PUBLIC WORKS DEPARTMENT.

CIVIL WORKS—Irrigation.

Calcutta, the 18th January, 1894.

Read—

Revenue Report of Irrigation Works in Rajputana for the year 1892-93, forwarded with letter No. $\frac{363}{C}$ S., dated the 12th October, 1893, from the Secretary to the Agent to the Governor General and Chief Commissioner, Rajputana, Public Works Department.

OBSERVATIONS.—The rainfall in the year 1892-93 was abnormally heavy; but the monsoon broke late, and the kharif crops were comparatively poor. After July the tanks, both in Ajmere and Merwara, filled well, and the *rabi* harvest was a particularly good one in consequence. The average rainfall in the Ajmere and Merwara Districts was 37·28 and 37·33 inches, and exceeded that of the previous year by 28·77 and 27·09 inches respectively. The average rainfall during the ten years ending 1890-91 was 21·42 inches for Ajmere and 18·76 inches for Merwara District.

2. The capital outlay during the year amounted to Rs. 3,71,786 (including indirect charges) on new tanks; these were not finally made over to the Revenue Department for irrigation purposes before the close of the year under review. The total capital expenditure on the three groups of tanks to the end of the year amounted to Rs. 22,68,461.

3. The following statement shows the actual financial results of the year under review as given in the Revenue Accounts:—

Tanks in	Total Capital outlay to end of year, including indirect charges	GROSS REVENUE COLLECTED.			WORKING EXPENSES.			Net Revenue.	Percentage of net Revenue on capital to end of year.
		Irrigation Revenue.	Miscellaneous receipts.	Total.	Direct.	Indirect.	Total.

The irrigation revenue collected was made up as follows:—

	1892-93. Rs.	1891-92. Rs.
Water-rates directly paid	4,064	6,852
Share of enhanced land revenue	85,960	76,244
TOTAL .	90,024	83,096

The share of enhanced land revenue is made up of water-rates, share of well assessments, and the difference between dry and wet rates which are collected with the land revenue.

4. The revenue assessed for the year is compared in the following table with the area irrigated. The increase of Rs. 41,432 over the assessment of the

year 1891-92 is due to the tanks having received a good supply of water during the year under review :—

Sub-Collectorate.	Irrigation. Revenue assessed.	Area.			Assessment per acre.
		Irrigated.	Protected.	Total.	
	Rs.	Acres.	Acres.	Acres.	Rs.
Ajmere	58,006	10,052	7,079	17,131	3·38
Beawar	44,457	6,772	7,103	13,875	3·20
Todgurh	25,230	3,087	2,237	5,324	4·74
Total, 1892-93 .	1,27,693	19,911	16,419	36,330	3·51
Total for 1891-92 .	86,261	7,710	4,277	11,987	7·20

The irrigation revenue assessed includes all assessments due on protected as well as on irrigated areas.

Of the irrigated area, 3,800 acres were cultivated under kharif and 16,111 acres under *rabi* crop, against 5,287 and 2,423 acres, respectively, in the preceding year. The increase of 13,688 acres under the *rabi* crop is satisfactory. Rupees 7,283 were remitted by the Local Administration during the year 1892-93, and of this amount a sum of Rs. 3,358 was on account of irrigation revenue remitted.

5. The following table shows the distribution of the working expenses :—

	1891-92.	1892-93.	Increase (+) or Decrease (—).
	Rs.	Rs.	Rs.
New Works, Maintenance and Repairs . .	85,183	77,192	—7,991
Establishment	19,707	20,862	+1,155
Tools and Plant	—352	—1,483	—1,131
Leave and Pension Allowances . . .	2,165	2,278	+113
TOTAL .	1,06,703	98,849	—7,854

There is a decrease in the working expenses of Rs. 7,854 as compared with the figures of the previous year, and the increase in the irrigated area has reduced the cost of working expenses per acre from Rs. 8·90 in the preceding year to Rs. 2·72.

The establishment charges were divided as follows :—

	Rs.
Direction	7,719
Executive	7,930
Civil Officers	5,213
	20,862

The outlay on new works and repairs was Rs. 767 and Rs. 76,425 respectively. The maintenance charges were still high owing to famine relief works remaining in progress during a portion of the year.

6. The average results of the experimental cutting of crops of different kinds referred to in paragraph 6 of the review on last year's report have not been given, as it is said, in paragraph 15 of the present report that the returns furnished are so patently inaccurate that neither details nor average results can be usefully included in the report. Enquiries are, however, being made by the Local Administration into the subject, and rules for conducting these experiments in a more satisfactory and reliable manner have been framed and will be introduced with the approval of the Supreme Government. The value of crops raised during the year is estimated at Rs. 5,90,961, against Rs. 1,93,591 of the preceding year.

7. Some information regarding the measurement of the depth of water in wells has been furnished in paragraph 16 of the report. Of the 482 wells, of which the measurement of the spring level was taken between the 15th and 25th September 1892, and on the 10th April 1893, 270 were benefited by tanks and 212 were independent of tanks.

In Ajmere, out of 65 wells which derived benefit from the tanks in their vicinity, the spring level of only 38 wells registered in September 1892 had decreased by the following April, and of the remainder the level was practically unchanged.

In Merwara, out of 205 wells benefited by tanks, the spring level in 123 had decreased by April 1893, as compared with the level in September 1892. In the remaining wells the water had either increased or showed no substantial difference.

8. In last year's report figures of discharge and duty were not given in Statement I. E. as originally submitted, but were, as explained in paragraph 8 of the review, furnished subsequently. This year the information has been furnished in Statements I. E. attached to the report. Figures for three tanks in the Merwara District, *viz.*, the Bulad new and old tanks and the Jalia new tank, and three tanks in the Ajmere District, *viz.*, the Bhir new tank, the Rajaosi tank, and the Ladpura new tank, have been furnished. There was no irrigation from the Chitar tank in the Merwara District and from Makrera new and old tanks in the Ajmere District.

9. The Report has been correctly prepared and the sketch maps of the Ajmere and Merwara Districts furnished.

ORDER—Ordered, that a copy of this Review be forwarded to the Agent to the Governor General and Chief Commissioner, Rajputana, for information.

T., dated the 15th August 1890 (which was published in the *Gazette of India* of the 28th August 1890, under Public Works Department notification No. 361, dated the 28th August 1890) may be made applicable to the Mayavaram-Mutupet railway, to the same extent as those rules now apply to the South Indian railway, from the date on which the said railway may be opened for the public carriage of passengers, animals, or goods.

RESOLUTION.—The Governor General in Council is pleased to sanction the application of the General Rules for Indian railways, with the modifications cited in the foregoing observations, to the Mayavaram-Mutupet railway to the same extent as those rules now apply to the South Indian railway.

ORDER.—Ordered, that the General Rules, which have already been published in the *Gazette of India*, dated the 18th September 1880, be further notified to the railway servants and to the public by a copy thereof, as modified by the resolution of the 15th August 1890, being kept open to inspection, free of any charge, in the office of the station master of every station on the said railway.

Ordered, also, that this resolution be communicated to the Government of Madras, for information and guidance, and that it be published under a notification in Part I of the *Gazette of India*.

No. 34.—Mr. C. A. Bull, Superintending Engineer, 2nd class, sub. *pro tem.*, Engineer-in-Chief of the Burma State Railway, is appointed to officiate as Manager of that line, in addition to his own duties, during the absence on privilege leave of Mr. G. F. Mathew, or until further orders.

CIVIL WORKS—Irrigation.

Calcutta, the 22nd January, 1894.

Read—

Administration Report of Irrigation Works in the Madras Presidency for 1892-93.

OBSERVATIONS.—The number of Major Works in the Madras Presidency dealt with in the Report is ten, as in the previous year. Work on the Kalingarayen channel, which is a sanctioned project, has not yet been begun. Of the ten works, eight are in full operation, and the construction estimates of five of these have been closed. Of the remaining two, one, the Periyar, is still under construction; and for the other, the Rushikulya, which is classed as a Protective Work, a Revenue Account was opened during 1892-93.

The number of Minor Works for which Capital and Revenue Accounts are kept remains at 23, of which 19 are irrigation systems, and 4 are tidal canals.

2. The Capital outlay incurred on these Major and Minor Works during and up to the end of the year under review was as follows:—

	Number of works.	During the year 1892-93.							Total direct and indirect to end of 1892-93.

* Excluding Védáranniyam canal, for which complete Capital account to end of 1892-93 has not yet been prepared.

3. Under Major Works the Capital outlay was almost entirely confined to the Kistna, Periyar and Rushikulya projects, on which it amounted respectively to Rs. 3,27,812, Rs. 13,48,377 and Rs. 5,08,065, inclusive of indirect charges.

The outlay on the Kistna project was principally on the eastern section for miscellaneous works. The widening of the Bantumilli canal in that section was completed. On the western section the widening of the Main canal was in progress.

On the Periyar project, work in No. I or reservoir division was much impeded by rain and heavy floods during the first half of the year, and progress on the main dam was comparatively slow, though greater than in 1891-92. The height of the dam was raised by about 20 feet during the year. The total amount of material put into the dam during the working season amounted to 903,118 cubic feet, and it is estimated that 3,739,460 cubic feet remained to be done at the close of the year. If the above rate of progress

were maintained, the work would be completed in four years; but it is stated that the outturn in future seasons will probably be lower, and the date of completion proportionately postponed. Work on the watershed-tunnel was retarded by the breaching of the reservoir which supplies the turbine at the north end, and subsequently the supply to the turbine failed early owing to short rainfall. Out of a total length of 5,704 feet, 3,658 feet had been bored by the close of the year, the work done during the year being 1,250 feet. In the No. II, or plains, division good progress was made with the distribution works.

On the Mahanadi section of the Rushikulya project, good progress was made with the Gulleri head-works and the Russelkonda reservoir, and the Goomsur head-works were completed. On the Rushikulya section, the main canal was nearly completed and progress made with the Surada reservoir. Water was let down this canal in June 1892, and down the Mahanadi canal in September.

The principal Capital outlay under the head Minor Works was on the Buckingham canal, and amounted to Rs. 1,90,968. A new lock was constructed and some improvements and diversions carried out.

4. The length of completed main canal on the major works amounted to 2,036 miles, and of distributary 5,590 miles. On both Major and Minor Works the length of navigable channel was 1,284 miles.

5. The revenue receipts and working expenses of each work for which Capital and Revenue Accounts are kept are shown in the following statement:—

* These include the amounts of indirect revenue for 1891-92 which were intimated to the Madras Government by the Board of Revenue after the accounts for that year were closed.

6. The gross revenue derived from the Major Works shows a satisfactory increase of Rs. 3,97,126 over the previous year. The working expenses were higher by Rs. 85,077, but the net revenue was more by Rs. 3,12,049. There was an increase in net revenue under all the Major systems, except the Srivaikuntham anicut and the Karnúl canal. The former is accounted for by large remissions having been granted owing to the season in the Tinnevelly district being unfavourable. On the Karnúl canal there was a much smaller demand for water for dry crops, the season having been good. A most marked recovery occurred on the Pennér and Sangam systems, the net revenue of Rs. 72,241 and Rs. 86,275 in 1891-92 rising to Rs. 2,26,239 and Rs. 2,29,940.

7. The figures for the Minor Irrigation Works for which Capital and Revenue Accounts are kept, given in para. 5, require some explanation. The total net revenue from these works in 1892-93 is shown as amounting to Rs. 20,71,315 against Rs. 2,19,450 in the previous year. But the figures for 1892-93 include a sum of Rs. 7,80,467 from the systems Nos. 5, 6, 7, 11, 13, 14, 15 and 16, which was the revenue derived in 1891-92, but for which the figures were not communicated by the Board of Revenue in time to be included in the report for 1891-92. The correct figures for the net revenue from this class of works in the two years thus become:—

	Rs.
1891-92	9,99,917
1892-93	12,90,848

The increase may be considered satisfactory.

Under Navigation Minor Works, the Buckingham canal shows much better results than usual, with a deficit of only Rs. 18,590 as compared with Rs. 74,599 in 1891-92. The improvement is attributed to the persistent efforts made to keep down working expenses, which were less than in 1891-92 by Rs. 54,521.

8. From Statement I. C. attached to the Report, it appears that the total Irrigation Receipts from the Major Works amounted to Rs. 83,64,231, and that this sum was divided into Rs. 78,56,986, which is the share of the land revenue on account of the water supplied, or in other words the water-rate, and Rs. 5,07,245 representing the irrigation share of the enhanced land revenue.

9. In the following statement the irrigation receipts are compared with the areas under first and second crops charged as irrigated:—

System.	Revenue derived from irrigated lands.		Area charged as irrigated.		Rate per acre.

GRAND TOTAL	1,07,89,708	85,96,678	2,843,018	2,792,589	3·8	3·1

The area under Major Works charged as irrigated, was less in 1892-93 than in 1891-92 by 21,254 acres, but the revenue derived was more, as the large remissions of the previous year were not found necessary. The area under Minor Works was greater by 71,683 acres than in 1891-92.

10. Details of the average water-rate for wet crops and irrigated dry crops are now given on page 7 of the Report. The figures are summarised in paragraph 7 of the review by the Madras Government on the report. For the Major Works they are as follows :—

The rates for wet crop (rice) appear low as compared with the rates obtaining in other parts of India for the same crop.

11. The area charged as irrigated under first crop by the Major Works amounted to 2,152,718 acres, and under second crop to 191,008 acres, or a total of 2,243,726 acres. The difference between this total and that given in column 4 of the table in paragraph 9 is due to the inclusion in the latter of the extent of "waste charged." The proportion of flow to lift irrigation was about 27 to 1.

12. The following statement shows the details of the working expenses, including the old maintenance charges, for each of the Major systems, and for the Minor systems in the aggregate :—

RESOLUTION.

Calcutta, the 6th February 1894.

Read—

Resolution in this Department, No. 3624 A., dated 18th August 1893, regarding the grant of exchange compensation allowance to European and Eurasian officers of Government not domiciled in India.

RESOLUTION.—The Resolution of the 18th August 1893 applies only to officers whose salary is chargeable to General Revenues. Exchange compensation allowance is therefore not admissible under that Resolution to Government officers in foreign service.

As regards Government officers in foreign service, the Government of India, so far as they are concerned, agree to the grant of exchange compensation allowance under the restrictions and rules of the Resolution last quoted. But as the allowances will not be payable by the Government of India but by the Foreign employer, the claim in each case must, subject to any conditions imposed by statute, or by trust provisions, be decided, in the case of foreign service of the first kind, by the orders of the employer to whom the officer's services have been lent, and in the case of service of the second and third kinds, with the consent of the controlling authority of the funds to which the allowance will be chargeable.

In cases in which exchange compensation allowance is granted to an officer in foreign service of the first kind, as defined in Article 802 of the Civil Service Regulations, the allowance should be calculated on "assumed pay" as defined in Article 808 of those Regulations. In other cases, it should be calculated on the actual sanctioned salary of the officer.

ORDER.—Ordered, that this Resolution be communicated to the several Departments of the Government of India, to all Local Governments and Administrations, to all Heads of Departments subordinate to the Finance Department; to the Comptroller and Auditor General; and to all Accountants General and Comptrollers.

Ordered also, that the Resolution be published in the *Gazette of India*.

Read—

Letter No. 1690 I., dated 30th November 1893, from the Government of the Punjab forwarding the Revenue Report of Irrigation Works in the Punjab for 1892-93, and Resolution by that Government reviewing the Report.

OBSERVATIONS.—The Capital outlay incurred during and up to the end of 1892-93 is shown in the following statement under the financial heads of account :—

* The Sirsa Branch being treated as a portion of the Western Jumna Canal.
† Includes Capital outlay on Madhopur workshops.

2. The total outlay during the year was Rs. 27,77,396 being less by Rs. 19,09,998 than the total outlay during 1891-92, the difference being caused principally by the decreased expenditure on the Chenab Canal.

On the Chenab Canal, the Capital outlay was Rs. 15,57,985. The principal outlay against the original estimate was on strengthening the Protection

Works on the right flank of the Weir at Khanki and on completing distributary systems. On the Chenab Canal Extension Project, for which sanction was received in August 1892, good progress was made in widening the Main Line and on the construction of the Jhang and Bhawani Branches and works in connection therewith.

On the Bari Doab Canal, the Capital outlay during the year was Rs. 2,4 ,324, principally on constructing and remodelling distributaries.

On the Sirhind Canal, there was a Capital outlay from Imperial Funds of Rs. 1,60,286, principally on works which were in progress at the time of closing the construction estimate. Under contributions there was a Capital outlay on works of Rs. 3,697, but there were credits under Tools and Plant, Suspense, and Receipts on Capital Account amounting to Rs 24,877, so that the net result was a reduction of Capital outlay by Rs. 21,180.

On the Western Jumna Canal, excluding the Sirsa Branch, there was a Capital outlay of Rs. 1,01,926, incurred principally on Drainage Works and Distributaries. The Drainage Works, as noted in paragraph 21 of Chief Engineer's report, have had an excellent effect and are practically completed.

On the Sirsa Branch of the Western Jumna Canal, Rs. 6,36,372 from Imperial Funds and Rs. 2,49,083 contributed by the Patiala State were expended on the Capital Account. Two out of the three sections into which the project is divided have been practically completed, and the whole of the construction work is expected to be finished before the end of 1894-95.

3. The following statement shows the mileage of main canal and distributaries in operation at the close of the year under review : —

The length of navigable channel was 386 miles.

In addition to the above, there are in the Native States 223 miles of completed canal, of which 46 are navigable, and 1,940 miles of completed distributaries.

During the year the length of canal has been increased by 83 miles, and of distributaries by 252 miles, all in British territory.

4. The financial results of the canals in operation are exhibited in the following statement :—

* Refunds deducted from Revenue.

† These percentages of net Revenue on Capital outlay do not include Muzaffargarh Canal.

5 The net Revenue for the whole Province is higher by Rs. 5,55,587 than it was in 1891-92, and the percentage on Capital outlay has risen from 6·17 to 6·79.

The Major Works show an increase in net revenue of Rs. 5,68,466, while the Minor Works show a decrease of Rs. 4,364, which, together with a decrease of net Revenue on the Muzaffargarh Canal of Rs. 8,515, accounts for the net increase over the whole Province.

Under Major Works, the Bari Doab and Sirhind Canals show a large increase in net Revenue, while there is a large decrease on the Western Jumna Canal owing to the areas irrigated in the Rabi of 1891-92 and the Kharif of 1892-93 having been smaller than usual.

This year the Swat River Canal gives a return of 5·20 per cent. of net Revenue on Capital outlay, but from paragraph 12 of the Chief Engineer's report there appear to be grounds for apprehension that the country irrigated by this canal may soon become waterlogged if the increase of area irrigated be not checked, and a detailed statement of his views is awaited by the Local Government.

The only Major Works which failed to meet their working expenses were the Chenab and the Lower Sohag and Para Canals. The Chenab Canal cannot yet be expected to pay its way, and the Chief Engineer in paragraph 139 of his report states that there is every reason to hope that the Lower Sohag and Para Canal will give large returns in the near future.

Under Minor Works, the Upper Sutlej and the Shahpur Canals show a satisfactory increase of net Reveuue over last year, and the Indus Canal returns, though lower than those of last year, which were abnormally high owing to the recovery of arrears of collections, show an improvement on the figures of former years.

The net Revenue of the Lower Sultej and Chenab Canals is about the average of ordinary years, while that of the Muzaffargarh Canals is slightly below it.

6. The net Revenue of the Major Works in operation exceeded the interest charges by Rs. 17,91,956, and at the close of the year the balance of net Revenue over interest charges for the whole Province amounted to 241¾ lakhs of rupees.

7. The area irrigated during the year and the irrigation revenue assessed thereon are shown in the following statement :—

8. The total area irrigated, though less by 218,005 acres than last year, is the second largest area on record.

The rainfall during the winter was abnormally great, and in most parts of the Province enabled crops to be brought to maturity without the aid of canal water.

The rate per acre for the whole Province has again fallen below that of the previous year; it is higher on most of the Minor Works, while on four of the Major Works it is higher, and lower on the remainder.

9. The areas of kharif and rabi crops were as follows :—

	Kharif. Acres.	Rabi. Acres.
Perennial Canals	681,124	817,781
Inundation ,, ...	637,694	712,732
TOTAL .	1,318,818	1,530,513

Compared with last year the kharif irrigated area has increased and is the largest for the past five years. The rabi irrigation on the other hand has decreased largely on the perennial canals and slightly on the inundation canals. The cause of the decrease on the perennial canals is the abnormal winter rainfall.

10. The following table shows the irrigated areas of the principal crops for the last two years :—

	1892-93. Acres.	1891-92. Acres.
Sugarcane	72,902	91,238

Wheat	957,635	1,120,982
Cotton	216,599	188,072

The decrease under sugarcane occurred on the Western Jumna Canal and is due to the low supply of water in the Jumna River in April and May 1892.

The decrease under rice is attributed to a similar cause.

The increase under jowar and maize is due to these crops having been sown to take the place of crops which could not be sown earlier owing to short supplies during the early kharif.

The decrease in wheat is due to the abnormally heavy winter rains.

Cotton, which suffered greatly last year from the attacks of locusts, has somewhat recovered.

The value of the crops irrigated is estimated at 826 lakhs of rupees.

11. Details of the discharges and water duty of the perennial canals, together with the minimum discharges of the rivers from which their supplies are drawn, are given in the following table :—

CANAL.	MINIMUM DISCHARGE OF RIVER.	MAXIMUM DISCHARGE OF CANAL AS DESIGNED.	MAXIMUM DISCHARGE OF CANAL DURING YEAR.	AVERAGE DISCHARGE AT HEAD.		ACRES IRRIGATED PER CUBIC FOOT OF AVERAGE DISCHARGE.

Chenab	5,763	8,000	2,000	1,553	1,135	54	65

* Excluding Native States Branches.

The minimum river discharges are, with the exception of the Swat River, higher than last year. The kharif duties are generally about the average of the last five years, while the rabi duties are all low. Supply exceeded demand during the greater part of the winter, and the rabi duties therefore do not compare favourably with those of seasons in which the contrary was the case.

The duty on the Chenab Canal is expected to improve as the area under irrigation increases.

12. On the Native States Branches of the Sirhind Canal the irrigation is still below the area which would have been obtained on British Branches from similar volumes of water. The proportion obtained remains as it was last year, *viz.*, 58 per cent., and the Chief Engineer, in paragraph 109 of his report, mentions that it would almost seem as if we should have to be content with an area only three-fifths of what would be irrigated did the States work up to the British standard.

13. The following table shows the working of the Native States Branches :—

STATE.	Capital outlay.	Gross revenue collected less refunds.	Working Expenses.	Net Revenue.	Percentage on Capital Outlay.	Water-rates assessed.	Area irrigated.	Water-rates assessed per acre.	Working Expenses per acre.

The figures for the year under review are far from satisfactory. The percentage on Capital outlay, which in Patiala is 2·84 as compared with 2·78 for last year, has in Nabha fallen from 2·30 to 0·87, and in Jhind there was a loss equivalent to 0·40 per cent. on the Capital as against a profit of 1·89 per cent. in the previous year. The working expenses per acre are also very high, being Rs. 3·23 per acre as against Rs. 1·76 in 1891-92.

The value of the crops irrigated during the year from the Native State Branches is estimated at Rs. 39,68,512.

14. The working expenses of the different canals are shown below :—

The total working expenses are more by nearly two lakhs of rupees than last year, the increase being due almost entirely to additional expenditure on the Sirhind and the Chenab Canals. In the latter case the increase is due to the expansion in length of irrigating channels and area irrigated, and in the former case it occurs largely under establishment and is due to the decreased capital expenditure.

The rate per acre irrigated has risen in the case of the Major Works on account of the smaller area irrigated.

15. The following are the details of the charges for establishment:—

	Revenue management.	Maintenance.	Total.	Percentage.
	Rs.	Rs.	Rs.	
Direction	82,106	80,448	1,62,554	12·14

Navigation	1,154	...	1,154	0·08
TOTAL	9,67,105	3,71,542	13,38,647	100·00

The share of direction charged to revenue is higher than in 1891-92 because of the smaller capital outlay.

16. The working expenses on Major Works amounted to 36 per cent. of the gross revenue realised as against 37·2 per cent. last year.

17. The following are some of the principal works charged against the Revenue Account:—

On the Swat River Canal.—Increasing the capacity of two drainage inlets.

On the Western Jumna Canal.—Regulating apparatus for Tajewala Dam, constructing Kachrauli Drain, wire rope suspension bridge on Hansi Branch, renewing with cast-iron grooves eight bays of the Tájawála undersluices.

On the Bari Doab Canal.—Building quarters for the regulating establishment at Madhopur, remodelling and constructing distributaries.

On the Sirhind Canal.—Alterations below Chupki and Akhalgarh Falls for facilitating navigation, construction of four ferries and a discharge run on Abohar Branch, minor head gates and gearing for Ludianah Division.

On Chenab Canal.—Four rest-houses for Ziladars and a workshop at Salar.

On the Indus Inundation Canals.—Reconstruction of head regulator of the Baja Branch of Manka Canal, addition to the head regulator Shoria Canal and construction of Gajani Branch and Western Distributaries, constructing Fauja and Borwala reclamation bunds.

18. The navigation receipts and charges are shown in the margin. The increase in traffic which followed on the revision of rates for rafting mentioned in paragraph 19 of last year's review has not been maintained: it yet remains to be seen whether the decrease which has occurred in the year under review will prove to be merely temporary.

	Receipts. Rs.	Charges. Rs.
Western Jumna Canal	35,869	12,274
Sirhind Canal (including Native States Branches)	9,192	13,115
Total	45,061	25,389

The net profit on navigation operations amounted to only Rs. 19,672 during the year.

19. The receipts on account of water power amounted to Rs. 1,51,101 as compared with Rs. 1,65,377 in 1891-92. The decrease is due to the longer closures of canals owing to slackness of demand.

20. On the Lower Sutlej and Chenab Canals and the Muzaffargarh Canals the value of "chher" labour and the sums contributed from the Zar-i-nagha funds are included in miscellaneous receipts.

On the Lower Sutlej and Chenab Canals 638,598 labourers were called out, and of these 455,880 were actually present. After allowing for 36,326, whose absence was sanctioned, the total number of absentees was 176,392 or a percentage of 26·37 as against 32·13 of last year. Fines amounting to Rs. 94,994 were inflicted.

The value of "chher" labour, as shown in the administrative accounts, was Rs. 92,021, but in paragraph 201 of the Chief Engineer's report it is stated that the correct value is Rs. 1,50,720, the error having arisen from the full value of the labour not having been reported.

The error does not affect the balance of expenditure and receipts as the assumed value of "chher" labour is shown on both sides of the account. Contributions from the Zar-i-nagha fund amounted to Rs. 81,611.

On the Muzaffargarh Canals the numbers of labourers were—

Called out	494,074
Present	437,309
Absent with sanction	17,249
Absent without sanction	45,258

Fines for absence amounted to Rs. 26,217.

The value of "chher" labour was Rs. 1,12,514, and Rs. 18,756 were contributed from the Zar-i-nagha fund.

The Zar-i-nagha funds on the Lower Sutlej and Chenab Canals and the Mozaffargarh Canals show credit balances of Rs. 1,10,126 and Rs. 62,202 respectively.

21. The year opened with an unrealised demand of Rs. 67,260, after deducting Rs. 756 as detailed at foot of table IIIC, and closed with an unrealised balance of Rs. 88,818. The demands during the year amounted to Rs. 61,22,593, and the collections to Rs. 61,01,035.

22. Two new points of interest are noted in the Resolution by the Local Government, *viz.*:—

(1) The results of the checks applied to the measurements of the irrigated area. Paragraphs 42, 72, 103 and 134 of the Chief Engineer's report deal with this subject, and the results are considered to be on the whole exceedingly satisfactory.

(2) The time spent on tour by Divisional and Sub-divisional Officers. The former Officers were away from head-quarters on tour during 182 days or half the year on the average, and the latter were on tour an average of 246 days or two-thirds of the year.

23. The report reached the Government of India on the 4th December, the date prescribed for its submission being the 15th November. It has, as usual, been prepared with great care, and is illustrated by excellent maps and diagrams. The results set forth in it are once more satisfactory, and the Government of India have much pleasure in endorsing the praise accorded by the Honourable the Lieutenant Governor to Colonel Ottley and Mr. Higham in paragraph 22 of the Resolution by the Local Government.

SANITARY.

The 14th February, 1894.

No. 52.—The following translation of the Special Regulations of the Ottoman Board of Health, applicable to the Mecca Pilgrimage of 1894, received through Her Majesty's Secretary of State for India, is published for general information:—

Special Regulations applicable to the Meccan Pilgrimage of 1894 (year of the Hegira 1311).

Article 1.—From the beginning of the month of Rajab until the end of the month of Zilhijja (that is to say, from the 8th January to the 2nd July), the lazaretto of Camaran will be open to receive arrivals by sea subject to quarantine.

Article 2.—During the period of these six months (Rajab, Shában, Ramazán, Shawwál, Zilkaada, Zilhijja), pilgrim vessels coming from beyond the Straits of Bab-el-Mandeb, whatever the tenor of their Bills of Health, must proceed direct to the Island of Camaran, without calling at any other port on the littoral of the Red Sea.

Article 3.—Pilgrim vessels are vessels which are chartered to carry pilgrims proceeding to the Hedjaz.

Article 4.—Vessels bound for the Red Sea having on board not more than one pilgrim for every hundred tons of registered tonnage are not included in the definition of pilgrim vessels. Such vessels will be dealt with according to the tenor of their Bills of Health, conformably to the General Regulation of 1867 applicable to arrivals from cholera-infected places.

Article 5.—Vessels carrying not more than five pilgrims for every hundred tons of registered tonnage can proceed to Abu-Saad, where they will discharge their pilgrims and merchandise subject to quarantine destined for the Hedjaz.

Quarantine will also be performed at Abu-Saad by the *sambouks* and other coasters subject to quarantine proceeding from one port to another of the Red Sea littoral.

Article 6.—For this purpose a lazaretto is established at Abu-Saad, as a branch of the Camaran lazaretto, which will be open throughout the year to arrivals specified in Articles 4 and 5 of this Regulation.

Article 7.—Vessels upon which cases of cholera or suspicious cases have occurred, either in the port of embarkation or during the voyage, will undergo (both vessels and pilgrims) quarantine for 15 days at Camaran. This quarantine will be renewed each time a cholera case occurs among crew or passengers after their arrival at the lazaretto and will date from the last case of sickness. In such cases, the provisions of the Cholera Regulation of 1867 will be strictly applied.

Article 8.—When a batch of pilgrims has suffered from cholera during their stay at Camaran, they will not be admitted to free pratique at Jeddah until they have undergone a supplementary quarantine for five days and rigorous disinfection at the lazaretto at Abu-Saad.

Vessels carrying such pilgrims may, however, clear in quarantine in conformity with Article 16 of the principal Regulation after landing at Abu-Saad the pilgrims and their baggage, and merchandise destined for Jeddah.

Article 9.—Indian or Malay pilgrims who take the indirect route *vid* Suez to the Hedjaz will be subjected to quarantine, unless they can prove, on their arrival at Jeddah, by their passports or other official documents, that they have come from beyond the Suez Canal, or that they have spent at least ten days in Egypt, in free pratique and in good health.

Vessels embarking at Suez Indian or Malay pilgrims who do not fulfil these conditions will be treated as infected, and will have to proceed to Camaran, at any rate in certain cases, to undergo quarantine there, according to the country of origin of the pilgrims in question.

Article 10.—Merchandise destined for Yemen not susceptible of infection can be landed at Hodeida under the supervision of the sanitary authority.

Article 11.—Vessels from beyond the Suez Canal and Egypt with unclean Bills of Health must proceed to Camaran for quarantine.

Article 12.—Pilgrim vessels which arrive from ports where cholera exists, but have had no cholera case during the voyage or after arrival, will undergo (vessels and pilgrims) a quarantine of ten days. Merchandise coming from a cholera-infected port will remain on board, if there have been no cholera cases during the voyage or after arrival, and will be exempt from disinfection and from sanitary fees, except in the case of old personal effects and stuffs already used, unwashed wool, old cottons, horse hair and feathers, raw hides, and other raw animal products, as well as rags of all kinds, which will be subject to the provisions of the Cholera Regulation of 1867.

Article 13.—No pilgrim vessel, even when admitted to free pratique, will be allowed to leave Camaran without re-shipping, after the performance of their quarantine, all the pilgrims brought by her.

Article 14.—Vessels coming from the Persian Gulf and Zanzibar, with pilgrims on board, bound for the Hedjaz, will also proceed to Camaran, but will be treated, according to the tenor of their Bills of Health, in the manner provided by the Cholera Regulation of 1867.

Article 15.—*Sambouks* coming from beyond the Straits of Bab-el-Mandeb with pilgrims will be subject to the same rules as vessels specially chartered for pilgrims. They must proceed direct to the anchorage of Camaran, and will be excluded from all other Arabian ports on the Red Sea.

Article 16.—The embarkation on board pilgrim vessels of live animals, as well as hides, animal products, rags of all kinds, coal, petroleum, and all other inflammable or explosive material except such coal and animals as are necessary for the service and provisioning of the vessel during the voyage, is strictly prohibited.

Article 17. All vessels embarking more than 100 pilgrims must be provided with a medical man licensed by authority in the country of departure, as well as with medicines, disinfectants, and articles necessary for the care of the sick. A special place must be arranged on the deck as a hospital. Attendance and medicines will be given gratuitously.

Article 18.—On the arrival of a pilgrim vessel at Camaran or Abu-Saad, as the case may be, all pilgrims will be disembarked and undergo the usual medical examination. If the condition of the vessel is good, and no suspicious case has occurred during the voyage, the vessel and the pilgrims will undergo five full days' quarantine, and their clothing and effects will be disinfected; but the cargo will be subject to the provisions of the Cholera Regulation of 1867.

Article 19.—The sanitary authority will not allow the departure of a pilgrim vessel from any port in the Empire, without assuring him-

self that it satisfies the following conditions, *viz.*, that the vessel is fit to undertake the voyage without danger; that she is well-equipped, well-regulated, well-ventilated, provided with a sufficient number of boats, and that she contains nothing on board that is or may become injurious to health or prejudicial to the safety of the passengers; that there are on board suitably stored, besides the provisions of the crew, food, drinking water of good quality, and fuel in sufficient quantity for all the pilgrims and for the entire declared duration of the voyage. This last provision, however, in so far as it concerns food, is strictly applicable only to vessels passing the Straits of Bab-el-Mandeb. For all other vessels the Captain is bound to have food only in the proportion necessary for the wants of the pilgrims who may have contracted to be fed on board during the entire voyage. The sanitary authority will refer to the authority to which the vessels are subject for the application of those of the above provisions which do not concern him directly.

Article 20.—Every pilgrim vessel which does not conform to the provisions of the present Regulation will be held to have contravened sanitary rules and be liable to extreme measures regarding quarantine.

Article 21.—Vessels carrying pilgrims are strictly subject to the following instructions concerning the measuring of pilgrim vessels:—

Read and adopted in meeting of the Superior Council of Health, the 10th and 22nd December, 1891, and amended the 23rd and 25th December, 1893.

Instructions regarding the measurement of Pilgrim-ships referred to above in Article 21.

1. Only steamers and ships propelled partly by steam and partly by sail are authorized to carry pilgrims on voyages beyond the Straits of Bab-el-Mandeb or beyond the Suez Canal.

2. The space to be given to each pilgrim irrespective of age or sex shall be at least 9 superficial feet and 54 cubic feet between decks. No passenger shall be accommodated in the ship's hold, and the deck, free of all goods, shall be reserved for the use of the crew and the passengers travelling between decks.

3. Any ship which can produce an official certificate, furnished by the authority on which it is dependent, proving its capacity with regard to the number of passengers that can be embarked, shall not be liable to a second measurement, except in the event of the size, capacity, and arrangements of the ship being found by the sanitary authority not to be in accord with the number of passengers shown in the certificate.

4. Any ship sailing under the Turkish flag which is unable to produce an official certificate of measurement shall be measured by a competent officer of the Imperial Marine, to be named by the local authority, with the assistance of the sanitary authority of the port where the ship happens to be. The service rendered by the sanitary authority in such a case is gratuitous.

As regards ships belonging to a foreign marine and not possessing official certificates of measurement, the sanitary authority shall give them the opportunity of producing the documents required in communication with their respective Consuls. The Consul can, if he so desires, cause the measurement in question to be made by the competent local authority in accordance with the requirements of Article (2) above.

5. The sanitary authority shall refuse to give a Bill of Health to any ship which has embarked pilgrims without the necessary certificate.

Read and adopted in meeting of the Superior Council of Health, the 10th and 22nd December, 1891.

Review of the Revenue Report of Irrigation Works in Bengal for 1892-93.

READ—

The Revenue Report of Irrigation Works in Bengal for 1892-93, and the Resolution thereon by the Government of Bengal, No. 1284 I.A., dated the 28th November 1893.

OBSERVATIONS.—The canal systems in Bengal for which Capital and Revenue Accounts are kept are, as formerly, seven in number, four being Major Works, and three Minor Works. One Major Work and two Minor Works are for Navigation only.

The Capital outlay on these works during and up to the end of 1892-93 was as follows:—

	Number of works.	DURING THE YEAR 1892-93. Works.	Establishment.	Tools and Plant.	Suspense account.	Total direct charges.	Indirect charges.	Total direct and indirect charges.	Total direct and indirect to end of 1892-93.

2. The direct Capital outlay on the Orissa Canals was Rs. 3,63,215, the principal expenditure being on the extension and remodelling of the Taldanda Canal and on the construction of distributaries and embankments. There was no change in the length of canals during the year, but 50 miles of distributaries were completed.

On the Sone Canals, the direct Capital outlay was Rs. 56,252, principally on distributaries.

On the Hidgellee Tidal Canal, the direct Capital outlay was Rs. 38,319, principally on works connected with the remodelling scheme.

3. The length of Main and Branch Canals open at the end of the year was 916 miles, of which 673 miles are navigable, and of distributaries 2,431 miles.

4. The financial results of the year are shown in the following statement:—

5. There was a satisfactory increase of Rs. 2,37,281 in the net revenue realized from Major Works, but this result was due in a great measure to recovery of arrears effected by improved administration, and the increase cannot therefore be expected to be permanent.

The system of managing revenue collections by means of revenue divisions in charge of a Deputy Collector continues to work well, and this system, which during the year under review was in force on the Sone and Orissa Canals, has been extended to the Midnapore Canal from 1st April 1893. The work of the Deputy Collectors in charge of these Revenue divisions is favourably commented on by the Local Government in paragraph 6 of its Resolution.

The net revenue earned is the highest on record, and amounted to 0·63 per cent. of the Capital outlay as compared with 0·25 per cent. last year.

6. There was, especially on the Orissa Canals, a marked decrease in the demands remaining unrealized at the end of the year under review, as compared with 1891-92. The figures for the three Major Irrigation Works are given in the following statement:—

Canals.	Balance unrealized at beginning of year.	Demands of year.	Total.	Less collections and remissions.	Balance unrealized at close of year.
	Rs.	Rs.	Rs.	Rs.	Rs.
Orissa	2,33,704	4,06,312	6,40,016	5,50,199	89,817
Midnapore	58,972	2,71,110	3,30,082	2,81,515	48,567
Sone	1,11,444	10,47,633	11,59,077	10,71,287	87,790
Total	4,04,120	17,25,055	21,29,175	19,03,001	2,26,174

7. The following table exhibits the area irrigated and the Revenue assessed thereon for the three Major Irrigation Works:—

Canals.	Area irrigated.		Assessed water-rates.		Per acre irrigated.	
	1892-93.	1891-92.	1892-93.	1891-92.	1892-93.	1891-92.
1	2	3	4	5	6	7

Orissa	160,952	177,685	2,40,200	2,66,587	1·49	1·50
Midnapore	91,217	83,973	1,40,000	1,29,245	1·53	1·54
Sone	410,761	474,723	8,15,158	9,82,032	1·98	2·07
Total	662,930	736,381	11,95,358	13,77,864	1·80	1·87

The differences occur principally on the Sone Canals. As explained in paragraph 79 of the Chief Engineer's report, the new rules under the Irrigation Act, which were introduced in 1891-92, were fully in force during 1892-93. Under these rules the irrigation is assessed by seasons instead of by crops as formerly, and a comparison of the areas irrigated in the two years cannot therefore be made accurately.

The assessments for 1892-93 are lower than in 1891-92 on all three canals.

8. The irrigation during the kharif and rabi was as follows:—

Canals.	Kharif.	Rabi.
	Acres.	Acres.
Orissa	158,358	2,594
Midnapore	91,217	...
Sone	311,168	99,593
Total	560,743	102,187

The areas irrigated by flow and lift were 643,792 acres and 18,958 acres respectively, or about 97 per cent. flow to 3 per cent. lift.

9. The principal crops irrigated were:—

	Acres.
Rice	568,371
Wheat	36,756
Barley	17,445
Sugarcane	39,007

The estimated value of the crops irrigated was 223 lakhs of rupees.

10. The details of working expenses, omitting the Eden Canal, are as follows:—

GRAND TOTAL	8,95,777	8,43,252	1,04,443	1,18,055	19,61,527	19,86,214

Of the maintenance outlay on the Orissa Canals, Rs. 53,456 were spent on head works, Rs. 1,23,060 on main canals, and Rs. 30,033 on distributaries. The excess expenditure as compared with 1891-92 was principally caused by repairs and improvements rendered necessary by high floods.

On the Midnapore Canal, Rs. 9,965 were expended on head works, Rs. 59,802 on main and branch canals, and Rs. 12,612 on distributaries. The large decrease on the main and branch canals as compared with 1891-92 is attributed partly to the thorough repairs carried out during the long closure of last year and partly to the close supervision exercised.

On the Sone Canals, Rs. 22,374 were expended on head works, Rs. 2,00,130 on main and branch canals, and Rs. 55,918 on distributaries. The increase in the total expenditure on main canals and distributaries was principally caused by a long closure of the Arrah Canal, during which extensive repairs and silt clearances were carried out.

11. The charge for establishment in the table in para. 10 is made up as follows:—

	Revenue management.	Maintenance.	TOTAL.	Percentage.
	Rs.	Rs.	Rs.	
Direction	22,367	22,367	44,734	5·30
Executive	2,12,401	2,12,400	4,24,801	50·38

GRAND TOTAL	6,08,485	2,34,767	8,43,252	100·00

The total cost of maintaining the Irrigation Major Works amounted to 79·3 per cent. of the gross revenue, of which 26·3 per cent. represents the charge for Revenue management.

12. The following figures relate to the complaints received and disposed of during the year:—

SYSTEMS.	Pending from previous year.	Filed during year.	Total.	Disposed of.	Balance left pending.
Orissa	830	3,372	4,202	3,748	454
Midnapore	95	341	436	367	69
Sone	529	7,483	8,012	7,417	595
	1,454				1,118

The total balance left pending is 1,118 as against 1,454 last year.

There was a great increase on the Sone Canals in the number of complaints filed during the year, and this occurred principally in the Buxar Division where the increase was from 737 to 3,944. The cause assigned is that, in the case of the large rabi area of 1891-92, there was no time to check the measurement statements before the demand statements were despatched, and that afterwards mistakes were found to have occurred, but the explanation does not appear satisfactory.

13. The navigation receipts and expenditure for all works are shown in the following statement:—

CANALS.	Length of navigable canal.	Receipts.	Expenditure.
	Miles.	Rs.	Rs.
Orissa Canal	205	1,19,394	20,758
Midnapore Canal	72	1,17,533	13,888
Hidgellee Tidal Canal	29	52,180	33,161
Sone Canal	218	59,089	42,653
Calcutta and Eastern Canals	47	4,64,716	2,52,307
Orissa Coast Canal	102	55,832	79,699
Nuddea Rivers	477	1,65,380	1,30,293
Total	1,150	10,34,124	5,72,759
Figures for 1891-92	1,150	11,42,587	6,88,537

There was a decrease in expenditure of Rs. 1,15,778, but receipts also fell off by Rs. 1,08,463.

14. The Navigation receipts are divided as follows:—

	Rs.
Tollage on private boats	9,64,786
„ Government boats	14,512
„ rafts	15,680
Transport service	27,984
Fines and sundries	11,162
TOTAL	10,34,124

The aggregate ton-mileage amounted to 49½ millions, the estimated value of the cargoes to 1,363 lakhs of rupees, and 612,668 passengers were carried.

15. The agreement regarding the Sarun Canals mentioned in paragraph 15 of last year's review, which was continued with slight modifications during 1892-93, has not proved satisfactory, and the future of these canals is uncertain.

The landholders who have proprietary rights in the river channels connected with the Eden Canal have lately seemed disposed to come to terms with Government, and it is hoped that an arrangement may be effected by which water from this canal will become available for irrigation and afford some return on the money expended.

16. The following table contains figures relating to the duty of water used for irrigation purposes:—

CANALS.	AVERAGE DISCHARGE, CUBIC FEET PER SECOND.				AREA IRRIGATED PER CUBIC FOOT PER SECOND.			
	AT HEAD.		UTILIZED.		DISCHARGE AT HEAD.		UTILIZED.	
	Kharif.	Rabi.	Kharif.	Rabi.	Kharif.	Rabi.	Kharif.	Rabi.

Sone . . .	4,098	2,494	3,529	1,580	67·06	50·60	77·85	79·87

17. The divergence between the sets of experiments on the outturn of rice crops on the Orissa and Sone Canals, which was noticed in last year's review, still continues, as will be seen from the figures on the margin, and no explanation has yet been given. No experiments were carried out on the Midnapore Canal during the year under review.

	OUTTURN PER ACRE. Grain. Mds.	Straw. Mds.
Orissa	12·63	24·01
Sone	37·1	88·02

18. The Revenue Report was received by the Government of India on the 6th December 1893, or about a month earlier than last year.

19. The Government of India have much satisfaction in noting the rapid progress made in the recovery of arrears of collections, especially in the case of the Orissa Canals, and also the good work done during the year by Mr. Odling and the officers of the department generally.

ORDER.—Ordered, that copies of this Review and of the Report be forwarded to the Revenue and Agricultural Department for information.

4. The net revenue derived from Major Works was higher by Rs. 7,521 than that of 1891-92, the receipts being more by Rs. 44,138 and the working expenses more by Rs. 36,617. Out of nine works three were worked at a loss.

On Major Works the percentage of net revenue on Capital outlay was 1·22 as compared with 1·19 last year. The balance of interest charges on these works amounted to Rs. 4,69,239 during 1892-93 and to Rs. 93,08,066 up to the end of the year.

The Minor Works of which Capital and Revenue accounts are kept yielded, during the year under review, a net revenue of Rs. 18,632 against Rs. 14,568 during the previous year, the decrease under revenue collected being more than balanced by a decrease in working expenses. In the case of eleven works out of twenty-six, the gross revenue was insufficient to cover the working expenses. The Government of India are pleased to learn from paragraph 14 of the Resolution by the Bombay Government that the question of handing over some of these works to the Revenue Department is receiving attention.

The net revenue from Minor Works of which only Revenue accounts are kept amounted to Rs. 3,46,934 against Rs. 3,58,319 in the previous year, a moderate rise in gross receipts having been insufficient to cover a considerable rise in working expenses.

5. The details of Irrigation revenue for the Major and Minor Works for which Capital and Revenue accounts are kept, are as follows:—

	Rs.
Water-rates directly paid	3,84,777
Share of enhanced land-revenue	12,747
	3,97,524
Deduct—Refunds	1,243
	3,96,281

6. The miscellaneous receipts from the same works were:—

	Rs.
Plantations	8,707
Water-power	10,920
Miscellaneous	1,34,634
	1,49,261

The miscellaneous receipts include a sum of Rs. 97,178, derived from water-supply of towns. Of this amount, Rs. 15,670 was charged for 304 million gallons of water from the Mutha Canals for the Poona City water-supply, the rates enforced being the same as those formerly charged. The average daily consumption of water in the Cantonment and Civil station of Poona was 799,701 gallons, being an average consumption of 24·8 gallons per head per diem for a population of 32,247.

7. The following table compares the areas irrigated by Major and Minor works during the year under review and the previous year with the assessments for those years:—

8. The area irrigated during the year under review shows a decrease of 29,948 acres as compared with last year; this is attributed to the favourable rainfall, which was more than double that of the previous year in many localities.

It is noticeable, however, that the falling off is confined to the Major Works and to the Minor Works of which Capital and Revenue accounts are kept, a slight increase being shown in the case of Minor Works of which only Revenue Accounts are kept; and the same remark applies regarding assessments.

The rate per acre for assessments has risen on all three classes of works: the considerable rise on Major Works is due to the commoner kinds of crops having been less freely irrigated during the year under review.

The report on the points mentioned in paragraph 9 of last year's review has not yet been received. The matter is said to be receiving the attention of the Bombay Government, and a communication is promised when all the reports of the local officers have been received.

9. The balance of unrealized demands, which amounted to Rs. 54,427 at the beginning of the year, had fallen to Rs. 31,456 at its close. The principal item outstanding was Rs. 15,708 on the Mutha Canals, and nearly two-thirds of this sum is stated to be on account of water supplied to towns.

10. The principal crops irrigated from Major Works and Minor Works of which Capital and Revenue accounts are kept were, as follows:—

	Acres.
Jowár	5,871
Ground-nut	11,242
Wheat	10,768
Sugarcane	8,851
Bajri	4,871

There was a large decrease, amounting to 23,224 acres, in the irrigated area under jowár, owing to more favourable rainfall.

The aggregate estimated value of the crops irrigated from the same works was 39½ lakhs of rupees.

No information regarding crops is supplied for Minor Works of which only Revenue accounts are kept.

11. The working expenses of the canals in operation are shown in the following table:—

There is an increase of Rs. 21,885 in the total working expenses of Major Works and Minor Works for which Capital accounts are kept, and the reasons for this are explained at length in paragraph 13 of the General remarks in the Report. Paragraph 10 of the Resolution by the Bombay Government deals with the subject of the increase in Working expenses, and the Government of India concur in the remarks therein made concerning the absolute necessity for enforcing strict economy.

The rates per acre irrigated in the case of these works are very high as compared with the rate in the case of Minor Works for which only Revenue accounts are kept.

12. The Establishment charges on the works for which Capital and Revenue accounts are kept were made up as follows :—

	Revenue Management.	Maintenance.	Total.
	Rs.	Rs.	Rs.
Direction . . .	19,424	8,515	27,939
Executive . .	68,552	27,743	91,295
Civil Officers . . .	22,026	...	22,026
TOTAL .	1,05,002	36,258	1,41,260

The rate per acre irrigated for revenue management alone works out to Rs. 1·6, and this would be a very full rate in other provinces for the whole cost of working expenses.

13. In the case of the old irrigation works of which only Revenue accounts are kept, the working expenses have risen by Rs. 28,328, and the charges for Establishment by Rs. 15,010. The Bombay Government, in paragraph 16 of their Resolution on the Revenue Report, have noticed the absence of explanation in respect of the charges against these works, and the required information will doubtless be supplied in next year's report. The Government of India are pleased to find that the maintenance of these useful works is receiving due attention.

14. The Revenue Report was received by the Government of India on 16th January. It has been well prepared and is well illustrated, as usual, by a series of maps.

GOVT. OF INDIA, PUBLIC WORKS DEPT.—CIVIL WORKS, IRRIGATION.

Calcutta, the 13th March 1894.

Review of the Revenue Report of Irrigation Works in the North-Western Provinces for the year 1892-93.

Read—

Letter No. 152 I., dated the 15th January 1894, from the Government of the North-Western Provinces, forwarding the Revenue Report of Irrigation Works in the North-Western Provinces for 1892-93, and the Resolution of that Government reviewing the Report.

OBSERVATIONS.—The Irrigation Works in operation for which Capital and Revenue Accounts are kept are, as in the preceding year, nine in number. Four are classed as Productive, one, the Betwa Canal, as Protective, and four as Minor Works. The Capital outlay on these works during and up to the end of the year under review is shown in the following statement :—

2. The total Capital outlay during the year is Rs. 1,27,028 less than during 1891-92. Under Suspense Account there is a decrease in expenditure of Rs. 88,262 owing to a large quantity of stock having been utilized, and under indirect charges there is a decrease of Rs. 50,706, the capitalized value of land revenue re-assessed on all land relinquished by the Irrigation Department up to the end of 1891-92 having been deducted from the indirect Capital charges of the canals concerned.

On the Betwa Canal, there was a Capital outlay of Rs. 9,666 incurred principally on drainage cuts of which 12 miles were opened during the year.

On the Ganges Canal, there was a Capital outlay of Rs. 86,217. The raising of the Puth Bridge was completed; masonry outlets and discharge flumes were constructed on certain distributaries; two miles of new distributary channel and 72 miles of new drainage cuts were completed.

On the Agra Canal, the Capital outlay was Rs. 24,639 incurred principally on distributaries. Four miles of new drainage cuts were completed during the year.

5. The gross revenue derived from the Major Works is less by Rs. 1,94,244 than in 1891-92, and the working expenses are more by Rs. 27,474, so that the net revenue is less by Rs. 2,21,718 than in the previous year.

The net revenue realized from the Major Works is equivalent to 5·2 per cent. on the Capital outlay, as compared with 5·5 per cent. in the previous year.

6. The net revenue derived from the Minor Works is Rs. 9,469 more than in the previous year.

7. The following table gives the result of the first year's working of the new Provincial Contract which takes the place of the Contract which expired on the 31st March 1892 :—

		Rs.
Revenue—		
Productive Works, gross earnings		55,99,355
Minor Works		1,86,634
	Total	57,85,989
Expenditure, Provincial—

Minor Works	Capital Account	49,025
	Working Expenses	1,61,970

	Total	27,36,320
Net Revenue		30,49,669
Interest charges payable to Government of India		29,00,916
Surplus		1,48,753

Under the new contract the Provincial Government retains, as before, the direct revenue from Productive Works and Minor Irrigation Works, but has now to pay interest to the Imperial Government on the total Capital outlay from all sources on Major Irrigation Works and on the Capital outlay from Imperial Funds on Minor Works and Navigation.

8. The statement in para. 4 gives the actual collections for the year, and the following table gives details of the irrigation revenue assessed, the total for each canal being compared with the area irrigated :—

9. The area irrigated is 1,799,846 acres, or 245,184 acres less than in 1891-92, the decrease being most marked on the Agra, Betwa, and Dun Canals. On the two latter the deficiency is in the rabi area alone, and is attributed to the plentiful winter rains. On the Agra Canal, there is a deficiency in kharif area also, which is said to be due to the supply of water in the Jumna River having fallen lower, during May and June 1892, than had ever occurred before.

The irrigated area under kharif crop was 706,221 acres, or 39·24 per cent. of the total irrigation, and that under rabi crop was 1,093,625 acres, or 60·76 per cent.

The assessments are lower than in 1891-92 by nearly 6 lakhs of rupees.

The total water-rate per acre irrigated averages Rs. 3·5 against Rs. 3·4 in the previous year.

The occupier's rate averages Rs. 2·66 per acre.

10. The areas under the principal crops were as follows :—

Crops.	1892-93.	1891-92.
	Acres.	Acres.
Sugarcane	216,362	245,667
Rice	174,843	149,015
Indigo	138,521	174,546
Cotton	68,690	88,647
Wheat	655,116	755,786
Barley	68,963	108,821
Gram	34,510	55,557
Poppy	9,816	11,290

The area under rice is the largest yet recorded.

There is a marked decrease under indigo, the explanation given being that the crop has suffered severely from excessive rain for some years past, while prices have also ruled low.

The decrease under barley is attributed to favourable winter rains, and that under wheat partly to the same cause and partly to the adoption of a more correct crop classification, wheat mixed with other crops being included under "Other Cereals" instead of under "Wheat" as formerly.

The estimated value of the irrigated crops is 671¾ lakhs of rupees, which is equivalent to Rs. 37·3 per acre and to 81·9 per cent. of the total Capital outlay on open canals.

11. The balance of demands remaining unrealized was Rs. 1,83,106 at the beginning and Rs. 1,21,979 at the end of the financial year. The remissions amounted to Rs. 41,198.

12. The following statement gives the details of the working expenses for 1892-93, and the totals compared with the previous year:—

Under extensions and improvements the expenditure amounted to Rs. 2,95,149 as compared with Rs. 2,33,826 in the previous year. It was incurred principally on river training works at the heads of the Ganges and Lower Ganges Canals and on numerous miscellaneous works for the improvement of distributaries and drainage works.

The outlay on repairs amounted to Rs. 9,21,991 as against Rs. 10,01,751 in 1891-92, in which year the repairs to river training works were exceptionally heavy. The cost of working expenses per acre irrigated is high, and the Government of the North-Western Provinces and Oudh have already been addressed on the subject of reducing the outlay under this head.

13. The details of the Establishment Charges shown in the last statement are as follows:—

	Revenue management.	Maintenance.	Total.	Percentage.
	Rs.	Rs.	Rs.	
Direction	1,65,937	60,701	2,26,638	16·29

Grand Total	10,12,658	3,78,286	13,90,944	100·00

14. The working expenses amounted to 40·4 per cent. of the gross revenue realized, and the cost of Revenue Management amounted to 35·1 per cent. of the working expenses.

15. The length of navigable channel open at the end of the year was 535 miles as in the previous year.

The ton-mileage amounted to about $5\frac{3}{4}$ millions: the estimated value of the cargoes was over 25 lakhs and that of rafts $2\frac{3}{4}$ lakhs.

The number of passengers carried was only 636.

16. The receipts and charges on account of navigation operations were as follows:—

Canal.	Receipts. 1891-92.	Receipts. 1892-93.	Charges. 1891-92.	Charges. 1892-93.
	Rs.	Rs.	Rs.	Rs.
Upper and Lower Ganges	16,630	11,763	19,654	14,027
Agra	7,679	6,512	9,993	8,463
Total	24,309	18,275	29,647	22,490

The deficit on navigation operations is smaller than last year by Rs. 3,275 on the Ganges Canals and by Rs. 363 on the Agra Canal, the improvement being in both cases due to reduction of Maintenance charges.

17. The revenue realised on account of water power amounted to Rs. 71,793, principally on the Ganges and Dun Canals. The total mean discharge available at the heads of canals was 10,202 cubic feet per second, and the revenue is equivalent to Rs. 7·04 per cubic foot.

18. The following hydraulic details are given in the report:—

Canal.	Number of irrigating days.	Mean discharge at head, cubic feet per second.	Discharge utilised, cubic feet per second.	Percentages. Discharge utilized.	Percentages. Discharge escaped.
Ganges	287	3,862*	3,299	85·4	14·6
Lower Ganges	287	3,814	2,194	57·5	42·5
Agra	209	1,024	710	69·3	30·7
Eastern Jumna	303	982	898	91·5	8·5

* Exclusive of the volume passed on to the Lower Ganges Canal.

The high percentage utilized on the Ganges Canal is due to the surplus water, which is run to keep up navigation, being passed on to, and escaped by, the Lower Ganges Canal.

The low percentage utilized on the Agra Canal is said to be due to this canal having been run during the latter half of the rabi season for navigation only, rain having stopped the demand for water for irrigation.

19. The following figures relate to the water duty obtained and the occupier's rate per cubic foot of discharge:—

Canal.	Area irrigated per cubic foot: Of discharge at head.	Area irrigated per cubic foot: Of discharge utilised.	Total water-rate per cubic foot of discharge utilised.	Occupier's rate per acre.	Total water-rate per acre.
	Acres.	Acres.	Rs.	Rs.	Rs.
Ganges	187	219	872	2·88	3·98
Lower Ganges . . .	153	266	809	2·42	3·04
Agra	104	151	508	2·88	3·38
Eastern Jumna . . .	231	253	1,150	3·41	4·54

The area irrigated per cubic foot of discharge utilized and the occupier's rate assessed are higher than in the previous year except on the Agra Canal.

20. The following particulars relate to the distributaries:—

Canal.	Area irrigated per mile of distributary.	Number of outlets per mile.	Area irrigated per outlet.
	Acres.		Acres.
Ganges	276	7·2	38
Lower Ganges	266	5·4	50
Agra	189	7·2	26
Eastern Jumna	343	5·6	61

Judging from these figures, the number of outlets on the Ganges and Agra Canals appears to be excessive.

21. The measurements of the level of water in wells were carried out as usual. On the Ganges Canal, the levels show generally a distinct fall, while the opposite is the case on the Lower Ganges Canal, particularly in the lower part of the Doab where the rainfall was above the average.

22. The Capital outlay during the year on drainage works amounted to Rs. 1,06,864, and 172 miles of new drainage cuts were opened. The Maintenance charges for drainage cuts in connection with works for which Capital and Revenue Accounts are kept was Rs. 62,900 and the expenditure under Agricultural Works was Rs. 63,954.

23. The following figures relate to the Tarai and Bhabar Canals which are in charge of an officer of the Irrigation Branch. No separate water-rent is assessed on these canals, the amount entered under water-rate being an arbitrary portion of the land revenue which is credited to the canals:—

Canals.	Irrigated area.	Revenue Receipts: Water-rate.	Plantations.	Water power.	Total.	Revenue Expenditure: Original works.	Repairs.	Establishment.	Tools and Plant.	Total.

* Details not given in the Revenue Report.

24. The Revenue Report was received by the Government of India on January 17th 1894, or four months earlier than was the case last year; but judging from the dates of the Chief Engineer's report (17th October 1893) and of the Resolution by the Local Government (19th October 1893), it might have reached the Government of India a good deal earlier. It has as usual been well prepared, and the results which it records can only have been attained through good and careful work on the part of the staff of the Department.

ORDER.—Ordered, that copy of this Review and of the Report be forwarded to the Revenue and Agricultural Department for information.

If the person claimed on the part of Her Majesty's Government, or on the part of the Government of the Argentine Republic, should be under examination for any other crime in the territory of the Argentine Republic or in the United Kingdom respectively, his extradition shall be deferred until the conclusion of the trial and the full execution of any punishment awarded to him.

ARTICLE V.

The extradition shall not take place if, subsequently to the commission of the crime, or the institution of the penal prosecution or the conviction thereon, exemption from prosecution or punishment has been acquired by lapse of time, according to the laws of the State applying or applied to.

It shall likewise not take place when, according to the laws of either country, the maximum punishment for the offence is imprisonment for less than one year.

ARTICLE VI.

A fugitive criminal shall not be surrendered if the offence in respect of which his surrender is demanded is one of a political character, or if he prove that the requisition for his surrender has, in fact, been made with a view to try or punish him for an offence of a political character.

ARTICLE VII.

A person surrendered can in no case be kept in prison or be brought to trial in the State to which the surrender has been made, for any other crime, or on account of any other matters, than those for which the extradition shall have taken place, until he has been restored, or has had an opportunity of returning to the State by which he has been surrendered. This stipulation does not apply to crimes committed after the extradition.

ARTICLE VIII.

The requisition for extradition shall be made through the Diplomatic Agents of the High Contracting Parties respectively.

The requisition for the extradition of an accused person must be accompanied by a warrant of arrest issued by the competent authority of the State requiring the extradition, and by such evidence as, according to the laws of the place where the accused is found, would justify his arrest if the crime had been committed there.

If the requisition relates to a person already convicted, it must be accompanied by the sentence of condemnation passed against the convicted person by the competent Court of the State that makes the requisition for extradition.

A sentence passed *in contumaciam* is not to be deemed a conviction, but a person so sentenced may be dealt with as an accused person.

ARTICLE IX.

If the requisition for extradition be in accordance with the foregoing stipulations, the competent authorities of the State applied to shall proceed to the arrest of the fugitive.

República Argentina, ya hubiese sido enjuiciado y puesto en libertad ó castigado, ó continuará procesado en el territorio de la República Argentina ó en el Reino Unido respectivamente, por el crimen por el que se demande su extradicion.

Si el individuo reclamado por el Gobierno de Su Majestad, ó por el Gobierno de la República Argentina, estuviera detenido por cualquier otro crimen en el territorio de la República Argentina ó en el Reino Unido respectivamente, su extradicion será aplazada hasta la terminacion del juicio y la completa ejecucion del castigo que le fué impuesto.

ARTICULO V.

La extradicion no tendrá lugar si, despues de cometido el crimen ó de instituida la acusacion criminal ó de condenado el reo, surgiera la prescripcion, segun las leyes del Estado requeriente ó requerido.

No tendrá igualmente lugar cuando, segun las leyes de cada pais, la mas alta pena del delito sea menor de un año de prision.

ARTICULO VI.

Un criminal fugado no será entregado si el delito por el cual se solicita su extradicion es de carácter politico, ó si dicho criminal probase que el pedido de extradicion se ha hecho en realidad con la mira de enjuiciarlo ó castigarlo por un delito de carácter politico.

ARTICULO VII.

Un individuo entregado no puede en caso alguno ser detenido ni enjuiciado en el Estado al que se haga la entrega, por otro crimen ó por otros asuntos que no sean aquellos que hayan motivado la extradicion, hasta tanto haya sido devuelto, ó haya tenido una oportunidad de regresar al Estado que lo entregare. Esta estipulacion no se aplica á crimenes cometidos despues de la extradicion.

ARTICULO VIII.

La requisitoria de la extradicion se hará por los Agentes Diplomáticos de las Altas Partes Contratantes respectivamente.

La requisitoria para la extradicion de un individuo acusado ha de ser acompañada de órden de prision, dada por autoridad competente del Estado que requiera la extradicion, y de aquellas pruebas que, segun las leyes del lugar donde sea hallado el acusado, justificarian su prision si el crimen hubiese sido cometido alli.

Si la requisitoria se relaciona con persona ya condenada, deberá venir acompañada de la sentencia condenatoria dictada contra la persona condenada por el Tribunal competente del Estado que haga la requisitoria para la extradicion.

Una sentencia dictada en rebeldia no ha de reputarse condenatoria; pero á una persona asi sentenciada puede tratarsele como á persona acusada.

ARTICULO IX.

Si la requisitoria para la extradicion está de acuerdo con las precedentes stipulaciones, las autoridades competentes del Estado requerido procederán á la prision del fugitivo.

ARTICLE X.

A fugitive criminal may be apprehended under a warrant issued by any Police Magistrate, Justice of the Peace, or other competent authority in either country, on such information or complaint, and such evidence, or after such proceedings, as would, in the opinion of the authority issuing the warrant, justify the issue of a warrant if the crime had been committed or the person convicted in that part of the dominions of the two Contracting Parties in which the Magistrate, Justice of the Peace, or other competent authority exercises jurisdiction: provided, however, that in the United Kingdom the accused shall, in such case, be sent as speedily as possible before a Police Magistrate in London. He shall, in accordance with this Article, be discharged, as well in the Argentine Republic as in the United Kingdom, if within the term of thirty days a requisition for extradition shall not have been made by the Diplomatic Agent of his country in accordance with the stipulations of this Treaty. The same rule shall apply to the cases of persons accused or convicted of any of the crimes or offences specified in this Treaty, and committed on the high seas on board any vessel of either country which may come into a port of the other.

ARTICLE XI.

The extradition shall take place only if the evidence be found sufficient, according to the laws of the State applied to, either to justify the committal of the prisoner for trial, in case the crime had been committed in the territory of the same State, or to prove that the prisoner is the identical person convicted by the Courts of the State which makes the requisition, and that the crime of which he has been convicted is one in respect of which extradition could, at the time of such conviction, have been granted by the State applied to; and no criminal shall be surrendered until after the expiration of fifteen days from the date of his committal to prison to await the warrant for his surrender.

ARTICLE XII.

In the examinations which they have to make in accordance with the foregoing stipulations, the authorities of the State applied to shall admit as valid evidence the sworn depositions or statements of witnesses taken in the other State, or copies thereof, and likewise the warrants and sentences issued therein, and certificates of, or judicial documents stating, the fact of a conviction, provided the same are authenticated as follows:—

1. A warrant must purport to be signed by a Judge, Magistrate or officer of the other State.

2. Depositions or affirmations, or the copies thereof, must purport to be certified under the hand of a Judge, Magistrate, or officer of the other State, to be the original depositions or affirmations, or to be true copies thereof, as the case may require.

4. In every case such warrant, deposition, affirmation, copy, certificate, or judicial document must be authenticated either by the oath of some witness, or by being sealed with the official seal of the Minister of Justice, or some other Minister of the other State; but any other mode of authentication for the time being permitted by the law of the country where the examination is taken may be substituted for the foregoing.

ARTICLE XIII.

C. L. Peel.

No. 1131-*I.*—Whereas His Highness the Maharaja of Bikanir (Bikanir being a Native State within the meaning of the Native Coinage Act, IX of 1876) has, pursuant to the authority contained in section 5 of the said Act, caused to be provided at the Mint of Bombay silver which has been coined under the said Act into four lakhs and ten thousand rupees, and has requested the Government of India to declare that a tender of payment of money, if made in rupees so coined, shall be a legal tender in British India:

And whereas the silver so provided has been coined into rupees of fineness identical with that prescribed by law for rupees of the Government of India:

And whereas the rupees so coined are identical in weight with the rupees of the Government of India, and the devices upon their obverse and reverse differ from the devices on coins now made or issued by the Bikanir State, and have been approved by the Governor-General in Council, and upon each of the rupees so coined its value in money of the Government of India is inscribed in the English language:

And whereas the said Maharaja on behalf of himself, his heirs, and successors has undertaken to abstain, during a term of thirty years from the date of this notification, from coining silver and copper in his own Mint, and has also undertaken that no coins resembling coins for the time being a legal tender in British India shall, after the expiration of the said term, be struck under his or their authority or with his or their permission at any place within or without his or their jurisdiction:

And whereas the said Maharaja has formally declared that a tender of payment of money, if made in silver coins of the Government of India, shall, in the territories subject to His Highness, be a legal tender in the cases in which payment made in such coins would under the law for the time being in force, be a legal tender in British India:

And whereas the said Maharaja, for himself, his heirs, and successors, has agreed that the law and rules for the time being in force respecting the cutting and breaking of coin of the Government of India reduced in weight by reasonable wearing or otherwise, or counterfeit, or called in by proclamation, shall apply to the coins made for the said Bikanir State under the said Act, and that the said State will defray the cost of cutting and breaking them:

And has also agreed not to issue the same coins below their nominal value, and not to allow any discount or other advantage to any person in order to bring them into circulation:

And has also agreed that, if at any time the Government of India call in their coinage in silver and copper, he, the said Maharaja, his heirs, or successors, will, if so requested by the

Government of India, call in, at his or their own expense, all the said rupees so coined for him:

Now, therefore, the Governor-General in Council, in consideration of the premises and in exercise of the power conferred by the Native Coinage Act (IX of 1876), section 3, is pleased to declare that a tender of payment of money, if made in the said rupees coined under the said Act for the said State of Bikanir, shall, subject to the provisions of the Indian Coinage Act (XXIII of 1870), be a legal tender in British India.

Witness.

19. Applicants for commissions may state the branch or department of the Army in which they would prefer to be employed in the event of their being called out for service. Special Rules for Cavalry Reserve Officers appointed under Rule 1.

25 (A) Officers of the Native Cavalry Reserve will be required, until they attain the age of 40, to attend the Head-Quarters of the Native Cavalry regiment most conveniently placed with respect to their homes for an annual training of 14 days, which at their own request may be extended up to two months. Such training will be accepted as qualifying for the capitation grant in the Volunteer Corps to which the officers belong. The details of attendance will be arranged by General Officers Commanding the districts to which the Volunteer Corps belong, in communication with the districts in which the training is to be undergone.

(B) The rank of these officers while going through their annual training will be that held by them in the Indian Army Reserve, irrespective of any rank they may hold in their Volunteer Corps. During the actual period of training they will receive pay at the rate of Rio per diem, and free passage by rail from and to their homes for themselves, one charger, and one personal servant.

(C) Officers on attaining the age of 40 will not be required to undergo further training, nor will they be liable to be called up for active service except in cases of emergency. They will, however, remain in the Reserve subject to retirement at the ages and under the conditions laid down in rule 6.

(D) Officers detailed to serve with a regiment of Native Cavalry in the field will be required to

join with one charger. A second charger and if necessary, saddlery will be provided on loan by Government, or on payment, subject to repurchase by Government at a valuation. They will recive Staff Corps rates of pay and staff pay as squadron officers from date of leaving their station to join. They will rank among themselves according to the date of their commissions as Lieutenants, those not already promoted to that rank being so promoted on joining.

Uniform.

26. Officers, as officers of the Indian Army Reserve, are not required to provide themselves with any uniform until their services are actually required.

They are however authorised, when not actually in performance of duty with the Volunteer Forces, or in a Government Department for which a special uniform is prescribed, to wear the following uniform :—

(A) *Tunic.*—Scarlet cloth, with blue cloth collar and cuffs. The collar ornamented with ½ inch lace along the top, and gold Russia braid at the bottom, the cuffs pointed with ½ inch lace round the top, and a tracing of gold Russia braid ¼ inch below the lace, terminating in a crow's foot and eye; eight buttons in front and two at the waist behind; the skirt closed behind with a plait at each side, and lined with white; the front, collar and skirt plaits edged with white cloth, ¼ inch wide; shoulder-straps of twisted round gold cord, universal pattern, lined with scarlet, a small gilt button at the top, badges of rank in silver, the letters "I. A. R." in silver or silver embroidery will be worn below the badges of rank.

Field Officers have a row of braided eyes below the lace on the collar; three bars of lace along the top of the cuff, showing ¼ inch of the facings between the bars; and the braiding on the sleeve is in the form of eyes below the lace for Colonels and Lieutenant-Colonels only. The lace on the sleeve extends to ten inches from the bottom of the cuff.

Captains have no braided eyes on the collar, and only two bars of lace along the top of the cuff; the tracing of the braid below the lace on the sleeves is plain without eyes.

Lieutenants have one bar of lace only on the cuff, extending to 9½ inches from the bottom of the cuff. In other particulars the lace and braiding are the same as those of Captains.

Second-Lieutenants.—As for Lieutenants but without badges of rank.

Lace.—Gold, two-vellum pattern.

Buttons.—Gilt, burnished, with crown and scalloped edge.

(B) An officer retired from the army may wear the uniform of his late regiment.

(C) Officers of the Native Cavalry reserve called up for training under Rule 25-A, will wear the uniform of the Volunteers Corps to which they belong.

27. When called to army service, all officers of the Indian Army Reserve, if not already in possession of khaki uniform, will be required to provide themselves with a field service uniform of the pattern prescribed for the corps or department to which they may be appointed for duty.

No. 800-F.—The following letter is published for information:

No. 766-F., dated Simla, the 18th April, 1894.

From—W. J. CUNINGHAM, Esq., C.S.I., Secretary to the Government of India, Foreign Department,

To—SIR H. MORTIMER DURAND, K.C.S.I., K.C.I.E.

I am directed to convey to you the acknowledgment by the Government of India and by Her Majesty's Government of the very efficient manner in which your recent special duty in Kabul was performed.

2. The Government of India thus expressed themselves in writing on this subject to the Secretary of State—"We desire to place upon record our high sense of the service rendered by Sir Mortimer Durand in discharging the arduous and difficult task confided to him. A settlement such as that which has been arrived at would, in our opinion, have been altogether unattainable but for the confidence with which Sir Mortimer Durand was able to inspire the Amir. That confidence was probably in some measure due to Sir Mortimer Durand's decision to enter Afghan territory without any escort and as the Amir's guest, and there can be no doubt that, as the negotiations proceeded, His Highness became more and more impressed with the sincerity and goodwill of our representative and of the British Government, and gradually abandoned all idea of suspicion or mistrust. To conduct a protracted negotiation of this kind to a successful close required no ordinary qualities of tact and patience—qualities which, together with all others required for so exceptional a negotiation, have been found united to a remarkable degree in Sir Mortimer Durand." To this Lord Kimberley replied—"The warm terms in which your Government acknowledge the services of Sir M. Durand and of the officers attached to him are fully deserved by the admirable tact and discretion with which this most difficult negotiation has been carried through from the beginning to its very satisfactory conclusion. I despatched to you on the 10th November the telegram quoted on the margin, and I now take this opportunity of requesting that you will communicate to Sir M. Durand the entire approval by Her Majesty's Government of his conduct of the important and difficult mission entrusted to him." The Governor-General in Council has much pleasure in thus complying with His Lordship's request.

Telegram, dated the 10th November, 1893.

From—The Secretary of State,

To—The Viceroy.

"Your telegram of 8th. I congratulate Your Excellency and Sir Mortimer Durand on the successful result of the mission to the Amir. The arrangements seem very satisfactory. I await detailed report before commenting on them."

3. The Government of India cannot but regret, however, that the occasion for conveying to you the sentiments of Her Majesty's Government should also be that on which they must bid you farewell on your departure from India.

4. You entered the Foreign Department Secretariat twenty years ago, and have almost uninterruptedly served in the same office with conspicuous merit and great distinction, occupying in quick succession all grades up to the highest, to which you attained nine years ago. You have, however, been more than once employed for a time outside this office; and your distinguished service on the occasion of your mission to Kabul last year was not the first which you had rendered to your country in Afghanistan, where you served as political officer in the field with credit in the years 1879 and 1880.

5. During your whole service you have sought little relaxation by taking leave of absence, and only when your health temporarily broke under the severe strain of your duties did you once remain absent for any long time. Besides the protracted and critical negotiations which have resulted in the settlement of the boundary and improved relations with Afghanistan, you have had to deal with many matters of the highest importance, among which may be mentioned the settlement of the boundary between Afghan-Turkistan and the Russian dominions, coupled with the negotiations conducted with the Amir on the occasion of His Highness's visit to India in 1885; the conquest, annexation, and consolidation of the administration of Upper Burma; the altered relations of the Government of India with Kashmir; the reconstitution of the Gilgit Agency and extension of political influence in Chitral, Hunza, and Nagar; the negotiations with China relative to the Sikkim frontier; the institution of a British protectorate on the Somali Coast and improvement of British relations with the tribes round Aden; the negotiations relating to the boundary of Burma with Siam and China; and the association of Native States in India with the British Government in furnishing troops for the defence of the Empire.

6. A record so distinguished as the history of your service in India cannot be closed without feelings of regret on both sides. The Governor-General in Council rejoices, however, to think that in the high office to which you have been called in Persia you will still be in a position materially to serve the interests of India, and that this country will not lie altogether beyond the horizon of your regard.

7. The Governor-General in Council now bids you a cordial farewell. You have before you the opportunity of winning great fame and distinction in a career which offers far wider scope than service in India can; and you leave behind you a record which gives brilliant promise of success in the future, while it is one upon which you may always look back with pride.

W. J. CUNINGHAM,

Secretary to the Government of India.

THE SCHEDULE.

I.—Nature of the Test-apparatus.

The apparatus consists of the following parts:

(1) the oil cup;

(2) the cover, with slide, test-lamp, and clock-work arrangement for opening and closing the holes in the cover and for dipping the test-flame;

(3) the water-bath or heating vessel;

(4) the tripod stand, with jacket and spirit-lamp for heating the water-bath;

(5) the thermometer for indicating the temperature of the oil in the oil-cup;

(6) the thermometer for indicating the temperature of the water in the water-bath;

(7) the thermometer for indicating the temperature of the oil before it is poured into the oil-cup;

(8) the dropping bottle or *pipette* for replenishing the test-lamp; and

(9) a barometer standardised at such Meteorological Office or other place as the Resident at Hyderabad may appoint in this behalf.

The oil-cup is a cylindrical flat-bottomed vessel made of gun-metal or brass, and tinned or silvered inside. A gauge is fixed to the inside of the cup to regulate the height to which it is to be filled with the sample under examination.

The cup is provided with a close-fitting overlapping cover, which carries the thermometer, the test lamp and the adjuncts thereto. The test-lamp is suspended upon two supports by means of trunnions, which allow it to be easily inclined to a particular angle and restored to its original position. The socket in the cover, which is to hold a round bulb thermometer for indicating the temperature of the oil during the testing operation, is so adjusted that the bulb of the latter is always inserted in a definite position below the surface of the liquid.

The cover is provided with three holes, one in the centre and two smaller ones close to the sides. These are closed and opened by means of a pivoted slide. When the slide is moved so as to uncover the holes, the suspended lamp is caught by a projection fixed on the slide, and tilted in such a way as to bring the end of the spout just below the surface of the lid. As the slide moves back so as to cover the holes, the lamp returns to its original position. Upon the cover in front of and in a line with the nozzle of the lamp is fixed a white bead, the diameter of which represents the size of the test-flame to be used.

The water-bath or heating vessel is so constructed that, when the oil-cup is placed in position in it, an air-space or air-chamber intervenes between the two; consequently, in applying the test under ordinary circumstances, the heat is transmitted gradually to the oil from the hot water through the air-space. The water-bath is fitted with a socket for receiving a long bulb thermometer to indicate the temperature of the water. It is also provided with a funnel, an overflow-pipe, and two handles.

The water-bath rests upon a tripod stand, which is fitted with copper cylinder or jacket, so that the bath is surrounded by an enclosed air-space, which retains and regulates the heat. One of the legs of the stand serves as a support for a spirit-lamp, which is attached to it by a small swing bracket.

The clock-work arrangement, by which during the operation of testing the slide is withdrawn and the test-flame dipped into the cup and raised again as the slide is replaced, is provided with a ratchet key for setting it in action for each test and with a trigger for starting it each time that the test-flame is applied.

II.—Directions for drawing the sample and preparing it for testing.

1. *Drawing the sample.*—In all cases the testing officer or some person duly authorised by him shall personally superintend the drawing of the sample from an original unopened tin or other vessel.

An opening sufficiently large to admit of the oil being rapidly poured or syphoned from the tin or other vessel shall be made.

Two bottles, each of the capacity of about 40 fluid ounces, are to be filled with the oil. One of these, the contents of which is intended to be preserved for reference in case of need, is to be carefully corked, the cork being well driven home, cut off level with the neck, and melted sealing-wax worked into it. The other bottle may be either stoppered or corked.

2. *Preparing the sample for testing.*—About ten fluid ounces of the oil, sufficient for three tests, are transferred from the bottle into which the sample has been drawn to a pint flask or bottle, which is to be immersed in water artificially cooled until a thermometer introduced into the oil indicates a temperature not exceeding 50° Fahrenheit.

III.—Directions for preparing and using the test-apparatus.

Preparing the water-bath.—The water-bath is filled by pouring water into the funnel until it begins to flow out at the overflow-pipe. The temperature of the water at the commencement of each test, as indicated by the long bulb thermometer, is to be 130° Fahrenheit, and this

is attained in this first instance by mixing hot and cold water, either in the bath or in a vessel from which the bath is filled, until the thermometer which is provided for testing the temperature of the water gives the proper indication; or the water is heated by means of the spirit-lamp (which is attached to the stand of the apparatus) until the required temperature is indicated.

2. *Preparing the test-lamp.*—The test-lamp is fitted with a piece of cylindrical wick of such thickness that it fills the wick-holder, but may readily be moved to and fro for the purpose of adjusting the size of the flame. In the body of the lamp, upon the wick, which is coiled within it, is placed a small tuft of cotton wool, moistened with petroleum, any oil not absorbed by the wool being removed. When the lamp has been lighted, the wick is adjusted by means of a pair of forceps until the flame is of the size of the bead fixed on the cover of the oil-cup; should a particular test occupy so long a time that the flame begins to get smaller through the supply of oil in the lamp becoming exhausted, three or four drops of petroleum are allowed to fall upon the tuft of wool in the lamp from the dropping bottle or *pipette* provided for that purpose. This can be safely done without interrupting the test.

3. *Filling the oil-cup.*—The oil-cup having been previously cooled by placing it bottom downwards in water at a temperature not exceeding 50° Fahrenheit is to be rapidly wiped dry, placed on a level surface in a good light, and the oil to be tested is poured in very slowly, without splashing, until its surface is level with the point of the gauge which is fixed in the cup. The round bulb thermometer is inserted into the lid of the cup, care being taken that the projecting rim of the collar touches the edge of the socket; the test lamp, prepared as already described, is placed in position, and the cover is then put on to the cup and pressed down so that its edge rests on the rim of the cup.

4. *Application of the test.*—The water-bath with its thermometer in position is placed in some locality where it is not exposed to currents of air, and where the light is sufficiently subdued to admit of the size of the entire test-flame being compared with that of the bead on the cover. The cup is carefully lifted without shaking it, and placed in the bath, the test-lamp is lighted, and the clock-work wound up by turning the key. The thermometer in the oil-cup is now watched, and when the temperature has reached 56° Fahrenheit, the clock-work is set in motion by pressing the trigger.

If no flash takes place, the clock-work is at once re-wound, and the trigger pressed at 57° Fahrenheit, and so on, at every degree rise of temperature, until the flash occurs, or until a temperature of 95° Fahrenheit has been reached.

If the flash takes place at any temperature below 77° Fahrenheit, the temperature at which it occurs is to be recorded. Two fresh portions of the sample are then to be successively tested in a similar manner and the results recorded. If no greater difference than 2° Fahrenheit exists between any two of the three recorded results, and if in no instance the flash has taken place within 8° of the temperature at which the testing is commenced, each result is to be corrected for atmospheric pressure as hereafter described, and the average of the three corrected results is the flashing point of the sample. In the event of there being a greater difference than 2° Fahrenheit between any two of the results, while in no instance has the flash taken place within 8° of the temperature at which the testing was commenced, the series of tests is to be rejected, and a fresh series of three similarly obtained, and so on, until a sufficiently concordant series is furnished, when the results are to be corrected and the average taken in the manner already described.

If, however, a flash has occurred at or below 64° when the test is applied in the manner above described, the next testing shall be commenced 10° lower than the temperature at which the flash had been previously obtained (that is to say, at 54° or thereunder), and this procedure shall be continued until the results of three consecutive tests do not show a greater difference than 2°, and until a flash has not occurred in any of the three tests within 8° of the temperature at which the testing is commenced: Provided always that if at the commencement of the series of tests a flash has occurred on the first application of the test-flame at 56°, and if a flash has also occurred on the first application of the flame in each of three successive tests in which thereupon the test-flame is first applied at 46° as above directed, the testing officer shall certify that the petroleum has a flashing point below 47°, and the sample shall be reported dangerous.

If a temperature of 76° Fahrenheit has been reached without a flash occurring, the application of the test-flame is to be continued at every degree rise of temperature until a temperature of 95° Fahrenheit has been reached. If no flash has occurred up to this point, and if the petroleum is declared to be imported subject to the provisions of the Act, the tests shall not be continued, and the testing officer shall certify that the petroleum has a flashing point over 95° and is not dangerous. But if the petroleum is oil ordinarily used for lubricating purposes, and is declared to have its flashing point at or above 200°, or oil to which a notification of the Local Government exempting it from the operation of the Act will be applicable in the event of the flashing point being found to be at or above 120°, the test shall be continued as follows:—The oil-cup is to be removed from the water-bath, and the temperature of the water in the water-bath is to be reduced to 95° Fahrenheit by pouring cold water into the funnel (the hot water escaping by the overflow pipe). The air chamber is then to be filled to a depth of 1½ inches with water at a temperature of about 95° Fahrenheit, the oil-cup is to be replaced in the water-bath, and the spirit-lamp attached to the water-bath is to be lighted and placed underneath. The test-flame is then to be again applied from 96° Fahrenheit at every degree rise of temperature as indicated by the thermometer in the oil-cup until a flash takes place or until a temperature of 200° Fahrenheit or 120° Fahrenheit, as the case may be, has been reached. If during this operation the test-flame appears to diminish in size, the lamp is to be replenished in the manner prescribed at (2) without interrupting the test.

If a flash occurs at any temperature between 76° and 200° Fahrenheit, the temperature at which it occurs, subject to correction for atmospheric pressure, is the flashing point of the sample.

In repeating a test a fresh sample of oil must always be used, the tested sample being thrown away, and the cup must be wiped dry from any adhering oil and cooled, as already described, before receiving the fresh sample.

5. *Correction for atmospheric pressure.*—As the flashing point of an oil is influenced by changes in atmospheric pressure to an average extent of 1·6° Fahrenheit for every inch of the barometer, a correction of the observed flashing point may become necessary. The height of the barometer must therefore be determined at the time of making the test for the flashing point. The true height of the barometer for the purpose of the test shall be considered to be the height of the column of mercury measured at 32° Fahrenheit, which is supported by the air-pressure at the time of the experiment,—that is, the actual height of the barometer at the time of observation duly corrected for any error of the instrument and for its temperature if necessary. For the purpose of applying the correction to the flashing point of the oil obtained by the test, a table is appended to this schedule giving the flashing points of oils ranging from 65° to 80° Fahrenheit under pressure ranging from 27 to 31 inches of mercury.

The table is used in the following manner:

Example.—An oil has given a flashing point of 71°, the barometer being at 28·6 inches; take the nearest number to 71° in the vertical column headed 28·6. This number is 70·8. Substitute for this the number in the same horizontal line in the column headed 30 (the normal height of the barometer). The substituted number, that is, the true flashing point of the oil, is 73°.

2. The accounts of 1892-93 showed a deficit of Rx. 833,412 against a surplus of Rx. 467,535 realised in 1891-92. This deterioration of Rx. 1,300,947 is due not to any falling off of revenue, but to an increase of expenditure caused by a heavy fall in Exchange and to some additional charges in England peculiar to the year 1892-93. In fact, the deficit shown in the accounts would have been considerably larger but for a satisfactory increase in the revenues in India, which counterbalanced to some extent the increased charges for Exchange and sterling expenditure. The increase in the net charge for exchange was no less than Rx. 2,869,567, of which Rx. 2,696,469 was due to the fall in the average rate of Exchange from 1*s.* 4·733*d.* in 1891-92 to 1*s.* 2·985*d.* in 1892-93. The net sterling expenditure in 1892-93 exceeded that of the preceding year by £397,518. On the other hand, the increase in the net revenues in India in 1892-93 amounted to Rx. 1,966,148 as compared with the previous year.

3. The Budget Estimate of 1892-93 anticipated a small surplus of Rx. 146,600; but the large deficit in the Accounts is the net result of a fall in Exchange and an increase in sterling expenditure counterbalanced by an improvement in the revenue and expenditure in India. The increase of revenue and reduction of expenditure in India as compared with the Budget Estimate amounted to Rx. 1,753,007 and Rx. 436,006 respectively, resulting in a net improvement of Rx. 2,189,013, of which Rx. 1,204,672 occurred in the Imperial section and Rx. 984,341 in the Provincial and Local section of the Accounts. The sterling receipts and expenditure were higher than the estimates by £19,433 and £384,141 respectively, while the increase in the net charge under Exchange amounted to Rx. 1,819,976.

4. The total increase of Rx. 1,753,007 in the revenues in India is distributed as follows:

	Increase+ Decrease—	Rx.
Principal Heads of Revenue	+	1,198,975
Interest	—	43,082
Post Office, Telegraph, and Mint	+	111,918
Civil Department	—	10,104
Miscellaneous	—	104,897
Railways	+	245,635
Irrigation	+	202,202
Buildings and Roads	+	44,017
Army	+	108,343
TOTAL	+	1,753,007

All the heads comprised in the Principal Heads of Revenue contribute to the increase under the group except Customs.

The Customs Revenue fell short of the estimates by Rx. 74,167 owing mainly to smaller exports of rice from Burma and Bengal.

The increase under the other heads of the group amounted to Rx. 1,273,142, and occurred principally under Land Revenue (Rx. 229,828), Opium (Rx. 358,580), Salt (Rx. 111,404), Stamps (Rx. 218,940), Excise (Rx. 140,043), and Provincial Rates (Rx. 83,398).

The decrease in the Interest receipts is connected mainly with the capital transactions of Guaranteed Railway Companies.

The greater part of the increase under the group "Post Office, Telegraph, and Mint" occurred under the head Mint, and was obtained from the unexpected heavy silver coinage of the year.

The main feature about the falling off under the group Miscellaneous is a decrease of Rx. 158,814 under "Exchange," which is a very uncertain head of Revenue.

As regards the group "Irrigation," the increase occurred chiefly under "Major Works—Direct Receipts," the larger revenue from extended irrigation not having been fully anticipated.

The major portion of the enhanced receipts under Army was on account of effective services.

5. The most important saving in the expenditure in India occurred under the group Direct Demands on the Revenues, under which the decrease was Rx. 822,170, due mainly to a falling off under Opium (Rx. 632,304) owing to the partial failure of the opium crop. The other important decreases were: Salaries and Expenses of Civil Departments, Rx. 120,680; Famine Relief and Insurance, Rx. 96,336; and Buildings and Roads, Rx. 88,735. On the other hand, there was an increase of Rx. 582,391 under Army and of Rx. 93,260 under Interest. The variations in the other groups are unimportant.

6. The improvement of Rx. 984,341 in the Provincial and Local section of the accounts was the result of an increase in revenue of Rx. 748,885 and a saving in expenditure of Rx. 235,456. The improvements were largest in Madras, Burma, and Bombay.

7. The increase of £19,433 in the revenue in England is distributed under several heads, the major part occurring under the heads Telegraph, Miscellaneous, and Army.

8. As regards the expenditure in England, there was a total excess over the Budget of £384,141, which appeared mainly under the heads Marine (£112,776) and Army (£294,296). There were also some increases under Interest (£37,717) and Superannuation Allowances and Pensions (£62,346); but these and other small excesses were counterbalanced by savings under other heads, the most important being the head "Special Defence Works," under which a reduction of £102,768 occurred owing to smaller payments for stores and armaments.

9. Of the increase of Rx. 1,819,976 in the net charge for exchange, Rx. 1,637,622 was due to the fall in Exchange from the Budget rate of 1*s.* 4*d.* to 1*s.* 2·985*d.* actually realised on the drawings of the year. The remainder, Rx. 182,354, represents the Exchange on the increased sterling expenditure at the Budget rate.

10. The several heads of Revenue and Expenditure are noticed in detail in the following paragraphs:

PRINCIPAL HEADS OF REVENUE.

11. *Land Revenue.*—The collections of the year exceeded those of the preceding year and the Budget Estimate by Rx. 988,671 and Rx. 247,734 respectively. Of the increase of Rx. 988,671 over 1891-92, Rx. 735,214 were realised in Madras, and the remainder chiefly in Bombay and Burma. The increase in Madras was due to the recovery of arrears from the previous year, the collections having been postponed on account of scarcity. In Burma the increase was due to the progress of settlement operations and to a favourable season, and in Bombay part of the increase was nominal as representing the adjustment of alienated Land Revenue by a corresponding increase under Expenditure, and part represented normal growth of the Revenue and recovery of arrears. The improvement as compared with the Budget Estimate occurred chiefly in Burma and Bombay, and was due to the same causes that account for the increases over 1891-92. There was also a moderate improvement in Madras. In no Province were the collections below the Budget Estimate, except in the North-Western Provinces and Oudh, where floods and unfavourable weather in certain districts and the non-recovery of arrears to the extent anticipated caused a reduction of Rx. 82,988 below the estimate.

		I.—Land Revenue. Rx.	Portion due to Irrigation. Rx.	Total. Rx.
1891-92	Accounts	23,965,774	673,189	24,638,963
1892-93	Budget	24,675,500	704,400	25,379,900

The collections of the past five official years (including Land Revenue due to Irrigation) and those of the last five revenue years ending with 30th September were as follow:

	Year ending 31st March	Year ending 30th September.
	Rx.	Rx.
1888-89	23,687,400	23,961,700
1889-90	24,671,200	24,782,300
1890-91	24,754,200	24,890,900
1891-92	24,639,000	24,700,400
1892-93	25,627,600	25,845,800

12. *Opium.*—The sale proceeds of Bengal provision opium exceeded those of the previous year by Rx. 143,605 and the Budget Estimate of the year by Rx. 423,265. The number of chests sold in 1892-93 was 48,852 against 56,250 chests sold in the preceding year and 54,000 chests taken in the Budget Estimate. This reduction in the quantity was necessitated by a very poor crop of opium, in consequence of which the quantity of the drug offered for sale from October 1892 was reduced to 3,642 chests a month against 4,500 chests sold in each of the preceding six months. The average price realised was, however, Rs. 1,247 per chest against Rs. 1,058 obtained in 1891-92 and Rs. 1,050 assumed in the Budget, and this large improvement in the price over the Budget Estimate more than counterbalanced the effect of the reduction in the quantity sold. The receipts from the Bombay Pass-fees were less than those of 1891-92 by Rx. 168,540, and less than the Budget Estimate by Rx. 75,270. The number of chests of Malwa opium weighed for export in 1892-93 was 27,313 chests against 31,236 chests weighed in 1891-92. The falling off in the revenue is less than the difference in the weighments would indicate owing to the realisation in 1892-93 of certain hundies issued in payment of opium weighed in 1891-92.

1890-91	44,760
1891-92	44,522
1892-93	33,679

As already stated, the Bengal opium crop was again a very poor one. The figures in the margin show the outturn of provision opium for the last eight years. The outturn in 1892-93 was the lowest on record since 1861-62.

13. *Salt.*—The Salt revenue in 1892-93 for all India shows a slight improvement over 1891-92, mainly the result of a large increase of Rx. 146,955 under Northern India, counterbalanced by a falling off in Madras and Bombay of Rx. 51,713 and Rx. 82,150 respectively. The important variations from the Budget Estimate were an increase of Rx. 138,090 in Northern India and a reduction of Rx. 35,542 in Bombay.

14. *Stamps and Excise.*—The Stamp revenue shows a satisfactory increase in nearly all the provinces, the largest increase in 1892-93 having been realised in Madras. Next in order come Bengal and Bombay. The Excise revenue also shows the usual tendency to rise. The improvement in 1892-93 is shared by all the provinces, except Assam, Madras, and the Punjab, where there have been only small decreases due to

temporary causes. The growth in the Stamp and Excise revenue in the last five years is indicated by the following figures:

1891-92	4,262,156	5,117,264
1892-93	4,448,540	5,242,443

The Stamp revenue received a check in 1890-91; but a renewed improvement began in 1891-92, which has continued during the following year.

15. *Provincial Rates.*—As usual, the variations in the receipts under this head follow those under Land Revenue, and the largest increase over 1891-92 appears in Madras, where the collections in that year were abnormally low in consequence of the scarcity in the Presidency. In Bengal there was an increase of Rx. 48,766 over the Budget Estimate owing to the revaluations going on in that Province.

16. *Customs: Import duties.*—The receipts of 1892-93 exceeded those of the preceding year and the Budget by Rx. 47,693 and Rx. 32,374 respectively. The improvement occurred chiefly in Burma and Bengal owing to increased imports of kerosine oil, liquor, and wines.

Export duties.—The receipts from export duties were lower than those of 1891-92, and the Budget Estimate by Rx. 138,601 and Rx. 111,644 respectively. The falling off was mainly in the export of rice from Burma and Bengal, and was due to the depression of trade in Europe and to high prices in this country.

17. *Assessed Taxes.*—The improvement under this head was general, being the necessary accompaniment of the increase in wealth and population and the more effective administration of the tax. In Bombay there was a special increase over 1891-92 of Rx. 5,199 in the tax on the surplus profits of Railway Companies.

18. *Forest Revenue.*—The improvement in the revenue over that of 1891-92 and the Budget Estimate occurred almost entirely in Burma, and was due generally to a rise of prices and to an exceptionally favourable season for floating down timber. The increase in that Province over 1891-92 and the Budget Estimate of 1892-93 amounted to Rx. 147,458 and Rx. 99,000 respectively; but these excesses were counterbalanced to some extent by a decline in the larger provinces due generally to a slackness in the demand for timber and fuel.

20. *Tributes.*—The increases were chiefly under the Baroda Tribute and in the recoveries from the Shan States and Manipur. A special claim for refund out of the Baroda Tribute was not settled in the year as expected, and the recoveries from the Shan States were not fully anticipated.

excess over the Budget Estimate of 1892-93 was the result of a number of variations, of which the more important were a refund to the Bombay Port Trust in connection with the composition of stamp duty chargeable on their debentures and increased payments to the Portuguese Indian Government on account of its share of the common customs receipts.

22. *Assignments and Compensation.*—The increased payments in 1892-93

are more than accounted for by the special adjustments of alienated Land Revenue in Bombay mentioned in paragraph 11.

23. *Land Revenue.*—The expenditure in 1892-93 exceeded that of the previous year by Rx. 101,219. Of the

excess, Rx. 35,760 occurred in the charges for District Administration, and Rx. 56,449 under Survey and Settlement. The increase under the first head is distributed over nearly all the provinces, and follows the general growth of revenue and improvement of administration. The Survey and Settlement charges were higher chiefly in Burma and Bengal. The Budget Estimate proved too high for all the provinces except Bengal, where the charges for District Administration and Survey and Settlement were not sufficiently provided for.

24. *Opium.*—The expenditure consists almost entirely of the payments for

Bengal opium. As already mentioned, there was a very poor crop in 1892-93; and though the expenditure has been reduced by successive failures of the crop for several years, the prospects of the Opium revenue have been rendered uncertain by the almost complete depletion of the reserve in stock.

25. *Salt.*—The charges in 1892-93 were about the same as in 1891-92,

but the saving on the Budget Estimate was Rx. 38,793. About half of this saving occurred in the charges for manufacture and excavation at Sambhar, and the other half in the payments for salt purchase and freight in Madras. The short expenditure at the Sambhar lake was due to a bad season for manufacture; and the failure to manufacture and the consequent depletion of stock have prejudicially affected the revenue of the following year. In Madras the outturn in some of the Government factories was smaller, and some new factories and extensions provided for in the Budget Estimate could not be opened.

26. *Stamps.*—The excess in the charges as compared with the actuals of

1891-92 and the Budget was only slightly less than that appearing under the head of Exchange, an increase in the Indian expenditure being more than counterbalanced by diminished sterling payments.

almost three-fourths occurred in Madras and the remainder chiefly in Bombay.

noticeable points in connection with these figures are (1) the construction of a steam launch for the Calcutta Customs House, and larger payments of commission to Registrars and Sub-Registrars caused an increase in

the charges for 1892-93 over the previous year; and (2) the termination of the revaluation work for the purpose of assessing the Provincial rates in Bengal and vacancies in certain establishments produced a saving on the estimates.

The excess in 1892-93 over the previous year would have been larger but for a change of classification by which the cost of certain combined appointments hitherto shown as Registration charges was transferred to a different head.

29. *Forests.*—The Estimates under this head generally prove too high.

The large saving in 1892-93 of Rx. 105,275 is distributed among all the provinces except India, the larger part having occurred in Madras and Bombay. The saving is attributed to a general contraction of departmental operations. The following figures compare the Forest Revenue and Expenditure of the last five years:

	Revenue.	Expenditure.	Net revenue.
1888-89	1,349,047	792,000	557,047

a decrease in England of £33,923, equivalent with Exchange to Rx. 44,546, and an increase in India of Rx. 34,830. The receipts were also below the Budget Estimate by Rx. 41,273, the falling off occurring entirely in India. In England the amounts obtained by the investment of surplus cash balances were not so large as in the previous year. In India the receipts are increasing with the yearly additions to the advances to Municipalities and others; but in 1892-93 the Budget Estimate was not reached chiefly because the Guaranteed Railways did not find it necessary to overdraw their capital account to the extent anticipated, and the receipts from Interest on Overdrawn Capital were less than the Estimate by Rx. 36,632.

31. *Expenditure: Interest on Debt.*—No new debt was incurred in India during 1892-93 except a Railway loan of Rx. 250,000 from the Rampur State, on which, however, no interest was paid during the year. The excess over the Budget was due chiefly to the conversion during the year of the greater portion of the outstanding balance of the 4½ per cent. Rupee loans into 4 per cents.

These conversion operations necessitated the payment of a portion of one-half year's interest in the latter months of 1892-93 instead of in the earlier months of 1893-94, and also involved the payment of Rx. 10,786 as brokerage. There were also some unexpected payments of arrears from previous years. In England the expenditure charged to Ordinary Debt included in 1891-92 £254,353 on account of discount on the sterling loans of the year; but the similar charge in 1892-93 amounted to £43,940 only. As usual, no provision for the latter amount was made in the Budget. The increase in the interest charged to Railway Debt is due to fresh advances made to the Railway Companies. The funds for these advances are obtained by

sterling loans, and a corresponding increase in the total interest charge in England is the result.

32. *Interest on other Obligations.*—The main factor producing the increase under this head from year to year is the increase in the Savings Bank Deposits. Excluding the adjustment of interest, the net addition to these deposits in the year amounted to Rx. 548,922 against Rx. 517,904 in 1891-92, and the interest charges were Rx. 306,227 in 1891-92 and Rx. 339,362 in 1892-93. Sufficient provision for these increases was not made in the estimate. The interest on the deposits of Service Funds was also higher than in the previous year and the Budget.

REVENUE.

33. *Post Office.*—The revenue continues to expand; the falling off below the Budget Estimate was due chiefly to a larger deduction from the receipts of the year on account of payments to English, Colonial, and other Foreign Post Offices.

34. *Telegraph.*—These receipts for 1891-92 were considered abnormally high, and the Budget Estimate for 1892-93 was therefore placed at a lower figure as compared with them; but an increase of Rx. 18,408 over the high figure of the previous year was realised in the actual result. This was due to the general expansion of the department.

1892-93	937,743	875,073	62,670

35. *Mint.*—The silver coinage in 1892-93 was very high, the importation of silver having been enhanced by speculations about the closure of the Indian Mints. The increase due to the larger coinage was counterbalanced to some extent by a smaller gain on copper coinage, the issues of copper having been somewhat less than usual. The gain amounted to Rx. 37,893 in 1892-93 against Rx. 83,831 realised in 1891-92 and Rx. 65,000 taken in the Budget.

EXPENDITURE.

36. *Post Office.*—The expenditure in India, like the revenue, increases from year to year with the growth of the department. The saving on the Budget Estimate of Rx. 36,855 was due chiefly to smaller expenditure than was anticipated for stationery and printing in India. There were other small savings in India, but these were counterbalanced by an increase in the charge for exchange on sterling expenditure.

37. *Telegraph.*—As in the case of the Postal Department, the increase in the expenditure follows the expansion of the operations of the department. Though the Telegraph revenue in 1892-93 was far in excess of the Budget Estimate, the provision for expenditure proved sufficient, and was closely followed by the actuals.

38. *Mint.*—Under this head also the expenditure was within the Budget Estimate, for though the large increase in the coinage necessitated charges for extra hours not contemplated in the estimates, the savings under other items fully covered these extra charges. The variation from the accounts of the preceding year is accounted for by the larger coinage in 1892-93.

CIVIL DEPARTMENT.

REVENUE.

39. *Civil Department.*—Under the heads comprised in this group there were no important variations in the receipts of 1892-93 as compared either with the corresponding receipts of 1891-92 or with the Budget Estimate. The apparent decrease in the total receipts of the year is due mainly to a change of classification introduced in the accounts of 1892-93 by which recoveries by the Marine Department for work done by it for other departments and Local Governments were deducted from expenditure instead of being credited as receipts. The only other point requiring notice in connection with this group was a general increase in the Police receipts in 1892-93 as compared with the estimates.

EXPENDITURE.

40. *General Administration.*—The expenditure on General Administration necessarily increases with the increasing efficiency and complexity of the administration. The Indian Expenditure closely followed the estimates, but in England there was some additional charge connected with the management of the conversion of the 4½ per cent. Rupee loans. Nearly three-fourths of the total excess over the Budget is, however, accounted for by the heavy fall in exchange during the year.

41. *Law and Justice: Courts of Law.*—The charges are increasing yearly. The excess over the Budget Estimate in 1892-93 occurred in the expenditure of Civil and Sessions Courts in Bengal, the North-Western Provinces and Oudh, and Madras either on account of new courts opened or new judicial establishments entertained during the year.

42. *Law and Justice: Jails.*—The expenditure in 1892-93 exceeded that of 1891-92 chiefly in Port Blair and Bengal. The excess over the Budget was largest in Madras, and was due to an increase in the jail population and an advance in the manufacturing industry.

43. *Police.*—Certain schemes for Police reorganisation were contemplated in framing the Estimates of 1892-93 for Madras and Bombay; but they were not carried out during the year. This fact, combined with the short strength of the District Executive Force in Burma, produced a large saving on the Estimates. On the other hand, the expenditure in Bengal exceeded the

estimate owing to the measures taken in connection with the administration of the Lushai country, and that in the North-Western Provinces and Oudh was higher than expected owing to a reorganisation scheme sanctioned by the Secretary of State. On the whole, a larger saving was anticipated in the Revised Estimate than was actually realised.

44. *Marine.*—The reduction in the Indian expenditure is more apparent than real owing to the change in the method of accounting for recoveries for work done by the Marine Department mentioned in paragraph 39.

The increase in the expenditure in England was special, and was due to payments made for the construction of two troopships and a dredger.

45. *Education, Ecclesiastical, and Medical.*—The provision made in the estimates on account of Education charges was not fully spent in the Central Provinces, Madras, and Bombay. The large increase in the Medical charges of Rx. 56,958 over the previous year was distributed over all the provinces.

46. *Political.*—The expenditure in 1892-93 exceeded that of the preceding year by Rx. 74,406. The more important of the excesses were: (1) an increase of Rx. 30,180 under Political Agents chiefly on account of the North Lushai and the Gilgit Agencies; (2) increased payment of Political Subsidies to the extent of Rx. 25,349 on account of arrears due to the Amir of Afghanistan from previous years; and (3) higher expenditure for entertainment of Envoys and Chiefs (Rx. 7,383) owing to the visit of the Prime Minister of Nepal. The Special Political expenditure in 1892-93 connected with missions and expeditions on the frontiers, amounting to Rx. 23,747, was also higher than in the previous year. The greater part of this as well as the other excesses mentioned could not be anticipated in the estimates.

The Budget Estimate was closely followed as regards the total expenditure, certain savings in India having been counterbalanced by an increase in the sterling expenditure and in the charge for exchange.

MISCELLANEOUS.

RECEIPTS.

48. *Superannuation.*—The receipts on account of contributions for pensions and gratuities were specially high in 1891-92 owing to the recovery of the arrears of previous years in Bengal and Madras. The subscriptions to the Military, Military Orphan, and Medical Retiring Funds are declining yearly; but sufficient allowance was not made for the decline in the Budget Estimate.

49. *Stationery and Printing.*—The receipts in 1891-92 included large recoveries on account of printing work done for the Census Department. There were no corresponding receipts in 1892-93; but, on the other hand, the recoveries on account of stationery supplied to State Railways and to the Berar Administration were larger than in the previous year, and were not fully anticipated in the Budget.

50. *Exchange.*—This is a very uncertain head of revenue depending on a number of factors, and the receipts are not susceptible of reliable forecast. The large divergence of the actuals from the Budget was due to the loss on miscellaneous remittances owing to the difference between the official rate and the average rate obtained by the Secretary of State for his bills having been as much as $1\frac{3}{4}d.$

The amounts of such unforeseen receipts were Rx. 13,625 only in 1892-93 against Rx. 30,890 in 1891-92; but the receipts from unclaimed deposits, from miscellaneous fees, fines, and forfeitures, and from rents and the recoveries of insurance and other departmental charges on English stores supplied to Provincial Governments exceeded the actuals of 1891-92 and the Budget Estimate.

EXPENDITURE.

52. *Territorial and Political Pensions.*—The payments in India in 1892-93 exceeded those of the preceding year by Rx. 14,607, while there was a decrease under England and Exchange of Rx. 30,974. The payments in England in 1891-92 included large arrears of pension drawn by the late Maharaja Duleep Singh. In India the excess over 1891-92 was caused chiefly by the grant of certain commutations of pensions and by payments of arrears. In England certain special payments on account of the Maharaja Duleep Singh were also made in 1892-93, which caused an excess over the Budget.

54. *Superannuation Allowances and Pensions.*—These charges continue to grow both in India and in England; but, apart from the addition to the pension list, the payments in England in 1892-93 were specially high owing to the adoption in that year of a rule for the payment of pensions monthly instead of quarterly.

55. *Stationery and Printing.*—The expenditure under this head increases with the growth of public business. In 1892-93 the excess over the Budget occurred in nearly all the provinces, notably in Bengal, where large supplies were made to the Survey and Settlement Department. Larger demands of stores from England and the fall in Exchange also contributed to the increase to some extent.

56. *Miscellaneous.*—The savings on the Budget Estimate occur chiefly in the Remittance charges and in the cost of petty Provincial and Local establishments. In 1891-92 the charges for Municipal taxes on Government buildings in Bombay were high, and certain special Commissions of Enquiry necessitated considerable expenditure. There was also a special adjustment in 1891-92 on account of the loss at Manipur. The payments in England on account of stores lost in transit to India were also much less than in 1891-92.

Total	1,500,000	1,500,000	1,500,000	1,500,000

The expenditure for the relief of distress chargeable to the grant was much less than was anticipated in Madras and Bombay; but, on the other hand, some expense was incurred on account of the distress in Ajmere-Merwara, which was not foreseen when the Budget was framed. The capital expenditure on Protective Railways shown above represented only such a portion of the total expenditure on those Railways as would, with the other authorised charges against the grant, raise the total to the fixed limit of Rx. 1,500,000.

CONSTRUCTION OF RAILWAYS CHARGED AGAINST REVENUE IN ADDITION TO THAT UNDER FAMINE INSURANCE.

58. The expenditure under this head in 1891-92 was wholly on account of lines constructed from the balances of Provincial Governments. The similar expenditure in 1892-93 amounted to Rx. 138,262 against a Budget provision of Rx. 183,200, the outlay on the Mayavaram-Mutupet Railway having been smaller than expected. But, in addition to the expenditure charged to Provincial Revenues, Rx. 201,225 out of the total Imperial expenditure on the construction of railways was shown under this head in 1892-93. This was necessary, as the capital expenditure chargeable to the Famine grant and to loans and balances could not exceed a fixed limit, and the amount above mentioned represented the excess of the total expenditure of the year above these limits taken together.

RAILWAYS.

59. *Earnings.*—The figures in the margin show the net earnings of railways, both State and Guaranteed, since 1888-89. The earnings of 1891-92 were exceptionally heavy owing to a combination of favourable circumstances, such as an exceptionally heavy export traffic of wheat and seeds, and a large pilgrim traffic connected with certain Hindu religious festivals. The Budget Estimates of 1892-93 therefore anticipated the normal receipts according to previous experience. The result shows that there was a moderate improvement of Rx. 178,335 over the Budget Estimate. This improvement was made up of a number of differences, of which the more important are the following:

	Rx.
1888-89	9,461,440

Bengal-Nagpur Railway	31,422
Other Railways (net)	29,801

Net	178,335

The traffic on the Rajputana-Malwa Railway proved to be exceptionally heavy in 1892-93, and a long pending claim against the Indian Midland Railway for certain interest charges was settled in that year, though no credit for such settlement was taken in the estimate. The estimates for the East Indian Railway were too low. There was a general development of traffic and an exceptionally good passenger traffic on the Burma Railway. The improvement on the Bombay, Baroda and Central India Railway was in the traffic in cotton, oil seeds, coal, and railway materials.

The falling off on the North-Western Railway was the result partly of reduced grain exports following an unfavourable crop, and partly of breaches on the line during the monsoon of 1892-93. There were also large outstandings at the end of the year which have been realised in 1893-94. The failure of the linseed crops in the Central Provinces and the small movement of food grains to Southern India account for a part of the falling off on the Great Indian Peninsula Railway. The decrease on the Bengal-Nagpur Railway occurred in the goods traffic.

60. *Interest and Annuities.*—These charges continue to grow with the extension of railways in the country. Apart from the charge for Exchange, the expenditure shows a saving on the Budget Estimate owing mainly to some of the Guaranteed Railway Companies not having overdrawn their accounts as anticipated. The Assam-Bengal Railway Company could not also pay up their subscribed capital to the extent anticipated.

61. *Other Expenditure.*—This expenditure in 1892-93 was less than in the preceding year by Rx. 252,593. The differences were mainly in the charges for surplus profits paid to Guaranteed Railways and the expenditure on Railway Surveys. The payments for surplus profits were Rx. 155,735 less as a result of the smaller traffic earned in 1892-93; and a sum of Rx. 81,572 on account of past expenditure on the Bengal-Assam Railway Survey was recovered from the Company in 1892-93 and deducted from expenditure. No provision was made for this deduction in the Budget Estimate.

62. *Loss on Railway Revenue Account.*—The following figures show the net loss to Government on the Railway Revenue Account from its connection with railways since 1888-89:

	Net receipts, excluding charge for Exchange. Rx.	Charge for Exchange. Rx.	Net loss. Rx.
1888-89	396,498	2,629,890	2,233,392
1889-90	664,620	2,517,221	1,852,601

1892-93	1,596,344	3,443,396	1,847,052

The year 1891-92 was exceptional, and, allowing for the specially heavy railway traffic of that year, the net receipts, excluding the charge for Exchange, show a steady improvement; but, though this improvement amounted in 1892-93 to

Rx. 931,724 as compared with 1889-90, the charge for Exchange has been so great as to counterbalance the whole of this improvement, and to leave the net loss at about the same figure as in 1889-90.

IRRIGATION.

MAJOR WORKS.

63. *Net earnings, excluding Land Revenue.*—These earnings showed in 1892-93 an advance of Rx. 73,487 over the previous year owing chiefly to an extension of irrigation from canals in the Punjab, to the recovery of arrears of water rates in Bengal, and to the seasons having been more favourable for canal irrigation in Madras and Bombay. The estimates were too low.

66. *Expenditure.*—The decrease in the expenditure in 1892-93 as compared with the previous year occurred almost entirely in Lower Burma and Madras. The Budget Estimate was closely followed as a whole. There was, however, a considerable excess in the Imperial expenditure on account of Famine Relief works in Upper Burma which was counterbalanced by savings chiefly in Bombay and Lower Burma.

BUILDINGS AND ROADS.

67. *Receipts.*—The increase in the receipts as compared with 1891-92 and with the Budget was the largest in the North-Western Provinces and Oudh owing to the sale of the bridge-of-boats over the rivers Gogra and Chowka at Byramghat. The receipts on account of contributions from Municipalities in Bombay were also higher than expected.

68. *Expenditure.*—The Imperial expenditure in 1891-92 was unusually high owing to special grants for the restoration of buildings at Quetta damaged by rain and for expenditure on famine relief works. The lapse on the Budget Estimate of 1892-93 was partly nominal, as a portion of the grant under India was transferred to Upper Burma for expenditure on minor irrigation works required for famine relief.

	Revised	1,904,800	3,932,600
	Accounts	1,969,530	3,876,950

As regards Provincial and Local charges, the expenditure in 1892-93 was lower than in the previous year in all the larger provinces. One cause of this general reduction was the fact that the year 1892-93 was the first year of the new Provincial Contracts; and, though the contracts did not entail a material reduction in the rate of expenditure of the Provincial Governments, the usual tendency appears to be to increase the Public Works expenditure towards the end of the term for which the contracts are framed.

ARMY.

69. *Receipts.*—The increase over the receipts of 1891-92 and the Budget Estimate occurred mainly under Commissariat, Remount, and Veterinary Establishments, and was due (1) to larger sales of Commissariat provisions, stores, and malt liquor; (2) to the transfer of certain cast remounts to the Bengal Cavalry regiments on payment; and (3) to the credit of the value of 260 horses taken by the 7th Dragoon Guards on their transfer to Egypt. There were also larger sales of regimental necessaries and unserviceable ordnance stores. In England a special credit was received in 1892-93 on account of the sale of the troopship *Jumna*.

70. *Expenditure: India.*—The expenditure in 1892-93 was less than that of the preceding year by Rx. 151,971. The charges for Special Military expeditions were considerably less in the year than in 1891-92; but, on the other hand, there was a large increase in Commissariat charges owing to a rise in the price of food for men and animals and an increase in the pay of British troops due to the fall in the rate of Exchange for converting their sterling pay into rupees. The Budget Estimate was exceeded to the extent of Rx. 582,391. The excess was due chiefly to the following items of additional expenditure:

		Rx.

The Revised Estimate did not provide sufficiently for the increase in the cost of food for men and animals.

71. *Expenditure: England and Exchange.*—The sterling expenditure in 1892-93 exceeded that of the previous year and the Budget Estimate by £329,283 and £294,296 respectively. The important variations comprised in these excesses were the following:

		Sterling. £	Exchange. Rx.
1891-92	Accounts	4,559,513	1,980,026
1892-93	Budget	4,594,500	2,297,300
	Revised	5,022,300	3,013,400
	Accounts	4,888,796	2,941,224

	Increase+ Decrease— Compared with actuals, 1891-92.	Compared with Budget Estimate, 1892-93.
Effective Services.		
Payment to the War Office in respect of British Forces serving in India	+264,303	+206,766
Furlough allowances of officers of the Indian service	+ 35,351	+ 41,654
Stores for India	—197,793	—138,824
Non-effective Services.		
Payment to the War Office in respect of British Forces for service in India	+ 38,974	+ 11,182
Pay and pensions of non-effective and retired officers of the Indian service	+199,471	+181,360
Total	+340,306	302,138

The increase in the payments to the War Office represented chiefly amounts paid in settlement of arrear claims.

The rise in the charges for furlough allowances and pensions was connected with the payment of the allowances monthly instead of quarterly. The figures for stores were affected by a falling off in the demands for special ordnance stores.

SPECIAL DEFENCE WORKS.

72. The expenditure for these works is diminishing yearly. The decrease in 1892-93 as compared with the previous year and the Budget was largest in England. The Budget Estimate was too high.

		Rx.
1891-92	Accounts	604,848
1892-93	Budget	614,500

CAPITAL EXPENDITURE NOT CHARGED TO REVENUE.

73. In 1891-92 the total expenditure not charged to Revenue was shown as Rx. 3,500,000. This was the maximum limit of the expenditure not so charged at the time the Budget Estimate of 1892-93 was framed; but, as a special case, the Secretary of State authorised the expenditure in 1892-93 on the Jherriah Extension of the East Indian Railway and on the Rampur-Moradabad Railway, the funds for which were to be advanced by the Rampur Durbar, to be treated as outside the fixed limit. The Budget Estimates for outlay on the Jherriah Extension and the Rampur-Moradabad Railway were taken at Rx. 160,000 and Rx. 375,000 respectively; and, in accordance with the decision of the Secretary of State just alluded to, the estimate of the total capital expenditure not charged to Revenue was placed at Rx. 4,035,000,—namely, outlay on Railway construction at Rx. 3,485,000, and that on Irrigation Works at Rx. 550,000.

74. *Railways.*—The total expenditure on the construction of railways from Imperial Funds exceeded the Budget Estimate by Rx. 25,893. This excess was made up of a reduction of Rx. 48,710 in the expenditure on the Bareilly-Rampur-Moradabad Railway and the Jherriah Extension, and an increase of Rx. 74,603 under all the other Railways taken together. As there was a saving of Rx. 18,909 on the estimate of capital outlay on Irrigation Works not charged to Revenue, the total outlay on Railways not so charged was (Rx. 48,710—Rx. 18,909) Rx. 29,801 less than the estimate. The Railway Capital Expenditure that could be charged to the Famine Grant (paragraph 57) was also Rx. 27,231 less than the estimate; and the excess in the total being Rx. 25,893, the excess over the estimate that was charged in the Imperial section of the head "37—Construction of Railways" (paragraph 58) amounted to (29,801 + 27,231 + 25,893) Rx. 82,925.

1892-93	Budget	3,485,000

75. *Irrigation.*—The expenditure in 1891-92 was high owing to special grants for the more rapid completion of the Chenab Canal and the Periyar Project. The lapse on the Budget Estimate of 1892-93 occurred in Bengal and the North-Western Provinces and Oudh.

RESOLUTION—By the Government of India, Public Works Department.

Conditions of promotion of Honorary Commissioned Officers to the Provincial Engineer Service of the Public Works Department.

Read—

Government of India, Public Works Department, Resolution No. 1664-G., dated 26th June 1893.

Despatch to Her Majesty's Secretary of State for India, No. 331 Financial, dated 11th October 1893.

Despatch from Her Majesty's Secretary of State for India, No. 4 Public Works, dated 11th January 1894.

RESOLUTION.—In the orders on question VI referred to in the Resolution cited in the preamble regarding promotions to the Provincial Service of the Engineer Establishment of the Public Works Department, it was stated that orders would issue hereafter regarding the promotion of Honorary Commissioned officers to that service.

Under present rules such officers are on promotion to honorary rank in the army graded as Assistant Engineers in the Public Works Department (*vide* Public Works Code, Vol. I, Chap. II, paragraph 58), but are counted against the Upper Subordinate Scale, and their pay is regulated by the rules applicable to military men (Public Works Code, Vol. I, Chap. I, paragraph 13, note 1, and Chap. V, paragraph 41).

The Governor General in Council is hereby pleased, with the concurrence of Her Majesty's Secretary of State for India, to order that Honorary Commissioned officers holding the rank of Deputy Commissary, Assistant Commissary, and Deputy Assistant Commissary shall be eligible for promotion to the Provincial Engineer Establishment, but that on being so promoted at their option, they shall, like Warrant and Non-Commissioned officers below the rank of Deputy Assistant Commissary, be required to resign their military rank under clause (3) of Article 388 of the Civil Service Regulations, and then be permitted to count their departmental service for a civil pension.

On being so promoted, they will be subject to the rules laid down in the Resolutions quoted in the margin, so far as they are applicable, and will draw the difference between the pay of the grade to which they are promoted and the staff pay and military allowances previously drawn by them as a personal allowance.

No. 2112-G., dated the 19th July 1892.
No. 1664-G., dated the 26th June 1893.

2. It should, however, be clearly pointed out to each officer who may accept promotion on these conditions that his non-departmental army service will not count for pension, and that he forfeits his right to a sterling pension under military rules, and also to a possible pension for his widow.

ORDER.—Ordered, that this Resolution be communicated to the Local Governments, Administrations, and Officers noted on the margin for information and guidance, and that it be published in Part I of the *Gazette of India*.

In Her Britannic Majesty's dominions the fugitive criminal shall not be surrendered until the expiration of fifteen days from the date of his being committed to prison to await his surrender.

Lord President.

Lord Privy Seal.

Earl of Kimberley.

Mr. Secretary Fowler.

Mr. Lefevre.

Mr. Bryce.

Whereas by the Extradition Acts, 1870 and 1873, it was amongst other things enacted that, where an arrangement has been made with any Foreign State with respect to the surrender to such State of any fugitive criminals, Her Majesty may, by Order in Council, direct that the said Acts shall apply in the case of such Foreign State ; and that Her Majesty may, by the same or any subsequent Order, limit the operation of the Order, and restrict the same to fugitive criminals who are in or suspected of being in the part of Her Majesty's dominions specified in the Order, and render the operation thereof subject to such conditions, exceptions, and qualifications as may be deemed expedient ; and that if, by any law made after the passing of the Act of 1870 by the Legislature of any British possession, provision is made for carrying into effect within such possession the surrender of fugitive criminals who are in or suspected of being in such British possession, Her Majesty may, by the Order in Council applying the said Acts in the case of any Foreign State, or by any subsequent Order, suspend the operation within any such British possession of the said Acts, or of any part thereof, so far as it relates to such Foreign State, and so long as such law continues in force there and no longer ;

Extradition is also to be granted for participation in any of the aforesaid crimes, provided such participation be punishable by the laws of both the Contracting Parties.

ARTICLE III.

Either Government may, in its absolute discretion, refuse to deliver up its own subjects to the other Government.

ARTICLE IV.

The extradition shall not take place if the person claimed on the part of the British Government, or the person claimed on the part of the Liberian Government, has already been tried and discharged or punished, or is still under trial within the territories of the two High Contracting Parties respectively for the crime for which his extradition is demanded.

If the person claimed on the part of the British Government, or if the person claimed on the part of the Liberian Government, should be under examination, or is undergoing sentence under a conviction, for any other crime within the territories of the two High Contracting Parties respectively, his extradition shall be deferred until after he has been discharged, whether by acquittal or on expiration of his sentence, or otherwise.

ARTICLE V.

The extradition shall not take place if subsequently to the commission of the crime, or the institution of the penal prosecution, or the conviction thereon, exemption from prosecution or punishment has been acquired by lapse of time, according to the laws of the State applied to.

ARTICLE VI.

A fugitive criminal shall not be surrendered if the offence in respect of which his surrender is demanded is one of a political character, or if he prove that the requisition for his surrender has in fact been made with a view to try or punish him for an offence of a political character.

ARTICLE VII.

A person surrendered can in no case be kept in prison, or be brought to trial in the State to which the surrender has been made, for any other crime or on account of any other matters than those for which the extradition shall have taken place until he has been restored or had an opportunity of returning to the State by which he has been surrendered.

This stipulation does not apply to crimes committed after the extradition.

ARTICLE VIII.

The requisition for extradition shall be made in the following manner :

Application on behalf of Her Britannic Majesty's Government for the surrender of a fugitive criminal in Liberia shall be made by Her Majesty's Consul at Monrovia.

Application on behalf of the Liberian Government for the surrender of a fugitive criminal in the United Kingdom shall be made by the Diplomatic Representative of Liberia in London, or, in the absence of such Representative, by the Consul-General for Liberia in London.

The requisition for the extradition of the accused person must be accompanied by a warrant of arrest issued by the competent authority of the State requiring the extradition, and by such evidence as, according to the laws of the place where the accused is found, would justify his arrest if the crime had been committed there.

If the requisition relates to a person already convicted, it must be accompanied by the sentence of condemnation passed against the convicted person by the competent Court of the State that makes the requisition for extradition.

A sentence passed *in contumaciam* is not to be deemed a conviction, but a person so sentenced may be dealt with as an accused person.

ARTICLE IX.

If the requisition for extradition be in accordance with the foregoing stipulations, the competent authorities of the State applied to shall proceed to the arrest of the fugitive.

ARTICLE X.

If the fugitive has been arrested in the British dominions, he shall forthwith be brought before a competent Magistrate, who is to examine him and to conduct the preliminary investigation of the case just as if the apprehension had taken place for a crime committed in the British dominions.

In the examinations which they have to make in accordance with the foregoing stipulations, the authorities of the British dominions shall admit as valid evidence the sworn depositions or the affirmations of witnesses taken in Liberia, or copies thereof, and likewise the warrants and sentences issued therein, and certificates of, or judicial documents stating the fact of, a conviction, provided the same are authenticated as follows:

1. A warrant must purport to be signed by a Judge, Magistrate, or officer of Liberia.

2. Depositions or affirmations, or the copies thereof, must purport to be certified under the hand of a Judge, Magistrate, or officer of Liberia to be the original depositions or affirmations, or to be the true copies thereof, as the case may require.

3. A certificate of or judicial document stating the fact of a conviction must purport to be certified by a Judge, Magistrate, or officer of Liberia.

4. In every case such warrant, deposition, affirmation, copy, certificate, or judicial document must be authenticated either by the oath of some witness, or by being sealed with the official seal of the Minister of Justice, or some other Minister of Liberia; but any other mode of authentication for the time being permitted by the law in that part of the British dominions where the examination is taken may be substituted for the foregoing.

ARTICLE XI.

If the fugitive has been arrested in Liberia his surrender shall be granted if, upon examination by a competent authority, it appears that the documents furnished by the British Government contain sufficient *primâ facie* evidence to justify the extradition.

The Authorities of Liberia shall admit as valid evidence records drawn up by the British authorities of the depositions of witnesses, or copies thereof, and records of conviction or other judicial documents, or copies thereof, provided that the said documents be signed or authenticated by an authority whose competence shall be certified by the seal of a Minister of State of Her Britannic Majesty.

ARTICLE XII.

The extradition shall not take place unless the evidence be found sufficient, according to the laws of the State applied to, either to justify the committal of the prisoner for trial, in case the crime has been committed in the territory of the said State, or to prove that the prisoner is the identical person convicted by the Courts of the State which makes the requisition, and that the crime of which he has been convicted is one in respect of which extradition could, at the time of such conviction, have been granted by the State applied to. The fugitive criminal shall not be surrendered until the expiration of fifteen days from the date of his being committed to prison to await his surrender.

ARTICLE XIII.

If the individual claimed by one of the two High Contracting Parties in pursuance of the present Treaty should be also claimed by one or several other Powers on account of other crimes or offences committed upon their respective territories, his extradition shall be granted to that State whose demand is earliest in date.

ARTICLE XIV.

If sufficient evidence for the extradition be not produced within three months from the date of the apprehension of the fugitive, or within such further time as the State applied to, or the proper Tribunal thereof, shall direct, the fugitive shall be set at liberty.

ARTICLE XV.

All articles seized which were in the possession of the person to be surrendered at the time of his apprehension shall, if the competent authority of the State applied to for the extradition has ordered the delivery thereof, be given up when the extradition takes place, and the said delivery shall extend not merely to the stolen articles, but to everything that may serve as a proof of the crime.

ARTICLE XVI.

All expenses connected with extradition shall be borne by the demanding State.

ARTICLE XVII.

The stipulations of the present Treaty shall be applicable to the Colonies and foreign possessions of Her Britannic Majesty, so far as the laws for the time being in force in such Colonies and foreign possessions respectively will allow.

The requisition for the surrender of a fugitive criminal who has taken refuge in any of such Colonies or foreign possessions may be made to the Governor or chief authority of such Colony or possession by any person authorized to act in such Colony or possession as a Consular officer of Liberia, or, if there is no such Consular officer in the Colony, by the Diplomatic Representative of Liberia in London, or, in his absence, by the Liberian Consul-General.

Such requisitions may be disposed of, subject always, as nearly as may be, and so far as the law of such Colony or foreign possession will allow, to the provisions of this Treaty, by the said Governor or chief authority, who, however, shall be at liberty either to grant the surrender, or to refer the matter to his Government.

Her Britannic Majesty shall, however, be at liberty to make special arrangements in the British Colonies and foreign possessions for the surrender of criminals from Liberia, who may take refuge within such Colonies and foreign possessions, on the basis as nearly as may be, and so far as the law of such Colony or foreign possession will allow, of the provisions of the present Treaty.

Requisitions for the surrender of a fugitive criminal emanating from any Colony or foreign possession of Her Britannic Majesty shall be governed by the rules laid down in the preceding Articles of the present Treaty.

ARTICLE XVIII.

The present Treaty shall come into force ten days after its publication in conformity with the forms prescribed by the laws of the High Contracting Parties. It may be terminated by either of the High Contracting Parties at any time on giving to the other six months' notice of its intention to do so.

The Treaty shall be ratified, and the ratifications shall be exchanged at London as soon as possible.

In witness whereof the respective Plenipotentiaries have signed the same, and have affixed thereto the seal of their arms.

Done at London, the sixteenth day of December, one thousand eight hundred and ninety-two.

(L.S.) ROSEBERY.
(L.S.) H. HAYMAN.

And whereas the ratifications of the said Treaty were exchanged at London on the thirty-first day of January, one thousand eight hundred and ninety-four:

Now, therefore, Her Majesty, by and with the advice of Her Privy Council, and in virtue of the authority committed to Her by the said recited Acts, doth order, and it is hereby ordered, that from and after the twenty-third day of March, one thousand eight hundred and ninety-four, the said Acts shall apply in the case of Liberia, and of the said Treaty with the Republic of Liberia.

Provided always, and it is hereby further ordered, that the operation of the said Extradition Acts, 1870 and 1873, shall be suspended within the Dominion of Canada so far as relates to Liberia and to the said Treaty, and so long as the provisions of the Canadian Act aforesaid of 1886 continue in force, and no longer.

RULES.

Transport, Import, and Export.

1. No arms or ammunition or military stores shall be transported in any part of the Hyderabad Assigned Districts without a license in form I appended to these rules. The license will be granted by the Deputy Commissioner of the district. If the articles are to be consigned to a place beyond the jurisdiction of the officer granting the license, the consent of the Deputy Commissioner of the district to which the consignment is made must be obtained before the license is issued. Such consent may be obtained by the person applying for the license, or the Deputy Commissioner to whom application for the license is made may forward the proposed license to the officer whose consent is required; and on receiving reply may either issue the license to the applicant, or inform him that his application for a license to transport arms, etc., has been refused. The fee payable in respect of every such license shall be ten rupees.

2. Persons lawfully entitled to possess arms, or to go armed, are permitted to transport in any part of the Hyderabad Assigned Districts arms and ammunition in reasonable quantities for their own use. Any person abusing this exemption, and transporting such articles otherwise than in reasonable quantities for his own use, will be held to have contravened this rule, and will, on conviction, become liable to the penalties under sections 13 and 14.

3. A person licensed to possess arms, ammunition, or military stores, or who is exempted from the liability to take out such a license, is entitled to transport to his residence from the premises of a licensed dealer arms, ammunition, or military stores without a separate transport license so long as the articles purchased are in reasonable quantity and for his own use. A licensed dealer in arms, ammunition, and military stores may supply the order of any such person, and may, without a separate transport license, send or despatch in any way desired to the residence of the purchaser the articles ordered by any such person so long as they fulfil the requirements of rule 2, and are legibly addressed to the person for whom they are intended.

4. A license to transport arms or ammunition or military stores is void if the consignment breaks bulk at any place short of the district for which it may

be granted. A license to transport shall ordinarily not be made valid for more than twice the period actually required for the conveyance of the articles to their destination by the intended route.

5. No license shall be granted, save by the special order of the Governor-General in Council, certified under the signature of the Secretary to the Government of India in the Foreign Department, for the importation into the Hyderabad Assigned Districts of any rifles, or parts of or fittings for rifles, except rifles or parts of or fittings for rifles of such quality or in such quantity as may reasonably be held to be intended for *bonâ fide* sporting purposes.

6. Licenses to import into the Hyderabad Assigned Districts arms (other than arms for which the Governor-General in Council is to issue licenses under rule 5), ammunition, or military stores may be granted by the Deputy Commissioner of the district to which such arms, ammunition, or military stores are consigned. The fee payable in respect of each such license shall be rupees five; but officers granting such licenses are empowered to remit the fee when the arms, ammunition, or military stores are of a reasonable quantity, and such officers are satisfied that they are required *bonâ fide* for purposes of protection of person or property. In the case of arms, ammunition, or military stores imported into the Hyderabad Assigned Districts from any other part of the territories of His Highness the Nizam or from any other Native State, a copy of the license shall be sent by the officer granting it to the Secretary for Berar to the Resident at Hyderabad. If the district to which the articles to be imported are consigned is other than a frontier district, and they are to cross the frontier by road or river, a copy of the license shall also be sent to the Deputy Commissioner of the frontier district, who shall, if he thinks necessary, before permitting the arms, ammunition, or military stores to leave his district, require the holder of the license to produce them for his inspection. If the articles are to cross the frontier by rail, a copy of the license shall be sent in the case of consignments despatched from a Presidency town to the Commissioner of Police, and in other cases to the Magistrate of the district from which the articles are to be despatched. In such cases the Commissioner of Police or the Magistrate of the district, as the case may be, should at once forward a copy of the license to the railway authorities at the place of despatch. And the railway authorities shall in every such instance satisfy themselves before delivery that the arms, ammunition, or military stores claimed by any consignee correspond with the description given in the original license, which the said consignee must produce, and also that the said license is identical in substance with the copy sent to them by the Commissioner of Police or Magistrate of the district. If the license is not produced, or the arms, ammunition, or military stores claimed do not correspond with the description in the license, the railway authorities will give immediate notice of the fact to the nearest Magistrate.

The license shall be prepared in form II appended to these rules.

7. Licenses to export arms or ammunition or military stores by road or by river to any place beyond the border of the Hyderabad Assigned Districts, and not within the limits of British India, may be granted by the Secretary to the Government of India in the Foreign Department, or by the Resident at Hyderabad, or by an officer authorised by the Government of India or by the Resident to grant such license.

Licenses granted under this rule will be prepared in form III, and be charged with a fee of rupees five, except in such cases as the Government of India in the Foreign Department or the Resident at Hyderabad may grant exemption from, or reduction of, the prescribed fee.

Copies of such licenses shall be sent on the day of issue to the Resident at Hyderabad and to the Political Officer of the State to which the articles are to be exported. If the articles are to be carried across the frontier by rail, a copy of the license should be sent to the Deputy Commissioner of the district from which the articles are to be despatched. In such cases the Deputy Commissioner of the district should at once forward a copy of the license to the railway authorities at the place of despatch. No railway company shall receive for despatch any box, package, or bale containing arms, ammunition, or

military stores as defined in the Indian Arms Act (XI of 1878), as applied to the Hyderabad Assigned Districts and the rules framed thereunder, unless covered and accompanied by the original license granted under these rules; and the railway authorities shall in every instance satisfy themselves that the goods tendered to them for conveyance correspond to the description given in such license, and that the license is identical with that forwarded to them by the Deputy Commissioner of the district.

8. Persons desirous of transporting, importing, or exporting arms, ammunition, or military stores in, into, or from the Hyderabad Assigned Districts, must apply in writing to the nearest officer authorised to grant a license. The application must specify—

(*a*) the place to which the articles are to be transported, imported, or exported; the route of transport, import, or export; and the probable time that will be occupied in the journey;

(*b*) the quantity, description, average price, and the purpose of each kind of arms or ammunition; or

(*c*) in the case of transport or export, whether the applicant has obtained the consent of the Magistrate or Police officer of the place of consignment. [If so, the evidence of such consent must be produced.]

9. Persons transporting, importing by road, or exporting arms, ammunition, or military stores under a license must write legibly on the cases or packages containing such articles an account of their contents.

10. In the case of transport or import, the consignee must, within six days of the articles reaching their destination, deliver the transport or import license to the Deputy Commissioner of the district. In the case of articles exported from the Hyderabad Assigned Districts to any place not within the limits of British India, the export license must within six days of the consignment reaching the frontier district, and before it leaves the Hyderabad Assigned Districts, be delivered to the Magistrate of the frontier district, or other officer empowered by him on this behalf. In the case of articles imported into the Hyderabad Assigned Districts, the import license must, within six days of the consignment entering the Hyderabad Asigned Districts, be shown to the Magistrate of the frontier district or other officer empowered by him in this behalf.

11. The officer to whom the transport, import, or export license, as the case may be, may be delivered under rule 10 must satisfy himself that the articles correspond with the entries in the license, and that any deficiency is properly accounted for.

Manufacture and Sale.

12. Licenses to manufacture, convert, keep, and sell arms or ammunition or military stores may be granted by the Deputy Commissioner of the district. They shall be in forms IV and V appended to these rules. The fee, payable in stamps, shall be twenty rupees in respect of licenses to manufacture, convert, and sell, and ten rupees in respect of licenses to keep and sell arms, ammunition, or military stores. Every license-holder under this rule shall keep, in such form as the Resident at Hyderabad may from time to time direct, registers of all arms manufactured or converted, of all ammunition and military stores manufactured, of all stock in hand, and of all sales. He shall exhibit his stock and his registers on demand by any Magistrate or by any Police officer not below the rank of Inspector. Magistrates and all Police officers not below the rank of Inspector are hereby empowered to enter and inspect any premises within their several jurisdictions in which arms or ammunition or sulphur are or is manufactured or kept, and to examine the stock and accounts of receipts and sales of arms, ammunition, and military stores. Any person licensed to sell arms and ammunition shall affix on a conspicuous part of his shop or usual place of business a signboard, on which shall be painted in large letters in English, or in the vernacular of the district, his name and the words "Licensed to manufacture (or, as the case may be, 'Licensed to deal in') arms, ammunition, and military stores." He

shall also post up in his shop a copy of section 22 of the Indian Arms Act (XI of 1878), as applied to the Hyderabad Assigned Districts, either in the vernacular of the district or in English.

Possession of arms, and going armed.

13. Licenses to possess cannon shall not be granted, save under the special order of the Governor-General in Council, certified under the signature of the Secretary to the Government of India in the Foreign Department. A copy of such license, so certified, must be sent immediately on its issue to the Deputy Commissioner of the place where the cannon is to be kept.

14. Licenses to possess arms and ammunition in reasonable quantities and to go armed for purposes of sport, of protection, or of display may be granted by the Deputy Commissioner of the district, or any Magistrate specially authorised in this behalf by the Resident in form VI. Such licenses shall be liable to a fee of four annas for each weapon. Such a license will authorise its holder to carry the arms described in the license on occasions when they may be reasonably required for the purposes named in the license. But the holder, unless specially authorised by the Deputy Commissioner, must not go armed in railway carriages, to fairs, religious processions, or other public assemblages. Licenses granted under this rule shall, on countersignature by the Commissioner, Hyderabad Assigned Districts, or other officer authorised in this regard by the Resident at Hyderabad, be valid for all the districts of the Hyderabad Assigned Districts.

15. Any Deputy Commissioner may grant a license in form VII for a journey, specifying the direction of the journey and the period it will occupy. Such license will be valid in other jurisdictions only for such journey and for such period, and will be liable to a fee of four annas for each weapon. Holders of licenses under this rule, unless specially authorised by the officer granting the licenses, must not go armed in railway carriages, to fairs, religious processions, or other public assemblages.

16. Licenses simply to possess fire-arms or ammunition or military stores may be granted in form VIII without fee. Such licenses will not authorise the holders to go armed or to carry arms.

17. Licenses for possession of arms and ammunition may be granted in form IX without fee, and for a term of five years, to persons who require arms for the destruction of wild animals which do injury to human beings, cattle, or crops. Such a license will be valid only in or on the immediate confines of the district for which it is granted. It will be subject to the conditions that the license and the weapon it covers is shown once a year, between the 15th November and the 31st December, to the nearest Magistrate, that the weapon becomes confiscated to Government directly it is sold or seized in execution of any debt; and that such weapon is carried only on occasions when it is to be used *bonâ fide* for the destruction of wild animals. Holders of licenses under this rule must not go armed in railway carriages, to fairs, religious processions, or other public assemblages.

18. Licenses may be granted to contractors, cultivators, and other persons without payment of any fee, entitling the holder to possess and transport gunpowder and fuses in reasonable quantities when the same are proved to the satisfaction of the officer granting the license to be required *bonâ fide*, in the case of licenses granted to contractors, for blasting purposes, and in the case of licenses granted to cultivators and persons for similar purposes in connection with agricultural works or works of public utility. Such licenses shall be given in form X appended to these rules.

19. Licenses may be granted to contractors and other persons without payment of any fee, entitling the holder to transport dynamite, blasting gelatine, and detonating caps in reasonable quantities when the same are proved to the satisfaction of the officer granting the license to be required *bonâ fide* for blasting purposes. General.

21. The fees leviable under these rules shall be taken in the shape of "impressed stamps." Ordinarily the applications for licenses or renewals of licenses shall be written on "impressed stamps" of value equal to the amount of fee leviable in respect of such licenses or renewals; and the licenses will be issued on plain paper. But when the licenses themselves are written or printed on "impressed stamps," the applications may be on plain paper. When an application for a license is written on an "impressed stamp," and the license is refused, the value of the stamp shall be refunded to the applicant.

22. Applications for licenses in respect of which no fee is leviable, or regarding licenses on which the full fee has been paid, shall be considered to be applications within meaning of Schedule II, article I, clause (*a*), of the Court Fees Act (VII of 1870) as applied to the Hyderabad Assigned Districts, and shall bear a court-fee stamp of one anna.

23. All licenses under rules 12 and 14 shall expire on the 31st December of the year for which they may be issued; licenses under rule 17 shall expire on the 31st December of the fifth year of their currency. But the currency of a license may be renewed, previous to its expiration, on payment of a second fee, by the same authority that granted it.

24. When a license granted in accordance with these rules is lost, or accidently destroyed, a duplicate may be granted to the licensee on payment of the same fee as he paid on the original license if not in excess of one rupee, and in any other case on payment of a fee of one rupee. Cultivators or other persons to whom licenses may have been granted without payment of any fee may obtain duplicates of such licenses if lost or destroyed free of all fee.

25. All licenses shall be given and held subject to the conditions endorsed on the reverse, and subject to these rules, and subject to the provisions of the Act. Licenses under rules 14 and 17 may be granted subject to the observance of a close season in the pursuit of game-birds or animals that do not injure either men or cattle or crops. The limits of the close season will be decided by the Resident, and the condition regarding such close season, if imposed, shall be endorsed on the reverse of the license.

26. Any person holding a license, or acting under a license granted in accordance with these rules, shall be bound to produce the same when called upon to do so by any Magistrate, or by any Police officer in charge of a police-station, or by any Police officer of higher rank.

27. Licenses granted for use within the Hyderabad Assigned Districts shall be written or printed in Marathi. Licenses granted for use beyond the Hyderabad Assigned Districts shall be in English, and may be in Marathi as well.

28. 29. Any officer empowered to grant a license under these rules may at his discretion refuse to grant, to renew, or to consent to the issue of a license, or may refer any application for the orders of the Resident.

PUBLIC DEBT.

No. 2918-A., dated Simla, the 8th June, 1894.

From—STEPHEN JACOB, Esq., Officiating Secretary to the Government of India, Finance and Commerce Department,

To—The Comptroller and Auditor General.

I am directed to acknowledge the receipt of your letter No. 1223-D., dated the 27th March 1894, on the subject of the payment of interest on Government Promissory Notes which have been enfaced for such payment in England, but on which the last Indian endorsement has not been certified.

2. In the Notification in this Department, No. 61, dated the 12th November 1858, laying down the rules for the enfacement of rupee paper for the payment of interest in London, it was provided that notes should be so enfaced only at Calcutta, and that notes bearing any endorsement must be renewed in the name of the then holder before being enfaced. It was also expressly stipulated that "any endorsement made in India of an enfaced note will not be recognised in England."

3. By a later Notification No. 79, dated the 15th September 1859, the provision as to the renewal of notes before enfacement was modified; and it was provided that holders of notes transferred for payment of interest to Bombay or Madras might "have such notes enfaced and registered by the Accountant General, Bombay (or Madras, as the case may be), on the condition that a certificate be affixed on the back of such notes by the Accountant General of the Presidency concerned that all existing endorsements have been examined by him and are valid and correct, and that the note itself is genuine and outstanding;

and on the understanding that no endorsement made subsequently to the date of the Accountant General's certificate will be recognised in England."

4. This later order did not expressly refer to Calcutta, but since its issue the recognised practice in Calcutta, as in Madras and Bombay, has been for the Public Debt Office to certify to the genuineness of the notes and of the endorsements, if any, upon them at the time of enfacement for payment of interest in London, renewal being effected only when desired by the holder or when necessary for any special reason.

5. It now appears from a letter, dated the 16th January 1894, from the Chief Accountant, Bank of England, to your address, that a very large number of the notes lodged at the Bank do not bear the prescribed certificate as to the correctness of the endorsement; and that as the Bank considered that the refusal to recognise uncertified endorsements might occasion trouble, it has hitherto admitted the notes on such evidence as could be procured in England of the genuineness of the endorsements. The Bank has, however, now raised the question whether its present practice is correct or whether it would be justified, and would be carrying out the wishes of the Government of India, in refusing to pay interest on notes on which the last Indian endorsement has not been duly certified.

6. I am to point out that the practice followed by the Bank of England as stated in the Chief Accountant's letter is not only irregular and not in accordance with the prescribed rules, but is also open to objection, since it is desirable that the genuineness of endorsements made in India should be decided in this country; the practice now brought to notice must in some cases operate with unfairness, as the proof required by the Bank might be easily obtainable in some cases, while in others it would not be possible to furnish it without a reference to India. The Government of India have accordingly decided that the practice should cease, and that in accordance with the authorised procedure notes on which the last Indian endorsement has not been certified should not be recognised in England.

7. The Government of India recognise the fact that the sudden cessation of the existing practice, however irregularly it has been allowed to grow up, might cause some inconvenience, and have accordingly decided that notice should be given in the form of the prescribed certificate of endorsement that endorsements made in India after the date of the certificate will not be recognised in England. The two following forms of notice are now prescribed by the Government of India for this purpose; and I am to request that in future one or other of the forms may be stamped on all Government Promissory Notes enfaced for payment of interest in England, Form A being used for notes bearing endorsements and Form B for clean notes:

A.

Certified that the above endorsement ha been examined, valid and correct, and that the note is genuine and outstanding. Any endorsement made in India subsequent to the date of this certificate will not be recognised by the Bank of England (vide *Government of India Notifications No. 61, dated the 12th November 1858, and No. 79, dated the 15th September 1859*).

Superintendent.

Dated . . . *189* .

B.

Certified that this note is genuine and outstanding. Any endorsement made in India will not be recognised by the Bank of England (vide *Government of India Notifications No. 61, dated the 12th November 1858, and No. 79, dated the 15th September 1859*).

8. I am to add that the attention of the Bank of England will be invited to the rules on the subject as laid down in 1858 and 1859, and the Bank will be requested to give notice of the above orders in such manner as may appear most suitable on the occasion of the next payment of interest on any loan; and thereafter to refuse payment of interest upon, and to return under objection all notes in which the rule as to endorsements in India is infringed, unless the endorsements have been previously recognized under the practice described in paragraph 5.

Ordered, that the letter be published in the *Gazette of India* for general information.

No. 124-I., dated 12th June, 1894.

RESOLUTION—By the Government of India, Public Works Department.

Review of the Revenue Report of Irrigation Works in Sind for 1892-93.

Read—

Letter No. 327-I., dated the 30th April 1894, from the Government of Bombay, forwarding the Revenue Report of the Irrigation Department in Sind for 1892-93, with a memorandum by the Commissioner in Sind, and the Resolution of the Government of Bombay on the subject.

OBSERVATIONS.—The number of Irrigation Works in Sind for which Capital and Revenue Accounts are kept is 11, of which 4 are classed as Major Works and 7 as Minor Works. The Capital outlay on these works during and up to the end of 1892-93 is shown in the following statement:

	Number of works.	During the year 1892-93.						Total direct and indirect to end of 1892-93.
		Works.	Establishment.	Tools and Plant.	Total direct charges.	Indirect charges.	Total direct and indirect charges.

Major Works—		Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Irrigation Works not charged against Revenue (Account head 49)	4	1,61,159	40,290	1,353	2,02,802	5,641	2,08,443	88,88,696
Minor Works and Navigation—

TOTAL ...	11	2,28,551	53,769	2,027	2,84,347	11,699	2,96,046	1,23,71,086

2. The Capital outlay on Major Works was incurred principally on the Eastern Nara, and there was also an expenditure on the Desert Canal and Unharwah Extension of Rs. 2,557 and Rs. 20,324 respectively.

The Capital outlay on Minor Works was, with the exception of Rs. 4,171 under indirect charges on the Mehrabwah, incurred solely on the Fuleli Canals, principally on the construction of regulators and inspection bungalows.

3. The recommendations of the Sind Irrigation Committee, referred to in paragraph 3 of last year's review, are gradually being given effect to, and several new projects have been submitted to the Local Government, notably that for the Jamrao Canal, which has now been sanctioned by Her Majesty's Secretary of State.

4. The following is a statement of the mileage of main and branch canals and of river embankments for the whole province:

		Miles.
Main Canals	2,231	5,888
Branch Canals	3,657	
River embankments		661

The length of main canals is less by 573 miles and of branch canals greater by 593 miles than that given in last year's report. The differences are due to more correct classification, while the net increase of 20 miles in the total length of main and branch canals is due to the resumption of the Karowah in Karachi District, to the taking over of the Mitnahwah in the Fuleli District, and to the addition of 2 miles to the length of the Desert Canal.

Sixteen miles of river embankments were constructed during the year, and the net increase in length of 2 miles only is accounted for by deductions made on account of eroded embankments in the Western Nara District.

5. The actual financial results of the year for the works for which Capital and Revenue Accounts are kept are shown in detail in the following statement. The aggregate figures for the works for which only Revenue Accounts are kept are also given:

Canals.	Total direct and indirect capital outlay to end of 1892-93.	Gross Revenue collected, 1892-93.			Working Expenses.			Net Actual Revenue.	Deduct receipts and charges on account of old Irrigation.	Net Revenue attributable to outlay of Government Capital.	Percentage of return.

‡ These figures represent deduction on account of receipts and charges relating to old irrigation works accepted by the Government of India in Public Works Department letter No. 74-I., dated 24th March 1893.

6. The gross revenue derived from the Major Works during the year under review was greater by Rs. 2,95,734 than in 1891-92, and the increase in net revenue attributable to the outlay of Government Capital, after allowing for deductions on account of old irrigation and for an increase in working expenses, amounted to Rs. 2,86,315.

Three of the Major Works show a large increase in net revenue, and on the fourth, the Eastern Nara Works, the percentage of net revenue on Capital outlay rose from 5·68 per cent. in 1891-92 to 5·92 per cent. in 1892-93.

On Major Works as a whole the percentage of net revenue on Capital outlay was 7·65 as compared with 4·53 during 1891-92.

The net revenue attributable to Government Capital outlay derived from the Minor Works for which Capital and Revenue Accounts are kept was slightly less than during the previous year, while the Minor Works for which only Revenue Accounts are kept showed an improvement in net actual revenue of Rs. 1,26,141.

7. The interest charges during the year on the four Major Works amounted to Rs. 3,39,822 and up to the end of the year to Rs. 64,00,801. The balance of receipts after paying off the interest charges was Rs. 3,39,766 for the year under review, and amounted to Rs. 22,32,089 to the end of the year.

The area assessed on the Major and Minor Works for which Capital and Revenue Accounts are kept showed an increase of 116,279 acres as compared with the previous year. The total area irrigated on all works is the largest yet recorded, and this is mainly due to the rabi crop which exceeded the average of the past five years by 218,322 acres, while the kharif crop shows a fair increase of 38,999 acres over the average.

The inundation is described as having been unfavourable for kharif crops, which require water in June and July; but the high level reached in August and maintained well into September gave an excellent supply for rabi.

The maximum reading on the Bukkur gauge reached 16′—9″ on the 18th August, and on the Kotri gauge the highest reading yet recorded, *viz.*, 21′—4″, was reached on the 27th August.

The rainfall during the year was unusually heavy; the heaviest fall occurred in the end of July and beginning of August, and was of great assistance to the kharif crop.

Considerable damage was done by floods during the year, and to this is attributed the heavy remissions amounting to Rs. 2,50,770, to which reference is made in paragraph 16 of the Resolution by the Local Government.

9. The following table exhibits the areas cultivated under kharif and rab crops in Government jaghir and foreign territory:

	Kharif. Acres.	Rabi. Acres.
Government land	1,633,041	534,918
Jaghir land	135,794	31,788
Foreign territory	54,010	9,504
Total ...	1,822,845	576,210
	2,399,055	

The difference of 3,094 acres between the above figures and those contained in the table in paragraph 8 is due to the exclusion of Agricultural Works from the latter.

10. In paragraph 22 of his report the Superintending Engineer shows that if foreign and jaghir lands were assessed at the same rates as Government lands, the assessment would have been increased by Rs. 4,62,488. The question of obtaining an enhanced revenue from jaghir lands, which was alluded to in paragraph 11 of last year's review, is still under the consideration of the Local Government.

11. The balance of demands on Government lands remaining unrealized at the beginning of the year was Rs. 58,198, after allowing for adjustments in the Revenue Department, and the outstanding balance on these lands at the end of the year was Rs. 61,597.

12. The following statement shows the distribution of outlay on Revenue Account:

Rs. 36,382 were expended on extensions and improvements in the Begari and Eastern Nara Districts, and under this head Rs. 27,553 were expended on constructing a new mouth and an escape sluice and channel for the Desert Canals.

13. The aggregate outlay on repairs amounted to Rs. 9,80,215, which is less by Rs. 7,965 than during 1891-92.

14. The details of establishment charges are as follows:

* Details not available.

Of the Major and Minor Works for which Capital Accounts are kept, the working expenses amounted to 33·4 per cent. of the total revenue after deducting from each the amounts due to old irrigation. The cost of Revenue management was 12·9 per cent. and of Maintenance, after deducting the maintenance charges due to old irrigation, to 20·5 per cent. of the total revenue.

15. The total expenditure on repairs includes a sum of Rs. 1,72,072 on account of establishment charged to works as against Rs. 1,87,201 in the previous year. Of this sum Rs. 89,311 were for supervising establishment and Rs. 82,761 for establishment engaged to watch canal banks and river embankments during the inundation.

16. The estimated value of the produce derived from irrigated land amounted to 451 lakhs of rupees. The following is a statement of the areas of the principal crops:

	Acres.
Kharif crops:	
Rice	630,509
Jowar	459,253
Bajra	480,083
Rabi crops:	
Wheat	314,123

All crops, with the exception of rice, show an increase over the figures for the preceding year.

17. The area irrigated by flow amounted to 956,613 acres and by lift to 310,768 acres. The double-cropped area was 123,421 acres.

The area irrigated during the kharif per cubic foot per second of canal head discharge varied from 29 to 50 acres.

18. As mentioned in paragraph 8 of this review, the inundation of 1892 was unfavourable for kharif and favourable for rabi crops. It is noted by the Superintending Engineer that the Indus took nearly three times as long in 1892 to discharge a flood of nearly the same volume as in 1887, and with an increase in level of 21 inches; but there is difficulty in forming any definite conclusion as to the cause of the phenomenon, though it is stated in paragraph 1 of the Resolution by the Local Government that the exceptional rainfall, which was about three times as heavy as that recorded in 1887-88, may afford a partial explanation.

19. The report was received by the Government of India on May 3rd, or about the same date as last year, which is considerably later than the date, 15th November, prescribed for its submission. It has as usual been well prepared, and the results

exhibited (a net revenue of 11·71 per cent. on the total Capital outlay to end of the previous year,—*vide* paragraph 33 of Local Government Resolution), especially in view of the character of the inundation, appear to the Governor General in Council highly satisfactory, and such as to indicate that good use has been made of the funds allotted to Sind irrigation. The Government of India concur in the opinion expressed in paragraph 40 of the Resolution by the Local Government as regards the administration of his charge by the Superintending Engineer and the praise awarded by him to the officers mentioned.

No. 256.—The following is published for general information:

No. 125-I., dated 12th June, 1894.

RESOLUTION—By the Government of India, Public Works Department.

Review of the Revenue Report of Irrigation Works in Baluchistan for the year 1892-93.

Read—

Revenue Report of Irrigation Works in Baluchistan for the year 1892-93 forwarded with letter No. 2966, dated 2nd May 1894, from the Secretary to the Agent to the Governor General and Chief Commissioner, British Baluchistan, Public Works Department.

OBSERVATIONS.—There are two Minor Works in Baluchistan of which both Capital and Revenue Accounts are kept, *viz.*, the Shebo Canal and the Khushdil Khan Reservoir.

2. The Capital outlay on the two works during and up to the end of 1892-93 was as follows:

* Includes indirect charges for 1891-92.

The outlay on the Shebo Canal during 1892-93 amounted to Rs. 2,186, including indirect charges incurred during the previous year, of which Rs. 1,571 was on Works and Rs. 361 on Establishment. No expenditure is shown as having been incurred on Tools and Plant during the year.

On the Khushdil Khan Reservoir there was no direct Capital outlay during the year, but an item of Rs. 77 incurred under indirect charges has been included in the Capital Account for the year under review.

3. The following statement shows the actual financial results of the year under review:

(a) Includes indirect charges for 1891-92.

After two successive years of loss on working, both systems worked at a profit during the year under review.

The working of the Shebo Canal resulted in a net profit of Rs. 9,181, or 1·40 per cent. on the Capital outlay. The revenue realized from the Shebo Canal as shown in the margin of the report is exclusive of Rs. 73 under Miscellaneous Receipts, and the total revenue is therefore Rs. 21,630 instead of Rs. 21,557.

The net return from the Khushdil Khan Reservoir amounted to Rs. 12,986, or 1·45 per cent. on the Capital expended.

The Irrigation Revenue on both canals is collected in kind, and the returns derived are affected by the yields of the various crops. There were no arrears of revenue due from the villagers at the end of the year 1892-93, nor any remissions except in the case of Shadezai people, who pay one-sixth of the share of produce as Government revenue instead of one-fourth as the other villagers do.

The Government of India have recently sanctioned the payment of Rs. 12,400 as compensation to the Shadezai Maliks in consideration of which they would pay the same revenue as other irrigators. Until this arrangement comes into force, the area watered during the year by the Shadezai villagers should be reported.

On the Shebo Canal the yield per acre during the year was—wheat 3·35 maunds and barley 4·85 maunds against the previous year's yield of 4·32 and 8·25 maunds respectively. The revenue realized from cultivated lands, exclusive of those under the Forest Department, was Rs. 3·03 per acre, and Rs. 7,693 from

the lands under the Forest Department. The rate charged to the Forest Department was Rs. 5 per acre for 1,433 acres, which were watered throughout the year, and Rs. 3 per acre for 176 acres, which were partially watered, against the rate of Rs. 1·65 per acre shown in last year's report as charged to that Department. It is stated that the revenue realized per acre of wheat amounted to Rs. 2·21 and of barley to Rs. 1·9 against Rs. 3·17 and Rs. 4·65 realized during 1891-92.

The yield per acre is not only extraordinarily small, but appears to be decreasing; a careful investigation into the facts and causes of such decrease would seem to be necessary and desirable.

On the Khushdil Khan Reservoir, the yield per acre was 3·10 maunds of wheat and 6·02 maunds of barley against the preceding year's yield of 0·96 maund and 4·24 maunds respectively. The revenue realized was—wheat Rs. 2·38 per acre and barley Rs. 3·09 per acre against Re. 0·68 and Rs. 1·96.

4. The area irrigated by the Shebo Canal during the year amounted to 4,140·61 acres, including 415 acres of irrigation by the Forest Department. The Khushdil Khan Reservoir irrigated 6,327 acres in addition to 17½ acres irrigated under kharif crops. All irrigation is by flow.

5. The following table shows the details of the working expenses exhibited in the statement in paragraph 3:

EXTENSION OF THE VOLUNTEER OFFICERS' DECORATION WARRANT TO THE COLONIES AND INDIA:

VICTORIA, R. I.

Whereas by Our Royal Warrant of the twenty-fifth day of July, one thousand eight hundred and ninety-two, We were graciously

pleased to institute a new Decoration for the purpose of rewarding the long and meritorious services of Officers of proved capacity in Our Volunteer Forces in Great Britain;

And whereas it has been represented to Us by Our Principal Secretary of State for War, on the recommendation of Our Principal Secretary of State for the Colonies acting on behalf of the several Governments of Our Colonies, and of Our Principal Secretary of State for India in Council, that the extension of the grant of this Decoration for Long Service to Our Volunteer Forces throughout Our Empire would be highly valued by them;

Now, to attain this end, We have extended, and by these presents for Us, Our Heirs, and Successors do extend, the grant of this Decoration to the Officers of the Volunteer Forces throughout Our Empire under the same terms and conditions as those on which it is granted to Officers in Our Volunteer Force by Our Royal Warrant of the twenty-fifth day of July, one thousand eight hundred and ninety-two, except that in the case of India eighteen years' service shall be the qualifying period: Provided always that the power of conferring the Decoration upon an Officer, or of removing the name of an Officer from the Registry of individuals upon whom the said Decoration shall have been conferred, shall be exercised on Our behalf with the same force as if exercised by Us, by the Governor-General of India, the Governor-General of the Dominion of Canada, or by the Governor of the Colony or Dependency according as such Officer shall have served in a Volunteer Force of India or of such Colony or Dependency; and the name of an Officer so granted the Decoration or removed from the Registry shall be published in the Official *Gazette of India* or of the said Colony or Dependency, as the case may be.

And We do further Ordain that Officers who have given qualifying service in the Volunteer Forces of any portion of Our Empire shall be entitled to reckon such service as part of the qualifying service required for this Decoration.

And We reserve to Ourself, Our Heirs, and Successors full power of altering, annulling, abrogating, augmenting, interpreting, or dispensing with these Regulations, or any part thereof, by a notification under the Royal Sign Manual.

No. 135.—The following Rules for Quarantine against plague which have been made by the Bombay Government in exercise of the power conferred by section 1, Act I of 1870, with the previous sanction of the Governor General in Council, are published for general information.

The Rules have effect from the 15th June 1894, as a temporary measure, in the ports of Aden, Perim, and the Somáli Coast:

I.—The Commander of every vessel, including buggalows or other native craft, arriving from Hongkong shall, before entering the harbour, indicate by signal the port from which such vessel has come.

II.—Such Commander shall not, except as hereinafter provided, allow any communication, either with the pilot boat, except orally, or with the shore, or with any other vessel or boat in the harbour.

III.—Immediately on any such arrival being signalled, the Health Officer of the Port shall go alongside the vessel and ascertain by enquiry from the Commander whether any person on board is suffering, or has during the voyage suffered, from plague; and if the Health Officer is satisfied by such enquiry that no person on board is suffering, or during the voyage has suffered, from plague, he shall direct the Commander to take the vessel to the quarantine anchorage duly appointed and notified in that behalf by the Resident, there to remain for a period of seven days from the date of arrival in the harbour. The Health Officer shall also direct the Commander to prohibit during the period for which the vessel remains at the quarantine anchorage as aforesaid all communication, except such as is hereinafter provided for between such vessel and the shore, or other vessels and boats in the harbour.

IV.—If the Health Officer shall have reason to believe at the time when the vessel arrives in the harbour that any person on board is suffering, or during the voyage has suffered, from plague, he shall direct the Commander to take the vessel to the quarantine anchorage as aforesaid, and there to remain for a period of fifteen days from the day of arrival in the harbour; and shall further direct that during such fifteen days intercourse between the said vessel and the shore or other vessels and boats in the harbour shall be prohibited as provided in Rule III.

V.—If during the period a vessel is at the quarantine anchorage aforesaid any case or cases of plague should occur on board, the said vessel shall remain in quarantine for a period of fifteen days from the date of the last case occurring, and be subject to all the prohibitions provided for in Rules III and IV.

VI.—When any vessel has been placed in quarantine as foresaid, the Health Officer may direct the removal of so many of the passengers and crew as may not be suffering from illness, and whose services may not be required on board the vessel, to such particular spots as may from time to time be selected by the Resident as places of quarantine, there to remain for a period of seven days, or, if the vessel has been placed in quarantine for fifteen days, for a period of fifteen days. If a case of plague occurs among such passengers and crew during any such period, they shall remain in a place of quarantine for a period of fifteen days from the date of the occurrence of the last case of such illness.

VII.—Any mails or cargo which may be brought by any vessel so arriving shall be landed under such precautions as the Health Officer may deem necessary to prevent the spread of the disease.

VIII.—It will be the duty of the Port Officer to facilitate the conveyance to all vessels in quarantine of such supplies of provisions, stores, and other articles as may be required by those on board. Such supplies will be placed on the boats of the vessels in quarantine to be subsequently removed by members of their crews.

IX.—All vessels arriving at Aden, Perim, and the Somáli Coast which may have communicated with vessels coming from Hongkong shall be subjected to the same quarantine as vessels arriving at Aden, Perim, and the Somáli Coast from Hongkong.

"ARTICLE XII.

"The extradition shall not take place unless the evidence be found sufficient, according to the laws of the State applied to, either to justify the committal of the prisoner for trial, in case the crime had been committed in the territory of the said State, or to prove that the prisoner is the identical person convicted by the Courts of the State which makes the requisition, and that the crime of which he has been convicted is one in respect of which extradition could, at the time of such conviction, have been granted by the State applied to. In Her Britannic Majesty's dominions the fugitive criminal shall not be surrendered until the expiration of fifteen days from the date of his being committed to prison to await his surrender.

WHEREAS the raising or keeping of a standing army within the United Kingdom of Great Britain and Ireland in time of peace, unless it be with the consent of Parliament, is against law:

And whereas it is adjudged necessary by Her Majesty and this present Parliament, that a body of forces should be continued for the safety of the United Kingdom and the defence of the possessions of Her Majesty's Crown, and that the whole number of such forces should consist of one hundred and fifty-five thousand three hundred and forty-seven men, including those to be employed at the depôts in the United Kingdom of Great Britain and Ireland for the training of recruits for service at home and abroad, but exclusive of the numbers actually serving within Her Majesty's Indian possessions:

And whereas it is also judged necessary for the safety of the United Kingdom, and the defence of the possessions of this realm, that a body of Royal Marine forces should be employed in Her Majesty's fleet and naval service, under the direction of the Lord High Admiral of the United Kingdom, or the Commissioners for executing the office of Lord High Admiral aforesaid:

And whereas the said marine forces may frequently be quartered or be on shore, or sent to do duty or be on board transport ships or vessels, merchant ships or vessels, or other ships or vessels, or they may be under other

And whereas no man can be forejudged of life or limb, or subjected in time of peace to any kind of punishment within this realm by martial law, or in any other manner than by the judgment of his peers and according to the known and established laws of this realm; yet nevertheless it being requisite, for the retaining all the before-mentioned forces, and other persons subject to military law, in their duty, that an exact discipline be observed, and that persons belonging to the said forces who mutiny or stir up sedition, or desert Her Majesty's service, or are guilty of crimes and offences to the prejudice of good order and military discipline, be brought to a more exemplary and speedy punishment than the usual forms of the law will allow:

No. 181.—The following Rules for Quarantine against plague which have been made by the Bombay Government in exercise of the power conferred by section 1, Act I of 1870, with the previous sanction of the Governor General in Council, are published for general information.

The Rules have effect from the 26th July 1894, as a temporary measure, in the ports of the Bombay Presidency, including Sind:

I.—The Commander of every vessel, including buggalows or other native craft, arriving at ports in the Bombay Presidency, including Sind, from Hongkong and Canton shall, before entering the harbour, hoist a yellow flag (or, if entering a port at night time, show whatever quarantine light signals are customary in the port) and indicate by signal the port from which such vessel has come, and shall keep such flag and signals flying until permitted to take them down as hereinafter provided. The pilot on going alongside a vessel from Hongkong and Canton shall direct the flag prescribed above to be hoisted, if it has not already been done.

II.—Such Commander shall not, without first having obtained permission as hereinafter provided, allow any communication, except orally, with the shore or any other vessel or boat, excepting with the boat supplying pilots, and in that case communication shall be limited to receiving on board the pilot, his servant, and baggage.

III.—On any such arrival being signalled, the Health Officer of the Port shall, as soon as possible, go alongside the vessel and ascertain by enquiry from the Commander whether any person on board is suffering, or has during the voyage suffered, from plague; and if the Health Officer is satisfied by such enquiry that no person on board is suffering, or during the voyage has suffered, from plague, and if the ship carries a qualified Medical Officer, quarantine shall be dispensed with and pratique granted.

If the vessel does not carry a qualified Medical Officer, he shall direct the Commander to take the vessel to the quarantine anchorage duly appointed and notified by Government, and there to remain for a period of eight clear days from the date of arrival in the harbour. The Health Officer shall also direct the Commander to prohibit during the period for which the vessel remains at the quarantine anchorage as aforesaid all communication, except such as is hereinafter provided for, between such vessel and the shore or other vessels and boats in the harbour.

IV.—If the Health Officer, as the result of the enquiry made under paragraph III above, shall have reason to believe at the time when the vessel arrives in the harbour that any person on board is suffering, or during the voyage has suffered, from plague, he shall direct the Commander to take the vessel to the quarantine anchorage as aforesaid, and there to remain for a period of fifteen days from the day of arrival in the harbour; and shall further direct that during such fifteen days' intercourse between the said vessel and the shore or other vessels and boats in the harbour shall be prohibited as provided in Rule III.

V.—If during the period a vessel is at the quarantine anchorage aforesaid any case or cases of plague should occur on board, the said vessel shall remain in quarantine for a period of fifteen days from the date of termination of the last case either by death, recovery, or removal from the vessel, and be subject to all the prohibitions provided for in Rules III and IV.

VI.—When any vessel has been placed in quarantine as aforesaid, the Health Officer may direct the removal of so many of the passengers and crew as may not be suffering from illness, and whose services may not be required on board the vessel, to such particular spots as may from time to time be selected by Government as places of quarantine, there to remain for a period of eight days, or, if the vessel has been placed in quarantine for fifteen days, for a period of fifteen days. If a case of plague occurs among such passengers and crew during any such period, they shall remain in a place of quarantine for a period of fifteen days from the date of the occurrence of the last case of such illness.

VII.—Any mails or cargo which may be brought by any vessel so arriving shall be landed under such precautions as the Health Officer may deem necessary to prevent the spread of the disease.

VIII.—It will be the duty of the Port Officer to facilitate the conveyance to all vessels in quarantine of such supplies of provisions, stores, and other articles as may be required by those on board. Such supplies will be placed on the boats of the vessels in quarantine, to be subsequently removed by members of their crews.

VIII.—If the vessel has not been allowed pratique at Singapore, or if through her not carrying a qualified Medical Officer, or for other reasons, the Health Officer is not satisfied that no one on board is suffering or has suffered during the voyage from the plague, he shall direct the Commander to take the vessel to the quarantine anchorage at Mateeabrooj or elsewhere duly appointed by the Port Officer, and there to remain for a period of eight days from the date of arrival in harbour. The Health Officer shall also direct the Commander to prohibit during the period for which the vessel remains at the quarantine anchorage as aforesaid all communication, except such as is hereinafter provided for, between such vessel and the shore or other vessels and boats in the harbour.

IX.—If the Health Officer, as the result of the enquiry made under paragraph V above, has reason to believe at the time when the vessel arrives in the harbour that any person on board is suffering, or during the voyage has suffered, from plague, or if during the time the ship is in quarantine at Mateeabrooj under Rule VIII any case of the disease breaks out, he shall direct the Commander to take the vessel to the quarantine anchorage at Diamond Harbour or elsewhere, and there to remain for a period of fifteen days from the day of arrival in the harbour; and shall further direct that during such fifteen days intercourse between the vessel detained under this Rule or Rule III and the shore or other vessels and boats in the harbour shall be prohibited as provided in Rule II.

X.—If during the period a vessel is at the quarantine anchorage aforesaid any case or cases of plague should occur on board, the said vessel shall remain in quarantine for a period of fifteen days from the date of the last case occurring, and be subject to all the prohibitions provided for in Rule IX.

SANITARY.

The 17th August, 1894.

No. 203.—The following Rules for Quarantine against plague which have been made by the Chief Commissioner of Burma in exercise of the power conferred by section 1, Act I of 1870, with the previous sanction of the Governor General in Council, are published for general information.

The Rules have effect from the 27th July 1894, as a temporary measure, in all ports in Burma:

I.—The Commander of every vessel, including junks or other native craft arriving from Hongkong or Canton, shall, on arrival at the pilot brig, or, if there is no pilot brig, at the entrance to the port, hoist a yellow flag and indicate by signal the port from which she has come.

II.—Such Commander shall not, except as hereinafter provided, allow any communication either with the shore or with any other vessel or boat, except with the boat supplying a pilot from the pilot brig, and in that case communication shall be limited to receiving on board the pilot, his servant, if any, and baggage.

III.—The pilot shall not take such vessel higher than Elephant Point in the port of Rangoon or higher than a place to be fixed by the Conservator in other ports, but shall anchor it there until the Health Officer of the Port has visited it and ascertained by enquiry from the Commander whether any person on board is suffering, or has during the voyage suffered, from plague. If the Health Officer is satisfied by such enquiry that no person on board is suffering, or during the voyage has suffered, from plague, and if the vessel carries a qualified medical officer, or if the vessel has undergone since leaving the infected port a quarantine which is properly proved for not less than eight days at Singapore or some other British port, the Health Officer shall by writing under his hand, to be delivered to the Commander, permit such vessel to haul down the yellow flag and proceed upwards in the port, and hold free communication with the shore and with vessels and boats in port. If the ship does not carry a qualified medical officer, or if she has not undergone eight days' quarantine at Singapore or some other British port since leaving the infected port, the Port Health Officer shall direct the Commander to take the vessel to the quarantine anchorage, and there to remain for a period of eight days from the date of arrival in the harbour. The Health Officer shall also direct the commander to prohibit during the period for which the vessel remains at the quarantine anchorage as aforesaid all communication, except such as is hereinafter provided for, between such vessel and the shore or other vessels and boats in the harbour.

IV.—If the Health Officer shall have reason to believe at the time when the vessel arrives in the harbour that any person on board is suffering, or during the voyage has suffered, from plague, he shall direct the Commander to take the vessel to the quarantine anchorage as aforesaid, and there to remain for a period of fifteen days from the day of arrival in the harbour; and shall further direct that during such fifteen days intercourse between the said vessel and the shore or other vessels and boats in the harbour shall be prohibited as provided in Rule III.

V.—If during the period a vessel is at the quarantine anchorage aforesaid any case or cases of plague should occur on board, the said vessel shall remain in quarantine for a period of fifteen days from the date of the last case occurring, and be subject to all the prohibitions provided for in Rules III and IV.

VI.—When any vessel has been placed in quarantine as aforesaid, the Health Officer may direct the removal of so many of the passengers and crew as may not be suffering from illness, and whose services may not be required on board the vessel, to such particular spots as may from time to time be selected by the Chief Commissioner as places of quarantine, there to remain for a period of eight days, or, if the vessel has been placed in quarantine for fifteen days, for a period of fifteen days. If a case of plague occurs among such passengers and crew during any such period, they shall remain in a place of quarantine for a period of fifteen days from the date of the occurrence of the last case of such illness.

VII.—Any mails or cargo which may be brought by any vessel so arriving shall be landed under such precautions as the Health Officer may deem necessary to prevent the spread of the disease.

VIII.—It will be the duty of the Conservator of the Port to facilitate the conveyance to all vessels in quarantine of such supplies of provisions, stores, and other articles as may be required by those on board. Such supplies will be placed on the boats of the vessels in quarantine, to be subsequently removed by members of their crews.

IX.—All vessels arriving at any port in Burma which may have communicated with any vessel coming from Hongkong or Canton shall be subjected to the same quarantine as vessels arriving at any port in Burma from Hongkong or Canton, unless the communication was held after the vessel from Hongkong or Canton was released from quarantine.

No. 18.—The following Statute is published for general information:

THE INDIAN RAILWAYS ACT, 1894.

[57 & 58 VICTORIA, CHAPTER 12.]

An Act to enable Indian Railway Companies to pay Interest out of Capital during construction.

[3RD JULY, 1894.]

BE it enacted by the Queen's Most Excellent Majesty, by and with the advice and consent of the Lords Spiritual and Temporal, and Commons, in this present Parliament assembled, and by the authority of the same, as follows:

1. This Act may be cited as the Indian Railways Act, 1894. Short title.

2. The expression "the Secretary of State" means the Secretary of State in Council of India: Definitions.

The expression "Indian Railway Company" means a company registered under the Companies Acts, 1862 to 1890, or any of them, and formed for the purpose of making and working, or making or working a railway in India, whether alone or in conjunction with other purposes:

The expression "the railway" means the railway in relation to the construction of which interest out of capital is permitted to be paid as herein-after provided.

3. An Indian Railway Company may pay interest on its paid-up share capital out of capital for the period, and subject to the conditions and restrictions in this section mentioned, and may charge the same to capital as part of the cost of construction of the railway:

Payment of interest out of capital.

(1) Such interest shall be paid only for such period as shall be determined by the Secretary of State; and such period shall in no case extend beyond the close of the half-year next after the half-year during which the railway shall be actually completed and opened for traffic:

(2) No such payment shall be made unless the same is authorised by the Company's memorandum of association or by special resolution of the Company:

(3) No such payment, whether authorised by the memorandum of association or by special resolution, shall be made without the previous sanction of the Secretary of State:

(4) The amount so paid out of capital by way of interest, in respect of any period, shall in no case exceed a sum which shall, together with the net earnings of the railway during such period, make up the rate of four per cent. per annum:

(5) No such payment of interest shall be made until such Company has satisfied the Secretary of State that two-thirds at least of its share capital, in respect whereof interest is to be so paid, has been actually issued and accepted, and is held by shareholders who, or whose executors, administrators, or assigns, are legally liable for the same:

(6) No such interest shall accrue in favour of any shareholder for any time during which any call on any of his shares is in arrear:

(7) The payment of such interest shall not operate as a reduction of the amount paid up on the shares in respect of which it is paid.

4. If an Indian Railway Company is about to make and work, or to make or work, a railway in addition to, or by way of extension of, a railway owned or worked by such Company, and for that purpose issues further share capital in addition to the capital already issued by it, such Company may pay interest upon such further share capital out of capital for the period, and subject to the conditions and restrictions in the last preceding section mentioned, the words in that section, "the railway," being read as applying to such addition or extension exclusively.

Additional share capital for extensions.

5. When a Company has power to pay interest under this Act, notice to that effect shall be given in every prospectus, advertisement, or other document inviting subscriptions for shares, and in every certificate of shares.

Notice in prospectus and other documents.

6. When any interest has been paid by a Company under this Act, the annual or other accounts of such Company shall show the amount on which, and the rate at which, interest has been so paid.

Accounts.

7. If by any memorandum of association, articles of association, or other document any power of borrowing money is conferred on an Indian Railway Company, or on its directors, with or without the sanction of any meeting, and if such power of borrowing is limited to an amount bearing any proportion to the capital of such Company, the amount of capital applied or to be applied in payment of interest under this Act shall, for the purpose of ascertaining the extent of such power of borrowing, be deducted from the capital of such Company.

Construction of borrowing powers.

8. Where an Indian Railway Company at any time before the passing of this Act has, with the sanction of the Secretary of State, paid interest out of capital, such payment shall be as valid as if it had been made pursuant to this Act.

Sanction of past payments.

9. This Act shall continue in force until the thirty-first day of December one thousand nine hundred and five, and to the end of the then next session of Parliament, and no longer, unless Parliament shall otherwise determine. Provided that all interest, the payment of which shall have been sanctioned by the Secretary of State under this Act, shall continue to be payable to the same extent and for the same period as if this Act had not expired.

Duration of Act.

PRESENT:

The Queen's Most Excellent Majesty in Council.

Whereas by the "Merchant Shipping Act Amendment Act, 1862," it is enacted that "whenever it is made to appear to Her Majesty that the rules concerning the measurement of tonnage "of merchant ships for the time being in force under the principal Act have been adopted by the "Government of any foreign country, and are in force in that country, it shall be lawful for Her "Majesty by Order in Council to direct that the ships of such foreign country shall be deemed to "be of the tonnage denoted in their Certificates of Registry or other national papers, and thereupon it shall no longer be necessary for such ships to be remeasured in any port or place in Her "Majesty's Dominions, but such ships shall be deemed to be of the tonnage denoted in their Certificates of Registry or other papers in the same manner, to the same extent, and for the same "purposes in, to, and for which the tonnage denoted in the Certificates of Registry of British "Ships is to be deemed the tonnage of such ships":

And whereas by "the Merchant Shipping Act, 1876," it is enacted that "where Her Majesty "has power under the Merchant Shipping Act, 1854, or any Act passed, or hereafter to be passed, "amending the same, to make an Order in Council, it shall be lawful for Her Majesty from time "to time to make such Order in Council, and by Order in Council to revoke, alter, or add to any "Order so made":

And whereas it has been made to appear to Her Majesty that a new Royal Ordinance, which came into operation on the 5th day of May 1883, stipulates that the Certificates of Tonnage of Norwegian Steamships may show the net tonnage calculated according to British rules:

And whereas it has been made to appear desirable to Her Majesty that the provisions of the said recited Order in Council of the 17th day of May 1876 should be revoked, and a new Order in Council made and substituted in lieu thereof:

No. 434R.-T., dated 17th August, 1894.

RESOLUTION—By the Government of India, Public Works Department.

Local taxation of railways in British India.

Read again—

Section 135 of the Indian Railways Act (IX) of 1890.

Government of India, Public Works Department, Notification No. 270, dated the 12th June 1890.

Government of India letter No. 298R.T., dated the 25th June 1890, explaining the intention of the Legislature in the matter of the local taxation of railways, and requesting that the Government of India may be furnished with complete schedules giving information in regard to the taxes which each railway administration was paying on the 30th April 1890 to local authorities as defined in section 135 of the Indian Railways Act (IX) of 1890.

Government of India Nos. 857—59R.T., dated the 19th November 1890, forwarding for information a tabulated statement of replies received from the several railway administrations, and intimating that the Government of India were pleased to depute Captain (now Major) R. C. Temple, B.S.C., to enquire locally into, and report to the Governor General in Council upon, the local taxation of railways.

Government of India, Public Works Department, Notification No. 136, dated the 5th April 1893.

Read also—

Letter, dated the 18th November 1891 (and its enclosures), from Major R. C. Temple, submitting a report upon the local taxation of railways in India based upon enquiries made in the provinces of Bengal and Burma.

OBSERVATIONS.—The Governor General in Council has perused with much interest the report submitted by Major Temple, which deals more especially with

the local taxation of railways in Bengal and Burma, although the system of taxation adopted in other provinces has also been briefly reviewed. It would appear from the facts set forth in that report and the other papers before the Government that the taxes which are now being levied from the several railway administrations under the authority of the Government of India, Public Works Department, Notifications No. 270, dated the 12th June 1890, and No. 136, dated the 5th April 1893, are in their nature generally fair and reasonable, and that in the majority of cases the assessment of these taxes is moderate.

RESOLUTION.—The Governor General in Council, having carefully considered the question, is of opinion that a general revision of the existing system of local taxation in regard to railways is unnecessary.

2. Should any railway administration, however, consider that any particular tax or its assessment is unreasonable or disproportionate to the services rendered, the Governor General in Council is pleased to decide that an application for the revision of such tax or assessment should be made direct to the Commissioner in charge of the Division in which the tax is levied, or, where there is not such a Commissioner, to the officer holding a position corresponding to that of a Commissioner (*e.g.*, the Collector in the Presidency of Madras or the Deputy Commissioner in Sylhet or Cachar), who is hereby appointed under section 135, sub-section (2), of the Indian Railways Act, 1890, to enquire specially into all the circumstances of the case, and determine, in communication with the contending parties, the sum, if any, which should be paid.

3. The Governor General in Council further desires to call the attention of local authorities to the Government of India, Public Works Department, Notifications No. 270, dated the 12th June 1890, and No. 136, dated the 5th April 1893 (under which every railway administration was declared liable to pay all taxes legally in force during the year ended on the 30th April 1890), and to direct that when it is sought to impose any new tax on a railway, application should be made through the Local Government concerned for the sanction of the Governor General in Council under section 135, sub-section (1), of the Act referred to above. In all such applications the reasons for imposing the new tax must be fully explained, and at the same time the views of the railway administration affected thereby should be obtained by the Local Government and submitted together with the application.

ORDER.—Ordered, that this Resolution be communicated to the Local Governments and Administrations and to the officers noted in the margin for information and guidance.

The Governments of Madras, Bombay, Bengal, North-Western Provinces and Oudh, and the Punjab.
The Chief Commissioners of the Central Provinces, Burma, Assam, and Coorg.
The Resident at Hyderabad.
The Resident in Mysore.
The Agents to the Governor General for Central India, Rajputana, and Baluchistan.
The Director General of Railways.
The Consulting Engineers to the Government of India for Railways, Calcutta, Lucknow, Central Division, and Assam.

Ordered also, that this Resolution be communicated to the Home Department and to the Accountant General, Public Works Department, for information, and that it be published under a notification in Part I of the *Gazette of India*.

By the QUEEN.

A PROCLAMATION.

VICTORIA, R.

Whereas We are happily at peace with all Sovereigns, Powers, and States;

And whereas a state of war unhappily exists between His Majesty the Emperor of China and His Majesty the Emperor of Japan, and between their respective subjects and others inhabiting within their countries, territories, or dominions;

And whereas We are on terms of friendship and amicable intercourse with each of these States, and with their subjects and others inhabiting within their countries, territories, or dominions;

And whereas great numbers of Our loyal subjects reside and carry on commerce, and possess property and establishments, and enjoy various rights and privileges, within the territory of each of the aforesaid States, protected by the faith of Treaties between Us and each of the aforesaid States;

And whereas We, being desirous of preserving to Our subjects the blessings of peace which they now happily enjoy, are firmly purposed and determined to maintain a strict and impartial neutrality in the said state of war unhappily existing between the aforesaid States;

We therefore have thought fit, by and with the advice of Our Privy Council, to issue this Our Royal Proclamation;

And We do hereby strictly charge and command all Our loving subjects to govern themselves accordingly, and to observe a strict neutrality in and during the aforesaid war, and to abstain from violating or contravening either the Laws and Statutes of the realm in this behalf, or the law of nations in relation thereto, as they will answer to the contrary at their peril;

And whereas in and by a certain Statute made and passed in a Session of Parliament holden in the 33rd and 34th year of Our reign, intituled "An Act to regulate the Conduct of Her Majesty's Subjects during the Existence of Hostilities between Foreign States with which Her Majesty is at Peace," it is, amongst other things, declared and enacted as follows:

"This Act shall extend to all the dominions of Her Majesty, including the adjacent territorial waters.

"*Illegal Enlistment.*

"If any person without the licence of Her Majesty, being a British subject, within or without Her Majesty's dominions, accepts, or agrees to accept, any commission or engagement in the military or naval service of any foreign State at war with any foreign State at peace with Her Majesty, and in this Act referred to as a friendly State, or, whether a British subject or not, within Her Majesty's dominions, induces any other person to accept, or agree to accept, any commission or engagement in the military or naval service of any such foreign State as aforesaid—

"He shall be guilty of an offence against this Act, and shall be punishable by fine and imprisonment, or either of such punishments, at the discretion of the Court before which the offender is convicted; and imprisonment, if awarded, may be either with or without hard labour.

"If any person without the licence of Her Majesty, being a British subject, quits or goes on board any ship with a view of quitting Her Majesty's dominions with intent to accept any commission or engagement in the military or naval service of any foreign State at war with a friendly State, or, whether a British subject or not, within Her Majesty's dominions, induces any other person to quit or to go on board any ship with a view of quitting Her Majesty's dominions with the like intent—

"He shall be guilty of an offence against this Act, and shall be punishable by fine and imprisonment, or either of such punishments, at the discretion of the Court before which the offender is convicted; and imprisonment, if awarded, may be either with or without hard labour.

"If any person induces any other person to quit Her Majesty's dominions, or to embark on any ship within Her Majesty's dominions, under a misrepresentation or false representation of the service in which such person is to be engaged, with the intent or in order that such person may

accept, or agree to accept, any commission or engagement in the military or naval service of any foreign State at war with a friendly State—

"He shall be guilty of an offence against this Act, and shall be punishable by fine and imprisonment, or either of such punishments, at the discretion of the Court before which the offender is convicted; and imprisonment, if awarded, may be either with or without hard labour.

"If the master or owner of any ship without the licence of Her Majesty knowingly either takes on board, or engages to take on board, or has on board such ship within Her Majesty's dominions, any of the following persons in this Act referred to as illegally enlisted persons, that is to say:

"(1) Any person who, being a British subject, within or without the dominions of Her Majesty, has without the licence of Her Majesty accepted, or agreed to accept, any commission or engagement in the military or naval service of any foreign State at war with any friendly State:

"(2) Any person, being a British subject, who without the licence of Her Majesty is about to quit Her Majesty's dominions with intent to accept any commission or engagement in the military or naval service of any foreign State at war with a friendly State:

"(3) Any person who has been induced to embark under a misrepresentation or false representation of the service in which such person is to be engaged with the intent or in order that such person may accept, or agree to accept, any commission or engagement in the military or naval service of any foreign State at war with a friendly State:

"Such master or owner shall be guilty of an offence against this Act, and the following consequences shall ensue, that is to say:

"(1) The offender shall be punishable by fine and imprisonment, or either of such punishments, at the discretion of the Court before which the offender is convicted; and imprisonment, if awarded, may be either with or without hard labour; and

"(2) Such ship shall be detained until the trial and conviction or acquittal of the master or owner, and until all penalties inflicted on the master or owner have been paid, or the master or owner has given security for the payment of such penalties to the satisfaction of two Justices of the Peace, or other Magistrate or Magistrates having the authority of two Justices of the Peace; and

(3) All illegally enlisted persons shall, immediately on the discovery of the offence, be taken on shore, and shall not be allowed to return to the ship.

Illegal Shipbuilding and Illegal Expeditions.

"If any person within Her Majesty's dominions, without the license of Her Majesty, does any of the following acts, that is to say:

"(1) Builds, or agrees to build, or causes to be built, any ship with intent or knowledge, or having reasonable cause to believe that the same shall or will be employed in the military or naval service of any foreign State at war with any friendly State; or

"(2) Issues or delivers any commission for any ship with intent or knowledge, or having reasonable cause to believe that the same shall or will be employed in the military or naval service of any foreign State at war with any friendly State; or

"(3) Equips any ship with intent or knowledge, or having reasonable cause to believe that the same shall or will be employed in the military or naval service of any foreign State at war with any friendly State; or

"(4) Dispatches, or causes or allows to be dispatched, any ship with intent or knowledge, or having reasonable cause to believe that the same shall or will be employed in the military or naval service of any foreign State at war with any friendly State—

"Such person shall be deemed to have committed an offence against this Act, and the following consequences shall ensue:

"(1) The offender shall be punishable by fine and imprisonment, or either of such punishments, at the discretion of the Court before which the offender is convicted; and imprisonment, if awarded, may be either with or without hard labour.

"(2) The ship in respect of which any such offence is committed and her equipment shall be forfeited to Her Majesty:

"Provided that a person building, causing to be built, or equipping a ship in any of the cases aforesaid, in pursuance of a contract made before the commencement of such war as aforesaid, shall not be liable to any of the penalties imposed by this section in respect of such building or equipping if he satisfies the conditions following, that is to say:

"(1) If forthwith upon a Proclamation of Neutrality being issued by Her Majesty he gives notice to the Secretary of State that he is so building, causing to be built, or equipping such ship, and furnishes such particulars of the contract and of any matters relating to, or done, or to be done, under the contract as may be required by the Secretary of State:

"(2) If he gives such security, and takes and permits to be taken such other measures, if any, as the Secretary of State may prescribe for insuring that such ship shall not be dispatched, delivered, or removed without the licence of Her Majesty until the termination of such war as aforesaid.

"Where any ship is built by order of or on behalf of any foreign State when at war with a friendly State, or is delivered to or to the order of such foreign State, or any person who to the knowledge of the person building is an agent of such foreign State, or is paid for by such foreign State or such agent, and is employed in the military or naval service of such foreign State, such ship shall, until the contrary is proved, be deemed to have been built with a view to being so employed, and the burden shall lie on the builder of such ship of proving that he did not know that the ship was intended to be so employed in the military or naval service of such foreign State.

"If any person within the dominions of Her Majesty, and without the license of Her Majesty,—

"By adding to the number of the guns, or by changing those on board for other guns, or by the addition of any equipment for war, increases or augments, or procures to be increased or augmented, or is knowingly concerned in increasing or augmenting, the warlike force of any ship which at the time of her being within the dominions of Her Majesty was a ship in the military or naval service of any foreign State at war with any friendly State—

"Such person shall be guilty of an offence against this Act, and shall be punishable by fine and imprisonment, or either of such punishments, at the discretion of the Court before which the offender is convicted; and imprisonment, if awarded, may be either with or without hard labour.

"If any person within the limits of Her Majesty's dominions, and without the licence of Her Majesty,—

"Prepares or fits out any naval or military expedition to proceed against the dominions of any friendly State, the following consequences shall ensue:

"(1) Every person engaged in such preparation or fitting out, or assisting therein, or employed in any capacity in such expedition, shall be guilty of an offence against this Act, and shall be punishable by fine and imprisonment, or either of such punishments, at the discretion of the Court before which the offender is convicted; and imprisonment, if awarded, may be either with or without hard labour.

"(2) All ships and their equipments, and all arms and munitions of war used in or forming part of such expedition, shall be forfeited to Her Majesty.

"Any person who aids, abets, counsels, or procures the commission of any offence against this Act shall be liable to be tried and punished as a principal offender."

And whereas by the said Act it is further provided that ships built, commissioned, equipped, or dispatched in contravention of the said Act may be condemned and forfeited by Judgment of the Court of Admiralty; and that if the Secretary of State or chief executive authority is satisfied that there is a reasonable and probable cause for believing that a ship within Our dominions has been or is being built, commissioned, or equipped contrary to the said Act, and is about to be taken beyond the limits of such dominions, or that a ship is about to be dispatched contrary to the Act, such Secretary of State or chief executive authority shall have power to issue a warrant authorizing the seizure and search of such ship and her detention until she has been either condemned or released by process of law: And whereas certain powers of seizure and detention are conferred by the said Act on certain local authorities:

Now, in order that none of Our subjects may unwarily render themselves liable to the penalties imposed by the said Statute, We do hereby strictly command that no person or persons whatsoever do commit any act, matter, or thing whatsoever contrary to the provisions of the said Statute upon pain of the several penalties by the said Statute imposed and of Our high displeasure.

And We do hereby further warn and admonish all Our loving subjects, and all persons whatsoever entitled to Our protection, to observe towards each of the aforesaid States, their citizens, subjects, and territories, and towards all belligerents whatsoever with whom We are at peace, the duties of neutrality; and to respect, in all and each of them, the exercise of those belligerent rights which We and Our Royal predecessors have always claimed to exercise.

And We hereby further warn all Our loving subjects, and all persons whatsoever entitled to Our protection, that if any of them shall presume in contempt of this Our Royal Proclamation and of Our high displeasure to do any acts in derogation of their duty as subjects of a neutral Sovereign in a war between other States, or in violation or contravention of the law of nations in that behalf, as more especially by breaking, or endeavouring to break, any blockade lawfully and actually established by or on behalf of either of the said States, or by carrying officers, soldiers, despatches, arms, ammunition, military stores, or materials, or any article or articles considered and deemed to be contraband of war according to the law or modern usages of nations, for the use or service of either of the said States, that all persons so offending, together with their ships and goods, will rightfully incur and be justly liable to hostile capture, and to the penalties denounced by the law of nations in that behalf.

And We do hereby give notice that all Our subjects and persons entitled to Our protection who may misconduct themselves in the premises will do so at their peril, and of their own wrong; and that they will in nowise obtain any protection from Us against such capture, or such penalties as aforesaid, but will, on the contrary, incur Our high displeasure by such misconduct.

Given at Our Court at *Osborne House, Isle of Wight*, this seventh day of *August*, in the year of our Lord one thousand eight hundred and ninety-four, in the fifty-eight year of Our reign.

GOD SAVE THE QUEEN.

The following letter addressed by Her Majesty's Secretary of State for Foreign Affairs to the Right Hon'ble Henry Hartley Fowler, Her Majesty's Secretary of State for India, is also published for general information and guidance :

FOREIGN OFFICE,
August 7, 1894.

SIR,

Her Majesty being fully determined to observe the duties of neutrality during the existing state of war between the Emperor of China and the Emperor of Japan, and being moreover resolved to prevent, as far as possible, the use of Her Majesty's harbours, ports, and coasts, and the waters within Her Majesty's territorial jurisdiction, in aid of the warlike purposes of either belligerent, has commanded me to communicate to you, for your guidance, the following rules, which are to be treated and enforced as Her Majesty orders and directions :

Her Majesty is pleased further to command that these rules shall be put in force in the United Kingdom, the Isle of Man, and the Channel Islands on and after the 12th day of this month, and in Her Majesty's territories and possessions beyond the seas six days after the day when the Governor or other chief authority of each of such territories or possessions respectively shall have notified and published the same, stating in such Notification that the said rules are to be obeyed by all persons within the same territories and possessions.

1. During the continuance of the present state of war, all ships of war of either belligerent are prohibited from making use of any port or roadstead in the United Kingdom, the Isle of Man, or the Channel Islands, or in any of Her Majesty's colonies or foreign possessions or dependencies, or of any waters subject to the territorial jurisdiction of the British crown, as a station, or place of resort, for any warlike purpose, or for the purpose of obtaining any facilities for warlike equipment ; and no ship of war of either belligerent shall hereafter be permitted to sail out of or leave any port, roadstead, or waters subject to British jurisdiction from which any vessel of the other belligerent (whether the same shall be a ship of war or a merchant ship) shall have previously departed until after the expiration of at least twenty-four hours from the departure of such last-mentioned vessel beyond the territorial jurisdiction of Her Majesty.

2. If any ship of war of either belligerent shall, after the time when this Order shall be first notified and put in force in the United Kingdom, the Isle of Man, and the Channel Islands, and in the several colonies and foreign possessions and dependencies of Her Majesty respectively, enter any port, roadstead, or waters belonging to Her Majesty, either in the United Kingdom, the Isle of Man, or the Channel Islands, or in any of Her Majesty's colonies or foreign possessions or dependencies, such vessel shall be required to depart and to put to sea within twenty-four hours after her entrance into such port, roadstead, or waters, except in case of stress of weather, or of her requiring provisions or things necessary for the subsistence of her crew or repairs, in either of which cases the authorities of the port, or of the nearest port (as the case may be), shall require her to put to sea as soon as possible after the expiration of such period of twenty-four hours without permitting her to take in supplies beyond what may be necessary for her immediate use ; and no such vessel which may have been allowed to remain within British waters for the purpose of repair shall continue in any such port, roadstead, or waters for a longer period than twenty-four hours after her necessary repairs shall have been completed. Provided, nevertheless, that in all cases in which there shall be any vessel (whether ships of war or merchants ships) of the said belligerent parties in the same port, roadstead, or waters within the territorial jurisdiction of Her Majesty, there shall be an interval of not less than twenty-four hours between the departure therefrom of any such vessel (whether ship of war or merchant ship) of the one belligerent, and the subsequent departure therefrom of any ship of war of the other belligerent ; and the time hereby limited for the departure of such ships of war respectively shall always in case of necessity be extended so far as may be requisite for giving effect to this proviso, but no further or otherwise.

3. [In the following Notification "Notes" means "Promissory Notes of the Government of India," and includes "Stock Certificates" issued in lieu thereof and "Loan Certificates with coupons attached."]

1. Notice is hereby given that all the Notes of the Four per cent. Loan of 1854-55 will be discharged at the General Treasury of Fort William (Public Debt Office, Bank of Bengal, Calcutta) on December 31st, 1894, on which date the interest on such Notes will cease.

2. Proprietors of Notes hereby advertised for discharge have the option, which must be exercised before noon of Wednesday, October 3rd, 1894, of tendering their Notes for reduction of interest from four per cent. to 3½ per cent. ; such reduction to have effect from December 31st, 1894, in the case of Notes tendered before noon of Monday, September 17th, and from June 30th, 1894, in the case of Notes tendered thereafter.

3. The reduced loan thus constituted will be known as the 3½ per cent. Loan of 1854-55, and no part of it will be paid off or discharged before August 1st, 1904, nor until the expiration of three months after notice of payment to be given by the Governor General of India in Council in the *Government Gazette*.

4. Notes may be tendered for reduction of interest at the Public Debt Office, Bank of Bengal, Calcutta, or at any other Bank (including the Bank of England) or Treasury to which they are for the time being enfaced for payment of interest. Notes so tendered must bear the following endorsement duly signed:

"This Note (or Stock Certificate) is tendered for reduction of interest in terms of Notification of September 1st, 1894."

5. On Notes so tendered before noon of Monday, September 17th (in addition to any interest already due and payable on them), four annas per Rs. 100 will be paid on account of difference of interest from June 30th, 1894, till December 29th, 1894. On Notes tendered thereafter no payment on account of difference of interest will be made.

In the case of Loan Certificates with coupons attached, each outstanding coupon will be stamped "Interest reduced to 3½ per cent." before the Certificate is returned to the proprietor.

7. All future payments of interest on any Note so enfaced will be made on the usual half-yearly dates as if the Note bore interest at 3½ per cent. instead of 4 per cent.

8. When a Note so enfaced comes in ordinary course under renewal, it will be renewed in its original form, save that—

(1) For "four per cent." will be substituted "three-and-a-half per cent."

(2) A clause will be added at the end—"The Governor General in Council hereby engages that this Note shall not be discharged before August 1st, 1904."

9. This clause does not apply if the proprietor has an Attorney in India empowered to sell.

MINT.

No. 4634-A.

Simla, the 14th September, 1894.

RESOLUTION—By the Government of India, Finance and Commerce Department.

Read the following letters transmitting reports on the working of the Mints and Assay Offices of Bombay and Calcutta for the year 1893-94:

From the Mint Master, Bombay, No. 352, dated the 6th July 1894.

From the Assay Master, Bombay, No. 61, dated the 21st June 1894.

From the Mint Master, Calcutta, No. 921, dated the 14th June 1894.

From the Assay Master, Calcutta, No. 1, dated the 2nd April 1894.

I.—WORKING OF THE MINTS.

The Mint Law, which since 1870 had remained unchanged, underwent an important alteration during 1893-94. On 26th June 1893, the law allowing private persons to tender silver to the Mint for coinage, either directly or through the Paper Currency Department, was repealed; and from that date, except for the receipt of nearly two crores of tolas of silver from the Exchange Banks, the operations of the Mint have been restricted to working off the silver then held, and to coining such small coins as are required to meet the ordinary demands of the public for small change. This event was the central fact of the mint history of the year, and must be prominently noticed, since it affected, as far as silver was concerned, all the operations of the year and vitiates any comparison with the results of other years.

2. *Imports and coinage: Gold.*—The imports of gold into India during the year under review were much larger than in 1892-93, having amounted to 474,635 ounces, valued at Rs. 3,14,65,300. In 1892-93 the imports were 272,442

ounces, valued at Rs. 1,78,17,891. The imports of 1892-93 were, however, unusually small, and the exports greatly in excess of the imports :

Year.	Imports.		Exports.		Net Imports.		Net Exports.	
	oz.	Rs.	oz.	Rs.	oz.	Rs.	oz.	Rs.
1889-90	850,232	5,07,10,273	76,848	45,57,235	773,384	4,61,53,038	...	...
1890-91	1,175,875	6,50,08,317	161,646	86,16,600	1,014,229	5,63,91,717	...	...
1891-92	709,102	4,11,89,291	285,454	1,70,51,369	423,648	2,41,37,922	...	...
1892-93	272,442	1,78,17,891	726,925	4,59,44,720	...	...	454,483	2,81,26,829
1893-94	474,635	3,14,65,300	378,399	2,50,52,839	96,236	64,12,461	...	...

The value of the metal tendered for coinage in the Calcutta Mint was Rs. 29,720, but no gold was coined during the year. In the Bombay Mint no gold was tendered for coinage or coined during the year.

3. *Imports and coinage : Silver.*—The net imports of silver during the year exceeded the net imports in 1892-93 by 8,805,461 ounces, and this although the imports of 1892-93 were exceptionally large, having been exceeded only three times during the last half century, and although the mints were closed to the coinage of silver for the public before the end of the first quarter of the year. The following figures show the net imports into India, the imports into Calcutta and Bombay being given separately, and the amounts tendered for coinage in each mint during the last two years. These amounts do not include the silver of the Exchange Banks referred to in the next paragraph, that silver having been taken over by Government specially and not tendered under the law :

Year.	Net Imports.						Amount tendered for coinage.	
	All India.		Calcutta only.		Bombay only.		Calcutta.	Bombay.

4. The following statement shews the coinage of the last three years :

	1891-92.	1892-93.	1893-94.	Decrease in 1893-94.
	Rs.	Rs.	Rs.	Rs.
Calcutta	1,47,90,202	2,99,80,183	82,10,146	2,17,70,037

Total ...	5,55,39,738	12,69,15,264	4,81,25,001	7,87,90,263

The mints having been closed to the coinage of silver for the public on the 26th June, the coinage of silver in the two mints was only about 38 per cent. of that of the previous year, being smaller by Rs. 7,87,90,263. That there was even as much silver coined as is shewn in the returns is due to the

fact that a considerable quantity imported by the Exchange Banks and landed in India subsequent to the closure of the mints was accepted by the Government on special terms and used for coinage. This quantity produced an outturn of Rs. 1,91,87,250.

5. *Total coinage : Gold and Silver.*—The value of the total coinage of gold and silver in each mint during the last five years is as follows :

Year.	Gold.		Silver.		Total of gold.	Total of silver.
	Calcutta.	Bombay.	Calcutta.	Bombay.		
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.

* Struck as samples and kept in stock.

6. *Silver tendered for coinage by the Currency Department.*—The silver transferred to the Mint by the Currency Department in exchange for mint certificates exceeded that received from the public by Rs. 42,71,956, but this does not take into account the silver, tolas 1,91,87,250, purchased from the Exchange Banks subsequent to the passing of Act VIII of 1893. The amount transferred in 1893-94 was less than that transferred in 1892-93 by Rs. 9,54,35,416. Of this decrease, Rs. 2,08,38,739 was in Calcutta and Rs. 7,45,96,677 in Bombay, the value of the metal transferred to each mint during the year being Rs. 55,93,814 and Rs. 2,09,94,332 respectively compared with Rs. 2,64,32,583 and Rs. 9,55,91,009 in 1892-93.

7. *Description of silver received in the mints.*—The following statement shows the description of silver received in the two mints during the year :

Description of silver tendered.	Bombay. Weight of silver presented at the Mint.	Calcutta. Value of certificates issued.
	Tolas.	Rs.

Native coins { Broach rupees	1,000	...
Clipped and drilled British Indian Government rupees	1,000	...
TOTAL ...	3,32,11,000	36,28,199

8. *Recoinage of old coin.*—The value of the uncurrent and defaced silver coin received from Government treasuries and departments during the year was Rs. 21,00,394 in the Calcutta Mint and Rs. 7,31,816 in the Bombay Mint compared with Rs. 18,88,739 and Rs. 1,86,608 respectively in the preceding year, showing an increase of Rs. 2,11,655 in Calcutta and of Rs. 5,45,208 in Bombay.

The receipts in the Calcutta Mint consisted chiefly of 15,30,000 shroff-marked coins from the Ambala, Delhi, Lahore, Madras, and other treasuries ; 2,72,100 Farakabad rupees paid into the Ambala Treasury by the Patiala State ; 2,70,900 worn and defective coins from the Madras, Delhi, Lahore, Allahabad, and other treasuries ; and 12,588 soldered coins and coins fraudulently reduced in weight received from State Railways.

The receipts in the Bombay Mint included 198,167 shroff-marked, light, soldered, and dumb rupees, 29,425 Portuguese Indian coin withdrawn from circulation and remitted to the Mint, 10,183 Syasi coins received from the Treasury Officer, Baroda, and treasure trove silver coins of the value of Rs. 215 received from the Bombay Branch of the Royal Asiatic Society. The Mint Master also received from the Political Agent, Bikanir, under the Native Coinage Act, 4,93,826 old Bikanir rupees and 3,29,800 old British Indian Government rupees in payment of the balance of new Bikanir rupees held by the Mint. Of these 3,29,800 Government rupees, 17,716 were found on weighment at the Mint to be below the legal remedy and were melted up, the remainder being sent to the Branch Reserve Treasury.

9. *Copper coinage.*—The nominal value of the coinage was Rs. 12,95,086 compared with Rs. 13,11,186 in 1892-93, showing a decrease of Rs. 16,100, due to no coinage having been executed for other Governments during the year. The value of the coinage executed for the Government of India, however, exceeded that of 1892-93 by Rs. 1,21,400, made up by an increase of Rs. 1,23,549 in pice and Rs. 17,426 in half-pice, and a decrease of Rs. 19,575 in pie-pieces.

16,371 maunds of copper were purchased for coinage during the year at an average rate of Rs. 29·031 per maund, 22,926 maunds having been purchased at an average rate of Rs. 30·8 per maund in the preceding year.

10. *Gain on copper coinage.*—The gain on copper coinage passed into circulation during the last five years is shown below :

	Rs.
1889-90	7,95,992
1890-91	6,64,192
1991-92	8,38,308
1892-93	3,78,929
1893-94	5,08,167

11. *Operative losses*—

(*a*) *Silver.*—After making corrections for fictitious losses and gains, the operative losses for melting and coining in 1893-94 amounted to Rs. 20,502 in Bombay and to 3,463 tolas in Calcutta, giving an average rate of Rs. 35·47 per lakh rolled in Bombay and Rs. 25·7 per lakh in Calcutta compared with Rs. 32·7 and Rs. 28·6 respectively per lakh rolled in 1892-93. But on account of the difficulty experienced in applying accurately the corrections for fictitious losses and gains, the Mint Masters are of opinion that it would be safer to estimate the rate of loss at from Rs. 33 to 38 per lakh in Bombay and 24 to 28 tolas per lakh in Calcutta.

(*b*) *Copper.*—17,586·4 maunds of copper were operated on during the year, and the loss incurred in the coinage amounted to 235·2 maunds, or at the rate of 1·3375 per cent., which is a shade better than last year, when the rate arrived at was 1·3612 per cent. But taking bye-products into account, the loss was entirely wiped out. The percentage of good coin obtained from the weight of metal operated on was also better than in 1892-93.

12. *Revenue and expenditure.*—The revenue and expenditure of the two mints in each of the last five years are shown below :

Year.	REVENUE.							EXPENDITURE.		
	SEIGNORAGE.			OTHER RECEIPTS.			TOTAL.			
	Calcutta.	Bombay.	Total.	Calcutta.	Bombay.	Total.		Calcutta.	Bombay.	Total.

13. The total revenue of both the mints in 1893-94 exceeded the total expenditure by Rs. 23,223, and the net result of the last five years' transactions shows a profit of Rs. 3,67,330. The increase under the head "Other receipts" represents mainly the difference between the price paid to the Exchange Banks for the silver purchased from them by Government and the outturn of the metal in rupees.

14. The expenditure on salaries and establishments in the two mints was less than in 1892-93 by Rs. 10,420, as shown in the following statement :

	CALCUTTA.			BOMBAY.			BOTH MINTS.		
	1892-93.	1893-94.	Increase + Decrease −	1892-93.	1893-94.	Increase + Decrease −	1892-93.	1893-94.	Increase + Decrease −
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Fixed establishment	1,88,792	2,08,426	+19,634	2,12,713	2,03,625	−9,088	4,01,505	4,12,051	+10,546
Temporary establishment	86,687	83,429	−3,258	61,937	44,229	−17,708	1,48,624	1,27,658	−20,966

15. The increase under "Fixed establishment" in the Calcutta Mint was chiefly on account of acting allowances drawn by the Mint and Assay Masters and the members of their respective establishments. The decrease under the same head in the Bombay Mint was due to the salary of the acting Mint Master being less than that of the permanent incumbent. The expenditure under this head in both mints has also been increased by the grant of exchange compensation. Under temporary establishment the decrease in both mints was due to the smaller coinage of the year.

16. *Local and English stores.*—The expenditure on stores in the Calcutta and Bombay Mints during the year was respectively Rs. 1,28,366 and Rs. 57,217 compared with Rs. 1,14,030 and Rs. 1,32,038 in 1892-93. The expenditure in the Calcutta Mint includes the value (Rs. 44,750) of boilers, cutting presses, rollers, etc., transferred to the account of plant in the capital account; but, if this item were excluded, the expenditure of the year on stores would fall to Rs. 83,616, which, compared with the corresponding expenditure (Rs. 96,877) of 1892-93, shows a saving of Rs. 13,261 on the expenditure under this head during the year. The decrease in the Bombay Mint occurred under all descriptions of stores, and was due to the smaller coinage.

17. *Pro formâ charges.*—These indirect charges in the two mints compare with those of the preceding year as follows :

	CALCUTTA.			BOMBAY.			BOTH MINTS.		
	1892-93.	1893-94.	Increase + Decrease −	1892-93.	1893-94.	Increase + Decrease −	1892-93.	1893-94.	Increase + Decrease −

The large decrease under the head "Interest" was chiefly due to the smaller silver bullion balances awaiting coinage during the year.

18. *Miscellaneous work.*—The cost of the miscellaneous work done in the two mints, the amount realised on that account, and the profit made thereon during the last two years is tabulated in the following statement :

	Calcutta.			Bombay.			Both Mints.

The miscellaneous work in the Calcutta Mint consisted chiefly of the manufacture of gold, silver, and bronze army medals, clasps, and stars, brass washers, and Army Temperance Association decorations.

19. *Capital account.*—The capital account of the Calcutta Mint was increased by Rs. 44,750 on account of new machinery and Rs. 12,250 on account of new buildings, but it was decreased by Rs. 23,690 on account of old and unserviceable machinery written off, the balance of the account at the close of the year being Rs. 77,08,708. The balance of the Bombay Mint capital account stood at Rs. 37,93,678 at the end of the year.

20. *Offences against the coinage.*—In 1893 there were 746 cases brought to trial, 893 persons tried, and 493 persons convicted for offences against the coinage compared with 846 cases brought to trial, 1,005 persons tried, and 650 convicted in the preceding year. As usual the largest number of cases were for possessing and delivering counterfeit and altered coin, 758 persons having been tried and 424 convicted on these charges against 866 persons tried and 551 convicted in the preceding year. On the charge of actually counterfeiting coin there was also a decrease during the year, as the following figures show :

	Number of cases brought to trial.	Number of persons tried.	Number of persons convicted.

II.—Working of the Assay Offices.

21. *Number of assays made—*

(*a*) *Gold.*—The total number of gold assays made in Calcutta during the year was 2,714 compared with 3,273 in 1892-93. Of these, only 57 were assays made for the Mint on certain parcels of gold tendered for coinage up to the 23rd June, and on small meltings of gold filings, etc.

(*b*) *Silver.*—The number of silver and miscellaneous assays made in Calcutta was 8,170 and in Bombay 22,056 compared with 19,205 and 50,328 in the preceding year, the decrease in both mints being consequent on the closure of the mints to the coinage of silver for the public.

22. *Assays of bullion alligated to standard.*—The average fineness of silver meltings for coinage was 916·042 in Calcutta against 916·088 in the preceding year. In Bombay the average fineness for the last two years was as follows :

	Rupees.	Half-rupees.	Quarter-rupees.	One-eighth-rupees.
1892-93 ...	916·77	915·95	915·80	915·78
1893-94 ...	916·01	915·92	915·65	915·58

23. *Parting assays of silver coins.*—The average proportion of gold found in the silver pyx coins at the Calcutta Mint for the year was 0·274 per mille compared with 0·177 per mille in 1892-93, the whole silver coinage of the Mint being computed to have contained about 842 troy ounces of fine gold, valued at about £3,570, compared with 1,998 troy ounces, worth £8,473, estimated to have been contained in the silver coinage of the previous year. In the Bombay Mint the average proportion of gold found in the silver pyx coins of the year was ·097 per mille compared with ·066 per mille in 1892-93.

24. *Pyx trials of silver coins.*—There were 67 trials for weight in the rupee coinage of the Calcutta Mint during the year. The total number of coins weighed was 670, of which the lightest coin weighed 178·93 grains and the heaviest 180·80 grains, the average weight of all the pyx rupees being 179·900 grains, 12·09 per cent being of the exact standard weight of 180 grains. In one trial a single coin was found to be beyond the legal remedy in weight, but a second pyx from the lakh of pieces under trial did not reveal any faulty coin. In Bombay the average weight of the rupee coinage taken over 7,160 coins was the same as that obtained in 1892-93 over 18,640 coins, namely, 180·025 grains, and none were found beyond the legal remedy.

25. The trials for fineness of the rupee coinage in Calcutta were 58 in number, 580 coins having been assayed singly and 1,160 in groups of 20 after melting. Of the coins assayed singly, the extreme variations in fineness ranged from 915·1 to 918·5, and the average fineness of the 580 coins assayed singly proved to be 916·520. The 1,160 coins assayed in groups gave an average fineness of 916·701, the lowest and highest figures obtained being 916·4 and 917·1.

26. In Bombay 1,790 rupees were assayed singly, and gave an average fineness of 917·138 and 8,950 in melted pyx, and the average fineness taken over the total number of 10,740 coins was found to be 917·087 for the year. One pyx during the year had to be retried, but no lakh had to be remelted. The following statement compares the results of the pyx trials of the two mints for the last two years :

27. *Pyx trials in England.*—The examination by the Deputy Master of the Royal Mint in London of the pyx coins of the Indian mints for the year 1892-93 shows that, as usual, " the standard weight and fineness of the coins have been maintained with accuracy."

28. *Reference standards.*—In Calcutta the mint working standard sets of tola and avoirdupois weight pieces were verified during the year, and the quinquennial reverification of the various sets forming the Assay Office working standards was carried out during January, February, and March 1894. In Bombay the Mint and Assay Office working standards were verified by comparison with the iridio-platinum standards received last year from England. The Government of India note that the Assay Master, Calcutta, has printed for the instruction of probationers an account of the methods adopted in his office for the verification of weights.

29. The Governor General in Council acknowledges the efficiency with which the Mints and Assay Departments have been worked and controlled by the officers in charge.

ORDER.—Ordered, that this Resolution be published in the *Gazette of India*.

Ordered also, that copies of the Resolution be forwarded to the Mint Masters, Bombay and Calcutta (with printed copies of the two reports on the working of the Mints), and to the Assay Masters, Bombay and Calcutta (with printed copies of the two reports on the working of the Assay Departments).

No. 253.—The following Rules for Quarantine against plague which have been made by the Bombay Government in exercise of the power conferred by section 1, Act I of 1870, with the previous sanction of the Governor General in Council, are published for general information.

The Rules have effect from the 23rd July 1894, as a temporary measure, in the ports of Aden, Perim and the Somáli Coast:

I.—The Commander of every vessel, including buggalows or other native craft, arriving at Aden, Perim, and Somáli Coast ports from the Arabian Red Sea Coast from Lith to Lohayya shall, before entering the harbour, hoist a yellow flag (or, if entering a port at night time, show whatever quarantine light signals are customary in the port) and indicate by signal the port from which such vessel has come, and shall keep such flag and signals flying until permitted to take them down as hereinafter provided. The pilot on going alongside the vessel shall direct the flag prescribed above to be hoisted, if it has not already been done.

II.—Such Commander shall not, without first having obtained permission as hereinafter provided, allow any communication, except orally, with the shore or any other vessel or boat, excepting with the boat supplying pilots, and in that case communication shall be limited to receiving on board the pilot, his servant, and baggage.

III.—On any such arrival being signalled, the Health Officer of the Port shall, as soon as possible, go alongside the vessel and ascertain by enquiry from the Commander whether any person on board is suffering, or has during the voyage suffered, from plague; and if the Health Officer is satisfied by such enquiry that no person on board is suffering, or during the voyage has suffered, from plague, and if the ship carries a qualified Medical Officer, quarantine shall be dispensed with, and pratique granted.

If the vessel does not carry a qualified Medical Officer, he shall direct the Commander to take the vessel to the quarantine anchorage duly appointed and notified by the Resident, and there to remain for a period of eight clear days from the date of arrival in the harbour. The Health Officer shall also direct the Commander to prohibit, during the period for which the vessel remains at the quarantine anchorage as aforesaid, all communication, except such as is hereinafter provided for, between such vessel and the shore or other vessels and boats in the harbour.

IV.—If the Health Officer, as the result of the enquiry made under paragraph III above, shall have reason to believe at the time when the vessel arrives in the harbour that any person on board is suffering, or during the voyage has suffered, from plague, he shall direct the Commander to take the vessel to the quarantine anchorage as aforesaid, and there to remain for a period of fifteen days from the day of arrival in the harbour; and shall further direct that during such fifteen days intercourse between the said vessel and the shore or other vessels and boats in the harbour shall be prohibited as provided in Rule III.

V.—If during the period a vessel is at the quarantine anchorage aforesaid any case or cases of plague should occur on board, the said vessel shall remain in quarantine for a period of fifteen days from the date of termination of the last case either by death, recovery, or removal from the vessel, and be subject to all the prohibitions provided for in Rules III and IV.

VI.—When any vessel has been placed in quarantine as aforesaid, the Health Officer may direct the removal of so many of the passengers and crew as may not be suffering from illness, and whose services may not be required on board the vessel, to such particular spots as may from time to time be selected by the Resident as places of quarantine, there to remain for a period of eight days, or, if the vessel has been placed in quarantine for fifteen days, for a period of fifteen days. If a case of plague occurs among such passengers and crew during any such period, they shall remain in a place of quarantine for a period of fifteen days from the date of the occurrence of the last case of such illness.

VII.—Any mails or cargo which may be brought by any vessel so arriving shall be landed under such precautions as the Health Officer may deem necessary to prevent the spread of the disease.

VIII.—It will be the duty of the Port Officer to facilitate the conveyance to all vessels in quarantine of such supplies of provisions, stores and other articles as may be required by those on board. Such supplies will be placed on the boats of the vessels in quarantine, to be subsequently removed by members of their crews.

IX.—All vessels arriving at Aden, Perim and the Somáli Coast, which may have communicated with vessels coming from the Arabian Red Sea Coast from Lith to Lohayya, shall be subjected to the same rules as vessels arriving at Aden, Perim and the Somáli Coast from the Arabian Red Sea Coast from Lith to Lohayya.

5. The operations of the Department during the year under review are satisfactory. The Revenue receipts amounted to Rs. 80,07,306, being an increase of Rs. 4,24,132 over the figures for the previous year. The Revenue expenditure amounted to Rs. 53,04,761, being an increase of Rs. 1,47,763. The net receipts thus amounted to Rs. 27,02,545, showing an increase of Rs. 2,76,369. The Revenue receipts include Rs. 11,51,145 on account of State messages and Rs. 88,780 on account of news-free and other *pro formâ* revenue. The receipts on account of State messages may properly be included in estimating the return on capital outlay of the Department; but, as stated in the review of the Report for 1891-92, the *pro formâ* revenue should not be so included. Exclusive of the *pro formâ* revenue, the net receipts amounted to 4·61 per cent. on the Capital outlay.

6. The revenue Receipts are made up as follows:

	Rs.
Message revenue, including State messages	60,70,960
Rent of lines, &c., on railways and canals	15,93,402
Rent of private lines, &c.	2,02,132
Sale of books, gazettes, &c.	18,007
Miscellaneous	34,025
Total ...	79,18,526
News-free and *pro formâ* revenue	88,780
GRAND TOTAL ...	80,07,306

7. The following statement summarises the Revenue receipts and charges during the last five years:

Year.	Gross receipts, excluding *pro formâ* revenue.	Charges.	Net receipts.	Percentage of net to gross receipts.	Dividend on capital.

8. The following figures show for the last two years the division of the traffic between State and Private and between Inland and Foreign messages respectively:

Class of telegrams.	1892-93.		1893-94.	
	No.	Value.	No.	Value.
		Rs.		Rs.

GRAND TOTAL ...	3,981,411	57,67,950	4,184,790	60,70,960

It is noticed with satisfaction that the private traffic continues to exhibit rapid progress. In the year under review there is a rise of 208,746 in the number of private messages and of Rs. 4,03,668 in their value.

The State Inland telegrams exhibit a decrease of 5,898, or ·98 per cent. in number, and of Rs. 1,09,416, or 9·12 per cent. in value. The decrease is attributed partly to the deferred service being found to be sufficiently expeditious for most State purposes and partly to the absence of Military operations.

The number of private Inland telegrams increased by 194,480 and their value by Rs. 1,63,726, equivalent to 6·85 and 5·67 per cent. respectively.

In Foreign Private telegrams there is an increase over the figures for the previous year of 14,266 in number and of Rs. 2,39,942 in value.

The revenue from trans-Indian traffic, which suffered a considerable diminution in the two preceding years owing to reduction in rates for transit across India, exhibits a satisfactory rise to Rs. 7,09,681 in the year under review, thus nearly approaching the figure of Rs. 7,31,553 at which the revenue stood in 1890-91, prior to the change in the transit rates.

9. The following table gives the percentages of traffic in number and value due to each class of message:

Class of telegram.	Inland.		Foreign.		Total.	
	No.	Value.	No.	Value.	No.	Value.
		Rs.		Rs.		Rs.
State	14·30	17·95	·16	1·01	14·46	18·96

TOTAL ...	86·75	68·23	13·25	31·77	100·00	100·00

10. The following figures show the division of the Inland traffic into the three classes of Urgent, Ordinary, and Deferred during the last two years:

	Percentages.					
	Urgent.		Ordinary.		Deferred.	
	1893-94.	1892-93.	1893-94.	1892-93.	1893-94.	1892-93.
State	9·74	11·66	19·95	19·00	70·31	69·34

Press	4·85	5·41	22·46	22·70	72·69	71·89

11. The growth of Inland private traffic in a period of ten years is shown by the following figures:

	Number of messages.	Value. Rs.
1884-85	1,364,814	15,04,633
1893-94	3,031,993	30,52,291
Increase	1,667,179	15,47,658

During the ten year period the number of messages has increased by about 122 per cent. and their value by over 102 per cent.

12. The following statement gives the distribution of the revenue charges during the last five years under the principal heads:

Year.	Line maintenance.				Signalling.			
	Establishment.	Repairs to lines and buildings.	Office stores and miscellaneous.	Total.	Establishment.	Repairs to buildings.	Office stores and miscellaneous.	Total.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
1889-90	8,22,820	3,03,351	60,851	12,86,222	30,15,465	64,818	1,69,941	32,30,224

1893-94	9,75,007	4,37,270	63,623	14,75,900	35,31,694	56,038	2,41,129	38,28,861

13. The strength of the signalling establishment amounted at the close of the year to 3,207, of whom 1,647 were departmental officers, 317 British military signallers, and 1,222 postal clerks.

14. The speed of transmission of messages over the principal main routes has been well maintained. There is a marked improvement in speed between Calcutta and Rangoon owing to the Melhuish transformer apparatus having been in use on these circuits throughout the year, and the improvement in speed on the Calcutta-Madras circuits is attributed partly to the same cause and partly to the high state of efficiency into which the lines have been brought.

The number of complaints received relating to the Indian Telegraph Department was 1,393, equivalent to 0·03 of the total number of messages, of which 881 were admitted. Of those admitted, 177 applied to non-delivery, 209 to delay, and 296 to mistakes. The number of messages that for various causes could not be delivered amounted to 14,395, equivalent to 0·289 of the total number received for transmission.

15. The total number of interruptions to communications amounted to 2,216, which shows a slight increase over the previous year; the total duration of the interruptions was also greater.

16. The number of telegraphic money orders rose to 115,440 from 107,256 in the previous year.

On the 1st May 1893, the exchange of telegraphic money orders with Ceylon was commenced, and in addition to the figures given above, 281 orders were sent and 1,668 received.

17. The Inland Press telegrams sent numbered 26,340, of the value of Rs. 1,01,826, against 25,834 valued at Rs. 95,088 in the previous year.

The Foreign Press messages numbered 3,255, and the Indian share of the charges thereon amounted to Rs. 16,896.

18. As regards electrical improvements, Mr. W. F. Melhuish's apparatus for long distance telegraphy has fulfilled the expectations which were formed of it. The apparatus has been largely brought into use, resulting already in a reduction of establishment of 3 telegraph masters and 57 signallers, representing approximately a saving of Rs. 64,000 per annum. Towards the close of the year under review Mr. Melhuish succeeded in showing that the auxiliary effect produced by his apparatus in the case of duplex working was also beneficial in quadruplex working, and at the close of the year a circuit so fitted up was opened and satisfactorily worked between Calcutta and Agra, a distance of 841 miles.

19. The use of the telephone continues to show satisfactory progress. At the end of the year 1893 there were 1,360 subscribers and 1,380 exchange connections to the Telephone Companies at Bombay, Calcutta, Kurrachee, Madras, Moulmein and Rangoon. There were also 26 exchanges and 205 exchange connections under the control of the Telegraph Department.

20. The construction of the Kashmir telegraph line from Srinagar to Astor was proceeded with, but the severe floods of July 1893 necessitated the working party being broken up before the line was completed in a permanent manner.

21. The Administration Report was received from the Director General of Telegraphs on 13th August, earlier than on any previous occasion. It has been correctly prepared, and the results which it exhibits are highly satisfactory and creditable to the administration of the Director General and the working of the staff of the Department.

The Government of India have much pleasure in taking this opportunity of recording their approbation of the progress exhibited in all branches of the Department, and of the smoothness of its working under Mr. Brooke's direction.

They also recognize with satisfaction the skill and ingenuity of Mr. Melhuish, whose improvements in electrical apparatus have resulted in considerable saving to the State and increased speed in the transmission of messages; and are further pleased to endorse the commendation accorded by the Director General to the other officers specially mentioned in his report.

ORDER.—Ordered, that a copy of this Review and of the Report, be forwarded to the Secretary of State and to the Local Governments and Administrations noted on the margin, and to the Government of Ceylon, for information. REGULATIONS.

*** *The following Regulations, made by the Secretary of State for India in Council, are liable to alteration from year to year:*

1. An Examination for admission to the Civil Service of India, open to all qualified persons, will be held in London in August of each year. The date of the Examination and the number of appointments to be made for each Province will be announced beforehand by the Civil Service Commissioners.

2. No person will be deemed qualified who shall not satisfy the Civil Service Commissioners:—

(i.) That he is a natural-born subject of Her Majesty.

(ii.) That his age will be above twenty-one years and under twenty-three years, on the 1st April, in the year in which the Examination is to be held.

[*N.B.—In the case of Natives of India it will be necessary for a Candidate to obtain a certificate of age and nationality signed, should he be a resident in British India, by the Secretary to Government of the Province, or the Commissioner of the Division within which his family resides, or should he reside in a Native State, by the highest Political Officer accredited to the State in which his family resides.*]

(iii.) That he has no disease, constitutional affection, or bodily infirmity unfitting him, or likely to unfit him, for the Civil Service of India.

(iv.) That he is of good moral character.

3. Should the evidence upon the above points be *primâ facie* satisfactory to the Civil Service Commissioners, the Candidate, on payment of the prescribed fee, will be admitted to the Examination. The Commissioners may however in their discretion at any time prior to the grant of the Certificate of Qualification hereinafter referred to, institute such further inquiries as they may deem necessary; and if the result of such inquiries, in the case of any Candidate, should be unsatisfactory to them in any of the above respects, he will be ineligible for admission to the Civil Service of India, and if already selected, will be removed from the position of a Probationer.

(3) Candidates who fail to obtain this Certificate, but who gain a Certificate of minimum proficiency in riding, will be allowed to proceed to India, but will be subjected on their arrival to such further tests in riding as may be prescribed by their Government, and shall receive no increase to their initial salary until they have passed such tests to the satisfaction of that Government. A Candidate who fails at the end of the year of probation to gain at least the Certificate of minimum proficiency in riding, will be liable to have his name removed from the list of Selected Candidates.

11. The selected Candidates who, at the Final Examination, shall be found to have a competent knowledge of the subject specified in Regulation 9, and who shall have satisfied the Civil Service Commissioners of their eligibility in respect of nationality, age, health, character, and ability to ride, shall be certified by the said Commissioners to be entitled to be appointed to the Civil Service of India, provided they shall comply with the regulations in force, at the time, for that Service.

The Civil Service Commissioners are authorized by the Secretary of State for India in Council to make the following announcements :—

(i.) *Selected Candidates will be allotted to the various provinces upon a consideration of all the circumstances, including their own wishes; but the requirements of the Public Service will rank before every other consideration.*

(ii.) *An allowance amounting to £100 will be given to all Candidates who pass their probation at one of the Universities or Colleges which have been approved by the Secretary of State,* viz., *the Universities of Oxford, Cambridge, Dublin, Glasgow, Edinburgh, St. Andrew's, and Aberdeen; Victoria University, Manchester; University College, London; and King's College, London; provided such Candidates shall have passed the Final Examination to the satisfaction of the Civil Service Commissioners, and shall have conducted themselves well and complied with such rules as may be laid down for the guidance of Selected Candidates. The whole probation must ordinarily be passed at the same Institution. Migration will not be permitted except for special reasons approved by the Secretary of State.*

(iii.) *The allowance of £100 will not be paid to any Selected Candidate until he has been certified by the Civil Service Commissioners to be entitled to be appointed to the Civil Service of India; and every Certificated Candidate must, before receiving his allowance, give a written undertaking to refund the amount in the event of his failing to proceed to India.*

(iv.) *All Candidates obtaining Certificates will be also required to enter into covenants, by which, amongst other things, they will bind themselves to make such payments as under the rules and regulations for the time being in force, they may be required to make towards their own pensions or for the pensions of their families. The stamps payable on these covenants amount to £1.*

(v.) *The seniority in the Civil Service of India of the Selected Candidates will be determined according to the order in which they stand on the list resulting from the combined marks of the Open Competitive and Final Examinations.*

(vi.) *Selected Candidates will be required to report their arrival in India within such period after the grant of their Certificate of Qualification as the Secretary of State may in each case direct.*

EXAMINATIONS FOR THE CIVIL SERVICE OF INDIA.

Syllabus, showing the extent of the Examination in certain subjects at the Open Competition for admission into the Indian Civil Service in 1895.

ENGLISH COMPOSITION.—An Essay to be written on one of several subjects specified by the Civil Service Commissioners on their Examination Paper.

ENGLISH LANGUAGE AND LITERATURE.—The Examination will be in two parts. In the one the Candidates will be expected to show a general acquaintance with the course of English Literature, as represented (mainly) by the following writers in verse and prose, between the reign of Edward III., and the accession of Queen Victoria:—

Verse—Chaucer, Langland, Spenser, Shakespeare, Milton, Dryden, Pope, Gray, Collins, Johnson, Goldsmith, Crabbe, Cowper, Campbell, Wordsworth, Scott, Byron, Coleridge, Shelley, Keats.

Prose—Bacon, Sir Thomas Browne, Milton, Cowley, Bunyan, Dryden, Swift, Defoe, Addison, Johnson, Burke, Scott, Macaulay (Essays and Biographies).

A minute knowledge of the works of these authors will not be looked for in this part of the Examination, which will, however, test how far the Candidates have studied the chief productions of the greatest English writers *in themselves*, and are acquainted with the leading characteristics of their thought and style, and with the place which each of them occupies in the history of English literature. Candidates will also be expected to show that they have studied in these authors the history of the English language in respect of its vocabulary, syntax, and prosody.

The other part of the Examination will relate to one of the periods named below, which will follow each other year by year in the order indicated—

1. (1895)	A.D. 1800 to A.D. 1832 [Nineteenth Century writers to the death of Scott]
2. (1896)	A.D. 1360 to A.D. 1600 [Chaucer to Spenser]
3. (1897)	A.D. 1600 to A.D. 1700 [Shakespeare to Dryden]
4. (1898)	A.D. 1700 to A.D. 1800 [Pope to Cowper]

The Examination in this part will require from Candidates a more minute acquaintance with the history of the English language and literature, as illustrated in the chief works produced in each period, and will be based to a considerable extent, but by no means exclusively, on certain books specified each year by the Commissioners.* The names

* The books for 1895 are:—
Wordsworth: Sonnets.
Coleridge: Poems.
Byron: Childe Harold.
Lamb: Essays of Elia.
Shelley: Poems.
Keats: Poems.
Cobbett: Rural Rides.

No. 6318-A.—The attention of holders of Government Promissory Notes, who hold them as an investment of more or less permanence, and not for the purpose of immediate sale, is called to the advantages afforded by the system of registration in Book Debt Account.

Registration and issue of Stock Certificate.

2. Government Promissory Notes of the 3½ per cent. loans may, at the option of the holders, be registered in Book Debt Account, non-transferable stock certificates being issued in lieu.

3. Government Promissory Notes intended for conversion into Book Debt must be surrendered either at the Public Debt Office, Bank of Bengal, Madras, or Bombay, or at the Treasury at which interest is payable, together with a written application, forms of which will always be available at the Banks of Bengal, Madras, and Bombay, and may be obtained through the Treasury Officer.

4. The holder will receive in exchange for the consolidated amount of such Notes a stock certificate of the loan to which the Notes appertain, or of any other loan to which he may (subject to the conditions set forth in Notification No. 5288 A., dated 19th October 1894) desire to transfer his holding.

Reconversion into Promissory Notes.

5. A holder of a stock certificate wishing to reconvert the whole or any portion of the sum it represents into Promissory Notes of the relative loan, may do so by tendering it either to the Bank of Bengal, Madras, or Bombay, or at the Treasury at which the interest is payable, endorsed thus:—

"Received in lieu of this stock certificate Government Promissory Notes of ₹ each (together with a new stock certificate for the balance amounting to ₹)."

But Promissory Notes can be issued only in sums of ₹100 or in multiples of that sum.

Sale or transfer of Stock.

6. All sales or transfers of Government stock registered in the Book Debt Account must be made in even hundreds of rupees, and by transfer to be executed in the Books of the Bank by the registered holder or his duly constituted Attorney. Such transfer is exempt from stamp-duty. Deeds of transfer forms can be obtained from the Bank of Bengal, Madras, or Bombay directly or through the Treasury Officer.

7. When the transfer has been duly executed and the original certificate lodged at the Bank, the transferee will receive a new certificate.

8. In cases where only a portion of the stock is transferred, the portion so conveyed will be noted on the back of the original certificate, and the purchaser will receive a certificate for an amount corresponding to the portion transferred.

9. Forms of transfer and of special Powers of Attorney for effecting sales or purchases are always available at the Banks of Bengal, Madras, and Bombay on payment of a trifling fee.

Transfer to London.

10. Proprietors of stock certificates who may be desirous of transferring the whole or any portion of the amount to England can, on application, obtain from the Bank of Bengal, Madras, or Bombay a non-transferable certificate, on production of which at the Bank of England the amount of stock so advised will be registered in the name of the payee and a certificate issued for the same.

Fees.

11. No enfacement or renewal fees will be levied in respect of the issue of stock certificates; but each such certificate issued by the Bank of Bengal, Madras, or Bombay will be chargeable at the rate of one rupee for every ₹5,000 or part of ₹5,000.

12. A fee of four annas per cent. is chargeable on each Note issued in lieu of a stock certificate, if the Note does not exceed ₹100, and of one rupee, if it exceeds that sum.

Payment of Interest.

13. Warrants for the interest due on Registered Debt may be made payable at a Public Debt Office or at any Government Treasury.

14. In the absence of any special arrangement, the interest warrant will, if payable at the Public Debt Office, be delivered, on or after due date, to the Registered Proprietor or his Agent or to the bearer of a letter from either of them on personal application for it. If it is payable at a Treasury, it will be sent to such Treasury, and will be similarly delivered by the Treasury Officer to the Registered Proprietor or his Agent or to the bearer of a letter from either of them.

15. But, if preferred, the warrant will be sent by post to the Registered Proprietor or his Agent at any address mentioned in a written application which may be made once for all, and will be acted upon until it is revoked.

16. The warrants will be paid on presentation at the Public Debt Office or the Treasury, as the case may be.

Form of Certificate.

17. The form in which stock certificates will be issued under this Notification is printed below.

18. This Notification supersedes paragraph 1 of the Notification of this Department, No. 4565 A., dated the 20th October 1893.

PART I.

GENERAL REVIEW.

PRELIMINARY.

In accordance with the Statutory Rules for the discussion of the Financial Statement of the Governor General in Council, I have caused a printed copy of the Financial Statement of 1894-95 to be delivered to each Member; and I proceed to submit to the Council the explanations I desire to offer with reference to it. Following the example set last year by Sir David Barbour, the prescribed Financial Statement will form the Second Part of the published compilation, and will set forth and explain in detail the various figures of the receipts and outgoings of the Government, being intended both for the information of the public, and as a permanent official record of the financial arrangements and prospects of the current and the approaching year. My accompanying explanation, which will form the first part of the compilation, is intended to give Honourable Members a more general view of the accounts and estimates, leaving fuller information regarding the details to be sought for in the more elaborate compilation, which has been printed and distributed in accordance with the rules.

2. I have so recently had occasion to lay before Honourable Members a review of our recent and present general financial position that I am to a certain extent discharged from the obligation to look on this occasion beyond the figures of the three years, the finance of which I have to explain, *viz.*, the past year, the current year and the coming year. I do not think that any Finance Minister has yet had the evil fortune to present figures which for all three years shew a deficit of Revenue, but I shall not waste the time of the Council in again going over the ground covered by the statement I laid before them three weeks ago, and bemoaning the adverse fate which a continually dwindling Rupee imposes upon us. I pass at once to the consideration of the accounts and estimates which it is my duty to explain.

ACCOUNTS, 1892-93.

3. The accounts of 1892-93, as finally made up, shew a deficit of Rx. 833,412, as compared with the deficit in the Revised Estimate of Rx. 1,081,900. The improvement, which amounts to Rx. 248,488, is composed of a number of small differences scattered over both the Revenue and Expenditure heads, none of which are large enough to require particular mention. In short, the Revised Estimate presented to the Council twelve months ago represented as accurately as an estimate could be expected to do the outturn of the year. The accounts were made up at an exchange a little less than 1*s.* 3*d.* per rupee; the total amount of Council Bills drawn during the year being £16,532,215 at the average rate of 1*s.* 2·985*d.*

4. The usual appropriation report, containing the Comptroller and Auditor General's review and comparison of the estimates and accounts of the year, was published in last week's *Gazette of India;* and with it the year's accounts are consigned to past history.

5. As compared with the Revised Estimates for 1892-93, which we have seen were very accurately justified by the final figures, the Budget Estimate of 1893-94 provided under *Revenue* heads for better Land Revenue Rx. 299,600, worse Opium Revenue Rx. 650,300, worse Salt Revenue Rx. 60,800, better Railway Revenue Rx. 487,500, and a number of minor differences. In the aggregate the difference was a difference for the worse of Rx. 15,500.

6. The Revised Estimates of 1893-94 shew that we have had a very favourable Land Revenue year, even after taking into account the fact that Rx. 207,200 of the increase comes in, in Madras and Bombay, by deduction from, or charge to, other heads. The return is about 25½ crores, whereas we have never yet come up to 25, and is Rx. 335,100 in excess of Budget. But, on the other hand, the loss of Opium Revenue is by Rx. 621,800 greater than anticipated, and whereas the lowest figure recorded for many years has been Rx. 7,879,182, we this year estimate to receive only Rx. 6,694,400. The loss under Salt Revenue has been much greater than anticipated, being Rx. 241,600 as compared with Budget Estimates. On the other principal Revenue heads taken together there has been a gain as compared with Budget of Rx. 252,000. Railways have done extremely well during the year, the Revenue being taken at Rx. 654,800 better than Budget, and more than a crore better than last year.

7. These differences and a number of minor ones give us a net improvement of Rx. 423,800 upon the Budget Estimates on the Revenue side,* of which Rx. 104,900 goes to Provincial account, leaving Rx. 318,900 for Imperial.

8. The Budget Estimates of the year were for a deficit of Rx. 1,595,100 upon the year's account. With the improvement of Revenue which I have noticed, our Expenditure if kept within estimate would have brought out at the end of the year a deficit of only Rx. 1,276,200. Our deficit, however, stands at Rx. 1,792,800, or Rx. 516,600 greater than this figure. And indeed, as a short opium crop has saved us Rx. 370,100 on our estimated opium payments, I have really to explain Rx. 886,700 of excess of Expenditure over Estimate in 1893-94.

9. The only heads of *Imperial Expenditure in India* which shew any noteworthy excess of Expenditure over Estimate are Interest on Debt (Rx. 159,500), Working Expenses of State Railways (Rx. 151,500), and the Army Expenditure (Rx. 318,300). The excess under the first represents for the most part the discount on the Loan raised in August, which amounted to Rx. 133,000. The excess Expenditure under the second arises in connection with the larger traffic already referred to. Of the Army Expenditure Rx. 263,500 is due to Exchange Compensation Allowances: there has also been expenditure in excess of the Budget Grants of Rx. 21,500 for certain special military and political operations, of Rx. 48,100 for special expenditure in connection with the Gilgit Agency, and Rx. 26,700 for special purchases of horses and mules: on the other hand, savings are anticipated from some of the Budget Grants.

We have saved Rx. 89,000 by short Expenditure upon Special Defences.

10. The items I have mentioned account for excess Imperial Expenditure in India of Rx. 540,300. The smaller differences result in a net saving of Rx. 26,600 and the real excess in the total figures, after allowing for Opium, is Rx. 513,700. So that we have saved more than enough, in minor differences over the rest of the account, to pay for the Exchange Compensation Allowances to non-military officers. These were not included in the Budget, but are estimated at Rx. 137,800 under the non-military heads.

* I neglect for present purposes the fact that about Rx. 30,000 of this is due to the operation in 1893-94 of the New Tariff Act.

11. The *sterling expenditure* account compared with Budget Estimate shews £104,100 excess payments under Interest; excess marine charges £27,300; short charges for special defence works £66,000, giving, with a few smaller differences, a net excess of £65,800.

12. The *exchange* upon the expenditure was estimated, at 1*s.* 2¾*d.*, to cost Rx. 9,935,900; it is now estimated at Rx. 307,200 more.

13. Adding together these items, the deterioration which I have explained on the expenditure side amounts to the figure above stated, namely—

	Rx.
Imperial Expenditure in India	513,700
Sterling Expenditure	65,800
Exchange	307,200
TOTAL	886,700

and leaves the year's account in deficit by Rx. 1,792,800.

14. I ought to mention as a matter of some public interest in connexion with the estimates of 1893-94, that the Royal Commission on Opium is expected to cost in India about Rx. 20,000, and in England about £1,500; of these amounts, half will be charged to Indian Revenues. The smallness of the expenditure is for the most part due to the fact that the Commissioners (except the one who was placed on the Commission as an officer of the Government of India) neither required nor received any remuneration for their services, being determined that their laborious task should cost as little as possible to the people of India.

BUDGET ESTIMATES, 1894-95.

15. In explaining the Budget Estimates for 1894-95 I ask the Council first to go back to my statement that the Revenue in the Revised Estimates of 1893-94 falls short of the Budgetted Expenditure of that year by Rx. 1,276,200. Our revenue of the coming year is largely estimated upon the basis of the Revised Estimates of the current year, and I propose first to shew, as compared with those Revised Estimates, what additional Revenue under the same heads we may expect to come into our account during the year 1894-95.

16. First, under the principal *Revenue* heads, the Estimates of Land Revenue show an increase of Rx. 211,300 upon the high figures of 1893-94; and Salt will, we hope, recover from its backward position of the current year, and bring us in an addition of Rx. 283,000. Under both these heads in fact we have some reason to think that certain short collections of February and March 1894 will come into the accounts of April or May, that is of 1894-95. On the other hand, we do not think it safe to take Opium at even the figure of 1893-94; our realisations are necessarily affected by the adverse exchange arising out of the low price of silver, and we estimate a falling-off of Rx. 300,800. The remaining principal heads show some increases and some decreases, but on the net account a decrease of Rx. 1,600, giving for this section of the accounts a net increase of Rx. 191,900. To this we have to add the estimated increase in Railways of Rx. 201,900 and in Irrigation of Rx. 144,200; but, on the other hand, we lose Rx. 160,400 under Mint Receipts (by reason of discontinuance of coinage). The net amount of all these is an increase of Rx. 377,600, which, by a number of minor differences under other heads, becomes Rx. 395,400. Of this total amount of increase of our revenues, Rx. 240,300 belongs to the Provincial account, and Rx. 155,100 to Imperial. In respect of Revenue, therefore, we expect on the Imperial account to be better off in the approaching year by only Rx. 155,100, as compared with the Revised Estimates of 1893-94; and the result therefore is that if we had on

our expenditure side merely to meet the same Imperial expenditure that was provided for in the Budget of last year, we would be, with the revenue we anticipate, in deficit by Rx. 1,276,200, less Rx. 155,100, or Rx. 1,121,100.

17. The deficit we will actually have to meet will be this amount *plus* any amount by which the expenditure for which we have to provide in the coming year exceeds that of the Budget Estimates of 1893-94. To find what this addition will be, take first the estimate of *Imperial expenditure in India*. The figures stand as follows:—

Net 105,600

18. The increases and decreases in this statement, which are less than Rx. 50,000, require no remark; they may be described as ordinary variations. The decrease under Interest merely means the transfer of more interest to the Railway Revenue account, the net increase under these two heads, Rx. 294,900, representing the additional working expenses and surplus-profits payments arising in connection with the larger traffic. Under Civil Departments we have a net increase of Rx. 105,600, of which the principal items are Rx. 28,500 under Administration (mostly Exchange Compensation allowance), Rx. 139,800 under Political (additional subsidy to the Amir Rx. 60,000, probable expenditure of demarcation under the treaty Rx. 50,000, Exchange Compensation Rx. 23,400); other increases Rx. 41,600 mostly due to the Exchange Compensation; savings in Police Rx. 26,900 (chiefly in Upper Burma); and savings under Marine Rx. 77,400 (mostly counterbalanced by short receipts).

19. The decrease of Rx. 370,700 under Buildings and Roads is due to economies forced upon us by our present financial condition. We have saved Rx. 194,200 by reducing the grant for Military Works, and Rx. 176,500 by cutting out practically every new work upon the Civil side (under India, General, and in Upper Burma) to which we are not absolutely committed.

20. The Army expenditure shows, as compared with the estimates presented last year, an increase of Rx. 475,700. Of this amount, the variations in pay and allowances which depend upon Exchange, alone account for Rx. 390,100.

For apart from the question of Exchange Compensation, the pay of the British Soldier is fixed in sterling, and the Rupee payment depends upon the rate of exchange annually fixed for the adjustment of transactions with the English Treasury. That rate was for 1894-95 fixed, as usual, upon the basis of the rates actually current in December last (namely 15$\frac{1}{4}$*d.*); but owing to the peculiar circumstances of the year, the rate has been declared "subject to

revision hereafter, should it be deemed necessary, in consequence of the actual rate varying greatly from the official rate for any considerable length of time."

The balance of the excess, or Rx. 85,600, is composed of several items, of which a fuller account is given in the second part of this statement.

21. The *English expenditure* for which we have to provide is, on the whole account, £13,500 less than that of last year. We have an increase on account of interest of £288,500, owing chiefly to the temporary borrowings of which I shall have presently to give an account; on the other hand, there are savings of £33,300 on the Marine charges (as last year's estimates contained some special construction charges); of £12,600 under Territorial Pensions (due to the death of Maharaja Dhulip Singh); of £69,700 under Army charges (a balance between a large saving in Military stores and an increase in non-effective charges); and of £152,100 under Special Defence Works, the expenditure on which is coming to an end.

	— 69,700

	— 34,300
TOTAL	—302,000
NET	— 13,500

The other differences are small, and involve a net decrease of £34,300.

22. The *Exchange* upon our expenditure was in last year's Budget taken at 14$\frac{3}{4}$*d.*, and came to Rx. 9,935,900. This year we take 14*d.* as our rate, and the Exchange comes to Rx. 11,307,400, so that we have an excess expenditure to provide for of Rx. 1,371,500.

23. Now, bringing all these increases of expenditure together, we have, as compared with Budget Expenditure of 1893-94—

	Rx.
In India—Imperial account—increase	444,000
In England, decrease	—13,500
For Exchange, increase	1,371,500
NET INCREASE	1,802,000

24. I have shown that our estimated revenue of 1894-95 falls short of the Budget expenditure of 1893-94 by Rx. 1,121,100; it therefore falls short of our budgetted expenditure of 1894-95 (so far as we have gone) by Rx. 2,923,100.

The difference between this and the 3$\frac{1}{2}$ crores I gave in my Statement of March 1st, is mainly in the reductions we have effected, chiefly under Buildings and Roads, both Military and Civil, in order to meet the shortness of our means.

SPECIAL MEASURES TO MEET THE DEFICIT.

25. This amount then, Rx. 2,923,100, is the deficit which we have to take special measures to meet. The first of these special measures is the re-imposition of Import Duties for which the Council passed a Bill on March 10th. The annual revenue to be obtained by that measure I then stated at Rx. 1,400,000, but the measure was modified in Select Committee by the reduction of the first-proposed duties on iron and steel, and I now put down the revenue at Rx. 1,350,000. I make a deduction of a little over ten per cent. for short collections the first year, and the actual figures passed into the estimates on account of the duties are—

	Rx.
Revenue (after deduction of Refunds)	1,200,000
Establishment	60,000
Net Produce	1,140,000

26. The next measure is that we are obliged to suspend the famine grant for

the time. This is, as has been often explained, the grant of surplus revenue to the construction of Protective Railways and Irrigation Works. Part of the original Rx. 1,500,000 is already pledged, that is, it is used to meet the loss to Government on its contracts in respect of the Bengal-Nagpur and Indian Midland Railways. That loss, in the coming year, is estimated at Rx. 368,800, and there is also an estimate of Rx. 10,000 for actual famine charges; so that of the whole grant only Rx. 1,121,200 is capable of being resumed, or rather withheld. We have deemed it expedient to allow Rx. 45,000 on account of certain Irrigation works, to remain charged against this head, but the remaining Rx. 1,076,200 will remain unspent in 1894-95. The principal Railway work which is being charged to this head at present is the East Coast Railway. And, as this work is classed also as a Productive work, a considerable grant has been given to it, under the head of Expenditure not charged against Revenue, so that this particular work will not very greatly suffer by the suspension of the grant. But this only means that the effect of the reduction is passed on to other Railway projects.

27. One other measure we have been obliged to take, namely, to call on Provincial Governments for contributions to our aid, in other words to force upon them severe economies, and appropriate the results to the benefit of our own account. The Government of India were most unwilling to have recourse to a measure which practically means the stoppage for the time of all administrative improvement, a measure which they feel must take all the heart out of Provincial Governments, by making them surrender all the fruits of careful administration, to fill the yawning gulf of our sterling payments. But as the Government of India said in addressing its demand to them, "the imperious necessity for imposing new taxation obliges the Government of India first to exhaust all available methods of increasing their resources; and this necessity is the only justification they can put forward for so soon making a practical revision of 'contracts' made only two years ago, and calling in balances which the Local Governments might legitimately claim as pledged to them for the purpose of administrative improvement."

28. The Government of India wish to acknowledge the readiness with which this demand has been met. The demand was issued on March 1st; it had been complied with by March 12th. Though not very large in amount, except in one case (that of Lower Burma), the demand comes so closely after the adjustment of assigned revenue to assigned expenditure, that it means in every case the adoption of active measures to restrict expenditure; and it must be remembered also that it comes after the Local Governments have already had, in the Exchange Compensation allowances, to meet new expenditure over and above their assignments.

29. The total amounts obtained from the Local Governments come to Rx. 405,000, their balances being, in nearly every case, reduced by the demand to the minimum prescribed by the Secretary of State.

30. By these three measures the deficit in our account is reduced by Rx. 2,621,200, namely:—

	Rx.
New Import Duties, net produce	1,140,000
Suspension of Famine Grant	1,076,200
Contributions from Local Governments	405,000
	2,621,200

from Rx. 2,923,100 to Rx. 301,900, at which figure it stands in the final statements.

31. I have already in my statement made in this place on March 10th given a full account of the reasons which have led to the Government accepting this deficit for the year 1894-95. I shall not weary the Council by a repetition of a subject then very elaborately discussed.

CLOSING OF THE MINTS.

32. The central fact of the Financial History of the year was the closing of the Mints on 26th June last. When the last Budget Estimates were presented to this Council, the Government of India were waiting for the Report of the Committee assembled under Lord Herschell's Presidency, to whom had been committed the examination of the Currency proposals of the Government of India. The Committee reported under date May 31st. Their recommendation was as follows:—

"It remains for us to state the conclusions at which we have arrived. While conscious of the gravity of the suggestion, we cannot, in view of the serious evils with which the Government of India may at any time be confronted if matters are left as they are, advise Your Lordship to overrule the proposals for the closing of the Mints and the adoption of a gold standard which that Government, with their responsibility and deep interest in the success of the measures suggested, have submitted to you.

But we consider that the following modifications of these proposals are advisable. The closing of the Mints against the free coinage of silver should be accompanied by an announcement that, though closed to the public, they will be used by Government for the coinage of rupees in exchange for gold at a ratio to be then fixed, say 1*s.* 4*d.* per rupee; and that at the Government treasuries gold will be received in satisfaction of public dues at the same ratio."

33. The Government of India having considered the Report, telegraphed to the Secretary of State on June 15th, proposing to take immediate action on this decision; the Secretary of State's consent was given on June 20th, and the necessary legislation was carried through on June 26th.

34. It was, of course, expected that the value of silver would be immediately affected by this change. It stood at about 38*d.* till June 25th, and then in four days it fell to 30½*d.* In July it recovered in the first week to 34*d.*, but settled afterwards at about 32½*d.* In August and September it stood at about 34*d.* but it fell during October, and its price from then till the middle of January stood at about 32*d.* After this, a renewed fall set in, and in the first week of March the price was quoted at 27*d.*; at that price the metallic value of the rupee is about ten pence farthing.

35. Meantime, Silver legislation was taking place in the United States of America. Congress met on August 7th, and a Bill for the repeal of the silver purchase clause of the Law of 1890 was speedily introduced and was passed on August 28th by an unexpected majority. The Bill remained under discussion in the Senate from August 28th till October 30th, when it was passed after a strong opposition. It received the President's signature on November 1st. But it will be seen from my statement of the history of the price of silver that the [illegible] effect [illegible] change in the price. The doubtful element in the case was the Indian legislation, and when that legislation became an accomplished fact, the price of silver immediately assumed a lower level.

36. During the months succeeding the closing of the Mints the price was favourably affected by a strong demand from India. The amounts imported into India during these months were Rx. 2,019,100, Rx. 781,400, Rx. 858,400, Rx. 1,127,400, Rx. 450,400, Rx. 926,600, Rx. 1,658,400, and in February Rx. 1,167,800. Total Rx. 8,989,300.

37. We have naturally been very much interested in the question what became in this country of these large imports of silver, but our enquiries have satisfied us that there has really been a very large demand for it for private use and possibly also for hoarding. The divorce between the value of coined and of uncoined silver brought about a state of things utterly unknown in Indian history—in the experience at least of any of the present generation—*viz.*, that uncoined silver could be sold at a profit for considerably less than its weight in coined silver. Silver dealers rushed in to make a profit out of the inability of the ordinary Indian to understand that it was not necessarily a profitable transaction to buy a tola of rupee-silver for fifteen annas. The question was violently agitated of imposing a silver import duty, so as to prevent a demand for silver that threatened to annihilate, by its own force, that balance of trade which had hitherto required settlement by Council Bills. But it was recognized that this demand for silver would have to be exhausted before our new Currency policy could have a fair chance, and it was determined to leave it to the operation of natural causes. The announcement was made upon January 18th that no duty would be placed on imported silver in aid of the Currency policy.

38. A certain amount of this silver, but not, so far as we can find, a very large amount, passed into Native States for use in coinage. It was easy to foresee that, by the closing of our Mints, our rupees would be appreciated with reference to the silver coinage of Native States, especially if measures were not adopted in these States to restrict their coinage in a corresponding measure. We advised the various Durbars to watch the current rate of exchange between their rupees and the Government rupee, and most of them stopped coinage very shortly after we had done it. The Native States are not, however, so favourably situated as we are, with reference to the maintenance of an appreciated coinage; for their rupees can, in most cases, be manufactured without elaborate machinery, and so far as we know (though we have not yet full information on the point), the local systems of currency are in very few cases strictly limited, like our own, to coin issued by the State in which it is current. We are, however, continuing to watch the effect of our policy upon the coin of Native States, and to advise them, from time to time, as to the economic effect of measures taken by ourselves or intended by them.

39. This excessive import of silver was not the only obstacle which our Currency measures had to meet with. We had been obliged, for reasons for which we were not responsible, to initiate these measures at the most unfavourable time of the year, namely, the beginning of the slack season—that is, the season when our exports are smallest; and the refusal of the Secretary of State to issue his Bills under 15$\frac{1}{16}d$., brought other importers into competition besides the importers of silver, and the balance of trade on the whole actually turned against India for a time. I think it is now recognized that the policy of refusing to issue Bills was a mistaken policy, and that it would have been better to issue Bills moderately so as to meet the demands on the Home Treasury. But the circumstances we had created were altogether new, and both officials and merchants and bankers had all to learn, by actual experience, what new economic forces had been called into existence, and how they affected the question of the appreciation of the rupee. The Secretary of State announced, on January 20th, his abandonment of his attempt to maintain a forced value for his Bills, and since then the course of commerce has given us ground for expecting that we shall be able to maintain the rupee at a value considerably above its metallic value, though not as yet approaching the limit at which there is any chance of its functions as a Currency beginning to be replaced by gold.

40. The first considerable issue of Council Bills was on 31st January, when a rate of 14$\frac{3}{8}d$. was obtained. The rate fell, till on the 26th February it stood at 13$\frac{1}{2}d$., but it has since then recovered to about 14d.

41. The question of the future value of silver is so doubtful that I hesitate to express any opinion regarding it. We are told that it has now touched bottom, but we have been told that very often, in past times, and yet it has sunk lower. I do not agree with those who think that if we were to open our Mints, we would benefit by enhancing the value of silver. It should be remembered that we can enhance that value only by actually absorbing a considerable share of the world's produce of the metal. But the absorption and coinage of a large amount of silver is an effect that can only follow, and be concomitant with, a fall in the value of the rupee. It is, in fact, economically, the effort of the Currency of the country to adapt itself, by increase in volume, to its decrease in value. In other words, if the opening of our Mints is to enhance the value of silver, it can do so only by a process which involves the depreciation of the value of the rupee; and therefore, as it seems to me, no enhancement of the value of silver, brought about by our opening our Mints, can be of any advantage to us.

42. I think that even those who do not believe in the ultimate success of our currency legislation, must at all events admit that we have, by its means, escaped an immediate disaster; and those who believe that the only way of issue from the difficulty lies through bimetallism, will admit that they are several steps nearer its realization when the rest of the world has ceased to rely on India's consent to bear the main portion of the burden of silver-depreciation.

SECRETARY OF STATE'S OPERATIONS.

43. By the circumstances to which I have alluded, the sale of Council Bills was practically in suspense from July 1893 to January 1894, inclusive. The Secretary of State had estimated to raise £18,700,000 by Bills, of which £1,189,200 was the estimated amount of net payments to Railway Companies, the remainder representing the current requirements of the year. During the first three months of the year he issued Bills for £5,722,799, an unusually large amount, which raised his sterling balance on June 30th to £4,173,925; but from that date till the end of January the amounts received were, in each of the seven months, £51,750, £78,250, £6,672, £4,791, £609,544 (in November), £20,937, £90,658, giving a total of only £862,602.

44. During this period, therefore, the Secretary of State had to carry on his transactions by borrowing. The high balances of June 30th carried him over July and August, and besides this balance he had at one time over £400,000 in hand on account of borrowings not repaying drawings provided for in the Budget Estimates. He had estimated to raise £1,300,000 of 3 per cent. stock to pay off Railway debentures, and though he raised most of this amount in July, the repayments were not complete till October. His cash balance, however, was very low in the end of August, namely, £460,903. In September he issued 3½ per cent. debentures for £1,385,000, and borrowed temporarily £500,000; and the net temporary borrowings in subsequent months were—October £1,500,000, November £750,000, December £750,000, January £2,750,000, giving a total of £6,250,000.

£25,000 of this came into October.

45. The figures as made up on actual accounts till the end of January, and estimates received from the Secretary of State for the two last months give us—

	Till January: Accounts.	February and March Accounts and Estimates.	Total for year.
Funds raised by Permanent Debt .	1,386,000	...	1,386,000
Council Bills	6,585,400	2,814,600	9,400,000
Temporary Borrowing (net) . .	6,250,000	−250,000	6,000,000
	14,221,400	2,564,600	16,786,000

It will be seen therefore that the Estimate of Council Bills now made falls short by £9,300,000 of the Estimate of last March, and that this amount has been made up by permanent debt £1,386,000, temporary debt £6,000,000, a reduction in the cash balance of £1,013,000: total £8,399,000; besides reductions in the payments to Railway Companies and on account of remittances.

46. We have *per contra* an enormous accumulation of silver in our Treasury Balances in this country. The £8,399,000 of debt incurred, and cash balance reduced, during the year are represented, at an exchange of 15*d.*, by Rx. 13,438,400 in this country, and our cash balances in India being practically increased by this amount, stand at the close of January, February, and March at the unprecedented figures of Rx. 23,802,200, Rx. 25,016,500 and Rx. 26,251,800 (estimated).

47. Next year, it will be seen that it is not the present intention of the Secretary of State to draw Bills on our accumulations of silver in order to pay off his temporary debt. He proposes to borrow £8,300,000, of which £6,000,000 will be used to discharge the temporary obligations outstanding at the end of the current year; and the rest is required for his ordinary transactions. The amount for which he proposes to draw, £17,000,000, is only the expenditure of the year, with the addition of the Capital outlay on account of State Railways, and a portion of his remittance payments. It must, as usual, be understood that these figures are given with reservation of entire liberty to the Secretary of State to vary his borrowings and his drawings as he may find occasion.

LOANS IN INDIA.

48. In the Budget Estimates of 1893-94 we proposed to raise a loan of Rx. 3,000,000. On July 14th, while we were still in ignorance of the approaching failure of Council Bills, a notification was issued calling for tenders for Rx. 3,500,000 at 3½ per cent., and at the same time notice was issued for the discharge of such part of the 4½ per cent. loans of 1878 and 1879 (excluding the 7 shillings per cent. portion) as still remained unconverted, under previous notifications, into four per cents. The loan was raised at an average of Rs. 96-3-2½ per cent., producing Rx. 3,366,130, against a nominal value of Rx. 3,499,100 (as Rx. 900 remained unissued). Of the 4½ per cent loan we estimate to have paid off Rx. 1,100,000 during the current year, leaving Rx. 241,447 undischarged. The three-and-a-half per cents. are now above par.

49. It is hardly necessary to say that with our huge silver balances, we have no intention of raising a loan in India during the year for which estimates are now being presented.

CONCLUSION.

50. Such then is our programme for the approaching year,—a programme of retrenchment and of vigilance, intended to tide us over what I have called a transition period. The means which we have adopted in our Budget Estimates of nearly balancing our Revenue and Expenditure, are means which will hardly be available a second time. It is at some risk that we suspend even for one year the provision of a crore or a crore and a half which we shall certainly require if a famine season comes upon us: we cannot call our financial position safe till we find ourselves again with that crore to the good. The forty lakhs also which we obtain from the Provincial Governments exhausts for the time that source of relief from temporary difficulties. A year hence, as I said a fortnight ago, we shall certainly have to reconsider our position, and we hope by that time to have a much more definite knowledge of the conditions upon which our future financial position rests.

PART II.

DETAILS OF ACCOUNTS AND ESTIMATES.

Section I.—Accounts of 1892-93.

51. The Revised Estimates for the year 1892-93 showed a deficit of Rx. 1,081,900. As anticipated by Sir D. Barbour in paragraph 18 of the Financial Statement of March last, I am now able to state that the actual deficit is somewhat less. The final Accounts have been closed with a deficit of Rx. 833,412.

52. Explanations of the variations under the several heads of the Account figures from those of the Budget and Revised Estimates will be found in the Appropriation Report published in the *Gazette of India* of the 17th Instant. The following statement contains a general comparison of the Revised Estimates with the Accounts of the year:—

1892-93. General Results.

53. The total Revenue and total Expenditure in India were higher than taken in the Revised Estimate by Rx. 136,707 and Rx. 56,294, respectively, giving a net improvement of Rx. 80,413. The distribution of these variations between Provincial and Imperial was as follows:—The Imperial Revenue fell short of the Revised Estimate by Rx. 19,678, and the Imperial Expenditure exceeded the Revised Estimate by Rx. 86,350, while the Provincial and Local Revenue exceeded the Revised Estimate by Rx. 156,385, and the Provincial and Local Expenditure fell short of the Revised Estimate by Rx. 30,056. Consequently there was an improvement in the Provincial and Local Section of the Accounts of Rx. 186,441, and a deterioration in the Imperial Section of Rx. 106,028.

In England there was a reduction in Expenditure, including Exchange, of Rx. 339,985, and an increase of Revenue of Rx. 14,531; these together yield

an improvement in England of Rx. 354,516. Deducting from the last figure Rx. 106,028, the amount of the deterioration in the Imperial Section of the Accounts in India, we arrive at the net amount of Rx. 248,488, by which the deficit of the Accounts fell short of that estimated in March last.

1892-93. Revenue in India.

54. The larger part of the increase in Revenue in India occurred under the Principal Heads of Revenue, Rx. 130,375. The Army Receipts were also under-estimated by Rx. 57,243.

1892-93. Expenditure in India.

55. The Army Expenditure in India was under-estimated in the Revised Estimates by Rx. 66,891. Under other heads the Expenditure on the whole was slightly less than the Revised Estimate.

1892-93. Expenditure in England.

56. The Army Expenditure in England fell short of the Revised Estimate by £133,504 and the Special Defence Expenditure by £48,668, owing in both cases chiefly to the progress in the supply of stores being smaller than was anticipated.

1892-93.

57. The Expenditure not charged to Revenue amounted to Rx. 3,986,290, being very slightly less than the amount taken in the Revised Estimate.

Section II.—Revised Estimate of 1893-94.

58. The following statement contains a general comparison of the figures of the Budget and Revised Estimates of 1893-94:—

	Budget.	Revised.	Revised, better.	Revised, worse.

DEFICIT . Rx.	1,595,100	1,792,800	...	197,700

1893-94. General Results.

59. There has been a moderate increase in the Revenue; and the total Expenditure in India has been restricted to a sum slightly less than the Estimate of March last; but the Imperial Expenditure in India and the Expenditure in England have exceeded the Budget Estimate, and the slight fall in the rate of exchange from 1*s.* 2·75*d.* to 1*s.* 2·6*d.* has caused an increase in the direct charge for exchange of Rx. 265,900. The net result is that it is now anticipated that the deficit of the year will exceed that entered in the Budget Estimate by Rx. 197,700, and will amount to the very considerable sum of Rx. 1,792,800. Probably the deficit will be somewhat reduced when the accounts of the year are made up.

1893-94. Revenue in India.

60. The increase in the Revenue in India above the Budget Estimate amounts on the whole only to Rx. 430,100. But the Revenues generally have increased in a very satisfactory manner, and it is the heavy falling off in the receipts from Opium and Salt that has reduced the net increase to the amount named. Of the improvement of Rx. 430,100, the sum of Rx. 325,200 is Imperial and Rx. 104,900 Provincial and Local.

1893-94. Decreases of Revenue in India.

61. The only heads under which the Revenue will fall short of the Budget Estimates by any considerable amount are:—

	Rx.
Opium	621,800
Salt	241,600
Provincial Rates	220,800
Marine	54,700
Gain by Exchange	78,000

62. The decrease under Opium is in the receipts from the sale of Bengal Opium, and is due partly to the small crop having necessitated a reduction of 351 chests in the quantity sold, but mainly to the average price realised being only Rs. 1,109 a chest as compared with Rs. 1,250 taken in the Budget Estimate.

63. The decrease under Salt is largest in Madras, amounting to Rx. 140,200; there it is due, not to any reduction in the quantity of salt issued, but to the fact that purchasers have again begun, probably in consequence of the fall in the price of Government securities, to avail themselves of the option of deferring payment of duty for six months on lodging security. In Northern India the falling off is considerable, amounting to Rx. 120,000, and represents an actual reduction in the quantity of salt issued. Owing to a failure of manufacture at the Sambhar Lake, the price of that salt had to be raised, and this necessarily had the result of reducing the sales of it. This ought not, however, to have caused a reduction of Salt Revenue in the whole of India, as Salt from other sources should in ordinary course have taken the place of the Sambhar Salt; but this has not occurred to nearly the full extent of the reduction in Northern India.

64. The decrease in Provincial Rates occurs in Madras. Part of it is nominal, being caused by a change in classification which transfers certain quitrents, amounting to Rx. 141,100, from this head to Land Revenue. The remainder is due to the suspension of the Village Cess in Madras for one year (1st July 1893 to 30th June 1894), the accumulated balance of the local fund to which the receipts from the cess appertain being sufficient to meet a year's expenditure.

65. The decrease under Marine occurs in the Imperial Marine Department and is nominal, being counterbalanced by a reduction in Expenditure; recoveries on account of ships or launches built or other work done at the Government Dockyards for Local Governments being now taken on the Dockyard Accounts as deductions from Expenditure instead of as Revenue. The decrease would have been larger had it not been for large receipts, amounting to Rx. 19,300, not anticipated in the Budget Estimate, from the hire of vessels of the Indian Marine.

66. The uncertainty in estimating the transactions which pass under the head of Gain by Exchange was explained in paragraph 48 of the Financial Statement of last March.

1893-94. Increases of Revenue in India.

67. The following are the more important increases of Revenue in India:—

	Rx.
Land Revenue, including that due to Irrigation	311,500
Stamps	116,900
Excise	212,000
Forest	88,300
State and Guaranteed Railways	646,300

68. Part, Rx. 141,100, of the increase under Land Revenue is nominal, as explained in paragraph 64 above. A considerable part, Rx. 66,100, of the increase in Bombay is also nominal, as it occurs in the adjustment of alienated Land Revenue, and is counterbalanced by an increase in Expenditure. See paragraph 77 below. The remainder, Rx. 104,300, represents the real increase and is contributed to by all Provinces, except the North-Western Provinces and Oudh, Burma and the Central Provinces.

69. The increase under Stamps occurs in all Provinces except Burma. The increase under Excise is also general, the largest increases being in Bengal, Rx. 60,000; Madras, Rx. 50,000; Bombay, Rx. 46,000; and the North-Western Provinces and Oudh, Rx. 30,000.

70. The largest part of the increase under Forest occurs in Burma, where, owing to a favourable season and the development of forest operations, it is anticipated that the receipts will exceed the Budget Estimate by Rx. 85,000.

71. The Railway Revenue has developed in a most satisfactory manner. The Budget Estimate took credit for a considerable increase in the receipts above those of 1892-93; but the returns up to date justify the anticipation that the Estimate will be exceeded by nearly two-thirds of a crore of rupees. Almost every Railway has shared in the general prosperity, the only exception of note being the Burma Railway, on which the development of traffic has experienced a check for reasons believed to be of a temporary nature: the prices of paddy have been low, and the cultivating classes in Burma have consequently been less well off than usual.

1893-94. Revenue in England.

72. The decrease in the sterling Revenue is accounted for by the fact that the Secretary of State, owing to the failure for a time to sell Council Bills, had for a great part of the year no balance available, as usual, for temporary investment. The receipts under Interest are therefore expected to fall short of the Budget Estimate by £10,400. The receipts under most other heads will also be less than the estimates by small amounts; but the aggregate of these decreases is more than counterbalanced by an increase of £13,700 under Army Receipts in England.

1893-94. Expenditure in India.

73. The Imperial Expenditure in India is expected to exceed the Budget Estimate by Rx. 143,600, while the Provincial and Local Expenditure will be less than the Estimate by Rx. 167,500. The difference between these two is the Rx. 23,900 shown in paragraph 58 as the reduction of the Expenditure in India below the Budget Estimate. This figure is the net result of a number of increases and decreases.

Exchange Compensation Allowances.

74. Before referring to the several increases and decreases, one cause of increased expenditure under most heads may be mentioned. In August last the Government of India decided to give to European and Eurasian officers not domiciled in India some compensation for the losses being suffered by them in consequence of the great and continued fall in the rate of exchange. The form which the portion of this compensation that affects Expenditure in India took was the grant to such officers of an allowance, payable monthly with salary, and designated Exchange Compensation Allowance, sufficient to enable each officer to remit to Europe one-half his salary, subject to a maximum limit of £1,000 a year, at a privileged rate of exchange, which was fixed till further orders at 1*s.* 6*d.* the rupee. The allowance is payable as a percentage on salary, varying with the rate of exchange assumed as the market rate for the quarter, and calculated to yield an amount equal to the difference between one-half salary converted at 1*s.* 6*d.* and one-half salary converted at the average market rate. The average market rate adopted for the payments of Exchange Compensation Allowance in each quarter is the average Calcutta demand rate for the

three months ending on the 15th of the month preceding the quarter. The allowances were granted with effect from the 1st April 1893. The rates taken as the average market rates for calculating the payments in each quarter have been—

	s.	d.
April to June 1893	1	$2\frac{4}{6}$
July to September 1893	1	$3\frac{3}{8}$
October to December 1893	1	$3\frac{11}{32}$
January to March 1894	1	$3\frac{5}{32}$
Average for the whole year	1	$3\frac{37}{160}$

75. The following table shows the payments of Exchange Compensation Allowance as taken in the Revised Estimates under each head of Account, Imperial and Provincial:—

	Imperial.	Provincial.	TOTAL.
	Rx.	Rx.	Rx.

45. Civil Works	4,300	21,700	26,000
46. Army: Effective	*263,500	...	*263,500
47. Special Defence Works	1,600	...	1,600
TOTAL	401,300	232,100	633,400

*This is the net amount paid, after making from the amounts due the prescribed deductions on account of family remittances at the favourable rate of 1s. $4\frac{1}{4}$d. which were made between April and August before the orders granting the Exchange Compensation Allowances issued. Those orders withdrew the privilege of making family remittances through the Government Account.

The distribution of the Provincial total of Rx. 232,100 among the several Provinces is as follows:—

	Rx.
Central Provinces	13,800
Burma (Lower)	19,700
Assam	7,800
Bengal	45,000
North-West Provinces and Oudh	42,700
Punjab	30,100
Madras	38,400
Bombay	34,600
TOTAL	232,100

1893-94. Increases of Expenditure in India.

76. The more important increases of Expenditure in India in 1893-94 as compared with the Budget Estimates are—

	Rx.
Assignments and Compensations	81,400
Interest	157,000
Law and Justice—Courts of Law	89,600
Political	97,500
Stationery and Printing	58,600
State Railways—Working Expenses	171,600
Army	318,300

77. The increase under Assignments and Compensations occurs almost entirely in Bombay: the debit and credit adjustments of alienated Land Revenue—adjustments peculiar to that Province—have been increased in consequence of the actual area of certain alienated lands in Sind having been found to be larger than the area previously recorded: there is a similar increase on the Revenue side under Land Revenue. See paragraph 68 above.

78. The increase under Interest represents the discount on the $3\frac{1}{2}$ per cent. loan for Rx. 3,500,000 raised in August last, and the portion of the interest on that loan payable in the year 1893-94, diminished by the saving in the interest on the $4\frac{1}{2}$ per cent. paper which was notified for discharge in October. When the Budget Estimate was framed last March, no provision was made for the interest on the new loan, as it was then assumed that it would be issued at 4 per cent., and that the interest payable during the year would be covered by the premium on the loan.

79. The grant of Exchange Compensation Allowances accounts for the larger part of the increase under Law and Justice. But in some Provinces also temporary appointments of Judges not provided for in the estimate have had to be sanctioned or continued.

80. The increase under Political is due chiefly to the enhancement by Rx. 60,000 a year of the subsidy paid to the Amir of Afghanistan, which was agreed to in the negociations of Sir Mortimer Durand, and to the cost of Sir Mortimer Durand's Mission to Cabul. The Herat Mission, the visit to Mekran of the Agent to the Governor General in Baluchistan, the exploration of the Borkhampti Country, the Kinchaing Mission, and the Anglo-Siamese Boundary Commission have also added to the expenditure under this head.

81. Most of the Provinces show an increase of Expenditure on Stationery and Printing: and the demands on the Calcutta Stationery Office have necessitated considerably larger purchases in this country than were anticipated.

82. The increase of Expenditure on State Railways was caused by the larger traffic and was necessary to earn the larger receipts.

83. The larger part of the increase under Army is due to the grant of Exchange Compensation Allowance, the charge to this head being Rx. 263,500 as

given in the table in paragraph 75. The following supplementary grants were also sanctioned during the year, namely—

	Rx.
For the Kachin, South Lushai and Kelat operations	21,500
For the Gilgit Agency	48,150
For the purchase of additional horses to replace those taken to Egypt by the 7th Dragoon Guards	16,900
For rations on the field service scale in the Chin country	16,200
Other smaller grants	14,550
TOTAL	117,300

1893-94. Decrease of Expenditure in India

On the other hand it is anticipated that the Budget Grants for the year will in some cases prove to have been higher than necessary.

84. The more important decreases of Expenditure in India as compared with the Budget Estimates are—

	Rx.
Land Revenue	57,700
Opium	370,800
Forest	69,700
Police	84,000
Marine	115,000
Civil Works	145,400
Special Defences	89,000

85. The decrease under Land Revenue occurs chiefly in the North-Western Provinces and Oudh, Rx. 23,700, Bombay, Rx. 18,400, and Assam, Rx. 12,200. In the North-Western Provinces and Oudh the Expenditure on Survey and Settlement has been restricted below the Estimate: in Bombay the payments to Village officers have been less than the Estimate, and some new establishments for which provision was made have not yet been entertained: in Assam the direct payments for the collection of Land Revenue are declining with the substitution of Tahsils for collection through Mauzadars, and in that Province also some new establishments provided for have not yet been entertained.

86. The reduction in Opium Expenditure is caused by the failure of the crop: the Estimate provided for the payments for an average crop.

87. The Budget grants under Forest have proved to be higher than necessary in all Provinces, the saving being largest in Madras and Bombay.

88. The decrease under Police is distributed over all the Provinces: the amounts entered in the Budget Estimates were generally too liberal, provision being made for schemes of re-organisation and improvement not fully ready to be brought into operation, as well as for the full existing scale of expenditure.

89. Most of the saving under Marine occurs in the Imperial Marine Department and is nominal, being counterbalanced by the reduction in Revenue, as explained in paragraph 65 above. There is also a reduction of Rx. 30,100 in Bengal and Burma, due to the progress in the construction of certain new vessels having been slower than was anticipated.

90. The decrease under Civil Works occurs in the Provincial and Local Expenditure of most of the Provinces, the largest reductions being in Madras and Lower Burma. The progress in some works for which provision was made in the Budget Estimate has not been so great as anticipated.

91. The execution of some works for which provision was made in the Estimate for Special Defences has been postponed: hence the saving under that head.

1893-94. Expenditure in England.

92. The main cause of the excess of £65,800 in the Expenditure in England was the failure to sell Council Bills for a time, which necessitated borrowing and increased the Interest charges. The increase due to this cause amounts to £84,600. Discount on the Loan of £1,300,000 and on India Debentures, for which no provision was made in the Budget Estimate, amounted to £19,500, and raised the total excess under Interest to £104,100. The Expenditure in England on Special Defence Works will be less than the Estimate by £66,000, the indents for stores sent from India having been reduced in consequence of the postponement of works mentioned in the preceding paragraph. The variations in other heads are smaller, and result in a slight excess over the Budget Estimate.

1893-94. Exchange.

93. The increase in the Sterling payments accounts for Rx. 41,300 of the increase in the charge under Exchange. The remaining Rx. 265,900 is due to the fall in the rate of exchange from 1*s.* 2·75*d.* as estimated in March 1893 to 1*s.* 2·6*d.* realised upon the remittances of the year.

Section III.—Budget Estimate of 1894-95.

1894-95. General Results.

95. The general features of the year 1894-95, as compared with the Budget Estimates of 1893-94, may be enumerated as follows: A substantial increase of Revenue, amounting to Rx. 837,100; an increase of Revenue net (after deducting the increased cost of establishment) of Rx. 1,140,000 by the imposition of new taxation; a large increase of Expenditure in India by the grant of Exchange Compensation Allowances to the services; a large reduction of Expenditure in India secured by the stoppage of all optional Expenditure chargeable to the Famine Grant and by stringent measures of economy under other heads; an increase in the Interest charges in England with reduction of other sterling Expenditure; and a large increase under Exchange caused by the fall in the value of the rupee from 1*s.* 2$\frac{3}{4}$*d.* to 1*s.* 2*d.*

The net result is a considerable improvement: the deficit will be Rx. 301,900 as compared with Rx. 1,595,100 in the Estimates of 1893-94. The reasons

why it has been decided by the Government of India to accept a deficit in the Estimates were fully explained to the Council* on March 10th.

1894-95. Revenue in India.

96. The Revenue in India in 1894-95 is expected to exceed that taken in the Budget Estimates of 1893-94 by Rx. 2,037,100. Of this, the sum of Rx. 1,200,000 is secured by the imposition of new taxes.

The increase in Imperial Revenue is Rx. 2,096,900, while there is a decrease of Rx. 59,800 in Provincial and Local Revenue. The distribution between Imperial and Provincial would have been different but for the contributions which the Provincial Governments have been called on to pay in consideration of the severe financial straits of the Imperial Government.

The amounts paid by the several Provinces are:—

	Rx.
Central Provinces	43,000
Lower Burma	180,000
Assam	16,000
Bengal	30,000
North-Western Provinces and Oudh	50,000
Madras	30,000
Bombay	56,000
	405,000

The contributions are brought upon the Estimates and Accounts by transferring the amount from the Provincial to the Imperial share of the receipts under Land Revenue: the Provincial Revenues being thereby diminished and the Imperial Revenues increased. The amount of the contributions levied being Rx. 405,000, the distribution of the increase of Revenue of Rx. 2,037,100, in ordinary course and apart from the special and extraordinary measure resorted to help towards securing equilibrium in the Imperial Budget Estimate, would have been Imperial Rx. 1,691,900 (or if we exclude the new Customs Revenue, Rx. 491,900) and Provincial and Local Rx. 345,200.

1894-95. Decreases of Revenue in India.

97. The only decreases of Revenue of importance are—

	Rx.
Opium	922,600
Provincial Rates	181,800
Mint	162,800
Marine	74,400

98. The loss under Opium occurs in the receipts from the sale of Bengal Opium, and is caused chiefly by the difference in the market price. Last March the current prices justified the assumption of an average price of ₹1,250 a chest: now it is not safe to assume a higher price than ₹1,070 a chest. The difference of ₹180 a chest means a loss of Rx. 761,400. The

* Extract from the Hon'ble Mr. Westland's speech in the Legislative Council on 10th March 1894:—

"The view which Your Excellency's Government has taken is, that we are at present in a transition period and that whatever measures we take, whether they are sufficient or insufficient to fill up the deficit in the accounts of the year 1894-95, they must be looked upon as only provisional and temporary. We are still passing through—it may be said we have only just entered upon—that currency crisis upon the settlement of which depends our future finance. Whether we shall be able to establish our rupee at what we may call a favourable figure, is a question the solution of which must practically be left to experiment. Until two months ago circumstances were against us, and the experiment was practically in suspense. The period during which we have been able to watch the effect of commercial operations upon our currency is not yet more than a few weeks old—far too short a time to enable us to judge whether the falling rupee is to carry us into perpetually increasing difficulties, or whether a recovery from its present low figure is to give us some respite from our financial troubles and anxieties. Even since my statement was laid before the Council, there has been a change; whether it is a merely temporary one or not, it is nevertheless an important change—in the aspect of the matter. Time has not yet declared on the one side or on the other, and it is impossible for any one as yet to pronounce whether our financial position is going to improve or going to deteriorate. It is a serious confession to make, but it is nevertheless true, that our financial position in the immediate future depends upon circumstances absolutely outside our control, and that we can do little more than watch in what direction the forces are working which will in the end either bring us security from these perpetual variations or still more serious troubles than any we have yet had to provide against."

"This then is the position we had to meet. Do what we will, the year 1894-95 must be a transition period—a period at the end of which, we have every reason to hope, we shall be far better able than we now are, to judge in what direction our finance is progressing."

"Under these circumstances, the question that presented itself to us was whether we were to assume that all hope of the recovery of the rupee, within some measurable distance of time, was lost, and to adopt heroic measures which would place ourselves at once in a position to meet our current rate of expenditure, even with the rupee at fourteen pence; or whether we should for the present adopt a policy of waiting for further developments, making all the temporary arrangements we could for tiding over a year of extreme difficulty, and meantime merely lay the foundation of the fiscal measures to which, in the event of our ultimately having to fill the whole estimated deficit of 3½ crores, we would be obliged to have recourse."

rest of the decrease is in consequence of the reduction in the probable quantity to be sold necessitated by the poor crops of last and previous years.

99. The decrease in Provincial Rates is the result of a decrease in Madras of Rx. 251,100 and an increase in other Provinces of Rx. 69,300. The improvement in the other Provinces is the normal increase in the rates, which increase with the Land Revenue. Of the decrease in Madras, Rx. 151,500 is nominal, being the amount transferred to Land Revenue in consequence of the change of classification described in paragraph 64 above: the remainder is caused by the suspension of the collection of the cess mentioned in the same paragraph during the first three months of the year, and by the rate at which the cess will be levied from 1st July next being lower than in the past.

100. The closing of the Mints to the free coinage of silver accounts for the loss of Revenue under Mint: as no silver will be tendered for coinage, there will be no seignorage receipts.

101. The decrease under Marine is nominal, as explained in paragraph 65 above.

1894-95. Increases of Revenue in India.

102. The following are the more important increases of Revenue in India anticipated in 1894-95:—

	Rx.
Land Revenue, including that due to Irrigation	599,300
Stamps	127,700
Excise	171,700
Customs	1,207,700
Assessed Taxes	53,700
Forest	57,200
Post Office	56,200
State and Guaranteed Railways	858,900
Irrigation—Major Works	67,900

103. Of the increase under Land Revenue, a portion, Rx. 151,500, in Madras, and Rx. 69,800 in Bombay, is nominal, for reasons explained in paragraphs 99 and 68 above. Bengal being permanently settled, shows a slight increase only, and the small Provinces under the direct administration of the Government of India show hardly any improvement on the whole. In the North-Western Provinces and Oudh there is a substantial falling off; but that is merely the result of a correction of an error in estimating. The Estimates of the last few years in that Province have not been realised, and it has been ascertained that sufficient allowance was not made in them for the normal arrears of revenue left uncollected at the end of the financial year: a larger allowance for arrears is made in the Estimate for 1894-95.

Excluding the North-Western Provinces, Bengal and India—General, all the other Provinces show substantial increases in the amount of Land Revenue, these being the result of Survey and Settlement operations in temporarily settled districts, and of the expansion of cultivation in provinces where the amount of the Revenue depends on the extent of cultivation.

104. The improvement in the Stamp Revenue, though unequally distributed over the Provinces, is general throughout India with the exception of Burma, where there has been a check to the development of this branch of income.

105. The increase in the Excise Revenue is also general, Burma being the only exception: the decrease in Burma is due to the adoption of the policy in regard to opium which was described in paragraph 71 of last year's Financial Statement.

106. The increase under Customs is due to the new duties imposed by Act VIII of 1894. The Customs Revenue has not done well in 1893-94, and had there been no change in the duties, it would not have been possible to anticipate any appreciable increase in this head of Revenue.

107. The increase under Assessed Taxes represents the normal development of this branch of Revenue, the amount of increase being somewhat greater than usual; with the exception of Bengal and Bombay, all provinces share in this increase, Madras being the largest contributor.

108. Most Provinces contribute to the increase under Forest, which is of rather more than the normal annual growth of this head of Revenue, the specially large increase being in Burma.

109. The increase under Post Office represents the normal annual progress of the Department, the amount being somewhat higher than usual, as the Revenue increased at more than the average rate in 1893-94.

110. The Railway Revenue is taken at an amount somewhat higher than that which will be realised in 1893-94. The increase is justified either by additional mileage recently opened or to be opened next year, or in the case of lines under development, by the steady growth of traffic.

111. The increase under Irrigation occurs mainly in the Punjab, an extension of irrigation from the Western Jumna, the Bari Doab, and the Chenab Canals being expected. The revenue from the Sirhind Canal was low in 1893-94, owing principally to the closure of the canal for silt clearance for three months: the normal revenue is expected in 1894-95.

1894-95, Expenditure in India.

112. The Expenditure in India in 1894-95 on the whole will be of about the same amount as in the Budget Estimate of 1893-94. Imperial Expenditure will be less by Rx. 572,200, while Provincial and Local Expenditure will be more by Rx. 373,400, the net result being the small excess of Rx. 198,800 shown in the table in paragraph 94. This approximate equality is the final result of many large variations in both directions.

1894-95, Exchange Compensation Allowances.

113. The following table gives the same information for 1894-95 in regard to the Exchange Compensation Allowances as is given above for 1893-94 in the table in paragraph 75. In estimating the amounts for 1894-95, 1*s.* 2*d.* the rupee has been assumed as the average market rate of the year:—

TOTAL	712,900	400,400	1,113,300

The distribution of the Provincial total of Rx. 400,400 among the several Provinces is as follows:—

	Rx.
Central Provinces	22,600
Burma (Lower)	33,100
Assam	13,900
Bengal	72,700
North-West Provinces and Oudh	73,900
Punjab	51,100
Madras	69,300
Bombay	63,800
TOTAL	400,400

1894-95. Increases of Expenditure in India.

114. The more important increases of Expenditure in India are—

	Rx.
Assignments and Compensations	98,700
Land Revenue	74,500
Customs	64,700
General Administration	67,400
Law and Justice—Courts of Law	141,500
Police	82,600
Medical	56,100
Political	146,200
Stationery and Printing	55,300
State Railways—Working Expenses	314,300
Ditto Interest	158,000
Army	475,700

115. Of the increase under Assignments and Compensations the larger part, Rx. 72,200, occurs in Bombay and is nearly counterbalanced by an increase of the receipts under Land Revenue, see paragraph 103 above. Most of the balance occurs in the Central Provinces, where payments are to be made to certain zemindars as compensation for the resumption of their Abkári rights by the Government—a step considered expedient in the interests of efficient Excise administration.

116. The increase under Customs is for the establishment required to collect the new Import duties.

117. From the table in paragraph 113 above it will be seen that the Exchange Compensation Allowances account for the greater portions of the increases under Land Revenue, General Administration, Law and Justice—Courts of Law, Police and Medical. The remainder of the increases under these heads represents the ordinary growth of expenditure required to meet the wants of the country under the services mentioned.

118. The Exchange Compensation Allowances account for Rx. 27,500 of the increase under Political. There is also an increase of Rx. 60,000 in the subsidy of the Amir of Afghanistan; and a provision of Rx. 50,000 has been made for the expenditure which will be incurred in connection with the Afghan border demarcation.

119. The increase under Stationery and Printing is explained in paragraphs 81 and 157: no appreciable reduction of the charges under this head below those of 1893-94 can be hoped for.

120. The increase in the Working Expenses of State Railways is an accompaniment of the increased revenue, and that in the Interest Charges is a transfer from Ordinary Debt following the yearly addition to the Capital Expenditure.

121. The more important increases in the Estimate of Army Expenditure for 1894-95 as compared with the estimate for 1893-94 are as follow :—

	Rx.
Exchange Compensation Allowances and alteration in the pay of British soldiers due to different value of the rupee—net	390,100
Smaller allowance for short strength of troops, based on recent actuals (Rx. 63,100 were deducted in 1893-94 and only Rx. 46,100 in the estimate for 1894-95)	17,000
Amount deducted from the *Budget Estimate*, 1893-94, for probable savings owing to the absence in Egypt of the 7th Dragoon Guards for a part of the year. Full provision is necessary in 1894-95	31,000
Pay of officers on the Unattached List of the British Army who are candidates for the Indian Staff Corps under clause 25, I. A. C., 1892	12,600
Increase in cost of food for men and animals	49,000
Increased provision for malt liquor	35,900
Increased provision for the Kashmir and Gilgit transport arrangements	40,000
Increased provision for railway charges for the conveyance of troops and stores	27,400
Provision for the additional staff, etc., required for part of the year under the new organisation on the abolition of the Presidency Army system	10,000
Replacement of the mobilisation equipments, stores, etc., destroyed by fire at Peshawar	38,200
Increased purchases of transport animals to complete establishment, due to casualties and castings	23,700
Larger provision for volunteer corps with reference to authorised establishments, and an increase in the number of efficients	11,300

The more important decreases are as follow :—

	Rx.
Withdrawal of a battalion of British infantry from the Indian establishment, 20 privates being added to each of the remaining battalions	15,700
Fewer local supplies required for ordnance factories, partly counterbalanced by larger provision for camp equipage	16,700
Reduced provision for capitalised pensions and for pensions of officers drawing their pensions in India	11,700
Smaller provision for charges for special expeditions	132,000
The omission of the following special grants made in 1893-94, namely :—	
Reconstitution of Hindustani regiments	12,500
Hutting charges of the Native Army beyond those allowed by regulation	25,900
Purchase of land	10,100
Establishment of new cantonment general hospitals at certain stations in Bengal	10,000

1894-95. Decreases of Expenditure in India.

122. The important decreases of expenditure in India are—

	Rx.
Interest	113,200
Marine	105,500
Construction of Protective Railways	1,054,300
Construction of Railways	50,700
Military Works	194,200
Civil Works	408,600
Special Defence Works	138,800

123. The saving under Interest is the result of the annual transfer from Ordinary Debt to Debt on account of the Capital Outlay on Railways and Irrigation Works. That transfer is partly counterbalanced this year by the addition to the Public Debt of Rx. 3,500,000 borrowed at $3\frac{1}{3}$ per cent. interest in August to October 1893, less the diminution of the debt by the notification for discharge of the balance, Rx. 1,341,400, of the $4\frac{1}{2}$ per cent. loans.

124. Of the decrease under Marine, the portion, Rx. 65,200, which occurs in the Imperial Marine Department is nominal, as explained in paragraph 65 above. The remainder occurs chiefly in Burma and Bengal: so many new vessels and launches will not be constructed for the Local Governments next year as in 1893-94.

125. The decrease under Construction of Railways is due to the approaching completion of the Mayavaram-Mutupet Provincial Railway in Madras, the provision for expenditure on that Railway being only Rx. 17,500 as compared with Rx. 67,500 in the Budget Estimate of 1893-94.

126. The decrease under Special Defence Works is secured by the practical completion of the expenditure on those works: in view of the financial position, and for other reasons, several of the not very large number of sanctioned works, which remain to be carried out, have been either postponed or abandoned.

127. The reduction under Construction of Protective Railways and that under Military Works, amounting together to Rx. 1,248,500, have been made expressly as measures of economy to help the Government towards securing equilibrium between Revenue and Expenditure.

128. Of the reduction under Civil Works, the sum of Rx. 176,500 was made from Imperial Expenditure directly with the object described in the preceding paragraph. And of the remainder the larger part is made in Provincial Expenditure indirectly with the same object, the reductions being made to enable the Provincial Governments to pay to the Imperial Government the contributions which they were called on to pay in order to reduce the deficit in the Estimates of 1894-95. Some of the Local Governments have however made the required reductions under other heads of expenditure.

129. It may be mentioned that very strict economy has been insisted on in other Expenditure also, and that the grants under many other heads than those mentioned in the two preceding paragraphs would have been larger had it not been for the efforts made to reduce the deficit in the Estimates. In fact the difficulties of the position have for the last year or two obliged the Government to take every feasible measure to reduce or restrict its current expenditure.

1894-95, Expenditure in England.

130. The Expenditure in England in 1894-95 will be on the whole less by £13,500 than that entered in the Budget Estimate of 1893-94.

131. The only head under which an increase of importance in the expenditure in England is anticipated is Interest, which shows an excess over the Budget Estimate of 1893-94 of £288,500. This is due to the sterling borrowing necessitated by the failure to sell Council Bills during a great part of 1893-94.

132. There are reductions of £33,300 under Marine, as the *Warren Hastings*, for the construction of which a large provision was made in 1893-94, has been completed, of £152,100 under Special Defence Works, the reason being the same as explained in paragraph 126 above in regard to the expenditure in India under the head, and of £166,800 under Army Effective Charges, the amount of Clothing and Ordnance Stores, and the payments to the War Office being less than in 1893-94. The Non-Effective Army Charges are, on the other hand, increased by £97,100: it is feared that the maximum of the Non-Effective sterling Army Charges has not yet been reached.

1894-95. Exchange.

133. The increase of Rx. 1,371,500 in the Exchange on Expenditure in England is due to the fall in the rate from 1*s.* $2\frac{3}{4}$*d.* to 1*s.* 2*d.* the rupee.

134. The figures in the above table show the distribution of the Land Revenue among the several Provinces. The feature which has distinguished this head of Revenue for many years appears again in the Estimates for 1894-95, namely, a progressive increase in consequence of increase of assessment on re-settlement and of extensions of cultivation in the Provinces where the revenue depends on the amount of land under cultivation. Setting aside the small Provinces classed under "India—General," and the permanently-settled Province of Bengal, the only Province which does not show an increase is the North-Western Provinces and Oudh: as explained in paragraph 103, this is due to more careful estimating and not to any actual falling off or to any change of policy in that Province. The Explanations in paragraphs 68 and 99 may also be referred to.

135. The Budget Estimate of receipts in 1893-94 from Bengal Opium was based on the assumption that 43,704 chests would be sold at an average price of ₹1,250 a chest. The yield of the crop being small, and the reserve having been exhausted, it became necessary to reduce the sales in the last three months of the year by 351 chests. This reduction accounts for a diminution of the receipts by Rx. 43,900. The high prices of 1892-93 were not maintained. The prices in April, May and June showed a distinct falling off: in July the price fell very low in consequence of the apprehensions and uncertainty caused by the passing of the Currency Act a few days before the sale: in subsequent months there was a large recovery; but the average price for the whole year was only ₹1,109 a chest. This lower price is the cause of the bulk of the falling off in the Bengal receipts. *Bengal Opium Revenue in 1893-94.*

136. The price realised at the sale this month was ₹1,095 a chest, and the tendency has since been downwards. It is therefore not considered safe to assume for 1894-95 a higher average price than ₹1,070 a chest. *Bengal Opium Revenue in 1894-95.*

The quantity of Bengal Opium to be sold in the first nine months of 1893-94 was settled by the notification in June last: the quantity to be sold in the last three months cannot be settled till June next; but for the purpose of the Budget Estimate it is assumed that 42,300 chests will be sold in the whole year, being less by 1,404 than the quantity assumed for 1893-94 in the Budget Estimate of that year.

These reductions in price and quantity account for the considerable diminution on the receipts from Bengal Opium in 1894-95.

137. The exports of Malwa Opium through Bombay have fluctuated considerably from month to month in 1893-94. But the final result of the year promises to be an export of about the same amount as in 1892-93. The Revised Estimate for 1893-94 and the Budget Estimate for 1894-95 have accordingly been placed at approximately the same figure as the actual receipts of 1892-93. *Bombay Opium Revenue in 1893-94 and 1894-95.*

Excise Opium in 1893-94 and 1894-95.

138. The receipts from the sale of Excise Opium tend to increase from year to year with the increase in Excise Revenue. The Budget Estimate of 1893-94 was placed lower than it otherwise would have been, because of the intended adoption from 1st June of the very restrictive measures in regard to opium in Burma described in paragraph 71 of the Financial Statement of last March. The arrangements for the change took longer to mature than was expected, and the new rules were brought into force only from 1st January 1894. This postponement and the general increase of the receipts in other Provinces have caused the increase in the Revised Estimate for 1893-94. The restrictive measures will be in force in Burma during the whole of 1894-95, and the reduction in receipts caused thereby more than counterbalances the increases in other Provinces.

Opium Expenditure in 1893-94 and 1894-95.

The expenditure on an average crop of opium was provided for in the Budget Estimate of 1893-94. The crop was again considerably below the average, and the expenditure this year has been less than the Estimate by Rx. 370,800. In 1894-95 provision is as usual made for the payments which an average crop requires.

139. The reasons of the falling off in Salt Revenue in 1893-94 have been explained in paragraph 63 above. The reasons are of such a nature that there is no likelihood of their producing a similar effect on the Revenue of next year. The Budget Estimate for 1894-95 has therefore been taken at a figure considerably higher than the probable Revenue of this year, but still less than the Revenue actually secured in 1891-92 and 1892-93.

140. The saving in the Expenditure this year occurs chiefly in Northern India and in Madras: the season was unfavourable for manufacture, and the manufacturing charges are smaller than usual.

141. The Stamp Revenue continues to increase. Burma is the only Province which does not contribute to the increase this year: depression of trade is alleged as the reason, but fluctuations in Stamp Revenue in a particular year can seldom be ascribed with confidence to any particular cause.

142. The Excise Revenue shows this year a fully normal increase. With the exception of Burma all Provinces share in the increase, the North-Western Provinces being now included among the Provinces whose Excise Revenue is increasing. The decrease in Burma, owing to the measures alluded to in paragraph 138 above, has not been so great in 1893-94 as assumed in the Budget Estimate, as the introduction of those measures took place later than intended: the full effect of them will be felt in 1894-95.

Customs Revenue.

144. The Customs Revenue has since 1890-91 shown a tendency to decline. Even with the addition of some receipts in the last three weeks of the year from the new duties imposed from the 10th March by Act VIII of 1894, the Revenue in 1893-94, though higher than in 1892-93, is expected to be slightly less than the Budget Estimate.

For next year without the new duties the estimate would have been about the same as the Budget Estimate for 1893-94. The new duties, as explained in Part I of this Statement, are expected to yield in 1894-95 an additional revenue, after deduction of refunds and drawbacks, of Rx. 1,200,000 in all: Rx. 180,000 under "Petroleum," and Rx. 1,020,000 under "Other Import Duties."

Customs Expenditure in 1894-95.

145. The imposition of the new duties necessitates a considerable increase of establishment: to meet the cost of this a sum of Rx. 60,000 has been added to the Estimate of Expenditure in 1894-95.

Interest Receipts in India.

149. The reductions in the receipts in India shown in the Revised Estimate for 1893-94 and in the Budget Estimate for 1894-95 are caused by the repayment by the Bombay Port Trust of a loan of Rx. 616,100 on 1st April 1893 and by the Bombay Municipality of a loan of Rx. 420,000.

Interest Receipts in England.

The Secretary of State has not had in 1893-94 any large amounts available from his cash balance for temporary investment at interest, and expects that the same will be the case in 1894-95. Hence the reduction in the Sterling Interest receipts.

Interest Expenditure in India.

150. A loan of Rx. 3,500,000 at $3\frac{1}{2}$ per cent. was raised in August—October 1894 at an average price of R96·3-$2\frac{1}{2}$ pies per cent.; and on the other hand, the balance, Rx. 1,341,400, of the $4\frac{1}{2}$ per cent. loan was notified for discharge in October. The discount of Rx. 133,000 on the new loan increases the Interest charges of 1893-94; and about three months' interest on the new loan is payable in the year.

In 1894-95 a whole year's interest is payable amounting to Rx. 122,500; but on the other hand, there is a saving of Rx. 60,363 from the discharge of the $4\frac{1}{2}$ per cent. loan.

The interest transferred to the Public Works Debt on account of the new Capital Expenditure on Railways and Canals amounts to Rx. 205,100 in 1893-94 and Rx. 179,200 in 1894-95.

Sterling Interest charges.

The increases in the Sterling Interest charges in the Revised Estimate for 1893-94 and in the Budget Estimate for 1894-95 are due to the borrowing operations in England described in paragraphs 181, 182 and 186 below in the Ways and Means Section of this Statement.

Savings Banks Interest charges.

The interest on Savings Banks Balances has been increasing yearly with the growth of the deposits. The reduction in 1894-95 is caused by the reduction of which notice was given on 30th December 1893 in the rate of interest from $3\frac{1}{2}$ per cent. to $3\frac{1}{8}$ per cent. Allowance is also made for the probability that that reduction will cause a diminution in the rate of increase of the Savings Bank Balances.

Other Interest items.

The Interest on Other Obligations, apart from the Savings Bank interest, is a small item which does not vary much, the "other obligations" being in many cases permanent ones.

Post Office and Telegraphs.

151. Both the receipts and charges of the Post Office and of the Telegraph Department increase from year to year with the development of the Departments. The net financial result in both Departments tends to improve.

The Mint.

152. The position of the Mints has been entirely changed by the enactment in June last of Act VIII of 1893, by which the free coinage of silver was stopped. For the present the Mints are only required for the coinage of small silver and copper. The seignorage receipts accordingly entirely disappear in 1894-95. The expenditure of the Mints shows a diminution in the Budget Estimate of 1894-95 as a consequence of the cessation of the coinage of rupees, but the permanent establishments have not as yet been reduced.

153. The grant of Exchange Compensation Allowances has added largely to the expenditure in India under all the heads included in this group, as will be seen from the tables in paragraphs 75 and 113. Explanations of increases due to other causes will be found in paragraphs 80, 117 and 118.

154. The expenditure on Political Pensions tends to decrease with the death of the old pensioners, as the additions made to the list are now small. The death of the Maharajah Duleep Sing causes the larger portion of the reduction in 1894-95.

155. The expenditure on Civil Furlough and Absentee Allowances would be fairly stationary but for the decision to pay those allowances in England at the favourable rate of exchange of 1*s.* 6*d.*; this causes an increase to the charges with every fall in the market rate of exchange.

156. The expenditure on Superannuation Allowances is increasing from year to year. The pension list has not yet reached its maximum limit: and the cost of pensions paid in England increases with the fall in exchange, all pensions paid there being now practically fixed in sterling in consequence of the concession of a fixed rate of conversion of 1*s.* 9*d.* the rupee for pensions fixed nominally in rupees.

157. The Stationery and Printing charges increase from year to year owing to the yearly increasing amount and complexity of public business.

158. But little expenditure on direct Famine Relief has been necessary this, or is anticipated next, year.

159. As explained in Part I, the financial necessities have compelled the stoppage of expenditure on Railways from the Famine Grant. For the same reason, the expenditure on Protective Irrigation Works has also been restricted to the amounts required to carry on works already begun.

161. The gross traffic receipts from State Railways are now expected to exceed the Budget Estimate in the current year by Rx. 483,800, while the working expenses are increased by Rx. 171,600, the net improvement being Rx. 312,200. *State Railways, 1893-94.*

The Budget Estimate was prepared for an increase of Rx. 476,700 over the Actuals of 1892-93, while the improvement now expected in the gross traffic receipts of 1893-94 over the Actuals of 1892-93 is Rx. 960,500.

The Railways named below contribute the increases, as compared with the Budget Estimate, noted against them :—

	Increase. Rx.
East Indian	170,000
Rajputana-Malwa	70,000
Eastern Bengal	80,000
North Western	180,000
Southern Mahratta	70,000
Oudh and Rohilkhand	15,000

These good results are due to an increase in coaching traffic, owing partly to the *Magh Mela* at Allahabad, and to improvement in jute, wheat, seeds, and coal traffic. These increases are to a certain extent absorbed by a fall in the receipts from other Railways of which the undernoted are the most important :—

	Decrease. Rx.
South Indian	40,000
Burma	87,500
Indian Midland	12,500

These decreases are the results of a falling-off in the goods traffic, owing to unfavourable crops and to dull markets.

Guaranteed Railways, 1893-94.

162. The gross receipts of the Madras Railway and the Bombay, Baroda and Central India Railway show improvements of Rx. 85,000 and Rx. 115,000 respectively, but indications are not wanting of a falling-off upon the first-named Railway. The Great Indian Peninsula showed a considerable falling-off in the earlier months of this year, but has been doing better lately. The net traffic receipts expected from the three Railways are Rx. 153,100 better than the Actuals of 1892-93, and Rx. 162,500 better than Budget Estimate of 1893-94.

State Railways, 1894-95.

163. The gross receipts of State Railways are estimated for 1894-95 at Rx. 164,600 in excess, and the net traffic receipts at Rx. 21,900 in excess of the Revised Estimate for 1893-94. These very moderate additions are fully justified by increased mileage. It is not considered safe to anticipate the larger revenue which several of the lines are bringing this year. The estimates of the East Indian Railway, the Eastern Bengal Railway, and the North-Western Railway are all placed below the receipts expected in 1893-94. The large deterioration in the "net result" shown in the table in paragraph 160 is caused by the addition of interest charges in India and by the increase in the charge for Exchange on interest and annuities paid in England.

Guaranteed Railways, 1894-95.

164. The net traffic receipts of the three Guaranteed Railways are placed at Rx. 48,000 in excess of the Revised Estimate, and Rx. 201,100 in excess of the Actuals of 1892-93. The Madras line is not expected to do better than in the present year, and it has not been thought prudent to calculate upon a repetition in 1894-95 of the most favourable results attained by the Bombay, Baroda and Central India in the current year. On the other hand, an improvement of Rx. 85,000 is expected on the Great Indian Peninsula Railway, on which the depression in 1893-94 has been abnormal.

Irrigation, 1893-94.

165. The Revised Estimate of receipts is Rx. 18,100 below the Budget Estimate of 1893-94. This small decrease is the result of very considerable variations. A reduction of Rx. 20,000 occurs in the Punjab owing to restriction of irrigation due to abundant rainfall, while the North-Western Provinces contribute an excess of Rx. 25,200 owing to under-estimate of income from flow-irrigation and a general under-estimate of the revenue. Bengal also shows an improvement of Rx. 5,000. The share of land revenue is increased by Rx. 15,400 in the Punjab on the Bari Doab Canal, but it is decreased by Rx. 39,200 in Madras owing to an increase budgeted for not having been realised on account of the late date on which orders were issued in connection with the new settlement in the Tanjore District.

Irrigation, 1894-95.

166. The irrigation revenue is expected in 1894-95 to exceed the Revised Estimate of 1893-94 by Rx. 144,200.

This improvement falls under—

Total	165,900	—21,700	144,200

The Imperial share of the improvement under direct receipts from Major Works is Rx. 83,000, and is mainly due to an increase of Rx. 80,900 in the Punjab. The estimated increase of Rx. 76,500 under share of land revenue is due chiefly to the introduction of the new settlement in the Tanjore District of the Madras Presidency.

169. The expenditure in India continues to increase. Generally speaking the causes may be said to be—the fall in the rate of Exchange, which affects the amount of pay given to British troops in India, and the percentage of pay granted as Exchange compensation; the increase in the number of volunteers; the

greater cost of ammunition and appliances manufactured in India in consequence of the adoption of more elaborate and scientific armaments; the development of local manufactures of all kinds whereby the home charges have been reduced at the expense of the Indian Estimates; the occupation of Gilgit; and the increase in the price of food-supplies in India.

The expenditure in England shows promise of reduction. Exceptionally heavy outlay on Ordnance stores began in 1887-88 in connection with the arming of British troops with magazine rifles, with the supply of the new breech-loading field guns to Batteries in India, and with the completion of the mobilization reserves. These measures have now been practically completed.

This reduction in the Home charges is, however, to some extent counterbalanced by the increase in the effective charges due to the grant of deferred pay to the British Army, and by the increase in non-effective charges, namely, the pension charges for British troops who have served in India, and the pay and pension of non-effective and retired officers of the Indian service.

The increase under Exchange is due to the fall in the rate.

SPECIAL DEFENCE WORKS.

Expenditure on Defence Works since their commencement.

170. The following table shows the expenditure on "Special Defence Works":—

	Rx.

1894-95 Budget "	152,300
	4,460,173

Revised Estimate, 1893-94.

171. The difference of Rx. 194,600 between the Revised and Budget Estimates is due to the expenditure in England on armaments and stores having been over-estimated and also to a reduced programme of works in India. The Budget Estimate for 1894-95 is less than the Revised Estimate for 1893-94 by Rx. 189,700, owing to the postponement of several works and to the approaching completion of the supply of stores and armaments for the Aden defence works.

172. The total expenditure on special defence works being estimated at Rx. 5,030,000, if the amounts provided in the Estimates for 1893-94 and 1894-95 are spent, there will remain Rx. 569,827 for Expenditure in 1895-96 and future years.

Section V.—Capital Expenditure on Public Works not charged against Revenue.

173. The Capital Outlay on Railways and Irrigation Works not charged to Revenue has been for many years limited to an annual sum of Rx. 3,500,000. As it was considered desirable to push on the construction of those useful works at a more rapid rate than that limit allowed, it was decided when the Famine Grant was restored that the whole amount available from that grant, after meeting direct Famine Relief Charges and the net charge on account of the Bengal-Nagpur and Indian Midland Railways, should be devoted to the

construction of Protective Railways. Accordingly, since 1890-91 the total limit on the annual Capital Expenditure on Railways and Canals has been Rx. 3,500,000, not charged to Revenue, *plus* the amount available from the Famine Grant, usually about Rx. 1,100,000.

In June 1892 the Secretary of State authorised the Government of India to increase the annual expenditure not charged to Revenue by Rx. 500,000 above the limit of Rx. 3,500,000 in cases where the Government of India are satisfied that the money can without inconvenience be supplied to enable Companies to undertake new lines of railway and extensions.

In 1894-95, as already explained, the financial necessities require the temporary suspension of the Famine Grant. The ordinary programme for Capital Expenditure has therefore had to be restricted to Rx. 3,500,000. The additional Rx. 500,000 provisionally sanctioned by the Secretary of State in June 1892 has also been entered in the Estimates in case it may be required for expenditure by Companies, and this provision brings the total estimate of the expenditure not charged to Revenue up to Rx. 4,000,000.

48.—STATE RAILWAYS—CONSTRUCTION.

174. The Budget grant for 1892-93 amounted to Rx. 4,615,000 as under:—

175. The Revised Estimate for that year provided for a total expenditure of Rx. 4,589,100 against which the actual expenditure incurred amounted to Rx. 4,640,893, thus exceeding the Revised Estimate by Rx. 51,793 and the Budget provision by Rx. 25,893.

180. The most important event affecting the Ways and Means of the year was the failure for a time to sell bills on India after the closure of the Indian mints, with effect from 26th June 1893, to the free coinage of silver. It is now estimated that the total drawings of the Secretary of State in 1893-94 will be £9,400,000 against £18,700,000 entered in the Budget Estimate. The deficiency is met (1) by temporary loans to the extent of a net sum of £6,000,000; (2) by the issue of India 3½ per cent. debentures for £1,386,000; (3) by a reduc- *1893-94. Council Bills.*

tion in the cash balances of £1,012,538; and (4) by reduced payments on account of Expenditure not charged to Revenue, of family remittances of officers from India, and of issues to Railway Companies.

1893-94. Permanent Sterling Debt.

181. It was stated in paragraph 93 of the last Financial Statement that a 3 per cent. sterling loan of £1,300,000 would be raised in 1893-94 for the discharge of Oudh and Rohilkhand and South Indian Railway Debentures and for advances to Railway Companies. This loan was raised at an average price of £98 17*s.* 3*d.* per cent.

In addition to the above loan, the Secretary of State issued in September 1893 £1,386,000 India 3½ per cent. debentures repayable after five years in 1898. This issue was required to meet to some extent the demands on the Home Treasury during the period in which the Council Bills were not sold.

1893-94. Temporary Sterling Loans.

182. It has already been mentioned that the failure of Council Bills for a time necessitated the provision of funds in England by temporary loans in 1893-94. The entries in the Revised Estimate on this account are as follow:—

	£
Temporary Debt incurred—	
Loans on security of India Bills	6,000,000
Loans on security of East India Bonds	4,750,000
TOTAL	10,750,000
Temporary Debt discharged—	
Loans on security of East India Bonds	4,750,000
NET	6,000,000

The India Bills have a currency of six months only and were raised—

(1) £2,000,000 in November 1893 at an average rate of interest of £2 16*s.* 7*d.* per cent. per annum;
(2) £1,500,000 in December at £2 12*s.* 3*d.* per cent.; and
(3) £2,500,000 in January at £2 7*s.* 7*d.* per cent.

The loans on the security of East India Bonds were raised from time to time according to the requirements of the Home Treasury, and have been discharged with funds obtained by the issue of India Bills.

1893-94. Payments to Railway Companies.

183. The net payments to Railway Companies will be less by £508,400 than taken in the Budget Estimate. Most of the reduction occurs in the issue of funds for Stores and Establishment charges. The estimates of these issues are based on information supplied by the companies, and generally prove too high.

1893-94. Deposits and Advances.

184. The net receipts on account of "Deposits and Advances" are now expected to exceed the Budget Estimate owing to smaller advances having been made on account of Expenditure in England on Defence Works at Aden recoverable from the Imperial Government.

1893-94. Remittances from India

185. The reduction in the net payments on account of remittances is caused by (1) the abolition in August 1893, when Exchange Compensation Allowances were granted, of the system under which Military and some other officers were allowed to make family remittances through the Government Account; (2) the payments for railway stores having been less than the estimate; and (3) considerable repayments by Her Majesty's Treasury and other Public Departments in respect of advances or services in India.

1894-95. Home Treasury.

186. Provision is made in 1894-95 for a net payment to Railway Companies of their Deposits of £911,400 and for other net disbursements, excluding Loans and Council Bills, of £17,637,100.

1894-95. Ways and Means.

It will be seen that the present intention of the Secretary of State is to draw in 1894-95 £17,000,000 by bills on India, and to borrow by temporary loans a net sum of £2,300,000, partly to meet the net disbursements and partly to replenish the Home Treasury balances which have been reduced considerably below the normal amount in the current year.

The gross amount of the temporary loans is entered at £8,300,000; but provision is made for the repayment of the outstanding balance of those loans raised in 1893-94, namely, £6,000,000.

It should be understood that, in stating the present intentions of the Secretary of State, no sort of pledge is given that he will adhere to the programme.

The headings in italics are connected with, and explained by, the corresponding figures of the Secretary of State's account in England. The others refer to purely Indian transactions.

1893-94. Main Features.

188. It has been explained in Part I. of this Statement that the failure to sell Council Bills for a time has led to a large accumulation of cash balances in India. It is now expected that the balance in the Indian Treasuries on 31st March 1894 will be Rx. 26,251,756 against Rx. 12,643,105 taken in the Budget Estimate. The increase of Rx. 13,608,651 is fully explained by the smaller payments of Council Bills, which with Exchange are entered in the Revised Estimate at Rx. 16,200,800 against Rx. 30,101,800 taken in the Budget Estimate. The other noticeable features in the Ways and Means of this year are (1) an increase of Rx. 500,000* in the 3½ per cent. Public Loan of the year; (2) the

* The amount entered in the statement in paragraph 187 is Rx. 499,100; the difference of Rx. 900 is due to a tenderer for that amount having failed to take up his allotment.

repayment of the greater part—Rx. 1,100,000—of the outstanding balance of the 4½ per cent. loans; (3) an unanticipated receipt from the Bombay Municipality of Rx. 420,600, the amount of the balance of its loan due to Government; (4) a reduction of Rx. 283,800 under "Unfunded Debt;" this is due to the growth of the Savings Banks balance being less than anticipated—a result of the notice of reduction in the rate of interest from 1st April 1894; and (5) a reduction in the receipts for remittances to England owing to the discontinuance of family remittances through Government of Military and other officers.

1893-94. New 3½ per cent. loan of Rx. 3,500,000.

189. By Notification No. 2984, published in the *Gazette of India Extraordinary* of 14th July 1893, tenders were invited for a Public Loan of Rx. 3,500,000 at a rate of interest of 3½ per cent. per annum. The tenders received were opened simultaneously at Calcutta, Madras, and Bombay on the 15th August 1893. The average rate of issue was Rx96-3-2½ pies per cent.

In the Budget Statement of last year the probable amount of the loan in the year was stated as three crores. It was subsequently decided to discharge the outstanding balance of the 4½ per cent. loans, which matured on 15th September 1893, amounting to about 134 lakhs. This necessitated an increase in the amount of the new loan. An improvement in the cash balances, due to the repayment to the Government by the Bombay Municipality of a loan of 42 lakhs and to other causes, rendered it possible to restrict the increase to 50 lakhs. It was considered that the credit of the Indian Government now stands sufficiently high to justify the offer of 3½ per cent. only on the new loan instead of 4 per cent., the rate at which the Government of India has borrowed in India for many years. The quoted market price of the 3½ per cent. paper is now above par.

Discharge of 4½ per cent. loans.

190. Simultaneously with the issue of the Notification inviting tenders for the new 3½ per cent. loan of 1893-94 the balance of the 4½ per cent. loans of 1878 and 1879 (except the 7 shillings per cent. portion) was notified for discharge on 14th October 1893 by Notification No. 2985, dated 14th July 1893. An option was given to pay in 4½ per cent. Notes the amounts due on tenders for the new loan. It is now expected that the total payments in discharge of the 4½ per cent. loans will be Rx. 1,100,000 in the current year and Rx. 150,000 in 1894-95, and the estimates have been prepared accordingly.

1894-95. Main Features.

191. The Budget Estimate of 1894-95 provides for the payment of Council Bills for £17,000,000. Though the sterling amount is less than the Budget Estimate of 1893-94 by £1,700,000, equivalent at 1*s.* 2*d.* the rupee to Rx. 2,914,300, the decrease in the rupee payments will be only Rx. 958,900.

Owing to the large accumulation of cash balances, it will not be necessary to raise any loan in India in 1894-95, but, on the other hand, provision has been made to meet in full the demands of Local Governments and Administrations for advances to Municipalities and Local Bodies and also to meet an expenditure of Rx. 500,000 on Railway Construction in excess of the ordinary limit of Rx. 3,500,000 fixed for such expenditure from loans and balances.

Public loan.

192. Though it has above been stated that it is not the present intention of the Government of India to raise any loan in 1894-95, yet full liberty is reserved, as usual, to alter the programme now announced to any extent that may be considered desirable.

Savings Banks.

193. The following are the details of the transactions of Savings Banks during the last few years:—

Year.	Net additions to deposits cash.	Interest.	Total addition.
	Rx.	Rx.	Rx.
1887-88	656,300	224,000	880,300
1888-89	685,200	261,800	947,000
1889-90	—362,900	272,200	—90,700
1890-91	250,700	279,700	530,400
1891-92	517,900	306,200	824,100
1892-93	548,900	339,400	888,300
1893-94 Budget	438,600	372,400	811,000
1893-94 Revised	203,500	366,800	570,300
1894-95 Budget	111,400	325,800	437,200

The Post Office Savings Banks deposits would have shown the usual progressive increase but for the notice given of the reduction of the rate of interest from 3¾ to 3½ per cent. with effect from the 1st of April next. The withdrawals this year have been heavy since the issue of the notification on 30th December, and only a small net receipt is estimated for next year.

Loans to Municipalities, etc.

194. The *minus* figure under the head of Loans to Municipalities in the table in paragraph 187 is due to certain large repayments made during the year. It was stated in paragraph 100 of the last Financial Statement that the Bombay Port Trust took advantage of the favourable state of the money market to raise a 4 per cent. loan to repay Government in 1893-94 the balance of a 4½ per cent. loan of Rx. 616,100. A similar application from the Bombay Municipality for the repayment of a balance of about 42 lakhs was granted in the course of the year. The gross amount placed at the disposal of Local Governments for advances to Local Bodies, etc., in 1894-95 is Rx. 833,700, while the similar allotments for the two preceding years were Rx. 608,200 in 1893-94 and Rx. 662,900 in 1892-93. It was necessary in the previous year to curtail the demands of the Local Governments on a consideration of the ways and means of the year, but the present state of the balances has enabled Government to provide for the full amount asked for next year.

Cash balances.

195. The current year is now expected to close with a cash balance of Rx. 26,251,756 and for 1894-95 a closing balance of Rx. 21,684,256 is taken. The estimated transactions of the year thus result in a reduction in the balances by Rx. 4,567,500.

Section VII.—Summary.

196. The principal features in this Statement are—

(1) The Accounts of 1892-93 have closed with a deficit of Rx. 833,412.

(2) The Revised Estimates of 1893-94 show a deficit of Rx. 1,792,800, an amount somewhat in excess of that entered in the Budget Estimate, Rx. 1,595,100. There has been a decrease of Revenue under two important heads, Opium and Salt; but the Revenue generally has shown satisfactory progress, particularly the Railway Revenue. Notwithstanding the grant of Excharge Compensation Allowances, the expenditure of the year on the whole will not differ much from the amount entered in the Budget

Estimates. The rate of exchange is taken in the Revised Estimate at 1*s.* 2·6*d.* the rupee against the Budget rate of 1*s.* 2·75*d.*: this difference increases the direct charge under Exchange by Rx. 265,900.

(3) A loan of Rx. 3,500,000 at 3½ per cent. interest was raised in India at an average price of R96-3-2½ per centum. The balance (Rx. 1,341,400) of the 4½ per cent. loans was notified for discharge; Rx. 1,100,000 will be paid this year: the whole amount ceased to bear interest from the 14th October 1893.

(4) The Mints were closed to the free coinage of silver at the end of June 1893. For several months thereafter the Secretary of State was not able to sell Council Bills in any quantities. His drawings during 1893-94 are now estimated at £9,400,000, while the Budget Estimate was for £18,700,000. It has therefore been necessary to replenish the Home Treasury balances by temporary borrowing. The diminution in the drawings has at the same time caused a very large increase in the cash balances in India, which are now expected to amount on the 31st March 1894 to Rx. 26,251,756 against the Budget Estimate of Rx. 12,643,105.

(5) The Budget Estimates for 1894-95 show a deficit of Rx. 301,900.

(6) The deficit with which the Government of India were threatened in 1894-95 was between three crores and three-and-a-half crores of rupees. The measures by which the deficit has been reduced to the amount shown in the Estimates are—

(*a*) stringent economy in expenditure;
(*b*) the temporary suspension of a portion of the Famine Grant, Rx. 1,076,200;
(*c*) contributions from Provincial Governments, amounting to Rx. 405,000; and
(*d*) the imposition of Import Duties estimated to yield in 1894-95 a net return of Rx. 1,140,000.

(7) Apart from the new taxation, the Revenues are expected to yield a substantial increase in 1894-95. But the Opium Revenue shows a considerable decrease, the net Opium Revenue being taken at Rx. 4,138,300 as compared with the Budget Estimate for 1893-94 of Rx. 5,061,200.

(8) The rate of exchange is taken at 1*s.* 2*d.* the rupee as compared with 1*s.* 2⅝*d.* in the Budget Estimate of 1893-94, and there is an addition to the direct expenditure under Exchange of Rx. 1,371,500; Exchange Compensation Allowances are estimated to cost in 1894-95 Rx. 1,113,300, of which Rx. 400,400 will be Provincial. In consequence of the sterling borrowing necessitated by the failure to sell Council Bills during a part of 1893-94, the Interest charges in England in 1894-95 will be considerably increased, but other decreases in sterling expenditure nearly counterbalance that increase.

(9) The Capital Expenditure on Railways and Irrigation Works not charged against Revenue is estimated at Rx. 3,643,100 in 1893-94 and at Rx. 4,000,000 in 1894-95. In 1893-94 there is in addition an expenditure on the Construction of Railways of Rx. 1,079,700 charged to the Famine Grant: expenditure from the Famine Grant on this account will not be incurred in 1894-95.

(10) It is expected that the Secretary of State will in 1894-95 sell Council Bills to the amount of £17,000,000 and will raise temporary loans of £8,300,000, out of which he will use £6,000,000 to repay the temporary loans borrowed in 1893-94. These announcements are accompanied by the usual reservation of entire liberty to the Secretary of State to vary the amounts to be obtained by bills or raised by loan as he may find occasion.

(11) It is estimated that the closing balance in the Treasuries in India on 31st March 1895 will amount to Rx. 21,684,256, and it is accordingly not intended to issue any public loan in India in 1894-95. Full liberty is however reserved to the Government of India to vary this intention in any way and to any extent which may be found expedient.

(12) The programme embodied in the Budget Estimates of 1894-95 is described as a programme of retrenchment and of vigilance intended to tide the Government over a transition period.

1. Notice is hereby given that all the Notes of the Four per cent. Loan of 1842-43 will be discharged at the General Treasury of Fort William (Public Debt Office, Bank of Bengal, Calcutta) on November 1st, 1894, on which date the interest on such Notes will cease.

2. Proprietors of Notes hereby advertised for discharge have the option, which must be exercised before noon of Saturday, July 28th, 1894, of tendering their Notes for reduction of interest from 4 per cent. to 3½ per cent., such reduction to have effect from August 1st, 1895.

3. The reduced loan thus constituted will be known as the 3½ per cent. Loan of 1842-43, and no part of it will be paid off or discharged before August 1st, 1904, nor until the expiration of three months after notice of payment to be given by the Governor General of India in Council in the *Government Gazette*.

4. Notes may be tendered for reduction of interest at the Public Debt Office, Bank of Bengal, Calcutta, or at any other Bank (including the Bank of England) or Treasury, to which they are for the time being enfaced for payment of interest. Notes so tendered must bear the following endorsement duly signed:

6. Every Note so tendered will be enfaced in the following terms before it is returned to the proprietor :

"The interest payable on this Note is reduced to 3½ per cent., and the principal amount will not be discharged before August 1st, 1904."

(1) For "four per cent." will be substituted "three-and-a-half per cent."

(2) A clause will be added at the end—"The Governor General in Council hereby engages that this Note shall not be discharged before August 1st, 1904."

9. If by reason of the duly certified absence from India of the proprietor or of one of the proprietors of a Note included in the terms of this notification a legal signature to the endorsement mentioned in clause 4 cannot be given by noon of Saturday, July 28th, 1894, then in such case the tender will be accepted if the Note be left in the custody of the Public Debt Office, Bank, or Treasury (as the case may be), and the tender be legally signed before noon of Saturday, August 18th, 1894.

And whereas We are on terms of friendship and amicable intercourse with each of these States, and with their subjects and others inhabiting within their countries, territories, or dominions ;

And whereas great numbers of Our loyal subjects reside and carry on commerce, and possess property and establishments, and enjoy various rights and privileges, within the territory of each of the aforesaid States, protected by the faith of Treaties between Us and each of the aforesaid States ;

And whereas We, being desirous of preserving to Our subjects the blessings of peace which they now happily enjoy, are firmly purposed and determined to maintain a strict and impartial neutrality in the said state of war unhappily existing between the aforesaid States ;

We therefore have thought fit, by and with the advice of Our Privy Council, to issue this Our Royal Proclamation ;

And We do hereby strictly charge and command all Our loving subjects to govern themselves accordingly, and to observe a strict neutrality in and during the aforesaid war, and to abstain from violating or contravening either the Laws and Statutes of the realm in this behalf, or the law of nations in relation thereto, as they will answer to the contrary at their peril ;

And whereas in and by a certain Statute made and passed in a Session of Parliament holden in the 33rd and 34th year of Our reign, intituled "An Act to regulate the Conduct of Her Majesty's Subjects during the Existence of Hostilities between Foreign States with which Her Majesty is at Peace," it is, amongst other things, declared and enacted as follows :

"This Act shall extend to all the dominions of Her Majesty, including the adjacent territorial waters.

"If any person induces any other person to quit Her Majesty's dominions, or to embark on any ship within Her Majesty's dominions, under a misrepresentation or false representation of the service in which such person is to be engaged, with the intent or in order that such person may accept, or agree to accept, any commission or engagement in the military or naval service of any foreign State at war with a friendly State—

"He shall be guilty of an offence against this Act, and shall be punishable by fine and imprisonment, or either of such punishments, at the discretion of the Court before which the offender is convicted; and imprisonment, if awarded, may be either with or without hard labour.

"If the master or owner of any ship without the licence of Her Majesty knowingly either takes on board, or engages to take on board, or has on board such ship within Her Majesty's dominions, any of the following persons in this Act referred to as illegally enlisted persons, that is to say:

"(1) Any person who, being a British subject, within or without the dominions of Her Majesty, has without the licence of Her Majesty accepted, or agreed to accept, any commission or engagement in the military or naval service of any foreign State at war with any friendly State:

"(2) Any person, being a British subject, who without the licence of Her Majesty is about to quit Her Majesty's dominions with intent to accept any commission or engagement in the military or naval service of any foreign State at war with a friendly State:

"(3) Any person who has been induced to embark under a misrepresentation or false representation of the service in which such person is to be engaged with the intent or in order that such person may accept, or agree to accept, any commission or engagement in the military or naval service of any foreign State at war with a friendly State:

"Such master or owner shall be guilty of an offence against this Act, and the following consequences shall ensue, that is to say:

"(1) The offender shall be punishable by fine and imprisonment, or either of such punishments, at the discretion of the Court before which the offender is convicted; and imprisonment, if awarded, may be either with or without hard labour; and

"(2) Such ship shall be detained until the trial and conviction or acquittal of the master or owner, and until all penalties inflicted on the master or owner have been paid, or the master or owner has given security for the payment of such penalties to the satisfaction of two Justices of the Peace, or other Magistrate or Magistrates having the authority of two Justices of the Peace; and

(3) All illegally enlisted persons shall, immediately on the discovery of the offence, be taken on shore, and shall not be allowed to return to the ship.

Illegal Shipbuilding and Illegal Expeditions.

"If any person within Her Majesty's dominions, without the license of Her Majesty, does any of the following acts, that is to say:

"(1) Builds, or agrees to build, or causes to be built, any ship with intent or knowledge, or having reasonable cause to believe that the same shall or will be employed in the military or naval service of any foreign State at war with any friendly State; or

"(2) Issues or delivers any commission for any ship with intent or knowledge, or having reasonable cause to believe that the same shall or will be employed in the military or naval service of any foreign State at war with any friendly State; or

"(3) Equips any ship with intent or knowledge, or having reasonable cause to believe that the same shall or will be employed in the military or naval service of any foreign State at war with any friendly State; or

"(4) Dispatches, or causes or allows to be dispatched, any ship with intent or knowledge, or having reasonable cause to believe that the same shall or will be employed in the military or naval service of any foreign State at war with any friendly State—

"Such person shall be deemed to have committed an offence against this Act, and the following consequences shall ensue:

"(1) The offender shall be punishable by fine and imprisonment, or either of such punishments, at the discretion of the Court before which the offender is convicted; and imprisonment, if awarded, may be either with or without hard labour.

"(2) The ship in respect of which any such offence is committed and her equipment shall be forfeited to Her Majesty:

"Provided that a person building, causing to be built, or equipping a ship in any of the cases aforesaid, in pursuance of a contract made before the commencement of such war as aforesaid, shall not be liable to any of the penalties imposed by this section in respect of such building or equipping if he satisfies the conditions following, that is to say:

"(1) If forthwith upon a Proclamation of Neutrality being issued by Her Majesty he gives notice to the Secretary of State that he is so building, causing to be built, or equipping such ship, and furnishes such particulars of the contract and of any matters relating to, or done, or to be done, under the contract as may be required by the Secretary of State:

"(2) If he gives such security, and takes and permits to be taken such other measures, if any, as the Secretary of State may prescribe for insuring that such ship shall not be dispatched, delivered, or removed without the licence of Her Majesty until the termination of such war as aforesaid.

"Where any ship is built by order of or on behalf of any foreign State when at war with a friendly State, or is delivered to or to the order of such foreign State, or any person who to the knowledge of the person building is an agent of such foreign State, or is paid for by such foreign State or such agent, and is employed in the military or naval service of such foreign State, such ship shall, until the contrary is proved, be deemed to have been built with a view to being so employed, and the burden shall lie on the builder of such ship of proving that he did not know that the ship was intended to be so employed in the military or naval service of such foreign State.

"If any person within the dominions of Her Majesty, and without the license of Her Majesty,—

"By adding to the number of the guns, or by changing those on board for other guns, or by the addition of any equipment for war, increases or augments, or procures to be increased or augmented, or is knowingly concerned in increasing or augmenting, the warlike force of any ship which at the time of her being within the dominions of Her Majesty was a ship in the military or naval service of any foreign State at war with any friendly State—

"Such person shall be guilty of an offence against this Act, and shall be punishable by fine and imprisonment, or either of such punishments, at the discretion of the Court before which the offender is convicted; and imprisonment, if awarded, may be either with or without hard labour.

"If any person within the limits of Her Majesty's dominions, and without the licence of Her Majesty,—

"Prepares or fits out any naval or military expedition to proceed against the dominions of any friendly State, the following consequences shall ensue:

"(1) Every person engaged in such preparation or fitting out, or assisting therein, or employed in any capacity in such expedition, shall be guilty of an offence against this Act, and shall be punishable by fine and imprisonment, or either of such punishments, at the discretion of the Court before which the offender is convicted; and imprisonment, if awarded, may be either with or without hard labour.

"(2) All ships and their equipments, and all arms and munitions of war used in or forming part of such expedition, shall be forfeited to Her Majesty.

"Any person who aids, abets, counsels, or procures the commission of any offence against this Act shall be liable to be tried and punished as a principal offender."

And whereas by the said Act it is further provided that ships built, commissioned, equipped, or dispatched in contravention of the said Act may be condemned and forfeited by Judgment of the Court of Admiralty; and that if the Secretary of State or chief executive authority is satisfied that there is a reasonable and probable cause for believing that a ship within Our dominions has been or is being built, commissioned, or equipped contrary to the said Act, and is about to be taken beyond the limits of such dominions, or that a ship is about to be dispatched contrary to the Act, such Secretary of State or chief executive authority shall have power to issue a warrant authorizing the seizure and search of such ship and her detention until she has been either condemned or released by process of law: And whereas certain powers of seizure and detention are conferred by the said Act on certain local authorities:

Now, in order that none of Our subjects may unwarily render themselves liable to the penalties imposed by the said Statute, We do hereby strictly command that no person or persons whatsoever do commit any act, matter, or thing whatsoever contrary to the provisions of the said Statute upon pain of the several penalties by the said Statute imposed and of Our high displeasure.

And We do hereby further warn and admonish all Our loving subjects, and all persons whatsoever entitled to Our protection, to observe towards each of the aforesaid States, their citizens, subjects, and territories, and towards all belligerents whatsoever, with whom We are at peace, the duties of neutrality; and to respect, in all and each of them, the exercise of those belligerent rights which We and Our Royal predecessors have always claimed to exercise.

And We hereby further warn all Our loving subjects, and all persons whatsoever entitled to Our protection, that if any of them shall presume in contempt of this Our Royal Proclamation and of Our high displeasure to do any acts in derogation of their duty as subjects of a neutral Sovereign in a war between other States, or in violation or contravention of the law of nations in that behalf, as more especially by breaking, or endeavouring to break, any blockade lawfully and actually established by or on behalf of either of the said States, or by carrying officers, soldiers, despatches, arms, ammunition, military stores, or materials, or any article or articles considered and deemed to be contraband of war according to the law or modern usages of nations, for the use or service of either of the said States, that all persons so offending, together with their ships and goods, will rightfully incur and be justly liable to hostile capture, and to the penalties denounced by the law of nations in that behalf.

And We do hereby give notice that all Our subjects and persons entitled to Our protection who may misconduct themselves in the premises will do so at their peril, and of their own wrong; and that they will in nowise obtain any protection from Us against such capture, or such penalties as aforesaid, but will, on the contrary, incur Our high displeasure by such misconduct.

Given at Our Court at *Osborne House, Isle of Wight*, this seventh day of *August*, in the year of our Lord one thousand eight hundred and ninety-four, in the fifty-eight year of Our reign.

GOD Save the QUEEN.

FOREIGN OFFICE,
August 7, 1894.

MY LORDS,

HER Majesty being fully determined to observe the duties of neutrality during the existing state of war between the Emperor of China and the Emperor of Japan, and being moreover resolved to prevent, as far as possible, the use of Her Majesty's harbours, ports, and coasts, and the

waters within Her Majesty's territorial jurisdiction, in aid of the warlike purposes of either belligerent, has commanded me to communicate to Your Lordships, for your guidance, the following rules, which are to be treated and enforced as Her Majesty's orders and directions:

Her Majesty is pleased further to command that these rules shall be put in force in the United Kingdom, the Isle of Man, and the Channel Islands on and after the 12th day of this month, and in Her Majesty's territories and possessions beyond the seas six days after the day when the Governor or other chief authority of each of such territories or possessions respectively shall have notified and published the same, stating in such Notification that the said rules are to be obeyed by all persons within the same territories and possessions.

1. During the continuance of the present state of war, all ships of war of either belligerent are prohibited from making use of any port or roadstead in the United Kingdom, the Isle of Man, or the Channel Islands, or in any of Her Majesty's colonies or foreign possessions or dependencies, or of any waters subject to the territorial jurisdiction of the British crown, as a station, or place of resort, for any warlike purpose, or for the purpose of obtaining any facilities for warlike equipment; and no ship of war of either belligerent shall hereafter be permitted to sail out of or leave any port, roadstead, or waters subject to British jurisdiction from which any vessel of the other belligerent (whether the same shall be a ship of war or a merchant ship) shall have previously departed until after the expiration of at least twenty-four hours from the departure of such last-mentioned vessel beyond the territorial jurisdiction of Her Majesty.

2. If any ship of war of either belligerent shall, after the time when this Order shall be first notified and put in force in the United Kingdom, the Isle of Man, and the Channel Islands, and in the several colonies and foreign possessions and dependencies of Her Majesty respectively, enter any port, roadstead, or waters belonging to Her Majesty, either in the United Kingdom, the Isle of Man, or the Channel Islands, or in any of Her Majesty's colonies or foreign possessions or dependencies, such vessel shall be required to depart and to put to sea within twenty-four hours after her entrance into such port, roadstead, or waters, except in case of stress of weather, or of her requiring provisions or things necessary for the subsistence of her crew or repairs, in either of which cases the authorities of the port, or of the nearest port (as the case may be), shall require her to put to sea as soon as possible after the expiration of such period of twenty-four hours without permitting her to take in supplies beyond what may be necessary for her immediate use; and no such vessel which may have been allowed to remain within British waters for the purpose of repair shall continue in any such port, roadstead, or waters for a longer period than twenty-four hours after her necessary repairs shall have been completed. Provided, nevertheless, that in all cases in which there shall be any vessel (whether ships of war or merchants ships) of the said belligerent parties in the same port, roadstead, or waters within the territorial jurisdiction of Her Majesty, there shall be an interval of not less than twenty-four hours between the departure therefrom of any such vessel (whether ship of war or merchant ship) of the one belligerent, and the subsequent departure therefrom of any ship of war of the other belligerent; and the time hereby limited for the departure of such ships of war respectively shall always in case of necessity be extended so far as may be requisite for giving effect to this proviso, but no further or otherwise.

3. No ship of war of either belligerent shall hereafter be permitted, while in any port, roadstead, or waters subject to the territorial jurisdiction of Her Majesty, to take in any supplies except provisions and such other things as may be requisite for the subsistence of her crew, and except so much coal only as may be sufficient to carry such vessel to the nearest port of her own country or to some nearer destination, and no coal shall again be supplied to any such ship of war in the same or any other port, roadstead, or waters subject to the territorial jurisdiction of Her Majesty without special permission until after the expiration of three months from the time when such coal may have been last supplied to her within British waters as aforesaid.

4. Armed ships of either party are interdicted from carrying prizes made by them into the ports, harbours, roadsteads, or waters of the United Kingdom, the Isle of Man, the Channel Islands, or any of Her Majesty's colonies or possessions abroad.

I have, &c.,

KIMBERLEY.

The Governor-General in Council is pleased to direct that the Orders and Directions of Her Majesty the Queen, Empress of India, as contained in the aforesaid Proclamation and Letter are to be obeyed by all persons within the limits of Her Majesty's territories and possessions in India.

Name of Article.	Rate of duty.
RICE, husked or unhusked, including RICE-FLOUR, but not including RICE-BRAN and RICE-DUST, which are free	Three annas per Indian maund of 82⅔ lb avoirdupois weight.

STATEMENT OF OBJECTS AND REASONS.

In the Tariff Act passed in March last cotton yarns and piece goods remained exempt from duty. The existing state of the finances is such as to render necessary the revenue to be derived from the duties on these classes of goods, and this Bill is introduced to authorize the levy of them. The opportunity has been taken of introducing several detailed amendments which the experience of the past eight months has shown to be desirable, and of which the object is to make the Tariff classifications more clear and precise and more easy of application.

The 17th December, 1894.

J. WESTLAND.

J. M. MACPHERSON,
Deputy Secretary to the Government of India.

(*a*) "The owner of the goods" shall include the managing agent or other principal officer of a mill.

(*b*) For "the bill-of-entry or shipping-bill" shall be substituted "the return required by this Act;"

(*c*) Every reference to a warehouse, or warehousing, shall be construed as referring to a "warehouse" as hereinbefore defined.

Duties.

Imposition of duties on cotton yarns produced in British Indian Mills.

5. There shall be levied and collected at every mill in British India upon all cotton yarns produced in such mill, a duty at the rate for the time being prescribed in the Indian Tariff Act, 1894, for the levy of duty in respect of cotton yarns imported by sea: VIII of 1894

Provided that no duty shall be levied upon yarns of the count or number of 20 or less:

Provided also that the Governor-General in Council may, by notification in the *Gazette of India*, exempt from duty any yarns of any count or number not exceeding 24.

Explanation.—Yarn is said to be "produced" within the meaning of this Act—

(*a*) in the case of yarn which is reeled and bundled in the mill in which it is spun—when it is so bundled;

(*b*) in the case of yarn which is woven in the Mill in which it is spun—when it is passed from the spinning into the weaving section of the mill;

(*c*) in any other case—when it is issued out of the premises of the mill.

Power to Governor-General in Council to fix tariff values of such yarns.

6. (*1*) The Governor-General in Council may from time to time, by notification in the *Gazette of India*, fix, for the purpose of levying the said duties, tariff values of all such yarns as aforesaid or of any particular count or counts thereof, and alter any tariff values for the time being in force.

(*2*) In the absence of any Notification under sub-section (*1*), the tariff values for the time being fixed for the purpose of the levy of duty in respect of such yarns when imported by sea shall be the tariff values for the purpose of the levy of duty under this Act.

(*3*) Such tariff value shall, for the purposes of this Act, be deemed to be the "real value" of the yarns to which it applies, but save as aforesaid all yarns shall be assessed under this Act at their real value as defined in section 30 of the Principal Act.

Delivery of monthly returns of yarn produced by millowners.

7. (*1*) The owner of every mill shall prepare and deliver, or cause to be prepared and delivered, to the Collector, on or before the fifteenth day of each month, a return of all cotton yarn produced at his mill during the preceding month, whether liable to duty or not; and shall subscribe a declaration of the truth of such statement at the foot of such return.

(*2*) Every such return shall state for each count or number of yarn the quantity produced during the preceding month under each of the three heads mentioned in the explanation to section 5, and in the case of dutiable yarn the real value of such yarn.

(*3*) Every such return shall also contain such further information and be in such form and be subject to such conditions as to verification and otherwise as may be prescribed by any rules under this Act.

Assessment of duty and notice requiring payment.

8. (*1*) The Collector shall thereupon assess the duties, if any, payable in respect of the month to which the return relates, and unless the amount thereof is immediately tendered shall cause a notice, in such form as may be prescribed by any rules under this Act, to be served on the owner requiring him to make payment of the amount assessed within ten days of the date of service of the said notice.

(*2*) A notice under sub-section (*1*) may be served on the owner of a mill by delivering or tendering to him or his agent at his ordinary place of business a copy of the notice, or, if this cannot be conveniently done, by fixing a copy of the notice on one of the outer doors of the mill.

Application of certain sections of Sea Customs Act to assessment and recovery of duties under this Act.

9. Sections 30 to 34, 37, and 39 to 41, all inclusive, of the Principal Act, shall apply to the assessment and recovery of the duties imposed by this Act.

Provided that the rate of duty and the tariff valuation applicable to any yarn which has not been warehoused as hereinafter provided shall be those in force at the time when the yarn was produced, and not when the return was delivered as provided by the said section 37.

Recovery of unpaid duty.

10. (*1*) If any duty payable under this Act is not paid within the time fixed by any such notice as aforesaid for the payment thereof, the Collector may, in lieu thereof, recover any sum not exceeding double the amount of duty so unpaid, which he shall, in his discretion, think it reasonable to require.

(*2*) All sums recoverable under the last foregoing sub-section shall be recovered in the manner provided in Act II of 1886, section 30, sub-sections (*1*), (*2*) and (*3*) with respect to the sums therein referred to.

Warehousing.

Licensing of warehouses for storage of yarn, and fees for same.

11. (*1*) The Chief Customs Authority may from time to time license any room or place as a warehouse for the storage of yarn, and for the purposes of this Act every such place shall be deemed to be a warehouse and to have been duly licensed under the Principal Act.

(*2*) There shall be payable in respect of every such warehouse such and the like licensing fees and other payments as may for the time being be payable in respect of a private warehouse licensed under the Principal Act.

Provided that the Chief Customs Authority may remit the whole or any part of such fees or other payments in respect of any particular warehouse.

Permission to deposit yarn in warehouses.

12. (*1*) The owner of any mill may apply for leave to deposit in a warehouse any yarn in respect of which duty has become leviable under section 5 and which has not been issued out of the mill.

(*2*) Such application shall be in writing signed by the applicant, and shall be in such form as may be prescribed by the Chief Customs Authority.

Application to yarn so deposited of provisions of Chapter XI of Sea Customs Act.

13. All the provisions of Chapter XI of the Principal Act, so far as the same are applicable to imported goods of a similar description, shall apply to all yarn in respect of which an application has been made under section 12.

Exemption from assessment of yarn so deposited.

14. When any yarn has been deposited in a warehouse, the quantity and particulars thereof shall be specified as so deposited in the return made under section 7 for the month in which the yarn was produced, and the said yarn shall be omitted in the assessment and collection of duty.

Inspection.

Power to Collector to inspect mills, and take copies of records and accounts.

15. (*1*) The Collector, or any officer duly appointed by the Local Government in that behalf, shall have free access at all reasonable times during working hours to any mill.

(*2*) Any such officer may at any time, with or without notice to the owner, examine the working records, sale records, and accounts of any mill, and take copies of, or extracts from, all or any of the said records or accounts, for the purpose of testing the accuracy of any return, or of informing himself as to any particulars regarding which information is required for the purposes of this Act or any rules thereunder.

Information acquired to be deemed official secrets within meaning of Act XV of 1889.

16. (*1*) All such copies and extracts, and all other information acquired by any such officer on the inspection of any mill or warehouse, shall be regarded as strictly confidential, and shall be deemed to be official secrets.

(*2*) If any such officer shall disclose to any person other than a superior officer any such official secret as aforesaid without the previous consent in writing of the Chief Customs Authority, he shall be guilty of a breach of official trust, and shall, upon conviction thereof, be punishable in the manner provided by section 4 of the Indian Official Secrets Act, 1889.

XV of 1889.

(*3*) The restriction imposed by section 5 of the last-mentioned Act shall not apply to a prosecution for a breach of an official trust under this Act.

Export and Drawback.

Grant of certificate when dutiable yarn is to be exported to Foreign Port.

17. If any dutiable yarn is exported by sea to any Foreign Port before the return in respect of it has been delivered to the Collector under section 7, the owner of the mill in which it was produced may apply to the Collector at the Port of Shipment, who, on being satisfied that such yarn has actually been shipped for export, shall grant him a certificate stating the quantity and particulars of such yarn, and that it has actually been so shipped.

When certificate granted, yarns to be exempt from duty.

18. When any certificate has been granted under section 17, the quantity and particulars of the yarn stated therein shall be specified as so shipped in the return made under section 7 for the month to which the yarn relates, and the said goods shall be omitted in the assessment and collection of duty.

Repayment of duties paid in case of yarns exported to Foreign Ports.

19. When any yarn upon which duty has been paid under this Act is exported by sea from any Customs Port to any Foreign Port, such duty shall, except as otherwise herein provided, be repaid as drawback:

Provided that in every such case the yarn has not been woven into cloth or otherwise altered in character since the payment of duty, and is identified to the satisfaction of the Collector at the Port of Shipment, and that the export is made within two years from the date of payment of the duty, or within such further time as the Chief Customs Authority on sufficient cause shown may in any case determine.

Repayment of duties in case of certain cotton fabrics exported to Foreign Ports.

20. (*1*) When any cotton fabrics woven in a mill in India and composed in whole or in part of dutiable counts of yarn are exported by sea from any Customs Port to any Foreign Port, the exporter may apply to the Customs Collector at the port of shipment for the repayment as drawback of any duty which may have been paid under this Act in respect of such yarn.

(*2*) In every application made under sub-section (*1*) the applicant must state—

(*a*) the quantities and counts of yarns in respect of which drawback is claimed, the mill at which they were produced, and, as nearly as possible, the dates on which they were produced;

(*b*) the mill at which, and, as nearly as possible, the dates on which the fabric was woven.

When such refunds may be granted.

21. The drawback shall be allowed by the Collector if it is proved to his satisfaction—

(*1*) that the said fabric has been woven within six months of the date on which it is shipped for export;

(*2*) that the yarns in respect of which drawback is applied for have paid duty within the said six months.

Power to prohibit repayment of duty in case of exportation to certain ports.

22. The Governor-General in Council may, from time to time, by notification in the *Gazette of India*, prohibit the payment of drawback on the exportation of yarn or cotton fabrics to any specified Foreign Port.

No repayment of duty to be granted in certain cases.

23. Notwithstanding anything herein contained, no drawback shall be allowed in respect of any yarn or cotton fabrics on which duty has been paid—

(*a*) when the goods are of less value than the amount of drawback claimed, or

(*b*) when the claim is for drawback amounting to less than 5 rupees in respect of any single shipment.

35. The provisions of the Principal Act as to drawback on export shall apply to all yarns upon which duty has been paid under this Part.

Application of provisions of Sea Customs Act as to drawback to yarn taxed under this Part.

STATEMENT OF OBJECTS AND REASONS.

The finer classes of cotton manufacture in India enter into direct competition with the cotton manufactures imported from England. As it is intended to weight these last with an import duty, it is considered necessary to levy at the same time a countervailing duty upon the competitive classes of Indian manufactures.

INDIAN TARIFF ACT, 1894, AMENDMENT BILL.

The Hon'ble MR. WESTLAND moved for leave to introduce a Bill to amend the Indian Tariff Act, 1894. He said :—

"On the 1st of March of this year I had the honor of introducing in this Council a Bill for the renewal of the import duties, which had been abolished in various stages from 1878 to 1882, and explained that the proposal of the

Government was to levy duties, except in a few cases, of five per cent.; that Her Majesty's Government had, in view of the financial position, assented to this course, but that they were not prepared at that time to sanction the inclusion of cotton yarns or cotton fabrics among the articles declared liable to duty. The discussions which took place in this Council during the consideration of that Bill made it evident that the exclusion of these cotton duties was a policy which was not favoured by the individual members of Your Excellency's Council, but which was, for the time at least, directed by Her Majesty's Government, who, through the mouth of Your Excellency, gave us the assurance that if, after an interval sufficient to judge of the position as affected by the new Tariff Act, the course of exchange, and other circumstances, there were no improvement, they would be prepared to receive a further representation on the subject.

"I need not recount the discussions which have since then taken place on this subject. It has been discussed at length both in the House of Lords and in the House of Commons, and the Government of India have also laid before Her Majesty's Government the ample representations which they received on the matter from various public bodies in India. Finally we received the instructions of Her Majesty's Government on the general question in the Secretary of State's Despatch of 31st May 1894, in which, repeating the undertaking given through Your Excellency on 10th March, that Her Majesty's Government were prepared, if necessity arose, to receive proposals on the subject, he laid down the economic conditions which it would be necessary to observe in any proposals we made.

"I am concerned at present only with the question of the import duties on cotton goods, the imposition of which has now been sanctioned by Her Majesty's Government: the condition which has been attached to this sanction I shall deal with when I take up the second part of the duty which to-day's list of business allots to me.

"Under the circumstances which I have stated, I imagine that the Council will require little explanation of me, in justification of the Bill I ask leave to introduce. I do not intend to anticipate the financial explanations that I shall have to give in this place three months hence. I would merely remind the Council that it was by means which were only temporarily available, that in the estimates which I produced last year the revenue was brought within about 30 lakhs of the expenditure: and that was done by taking the exchange at fourteen pence. It is only by a miracle such as we cannot hope for, that we shall be able to base next year's estimate upon so favourable a rate; and even if we did so, we would, estimating on the basis of last year's figures, have to face a deficit of a crore or a crore and a half at least. I consider it to be as certain as anything can be, that depends upon such an unstable item as exchange, that without the aid of the cotton duties we shall not be able to present to the Council in March next such estimates as would meet with the Council's approval.

"The necessity of the income derivable from the cotton duties being thus established, it seemed to the Government to be advisable for many reasons that these duties should be introduced as soon as possible, and without waiting for the season when the Financial Estimates come before us in detail. The anticipation of these duties has already, as we are informed, caused considerable orders to be sent to England, and we learn from England also that goods are being shipped in larger quantities than usual, in order that they might arrive before the duties become leviable. To postpone legislation on the subject merely means to divert into the pockets of those importers the profit which I think they would themselves admit properly belongs to the State. There are also other economic disadvantages which arise to us, from a temporary excess of imports. I have no hesitation, therefore, in asking that we may be allowed under the circumstances, to anticipate the financial arrangements of next year by bringing the proposed duties into effect at once. Even if we are fortunate enough not to require for the balancing of the current year's account the revenue they will bring in, yet we have the heavy deficits of the last two years to make up for, not to talk of the suspension of the famine insurance grant of the current year.

"We have taken the opportunity afforded by the introduction of the cotton duties to revise the Tariff also in some other particulars, keeping in respect

of them, however, strictly within the lines of policy explained when the Tariff Bill was introduced in March last. In so far-reaching a subject, it was necessarily impossible to foresee all the difficulties and doubts that would arise in applying the provisions of the Tariff, and though we have done our best to meet these difficulties, I am bound to admit that in some cases there has been cause for complaint. The main reason for this is that the Tariff is so drawn up as to leave, in some cases, a doubt as to whether certain articles are taxable or not. In a Tariff which has been in force for half-a-century, practice and custom have had the effect of defining pretty clearly the classification for Tariff purposes of the articles which are imported; each variation in the course of trade, each new article which has entered into the list of imports has, as it presented itself, found its assigned place in the Tariff classification. But when a new Tariff is introduced, after twelve years' abeyance, the changes that have intermediately taken place in the course of trade present themselves in too great numbers for immediate settlement, and give rise to differences of opinion between the Collector and the payer, or rather to cases in which the latter is not satisfied with the decision of the former.

"I am quite willing to admit that a merchant who would pay without demur a duty which was clearly imposed upon him by the law, is reasonable in resenting the levy of the same duty when he considers it is imposed upon him only by an interpretation of the law in which he does not concur. However clear the interpretation may be to an officer who is accustomed in his daily duty to deal with questions of classification, the merchant may reasonably claim that the law itself should be set forth in terms which do not leave the question of taxation to considerations which might, even for a short time, be interpreted in one way at one Customs port and in another way at another.

"The difficulties and doubts in this respect have mainly arisen out of two causes, and these I shall ask the Council to enable me to remove.

"In the first place, the schedules as they stand at present are statements by classes of the goods that are liable to duty; they make reference to the goods which are free from duty, only when it is necessary to exempt some specified item or items coming under a class which is dutiable. When, therefore, an article is presented to the Collector, the question that has to be decided is, does it, or does it not, fall within one of the specified classes; if it does not, there is no authority to tax it, and it must go free. Now if the huge variety of articles is considered, and the fact that our Tariff specified 62 classes only, it will easily be seen that there are numerous articles which the importer at least considers do not come within any of the classes, and which he therefore claims should go free. It does not satisfy him to be told that in the trade returns, upon which the Tariff classification was based, the articles in dispute have always been taken within a specified one of these 62 classes.

"In order to remove this cause of variance, we have adopted a principle which is followed by the American Tariff and by several other Tariffs I could name. We carefully specify and define the free headings as well as the taxed ones, and then we add that all unenumerated articles have to pay the general rate of duty. The result is that the contention that some specific article does not fall within any of the Tariff classifications results, not in letting it go free, but in subjecting it to taxation. I need not say that this course is adopted only because we believe it carries out the intention of the Legislature, when the matter was under discussion last March. A reference to the discussions in the Council will show that the principle of taxation was that everything should pay duty which there was not some special reason for exempting. This principle is obviously strictly carried out by examining and specifying what ought to be exempt, and then saying that everything else should be taxed. And in fact a mistake in this direction is easily corrected, for the Executive Government has the power of exempting anything that is by law taxable; but a mistake of the opposite kind, the accidental exemption, on a mere technical ground, of some unspecified article while other things of exactly the same character and use are taxed, creates an inequality which cannot be remedied without legislation.

"I may give one illustration of this, which, though it is not the case of an article taxed at the general rate of duty, I select because it arises in connec-

tion with the very first article in our schedules,—that of fire-arms. Somebody has invented a gun in which the explosive force is obtained by the release of highly compressed carbonic acid gas. These guns are quite deadly enough for any practical purpose, and ought for any purpose of taxation to be reckoned with fire-arms discharged in the ordinary way, but as the explosion is determined by a mechanical act, and not by combustion of any kind, the arms are not fire-arms and are chargeable with a much lower rate of duty than fire-arms.

"Or take the case of sponges: they were meant to be taxed under the classification of toilet requisites; but unfortunately sponges are used for many purposes besides application to the human body, and this gives occasion to a contention that under the existing Tariff sponges are not always taxable. A similar doubt of the opposite kind has arisen in the case of hops and certain pulses. We omitted all mention of them, with the intention of leaving them free of duty, but the question has arisen whether they are not, under the classification of 'provisions,' taxable at the rate of five per cent. under article 3.

"In these instances and in others we have made the necessary correction in the Tariff, but it is only by actual experience that we can say in how many cases in future similar difficulties will arise. Trade usages and trade nomenclature frequently create differences and difficulties in these points of detail, and the best way to remove them and prevent their interfering with the intended effect of the law is that which we have adopted, as I have explained above, in common with the American and several other Tariffs.

"The second cause of the difficulties to which I am alluding is the indefiniteness of the lines which divide machinery which is free, articles made of iron which are taxed at one per cent., and hardware and cutlery, including ironmongery, which pays the five per cent. rate of duty. The exemption of machinery was based on the principle that it was undesirable to burden with a five per cent. duty capital employed in the productive industries of the country; but, even while the old Tariff was in force, difficulties were found in restricting the application of the exemption within its intended limits. 'Machinery' is a somewhat wide term, and it gives rise to claims for exemption of 'machines,' which is a still more indefinite and extensive term. We have met this difficulty by giving a somewhat precise definition of machinery, which will, we hope, have the effect of opening the door freely to such articles as represent what may be called the fixed capital employed in productive industries, but will at the same time prevent claims arising for exemption of articles which, though they may bear, in common parlance, the name of machines, have no right to expect entry into India without the same payment of duty which we levy upon nearly all other imported articles. The proposed definition of machinery was circulated to Chambers of Commerce, and other authorities, a short time ago, and has been slightly expanded in consequence of suggestions received.

"These are the two principal directions in which we have amended the Tariff, with the object of making its effect more clear and precise and less liable to question. We hope that the additional clearness which we have imparted to it will remove the difficulties that have arisen in its application, and facilitate and expedite the action both of the Customs officers and of the importing merchants. It will be seen that the inclusion of the free classes, and the more careful definition of the taxable ones, have resulted in increasing the number of articles from 62 to 117, while keeping, as we believe, strictly within the intentions and principle of the original Act.

"We have also, in respect of the other articles of the Tariff of March last, made some amendments in the definitions, chiefly in the direction of expressing them more clearly and removing the chances of doubt as to what they really contain.

"The valuations have also undergone a revision. We receive monthly returns of prices, which in some cases at least are sent also to the Chambers of Commerce, and on the basis of these returns we have examined the valuations in the existing Tariff. The valuations adopted are mostly based on the prices of October, care being taken that nothing special or peculiar to that month has been taken as a permanent or normal value. This revision of valuations is a

function which the Executive Government have authority to discharge without special reference to the Legislature, but we have thought it best to combine the operation with the present general revision of the Tariff."

The Motion was put and agreed to.

The Hon'ble MR. WESTLAND also introduced the Bill.

The Hon'ble MR. WESTLAND also moved that the Bill and Statement of Objects and Reasons be published in the Gazette of India in English. He said:—"I have to explain that we have modified the usual form of this Motion in omitting the publication in the local Gazettes. The fact is that it will be necessary for me to propose to the Council that all the requisite steps be taken as soon as possible. I have taken measures that the Gazette of India in which this Tariff will be published will be amply distributed at all the Customs-ports, so that, so far as regards local knowledge of its provisions publication in the local Gazettes is not absolutely necessary. The local Gazettes only appear, like our own Gazette, once a week, and if I were to move that the Bill be published in the local Gazettes, it is quite possible that when the Council came to a full discussion of the Bill it would be found that some of these local Gazettes had not had time to publish it."

The Motion was put and agreed to.

COTTON DUTIES BILL.

The Hon'ble MR. WESTLAND also moved for leave to introduce a Bill to provide for the imposition and levy of certain duties on cotton goods. He said:—

"I have now to ask the permission of the Council to supplement the imposition of import duties on cotton goods by introducing a Bill for the levy of excise duties on certain cotton goods manufactured in India.

"I would not be dealing straightforwardly with the Council if I pretended that this measure was recommended by the Government of India on its own merits. No Government would desire, except under the extremest stress of financial necessity, to impose a duty upon an industry so deserving of any fostering care which the Government can bestow upon it, as the cotton manufacturing industry of India. The proposal I make is therefore not made on its own merits, but as the necessary accompaniment of the fiscal measure which I have already to-day laid before the Council—a fiscal measure which we believe to be rendered necessary by the financial circumstances in which we find ourselves.

"Her Majesty's Government, representing the supreme authority in the administration of India, and following the instructions of the House of Commons, have stipulated that if we are obliged by stress of finance to impose an import duty on cotton goods, we must deprive it of a protective character by imposing an equivalent duty upon similar goods manufactured in India, to the extent to which these enter into direct competition with goods imported from the United Kingdom. I do not desire to discuss this condition—it is a decision arrived at by an authority which is as capable of pronouncing a judgment on the economic question as the Government of India is, and which has, by the constitution of the Government of India, the authority to enforce it.

"The part which the Government of India have taken in the discussion of the subject has been, in the first place, to lay before Her Majesty's Government such arguments on the subject as occur to themselves or as were communicated to them by various representative bodies in this country; and in the second place, after receiving the decision of Her Majesty's Government on the matter which they accept as a fully-instructed decision, to consider in what manner they can carry out the requirements of the House of Commons, while at the same time conserving to the utmost degree consistent with those requirements the interests of manufacturers in this country, and avoiding to the utmost possible extent all interference with the processes of manufacture and production in this country.

"The Bill which I now ask leave to introduce sets forth in legislative form the method in which we propose to carry into effect the results of our considerations.

"The first question, therefore, to which our enquiries were directed was the extent to which Manchester and Indian manufacturers compete. The details of the subject will be found in the papers laid before the Council, but generally it may be said that below the class of yarns described as 24s to 30s, the circumstances of production are such as to give India a natural advantage over Manchester, and above that class they are such as to give Manchester a natural advantage over India. The markets for these different classes of goods, the coarser and the finer, are also to a very great extent distinct.

"Both Manchester and India confine themselves for the most part to their respective spheres of industry, and thus to only a limited extent compete with each other, their processes in each case being adapted to their own spheres and not to their competitors'. In fact, if it were not that by the continuous advance of the Indian manufacturers in skill and in enterprise, they are beginning, by the manufacture of the higher counts, to invade what has hitherto been the province of Manchester, it might be said that the two classes of manufacture and consumption were entirely distinct.

"The only fear, therefore, that arises to Manchester is that the imposition of a duty of 5 per cent. upon Manchester goods may give such an advantage to the Indian manufacturer in respect of the finer classes of goods, as to enable him, by reason of the difference of taxation, to oust Manchester in an increasing degree from its own sphere of manufacture; and we carry out the condition of non-protection imposed upon us by subjecting to an equivalent excise duty the classes of goods which I have described as primarily belonging to the sphere of non-Indian manufacture.

"We have had some correspondence with Her Majesty's Government as to the precise point where the line should be drawn The information of the Government of India is that practically nothing below 28s is imported from Manchester, and we, therefore, proposed to limit our tax to counts higher than 24. The Secretary of State, on the other hand, believes, from the information supplied to him, that cloth is imported into India which contains, although in combination with finer yarns, yarns of count 24; and considering Her Majesty's Government pledged to the House of Commons to insist on the avoidance of all protection, desired to make 20s the highest free count. I may explain that there is not the least difficulty in getting the information in question as regards yarns. Yarns are classified by counts, and we know that of the total of imported yarns, only 2 per mille are of count 24 or less. Moreover, as Manchester, though it has the bulk of this trade, has not the monopoly of it, the probabilities are that a great part of this 2 per mille represents a portion of the import trade that does not belong to Manchester at all. It is more difficult, however, to gather the exact facts regarding woven fabrics; they are not classified for trade purposes by the counts of the yarn they contain, and it requires an expert examination to decide what the counts of the yarns really are. The fact, therefore, regarding which there is this difference of information between ourselves and the Secretary of State can be solved only by an enquiry of a kind that it is not possible to undertake while a measure like the present one is known to be under consideration, and we have made therefore this arrangement, with the sanction of Her Majesty's Government, that on the first introduction of the Bill we shall fix the line at 20, but we shall take power to raise it to 24, if it is found upon enquiry that woven fabrics imported from Manchester do not, as a matter of fact, contain yarns so coarse.

"Our proposal, therefore, is to levy an excise duty upon all yarns manufactured in mills in India which are above the count of 20, power being taken to exempt up to 24. We do not touch the hand-industry; little or no yarn of the finer counts is now-a-days spun by hand, and what is spun cannot be regarded as competing in the market with mill-spun yarns. Village industry is, however, almost confined to the weaving of yarns, either imported or Indian-manufactured.

"It will be seen from the papers that our first intention was to tax imports of fabrics at 5 per cent., and to tax yarns, both imported and manufactured, at

$3\frac{1}{2}$ per cent., these being the rates of the former Tariff. Objection has been raised to this as containing in itself an element of protection, and we now propose to take a 5 per cent. duty all round. The difference in the operation of a 5 per cent duty upon Manchester and upon India is this. The Indian producer will pay 5 per cent. duty on the yarns, and he will have also to pay something in respect of duty on the stores consumed in manufacture. The Manchester producer has not to pay duty on these stores, but on the other hand he has to pay the duty upon that portion of the value of his fabrics which represents the cost of the conversion of yarn into cloth, and upon the charges of conveyance to India. I do not know which of the two will in this respect have the advantage; in any case the difference will be a very small one.

"My discussion of the subject will have shewn the Council that our intention is to tax the production of yarns only—that is, those of the higher counts,—and to tax cotton fabrics only through the taxation of yarns. It has been a great object with us so to regulate our procedure as to interfere as little as possible with the processes of production. If we tax the yarns, the cotton fabrics which are woven from them will necessarily pay their due share of duty, without our having in any way to touch the weaving departments of the mills. And as regards the taxation of the yarns, the method we have adopted is that of avoiding all interference with the mills themselves and with mill management, and basing our assessments upon monthly returns of production, which we shall lay upon the mill-owners a legal obligation to render to us. We believe we can take steps to prevent incorrect returns being sent to us, and can satisfy ourselves that the returns sent us as a basis of assessment are fairly and truly compiled. The processes of manufacture are such as to require the maintenance in the mills themselves of working-records which afford ample means of testing the returns. The problem set before the manufacturer, when he is producing 20s, for example, is that of producing 16,800 yards of yarn which shall weigh one pound neither more nor less; and this exact result cannot be attained except by examining and recording the result of each process and adjusting it to a definite standard. Moreover, it must be remembered that the yarns we tax are the finest that are produced in India, and are such as can be manufactured only in mills which are thoroughly well organized and managed. If we draw the dividing line above 20s, the yarn taxed in India will be only about 20 per cent. of the whole production, and if we draw it above 24s, it will be only about 6 per cent. In either case many mills will fall entirely outside the area of taxation, as they do not produce the finer counts at all, and their work and disposal of their produce will therefore be in no way interfered with.

"We provide that yarns which are intended for export either shall not pay any duty at all, or if they have paid it, that the full amount shall be refunded.

"As we do not propose the present measure for the sake of the revenue we intend to derive from it, we do not attempt to justify it by shewing the amount of revenue it will bring in, nor can it legitimately be attacked on the ground that the revenue is too small to warrant the steps we take. The gross revenue I expect from Excise duties is only about seven lakhs, and if the dividing line is raised to 24, only about two and a half lakhs; but the revenue with respect to which and for the raising of which the Bill is introduced, is that derived from the Cotton Duties as a whole. This I estimated last March at an annual sum of Rx. 1,350,000, and it would be considerably increased if based upon later figures.

"It remains for me to make some remarks on the manner in which we propose to deal with mills established outside British India. Those in Berar we need not reckon with; these territories are subject to our direct administration, and whatever law we apply to British India we can apply also to Berar.

"In Native States there are only one or two cases as yet with regard to which the question is of any practical importance, and the chief of these are the mills established in the territories of His Highness the Nizam. Our present information is that the yarns produced at these mills are consumed within the Nizam's own territories and do not enter British India at all. If that is the case, the question does not affect us, and is one for settlement by the Nizam's Government. But so far as regards this class of mills the existing law gives us ample power.

We can under the Tariff Act declare the territory of any Native Chief to be foreign territory, and thereupon all imports from it become subject to the ordinary duties levied upon goods imported by sea. But to make things perfectly clear we have repeated that provision in the present Bill, and have thus taken power, even without subjecting to duty all imports from any such States, to levy the duties upon all cotton goods so imported, and, if it is necessary, to prohibit importation except by specified routes. If we are burdening our own manufacturers in order to avoid protecting them against Manchester, we shall certainly take steps to prevent the protection, against our own manufacturers, of goods manufactured outside British India."

The Motion was put and agreed to.

The Hon'ble MR. WESTLAND also introduced the Bill.

The Hon'ble Mr. PLAYFAIR said :—"I beg leave to reserve my remarks on the Bill introduced by the Hon'ble Mr. Westland until I have had an opportunity of examining it."

The Hon'ble MR. WESTLAND also moved that the Bill and Statement of Objects and Reasons be published in the Gazette of India in English. He said :—"I have already explained the reasons for the shortness of this Motion but I may state that, as a matter of fact, the mill-owners and the Chamber of Commerce of Bombay have in their possession at the present moment the Bill now laid before the Council. I have taken every possible step to keep them informed of the measures which are being taken here. I may also mention that, with Your Excellency's permission, I shall move for a Select Committee on Thursday next. The Hon'ble Mr. Playfair says that he intends to reserve his remarks until that day. It was with the intention of affording every opportunity for the examination of the Bill before discussion upon it in this Council took place that I have taken these special measures to communicate the substance of the Bill to the people interested in it in Bombay, and that I have put off for three days the Motion that the Bill should be placed before a Select Committee."

The Motion was put and agreed to.

The Council adjourned to Thursday, the 20th December, 1894.

Ordered, that the following papers relating to the imposition of Duties on Cotton Goods be published for general information in a Supplement to the *Gazette of India.*

STEPHEN JACOB,
Officiating Secretary to the Govt. of India.

Despatch from the Secretary of State for India (RIGHT HON'BLE H. H. FOWLER), to the Government of India,—No. 65 (Revenue), dated 31st May 1894.

INDIAN TARIFF ACT AND THE COTTON DUTIES.

In a separate Financial Despatch, I hope shortly to review the budget estimates of your Excellency's Governments for the year 1894-95; I now desire to address you on the subject of the Indian Tariff Act, 1894, by which import duties have been imposed, in order to meet in part the deficit caused by the further fall in the gold value of silver.

2. When the Tariff Bill was discussed in your Legislative Council, the Indian and other non-official members spoke and voted against the exemption of cotton goods from import duties; and your letter of the 21st March forwards memorials from Chambers

of Commerce and other bodies to the same effect. I attach much importance to these expressions of opinion, and to your representations concerning the state of Indian public feeling upon the subject, and I have inquired carefully into the recent history of this important question.

It is not necessary to refer in detail to the duties, levied at different rates, before 1875. In that year cotton twist was subject to an import duty of 3½ per cent., and other cotton goods to an import duty of 5 per cent. *ad valorem*. In July 1875, the Marquis of Salisbury, Secretary of State for India, drew the attention of the Government of India to the desirability of abolishing the import duties on cotton goods as soon as the condition of the Indian finances permitted such a course. He added,—"It "is impossible to believe that under these conditions the duty can be permanently main- "tained. The entire acceptance of the system of free trade by England is incom- "patible with the continuance of an exception apparently so marked. Parliament, "when its attention is drawn to the matter, will not allow the only remnant of protec- "tion within the direct jurisdiction of the English Government to be a protective duty, "which, so far as it operates at all, is hostile to English manufactures.

"But though the duty will not be permanent, its prolonged existence cannot fail "to have serious effects. During the agitation which will precede its abolition, feelings "of animosity on both sides will be aroused. It will be represented in India, however "mistakenly, as a direct conflict between Indian and English interests in which "Parliament is being moved to prefer the latter. This excitement will prevail more "or less widely in proportion to the strength of the interests which are assumed to be "affected by it; and if the prosperity of this industry" (the Indian cotton manufac- "turing industry) "corresponds to its present promise, the strength of these interests "will grow steadily with the lapse of time.

"These considerations will, I doubt not, commend to your Excellency's mind the "policy of removing, at as early a period as the state of your finances permits, this "subject of dangerous contention. The precaution has, indeed, been delayed too "long."

3. While Lord Salisbury's Despatch was on its way to India, the Legislature in that country passed the Tariff Act of 1875, making no alteration in the import duties on cotton goods. The Secretary of State, writing in November 1875, commented on the absence of any provision as to the cotton duties in the new Tariff Act; and he remarked that the import duty on cotton manufactures was "on general principle liable to "objection, as impeding the importation of an article of first necessity, and as tending "to operate as a protective duty in favour of a Native manufacture. It is thus incon- "sistent with the policy which Parliament, after very mature deliberation, has sanc- "tioned, and which, on that account, it is not open to Her Majesty's Government to "allow to be set aside, without special cause, in any part of the Empire under their "direct control." Lord Salisbury regarded "the speedy removal of the cotton duties "as a matter of serious importance both to Indian and Imperial interests;" and he added that "the entire removal of the duty should not be adjourned for an indefinite "period, but provision should be made for it within a fixed term of years."

4. In July 1877 the House of Commons passed a Resolution that "the duties now "levied upon cotton manufactures imported into India, being protective in their nature, "are contrary to sound commercial policy, and ought to be repealed without delay as "soon as the financial condition of India will permit." In 1878 the Government of India exempted from import duty certain coarser kinds of cotton manufactures, which were found to be specially subject to competition from similar goods manufactured in India. In March 1879, the exemption was carried further, and was made applicable to "all cotton goods containing no yarn of a higher number than thirties." In April 1879 the House of Commons passed a second Resolution that the Indian import duty on cotton goods, being unjust alike to the Indian consumer and the English pro- ducer, ought to be abolished; and this House accepts the recent reduction in these duties as a step towards their total abolition, to which Her Majesty's Government are pledged." Much difficulty and some hardship occurred in the practical working of the exemptions. Manufacturers in England were driven to making for the Indian market goods coming within the exemptions; a revolution was effected in the trade; the proportion of exempted goods quickly rose from a small fraction to nearly the whole of the importations in certain classes of fabrics; and the customs revenue yielded by duties on cotton goods greatly declined.

In March 1882, a considerable surplus of revenue enabled the Government of India to abandon all import duties, including the duty on cotton manufactures.

5. The revenue yielded by the cotton duties in the year 1872-73, shortly before the Tariff Act of 1875, was quoted by the Government of India as being,—

	Rx.	Rx.
On yarn and thread	109,000	
On piece-goods	707,000	
		816,000
The first exemption of coarser cotton goods from duty in 1878 was estimated by the Government of India to involve a loss of Revenue amounting to	...	22,000
The further exemption granted in 1879 was estimated by the Government of India to involve a loss of from Rx. 150,000 to upwards of	...	200,000
When the import duties were finally abolished in 1882, the Government of India estimated the cost of the measure at Rx. 1,219,000 out of which the then remaining duties on cotton goods amounted to	...	655,000

6. During the past twenty-five years the importations of British cotton goods into India have increased steadily and largely; and during the last 15 years the out-put of the Indian cotton mills also made great advances. The following tables show that importations and Indian manufactures have progressed both when the former were weighted with duties, and when the latter had lost any advantages which the duties gave them. Indeed, the increase of importations of piece-goods was much more rapid during the last ten years of the existence of the duty (namely 1873-83) than it was during the ten years after the duty was abolished (namely 1883-93); while the Indian mill industry extended less rapidly when it was protected by a duty on imported goods, than it did after the abolition of the duty.

No precise information appears to be available showing the quantity of Indian-made piece-goods and yarns that are consumed in India. But it is understood that Indian machine-made yarns have largely displaced not only imported yarns but also

yarns spun at village homes. And it is said that machine-made yarns are now much used on domestic looms in the interior.

7. Since 1882 no import duties have been levied in India on cotton manufactures, or any articles save arms, salt, liquors, and petroleum. In the present year your Government were confronted by a heavy further fall in the gold value of silver, whereby an additional charge of nearly Rx. 3,000,000 was thrown upon India. In order to meet a part of this charge you proposed to reimpose import duties; and you estimated that import duties of 5 per cent. on other articles, including silver, but not including cotton manufactures, would yield Rx. 1,140,000 in the first year and might afterwards produce Rx. 1,400,000 a year; while a 5 per cent. duty on cotton piece-goods and a 3 per cent. duty on yarns might yield Rx. 1,000,000 in the first year and Rx. 1,300,000 afterwards.

8. It was expected that by largely reducing the sum set apart for famine insurance, and by making strict economies in expenditure, Rx. 1,481,000 of the deficit would be covered; while the duties imposed on commodities other than cotton manufactures would meet Rx. 1,140,000 more. The expected deficit would thus be reduced to Rx. 300,000. In view of the financial situation, and of the measures which were affirmed by and were taken in accordance with the Resolutions of the House of Commons passed in 1877 and 1879, Her Majesty's Government decided that duties should not at present be imposed upon cotton manufactures. But my predecessor, Lord Kimberley, intimated to your Excellency, and you informed the Legislative Council, that, if after an interval sufficient to judge of the financial position as affected by the Tariff Act, the course of exchange, and other circumstances, there was no improvement, Her Majesty's Government would be prepared to receive a further representation from the Government of India on the subject of imposing import duties upon cotton manufactures.

9. If we take the cotton duties, as reduced and abolished in the years 1878-82, to have yielded Rx. 900,000, they represented 2·05 per cent. of Rx. 43,793,000, the total taxation of the year 1881-82, including the land revenue, but apart from railways, opium, post office, and other receipts which are in no sense taxation. Similarly the Rx. 1,300,000 which it is computed the cotton duties would yield, represent 2·5 per cent. of the total taxation of the year 1893-94.

10. It is too soon to judge of the effect of the new Tariff Act on the financial situation. During the first few weeks of the year 1894-95 the rate of exchange obtained for Council Bills has been less than fourteen pence, the rate taken in the budget estimates. If, however, your Government should be forced again to consider the question of imposing duties on cotton manufactures, it will be requisite to ascertain what classes of imported cotton goods come into competition with Indian manufactures of the same kind. Among imported cotton goods, there will probably be some classes of goods which directly compete with goods produced in India, some which partly compete, and some which practically do not compete at all. It would be for your Government, after full inquiry, to decide how far you could distinguish between these three classes of imported cotton goods; and then to consider by what measures you could deprive any duties, that might be imposed, of a protective character. This object could be attained either by exempting from duty those classes of imported goods which clearly and directly compete with Indian manufactures, or by levying on the latter an excise duty equivalent to the import duty on corresponding goods from abroad. In the case of imported goods which do not compete with Indian manufactures, import duties would not be protective and no equivalent excise duty would be needed. The experience of 1879-80 regarding the difficulty or the futility of drawing an arbitrary line for fiscal purposes between certain classes of woven goods must be remembered; and it must be borne in mind that the Indian mills now spin yarns of higher counts than they did in 1880. But that experience would hardly tell against a general exemption of all yarns, and a general imposition of duties on all woven goods, accompanied by a corresponding excise duty upon woven goods manufactured at Indian mills.

11. I am aware that serious objections have been taken to the imposition of an excise duty upon Indian manufactures. It would certainly be practically impossible to attempt the levy of an excise duty on cotton yarns and goods produced by cottage industry all over India; but these village-made goods do not practically compete with imported cotton manufactures, and no question of levying an excise upon the products of village industries need therefore be raised.

12. The main objections that have been urged against an excise duty upon the products of Indian cotton mills are, briefly, (1) that the Indian cotton mills industry is in a depressed state, and that the imposition of such a duty would cripple or check

the growth of the only large manufacturing industry that has grown up in India to the great advantage of the wage-earning classes; (2) that such a duty could not be levied on the produce of mills in Native States, or in the Portuguese and French settlements, and would therefore greatly favour mills outside British India to the prejudice of mills in British provinces; (3) and that the excise duty would be difficult to levy, and would involve large refunds on Indian goods exported to Further Asia and to Africa.

13. I regret that the flourishing mill industry of Western India should have suffered, but I hope the trouble may be only temporary. If it should prove to be so, I do not anticipate that a moderate excise duty, levied to maintain an equality of conditions between imported and Indian cotton goods, would seriously hamper the Indian industry. For I observe that that industry flourished and expanded during the twelve years 1882-93 when its products had to meet English manufactures on equal terms, the import trade being free of duty.

14. It is true that the Indian Legislature cannot impose an excise duty on the produce of cotton mills in Native States, or in French and Portuguese India; and it would not be expedient to attempt the levy of duties on goods crossing the boundary between British territory and Native States in the interior. But the imposition of any customs duties, or of excise duties on salt and liquors, necessitates either the maintenance of a customs line, or the arrangement of a customs union, between British territory and the Indian settlements of France and Portugal on the sea-board. Such a customs line or such a customs union could provide for the levy of duty on cotton fabrics, as well as on other dutiable goods brought into British India; and it is possible that Native States might, upon representations from your Government, consent to impose on the produce of cotton mills in their territories excise duties corresponding to those levied in British India. But at present the latest returns show only 9 cotton mills in Native and other territory as compared with 105 mills in British provinces and Berar; the total number of spindles in these nine mills is returned at 162,590, against 3,110,398, spindles in British provinces.

1 mill at Indore.
3 mills in the Nizam's territory.
2 mills in Mysore.
2 mills at Pondicherry.
1 mill in Travancore.

15. If an excise duty were imposed by the Legislature, I anticipate that, with the co-operation of the mill owners, means of levying and collecting the duty could be found in British provinces. The difficulty of checking claims to refund on exportation was not found to be insuperable in India before 1882, and such refunds are granted in other countries. And the practical difficulties, in the way of realizing and occasionally refunding excise duties on cotton manufactures, would hardly be a bar to the imposition of such duties, if the Legislature should find the measure to be unavoidable.

16. Should such a necessity unfortunately arise, it is important that, if possible, these duties should not be exposed to opposition on the ground that they are protective. I have, therefore, discussed the subject in the foregoing paragraphs, in order that any proposal which you may hereafter have to make upon the matter may be in a shape that will not be open to serious economical objection at the outset.

Extract from Despatch from the Government of India, to the Secretary of State for India,—No. 210, dated 7th August 1894.

We have the honour to acknowledge receipt of your Revenue Despatch No. 65, dated May 31st last, on the subject of the imposition of import duties upon cotton.

2. The Honourable Mr. Westland took an opportunity of making special enquiries into the details connected with this matter during a recent visit to Bombay. He has laid his conclusions and recommendations before us in the minute which we enclose.

3. We have considered the subject in Council, and as the plan which he suggests, namely, the levy of an excise duty on mill-manufactured yarns of counts above 24, seems to us to meet the conditions prescribed in the despatch above quoted, and to afford a solution of the difficulties connected with the levy of duties on imported cotton goods, we recommend it as the basis of legislation, if it should be necessary to strengthen our financial position during the coming cold weather.

Extract from Minute by the Honourable Mr. Westland, dated 14th July 1894, regarding Excise duties on Indian Cotton Manufactures.

The main facts relating to the trade in woven goods are these:—

First, the Indian mills do not, as a matter of fact, produce yarns of better class than 30s. For the first time this year the Millowners' Association of Bombay collected

statistics of all the productions in India; one mill only out of 141 refused its statistics. The results were—

„ 30s „ 40s	1·453
„ 40s ...	·127
TOTAL	100

This being the first year of the collection of these statistics, no attempt was made to go into greater detail than the above; but the President of the Association estimates that at most only 6 per cent. of the whole can be put down as over 24s.

The main reason for this is that Indian cotton is not suitable for spinning higher counts; it does not give sufficient length of fibre. The trade, therefore, necessarily follows the limits imposed by the nature of its raw material. The mills also are constructed with reference to the ordinary counts of their spinning. What this means will be obvious from the following considerations. In the preparatory stages, *i.e.*, up to the "roving" the mill at full work turns out a certain number of pounds of cotton. There are certain variations, to which I shall afterwards refer, which have to be introduced even in these preparatory stages with reference to the count of the final outturn, but generally speaking, the machinery in full work will turn out a fixed number of pounds per day. Now in the spinning department the outturn at full work depends on the number of revolutions, so that the full outturn is a certain length of yarns. If the mill is spinning 30s, this will use up only two-thirds of the number of pounds that it would use if it were spinning 20s, so that it can take off only two-thirds of what the preparatory stages can produce. In other words, if a mill which is adapted for spinning 20s is used for spinning 30s, one-third of the machinery of the preparatory stages must be kept idle. This effect is aggravated by the consideration that for the finer counts the mills have to be run somewhat slower.

Just as the machinery of Indian mills is adapted for the lower counts, so that of Lancashire is adapted for the higher. They use American cotton, which is of such a quality that it would be waste to employ it on goods under about 30s. It would obviously never pay Manchester to use up American cotton at four pence a pound in making a class of goods which their Indian competitors can make up as well out of cotton that costs only three pence. Moreover, Manchester has workmen of higher skill than the Indian, and it pays better to employ them also on the finer goods. The consequence is that, as a matter of fact, the ordinary Manchester goods which come to this country are about 30—a little lower and a little higher—and Manchester sends us also all the finer qualities up to 60s, and even finer. The reason why there was such a revolution of trade after 1878, when all goods not containing finer yarns than 30s were exempted from duty, was that the bulk of the goods were closely above and below this standard, and it required very little change in manufacture to reduce them all below it. This state of things still exists.

I do not know if any precise statistics exist regarding the counts of piece-goods, for they are not classified for trade purposes by counts; but of yarns (which are so classified and denominated) I have obtained very full statistics. For as Manchester and the Indian mills compete in piece-goods, so they also compete in the supply of yarns not only for the hand-loom industry that is spread all over India, but also for the supply of China and the East generally.

As regards Indian mills, only a small proportion of the yarns produced is used for mill-weaving. Of the 141 mills in existence, only about 64, or less than half, possess any looms at all; the rest are occupied solely in producing yarns for export and for handloom consumption; and among the 64 spinning and weaving mills, the weaving department absorbs only a portion of the outturn of yarns.

The following figures in millions of pounds give the totals of the production, the cotton used being 4,100,000 cwt., costing about Rx. 10,250,000:—

Yarns produced in India, 373 millions lbs.:

Sold and exported	170
Sold for handloom weaving	129
Used for mill-weaving	74
TOTAL	373

I may add to these statistics the result of weaving the 74 million pounds of yarns—

Cloth exported	14
Consumed in India	70½
TOTAL	84½

(A pound of yarn produces more than a pound of cloth, sizing, etc., being added; but of cotton about 100 pounds produce only some 77 pounds of yarn, the balance being dirt or waste.)

It will be seen, therefore, that the trade in yarns of Indian manufacture greatly exceeds the trade in cloths of Indian manufacture. I have said above that 94 per cent. of the amount produced is 24s and under and only 6 per cent. above 24s; but the Collector of Customs at Bombay has given me the following statistics of the exports there in 1892-93 and 1893-94, the quantities being in lbs., and the values in Rx.:—

TOTAL	170,786,529	6,140,387	125,467,827	4,650,541

These figures are sufficient to show that of the exports the counts above 24 form only an insignificant proportion, considerably less than ½ per cent.

Now of yarns imported into India in the financial years 1892-93 and 1893-94, the amounts are—

	1892-93. lbs.	1893-94. lbs.
From the United Kingdom	37,337,449	41,642,142
Elsewhere	939,096	1,164,849
TOTAL	38,276,545	42,806,991

of which Bombay, Madras, and Calcutta each received a little over ten millions. Of the imports into Bombay, a complete analysis, extending over 24 years, was recently made by the Bombay Chamber of Commerce, and the result of that analysis is given in Appendix A. It will be seen that—

(1) Of grey mule twist, only ·04 out of 27·21, or ·15 per cent., was of 24s and under;

(2) Of grey water twist, only ·15 out of 26·19, or ·57 per cent., was of 24s and under;

and the percentage in both cases has been for years gradually decreasing.

The gross figures for the calendar year 1893 are 8,500 pounds of 24s and under and 4,599,808 pounds over 24s.

The whole of the imported yarns are used for handloom weaving. The mills take none of it.

The facts therefore are that the Manchester trade and the Indian mills trade run on entirely different lines; the trade of the former is confined to goods of higher counts than 24, and that of the latter to 24s and lower counts. There is the single exception that the Indian mills produce for local consumption, but not for export, a small proportion of goods of higher count than 24s. This last is mostly produced from imported Egyptian cotton, and it is for the most part confined to a group of mills (the Petit group) which have gone in very largely for experiments in fine spinning and in fancy goods. I find that in 1892-93 some 28,000 cwt. of Egyptian cotton were imported into India, and the Manager of the Petit Mills (Honble Mr. N. Wadia) informed me it was mostly imported by himself. The other mills, by reason of the disadvantages I have above explained, confine themselves to lower counts.

In respect of Egyptian cotton, there is a possibility of competition between Manchester and India. Egypt lies midway, and the freight to India costs no more than the freight to England. But it would be hopeless for the Indian mills to attempt to compete with Manchester for American cotton. Not only is the distance greater, but the Indian manufacturer, if he imported American cotton, would have to import and pay freight on a lot of dirt, etc.; for, as above stated, the outturn of yarn is only 77 per cent. or so of the weight of the cotton. So that the Manchester manufacturer sending out yarn or cloth has in respect of American cotton a great advantage over the Indian spinner and weaver in having to pay freight on a smaller quantity of goods.

Besides, *cæteris paribus*, Lancashire starts with great advantage over India. The machinery costs less, for India has to pay freight, packing, and insurance; building and erecting are very expensive in India, especially under the head of European supervision. Coal lies next door to Manchester; the Bombay mills have to get theirs mostly from England. Moreover, depreciation is much greater in India, and the wages bill, I am informed, is at least as high; for, though each person costs much less, the number that has to be employed is greater and the individual labourer is much less efficient.

Another reason prevents the Indian millowner from attempting to compete by importing yarns and weaving from them. When a mill weaves from its own spinnings, the yarn is conveyed to the weaving department on its original spindles. A mill that purchases yarns to weave would have first to pay, in the price of the yarns, the cost of reeling and bundling and packing, and then in its own wages, also the cost of conveyance, unpacking, and unbundling. All this is prohibitive as a matter of competition, and I am informed that though in Lancashire some mills do weave from yarn spun elsewhere, it is done only where it is possible to convey the yarn upon its original spindles.

It is certain that, as a matter of fact, no mill does weave, except in minute quantities, from imported yarns.

Manchester has a more serious rival in the Continent than it is likely ever to have in the Indian manufacturer; but this is more in the department of coloured, printed, and dyed goods and fancy goods than in grey or white piece-goods. These Continental goods are of counts which range from 20s to 34s, that is, from good Indian to ordinary Manchester. They are largely made of Indian cotton, which is exported for the purpose and mixed with American or similar cotton, so as to produce a finer quality of goods than can be made from pure Indian. Of raw cotton in 1892-93, the exports from India were 4,789,201 cwt., of which 528,403 went to the United Kingdom, 443,988 to Japan, and nearly all the rest, say, 3¾ million cwt., to the Continent of Europe. A leading firm in Bombay gives me the following statistics of exports from that city for eleven years in bales of 3½ cwt.:—

Statement III.

	United Kingdom.	Continent.
1883-84 (Cotton year, July to June)	577,000	719,000
1884-85	267,000	524,000
1885-86	321,000	687,000
1886-87	397,000	750,000
1887-88	234,000	659,000
1888-89	386,000	900,000
1889-90	370,000	1,118,000
1890-91	114,000	957,000
1891-92	72,000	832,000
1892-93	40,000	776,000
1893-94	49,000	860,000

shewing that the United Kingdom is ceasing to be a customer for these inferior grades of cotton, as it pays Manchester to go in more and more for the finer qualities of goods. Even of the above figures for the United Kingdom, about half, I believe, is re-exported to the Continent.

The statistics of imports into India for 1892-93 shew the following figures under the three main sections of cotton fabrics (in thousands of yards):—

Statement IV.

Grey goods—	
United Kingdom	1,090,164
Continent of Europe	51
All others (chiefly America)	2,369
TOTAL	1,092,584
White goods—	
United Kingdom	374,115
Continent of Europe	1,264
All others	980
TOTAL	376,359
Coloured, printed, and dyed—	
United Kingdom	328,779
Continent of Europe	8,686
All others	1,646
TOTAL	339,111

These are the figures for the totals of all qualities, and it will be seen that Manchester has not such a complete command of the market in respect of the last class as it has in the other cases. I am informed that these coloured and fancy goods are becoming popular in India, and that the Continent, more than Manchester, is cultivating the native taste and sending cheap goods to the improving market. In India the Petit group of mills alone attempt these manufactures.

From all that I have said, therefore, it is clear that—

(1) Of the manufactures of India, quite 94 per cent. is absolutely outside the range of any competition with Manchester, being the coarser quality of goods (24s and under) which Manchester cannot pretend to supply so cheaply as India.

(2) Manchester has an absolute monopoly of the finer qualities of goods, but the bulk of its trade consists in piece-goods of about 30s, and in yarns somewhat finer.

(3) Of goods of the counts 26 and over, India can produce them under difficulties and in small quantities, and to the extent to which it produces them it is in direct, but obviously somewhat unequal, competition with Manchester, that is, it is producing goods of a class that Manchester also lays down in India.

The values may be roughly stated as follows:—

Statement V.

	Rx.	Rx.
Imports from United Kingdom into India—		
Yarns	2,600,000	
Piece-goods	22,000,000	
		24,600,000
Mill manufactures in India:—	Rx.	
Piece-goods—		
Exported*	600,000	
Consumed in India*	3,400,000	
Yarns, excluding those woven into piece-goods—		
Exported	6,000,000	
Consumed mostly by handlooms	4,600,000	
Total		14,600,000

* These are the figures as given to me, but I judge from our statistical returns that the "exported" means "exported as grey piece-goods," and that the "consumed in India" includes the piece-goods that are "coloured, printed, and dyed" for export.

Six per cent. of this amount, or say Rx. 860,000 worth of produce, may be considered as a possible competitor in the field of trade that is occupied by Manchester, that is, not only with the Rx. 24,600,000 worth of goods which Manchester sends yearly to India, but also with the large quantities which Manchester sends to China, Japan, and the East Coast of Africa, to which places India might (though as a matter of fact it does not) send part of its total competitive traffic of Rx. 860,000. The exports of Manchester to the East appear to be nearly 30 millions sterling, say Rx. 45,000,000. So that India gets less than 2 per cent. of the market for the finer goods, of which Manchester gets 98 per cent.

The only possible harm that can arise to Manchester, if we were to impose an import duty of 5 per cent. without levying a countervailing duty on Indian manufactures, is that in this narrow margin—the Rx. 860,000 of Indian manufacture—the Indian mills, having no corresponding burden of taxation, might be able to absorb a larger share of the whole trade. The probability of their actually doing so may be judged from what I have above said of the greater facilities and the greater inducements that Indian mills have for extending the coarser rather than the finer qualities. But even should the effect of this advantage be to treble the existing production, it would take away from Manchester no more than Rx. 1,700,000 worth of trade out of its present total of Rx. 24,600,000 in India.

I have given careful consideration to the question of the best way in which to assess and levy an excise duty, and my proposal is to levy the duty upon yarns only and not upon woven cloth. The woven cloth will pay its duty by reason of its being made from duty-paid yarns, but the practical difficulties of assessing duty after weaving, and of keeping any control or exercising any inspection over the weaving departments in order to provide for the levy of a duty, are very great. Moreover, yarns are just as much a competitive product as cloth, the bulk of the Indian yarns and the whole of the imported yarns being used for the handloom industries; and, of course, if we can make sure of taxing at the yarn stage, there is no necessity for our even asking any questions about the weaving stages.

There is no doubt in my mind that if the mills were required by law to deliver to an assessing officer a detail of the quantity of each count higher than 24 spun, sold or delivered to weaving department, we would have, by giving power to the assessing officer to inspect the records of working and delivery, an absolute security for the correctness of the return. No mill could work without providing at the same time ample means for the test; for the results of the various processes through which the cotton passes from bale to yarn have to be carefully tested and recorded, so as to ensure the accuracy of the final result.

I have no statistics to show which of the Indian mills spin counts over 24 and which do not. The present year was the first in which the Millowners' Association set about the collection of statistics of production, and they did not go into greater detail of classification than shewn in Statement I above, which groups in one total all above 20s and not above 30s. But my impression from the information I have gathered is that it is almost entirely on the Bombay side (including Central Provinces) that mills will be found which spin the higher counts. The North-Western Provinces cotton, for example, is of poor quality—only half-inch fibre—and taken by itself could not spin better than 12s. The mills in the North-Western Provinces import cotton from the Central Provinces in order to mix with their local cotton and improve the counts of their yarn. But for spinning the higher counts they are under the same disadvantage compared to the mills in the Central Provinces and Bombay as Bombay is under with respect to 40s and 60s when compared to Manchester.

I have left out of account cloths woven by handlooms out of fine yarns spun by hand; the quantity is small, for the looms are in respect of the finer counts at any rate mostly supplied by mill-spun yarns, and such production is obviously out of all serious competition with mill industry. But a word or two is required regarding Native States.

There is one mill in Baroda and one in Indore, both worked by the Native States. Their outturn, I am informed, is of very poor quality, and their machinery ancient. Indore cannot produce better than 10s.

There are two in Mysore (Bangalore) and one in Travancore (Quilon); but, if I am rightly informed, their produce is not of high quality, and probably it will be found

that they do not come within the proposed taxable limits. Of the three, only one possesses looms, the other two being confined to spinning, their yarns being used for the local handloom weavers.

There are three in the Nizam's territories, all of which are both spinning and weaving mills. They are under European management, and are as good as the ordinary Bombay mills. As they are close to some of the best cotton districts, it is not unlikely that they manufacture yarns and piece-goods of counts higher than 24s. I am informed that the consumption of their goods is entirely local.

There are two in Pondicherry (French territory). There used to be more, but they were not successful.

I have not reckoned one or two mills in Berar, because as Berar is under our direct administration, it can be reckoned for present purposes as part of British India.

The following statistics have been given me of the yarn production during 1893 by nine mills in Native States, including, I believe, Berar:—

Counts.	Yarns.	Percentage.
Statement VI.	Pounds.	
10s and under	1,028,670	8·744
Above 10s to 20s	6,718,752	57·112
„ 20s „ 30s	4,014,199	34·122
„ 30s „ 40s	2,596	·022
„ 40s	.....	.....
	11,764,217	100·00

A question will necessarily arise of how to arrange for drawbacks on export of duty-paid yarns; but I do not think it will present any difficulty. The amount of duty-paying yarns is only a small proportion of the trade, and a comparatively small proportion of the mills have anything to do with it. Of this small amount of duty-paying yarns again, only a small proportion is exported—see Statement II above; it is for Indian consumption and not for export that it is manufactured. The usual rule that an exporter claiming drawback has to prove that he has paid duty on the goods he exports will probably be sufficient to provide for the case. If we base our assessment of duty on the mill-owners' records of business, it ought not to be difficult for him to identify exported goods with the duty he has paid.

Finally, I have not in my statement of the facts entered, so far as I am aware, upon any controversial matter. I had not, while in Bombay, to investigate conflicting evidence or reconcile opposing interest. I applied to the best sources, both on the importing and on the mill-owners' sides, for the information I required. I met on both sides with the greatest courtesy and the utmost readiness to give information; and I believe, I may say, that there is at least no doubt as to the facts.

Telegram from Secretary of State, London, to Viceroy, Camp,—dated 11th December 1894, 6-5 P.M.

I have considered carefully in Council your Despatch of 7th of August, Cotton duty. Her Majesty's Government consider, in accordance with Resolutions of House of Commons of 1877 and 1879, and pledges given by Secretary of State in House of Commons on 27th of July and 16th of August last, duty must not be protective. Countervailing Excise duty is therefore necessary. I accept your proposal subject to two modifications; first, Import and Excise duty on yarns should be 5 per cent., same as on woven goods; second, in order to insure that duty shall not be protective, limit of exemption for yarns should be 20, not 24, but power may be taken in Act to raise limit hereafter by Executive action with consent of Her Majesty's Government, if experience shows that 20 is unnecessarily low. Subject to these conditions, I agree to the proposed legislation forthwith. Despatch follows by next mail.

J. M. MACPHERSON,
Offg. Secretary to the Government of India.

The following Report of the Select Committee on the Bill to amend the Indian Tariff Act, 1894, was presented to the Council of the Governor General of India for the purpose of making Laws and Regulations on the 27th December, 1894 :—

LEGISLATIVE DEPARTMENT.

WE, the undersigned, Members of the Select Committee to which the Bill to amend the Indian Tariff Act, 1894, was referred, have considered the Bill and the papers noted in the list appended, and have now the honour to submit this our Report, with the Bill as amended by us annexed thereto.

Schedule IV, No. 8.—In consequence of representations received by us, we have simplified the classification of sugar contained in this number.

No. 11.—In accordance with a suggestion from Madras, we have exempted unmanufactured tobacco from duty.

No. 13.—We have exempted from duty water-lifts, sugar-mills and oil-presses as well as all machines ordinarily used in processes of husbandry or for the preparation for use or for sale of the products of husbandry which the Governor General in Council may by notification exempt.

No. 14.—We have carefully examined the definition of machinery and made certain additions with the view of rendering it more complete and comprehensive as well as more readily intelligible.

No. 15.—We have made one or two additions to the articles chargeable with one per cent. duty under the heads of iron and steel.

No. 44.—We have made the duty in the case of coloured twists and yarns and of piece-goods payable *ad valorem* instead of on a tariff valuation as in the Bill as introduced, and we have combined mule and water twists under the same head.

No. 46.—Owing to our having inserted this new number, which relates to earth, common clay and sand (declared to be free), we have had to alter the subsequent numbering to the end of the Schedule.

No. 93.—We have amended the proviso to this number so as to provide for the exemption from duty of the materials of such tramways as the Governor General in Council may think fit, by notification, specifically to exempt.

No. 96.—A representation has been received by us from certain of the Inland Steam Navigation Companies concerning the duty which it was originally proposed to impose on inland ships and vessels under this number. We have now made such ships and vessels free from duty.

2. We have also received and considered a number of suggestions as to the classification of articles and the tariff valuations, to some of which we have given effect.

3. The publication ordered by the Council has been made as follows :—

In English.

Gazette.	*Date.*
Gazette of India	17th December, 1894.

4. We do not think that the measure has been so altered as to require re-publication, and we recommend that it be passed as now amended.

Duties.

Imposition of duties on cotton yarns produced in British Indian mills.

5. There shall be levied and collected at every mill in British India, upon all cotton yarns produced in such mill, a duty at the rate for the time being prescribed in the Indian Tariff Act, 1894, for the levy of duty in respect of cotton yarns imported by sea: VIII of 1894.

Provided that no duty shall be levied upon yarns of any count commercially known as number 20 or less:

Provided also that the Governor General in Council may, by notification in the Gazette of India, exempt from duty any yarns of any count or number not exceeding 24.

Explanation.—Yarn is said to be "produced" within the meaning of this Act—

6. (*1*) The Governor General in Council may from time to time, by notification in the Gazette of India, fix, for the purpose of levying the said duties, tariff values of all such yarns as aforesaid or of any particular count or counts thereof, and alter any tariff values for the time being in force.

(*2*) In the absence of any notification under sub-section (*1*), the tariff values shall be those specified in the schedule to this Act.

(*3*) Such tariff value shall, for the purposes of this Act, be deemed to be the "real value" of the yarns to which it applies, but save as aforesaid all yarns shall be assessed under this Act at their real value as defined in section 30 of the Principal Act.

Delivery of monthly returns of yarn produced by mill-owners.

7. (*1*) The owner of every mill shall prepare and deliver, or cause to be prepared and delivered, to the Collector, on or before the fifteenth day of each month, a return of all cotton yarn produced at his mill during the preceding month, whether liable to duty or not; and shall subscribe a declaration of the truth of such statement at the foot of such return.

8. (*1*) The Collector shall thereupon assess the duties, if any, payable in respect of the month to which the return relates, and unless the amount thereof is immediately tendered shall cause a notice, in such form as may be prescribed by any rules under this Act, to be served on the owner requiring him to make payment of the amount assessed within ten days of the date of service of the said notice.

(*2*) A notice under sub-section (*1*) may be served on the owner of a mill by delivering or tendering to him or his agent at his ordinary place of business a copy of the notice, or, if this cannot be conveniently done, by fixing a copy of the notice on one of the outer doors of the mill.

Provided that the rate of duty and the tariff valuation applicable to any yarn which has not been warehoused as hereinafter provided shall be those in force at the time when the yarn was produced, and not when the return was delivered as provided by the said section 37.

Recovery of unpaid duty.

10. (*1*) If any duty payable under this Act is not paid within the time fixed by any such notice as aforesaid for the payment thereof, the Collector may, in lieu thereof, recover any sum not exceeding double the amount of duty so unpaid, which he shall, in his discretion, think it reasonable to require.

(*2*) There shall be payable in respect of every such warehouse such and the like licensing fees and other payments as may for the time being be payable in respect of a private warehouse licensed under the Principal Act:

Provided that the Chief Customs Authority may remit the whole or any part of such fees or other payments in respect of any particular warehouse.

Permission to deposit yarn in warehouses.

12. (*1*) The owner of any mill may apply for leave to deposit in a warehouse any yarn in respect of which duty has become leviable under section 5 and which has not been issued out of the mill.

(*2*) Such application shall be in writing signed by the applicant, and shall be in such form as may be prescribed by the Chief Customs Authority.

Application to yarn so deposited of provisions of Chapter XI of Sea Customs Act.

13. All the provisions of Chapter XI of the Principal Act, so far as the same are applicable to imported goods of a similar description, shall apply to all yarn in respect of which an application has been made under section 12.

Exemption from assessment of yarn so deposited.

14. When any yarn has been deposited in a warehouse, the quantity and particulars thereof shall be specified as so deposited in the return made under section 7 for the month in which the yarn was produced, and the said yarn shall be omitted in the assessment and collection of duty.

(2) Any such officer may at any time, with or without notice to the owner, examine the working records, sale records, and accounts of any mill, and take copies of, or extracts from, all or any of the said records or accounts, for the purpose of testing the accuracy of any return, or of informing himself as to any particulars regarding which information is required for the purposes of this Act or any rules thereunder.

Information acquired to be deemed official secrets within meaning of Act XV of 1889.

16. (1) All such copies and extracts, and all other information acquired by any such officer on the inspection of any mill or warehouse, shall be regarded as strictly confidential, and shall be deemed to be official secrets.

(2) If any such officer shall disclose to any person other than a superior officer any such official secret as aforesaid without the previous consent in writing of the Chief Customs Authority, he shall be guilty of a breach of official trust, and shall, upon conviction thereof, be punishable in the manner provided by section 4 of the Indian Official Secrets Act, 1889.

J. M. MACPHERSON,
Offg. Secretary to the Government of India.

The following Report of the Select Committee on the Bill to provide for the Imposition and Levy of certain Duties on Cotton Goods was presented to the Council of the Governor General of India for the purpose of making Laws and Regulations on the 27th December, 1894:—

LEGISLATIVE DEPARTMENT.

WE, the undersigned, Members of the Select Committee to which the Bill to provide for the Imposition and Levy of certain Duties on Cotton Goods was referred, have considered the Bill and the papers noted in the list appended, and have now the honour to submit this our Report, with the Bill as amended by us annexed thereto.

2. We have revised the definition of Collector in section 2, with the object of showing on the face of the Bill that the Customs Collectors at the larger ports only are to perform the functions of the Collector under the Bill, and that elsewhere they may be discharged by the Collector of the district or by such officer as the Local Government may appoint.

3. We have so altered the first proviso to section 5 as to make it clear that it is the intention to exempt from duty all yarns which would, by mercantile usage, be reckoned as of the number of 20 or less, even though they may slightly exceed that number, that is, may weigh slightly less than the weight theoretically attributable to that number.

4. We have appended to sub-section (2) of section 6 a Schedule specifying the same tariff values for yarns dutiable under this Bill as those which are proposed for like yarns when imported by sea by the Bill to amend the Indian Tariff Act, 1894, which is now before the Legislative Council.

5. We have added a sub-section to section 7 under which the first returns of yarns produced will not be required of mill-owners until the 15th February.

6. With the view of meeting, as far as possible, an objection taken to section 18 by the Bombay Millowners Association, we have altered the section so as to permit of yarns shipped for export being shown in the return for any month not later than that in which the yarn is shipped.

7. We have added an explanation to section 19 the effect of which will be to enable the drawback on yarn which has only been bleached or dyed or converted into sewing thread being recovered under this section.

8. In deference to representations made to us we have extended the periods within which, under section 21, drawback on export of cotton fabrics may be claimed to twelve months from the date of the manufacture of such fabrics, and to twelve months from the date on which the yarns in respect of which drawback is applied for have paid duty.

9. We have inserted an additional number in section 25 taken from the Bombay Salt Act, 1890, imposing a penalty on officers guilty of abusing their powers under the Bill.

10. We have inserted two new sections (section 31), imposing on mill-owners the duty of keeping such records and accounts as they may be required to do by rule, and (section 35), applying the provisions of section 10 of the Tariff Act, which prescribe rules as to payment of duty in the case of contracts for sale made before duty has been imposed, to duties imposed under this Bill.

11. We have added a sub-section to section 36 with the object of subjecting goods which may be imported in contravention of a notification issued under the section to the penalties imposed by section 19 A of the Sea Customs Act in the case of goods whose importation is prohibited under that Act.

12. The other alterations we have made in the Bill as introduced do not appear to us to be of sufficient importance to call for notice.

13. The publication ordered by the Council has been made as follows:—

In English.

Gazette.	*Date.*

14. We do not think that the measure has been so altered as to require republication, and we recommend that it be passed as now amended.
