

The total number of punishments inflicted rose from 99,578 in 1891 to 112,826 in the year under report. There was an increase (from 528 to 576) in the number inflicted by criminal courts and—among those awarded by Jail officers—in the number of solitary confinements (from 9,727 to 10,839) and of orders for reduced diet (from 10,909 to 12,664). The Government of India are glad to observe a reduction in the number of punishments by solitary confinement with reduced diet (from 8,819 to 7,789), and that corporal punishments fell from 2,108 to 2,082. The number of punishments by solitary confinement with reduced diet still continues to be highest in Burma (2,544), but it is acknowledged that the prisoners in that Province are very refractory than in other Provinces, and this method of punishment has been employed less frequently than in the preceding year. There was also a large number of corporal punishments (431) in Burma. The number of whippings inflicted during the year was highest in the North-Western Provinces and Oudh (502), where the daily average number of convicts was greatest, and, of the large Provinces, it was lowest in the Madras Presidency (60). The ratio per cent. of whippings to the total of other jail punishments

inflicted on males (1·91) was lower than in 1891 (2·20), and, except in Burma and the Hyderabad Assigned Districts, the fall was universal.

As observed in the Resolution for 1891, the Government of India contemplate legislation to remove divergencies in the method of recording jail offences and punishments (as well as of adjudging such punishments) which exist in the several Provinces. A draft Bill to amend the provisions of Act XXVI of 1870, and to substitute one general Prisons Act, extending to all India and superseding the existing local Acts in Madras, Bombay and Bengal, was circulated for opinion with Home Department letter No. $\frac{4\text{-Jails}}{165-75}$, dated the 25th March 1893; and the Bill, together with the replies of Local Governments and Administrations, is now under the consideration of the Government of India. When the proposed law has been enacted, a proper comparison will be possible between the discipline enforced and punishments awarded in the several parts of India, which cannot be made under existing circumstances.

In paragraph 28 of the Home Department Resolution of the 9th November last the Government of India prescribed, for general adoption in Provincial reports, the form of Statement VI recommended by the Prison Conference of 1892 (Appendix III of the Report of the Conference). As, however, the statistics of offences and punishments of only two Provinces have been submitted in the new form, it is necessary in the present year to retain the old form of Statement No. 7 annexed to this review. The two forms of Statement VI are so entirely different that the Reports for 1893 should be made to show figures for two years in the new form for purposes of comparison; Local Governments and Administrations are requested to issue orders accordingly.

9. The working of the mark system during the past two years is shown in Statement No. 12. The number of convicts who earned remission of sentence under the system increased from 11,147 to 11,649. Out of the convicts who were released during the year and had come under the system, only 34 had failed to earn remission. The maximum remission in days earned by any convict released during the year was 1,374; the sentence in this case was over ten years. The maximum gratuity earned by any convict released was Rs. 28, as compared with a maximum of Rs. 50 earned in 1891, and of Rs. 60 earned in 1890. This fall is not a matter for regret, as the Government of India have expressed the opinion (paragraph 42 of their Resolution of 9th November last) that what is needed is not so much a system for rewarding with money industrious and well-conducted prisoners, who by earning marks can gain a substantial reduction of their sentences, as one for giving to indigent prisoners, when released, a sufficient subsistence allowance to enable them to reach their homes. A revised set of Mark Rules is now in the hands of Local Governments and Administrations, which will enable them to extend the remission system and to apply it with greater uniformity in the several Provinces. In future, not only will the reduction of sentences depend upon the number of marks obtained by convicts, but the marks will be taken into consideration in granting prison privileges and in making selections for promotion to any grade of prison officer.

10. Statements Nos. 8 and 9 show the expenditure on jails and the cash earnings of prisoners. The gross expenditure rose from Rs. 54,78,045 in 1891 to Rs. 58,43,211 in the year under review. It was highest in Bengal (Rs. 12,01,958) and lowest in Coorg (Rs. 12,458). The increase was distributed over every head of charge, but the largest rise (Rs. 2,90,384) occurred under "Rations." The average cost of rations per head (Rs. 27-4-1) was higher than in 1891 (Rs. 25-1-11). Excluding Coorg, it was highest in Burma (Rs. 39·9), and remains lowest in the North-Western Provinces and Oudh (Rs. 19-13-8).

The total cost of establishments rose from Rs. 19,37,791 to Rs. 19,61,688. There was an increase under this head in Burma (from Rs. 2,64,011 to Rs. 2,80,868), in the Central Provinces (from Rs. 98,300 to Rs. 1,03,036), in Bengal (from Rs. 4,47,212 to Rs. 4,50,223), in the North-Western Provinces and Oudh (from Rs. 3,55,452 to Rs. 3,58,486), in the Punjab (from Rs. 2,70,456 to Rs. 2,71,625) and in Bombay (from Rs. 1,84,247 to Rs. 1,85,373); there was a fall in Madras (from Rs. 2,68,882 to Rs. 2,60,848) and in Assam (from Rs. 21,046 to Rs. 20,804). The total cost of Police guards increased slightly (from Rs. 2,56,896 to Rs. 2,56,962); but the expenditure on this account may be expected henceforward to diminish steadily, as the instructions of the Government of India directing the substitution of jail warders for Police guards are carried out. There was no expenditure on Police guards during the past year in the Madras Presidency, Bengal, the Central Provinces and Burma, as the guarding of the jails in these Provinces has already been taken over by warders.

Hospital charges rose from Rs. 1,71,560 to Rs. 1,89,410. Excluding Coorg, the cost per head of the daily average strength was—highest in Bengal (Rs. 2-12-6) and lowest in the Hyderabad Assigned Districts (Rs. 1-1-10). The cost per head of the daily average number sick was—in the Madras Presidency, Rs. 7o-13-3; in the Bombay Presidency, Rs. 57-10-5; in Bengal, Rs. 69-9; in the North-Western Provinces and Oudh, Rs. 35-2-8; in the Punjab, Rs. 43-13-9; in the Central Provinces, Rs. 47-11-6; in Burma, Rs. 67-6-3; and in Assam, Rs. 34-4-2.

The total expenditure on account of clothing increased from Rs. 2,83,904 to Rs. 2,93,260, but the cost per head of daily average strength remained about the same (Rs. 3-1-2).

The charge for contingencies, which was Rs. 5,17,211 in 1891, reached Rs. 5,40,824 in 1892. The charge was highest in Bengal (Rs. 1,87,779), and, excluding Coorg and Hyderabad, lowest in Assam (Rs. 7,759); but it is impossible, as has been observed in previous years, to institute any comparison between the expenditure on contingencies in the several Provinces, owing to the various principles adopted in classifying items under this head. Local Governments and Administrations have been consulted in the matter, and the Government of India are desirous of formulating a uniform system to regulate the classification of charges as contingent. When this design is carried out, the word "Contingencies" as applied to jail expenditure will have the same meaning throughout India, and then only will it become possible to compare the outlay under this head in the various Provinces.

11. The total cash earnings of prisoners fell from Rs. 13,71,328-13 to Rs. 12,51,424-9, a decrease of Rs. 1,19,904-4. The earnings were greatest in Burma (Rs. 3,25,010-9) and in Bengal (Rs. 3,23,210-15). In the North-Western Provinces and Oudh they aggregated Rs. 1,87,575-14; in the Punjab, Rs. 1,52,711-14; in the Madras Presidency, Rs. 1,19,131; in the Bombay Presidency, Rs. 1,14,314-3. In the Central Provinces there was a net loss of Rs. 18,024 on the manufacturing transactions of the year; but this was due chiefly to the fact that the Jubbulpore jail failed to secure within the year the prescribed audit certificate for Rs. 45,000 worth of carpets supplied to the Commissariat Department of Bombay, and that there were also other bills unpaid, which brought up the total amount of the outstanding credits of this jail at the close of the year to over Rs. 86,000.

The total cost of maintenance of the jails and prisoners (as observed in paragraph 10 above) rose from Rs. 54,78,045 to Rs. 58,43,211. The net expenditure on Jails in 1892 was thus Rs. 45,91,786-7, as compared with Rs. 41,06,716-3 in 1891. The average net cost of a prisoner in India was Rs. 47-14-10, against Rs. 44-5-10 in the preceding year. The following figures compare the average net cost in the several Provinces in the years 1891 and 1892:—

	1891.	1892.
	Rs. A. P.	Rs. A. P.
Madras	60 14 6	55 12 5
Bombay	48 6 6	55 3 7
Bengal	48 4 9	51 2 6
North-Western Provinces and Oudh	37 10 0	35 9 9
Punjab	46 8 4	51 6 7
Central Provinces	37 8 4	65 5 9
Burma	36 14 4	45 15 3
Assam	58 1 10	57 13 9
Coorg	46 13 8	63 5 0
Hyderabad Assigned Districts	52 6 6	64 4 0

The outstandings already noticed in this paragraph of course considerably affect the figure for 1892 in the Central Provinces.

12. The Government of India observe with regret that, on the whole, the health of the Jail population, which had improved in 1891, again fell back considerably. The ratios per mille of admissions into hospital, of daily average number sick, and of deaths from all causes, were all higher than in the preceding year, as will be seen from the following figures:—

	Ratio per mille of daily average strength.	
	1891.	1892.
Admissions into hospital	978·57	1,116·87
Daily average number sick	33·60	37·94
Deaths from all causes	30·19	35·94

The number of deaths from fever (229) was less than in 1891 (261), but the mortality from bowel complaints and cholera was higher. The deaths from the two latter causes numbered, respectively, 820 and 510 in 1892, as compared with 738 and 324 in 1891. The largest number of deaths from fevers occurred in the North-Western Provinces and Oudh (60). The mortality from dysentery and diarrhœa was highest in Bengal (195), while cholera was fatal in the greatest number of cases in Madras (192).

Of the 180,889 prisoners discharged during the year, 99,048 (54·7 per cent.) gained weight, 38,022 (21·0 per cent.) lost weight, and 37,730 (20·8 per cent.) neither gained nor lost weight. As to the remainder particulars are not available.

The following statement compares the aggregate number of deaths and the ratio of mortality in each Province during the past two years, and also contrasts the Jail death-rates with the maximum and minimum death-rates reported among the free population:—

		No. of deaths in Jails.	Ratio per 1,000 of deaths in Jails.	Death-rate per 1,000 among free population in any one district.	Highest ratio of deaths among the free population in any one district.	Lowest ratio of deaths among the free population.
Madras	1891	347	35·33	26·2	59·4	13·5
	1892	504	45·14	22·3	46·5	14·3
Bombay	1891	253	32·44	27·26	42·11	14·99
	1892	293	36·52	32·50	47·51	20·93
Bengal	1891	493	30·97	26·94	43·53	16·56
	1892	752	43·78	31·92	43·62	19·34
North-Western Provinces and Oudh.	1891	780	27·62	31·14	47·0	20·31
	1892	803	29·14	34·11	52·35	23·13
Punjab	1891	347	28·30	29·13	41·98	20·24
	1892	387	30·54	49·48	66·69	23·01
Central Provinces ...	1891	142	30·37	35·54	46·84	25·65
	1892	212	44·66	34·14	46·66	24·58
Burma	1891	345	30·12	15·93	25·08	10·85
	1892	392	33·10	20·00*	29·91*	12·55*
Assam	1891	84	52·11	29·91	35·91	19·91
	1892	76	58·97	34·21	41·41	26·68
Coorg	1891	8	32·64	21·79	21·79	21·79
	1892	3	30·33	30·62	30·62	30·62
Hyderabad Assigned Districts	1891	12	11·29	40·6	47·6	30·0
	1892	21	17·16	28·8	33·2	24·6

* For Lower Burma only.

13. The comparison with the recorded death-rate among the free population must be accepted with caution in the case of those Provinces where the general registration of vital statistics is still very defective. In the Madras Presidency cholera was prevalent, and accounts for the rise (from 35·33 to 45·14) in the ratio per mille of deaths in jails. If deaths from cholera be excluded, the ratios were 26·1 in 1891 and 27·9 in 1892.

In the Bombay Presidency nearly half the number of deaths among convicts occurred in the Sind jails, the jail at Shikarpur heading the list with a death-rate of over 116 per mille. Proposals are under the consideration of Government for transferring the District Jail from Shikarpur to Sukkur. It is noticed that out of 413 prisoners released from the Dhuliakot Jail during the year, only 124 gained weight, and the remainder either lost weight or continued in the condition in which they were admitted into jail.

The high death-rate in the jails of Bengal has been the subject of separate communication with the Government of that Province. The principal causes were the general unhealthiness of the year in the Lower Provinces, and the high price of food-grains which caused a number of criminals to be admitted in a weakly condition. But the Government of India have thought it necessary to call for a special report on the sanitary condition of ten jails in Bengal.

Although the health of the prison population of the North-Western Provinces and Oudh was not as satisfactory as in previous years, yet the death-rate (29·14 per mille) was not excessive. The rise in the jail death-rate (from 27·62 per mille in 1891 to 29·14 in 1892) accompanied a rise in the mortality among the free population (from 31·14 in 1891 to 34·11 in 1892), and was exceeded by the latter. In the following jails there was a marked increase in the mortality among convicts:—

	Death-rate per 1,000.	
	1891.	1892.
Ghazipur	43·53	60·94
Gorakhpur	74·89	87·44
Aligarh	15·15	50·70
Saharanpur...	37·31	50·63
Banda	52·24	85·75

The increase is stated to have been mainly due to the bad or indifferent health of the prisoners on admission into Jail. A new jail is being built at Gorakhpur. At Banda less than 50 per cent. of the prisoners admitted during the year were in good health; there were also several cases of sunstroke.

The Government of India observe that the jail death-rate in the Punjab (30·54)—though higher than in 1891 (28·30)— was nearly 19 per mille less than the recorded death-rate among the free population (49·48), which rose very greatly. The rate of mortality in the Karnal Jail was high (75·76 per mille), but the total number of deaths was only 10, and of these, 9 occurred in the months of February and March from pneumonia and acute pneumonic phthisis, when influenza prevailed among the free population.

The total number of deaths in the jails of the Central Provinces rose from 142 in 1891 to 212 in 1892; but 112 deaths occurred among convicts alone in the three jails of the Chattisgarh Division, all of which, and especially the Sambalpur Jail, suffered from an outbreak of cholera. The Government of India observe that in the Central Provinces the result of the experiments made to test the effect of moderate labour on prisoners of weakly constitutions was that, as a rule, the prisoners gained in weight. In Bengal also such prisoners are reported to have improved in health, and it is believed that the same result will be experienced wherever the experiment is carefully made; but it has been remarked in a communication on the subject to the Government of Bengal that the system should be carefully watched and confined to jails under specially skilled supervision.

In Burma, as in other Provinces, the health of the prisoners was not satisfactory, the rates of admissions into hospital, daily average sick, and deaths being respectively, 934, 39 and 33·09 per mille, as compared with 891, 34 and 30·12 in 1891. The increase was, however, entirely due to cholera; and if this cause be excluded, the death-rate for 1892 falls to 24·06. Cholera was present in 12

jails, and in 8 of them apparently in an epidemic form. The jail authorities adopted preventive measures, which on the whole were successful in preventing the spread of the disease. The sanitary condition of the Moulmein Jail has been made the subject of special correspondence, and it may have to be converted into a District Jail if the health of the prisoners does not improve. It is a matter for regret that the mortality in the jails of Assam was again heavy. The number of deaths (76) was smaller than in 1891 (84), which was an exceedingly unhealthy year, but the ratio per mille was higher (59 as compared with 52·1 in 1891). The Chief Commissioner, however, is satisfied that where the mortality was heaviest, it had nothing to do with any defects in the sanitary condition of the jails. The jails which chiefly contributed to the large number of deaths were Gauhati, Nowgong and Dibrugarh; and it appears that the causes assigned by the Chief Commissioner, *viz.*, the large number of anæmic coolies (punished for desertion) admitted into the Dibrugarh Jail, the prevalence of *Kala-Azar* in the town and district of Nowgong, and the stoppage of the water-supply at Gauhati, sufficiently account for the mortality. Special instructions have been given by the Chief Commissioner regarding the Gauhati Jail.

The health of the prison population in Berar continued satisfactory, although the rates of admission to hospital, daily average sick, and deaths were slightly higher than in 1891.

ORDER.—Ordered, that a copy of this Resolution be forwarded to all Local Governments and Administrations for information and guidance, and to the Department of Finance and Commerce for information.

Ordered also, that this Resolution be published in the Supplement to the *Gazette of India*.

[True Extract.]

C. J. LYALL,

Secretary to the Government of India.

Statements appended to Home Department Resolution No. $\frac{14\text{—Jails}}{612\text{-}23}$, dated the 4th November, 1893.

No. I.

GENERAL SUMMARY SHOWING the DISTRIBUTION of the PRISONERS of all CLASSES CONFINED in the JAILS and SUBSIDIARY JAILS of BRITISH INDIA during the years 1891 and 1892.

C. J. LYALL,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the week ending at 8 a.m. on Saturday, November 4th, 1893.

The cyclonic storm which existed over the east of the Bay at the close of the previous week passed across the Burma Coast on the 28th of October or early on the morning of the 29th, and gave very unsettled weather and heavy rain to the whole of Burma. It was succeeded by a rapid barometric rise. With the disappearance of unsettled conditions from the east and north of the Bay, the general conditions of weather and winds became more normal. The wind direction on the Madras Coast shifted from west and north-west to north and north-east, and rain commenced over the Carnatic. At first the rainfall was light, but as the week progressed the fall increased, and amounts of an inch and more were reported from the coast stations. All over Northern and Central India high pressures and fine anti-cyclonic weather have prevailed. In the North-West Provinces, the Punjab, Sind, Rajputana, and Madras the mean temperature was slightly higher than usual, but in the other Provinces it was lower, and the mean temperature for the whole country for the whole week was nearly $\frac{1}{2}^{\circ}$ below the normal average.

The chart of the 29th October showed that the cyclonic storm which lay over the east of the Bay on the 28th had passed inland over Burma, and the centre was apparently near Fort Stedman. The barometer had fallen over the greater part of North-East India, except Lower Burma, and had risen elsewhere. Readings were highest over the central parts of the country and lowest over Upper Burma. Winds were irregularly cyclonic over Upper Burma, northerly and north-north-westerly along the East Coast of the Peninsula, and blew from about the normal directions elsewhere. Showers were reported from Gnatong (snow), Murree, Srinagar, and the south of the Peninsula, and general and rather heavy rain from Burma. Minbu had received 6·15 inches, Bassein 3·70 inches, Yamethin 3·40 inches, Thayetmyo 3·17 inches, and Rangoon 2·15 inches. Madura received 3·23 inches. On the morning of the 30th pressure was rising almost everywhere, and readings, though somewhat higher over the central parts of the country and lower over the Bay and Arabian Sea than elsewhere, were generally uniform. The wind was shifting round to north-east on the South Carnatic Coast, and the directions generally were fairly normal. Rain still fell in Burma, though the amounts were much smaller than on the previous day, and light local showers were reported from a few other parts of the country. On the 31st October the barometer was falling generally, but the change was generally moderate, and the distribution of pressure was little altered. The wind directions were fairly normal. Light rain had commenced on the Madras Coast, and a few showers were reported from North-Eastern India. On November 1st an important change was shown. Pressure had fallen over the Peninsula and risen over Northern India. Hence gradients had increased. The wind had risen over the Bay, and the rainfall on the Madras Coast had

increased. The general conditions were fairly normal, except that between the high pressure over the central parts of the country and the low pressure over Travancore and Ceylon, the pressure difference was greater than usual. On November 2nd the barometer was rising, except in Tenasserim, but the changes were fairly uniform, and the general distribution was unaltered. The wind blew from about the usual directions, and rain continued to fall over the south of the Peninsula. At Cuddalore and Negapatam the amount received was nearly 2 inches. The chart of November the 3rd showed a further fall of the barometer over the south and east of the Indian region and a further rise in the north-west. Hence gradients had again increased, and the wind over the Bay and the Peninsula had risen in force. Pressure was highest in East Rajputana and lowest over the south-west of the Bay. Rain had fallen generally over the east and south of the Peninsula with one or two local showers elsewhere. Cuddalore had received nearly 2 inches, and Toungoo, Colombo, Calicut, and Cocanada over 1 inch. On November 4th the changes recorded were unimportant, and the general distribution of pressure and the general circulation of the winds were practically unchanged. Rain was general over a large part of the Peninsula, while elsewhere the weather was fine and dry. Negapatam had received $2\frac{1}{2}$ inches of rain, Kurnool $2\frac{1}{4}$ inches, and Colombo and Nellore over 1 inch.

Temperature.—The following table shows the variations of the mean temperature from the normal on each day of the week for the different Provinces of India:

Province.	October 1893.			November 1893.				Mean variation of week.
	29th.	30th.	31st.	1st.	2nd.	3rd.	4th.	
	°	°	°	°	°	°	°	°
Burma	—5·1	—3·6	—2·4	—1·4	—1·2	—0·9	—1·1	—2·2
Bengal and Assam	—0·2	—0·3	—0·4	—1·1	—1·2	—1·0	—0·4	—0·7
North-Western Provinces and Oudh.	+0·4	+0·3	+1·1	+0·2	+0·6	—0·2	—0·4	+0·3
Punjab	+2·1	+2·3	+0·9	+0·5	+0·7	+0·4	—0·1	+1·0
Bombay	—0·7	—1·1	—0·9	—0·5	—0·6	—0·8	—0·2	—0·7
Central Provinces and Berar	—1·9	—0·9	—1·4	—1·9	—2·2	—2·6	—2·8	—2·0
Central India and Guzerat	—1·0	—0·9	—0·3	—0·4	—0·2	+0·3	—0·2	—0·4
Sind and Rajputana	+0·8	+0·8	+1·5	+2·1	+1·8	+1·2	—0·3	+1·1
Madras	+0·3	+0·5	+1·1	+0·1	—0·3	—0·5	+0·1	+0·2
Mean for whole of India	—0·6	—0·3	—0·1	—0·3	—0·3	—0·5	—0·6	—0·4

From the above it will be seen that the relative coolness which characterised last week has continued during the week under review. The deficiency of temperature was less marked than in the previous week, and for the whole of India was less than $\frac{1}{2}^{\circ}$ for the period.

Rain.—As was shown in the earlier portions of the summary, the principal rainfall of the week was attributable to the effects, first, of the cyclonic storm and disturbed weather over Burma in the early part of the week; and, secondly, to the reappearance of the autumn monsoon on the Coromandel Coast. The table at the close of the summary shows that, while light showers have fallen during the week in East Bengal, Assam, Deltaic Bengal, the north-west of the Punjab,

Malabar, Madras (South Central), Mysore, and Ganjam, all the heavy rainfall was reported from the Burma and East Coast divisions. Hence, while thirty-five divisions report absolutely no rain and four divisions more an average fall for the week of less than 0·10 inch only, thirteen have received effective rain during the week. In Lower Burma, Central Burma, and Upper Burma the average actual rainfall of the week varied from 2·22 inches to 2·83 inches, and in the East Coast (Central and South) and Madras (South) exceeded 1 inch. In all parts of the country, except Burma and the south-west and south-east of the Peninsula, the normal rainfall at this season of the year is very light, but in most places even this small rainfall has not been received, and only three divisions, *viz.*, Lower and Central Burma and the north-west of the Punjab, report more than the average rainfall. In Lower and Central Burma this excess amounts to about 1½ inches, but in North-West Punjab to only 0·02 inch. On the East Coast (South and Central) the normal rainfall of the week is between 2½ and 2¾ inches, and the actual rainfall over these two divisions is about 1 inch short of the normal.

The concluding column of the table shows that since October 15th the total actual rainfall is in excess of the normal in Lower Burma, Arakan, Assam, all the Bengal and North Western Provinces divisions, the Central Provinces divisions, Central India (East), and Hyderabad (South). In all the other divisions the actual rainfall has been short of the normal, though this is of comparatively little importance, except in the case of the Madras divisions.

The following gives the largest total amounts received during the week as reported in the rainfall telegrams of the week:

Division.	District.	Station.	Amount.
Lower Burma . .	Bassein . .	Sudder . .	4·41 inches.
Upper Burma . .	Magwe . .	Ditto . .	5·25 ,,
Malabar . . .	Calicut . .	Ditto . .	1·53 ,,
Madras . . .	Cuddapah . .	Chitvel . .	3·08 ,,
Ditto . . .	Nellore . .	Iskapally . .	6·78 ,,
Ditto . . .	Tanjore . .	Negapatam . .	7·08 ,,
Ditto . . .	Madura . .	Melur . .	4·49 ,,

SIMLA, *9th November, 1893.*

W. L. DALLAS,
Asst. Meteorological Reporter to the Government of India.

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 4th November.*—Rainfall moderate in the Karnatic and Southern districts and light in the Western and Central districts and the Circars. Sowings being made largely. Standing crops flourishing. Harvest of early crop yielding average outturn. Pasture and fodder sufficient and condition of stock good. Prices almost stationary, but slightly easier in the Deccan and Central districts. Since 4th over 12 inches of rain has fallen at Madras, and heavy fall has probably extended over large area and filled tanks.

Bombay.—*For week ending 8th November.*—Rain urgently wanted in parts of the Deccan. Standing crops withering for want of moisture, or damaged by insects or rats in parts of three districts; crops otherwise good. Preparations for late crops and reaping of early crops progressing generally, except in two districts, where sowing is retarded for want of rain. Cotton picking continues in two districts. Prices steady, except in two districts. Fodder sufficient. Agricultural stock good.

Bengal.—*For week ending 4th November.*—No rain fell during the week and the fine weather is favourable to the crops. Prospects of winter rice which is now in ear are generally good, except in tracts which suffered from floods. In Noakhali the damage done to winter rice by the cyclone of 22nd October is estimated at two annas and in some parts from four to eight annas. Extensive damage to the crop by insects is reported from the Brahmanbaria sub-division of Tipperah. Sowing of spring crops is in progress. The price of rice has fallen slightly in some districts. Cattle are in good condition, and the fodder supply is generally sufficient. 334 persons, including 119 men, 120 women, and 95 children, received gratuitous relief in the Madaripur sub-division during the week.

North-Western Provinces and Oudh.—*For week ending 8th November.*—Weather fine and seasonable. Harvesting of the autumn crops approaching completion. Sowings for the spring crops well advanced. Fields are being prepared for poppy cultivation. Sugarcane pressing and cotton picking commenced. Prospects good. Supplies abundant. Prices generally steady.

Punjab.—*For week ending 8th November.*—Slight rain in part of Rawal Pindi district. Harvesting of autumn crops in progress. Sowings of spring crops commenced, though ploughing is still going on in some districts. Condition and prospects of standing crops are generally reported good. Yield of cotton was said to be good in first picking, but not in the second. Autumn crops have been injured by field rats in part of Lahore. Cattle are generally in good condition. Fodder sufficient in all districts, except in Shahpur and part of Mooltan. Prices falling in five districts; stationary elsewhere.

Central Provinces.—*For week ending 8th November.*—Weather generally cloudy and cool. Harvesting of autumn crops continues. Sowings of winter crops approaching completion. Prices steady.

Burma.—*For week ending 4th November.*—Rain fell in all districts in Lower Burma, and the crop prospect generally is good. Rain fell also in all districts of Upper Burma, except Pakokku and Lower Chindwin; more than two inches of rain fell in Shwebo, Myingyan, Minbu, Magwé, Meiktila, Yamethin, and the Northern Shan States. The crop prospect generally in Upper Burma is good, but more rain is still required in Ye-u and in parts of Shwebo, while in Sagaing, Pakokku, Magwé, Kyaukse, and Meiktila some damage has been caused by heavy rain or floods. The price of paddy has fallen in seven districts, and risen in one.

Assam.—*For week ending 7th November.*—Weather seasonable. Sowing of mustard and pulses progressing. Prospects good. Condition of cattle fair. Fodder and water sufficient.

Mysore and Coorg.—*For week ending 8th November.*—MYSORE: Slight rain in parts. Standing crops in good condition. *Ragi* (*Eleusine coracana*) harvested in parts. Prices have fallen in three districts; stationary elsewhere.

COORG: No rain. Rice crop in good condition. Coffee picking commenced in some parts. Cardamom picking continues. Prices stationary. Water and fodder for cattle sufficient.

Berar and Hyderabad.—*For week ending 8th November.*—BERAR: Weather cool. Crops in good condition. Picking of cotton in progress. Weeding operations completed, except in Akola. Fodder and water ample. Prices almost stationary.

HYDERABAD: No rain during the week. Harvesting of autumn crops continues. Sowing of spring crops in progress. Prices stationary.

Central India.—*For week ending 8th November.*—No rain fell in any part of Central India. The late monsoon appears to have been satisfactory in Central India. Autumn crops being reaped in Baghelkhand. Spring sowings commenced in Gwalior and in progress in other parts. Standing crops generally in good condition, except in Baghelkhand and Goona, where they have been slightly damaged by excessive rain and insects. Condition of agricultural stock good, except in parts of Goona. Pasturage good and sufficient. Prices falling in Gwalior and Bhopal; steady elsewhere. Sowing of opium commenced in the Neemuch district; prospects good.

Rajputana.—*For week ending 8th November.*—Spring operations in progress. Harvesting of autumn crops nearly completed. Harvest prospects and cattle generally good. Pasturage or fodder sufficient. Prices fluctuating in two States, and steady elsewhere.

Kashmir.—*For week ending 7th November.*—Report not received.

Nepal.—*For week ending 4th November.*—No rain. Weather fine. Harvesting of rice almost completed.

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

SUPPLEMENT TO

The Gazette of India.

No. 46.} CALCUTTA, SATURDAY, NOVEMBER 18, 1893.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 11th November.*—Rainfall very heavy in the Carnatic and adjoining parts of the Central and Deccan districts, heavy in the Circars and good in the rest of the Presidency. This fall has filled irrigation works and greatly improved prospects. Sowings continue widely. Standing crops generally promising. Harvest of early crop yielding fair to average outturn. Pasture abundant and cattle in good condition. Prices almost unaltered.

Bombay.—*For week ending 15th November.*—Slight rain in parts of the Deccan, Karnatak, and Konkan. More rain urgently required in parts of the Deccan. Standing crops withering for want of moisture or damaged by insects in parts of two districts; otherwise good. Preparations for the late crops and reaping of early crops progressing generally, except in two districts where sowing is retarded for want of rain. Prices steady, except in one district. Fodder sufficient. Agricultural stock good.

Bengal.—*For week ending 11th November.*—The weather throughout the week was cloudy, and light scattered showers fell in most parts of the province. General agricultural prospects continue favourable. Winter rice is ripening rapidly, and in some districts the harvest has begun. Some damage to winter rice by insects is reported from parts of Tippera, Faridpur, and Mymensingh. Sugarcane is generally a promising crop. Sowing of spring crops, poppy, and tobacco is well forward. The price of rice shown a downward tendency. Cattle are generally reported well, and the fodder supply is sufficient except in

parts of Mymensingh. In Faridpur 313 persons, including 101 men, 116 women and 96 children, received gratuitous relief during the week. Gratuitous relief is also being given in Backergunge.

North-Western Provinces and Oudh.—*For week ending 15th November.*—Light showers have fallen in a few southern and eastern districts and somewhat heavy rain in Benares, in other places the weather has been clear and bright. Harvesting of the autumn crops nearing completion. Sowings for spring crops germinating well. Picking of cotton and pressing of sugarcane continue. Poppy sowings commencing. Supplies and fodder abundant. Prices stationary.

Punjab.—*For week ending 15th November.*—No rain. Reaping and threshing of autumn crops nearly over. The outturn is reported below average in Dera Ismail Khan. Sowings of spring crops going on. Prospects of standing spring crops are generally good. Field rats have damaged gram shoots in parts of Umballa and autumn crops in parts of Lahore. Cattle in good condition. Fodder is sufficient in all districts, except in Shahpur and part of Mooltan. Prices falling in four districts; stationary elsewhere.

Central Provinces.—*For week ending 15th November.*—Cloudy weather has prevailed with general rain. Heavy falls have occurred in the Nerbudda Valley and Nagpur districts, and in the latter considerable damage has been caused to cotton and wheat. The young seedlings having rotted, it will be necessary to resow a considerable area. Little or no damage seems, however, to have resulted in the Chhattisgarh country and the northern districts, and the rain where of moderate quantity has apparently been on the whole beneficial.

Burma.—*For week ending 11th November.*—Very little rain fell in Lower Burma, except in Bassein. Early paddy is being reaped. The crop prospect on the whole is good, but standing crops in part of Kyaukphyu have been damaged by the late cyclone, and more rain is required in Amherst. There were light showers in the northern districts of Upper Burma, but no rain elsewhere. The planting out of the wet-weather rice crop has generally been finished. The cotton harvest in Sagaing and Myingyan is almost over. Standing crops for the most part promise well, but more rain is required in Shwebo and Yeu, while in Myingyan the paddy crop has in places been damaged by floods. The price of paddy has fallen in four districts and risen in three others.

Assam.—*For week ending 14th November.*—Weather seasonable. Prospects of crops generally good. Condition of cattle fair. Fodder and water abundant.

Mysore and Coorg.—*For week ending 15th November.*—MYSORE: Good rain in parts of two districts, slight elsewhere. Standing crops in good condition. *Ragi* (*Eleusine coracana*) harvested in five districts. No material change in prices. Prospects favourable.

COORG: Rainfall good. Rice crop thriving. Coffee and cardamom picking continues. Water and fodder for cattle sufficient. Prices stationary.

Berar and Hyderabad.—*For week ending 15th November.*—BERAR: Rainfall good. Weather cool and cloudy. Cotton and *jowar* (*sorghum vulgare*) crops slightly damaged by recent rains in Basim and Amraoti. Sowings in progress. Weeding operations continue in Akola. Fodder and water sufficient. Prices unchanged.

HYDERABAD: Rainfall moderate. Harvesting of autumn and irrigated crops in progress. Sowing of spring crops continues. The present rainfall it is feared will damage the crops. Prices stationary.

Central India.—*For week ending 15th November.*—Some rain fell during the week in Bhopal and Bundelkhand. Operations for the spring crops in progress in all parts. Condition of standing crops generally good, except in

Baghelkhand and Goona. Agricultural stock in good condition, except in parts of Goona. Pasturage good and sufficient. Prices of food-grains falling in Gwalior, Bhopal, and Goona; steady in other parts. Condition of opium in Neemuch good; sowing commenced in Bhopal.

Rajputana.—*For week ending 15th November.*—Moderate rain in part of Ulwar. Sowings of spring crops and reaping of autumn crops continue in parts. Harvest prospects, and cattle, generally good. Great damage has been done to autumn crops by rats in Marwar. Pasturage or fodder sufficient. Prices falling in three States, rising in one, and steady elsewhere.

Kashmir.—*For week ending 14th November.*—Weather fine. Spring crops mostly sown; sowings, however, still going on in some tahsils. Prices stationary.

Nepal.—*For week ending 11th November.*—Report not received.

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the week ending at 8 a.m. on Saturday, November 11th, 1893.

During the week under review the most important feature in the weather has been the cyclonic storm which affected the Coromandel Coast on the 5th and 6th of November. The storm occasioned high winds and heavy rain over the Madras Presidency on these dates, and the generally disturbed conditions which either resulted from or accompanied the cyclone subsequently extended over a large part of the country cloudy, overcast, and showery weather being reported from the Central and North-West Provinces and from parts of Bengal from the 7th to the 11th. Over North-West India, on the contrary, very fine quiet weather has prevailed, and there has been practically no rain there throughout the week. The weather has been cooler than usual throughout the whole country, but the departure from the normal has been less than might have been anticipated from the lowness of the day temperatures owing to the unusual warmth at night which has resulted from the cloudy state of the sky.

The chart of Sunday, the 5th, showed that barometric pressure was rising except over Madras where a more or less brisk fall was in progress. A cyclonic storm lay off the Coromandel Coast, the centre being as far as can be judged in about the latitude of Cuddalore. Pressure was high and uniform over Northern India, but gradients were rather steeper than usual over the Peninsula and the central parts of the country. Winds were fairly normal in direction, blowing from

between north and east in general, but around the small storm over the south-west of the Bay the directions were cyclonic. The force was fresh in the south. Rain was falling over the south, centre and east of the Peninsula, but elsewhere the weather was fine. Madras had received about 2¼ inches, and Nellore, Cuddalore, and Colombo about 1½ inch. On the morning of the 6th the chart showed that pressure had fallen two-tenths of an inch at Madras, and that the centre of the cyclonic storm lay between Cuddalore and Madras. Gradients were steep around the storm, and the cyclonic winds were blowing with the force of a gale. In other parts of the Indian region though the barometer was falling, the general conditions were generally little changed and the weather was fine except in Lower Bengal, where some showers were reported. Heavy rain had fallen over a large part of Madras, more particularly to the north of the storm centre. Madras had received 6·30 inches, Cuddalore 2·78 inches, Nellore 2·43 and inches, Masulipatam 2·37 inches. By the morning of the 7th the cyclonic storm had practically disappeared, though there existed a residual disturbance over the west of the Bay and east of the Peninsula. The barometer had, however, risen fast over the Carnatic, and the lowest pressures were reported from Malabar. Pressure remained high and uniform over Northern India The winds were very irregular over the south-east of the Peninsula, but were fairly normal in direction elsewhere. The force had fallen on the Madras Coast. Rain continued general and rather heavy over the east and centre of the Peninsula, and some showers were again reported from North-East India. Nellore reported 5·04 inches of rain, Madras 3·77 inches, and Vizagapatam 3·63 inches. On the 8th the pressure changes were comparatively unimportant and readings decreased from a high pressure area in the north to a low pressure area in the extreme south. The winds remained variable in Madras but blew from the normal directions elsewhere. Rain had extended to the Central and North-Western Provinces and continued over the east, centre, and south of the Peninsula. The heaviest amounts were 3·58 inches at Coimbatore, and 1·50 inches at Cuddalore. The chart of the 9th showed that pressure was rising except in North-East India, but the general distribution was not altered to any considerable extent, readings remaining highest in the extreme north and lowest in the extreme south. The winds were fairly normal. Rain was reported from the greater part of the Peninsula and of the Central and North-Western Provinces, and the amounts were larger again along the East Coast of the Peninsula. Masulipatam reported 7·90 inches, Coconada 4·33 inches, Gopalpur 3·75 inches, Nellore 3·35 inches, and Hoshangabad 2·80 inches. On the 10th the barometer was falling except in Bengal, the Peninsula, and Lower Burma, but the changes in the general distribution were unimportant. The winds also were practically unchanged. Rain had ceased in the North-Western Provinces, and was falling off in the Central Provinces, but in the east and south of the Peninsula it continued to fall more or less heavily. Cuddalore and Negapatam reported 3¾ inches, Tinnevelly 2¾ inches, and Coimbatore, Coconada and Colombo about 1½ inch. On the 11th pressure was changing slowly, and the only important alteration was the appearance of another depression off the Coromandel Coast. The winds were north-westerly at Madras and Cuddalore, but elsewhere the directions remained fairly normal. Rain continued to fall over the east and south of the Peninsula, and there were still some showers reported from the Central Provinces. Cuddalore reported 3·78 inches of rain, Nellore 3·00 inches, Colombo 2·10 inches, and several stations over 1 inch.

Temperature.—The following table shows the variations of the mean temperature from the normal on each day of the week for the different Provinces of India :—

Province.	November 1893.							Mean variation of week.
	5th.	6th.	7th.	8th.	9th.	10th.	11th.	
Burma	−1·1	−1·4	−1·6	−1·1	−0·6	+0·4	+1·0	−0·6
Bengal and Assam	+0·8	−0·4	−2·2	−0·5	−0·2	−1·0	−0 6	−0 6
North-Western Provinces and Oudh	−0·4	−1·7	−1·1	+0·6	−3 0	−1·6	−0·6	−1·1
Punjab	−0·3	−1·4	−1·4	−1·2	−0 9	−0·7	−0 9	−1·0
Bombay	−0·3	−1·0	−1·2	+0·9	−0·3	−0·1	+1·5	−0·1
Central Provinces and Berar	−2·3	−2·3	−1 0	−1·5	−5·0	−3·4	+0·1	−2·2
Central India and Guzerat	−0·8	−2·1	−2·9	−0 8	−3·8	−3·4	−1·3	−2·2
Sind and Rajputana	−0·8	−0·9	−1·6	−2·5	−1·3	−1·3	−1·1	−1·4
Madras	+0·3	−2·0	−2·7	−2·0	−0·6	−1·0	−1·3	−1·3
Mean for whole of India	−0·6	−1·5	−1·7	−0·9	−1·7	−1·3	−0·4	−1·2

On no day of the week was the mean temperature of the whole country above the normal. The coolest days were the 7th and 9th, when the abnormal deficiency was 1·7. In Bengal and Madras on the 5th, in the North-Western Provinces and Bombay on the 8th, in Burma on the 10th, and in Burma, Bombay and the Central Provinces on the 11th the mean temperature slightly exceeded the normal average, but with these exceptions, the heat was steadily less than usual.

Rain :—During the week under review the rainfall, as mentioned above, has been due to disturbed conditions which in a greater or less degree affected the whole country except the extreme north-west. These disturbed conditions were shown in the most intense form over the Carnatic, in a mild form over the Central Provinces and the west of the Peninsula, and in a very slight form over Bengal and the North-Western Provinces. Hence the table at the close of the summary shows that, while there has been no rain over the Punjab, Rajputana, Guzerat, Kathiawar, and Sind, there has been moderate rain over the west of the Peninsula, and the Central Provinces, and light rain elsewhere. Of the 52 rainfall divisions, fourteen have had absolutely no rain during the week, thirteen more have had an average actual rainfall per division of less than one-tenth of an inch for the week, while in the remaining twenty-five divisions the rainfall has been effective, ranging from 0·10 inch in Behar to as much as 9·51 inches in the East Coast (central). The third column of the table shows that the average actual fall of the week has been in large excess over the east and centre of the Peninsula, in moderate excess over Malabar and the Central Provinces, and in slight excess in the North-Western Provinces and Central Burma. In other parts of the country the rainfall has been generally less than the normal, but the deficiency has been slight and unimportant. The greatest absolute excess has been 7·96 inches in the East Coast (central) division.

The three concluding columns of the table show that since October the 15th the total rainfall for the period is generally in excess of the normal average except in the Punjab, Rajputana, Guzerat, Kathiawar and Sind, where throughout the whole month little or no rain has fallen.

The following gives the largest total amounts received as reported in the rainfall telegrams of the week :—

Division.	District.	Station.	Amount. Inches.
Central Burma . .	Thayetmyo . .	Linboungwe . .	9·02
North-Western Provinces	Mirzapur . .	Chakia . .	2·50

W. L. DALLAS,
Assistant Meteorological Reporter to the Government of India.

Simla, the 16th November, 1893.

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 18th November.*—Rainfall general; very heavy in the Carnatic, Godavari and Kistna districts, heavy in Cuddapah, Central and West Coast, good in Vizagapatam and southern districts. The fall of the last two weeks has greatly improved water-supply and prospects. Sowings proceeding vigorously. Standing crops thriving but have been affected slightly in places by excessive rain. Harvest of early crops continues with fair to average outturn. Pasture plentiful and cattle generally in good condition. Prices practically stationary, but dry grains slightly easier.

Bombay.—*For week ending 22nd November.*—Rain throughout the Presidency Proper and in one district of Sind. The rain has been generally beneficial to crops but more is still required in parts of the Deccan. Standing crops damaged by rust, rain or insects in seven districts, and withering for want of rain in parts of one district; otherwise good. Preparation for late and reaping of early crops progressing generally. Cotton-picking continues in three districts. Prices stationary except in two districts. Fodder sufficient. Agricultural stock good.

Bengal.—*For week ending 18th November.*—No rain fell during the week with the exception of a few unimportant showers in Orissa and the Darjeeling hills. The winter rice harvest is beginning and promises to yield an excellent outturn, except, as previously reported, in tracts which suffered from floods, and in the north of Tippera where mischief is still being caused by insects. Spring crops are still being sown. The earlier sowings are coming on well. Prospects of poppy are favourable, but in Darbhanga and Muzaffarpur the sowings are rather late owing to the presence of excessive moisture in the soil. Tobacco and sugarcane promise to be good crops. The price of rice is falling. Cattle are generally in good condition, but want of fodder is still reported from Tippera and the supply is not sufficient in parts of Backergunge and Mymensingh. The number of persons receiving gratuitous relief during the week were:—

Faridpur, 145, including 71 men, 39 women, and 35 children.

Backergunge, 3,108, including 249 men, 1,212 women, and 1,647 children.

North-Western Provinces and Oudh.—*For week ending 22nd November.*—Weather generally cloudy with light showers in most districts. Sowings for spring crops and poppy sowings germinating well. Harvesting of autumn crops still going on. Prospects favourable. Supplies and fodder ample. Prices stationary.

Punjab.—*For week ending 22nd November.*—No rain. Harvesting of autumn crops nearly over. Sowings of spring crops in progress. Standing crops are said to be in good condition. Outturn of the autumn crop is reported good. Spring crops have been injured by field rats in parts of Umballa and Lahore. Cattle are generally in good condition. Fodder sufficient in all districts, except in Shahpur where it is scarce. Prices rising in one district, falling in three districts, stationary elsewhere.

Central Provinces.—*For week ending 23rd November.*—Rain has fallen in the Northern Districts but apparently without prejudice to the prospects of the cold weather harvest. Rain has, however, caused damage to the *jowari* (*Sorghum vulgare*) and cotton corps in Nimar and in the Nagpur country and the outturn will not be as good as was lately anticipated.

Burma.—*For week ending 18th November.*—Early paddy is being reaped in Lower Burma where the crop prospect generally is good, but slight damage is reported from parts of Thongwa and Henzada, and more rain is still required in Amherst. There was light rain in ten districts of Upper Burma and none elsewhere. Reaping of early paddy and ploughing for cold-weather crops continue. Crop prospects in Upper Burma generally are good, but in Shwebo more rain is required and late paddy is withering, and in Minbu some paddy has been destroyed by floods. The price of paddy has fallen in three districts, but has risen in two.

Assam.—*For week ending 21st November.*—Weather dry and cool. Prospects of crops in general good. Condition of cattle normal. Fodder and water sufficient.

Mysore and Coorg.—*For week ending 22nd November.*—MYSORE.—Good rain in the civil and military station and in the Mysore district. Crops and prospects good. Outturn of crops harvested favourable. Prices risen slightly in one district.

Coorg.—*For week ending 22nd November.*—Slight rain. Rice crop thriving. Picking of coffee and cardamoms in progress. Prices stationary. Fodder and water sufficient for cattle.

Berar and Hyderabad.—*For week ending 22nd November.*—BERAR.—Slight rain. Weather cloudy and cool. Crops satisfactory, except *jowari* (*Sorghum vulgare*) which has been much damaged from recent rains. Sowings completed in Buldana and Akola. Weeding operations still continue in Akola. Fodder and water sufficient. Price of food-grains risen in Akola and fallen in Buldana.

Hyderabad.—*For week ending 22nd November.*—Rainfall during week 1 inch 75 cents; total from 1st January, 58 inches 79 cents. Harvesting of autumn and irrigated crops in progress. Sowing of spring crops continues. The present excessive rainfall, it is feared, will spoil the crops. Grass plentiful. Prices stationary.

Central India.—*For week ending 23rd November.*—Rain fell in nearly all parts of Central India during week. Agricultural operations in progress and nearly completed in Bhopal. Standing crops generally good, except in parts of Baghelkhand and Goona. Condition of agricultural stock good, except in Goona. Pasturage good and sufficient. Prices of food-grains falling in Gwalior, fluctuating in parts of Bhopawar, rising in Bhopal, steady elsewhere. Opium sowing in progress in Bhopawar.

Rajputana.—*For week ending 22nd November.*—Rainfall nearly 3¼ inches in Abu, 2½ in Jhallawar, over one inch in Sirohi and Jeypore, slight in other places. Sowings for the spring crops still continue. Reaping of autumn nearly completed. Winter rain wanted in Kerowlee. Harvest prospects and cattle generally good. Wheat crops damaged by recent rain in Sirohi and the autumn crops by rats in Marwar. Pasturage or fodder sufficient. Prices fluctuating in three States and steady elsewhere.

Kashmir.—*For week ending 21st November.*—Weather fine. Spring sowings still in progress in some places. Rain wanted. Prices slightly falling.

Nepal.—*For week ending 18th November.*—Weather sunny and clear.

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

RAILWAY STATISTICS.

STATEMENT OF APPROXIMATE GROSS EARNINGS OF INDIAN RAILWAYS FROM 1ST JULY TO 12TH NOVEMBER 1892, AND FROM 1ST JULY TO 11TH NOVEMBER 1893.

N.B.—As regards the figures in column *Total Receipts from 1st July 1893*, audited figures have been used as far as possible.

Railway.	Average earnings per mile per week during the 2nd-half of 1892.	Week ending 12th November 1892. Mean mileage worked.	Earnings. Total.	Earnings. Per mile open per week.	Week ending 11th November 1893. Mean mileage worked.	Earnings. Total.	Earnings. Per mile open per week.	Earnings from 1st July to 12th November 1892.	Earnings from 1st July to 11th November 1893.	Increases during the 2nd-half of 1893.	Decreases during the 2nd-half of 1893.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

HOME DEPARTMENT.

POSTING OF CIVIL SERVANTS WHO HAVE BEEN APPOINTED IN ENGLAND TO THE BENGAL PRESIDENCY.

No. $\frac{2\ \text{Establishments}}{622-652}$.

Extract from the Proceedings of the Government of India in the Home Department (Establishments),—under date Calcutta, the 30th November 1893.

RESOLUTION.

THE undermentioned gentlemen have recently been appointed in England to the Indian Civil Service (Bengal Presidency) in the order specified below:—

Mr. Hammett Reginald Clode Hailey, North-Western Provinces and Oudh, Punjab, and Central Provinces.
" William Stirling Hamilton, North-Western Provinces and Oudh, Punjab, and Central Provinces.
" Blanchard Foley, Lower Provinces.
" George Frederick Arnold, Burma.
" John Frederick Gruning, Lower Provinces.
" Robert Lucas Hyrapiet Clarke, North-Western Provinces and Oudh, Punjab, and Central Provinces.
" Wilfred Charles Geldart, North-Western Provinces and Oudh, Punjab, and Central Provinces.
" Kiran Chandra De, Lower Provinces.
" Joseph Ernest Goudge, North-Western Provinces and Oudh, Punjab, and Central Provinces.

Mr. Henry Telford Stoner Forrest, Lower Provinces.
„ Gerald Constantine Winnington Ingram, North-Western Provinces and Oudh, Punjab, and Central Provinces.
„ Hubert Digby Watson, North-Western Provinces and Oudh, Punjab, and Central Provinces.
„ Jnanendra Nath Gupta, Lower Provinces.
„ Robert Paget Dewhurst, North-Western Provinces and Oudh, Punjab, and Central Provinces.
„ Basil Copleston Allen, Lower Provinces.
„ Ernest Robert Worth Davidson, North-Western Provinces and Oudh, Punjab, and Central Provinces.
„ John Joseph Platel, Lower Provinces.
„ Thomas Cecil Edwards, North-Western Provinces and Oudh, Punjab, and Central Provinces.
„ William Nawton Maw, North-Western Provinces and Oudh, Punjab, and Central Provinces.
„ Arthur James Warburton Kitchin, North-Western Provinces and Oudh, Punjab, and Central Provinces.
„ William John Smyth, Burma.
„ Charles Ernest Low, North-Western Provinces and Oudh, Punjab, and Central Provinces.
„ Leycester Annand Grey Clarke, North-Western Provinces and Oudh, Punjab, and Central Provinces.

2. The Governor General in Council has been pleased to attach the above-mentioned gentlemen to the Province specified opposite each name, as follows:—

Mr. B. Foley „ J. F. Gruning „ K. C. De „ H. T. S. Forrest „ J. N. Gupta „ J. J. Platel	Bengal.
„ B. C. Allen	Assam.
„ H. R. C. Hailey „ R. L. H. Clarke „ J. E. Goudge „ G. C. W. Ingram „ R. P. Dewhurst „ E. R. W. Davidson „ T. C. Edwards	North-Western Provinces and Oudh.
„ W. S. Hamilton „ W. C Geldart „ H. D. Watson „ A. J. W. Kitchin	Punjab.
„ W. N. Maw „ C. E. Low „ L. A. G. Clarke	Central Provinces.
„ G. F. Arnold „ W. J. Smyth	Burma.

3. The Governor General in Council is further pleased to direct that the gentlemen posted to the Lower Provinces of Bengal shall, on arrival at Calcutta, report themselves to the Chief Secretary to the Government of Bengal. Should any of them land in Bombay, they should enquire of the Secretary to the Government of Bombay whether any orders are awaiting them from the Government of Bengal. The officer posted to Assam should report his arrival by telegraph from the port of arrival to the Secretary to the Chief Commissioner of that Province at Shillong, by whom he will be instructed to which portion of the Province to proceed. The officers posted to Burma should proceed to Rangoon and report themselves to the Chief Secretary to the Chief Commissioner of that Province.

4. The officers posted to the North-Western Provinces and Oudh should report themselves to the Chief Secretary to the Government of the North-Western Provinces and Oudh, Allahabad. The officers posted to the Punjab should telegraph from Bombay to the Chief Secretary to the Government of the Punjab, Lahore, for orders as to their destination, in the event of their not finding instructions awaiting their arrival at Bombay. The officers posted to the Central Provinces should report by telegraph from Bombay their arrival to the Secretary to the Chief Commissioner of those Provinces at Nagpur, by whom they will be instructed to which portion of the Province to proceed.

5. Local Governments and Administrations are requested to inform the Government of India of the date on which the gentlemen in question so report themselves. Should any officer attached to one of the Upper Provinces in India wish to exchange with an officer of his year attached to another of those Provinces, he is at liberty to do so; but he must report to the Government of India in the Home Department for previous sanction any arrangement of the kind he may be able to effect.

ORDER.—Ordered, that a copy of this Resolution be forwarded to the Governments of Bengal, the North-Western Provinces and Oudh, and the Punjab, and the Chief Commissioners of the Central Provinces, Burma, and Assam, for information and guidance, with the intimation that, in accordance with the decision of Her Majesty's Secretary of State for India, the gentlemen who have now been appointed will rank above those mentioned in Home Department Resolution No. $\frac{1 \text{ Establishment}}{533-563}$, dated the 17th October 1893. Also that the Resolution be published in the Supplement to the *Gazette of India*, and that a copy be forwarded to each of the gentlemen named therein.

(True Extract.)

C. J. LYALL,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the week ending at 8 a.m. on Saturday, November 18th, 1893.

It will be remembered that at the close of the last week an area of low pressure and of disturbed weather lay over the south-west of the Bay of Bengal. This area, so far as can be traced, passed across the south of the Peninsula and entered the Arabian Sea, where for some days there existed a large area of disturbed conditions which perhaps hardly reached the intensity of a cyclone. On the 15th, however, a brisk to rapid rise of the barometer occurred over the west of India, which was not improbably caused by the movement westward of the disturbance combined with the concentration of the disturbed conditions and the localisation of the barometric fall as the disturbed area developed into a well-defined cyclone. When this intensification occurred the storm commenced a northerly or north-easterly advance, and at the close of the week was threatening the Kathiawar Coast. The principal rainfall area was thus at first the whole of the south of the Peninsula, but as the week progressed rain worked up the west coast to Bombay and over the central parts of the country to the Central Provinces, and at the close of the week had extended to Kathiawar and Guzerat, wh it had more or less ceased over the south of the Peninsula. The mean temperature of the week was generally above the normal—a result due to the high temperatures experienced at night, the day temperatures having been almost throughout below the normal average.

On Sunday, November 12th, the chart showed that the barometer was generally falling except in North-Eastern India. A well-defined area of low pressure overlay the south-west of the Bay, while readings were also relatively low off the Malabar Coast. Pressure was highest in North-Western India. The winds were generally between north and east, but cyclonic movements were reported over the south-west of the Bay, while along the west coast the directions were rather variable. Rain was very general over the south, centre and east of the Peninsula, but elsewhere the weather was fine. Coconada had received 8½ inches, Rajahmundry 6 inches, Cuddalore 3 inches, and several stations over 1 inch. On the morning of the 13th the barometer was rising over a considerable part of North-Eastern India and along the east side of the Peninsula, while it was falling elsewhere, the fall being greatest along the West Coast of the Peninsula. Pressure was high over Northern India and low over the Arabian Sea off the west coast, the intervening gradients being moderately steep. The winds blew from between north and east almost everywhere. Rain was falling over nearly the whole of the Peninsula, but elsewhere the weather was fine. Coconada reported 6½ inches, Rajahmundry 3½ inches, and Vizagapatam 1¾ inches. The chart of the morning of the 14th showed much the same general conditions as those prevailing on the 13th, only that the low pressure area off the west coast was better defined. The winds had become southerly in Malabar, but elsewhere the directions remained between north and east. The force was fresh at several western stations. Rain still fell over nearly the whole of the Peninsula, and the fall had extended northward into the Central Provinces. The heaviest amounts reported were 2·86 inches at Belgaum, 2·50 inches at Masulipatam, and over

1 inch at several stations. On the morning of the 15th pressure was increasing over the Peninsula, the Central Provinces, and the whole of North-Eastern India, and was falling over North-Western India. The low pressure area off the West Coast was apparently moving northward. It was still a well-defined depression and occasioned a well marked indraught of winds towards its centre. Gradients were steep over Guzerat and the winds fresh or strong over the Peninsula and along the Sind and Kathiawar Coasts. Rain was still falling over the greater part of the Peninsula and over the Central Provinces. Madras reported 2·85 inches, Goa 2·80 inches, and several stations over 1 inch. On the morning of the 16th pressure was rising everywhere, the rise being brisk over a large part of the country and rapid along the West Coast. The general distribution of pressure was unchanged, except that gradients were slighter. The winds were easterly and south-easterly over the Peninsula and north-easterly to easterly elsewhere. The force was fresh on the West Coast and Verawal reported a gale. Rain was almost wholly confined to the west and south of the Peninsula, and the amounts were generally moderate. On Friday, 17th, the barometer was generally changing by small amounts, but was falling except in Guzerat. The wind was variable along the West Coast, but was otherwise little changed in direction. Rain was falling in small amounts over Guzerat and parts of the Peninsula. On Saturday the barometer was falling everywhere, but the changes were generally greater in the north than in the south, and gradients were hence becoming slighter. The winds were generally between north and east, and the only rainfall was a few showers over Guzerat and the Peninsula.

Temperature.—The following table shows the variations of the mean temperature from the normal on each day of the week for the different Provinces of India:—

Province.	November 1893.							Mean variation of week.
	12th.	13th.	14th.	15th.	16th.	17th.	18th.	
Burma	+1·4	+1·1	+0·9	−0·2	−1·0	−1·5	−1·3	−0·1
Bengal and Assam	+0·8	+0·4	+0 7	−0·1	+0·3	−0·2	−0 2	+0 2
North-Western Provinces and Oudh	−1·0	−0 9	−0·6	−0·8	−0·3	−0·3	+1·1	−0·4
Punjab	−0·7	+0·4	+0·2	+1 0	+1·5	+0·6	0	+0·4
Bombay	+1·2	+1·6	+1·7	+2·0	+1·7	+2·4	+3·0	+1·9
Central Provinces and Berar	+2·2	+3·2	+3·0	+2 6	+2·9	+3·2	+3·3	+2·9
Central India and Guzerat	+0·3	+1·1	+0·9	−1·6	+3·1	+2·1	+1·9	+1·1
Sind and Rajputana	−1·2	−0·9	−0·1	+0·3	+1·0	+2·8	+0·4	+0·3
Madras	−2·6	−1·8	−0·3	+0·4	+0·4	+1·4	+2·0	−0·1
MEAN FOR WHOLE OF INDIA	0	+0 5	+0·7	+0·4	+1 1	+1·2	+1·1	+0 7

On the 12th the general temperature of India was exactly normal, on the 13th there was an excess of ½°, and this condition continued until the 16th, when the mean of the whole country rose to 1° above the normal average and so continued till the close of the week. The mean temperature for the whole week for the whole country was 0°·7 above the normal. The provincial variations show that the weather relatively to the average was warmest over Bombay and the Central Provinces where the excess varied between 1°·9 and 2°·9. Almost the whole of the excess was attributable to the very high temperatures recorded at night. Owing to the disturbed state of the weather the sky was more or less cloudy throughout. This condition resulted in relatively low temperatures

during the day, but at night, when the ordinary radiation was interrupted, the temperature remained high and greatly exceeded the normal.

Rain.—The rainfall table at the close of the summary shows that during the week rain has been received over a large part of the country. In Tenasserim, in all the Bengal, Assam, the North-Western Provinces and Punjab divisions, in the Central Provinces (east), in Sind, in Central India, and in Rajputana there has been actually or practically no rain throughout the week, but in all other parts of India effective rainfall is reported. The respective number of divisions is twenty-two, in which the average actual rainfall has been effective, and thirty in which there has been actually or practically no rain. The actual average rainfall ranges from 6·44 inches in the East Coast (central), 4·15 inches in Madras (south-central), 3·67 inches in the East Coast (north), and 3·64 inches in the East Coast (south) to 0·10 inch in the East Coast (north *a*). Over a very large part of the country the average normal rainfall of the present week is exceedingly small, and over West Bengal and the North-Western Provinces is absolutely *nil*; hence the absence of rain over Upper India as shown by the column of actual average rainfall, is of no importance. The third column of the table shows that in Central Burma, Arakan, in all the divisions of the Peninsula, in the Central Provinces divisions, in Guzerat, in Kathiawar and in Central India (west), the rainfall has been in excess of the normal. In all the other divisions there has been either a deficiency or no departure from the normal. The greatest actual excess is in the East Coast (central) division, where the normal average rainfall is only 0·95 inch and where the actual rainfall was 6·44 inches, showing an excess of 5·49 inches. In all the Peninsular divisions the excess is considerable, generally varying between 1 inch and 3 inches.

The three concluding columns of the table show that the rainfall of the past month has been very generally excessive. In most parts of the country the anticipated amounts are small, but over the Peninsula the fall is usually fairly heavy, and is hence of great importance. In this region the fall has been considerably above the average.

The following gives the largest total amounts received during the week as reported in the rainfall telegrams of the week :—

Division.	District.	Station.	Amount, Inches.
Malabar	Travancore	Alleppy	6·30
Do.	S. Kanara	Bantwal	6·67
Madras	Coimbatore	Satyamangalam	8·60
Konkan	N. Kanara	Supa	7·32
Deccan	Belgaum	Sudder	4·81
East Coast	Godavery	Coringa	18·32
Do.	Nellore	Kavali	19·43
Do.	Chingleput	Uttaramery	9·30

Provinces.	Division.	Rainfall data for week ending November 18th, 1893.			Rainfall data from October 15th to November 18th, 1893.		
		Average actual rainfall of Division.	Average normal rainfall of Division.	Excess or defect in inches.	Average actual rainfall of season to date.	Average normal rainfall, Oct. 15th to November 18th.	Excess or defect of (seasonal) rainfall expressed as a percentage.

W. L. DALLAS,
Assistant Meteorological Reporter to the Government of India.

Simla, the 23rd November, 1893.

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 25th November.*—Rainfall again heavy in parts of the Carnatic, Central and Southern districts, and moderate in the remainder and on West Coast. Little or no rain in the Deccan and Circars. Excessive rain has done some damage in Trichinopoly and Tanjore. Tanks nearly all full and irrigation supplies ample. Sowings going on rapidly, especially in the more southerly districts. Standing crops generally flourishing, though in parts excessive rain of late has done some damage. Harvest of the early crop is yielding about the average. Pasturage abundant, and stock in good condition. Prices fluctuating very slightly, but a little easier in the Central districts.

Bombay.—*For week ending 29th November.*—Rain throughout the Presidency, generally slight; more rain urgently required in parts of the Deccan. Standing crops withering for want of moisture or damaged by rain in parts of eight districts; otherwise good. Sowing of late crops progressing in ten, and reaping of early crops in twelve, districts. Cotton-picking continues in two districts. Prices steady except in two districts. Fodder sufficient. Agricultural stock good.

Bengal.—*For week ending 25th November.*—There were slight showers of rain during the week in Bihar and in East and North Bengal. Except in the north of Tipperah, where insects are still reported to be doing much damage, standing crops are doing well. Harvesting of early rice has begun. Spring crops and poppy are being sown, and earlier sowings are doing well. The price of common rice generally shows a tendency to fall. In some districts the new crop is coming into the market. Cattle are generally reported to be in good condition. Insufficiency of fodder-supply is still reported from places in Backergunge and Mymensingh, but the supply is improving in Tipperah. The numbers gratuitously relieved during the week were:—*Faridpur*—Men 35, women 11, and children 24, total 70 (exclusive of figures for Gopalganj circle not received); *Backergunge*—Men 196, women 664, and children 795, total 1,655 against 3,108 in the previous week.

North-Western Provinces and Oudh.—*For week ending 29th November.*—Light showers have been fairly general. Harvesting of autumn crops nearly finished. Sowings for spring crops approaching completion, seed germinating well. Sugarcane-pressing commenced in places. Supplies and fodder ample. Prices stationary.

Punjab.—*For week ending 29th November.*—Slight rain in parts of Delhi and Umballa. Harvesting of autumn crops nearly over. Sugarcane being pressed and cotton picked. Sowings of spring crops going on. Condition of standing crops is reported good in all districts, except Rawalpindi and parts of Lahore where it is said to be average. Field rats have damaged the young crops in parts of Umballa and Lahore. Cattle are generally in good condition. Fodder sufficient in all districts, except Shahpur where it is scarce. Prices falling in three districts; stationary elsewhere.

Central Provinces.—*For week ending 29th November.*—Weather cloudy and warm with slight falls of rain in four of the Northern districts. Some damage has been done to *tur* (*cajanus flavus*) in the Nagpur country by the cloudy weather and by insects. Harvesting of autumn crops in progress. Sowings for winter crops continue. Fodder sufficient. Prices steady.

Burma.—*For week ending 25th November.*—Rain fell in four districts of Upper Burma, in the Northern Shan States, and Akyab. Reaping of early paddy progressing in Lower Burma, where crop prospects continue good, except in three districts where slight damage is reported. In Upper Burma crop prospects are very encouraging, but in Shwebo want of rain is generally felt. Reaping of early paddy and ploughing for cold-weather crops continue. The price of paddy has risen slightly in Prome, but has fallen largely in Tharrawaddy and the Northern Shan States, considerably in Katha, Shwebo, and Thayetmyo and slightly in Magwe and Meiktila.

Assam.—*For week ending 28th November.*—Weather seasonable. Harvesting of winter paddy begun. Condition of cattle fair. Fodder and water sufficient.

Mysore and Coorg.—*For week ending 29th November.*—MYSORE: Rainfall general in three districts. Standing crops in good condition. *Ragi* (*Eleusine coracana*) harvested in parts. Prices fallen in two districts.

COORG: Rainfall moderate. Rice crop in good condition. Coffee-picking continues, and picking of cardamoms completed. Fodder and water sufficient for cattle. Prices stationary.

Berar and Hyderabad.—*For week ending 29th November.*—BERAR: Rainfall good. Weather warm at Akola and cool elsewhere. Crops in fairly good condition. Damage has been caused by recent rain in parts of Buldana and Akola. Picking of cotton in progress. Sowings completed in Amraoti. Weeding operations in Akola not yet finished. Sufficiency of fodder and water continues. Prices risen in one taluka only. Cattle generally healthy.

HYDERABAD: No rain during the week. Harvesting of autumn and irrigated crops in progress. Sowing of spring crops continues. Prices stationary.

Central India.—*For week ending 29th November.*—Slight rain has fallen in most parts of Central India during the week. Autumn harvesting continues in Baghelkhand and Bhopawar. Spring sowings nearly completed in Bundelkhand, in progress in other parts. Crops in good condition in all parts, except in Baghelkhand and Goona where they have been slightly damaged by rain and insects. Condition of agricultural stock and pasturage good. Prices of foodgrains falling in Gwalior; steady in other parts. Opium sowing almost completed in Bhopawar. The condition of the crop in the Neemuch district is indifferent.

Rajputana.—*For week ending 29th November.*—Rainfall fairly general and heavy in some parts. Agricultural operations and standing crops satisfactory, except in Meywar where spring sowings are delayed by late rains. Harvest prospects and cattle generally good. Pasturage and fodder sufficient except in part of Kotah. Prices falling in two States, rising and fluctuating in one, and steady elsewhere.

Kashmir.—*For week ending 28th November.*—Weather fine. Spring sowings going on in some places. Prices falling.

Nepal.—*For week ending 25th November.*—Weather seasonable. Mornings cold and foggy.

E. C. BUCK,

Secretary to the Government of India.

ANNUAL REPORT ON THE OPERATIONS OF THE POSTAL LIFE INSURANCE AND MONTHLY ALLOWANCE SCHEMES FOR THE YEAR 1892-93.

No. 5150-P., dated Calcutta, the 30th November, 1893.

ORDER—By the Government of India, Finance and Commerce Department.

READ—

Letter from the Director General of the Post Office of India, No. 9840, dated 3rd November, 1893, and enclosures

ORDER.—Ordered that these papers be published in the Supplement to the *Gazette of India* for general information.

J. F. FINLAY,
Secretary to the Government of India.

POST OFFICE.

No. 9840, dated Calcutta, the 3rd November, 1893.

From—The Director General of the Post Office of India,

To—The Secretary to the Government of India, Finance and Commerce Department.

I have the honour to submit the Annual Report on the operations of the Postal Life Insurance and Monthly Allowance schemes for the year 1892-93.

2. During the year, 233 new policies were granted of the aggregate value of ₹3,56,600, against 157 policies issued in the previous year for sums amounting in all to ₹2,21,000, and seven applications for Life Insurance were refused on account of unfavourable medical reports on the lives of the persons who applied for insurance. Of the 233 persons who insured their lives, 68 were servants of the Telegraph Department, and the total value of the policies issued in their favour amounted to ₹1,60,000. The remaining 165 persons were Post Office servants, and the aggregate value of their policies was ₹1,96,600. Compared with the results of the previous year, there was an increase of 49 in the number, and of ₹60,700 in the value of new policies issued in favour of Post Office servants, and an increase of 27 in the number, and of ₹74,900 in the value of new policies issued in favour of servants of the Telegraph Department.

3. The total sum realized on account of premia on both old and new policies amounted during the year to ₹73,556, as compared with ₹65,058 in the previous year; claims to the extent of ₹17,417 were discharged as compared with payments amounting to ₹14,398 during the preceding year, and 12 policies representing a gross assurance of ₹15,000, either lapsed, or were surrendered or cancelled. The general results of the past two years are summarised in the table below :—

LIFE INSURANCE.	Up to 31st March 1892.	Up to 31st March 1893.
Number of lives insured	1,546	1,779
Amount received in premia	₹ 3,17,573	₹ 3,91,130
" of insurance	21,14,025	24,70,625
" of claims met	82,395	99,813

4. The active policies existing on 31st March 1893 numbered 1,535, representing an aggregate assurance of R21,71,100 as detailed below:—

		R
1 for		700 effected by a single payment of premium.
523	,,	7,69,450 effected by payment of monthly premia up to the age of 50.
533	,,	7,24,150 effected by payment of monthly premia up to the age of 55.
478	,,	6,76,800 effected by payment of monthly premia during life.
TOTAL . 1,535	,,	21,71,100

5. In this year also no insurance was effected by a single payment. Of the 233 policies actually issued, 171 represented a total insurance of R2,69,950 by payment of premia during a fixed period, of which 130 were held by Natives of India and 32 by Europeans or Eurasians; while 62 policies represented a total insurance of R86,650 by payment of premia during life, of which 55 were in favour of Natives of India and 7 in favour of Europeans or Eurasians. The 165 policies taken out by servants of the Post Office may be classified territorially as below:—

73	issued in Lower Bengal and Assam.
31	issued in the Madras Postal Circle.
12	,, ,, Bombay ,, ,,
49	,, in other Postal Circles.
165	

All the 73 policies shown under the head of Lower Bengal and Assam were actually taken out in the Lower Provinces, where the scheme seems to be increasingly popular.

6. The following statement shows the distribution of Life Insurance policies among the various grades of Post Office officials:—

GRADE IN POST OFFICE.	Number of officials on 31st March 1893.	NUMBER OF LIFE INSURANCE POLICIES HELD.		Percentage of lives insured.
		On the 31st March 1892	On the 31st March 1893.	
Superintendents and Inspectors . .	395	97	99	25·06
Postmasters, Sub-Postmasters and Branch Postmasters	4,986	307	334	6·70
Schoolmasters and other extraneous Agents	3,932	5	5	·12
Clerks	6,740	521	616	9·14
Postmen and Village Postmen .	17,141	94	103	60
Road Establishment	12,477	21	26	·20
Signallers, Clerks and other servants of combined offices	1,162	66	74	6·36
TOTAL .	46,833	1,111*	1,257†	2·68

* Exclusive of 213 policies held by servants of the Telegraph Department.
† Ditto 278 ditto ditto.

Out of a total of 46,833 servants of all grades of the Department, 1,257 persons, or 2·6 per cent. had insured their lives on the 31st March 1893, and it will be observed that, as in previous years, the percentage was highest in the grade of supervising officers.

7. The progress in the direction of monthly allowances during the year has been insignificant; only one new contract of this character was entered into, by which a deferred monthly allowance of R5 was secured by payment of monthly subscriptions. One contract for R50 lapsed by the death of the holder before payment commenced, so that at the close of the year there were in existence six monthly allowance contracts representing a total monthly payment of R83-8.

8. The following figures exhibit the financial results of both schemes:—

10. Although not specially provided for in the departmental rules which have recently undergone revision, under Article 867 of the Civil Service Regulations, the Trustees, Committee, or Managers of any Local Fund are competent, on certain conditions, to purchase from the Life Assurance Branch of the Post Office a pension or annuity for any of their servants for whom such pension or annuity is not otherwise admissible; and during the year under review, with the sanction of the Punjab Government, a life annuity of ₹40 per month, to have effect from the 16th June 1891, was purchased by the District Board of Gujrat in favour of an overseer who had been in their service.

11. The appendices which usually accompany this report are attached.

Statement showing the operation of the Scheme of Life Insurance and Monthly Allowance during the years 1891-92 and 1892-93.

SUPPLEMENT TO

The Gazette of India.

No. 49.} CALCUTTA, SATURDAY, DECEMBER 9, 1893.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the week ending at 8 a.m. on Saturday, November 25th, 1893.

The more or less unsettled weather, which has prevailed over a considerable part of the Indian region during the past two or three weeks, has largely passed away during the week under review. The cyclonic storm which was threatening the Kathiawar coast at the close of last week struck the coast near Verawal on Monday morning. After reaching land the depression quickly filled up, but the disturbed conditions of weather which accompanied the storm spread out over the greater part of Northern and Central India, and cloudy skies and showers of rain were very general over those regions. On Friday these disturbed conditions were disappearing, and on that and the following day the weather was generally fine over the north and centre. Over the Peninsula comparatively little rain fell between the 19th and 21st, *i.e.*, while the cyclone was in active existence, but on the 22nd, when pressure conditions were becoming more normal, northerly and north-easterly winds re-appeared over the Carnatic, heavy rain set in and continued till the close of the week. The mean temperature of the week was generally above the normal, the mean for the whole of India for the whole week being nearly a degree above the normal average.

On the morning of Sunday, 19th November, the barometer was falling except over North-East India. In Kathiawar and Guzerat the fall was brisk and a cyclonic storm was advancing towards the Kathiawar coast. The winds over a considerable part of Western and North-Western India were influenced by the approaching storm and exhibited an indraught towards it, but over North-Eastern and Eastern India the normal north and north-eastern directions were maintained. Light to moderate rain was falling over Western India, and one or two showers were reported from Burma and Bengal. The chart of the 20th showed that the cyclonic storm was close to Verawal where the barometer had fallen 0·20″. The barometer was falling all over Guzerat and the west of the Peninsula, but was rising elsewhere. Cyclonic winds and gales prevailed in the neighbourhood of the storm, while variable winds were reported from North-West India and northerly winds from the Bay area. There was no rain over the Punjab, North-East India or the Bay area, but elsewhere rain was general. Verawal and Indore reported over 2 inches, Mount Abu, Ajmere, and Jeypore over 1 inch. On the 21st the barometer was falling over North-East India and rising elsewhere. Over part of North-West India the rise had been brisk and the cyclonic storm had largely filled up. The winds were generally similar to those reported on the 20th, but the force had decreased over the cyclonic region. There was very little rain over the Punjab, North-East India or the Peninsula, but in the North-Western Provinces, Rajputana, Central India, and Guzerat the fall was fairly general. In several places the fall exceeded ½ inch and at Cuttack and Neemuch equalled 1 inch. On the 22nd the barometer was falling over the Punjab, Rajputana, the west of the North-Western Provinces, and the south of the Peninsula and was rising elsewhere. The change had again been brisk over Guzerat and the cyclonic storm was almost filled up. Pressure was now high in North-West and North-East India and lowest over the south of the Bay, so that the normal distribution was almost restored, and the winds blew from about the usual directions generally, Rain still fell over the North-West and Central Provinces, Rajputana and Guzerat, but the principal rainfall area was again re-established over the South Carnatic where amounts of between 1 and 2 inches were reported. On the morning of the 23rd the cyclonic storm had wholly disappeared. The barometer was rising over North-West India but falling elsewhere. The general distribution of pressure was fairly normal, readings decreasing from the north southward. The wind directions were also normal. Rain continued to fall over the same regions as those given yesterday, but the fall over the Carnatic had increased. Trichinopoly and Negapatam had received over 6 inches, Cuddalore over 4, and Nellore and Cuddapah about 2 inches. On the 24th the barometric changes were small, and both the pressure distribution and the wind directions were practically unchanged. Rain was again general over the south of the Peninsula, and a few showers were reported from other parts of the country. In the south of the Peninsula the rain had fallen lighter, the heaviest amounts reported being 2 inches at Wellington and 1 inch at Tennevelly and Trichinopoly. The chart of the 25th showed that again, only slight changes had occurred in pressure, and that the general distribution, as well as the circulation of the winds, was little altered. Rain was still falling in the Carnatic, but elsewhere the weather was fine. The heaviest amount reported was 2 inches at Cuddalore.

Temperature.—The following table shows the variations of the mean temperature from the normal on each day of the week for the different Provinces of India :—

Province.	November 1893.							Mean variation of week.
	19th.	20th.	21st.	22nd.	23rd.	24th.	25th.	
	°	°	°	°	°	°	°	°
Burma	—1·2	—1·9	—2·7	—2·0	—1·1	—0·2	—0·1	—1·3
Bengal and Assam . .	—0·3	+0·5	+2·0	+2·0	+2·0	+2·9	+2·4	+1·6
North-Western Provinces and Oudh	+1·4	+1·6	—4·4	—0·9	+1·5	+3·3	+2·5	+0·7
Punjab	—0·7	—0·6	—0·9	—1·8	+0·1	+0·2	+0·3	—0·5
Bombay	+1·9	+2·5	+2·2	+1·1	+1·2	+2·1	+2·9	+2·0
Central Provinces and Berar	+4·1	+4·6	+3·8	+6·5	+7·0	+7·0	+6·9	+5·7
Central India and Guzerat .	+3·3	+1·7	—3·7	—0·8	+0·5	+1·2	+2·8	+0·7
Sind and Rajputana . .	+3·9	—0·4	—4·2	—2·1	—2·0	—0·6	—0·3	—0·8
Madras	+1·6	+0·9	+0·3	+0·7	—1·0	—1·3	+0·7	+0·3
Mean for whole of India	+1·6	+1·0	—0·8	+0·3	+0·9	+1·6	+2·0	+0·9

On all the days of the week except the 21st the mean temperature of the whole of India was excessive, the excess being as much as 2° on the 25th and only 0°·3 on the 22nd. The provincial variations show that on the mean of the week the temperature was lower than usual in Burma, the Punjab, Sind, and Rajputana and higher than usual in the other provinces. The abnormal excess was greatest in the Central Provinces where it amounted to 5½°. As was the case last week, most of this abnormal excess of temperature was attributable to exceedingly warm nights, the day readings of the thermometer having been generally below the average.

Rain.—The rainfall table at the close shows that during the week there has been fairly general but light rainfall. In thirteen of the rainfall divisions there has been absolutely no rainfall, and in fourteen more an average actual fall of less than one-tenth of an inch, while in twenty-five there has been an average fall of over one-tenth. The heaviest rainfall occurred over the Carnatic where the average actual fall for the East Coast (south) was 4·74 inches, for Madras (south-central) 2·61 inches, and for Madras (south) 1·65 inch, but over Guzerat, Sind, Kathiawar, Central Provinces, and Rajputana, where the weather was affected by the cyclonic storm, the amounts were also considerable. The regions which received absolutely no rain include the following divisions, *viz.*, Tenasserim, Lower Burma, Deltaic and Central Bengal, Orissa, Oudh (north), the Punjab, south, Hill districts, north-west, and west, the Central Provinces, east, the East Coast, north, *a*, and Hyderabad, south. The third column of the table shows that the total average actual rainfall has exceeded the normal average in twenty-eight divisions. In most cases this excess has been small and of relatively little importance, but in Madras, south central, the excess equalled 2 inches, in the East Coast, south, 3 inches, and in Central India and Rajputana 1 inch. The three concluding columns of the table show that for the whole period from October 15th to date the total rainfall has been heavier than usual over a very large part of the country. In Tenasserim and Lower Burma, in the Punjab divisions, and in parts of the centre of the Peninsula, the rainfall has been deficient, but in almost all other parts it has equalled or exceeded the normal. In the Carnatic where the rainfall of this season is so important, the fall has been largely above the normal average.

The following gives the largest total amounts received during the week as reported in the rainfall telegrams :—

Division.	District.	Station.	Amount. Inches.
Malabar	Calicut	Manjeri	3·34
Madras (S. C.)	Coimbatore	Aranakurchi	6·33
Khandesh	Dhulia	Nardurbar	2·88
Central Provinces	Saugor	Banda	2·46
Guzerat	Ahmedabad	Gogha	3·10
Central India	Bhopal	Sudder	3·49
East Coast	Trichinopoly	Pudukota	16·40

Province.	Division.	Rainfall data for week ending November 25th, 1893. Average actual rainfall of Division.	Average normal rainfall of Division.	Excess or defect in inches.	Rainfall data from October 15th, to November 25th, 1893. Average actual rainfall of season to date.	Average normal rainfall. October 15th to November 25th. W. L. DALLAS,
Assistant Meteorological Reporter to the Government of India.

Simla, the 30th November, 1893.

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 2nd December.*—Rainfall good in the Southern districts, light in the Carnatic and Central districts and on the West Coast; no rain elsewhere. The rainfall up to date exceeds the normal average in most districts. Water-supply ample and tanks nearly all full. Agricultural operations are being vigorously pushed on. Standing crops generally thriving, but affected in parts by the excessive rain of the previous two weeks. Harvests of early sown crops being gathered with fair to average outturn. Pasturage ample and cattle in good condition. Prices slightly falling in many districts.

Bombay.—*For week ending 6th December.*—Slight rain in parts of Sind and Gujarat, more rain required in parts of the Deccan. Standing crops withering for want of moisture or damaged by rain, insects or blight in parts of four districts; otherwise good. Sowing of late crops progressing in twelve, and reaping of early crops in thirteen, districts. Cotton-picking continues in three districts. Prices steady except in two districts. Fodder sufficient, and agricultural stock good.

Bengal.—*For week ending 2nd December.*—There was slight rain in Jalpaiguri and Darjeeling on the 29th and 30th November, otherwise the weather during the week was fine and dry. The rice harvest is in progress, and a satisfactory outturn is generally expected. In parts of Tippera the crop is still suffering from insects. Spring and poppy sowings are nearly completed, and are coming on well. Sugarcane is a promising crop. Tobacco prospects are favourable. The price of rice is falling. Cattle are in good condition, and the fodder-supply is sufficient except in parts of the Kishorganj Subdivision of Mymensingh. The number of persons receiving gratuitous relief during the week were as follows:—*Faridpur* (*Madaripur Sub-division*):—Men 44, women 92, and children 46, total 182; *Backergunge* (*Sadar and Pirojpur Sub-divisions*):—Men 350, women 1,300, and children 1,705, total 3,355, against 1,655 and 3,108 in the two previous weeks.

North-Western Provinces and Oudh.—*For week ending 6th December.*—Weather seasonable. Poppy sowings almost finished, the seed has germinated well. Irrigation of spring crops commenced. Paddy being cut in places. Sugarcane-pressing and cotton-picking in progress. Prospects good. Supplies and fodder plentiful. Prices fairly steady.

Punjab.—*For week ending 6th December.*—No rain. Harvesting of the autumn crops nearly over. Sugarcane being pressed. Sowings of spring crops still continue in some districts. Condition of standing crops good, except in Rawalpindi and parts of the Lahore district where it is said to be average. Rain wanted in some districts. Field rats have damaged the young crops in part of Umballa and Lahore. Cattle are generally in good condition. Fodder sufficient in all districts, except Shahpur where it is scarce. Prices falling in five districts, unsettled in one; stationary elsewhere.

Central Provinces.—*For week ending 6th December.*—Weather generally clear and cool. Harvesting of autumn crops and sowings for winter crops approaching completion. Cattle in good condition. Fodder sufficient. Prices stationary.

Burma.—*For week ending 2nd December.*—Reaping of early paddy generally completed, and reaping of main crop commenced in several districts of Lower Burma. Crop prospects good both in Lower and Upper Burma, but some increase to the damaged area in Amherst is reported, as the rainfall of the previous week was mostly confined to the Upper Burma districts. Shwebo still requires heavier showers. Reaping of wet-weather paddy and ploughing for cold-weather crops continue. The price of paddy is reported to have risen very largely in Sandoway, but it has fallen considerably in Rangoon, Prome, Mandalay, and Lower Chindwin; the fluctuations elsewhere in the price of paddy are slight and unimportant.

Assam.—*For week ending 5th December.*—Weather seasonable. Reaping of late rice continues. Condition of cattle good. Fodder and water sufficient.

Mysore and Coorg.—*For week ending 6th December.*—MYSORE: Crops and prospects good. *Ragi* (*Eleusine coracana*) harvested in seven districts. Prices fallen in one district.

COORG: No rain. Standing crops in good condition. Coffee-picking continues. Slight rise in prices. Water and fodder for cattle sufficient.

Berar and Hyderabad.—*For week ending 6th December.*—BERAR: Slight rain in Melghat. Weather cool. Picking of cotton and cutting of *jowari* (*Sorghum vulgare*) in progress; *tur* (*Cajanus indicus*) in pod in Wun. Sowings continue in three districts. Weeding operations in Akola still progressing. Fodder and water sufficient and prices steady.

HYDERABAD: No rain during the week. Harvesting of irrigated crops continues. Prices stationary.

Central India.—*For week ending 6th December.*—Rain fell during the week in the Bhopawar and Baghelkhand Agencies. Autumn harvesting in progress in Baghelkhand, completed in Bhopawar. Spring operations in progress in all parts. Sowings almost finished in Bundelkhand. Crops in good condition except in Baghelkhand and Goona. Agricultural stock and pasturage generally in good condition. Prices of food-grains slightly risen in part of Bhopawar; steady in other parts of Central India. Opium sowing almost completed in Bhopawar, plants germinating. The condition of the crop in Neemuch is indifferent.

Rajputana.—*For week ending 6th December.*—Slight rain in parts of Bikaneer. Agricultural operations, standing crops, and cattle generally satisfactory. Harvest prospects generally good. Pasturage or fodder sufficient. Prices falling in two States and steady elsewhere.

Kashmir.—*For week ending 5th December.*—Weather fine. Spring sowings still going on. Prices falling.

Nepal.—*For week ending 2nd December.*—Weather cold. Prospects normal.

E. C. BUCK,

Secretary to the Government of India.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

RAILWAY STATISTICS.

STATEMENT OF APPROXIMATE GROSS EARNINGS OF INDIAN RAILWAYS FROM 1ST JULY TO 26TH NOVEMBER 1892, AND FROM 1ST JULY TO 25TH NOVEMBER 1893.

N.B.—As regards the figures in column *Total Receipts from 1st July 1893*, audited figures have been used as far as possible.

RAILWAY.	Average earnings per mile per week during the 2nd-half of 1892.	Week ending 26th November 1892. Mean mileage worked.	Earnings. Total.	Per mile open per week.	Week ending 25th November 1893. Mean mileage worked.	Earnings. Total.	Per mile open per week.	Earnings from 1st July to 26th November 1892.	Earnings from 1st July to 25th November 1893.	Increases during the 2nd-half of 1893.	Decreases during the 2nd-half of 1893.

SUPPLEMENT TO

The Gazette of India.

No. 50.} CALCUTTA, SATURDAY, DECEMBER 16, 1893.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weather Review of India for the week ending at 8 a.m. on Saturday, December 2nd, 1893.

During the week under review anti-cyclonic conditions of pressure and winds have prevailed over the greater part of the Indian region. All over Northern India high pressure has held steadily throughout the week and extended southward in a modified form over the central parts of the country and the head of the Peninsula. Throughout the whole of this large region pressure has been high and fairly uniform, the winds light and the weather fine. Over the south of the Peninsula on the contrary, the pressure distribution has been connected with a low pressure area lying to the southward of India, gradients have been steeper than over places lying further to the northward, the winds have been stronger and rain has fallen on several occasions. The mean temperature of the whole of India has been steadily higher than usual and for the whole week showed an abnormal excess of $1\frac{1}{2}^{\circ}$.

On Sunday, November 26th, a large area of high pressure, with its highest points over the north-west of the Punjab and the north-east of Assam, lay over Northern India. From this area readings steadily decreased and were lowest over Ceylon and over the Arabian Sea off the Malabar Coast. The winds varied between north and east in most parts of the country, but some south-easterly or southerly winds were reported in the Peninsula, and calms were very numerous in Upper India. Light showers were reported from Bhamo

and Seoni, but otherwise rain was confined to the southern half of the Peninsula. The heaviest falls were 1·72 inch at Negapatam and 1·06 inch at Cuddalore. On the 27th pressure was increasing over the Peninsula and decreasing over Northern India. The changes were not sufficient to alter the general distribution of pressure, and the only change in this respect was a slight decrease in the steepness of the barometric gradient. The winds were unchanged. Rain had fallen at Diamond Island and over the south of the Peninsula. Elsewhere there was none. Tinnevelly had received 2·74 inches, Negapatam 1·47 inch, and Colombo 1·24 inch. These were the heaviest amounts. The chart of the 28th showed that the barometer was rising in nearly all places. The rise was greater in the north than in the south, and consequently there had been a slight increase again in the barometric gradient. This was the only important change. The winds remained between north and east. With the exception of a shower at Indore rain was confined to the south where the heaviest falls reported were 3·14 inches at Madura, 2·15 inches at Colombo, and 1·13 inch at Tinnevelly. On the 29th pressure was falling again everywhere. The fall was generally greater in the north than the south, and hence pressure had become more uniform. North-westerly and westerly winds had appeared down the Gangetic plain, but otherwise the general directions of the wind were unaltered. Showers had fallen over Burma, Assam, and Ceylon, but there was no rain in any other part of the country. On the 30th the pressure changes were irregular, but there was no important alteration in the general distribution. The winds were somewhat more southerly than of late over the central parts of the Peninsula, but otherwise there was no change. Light showers were reported from North Bengal, the Assam Valley, Upper Burma and Travancore, but elsewhere the weather was fine. On December 1st pressure was rising everywhere. The rise had been greater in the north than the south, hence gradients had increased, the wind had risen a little, and rain had re-commenced on the Madras Coast. There were still light showers in Upper Burma. On the 2nd the barometer was still rising except over parts of North-East India. Gradients remained moderately steep and the wind was fresh in a few places. Light showers were reported from three stations in the south of the Peninsula.

Temperature.—The following table shows the variations of the mean temperature from the normal on each day of the week for the different provinces of India :—

Province.	November 1893.					December 1893.		Mean variation of week.
	26th.	27th.	28th.	29th.	30th.	1st.	2nd.	
	°	°	°	°	°	°	°	°
Burma	—0·4	—1·3	—2·3	—2·6	—2·9	—3·9	—4·1	—2·5
Bengal and Assam	+2·0	+0·8	0	+0·4	—0·3	—0·8	—0·2	+0·3
North-Western Provinces and Oudh	+2·5	+2·4	+2·1	+0·2	—2·4	—1·7	—0·2	+0·4
Punjab	+0·3	+0·2	—0·1	—0·9	—2·8	—0·3	—1·3	—0·7
Bombay	+3·3	+4·1	+3·7	+3·8	+3·7	+3·8	+4·0	+3·8
Central Provinces and Berar	+7·1	+7·2	+7·8	+7·2	+4·0	+2·8	+1·0	+5·3
Central India and Guzerat	+5·3	+6·0	+6·9	+5·0	+3·0	+3·0	+3·0	+4·6
Sind and Rajputana	+1·3	+2·2	+1·1	0	—0·9	+2·8	+2·3	+1·3
Madras	+1·2	+0·3	+0·1	+0·7	+1·0	+1·2	+1·2	+0·8
Mean for whole of India	+2·5	+2·4	+2·1	+1·5	+0·3	+0·8	+0·6	+1·5

On each day of the week the mean temperature of the whole country was above the normal the excess for the week being 1°·5. In Burma the mean of each day was below the normal, the deficiency ranging from only 0°·4 on the 26th November to 4°·1 on the 2nd December. In the Punjab there was a deficiency on all but two days (26th and 27th), but the relative coolness was less than in Burma. In all the other provinces the heat was greater than usual.

Rain.—It was shown in the earlier parts of the summary that while light local showers had occurred in various parts of the country, the only region in which there was any important rainfall was the south of the Peninsula. The table at the close of the summary shows that in sixteen of the rainfall divisions some rain was received during the week, but only in Madras (south) did the average actual rainfall of the division equal two inches and in the East Coast (south) one inch. In all the other divisions the average rainfall was less than half an inch, and in no less than nine out of the sixteen reporting rain it was less than one-tenth of an inch. The divisions which reported rain were Upper Burma, the Assam division, North Bengal, Oudh, Malabar, Madras (South-Central), the Central Provinces (Central), Kathiawar, Sind, Central India (East), the East Coast (North), Madras (Central), the East Coast (Central and South), and Madras (South). In all the other divisions there was absolutely no rain.

The three concluding columns of the table show that from the 15th of October to date the rainfall has been deficient in Tenasserim, Lower Burma, all the Punjab divisions, the Konkan, the Deccan, Khandesh, and Sindh, but that in all other places the total fall of rain for the period has been equal to or above the average.

The only heavy totals reported this week are 2·40 inches at the Sudder station, Travancore; 2·13 inches at Maksudungarh, in Bhopal, 2·85 inches at Chedambaram in South Arcot; 3·93 inches at Jyankonda, Cholapuram, in Trichinopoly; 4·35 inches at the Sudder station, Madura; 5·02 inches at Kayalpatnam in Tinnevelly, and 5·50 inches at Arantangi in Tanjore.

Provinces.	Division.	Rainfall data for week ending December 2nd, 1893. Average actual rainfall of Division.	Average normal rainfall of Division.	Excess or defect in inches.	Rainfall data from October 15th to December 2nd, 1893. Average actual rainfall of season to date.	Average normal rainfall, Oct. 15th to December 2nd.	Excess or defect of (seasonal) rainfall expressed as a percentage.

W. L. DALLAS,
Assistant Meteorological Reporter to the Government of India.

Simla, the 7th December, 1893.

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 9th December.*—Heavy rain in parts of South Arcot, scattered showers in Tinnevelly and parts of Godavari, Chingleput, and Madura; no rain elsewhere. Water-supply ample. Agricultural operations progressing vigorously. Standing crops generally thriving. Early-sown crops harvested with fair to average outturn. Pasturage ample and stock in good condition. Prices generally falling.

Bombay.—*For week ending 13th December.*—Light rain in one district of Sind; more rain required urgently in parts of the Deccan. Standing crops withering for want of moisture or damaged by frost, insects, or blight in parts of four districts; otherwise good. Sowing of late crops progressing in ten, and reaping of early crops in fourteen, districts. Cotton-picking continues in two districts. Prices steady. Fodder sufficient and agricultural stock good.

Bengal.—*For week ending 9th December.*—There was no rain during the week, with the exception of a few local showers in East and North Bengal. General agricultural prospects continue favourable. The rice harvest is being rapidly pushed on, and it is estimated that the outturn will be a full average (16 annas) or more than a full average in twenty-one districts, from 12 to 16 annas in sixteen districts, and from 9 to 12 annas in nine districts. In Chittagong, Noakhali and Tippera some damage is apprehended from insects. The sowing of all cold-weather crops, including poppy and tobacco, is almost completed, and the young plants are doing well. The price of rice is generally falling. Fodder-supply is sufficient, and cattle are in good condition, except in Puri. The number of persons in receipt of gratuitous relief during the week were:—*Faridpur* (*Madaripur Sub-division*)—Men 47, women 102, and children 82, total 231, against 182 in the previous week; *Backergunge* (*Sadar and Pirojpur Sub-divisions*)—Men 334, women 1,219, and children 1,520, total 3,073, against 3,355 in the previous week.

North-Western Provinces and Oudh.—*For week ending 13th December.*—Weather clear and cold. Spring crops have germinated well and are being irrigated. Rice being cut. Poppy promising. Sugar cane-pressing continues. Prospects favourable everywhere. Fodder and supplies sufficient. Prices generally steady.

Punjab.—*For week ending 13th December.*—Rainfall *nil*. Harvesting of autumn crops nearly over. Sugarcane being pressed. Irrigation of spring crops commenced. The crops are flourishing and their condition and prospects are good, but rain is wanted. The young crops are reported to have been damaged by field rats in parts of Umballa and Lahore. Cattle are generally in good condition, and fodder is reported to be sufficient in all districts, except in

parts of Shahpur. The poppy crop has germinated well. Prices falling in five districts; stationary elsewhere.

Central Provinces.—*For week ending 13th December.*—Weather cold and clear. Winter crops in good condition and look promising. Harvesting of autumn crops continues in parts. Prices stationary.

Burma.—*For week ending 9th December.*—A little rain fell last week in Kyaukpyu, but none elsewhere during the week. Reaping of the main paddy crop well in hand in almost all districts of Lower Burma. Crop prospects both in Lower and Upper Burma are generally good, but in Kyaukpyu the crop will be short owing to serious destruction caused by the late cyclone. Prospects in Amherst and Shwebo remain unchanged. In Upper Burma reaping of wet-weather paddy continues, and ploughing and planting of dry-weather crops is progressing. The price of paddy has risen in four districts. The high price of paddy ruling in Kyaukpyu is due to the destruction of the crop by the late cyclone.

Assam.—*For week ending 12th December.*—Weather seasonable. Harvesting of winter paddy continues. Condition of cattle fair. Fodder and water sufficient.

Mysore and Coorg.—*For week ending 13th December.*—MYSORE: Standing crops in good condition. Harvesting of *ragi* (*Eleusine coracana*) continues in six districts. Prices risen in two districts.

COORG: No rain. Rice crop ripening. Coffee-picking continues. Prospects generally good. Water and fodder sufficient for cattle. Prices stationary.

Berar and Hyderabad.—*For week ending 13th December.*—BERAR: Weather cool and clear. Picking of cotton and cutting of *jowar* (*Sorghum, vulgare*) continues. Linseed crop infested by insects in parts of Akola taluka. Preparation of land for ensuing crop commenced in two districts. Sowings in Ellichpur nearly completed. Weeding operations in Akola not yet finished. Supply of fodder and water ample. The price of *jowar* (*Sorghum vulgare*) has fallen in one taluka. Cattle generally healthy.

HYDERABAD: No rain during the week. Harvesting of irrigated crops continues. Standing spring crops in good condition. Fodder plentiful. Prices stationary.

Central India.—*For week ending 13th December.*—Sowings of spring crops completed in Gwalior, Bhopal, and Bundelkhand; in progress in other parts. Autumn harvesting completed in Bhopawar, in progress in Baghelkhand. Collection of cotton nearly completed in Bhopawar. Condition of crops generally good, except in Baghelkhand and Goona. Agricultural stock and pasturage good. Prices of food-grains steady in all parts. Opium being sown in parts of Gwalior, the condition of the crop in Bhopawar is good, in the Nimach district indifferent.

Rajputana.—*For week ending 13th December.*—Agricultural operations, standing crops, and cattle, generally satisfactory. Harvest prospects generally good. Pasturage or fodder sufficient. Prices fluctuating in two States, falling in one, risen in another, and steady elsewhere.

Kashmir.—*For week ending 12th December.*—Weather generally cloudy and getting cooler every day. Spring sowings still going on in Kashmir Proper. Rain wanted in Muzaffarabad. Prices falling.

Nepal.—*For week ending 9th December.*—Weather cold but fine. Prospects normal.

E. C. BUCK,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVIEWING THE POST OFFICE ADMINISTRATION REPORT FOR 1892-93.

No. 5482S.R., dated Calcutta, the 15th December 1893.

RESOLUTION.—By the Government of India, Finance and Commerce Department.

READ—

Report on the Post Office of India for the year 1892-93.

OBSERVATIONS.—The transactions in 1892-93 in the various branches of business undertaken by the Post Office show, as in previous years, satisfactory progress. In the working of the Inland Post, one important matter, which occupied much attention during the year, was the question of extending a policy of postal unity with Native States which have separate postal systems of their own. The other important events which may be noticed under this head were—

(1) the reorganisation of deliveries in Bombay and Calcutta with the object of providing the public with a regular and quick delivery of local correspondence;

(2) the permanent adoption of the system of payment of military pensions at post offices in the Punjab;

(3) the successful working of the experiment of serving civil processes by means of the registered letter post in two districts of the North-Western Provinces, and the proposed extension of the system to the other districts of those Provinces;

(4) the introduction, as an experimental measure, of an arrangement for the sale of Government quinine to the poorer classes of the people in Bengal, Assam, and Burma through the agency of the Post Office. The system is being gradually extended to other provinces.

2. Under "Foreign Post," the principal events were—

(*a*) the uniform application of the Union postage rates to all parts of the world to which the inland rates did not apply;

(*b*) the conclusion of arrangements for the exchange of parcels with New South Wales and Queensland;

(*c*) the establishment of a telegraphic money order exchange with Ceylon, which did not come into operation however until the beginning of May 1893;

(*d*) the progress of negotiations for the introduction of parcel exchanges with the Imperial British East Africa Company's territory and with Persia.

3. The following is a brief summary of the transactions of the Imperial Post Office during the year as compared with the previous year:—

		1891-92.	1892-93.	Increase or decrease per cent.
Number of post offices		8,617	8,832	2·49
„ letter boxes		12,848	13,292	3·45
„ letters and post-cards issued for delivery		300,619,812	311,014,049	3·45
„ newspapers „ „		25,910,386	26,637,963	2·80
„ parcels „ „		2,108,685	2,169,715	2·89
„ packets „ „		10,711,051	12,149,494	13·42
„ letters and parcels insured		265,610	263,811	—0·67
* „ inland money orders issued		7,783,296	8,237,855	5·84
* Value of „ „ „	₹	16,44,09,526	17,19,16,585	4·56
* Commission realised on „ „	₹	20,58,306	21,58,398	4·86
Number of telegraphic „ „		97,659	107,401	9·97
Value of „ „ „	₹	1,06,69,989	1,16,01,119	8·72
Commission realised „ „ „	₹	1,11,738	1,21,637	8·85
Number of foreign money orders issued by India		45,750	43,490	—4·94
Value of „ „ „	£	157,921	143,738	—8·98
Number of foreign money orders paid in India		21,018	21,599	2·76
Value of „ „ „	£	136,528	113,718	—16·70
Mileage of mail lines—				
Railways		17,196	17,540	2·00
Mail Carts		4,192	4,650	10·92
Runners and boats		44,019	45,732	3·89
Steamers		12,321	12,550	1·85

* Excluding money orders of Native States and Portuguese Settlements.

4. With the exception of foreign money orders issued in India and letters and parcels insured, there was an increase in the number of transactions under each head, the increase being the largest in the number of packets delivered and telegraphic money orders issued; but the increase in the number was accompanied by a decrease in the value of foreign money orders paid in India. The decrease in the foreign money order business occurred mainly in the transactions with the United Kingdom and Egypt, and was due to the unfavourable rates of exchange. The popularity of post-cards and of the value-payable post continues; the number of post-cards issued for delivery having exceeded the number in 1891-92 by upwards of seven millions or 6·25 per cent., while the number of articles sent under the value-payable system showed an increase over the previous year's figures of more than 13 per cent. The declared value of value-payable parcels rose from 134½ lakhs in 1891-92 to upwards of 151½ lakhs in 1892-93, and the commission realised thereon from ₹2,44,865 to ₹2,77,845. In consequence of the reduction of postage between India and the United Kingdom the number of letters and post-cards exchanged between the two countries had increased by over half a million in 1891-92. A similar increase occurred again in the year under review, but the increase in the number of book-packets from and to the United Kingdom was remarkable, being nearly 50 and 30 per cent. respectively.

5. The number of unpaid letters posted diminished by over a million, while that of paid letters increased by nearly 4½ millions; which is so far satisfactory. The number of postal articles actually delivered was 97·17 per cent. of the total number sent out for delivery, as compared with 97·22 per cent. in the preceding year.

6. In the money order business, the yearly progress has been steady and regular since the time it was taken over by the Post Office in 1880. During the last twelve years the total number of inland money orders issued has

risen from 1,604,174 to 8,237,855, the aggregate value of the orders from ₹4,57,08,580 to ₹17,19,16,585, and the commission realised thereon from ₹5,35,976 to ₹21,58,398. Including Foreign and Native State money orders, the entire transactions in this branch of business during the last two years compare as follows:—

			1891-92.	1892-93.
Issued	Number of money orders		7,870,783	8,325,457
	Value of money orders	₹	16,80,46,172	17,57,24,054
	Commission realised on money orders issued	₹	20,95,666	21,94,419
Paid	Number of money orders		7,903,145	8,365,203
	Value of money orders	₹	16,97,88,145	17,75,28,369

The number, aggregate value, and commission realised in 1892-93 exceeded those in 1891-92 by 5·77, 4·56 and 4·71 per cent. respectively, and the average value of an inland money order was ₹20-13-10 in the past year against ₹21-1-11 in the previous year. The revenue money order system made considerable progress in the North-Western Provinces and Oudh and in the Lower Provinces of Bengal, but in Madras, where the system is still under trial, the progress made during the year was small.

7. The insurance business shows a slight falling off. The number of insured articles was less by 0·67 per cent., the decrease being confined entirely to the number of parcels insured. The number of insured letters and the declared value thereof were, however, higher, being 89,845 against 88,741 and ₹2,36,54,593 against ₹2,31,67,897 in the preceding year. The total declared value of insured articles was ₹7,30,60,710 and the insurance fee ₹1,93,250 against ₹7,65,40,274 and ₹2,02,737 respectively in 1891-92.

8. The Postal Savings Banks are working satisfactorily. The results of the last two years may be summarised thus:—

		1891-92.	1892-93.
Number of banks		6,452	6,408
„ accounts at the close of the year		463,453	520,967
Amount of deposits during the year	₹	4,03,67,077	4,14,52,425
„ withdrawals during the year	₹	3,56,50,232	3,65,51,950
„ balance at the close of the year	₹	7,05,93,160	7,81,87,727
Average balance of each account	₹	152·32	150·08

9. The number of complaints made by the public against the Post Office was 8,671 against 8,306 in the preceding year, representing an increase of 4·39 per cent. Nearly 42 per cent. of the total number proved to be groundless. The Governor General in Council is glad to notice that special instructions were issued during the year with a view to ensure thoroughness in the matter of enquiries regarding complaints.

10. It is observed that the system of receiving salt revenue at post offices was materially affected by the changes introduced from the 1st October 1892, by which the system was confined to post offices at stations where there are no treasuries or sub-treasuries, and a charge of 8 annas was imposed on every ₹100 paid in by the purchasers of salt. The amount received at post offices throughout the year under report on this account was 49 lakhs against 85 lakhs in the preceding year, the amount received since the introduction of the change in October 1892 to the end of the year being about 3½ lakhs only. The system has since been extended to the Central Provinces, Rajputana, and Central India.

11. The revenue and expenditure of the Post Office during the last three years were as follows:—

	1890-91.	1891-92.	1892-93.
	₹	₹	₹
Revenue . . .	1,40,27,482	1,44,59,253	1,48,88,627
Expenditure . . .	1,39,65,357	1,49,64,174	1,51,85,555
+ Surplus or — deficit .	+62,125	—5,04,921	—2,96,928

The increase in receipts in 1892-93 over 1891-92 was due mainly to increased sales of ordinary and service postage stamps and larger receipts on account of money order commission.

Making the same adjustments as in previous years, the results are—

	1890-91.	1891-92.	1892-93.
	₹	₹	₹
Surplus or deficit according to Statement XI of the Report . . .	+62,125	—5,04,921	—2,96,928
Add indirect expenditure .	—10,60,522	—6,40,718	—6,07,041
TOTAL .	—9,98,397	—11,45,639	—9,03,969
Deduct District Post charges (excluding charges in British Baluchistan) .	11,23,210	11,42,554	11,54,907
Resulting surplus or deficit	+1,24,813	—3,085	+2,50,938

12. The Governor General in Council is glad to record his appreciation of Mr. Fanshawe's able and successful administration of the Post Office, and to notice the names of the officers of whom favourable mention is made in paragraph 60 of the Report.

ORDER.—Ordered, that copy of the Resolution be forwarded to the Director General of the Post Office of India, and that the Report and the Resolution be published in the *Gazette of India*.

J. F. FINLAY,
Secretary to the Government of India.

ANNUAL REPORT

ON

THE POST OFFICE OF INDIA

FOR THE YEAR

1892-93.

No. 9581, dated the 30th October 1893.

From—A. U. FANSHAWE, Esq., *Director General of the Post Office of India,*

To—*The Secretary to the Government of India, Department of Finance and Commerce.*

I have the honour to submit the Annual Report on the Post Office of India for the official year 1892-93.

Principal events, Inland Post.

2. It has become a commonplace of postal administration to record uninterrupted progress in the various branches of business undertaken by the Post Office, but this progress has inevitably brought with it new responsibilities, and special demands on our revenue. The increasing pecuniary responsibility, in particular, at the smaller post offices, in connection with the money order system, has claimed very serious attention, and the necessity for raising rates of pay in the case of various servants of the Department is one that cannot be deferred. These and other kindred matters were under special enquiry during the year, and in January 1893, a postal committee assembled at Calcutta to deal with a number of important account questions and discuss various administrative measures. The amalgamation of posts in Mysore with the Imperial system in 1889 was followed by an increase of a million in the number of postal articles delivered in that State during the first year of our management, and the question of extending a policy of postal unity to other Native States occupied much attention during the year. It may be hoped that the obvious commercial and political advantages of this policy will lead to its general adoption before long, with the assent and co-operation of the Native States which still have separate postal systems of their own. As regards what may be termed postal business proper, the year was marked by the successful carrying out of a large measure of reorganising deliveries in Bombay, and similar steps were being taken in Calcutta, the main object in both cases being to provide the public with a regular and quick delivery of local correspondence. In the Punjab, the employment of pensioned soldiers of the Native Army has been attended with a considerable measure of success. During the year under report, 96 pensioners received appointments chiefly in subordinate positions as packers, letter-box peons and watchmen. It has not, however, hitherto been found possible to give practical effect to the scheme for training non-commissioned officers and men, while still with the colours, for employment after retirement in this Department. The payment of military pensions at post offices in the same province was continued to the undiminished satisfaction of the pensioners, and has now been permanently adopted. The Revenue money order system goes on expanding, and was extended, at the request of the local Governments, to all the districts of the Punjab and also of the Central Provinces, while the scope of the scheme for paying

miscellaneous Government dues by means of money orders has been enlarged in Bengal and the scheme itself was introduced in the Punjab. There has again been evidence during the year of the constant tendency, on the part of other departments, to make more and more use of the Post Office agency. In two districts of the North-Western Provinces the experiment was tried of serving civil processes by means of the registered letter post, and the plan was found to work so successfully that the local Government have asked for its general adoption in those provinces. This, however, is a mere adaptation of the existing organisation of the Post Office to the requirements of another department. In the Central Provinces, postmasters have undertaken the sale of Forest licenses, and in the Lower Provinces a large scheme was introduced for the sale of Government quinine in small specially prepared packets at post offices, so as to bring this febrifuge in a cheap form to the doors of the people. Immediate advantage was taken of this boon by the poorer classes, and it has already been arranged to extend the benefits of the system to Assam and Burma. There were serious interruptions in the mail service in different parts of the country during the year. One of the most important occurred on the North-Western Railway where regular through communication was interrupted from the 28th July to 21st August 1892, and special arrangements had to be made for carrying mails over the break. On the Harnai railway to Quetta unusually heavy falls of snow completely blocked the line for several days in January, and again in February 1893, and three engines and a snow plough had to be employed to clear the line before traffic could be resumed. On the roads between Kalka and Simla and between Murree and Srinagar, breaks occurred which stopped ordinary road traffic, and on the former line the Post Office was called upon to undertake the carriage of grain from Kalka so as to keep down the price of food grains at Simla which is dependent on the plains for its supplies. In September 1892 the Post Office was required at short notice to organise a field post office in connection with the Isazai Expedition, which was, however, of short duration. In connection with the Kuram Field Force a postal service was also established in October 1892 under considerable difficulties, and in the case of the Wano expedition postal communication was arranged for *vid* the Gomal Pass with the troops serving in the direction of Jandula and Kajuri Kach. In Burma an outbreak in the Chin Hills seriously interfered with mail arrangements, and caused some anxiety, but, on the whole, a satisfactory service was kept up.

Principal events, Foreign Post.

3. The following were the principal events of the Foreign Post. The Acts of the Postal Congress of Vienna came into force on the 1st July 1892. With effect from the same date, the equivalents in Indian currency of the standard union rates of 25 centimes, 10 centimes, and 5 centimes were raised to 2½ annas, 1 anna, and ½ anna respectively; and the special rates of postage that were still in force for a few foreign non-union countries were abolished, the union postage rates being made uniformly applicable to all parts of the world to which the inland rates did not apply. The British Colony of Natal and the South African Republic of the Transvaal entered the Postal Union during the course of the year, the former on the 1st July 1892, and the latter on the 1st January 1893; and with effect from the first mentioned date, Bosnia-Herzegovina was also declared a separate member of the Union. Arrangements were concluded for the exchange of parcels with the Australian Colonies of New South Wales and Queensland, and a few additions were made to the list of parcel and money order exchanges through the United Kingdom. The question of establishing a telegraphic money order exchange with Ceylon was taken up and the final arrangements were settled before the close of the year, but the exchange did not actually come into operation until the beginning of May 1893. Negotiations were also in progress during the course of the year for the introduction of parcel

exchanges with the Imperial British East Africa Company's territory and with Persia, and the sterling money order exchange with British North Borneo was converted into a rupee exchange. The limit of weight for packets of samples exchanged between India and the following countries, *viz.* Austria-Hungary, Belgium, Egypt, France, Italy, Portugal and Roumania, was raised from 8 to 12 ounces; and 2½ annas envelopes of a new kind for overland and foreign correspondence were issued for sale to the public.

Working of the P. & O. Contract.

4. According to the terms of the contract with the Peninsular and Oriental Steam Navigation Company, the steamers with the European mails are due in Bombay at 8 A.M. on Monday of each week; but on 42 occasions they arrived in advance of the contract date, in 17 instances on the previous Saturday, and in 25 instances on the previous Sunday. On 6 occasions there was an early Monday arrival, while the contract time was actually exceeded four times, the longest delay, *viz.* 38 hours and 10 minutes, being due to a protracted detention of the mail steamer in the Suez Canal, caused by the grounding of another vessel. The average time occupied by the mail between London and Bombay was 15 days 20 hours and 24 minutes homewards, and 15 days 14 hours and 50 minutes outwards. The contract steamer which left Bombay on the 8th October proceeded as far as Brindisi only, and therefore no parcels for the United Kingdom were forwarded that week. Twice during the year advantage was taken of the despatch of an extra passenger steamer from Bombay, *vid* Marseilles, to send an additional mail to London. Only articles specially marked for transmission by these steamers were forwarded, and they amounted to 2,372 letters and papers in one case, and to 1,603 in the other. These steamers left Bombay on Tuesday and the articles carried by them reached London somewhat under four days in advance of the mails sent by the regular steamers leaving Bombay on Saturday.

Charge of the Post Office.

5. The administration of the Department throughout the year was in my hands.

Section I.—Post Offices, Letter-Boxes, and Village Postmen.

Post Office receptacles and rural delivery.

6. In Appendix I are compared the number of post offices, letter-boxes, and village postmen of the Imperial Post in each circle on the 31st March 1893, with the number at the close of the previous year, and in the marginal abstract will be found the figures of the past two years for the whole of India for both the Imperial and District Post separately and together. The total number of post offices has increased by 376, and the new offices belong almost entirely to the class of offices entrusted to the charge of village school-masters and other persons who are not paid servants of the Department. The great majority of these offices were opened in the Punjab, where special attention was given during the year to the development of postal communication in the interior of districts. The total number of letter-boxes for the use of the public has increased by 596, the increase being greatest in the Bombay circle, and it may be mentioned that the whole subject of the position of letter-boxes in towns, their regular clearance, and other kindred matters was under special enquiry and report during the year. As a check on the proper clearance of these boxes, moveable plates, showing the next hour of clearance, which have to be changed on each occasion the letter-box is opened, were introduced with success in the Punjab, and

	Imperial Post.		District Post.		Total.		Increase.
	Number at close of 1891-92.	Number at close of 1892-93.	Number at close of 1891-92.	Number at close of 1892-93.	Number at close of 1891-92.	Number at close of 1892-93.	
Post Offices .	8,617	8,832	1,146	1,307	9,763	10,139	376
Letter-boxes .	12,848	13,292	2,443	2,595	15,291	15,887	596
Village Postmen	3,762	3,837	2,590	2,924	6,352	6,761	409

this system is being extended to other provinces. There was a marked increase of 409 under the head of village postmen, due to the extension of rural delivery particularly in the Punjab.

Section II.—Postal Lines.

Postal communications.

7. Appendix II contains statistics according to postal circles regarding the length of lines over which mails are conveyed by the various agencies used by the Post Office for this purpose. There has been an increase under every head as will be seen from the marginal abstract. The increase in the railway mileage was due almost entirely to the extension of railway communication in different parts of the country, long sections of new railway lines being opened during the year and used for postal purposes on His Highness the Nizam's Guaranteed State Railway, the Southern Mahratta Railway, the Rajputana-Malwa and Jodhpur Railway, and the North-Western Railway. The management of the Railway Mail Service in Kathiawar was transferred from the Inspector General, Railway Mail Service, to the Postmaster General, Bombay, on special grounds of administrative convenience. The increase in railway communication led to the closing of a number of runners' lines; but this was more than counterbalanced by the opening of new lines in various parts of the country, while the results of the year showed an increase of 1,713 miles in the total mileage of runners' lines. This was mainly due to the transfer of a number of District Post lines to the Imperial establishment in the Punjab, as part of a general scheme for the improvement of postal communications in the interior of districts in that Province. Of the net increase of 458 miles in the mileage of mail cart lines, the Punjab is responsible for 283 miles owing to the establishment of a number of new mail cart services, the most important of which was between Kohat and Edwardesabad, while in Assam a mail cart service was opened between Gauhati and Shillong. The increase under the head of steamer lines was due to the extended use of local steamer services in Bengal and in Burma.

Imperial Mail Lines.	Total mileage in 1891-92.	Total mileage in 1892-93.	Increase.

Steamers	12,321	12,550	229
Total	77,728	80,472	2,744

Section III.—Correspondence and Parcels.

General results.

8. The estimated number of postal articles of all kinds, exclusive of money orders, issued for delivery during the year, amounted to nearly 352 millions, or more than 12½ millions in excess of the number issued in the preceding year. Statistics showing the different classes of articles delivered in the various postal circles will be found in Appendix III, and a summary of the general results is given in the statement below:—

Year.	Post-cards.	Letters paid.	Letters unpaid.	Letters registered.	Total of letters and post-cards.	Newspapers.	Parcels.	Book and pattern packets.	Grand Total (all postal articles except money orders).
	No.	No.	No.	No.	No.	No.	No.	No.	No.
1891-92	112,748,448	154,144,895	27,309,873	6,416,596	300,619,812	25,910,386	2,108,685	10,711,051	339,349,934
1892-93	119,802,516	158,555,165	26,202,595	6,453,773	311,014,049	26,637,963	2,169,715	12,149,494	351,971,221
Increase or Decrease	7,054,068	4,410,270	...	37,177	10,394,237	727,577	61,030	1,438,443	12,621,287
	...	...	1,107,278	...	...	...	...	...	...
Percentage of— Increase or Decrease	6·25	2·86	...	·57	3·45	2·80	2·89	13·42	3·71
	...	...	4·05	...	...	...	...	...	...

It will be seen that, except as regards unpaid letters, there was an increase in the total number of articles issued for delivery under every head; the largest proportional increase was 10·69 per cent. in the Burma circle; in Eastern Bengal, Bengal proper and Madras, the rate of increase was upwards of 5 per cent., while in all other circles the increase was at a lower rate. Nearly 120 million post-cards were issued for delivery during the year, being an increase of more than 7 millions or 6·25 per cent. over the figures of the preceding year. The greatest use was made of this form of communication in the Bombay circle, where 26½ million post-cards were received for delivery through the post; but it may be added that in Bengal the number of post-cards was for the first time actually in excess of the number of paid letters. There was an increase of nearly 4½ millions or 2·86 per cent. in paid letters, the greatest part of which occurred in the Madras, Bengal, and Burma circles. There was a decrease of 4·05 per cent. in the number of unpaid letters as compared with an increase last year of 3·64 per cent., which may in some measure be attributed to the constantly growing popularity of post-cards. The proportion of unpaid letters to letters on which postage is prepaid is much lower in Madras and Bombay than elsewhere, whereas it is highest in Burma, Bihar, and Oudh. In the two first-named provinces, unpaid letters are about half as numerous as paid letters. About 6½ million letters were registered, though the increase in the year was small, and registration was, as usual, more largely resorted to in the Madras circle than elsewhere. In newspapers, there was an increase of 2·80 per cent., and about the same rate of increase under the head of parcels; while the increase in book and pattern packets was nearly 13½ per cent., the greater part of which was made up by an increase in the number of unregistered packets alone.

Average number of letters and post-cards to each person.

9. In connection with the Census of February 1891, a comparative table showing the average number of letters and post-cards per head of population in the different postal circles in 1881, and in 1891, was prepared on provisional figures obtained from the Census Commissioner, and published in the Annual Report on the Post Office for 1890-91. The final figures of the Census have now been received, and the results obtained from them are substantially the same as those arrived at on the provisional figures. In the Bombay Presidency, including Sind, each person received, on an average, rather more than two letters, while in Bengal, the Punjab and Burma each person received, on an average, rather more than one letter. Judged by a European standard there is plenty of room for growth of correspondence, and the Post Office has yet a vast task before it in dealing with the vernacular correspondence of the country when more fully developed.

Extent of official correspondence and vernacular correspondence.

10. Special statistics were recorded at the time of the enumeration, during the second week of February 1893, with a view to ascertain the proportion of service correspondence and of correspondence addressed in the various vernaculars of the country, to the whole correspondence conveyed by post. Of an estimated total number of 358,717,203 articles, private and official taken together, for the year, about 11·78 per cent. consisted of official covers, the percentage of this class of correspondence being highest in the Madras circle, where it nearly reached 13 per cent. The proportion of vernacular correspondence to the whole differed, as might be expected, in different parts of the country, but for the whole of India it was 55·37 per cent. of the entire correspondence. In the Bombay Presidency, however, where post-cards are so largely used by Natives, the vernacular correspondence was actually 65·41 per cent. of the whole.

Foreign correspondence including that with the United Kingdom.

11. The figures in Appendix III include the foreign correspondence received in India for delivery, but a special table is given at the end of this paragraph showing separately the amount of correspondence in each direction between India and the United Kingdom and between India and foreign countries. Hitherto

the figures given in this table have not represented the number of articles of correspondence exchanged with the United Kingdom but the estimated number of postage rates. This is no longer a convenient arrangement, and the figures relating to the United Kingdom, now given in the table below, show the estimated number of articles both for the year under report and the preceding year. It will be seen that there has been a marked increase in the mails exchanged with the United Kingdom, especially as regards newspapers and book packets. The reduced newspaper and packet postage rates were in force only during the three last months of 1891-92, and it was to be expected, therefore, that the traffic would grow considerably during the year now under report; but in the case of book packets, particularly, the actual results have been quite remarkable, the rate of increase being over 30 per cent. homewards and nearly 50 per cent. outwards. In the case of letters and post-cards there was again an increase of over half a million in the aggregate number exchanged, though there was no special stimulus in the way of any reduction of letter postage rates during the year under report to account for this. The postage on international post-cards was slightly reduced from the 1st January 1892, and this may have helped to swell the number sent home during 1892-93, which increased by about 8 per cent., but the number of post-cards exchanged with the United Kingdom is wholly insignificant in comparison with the number of letters, and a noticeable feature of the year's exchange was a falling off to the extent of about 28 per cent. in the number of post-cards received from home. The effect of the step taken nearly three years ago when the letter postage to the United Kingdom was reduced is now fully apparent. In each of the two years during which the reduced rates have been in force there has been an increase of more than half a million over the figures of the previous year, in the aggregate number of letters and post-cards exchanged with the United Kingdom, the larger share of which was contributed by India, though some allowance must be made, of course, for the ordinary increase in correspondence. Statistics of correspondence with foreign countries are taken only once in three years, alternately in May and November, and the figures given in the table are again those of May 1890, so that no remarks are called for regarding them.

	Class.	Estimated Aggregate Number.		Percentage of		Remarks.
		1891-92.	1892-93.	Increase.	Decrease.	
Despatched from India to the United Kingdom.	Letters including post-cards	2,585,884	2,855,220	10·42	...	These figures are based on the statistics taken for each mail between India and the United Kingdom.

* Net revenue is calculated after deduction of Customs duty and sums due to the Peninsular and Oriental Company and London Post Office.

More than 80 per cent. of the whole foreign parcel traffic was with the United Kingdom. As regards the exchange with the British Post Office, there was a slight falling off during the year under report in the number of parcels received from the United Kingdom as well as in their average weight, while in the opposite direction, though the average weight of the parcels sent home from India was somewhat lower than in the preceding year, there was a satisfactory increase of about 8,000 in their number. If the figures relating to this exchange in both directions be taken together, the results show an advance of 6,646 in the number of the parcels and of about ₹4,000 in the net revenue of the Indian Post Office over the figures for the preceding year, while the average weight of the parcels remained practically the same. In the case of the exchange with the United Kingdom through the agency of the Peninsular and Oriental Steam Navigation Company, there is hardly any difference between the figures for this year and those for the preceding year, as regards the parcels sent home from India; but in the opposite direction the year under report was marked by a complete change in the conditions of the traffic, the number of parcels received in India being only 6,500 as compared with 45,000 in the preceding year. This was due to the almost total extinction of the business in P. and O. book parcels below 5lbs in weight, which was anticipated in last year's report, and also to a large decrease, of about 50 per cent., in the number of book

parcels exceeding that weight, caused by the reduction of the packet postage rates which took effect from the 1st January 1892. The number of P. and O. book parcels not exceeding 5lb in weight, which is the limit of weight for packets exchanged with the United Kingdom by the letter post, fell from something over 35,000, in round numbers, in 1891-92 to about 2,000 in the year under report, the traffic being almost wholly diverted to the cheaper letter post, in which, as already stated in a previous part of this report, there was a very remarkable increase in the number of packets of all kinds received from the United Kingdom. It is probable, however, that the public will always to some extent continue to send books to this country through the Peninsular and Oriental Steam Navigation Company's agency, even in the case of those which might be sent by post at a lower cost, because the manner in which the P. and O. parcels are packed and forwarded to this country offers a safer conveyance for books than their transmission with open ends through the letter post.

General results of Foreign Parcel Post.

13. In the exchange with Continental Europe, there was a small increase in the number of parcels received, and a small decrease in the number of parcels despatched, which practically balanced each other, while in the exchanges with other countries there was a decided increase in both directions, a large proportion of which is to be attributed to the rapid development of the business done with Ceylon since the introduction of the value-payable system from 1st January 1891. The progress of the foreign parcel traffic as a whole since 1873-74 will be seen from the table in the margin.

Year.	Number of Parcels.	Year.	Number of Parcels.
1873-74	21,923	1883-84	98,296
1874-75	25,563	1884-85	110,590
1875-76	35,819	1885-86	133,054
1876-77	45,357	1886-87	141,453
1877-78	59,183	1887-88	158,792
1878-79	69,763	1888-89	163,989
1879-80	73,211	1889-90	177,210
1880-81	80,257	1890-91	191,713
1881-82	88,840	1891-92	211,162
1882-83	88,684	**1892-93**	**185,460**

Delivery work of the year.

14. The figures given in paragraph 8 of this report show that 351,971,221 letters, post-cards, newspapers, packets, and parcels were issued for delivery during the year. These figures are only approximate, being calculated from actual enumerations made for a week at a time twice during the year, and represent delivery of the mails properly so called. In order, however, to ascertain the entire delivery work of the year, it is necessary to add the number of money orders which are now delivered and paid by postmen. The entire delivery work is shown by the following figures:—

Sent out for delivery (including 8,374,874 money orders)	360,346,095
Received back undelivered	10,191,008
Balance actually delivered	350,155,087
Sent to Dead Letter Offices	3,204,908
	353,359,995

These figures show that the percentage of articles delivered to the whole number sent out for delivery was 97·17, as compared with 97·22 in the previous year.

Dead Letter Offices.

15. The total number of letters, post-cards, and other articles, excluding money orders, that reached the various Dead Letter Offices, of which there are eleven, was 4,290,795 as compared with 4,586,874 received in the previous year. The distribution of these articles among the different Dead Letter Offices, and the

way in which they were disposed of, are shown in detail in Appendix IV of which a summary is given below:—

			Number.		Percentage.	
			1891-92.	1892-93.	1891-92.	1892-93.
Total number of articles received in Dead Letter Offices			4,586,874	4,290,795		
	1891-92.	1892-93.				
DEDUCT—						
Articles issued by Dead Letter Offices for delivery to the addressees or senders and received back again as undeliverable	265,562	258,448				
Articles transferred to other Dead Letter Offices	1,282,520	1,181,804				
			1,548,082	1,440,252		
Net receipts to be disposed of by the Dead Letter Offices			3,038,792	2,850,543	100	100
Articles disposed of by the Dead Letter Offices less the proportion of articles returned undeliverable — Disposed of by redirection to addressees			419,472	408,653	13·80	14·34
Articles disposed of by the Dead Letter Offices less the proportion of articles returned undeliverable — Disposed of by return to senders			1,843,943	1,724,322	60 68	60·49
Articles undisposable			775,377	717,568	25·52	25·17

Of the total number of articles, 408,653 were successfully disposed of by being redirected and then delivered to addressees, while 1,724,322 were returned to the senders and 717,568 were found to be unreturnable.

Special incidents in Dead Letter Office work.

16. As usual, a large amount of valuable property was found in letters and other articles posted without address, or with addresses so incorrect or incomplete that the covers had to be opened in order that the senders might be traced. In articles opened in the Dead Letter Offices of Bengal, Bombay, and Madras were found cheques, bills of exchange, currency notes, jewellery, and other valuables to the amount of ₹1,90,105 besides £969-14-1½ and 200 francs, and the whole of this property, with the exception of articles of the total value of ₹7,833, and of £88-3-6, was successfully delivered. The number of articles with neither name nor address on them shows no tendency to diminish, and it may be mentioned as a curious comment on the want of care on the part of business men of the Native community that 45 letters out of those which reached the Bombay Dead Letter Office without address were found to contain hundis. One of these letters posted at Aden and intended for a native merchant in Bombay contained three cheques, one for ₹2,000 and two for £300 each. Nothing remarkable has been brought to notice in connection with the work of Dead Letter Offices, but it may be mentioned that an orderly of the Salvation Army dropped into the Bombay General Post Office letter box a bank pass book and a cheque for ₹2,000 which he had been told to take to a bank. The articles were duly returned by the Dead Letter Office on an application being made for them.

Sale of Postage Stamps, etc.

17. Particulars regarding the sale of post-cards, postage stamps and embossed envelopes will be found in Appendix V and similar information regarding service post-cards and postage stamps in Appendix VI. A statement compiled from these appendices showing the sales of each kind of post-cards, postage stamps and embossed envelopes, is given at page 11. On the reduction of the letter postage to the United Kingdom and foreign countries from 4½ annas to 2½ annas per ½oz., the 4½-anna envelopes in stock were over-printed with the new rate, and during the year under report, a new 2½-anna envelope was introduced, and made available for sale to the public with effect from 1st January 1893. Altogether, there was an increase of R4,12,893 in the value of ordinary stamps, and R1,11,285 in the value of service stamps, sold during the year.

The largest sales of ordinary stamps were in the Bombay circle, where they amounted to over 19½ lakhs of rupees. Madras comes next with sales amounting to nearly 19 lakhs of rupees, and then Bengal with sales amounting to 17¼ lakhs of rupees. The inland post-cards commanded the greatest popularity. Nearly 86½ millions of these were sold during the year, the Bombay circle being responsible for sales amounting to about 23 millions, which were nearly 9 millions in excess of those of Madras in which the sales stood next highest. The small half anna envelope, which is sold for the nominal value of the impressed stamp, had the next greatest sales. The total number sold during the year was 66½ millions, and Bombay headed the list, as usual, with a sale on this occasion of 14⅛ millions. Next come the sales in half anna stamps in which Bengal again maintained the lead, with a sale of nearly 10⅛ millions.

The sales of the special kinds of square envelopes, the price of which includes a charge to cover the cost of the paper, fell from 332,262 in 1891-92 to 305,658 in 1892-93. The largest sales of these envelopes were in the Madras circle, where the sales of the large and small-sized 2-anna registration envelopes also stood the highest. With a view to stimulate the sales of large-sized registration envelopes, a special commission of a quarter anna in the rupee was granted, as an experimental measure for one year from December 1892, to all postmasters and stamp-vendors, and it is satisfactory to find that the sales have risen from 19,711 in 1891-92 to 28,802 in 1892-93.

There was an increase in the sales of service post-cards and postage stamps of all denominations. The increase in the sales of the 9-pie envelopes for soldiers was probably due to the reduction in their price from 14 annas to 12 annas a packet of 16 envelopes. From returns obtained for the past ten years, it appeared that these envelopes have never been popular, and that of late years, the sales had fallen very low. In order, therefore, to encourage their use by soldiers, the sanction of Government was obtained during the year to their sale at the nominal value of the embossed stamp, and the special attention of commanding officers was directed to the subject.

Besides the sale of postage stamps, 1-anna revenue or receipt stamps of the aggregate value of R2,87,896 were sold during the year through the agency of the Post Office, and postmasters in Burma retailed on behalf of Government general stamps of the value of R45,181.

[The figures represent issues from Treasuries to Postmasters and Licensed Vendors for sale to the Public.]

Section IV.—District Post.

Scope and management of the District Post.

18. There is nothing new to be said as to the general position of the District Post, and all that is necessary here is to recapitulate what has been stated in former reports. The sources of revenue from which District Post establishments are maintained vary in different provinces, as will be seen from columns 6 and 7 of the statement on the next page, and the notes at the foot of this statement; and though in one or two provinces the administration of the funds is vested in District Boards, the practical mangement rests with the heads of the postal circles under the control of the local Government. The primary object of the District Post, as frequently pointed out, is to provide postal communication between the head-quarters of districts and revenue and police stations in the interior of the country, but for many years past the funds derived from these sources have been chiefly spent on the maintenance of rural delivery services, and on the establishments of unimportant lines and post offices. A good deal has been done during the year in the way of taking over, as a charge to the Imperial Post, establishments of this kind that have been found to pay their way, especially in the Punjab where the matter had long required attention, and the efforts of the Postmaster General to improve and extend the postal arrangements for the interior of districts, by means of the funds set free, have been seconded by the local Government. In many parts of the country the rural delivery services are necessarily irregular, as there are few letters to be delivered and the postmen have frequently to cover large tracts of ground. More method and regularity, however, are being introduced, though the work will inevitably be one of time, and the exercise of a closer control over village postmen has received special attention in most circles.

General results of the year.

19. On page 13 a comparative statement is given for the years 1891-92 and 1892-93, of the establishments, income, expenditure and operations of the District Post. There was an increase of 161 in the number of post offices and of 332 in the number of postmen and village postmen, which occurred mainly in the Punjab circle, and an increase of 152 in the number of letter-boxes, chiefly in Burma. In the Punjab, lines of a total length of 1,037 miles were transferred from the District Post to the Imperial Post, but new District Post lines were opened in other circles, chiefly in the Central Provinces, Bengal and Burma, aggregating 724 miles, and on the whole there was a net decrease in District Post lines of 160 miles. There was an increase of 7,96,050 in the number of articles, which includes money orders, delivered by District Post agency, and an increase of 8,99,711 in the number posted in the District Post offices and letter-boxes, while the percentage of articles returned as undeliverable rose very slightly from 4·69 to 4·82. Details of letters and other postal articles sent to, and received from, the District Post are given according to circles in Appendix VII.

District Post.

(a) Includes contributions from Tributary States.
(b) These are dry season distances; during the rains these lines are increased in length.
(c) Includes contributions from Frontier Police Fund, ₹3,144, and the State of Hill Tipperah, ₹300.
(d) Includes lines paid from the revenues of Feudatory States.
(e) Grant made available from Bombay District Post Funds.
(f) Includes contributions from Feudatory States, ₹8,230.
(g) Four letter boxes were less shown in 1891-92.
(h) Final figures subsequently obtained by the Postmaster General.
(i) 38 miles were less shown in 1891-92.

Section V.—Money Orders.

Inland money orders. General results.

20. The total number of money order offices at the close of the year was 10,096, as compared with 9,961 at the close of the previous year. The number of inland money orders issued, including telegraphic money orders but excluding all transactions with Native States, was nearly 8¼ millions of the aggregate value of about 17⅕ crores of rupees, and the commission realised amounted to over 21½ lakhs of rupees. The table in the margin shows the yearly progress made in this branch of business since it was undertaken by the Post Office in 1880. During the year under report there was an increase of 5·84 per cent. in the number of inland money orders issued, of 4·56 per cent. in their value, and of 4·86 per cent. in the amount of money order commission. The average value of an inland money order was ₹20-13-10, against ₹21-1-11 in the previous year.

Increase	454,559	75,07,059	451,952	75,11,866	...	...

*These totals include void money orders charged off in the accounts by credit to deposits.

As in former years, the money order business of the Bengal circle was far greater than that of any other circle. From Calcutta alone, 489,463 money orders were issued for ₹88,82,274, while the number paid in Calcutta was 827,801 of the aggregate value of ₹1,52,75,078. The great difference between the issues and payments in Calcutta was due, as explained in previous years, to the very large use made of the value-payable system by the trading community of that city. Of the total number of money orders paid by the Calcutta General Post Office and its town sub-offices, 572,341, or over 69 per cent., were value-payable money orders. In the North-Western Provinces, Bihar and Oudh, the payments were largely in excess of the issues; whereas in Burma, the Central Provinces, Assam, Sind, and Central India, the issues were more important than the payments. There was a falling off in the number and value of money orders issued in the Sind circle, which is attributed to the temporary cessation of railway works, and in some degree to the prevalence of cholera at one period of the year, in Baluchistan. In other respects there has been no change in the general character of the money order business in the different provinces. It may, however, be mentioned that the commission on money orders issued at Busrah and Bagdad was, at the close of the year, raised from 1 to 2 per cent., to prevent money orders from being used for the purpose of trade remittances.

Revenue money orders.

22. The Revenue money order system continued to make steady progress in the North-Western Provinces and Oudh, and also in the Lower Provinces of Bengal. In the North-Western Provinces and Oudh, the total number of revenue money orders issued rose from 131,737 in 1891-92 to 134,893 during 1892-93; the amount of revenue remitted in this way was ₹30,31,817 as compared with ₹28,10,830 in the preceding year; and the commission realised by the Post Office was ₹38,864 as compared with ₹36,941. The system was most popular in the Gorakhpur, Basti, Azamgarh, and Ghazipur districts of the North-Western Provinces. In the Lower Provinces, comprising the postal circles of Bengal, Bihar, and Eastern Bengal, the number of revenue money orders rose from 165,706 to 180,922, and the amount of revenue remitted from ₹14,39,768 to ₹16,31,709. In Madras, much progress had not been made, and the system was still under trial in the six selected districts of that Presidency: during the year 1,050 revenue money orders were issued for ₹12,308 against 723 orders for ₹8,256 in the previous year, and it seems probable that there will be no sufficient justification for retaining this special system in that Presidency, where the ryots are able to pay all Government demands in their own villages. In the Punjab, the system was confined to the four districts of Delhi, Ferozepur, Lahore, and Sialkot, but since the close of the year it has been extended to the whole province at the request of the local Government. The number of revenue money orders issued in the four districts to which the system was applicable, rose from 1,720 in 1891-92 to 1,902 in 1892-93, but the actual amount of revenue remitted fell from ₹1,29,833 to ₹1,25,488, and the amount of commission realised from ₹1,411 to ₹1,383, which is regarded as an indication that the system has found favour chiefly with petty landholders. In the Punjab also it seems probable that, owing to the character of the land revenue system, the revenue money order transactions will never be very extensive, but the general adoption of the system has been agreed to. In the seven districts of the Central Provinces in which it was tentatively introduced in October 1891, the system has now been made permanent, and during the year under review, 1,884 revenue money orders of the aggregate value of ₹1,20,625 were issued on which the commission realised was ₹1,338. In view of these results the Local Administration has asked that the system should be extended to the entire province.

Remittance of miscellaneous Government dues by money order.

23. There was also a development of the system for the remittance by money order of miscellaneous Government dues in the Lower Provinces of Bengal, and in the North-Western Provinces and Oudh. In the first-named provinces, including the postal circles of Bihar and Eastern Bengal, 67,859 official money orders, of the aggregate value of ₹12,60,468, were paid during the year. by book transfer, as compared with 63,922 orders of the total value of ₹10,99,077 paid during the previous year; while in the North-Western Provinces and Oudh, the number of such orders issued during the year was 17,409 of an aggregate value of ₹3,42,893, as compared with 14,935 orders for ₹2,90,398 issued in 1891-92. Towards the close of the year, the system was made applicable to remittances of forest revenue to treasuries and sub-treasuries in the Lower Provinces, and its extension to the Punjab has already received the assent of the local Government.

Rent money orders.

24. The number of rent money orders issued in the North-Western Provinces and Oudh during the year 1892-93 was 63,862, and the total value of the remittances ₹8,37,593, as compared with 58,997 orders for ₹7,76,181 in 1891-92. The commission realised from these orders was ₹13,297, as compared with ₹12,316 in the previous year. The number of rent money orders issued during the year in the Lower Provinces of Bengal was 44,444, as compared with 40,477 issued in the previous year; the amount of rent paid in this way was ₹5,70,350, as compared with ₹5,17,257, and the commission realised was ₹9,513, as compared with ₹8,592 in 1891-92. The number of rent money orders issued during the year in the Central Provinces was 1,892 of an aggregate value of ₹29,061, as compared with 499 orders of an aggregate value of ₹8,283 issued during the six months of the previous year in which the system was in force, the commission realised being ₹434 compared with ₹121.

Money order business with Native States.

25. The following is a statement of money order transactions with Native States:—

State.	Issues in the State.		Payments in the State.	
	Number.	Value.	Number.	Value.
		₹		₹
Gwalior	42,225	9,28,290	14,109	4,40,498
Patiala	14,946	5,95,266	12,046	4,02,075
Jhind	2,325	93,900	2,610	80,592
Nabha	2,313	68,441	2,581	87,718
Chamba	1,442	49,718	405	17,115
Faridkot	862	24,961	364	11,083
Total	64,113	17,60,576	32,115	10,39,081

Compared with the results of the previous year, there has been a steady increase in the money order transactions with Native States. As noticed in last year's report, the payments made by the Imperial Post Office on account of money orders issued by Native States have been considerably larger than the issues by the Imperial Post Office on those States. Measures were taken during the year to reduce the balances due by Native States on account of their money order business, and some general principles were laid down to regulate remittance transactions of Imperial post offices with Native State treasuries.

Telegraphic money orders.

26. The following statement shows the transactions in telegraphic money orders in each circle, during the year:—

Names of Postal circles.	Issues.			Payments.	
	Number of money orders.	Value of money orders.	Commission realised.	Number of money orders.	Value of money orders.
		₹	₹ a.		₹
Bengal	10,715	13,33,526	13,294 4	14,730	17,99,470
Bombay	4,538	6,00,686	6,332 12	7,280	9,33,185
Madras	15,350	18,83,324	19,444 2	33,065	31,44,237
North-Western Provinces	3,770	3,27,430	3,381 4	11,348	9,15,244
Punjab	3,574	3,45,316	5,087 2	7,276	7,31,376
Assam	4,588	4,80,044	5,066 6	2,292	3,77,861

Central India	888	95,293	890 0	541	78,625
Central Provinces	2,171	3,28,268	3,444 14	1,729	1,79,851
Eastern Bengal	2,559	4,55,155	4,632 8	6,115	7,32,398
Oudh	742	65,979	676 6	4,484	2,90,674
Rajputana	472	49,363	535 10	1,084	1,44,519
Sind	2,698	3,30,220	3,419 4	1,259	2,14,268
Total	1,07,401	1,16,01,119	1,21,637 8	1,07,032	1,15,96,338
Total for 1891-92	97,659	1,06,69,989	1,11,738 1	96,733	1,06,50,322
Increase	9,742	9,31,130	9,899 7	10,299	9,46,016

The number of telegraphic money orders issued was 107,401, representing an aggregate value of over 116 lakhs of rupees, as compared with 97,659 orders in the previous year, aggregating in value over 106½ lakhs of rupees. The commission realised was ₹1,21,638 as compared with ₹1,11,738 realised in the previous year. The average value of a telegraphic money order was ₹108-0-3 against ₹109-4-1 in 1891-92, and the commission amounted to ₹1-0-9 per cent. on the issues the same as last year. As in the case of previous years, nearly half the total number of these orders were issued from Burma, and a large proportion of them were paid in the Madras circle. Looking at the transactions in that circle, it will be observed that the payments are greatly in excess of the issues, and the Postmaster-General, Madras, reports that the business has more than doubled itself during the past five years, and that there is no indication of any abatement in its growth.

The table on the margin shows the number and amount of money orders telegraphed to Bombay to be advised to foreign countries. All the rupee orders, 39 in number, were for Goa. Of the sterling orders, 199 were for the United Kingdom, and the rest were for Italy, Germany, Malta, Victoria, and Sydney.

Year.	No.	Value of sterling order.			Value of rupee order.		
		£	s.	d.	₹	a.	p.
1891-92	187	1,563	0	0	2,560	0	0
1892-93	249	2,176	0	5	2,770	0	0
Increase	62	613	0	5	210	0	0

Foreign money orders in sterling.

27. Foreign money orders for the United Kingdom, for the Colonies and for European Countries and Egypt are issued in sterling, payments being made by the remitters at the rates of exchange fixed by the Post Office from time to time for this purpose. Details of the sterling money order exchanges of the year are given in the table below :—

Countries of Exchange.	1891-92. Orders issued by India. No.	1891-92. Orders issued by India. Amount.	1891-92. Orders paid India. No.	1891-92. Orders paid India. Amount.	1892-93. Average amount of each order	...	3 9 0	...	6 9 10	...	3 6 1	...	5 5 3

* Includes 727 money orders of the value of £2,472 15s. 6d. issued in March 1893, but adjusted in the accounts for April 1893.

The number of money orders issued on foreign countries fell from 45,750 in 1891-92 to 43,490 in the year under report, and the value from £157,922 to £143,738. The orders advised by foreign countries and paid in India show an increase of 581 in number, but a decrease of £11,810 in value. As in 1891-92, the fall under issues by India principally occurs in the exchange with the United Kingdom, and the decrease under payments by India is chiefly in exchanges with Egypt. The falling off in the transactions with the United Kingdom and Egypt is due to the unfavourable rates of exchange, but as regards the business with Egypt, the Presidency Postmaster, Bombay, remarks that "while the loss may be regretted so far as the commission is concerned, there can be no doubt that trade remittances which the loss represents, should, strictly speaking, never have come within the limits of the Postal money-order system." The average value of money orders issued by India in 1892-93 was £3-6-1 against £3-9 in 1891-92, and that of money orders paid in India was £5-5-3 against £6-9-10 in the preceding year. The average of the rates of exchange in force in 1892-93 was about 14¾*d.* per rupee, against 16⅛*d.* in 1891-92. There was a net gain of R6,469 in the year by exchange on money orders exchanged with Continental and Colonial Governments.

Foreign money orders in Indian currency.

28. The details of the year's transaction in connection with foreign rupee money order exchanges are shown below :—

* Up to June 1892 it was a sterling money order exchange. From July 1892 it has been converted into a rupee money order exchange.

Note.—A sum of R1,168-7-11 on account of premium paid for purchase of drafts to Goa was deducted from revenue under the head "Gain by Exchange on Continental and Colonial money orders" in the accounts.

The money order business with Ceylon and the Straits Settlements has grown steadily. The issues in India upon both these places have within the past five years just doubled themselves. It is interesting to note that Ceylon pours into India between 10 and 11 lakhs of rupees a year while receiving in return less than a lakh, the great bulk of the former remittances being, no doubt, made by Madrassis of the lower orders, mostly coolies, who have obtained employment in Ceylon. When the relations between India on the one side and Ceylon and the Straits on the other, become closer, it is probable that this business will assume very large proportions. So far as the outward orders are concerned, the exchange with the Portuguese Settlements is the most important, and as regards the orders issued by China and Japan, the transactions have almost trebled themselves. North Borneo has been added to the list of countries with which there are money order exchanges in Indian currency. Up to June 1892, the exchange with North Borneo was a sterling money order exchange. The average value of a foreign rupee money order issued by India was R37-4-0 against R36-10-8 in 1891-92, and that of an order paid in India was R42-13-0 against R43-7-6 in the preceding year. The commission averaged R1-1-4 per cent. of the value of the orders issued.

Forfeited or void money orders.

29. The usual statement of forfeited or void money orders is given below :—

Balance on the 31st March 1892. No.	Balance on the 31st March 1892. Value.	Void money orders for 1892-93. No.	Void money orders for 1892-93. Value.	Total. No.	Total. Value. * The balance shown last year was No. 2,538, value R56,019-13-0. The difference is due to subsequent adjustments made in the accounts for 1891-92.

The actual amount which lapsed to Government during the year is not known, as the outstanding void money orders are still under careful examination. The total balance standing on the register of forfeited money orders at the end of the year was R60,377 against R56,077 standing at the close of the previous year.

Aggregate money order transactions, Inland and Foreign.

30. The following statement gives an abstract of the entire money order business of the Post Office in the year, including inland and foreign money orders, both ordinary and telegraphic, the foreign sterling money orders being shown in Indian currency at the rates in force when the transactions took place :—

Money orders—Inland, Native State and Foreign for the year 1892-93.	Issues.			Payments.	
	Number.	Value.	Commission.	Number.	Value.

British postal orders.

31. The statement on the margin shows the sales of British postal orders during the year. The total number of orders sold in 1892-93 was 28,529, against 30,625 in the preceding year, and the total value, (including poundage), ₹1,80,116 against ₹1,97,683 in 1891-92. The decrease is principally under the 10 shilling and 20 shilling orders which, however, with the orders for 5 shillings, continue to be most in demand, 21,138 of these orders having been sold during the year under report, while the total number of orders of other denominations was only 7,391. The commission of the Indian Post Office on the total sales amounted to ₹847. A large number of these orders, forming part of the reserve stock, were returned to the London Post Office as spoilt during the year.

Denominations of British Postal Orders.	Number sold during 1891-92.	Number sold during 1892-93.	Decrease.

Total	30,625	28,529	2,096

Section VI.—Savings Banks.

General results of the year.

32. On the following page is given a statement showing in detail, according to postal circles, the Savings Bank transactions of the year as compared with those of the previous year. At the close of the year there were 304 Head Banks and 6,104 Sub-Banks, or a total of 6,408 offices performing Savings Bank business, against 6,452 in the preceding year. The decrease of 44 offices was due to the withdrawal of Savings Bank powers from certain small branch post offices in the Punjab, at which the transactions were nominal. There are now more than half a million depositors in our banks, the actual number at the close of the year being 520,967 as compared with 463,453 at the end of 1891-92. This gives an increase of 57,514 or 12·40 per cent., 166,135 accounts having been opened and 108,621 accounts closed during the year under report. The amount deposited in the year was 414½ lakhs of rupees as compared with 403½ lakhs in 1891-92; the amount withdrawn was 365⅝ lakhs as compared with 356⅓ lakhs in 1891-92; and the interest paid was a little under 27 lakhs as compared with 24 lakhs in 1891-92. The total amount standing at the credit of depositors was nearly 782 lakhs of rupees, or an increase of 76 lakhs, and the average balance of each account was ₹150·08 as compared with ₹152·32 in the previous year. Of the 520,967 active accounts at the end of the year, 22,253 were security deposit accounts, with a balance in favour of depositors of over 43⅓ lakhs of rupees; 4,544 were Public, Regimental and Police accounts with a balance of 32½ lakhs; and of the remaining 494,170 active accounts, 69,550 were opened on behalf of minors, by parents and relatives, with a balance in their favour of above 1⅓ crores of rupees.

Statement showing the Post Office Savings Bank Transactions during 1892-93 compared with 1891-92.

[Arranged in the order of aggregate balances as shown in column 13.]

* Inclusive of ₹86,73,708, the aggregate balance of accounts transferred from one Post Office to another.

Incidence of Savings Bank work according to circles.

33. Bombay continued to head the circles in having the highest number of accounts open and the largest balance in favour of depositors at the close of the year. In the Rajputana and Central India circles the average balance for each account increased and a very slight increase also occurred in Bengal. In all the other circles there was a decrease. The amount is highest in Bombay, Sind, Central India and the Punjab, and lowest in Madras. As noticed in last year's report, the proportion of accounts opened on behalf of minors was highest in Bombay, and in Sind the proportion of deposits on account of minors to the total transactions continued to be abnormally high as compared with other circles.

Depositors, Europeans and Native of India.

34. The statement below shows the number and value of accounts held by Europeans and Eurasians as compared with the number and value of accounts held by Natives of India. It will be seen that nearly 90 per cent. of the total number of accounts were held by natives of this country, and that Bombay and Madras, as noticed in last year's report, have the largest number of European and Eurasian accounts.

Depositors according to occupation.

35. In the following statement depositors are classified according to their occupation. Those included in class VI, who have no occupation, or whose incomes are derived from others, or from their own property, now hold the highest number of accounts, *viz.*, 40 per cent. of the whole. Next in importance are the professional classes, with fixed and variable incomes. There was an increase during the year of 19·22 per cent. in the domestic class, who now form more than 14 per cent., as against 13 per cent. in the previous year. The largest percentage of increase was in the industrial class, *viz.*, 26·51.

Investment in Government securities.

36. Under Government securities during the year there were 270 purchasers, whose investments represented a sum of R2,62,100, as against 179 purchasers, who invested R1,08,900 in the preceding year. The sales numbered 26 against 34 in 1891-92. In the Bombay circle there was an unusual increase in purchases and a decrease in sales, which were probably due to a temporary feeling of insecurity caused at the time by the failure of the Oriental Bank. The value of the securities held in the custody of the Comptroller General at the close of the year was R3,97,400 compared with R3,68,200 on the 31st March 1892.

Section VII.—Insurance.

Insurance business.

37. The progress of the insurance business of the Post Office since it was first undertaken is given in the following statement :—

Year.	Letters.		Parcels.		Total.		Insurance fees.

1892-93	89,845	2,36,54,593	173,966	4,94,06,117	263,811	7,30,60,710	1,93,250
Percentage of increase (+) or decrease (—)	+1·24	+2·10	—1·64	—7·43	—·67	—4·54	—4·07

It will be seen that there was a falling off in the total business of the year both as regards the number and as regards the value of the articles insured, but this was entirely caused by the decrease in parcel insurance transactions. The total number of insured parcels was 2,903 less than the number in the previous year, and the total value stood at 494 lakhs, as compared with 533¾ lakhs of rupees in 1891-92. It was anticipated that the limit of value of Rs. 1,000 for postal insurance, introduced in 1890, would more immediately affect the parcel business, but even as regards this class of business the results have been very different in different parts of the country. The chief decrease occurred in Bombay where the number of insured parcels fell from 48,244 in 1891-92 to 40,240, and in Bengal where the number of parcels was 2,825 less than in the previous year, while in Madras there was a striking increase in the number and value of these parcels. The Postmaster-General believes that this result is in some measure due to the fact that certain traders in Southern India were collecting gold which had been hoarded in various forms, and sending it to Bombay. The scarcity which prevailed during a part of the year in the southern districts of that Presidency would have had the effect of bringing out hoarded gold, and this, and the continued appreciation of the metal, are thought to account for some part of the increase in the parcels of bullion insured in the Madras circle. The parcel business done in Bombay was more important than in any other circle, notwithstanding the decline in the actual transactions of the year. The number of parcels insured in Madras was 35,562, the number in Bengal was 25,030, and perhaps the most remarkable figures, so far as the other circles are concerned, are those of Rajputana where 14,000 parcels were insured as compared with 13,000 in the previous year.

As regards insured letters, there was a general increase in the business of the year. The total number rose from 88,741 in 1891-92 to 89,845, and the

insured value from 231½ lakhs to 236½ lakhs of rupees. Most of the insured letters still contain currency notes, and about a third of the whole transactions of the year took place in Madras. At the same time there is no doubt that numerous remittances are still made in different parts of the country in uninsured letters, and as an illustration of the confidence commanded by the system of ordinary registration, it may be mentioned that an uninsured registered letter, which, with a number of others, was accidentally damaged by fire while in transit through the post, was found to contain currency notes of the value of three lakhs of rupees. The contents of the letter were in no way injured and were safely delivered at their destination. In the desire to save a small sum in postal fees the public frequently neglect the most reasonable precautions. An ordinary letter in a very flimsy cover which was torn in the post contained one hundi in English for ₹1,200 and five hundis in Hindi for sums not ascertained, while it came to light, in the course of an enquiry into a case of theft of letters, that a Native firm in Bombay had sent the halves of currency notes for ₹10,000 in two separate unregistered letters to the same address on the same day. In order to minimize as far as possible the temptation to fraud to which certain class of servants of the Department are constantly subjected, it was decided to reduce, with effect from 1st January 1893, the limit of value of insured articles deliverable by postmen and village postmen to ₹250. The Inland Insurance system was extended during the year to the Aden post office and the Postmaster-General, Bombay, writes as follows of the first year's experience :—

"Thirty-eight letters were posted for India of the insured value of ₹9,957-4-0, while the number of parcels posted, which in 1891-92, when the office could only insure parcels for the United Kingdom, was 129, has now risen to 334. Insured parcels posted at Aden for India contain jewellery, pearls, amber and ambergris, a substance said to be obtained from the diseased liver of the whale, which is occasionally imported from Makalla. This substance is said to possess the same properties as musk, and is valued at ₹25 per tola."

The average value for which each letter was insured during the year 1892-93 was ₹263 as compared with ₹261 in the previous year, and the average value for which each parcel was insured was ₹284 against ₹301 in 1891-92.

Claims for compensation.

38. There were 35 claims for compensation for the alleged loss of insured articles during the year under review, as compared with 28 cases in each of the two previous years. In respect of 33 out of the 35 claims the liability of the Post Office was admitted, the loss having been caused by fraud or neglect on the part of servants of the Post Office in the case of 17 articles, by accident in 2 cases, and by highway robbery in regard to the remaining 14 articles. Of these 14 insured articles, 12 (of the aggregate value of ₹4,673) were lost in three cases of highway robbery of the mail which occurred in Native States. In the first case the loss, amounting to ₹1,740, was recovered from the Durbar; in the second case ₹2,000 was recovered after the close of the year, and in the third case no claim was made against the Native State concerned. A statement of the cases in which compensation was paid during the last two years is given on the margin, and it will be seen that the payments by the Post Office in the year under report amounted only to ₹2,148-13-6 or 1·11 per cent. of the total amount realised as insurance fees, the

Cases in which compensation was paid.	1891-92. No.	1891-92. Amount.	1892-93. No.	1892-93. Amount.
		₹ a. p.		₹ a. p.

Amount of compensation paid	...	4,713 8 0	...	2,148 13 6

percentage in the previous year being 2·32. In two instances compensation was refused, as the Post Office declined to accept responsibility, the insured articles having been delivered in both cases in perfectly good condition, and there being good reason to believe that the contents, said to have been abstracted, were not enclosed when the articles were posted.

Section VIII.—Value-payable System.

Value-payable post.

39. The development of the value-payable business since its introduction in 1877 is shown in the marginal table, and it will be seen that the characteristic progress of this branch of Post Office work has been fully maintained during the year under report. The total number of articles of all kinds sent through the post under this system was 1,415,595, as compared with a total of 1,251,004 in the previous year; the total amount specified for recovery from the addressees was more than 151½ lakhs of rupees against 134½ lakhs, and the commission realised was over 2¾ lakhs against nearly 2½ lakhs, in the previous year. There was thus an increase of 13·15 per cent. in the number of articles, of 12·74 per cent. in the value specified for recovery, and of 13·46 per cent. in the commission realised. Nearly half the entire business of the year was transacted in the Bengal circle, which, so far as the value-payable system is concerned, practically means Calcutta. Out of a total of 594,427 articles sent by this system in the whole of the Bengal circle, 572,341 were actually posted at the Calcutta General Post Office and its town Sub-offices; and of the 62⅘ lakhs of rupees recovered from the addressees of value-payable articles, over 60½ lakhs were paid to tradesmen in Calcutta. These figures, it may be added, show an increase during the year of 2½ lakhs of rupees in the cash business carried on between Calcutta firms and their constituents in the interior by means of the post. In Madras the value-payable business has almost doubled itself within the last five years, and the present year's experience again proves that the use of the system in that Presidency is mainly for the purpose of obtaining articles from other parts of India. The value-payable business with Ceylon is steadily increasing. During the year, 7,095 value-payable articles, of the aggregate value of ₹82,893, on which a commission of ₹1,079 was realised, were despatched from India to Ceylon, as compared with 5,562* articles in the preceding year, while 177 articles of the aggregate value of ₹2,620 were received from Ceylon as compared with 150* articles of the aggregate value of ₹2,083*, received during the previous year. The system has only been in force for two complete years, and it will be observed that India already supplies Ceylon with a considerable quantity of goods, so that it may confidently be expected that the closer postal relations with that country, which I have consistently advocated, will bring increasing benefits to India, especially when the daily steamer service, which has lately been arranged for, is established between Tuticorin and Colombo.

fied for recovery from

At the Aden post office, to which the value-payable system was extended at the same time as the Inland Insurance system, 53 parcels and 2 unregistered

* Revised figures.

packets of the aggregate value of ₹1,052 were posted, most of the parcels, it is understood, containing cigarettes.

Classification of value-payable articles.

40. In the statement on the margin details are given of the different classes of articles sent through the post as value-payable. Compared with the figures of the previous year, the result is an increase of 8·20 per cent. in value-payable parcels, of 13·67 per cent. in value-payable railway receipts, of 11·51 per cent. in value-payable registered letters and packets, and of 18·47 per cent. in value-payable unregistered packets. The average value of each article, calculated on the whole business of the year in all classes, was ₹10-11-4 as compared with ₹10-12-0 in the preceding year, and except in the case of railway receipts, the average value of which rose from ₹24-11-2 to ₹26-5-11, the average commission on each article was practically the same as in the preceding year.

	Number.	Value.	Commission.	Average value of each article.	Average commision on each article.

Section IX.—Miscellaneous.

Post Office Security Fund.

41. The statements below show the position of the old and new security funds of the Department. The new fund was created in 1883, and all subscriptions realised are credited to it, whereas all charges are debited against the old fund. The balance at the credit of the old fund on the 31st March 1893 was ₹2,994 against ₹23,892 on the same date of the previous year, while the balance at the credit of the new fund, excluding the value of Government securities purchased in favour of the fund, had risen from ₹3,00,540 on the 31st March 1892 to ₹3,64,866 at the close of the year under report.

Complaints by the public.

42. The number of complaints made by the public, which came to the knowledge of the heads of postal circles, was 8,671 as compared with 8,306 in the previous year. These figures represent all complaints made by the public to heads of circles and to postmasters of Presidency offices, as well as all complaints received direct by postal superintendents and others and subsequently reported to heads of circles, and may be accepted as embracing not only all the serious complaints, but also the great majority of complaints which are not mere enquiries. There was an increase of 4·39 per cent. in the total number of complaints received during the year, but more than two-fifths of these proved to be groundless. Special instructions were issued during the year as to the necessity for thoroughness in the matter of enquiries regarding complaints, and the following extract from the circular orders on the subject may be quoted here :—

"As a first step towards this end, it requires to be more generally realised that complaints are, as a rule, due to some mistake or neglect on the part of postal servants that has given rise to dissatisfaction or anxiety. That the Post Office has at times to bear a good deal of unjust blame is, of course, true, but the majority of complaints are made by persons who have legitimate cause for feeling aggrieved. It must be remembered that, although the transactions of an individual with the Post Office may be unimportant in themselves, they touch very closely his personal comfort and convenience, and if we are to retain the confidence of the public, it is most desirable that complaints relating to these transactions should be treated with consideration, and that officials of the higher grades should prove by their action that the profession of the Department that well-founded complaints are welcomed, as furnishing a check on defective procedure, and on want of care, is an honest profession."

In many cases it is difficult, if not impossible, to carry through enquiries to a successful issue, especially when they relate to the loss of unregistered letters. But what has been particularly enjoined on the officers of the Department is that the circumstances of each complaint should be looked into with real care and intelligence so that the enquiry may be directed into the right course, and that a constant check should be kept on the progress of the enquiry. It has also been pointed out that when a number of individual complaints are received, from time to time, regarding the same post office, their collective weight must be taken into account as showing that something is wrong. Weekly returns of complaints are now submitted by all head offices to supervising officers or the heads of circles, and the whole subject is receiving careful attention.

Reckless complaints and want of care in posting letters.

43. It has already been stated that nearly 42 per cent. of the year's complaints were found to be groundless. Some number of these were due to misunderstanding, or were only proved to have no foundation after enquiry had been made, but there is always a certain proportion of reckless complaints. Among the instances of such complaints, which have been brought to notice, the following may be mentioned. A European official complained that he had not received a box of cigarettes which had undoubtedly been despatched from Port Said three months previously, and on the production of his own receipt for the box explained that it had been put away without his knowledge by a servant. But perhaps the most remarkable case of attributing blame to the Post Office, without verifying facts, was that of a secretary to a charitable institution who complained that one of the recipients of his charity, to whom monthly remittances were sent by means of money orders, had been subjected to hardship, because the postmaster at the place of payment had only paid these orders after an interval of several months. The receipts for the money orders were asked for, and an examination of them showed that regular monthly remittances had never been sent, and that the charges against the postmaster were absolutely devoid of justification. But quite apart from reckless complaints, there is reason for thinking that the miscarriage of a certain number of letters is due to the fact that any servant or hanger-on of an establishment is allowed to undertake the duty of posting them. It is a matter of common experience in many places in this country to meet coolies wandering about with letters, to be delivered by hand, and appealing casually to

any passer-by for suggestions as to what should be done with them, and persons of the same class are only too frequently employed to take letters to the post. This want of care is, at any rate, much more marked in India than elsewhere, and it seems desirable that public attention should be directed to the importance of seeing that more trustworthy messengers should be employed for the purpose of posting letters. In this connection another incident from the experience of the year under report may appropriately be mentioned. A European, while staying with a friend, sent to the post an unregistered letter, containing a number of currency notes, which never reached its destination. The posting was entrusted to an old servant of the house who was said to be absolutely trustworthy, and the sender could only be informed that he had broken a plain rule of the Department in sending currency notes in an unregistered letter, and that the loss, if there had been a loss, was mainly due to his own action. Some months later, however, there were independent reasons for suspecting the honesty of this servant, and his house was searched by the police with the result that the missing notes were found in his possession.

Complaints regarding special classes of articles.

44. The number of complaints received during the year regarding registered letters, ordinary parcels, insured articles, and value-payable articles is shown in the statement below. The total number of these complaints rose from 465 in 1891-92 to 496 in 1892-93, and the number of cases in which blame was established against the Post Office was 150 as compared with 128 in the previous year, while there was practically the same number of cases in both years in which complaints proved groundless, or in which no definite conclusion was arrived at, or which were pending at the close of the year. Against the increase in the number of complaints it should be noted that there was an increase of about 37,000 in the number of registered letters, of about 61,000 in the number of parcels, and of nearly 165,000 in the number of value-payable articles; there was a slight decrease in the number of insured articles while the number of complaints rose from 12 to 17. Complaints which proved to be well founded were made by the public in respect of only 73 out of 6,453,773 registered articles, 43 out of about 2,170,715 parcels, 17 out of 2,63,811 insured articles, and 17 out of 1,415,595 value-payable articles.

Offences by servants of the Post Office.

45. The offences punishable by law, which were established against servants of the Post Office, are shown in Appendix VIII, and a summary of the figures is given on the margin. Of the 282 offences 35 were cases of misappropriation of office cash, 121 were money-order frauds, 14 were savings bank frauds, and most of the remaining

	1891-92.	1892-93.
Number of legal convictions . .	150	176
Number of cases punishable departmentally	110	106
Total .	260	282

offences were cases of thefts from the mails. Of the offenders, 75 were departmental postmasters and clerks, 38 were extraneous agents in charge of post offices, 92 were postmen and village postmen, and 9 were mail carriers. The total amount of defalcation and losses due to the dishonesty or negligence of Post Office servants was ₹38,712-6-2 (as compared with ₹23,990-4-9 in the previous year), of which ₹16,636-13-6 was recovered from the offenders or their sureties, ₹4,291-0-10 was written off against the guarantee fund, ₹17,722-10-4 remained unadjusted at the close of the year, and ₹61-13-6 was debited to Government as actual loss. Of the amount shown above as charged to the guarantee fund ₹2,098-5-9 was written off provisionally to enable the accounts to be adjusted during the year under report, and it is probable that the greater portion of this sum will be recovered. Of the total amount of defalcations by postal servants ₹11,651-12-2 was misappropriated by extraneous agents in charge of post offices, of whom there are now 3,932. They are not required under the general rules of the Department to furnish security, though in one or two circles this has been sanctioned, but they all subscribe to the guarantee fund. Of this amount ₹5,863-12-4 was recovered, ₹950-6-6 written off to the guarantee fund, and ₹4,837-9-4 remained unadjusted at the close of the year.

Special instances of fraud by Post Office servants.

46. Two serious frauds in connection with the Post Office Savings Bank were committed by postmasters in the Bengal circle during the year, and also two serious frauds in connection with the value-payable system. The latter are described as follows by the Postmaster General, Bengal:—

"Abala Bandhab Mukerjee, head master of the Kusumgram school in the Burdwan district, was appointed in August 1892 to act for a short time as postmaster of the branch post office, Kusumgram, during the absence of the permanent postmaster, the head pundit of the school. During the 13 days that Abala Bandhab Mukerjee was in charge of the post office he wrote to various well-known firms in Calcutta and elsewhere, ordering jewellery and numerous other articles to be sent to him by value-payable post. Some of the articles were ordered by the officiating postmaster without authority in the name of a neighbouring zamindar, living in the jurisdiction of his post office, and the rest of the goods were ordered in his own name with the added designation of secretary of a co-operative store and agency which had no existence. When the articles arrived, the branch postmaster took possession of them without paying the sums specified for recovery on delivery and then absconded. The total value of the articles thus misappropriated was ₹3,596, but all of them except a few articles to the value of ₹305-9-4 were subsequently recovered by the police. A reward of ₹500 was offered by the district authorities for the apprehension of the branch postmaster, but he has not yet been arrested. In the other case, Bolai Chand Rai, sub-postmaster of Chilmari in the Rungpur district, absconded on the 19th February 1893, after embezzling ₹1,691 of the cash and collections of the office. Two days before he absconded he misappropriated three value-payable insured parcels of sovereigns which he had himself under a false name ordered from a firm in Calcutta. The amount specified for recovery on the three parcels was ₹1,682, and although Bolai Chand Rai did not pay anything when he appropriated the parcels, he issued value payable money-orders in the usual course, and the senders of the gold were duly paid. By this device the absconding sub-postmaster avoided any complaint from the Calcutta firm while defrauding Government and increasing his own illegal gains by the value of the sovereigns sent in compliance with his order. A reward of ₹200 has been offered for the apprehension of Bolai Chand Rai, but he too up to now has evaded arrest."

There was also a serious case of misappropriation of money by a village postman of Yellamanchilli in the district of Vizagapatam in the Madras Presidency. It appears that he had been in the habit of misappropriating sums entrusted to him for payment of money orders, but as he received fresh funds he made a practice of paying the old orders, so that the matter did not come to light for some time. In the various cases against him he was sentenced to an aggregate term of imprisonment for 7 years. The striking feature in this case is that when the postal inspector visited some of the villages served by the village postman he received favourable replies to the enquiries as to his behaviour, and

the man was so popular that the residents of these villages were even willing to engage a pleader for his defence. Two postmasters committed suicide during the year. The sub-postmaster of Wun in the Central Provinces having misappropriated the value of certain money orders and savings bank deposits and his office cash to the amount of ₹696-9-9 drowned himself in a well on the day on which the postal superintendent arrived to inspect the post office. The sub-postmaster of Talup in the Lakhimpur district of Assam, who had embezzled Government money to the extent of ₹610-8-0 also committed suicide by taking an overdose of opium, after the arrival of the postal superintendent to inspect the post office.

Offences by persons not belonging to the Post Office.

47. Apart from these cases, three frauds in connection with the money order business and three frauds in connection with the Savings Bank were committed by persons not belonging to the Post Office. In one case the payee of the money order was a boy, and payment was improperly obtained by a resident of the same village, who knew that this money order was expected, and brought another boy to personate the real payee. In the second case the false personation was done by a cousin of the real payee who resided at the same address; while in the third case the swindler bore a similar name to that of the person for whom the money order was intended, and had had the letter of advice delivered to him owing to the similarity in name. In the first two cases the impostors were convicted and punished but in the last case the false personator had left the place before the fraud was discovered. In one of the savings bank cases the depositor altered the balance in his pass-book from ₹2-13-0 to ₹102-13-0 and fraudulently withdrew ₹100. The depositor has hitherto evaded arrest, although a warrant and proclamation have been issued against him. Excluding cases of highway robbery, which are separately dealt with, there were 24 cases of house-breaking and theft of Government money from post office safes and mails, as compared with 27 in the previous year; the total amount stolen was ₹3,441-15-8, of which ₹2,475-7-9 was recovered, ₹69-0-11 debited to Government as actual loss, and ₹897-7-0 was outstanding at the close of the year.

Highway robberies and attacks upon the mail.

48. From the abstract given in the margin it will be seen that there were 27 attacks by highway robbers on the mail during the year, as compared with 31 in 1891-92. Of this number 23 occurred in British territory and 4 in Native States. The following statement shows the postal circle and the district or Native State in which each attack on the mail was made. It will be seen that there was a satisfactory decrease in the number of cases in the North-Western Provinces and Bihar, only 8 robberies having occurred in the former and one in the latter circle, as compared with 13 and 5 respectively in the previous year; but, on the other hand, the number of mail robberies in Madras rose from 2 to 9. The Punjab, Central Provinces, and Rajputana had 2 cases each, while there was only one case in each of the

Character of mail robberies.

49. In three cases only were the contents of the plundered mail of any considerable value. In the first case, which occurred in the Travancore State, the mail contained four parcels, which had been insured for ₹933, but no compensation was claimed from the State, because the spot, where the mail was attacked, was only just within the Travancore boundary, and had apparently been purposely selected on account of the cover afforded by trees standing there, and because the offenders belonged to neighbouring villages in British Territory. In the second case, which took place in the Marwar State, the mail contained a cash remittance of ₹150 and four parcels insured for ₹1,740. The loss was made good by the State. In the 3rd case which occurred in the Jeypore Native State, the mail contained four parcels, insured for ₹2,000, and the loss was made good after the close of the year under report. In 8 out of the 27 cases the entire mail, and in 10 other cases a portion of the mail, was recovered, and the total loss of Govern-

ment money amounted to only R363-14-3. In ten cases prosecutions were instituted but only four convictions were obtained. In the North-Western Provinces, police constables were implicated in two mail robberies; in one instance a conviction was secured, but in the other, though the robbery, which was committed by four men dressed as police chowkidars, is supposed to have been planned by a constable with the object of getting certain superior officials into trouble, there was not sufficient direct evidence to warrant a prosecution. On neither occasion was there anything of value in the mail. In the single case that occurred in Bengal the robbery is believed to have been committed by the friends of a peon who was being prosecuted at the time for making a false report that he had been robbed, with the object of showing that robberies were not of unusual occurrence in that locality. In one of the Madras cases, the intention of the robbers was to carry off rice which they believed to be stored in a cultivator's hut, and they only turned their attention to the mails because the runner happened to be waiting in this hut, instead of the stage hut. and they were disappointed in their search for the rice. As they found nothing of value on opening the mail bags they left the contents intact, and contented themselves with beating the runner. In another Madras case the object of the robbers is supposed to have been to kill the runner, in order to get a rival faction into trouble. In 24 cases the mail carriers or their escorts were severely beaten or wounded, but no deaths were caused in the actual cases of highway robbery. There were six cases, however, of unsuccessful attempts to rob the mail, in one of which the mail carrier was killed. He was attacked from behind, felled to the ground by a blow from an axe on the back of his neck, and so seriously wounded that he died a few days later. With the greatest courage, however, despite his wounds, he succeeded in retaining possession of his mails. The mail from Demagiri for Lungleh in Eastern Bengal, while being conveyed under the escort of two sepoys, was attacked on the 10th April 1892 by some Lushai raiders. One of the mail runners was wounded, but the escort was re-inforced by some other sepoys and the raiders were beaten off. Two of the attempts were only technical attempts at highway robbery. In one instance a mail tonga was stopped and the driver and passengers ill-treated, though the mails were not touched, and in another a village postman, while returning from his beat, was assaulted and roughly handled, but not actually robbed.

Casualties of the year.

50. As usual, there were various casualties during the year, chiefly owing to flood and fire. Two village postmen were drowned, one in the Darjeeling district, and the other in Bihar, while attempting to ford streams that were in flood, and the mail cart, that runs between the Yaru-karez railway station and Pishin, was swept away by a sudden torrent while crossing the bed of a river on the 6th August 1892, the whole of the mails being lost. In April 1892, a boat conveying mails and passengers to the shore at Janjira on the Bombay coast was capsized, and five of the passengers were drowned. The mail guard, however, who was a strong swimmer, managed to reach the shore and saved the mail bag. In the following month a boat carrying mails to be placed on board the Cachar steamer was upset by a squall on the river Padma in the Faridpur district, but on this occasion also the mail guard escaped with his life, and was successful in saving most of the mails, though he was carried 4 miles down the river before he could gain the bank. In September 1892, a mail carrier in Burma while crossing one of the mouths of the Irrawaddy in a small boat was blown out to sea by a storm. He was picked up by a steamer bound for Tavoy, after three and a half days exposure, by which time the boat had drifted 50 miles off the coast and was on the point of sinking, and fortunately recovered. On the 23rd January 1893, the M.M. Steamer "*Niemen*" was wrecked off the coast of Ceylon near Trincomalee, and the mails which she

was carrying from Calcutta and Madras for Colombo and foreign places were all lost. Fires occurred during the year at fourteen post offices in different parts of the country, many of which were only bamboo and mat structures, and in most cases the buildings were destroyed, though there was no serious loss of property. In addition to these casualties, a mail runner was killed in the Baroda State in a passing altercation with two other men, and in two instances wild elephants were instrumental in destroying or detaining the mails. On the night of the 31st May 1892, the parcel mail runners on their way to Dimapur in Assam found the road blocked by a herd of wild elephants and had to abandon their mails and save their lives by flight. The mail bags were recovered the next day, but the contents of one of them, which had been trampled on, had been entirely destroyed. The mail line to Baksa-Duar in the Jalpaiguri district, Bengal, was also rendered unsafe for a number of days by the presence of wild elephants which killed several persons and demolished the mail runners' huts at one of the stages.

Post Office staff.

51. The staff of the Imperial Post Office in the different grades is shown circle by circle in Appendix IX, and an abstract of this Appendix is given on the margin. The total numerical strength of the Post Office staff was 46,857 on the 31st March 1893, as compared with 46,029 on the same date of the preceding year, the largest increase being under the head of extraneous agents. This was chiefly due to the opening of a number of new branch offices in the Punjab circle, almost all of which were placed in charge of school-masters. The increase under other heads is attributable to the general development of the work of the Post Office. Our postal staff, at present, comprises few women. Except in Burma it would be impossible, with regard to the condition of society with which we have to deal, to employ Native women in charge of post offices, and only a few European or Eurasian women are actually included among the servants of the Department. It may be noted, however, as a matter of interest, that, for the last twenty years, a Native woman has delivered letters at Sahiwal in the Shahpur district of the Punjab, with credit to herself and to the entire satisfaction of the inhabitants. She was originally appointed to discharge this duty, on payment of one pie a letter, when the postal arrangements of the district were managed by the Deputy Commissioner, and was subsequently brought upon the regular establishment of the Post Office. She is said to be quite illiterate, but her wonderful knowledge of the place and the residents enables her to deliver letters, when once the address has been read to her, with perfect correctness, and she has always been a general favourite.

Postal Officials.	1891-92.	1892-93.
Directorate and Heads of Circles and Account Office	23	24
Superintendents and Inspectors of Post Offices	396	395
Postmasters, including Deputy, Assistant, Sub, and Branch Postmasters	5,057	4,986

Clerks	6,560	6,740
Postmen and other servants	13,158	13,304
Road Establishment	12,383	12,477
Village Postmen	3,750	3,837
Signallers, Clerks and other servants employed for telegraph work in Combined Offices	1,047	1,162
TOTAL	46,029	46,857

Cost of printing by private presses.

52. The charges incurred during the year on account of printing work done by private presses amounted to R33,311, as compared with R35,655 in 1891-92 and R52,432 in the preceding year. Some unusual expenditure was incurred in the Bombay and Assam circles, owing to the printing of the revised Savings Bank rules in vernacular, and to the reproduction of a collection of circular orders; but, notwithstanding this, the total charges for the year were R2,344 less than the charges incurred in 1891-92.

Section X.—Non-Postal Branches of the Post Office.

Telegraph work of the Post Office.

53. During the year under review 102 combined post and telegraph offices were opened, and 11 such offices were closed. There was, therefore, an increase of 91 in the total number of combined offices, as compared with an increase of 65 during the previous year. Of the 102 new combined offices, 93 were at places which had previously been without a Government telegraph office, and 68 at places where there had previously been no Government or Railway telegraph office. The greatest progress in this direction during the year was made in the Madras circle, where 22 new combined offices were opened, while 15 new offices were opened in Bengal, 13 in Bombay, 11 in Assam and 10 in the Central Provinces. At the close of the year under report there were altogether 1,100 Government telegraph offices open, of which 255 were Departmental telegraph offices, and 845 were combined post and telegraph offices. During the year 166 servants of the Post Office qualified as signallers, while 94 were still under training when the year closed. The number of post offices under the charge of telegraph masters or regular signallers of the Telegraph Department was 8 as compared with 10 in the previous year.

Traffic statistics of combined offices.

54. The statement given below shows the traffic statistics of combined offices under the Post Office according to postal circles, and it will be seen that Madras again heads the list with a total of 174 combined offices and a revenue of over 2¾ lakhs of rupees derived from telegrams. On the total figures of the 845 combined offices, there was an increase of 94,654, or 8·93 per cent., in the number of messages sent, and 105,159, or 9·58 per cent., in the number of messages received. In revenue there was an increase of ₹57,061, or 4·96 per cent., over the figures of the previous year, while the total revenue from messages sent from combined offices exceeded the expenditure on the establishment of these offices by ₹9,13,147.

Names of Circles.	Number of combined offices open on 31st March 1893.	Total cost of Postal Establishment debitable to the Telegraph Department for working combined offices during the year.	Number of Messages.			Revenue realised during the year on sent messages (Inland and Foreign).	Remarks.
			Sent Inland and Foreign (excluding Free Messages).	Received.	Transit.

* Excluding 54,632 free messages.

Telegraph receiving offices.

55. In addition to the work done by combined offices, as shown in the statement above, the Post Office also renders assistance to the Telegraph Department by booking at all other post offices, except a few branch offices, telegrams tendered by the public, and sending them by post to the nearest telegraph office for onward transmission by wire. During the year under report there was an increase in the number of receiving offices at which telegrams were booked, the number being 1,787 at the close of the year as compared with 1,709 at the close of 1891-92. The revenue realised was slightly larger than in the previous year, being ₹38,073 as compared with ₹35,021,* while the number of messages was almost exactly the same in the two years, *viz.* 40,746 in 1892-93 and 40,731 in 1891-92.

The number of messages collected by post offices in the Persian Gulf on account of the Indo-European Telegraph Department was 380 against 372 in 1891-92 and fees to the amount of ₹2,635-1-0 were realised as compared with ₹2,246-10-0 in the previous year.

Post Office carrying agency and passenger service.

56. The management of the Government carrying agency, or bullock train, and passenger service between Kalka and Simla was attended with a good deal of difficulty during the year. There was great scarcity of grass before the rains set in, and subsequently the price of grain ruled high for several months, while a serious break in the road defied engineering skill for some time and was a constant source of anxiety. The bullock train receipts exceeded those of the previous year by ₹16,380, but the passenger service revenue showed a falling off of ₹12,057. This, however, was more apparent than real, as a large sum was received in 1891-92 for the use of a number of vehicles and horses from the Simla line on the occasion of the Viceroy's visit to Kashmir. As regards the charges it has been found impossible, in practice, to dissociate the working of the two services, and the separate charges debited in the past to the bullock train and passenger service have been largely arbitrary. The results of the year, therefore, can only be judged on the joint cost of the two services. The total charges were ₹71,362 in excess of the total receipts, as compared with an apparent deficit of ₹54,909 in 1891-92, when, however, the receipts were swelled by the special payment already referred to, and of ₹75,925 in 1890-91. The charges would have been materially less, had it not been that compensation had to be paid to the line contractors on account of the high prices of grass and grain, and that unusual expenses had to be incurred on account of the break. It may be added that some number of transport bullocks were employed on the line, in pursuance of Government policy of employing army transport in civil departments in times of peace.

Receiving Salt-revenue at post offices.

57. The system of receiving salt-revenue at post offices remained in force throughout the year in the North-Western Provinces and Oudh and in the Punjab, but the conditions under which it is worked were materially modified with effect from the 1st October 1892. Since that date salt-revenue has only been received at post offices away from treasury and sub-treasury stations, where the work can be undertaken with due regard to considerations of postal convenience and safety, and a charge is made for the services rendered by the Department. The object of the change was to put a stop to the receipt of large sums of money by post offices at places where there were treasuries, and it was pointed out in last year's report that it was to be expected that the sums paid in at post offices in the interior of districts would probably be very small, though petty salt traders, living away from treasury stations, would be given the convenience of having their money received on the spot on payment of a small percentage. The modified system was extended, at the instance of the Commissioner, Salt Revenue, Northern India, to the Central Provinces, Rajputana and the Central India Agency with effect from the 1st January 1893, but was only taken advantage of to a very limited extent. The total amount received by

* In the Annual Report for 1891-92 this amount was shown as ₹35,860, owing to an incorrect return having been furnished by one of the postal circles.

the Post Office throughout the year was about 49 lakhs of rupees, as compared with 85 lakhs of rupees in the preceding year, but the greater part of this sum was paid in during the first two quarters of the year in the North-Western Provinces and Oudh and in the Punjab. The actual payments during the last half of the year did not amount to much more than $3\frac{1}{4}$ lakhs of rupees.

Section XI.—Financial Results.

Receipts and Expenditure according to departmental accounts.

58. The receipts and charges of the year as shown in the Post Office Accounts are given in detail in Appendix X under two main heads, Postal Service proper and Non-postal branches, and a summary of the results will be found in the statement below:—

	Receipts.		Charges.	
	1891-92.	1892-93.	1891-92.	1892-93.
	₹	₹	₹	₹
1. Postal Service Proper	1,41,27,843	1,45,46,185	1,14,90,195	1,15,56,908
2. Non-Postal Branches—				
(*a*) Bullock Train	71,330	96,185	1,35 516	96,185
(*b*) Passenger Service	1,71,172	1,58,854	1,71,172	1,58,854
(*c*) Mail Steamer Subsidies	...	...	6,19,109	6,66,394
(*d*) Contributions from Native States	11,245	11,295	...	...
Total	1,43,81,590	1,48,12,519	1,24,15,992	1,24,78,341

Under the head of Postal Service proper, the receipts for the year were ₹4,18,342 in excess of the receipts for 1891-92. This is due to an increase of ₹3,41,844 in the revenue derived from the sale of ordinary postage stamps, to an increase of ₹1,22,694 in the revenue derived from service postage stamps, and to an increase of ₹58,763 in the income obtained from postage and commission paid in cash. Under the head of "Non-postal branches," the receipts were ₹12,587 more than in the preceding year; and the net revenue of the Post Office realised under both heads during the year under report was ₹4,30,929 in excess of the net revenue realised in 1891-92. The total charges of the year show an increase of ₹62,349 over the charges of the previous year. Under the head of "Postal Service proper," there was a marked diminution in the cost of stationery and printing, but no other items call for special notice. Under the head of "Non-postal branches," the charges for the bullock train and passenger services are entered at the same figure as the receipts, the additional expenditure being shown as a charge under the head of "Mail cart charges." The actual results of the working of the two services have been already dealt with.

Financial position of the Post Office.

59. In Appendix XI is given a comparative abstract of the receipts and charges for the year, and this appendix contains a third head of account comprising certain receipts and charges which find a place in the Finance and Revenue Accounts, although they are not shown in the Post Office Accounts. The entries under this head are quoted in the margin, and if these totals be added to the totals given in the preceding paragraph, the entire

Receipts, 1892-93.	₹	Charges, 1892-93.	₹
District Post collections, including zemindary dâk receipts in Bengal	76,108	District Post establishment, including zemindary dâks in Bengal	11,75,134
		Stores from England	3.57.580
		Payments under postal arrangements with Lords of the Treasury	5.99,000
		Exchange on charges in England	5.75 500
Total	76,108	Total	27,07,214

receipts of the year will amount to ₹1,48,88,627, and the entire charges to ₹1,51,85,555. There was thus a deficit of ₹2,96,928 on the year's transactions as shown in the Finance and Revenue Accounts. The charge, however, on account of District Post establishments has to be excluded from the calculation. It is entirely met by grants from District Post funds, which, with the exception of the item shown in the marginal table, are not credited to the Post Office in the Finance and Revenue Accounts. The actual results of the year, therefore, show a surplus of ₹8,02,098. It has been usual, however, to take into account the indirect charges which are properly debitable to the Post Office in order that its real financial position may be ascertained, and these charges amounted to ₹6,07,041 as shown in the margin. If this sum be deducted from the amount of the surplus already stated, the net financial result will be a surplus of ₹1,95,057.

	1892-93.
	₹
Railway free service estimated	98,937
Rent of Government buildings	3,91,802
Gratuities	2,284
Leave allowances paid in Great Britain	20,062
Pension (being the average of five years capitalized at 10·165 years' purchase)	3.24.415
	8,37,820
Deduct—Share of Marine subsidies charged in the Finance Accounts, which should have been borne by the Military, Political and other Departments	2,30,779
	6,07,041

The Post Office is now to receive a commission, calculated at the same percentage as the money order commission, for the payment of the pensions of military pensioners, though no actual credit was made on this account during the year under report, and also obtains some remuneration for receiving salt revenue which, has become a very small matter; but no allowance has been claimed on account of the services rendered by the Department to Government in the management of the Post Office Savings Bank, and in carrying official correspondence at exceptionally low postage rates.

Section XII.—Notice of Post Office Officials.

Mention of special services.

60. I have much pleasure in bringing to the notice of Government the good services of Mr. W. J. Ham, whom I have to thank for all he has done in the interests of efficiency and economy since his appointment as Inspector-General, Railway Mail Service, and of Mr. J. Cornwall, who, as Deputy Postmaster-General, Burma, has had to accept an onerous and responsible charge, and has shown vigour and thoroughness in the administration of posts in that province. Mr. F. Whymper acted as Deputy Postmaster-General, Burma, for six months, during Mr. Cornwall's absence, and has proved himself a trustworthy and able officer. Mr. Owens, as Presidency Postmaster, Bombay, did excellent work in carrying out successfully a large scheme of re-organising postal deliveries in that city, and Mr. C. J. Dease and Mr. G. A. T. Bennett deserve special credit, the first for his management of the field post office arrangements for the Isazai expedition, and the second for the successful conduct of an important enquiry at Zanzibar. The following officers also, whose names have been mentioned by the heads of circles, are entitled to special thanks: Rai Bahadur Daulat Ram, who had unusual difficulties and anxiety to contend with on account of the long-continued break in the Simla-Kalka road: Mr. Henry Smith, Superintendent of the Coconada postal division; Ghulam Raza Saheb, Superintendent of the Trichinopoly postal division; Mr. I. Hamilton, Superintendent of the Baluchistan postal division; and Mr. Cursetji Sorabji, Superintendent of the Kathiawar postal division, all of whom are reported to have displayed exceptional vigour and ability; and Mr. A. Franks Ryan, Superintendent, Railway Mail Service, who did particularly good work in making mail arrangements on the occasion

of the break in the North-Western Railway, and in the investigation and prosecution of a very important case of fraud. I have further to express my regret that the Department should have lost the services of two old and valued officers. Mr. Hutton, who had been Presidency Postmaster of Calcutta for 12 years, and had acted on various occasions as Postmaster-General, retired from Government employ in April 1893, and the death in May 1892 of Rai Bahadur Ramoutar Singh, who for many years past had managed the intricate sorting arrangements of the Railway Mail Service, has left a gap in the office of the Inspector-General of that branch of the Department which will not easily be filled.

SCHEDULE OF PRINCIPAL STEAM SERVICES.

By the British India Steam Navigation Company.

(1) Weekly communication between Calcutta, Rangoon, and Moulmein. (2) Weekly communication between Calcutta and Rangoon *viâ* Chittagong, Akyab, Kyouk-Phyo, and Sandoway. (3) Weekly communication between Rangoon and Mergui *viâ* Tavoy. (4) Fortnightly communication between Madras and Rangoon, touching at certain intermediate ports on the north-east coast of Madras. (5) Weekly direct communication between Bombay and Karachi. (6) Weekly communication between Bombay and Karachi *viâ* the Coast ports. (7) Weekly communication between Karachi and Busrah *viâ* the Persian Gulf ports.	Under contract with the Post Office for ten years, from 1st May 1884, on an annual subsidy of ₹4,39,000.
(8) Fortnightly communication between Madras and Bimlipatam *viâ* Masulipatam, Coconada, and Vizagapatam. (9) Weekly communication between Tuticorin and Colombo.	Under supplementary contract with the Post Office, from 6th May 1886 to 30th April 1894, on an annual subsidy of ₹15,000.
(10) Bi-weekly communication between Tuticorin and Colombo.	There is no regular contract with the British India Steam Navigation Company for this supplementary service, which began on the 1st March 1892, but the understanding is that it may be used up to the 31st March 1893 by the Indian and Ceylon Post Offices, on payment of an annual subsidy of ₹3,000, to be shared equally between Governments of India and Ceylon.
(11) Weekly communication between Kyouk-Phyo, Cheduba, and Ramree.	Under contract with the Local Administration for ten years, from 18th November 1884, on a monthly subsidy of ₹1,500 for the first five years and ₹1,200 for the second period of five years, subject to other arrangements if intermediately made.
(12) Additional services between India and Burma and Burma and the Straits.	These additional services are not included in the contract with the British India Steam Navigation Company, but it has been arranged that the Post Office may use them until 30th April 1894 on payment of ₹50,000 annually.

By the Asiatic Steam Navigation Company.

(13) Six-weekly communication between Calcutta and Port Blair, with extensions to Madras and Rangoon.	The consideration is not in the form of subsidy, but of guaranteed rates for the transport of Government stores, the contract is for five years, from 1st January 1888, and is terminable after the five years by a notice of six months.

By the Irrawaddy Flotilla Company.

(14) A daily service between Mandalay and Myingyan to and fro each way (except on Sundays). (15) A daily service between Myingyan and Pokôkku to and fro each way (except on Sundays). (16) A daily service between Prome and Thayetmyo to and fro each way (except on Sundays). (17) A bi-weekly service between Thayetmyo and Pokôkku to and fro each way. (18) A weekly service between Pokôkku and Kindat to and fro each way. (19) A weekly express service between Mandalay and Bhamo to and fro each way.	Under contract with the Local Government for five years, from the 1st January 1891 to the 31st December 1895. The subsidy is ₹9,000 per mensem, towards which the Post Office contributes ₹3,500 per mensem.
(20) A tri-weekly service between Rangoon and Bassein. (21) A bi-weekly service between Bassein and Henzada.	Under contract with the Local Administration from 1st July 1880 and to continue in force until six months' notice is given by either party, the subsidy being ₹2,500 per mensem, towards which the Post Office contributes ₹500.
(22) A bi-weekly service between Rangoon and Pyapon.	Under contract with the Local Administration from 1st October 1882, and to continue in force until six months' notice is given by either party. The subsidy is ₹800 per mensem.
(23) A daily service between Rangoon and Kyauktan, and *vice versâ*.	The service is under contract with the Post Office from 1st September 1892; period not fixed, but terminable at any time by two months' notice. Monthly subsidy is ₹125.

By the Euphrates and Tigris Steam Navigation Company.

(24) Weekly communication on the River Tigris between Busrah and Bagdad. — Under contract for ten years, from the 1st May 1884, with Her Majesty's Secretary of State for India. Subsidy is ₹36,000 per annum; steamers run in connection with line No. 7.

By Messrs. Apcar & Co., Calcutta, and Jardine, Matheson & Co., Hong-Kong.

(25) Fortnightly communication between Calcutta and Straits and Hong-Kong, the dates of departure being regulated mainly with reference to the Calcutta opium sales. — No subsidy.

By the Peninsular and Oriental Steam Navigation Company.

(26) Fortnightly communication between Calcutta and Colombo, touching occasionally at Madras.
(27) Fortnightly communication between Bombay and Colombo. — Non-contract lines maintained by the Company in connection with the China and Australian mail services. The Post Office pays by weight for the conveyance of mails sent by these non-contract steamers.

By other Agencies.

(28) By River Steam Navigation Company.—Daily communication between Jatrapur and Dibrugarh on the Brahmaputra River. — Under contract with the Local Administration, from the 7th October 1883 to the 1st May 1893. Annual subsidy ₹1,00,000, towards which the Post Office contributes ₹30,000.

(29) By India General Steam Navigation Company.—Daily communication between Naraingani and Silchar. (These steamers, however, only run as far as Fenchuganj from 1st November to 15th May and as far as Karimganj during the month of October.) — Under contract with the Post Office for five years from 1st January 1892 on an annual subsidy of ₹20,000.

(30) By India General Steam Navigation Company.—Bi-weekly communication between Calcutta and Cuttack *vid* Chandbali. — Under contract with the Post Office from the 14th September 1887; period not fixed, but terminable at any time by one calendar month's notice. Monthly postal subsidy is ₹300.

(31) By Messrs. Shepherd & Co.'s Steamers.—Daily communication between Bombay and Goa. — Under contract with the Local Government, from 1st October 1892 to 31st May 1893. The monthly subsidy is ₹3,000, towards which the Post Office contributes ₹969·6 and the Portuguese Government ₹200.

(32) By Bengal Central Flotilla Company.—Daily communication between Khulna and Barisal. — Under contract with the Post Office, from 1st July 1889 to 30th June 1894, but terminable at any time by six months' notice. Monthly postal subsidy ₹350, of which the Imperial Post Office contributes ₹183.

(33) By Bengal Central Flotilla Company.—Four times a week between Barisal and Taktakhali. — No contract has been entered into with the Company, but they have been carrying the mails since 1st April 1892 on a monthly subsidy of ₹100.

(34) By Messrs. Hoare, Miller & Company.—Daily communication between Calcutta and Midnapore. — No contract was entered into with the Company, but they have been carrying the mails since December 1882 on payment of a monthly subsidy of ₹60.

(35) By Messrs. Dawson and Thompson of Moulmein.—A tri-weekly steamer service between Buthidaung and Akyab and *vice versâ* from 1st October to 30th April in each year and during the remaining months of each year a bi-weekly service.

(36) By Messrs. Dawson and Thompson of Moulmein.—A bi-weekly steam launch service between Akyab and Paletwa from 1st October to 30th April in each year and a weekly service to and fro during the remaining months of the year and a weekly service between Akyab and Kyauktan (for the Paletwa mail) and *vice versâ*. — Under contract with the Local Administration for 5 years from 15th February 1890, but terminable at any time by either party giving six months' notice. Subsidy ₹15,000 a year.

(37) By Messrs. Dawson and Thompson of Moulmein.—A daily service except on Sundays from Moulmein to Denjinzeik and *vice versâ*, and a tri-weekly service from Moulmein to Shwegon and *vice versâ*. — Under contract with the Local Administration from 1st May 1891 to 1st May 1895 on a monthly subsidy of ₹500.

(38) By Salween Steam Navigation Company at Moulmein.—A bi-weekly service between Moulmein and Kayando and *vice versâ*, and a daily service between Moulmein and Natmaw and *vice versâ*. — Under contract with the Local Administration for two years from 1st February 1893. Local Government may terminate contract by giving six months' notice. Subsidy ₹3,000 a year.

NOTE.—A service by sea worked by native boats is maintained by the Government of Ceylon between Point Calimere on the Indian side and Kankesanturai on the Ceylon side.

Appendix No. I.

Statement showing the number of Post Offices and Letter-Boxes opened, and Village Postmen entertained during the year 1892-93, and the total number that stood at the end of the official years 1891-92 and 1892-93.

[This Appendix relates only to the Imperial Post, and does not include figures of the District Post.]

Names of Postal Circles.	Existed on the 31st March 1892. Post Offices.	Letter-Boxes.	Village Postmen.	Opened or Entertained in 1892-93. Post Offices.	Letter-Boxes.	Village Postmen.	Total of 1892-93. Appendix No. VIII.

Statement showing the offences punishable by law committed by Post Office Officials and established against them during the years 1891-92 and 1892-93.

[The figures relate to both the Imperial and the District Post.]

Names of Postal Circles.	Number of ascertained cases of dishonesty on the part of Post Office Employés.		Total.	
	Number of legal convictions.	Number of cases departmentally punished.		
Bengal	18	11	29	
Bombay	5	13	18	
Madras	54	33	87	
North-Western Provinces	14	11	25	
Punjab	15	6	21	
Assam	4	2	6	
Bihar	11	5	16	
Burma	8	1	9	
Central India	6	...	6	
Central Provinces	15	4	19	
Eastern Bengal	4	5	9	
Oudh	9	3	12	
Rajputana	3	3	6	
Sind	4	1	5	
Railway Mail Service	6	8	14	
Total of 1892-93	176	106	282	
Total of 1891-92	150	110	260	

Note.—The figures in this Appendix show the cases in which punishment was awarded during the year, as it is only when a case is closed that it can be entered with certainty as having been committed by a Post Office servant.
Besides the 282 cases shown above, there were in 1892-93, 52 cases in which offences were apparently established against the Post Office Officials, but no punishment was imposed on them owing to the cases not being concluded, or to the death or escape of the offenders.

Appendix No. IX.

Column 2.—These figures represent the net proceeds of the sale of ordinary postage stamps after deducting the sale discount.

Column 3.—The great differences observable in this column are due mainly to changes of system in the treatment of official correspondence, which was charged at full letter rates up to 1865-66, at the same rates as ordinary correspondence (letters, packets, etc.) from that year to 1872-73, and afterwards at a low privileged letter rate of one anna for 10 tolahs (about 4 oz.)

Column 8.—The figures in this column show the revenue undisturbed by the changes of system in respect of official correspondence detailed in the notes regarding Columns 3.

Column 12.—The figures in this column shew the proportion of the cash collections in column 4 to [illegible] with the year 1872-73, when the official postage rate was reduced (see note on column 3) and the [illegible]

Columns 21 to 26.—Three digits are omitted from the figures in these columns.

Columns 27 and 28.—These figures cannot be given prior to 1873-74, owing to a difference [illegible]

Column 29.—The registration of newspapers only commenced in the year 1871-72 and [illegible]

(a) Revised so as to include letters to Gibraltar, Malta, and places east of Suez.

(b) Revised so as to show the number of articles exchanged with the United [illegible]

* Including post cards from 1879-80.

† 1,378 miles of lines under this head have in 1884-85 been included [illegible]

Printed and published for the GOVERNMENT OF INDIA, *at the Office of the* SUPERINTENDENT OF GOVERNMENT PRINTING, INDIA, *No. 8, Hastings Street, Calcutta.*
