Central Provinces.—*For week ending 27th March.*—Weather alternately cloudy and clear with light showers of rain in some districts. Reaping of winter crops in progress in the North and threshing in the South of the Provinces. Crop prospects in Damoh decidedly gloomy, wet and cloudy weather having encouraged the spread of rust. The poorer classes are beginning to suffer, work being scarce. In Jabalpur (except in the Murwara tahsil), the outturns of grain, wheat and linseed are poor. Price of wheet rising in the northern districts.

Burma.—*For week ending 23rd March.*—Slight rain has fallen in Tavoy and in northern parts of Upper Burma. In Lower Burma harvesting of main paddy crop completed; and in Upper Burma sowing and transplanting of dry-weather paddy and cultivation of dry-weather food-crops approaching completion. Crop prospects good. Prices of paddy steady with a slight rise in two and a fall in three districts of Lower Burma, where prices are above normal. In Upper Burma there is a rise in three districts, but the prices are below normal. Fodder and water-supply sufficient.

Assam.—*For week ending 26th March.*—Slight rain fell throughout the province. Ploughing for summer paddy progressing. Pressing of sugarcane continues. Condition of cattle fair. Fodder and water sufficient.

Mysore and Coorg.—*For week ending 27th March.*—MYSORE: Standing crops withering in parts of Kolar and Tumkur districts. Prospects favourable. Prices slightly fallen in Chitaldrug district.

COORG: Threshing of rice almost completed. Coffee blossomed in some parts. Prices of food-grains normal. Fodder and water for cattle fairly sufficient.

Berar and Hyderabad.—*For week ending 27th March.*—BERAR: Weather warm and cloudy with moderate rainfall during the week. Cutting of winter crops completed. Preparation of land for ensuing rain crop commenced in all districts. Fodder and water adequate for requirements. Prices fluctuating in the Wun district and steady elsewhere.

HYDERABAD: Slight rainfall during week. Sowing of hot-weather crops in progress. State of crops favourable. Water in wells and tanks sufficient for cultivation. Prices normal.

Central India.—*For week ending 27th March.*—Partial rain fell in two agencies during week. Agricultural operations completed in Nimach, Bundelkhand, and in progress in other agencies. Condition of standing crops indifferent in Isagarh of Gwalior, fairly good elsewhere. Condition of cattle fair except in Bhopal. Pasturage good and sufficient in all districts except Gwalior where it is indifferent. Prices of food-grains high in Isagarh of Gwalior and Goona; rising in Dhar and Bagode of Bhopawar; slightly falling in Bundelkhand and normal elsewhere. Condition of opium indifferent in Isagarh of Gwalior and Nimach; partly damaged by rain in Goona, Bhopal, and Bhopawar; fairly good elsewhere.

Rajputana.—*For week ending 27th March.*—Slight rain in Bickaneer. Agricultural operations satisfactory. Harvesting continues. Standing crops, prospects, and agricultural stock generally good. Fodder sufficient, but failing in Dholepore. Prices falling in two States, below average in one, and steady elsewhere.

Kashmir.—*For week ending 26th March.*—Heavy rain fell throughout Kashmir during the week. Prices continue normal.

JAMMU PROVINCE.—*For week ending 27th March.*—Heavy rain with hail. Prices rising. Crops in good condition. Fodder sufficient.

Nepal.—*For week ending 23rd March.*—Very slight rain. Weather bright and sunny. Condition of crops good.

DENZIL IBBETSON,

Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.
PUBLIC WORKS DEPARTMENT.
RAILWAY STATISTICS.

STATEMENT OF APPROXIMATE GROSS EARNINGS OF INDIAN RAILWAYS FROM 1ST JANUARY TO 17TH MARCH 1894, AND FROM 1ST JANUARY TO 16TH MARCH 1895.

N.B.—As regards the figures in column *Total Earnings from 1st January 1895*, audited figures have been used as far as possible.

Railway.	Average earnings per mile per week during the 1st half of 1894.	Week ending 17th March 1894. Mean mileage worked.	Week ending 17th March 1894. Earnings. Total.	Week ending 17th March 1894. Earnings. Per mile open per week.	Week ending 16th March 1895. Mean mileage worked.	Week ending 16th March 1895. Earnings. Total.	Week ending 16th March 1895. Earnings. Per mile open per week.	Earnings from 1st January to 17th March 1894.	Earnings from 1st January to 16th March 1895.	Increase.	Decrease.

DEPARTMENT OF REVENUE AND AGRICULTURE,
Calcutta, the 28th March 1895.

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

HOME DEPARTMENT.

EXECUTION OF DEEDS, CONTRACTS AND OTHER INSTRUMENTS ON BEHALF OF HER MAJESTY'S SECRETARY OF STATE FOR INDIA IN COUNCIL.

No. $\frac{8 \text{ Judl.}}{455-501}$.

Extract from the Proceedings of the Government of India in the Home Department (Judicial),—under date, Calcutta, the 28th March 1895.

READ again—

The correspondence on the subject of the execution of deeds, contracts, and other instruments on behalf of Her Majesty's Secretary of State for India in Council, ending with the letter from the Government of the Punjab, No. 855-S., dated the 25th July 1891.

READ also—

The Home Department Circular to Local Governments and Administrations, Nos. $\frac{5 \text{ Judicial}}{322-331}$, dated the 7th March 1892, forwarding a draft Resolution purporting to consolidate the orders issued from time to time on the subject, and the replies thereto.

RESOLUTION.

IN exercise of the power conferred by the thirty-third and thirty-fourth of Victoria, Chapter fifty-nine, Section two, and of all other powers enabling him in this behalf, the Governor General in Council is pleased, in supersession of existing orders, to declare that the undermentioned classes of deeds, contracts, and other instruments referred to in the twenty-second and twenty-third of Victoria, Chapter forty-one, Section two, may be executed as follows:—

A.—In the case of the Governor General in Council—

All deeds and instruments relating to any matters other than those hereinafter specified. } By a Secretary to the Government of India.

B.—In the case of the Military Department—

I.—In the Military Works Department (subject to any limits fixed in Departmental orders):—

By Chief Engineers, Superintending Engineers, Superintendents of Works, Executive Engineers in the Buildings and Roads and Irrigation Branches, Managers, Engineers-in-Chief, Superintendents of Works, and Executive Engineers in the Railway Branch.
V.—Leases for grazing cattle on canal banks or roadsides; for fishing in a canal; for the cultivation of land under the Irrigation Department; leases of water for irrigation and other purposes, and leases of water-power; and instruments relating to the sale of grass, trees, or other produce on roadsides or in plantations.	By Chief Engineers, Superintending Engineers, Superintendents of Works, Divisional officers in the Buildings and Roads and Irrigation Branches, and in Bengal by Sub-divisional officers of the Irrigation Branch.

VI.—Leases of houses, land, or other immoveable property, provided that the rent reserved shall not exceed ₹5,000 a month.	By Chief Engineers, Superintending Engineers, Superintendents of Works, Executive Engineers in the Buildings and Roads and Irrigation Branches, Managers, Engineers-in-Chief, Superintendents of Works, and Executive Engineers in the Railway Branch.
VII.—All instruments connected with the re-conveyance of property given as security.	By Chief Engineers, Superintending Engineers, Superintendents of Works, Executive Engineers in the Buildings and Roads and Irrigation Branches, Managers, Engineers-in-Chief, Superintendents of Works, and Executive Engineers in the Railway Branch.
VIII.—Instruments connected with the collection or farming of tolls at bridges or ferries or other means of communication provided by the Railway, or by the Local Government.	By Chief Engineers, Superintending Engineers, Superintendents of Works, Executive Engineers in the Buildings and Roads and Irrigation Branches, Managers, Engineers-in-Chief, Superintendents of Works, and Executive Engineers in the Railway Branch.
IX.—Contracts connected with the loading and unloading of goods and for other matters necessary for, or incidental to, traffic working.	By Managers of State Railways.
X.—Contracts connected with the sale of scrap, ashes, and other surplus material.	By Managers of State Railways.
XI.—Agreements for the recovery of fines on account of drift wood or other timber passing into a canal.	By Chief Engineers, Superintending Engineers, Superintendents of Works, and Executive Engineers in the Irrigation Branch.
XII.—Agreements for the interchange of traffic with other State Railways.	By Managers of State Railways.
XIII.—Agreements with private or guaranteed Railway Companies, Tramway Companies, and other carrying Companies.	By Managers of State Railways.
XIV.—Agreements with covenanted Engine-drivers on the expiry of the term of their original covenants.	By Managers of State Railways.
XV.—Agreements with monthly non-pensionable European, Eurasian, and Native employés on State Railways, defining the terms and conditions of service to be entered into on entering the service of Government.	By Managers, Engineers-in-Chief, Locomotive Superintendents, Traffic Superintendents, Examiners of Accounts, Chief Storekeepers; and Executive Engineers in charge of Divisions, District Locomotive Superintendents, and District Traffic Superintendents in the Railway Branch.
XVI.—All deeds and instruments relating to any matters other than those specified in heads I to XV.	By Secretaries and Joint Secretaries of Local Governments.

F.—In the case of the Telegraph Department—

I.—Contracts and other instruments for works and stores.	By the Director and Deputy Director-General of Telegraphs and the Director of Construction, by Superintendents and Assistant Superintendents of Telegraphs, subject to the limit fixed by Departmental orders.
II.—Leases of houses to the Telegraph Department, containing, where necessary, an agreement making the Government liable for loss by fire caused by the act of the lessee; provided that the rent reserved in such lease shall not exceed ₹500 a month.	By the Director and Deputy Director-General of Telegraphs.
III.—Contracts and other instruments for securities deposited by Telegraph subordinates.	By Superintendents and Assistant Superintendents of Telegraphs, subject to the limit fixed by Departmental orders.

G.—In the case of the Post Office—

I. Contracts and other instruments relating to the business of the Post Office.	By the Director-General of the Post Office.
II. Contracts and other instruments relating to the business of the Post Office managed by a Post Master General or Officer exercising the powers of a Post Master General.	By such Post Master General or Officer exercising the powers of a Post Master General subject to any limit prescribed by Departmental orders.

H.—In the case of the Civil Medical Department under the Government of India—

Contracts or other instruments relating to the Medical Department.	By the Surgeon-General with the Government of India.

I.—In the case of the Forest Department—

Contracts and other instruments in matters connected with the administration and working of forests and with the business of the Forest Department generally.	By Conservators, Collectors of Districts, Deputy, Assistant, Extra Deputy, and Extra Assistant Conservators of Forests to such extent and within such limits as the Local Government may prescribe by notification in the official Gazette.

J.—In the territories under the administration of the Government of Madras, as regards contracts, etc., not hereinbefore specified—

I.—In the case of the Governor in Council— All deeds and instruments relating to any matters other than those specified in heads II to V.	By a Secretary to Government.
II.—Contracts and other instruments for the purchase, supply, conveyance or carriage of building materials, stores, machinery, etc., and the provision of labour for building or other work, and such like engagements.	By Collectors of Districts, Sub-Collectors, Assistant and Deputy Collectors in charge of Divisions; Inspector-General, Deputy Inspector-General, and Superintendents of Police; Commissioner of Police, Madras; Inspector-General of Jails, Superintendent of Stationery; and the Presiding Port Officer and Port Officers.
III.—Contracts and other instruments relating to the Medical Department	By the Surgeon-General with the Government of Madras.
IV.—(*a*) All contracts, deeds or other agreements relating to the execution of salt works, or the purchase, sale or transport of salt, the supply of labour, stores, building materials, etc., and any other like engagements relating to the salt revenue or the business of the Salt Department.	By the Commissioner of Salt, Abkari, and Separate Revenue.
(*b*) All contracts, deeds or other agreements relating to the execution of salt works, or the purchase, sale or transport of salt, the supply of labour, stores, building materials, etc., and any other like engagements relating to the salt revenue, or the business of the Salt Department within their respective jurisdictions and within the limit of value of ₹5,000; and contracts or agreements for the import of foreign salt on credit, for payment of the duty leviable thereon, or contracts or agreements for the clearance of salt under the credit system on the deposit of securities within the limit of value of ₹50,000.	By the Deputy Commissioners of Salt and Abkari Revenue.

(*c*) Leases granted to manufacturers of salt in blocks of land in Government factories, when the estimated value of the land concerned does not exceed ₹250.	By Deputy Commissioners of Salt and Abkari Revenue.
(*d*) Contracts or agreements for the import of foreign salts on credit, for payment of the duty leviable thereon, or contracts or agreements for the clearance of salt under the credit system wholesale on the deposit of securities within the limit of value of ₹10,000.	By Assistant Commissioners of Salt and Abkari Revenue.
V.—Contracts and other instruments relating to matters connected with the Educational Department.	By the Director of Public Instruction.

K.—In the territories under the administration of the Government of Bombay, as regards contracts, etc., not hereinbefore specified—

I.—All deeds and instruments relating to matters other than those specified in heads II to VII and IX to XIV and XVI to XXI.	By a Secretary to Government.
II.—Contracts for the supply of articles of dead stock, or petty supplies.	By the Government officer for whose use such articles or petty supplies are required, or by any Government officer to whom such officer is subordinate.
III.—Contracts for the sale of useless articles.	By the Government officer in whose office such useless articles are, or by any Government officer to whom such officer is subordinate.
IV.—Contracts for lease or sale of Government buildings.	Jointly by the chief local officer of the Department in whose charge, and the chief local officer of the district in which such buildings are.
V.—Contracts for hire or purchase of buildings for Government.	Jointly by the chief local officer of the Department for which, and the chief local officer of the district in which, such buildings are to be hired or purchased.
VI.—Contracts and other instruments for the purchase, supply, and conveyance or carriage of building materials, stores, machinery, etc., and contracts for petty constructions and repairs, and for public works of every description which are not executed by the Public Works Department.	Jointly by the chief local officer of the Department by which, and the chief local officer of the district in which, such works are to be executed, or by an Assistant or Deputy Collector if the work is executed by the Revenue Department.
VII.—Sanads— (*a*) continuing or confirming exemption from payment of land revenue, or (*b*) continuing or confirming any pension or grant of money or land revenue, or (*c*) confirming watan-service—commutation settlements, or (*d*) guaranteeing cash payments in lieu of abkari or other rights, or (*e*) granted under section 133 of the Bombay Land Revenue Code, 1879, or any other law for the time being in force relating to the survey of towns and cities.	By Collectors of Districts.

VIII.—Deeds, contracts, and instruments relating to land, or to any benefit arising out of land, or to water, or to any benefit arising out of water, or to land revenue.	In the City of Bombay, by a Secretary to Government; elsewhere, by Collectors of Districts; or in any business connected with the duties of the Talukdari Settlement Officer, by that officer.
IX.—Contracts for the farm of tolls, taxes, duties, cesses, or revenues of any description.	By Collectors of Districts, or by the heads of the Departments by which such tolls, duties, cesses or revenues are levied.
X.—Contracts for the erection or repair of boundary marks.	By Survey Officers or Revenue Officers not lower in rank than Mahalkaris.
XI.—Contracts for the supply of stationery, etc., to the Superintendent of Stationery.	By the Superintendent of Stationery, Bombay.
XII.—Contracts for the supply of articles of any description for the use of jails or regarding the sale of articles manufactured in jails.	By the Inspector-General of Prisons, Bombay, or by the Superintendents of Jails.
XIII.—Security bonds for the due performance of their duties by Government servants whom the Inspector-General of Prisons has power to appoint.	By the Inspector-General of Prisons or by the Superintendents of Jails.
XIV.—Contracts for the supply of articles procured in the local markets for the Police.	By the Commissioner of Police in the City of Bombay; and elsewhere, by the Inspector-General of Police, or by District Superintendents of Police.
XV.—Deeds, contracts, and instruments relating to salt revenue or to the business of the Salt Department, or to the land, buildings or other property in the control of that Department, other than contracts of the nature specified above in Articles I to VI.	In Sind, by the Commissioner in Sind or by the head of the Salt Department in that Province, or by Collectors of Districts; and elsewhere, by a Secretary to Government, or by the Collector of Salt Revenue, Bombay.
XVI.—Contracts entered into with normal scholars and apprentices in Engineering or Industrial Colleges, etc.	By Educational Inspectors or by the Principals of such Colleges.
XVII.—Agreements and deeds entered into with Managers of Educational Institutions in respect of Government grants-in-aid up to ₹1,000 or in respect of the lease of Government school buildings.	By the Director of Public Instruction, Bombay.
XVIII.—Contracts for the supply of articles procured in the local markets for hospitals, lunatic asylums, etc.	By the local Medical Officers in charge of such hospitals, asylums, etc.
XIX.—Deeds, contracts, and instruments of every description relating to the administration of Aden.	By the Political Resident, Aden.
XX.—Contracts for the purchase and supply of stores and building materials and for the provision of labour, also indentures to bind apprentices at the Mint for a definite term.	By the Mint Master, Bombay.
XXI.—Deeds, contracts, and instruments of every description not included in any of the foregoing articles.	In Sind, by the Commissioner in Sind.

L.—In the territories under the administration of the Government of Bengal, as regards contracts, etc., not hereinbefore specified:—

I.—In the case of the Lieutenant-Governor— All deeds and instruments relating to matters other than those specified in heads II to VII.	By the Secretary to the Government of Bengal in the Revenue and General Departments.

II.—Contracts for the supply of stationery (and Bonds of employés when it is necessary that they should be executed by the obligee), etc., to the Superintendent of Stationery.	By the Superintendent of Stationery, Calcutta.
III.—Contracts for supply of clothing, etc., for the Police.	By the Commissioner of Police, Calcutta, and the Inspector-General of Police, Bengal.
IV.—Contracts for the supply of articles, etc., for the use of jails, or regarding the sale of articles manufactured in jails.	By the Inspector-General of Jails, Bengal.
V.—Contracts for the supply of articles, and for repairing, cutting, etc., roads and canals.	By Collectors of Districts.
VI.—Contracts for the supply of articles procured in the local markets for hospitals, lunatic asylums, etc.	By the local Medical Officers in charge of such hospitals, asylums, etc.
VII.—Contracts and other instruments in matters connected with the lease or sale of land.	By Collectors of Districts and Deputy Commissioners.
VIII.—Contracts for the purchase and supply of stores and building materials and for the provision of labour; also indentures to bind apprentices at the Mint for a definite term.	By the Mint Master, Calcutta.

M.—In the territories under the administration of the Government of the North-Western Provinces and Oudh, as regards contracts, etc., not hereinbefore specified—

I.—In the case of the Lieutenant-Governor and Chief Commissioner— All deeds and instruments relating to matters other than those specified in heads II to IV.	**By a Secretary to Government.**
II.—Contracts and other instruments for sums not exceeding ₹2,000 except those which affect real estate.	By all Heads of Departments.
III.—Contracts and other instruments at present executed by Collectors, Deputy Commissioners, and Deputy Collectors.	By Collectors and Deputy Commissioners.
IV.—Contracts and other instruments for a sum not exceeding ₹500, and not affecting real estate.	By subordinate officers appointed by Heads of Departments with the approval of the Local Government.

N.—In the territories under the administration of the Government of the Punjab, as regards contracts, etc., not hereinbefore specified—

I.—In the case of the Lieutenant-Governor— All deeds and instruments relating to matters other than those specified in heads II to IV and VI and VII.	By a Secretary to Government.
II.—Contracts and other instruments connected with leases of land, ferries, dues for grazing cattle on places other than canal banks, fisheries, *nazul* lands and buildings, spontaneous products and minerals, execution of minor works not under the Public Works Department, and the supply of necessaries for depôts.	By Deputy Commissioners.
III.—Instruments relating to the sale of waste lands.	By Deputy Commissioners.
IV.—Contracts relating to any matter falling within their ordinary jurisdiction.	By Deputy Commissioners.

V.—(*a*) Instruments of free grant of proprietary right in land. (*b*) Instruments whereby property is mortgaged to the Government as security for a loan. (*c*) Instruments of exchange of land.	By a Secretary to Government and Deputy Commissioners.
VI.—Contracts for the supply of clothing, etc., for the Police.	By the Inspector-General of Police.
VII.—Contracts for the supply of articles for use in jails, or regarding the sale of articles manufactured in jails.	By the Inspector-General of Prisons.

O.—In the territories under the administration of the Chief Commissioner of the Central Provinces, as regards contracts, etc., not hereinbefore specified—

I.—In the case of the Chief Commissioner— All deeds and instruments relating to matters other than those specified in head II.	**By his Secretary.**
II.—Contracts and other instruments in matters connected with the lease or sale of land.	**By Deputy Commissioners.**

P.—In the territories under the administration of the Chief Commissioner of Burma, as regards contracts, etc, not hereinbefore specified—

I.—In the case of the Chief Commissioner— All deeds and instruments relating to matters other than those specified in heads II to IV.	By a Secretary to the Chief Commissioner.
II.—Contracts and other instruments for the supply of stores, rations, clothing, etc.	By the Heads of the Jail and Police Departments.
III.—Contracts and other instruments relating to matters connected with their respective Departments.	**By all Heads of Departments.**
IV.—Contracts and other instruments connected with the lease or sale of land and fisheries; and contracts relating to any matter falling within their ordinary jurisdiction.	By Deputy Commissioners.

Q.—In the territories under the administration of the Chief Commissioner of Assam, as regards contracts, etc., not hereinbefore specified—

I.—In the case of the Chief Commissioner— All deeds and instruments relating to matters other than those specified in heads II to V.	By his Secretary.
II.—Contracts and other instruments in matters connected with the lease or sale of land, ferries and fisheries, spontaneous products and minerals, for the supply of stores, building materials, labour, and such like engagements.	**By Deputy Commissioners.**
III.—Contracts and other instruments connected with temporary leases of land or of other rights, dues or property of Government or for the supply of stores, building materials, labour, and such like engagements when such contract, instrument or engagement does not exceed the value of ₹500.	By Assistant Commissioners and Sub-divisional Officers.
IV.—Contracts and other instruments connected with leases of land.	By Extra Assistant Commissioners and Settlement Officers.

V.—Contracts for the supply of articles required for the use of the Department, and other instruments connected with the administration of the Department.	By all Heads of Departments.
R.—In the case of the Chief Commissioner of Coorg as regards contracts, etc., not hereinbefore specified.	By his Secretary.
S.—In the Hyderabad Assigned Districts, as regards contracts, etc., not hereinbefore specified—	
I.—All deeds and instruments relating to matters other than those specified in heads II and III.	By the Resident at Hyderabad, the First Assistant Resident, Commissioners, and Deputy Commissioners in the Hyderabad Assigned Districts.
II.—Contracts for the supply of clothing, etc., for the Police.	By the Inspector-General of Police.
III.—Contracts for the supply of articles required for jails.	By the Inspector-General of Jails.
T.—In British Baluchistan and the territories administered by the Agent to the Governor-General in Baluchistan as such Agent—	
I.—All deeds and instruments relating to matters other than those specified in heads II to V.	By the First Assistant to the Agent to the Governor General and Chief Commissioner.
II.—Contracts and other instruments for the supply of stores, clothing, etc.	By Heads of Departments concerned.
III.—Contracts and other instruments relating to matters connected with their respective Departments.	By all Heads of Departments.
IV.—Contracts and other instruments connected with the lease or sale of land, or whereby land is mortgaged to Government in security for a loan, and contracts and instruments relating to any matter falling within their ordinary jurisdiction, including the execution of civil works not under the Public Works Department.	By Political Agents and Deputy Commissioners.
V.—Sanads— (*a*) containing or conferring exemption from payment of land revenue; (*b*) containing or confirming any pension or grant of money connected with the land revenue; (*c*) contracts and instruments relating to any matter falling within jurisdiction of the Settlement Department.	By the Revenue Commissioner.
U.—Agreements for the recovery of advances under the Land Improvement Loans Act, XIX of 1883, and the Agriculturists' Loans Act, XII of 1884.	By District Officers.

ORDER.—Ordered that the above Resolution be communicated to Local* Governments and Administrations and the several Departments of the Government of India for information and guidance; and that it be also published in the Supplement to the *Gazette of India*.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the Week ending at 8 a.m. on Saturday, March 23rd, 1895.

General Summary.—Fairly uniform pressure conditions have prevailed throughout the Indian region during the greater part of the week under review. During the early part of the week pressure was relatively high in the north-west of India, and relatively low over Bengal and the Gangetic plain, but on Thursday (21st) a change commenced. The barometer then began to fall briskly in the north-west and to rise in the north-east, so that conditions during the next two days were the reverse of those prevailing at the commencement of the week, high pressures being reported from Assam and Bengal, and a slight depression from the Punjab. More or less variable winds and fair weather prevailed during the continuance of uniform pressures, but on Thursday easterly winds set in up the Gangetic plain, and on the last two days strongish cyclonic winds blew over North-Western India. Rain commenced in Baluchistan, Kashmir, and the extreme north-west of India on Friday, but the amounts received were not large.

In Southern India fine weather with variable winds and about the normal temperatures has prevailed steadily.

Daily Summary.—*Sunday.*—The pressure changes were generally unimportant. Barometric readings were about normal in North-Western India, but were below the normal in North-Eastern India, and over the west coast of the Peninsula. The wind directions varied considerably, and, except at Darjeeling and Gnatong where the force was strong, the winds were light or moderate. Temperature had increased slightly in Burma and Bengal, and decreased elsewhere, the reduction in North-Western and Central India and the North Deccan having been more or less rapid. The mean temperature was between 2° and 8°

lower than usual in the north-west and centre of the country. Showery weather continued in Cachar, and thundershowers were received at numerous stations in the Central Provinces, Berar, and Chota Nagpur.

Monday.—Pressure had increased everywhere. Pressure conditions were approximately normal, and readings fairly uniform. Wind directions were very variable, and calms were reported in the Punjab. Temperature had changed considerably and irregularly. It had fallen in Bengal, Madras, and the Central Provinces, risen in Burma, Central India, and Rajputana. The mean temperature was 5° above the normal in Burma, and Lower and Central Burma was the hottest area in the Indian region. Thundershowers had occurred in East Bengal, Chota Nagpur, and the Central Provinces.

Tuesday.—Pressure had increased briskly over North-Eastern India, but had changed slowly and irregularly elsewhere. Readings remained very uniform. Winds were again generally irregular in direction, but the force in many places was somewhat stronger than on Monday. Temperature had recovered again in Bengal, while it had decreased in the North-Western Provinces, the Central Provinces, and Central India. The mean temperature was in defect of the normal in the Central Provinces (6°), in Central India (5°), in Sind, Rajputana, and the Punjab (4°), in the North-Western Provinces (3°), and in Madras (2°). On the contrary, it was in excess in Burma, Bengal, and Assam. Central Burma was again the hottest part of the Indian region. Thundershowers had again occurred in the Central Provinces, Bundelkhand, Baghelkhand, and West Bengal.

Wednesday.—The pressure changes were again unimportant, and readings were again fairly uniform, though somewhat lower in Burma and Southern India than elsewhere. Pressure was in slight defect in Burma, and in more or less excess elsewhere. Moderate to light winds irregular in direction prevailed generally. Thunderstorms had occurred over the same area as on the 19th, and had extended southward into the Deccan. Temperature had fallen briskly in Burma and rapidly in Bengal, and the mean was below the normal average very generally. The hottest part of India was the Madras Deccan.

Thursday.—An important change had occurred in the north-west, where pressure had given way rapidly over Baluchistan and the Punjab. Elsewhere the barometer was generally steady. Pressure was in moderate excess in parts of North-Eastern and Central India, and was about normal in other places. The winds were beginning to shift to east in Bengal and the Gangetic plain, but there was no other change of importance. Temperature had fallen in Bengal, while it had begun to rise again in North-Western and Central India. The mean temperature was largely below the normal in the central and north-eastern parts of the country, and was more or less below generally. Central Madras was again the hottest part of the Indian region.

Friday.—Pressure had risen briskly in north-east, and fallen slightly to briskly in the north-west of India, while elsewhere the changes were small. A depression was forming over the South-West Punjab and Upper Sind, while readings were high, and considerably above the normal in Bengal and Assam. Winds were north-easterly to easterly in Bengal and Assam, and very irregular elsewhere. Though temperature had increased, except over Madras and Burma, the mean temperature was still below the normal average very generally. The hottest region was now Gujarat. Rain was confined to a few stations in the extreme north-east.

Saturday.—Pressure had decreased almost everywhere, and the depression over the western desert had developed. Within the area of disturbance pressure was in considerable defect, while in North-Eastern India, on the contrary, pressure read above the normal. Easterly and south-easterly winds prevailed up the Gangetic plain, and rain had fallen in Baluchistan, Kashmir, and the north of the Punjab. Temperature had fallen over Burma, the Indian Peninsula, and at the hill stations, and risen elsewhere. The mean temperature was in excess, except in Burma and Madras. The hottest region was Gujarat, where a day temperature of 104·2° was registered.

Temperature.—During the week temperature was generally lower than usual, except in Burma, but temperature has been very unsteady, and the variations from the normal have changed largely from day to day. Thus in Burma there

was a mean excess of 4·9° on the 18th, and a mean deficiency of 1·7° on the 23rd, in Bengal and Assam an excess of 3·6° on the 17th, and a deficiency of 7·8° on the 21st, and in Sind and Rajputana a deficiency of 5·3° on the 17th, and an excess of 3·1° on the 23rd.

The following table gives the variation of the mean temperature from the normal in the different provinces of India for each day of the week :

Province.	March 1895.							Mean variation of week.
	17th	18th	19th	20th	21st	22nd	23rd	
	°	°	°	°	°	°	°	°
Burma	+1·6	+4·9	+3·4	+1·0	+1·3	−0·8	−1·7	+1·4
Bengal and Assam	+3·6	−1·4	+1·2	−2·9	−7·8	−5·7	−3·5	−2·4
North-Western Provinces and Oudh	+1·0	−0·6	−3·4	−4·7	−5·1	−3·3	−1·8	−2·6
Punjab	−2·3	−2·1	−3·5	−2·9	−1·5	−0·1	+2·9	−1·4
Bombay	−0·5	+1·2	−0·3	−1·6	−1·3	+0·3	+0·9	−0·2
Central Provinces and Berar	−0·2	−3·0	−6·1	−7·5	−7·7	−5·7	−3·0	−4·7
Central India and Gujarat	−6·2	−1·9	−4·9	−5·5	−4·4	−1·9	−0·4	−3·6
Sind and Rajputana	−5·3	−4·0	−4·4	−4·1	−1·7	−0·6	+3·1	−2·4
Madras	+0·1	−1·4	−1·8	+0·3	+0·3	+0·1	−0·7	−0·4
Mean for whole of India	−0·9	−0·9	−2·2	−3·1	−3·1	−2·0	−0·5	−1·8

The mean temperature of the week was 1½° in excess in Burma, and about normal in Bombay and Madras, but was between 1½° and 2½° in defect in the other provinces. The coolest days were the 20th and 21st, when the mean temperature of the whole of India was 3·1° below the average.

Accompanying the large changes in temperature above described, there has occurred a large change in the position of the area of highest day temperatures within the Indian region. Thus the maximum day temperature reported on the—

17th was 103·2° at Cuddapah.
18th ,, 103·6° ,, Thayetmyo.
19th ,, 104·6° ,, Ditto.
20th ,, 102·2° ,, Cuddapah.
21st ,, 101·7° ,, Ditto.
22nd ,, 103·9° ,, Deesa.
23rd ,, 104·2° ,, Surat.

Thus during the week the highest day temperatures passed from Central Burma to Central Madras and from Central Madras to Gujarat.

Rainfall.—The greater part of the rain which was received during the week under review was attributable to thundershowers which occurred over Assam, Bengal, the central parts of the country, and even as far south as the Deccan. These thunderstorms were developed during the relatively uniform conditions of pressure which prevailed from the 17th to the 21st, and ceased suddenly with the appearance of the depression over the western desert at the close of the week. On Friday, the 22nd, rain commenced in the extreme north-west, and at 8 A.M. on the 23rd rainy weather was reported from several stations on the north-west frontier. The average actual rainfall of the week was heaviest (1·45 inches) in the Surma Division of Assam; this was followed by 0·74 inch in the Central Division of the Central Provinces, by 0·70 inch in the Brahmaputra Division of Assam, and by 0·53 inch in the northern division of Bengal. In all the other divisions reporting rainfall the average fall was under 0·50 inch. The rainfall was generally below the normal, except in some of the Central and Bengal Divisions. The station of Thal in the Kohat district of the Punjab had a total fall of 5·30 inches during the week.

W. L. DALLAS,

Asst. Meteorological Reporter to the Government of India.

SIMLA, *28th March 1895.*

DENZIL IBBETSON,

Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the Week ending at 8 a.m. on Saturday, March 30th, 1895.

General Summary.—The unsettled weather which prevailed over North-Western India at the close of the previous week continued into the week under review. A large area within which pressure was in very large defect overlay North-Western India, and to the northward and westward of this area rain and strong winds were reported. This depression lasted during the 25th, on which day rain was reported from a large number of the stations in the extreme north-west of India, but by the morning of the 26th it had disappeared, and been succeeded by a very rapid barometric rise in North-Western India. Between the 26th and the morning of the 30th pressure became steadily more uniform throughout India, and the weather was quiet and fine almost everywhere. On the 30th pressure began to fall briskly in the extreme north-west, and rain commenced at Peshawar and Cherat.

A wave of low temperature followed the depression and rainfall of the early part of the week, and, except on the 24th, the general temperature of India was in defect of the average. The coolest day was the 27th, when in the North-Western Provinces, the Central Provinces, Berar, Central India, and Gujarat there was a deficiency of 5° or more in the mean temperature as compared with the normal.

Daily Summary.—*Sunday.*—A large low pressure area overlay North-Western India, the barometer at Peshawar, Dera Ismail Khan, and Jacobabad reading 0·20 inch below the normal average. From the low pressure area readings steadily increased, and were highest in Assam, Burma, and the south of the Peninsula. The depression in the north-west influenced the winds over a large part of Northern India, the force having been strong to a gale over North-Western India, but over the Peninsula and North-Eastern India the directions were variable, and the force generally light. Rain had fallen at the hill stations in the extreme north-west, as well as at a few places in the neighbouring plains. The heaviest amounts were 1·10 inches at Murree, and nearly ¾ inch at Astor and Cherat. The mean temperature was in defect in Madras, in excess in the Punjab, Sind, and Rajputana, and about normal in the other provinces.

Monday.—A rapid recovery of pressure had occurred over North-Western India, except over the east of the Punjab, and a slight fall over North-Eastern India, while over the Peninsula the barometer had been steady. A depression was shown over the east of the Punjab, and a second over the east of the North-Western Provinces and Bihar. The winds were cyclonic and strong to a gale in the neighbourhoods of the two depressions, while they were generally southerly over the Bay, and northerly over the east of the Arabian Sea. Rain had fallen over the north and east of the Punjab and the west of the North-Western Provinces. At Murree and Srinagar the amount received was nearly 2 inches, but elsewhere the falls were light. Temperature was in excess of the average in the North-Western and Central Provinces, and normal or below the normal elsewhere. In the Punjab the deficiency was as much as 4½°.

Tuesday.—Pressure had decreased slightly in North-Eastern India and in the south of the Peninsula, and had increased elsewhere, the rise being very rapid in the north-west and centre. Pressure was lowest over North-Eastern India, and highest in the north of the Punjab, but the two depressions noticed on the previous day had ceased to exist. The winds varied considerably in direction, but were still strong in force in several parts of the country. The mean temperature was almost everywhere low, the abnormal deficiency being as much as 6·9° in Central India and Gujarat, and 6·0° in the Punjab. Rain in small or moderate amounts had occurred at several stations, but principally in the north-east.

Wednesday.—Pressure had fallen briskly in North-Western India, but elsewhere the barometer was steady or nearly so. A large low pressure area overlay the trans-Gangetic portions of the North-Western Provinces and North Bengal, while pressure was high in the west of the Punjab and in Kathiawar. Winds were generally westerly down the Gangetic plain and across Bengal. Elsewhere the directions varied considerably. The mean temperature remained below the normal average, the greatest abnormal deficiency being 5·7° in Gujarat and Central India. Light rain had fallen at a few north-eastern stations, and snow had occurred at Gnatong.

Thursday.—Pressure had risen briskly to rapidly over North-Eastern India, and had been nearly steady elsewhere. Pressure had hence become much more uniform. The winds were very little changed, and had again been strong down the Gangetic plain. Temperature had risen at most stations, and the mean was about normal in Burma, Bombay, and Madras, but elsewhere the deficiency previously noticed continued. The only rainfall reported was a shower at Colombo.

Friday.—Pressure changes had been generally slight, and the barometric readings throughout India were generally very uniform. Winds were generally variable in direction, and light or moderate in force, while calms prevailed in the north-west. Temperature had continued to increase in Northern India, but had fallen in Burma and the Peninsula. The mean temperature was about normal in Bengal, Assam, the Punjab, Bombay, Sind, Rajputana, and Madras, but was still below the normal elsewhere. A light shower of rain was again reported from Colombo.

Saturday.—The barometer had fallen briskly over North-Western India, but pressure was nearly normal over the greater part of the country. Winds continued variable in direction, and calms were reported from several northern and central stations. The temperature changes had been irregular. The mean temperature had been normal in Bengal, the Punjab, Bombay, Sind, and Rajputana, in slight excess in the Central Provinces, and in slight defect in Madras, Central India, the North-Western Provinces, and Burma. Showers were reported from a few north-western and north-eastern stations.

Temperature.—The following table gives the variations from the normal temperature of the different provinces of India for each day of the week:

Province.	March 1895.							Mean variation of week.
	24th	25th	26th	27th	28th	29th	30th	
	°	°	°	°	°	°	°	°
Burma	−0·9	−0·4	−0·6	−1·5	−0·1	−1·0	−1·1	−0·8
Bengal and Assam	−0·9	−0·1	+0·9	−2·4	−2·1	−0·9	+0·9	−0·7
North-Western Provinces and Oudh	+0·6	+2·1	−4·7	−5·0	−4·0	−1·7	−1·1	−2·0
Punjab	+1·1	−4·5	−6·0	−4·6	−2·1	−0·6	+0·2	−2·4
Bombay	+0·7	+0·6	−2·3	−0·6	+0·5	+0·7	+0·4	0
Central Provinces and Berar	+0·1	+2·7	−3·0	−5·4	−3·6	−1·4	+1·3	−1·3
Central India and Gujarat	+0·5	−1·5	−6·9	−5·7	−3·3	−2·0	−2·1	−3·0
Sind and Rajputana	+4·3	−1·1	−4·7	−4·6	−2·6	−0·8	−0·6	−1·4
Madras	−1·0	−0·9	−0·7	−0·4	−0·3	−0·8	−1·1	−0·7
Mean for whole of India	+0·5	−0·3	−3·1	−3·4	−2·0	−0·9	−0·4	−1·4

The general temperature of India was ½° above the normal average on the 24th, but on the 25th a deficiency had set in which lasted till the close of the week. The greatest deficiency (−3·4°) was on the 27th, after which day the mean temperature rose steadily, so that by the 30th the abnormal deficiency was only

0·4°. The greatest variations of temperature during the week were experienced in Sind and Rajputana.

The highest maximum recorded on the 24th was 103·7° at Khandwa.
" " " " " 25th " 103·7° " Akola.
" " " " " 26th " 104·2° " Cuddapah.
" " " " " 27th " 104·4° " Salem.
" " " " " 28th " 103·7° " Khandwa.
" " " " " 29th " 105·2° " Cuddapah.
" " " " " 30th " 105·2° " Ditto.

The above shows there was comparatively little increase in the heat during the week, and that the hottest regions were Central Madras and the west of the Central Provinces.

Rainfall.—During the week under review rain fell in considerable amounts over the Punjab, Assam, Lower Bengal, and Malabar, while over Burma, West Bengal, the North-Western Provinces, the central parts of the country, and the Peninsula, excepting Malabar, there was little or no rain. The heaviest average actual rainfall was 1·08 inches in Assam (Surma), followed by 0·92 inch in Assam (Brahmaputra), by 1·02 inches in the Punjab (North-West), and by 0·70 inch in the Punjab (Hill Districts). No less than thirty-nine of the rainfall divisions had actually or practically no rain. All the divisions of the Punjab, the Malabar Division, and the Coorg Division had heavier rainfall than the average, but in all other parts of the country the rainfall was less than usual. In Assam and part of Bengal the deficiency was considerable, but elsewhere it was small and unimportant. It is, however, only in parts of Bengal, of Assam, and of the Punjab that the normal rainfall of the present week is at all considerable, so that the lightness of the general rainfall reported this week is of comparatively small importance.

The three columns of the table exhibiting the state of the seasonal rainfall show that the spring rainfall has been relatively heavy over the whole of the central parts of the country and in the north-west of the Punjab, and has been relatively light elsewhere. In Burma and Madras there has been practically no rain throughout the month.

The more important totals for the week are as follows: Dacca received 2·32 inches, Sylhet 3·16 inches, Murree 3·36 inches, Haripur (Hazara District) 3·70 inches, Sahiwal (Shahpur District) 2·05 inches, one station (name not given) in Dera Ismail Khan district 3·49 inches, and Alleppy (Travancore) 3·95 inches.

W. L. DALLAS,

Asst. Meteorological Reporter to the Government of India.

SIMLA, *4th April 1895.*

DENZIL IBBETSON,

Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 30th March.*—Only scattered showers in the Circars and on the West Coast. Irrigation supplies are generally short, and many sources are drying up. The standing crops chiefly under wells, and irrigation works are suffering in the southern parts of the Presidency. Cotton is also suffering in parts. Some harvest is still going on with moderate yield. Fodder is generally sufficient, and cattle are in good condition. Prices of staple grains are slightly dearer in the Circars and Southern districts; elsewhere prices are almost stationary.

Bombay.—*For week ending 3rd April.*—The standing crops are good, except in parts of Karachi and Hyderabad, where they are damaged by insects, blight, or other causes. Reaping of the late crops continues in parts of fourteen districts, and preparations for next season in parts of twelve. Cotton-picking is in progress in parts of Gujarat, Kathiawar, and the Karnatic. The fodder-supply is sufficient, except in parts of Shikarpur. Agricultural stock are in good condition. Prices are normal, except in parts of Ahmednagar and Sholapur.

Bengal.—*For week ending 1st April.*—There was rain in some districts during the week, but, except in Murshidabad, Rungpur, Dacca, and Purneah, it was insignificant in amount. The rain has assisted preparation of the land for autumn rice and jute in Northern Bengal. In parts of Eastern Bengal more rain is still required for the standing crops, notably for the chilli and pulse crops in Chittagong. Spring rice and indigo are doing well. The spring harvest is proceeding with every prospect of a good outturn. The collection of opium is nearly finished, and the weighment is about to begin. In Hazaribagh it is reported that the fodder-supply is scanty. The price of common rice continues generally normal, although a slight fall has occurred in some districts.

North-Western Provinces and Oudh.—*For week ending 3rd April.*—Weather seasonable. Slight rain in two tehsils of the Moradabad district. The spring harvest is in full progress: the outturn in Oudh is below average; elsewhere it is good. The poppy crop is indifferent. Fodder and supplies are ample. Prices are fluctuating slightly.

Punjab.—*For week ending 3rd April.*—Rain has fallen in all but three districts. Harvesting of the spring crops has commenced. Sowings of cotton, tobacco, and other extra spring crops are in progress. The condition of the standing crops is generally reported good, though poor in parts of Jullundur. Prospects are good throughout. Recent rain has improved the condition in Dera Ismail Khan. The crops are said to have been damaged to some extent in parts of Lahore. Cattle are generally in good condition, and fodder is sufficient throughout the Province. Prices are normal in Umballa and are low elsewhere.

Central Provinces.—*For week ending 3rd April.*—Weather generally sultry and hot for the season, abnormally cloudy, but no rain, except a slight shower in one district. Harvesting of the winter crops progresses, and threshing is well advanced. Land is being prepared for the autumn sowings in Wardha. Prices rule high in Damoh and Seoni, but are normal in other districts. The export trade is dull.

Burma.—*For week ending 30th March.*—Showers of rain fell in three districts of the northern part of Upper Burma. In Lower Burma agricultural operations have been completed. In Upper Burma sowing and transplanting of dry-weather paddy and cultivation of miscellaneous food-crops are nearly completed. Prospects are generally good. Fodder and water-supply sufficient. Prices of paddy are stationary, except for a slight rise in three districts of Lower Burma, where prices are above normal, and a fall in the Meiktila district of Upper Burma, where prices are below normal.

Assam.—*For week ending 2nd April.*—Weather seasonable. Sowing of early rice has commenced. Pressing of sugarcane continues. The condition of cattle is fair. Fodder and water are sufficient.

Mysore and Coorg.—*For week ending 3rd April.*—MYSORE: Crops are withering in some places. Prospects otherwise good. Prices slightly fallen in the Shimoga district.

COORG: Rainfall moderate. Threshing of rice is over. The coffee crop has blossomed in some parts. Fodder and water for cattle fairly sufficient. Prices of food-grains are normal.

Berar and Hyderabad.—*For week ending 3rd April.*—BERAR: Weather hot. Threshing of wheat, gram, and linseed continues in two districts. Breaking up of land for the next rain crop is in progress. The fodder and water-supply are ample. Prices are almost steady.

HYDERABAD: No rain during the week. Sowing of the hot-weather crops is completed. Water in tanks and wells is sufficient for cultivation. Prices are normal.

Central India.—*For week ending 3rd April.*—Slight rain in the Bundelkhand Agency during the week. Agricultural operations nearly completed in Bundelkhand, Baghelkhand, and Bhopawar; in progress in other Agencies. The probable outturn will be below average in Bundelkhand, but fairly good in all Agencies. The condition of agricultural stock is indifferent in some parts of Gwalior, but fairly good elsewhere. Pasturage is good and sufficient in all Agencies, but indifferent in some districts of Gwalior. Prices of food-grains are high in Goona, rising in part of Gwalior, falling in Bundelkhand, and normal elsewhere. Opium partly damaged by rain in Goona, but fairly good in other Agencies.

Rajputana.—*For week ending 3rd April.*—Agricultural operations are satisfactory. Harvesting continues. Standing crops, prospects, and agricultural

stock are generally good. The crops have been partly damaged by hail in Dholepore. Fodder is sufficient, except in Dholepore. Prices are below average in one State, fluctuating in two, falling in one, and steady elsewhere.

Kashmir.—*For week ending 2nd April.*—KASHMIR VALLEY: Rain has fallen in the Mozafferabad district. The weather is now fine. The spring crops are in good condition. Ploughing for the autumn harvest is in progress. Prices continue normal.

JAMMU PROVINCE.—*For week ending 3rd April.*—Slight rain. The standing crops are in good condition. Fodder is sufficient.

Nepal.—*For week ending 30th March.*—The days are warm, but the nights are cold. Prospects of the crops are good.

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

RAILWAY STATISTICS.

STATEMENT OF APPROXIMATE GROSS EARNINGS OF INDIAN RAILWAYS FROM 1ST JANUARY TO 24TH MARCH 1894, AND FROM 1ST JANUARY TO 23RD MARCH 1895.

N.B.—As regards the figures in column *Total Earnings from 1st January 1895*, audited figures have been used as far as possible.

RAILWAY.	Average earnings per mile per week during the 1st half of 1894.	Week ending 24th March 1894. Earnings. Mean mileage worked.	Total.	Per mile open per week.	Week ending 23rd March 1895. Earnings. Mean mileage worked.	Total.	Per mile open per week.	Earnings from 1st January to 24th March 1894.	Earnings from 1st January to 23rd March 1895.	Increase.	Decrease.

F. B. HEBBERT,
Under Secretary.

SIMLA, *the 4th April 1895.*

Printed and published for the GOVERNMENT OF INDIA *at the* GOVERNMENT CENTRAL PRINTING OFFICE, *Simla.*

SUPPLEMENT TO

The Gazette of India.

No. 15.} CALCUTTA, SATURDAY, APRIL 13, 1895.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the Week ending at 8 a.m. on Saturday, April 6th, 1895.

At the commencement and again at the close of the week, fine weather prevailed generally over the greater part of India, but during the middle of the week a barometric depression appeared over North-Western India, and occasioned very unsettled weather in that part of the country. Rain began in Baluchistan and Kashmir on the 2nd, spread over a large part of the Punjab and of the North-West Himalayas on the 3rd and 4th, and ceased on the 5th. In addition to this burst of rainfall over North-Western India, thundershowers have occurred over North-Eastern India—more particularly in Assam—on most days of the week; and, quite at the close of the week, rather severe thunderstorms and nor'-westers commenced in different parts of the Peninsula.

As noticed above, the rainfall area was greatest on the 3rd and 4th. Previous to the latter date, the mean temperature had been generally fairly normal, but on the 4th a sudden and considerable fall of temperature was reported in the Punjab, Sind, and Rajputana, and a wave of low temperature flowed out from North-Western India, and spread to all parts of the country, except Burma and Madras.

Daily Summary.—*Sunday.*—Pressure was decreasing slightly both in North-Eastern and North-Western India and was nearly steady elsewhere. Pressure was relatively low over the western desert and over North Bengal, and relatively high in Burma; but the differences were generally small, and over a large part of the country readings were very uniform. Winds were southerly over the Bay area, but blew from between north and west in most other places. Light showers of rain had fallen in Assam and at Colombo.

Monday.—Pressure had commenced to decrease over North-Western India, Baluchistan, and the west of the Peninsula, had risen in North-Eastern India, and had been nearly steady elsewhere. Pressure was above the normal in the north-east and below in the north-west of India. Winds were southerly over the Bay and Bengal, westerly down the Gangetic plain, and northerly in the west of the Peninsula. Thundershowers had given scattered rainfall to a few places in the east, of which the most important were 1·31 inches at Moulmein, 1·60 inches at Silchar, and 0·75 inch at Sibsagar.

Tuesday.—Pressure had decreased over North-Western India and had increased or been steady elsewhere. The fall had been brisk over the Central Punjab, and a large shallow depression was shown in the north-west. Pressure was in considerable excess over Assam and Burma, and in considerable defect within the depression area. Winds were cyclonic around the depression in the north-west, southerly over the Bay area, and variable elsewhere. Rain had fallen at a few places in the extreme north-west and extreme north-east. Silchar reported 1·20 inches of rain, Sibsagar 0·52 inch, and Peshawar 0·36 inch.

Wednesday.—Pressure had fallen briskly on the North-West Himalayas, but elsewhere the changes were small. The depression over North-Western India still existed, and the centre was approaching the hills, where strong squally winds were blowing. Strong south-south-westerly winds were also blowing at the head of the Bay. The weather was unsettled and cloudy over North-Western India, and scattered showers continued to be reported from North-Eastern India. Elsewhere the weather was fine. The heaviest rainfall amounts were 0·90 inch at Srinagar, 0·82 inch at Lahore and Silchar, and 0·55 inch at Astor and Sialkote.

Thursday.—The depression had disappeared from North-Western India, and the barometer had recovered rapidly there. It had, on the other hand, fallen briskly to rapidly over North-Eastern India, and a shallow depression was shown over Bengal. Pressure generally was very uniform, and the variations from the normal were moderate or small. Winds were variable, except over the Bay area, where they remained southerly. Rain was again reported from North-Western India and from Assam and Lower Bengal. The principal falls were 0·82 inch at Burdwan, 0·67 inch at Mussooree and Chakrata, and 0·46 inch at Silchar.

Friday.—Pressure had decreased briskly to rapidly over the greater part of the country. Readings were relatively high over the north-west of the Punjab and low over North Bengal and the centre of the Peninsula. Pressure was in slight excess over the Punjab, in large defect over the Assam Valley, and nearly normal elsewhere. Westerly winds prevailed down the Gangetic plain, and northerly winds in North-Western India, but in most other places the directions were variable. Rain had ceased in the north-west, but showers continued to fall in the north-east of India, and had commenced to fall in Southern India. The only amount exceeding ½ inch was at Silchar, which station received 1·29 inches.

Saturday.—Pressure had risen briskly to rapidly over North-Eastern India, but had been steady or nearly so elsewhere. In consequence, readings had become much more uniform, though shallow depressions were still shown in North Bengal and in the centre of the Peninsula. Westerly winds continued down the Gangetic plain, and a feeble and irregular cyclonic circulation of the winds had commenced in the Peninsula. A few light scattered showers (most general in the Central Provinces) were reported.

Temperature.—The following table gives the variations from the normal temperature of the different provinces of India for each day of the week:

Province.	March 1895.	April 1895.						Mean variation of week.
	31st	1st	2nd	3rd	4th	5th	6th	
	°	°	°	°	°	°	°	°
Burma	−0·8	+0·1	−0·1	−0·2	+0·4	+1·5	+0·8	+0·2
Bengal and Assam	+1·1	+0·2	−0·4	+0·2	+0·3	+0·3	−0·9	+0·1
North-Western Provinces and Oudh	−1·4	−2·3	−0·2	+1·3	−1·4	−7·3	−5·9	−2·5
Punjab	−0·1	+1·7	+2·3	+0·2	−7·1	−5·5	−4·8	−1·9
Bombay	−0·3	+0·2	+0·6	+0·2	−0·1	+0·2	−1·2	−0·1
Central Provinces and Berar	+0·6	−0·7	+0·3	+2·3	+0·8	−1·9	−5·1	−0·5
Central India and Gujarat	−2·1	−2·8	−1·9	+0·7	−1·8	−6·4	−4·3	−2·7
Sind and Rajputana	−0·4	+0·9	+1·1	+2·0	−4·5	−4·0	−2·3	−1·0
Madras	−1·3	−1·2	−1·1	−0·9	−0·6	+0·4	+0·6	−0·6
Mean for whole of India	−0·5	−0·4	+0·1	+0·6	−1·6	−2·5	−2·6	−1·0

From the 31st of March to the 3rd April the mean temperature of India was approximately normal, but on the 4th a sudden fall of over 2° occurred, and the mean temperature from that date to the close of the week was below the average. The greatest abnormal defect was on the 6th. The greatest deficiency in the temperature was recorded in the North-Western Provinces, Central India, and Gujarat, where, on some days, the mean was between 6° and 7° lower than usual. The Punjab was almost equally cool, and that province reported a deficiency of 7·1° on the 4th. The greatest variation in temperature was recorded in the

Punjab, where there was an excess of 2·3° on the second, and a deficiency of 7·1° on the 4th.

The highest maximum recorded on—

31st March	was 105·2°	at	Cuddapah.
1st April	,, 105·9°	,,	Chanda.
2nd ,,	,, 106·4°	,,	Ditto.
3rd ,,	,, 106·2°	,,	Nagpur.
4th ,,	,, 105·9°	,,	Chanda.
5th ,,	,, 107·1°	,,	Minbu.
6th ,,	,, 106·2°	,,	Cuddapah.

The hottest regions of the Indian area were hence, as was the case last week, the Central Provinces and Central Madras, except on the 5th, when there occurred a rise of temperature in Burma, and the hottest region was transferred temporarily to that province.

Rainfall.—From a large part of India rain was actually or practically absent during the past week, but in Assam and the Punjab the fall was general and moderately heavy, while in Tenasserim, Lower Bengal, the Central Provinces, and the south of the Peninsula, light scattered showers were received. The regions which received actually or practically no rain during the week included all the Burma divisions, except Tenasserim, the Central, North, Orissa, Chota Nagpur, and Bihar divisions of Bengal, all the North-Western Provinces divisions, all the divisions in the Peninsula, except Malabar and South Madras, and all the central and north-western divisions of India, except the east of the Central Provinces and the whole of the Punjab. In Tenasserim, Assam, the Punjab (South, Central, Submontane and Hill districts), Malabar and the Central Provinces (East), the average actual rainfall was in excess of the normal; in all the other divisions it was in defect.

The three concluding columns of the table, showing the state of the rainfall for the five weeks ending on April 6th, exhibit an excess of rain, for that period, over the north-west and west of the Punjab, over Khandesh, Berar, the Central Provinces divisions, over Sind, Central India, and over Rajputana; and a deficiency of rain in all other parts of the country. In Burma (except Tenasserim) and over a large part of the Peninsula there has been actually or practically no rainfall throughout.

The returns of the heavy falls of rain during the week, March 31st to April 6th, show that the only considerable amounts were received in North-Eastern and North-Western India. The station of Netrokona in Mymensingh received a total of 1·60 inches; Karinagunj in Sylhet received 7·25 inches; Nemotha in Cachar 6·61 inches; Cherrapunji in the Khasia Hills 4·55 inches; Jorhat in Sibsagar 3·42 inches; Sonapur in Kamrup 2·17 inches; Pathankote in Gurdaspur 1·11 inches; Tarntaran in Amritsar 1·19 inches; Dharmsala 1·31 inches; Mansehra in Hazara 1·62 inches; Ponnani in Calicut 2·24 inches; Bramhapuri in Chanda 1·07 inches; and Tenkasi in Tinnevelly 1·73 inches.

W. L. DALLAS,
Asst. Meteorological Reporter to the Government of India.

SIMLA, *11th April 1895.*

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 6th April.*—A few showers have fallen in parts of the Southern districts, on the West Coast, and in the Circars. The pre-monsoon rains are being anxiously looked for in the Central and Southern districts. Cultivation for the next crop is commencing on the West Coast; elsewhere it is confined to small areas under wells and the largest irrigation works. Irrigation supplies continue to decrease as usual this time of the year. The standing crops are not very extensive, but are suffering in many parts of the southern half of the Presidency. The harvest still continues on a small scale with only moderate yield. Fodder is generally sufficient, and the condition of cattle is generally good. Prices are almost stationary, but are slightly easier in most districts, and have risen slightly only in South Arcot, Salem, and Madura.

Bombay.—*For week ending 10th April.*—The standing crops are good, except in parts of Sind, where they have been damaged by insects, rust, or other causes. Reaping of the late crops continues in parts of thirteen districts, and preparations for next season in parts of fifteen. Cotton-picking is in progress in parts of Gujarat, Kathiawar, and the Karnatak. The fodder-supply is sufficient, except in parts of Shikarpur. Agricultural stock are in good condition. Prices are normal, except in parts of Ahmednagar and Sholapur.

Bengal.—*For week ending 8th April.*—There was rain in the Central and Eastern districts of the Province during the week. Preparation of the land for jute and autumn paddy is in progress, and in several districts sowing itself has commenced, but rain is still required in parts. Early paddy and indigo are doing well. The harvesting of the spring crops is approaching completion, and the general result is satisfactory. The weighment of opium has begun with expectation of a fair outturn. In Gaya the opium is said to be of high consistence. A good crop of *mahua* (*Bassia latifolia*) is expected in Gaya and Chota Nagpur. In Hazaribagh the fodder-supply is still scanty. The price of common rice continues steady and is normal.

North-Western Provinces and Oudh.—*For week ending 10th April.*—Weather clear and seasonable. Showers have fallen in one or two districts. The spring crops are being harvested. The outturn is good, except in Oudh, where the harvest is below normal. Sowing of sugarcane continues. Prospects on the whole are favourable. Markets are well supplied, and fodder is sufficient. Prices are normal with a tendency to fall.

Punjab.—*For week ending 10th April.*—Rain has fallen in all districts, except Hissar, Delhi, and Sialkot. Harvesting of the spring crops has commenced. Extra spring and autumn sowings are in progress. The crops are generally in good condition, and the produce is said to be an average one in some districts. The crops are slightly damaged by hail in parts of Ferozepore and Shahpur. Cattle are generally reported to be in good condition, and fodder is sufficient throughout the Province. Prices are rising in Shahpur, normal in Umballa, but low elsewhere.

Central Provinces.—*For week ending 10th April.*—Weather cloudy in most districts. A thunderstorm occurred in Nagpur on the 6th instant accompanied by hail and 1·20 inches of rain. Winter crops in Chhattisgarh somewhat damaged by cloudy weather and hail. Threshing of winter crops in full swing in the north and east and nearly completed in the south. Prices above normal in Seoni, but falling in Nagpur. Importation into Damoh continues.

Burma.—*For week ending 6th April.*—Light showers of rain have fallen on the Tenasserim Coast and in the northern parts of the Province. There are signs of an early monsoon. In Lower Burma agricultural operations are practically *nil*. In Upper Burma the cultivation of dry-weather paddy and miscellaneous food-crops is nearly completed. Reaping and gathering of the crops has commenced in some parts. Sowing of the early wet-weather paddy has also begun. The standing crops are in good condition, except in the Ava subdivision, where slight damage has been caused to peas. Prospects are generally favourable. The fodder and water-supply are sufficient. The price of paddy has fallen slightly in four districts of Lower Burma and one of Upper Burma; elsewhere the price is stationary. Prices are above normal in most places in Lower Burma and below normal in Upper Burma.

Assam.—*For week ending 9th April.*—Weather seasonable. Sowing of early rice and pressing of sugarcane continue. The condition of cattle is fair. Fodder and water are sufficient.

Mysore and Coorg.—*For week ending 10th April.*—MYSORE: The standing crops are withering in parts of the Tumkur and Kolar districts. Prospects are favourable. Prices have slightly risen in the Hassan district.

COORG: Rainfall moderate. The coffee crop has blossomed in some parts. Fodder and water for cattle are sufficient. Prices of food-grains are normal.

Berar and Hyderabad.—*For week ending 10th April.*—BERAR: Weather warm. Ploughing of fields for the ensuing rain crop is well advanced. Fodder and water are sufficient. Prices have risen in two districts and fallen in one, but are stationary elsewhere.

HYDERABAD: Rainfall moderate during the week. Thunderstorms have occurred during the last few days. The standing crops are in favourable condition. Water in wells and tanks is sufficient for cultivation. Fodder is available for cattle. Prices are normal.

Central India.—*For week ending 10th April.*—No rain during the week. Agricultural operations are nearly completed in Bundelkhand, Baghelkhand, and Bhopawar, and are in progress in other Agencies. The probable outturn will be below average in Bundelkhand, but good in other Agencies. The condition of agricultural stock is indifferent in parts of Gwalior, Bundelkhand, and in parts of Bhopal, but is fairly good elsewhere. Pasturage is good and sufficient in all Agencies, but indifferent in some districts of Gwalior. Prices of food-grains are high in Goona, rising in part of Gwalior, falling in Bundelkhand, and normal elsewhere. The opium crop has been partly damaged by hail in Bhopal and by rain in Goona, but the crop is fairly good in other Agencies.

Rajputana.—*For week ending 10th April.*—Agricultural operations are satisfactory, and reaping continues. The standing crop prospects and agricultural stock are generally good. The crops have been partly damaged by hail in Dholpore. Fodder is sufficient, except in Dholpore. Prices are fluctuating in two States and falling in four, and steady elsewhere.

Kashmir.—*For week ending 9th April.*—KASHMIR VALLEY: Weather fine. The spring crops are in good condition. Prices continue normal.

JAMMU PROVINCE.—*For week ending 10th April.*—No rain. Standing crops in good condition. Fodder is sufficient. Prices are rising.

Nepal.—*For week ending 6th April.*—Rainfall very slight. Weather cloudy and misty. Prospects of the crops are good.

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

SUPPLEMENT TO

The Gazette of India.

No. 16.] CALCUTTA, SATURDAY, APRIL 20, 1895.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

RAILWAY STATISTICS.

RETURNS OF ACCIDENTS ON INDIAN RAILWAYS FOR THE SIX MONTHS ENDING THE 30TH JUNE 1894.

No. 109 R. Stat., dated Simla, the 3rd April 1895.

RESOLUTION.—By the Government of India, Public Works Department.

Read again—

Public Works Department Order No. 12 R. Stat., dated the 21st January 1892.
Public Works Department Order No. 77 R. Stat., dated the 13th March 1893.
Public Works Department Order No. 95 R. Stat., dated the 13th March 1894.

Read also—

The following note by the Director General of Railways, No. 49 Stat., dated the 8th March 1895, with abstract returns of accidents to trains, etc., on the open lines of railway in India for the six months ending the 30th June 1894.

Abstract No. 4, on pages 14 and 15 of the accompanying returns, shows the accidents to trains, rolling stock, permanent-way, etc., reported during the six months ending the 30th June 1894, and distinguishes the different classes of accidents and the number of passengers and others, and of railway servants killed or injured in each class of accident.

2. The total number of accidents and the casualties resulting therefrom, as compared with the average of the three previous corresponding half-years, are

summarized in the following table under the heads "Standard gauge," "Metre gauge" and "Special gauges":

	Number.			Number of passengers and others.		Number of servants.		Total all classes.	
	Accidents reported to Local Governments under section 83 of the Indian Railways Act (IX of 1890).	Other accidents.	Total.	Killed.	Injured.	Killed.	Injured.	Killed.	Injured.
Standard gauge.									
Six months ending the 30th June 1894	40	1,362	1,402	(a) 8	(b) 31	6	15	14	46
Average of the corresponding periods of the three previous years	64	1,293	1,357	4	20	5	19	9	39
Metre gauge.									
Six months ending the 30th June 1894	13	1,121	1,134	...	(c) 25	1	4	1	29
Average of the corresponding periods of the three previous years	21	1,042	1,063	2	14	6	7	8	21
Special gauges.									
Six months ending the 30th June 1894	...	34	34	...	...	...	...	...	...
Average of the corresponding periods of the three previous years	1	29	30	...	...	...	1	...	1
Total all gauges for six months ending the 30th June 1894	53	2,517	2,570	(a) 8	(d) 56	7	19	15	75
Average of the corresponding periods of the three previous years	86	2,364	2,450	6	34	11	27	17	61

3. The following table shows, for each gauge separately, the percentage of increase or decrease in the number of accidents, in the mean mileage worked and in the train-mileage run during the half-year under review, as compared with the average of the three previous corresponding half-years:

INCREASE OR DECREASE AS COMPARED WITH THE AVERAGE OF THE FIRST-HALVES OF 1891, 1892 AND 1893.

	Accidents.		Mean mileage		Train-mileage.	
	No.	per cent.	Miles.	Per cent.	Miles.	Per cent.
Standard	+45	+ 3·32	+ 518	+ 4·82	+ 790,098	+ 3·27
Metre	+71	+ 6·68	+ 536	+ 8·23	+ 800,504	+ 8·72
Special	+4	+ 13·33	(e) −2	−0·82	−13,069	−6·11
Total	+120	+ 4·90	+ 1,052	+ 6·01	+ 1,585,933	+ 4·71

4. The principal variations in the number of accidents as compared with the average of the correspondin periods of the three previous years, reported in connection with the working of the several gauges, are shown in the statement below under the classification adopted in abstract No. 4 of the returns:

Gauge and classification.	Increase or decrease.			Percentage of increase or decrease.
	Serious.	Minor.	Total.	
Standard gauge.				
Collisions between goods trains or parts of goods trains	−6	+21	+15	+38·46
Passenger trains or parts of passenger trains leaving the rails	−8	− 5	−13	−44·83
Goods trains, or parts of goods trains, engines, etc., leaving the rails	−8	− 9	−17	−15·89
Trains running over cattle on the line	...	+88	+88	+10·89
Trains running over obstructions on the line	+6	−17	−11	−20·37
The bursting of tubes, etc., of engines	...	+53	+53	+151·43
The failure of machinery, springs, etc., of engines	+1	+43	+44	+28·39
Fire in trains	−1	−45	−46	−58·97
Fire at stations, or involving injury to bridges or viaducts	−2	− 9	−11	−33·33
Under head "Other accidents"	−5	−14	−19	−18·81
Metre gauge.				
Goods trains, or parts of goods trains, engines, etc., leaving the rails	−1	+11	+10	+16·95
Trains running over cattle on the line	−3	+15	+12	+ 1·95
The bursting of tubes, etc., of engines	...	+18	+18	+42·86
The failure of machinery, springs, etc., of engines	...	+26	+26	+35·14
Special gauges.				
The flooding of portions of permanent-way	...	+10	+10	+1,000·00

(a) Not passengers. (b) Of these, three were not passengers.
(c) Of these, one was not a passenger. (d) Of these, four were not passengers.
(e) Decrease due to the fair weather line on the Jorhat (state) railway having been taken up earlier than usual.

Standard gauge.

5. The increase under "Trains running over cattle on the line" was chiefly due to 34 accidents having been recorded under this head on the East Indian railway and 30 on the East Coast (state) railway.

6. Of the increase of 53 accidents under "The bursting of tubes, etc., of engines," the North Western (state) railway was responsible for 51.

7. Out of a total increase of 44 accidents under "The failure of machinery, springs, etc., of engines," the Great Indian Peninsula railway accounted for an increase of 34.

8. The principal variations under "Fire in trains" were decreases of 22 and 18 on the Madras and the Great Indian Peninsula railways, respectively.

Metre gauge.

9. The increase under "The bursting of tubes, etc., of engines" was almost entirely due to the number of accidents having risen from 17 to 34 on the Southern Mahratta railway.

10. Under "The failure of machinery, springs, etc., of engines," the chief increases took place on the Southern Mahratta and the Burma (state) railways, on which the numbers rose from 21 to 36 and 11 to 23, respectively.

Special gauges.

11. The increase under "The flooding of portions of permanent-way" was entirely due to the number recorded on the Morvi railway having risen from 1 to 11.

---

12. Taking all gauges together, the number of cattle accidents was largest on the Southern Mahratta railway, *viz*, 278; next to that line comes the South Indian railway with 120, then the Rajputana-Malwa railway with 111, the East Indian railway with 110, the Eastern Bengal (state) railway with 100, the North Western (state) railway with 77, the Oudh and Rohilkhand (state) railway with 63, the Madras railway with 56, and the Great Indian Peninsula railway with 54.

In relation to train-mileage run, the number was highest on the Southern Mahratta railway, which gave an average of 1 accident in 6,173 train-miles run; the Bengal Dooars railway coming next with an average of 1 in 7,017; then the East Coast (state), the Nizam's Guaranteed State, the Dibru-Sadiya and the Jodhpore-Bickaneer railways with averages of 1 in 7,454, 1 in 7,811, 1 in 8,726, and 1 in 10,495, respectively.

The lowest number recorded relatively to train-mileage run was on the Great Indian Peninsula railway, *viz*., 1 in 111,310; the Bombay, Baroda and Central India railway coming next with 1 in 102,088; then the North Western (state) railway with 1 in 63,181, the East Indian railway with 1 in 51,022, the Gaekwar's Dabhoi railway with 1 in 47,993, and the Burma (state) railway with 1 in 47,321.

---

13. As compared with the average of the corresponding periods of the three previous years, the casualties to passengers and to servants in the employ of railways or of contractors not coming under the classification adopted in abstract No. 4 of the returns, as also the total casualties from all causes including trespassers, cases of suicide, etc., are shown, separately for each gauge, in the table below. (For details, *vide* abstract No. 2.)

Gauges.	Average of the first-halves of 1891, 1892, and 1893.						First half of 1894.					
	Passengers.		Servants.		Total all causes.		Passengers.		Servants.		Total all causes.	
	Killed.	Injured.	Killed.	Injured.	Killed.	Injured.	Killed.	Injured.	Killed.	Injured.	Killed.	Injured.
Standard	27	73	69	223	227	370	24	60	80	216	259	364
Metre	4	20	18	53	75	111	5	24	19	49	51	126
Special	...	1	...	2	1	4	...	...	1	...	2	...
Total	31	94	87	278	303	485	29	84	100	265	312	490

14. The following table shows, for the several gauges, the number of persons reported to have been killed or injured in yards, workshops, etc., or to have died in carriages or at stations from causes unconnected with the working of trains:—

Gauges.	Killed.	Injured.	Died.
Standard	19	128	372
Metre	1	14	96
Special	...	...	1
Total	20	142	469

15. The statistical results of the half-year under review are summarized in the table below under certain selected heads:

Particulars.	Standard.	Metre.	Special.	Total	
				For six months ending the 30th June 1894.	Average of the corresponding periods of the three previous years.
Mean mileage worked . Miles.	11,259	7,051	242	18,552	17,500
Train-mileage run . . Miles.	24,960,480	10,094,103	209,978	35,264,561	33,678,628
Number of passengers carried . . . No.	45,759,894	23,681,796	448,529	69,890,219	61,450,611
Number of passenger units carried one mile . No.	2,146,037,968	926,446,711	11,593,312	3,084,077,991	2,793,057,573
Number of accidents per 100,000 train-miles run . No.	6	11	16	7	7
Proportion of passengers killed by accidents to trains (*vide* abstract No. 4) to number carried . No.	...	...	...	*Nil.*	1 in 20,483,537
Proportion of passengers injured by accidents to trains (*vide* abstract No. 4) to number carried . . . No.	1 in 1,634,282	1 in 986,741	...	1 in 1,344,043	1 in 2,048,354
Proportion of passengers killed from all causes (*vide* abstract No. 2) to number carried . . No.	1 in 1,906,662	1 in 4,736,359	...	1 in 2,410,008	1 in 1,807,371
Proportion of passengers injured from all causes (*vide* abstract No. 2) to number carried . . No.	1 in 519,999	1 in 493,371	...	1 in 513,899	1 in 495,569
Proportion of passengers killed and injured from all causes (*vide* abstract No. 2) to number carried No.	1 in 408,570	1 in 446,825	...	1 in 423,577	1 in 388,928
Proportion of passengers killed and injured from all causes (*vide* abstract No. 2) to number of passenger units carried one mile . . . No.	1 in 19,161,053	1 in 17,480,127	...	1 in 18,691,382	1 in 17,677,580

16. The accidents *for the second quarter of 1894* are dealt with in the following note:

Note on the accidents for the second quarter of 1894.

The following table gives the number of accidents, as classified in abstract No. 4 of the returns, which resulted in loss of, or injury to, life and limb, and shows the railways on which they occurred:

Casualties resulting from accidents to trains, rolling stock, etc., for the second quarter of 1894.

Railway.	Number of accidents reported during the 2nd quarter of 1894.	Passengers and others.		Servants.		Total.	
		Killed.	Injured.	Killed.	Injured.	Killed.	Injured.

Average of the three corresponding quarters of 1891, 1892 and 1893	...	3	21	5	15	8	36

(2). *East Indian railway.*—On the 4th April 1894, a Permanent-way Inspector's trolly was run over by a down light engine at mile 431 between Dildárnagar and Gahmar. The accident was due to the trolly having been placed on the line without orders and not protected by signals. Two trollymen were killed.

On the 10th April 1894, a down goods train, while being shunted into a siding at Bhadan, ran against the dead-buffer and was derailed. The guard to whose carelessness the accident was due was slightly injured.

On the 30th May 1894, the up chord mail, which entered the Burdwan station at too high a speed, ran past the platform into the siding and collided with a local passenger train which had been stabled there for the night. A second class passenger was slightly injured. The accident was due to the brakesman and driver having failed to keep the train under proper control. The brakesman has been dismissed and the driver fined R100.

(3) *Indian Midland railway.*—On the 13th April 1894, a light trolly was run into by a down goods train at mileage 21—15 between Mid Ghát and Barkhera stations. The accident was due to the trolly not having been protected by signals. The Sub-Inspector who was in charge of the trolly and three trollymen were injured.

(4) *North Western (state) railway.*—On the 26th May 1894, a collision took place between two engines in the Jacobabad locomotive yard through the carelessness of the locomotive staff. A railway servant was slightly injured.

On the 25th June 1894, a bullock cart was run into by a down goods train at a level-crossing near Nundero. The cartman was killed.

(5) *Oudh and Rohilkhand (state) railway.*—On the 19th April 1894, a level-crossing gate was run through by an up goods train. The gateman was injured.

(6) *Eastern Bengal (state) railway.*—On the 12th May 1894, a down mixed train ran into the Canning station at a high speed and came into contact with the dead-buffer at the end of the station line. Nine passengers were slightly injured.

On the 22nd May 1894, owing to a defect in the draw-bar of a wagon, an up mixed train parted on an incline at Chámpaháti, and when the driver shut

off steam and applied the brake, the rear portion of the train collided with the front portion. Seven passengers were slightly injured.

On the 7th June 1894, owing to the driver having run at an excessive speed and in disregard of signals, a down goods train was derailed in the Calcutta goods yard. Four servants were killed, and there was considerable damage to rolling stock.

On the 9th June 1894, a special goods train ran into a hackney carriage at the level-crossing gate at Brace bridge junction. Four of the occupants of the hackney carriage were killed and three injured.

(7) *Bombay, Baroda and Central India railway.*—On the 29th June 1894, the gauge glass of an engine of a down local train accidentally broke at the Colába station. A fireman was injured.

(8) *Burma (state) railway.*—On the 14th May 1894, owing to the points having been wrongly set, a collision took place between an up mixed and a down mixed train which was standing at the Kyaukse platform. Eighteen passengers were slightly injured and there was also damage to rolling stock.

ORDER.—Ordered, that the above note, with the abstract returns, be communicated for information to the Local Governments and Administrations, and to the officers noted in the margin.

The Governments of Madras, Bombay, Bengal, North-Western Provinces and Oudh, and the Punjab.
The Chief Commissioners of the Central Provinces, Burma, Assam, and Coorg.
The Res dent at Hyderabad.
The Resident in Mysore.
The Agents to the Governor General for Rajputana, Central India, and Baluchistan.
The Director General of Railways.
The Consulting Engineers to the Government of India for Railways, Calcutta, Lucknow, and Assam.

Ordered also, that copies be forwarded for the information of Her Majesty's Government.

Ordered further, that this note, with the abstract returns, be published in the Supplement to the *Gazette of India*.

F. B. HEBBERT,
Under Secretary.

Documents accompanying.

Abstract returns of accidents for the six months ending the 30th June 1894.

Enclosure to P. W. D. No. 109 R. Stat., dated the 3rd April 1895.

ABSTRACT No. 1.

GENERAL TOTAL.

NUMBER of PERSONS reported, during the SIX months ending 30th June 1894, as KILLED or INJURED on ALL RAILWAYS open for TRAFFIC in INDIA, distinguishing between PASSENGERS, RAILWAY SERVANTS, and OTHER PERSONS; and distinguishing also, in the case of the two former classes, between ACCIDENTS caused by ACCIDENTS to TRAINS, ROLLING-STOCK, PERMANENT-WAY, etc., and ACCIDENTS happening otherwise.

	Standard gauge lines.		Metre gauge lines.		Special gauge lines.		Total all gauges.	
	Killed.	Injured.	Killed.	Injured.	Killed.	Injured.	Killed.	Injured.
PASSENGERS:—								
From accidents to trains, rolling-stock, permanent-way, etc.	...	28	...	24	...	...	...	52
By accidents from other causes, including accidents from their own want of caution or misconduct	24	60	5	24	...	...	29	84
SERVANTS:—

ABSTRACT

No. 2.

Number of persons reported, during the six months ending 30th June 1894, as killed or injured in India by the travelling of trains or the movement of vehicles used exclusively upon railways, distinguishing between passengers, railway servants, and other persons, and classifying, as far as practicable, the nature and causes of the accidents occasioning the death or injury.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the Week ending at 8 a.m. on Saturday, April 13th, 1895.

During the first four days of the week under review, pressure was exceedingly uniform throughout the greater part of India, and the barometric changes from day to day were in general small. During this period the winds were generally variable in direction, numerous calms were reported, and the force was generally low. There was a good deal of cloud at different times over considerable portions of the country, and the weather on some days was showery. On the 7th the showers were received in the central parts of the Peninsula and in the Central Provinces; on the 8th in the south of the Peninsula, on the Kumaun-Himalayas, and in Central Bengal; on the 9th in the south of the Peninsula, and on the 10th in the south of the Peninsula and in Lower Bengal. On the 11th a considerable change occurred. A deepish well-defined depression appeared over the western desert, the uniform pressures hitherto prevailing wholly disappeared, and the winds increased in force and became more steady. These conditions lasted till the close of the week. Near the centre of the depression in the north-west the barometer read about 0·17 inch below the normal, but notwithstanding this the disturbance exercised but little influence on the weather, which remained fine all over North-Western India, while showers continued to be received over Bengal and the south of the Peninsula. The heaviest rainfall was reported on the 13th, on which day several stations in Bengal registered largish amounts. The wet weather in North-Eastern and Southern India has been accompanied with low temperatures, while in North-Western India, where the weather has been dry, the temperature has been excessive.

Daily Summary.—*Sunday.*—Pressure was low in Lower Burma and the west of the Peninsula, relatively high in the east of the Peninsula, and highest in the Assam valley, but the pressure difference was everywhere small. The winds varied a good deal in direction, but at some stations had been strong. Showers had occurred at several inland stations.

Monday.—Pressure had increased except on the north-western frontier and at some central stations, where it had been steady. The general distribution was the same as on the preceding day, and readings were uniform generally. Variable winds prevailed, and calms were reported from several stations. The weather was cooler than usual, more especially in the North-Western and Central Provinces. Scattered showers were reported from different parts of the country, but more particularly from the south of the Peninsula.

Tuesday.—Very little change had occurred, and the pressure distribution was the same as on the 8th. Pressure was unusually uniform, and was above the normal, except in Lower Burma. Winds were again variable, and numerous calms were reported. Temperature remained low, except in Burma and Bombay. Showers had occurred in the south of the Peninsula.

Wednesday.—Pressure had decreased generally, but the change had been small, except in North-Western India and the Assam valley, where it had been brisk. Pressure remained very uniform generally, but a shallow depression was appearing over the western desert. Winds were southerly in Lower Burma and Madras, but remained variable and generally light elsewhere. Temperature, though rising slowly, was still generally low for the time of year in all provinces, except Burma and Bombay. Showers had occurred in the south of the Peninsula and in Lower Bengal.

Thursday.—Pressure had fallen over Northern India, and been steady or risen elsewhere. The fall over North-Western India has been brisk to rapid, and the depression in that region had undergone considerable development. In consequence the uniform pressures previously prevailing had disappeared and moderate gradients were shown. The winds were irregularly cyclonic over North-Western India, and southerly over the Bay and in Bengal. The force was increasing. Temperature had risen fast in North-Western India. The mean temperature was in excess of the normal in the Punjab, Sind, and Rajputana, normal in Burma, Bombay, Gujarat, and Central India, but still deficient in the North-Western and Central Provinces. Showers were reported from Burma and the south of the Peninsula.

Friday.—Pressure had fallen, except in North-Eastern India. The fall in North-Western and Central India had been brisk to rapid, and a large low pressure area covered the Punjab, Sind, Rajputana, and the west of the North-Western Provinces. Pressure was highest in the extreme east, and moderate gradients prevailed. Winds were generally unchanged in direction, but the force had increased in the north of the Bay and in Sind, Rajputana, and Central India. The mean temperature was excessive in North-Western India, but deficient elsewhere. Rain had fallen in North-Eastern India and the south-west of the Peninsula.

Saturday.—Pressure had risen generally, and the barometric gradients had become slighter, but otherwise the changes had been unimportant. A small local depression had appeared over Lower Bengal. Winds were also little changed. The force had been fresh to strong over the north of the Bay, in Bengal, and in the north of the Bombay Presidency. The mean temperature was excessive in the north-west, normal over the central parts of the country, and in defect elsewhere. Thundershowers have occurred generally over Bengal, and scattered showers over the south of the Peninsula. Showers had also occurred in Baluchistan.

Temperature.—The following table gives the variation of the mean temperature from the normal in the different provinces of India for each day of the week:

Province.	April 1895.							Mean variation of week.
	7th	8th	9th	10th	11th	12th	13th	
	°	°	°	°	°	°	°	°
Burma	+0·8	+1·0	+2·0	+0·8	0	—1·9	—1·2	+0·2
Bengal and Assam	—3·2	—3·8	—2·7	—2·5	—2·0	—2·5	—5·2	—3·1
North-Western Provinces and Oudh	—5·8	—6·0	—6·4	—5·7	—4·6	—1·0	—2·3	—4·5
Punjab	—4·4	—3·6	—2·3	—1·0	+3·3	+2·1	+3·1	—0·4
Bombay	—0·9	—0·8	—0·4	—0·8	+0·1	—1·6	—2·3	—1·0
Central Provinces and Berar	—5·9	—5·5	—5·6	—6·4	—5·0	—2·9	—0·4	—4·5
Central India and Gujarat	—2·0	—4·5	—5·0	—2·7	—0·9	+1·8	+0·8	—1·8
Sind and Rajputana	—3·3	—3·7	—2·4	—1·1	+1·5	+7·1	+4·1	+0·3
Madras	—0·5	—2·1	—1·8	—1·6	—2·0	—1·7	—1·7	—1·6
Mean for whole of India	—2·8	—3·2	—2·7	—2·3	—1·1	—0·1	—0·6	—1·8

In Bengal, Assam, the North-Western Provinces, Bombay, the Central Provinces, and Madras, the mean temperature has been almost continuously below the normal average throughout the week; in Burma it was above for the first four days and subsequently below, and in the Punjab, Sind, Rajputana, Gujarat, and Central India it was below during the first four days and subsequently above the normal. For the whole of India the mean was low from the 7th to the 11th, and normal on the 12th and 13th. In the North-Western and Central Provinces the mean temperature for the week was as much as $4\frac{1}{2}^{\circ}$ below the average. The province of Sind and Rajputana exhibited the largest range of temperature during the week, for while on the 8th the mean was 3·7° below the normal, on the 12th it was 7·1° above.

The highest maxima recorded were—

On the 7th	April	104·3°	at	Ahmedabad.
„ 8th	„	105·3°	„	„
„ 9th	„	105·9°	„	„ and Deesa.
„ 10th	„	108·4°	„	Deesa.
„ 11th	„	109·3°	„	Jacobabad.
„ 12th	„	110·2°	„	Hyderabad (Sind).
„ 13th	„	106·4°	„	Jacobabad.

The above shows that temperature rose steadily between the 7th and the 12th, and then fell somewhat. At first the hottest region within the Indian area was Gujarat, but on the 11th the hottest region was transferred north-westward, and the highest maxima on the last three days of the week were reported from Sind.

Rainfall.—During the past week the rainfall has been actually or practically *nil* over Bihar, the North-Western Provinces, the Punjab, Gujarat, Kathiawar, Sind, Central India, Rajputana, and the northern half of the Peninsula. On the other hand, light general rain had been received in Burma and the Central Provinces, and moderate general rain in Assam, Bengal, and the southern half of the Peninsula. In all parts of the country the rainfall has accompanied and fallen during thunderstorms. The heaviest average actual rainfall reported was 1·89 inches in Coorg, but in East Bengal, Malabar, Madras (South-Central), Mysore and Hyderabad (South) the average rainfall for the week exceeded 1 inch. In Burma, Bengal, and Assam the major part of the rainfall occurred during the latter half of the week, and in the Central Provinces at the commencement of the week, while in the south of the Peninsula the fall was spread over the whole week. The average actual rainfall was in excess of the normal average in Eastern, Deltaic, and Central Bengal, Orissa, Malabar, Madras (South-Central), Coorg, Mysore, the Bombay Deccan, Berar, all the divisions of the Central Provinces, the East Coast (North), Hyderabad (South), Madras (Centre), the East Coast (Centre), and Madras (South). In most divisions the excess was comparatively small, but in Malabar, Coorg, and Mysore the excess exceeded 1 inch. In all the remaining divisions the rainfall was less than the normal. In Assam the deficiency was large, the Surma valley having received only 0·67 inch instead of the normal 4 inches, and the Brahmaputra valley only 0·35 inch instead of 1·38 inches.

The three concluding columns of the table show the state of the seasonal rainfall (from the 3rd of March to the 13th of April). In the north-west and west of the Punjab, in Malabar, in Coorg, in Mysore, in Berar, in the Central Provinces, in Sind, in Central India, in Rajputana, in Hyderabad (South), and in Madras (Centre) the fall for the above period has been in excess of the average. It will be seen, on comparing this list with that given last week, that a considerable improvement has occurred during the week under review. This is more particularly the case with regard to the Peninsula, Malabar, Coorg, Mysore, and parts of Hyderabad and of Madras having now received a good supply of rain.

The returns of heavy falls of rain during the week, April 7th to 13th, show that considerable amounts were received over Southern and over North-Eastern India. Manickgunj (Dacca) received 3·19 inches; Kandi (Moorshedabad) 3·04 inches; Ponani (Calicut) 7·78 inches; Trivandrum 3·43 inches; Yercand (Salem) 3·06 inches; Bhawani (Coimbatore) 3·35 inches; Kodaund (Nilgiris) 3·79 inches; Devantully (Bangalore) 3·05 inches; Tiptur (Tumkur) 7·20 inches; and Anantapur 3·02 inches.

W. L. DALLAS,

Asst. Meteorological Reporter to the Government of India.

SIMLA, *18th April 1895.*

DENZIL IBBETSON,

Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 13th April.*—Rainfall good in Bellary, Anantapur, Coimbatore, Nilgiris, and on the West Coast; fair in Ganjam, Vizagapatam, in parts of Salem, Madura, and Tinnevelly; scattered showers in Kurnool, Cuddapah, North Arcot, Trichinopoly, and Tanjore; no rain elsewhere. Cultivation has commenced on the West Coast and to a slight extent in other places under the recent rains. The standing crops chiefly under wells, and irrigation works are suffering in parts of the Carnatic and Southern districts. Some harvest is still going on with moderate yield. Fodder is generally sufficient, and cattle are in good condition. Prices of staple grains are slightly dearer in parts of the Southern districts; elsewhere prices are easier or stationary.

Bombay.—*For week ending 17th April.*—Slight rain in parts of the Upper Sind Frontier, the Karnatak, and Deccan. The standing crops are in good condition, except in Hyderabad where they are damaged by worms. Reaping of the late crops continues in parts of eleven districts, and preparations for the next season in parts of sixteen. Cotton-picking is in progress in parts of Gujarat and Dharwar. The fodder-supply is sufficient, except in one taluka of Shikarpur. Agricultural stock is in good condition. Prices are normal, except in parts of Sholapur and Ahmednagar.

Bengal.—*For week ending 15th April.*—Rain accompanied with thunderstorms fell generally over Bengal Proper, and has done good. It was heavy in the Western districts, where it was especially wanted. In Bihar there was no rain, and very little in Orissa and Chota Nagpur. The preparation of the land and the sowing of jute and of the autumn crops is going on, but more rain is required in parts. Spring rice and indigo are doing well. In Orissa the spring rice is being harvested. The harvesting of the spring crops is practically over, and the general result is good. The weighment of opium continues. The mango crop in Bihar promises well. The fodder-supply in Hazaribagh is still scanty. The price of common rice is generally steady with a slight tendency to fall.

North-Western Provinces and Oudh.—*For week ending 17th April.*—Weather clear. Slight showers in a few places. Harvesting of the spring crops is approaching completion. Threshing and winnowing are in progress. Irrigation of sugarcane continues, and sowing of indigo has commenced. Supplies and fodder are sufficient. Prices are normal, except in a few districts, where they have risen slightly. On the whole the crops in the Meerut division are excellent, in Agra and Rohilkhand they are good, in Benares and Allahabad fair, in Oudh below average.

Punjab.—*For week ending 17th April.*—Rain has fallen in Lahore tahsil only. Reaping and gathering of the spring crops are in progress. Sowings of

extra spring crops are going on, and that of the autumn crops has commenced. The condition and prospects of the crops are said to be good. Cattle are generally in good condition, and fodder is sufficient throughout the Province. Prices are below normal in Sialkot and Shahpur, normal in Umballa, and low elsewhere.

Central Provinces.—*For week ending 17th April.*—Weather somewhat cloudy with general light showers and thunderstorms in places. Hail in Seoni and Nagpur. Ploughing has commenced in some districts. Threshing of winter crops continues. Prices are above normal in Seoni and are rising slightly in Damoh. The price of wheat is falling in Saugor. Importation into Damoh continues.

Burma.—*For week ending 13th April.*—Light showers of rain have fallen in three divisions of Lower Burma and in two divisions of Upper Burma. In Upper Burma transplanting of the dry-weather crops is nearly completed, and reaping and gathering are in progress in places. Ploughing and sowing of the early wet-weather crops are commencing in the irrigated tracts. The standing crops are in good condition, except in parts of the Sagaing and Minbu districts. The fodder and water-supply are sufficient. Prices are normal and steady.

Assam.—*For week ending 16th April.*—Weather dry. Sowing of the early rice and pressing of sugarcane are progressing. Condition of cattle is fair. Fodder and water are sufficient.

Mysore and Coorg.—*For week ending 17th April.*—MYSORE: Rain has fallen in all districts. The standing crops are in good condition. Prices have fallen in Hassan and risen in Kolar.

COORG: Rainfall moderate. Fodder and water for cattle are sufficient. Prices of food-grains are normal.

Berar and Hyderabad.—*For week ending 17th April.*—BERAR: Weather warm and cloudy. Preparation of land for the ensuing crop continues. Fodder and water-supply are ample. Prices are almost steady.

HYDERABAD:—Rainfall moderate during the week. Storms with hail in some districts. The hot-weather crops are in good condition. The spring crops are being threshed. Grass is scarce in Aurungabad. Water in tanks and wells is sufficient for cultivation. Prices continue normal.

Central India.—*For week ending 17th April.*—Some rain fell in the Baghelkhand district during the week, and heavy rain at Indore. Agricultural operations have been completed in Bundelkhand, but are in progress in other Agencies. The probable outturn will be good. The condition of agricultural stock is fairly good in all Agencies, except in parts of Goona and Bhopal. Pasturage is good and sufficient in all Agencies. Prices of food-grains are high in Bhopal and Goona, falling in Bundelkhand, normal elsewhere. The condition of opium is bad in part of Gwalior, and the crop has been partly damaged by rain in Goona, but is fair elsewhere.

Rajputana.—*For week ending 17th April.*—Rainfall slight in Abu, Kotah, Ajmere, and Bikanir. Agricultural operations are satisfactory. Reaping continues. The standing crops, prospects, and agricultural stock are generally good. The crops have been damaged partly by hail in Dholpore. Fodder is sufficient, except in Dholpore. Prices are fluctuating in three States, rising in one, falling in two, and steady elsewhere.

Kashmir.—*For week ending 16th April.*—KASHMIR VALLEY: Rain has fallen twice during the week. The spring crops are reported to be in good condition. Prices continue normal.

JAMMU PROVINCE.—*For week ending 15th April.*—Rainfall slight. The spring crops are in good condition. Cattle are healthy. Prices are stationary.

Nepal.—*For week ending 13th April.*—Weather cloudy and cold. The prospects of the wheat crop are good. Sowing of maize has been delayed for want of rain.

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

(*l*) Includes the Mysore-Nanjangúd and the Yesvantpur-Mysore frontier sections.
(*m*) Total earnings from 15th September 1893 to 31st March 1894.
(*n*) Total earnings from 12th April 1893 to 31st March 1894.

F. B. HEBBERT,
Under Secretary.

SIMLA, *the 18th April 1895.*

Printed and published for the GOVERNMENT OF INDIA *at the* GOVERNMENT CENTRAL PRINTING OFFICE, *Simla.*

SUPPLEMENT TO

The Gazette of India.

No. 17.} CALCUTTA, SATURDAY, APRIL 27, 1895.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the Week ending at 8 a.m. on Saturday, April 20th, 1895.

General Summary.—During the week under review, pressure has been more or less above the normal average throughout the whole of India. This excess has been considerable to very large in the north, while it has been but slight in the south, and over the western desert. The result has been an irregular and abnormal distribution of pressure. Over the Peninsula readings have been very uniform; over the western desert there has been a stationary shallow depression, while over the Gangetic plain and North-Eastern India, moderate gradients for easterly and south-easterly winds have prevailed. The winds have been very unsteady and light over the Peninsula and the central parts of the country, while moderate southerly and south-easterly winds have blown in Bengal, and south-easterly and easterly winds up the Gangetic plain. Thundershowers have occurred in most parts of the country during the week. On most days they have been scattered and more or less local, but on the 16th there was a very general fall of rain over North-Western India, and on the 14th over Bengal. As a result of these showers, and in Northern India of the prevalence of easterly instead of the normal north-westerly winds, the weather has been most unusually cool, and the temperature more particularly during the day has been largely below the normal average.

Daily Summary.—*Sunday.*—Pressure had increased very generally. Readings were highest over Assam, and lowest over the western desert. Moderate gradients existed over Northern India, but over the Peninsula pressure was uniform. The winds were easterly up the Gangetic plain and very variable elsewhere. Over the north of the Bay the force was fresh. Rain had fallen generally in Bengal, and fairly generally over the Peninsula. In two or three instances the amount received exceeded one inch.

Monday.—Pressure had increased briskly over the central parts of the country, fallen or been steady elsewhere. The general distribution was unaltered, but gradients were slighter over Northern India. The winds had fallen lighter, and the easterly current up the Gangetic plain was feebler. Rain had ceased in Bengal, but a few scattered showers were reported from the north-west, centre, and south of India.

Tuesday.—Pressure had changed by considerable amounts. It had risen in the north-west and fallen elsewhere. A large shallow depression overlay Sind, Southern Rajputana, and Central India, while pressure was highest in the north of the Punjab. Over the Peninsula readings were exceedingly uniform. The winds varied considerably. A general burst of rain had occurred in the north-west, while in the centre and south showers were fairly general.

Wednesday.—The changes of the barometer and the general distribution of pressure were irregular. North-westerly winds prevailed over Sind, Gujarat, and Bombay, but elsewhere variable winds continued. Showers of rain, in several instances heavy, were received over a large part of the country.

Thursday.—Pressure had been steady over North-Eastern India and had fallen elsewhere. Readings were in nearly all places very uniform, and the winds remained light and variable. Showers had been received in north and west Bengal and in the south of the Peninsula.

Friday.—Pressure had fallen briskly in North-Western India, and been steady or risen slightly elsewhere. A depression had been developed over the western desert, while pressure was highest in Assam; hence the general distribution which

prevailed at the commencement of the week had been re-established. Winds were becoming easterly again up the Gangetic plain. Thundershowers had been received over the North-West Himalayas, the Gangetic plain, north and east Bengal, Upper Burma, and the south of the Peninsula.

Saturday.—Pressure had fallen briskly in Sind, but had been steady elsewhere. The distribution was unaltered. Southerly and south-easterly winds prevailed at the head of the Bay, easterly winds in the Gangetic plain, and variable winds elsewhere. Showers had been received in north Bengal, Chota Nagpur, the Kumaun-Himalayas, and parts of the Peninsula.

Temperature.—The following table gives the variation of the mean temperature from the normal in the different Provinces of India for each day of the week:

Province.	April 1895.							Mean variation of week.
	14th	15th	16th	17th	18th	19th	20th	
	°	°	°	°	°	°	°	°
Burma	—1·2	—0·5	+0·6	+0·3	+0·8	+1·3	+1·1	+0·3
Bengal and Assam	—7·0	—5·4	—3·0	—2·0	—2·3	—3·1	—3·6	—3·9
North-Western Provinces and Oudh	—1·9	—0·8	—1·1	—6·5	—7·7	—5·3	—7·0	—4·0
Punjab	+2·7	+5·3	—3·3	—7·0	—4·1	—1·9	—0·4	—1·3
Bombay	—1·4	—1·0	—1·6	—1·6	—0·8	+0·4	+0·3	—0·8
Central Provinces and Berar	+0·1	—2·6	—4·6	—5·6	—6·0	—3·4	—4·4	—3·8
Central India and Gujarat	+1·3	+0·3	—0·2	—0·6	—1·2	+0·4	—1·3	—0·2
Sind and Rajputana	+1·5	+2·3	+2·3	—5·2	—0·9	+1·5	+1·3	+0·4
Madras	—2·6	—3·3	—3·2	—3·4	—3·8	—3·1	—3·7	—3·3
Mean for whole of India	—0·9	—0·6	—1·6	—3·6	—2·9	—1·5	—2·0	—1·9

The mean temperature of the whole country was about normal on the 14th and 15th, but fell below on the 16th, and so remained until the close of the week; the coolest day being the 17th, when the mean temperature of the whole country was 3½° below the average. The provincial variations show that the coolest regions, relatively to the normal, were the North-Western Provinces, where there was a deficiency of 4°, Bengal with a mean deficiency of 3·9°, the Central Provinces with a mean deficiency of 3·8°, and Madras with a mean deficiency of 3·3°. The warmest region was Sind and Rajputana, where on the mean of the week there was an excess of 0·4°.

The highest maxima reported on each day were—

On the 14th April 105·3° at Ahmedabad.
„ 15th „ 107·7° „ Hyderabad (Sind).
„ 16th „ 108·9° „ Jacobabad.
„ 17th „ 106·9° „ Deesa.
„ 18th „ 107·4° „ „
„ 19th „ 109·4° „ „
„ 20th „ 112·2° „ Jacobabad.

The warmest region was thus Sind and Gujarat throughout the week, and the maxima increased 7° during the week.

Rainfall.—The past week was one of unusual rainfall over the Indian area. Only three districts—*viz.*, Arakan, Kathiawar, and Rajputana (West)—had absolutely no rain during the week, though nine more—*viz.*, Upper Burma, North Bihar, the North-Western Provinces (East and Submontane), Khandesh, Gujarat, Sind, and Rajputana (East)—had an average actual fall of less than 0·10″, which for

practical purposes was unimportant. In all the remaining districts effective rainfall was received. The heaviest average fall was 2·01 inches in Madras (South), while Central Bengal, Orissa, Chota Nagpur, Madras (South-Central), and Coorg had average falls of one inch or over. Nearly the whole of this rainfall occurred during thunderstorms, which storms were most severe in the south of the Peninsula. The third column of the table shows that the week's rainfall was in defect of the normal in Burma, Assam, Lower Bengal, and part of the western desert, but was in excess elsewhere. The deficiency was large in Assam, but was unimportant elsewhere. The excess was greatest—exceeding one inch—in Orissa, Chota Nagpur, Madras (South-Central) and Madras (South).

In North-East India the principal part of the rain fell on the 14th, 17th, and 20th; in the North-Western Provinces on the 15th, 16th, and 17th; in the Punjab, on the 15th and 16th; in the south of the Peninsula, on the 19th and 20th; and over the head of the Peninsula and the central parts of India on the 15th, 16th, and 17th.

The columns showing the total actual and normal rainfall for the period March 3rd to April 20th exhibit a deficient rainfall in Burma, Assam, Bengal (except Central Bengal, Orissa and Chota Nagpur), the North-Western Provinces (except Oudh [South] and the Central and West divisions), the Punjab (except the North-West and West divisions), Kathiawar, and the East Coast (North (*a*) and South). In the remaining parts of India the rainfall for the period quoted above has been excessive. Heavy local falls of rain have occurred during the week April 14th to 20th in many parts of the country. Thus Jamalpur (Mymensingh) has received 3·13 inches; Cherrapunji 3·47 inches; Jalpaiguri 2·38 inches; Kurseong (Darjeeling) 2·26 inches; Kendrapara (Cuttack) 5·12 inches; Bhodrak (Balasore) 3·14 inches; Chaibassa 2·32 inches; Jansath (Muzaffarnagar) 2·02 inches; Pithoragarh 3·11 inches; Raya (Amritsar) 2·85 inches; Abbottabad 2·02 inches; Palghat (Calicut) 3·00 inches; Karkal (Mangalore) 3·03 inches; Bhawani (Coimbatore) 3·35 inches; Coonoor 5·20 inches; Sorab (Mysore) 3·76 inches; Bhatkal (Karwar) 2·68 inches; Sindgi (Bijapur) 2·58 inches; Umrer (Nagpur) 3·84 inches; Udayagiri (Ganjam) 3·45 inches; Tallapudy (Godavery) 6·02 inches; Perambular (Trichinopoly) 3·18 inches; Dindigul 4·28 inches; Arasadi (Tinnevelly) 5·26 inches.

W. L. DALLAS,
Asst. Meteorological Reporter to the Government of India.

Simla, *25th April 1895.*

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 20th April.*—Showers have fallen throughout the greater part of the Presidency; they were especially good in the Circars, Central, and Southern districts. Sowing has commenced on the West Coast. Such standing crop as there is has been much benefited in the southern half of the Presidency by the recent showers, and the crop generally is in good condition, except cotton in the Deccan districts. Some harvest is still going on with moderate yield. Pasture is improving in places and fodder is generally sufficient. Cattle are in good condition. Prices of staple grains are slightly cheaper in the Deccan and Southern districts; elsewhere prices are practically stationary.

Bombay.—*For week ending 24th April.*—Slight rain in parts of eleven districts. The standing crops are in good condition. Reaping of the late crops continues in parts of nine districts, and preparations for next season in parts of sixteen. Sowing is progressing in parts of Sholapur. Cotton-picking is in progress in parts of Gujarat and Dharwar. The fodder-supply is sufficient. Agricultural stock are in good condition. Prices are normal, except in parts of Ahmednagar and Sholapur.

Bengal.—*For week ending 22nd April.*—There was rain in Orissa and Chota Nagpur and over the greater part of Bengal Proper. In Bihar and in Eastern Bengal little or no rain was reported during the week. The lands are being ploughed and the sowing of the autumn rice and jute is going on. More rain is required in parts of Northern and Eastern Bengal and in Darbhanga and Purneah. Spring rice and indigo are doing well. In some districts the harvesting of the spring rice has begun. The spring harvest is over and the mean outturn for the Province is estimated between thirteen and fourteen annas. The price of common rice is steady.

North-Western Provinces and Oudh.—*For week ending 24th April.*—Showers have fallen in most districts. Grain on the threshing floors has been somewhat damaged by rain in Bareilly. Threshing and winnowing of spring crops and irrigation of sugarcane and extra crops are going on. Markets are well supplied and fodder is sufficient. Prices are generally easy; but slightly above normal in two districts. Prospects are favourable, except in Oudh.

Punjab.—*For week ending 24th April.*—Rain has fallen in all but three districts. Harvesting of the spring crops is in progress. Cotton and sugarcane are being sown. Prospects of the standing crops are favourable; the outturn of barley and other crops in Dera Ismail Khan is reported below average owing

to high winds. Cattle are generally in good condition. Fodder is sufficient throughout the Province. Prices are below normal in Sialkot and Shahpur and continue low elsewhere.

Central Provinces.—*For week ending 24th April.*—Weather generally cloudy and warm with occasional storms and light rain. Ploughing of land is in progress. Prices are above normal in Saugor, Damoh, and Seoni. Importation of grain into Damoh continues.

Burma.—*For week ending 20th April.*—Showers of rain fell in several districts, but were not general. In Upper Burma transplanting of the dry-weather crops is approaching completion, and reaping is well in hand. Sowing of early wet-weather paddy is progressing in Mandalay, Kyaukse, and the Southern Shan States. Prospects of the standing crops are good. Prices are normal and steady. The fodder and water-supply are sufficient.

Assam.—*For week ending 23rd April.*—Weather dry. Sowing of early rice and pressing of sugarcane continue. The condition of cattle is fair. Fodder and water are sufficient.

Mysore and Coorg.—*For week ending 24th April.*—MYSORE: Rain has fallen in all districts. The standing crops are in good condition. Prospects are good. Prices have slightly risen in Mysore and fallen in Kadar.

COORG: Rainfall good. Coffee has blossomed. No standing crops. Fodder and water for cattle are sufficient. Prices of food-grains are normal.

Berar and Hyderabad.—*For week ending 24th April.*—BERAR: Weather warm and clear. Threshing of wheat, gram, and linseed continues. In the Ellichpur and Melghat talukas land is being prepared for the ensuing rain crop. Fodder and water are sufficient. Prices are fluctuating in two districts and are stationary elsewhere.

HYDERABAD: Rainfall moderate. Weather unusual for this season of year: the temperature is comparatively low and storms are frequent. The standing crops have been damaged to some extent. The spring crops are being harvested in Aurangabad. Water in tanks is sufficient for cultivation. Fodder is scarce, but sufficient for agricultural cattle. Prices are normal.

Central India.—*For week ending 24th April.*—Moderate rain in five Agencies. The crops have been harvested in four Agencies and the probable outturn will be fair, except in one Agency. Cattle are in good condition, except in some parts of the Bhopal Agency. Pasturage is good and sufficient in all Agencies. Prices of food-grains are high in Bhopal and Goona, falling in Bundelkhand, below normal in part of Gwalior, and normal elsewhere. The opium crop is in good condition, except in Goona.

Rajputana.—*For week ending 24th April.*—Rainfall good in Meywar, slight in Kherwara, Ajmere, Dholepore, Bhurtpore and Bickanir. Agricultural

operations are satisfactory. Reaping continues. The standing crops, prospects, and agricultural stock are generally good. The crops have been damaged partly by hail in Dholepore. Fodder is sufficient, except in Dholepore. Prices are fluctuating in one State, falling in one, rising in one, and steady elsewhere.

Kashmir.—*For week ending 23rd April.*—KASHMIR VALLEY: Rainfall slight. Oil-seeds and other standing spring crops are generally in good condition. Land is being prepared for the autumn crops. Prices continue normal.

JAMMU PROVINCE: *For week ending 21st April.*—Rainfall slight. The spring crops are ripe. Reaping has commenced. Prices are normal.

Nepal.—*For week ending 20th April.*—Rainfall slight. Weather cloudy and cool. Sowing of Indian-corn has begun.

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the Week ending at 8 a.m. on Saturday, April 27th, 1895.

During the present week two important points call for notice. The first is the large general change which has occurred during the week from the relatively uniform pressures, light winds and cloudy, cool and showery weather which prevailed at the commencement of the week to the large pressure differences, the strong winds and the dry hot weather which prevailed at the close of the week. Superimposed on this general large change was an important local irregularity in the shape of a cyclonic storm which appeared over the centre of the Bay on the 24th, advanced quickly on a curved course, first to north and then to north-east during the 25th, and struck the Arakan Coast on the morning of the 26th. This storm probably occasioned rough unsettled weather over the Bay, and has given very heavy rain to Assam and probably Upper Burma. During the first few days of the week the weather was cloudy and showery, but as soon as the isobars began to close up and the wind to rise, the thunderstorms, on which the rainfall had depended, ceased, and, except for the local rainfall due to the cyclone, the weather became more settled. Temperature during the week exhibited a general tendency to increase.

Daily Summary.—*Sunday.*—Pressure was falling slightly over the North-Western and Central Provinces, the east of the Peninsula, and Bengal, and was steady elsewhere. A slight depression was shown over the Indus Valley and

another over Burma, while readings were highest in Assam and North Bengal. Pressure was uniform, and the winds were light and unsteady. Showers had occurred in several parts of the country, and the mean temperature was low, except in Burma, Sind, and Rajputana, where there was an excess of $2\frac{1}{2}^{\circ}$, and in the Punjab, where there was an excess of $\frac{1}{2}^{\circ}$.

Monday.—The pressure differences remained very small, but the distribution was irregular. One shallow depression was shown over the western desert, a second over the central parts of the country, and a third over Burma. Readings remained highest over North Bengal and Assam. The wind directions were again very variable, and scattered showers, accompanying dust and thunderstorms, had occurred over a considerable part of the country. The mean temperature was excessive over North-Western and part of Central India, but was still in defect elsewhere.

Tuesday.—Pressure had generally changed only by small amounts, and the relative distribution had undergone very little alteration. Readings remained highest in Assam and North Bengal, and lowest over the western desert, and the pressure difference remained small. The winds were variable, and the mean temperature was low for the time of year in Bengal, the North-Western Provinces, the Central Provinces, and Madras. Elsewhere the heat was more or less excessive. Scattered thundershowers were reported.

Wednesday.—The barometric changes and the distribution were both irregular. Pressure was highest over Burma, and low over the western desert and the east of the Punjab and over the central parts of the country. The winds were light and variable generally, but at Diamond Island a strongish east-north-easterly wind was blowing with a rough sea and rain. Temperature was inclined to rise very generally, and scattered thundershowers were reported from several parts of the country.

Thursday.—Pressure had decreased everywhere, and a depression had formed over the centre of the Bay. Pressure was below the normal average almost everywhere—most so in the south of the Bay. Around the Bay the winds were cyclonic, but, except at Diamond Island, they had little force. The directions elsewhere were variable. The mean temperature was low over Burma and the North-Western Provinces, high over Sind, Rajputana, Gujarat, and Central India, and about normal in other provinces. Heavy rain had fallen at Diamond Island, and scattered showers over a large part of the country.

Friday.—The depression which was developing over the centre of the Bay on the 25th had intensified considerably, travelled quickly along a curved path, and had struck the Arakan Coast between Chittagong and Akyab. Pressure had increased over a large part of the Peninsula, and decreased elsewhere—most so in North-Eastern India. The winds were probably strong within the storm area, but were moderate in other regions. The mean temperature had been low in North-Eastern India and in Madras, and about normal elsewhere.

Saturday.—The principal change was the brisk to very rapid rise of pressure over North-Eastern India, due to the filling up of the storm. In other parts of the country the changes were slight. A very important general alteration had, however, occurred; the uniform pressures of the early part of the week having disappeared, and been succeeded by large pressure differences. Fresh to strong winds prevailed throughout the country. Rain had fallen at a few places in North-Western and North-Eastern India and in the Peninsula. The heat was in excess over North-Western India.

Temperature.—The following table gives the variation of the mean temperature from the normal in the different provinces of India for each day of the week:

Province.	April 1895.							Mean variation of week.

Mean for whole of India	—1·4	—1·1	—0·1	+0·1	—0·3	—0·8	—0·5	—0·6

The means for the whole of India for the week show apparently that there was a general tendency for temperature to recover from the depression which had prevailed during the previous week. This tendency was counteracted by the accident of the cyclone on the 25th and 26th, but as this disturbance was disappearing on the 27th, the recovery of temperature began to reassert itself. The coolest day, relatively to the average for the whole of India, was the 21st, when the general temperature was 1·4° below the normal, and the warmest day the 24th, when the general temperature was 0·1° above. The provincial variations show that, compared with the average, the hottest region was Sind and Rajputana with an abnormal excess of 2·5°, and the coolest place, the North-Western Provinces, with an abnormal deficiency of 3·0°.

The highest maxima reported on each day were—

On the	21st	April	112·3°	at Jacobabad.
„	22nd	„	112·2°	„ „
„	23rd	„	108·9°	„ Mooltan.
„	24th	„	111·3°	„ Jacobabad.
„	25th	„	111·0°	„ Deesa.
„	26th	„	112·2°	„ Jacobabad.
„	27th	„	115·1°	„ „

The above shows that the warmest region throughout the week was Sind and Gujarat, and that, as indicated by the general table given above, there was comparatively little increase of heat as the week progressed.

Rain.—The past week, like its predecessor, has been one of very general rainfall throughout India. Only seven of the rainfall divisions report absolutely no rain. These divisions are the North-Western Provinces (Central and West), Khandesh, Gujarat, Kathiawar, Sind, and Rajputana (West). In addition to these divisions the following had an average actual fall for the week of less than one-tenth of an inch, *viz.*, the Punjab (South and West), Berar, the Central Provinces (West and East), Central India (East), and Rajputana (East). In these fourteen divisions then there was absolutely or practically no rain, but in all the other divisions effective rainfall was received. The heaviest average actual fall was 4·00 inches in Arakan, followed by 3·14 inches in Assam (Surma), by 2·07 inches in Coorg, and by averages of over 1 inch in North Bengal, Chota Nagpur, Malabar, and Madras (South). The above consideration of the disposition of the divisions having heavy and light rainfall shows that during the week rain was heaviest in North-Eastern India, relatively heavy in the south of the Peninsula, and lightest over parts of North-Western India. From Burma the only return received is from the Arakan division, but it is probable that rain fell throughout the whole of Burma.

The third column of the table shows that the rainfall of the week was in excess of the normal over the greater part of the country. The only divisions which reported a deficiency were—East Bengal, the Assam divisions, Deltaic Bengal, North Bihar, the North-Western Provinces (Central and West), the Punjab (South and West), Khandesh, Berar, the Central Provinces (East), Sind, Rajputana (West), and Hyderabad (South). In nearly all cases the deficiency was small and unimportant, but in Assam (Brahmaputra) it was as much as 1·41 inches. In all the divisions of India, except those mentioned above, the week's rainfall was excessive, the excess being as much as 3·48 inches in Arakan, and 1 inch or above in Chota Nagpur and Coorg. Most of this rainfall occurred during thunder and duststorms, but in Arakan and Cachar the principal part of the rainfall occurred during the cyclone which crossed from the Bay into Burma. The rainfall was scattered through the week in most parts of the country, but in North-Eastern India the heaviest rainfall occurred during the progress of the cyclone noticed above.

The columns giving the total actual and normal rainfall for the period, March 3rd to April 27th, exhibit a deficiency of rain in East, Deltaic and North Bengal, in Assam, in Bihar, in the North-Western Provinces (Submontane), in the Punjab (South, Central, Submontane, and Hill districts), in Khandesh, in Kathiawar, and in the East Coast (North), and an excess elsewhere. The greatest excess is over the Peninsula and the more central parts of the country.

The following heavy local falls during the week are reported: Akyab 4·71 inches, Barisal 3·32 inches, Cherrapunji 8·79 inches, Churamn (Dinajpur) 4·62 inches, Kurseong 4·43 inches, Perintalward (Calicut) 7·10 inches, Raspar (Salem) 4·35 inches, Mettupalayam (Coimbatore) 5·24 inches, Virajpet (Coorg) 3·69 inches, Honnavalli (Tumkur) 4·49 inches, Thirthahalli 4·12 inches, Chandgad (Belgaum) 3·70 inches, Yellavaram (Godavery) 3·90 inches, Wandewash (North Arcot) 4·20 inches, Illuppur (Trichinopoly) 5·07 inches.

SIMLA, *2nd May 1895.*

W. L. DALLAS,
Asst. Meteorological Reporter to the Government of India.

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 27th April.*—Showers have fallen throughout the Province, and the rainfall has been especially good in parts of the Central, Southern, and West Coast districts. Ploughing and sowing are in progress in parts. The standing crops only occupy small areas, and are generally fair, and have been improved by the recent rain in all the Southern districts. Some harvest is still going on, generally with fair outturn. Pasture continues scarce, but is improving in places, and fodder is generally sufficient. Cattle are generally in good condition. Prices are slightly easier in the Central and Southern districts; elsewhere prices are practically stationary.

Bombay.—*For week ending 1st May.*—Slight rain in parts of the Konkan, Deccan, and Karnatak. The standing crops are good, except in one taluka of Karachi, where they are injured by blight. Reaping of all crops continues in parts of eight districts. Preparations for next season are in progress in parts of seventeen districts. Sowing is progressing in one taluka of Sholapur. Cotton-picking continues in parts of Gujarat and Dharwar. The fodder-supply is sufficient. Agricultural stock in good condition. Prices are normal, except in parts of Ahmednagar.

Bengal.—*For week ending 29th April.*—There was rain in all the reporting districts, except Dacca, accompanied by hail in parts of Khulna and Patna. It has done much good to the standing crops, and has facilitated ploughing and early sowings. More rain is required in some few districts. Indigo and young sugarcane are doing well. The harvesting of the spring rice in Orissa is nearly over. The *mahua* (*Bassia latifolia*) harvest in Chota-Nagpur has yielded a good outturn. The mango crop in Bihar is reported good, but in Patna it has been somewhat damaged by rain and hail. The fodder-supply in Hazaribagh has improved by the late rain. The price of common rice continues generally stationary.

North-Western Provinces and Oudh.—*For week ending 1st May.*—Weather seasonable with increasing heat. Slight rain has fallen in some of the Eastern and Submontane districts and in Agra. Damage by hail is reported in one parganah of Almora. Threshing and winnowing of the spring crops are approaching completion. Irrigation of the summer crops continues. Markets are well supplied. Fodder is reported to be insufficient in Fyzabad; elsewhere it is sufficient. Prices are fairly steady, but rising in a few districts.

Punjab.—*For week ending 1st May.*—Rain has fallen in all districts, except Hissar, Delhi, Umballa, Sialkot, and Dera Ismail Khan. Reaping of the spring crops is nearly over; threshing has commenced. Sowing of the extra spring crops is still going on in Dera Ismail Khan. Land is being prepared for the autumn crops, the sowing of which will begin shortly. The standing crops are in good condition. The outturn is said to be an average one in Delhi. The spring crops are reported to have been damaged to some extent by hail in parts of Lahore. Agricultural stock and cattle are generally in good condition, and pasturage and fodder are sufficient throughout the Province. Prices are normal in Umballa, below normal in Sialkot and Shahpur, and continue low elsewhere.

Central Provinces.—*For week ending 1st May.*—Weather generally clear and warm with light showers in Nagpur. Land is being prepared for the autumn sowings in Nimar, Nagpur, and Chanda. Threshing of the winter crops is progressing. Prices are above normal in Seoni and are stationary in Damoh, where imports are increasing.

Burma.—*For week ending 27th April.*—Report not received.

Assam.—*For week ending 30th April.*—Weather seasonable. Sowing of the early rice continues. Pressing of sugarcane is finished. The condition of cattle is fair. Fodder and water are sufficient.

Mysore and Coorg.—*For week ending 1st May.*—MYSORE: Rain has fallen in all districts. The standing crops are in good condition. Prospects are good. Ploughing operations have commenced in the Shimoga district. Prices have slightly risen in the Mysore and Shimoga districts.

COORG: Rainfall moderate. Prospects of coffee and cardamom are fair. Ploughing for rice and *ragi* (*Eleusine coracana*) has commenced. Fodder and water for cattle are sufficient. Prices of food-grains are normal.

Berar and Hyderabad.—*For week ending 1st May.*—BERAR: Weather hot. Threshing of wheat, gram, and linseed has been completed in Ellichpur. Breaking up of the land for the next rain crop is in progress. The fodder and water-supply are ample. Prices have fallen in two districts, but are steady elsewhere.

HYDERABAD: Rainfall moderate. Thunderstorms and slight rain in the Eastern and Southern divisions. The standing crops have been somewhat damaged by hail. The hot-weather crops are being harvested in the Hyderabad and Warangal districts. The water-supply is running short, except in Hyderabad. Prices are normal.

Central India.—*For week ending 1st May.*—Rainfall moderate in parts of three Agencies. Harvesting of the winter crops has been completed in four Agencies and in parts of Gwalior, and is in progress elsewhere. The probable outturn will be good in four Agencies, but below average in others owing to the recent rain and hailstorms. Agricultural stock in good condition in all Agencies, except in parts of Goona and Gwalior. Pasturage is good and sufficient in all Agencies, except in parts of Gwalior. Prices of food-grains are falling in Bundelkhand, above normal in Bhopawar and Goona, rising in parts of Gwalior, and normal elsewhere. Opium is in good condition in Gwalior; elsewhere it has been gathered.

Rajputana.—*For week ending 1st May.*—Rainfall moderate in Kotah, Ajmere, Jeypore, and Bickanir. Agricultural operations are satisfactory. Reaping continues. The standing crops, prospects, and agricultural stock are generally good. The crops have been damaged partly by hail in Dholepore. Fodder is sufficient, except in Dholepore. Prices have risen in one State, fluctuating in one, falling in one, and steady elsewhere.

Kashmir.—*For week ending 30th April.*—KASHMIR VALLEY: Rainfall slight. The standing spring crops are generally in good condition. Land is being prepared for the autumn crops. Prices continue normal.

JAMMU PROVINCE: *For week ending 30th April.*—Harvesting is in progress. Cattle are healthy. Prices are stationary.

Nepal.—*For week ending 27th April.*—Slight showers have fallen. The weather is getting warm. The wheat crop promises well. Indian-corn is still being sown.

To

THE SECRETARY TO THE GOVERNMENT OF MADRAS,
REVENUE DEPARTMENT.

Calcutta, the 27th March, 1894.

SIR,

I am directed to acknowledge the receipt of the Proceedings forwarded with your letter No. 626, dated the 14th ultimo, and to say that the Government of India agree with the Government of Madras that a refund should be made of the difference between the specific and *ad valorem* duty on arms purchased by European British subjects residing in Native States from an importer or seller also residing in a Native State.

* * * * *

I have the honour to be,

SIR,

Your most obedient Servant,

J. E. O'CONOR,
Asst. Secretary to the Government of India.

Copy forwarded to the Governments of Bombay and Bengal, and to the Chief Commissioner of Burma.

CUSTOMS CIRCULAR No. VI.

(Refund of import duty not to be granted on lost goods, on which duty has been paid, when they have passed out of Customs custody.)

No. 2692-S.R.

GOVERNMENT OF INDIA.

FINANCE AND COMMERCE DEPARTMENT.

STATISTICS AND COMMERCE.
Customs.

To

THE CHIEF SECRETARY TO THE GOVERNMENT OF
BOMBAY, REVENUE DEPARTMENT.

Simla, the 30th May, 1894.

SIR,

I am directed to acknowledge the receipt of your letter No. 2834, dated 24th April 1894, on the subject of a claim made by * * * for the refund of the Customs duty paid by them on 198 cases of kerosine oil which were lost in Bombay Harbour while in transit from the importing vessel to the wharf after the oil had been entered for home consumption and duty had been paid on it.

2. I am to state that the Governor General in Council concurs in the opinion of the Government of Bombay stated in the second paragraph of your letter, and that the claim made by the firm cannot be accepted. To establish a claim for exemption from duty on lost goods it must be shown that the goods when lost had not actually been entered for warehousing or for home consumption, or that they were lost after entry for home consumption while they were in the custody of the Customs officials. When the goods have been lost before entry for home consumption or after it has been completed, and while the goods are in the custody of the importer or his agents, such loss must be accepted by the importer as a trade risk against which the Government cannot undertake to insure him.

3. This ruling will be communicated to all Local Governments for future guidance in such cases.

I have the honour to be,

SIR,

Your most obedient Servant,

J. E. O'CONOR,
Asst. Secretary to the Government of India.

CUSTOMS CIRCULAR NO. VII.

(Adoption at all Indian ports of the practice observed in the Bombay Custom House in regard to the treatment under the Merchandise Marks Act, 1889, of goods bearing the names of British or British Indian firms, and of bottles of wine and other liquors.)

No. 4175-S.R.

GOVERNMENT OF INDIA.

Customs.

RESOLUTION.

Simla, the 18th August, 1894.

Read—

Letter from the Government of Bombay, No. 1484, dated the 24th February 1894, and enclosures.

Letter to the Governments of Madras and Bengal, and the Chief Commissioner of Burma, No. 84-S., dated the 16th March 1894.

Letter from the Government of Bengal, No. 5-T.F., dated the 6th May 1894, and enclosure.

Letter from the Chief Commissioner of Burma, No. 476-1 C.-3, dated the 22nd May 1894, and enclosures.

Letter from the Government of Madras, No. 432, dated the 20th June 1894, and enclosures.

In the letter of the 24th February 1894 the Government of Bombay brought to the notice of the Government of India that the practice of the Bombay Custom House in the administration of the Indian Merchandise Marks Act, 1889, was at variance with the practice at Calcutta and other ports in respect of the following two points:

(1) At Bombay goods bearing the names of British or British Indian firms are detained unless the origin of the goods is indicated *on the same label* as that on which the name appears.

(2) At Bombay the indication of the country of origin, as well as of the names of the shippers, is required to be placed on the capsules and corks of bottles of wine and other liquors as well as on the labels.

The Government of Bombay observed that this practice was in conformity with the intention of the law, and suggested that it should be adopted elsewhere. As the Collector of Bombay observes, the English Board of Customs, in their circular issued under the corresponding Act in England, have ordered that the indication of origin "should form an actual part of the label or wrapper on which the description appears."

2. The suggestion was referred for opinion to the other local Governments. From the replies it appears that in Bengal and Burma the practice in regard to both points is different, but that both the local Governments are in favour of adopting the Bombay practice. In Madras, the practice as regards the first point is the same as that obtaining in Bombay; but as regards the second point, the marking of the country of origin on corks and capsules of bottles is not insisted on. The Government of Madras admit that such marking seems to be required by law; but, in view of the inconvenience and loss which would be caused to shippers by a sudden change of the existing practice, they suggest that the practice need not be interfered with, or, if any change is to be made, that ample notice should be given to the trade.

3. The Governor General in Council agrees with the Government of Bombay in thinking that the practice of the Bombay Custom House in regard to both the points is in accordance with the intention of the law. His Excellency in

Council is, therefore, pleased to direct that this practice should be adopted at all other ports, but that its enforcement as regards the second point should follow adequate notice to importing firms, so as to prevent any reasonable ground of complaint of loss.

Ordered, that copy of the Resolution be communicated to the Governments of Madras, Bombay, and Bengal, and to the Chief Commissioner of Burma.

J. E. O'CONOR,
Asst. Secretary to the Government of India.

CUSTOMS CIRCULAR NO. VIII.

(Exemption from Customs duty of salt imported into Calcutta and issued with the sanction of the Government of Bengal to manufacturers of glazed stoneware.)

No. 4708-S.R.

GOVERNMENT OF INDIA.

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the Week ending at 8 a.m. on Saturday, May 4th, 1895.

At the close of last week pressure was low over the Gangetic plain and the Punjab, and high over the Arabian Sea and Bay of Bengal; large pressure differences existed, strong westerly winds were blowing, and the weather was dry and hot. These conditions have continued with only slight modification during the week under review. The only really important change has been the gradual and unsteady rise of the barometer over Northern India, combined with steady pressures in the south. Hence pressure had become more uniform at the close of the week than it was at the commencement, and accompanying this change there was a change in the winds. The westerly winds which continued to prevail over the greater part of the country fell lighter, and easterly winds appeared over the north side of the Gangetic plain, while the weather became more cloudy and cooler, and thundershowers, which had almost ceased during the prevalence of the strong westerly winds, again occurred over a large part of the country. In North-Eastern India the weather was at no time influenced by these westerly winds, but strong southerly winds from the Bay blew uninterruptedly. Consequently, there was much more moisture in this region, heavyish rainfall was of almost daily occurrence, and the provinces of Burma, Bengal, and Assam alone among the provinces of India had a temperature steadily lower than the normal. The wind was strong to a gale over a large part of the country at different times,

and local dust and thunder storms were on some occasions accompanied with strong winds, but there was no cyclonic storm during the week.

Daily Summary.—*Sunday.*—Pressure was low over the western desert and the Gangetic plain, and high off the Bombay Coast. Gradients were much steeper than usual, and the westerly to north-westerly winds which blew over a large part of the country were strong to a gale in force. The southerly winds over the Bay were also strong. Rain was practically confined to North and East Bengal and Assam, though a few local showers were reported from other parts of the country. The mean temperature was generally excessive, except in Bengal and Bombay.

Monday.—Pressure remained highest on the west coast of the Peninsula and lowest over the north of the Gangetic plain, and gradients were even steeper than on the 28th. Strong westerly and north-westerly winds prevailed, except in North-Eastern India, where the directions were variable. The mean temperature had been normal or excessive, except in Bengal and Burma. Rain had fallen in Burma, Assam, and North Bengal. In Assam the fall had been heavy.

Tuesday.—Pressure had decreased over the extreme north-west, been steady in the extreme south, and risen elsewhere. The relative distribution showed little general change, and gradients continued steep. Easterly winds were re-appearing in Northern India, otherwise there was little alteration in the wind currents. The mean temperature had been excessive, except in Burma, Bengal, and the North-Western Provinces. Rain was confined to North-Eastern India, but was heavy in Cachar and East Bengal.

Wednesday.—Two barometric depressions were shown, one over the Upper Indus Valley, and a second over the east of the Central Provinces and west of Bengal, while readings were highest in Assam. The winds were cyclonic around the depression over the Central Provinces, easterly and south-easterly up the Gangetic plain, and north-westerly elsewhere. The mean temperature had been excessive everywhere, except Burma, but particularly so in North-Western India. Rain had fallen in Upper Burma, East Bengal, and Assam, but the amounts were smaller than on the preceding day.

Thursday.—Pressure had changed irregularly and largely in Northern India, and been nearly steady elsewhere. The general conditions of pressure and of wind were not much changed. The mean temperature remained above the normal average everywhere, particularly in the north-west. Showers had fallen in North-Eastern India, the amounts being large in Lower Bengal.

Friday.—Two depressions continued to be shown, one over North-Western India, and the second over the Central Provinces, and the general conditions were still unaltered. The easterly winds were disappearing from the Gangetic plain, but otherwise there was little alteration. The mean temperature had been normal or excessive everywhere. Scattered showers had occurred over a large part of the country.

Saturday.—Pressure had increased over nearly the whole country. Readings were highest in Assam and lowest over the western desert, and gradients had become more nearly normal. The wind had again become easterly up the Gangetic plain, but this was practically the only change. The mean temperature had

been excessive, except in the North-Western Provinces, and perhaps in Burma. Rain had fallen over nearly the whole of Bengal and Assam, and scattered showers had occurred in other parts of the country.

Temperature.—The following table gives the variation of the mean temperature from the normal in the different provinces of India for each day of the week:

Province.	April 1895.			May 1895.				Mean variation of week.
	28th	29th	30th	1st	2nd	3rd	4th	
	°	°	°	°	°	°	°	°
Burma	—4·5	—2·1	—1·3	—1·3	—0·3	—0·1	—0·5	—1·4
Bengal and Assam	—1·1	—1·3	—0·5	—1·3	—1·4	—0·8	—3·8	—1·5
North-Western Provinces and Oudh	+2·5	+1·5	—0·5	+1·0	+0·8	—0·6	—1·4	+0·5
Punjab	+3·1	+1·4	+2·0	+7·4	+6·2	+2·7	+1·4	+3·5
Bombay	—0·9	—0·5	+0·1	+0·1	+1·4	+1·8	+2·2	+0·6
Central Provinces and Berar	+1·7	—0·1	+1·6	+2·3	+2·6	+2·9	+1·4	+1·8
Central India and Gujarat	+1·6	+1·3	+0·8	+0·9	+1·4	+2·7	+1·6	+1·5
Sind and Rajputana	+3·7	+2·7	+4·0	+5·5	+4·3	+0·8	+1·6	+3·2
Madras	+0·6	+2·7	+3·9	+3·1	+2·2	+3·1	+0·8	+2·3
Mean for whole of India	+0·7	+0·6	+1·1	+2·0	+1·9	+1·4	+0·4	+1·2

The recovery of temperature which had commenced last week was maintained, and the mean temperature of the whole of India was above the normal throughout the week. The excess was greatest on the 1st and 2nd May, when it was about 2°. The provincial variations show that in North-Eastern India, where there occurred a good deal of heavy rainfall during the week, the mean temperature was steadily low throughout, but that in all the other parts of the country the mean was on nearly all days excessive. The heat, relatively to the average, as well as absolutely, was greatest in the Punjab, Sind, and Rajputana. On the 30th April and the 1st and 3rd of May, the abnormal heat was very great in the Madras Coast districts.

The highest maxima reported on each day were—

On the 28th April 115·2° at Jacobabad.
„ 29th „ 113·7° „ „ and Hyderabad.
„ 30th „ 115·6° „ „
„ 1st May 118·0° „ „
„ 2nd „ 117·1° „ „
„ 3rd „ 112·7° „ Nagpur.
„ 4th „ 115·6° „ Jacobabad.

With the single exception of the 3rd, when there occurred a considerable and sudden fall of temperature in the Punjab and Upper Sind, and considerable rise in the Central Provinces, the maximum temperature for the whole of India has been steadily reported from Sind, and the maxima there have varied from 113·7° on the 29th to 118° on the 1st.

Rain.—The rainfall of the week under review has been much less generally distributed than was the case with the rainfall of the two preceding weeks, while, on the contrary, it has been very much heavier in certain districts during the

present than during the past weeks. It will be remembered that, over the greater part of the country and during most of the present week, dry hot westerly and north-westerly winds prevailed. These winds carried very little moisture, and where they blew the weather was dry. These winds fell lighter towards the close of the week, winds from other directions sprang up, conditions favourable for local storms were developed, and scattered thundershowers occurred. This account explains the rainfall conditions exhibited in the first column of the concluding table. Over the whole country, except North-Eastern India, the rainfall is light and scattered, such as would be received during the occurrence of small local storms, or altogether wanting where these storms had been absent and where the dry winds had prevailed uninterruptedly. In North-Eastern India conditions were the opposite of those just described. The dry westerly winds never penetrated into this region, which had, on the contrary, strong southerly winds from the Bay. These winds brought up much moisture, and the rainfall was general throughout the whole of North-Eastern India, and was heavy and continuous in some parts.

The table shows that absolutely no rain was received in twenty-one divisions, and practically none in eight more. These twenty-nine divisions included Bihar (South), most of the North-Western Provinces, and all the Punjab divisions, the greater part of the Peninsula, and the whole of the central parts of the country, while all over North-Eastern India moderate to heavy rain was received. The heaviest average actual fall was 11·41 inches in Assam (Surma), followed by 5·00 inches in East Bengal, and by nearly 2 inches in North Bengal. The third column of the table shows that the rainfall of the week was in excess of the normal in Central Burma, in East, Deltaic and North Bengal, in Assam (Surma), in Orissa, in Chota Nagpur, in Bihar (North), in the North-Western Provinces (East and Submontane), in Oudh (North), and in the East Coast (North). In all other places the rainfall was short of the average. The excess was as much as 6·56 inches in Assam (Surma) and 2·66 inches in East Bengal, while the largest deficiency was about 1 inch in Tenasserim, Malabar, and Coorg. In Burma most of the rainfall of the week fell during the first two days, in Assam and East Bengal rainfall occurred practically daily, and elsewhere most of the rain fell on the last two days.

The columns giving the total actual and normal rainfall for the period March 3rd to May 4th show that the seasonal rainfall equals or exceeds the normal over the greater part of the country. The only important instances of defect are found in Assam (Brahmaputra), Bihar (North), the Punjab (South), Khandesh, Kathiawar, and the East Coast (South).

The following heavy total falls during the week are reported: Fenny (Noakhalli) 7·27 inches, Nasimagar (Tipperah) 14·60 inches, Naraingunj (Dacca) 7·44 inches, Karimgunj (Sylhet) 15·39 inches, Silchar 14·14 inches, Cherrapunji 14·39 inches, Magurah (Jessore) 7·37 inches, Jalpaiguri 3·45 inches, Mozufferpore 4·79 inches, Badaun 3·57 inches, Moyisandra (Tumkur) 2·95 inches, Nassapatam (Vizagapatam) 3·24 inches.

SIMLA, *9th May 1895.*

W. L. DALLAS,
Asst. Meteorological Reporter to the Government of India.

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 4th May.*—Scattered showers have fallen in the Circars, Deccan, and Southern districts. Irrigation supplies are seasonable. Cultivation and sowing are proceeding in parts. The standing crops generally are in good condition. Some harvest is still going on with fair yield. Pasture is scarce, but fodder is available, and cattle are in good condition. Prices are almost stationary, but are slightly easier in the Deccan, Central, and some of the Southern districts.

Bombay.—*For week ending 8th May.*—Slight rain in parts of Sholapur, Belgaum, and Dharwar. The standing crops are good, except in parts of Karachi, where they are injured by blight or insects. Reaping of the late crops continues in parts of five districts. Preparations for the next season are general. Sowing is progressing in one taluka of Sholapur. Cotton-picking continues in parts of Gujarat. The fodder-supply is sufficient. Agricultural stock in good condition. Prices are normal, except in parts of Sholapur.

Bengal.—*For week ending 6th May.*—There was rain over the whole Province during the week, the heaviest falls being in Eastern and Central Bengal. Agricultural prospects are generally favourable. Ploughing is now in progress in most districts, and the early rice and jute are being sown. Indigo and sugarcane are doing well. The harvesting of spring rice in Orissa is finished, but in other districts it is still proceeding. In Behar mangoes have been slightly injured by storms. The fodder-supply at Giridi is still reported to be scanty. The price of common rice is steady.

North-Western Provinces and Oudh.—*For week ending 8th May.*—Weather generally seasonable, but stormy and rainy, and unusually cool in a few districts. Irrigation of sugarcane and extra crops is progressing. Threshing and winnowing of the spring crops are still going on. Supplies are ample. Fodder is still insufficient in Fyzabad. Prices are slightly above normal in Allahabad, Moradabad, and Meerut; elsewhere prices are stationary.

Punjab.—*For week ending 8th May.*—No rain during the week. Harvesting of the spring crops is going on. Sowings of the extra spring crops are nearly over. Ploughings for and sowings of the autumn crops have commenced. The irrigation of sugarcane and cotton has also commenced in Jullundur. The standing crops are generally said to be in good condition. The outturn of the spring crops is reported good to average. A flight of locusts passed through one tahsil of Dera Ismail Khan from west to east, but no damage is reported. Cattle are generally in good condition, and fodder is sufficient in all districts, except in part of Lahore. Prices are rising in Peshawar; normal in Delhi and Umballa; elsewhere prices continue low.

Central Provinces.—*For week ending 8th May.*—Weather very warm and generally clear. Land is being ploughed for the autumn sowings in the south and in the east. Threshing of the winter crops is approaching completion in some districts. Prices have slightly risen in Damoh and continue above normal in Seoni. Importations in Damoh continue.

Burma.—*For week ending 27th April.*—In Lower Burma the reaping of dry-weather paddy has been completed in Amherst. In Upper Burma transplanting of dry-weather paddy is nearly finished. Cultivation of early wet-weather paddy is in progress. Reaping of miscellaneous crops is in progress. In the Myinmyu sub-division of the Sagaing district the dry-weather paddy has been slightly damaged by rain, as also tobacco in the Sagaing sub-division. Crop prospects are generally good. The price of paddy has risen considerably in Thongwa and Bassein and slightly in Henzada; elsewhere the price is stationary.

For week ending 4th May.—In some districts of Upper Burma the dry-weather paddy has been reaped; in others it is still being transplanted. Cultivation of early wet-weather paddy is progressing in Mandalay and Kyaukse. In Sagaing dry-weather paddy is slightly damaged by insects and heavy rain, and in the Mingin sub-division of Upper Chindwin this crop has been destroyed by heavy rain. The wheat, dry-weather paddy, pea, gram, and bean crops have failed entirely in three circles of the Salin township of the Minbu district; elsewhere crop prospects are good. The price of paddy has risen largely in Tharrawaddy, considerably in Rangoon, Pegu, Bassein, Magwe, and Kyaukse, slightly in Prome, Thongwa, Shwegyin, and Toungoo, but has fallen slightly in Tavoy.

Assam.—*For week ending 7th May.*—Weather seasonable. Sowing of the early rice continues. The condition of cattle is indifferent. Fodder and water are sufficient.

Mysore and Coorg.—*For week ending 8th May.*—MYSORE: Rain has fallen in all districts. The standing crops are in good condition. Ploughing operations continue throughout the Kolar district. Prospects are good. Prices have risen in Bangalore and fallen in Mysore.

COORG: Rainfall moderate. Ploughing of rice fields has commenced in some parts of Coorg. Fodder and water for cattle are sufficient. Prices are normal.

Berar and Hyderabad.—*For week ending 8th May.*—BERAR: Weather warm and clear. Land is being prepared for the ensuing rain crop. Fodder and water are sufficient for requirements. Prices have risen in two districts and fallen in one, but are stationary elsewhere.

HYDERABAD: Rainfall moderate. The weather is warm and indicates storms. The hot-weather crops have been harvested. Land is being manured in the Western division for the coming monsoon. The water-supply is sufficient. Fodder is somewhat scarce in Aurangabad. Prices are normal.

Central India.—*For week ending 8th May.*—No rain during the week. Harvesting of the winter crops is completed in Bundelkhand, Western Malwa and Gwalior, but is in progress in other Agencies. The probable outturn is below average in one district of Gwalior, and in Bhopal and Bundelkhand, but is good elsewhere. Agricultural stock in good condition in all Agencies, except in some parts of Gwalior and Bhopal. Pasturage is good and sufficient in all Agencies, except in a few districts of Gwalior. Prices of food-grains are high in Bhopal and Goona, rising in one district of Gwalior, low in another district, but normal elsewhere.

Rajputana.—*For week ending 8th May.*—Rainfall moderate in Bikanir. Agricultural operations are satisfactory. Reaping and threshing continue. The standing crops, prospects, and agricultural stock are generally good. Fodder is sufficient, but is failing in Dholepore. Prices are rising in two States, but are steady elsewhere.

Kashmir.—*For week ending 7th May.*—KASHMIR VALLEY: Rainfall moderate. The weather is now fine. The oil-seeds crops are generally in excellent condition. Land is being prepared for rice cultivation. Prices continue normal.

JAMMU PROVINCE: *For week ending 8th May.*—No rain. Reaping of the spring crops is in progress. Prices are stationary.

Nepal.—*For week ending 4th May.*—Weather cloudy. Sowing of early rice and Indian-corn is progressing. The land has been prepared for cultivation. The wheat crop is ripe; reaping has commenced.

7. Letter from the Government of Bengal, No. $\frac{14\text{-T.}}{\text{Marine}}$, dated 30th April 1895.

RESOLUTION.

Towards the end of 1893 the Secretary of State, at the request of the Government of India, sent out from England an expert to fill the appointment of Inspector of Mines, one of whose principal duties was to advise the Government of India on the subject of that regulation and control of the mining industry which, it was acknowledged, could not long be delayed. The report cited in the preamble to this Resolution represents the results of six months' inspection by Mr. Grundy, the expert in question, and embodies his proposals for the regulation of mines in India.

2. The inspections upon which these proposals are based have been confined to coal-mines in Bengal; and with regard to two major questions, the decision of which must largely depend upon the social and industrial habits of the people, the Governor-General in Council will await Mr. Grundy's matured conclusions, based upon a wider experience of the country generally, of mines other than coal-mines, and of a mining population other than the non-Aryan Sonthals and Bauris. These questions are, the prohibition of underground labour by females, and restrictions upon the employment of children. But it is abundantly clear from Mr. Grundy's report that there are many matters common to mines in all parts of the world, regarding which authoritative regulation is already needed for the protection of the mining population, and will become more and more necessary as existing mines develop. This, it is believed, will be admitted even by those whose interests are most closely concerned; and in respect of these matters there is every reason why action should not be delayed.

3. His Excellency in Council is anxious to associate with him in the consideration of this important question, and to carry with him in the conclusions to be arrived at, those who are concerned in the mining industry of the country,

and who will be immediately affected by the proposed regulations. He has therefore decided, with the approval of Her Majesty's Secretary of State, to refer the matter for consideration to a Committee on which the Bengal Chamber of Commerce, the Indian Mining Association, and the native owners of coal-mines will be represented. Mr. William Miller, Manager of the Equitable Coal Company's Works at Barrakur, Mr. Ernest Cable of the Firm of Messrs. Bird & Co., and Kumar Dakhineswar Malia have been nominated to represent their interests respectively. Mr. Grundy has been appointed a Member of the Committee by the Government of India, and Mr. H. C. Williams, I.C.S., has been selected for the office of President.

4. The Committee will meet towards the end of May under the direction of the Bengal Government. Its duty will be to consider and advise upon the regulation by Government of mines in India. It should frame, for the approval of Government, general rules which will be applicable to all mines without distinction, and also special skeleton rules which will be applied to individual mines or groups of mines, the details being filled in subsequently with reference to the special circumstances of each case. It should also specify the matters regarding which it considers legislation to be desirable, and the provisions which it would suggest under each head. In framing its recommendations, it should bear in mind, as the objects to be aimed at, *firstly* to afford full protection to the mining population in all matters in which they have a reasonable claim to protection; *secondly*, to limit interference as far as may be possible consistently with the attainment of that object; and *thirdly*, to pay due regard to the interests and possibilities of small mines and of native owners.

5. In pages 28 to 30 of his report, Mr. Grundy enumerates the headings under which he suggests that regulation will be advisable. The Government of India are not sure that Mr. Grundy's list does not include some minor matters which may safely be left alone for the present. The following appear to them to be the more important matters regarding which regulation is undoubtedly called for: the qualifications of Managers and Assistant Managers, plans of mines, standing water, ventilation, lighting, fire-damp, shafts and outlets, the fencing of shafts and machinery, report and classification of accidents, the securing of roofs, and the powers of Inspectors. But they have no desire to fetter the discretion of the Committee, to whose consideration they refer the general question.

ORDER.—Ordered, that a copy of the foregoing Resolution be forwarded (i) to the Government of Bengal for information and the issue of the necessary orders; and (ii) to the Director, Geological Survey of India, for information and communication to the Inspector of Mines in India.

Ordered also, that a copy of the Resolution be forwarded to the Secretary to the Bengal Chamber of Commerce and to the Secretary to the Indian Mining Association, in continuation of letter No. $\frac{3706}{3707}$, dated 18th December 1894.

Ordered also, that the Resolution be published in the Supplement to the *Gazette of India*.

The Gazette of India.

No. 20.} SIMLA, SATURDAY, MAY 18, 1895.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the Week ending at 8 a.m. on Saturday, May 11th, 1895.

During the past week, though the barometer has changed considerably from day to day, the general distribution of pressure has altered very little. Readings have been steadily low over the western desert, over the Central Provinces, and over Upper Burma, while they have been highest in the south of the Bay. Accompanying this steadiness in the distribution of pressure were fairly steady wind directions. Over the Bay the winds were generally southerly, over the Gangetic plain south-easterly and easterly, and over Western India north-westerly and westerly. The force was strong to a gale over a large part of the country, but particularly so on the Sind and Kathiawar coasts, where the wind blew with a high velocity at times. The most marked feature in the weather was the high temperature which prevailed almost everywhere towards the close of the week. This excess of heat was at its maximum on Saturday, the 11th, when the thermometer in North-Western India rose to many degrees above the normal of the time of year. Rain fell on several days over North-Eastern India and the Peninsula, but there was little or none received in North-Western and Central India.

Daily Summary.—*Sunday.*—Pressure was changing irregularly and generally by small amounts. The barometer read highest in Assam, and lowest over the western desert, and above the normal average everywhere. Winds were easterly and south-easterly over the Gangetic plain, westerly to north-westerly over Western India, and variable elsewhere. The mean temperature was in defect of the normal in the North-Western Provinces, in excess over the Punjab, Central India, Gujarat, Sind, and Rajputana, and about normal elsewhere. Rain had fallen in North Bengal, and at a few places in the Peninsula.

Monday.—Pressure continued to change irregularly, but was still above the normal average everywhere. The excess was greatest in Northern India. The general distribution was little changed. The wind directions were also practically unaltered. Temperature had very generally fallen. The mean temperature was in excess of the normal in the Punjab, Sind, and Rajputana, in defect in the North-Western and Central Provinces, Burma, and Madras, and about normal elsewhere. Rain had fallen in West Bengal, Burma, and the Peninsula. The rainfall, though not general, was heavy in some places.

Tuesday.—Pressure had fallen almost everywhere, but still the general distribution exhibited very little change. Pressure was highest in the south of the Bay, and low over the western desert, the Central Provinces, and Central Burma. Winds were south-easterly over the north of the Gangetic plain, northerly on the west, and southerly on the east side of the Peninsula, and variable elsewhere. The mean temperature was above the normal average over North-Western India and Central India, below in the North-Western Provinces and Madras, and normal in other parts of the country. A little scattered fall was all the rain reported.

Wednesday.—Pressure had been nearly steady; hence the general distribution was practically unchanged. The winds were the same as on the preceding day. The mean temperature was normal or excessive. The abnormal excess was greatest in the Punjab, Sind, and Rajputana. Scattered showers of rain were again reported from different parts of the country.

Thursday.—The barometer had begun to fall very generally, and the excess of pressure previously prevailing was beginning to disappear. The winds were again practically unchanged. The temperature had, on the whole, risen, and, except in Burma and Madras, exceeded the normal average. Rain had fallen generally in Burma, and locally at Salem, but there had been none elsewhere.

Friday.—The barometer was changing by small amounts, and pressure was nearly normal over the greater part of the country. The wind was southerly over the Bay and Bengal, but was variable elsewhere. Temperature had again risen, except in Burma, and the mean temperature was excessive, except in Burma. The abnormal excess was very large in North-Western India. Showers of rain had fallen in Burma and the south of the Peninsula.

Saturday.—Barometric readings were high over Assam and the south-east of the Bay, low over Central Burma, over the Central Provinces, and over the Punjab. The winds remained southerly over the Bay and Lower Bengal, and generally variable elsewhere. Temperature had again risen, and the mean temperature remained excessive over all parts of the country, except Burma. Scattered showers of rain had occurred in several parts of the country, but more particularly in Burma and the south of the Peninsula.

Temperature.—The following table gives the variation of the mean temperature from the normal in the different provinces of India for each day of the week:

Province.	May 1895.							Mean variation of week.
	5th	6th	7th	8th	9th	10th	11th	
	°	°	°	°	°	°	°	°
Burma	+0·8	—1·4	+0·8	—0·3	—1·1	—2·2	—1·3	—0·7
Bengal and Assam	—0·9	—0·5	+0·3	+0·7	+1·6	+3·0	+3·1	+1·0
North-Western Provinces and Oudh	—2·3	—3·0	—3·4	—0·8	+1·3	+3·9	+5·7	+0·2
Punjab	+3·3	+2·1	+3·7	+5·6	+5·5	+7·7	+8·7	+5·2
Bombay	+0·5	+0·1	—0·2	+0·8	+1·1	+2·5	+3·7	+1·2
Central Provinces and Berar	+0·8	—1·4	0	+0·9	+1·5	+2·7	+3·1	+1·1
Central India and Gujarat	+2·5	+0·6	+0·6	+0·6	+1·4	+2·9	+6·1	+2·1
Sind and Rajputana	+1·9	+1·9	+2·6	+3·6	+4·9	+5·8	+6·5	+3·9
Madras	—0·4	—3·1	—2·4	—0·8	—0·1	+0·5	+0·9	—0·8
Mean for whole of India	+0·7	—0·5	+0·2	+1·1	+1·8	+3·0	+4·1	+1·5

The means for the whole country show that, during the first three days of the week, the temperature was unsteady, there being a slight excess on the 5th, a slight defect on the 6th, and a slight excess again on the 7th. After the last date, however, a decided rise set in, and between the 8th and the 11th the mean temperature rose from 1·1° above the normal to 4·1° above the normal. The provincial variations show that the mean temperatures of Burma and of Madras for the week were lower than usual, but that in all other provinces the heat was greater than is ordinarily experienced. This was particularly the case over north-western India, comprising the Punjab, Central India, Gujarat, Sind, and Rajputana, where the mean temperature was in excess of the normal throughout the whole week, and where the abnormal excess on the 11th varied between 6·1° and 8·7°. In the North-Western Provinces the variations of the mean temperature were irregular; thus on the 7th the mean was 3·4° below, and on the 11th 5·7° above the average.

Exceptionally high day temperatures were recorded towards the close of the week, when in the Indus Valley the readings of the maximum thermometer were from 10° to 12° above the normal.

The highest maxima reported on each day were—

On May	5th	117·6°	at	Jacobabad.
„	6th	118·0°	„	„
„	7th	118·5°	„	„
„	8th	119·0°	„	„
„	9th	121·5°	„	„
„	10th	118·5°	„	„
„	11th	119·0°	„	„

Rain.—During the week under review dust and thunder storms have given rain to all parts of the country, except the centre and north-west, where the weather has either been fine or disturbed only very slightly. The rainfall of the week has been absolutely or practically *nil* in Arakan, Orissa, Oudh, the North-Western Provinces (Central and West divisions), the Punjab (all divisions), the Konkan, Khandesh, Berar, the Central Provinces (West and Central divisions), Gujarat, Kathiawar, Sind, Central India, Rajputana, and Hyderabad (South). In all other parts of the country effective rainfall has been received, the average of the divisions ranging from 5·43 inches in Tenasserim and 4·00 inches in the East Coast, North, division to 0·12 inch in the Central Provinces (East). Even where rain was received, however, the average fall was generally below the normal average. In Tenasserim there was an abnormal excess of 3·77 inches, in the East Coast (North) of 3·55 inches, in Lower Burma of 0·37 inch, in the North-Western Provinces (East) of 0·12 inch in Madras (South Central) of 0·92 inch, in Mysore of 0·38 inch, in Madras (Central) of 0·08 inch, in the East Coast (Central) of 0·14 inch; and in Madras (South) of 0·13 inch. In all the remaining divisions the rainfall was less than the normal. The deficiency was large in Arakan, East Bengal, Assam, Deltaic, Central and North Bengal, Orissa, the Hill districts of the Punjab, and Coorg, but elsewhere, though general, was not very important.

The columns giving the average actual and average normal rainfall for the period, 3rd March to 11th May, show that the seasonal rainfall has been in excess over Tenasserim, Lower and Central Burma, Chota Nagpur, the North-Western Provinces (East and Submontane), the Punjab (North-West and West), Malabar, Madras (South Central), Coorg, Mysore, the Konkan, the Deccan, Berar, the Central Provinces, Sind, Central India, Rajputana, the East Coast (North and Central), Madras (Central), and Madras (South); that it has been normal in Orissa and Hyderabad (South); and that it has been in defect elsewhere. The deficiency is most marked in Gujarat and Kathiawar.

The following heavy total falls of rain during the week are reported: Thaton (Amherst) 7·48 inches, Maubin 4·42 inches, Myittha (Kyaukse) 2·03 inches, Fenny (Noakhalli) 2·24 inches, Shillong 2·61 inches, Goalundo 2·00 inches, Pubna 2·54 inches, Bhagatpur (Jalpaiguri) 3·34 inches, Zamani (Ghazipur) 2·40 inches, Nelamber (Calicut) 1·75 inches, Perundarai (Coimbatore) 4·98 inches, Chitaldroog 3·55 inches, Bobbili (Vizagapatam) 5·40 inches, Garravaram (Tistna) 2·02 inches, Maunargadi (Tanjore) 2·82 inches, Periyakolam (Madura) 2·52 inches.

W. L. DALLAS,
Asst. Meteorological Reporter to the Government of India.

SIMLA, *16th May 1895.*

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 11th May.*—Seasonable showers have fallen almost throughout the Province. The water-supply is sufficient for the season. Cultivation is proceeding generally after the recent rain, and sowing is in progress in parts. The standing crops are in good condition. Some harvest with moderate outturn is still proceeding. Pasture is improving, and fodder is sufficient. Prices are practically stationary.

Bombay.—*For week ending 15th May.*—Slight rain in parts of the Deccan and Karnatak. The standing crops are good, except in one taluka of Karachi where they have been injured by the heat. Reaping of the late crops continues in parts of two districts. Preparations for next season are general. Sowing is progressing in parts of two districts. Cotton-picking continues in parts of Gujarat. The fodder-supply is sufficient, and agricultural stock are in good condition. Prices are normal, except in parts of two districts.

Bengal.—*For week ending 13th May.*—There were local showers during the week, but no heavy rain was reported, except in Khulna and Patna. More rain is wanted in parts for ploughing and for the early sowings. The sowing of jute and of early rice still continues. The state of the young sugarcane and indigo crops is good. The harvesting of the spring rice still continues in some districts. The price of common rice is generally reported stationary, but in Chittagong it is said to be rising.

North-Western Provinces and Oudh.—*For week ending 15th May.*—The heat is increasing. Occasional storms accompanied with slight rain have occurred in places. Threshing and winnowing of the spring crops is nearly completed. The outturn is reported to be excellent in Meerut, below average in Lucknow, and poor in part of Aligarh. Irrigation of sugarcane, indigo, and extra crops continues. Prospects are generally fair. Markets are well supplied. Fodder is still insufficient in Fyzabad. Prices are generally stationary, but are rising in two districts.

Punjab.—*For week ending 15th May.*—No rain. Reaping of the spring crops is nearly over. Threshing operations are in progress. Sowing of the extra spring crops is still going on in parts of Dera Ismail Khan. Ploughings for and sowings of the autumn crops have commenced. The sugarcane and cotton crops are being irrigated. The standing crops are generally reported to be in good condition. Flights of locusts passed through two tahsils of Dera Ismail Khan but did no damage. Cattle are generally in good condition and fodder is sufficient in all districts, except in parts of Lahore and Dera Ismail Khan. Prices are rising in Peshawar, normal in Umballa, and low elsewhere.

Central Provinces.—*For week ending 15th May.*—Weather hot and occasionally cloudy with storms in Seoni and Nagpur on the 12th. Land is being prepared for the autumn sowings nearly everywhere. Threshing of the winter crops is almost completed. Prices are steady. Imports into Damoh continue.

Burma.—*For week ending 11th May.*—In Upper Burma the reaping of the dry-weather paddy is still in progress. Cultivation of the early wet-weather paddy has commenced in Lower Chindwin and Meiktilla, and ploughing for sesamum in Minbu. Prospects of the standing crops are generally good. The

price of paddy has fallen slightly in Rangoon, Thongwa, and Bassein, risen considerably in Thayetmyo, and slightly in Prome, Magwe, and Myingyan; elsewhere prices are stationary.

Assam.—*For week ending 14th May.*—Weather seasonable. Sowing of early rice is progressing. The condition of cattle is indifferent. Fodder and water are sufficient.

Mysore and Coorg.—*For week ending 15th May.*—MYSORE: Rain has fallen in all districts. The standing crops are in good condition. Ploughing operations have commenced in Bangalore, and are continued throughout the Kadur district. Prospects are good. Prices have slightly risen in three districts.

COORG: Rainfall moderate. Ploughing of rice fields continues. Fodder and water for cattle are sufficient.

Berar and Hyderabad.—*For week ending 15th May.*—BERAR: Weather hot and cloudy. Ploughing of fields for the next rain crop continues. Fodder is sufficient. The water-supply is scarce in parts of the Chikhli taluka. Prices are almost stationary.

HYDERABAD: Rainfall moderate. The weather betokens storms. The present water-supply is sufficient. Fodder is scarce in Aurangabad. The hot-weather crops are still being harvested in some districts. Prices are normal.

Central India.—*For week ending 15th May.*—There was no rain during the week. Agricultural operations are in progress in Goona, but have been completed elsewhere. The probable outturn is good in two Agencies, but below average in four others, and in parts of Gwalior. The condition of agricultural stock is good in all districts, except in Bhopal. Pasturage is good and sufficient, except in the Neemuch district. Prices of food-grains are high in Bhopal and Goona, and rising in one district of Gwalior; elsewhere prices are normal.

Rajputana.—*For week ending 15th May.*—Agricultural operations are satisfactory. The crops have been harvested. Land is being prepared for the autumn crops in parts. Crops, prospects, and agricultural stock are generally good. Fodder is sufficient, except in Dholepore where it is failing. Prices have fallen in two States, and are rising in four, but are normal elsewhere.

Kashmir.—*For week ending 14th May.*—KASHMIR VALLEY: Slight rain during the week. The weather is now fine. The oil-seeds crops are generally in good condition. Land is being prepared for rice cultivation. Prices continue normal.

JAMMU PROVINCE: *For week ending 14th May.*—Rainfall slight. Reaping of the standing spring crops is still in progress. Fodder is sufficient. Prices are stationary.

Nepal.—*For week ending 11th May.*—Some smart showers have fallen, and the weather continues cloudy. Sowing of Indian-corn has been completed.

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Circular No. 1-P.

Extract from the Proceedings of the Government of India, Department of Revenue and Agriculture (Inventions and Designs),—dated Calcutta, the 3rd May 1895.

Read—

The appended report by the Secretary under the Inventions and Designs Act, 1888, on the working of his office, during the year ending 31st December 1894.

RESOLUTION.

The Director of Records to the Government of India was appointed Secretary under the Inventions and Designs Act in January 1894, and held charge of the office throughout the year under report, except during an absence of four months, on medical leave, when his duties were carried on by Surgeon-Lieutenant-Colonel Ranking, Secretary to the Board of Examiners.

2. The Government of India notice with satisfaction the increasing work of the office as an indication of the value placed by the public on the protection afforded to inventors by the Act.

3. **The number of references to experts was considerably reduced during the year under review. The subject of these references is still under the consideration of the Government of India.**

ORDER.—Ordered, that the above Resolution be forwarded to the Legislative Department, and to the Local Governments and Administrations noted in the margin.

Government of Madras.		Chief Commr. of the C. Provinces.	
"	Bombay.	" "	Burma.
"	Bengal.	" "	Assam.
"	N.-W. P. and Oudh.	" "	Coorg.
"	Punjab.	" "	Ajmere.
Resident at Hyderabad.			

Ordered also, that a copy be published in the supplement to the *Gazette of India*.

(True extract.)

DENZIL IBBETSON,
Offg. Secy. to the Govt. of India.

No. 861-P., dated Calcutta, the 19th March 1895.

From—G. W. FORREST, Esq., Secretary under the Inventions and Designs Act,

To—The Secretary to the Government of India, Department of Revenue and Agriculture.

I have the honour to submit the following report on the working of the Office of the Secretary under the Inventions and Designs Act, 1888, during the year ending 31st December 1894.

2. I assumed charge of the office on the 1st January 1894, and discharged the functions of Secretary under the Act up to the 1st July 1894, when ill-health compelled me to proceed to Europe on four months' medical leave. During my absence Surgeon-Major Ranking, Secretary, Board of Examiners, held charge of the office.

3. Through the courtesy of the Comptroller General of Patents I was enabled, when in England, to pay some visits to the Patent Office for the purpose of gathering knowledge which would be useful in the organisation and administration of the Patent Office in India. My thanks are due to Mr. Webb of the Patent Office for conducting me through every portion of the Patent Office, and having explained to me by the heads of the different branches the working of this great and important department of the State. A great portion of the information which I gathered is too technical for this report, but it will always be of service to me in all work relating to Patents. I had an instructive discussion with some of the high officials connected with the office with regard to the fundamental question whether it is better to adopt the English system of entering into no enquiry as to novelty, or the American system of having a thorough investigation made. In India the Act leaves it discretionary to make an enquiry into novelty, but owing to there being but few competent experts in the country, the exercise of this power must be more or less unsatisfactory. In England the consensus of opinion seems to be that it is better to make no enquiry into novelty. The advantages of the various publications issued by the Patent Office were discussed, and the forms in use and the rules in force were explained. Since my return to India the Patent Office in England has kindly forwarded to me a complete set of the various publications issued by it and copies of its several rules and forms. Some of these might, with advantage, be adapted to India. The time has certainly come when, as is the case in England, a set of rules might be prescribed under the Act for the guidance of the public. At present the only guide is notifications issued from time to time in the Government Gazette. The Act contains much which would be incorporated in the rules, but in the latter it would be put into less technical language and so be more easily understood by the public. The framing of a set of rules for the guidance of the office has for some time been under consideration, and therefore the present appears to be an opportune moment for considering the construction of rules for the guidance of the public.

4. The time has also come when it might be advisable to consider whether it would not be a convenience to the public for the Indian Office to issue an illustrated journal, somewhat similar to the journal issued by the English Patent Office. A journal of this nature might, without much trouble and cost, be issued, if applicants were required, when filing specifications, to also lodge an abridged description and a drawing, on a reduced scale, of their inventions. The trouble

and outlay involved in the issue of a journal of this nature would be amply compensated by the stimulus it would give to inventions. A great portion of the outlay would, in all probability, be recovered, by the sale of the journal. But even if no portion of the cost were recovered the growing prosperity of the Indian Office would justify a small expenditure on a work so useful to the public.

5. As will be observed from the table of statistics appended to this report, the year was marked by a steady improvement in the several branches of business done in the office. Every facility was afforded the public for the inspection of specifications and models, and a few new models were added to the collection in the museum provided for their accommodation.

6. Among the matters of public interest dealt with during the year was a representation from the Society of Patent Agents, London, for the grant of a more formal certificate than that hitherto issued, of the filing of specifications and the acquisition of exclusive privileges. The matter is still under consideration. Steps have also been taken for the issue of rules for the preparation of drawings accompanying applications snd specifications. The drawings hitherto filed have been of various sizes and descriptions, and the object of the rules is to secure uniformity in size and other details. This will facilitate the work of examining the drawings with the specifications. The rules have been framed with few restrictions, in order to hamper as little as possible those who are anxious to have their inventions protected.

7. Three applications have been filed during the year under report for the extension of the term of exclusive privilege. One of these was granted for a further period of fourteen years, another was rejected as having been submitted after the prescribed limit of time, and the third has since the close of the year been rejected.

8. The total number of applications for leave to file specifications was the same as the year preceding, *viz.*, three hundred and seventy-five: two hundred and sixty-six of these were granted, thirty-seven refused, and seventy-two remained pending at the close of the year.

9. The number of references to experts was less than the previous year, and amounted to about a third of the number of applications filed. This decrease is due to the present policy of curtailing, as far as possible, the preliminary investigation regarding novelty and utility. The question of novelty and utility is now closely investigated in those cases only in which the invention is likely to affect the interests of the State, or that of the poorer classes who cannot protect themselves. Of the one hundred and thirty-one applications referred to experts, fifty-five were on payment of fees and seventy-six without—twenty-one of the latter, against thirty-one in 1893 having been reported on by the Public Works Department. One hundred and seventy-five of the applications filed were received from residents in India, thirty-two or ten more than the previous year having come from natives. Seven of the latter were refused for want of novelty in the inventions it was sought to have protected.

10. The number of specifications filed during the year was two hundred and ninety-four against two hundred and fifty-three in the year before. These

included twenty-six for matters connected with railways, ten for the pulling of punkahs, ten for the manufacture of tea, eight for the treatment of cotton and other fibres, six for water-lifts, four for the manufacture of indigo, four for sugarcane mills, and three for baling presses.

11. The applications received for the registration of designs were only thirty-eight in number, of which but nine were registered. This was due to the subject of the applications being in some instances inventions, and in others trade marks. In fourteen cases the applications were for the registration of representations of the Hindu gods and goddesses on playing-cards, which, however, were not considered as new and original designs within the meaning of the Act.

12. The Advocate General was consulted in four cases involving points of law.

13. In one hundred and thirty-three cases the exclusive privilege acquired was continued—sixty-four beyond the fourth year, fifty-three beyond the fifth and sixteen beyond the sixth year; this being an increase by fifty-four over the year previous.

14. During the period under report, one hundred and twenty-eight patents lapsed through the non-payment of the fourth year's renewal fee, and twenty through the non-payment of the fee for the fifth year.

15. A marked increase took place in the amount of fees collected, the sum received having stood at Rs. 21,881-6-0 against Rs. 17,057-2-0 in 1893. Of the amount collected, Rs. 60-12-0 were refunded, leaving a net total income of Rs. 21,820-10-0.

16. The several heads of receipt are shown in the annexed table, from which it will be seen that the main items consisted of Rs. 8,810 for specifications, Rs. 6,610 on account of the continuance of exclusive privilege, and Rs. 3,750 for applications.

G. W. FORREST,

Secretary under the Inventions and Designs Act.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

RAILWAY TRAFFIC.

Rates and conditions for the carriage of coal for the general public; and of coal and railway materials and stores, whether for state or other railways.

No. 8-Ry., dated Simla, the 4th May, 1895.

RESOLUTION—By the Government of India, Public Works Department.

Read—

Government of India circular No. 17 Railway, dated the 30th October 1891, and its enclosures, as modified by the corrigenda slips dated respectively the 14th September 1893, 13th March 1894 and 29th August 1894, and the addendum slip dated the 9th March 1894.

Despatch to the Secretary of State for India, No. 34 Railway, dated the 16th March 1892.

Despatch from the Secretary of State for India, No. 121 Railway, dated the 22nd December 1892, and its enclosure.

Despatch to the Secretary of State for India, No. 22 Railway, dated the 11th April 1894.

Despatch from the Secretary of State for India, No. 55 Railway, dated the 19th July 1894, and its enclosure.

Read also—

Government of India letter No. 505-R.T., dated the 17th September 1894, to the Local Governments and Administrations and officers controlling railways, and the replies received thereto.

Letter from the Consulting Engineer to the Government of India for railways, Calcutta, No. 2242, dated the 27th September 1894, and its enclosure.

Government of India memorandum No. 630-R.T., dated the 6th November 1894, to the Local Governments and Administrations and officers controlling railways and its enclosures.

Government of India letter No. 705-R.T., dated the 10th December 1894, to the Consulting Engineer to the Government of India for railways, Calcutta.

Memorandum from the Consulting Engineer to the Government of India for railways, Calcutta, No. 3065, dated the 22nd December 1894, and its enclosure.

Government of India letter No. 1-R.T., dated the 2nd January 1895, to the Consulting Engineer to the Government of India for railways, Calcutta.

Memorandum from the Consulting Engineer to the Government of India for railways, Calcutta, No. 3074, dated the 22nd December 1894, and its enclosures.

OBSERVATIONS.—With circular No. 17 Railway, dated the 30th October 1891, the Government of India promulgated, for adoption on all state railways worked by Government and on the East Indian railway, schedules of rates and conditions for the carriage (i) of railway materials and stores, including coal, whether for state or other railways, and (ii) of coal for the general public. Further, in order to secure uniformity, it was requested that the administrations of all other railways might be moved to adopt the same rates and conditions.

2. Complete uniformity in the charges for this description of traffic was not, however, secured; and the matter continued to receive the attention of the Government of India in respect to the removal of the chief objections which were considered to exist. By the terms of the circular of October 1891 the rules became subject to revision at the end of 1894, and the opportunity has been taken to draw up, in consultation with the administration of the East Indian railway, schedules revised with a view to better serve the various interests involved.

RESOLUTION.—The Governor General in Council is accordingly pleased to rule, in supersession of all previous orders on the subject, that, until further orders, the charges and conditions embodied in the accompanying schedules, A, B and C, for the carriage respectively of (i) coal for the general public, (ii) coal for foreign lines, and (iii) foreign railway materials and stores (excluding coal), shall be adopted on all state railways which are directly administered by Government and on the East Indian railway.

2. These orders shall have effect in the case of railway materials and stores, including coal, from 1st January 1895, and in the case of coal carried for the general public from such date, not later than 1st July 1895, as may be notified by each railway.

3. In order to secure, on the several railways, uniformity in the charges for these services, the Governor General in Council desires that the administrations of the railways mentioned in the margin, over which the Secretary of State has reserved control in such matters, may be moved to accept the revised rates and conditions shown in the accompanying schedules in place of the rates which have previously been approved for this description of traffic under the provisions of the several contracts, and that the administrations of all other railways which are not specially referred to may likewise be moved to adopt the same.

South Indian.
Bombay, Baroda and Central India, including the Rajputana-Malwa.
Southern Mahratta, including the Mysore section.
Bengal Central.
Bengal and North-Western, including Tirhoot.
Lucknow-Bareilly section of the Rohilkund-Kumaon.
Bengal-Nagpur.
Indian Midland.
Assam-Bengal.

ORDER.—Ordered, that this resolution be communicated to the Local Governments and Administrations, and to the officers noted in the margin, for information and guidance; also to the Governments of the North-Western Provinces and Oudh, and the Punjab, the Chief Commissioner of the Central Provinces, the Agents to the Governor General for Central India and Baluchistan, and the Accountant General, Public Works Department, for information.

The Governments of Madras, Bombay and Bengal.
The Chief Commissioners of Burma and Assam.
The Resident at Hyderabad.
The Agent to the Governor General for Rajputana.
The Director General of Railways.
The Consulting Engineers to the Government of India for railways, Calcutta, Lucknow and Assam.

Ordered also, that this resolution, and its enclosures, be published in the Supplement to the *Gazette of India*, for general information.

W. S. S. BISSET, *Lieut.-Col., R.E.*,
Secretary to the Government of India.

SCHEDULE A to the Government of India circular No. 8 Railway, dated the 4th May 1895.

Rates and conditions for the carriage of coal for the general public.

1. The following will be the scale of charges for the carriage of coal, including coke and patent fuel, and shall be applicable alike to local and through traffic, for the general public:

(*a*) *Consignments of less than a wagon load*—

These consignments will be charged for as a full wagon load at the rates shown below, unless the coal is bagged, in which case it will be charged at ½ pie per maund mile on actual weight, subject to the differential rule, and carried at owner's risk.

(*b*) *Consignments in full wagon loads*—

	Per maund per mile.
For all distances up to 400 miles inclusive . . .	0·15 pie.
For distances above 400 miles—	
For the first 400 miles	0·15 „
For the distance in excess of 400 miles . . .	0·10 „

The charge under (*b*) shall be made on the full carrying capacity, for each class of coal, of the wagons employed.

(*c*) *Minimum distance for charge*—

The minimum distance which each individual railway shall be entitled to charge is 25 miles, no terminal being charged when a minimum distance charge is applied.

In calculating the distance for charge for through traffic the minimum distance to be taken for the despatching or for the receiving railways shall not be less than 25 miles unless a shorter minimum distance for charge shall have been adopted by any of the railways concerned, in which case the minimum adopted by that railway shall be taken. The charge shall be calculated on the through distance so arrived at and shall be divided between the railways concerned in the proportion of the actual mileage of each railway when that mileage is not less than the minimum mileage adopted on that railway. Should the actual mileage be less than the minimum mileage adopted by any railway, the minimum mileage adopted by that railway is to be taken in division. Only two minimum distance charges, those of the despatching and receiving railways, shall, however, be included in calculating any through rate.

(*d*) *Rebate on aggregate of consignments carried a less distance than 500 miles*—

At the end of any calendar half-year, a consignee, whose aggregate consignments to one station or *viâ* one junction during the half-year shall have exceeded 50,000 maunds, may claim a refund in respect of the payments made in accordance with the following scale. (For the purposes of these rebates all Calcutta stations to be regarded as one with Howrah)—

On quantities in excess of—

Mds.	Mds.	Rebate.
50,000 up to	200,000 . . .	2½ per cent.
200,000 „	400,000 . . .	5 „
400,000 „	600,000 . . .	7½ „
600,000 „	800,000 . . .	10 „
800,000 „	... . . .	15 „

The rebate under this scale will be limited to 10 per cent. of the total quantity carried.

(*e*) *Rebate on exported coal*—

An additional rebate to that granted under clause (*d*) and calculated on the same scale will be allowed on the whole quantity of coal exported by one consignee by sea from Howrah or Calcutta as shown by the bills of lading, but not including bunker coal. This additional rebate will be limited to 10 per cent. of the total quantity exported.

Thus, the maximum rebate claimable on exported coal will be 10 per cent. in accordance with clause (*d*) and 10 per cent. in accordance with this clause, or 20 per cent. altogether.

(*f*) *Rebate on aggregate of consignments carried 500 miles and more over the home line*—

At the end of any calendar half-year a consignee, whose aggregate consignments to one station or *viâ* one junction during the half-year shall have exceeded 50,000 maunds, may claim a refund in respect of the payments made in accordance with the following scale:

On quantities in excess of—

Mds.	Mds.	Rebate.
50,000 up to	200,000 . . .	2½ per cent.
200,000 „	400,000 . . .	5 „
400,000 „	600,000 . . .	7½ „
600,000 „	... . . .	25 „

The rebate under this scale will be limited to 15 per cent. of the total quantity of coal carried.

(*g*) *Claim for rebate*—

Any rebate not claimed within two months of the expiry of the calendar half-year in which it accrued will be subject to a discount in accordance with the following scale:—

If claimed after two months, but—

within three months	5 per cent.
„ four „	10 „
„ five „	15 „
„ six „	20 „

No rebate will be paid unless claimed within six months after the expiry of the calendar half-year in which it accrued.

2. Consignments of coal destined for *or viâ* stations on any foreign railway which is in immediate connection with the despatching railway shall be booked *viâ* such junction between the despatching railway and the said foreign railway as the consignor shall elect. Railways between which there is a transfer of goods shall be deemed to be in immediate connection.

3. The charge under paragraph 1 (*a*) and (*b*) shall be calculated in all cases on the shortest route, and shall be divided among the carrying railways adopting this schedule in proportion to the mileage passed over each: provided that when the consignment is not carried by the shortest route, the mileage rate to be credited in division to the railways carrying the traffic for the actual distance they carry the consignment shall not, for such railways as form part of such portion of the shortest route as may not have been followed and are not consenting parties to the adoption of the route followed, be less than the mileage rate to which they would have been entitled if the consignment had been carried by the shortest route.

Railways that do not form part of the portion of the shortest route not followed shall only receive in division a proportion of the charge by the shortest route in accordance with their mileage by the route followed.

4. When traffic is booked over railways whose administrations have not adopted this schedule, the through rates with such railways shall be the sum of the local rates, the local rates of the railways parties to this arrangement being the charges according to this tariff to or from the junction stations of the railway or railways which have not accepted this schedule.

5. All charges for loading and unloading coal into and from railway wagons, as well as those for transhipment at ferries, or otherwise, shall be at the entire cost of the consignors and consignees, and will be in addition to the rates herein prescribed.

The loading, unloading and transhipment charges shall belong to the railway doing the work, or if at a joint station shall be credited to the joint account.

6. When additional charges at ferries or elsewhere are reckoned at a rate on an additional mileage, such mileage shall not be taken into account in calculating distances under this tariff, nor in the division of the tariff charges, and all ferry charges, whether calculated at a rate on an additional mileage or otherwise, shall belong to the railway working the ferry.

7. Subsidiary rules, not at variance with the foregoing rules, may be made in the usual manner, and the customary power of making special arrangements for special consignments may be reserved.

8. In the interpretation of these rules, all railways worked by the Undertaking of the East Indian railway are to be considered parts of that line, excepting the portion of the Delhi-Umballa-Kalka railway between Umballa Cantonment and Kalka stations, for carriage over which an additional charge may be made, subject to the approval of the Government of India.

SCHEDULE B to the Government of India circular No. 8 Railway, dated the 4th May 1895.

Rates and conditions for the carriage of coal for foreign railways.

COAL, COKE, AND PATENT FUEL.

1. The following will be the scale of charges for the carriage of coal, coke and patent fuel, whether consigned for construction, working, or maintenance :

(*a*) *Consignments of less than a wagon load*—

These consignments will be charged for as a full wagon load at the rate shown below, unless the coal is bagged, in which case it will be charged at ⅓ pie per maund mile on actual weight, subject to the differential rule, and carried at owner's risk.

(*b*) *Consignments in full wagon loads*—

	Per maund per mile.
For all distances up to 400 miles inclusive	0·15 pie.
For distances above 400 miles—	
For the first 400 miles	0·15 ,,
For the distance in excess of 400 miles . . .	0·10 ,,

The charge under (*b*) shall be made on the full carrying capacity, for each class of coal, of the wagons employed.

(*c*) *Minimum distance for charge*—

The minimum distance which each individual railway shall be entitled to charge is 25 miles, no terminal being charged when a minimum distance charge is applied.

In calculating the distance for charge for through traffic the minimum distance to be taken for the despatching or for the receiving railways shall not be less than 25 miles unless a shorter minimum distance for charge shall have been adopted by any of the railways concerned, in which case the minimum adopted by that railway shall be taken. The charge shall be calculated on the through distance so arrived at and shall be divided between the railways concerned in the proportion of the actual mileage of each railway when that mileage is not less than the minimum mileage adopted on that railway. Should the actual mileage be less than the minimum mileage adopted by any railway, the minimum mileage adopted by that railway is to be taken in division. Only two minimum distance charges, those of the despatching and receiving railways, shall, however, be included in calculating any through rate.

(*d*) *Rebate on aggregate of consignments carried a less distance than 500 miles.*—

At the end of any calendar half-year, a railway administration whose aggregate consignments during the half-year shall have exceeded 50,000 maunds may claim in respect of the payments made a refund in accordance with the following scale. (For the purposes of these rebates all Calcutta stations to be regarded as one with Howrah)—

On quantities in excess of—

Mds.		Mds.	Rebate.
50,000	up to	200,000 . . .	2½ per cent.
200,000	,,	400,000 . . .	5 ,,
400,000	,,	600,000 . . .	7½ ,,
600,000	,,	800,000 . . .	10 ,,
800,000	,,	. . . . .	15 ,,

The rebate under this scale will be limited to 10 per cent. of the total quantity carried.

(*e*) *Rebate on exported coal*—

An additional rebate to that granted under clause (*d*) and calculated on the same scale will be allowed on the whole quantity of coal exported by one consignee by sea from Howrah or Calcutta as shown by the bills of lading, but not including bunker coal. This additional rebate will be limited to 10 per cent. of the total quantity exported.

Thus the maximum rebate claimable on exported coal will be 10 per cent. in accordance with clause (*d*) and 10 per cent. in accordance with this clause or 20 per cent. altogether.

(*f*) *Rebate on aggregate consignments carried 500 miles and more over the home line*—

At the end of any calendar half-year, a railway administration, whose aggregate consignments during the half-year shall have exceeded 50,000 maunds and each has been carried a distance 500 miles or more over the home line, may claim in respect of the payments made a refund in accordance with the following scale :

On quantities in excess of—

Mds.		Mds.	Rebate.
50,000	up to	200,000	2½ per cent.
200,000	,,	400,000	5 ,,
400,000	,,	600,000	7½ ,,
600,000		... .	25 ,,

The rebate under this scale will be limited to 15 per cent. of the total quantity of coal carried.

(*g*) *Claim for rebate*—

Any rebate not claimed within two months of the expiry of the calendar half-year in which it accrued will be subject to a discount in accordance with the following scale :—

If claimed after two months, but—

within three months	5 per cent.
,, four ,, ...	10 ,,
,, five ,, ...	15 ,,
,, six ,, ...	20 ,,

No rebate will be paid unless claimed within six months after the expiry of the calendar half-year in which it accrued.

2. Consignments of coal destined for a railway in immediate connection with the despatching railway shall be booked to such junction between the said railway and the despatching railway as the former railway may elect at the charge (under this tariff) by the shortest route to that junction. Railways between which there is a transfer of goods shall be deemed to be in immediate connection.

3. (i) Coal for use on a foreign railway which is not in immediate connection with the despatching railway shall be booked over the despatching and intervening railways to such junction with the said foreign railway as that railway may elect, at the through mileage rate to such junction.

(ii) The charge under paragraph 1 (*a*) and (*b*) shall be calculated in all cases on the shortest route, and shall be divided among the carrying railways adopting this schedule in proportion to the mileage passed over each: provided that when the consignment is not carried by the shortest route the mileage rate to be credited in division to the railways carrying the traffic for the actual distance they carry the consignment shall not, for such railways as form part of such portion of the shortest route as may not have been followed and are not consenting parties to the adoption of the route followed, be less than the mileage rate to which they would have been entitled if the consignment had been carried by the shortest route.

Railways that do not form part of the portion of the shortest route not followed shall only receive in division a proportion of the charge by the shortest route in accordance with their mileage by the route followed.

4. When traffic is booked over railways whose administrations have not adopted this schedule the through rates with such railways shall be the sum of the local rates, the local rates of the railways parties to this arrangement being the charges according to this tariff to or from the junction stations of the railway or railways which have not accepted this schedule.

5. All charges for loading and unloading coal into and from railway wagons, as well as those for transhipment at ferries, or otherwise, shall be at the entire cost of the consignors and consignees, and will be in addition to the rates herein prescribed.

The loading, unloading and transhipment charges shall belong to the railway doing the work, or if at a joint station shall be credited to the joint account except in the case of coal consigned to any of the railways forming the junction, in which case such charges are debitable to that railway.

6. When additional charges at ferries, or elsewhere, are reckoned at a rate on an additional mileage, such mileage shall not be taken into account in calculating distances under the tariff, nor in the division of the tariff charges. And all ferry charges, whether calculated at a rate on an additional mileage or otherwise, shall belong to the railway working the ferry.

7. Subsidiary rules, not at variance with the foregoing rules, may be made in the usual manner, and the customary power of making special arrangements for special consignments may be reserved.

8. In the interpretation of these rules all railways worked by the Undertaking of the East Indian railway are to be considered parts of that line, excepting the portion of the Delhi-Umballa-Kalka railway between Umballa Cantonment and Kalka stations, for carriage over which an additional charge may be made, subject to the approval of the Government of India.

SCHEDULE C to the Government of India circular No. 8 Railway, dated the 4th May 1895.

Rates and conditions for the carriage of foreign railway materials and stores (excluding coal).

RAILWAY MATERIALS AND STORES (EXCLUDING COAL).

1. The following will be the scale of charges for the carriage of railway materials and stores, whether consigned for construction, working, or maintenance:

(*a*) *For consignments of less than 300 maunds, subject to the differential rule*—

	Per maund per mile.
For all distances up to 400 miles inclusive . .	0·1725 pie.
For distances above 400 miles—	
For the first 400 miles	0·1725 ,,
For the distance in excess of 400 miles . .	0·115 ,,

(*b*) *For consignments of 300 maunds and over*—

	Per maund per mile.
For all distances up to 400 miles inclusive . .	0·15 pie.
For distances above 400 miles—	
For the first 400 miles	0·15 ,,
For the distance in excess of 400 miles . .	0·10 ,,

2. Railway materials and stores for use on a foreign railway which is in immediate connection with the despatching railway shall be booked over the despatching railway to such junction between the said foreign railway and the despatching railway as the former railway may elect, at the charge (under this tariff) by the shortest route to that junction. Railways between which there is a transfer of goods shall be deemed to be in immediate connection.

3. (i) Railway materials and stores for use on a foreign railway which is not in immediate connection with the despatching railway shall be booked over the despatching and intervening railways to such junction with the said foreign railway as that railway may elect, at the through mileage rate to such junction.

(ii) The charge under paragraph 1 (*a*) and (*b*) shall be calculated in all cases on the shortest route, and shall be divided among the carrying railways adopting this schedule in proportion to the mileage passed over each: provided that when the consignment is not carried by the shortest route, the mileage rate to be credited in division to the railways carrying the traffic for the actual distance they carry the consignment shall not, for such railways as form part of such portion of the shortest route as may not have been followed and are not consenting parties to the adoption of the route followed, be less than the mileage rate to which they would have been entitled if the consignment had been carried by the shortest route.

Railways that do not form part of the portion of the shortest route not followed shall only receive in division a proportion of the charge by the shortest route in accordance with their mileage by the route followed.

4. When traffic is booked over railways whose administrations have not adopted this schedule, the through rates with such railways shall be the sum of the local rates, the local rates of the railways parties to this arrangement being the charges according to this tariff to or from the junction stations of the railway or railways which have not accepted this schedule.

5. All dangerous goods, specie and bullion are charged at tariff rates, subject to the ordinary regulations as to minimum, etc.

6. (i) Any articles which, owing to length, breadth, or any other cause, require to be loaded separately in one or more vehicles for their conveyance, and do not admit of such vehicle or vehicles being loaded to the full marked carrying capacity, shall be charged for on actual weight at the rates prescribed in paragraph 1 (*a*) or 1 (*b*), as the case may be, subject to a minimum weight of 200 maunds in respect of each vehicle employed, such minimum being charged for on the scale for consignments under 300 maunds, provided that the charge made shall not exceed the charge as for a consignment of 300 maunds at the rates prescribed in paragraph 1 (*b*).

(ii) Girders, rails, long timber and other material requiring the protective use of dummy wagons shall be charged at the rates prescribed in paragraph 1 (*a*) or 1 (*b*), as the case may be, calculated as under—

For each vehicle under load—

Actual weight of load, subject to a minimum of 200 maunds, such minimum being charged for on the scale for consignments under 300 maunds: provided that the charge made shall not exceed the charge as for a consignment of 300 maunds at the rates prescribed in paragraph 1 (*b*).

For each dummy wagon—

A fixed minimum charge for each vehicle employed as for 200 maunds, based upon the scale for consignments over 300 maunds.

(iii) *For rolling stock the following scale of charges will apply:*

Locomotives complete, or engines and tenders separately, when running on their own wheels—12 annas per mile each.

Locomotives complete when loaded on other vehicles—1 anna per mile per wheel of the vehicle used.

Vehicles of all descriptions running on their own wheels—3 annas per mile per vehicle.

Vehicles of all descriptions when loaded on other vehicles—1 anna per mile per wheel of the vehicle used.

7. All consignments shall, unless otherwise specially agreed to, be subject to the same conditions as may be applicable to public traffic in respect of demurrage, loading and unloading, etc., provided that, when loading or unloading is done by the railway, the charge shall be 3 pies per maund for each operation.

8. In all cases where loading is performed by senders, or their agents, and not by the Traffic Department of the forwarding railway, the following scale of charges shall apply:

(*a*) Full wagon loads* . .	These will be charged for on actual weight at the rates prescribed in paragraph 1 (*b*).
(*b*) Consignments of less than full wagon loads.*	These will be charged for in accordance with paragraph 6 (i).
(*c*) The balance of a consignment over full wagon loads.	
(*d*) Articles falling under paragraph 6 (i).	
(*e*) Articles falling under paragraph 6 (ii)	These will be charged for in accordance with paragraph 6 (ii).

9. All charges for loading and unloading into and from railway wagons as well as those for transhipment at ferries, or otherwise, shall be at the entire cost of the consignors and consignees, and will be in addition to the rates herein prescribed.

The loading, unloading and transhipment charges shall belong to the railway doing the work, or if at a joint station, shall be credited to the joint accounts, except in the case of railway materials and stores consigned to any of the railways forming the junction, in which case such charges are debitable to that railway.

10. When additional charges at ferries or elsewhere are reckoned at a rate on an additional mileage, such mileage shall not be taken into account in calculating distances under the tariff, nor in the division of the tariff charges, and all ferry charges, whether calculated at a rate on an additional mileage or otherwise, shall belong to the railway working the ferry.

11. Subsidiary rules, not in variance with the foregoing rules, may be made in the usual manner, and the customary power of making special arrangements for special consignments is reserved.

12. In the interpretation of these rules, all railways worked by the Undertaking of the East Indian railway are to be considered parts of that line, excepting the portion of the Delhi-Umballa-Kalka railway between Umballa Cantonment and Kalka stations, for carriage over which double charges may be made.

---

* Full wagon loads are defined to be loads of not less than within half a ton of the marked carrying capacity of the vehicles used.

* Figures for 1894-95 are not yet available.
(*a*) Includes the Bhopal-Itársi railway.
(*b*) Includes the Godhra-Rutlam railway.
(*c*) Total earnings from 2nd April to 5th May 1894.
(*d*) Includes the Guntakal-Mysore frontier section.
(*e*) Includes the Tirhoot state railway. Although for convenience classed amongst state railways, the company's section of this line is the property of the Bengal and North-Western Railway Company.
(*f*) Includes the Jammu and Kashmir and the Hyderabad-Umarkot railways.
(*g*) Although for convenience classed amongst state railways, this line is the property of the Bengal Central Railway Company.
(*h*) Includes the Wardha Coal, Dhond-Manmád, Khámgaon, and Amráoti railways.
(*i*) Includes the Mysore-Najangúd and the Yesvantpur-Mysore frontier sections.

F. B. HEBBERT,
Under Secretary.

SIMLA, *the 16th May 1895.*

Printed and published for the GOVERNMENT OF INDIA *at the* GOVERNMENT CENTRAL PRINTING OFFICE, *Simla.*

SUPPLEMENT TO

The Gazette of India.

No. 21.} CALCUTTA, SATURDAY, MAY 25, 1895.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the Week ending at 8 a.m. on Saturday, May 18th, 1895.

Two points about the pressure distribution of the past week are remarkable. In the first place, the relative distribution showed hardly any important change during the week. Pressure, notwithstanding large barometric changes from day to day, remained throughout the week steadily low (1) over the Punjab and the western desert, (2) over the Lower Gangetic plain and Chota Nagpur, and high over the west of the Peninsula and the south of the Bay. While the areas of high and of low pressures maintained the above positions steadily throughout the week, the relation of the two areas changed considerably between the beginning and end of the week; thus on the 12th the barometric difference between Bombay and Bickaneer was 0·225 inch, on the 16th the difference between the same two stations was 0·265 inch, and on the 18th was 0·310 inch, so that the observations showed a steady increase in the amount of the pressure differences over India as the week progressed. This was accompanied with a steady rise in the wind force, so that by the close of the week a very strong westerly and north-westerly wind was blowing over nearly the whole of India. This increase in the extent and force of the dry westerly current was accompanied with a retreat of the moist southerly and south-easterly current from the Bay, so that while, at the commencement of the week, showers were reported in Northern India, as far west as Kashmir, and in the Peninsula from several western and central stations, by the close of the week rain was practically confined to Burma and North Bengal. The mean temperature throughout nearly the whole week and throughout nearly the whole country was in excess of the normal, but in Madras on some days and in Burma on all days the weather was cooler than usual.

Daily Summary.—*Sunday.*—Pressure was highest in the extreme south and low over the Punjab and the Central Provinces. The wind was westerly over Western India and the Peninsula, southerly over the Bay and Bengal, easterly up the Gangetic plain, and variable in Burma. The force was strong at many places. Scattered rainfall had occurred over Burma, the Peninsula, and Northern India. The mean temperature was largely above the normal, except in Burma and Madras.

Monday.—Pressure was changing irregularly, and was very unsteady in different parts of the country. Thus, on the Madras coast and in the north-west of the Punjab, pressure had risen briskly, while at neighbouring stations there had been a brisk decrease. Pressure remained highest in the extreme south, and low over the western desert and the Central Provinces. The winds were on the whole lighter than on the preceding day, and less regular in direction. The mean temperature remained excessive, except in Burma and Madras, and scattered showers had again fallen over several parts of the country.

Tuesday.—Pressure was decreasing almost everywhere, the fall being very large on the Madras coast. The general distribution of pressure had, however, changed very little, pressure remaining high in the west and south, and low over the western desert and over Chota Nagpur. Calms prevailed over North-Western India, southerly winds over North-Eastern India, and westerly winds elsewhere. Dust and thunder showers had given rain to several places in Northern India, in Burma, and in the south of the Peninsula.

Wednesday.—Pressure had commenced a recovery, but the changes were not large enough to materially affect the distribution of pressure. The winds were the same as were reported on the preceding day. Showers of rain had

again occurred over parts of Burma, Bengal, and the Peninsula. The mean temperature was about normal over the Peninsula, and excessive elsewhere—more particularly in the Punjab.

Thursday.—The recovery of pressure which had commenced on the preceding day was maintained slowly, but there was no other change. The winds had shifted to north along the west coast of the Peninsula, but in other respects the wind circulation was unaltered. A little rain had fallen in Burma, East Bengal, Assam, Malabar, and Rajputana. The mean temperature remained generally excessive, the greatest excess being in the Punjab.

Friday.—Pressure had begun to fall again, more particularly in the north, and gradients were becoming steeper. The general distribution of pressure and the general circulation of the winds were unchanged. The force of the wind was very strong over Western India. The mean temperature was normal to excessive. Rain had fallen generally over Burma, and as showers over Assam, North Bengal, and the south of the Peninsula.

Saturday.—Pressure had continued to fall over Northern India, while it had been steady in the south, hence pressure differences were increasing, and gradients were very steep for the time of year. The winds were strong over the greater part of the country, but were moderate in the north-east. Rain had again fallen generally, and rather heavily over Burma. The mean temperature was normal or excessive, except in Burma, where the rainfall kept the weather cool.

Temperature.—Perhaps the most marked feature of the weather of the past week has been the excessive temperature which has prevailed almost everywhere. It will be remembered that temperature began a general rise last week on the 7th. The temperature curve steadily ascended until the 11th, on which day the crest was reached, so that throughout the present week, though the mean temperature has been excessive, the curve has exhibited a steady descent. The following table shows the variation of the mean temperature from the normal in the different provinces of India for each day of the week :

Province.	May 1895.							Mean variation of week.
	12th	13th	14th	15th	16th	17th	18th	
	°	°	°	°	°	°	°	°
Burma	−1·7	−1·5	−0·1	−0·4	−0·9	−1·2	−1·6	−1·1
Bengal and Assam	+1·9	+1·6	+1·9	+1·7	+1·7	+2·0	+2·3	+2·0
North-Western Provinces and Oudh	+3·7	+3·3	+0·6	+2·0	+2·3	+3·7	+3·7	+2·8
Punjab	+8·5	+7·7	+4·4	+5·2	+6·0	+5·5	+6·3	+6·2
Bombay	+2·9	+1·0	+0·5	+1·0	+0·5	+0·1	−0·6	+0·7
Central Provinces and Berar	+4·3	+2·0	+1·6	+1·8	+0·7	+1·4	+0·8	+1·8
Central India and Gujarat	+5·4	+3·9	+3·3	+1·6	+0·2	+0·1	−0·6	+2·0
Sind and Rajputana	+6·1	+5·2	+4·0	+3·2	+2·6	+0·6	−0·4	+3·0
Madras	−0·5	−2·6	−2·7	+0·4	−0·5	+1·2	+2·3	−0·3
Mean for whole of India	+3·4	+2·3	+1·9	+1·8	+1·4	+1·5	+1·4	+1·9

The concluding line of figures shows that the mean temperature of the whole country has been excessive on all days, the amount of the excess decreasing from 3·4° on the 12th to 1·4° on the 18th. The provincial variations show that the weather had been steadily cool in Burma, and that temperature had been unsteady in Madras. In the case of both of these two provinces the mean temperature of the week was below the average. In all the other provinces the mean temperature was excessive, the abnormal excess ranging from only 0·7° in Bombay to 6·2° in the Punjab.

The day temperatures like the mean temperatures exhibited a decrease as compared with last week.

The highest maxima reported on each day were—

On May	12th	118·4°	at	Sirsa.
„	13th	117·4°	„	„
„	14th	115·5°	„	Multan.
„	15th	114·7°	„	Jacobabad.
„	16th	113·4°	„	Sirsa.
„	17th	113·4°	„	Montgomery.
„	18th	115·1°	„	Jacobabad.

The above shows that the maxima steadily decreased until the 16th, after which the day temperature began to rise again.

Rain.—The rainfall of the past week, though light, has been very widely distributed; only in seven divisions, *viz.*, the North-Western Provinces (West), the Punjab (Central), Khandesh, Gujarat, Kathiawar, and Rajputana (East and West), is there absolutely no rain reported, though in thirteen other divisions, *viz.*, Oudh (South), the North-Western Provinces (Central), the Punjab (South, North-West, and West), the Konkan, Berar, the Central Provinces (West, Central, and East), Sind, Central India (East), and Hyderabad (South), the total rainfall of the week was less than one-tenth of an inch. In all the remaining divisions effective rainfall has been received. The heaviest average actual fall reported is 9·30 inches in Tenasserim, which is followed by 4·02 inches in North Bengal, by 2·66 inches in Lower Burma, and by 2·00 inches in Assam (Surma). The smallest effective falls are 0·10 inch in the Bombay Deccan, 0·13 inch in the submontane district of the Punjab, and 0·14 inch in Bihar, South. As mentioned above the fall, though general, was far from heavy in most places. In Tenasserim there was an excess of 3·90 inches, in North Bengal of 2·23 inches, in the North-Western Provinces (East) of 0·07 inch, in the North-Western Provinces (Submontane) of 0·14 inch, in Oudh (North) of 0·37 inch, in Mysore of 0·06 inch, in Sind of 0·02 inch, in the East Coast (North) of 0·05 inch, in the East Coast (Central) of 0·68 inch, and in the East Coast (South) of 0·12 inch. In all the remaining divisions the average actual fall was less than the average normal fall, the deficiency equalling over 3 inches in Assam (Surma), and over 1 inch in Arakan, East Bengal, Assam (Brahmaputra), and Malabar.

The columns giving the average actual and average normal rainfall for the period, March 3rd to May 18th, show that the seasonal rainfall has been in excess over Tenasserim, Chota Nagpur, the North-Western Provinces (East and Submontane), Oudh (North), the Punjab (West), Mysore, Berar, the Central Provinces (West and Central), Sind, Central India (East), the East Coast (North), Madras (Central), the East Coast (Central), and Madras (South). In all the other divisions the seasonal rainfall was normal or deficient. The most serious cases of deficiency were Khandesh, Gujarat, and Kathiawar.

The following heavy total falls of rain during the week are reported : Thaton (Amherst) 10·75 inches, Kyauktan (Pegu) 6·13 inches, Kyaiktu (Shwegyin) 5·76 inches, Pallick (Kyaukse) 5·80 inches, Patnakhally (Backergunj) 3·22 inches, Sunamgunj (Sylhet) 6·71 inches, Dhubri 4·53 inches; Matabhanga (Cooch Behar) 7·33 inches, Falakota (Jalpaiguri) 10·15 inches, Kishangunj (Purnea) 3·39 inches, Harria (Basti) 4·14 inches, Calicut 2·66 inches, Vaniyambadi (Salem) 2·53 inches, Gudibanda (Kolar) 2·60 inches, Udayagiri (Ganjam) 3·40 inches, Cuddapah 3·61 inches, Bezwada (Kistna) 5·15 inches, Vallam (Tanjore) 3·90 inches.

W. L. DALLAS,
Asst. Meteorological Reporter to the Government of India.

SIMLA, *24th May 1895.*

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 18th May.*—Rainfall good and seasonable in the Circars and Central districts; moderate elsewhere, except in Bellary. Cultivation is proceeding where there has been rain. The standing crops are generally fair or good. Pasture is scarce, but fodder is sufficient, and cattle are in good condition. Prices are steady, or very slightly easier.

Bombay.—*For week ending 22nd May.*—Slight rain in parts of seven districts of the Presidency, but more rain is urgently required in parts of Dharwar. The standing crops are good. The harvested crops have been damaged in one taluka of Hyderabad by rain. Reaping of the late crops continues in parts of Baroda territory. Preparations for next season are general. Sowing is progressing in one taluka of Kanara. Cotton-picking continues in parts of Gujarat. The fodder-supply is sufficient, and agricultural stock in good condition. Prices are normal, except in parts of two districts.

Bengal.—*For week ending 20th May.*—There was general rain in North Bengal, and elsewhere local showers are reported. The ploughing of the land and the sowing of the autumn crops are in progress, but more and general rain is required, especially in the Central districts of the Province. Early rice and jute are still being sown. Indigo, sugarcane, and other standing crops are doing well. The price of common rice continues almost stationary.

North-Western Provinces and Oudh.—*For week ending 22nd May.*—Weather extremely hot. Showers have fallen in several districts. Threshing and winnowing of spring crops finished in places, and approaching completion elsewhere. Outturn reported below average in Farukhabad, fair in Cawnpore, and excellent in Meerut. Markets well supplied. Fodder continues insufficient in Fyzabad. Prices rising in Meerut and Farukhabad, but are generally stationary elsewhere.

Punjab.—*For week ending 22nd May.*—Rain has fallen in parts of the Umballa, Jullundur, Amritsar, and Shahpur districts. Harvesting of the spring crops is going on. Ploughing for the autumn crops is in progress. Sugarcane and cotton are being weeded. The condition of the standing crops is generally reported good to average. Locusts have appeared in parts of Multan and Dera Ismail Khan. No damage is reported from the former district, but the eggs are said to have been laid in the latter. The necessary steps are being taken for their destruction. Cattle are generally in good condition, and fodder is sufficient in all districts, except in parts of Dera Ismail Khan. Prices are rising in Peshawar, continue normal in Umballa, and are low elsewhere.

Central Provinces.—*For week ending 22nd May.*—Weather continues hot, and is occasionally cloudy with light storms. In Seoni the preparation of land for autumn sowings is being carried on. Threshing of winter crops nearly completed. Prices stationary. Imports into Damoh continue.

Burma.—*For week ending 18th May.*—In Upper Burma the reaping of dry-weather paddy is still in progress in some districts. Ploughing for the wet-weather paddy has commenced in Sagaing and Meiktila. In Thayetmyo cultivation of the early wet-weather paddy and maize has commenced. The

prospects of the standing crops are generally good, but the early wet-weather paddy in Mingin and Upper Chindwin has been destroyed by floods. The price of paddy has risen slightly in five districts, and considerably in two others.

Assam.—*For week ending 21st May.*—Weather seasonable. Sowing of early rice continues. The condition of cattle is indifferent. Fodder and water are sufficient.

Mysore and Coorg.—*For week ending 22nd May.*—MYSORE: Rain in all districts, except in parts of Shimoga. The crops and prospects are good. Prices have fallen slightly in the Bangalore and Kadur districts.

COORG: Rainfall very slight. Ploughing of rice and *ragi* (*Eleusine coracana*) fields continues. Water and fodder for cattle are sufficient.

Berar and Hyderabad.—*For week ending 22nd May.*—BERAR: Weather hot. Breaking up of land for the ensuing crop is in progress. Fodder is sufficient. The water-supply is scarce in parts of the Chikhli taluka. Prices are almost steady.

HYDERABAD: Rainfall moderate. The water-supply is fast running short. Fodder is scarce in Aurangabad. The hot-weather crops are still being harvested in some districts. Prices are fluctuating.

Central India.—*For week ending 22nd May.*—Some rain fell in the districts of Gwalior. Agricultural operations are in progress in Goona, but have been completed elsewhere. The probable outturn for the whole of Central India will be fair. Cattle are in good condition, except in parts of Bhopal and Gwalior. Pasturage is good and sufficient in all districts. The price of food-grains is high in Bhopal and Goona, but is normal elsewhere.

Rajputana.—*For week ending 22nd May.*—Rainfall moderate in Tonk, showers in Marwar and Ulwar. Agricultural operations are satisfactory. The crops have been harvested. Land is being prepared for the autumn crops in parts. Crop prospects and agricultural stock are generally good. Fodder is failing in Dholepore, and is getting scarce in Kerowli, but is sufficient elsewhere. Prices have risen in four States and fallen in one, but are steady elsewhere.

Kashmir.—*For week ending 21st May.*—KASHMIR VALLEY: The rainfall has been moderate, but has done good to the standing spring crops. Sowings of rice and Indian-corn are still going on. Water for irrigation is ample. Prices continue normal.

JAMMU PROVINCE: *For week ending 22nd May.*—Slight showers have fallen during the week. Threshing of the crops is in progress. Cattle are in good condition. Prices are stationary.

Nepal.—*For week ending 18th May.*—Slight showers have fallen. The weather is warm. Prospects are good.

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

No. $\frac{16}{3-6}$.

Extract from the Proceedings of the Government of India in the Department of Revenue and Agriculture (Commercial Exhibitions),—dated the 24th May, 1895.

RESOLUTION.

The following is published for general information in continuation of the Resolution of the Department of Revenue and Agriculture, No. $\frac{7}{3-6}$, dated 7th March 1895.

Letter dated 18th April 1895, from the Secretary, London Exhibitions, Limited.

Messrs. French and Langdale of the India Tea Growers Association propose making a collective exhibit of specimen teas from the India tea gardens, pressed leaves, and other things of interest connected with the Indian tea industry. In view of this, my Directors consider that if you could see your way, in your official capacity, to issue a letter to the growers in the various tea districts intimating this fact, by this means not only would the knowledge be properly disseminated amongst the people interested, but also the circular emanating from yourself would have great weight. I am emboldened to ask you this as it is the wish of the Company to make the forthcoming Empire of India Exhibition a thoroughly representative one, particularly in that industry which has been so fruitful a source of revenue.

Any packages that may be sent should be distinctly labelled "For the Empire of India Exhibition" and should be addressed to Messrs. French and Langdale, Customs Chambers, 14, Dunstans Hill, London, E.

ORDER.—Ordered, that the foregoing letter be published in the Supplement to the *Gazette of India* and forwarded to Local Governments and Administrations noted on the margin for publication in the local Gazettes.

Secretary to the Government of—	Chief Commissioner of the—
Madras.	Central Provinces.
Bombay.	Burma.
Bengal.	Assam.
North-Western Provinces and Oudh.	Coorg.
Punjab.	Ajmere.
	Resident at Hyderabad.

[True Extract.]

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

* Figures for 1894-95 are not yet available.
(*a*) Includes the Bhopal-Itársi railway.
(*b*) Includes the Godhra-Rutlam railway.
(*c*) Total earnings from 2nd April to 12th May 1894.
(*d*) Includes the Guntakal-Mysore frontier section.
(*e*) Includes the Tirhoot state railway. Although for convenience classed amongst state railways, the company's section of this line is the property of the Bengal and North-Western Railway Company.
(*f*) Includes the Jammu and Kashmir and the Hyderabad-Umarkot railways.
(*g*) Although for convenience classed amongst state railways, this line is the property of the Bengal Central Railway Company.
(*h*) Includes the Wardha Coal, Dhond-Manmád, Khámgaon, and Amráoti railways.
(*i*) Includes the Mysore-Najangúd and the Yesvantpur-Mysore frontier sections.

F. B. HEBBERT,
Under Secretary.

SIMLA, *the 23rd May 1895.*

Printed and published for the GOVERNMENT OF INDIA *at the* GOVERNMENT CENTRAL PRINTING OFFICE, *Simla.*

SUPPLEMENT TO

The Gazette of India.

No. 22.} CALCUTTA, SATURDAY, JUNE 1, 1895.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

(*Statistical Branch*).

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the Week ending at 8 a.m. on Saturday, May 25th, 1895.

Like the preceding week, the week under review has been one of very little general change. Pressure has been steadily high over the west of the Peninsula and the south of the Bay, and steadily low over the Punjab and the Gangetic plain. As was the case last week, the barometric differences have been very large, the average daily difference between Ceylon and the North-Western Provinces being between 0·35 inch and 0·40 inch. Accompanying these large pressure differences were very strong winds, which blew from between north-west and west, and occasioned very hot dry weather throughout nearly the whole country. Burma, Assam, and Bengal were beyond the influence of these hot westerly winds, and during the whole week received southerly and south-south-easterly winds from the Bay, which gave heavyish rain to a large part of North-Eastern India. In consequence of these sea winds and of the resulting rainfall, the mean temperature of the Eastern Peninsula was steadily low, and in marked contrast to that prevailing in India. The warmest part of India was the north-west, where both on the hills and plains the mean temperature exceeded the normal average by about 10°.

Daily Summary.—*Sunday.*—Pressure had increased briskly over the north-west of the Punjab, and decreased briskly over Bengal and Assam. Elsewhere the changes were small. Strong westerly winds prevailed, except at the most eastern stations. The heat was excessive in Northern India and in Madras. Rain had been general, and rather heavy in Burma, while showers had occurred in North Bengal, Kashmir, and the Peninsula.

Monday.—Pressure had not changed much, and the general conditions were much the same as on the preceding day. Pressure remained highest over the west of the Peninsula and the south of the Bay, lowest in Bihar, and the differences were everywhere very large. The wind blew from directions between south-west and north-west, except on the west coast of the Peninsula, where the direction was more northerly, and in Burma and Bengal where it was southerly to south-easterly. The force was very generally strong. The mean temperature was high in North-Western India, low in Burma, and nearly normal elsewhere.

Tuesday.—Pressure had increased almost everywhere, but there had been a slight decrease along the foot of the North-Western Himalayas. In consequence of these changes the barometric differences were even larger than on Monday, and the baric gradient was between two and three times greater than usual. Readings were lowest at the foot of the Kumaun Himalayas, and highest in the south of the Bay. Northerly winds prevailed in the north of the Punjab and at some stations on the west coast, southerly to easterly winds in Burma, Assam, and Bengal, and generally westerly winds elsewhere. The force continued strong. Temperature had again risen, and, except in Burma and Bombay, was above the normal average.

Wednesday.—The chart showed no important change. Pressure remained lowest along the foot of the North-Western Himalayas, and highest in Malabar and the south of the Bay, and the pressure differences were large. The winds were equally unchanged, except that there was a tendency to the establishment of an easterly current along the foot of the Himalayas. Temperature had continued to rise, and was excessive when compared with the normal in every province of India, except Burma, where there was an average deficiency of 2·9°.

Thursday.—Pressure had increased over North-Eastern India, and decreased over North-Western India, but had been steady generally. Readings were

lowest in the Punjab, and an arm of relatively low pressure extended south-eastward from the Punjab over the south of the Gangetic plain. This modification of the distribution had occasioned an extension of the easterly wind up the Gangetic plain, but practically there was no other change. The mean temperature exhibited a further rise. In Burma the heat was exactly normal, and in every other province was excessive.

Friday.—The chart showed that a small but well-defined depression had been developed over the Central Punjab, and gradients had become somewhat less steep over the whole country, but in other respects conditions were practically unchanged. The mean temperature had fallen very slightly, but, except in Burma, it was still everywhere excessive when compared with the normal.

Saturday.—Pressure had been steady over the south of the Indian area, but had decreased briskly to rapidly in the north, so that gradients had again become very steep. The depression over the Punjab had advanced slowly eastward, and was approaching the Himalayas near Simla. The winds were cyclonic over the Punjab, easterly up the north side of the Gangetic plain, and southerly in Bengal, while elsewhere the direction was between south-west and north-west. A further trifling fall in the mean temperature was recorded, the principal fall being in Madras, Gujarat, and Central India.

Temperature.—At the close of last week the mean temperature curve exhibited a steady descent. This descent reached its lowest point on Sunday, the 19th, when the general excess of temperature for the whole of India was only 0·9°. With the 19th, a rise set in which continued until the 23rd, when the mean temperature was excessive over practically the whole of India. After the 23rd the temperature curve exhibited a very gradual descent. The present week has both absolutely and relatively been the hottest period of this season. The following table shows the variation of the mean temperature from the normal in the different provinces of India for each day of the week:

Province.	May 1895.							Mean variation of week.
	19th	20th	21st	22nd	23rd	24th	25th	
	°	°	°	°	°	°	°	°
Burma	−2·6	−3·8	−3·9	−2·9	0	−0·1	+0·2	−1·9
Bengal and Assam	+2·6	+4·0	+5·2	+4·5	+0·3	+0·5	−0·1	+2·4
North-Western Provinces and Oudh	+3·6	+2·9	+5·8	+7·0	+6·6	+4·4	+3·6	+4·8
Punjab	+4·4	+4·4	+6·5	+7·2	+9·6	+10·6	+10·4	+7·6
Bombay	−1·2	−1·0	−0·7	+0·1	+1·2	+0·7	+1·5	+0·1
Central Provinces and Berar	−0·4	−0·3	+0·9	+3·3	+4·4	+3·6	+3·6	+2·2
Central India and Gujarat	−0·8	−0·9	+0·8	+2·4	+3·0	+3·0	+1·7	+1·3
Sind and Rajputana	+0·5	+1·5	+2·9	+5·0	+6·1	+5·3	+5·9	+3·9
Madras	+2·3	+2·1	+3·2	+2·9	+3·2	+3·3	+1·4	+2·6
Mean for whole of India	+0·9	+1·0	+2·3	+3·3	+3·8	+3·5	+3·1	+2·6

The provincial variations show that the mean temperature was considerably below the normal in Burma during four days of the week, and about normal on the remaining three days. The province of Bombay showed similar conditions, though in a less decided manner, but with these two exceptions it may be taken that the mean temperature was excessive throughout the week. The final column of figures shows that the greatest excess was in the Punjab, where the variation for the whole week was +7·6°, and where on the 24th and 25th it was as much as 10·5°. The hottest day as mentioned above was the 23rd, when the mean temperature of Burma was normal, and that of all the other provinces excessive.

The highest maxima reported on each day were—

On May 19th	115·6°	at	Jacobabad.
„ 20th	113·2°	„	„
„ 21st	114·4°	„	Sirsa.
„ 22nd	120·5°	„	Jacobabad.
„ 23rd	122·0°	„	„
„ 24th	121·9°	„	Montgomery.
„ 25th	123·0°	„	Jacobabad.

The above shows that the hottest region within the Indian area during the week has been Upper Sind and the south of the Punjab, and that within that region the heat has been excessive.

Rainfall.—The rainfall returns show that the fall has been less general than in the two preceding weeks. The only moist current of air prevailing during the week has been the southerly and south-south-easterly current, which has blown strongly and steadily over Burma, Bengal, and Assam. In all the remaining provinces dry hot westerly (north-west and south-west) winds have prevailed, and at the outside have yielded a few drops of rain during dust or thunder storms. In consequence of these conditions no less than thirteen of the rainfall divisions report absolutely no rain at all during the week, while nineteen more had a total average fall for the whole week of less than one-tenth of an inch. These returns show a much lighter and more scattered general rainfall than was the case last week. The regions which received absolutely or practically no rain included the following divisions: both the Bihar divisions, all the North-Western Provinces and Oudh divisions, all the Punjab divisions, Malabar, Coorg, the Konkan, Khandesh, the Central Provinces (West and Central divisions), Gujarat, Kathiawar, Sind, Central India, Rajputana, the East Coast (Central and South divisions), and Madras (South and South Central divisions). In all other parts of the country effective, and in places heavy rainfall has been received during the week. The heaviest average actual fall reported was 6·98 inches, which was considerably lighter than the heaviest average reported last week. This amount was followed by 4·55 inches in Arakan and by 4·42 inches in East Bengal. The smallest effective falls reported were 0·14 inch in Hyderabad (South) and 0·18 inch in the Central Provinces (East).

The third column of the table gives the excess or defect in inches of the average actual as compared with the average normal rainfall, and from this column it will be seen that the rainfall of the week has been abnormally light. In East Bengal there has been a considerable excess, in Central Burma, Assam (Brahmaputra), and Deltaic Bengal there has been a moderate excess, and in Tenasserim, Central Bengal, and Berar a slight excess. In all other parts of the country the rainfall was deficient. This deficiency was large in Malabar, Madras (South Central), and Coorg, as well as in Arakan, and in both cases the lightness of the rainfall was attributable to the absence of those temporary advances of the monsoon, which in ordinary years give spasmodic but heavyish rainfall to the southern and south-western coasts of the Indian and of the Burma Peninsula.

The three last columns of the table giving the average actual and average normal rainfall from March 3rd to May 25th show a fairly general deficiency in the state of the seasonal rainfall. In Tenasserim, Chota Nagpur, the North-Western Provinces (East and Submontane), the Punjab (West), Mysore, Berar, the Central Provinces (West and Central), Sind, the East Coast (North), Madras (Central), and the East Coast (Central) the total of the seasonal rainfall has been in excess of the normal, but, except in these few divisions, the rainfall has at best been only normal and at worst, as in Sind, Gujarat, and Khandesh has been almost or entirely wanting.

The following heavy total falls of rain during the week are reported: Thaton (Amherst) 7·72 inches, Maubin 6·10 inches, Minhla 6·21 inches, Minbu 6·40 inches, Rathedaung (Akyab) 6·34 inches, Fenny (Noakhally) 9·26 inches, Dibrugarh 7·37 inches, Goalundo 6·67 inches, Debigunj (Jalpaiguri) 5·82 inches, Kibbanahalli (Tumkur) 3·14 inches, Heddagalli (Bellary) 2·22 inches.

W. L. DALLAS,
Asst. Meteorological Reporter to the Government of India.

SIMLA, *30th May 1895.*

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 25th May.*—Rainfall moderate in Bellary; light showers in a few other districts. Cultivation is proceeding in places favoured by rain. The standing crops are generally fair or good. Pasture is scarce but fodder is sufficient, and cattle are generally in good condition. Prices are generally steady or easier.

Bombay.—*For week ending 29th May.*—Slight rain in parts of the Deccan, Konkan, and the Karnatak; more rain is urgently required in parts of Dharwar. The standing crops are good. Preparations for next season are general. Sowing is progressing in parts of Kanara. Cotton-picking continues in parts of Gujarat. The fodder-supply is sufficient. Agricultural stock in good condition. Prices are normal, except in parts of two districts.

Bengal.—*For week ending 27th May.*—There was abnormal heat during the week, followed by rain in almost all districts, except in Cuttack, Hazaribagh, and parts of Bihar. The rainfall was heavy in the Eastern and in some of the Central districts. The early rice and jute are still being sown, and the preparation of the land for the sowing of other autumn crops is in progress, but more rain is required in parts of the Province. Prospects of sugarcane, indigo, and other standing crops are favourable. The mango crop in Hazaribagh is said to be indifferent. The price of common rice continues steady.

North-Western Provinces and Oudh.—*For week ending 29th May.*—Weather clear, but the heat is excessive. Sugarcane and extra crops are being irrigated, and are doing well. Prospects are favourable. Preparations for the autumn crops have commenced in places. Threshing and winnowing almost completed. Fodder and supplies are ample, except in Fyzabad where fodder continues to be insufficient. Prices have risen slightly in four districts; elsewhere prices are generally stationary.

Punjab.—*For week ending 29th May.*—Rain has fallen in parts of the Delhi, Rawal Pindi, and Dera Ismail Khan districts. Harvesting of the spring crops is nearly over. Grain is being stored. Reaping of the extra spring crops has commenced. Ploughings for and sowings of the autumn crops are in progress. The standing crops are generally in good condition. The outturn of the spring crops is said to be below average in some districts. Cattle are generally in good condition, and fodder is sufficient in all districts, except in parts of Dera Ismail Khan. Prices are rising in Umballa, Shahpore, and Peshawar, normal in Delhi, and low elsewhere.

Central Provinces.—*For week ending 29th May.*—Weather very hot with high winds in Saugor and Wardha. Duststorms in Nagpur accompanied once by a good shower of rain. Harvesting operations of the winter crops are all completed, and preparation of land for the autumn sowings is in progress everywhere. Prices are almost steady. Imports into Damoh continue.

Burma.—*For week ending 25th May.*—In Lower Burma ploughing for the main wet-weather paddy crop has commenced in Amherst and Tavoy, and in Amherst nurseries are being planted. In Upper Burma reaping of the dry-weather paddy is still in progress. Ploughing for main wet-weather paddy has commenced in Myitkyina and the Ruby Mines. Ploughing for miscellaneous wet-weather crops is progressing in Sagaing, Lower Chindwin, Magwe, and Myingyan. Cultivation of hill paddy has commenced in Bhamo and Minbu. The prospects of the standing crops are generally good. Some damage has been caused by heavy rain in the Bhamo township. The price of paddy has risen slightly in Rangoon, Prome, and Toungoo, and considerably in Shwegyin and Pakokku.

Assam.—*For week ending 28th May.*—Weather rainy. Sowing of the early rice is progressing. Fodder and water are sufficient.

Mysore and Coorg.—*For week ending 29th May.*—MYSORE: Slight rain all over the State. The standing crops are in good condition. Prices have fallen slightly in Chitaldrug, and risen in Shimoga.

COORG: Rainfall slight. Ploughing of rice and *ragi* (*Eleusine coracana*) fields continues. Water and fodder for cattle are sufficient. Prices are normal.

Berar and Hyderabad.—*For week ending 29th May.*—BERAR: Weather hot with moderate rain during the week. Preparation of land for the ensuing crop is in progress. Fodder is sufficient. Scarcity of water prevails in parts of the Chikhli taluka. Prices are stationary.

HYDERABAD: Rainfall moderate. The hot weather crops are still being harvested. The water-supply is getting scarce everywhere. Scarcity of fodder in Aurangabad. Prices are normal.

Central India.—*For week ending 29th May.*—No rain. Agricultural operations for the autumn sowings have commenced in Western Malwa and Goona. Cattle are in good condition, except in parts of Bhopal and Bhopawar. Pasturage is fairly good and sufficient in all Agencies. Prices of food-grains are rising in one district of Gwalior and in Baghelkhand, above normal in Bhopal and Goona, but normal elsewhere.

Rajputana.—*For week ending 29th May.*—Rainfall moderate in Sujangarh. Agricultural operations are satisfactory. The land is being prepared for the autumn crops in parts. Crops, prospects, and agricultural stock are generally

good. Fodder is failing in Dholepore. Prices are fluctuating in one State, have risen in four and fallen in one, but are steady elsewhere.

Kashmir.—*For week ending 28th May.*—KASHMIR VALLEY: Weather fine. Rice and Indian corn sowings are in progress, and other autumn sowings have now commenced. The standing spring crops are ripening. Water is ample for irrigation. Prices continue normal.

JAMMU PROVINCE: *For week ending 29th May.*—No rain. The heat is excessive. Threshing and harvesting are in progress. Cattle are in good condition. Prices are normal.

Nepal.—*For week ending 25th May.*—Weather cloudy. Prospects of the crops are good.

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

* Figures for 1894-95 are not yet available.
(*a*) Includes the Bhopal-Itársi railway.
(*b*) Includes the Godhra-Rutlam railway.
(*c*) Total earnings from 2nd April to 19th May 1894.
(*d*) Includes the Guntakal-Mysore frontier section.
(*e*) Includes the Tirhoot state railway. Although for convenience classed amongst state railways, the company's section of this line is the property of the Bengal and North-Western Railway Company.
(*f*) Includes the Jammu and Kashmir and the Hyderabad-Shadipalli railways.
(*g*) Although for convenience classed amongst state railways, this line is the property of the Bengal Central Railway Company.
(*h*) Includes the Wardha Coal, Dhond-Manmád, Khámgaon, and Amráoti railways.
(*i*) Includes the Mysore-Najangúd and the Yesvantpur-Mysore frontier sections.

F. B. HEBBERT,
Under Secretary.

SIMLA, *the 30th May 1895.*

Printed and published for the GOVERNMENT OF INDIA *at the* GOVERNMENT CENTRAL PRINTING OFFICE, *Simla.*

SUPPLEMENT TO

The Gazette of India.

No. 23.} CALCUTTA, SATURDAY, JUNE 8, 1895.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

FINANCE AND COMMERCE DEPARTMENT,
(*Statistical Branch*).

J. F. FINLAY,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

ACCOUNT.
General.

No. 57 A. G., dated Simla, 24th May 1895.

Review of the Revenue and Expenditure recorded under the head "Civil Works" in the Accounts of the Government of India for the official year 1893-94.

READ—

Note by R. G. Macdonald, Esq., Accountant General, Public Works Department, upon the Accounts of Revenue and Expenditure recorded under the head "Civil Works" in the Accounts of the Government of India for 1893-94.

RESOLUTION.—The main points worthy of notice are:—

I.—The improvement in Revenue and the decrease in Expenditure as compared with 1892-93.

II.—The increase in the receipts from rents of buildings and the net return from buildings occupied as residences; *vide* paragraph 4.

III.—The relative outlay on Civil Buildings and Communications, *vide* paragraphs 9, 13, 16, 17, 21 to 25 and 28 to 32.

IV.—The establishment charges, *vide* paragraphs 14 and 15.

V.—The net charge to the State on account of the Royal Indian Civil Engineering College at Coopers Hill and the Thomason College at Roorkee, *vide* paragraphs 5 and 11.

2. The figures of revenue compare as follows with those of 1892-93:—

	Rx.
1893-94	628,460
1892-93	607,914
INCREASE	20,546

The increase is due chiefly to larger receipts from "Rents of Buildings," "Ferry Receipts," "Tolls on Roads" and "Fines, Refunds and Miscellaneous;" the receipts from "Sale of old materials" show a large falling off. The largest items of revenue are under the head of "Ferry Receipts" and "Tolls on Roads," but the returns from these sources, as might be expected, show but little variation from year to year.

3. Under the head "Rents of Buildings" there was an improvement in the total receipts which amounted to Rx. 54,378. This is considerably in excess of any figure attained during the past five years. The net return from buildings occupied as residences (excluding those allotted rent-free) amounted to 1·80 per cent. against 1·64 in 1892-93, 1·72 in 1891-92 and 1·50 in 1890-91. The Capital cost of buildings set apart as residences, excluding those allotted rent-free, has increased during the year from Rx. 741,965 to Rx. 865,321. The bulk of the increase is due to a number of buildings having been brought on to the Capital and Revenue Accounts of civil buildings for the first time.

4. The total expenditure from all sources amounted to Rx. 4,828,657 against Rx. 4,969,615 in 1892-93, so that there has been a decrease of

Rx. 140,958 during the year under review. The figures (exclusive of outlay from Excluded Local Funds and Contributions compare as follows :—

	1892-93. Rx.	*1893-94.* Rx.	*Difference.* Rx.
Imperial	773,509	836,324	+62,815
Provincial	2,162,357	2,116,812	—45,545
Incorporated Local	1,714,593	1,677,144	—37,449
TOTAL	4,650,459	4,630,280	—20,179

It is observed that while there has been a decrease both under Provincial and Local expenditure, there has been an increase under Imperial; the net decrease amounting to Rx. 20,179.

5. Of the total outlay by Departmental and Civil officers during the year under review, much more was expended on new buildings than on new roads, the figures being Rx. 953,208 and Rx. 772,447, respectively, against Rx. 971,710 and Rx. 783,932, respectively, in the previous year. In the matter of repairs Rx. 1,341,481 were spent on communications and Rx. 316,051 on buildings against Rx. 1,328,493 and Rx. 289,899, respectively, in 1892-93. On works of Miscellaneous Public Improvement Rx. 227,000 were spent on new works and Rx. 108,090 on repairs against the corresponding figures of Rx. 377,165 and Rx. 105,596 in the previous year.

Attention is invited to the comparatively large outlay on new Civil Buildings which was principally from Provincial Funds. The Government of India think it desirable that some economy should be effected in this direction and that a larger proportion of the annual assignments should be devoted to works of Communication and especially feeder roads to railways.

6. The percentage of the Establishment charges on outlay on works and repairs amounted, in the case of expenditure by Public Works officers, to 27·98 against 27·48 in the previous year. The average for the five years ending 1893-94 is 26·02 per cent.

7. From the tables given in paragraph 15 of the Accountant General's note, it will be seen that of the total outlay by Public Works Officers, Establishment absorved 21 per cent., while in the case of outlay by officers of other Departments the corresponding charge was 14 per cent. It is explained that the works executed by these officers required comparatively little professional skill, and that the supervision is therefore necessarily cheaper.

8. The net direct charge to the State in 1893-94 on account of the Royal Indian Engineering College amounted to £4,502, exclusive of salaries of passed students detained in England and passages of officers on appointment which amounted, respectively, to £3,683 and £611; the total of these three items amounting to £8,796 as compared with the corresponding total of £5,778 in 1892-93. On the other hand, the net debit on account of the Thomason College at Roorkee was Rx. 13,232 as compared with Rx. 12,614 in the previous year.

The Governments of Madras and Bombay (General), Bengal, the North-Western Provinces and Oudh, and the Punjab.
The Chief Commissioners of the Central Provinces, Burma, Assam, and Coorg.
The Resident at Hyderabad.
The Agents to the Governor General for Central India, Rajputana, and Baluchistan.
The Superintendent of Port Blair and Chief Commissioner, Andaman and Nicobar Islands.
The Accountant General, Public Works Department.
The Director General of Military Works.

ORDER.—Ordered, that the foregoing, with a copy of the note, be forwarded to the Local Governments, Administrations and officers noted in the margin for information.

Ordered also, that a copy of the Resolution and note be forwarded to the Finance Department, and that the papers be published in the Supplement of the *Gazette of India*.

W. S. S. BISSET, *Lieut.-Col., R.E.*,
Secretary to the Government of India.

Document accompanying.
Note by Accountant General, Public Works Department, with accompaniment

Accompaniment to Public Works Department Resolution No. 57 A.-G., dated 24th May 1895.

Note by R. G. Macdonald, Esq., Accountant General, Public Works Department, upon the accounts of Revenue and Expenditure recorded under the head "Civil Works" in the accounts of the Government of India for 1893-94.

The amount of *Revenue* and *Expenditure* exhibited in these accounts, and reviewed in the following paragraphs, is as follows :—

	Collected or expended by: Public Works Officers.	Collected or expended by: Officers of other Departments.	Collected or expended in England.	TOTAL.
	Rx.	Rx.	Rx.	Rx.
Revenue	186,672	399,175	42,613	628,460*
Expenditure	3,476,338	1,211,939	140,380	4,828,657

*Includes outlay amounting to Rx 198,377 from Excluded Local Funds and Contributions, and Rx. 51 spent by the Public Works Department, Bombay, for the Indo-European Telegraph Department.

REVENUE.

1. The *Revenue* credited in the accounts of the Government of India for 1893-94 under the head "Civil Works" amounts to Rx. 628,460. Of this sum—

Rx.	
186,672	were realised by Public Works officers in India;
399,175	by officers of other Departments in India; and
42,613	in England.
TOTAL 628,460	

The sources of revenue and the amounts collected are :—

3. A comparison of the actual revenue derived from "Civil Works" with the Budget and Revised Estimates is given below :—

Year.	Budget Estimates.	Revised Estimates.	Actuals.
	Rx.	Rx.	Rx.
1893-94	581,200	607,100	628,460

The increases of Rx. 47,260 over Budget Estimate and of Rx. 21,360 over Revised Estimate are chiefly due to the recovery of the Government share of the profits of the Darjeeling-Himalayan Railway for the four years ending 30th June 1893 ; to an improvement in the ferry receipts and tolls on roads in Madras and Bombay ; and to the receipt of large contributions from Municipalities and private parties.

4. *Rents of buildings, Rx. 54,378.*—The receipts from this source compare as follows with the realizations in the four preceding years :—

Years.	By Public Works Officers.	By Officers of other Departments.	Total.
	Rx.	Rx.	Rx.
1889-90	36,875	4,061	40,936
1890-91	37,888	4,028	41,916
1891-92	38,908	4,066	42,974
1892-93	41,640	4,195	45,835
1893-94	49,973	4,405	54,378

The net return on capital cost of buildings set apart as residences, excluding those allotted rent free, is 1·80 per cent. as shown below against 1·64 per cent. in the previous year. This class of outlay is, it will be observed, very unprofitable. A large sum has been expended on rent-free buildings, especially in the provinces of Bengal and Bombay :—

		CAPITAL COST OF BUILDINGS FROM EXAMINER'S ACCOUNTS.				COST OF REPAIRS.			
		Year of the Account.	AMOUNT. *Rent-free buildings.	Other buildings.	Total.	Rents realised.	Rent-free buildings.	Other buildings.	Net return excluding repairs to rent-free buildings.	Percentage of net return on Capital cost excluding rent-free buildings.

							29,548			

* Excluding buildings occupied as residences by Heads of Local Governments and Administrations.
(a) Excludes certain Provincial buildings, the financial results of which have not been recorded in the Capital and Revenue Account for 1892-93.
(b) The Provincial Civil Works Capital and Revenue Accounts not having been received, the figures of 1892-93 have been adopted in the case of Provincial buildings.

5. *Receipts from the Thomason Civil Engineering College, Roorkee, Rx. 2,865.*—The financial results of the working of this college were—

	Rx.
Income	2,865
Outlay—	
Salaries, Office establishment, Book Depôt and Press	15,083
Repairs of buildings	1,014
Total	16,097
Net debit	13,232
Against in 1892-93	12,614
Ditto in 1891-92	15,450

6. *Ferry Receipts, Rx. 300,641.*—This is the largest source of revenue credited under the head "Civil Works :" the major portion of it, amounting to Rx. 293,383, has been realized by Civil Officers.

The realizations under this head during the last four years are shown in the following table :—

Years.	By Public Works Officers.	By Civil Officers.	Total.
	Rx.	Rx.	Rx.
1890-91	3,815	295,593	299,408
1891-92	4,821	301,581	306,402
1892-93	7,914	286,060	293,974
1893-94	7,258	293,383	300,641

The increase of Rx. 6,667 in 1893-94 occurs mainly in Madras and Bengal.

The largest sums were collected in the following provinces :—

Provinces.	Amount.
	Rx.
Bombay	14,462
Assam	14,857
Punjab	33,818
North-Western Provinces and Oudh	58,888
Bengal	61,799
Madras	92,393

The incidence of the revenue is—

	Rx.
Imperial	*Nil.*
Provincial	109,879
Local	190,762
Total	300,641

EXPENDITURE.

7. The *Expenditure* recorded in the accounts for 1893-94 under the head "Civil Works" amounts to Rx. 4,828,657. Of this sum—

Rx. 3,476,338 were expended by Officers of the Public Works Department;
„ 1,211,939 by Officers of other Departments;
„ 4,688,277 and
„ 140,380 in England, including exchange, but exclusive of Rx. 5,471, the value of stores supplied to India, included in the outlay upon the works concerned.
„ 4,828,657 in all.

8. The following table compares the actuals of the year (exclusive of outlay from Excluded Local Funds and Contributions) with the Budget and Revised Estimates:—

Funds.	Budget Estimate.	Revised Estimate.	Actuals.
	Rx.	Rx.	Rx.
Imperial	837,600	844,700	836,324*†
Provincial	2,280,600	2,162,400	2,116,812
Local	1,772,700	1,742,200	1,677,144
Total	4,890,900	4,749,300	4,630,280

* Inclusive of Rx. 51 spent by the Public Works Department, Bombay, for the Indo-European Telegraph Department.

† Differs from the amount shown in the Finance and Revenue Accounts of the Government of India by Rx. 15, the amount of outlay in England and exchange (under Coorg) not brought to book by Examiner in 1893-94.

Imperial outlay, Rx. 836,324.

The outlay, as compared with the Budget Estimate, shows a small decrease of Rx. 1,276, which calls for no remark. Compared with the Revised Estimate there has been a lapse of Rx. 8,376, which occurred principally in the expenditure in England.

Provincial outlay, Rx. 2,116,812.

The lapses from the Revised and Budget Estimates are due to an overestimate of the requirements of the year.

The following table shows the lapses, distributed under Departmental and Civil Officers:—

	Departmental Officers.	Civil Officers.	Total.
	Rx.	Rx.	Rx.
Budget Estimate	2,153,400	127,200	2,280,600
Actuals	2,012,858	103,954	2,116,812
Lapse	140,542	23,246	163,788
Revised Estimate	2,048,700	113,700	2,162,400
Actuals	2,012,858	103,954	2,116,812
Lapse	35,842	9,746	45,588

Incorporated Local Fund outlay, Rx. 1,677,144.

The lapses from the Revised and Budget Estimates occurred chiefly under Civil Officers owing mainly to the expenditure in Madras having been overestimated.

The actual outlay by Departmental and Civil Officers, is compared with the Budget and Revised Estimates in the following table:—

	Departmental Officers.	Civil Officers.	Total.
	Rx.	Rx.	Rx.
Budget Estimate	582,700	1,190,000	1,772,700
Actuals	575,027	1,102,117	1,677,144
Lapse	7,673	87,883	95,556
Revised Estimate	599,300	1,142,900	1,742,200
Actuals	575,027	1,102,117	1,677,144
Lapse	24,273	40,783	65,056

The total expenditure of the year has been charged in the accounts in the following manner:—

	Rx.
New works	1,952,655
Repairs	1,765,622
Tools and Plant	50,479
Decrease in stores, etc.	—17,937
Miscellaneous (Contributions to Municipalities, etc.)	42,074
Establishment	895,384
	4,688,277
Add—	
In England	140,380
TOTAL	4,828,657

9. The following table exhibits the services on which this sum was spent and the funds out of which it came. The outlay from Excluded Local Funds and contributions, Rx. 198,377, represents money expended, mainly on works requiring professional skill, by the agency of the Public Works Department for local bodies and institutions.

(a) Differs from the amount shewn in page XV by Rx. 15, the amount of outlay in England and Exchange (under Coorg) not brought to book by Examiner in 1893-94.

10. *Outlay in England.*—The outlay in England, exclusive of the value of stores charged to works in these accounts, compares as follows with the actuals of the previous four years:—

DETAILS.	1889-90.	1890-91.	1891-92.	1892-93.	1893-94.
	£	£	£	£	£
Salaries of President, Professors, etc., and other charges of the Royal Indian Civil Engineering College, Cooper's Hill	25,602	24,905	28,017	28,184	30,330
Salaries, etc., of passed students detained in England	4,357	4,380	4,334	4,537	3,683
Passage to India of Officers on appointment	1,576	704	761	761	611
Furlough pay and absentee allowances of Officers of the Public Works Department	66,109	43,785	48,639	49,203	49,729
Salaries, etc., of Indian Officers of the Public Works Department undergoing training in England	745	679	434	479	354
Remuneration for professional services	...	1,098	167	368	379
	98,389	75,551	82,352	83,532	85,086
Exchange	44,160	24,686	35,763	50,255	55,294
TOTAL	142,549	100,237	118,115	133,787	140,380

11. The direct charge to the State under the head "Civil Works" on account of the Royal Indian Civil Engineering College at Cooper's Hill was—

		Charge in sterling.	Income in sterling.		Net charge.
		£	£		£
In	1893-94	30,330	25,828		4,502
,,	1892-93	28,184	27,704	=	480
,,	1891-92	28,017	27,197	=	820
,,	1890-91	24,905	24,878	=	27
,,	1889-90	25,602	25,172	=	430
,,	1888-89	28,768	26,380	=	2,388

There has been a large increase in 1893-94 in connection with this College.

12. The distribution of the outlay in India by Provinces is shown in the following table :—

13. Omitting the outlay from Excluded Local Funds and Contributions in regard to which the Public Works Department is merely the executive agency employed to carry out the work, the outlay in India on "Civil Works" during 1893-94 compares as follows with that incurred during the four preceding years :—

Heads of service.	1889-90.	1890-91.	1891-92.	1892-93.	1893-94.

GRAND TOTAL	4,131,608	4,411,177	4,877,090	4,516,672	4,489,900

* The expenditure by Officers of other Departments was not detailed in the accounts by service heads till the year 1890-91.

14. The expenditure on Establishment bears the following ratio to the total outlay by Public Works Officers, exclusive of Establishment, and to the outlay on works and repairs only :—

	Percentage of Establishment on total outlay exclusive of Establishment.	Percentage of Establishment on outlay on Works and Repairs only.
1889-90	26·97	26·80
1890-91	25·51	25·97
1891-92	21·83	22·44
1892-93	26·96	27·48
1893-94	27·73	27·98

The provinces showing unfavourable results are :—

	Percentage on total outlay exclusive of Establishment.	Percentage on outlay on Works and Repairs.
Central India	46·62	44.23
Bengal	36·57	34.66
Port Blair	34·81	34.96
North-Western Provinces and Oudh	33·47	32.58
Madras	33·00	36·08
Rajputana	32·23	32·73
Upper Burma	30·39	31·92
Bombay	29·19	29·84

15. The following table shows the percentages of the total money expended in each Province under the different departmental and service heads :—

I.—By Public Works Officers.

Omitting Excluded Local and Contributions.

Provinces.	Civil Buildings.		Communications.		Miscellaneous Public Improvements.		Establishment.	Tools and Plant.	Suspense.	Total.

16. Of the total outlay under Public Works Officers—

	Against in 1892-93.	Against in 1891-92.
26 per cent. was expended on new Buildings	26 per cent.	28 per cent.
17 „ „ „ „ „ Roads	17 „	18 „
2 „ „ „ „ „ Works of Miscellaneous Public Improvements	3 „	5 „
8 „ was spent on repairs of Buildings	7 „	8 „
24 „ „ „ „ „ Roads	23 „	20 „
1 „ „ „ „ „ Works of Miscellaneous Public Improvements	1 „	1 „
Establishment absorbed 21 per cent. of the total outlay and	21 „	18 „
Tools and Plant, 1 per cent.	2 „	1 „

Similarly, of the total outlay under officers of other Departments :—

5 per cent. was expended on new Buildings	5 „	3 „
16 „ „ „ „ „ Roads	18 „	18 „
7 „ „ „ „ „ Works of Miscellaneous Public Improvements	7 „	7 „
4 „ „ „ on repairs to Buildings	3 „	2 „
46 „ „ „ „ „ Roads	45 „	47 „
4 „ „ „ „ „ Works of Miscellaneous Public Improvements	4 „	3 „
14 „ of the total outlay was recorded under Establishment	14 „	13 „
3 „ under Miscellaneous, and	3 „	6 „
1 „ of the outlay on Tools and Plant	1 „	1 „

17. The outlay under the different heads of service varies considerably in the several Provinces. More than one-fourth, or 26 per cent., of the total outlay by Public Works Officers has been spent on new buildings against 17 per cent. on new roads. The Provinces in which the percentage of new civil buildings is high are Madras, Lower Burma, Baluchistan, and Port Blair. The expenditure by the Military Works Department is almost solely upon churches in cantonments, and in Hyderabad, Imperial Civil Works consist of buildings only.

The largest expenditure on new roads has taken place in Assam, North-Western Provinces and Oudh, Upper Burma, Punjab, Bombay, Lower Burma and Central Provinces.

It is noticeable that in Bengal and Madras a comparatively small proportion of the outlay on the construction and maintenance of roads is incurred through the agency of Public Works Officers, the bulk of the expenditure under these heads being accounted for by Civil Officers. Central India maintains a high percentage for establishment ; the percentage is lowest in Lower Burma and Assam.

The low percentage in Burma is due to additional outlay on works, owing to the transfer of the Rangoon Military Works division to the control of the Local Administration. In Assam the increased outlay on works, chiefly due to the construction of the Nichuguard-Manipur road, is the cause of the establishment percentage being so small.

The Military Works establishment percentage appears high, owing to the inclusion of the figures of the Accountant-General's auxiliary accounts under "Suspense." If those figures were omitted, the percentage would only be 19.

The major portion of the outlay by Civil Officers was upon maintenance of roads and was incurred in Madras, Bengal, North-Western Provinces and Oudh, and Bombay, and it will be observed, that repairs to roads have taken up 46 per cent. of the total outlay. Of the remainder, 16 per cent. was expended on new roads.

18. The *Imperial* outlay was incurred in the under-noted Provinces upon the objects detailed :—

	Military Works.	Rajputana.	Central India.	Coorg.	Mysore.	Hyderabad.	Port Blair.	Baluchistan.	Central Provinces.	Burma. Upper.	Burma. Lower.	Assam.	Bengal.	North-Western Provinces and Oudh.	Punjab.	Madras.	Bombay.	Total.

19. In Upper Burma the large outlay of Rx. 299,078 is due to the opening out of the Province generally. The other provinces showing heavy outlay are Assam and Baluchistan. The principal works on which outlay was incurred were :—

In Coorg—

Opening out Veerajpet-Periapatam road.
Bridge across the causeway at Siddapur, Bangalore-Mangalore road.

In Baluchistan—

Buildings—New block of Public Offices, Quetta.
New Residency, Quetta.
Roads—Hindu Bagh, Fort Sandeman.
Mir Ali Khil-Khajuri Kach Section of the Murga-Gomal road.
Chor Khil Dhana road.
Miscellaneous Public Improvements—Fort Sandeman Water-supply.

In Upper Burma—

Buildings—Jails at Bhamo and Kindat.
Roads—Myingyan-Fort Stedman, Yeu-Kin-u, Taungdwingyi-Natmouk, Banmouk-Mansi.

In Lower Burma—

Light-house at Oyster Island.

In Assam—

Road from Nichuguard to Manipur.

In Punjab—

Buildings—Constructing Militia lines, Kurram.
Civil buildings at Para Chinar.
Purchase and improvements of Snowdon Estate, Simla.

In Bombay—

Buildings—Offices and quarters for the Customs and Salt Departments at Castle Rock.

The outlay incurred to the end of 1893-94 on the construction of the North-West Frontier road from Dera Ismail Khan to Khusalgarh is as follows :—

	Estimate.	Outlay.	Excess.
	Rx.	Rx.	Rx
Works	324,581	319,967	—4,614
Establishment	65,897	69,312	+3,415
Tools and Plant	12,600	9,358	—3,242
TOTAL	403,078	398,637	—4,441

In addition to this there has been an outlay of Rx. 4,315 on this work against an estimate of Rx. 2,595 which has been debited to 44—Military Works.

The largest outlay on repairs of buildings is in Upper Burma and is due to the large increase in the number of Police buildings.

More than half of the total outlay on the up-keep of roads has been incurred in Upper Burma : Central India, Coorg, Baluchistan, and Rajputana absorb most of the remainder.

20. The *Provincial* outlay was incurred in the under-noted Provinces upon the objects specified below—

	7	7	4	15	22	10	11	...	...	24	100

22. The outlay by officers of the Public Works Department has been incurred in the following proportions :—

	Against in 1892-93.	Against in 1891-92.
30 per cent. on new Buildings	30 per cent.	32 per cent.
10 „ „ Roads	11 „	12 „
1 „ „ works of Miscellaneous Public Improvements	3 „	6 „
9 „ „ repairs to Buildings	8 „	8 „
24 „ „ „ to Roads	22 „	20 „
1 „ „ „ „ works of Miscellaneous Public Improvements	1 „	1 „
24 „ of the total outlay has gone in payments to establishment	23 „	19 „
1 „ on Tools and Plant	2 „	1 „

23. Attention is invited to the outlay by Public Works officers of Rx. 614,005 on new buildings, as compared with Rx. 210,082 on new roads.

24. The variations in the percentages are very marked, as will be seen from the table in paragraph 21. In Madras the outlay on new buildings is 47 per cent. against 4 per cent. on new roads, and in Lower Burma 50 per cent. on new buildings against 7 per cent. on roads. Bombay, Bengal, and the North-Western Provinces and Oudh also show considerably larger outlay on new buildings than on new roads.

The outlay by officers of other Departments is comparatively small: this agency is chiefly made use of in Madras, Lower Burma, Bengal, and in the North-Western Provinces and Oudh.

In Lower Burma the whole outlay appears under Miscellaneous, which means that it is unclassified; 13 per cent. of the total outlay in the North-Western Provinces and Oudh is devoted to works of Miscellaneous Public Improvement, and 28 per cent. to repairs of works of the same class; repairs to buildings and roads absorb 19 per cent. and 7 per cent., respectively.

In Bengal 25 per cent. of the entire outlay has been spent upon repairs to roads, 23 per cent. on repairs to works of Miscellaneous Public Improvement, and 36 per cent. on establishment.

In Madras, 55 per cent. of the total outlay has been spent upon works of Miscellaneous Public Improvement, 11 per cent. on new buildings, and 31 per cent. on up-keep of roads.

25. *Repairs* of Buildings and Roads have taken up the under-noted percentages of the total outlay :—

Provinces.	Percentage of total outlay incurred on repairs.		
	Buildings.	Roads.	Miscellaneous Public Improvements.
Public Works Officers.			
Central Provinces	4	27	...
Lower Burma	6	20	1
Assam	5	26	...

Madras	...	...	...
Bombay	...	...	...

26. The principal works on which outlay was incurred were :—

In Central Provinces—

Buildings—Additions and alterations to Jail at Narsinghpur.
New Public Offices, Nagpur.
Hospital in Central Jail, Jubbulpur.

Roads—Mul-Umrer.
Arang-Khariar.
Mandla-Dindori.
Mandla-Bilaspur.

In Lower Burma—

Buildings—Extension of the Lunatic Asylum, Rangoon.
Jails at Prome and Insein.
New Government House, Rangoon.
New Public Offices, Rangoon.
Reformatory at Insein.
Deputy Commissioner's Court, Treasury and Thana, Sandoway.

Roads—Thônzé bridge on Rangoon-Prome road.
Tavoy to opposite Yebyu.
Shwegun-Hlaingbwè.
Theinzeik-Bilin.

In Assam—

Roads—Changsil Road, Duarband to Aijal.
Bridges on the Companyganj-Salutikar Road.
Completing Goramur Road.
Improving and bridging Northern Trunk Road, Rangnadi to Dekrang.
Completing Northern Trunk Road, Gohpur to Kalabari.

In Bengal—

Buildings—New wing to the opium godown, Calcutta.
New Treasury building, Faridpur.
New Stamp and Stationery Office, Calcutta.
Judges Court, Noakhali.
Chemical Laboratory in the Presidency College, Calcutta.
School of Art and Art Gallery, Calcutta.
Zenana Hospital, Patna.
Bengal Veterinary Institution, Calcutta.
Roads—Foreshore Road, Howrah.
Ranchi-Chaibassa.
Darjeeling-Lebong.
Bridge over the Subornarekha River.

North-Western Provinces and Oudh—

Buildings—Library and Barristers' and Pleaders' Chambers attached to the High Court, Allahabad.
Additions and alterations to Thomason Hospital, Agra.
Land Compensation and Road diversion for additions to Thomason Hospital, Agra.
Ramsay's Hospital, Naini Tal.
Roads—Extension of the Fyzabad, Basti, and Gorakpur Trunk Road to the Katri and Lakarmandi Stations.

In Punjab—

New Jail at Abbottabad.
New Girder Bridge across the River Jhelum.
Montgomery Jail.
Combined Boarding-house for the Central Training College, Normal School and the Model School, Lahore.
Additional accommodation in the Civil Court, Delhi.
New Police lines and Hospital, Delhi.
Restoration of Lawrence Military Asylum, Sanawar.
Training Works, Kalka-Simla Cart Road.

In Madras—

Buildings—Additions and improvements to Government House, Ootacamund.
Collector's Office at Calicut.
New Law College, Madras.
Additions and improvements to Penitentiary, Madras.
Connemara Library and Victoria Technical Institute, Madras.
Adding a third story to the General Hospital, Madras
Workshop for students of the Engineering College, Madras.
Additions and alterations to old High Court buildings to accommodate Stamps, Stationery, Collectors' Offices, Madras.
New Law Court and block of buildings for Vakeels and Barristers, etc., Madras.
Roads—Vayitri to Gudalur.

In Bombay—

Buildings—Distillery at Surat.
Central Jail, Ahmedabad.
Gujrát College at Ahmedabad.
Central Jail, Hyderabad.
New Civil Hospital and Medical School at Hyderabad.
Elphinstone Middle School, Bombay.
Distillery at Godhra.
St. George's Hospital, Bombay.
Subordinate and Small Cause Courts at Poona.
Adding a wing to Public Works Buildings, Bombay.
European General Hospital, Aden.
Roads—Dahánu-Jawhár.
Hukeri-Gokák.
Nipáni-Mahálingpur.
Gokák-Navalgund.
Havinhipargi Telgi.
Metalling Bombay-Agra Road.
Bridge over Sábarmati River.
Neri-Ajanta Road.
Bridge at Dápuri on Mula River.
Váda-Shirghát.

Miscellaneous Public Improvements—Strengthening the existing dry rubble stonepitching from Colába to a portion opposite Marine Lines Station.

27. The money obtained from *Incorporated Local Funds* has been expended on the undernoted objects :—

28. The bulk of the outlay by Public Works Officers has been incurred on "Communications," of which 30 per cent. is upon new works, chiefly in the North-Western Provinces and Oudh and 38 per cent. on repairs, chiefly in the North-Western Provinces and Oudh, Bombay, and Punjab. The outlay on "New Buildings" by this agency is comparatively small, being about 6 per cent. of the total outlay, and the largest expenditure under this head occurred in the North-Western Provinces and Oudh, Punjab, and Bombay, chiefly under "Medical" and "Educational."

Nearly two-thirds of the total outlay from Incorporated Local Funds has been administered by Officers of other Departments.

29. The outlay on repairs to "Communications" under Officers of other Departments amounted to Rx. 539,406. Bengal and Madras with Rx. 225,083 and Rx. 215,468, respectively, show the largest expenditure.

30. The money assigned to public works from Incorporated Local Funds was expended in the following proportions upon Buildings and Communications and other works of Miscellaneous Public Improvement:—

Provinces.	Percentage on total outlay.										
	Civil Buildings.		Communications.		Miscellaneous Public Improvements.		Establishment.	Tools and Plant.	Suspense.	Miscellaneous.	Total.
	Works.	Repairs.	Works.	Repairs.	Works.	Repairs.

33. The principal works in progress were:—

In Central Provinces—

Road—Narsinghpur-Gorabibi Section of the Narsinghpur-Lakhnadon Road.

In Assam—

Roads—Improving Natwanpur Road.
Sylhet-Muktapurghat.
Pagla-Gobindaganj.
Sunamganj-Pagla.
Fenchuganj-Kamalganj.
Nilamganj-Olivia-cherra.
Gauripur-Roha.
Sylhet-Lalabazar to Sherpur.

In North-Western Provinces and Oudh—

Buildings—Dispensary at Jhansi.
Roads—Bridge over Hindan River.
„ „ Kali Nadi.
Baijnath and Hawalbagh Cart Road.
Raising Moradabad and Sambha Road.
Azamgarh and Mow Road.
Lalitpur and Mehroni Road.

In Madras—

Roads—Causeway across the Palar River on the Ranipet-Arcot Road.

In Bombay—

Roads—Ahmedabad to Bareja.
Athni-Kempur.
Kudchi-Terdál.
Miryabay-Sindgi.
Nadiad-Kapadvanj.
Petlad-Cambay.
Dhondaicha-Sháháda.
Roads—Dhulia-Amalner.
Nimgám-Chopda.
Amalner-Chopda.
Nasik-Dindori and Kalvan.
Pen-Panvel.
Manor-Váda.
Bhiwndi-Váda.

Miscellaneous Public Improvements—

Drainage of Ahmedabad City.
Hubli water works.
Dhulia „
Panvel „
Protective Work—Surat.

34. The names of works and localities on which outlay by officers of other Departments has been incurred cannot be given, as accounts are not received in such detail.

35. The works carried out by the Public Works Department from money assigned from Excluded Local Funds in the various Provinces are classified below—

37. The principal contribution works on which outlay was incurred during 1893-94 were :—

In Central Provinces—

Improving Burhanpur water-supply.
Laying a second main from Ambajherry to pumping reservoir, Nagpur.
Road from Khariar to Bhowani Patna.
Balram Dass Water-works, Raipur.
Raj-Nandgaon Water-works.

In Lower Burma—

New Cathedral, Rangoon.

In North-Western Provinces and Oudh—

La Martiniere Girls' School.

In Punjab—

Jubilee Museum, Lahore.
Dufferin Hospital, Delhi.
Simla additional Water-supply.
Simla Sewage Extension.
Delhi Water-works.
Delhi Sewage-works.
Dalhousie Water-supply.
Improving drainage works, Ludhiana City.
Amballa Water-supply.

In Bombay—

Anjuman-i-Islám School at Bombay.
Ráo Bahádur Govindrao Ramchandra Garud High School, Khándesh.

38. The suspense balances and objectionable expenditure outstanding at the close of 1893-94 are separately reviewed.

CALCUTTA; *The 14th March 1895.*

R. G. MACDONALD,
Accountant-General, P. W. Dept.

Documents accompanying.

Abstract and detailed accounts of Revenue and Expenditure recorded under the head Civil Works during 1893-94.

Acctt.-Genl., P. W. Dept., memorandum No. 265 G., dated 14th March 1895.

Submitted to the Secretary to the Government of India, Public Works Department.

Accompaniment to Accountant General, P. W. D.'s endorsement No. 265-G., dated 14th March 1895.

ABSTRACT by Funds, Departmental Heads, and Agency of Collection and Disbursement, of Revenue and Expenditure recorded under the head CIVIL WORKS during 1893-94, compared with the Budget and Revised Estimates of the year and the actuals of the year 1892-93.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Memorandum on the snowfall in the mountain districts bordering Northern India and the abnormal features of the weather in India during the past five months, with a forecast of the probable character of the south-west monsoon rains of 1895.

The present memorandum is drawn up in accordance with the practice of the past eleven years, and includes, firstly, a brief summary of the information received from various officers relating to the snowfall of the past winter or cold weather in the Afghan mountains and the Himalayan area; secondly, a statement of the chief peculiarities or abnormal features of the meteorology of India during the past five months; and, thirdly, a forecast of the probable character of the approaching south-west monsoon rains based on this information.

The forecast is based in part on the snowfall information and on the abnormal features of the weather during the past five months, and in part on a comparison with the meteorology of the previous thirty years, so far as it is available. It is necessary to point out that the forecast is a statement of probabilities and not of certainties, and that it is liable to error from the limitation and uncertainty of part of the data on which it is based. It has been drawn up after a consideration of all the available information, but it should, to use the words of the Famine Commission Report, "*be used with due caution.*"

The monsoon forecasts, as at present issued, necessarily leave out of consideration two important points on which the agricultural value of the monsoon rainfall largely depends, *viz.*:

(1) the probability of the occurrence of a prolonged break in the rains in July or August;

(2) the probability of the unusually early termination of the rains in Upper India or Bengal;

and are hence imperfect every year to that extent.

The chief features or conditions which influence and determine the extension and general strength of the south-west monsoon currents are as follows:

1st.—The amount and time of occurrence of the cold-weather snowfall in the mountain districts adjacent to Northern India.

2nd.—The local peculiarities of the weather in India itself immediately antecedent to the advance of the monsoon currents across the coasts of India into the interior, and which it is found are generally impressed upon it during the hot weather, and are frequently more or less persistent in character. These abnormal features are, on the whole, best estimated by means of the variations of pressure from its normal value in different parts of India.

3rd.—Local peculiarities in the Bay of Bengal and Arabian Sea, over which the monsoon currents pass before they reach India.

The first of these conditions or factors is mainly influential in determining the northern limits of the monsoon rains, heavy and prolonged snowfall in the Western Himalayan area either preventing or delaying the extension of the monsoon current over Upper India during the rainy season. Heavy and untimely snowfall in April and May especially exercises a very powerful influence in this way.

The second factor determines those large local district or provincial variations of rainfall during the monsoon which are evidently due to persistent local conditions or peculiarities, and not to general causes influencing the whole of India more or less.

The third and last factor is almost certainly of equal importance with the preceding two, but it is that on which information is most difficult to obtain, and is least in amount and longest in being received. In fact, information

respecting the weather conditions in the Arabian Sea or Bay of Bengal is rarely received in time to be utilized in drawing up the annual forecasts.

Summary of snowfall information.

The whole of the information referring to the snowfall in the mountain districts bordering Northern India for each month of the year is now published as it is received in the India Monthly Weather Reviews.

The following gives a brief summary of the information relating to the snowfall of the past cold weather received up to date:

I.—AFGHAN MOUNTAIN DISTRICTS.

(1) Hills West of Dera Ismail Khan.

November.—There was a slight fall of snow on the 30th on the Pirghel (11,000 feet) and Merwatti (10,500 feet).

December.—Snow fell on the 23rd down to about 5,500 feet, the fall on the higher peaks ranging from 6 inches to 2 feet in amount.

January.—There were frequent falls on the 2nd, 3rd, 6th, 23rd, 30th and 31st on the higher ranges. The total amount on the highest peaks was estimated at about 8 feet.

February.—There were snowstorms on the 2nd, 3rd, 4th and 6th of the month, which gave a total of 3½ feet of snow on the Takht Suleman and other high peaks.

March.—Snow fell on the higher peaks on the 14th, 15th and 24th. The fall on the higher peaks of the Shirani country (Takht Suleman, &c.) was estimated at nearly 4 feet.

April.—No snow.

The opinion of the natives of these hill districts is that the fall has been less than usual.

(2) Kurram.

January.—Several snowstorms occurred during the month. The most severe was on the 12th, when snow fell down to 4,000 feet.

February to April.—No information.

The inhabitants of Kurram consider that the season was unusually mild.

(3) Khyber District.

December.—Snow fell in the last week of the month in Tirah.

January.—There were two snowstorms during the month. The total fall on the Lakka hills was about 1½ feet.

February.—Snowstorms occurred in the first week of the month. The fall on Tirah was 2 feet and on the Lakka peak 1½ feet.

March to April.—No snow fell.

(4) Waziristan.

November to February.—No reports received.

March.—There were snowstorms on the hills above 8,500 feet on the 1st, 8th to 10th, 13th, 15th, 17th and 24th. The snowfall during the storm of the 8th to 10th was heavy and continuous. The snow melted rapidly during the last fortnight of the month.

April.—Light snow fell during the first ten days of the month above 10,000 feet. The snow completely disappeared before the end of the month.

(5) Kabul.

November.—Snow commenced earlier than usual, the first fall of the season occurring in the last week of November. The fall was general and all the hills about Kabul were covered with snow at the end of that month.

December to April.—No reports received for this period.

II.—HIMALAYAS.

(A) THE PUNJAB AND KASHMIR HIMALAYAS.

(1) Hills to the North of Hazara.

December.—Light snow fell at Hazara (4,100 feet) on the 24th, 29th and 30th.

January.—Light snow fell on the 1st and 7th at Hazara.

February.—Snow fell on the higher ranges near Hazara on the 1st.

March.—Heavy rain fell in this month which melted and washed away the snow on the lower ranges. There were light falls of snow on the higher ranges during the month.

April.—Light snow fell on the higher ranges on the 2nd, 3rd and 4th.

The following gives the reported accumulation on the hills in this district on the 15th of each month from January to April 1895, and in the corresponding months of the year 1894 for comparison:

Hill.	Depth of snow on the 15th of							
	January 1895.	February 1895.	March 1895.	April 1895.	January 1894.	February 1894.	March 1894.	April 1894.
	Feet.	Feet.	Feet.	Feet.	Feet.	Feet.	Feet.	Feet.
Kagan Hills	9	2	2	Slight	2	9	2	*Nil.*
Konsh and Bhagarmang Hills	4½	1	1	Slight	1	7	1 to 2	*Nil.*
Kagan higher mountains	12	...	1 to 1½	Slight	6 to 10	9 to 12	3 to 4	?
Black Mountain (crest)	?	?	?	...	3	4?	1?	*Nil.*
Manúr Hills	9	...	...	...	...	...	...	*Nil.*
Bhaliji Hills	7	...	...	...	...	10	...	*Nil.*
Gulli Range	6 to 8	1 to 1½	½ to 1	...	...	...	...	*Nil.*

The snowfall of the past winter in the opinion of the natives of the district was much less than usual, and the little there was melted away earlier than usual.

(2) Murree.

The following table gives the monthly returns of the snowfall at Murree and on the hills near Kahuta:

Station.	Total fall of snow in the month of					
	December 1894.	January 1895.	February 1895.	March 1895.	April 1895.	Total of period.
	Ft. In.	Ft. In.	Ft. In.	Ft. In.	Ft. In.	Ft. In.
Murree	1 6	7 1	3 3	*Nil*	*Nil*	11 10
Kahuta	?	6 0	*Nil*	*Nil*	*Nil*	6 0

The following gives comparative data for the past six years:

Station.	Total fall of snow from January to March in							Average of seven years.
	1895.	1894.	1893.	1892.	1891.	1890.	1889.	
	Ft. In.	Ft. In.	Ft. In.	Ft. In.	Ft. In.	Ft. In.	Ft. In.	Ft. In.
Murree	10 4	15 9	29 4	0 5	29 0	3 8	7 3	13 8
Kahuta	6 0	5 0	18 0	*Nil*	5 3	0 9	4 3	5 7

The fall of the period was hence slightly below the mean of past years. The chief feature of the winter was the early termination of the snowfall in February.

(3) Kashmir (Srinagar).

The following gives a statement of the snowfall at Srinagar in the Kashmir valley:

Month.	Number of days on which snow fell.		Total snowfall of month.			
	1894-95.	1893-94.	1894-95.		1893-94.	
			Ft.	In.	Ft.	In.
December	8	*Nil*	1	6	*Nil*	
January	9	13	5	1	4	3
February	6	9	4	0	2	6
March	5	2	1	8	0	10
Total . .	28	24	12	3	7	7

(4) Lahoul.

The following gives a statement of the snowfall registered at the observatory at Kailang in Lahoul:

Month.	Snowfall, 1894-95.			Snowfall, 1893-94.		
	Number of days on which snow fell.	Total snowfall of month.		Number of days on which snow fell.	Total snowfall of month.	
		Ft.	In.		Ft.	In.
December	7	4	0	2	0	3
January	11	3	6	17	3	6
February	6	2	0	14	4	3
March	13	3	6	11	5	4
April 1st to 5th	4	1	6	3	2	1
Total . .	41	14	6	47	15	5

The snowfall was hence nearly the same in amount as last year. The chief difference was in the month of December. Heavy snow fell in December 1894 and practically none in December 1893.

The Superintendent describes the winter in the following terms:

"The winter set in very early and heavy falls of snow occurred in November. The Rotang Pass, which usually remains open to the middle of January, was closed before the middle of December. The chief feature of the winter has been the intense and persistent cold. Hence, although the snowfall of the whole season has not been excessive in amount, it is now (April) melting very slowly."

(5) Chamba.

December.—Snow fell on eleven days during the month. The fall came down to 4,000 feet on the outer ranges and 2,600 feet on the inner ranges.

January.—Snowstorms occurred between the 7th and 13th and the 19th and 23rd. The snow line came down to about 4,000 feet in these storms.

February.—There were snowstorms between the 1st and 4th and the 8th and 11th, but the falls were light and smaller than usually occur in this month.

March.—A snowstorm on the 24th and 25th March gave heavy snow on the higher ranges. The snow line descended to 6,000 feet on the outer ranges.

April.—Snow fell on the 3rd and 4th of the month down to 6,500 feet. The snowfall appeared to be heavy on the higher ranges. The following gives the snowfall as actually measured at five sites at different elevations in the neighbourhood of Chamba:

Month.	Tisa, 5,000 feet.	Bhandal, 5,500 feet.	Thanela, 7,000 feet.	Barmaur, 7,000 feet.	Kalatop, 8,000 feet.	Killar, 8,600 feet.
	Ft. In.	Ft. In.	Ft. In.	Ft. In.	Ft. In.	Ft. In.
December 1894. . . .	2 1½	2 2	13 4	6 6	15 0	Information not yet received.
January 1895 „	0 5	2 11	2 4	6 10	5 10	
February „	1 3	4 0	4 2	2 0	5 6	
March „	*Nil*	0 2	0 5	0 4	0 4	
April 1st to 15th . . .	*Nil*	*Nil*	0 4	0 3	*Nil*	
Total 1894-95 .	3 9½	9 3	20 7	15 11	26 8	?
Total for period January to March 1893-94.	1 11½	5 0	18 1	...	15 6	?

The Deputy Conservator of Forests, Chamba Division, writes as follows of the snowfall in Chamba during the past winter:

"The snowfall was above the average on the inner ranges, mainly on account of the heavy falls in the early part of the winter. The snow-slides are rather smaller than usual, snow having fallen with less than the usual amount of moisture. The snowfall was well up to the average at medium and lower elevations and on the outer ranges. Snowfall has descended lower and was rather greater in amount than in the winter of 1893-94. As in that winter, it was heavier on the inner than on the outer ranges, but this inequality is entirely due to falls in the early part of the season. Later falls appear generally to have been heavier on the outer ranges.

"From enquiries and my own observations I should say that the past winter more closely resembles that of 1890-91 than any other subsequent winter. The

amount of snow appears to have been much about the same as in 1890-91, but the falls began earlier than in that year, and they were particularly heavy on the inner ranges at the commencement of the season."

(6) KULU.

December.—No report received.

January.—Snow fell on thirteen days in the Kulu and Plach tahsils. Frequent rain fell in the lower valleys. Snow was received above 5,000 feet during the month. The fall of the month was similar to that of January 1894.

February.—Snow fell on four days during the month. The falls only occurred on the higher elevations, about 7,000 feet. There was much hot sunshine, and the snow melted rapidly.

March.—Snowstorms occurred on the higher passes and elevations on six days in the Kulu tahsil and on eight days in the Plach tahsil. The snow melted rapidly during the month. Some Lahoulies crossed the Rotang Pass before the end of the month.

April.—Light falls occurred on the higher elevations on the 3rd and 4th. All the passes were open before the end of the month for foot traffic.

The following table gives the depth of snow on the 25th of each month from December to May, and also on the 25th May of the past six years, on seven of the passes in this district for comparison :

Tahsil.	Name of pass.	Elevation.	Depth of snow on the 25th of					Depth of snow on the 25th May					
			January 1895.	February 1895.	March 1895.	April 1895.	May 1895.	1894.	1893.	1892.	1891.	1890.	1889.

(7) UPPER SUTLEJ VALLEY (POO).

October.—Snow fell on the 5th and 6th down to 13,000 feet.

November.—Snow fell on the 4th and 5th down to 12,000 feet, and on the 28th to 10,000 feet.

December.—Snow fell down to the bottom of the valley (8,500 feet) on the 10th to the 14th, and again on the 25th and the 29th to the 31st. The total fall of the month was 2 feet 3 inches.

January.—Snowstorms occurred on the 1st to 3rd, the 5th to 13th, the 15th and the 20th to 25th. The total fall was 4 feet 11 inches.

February.—There were snowstorms on the 1st and 2nd and on the 6th and 7th. The total fall of the month was 1 foot 3 inches.

March.—Snow fell from the 15th to 17th and from the 24th to 26th, the total amount being 3 feet 2 inches.

April.—No snow fell in the valley; it fell on the mountains above 11,000 feet.

The natives of the district consider the winter to have been a favourable one.

(8) UPPER SUTLEJ VALLEY (KILBA).

November.—Light falls of snow occurred on the 4th, 5th and 19th above 9,000 feet, and heavy falls on the 29th down to 7,500 feet.

December.—Heavy falls of snow were received on the 15th, 23rd and 27th and a light fall on the 31st.

January.—Snowstorms occurred on ten days of the month down to varying heights. The most severe storms were on the 10th, 11th, 21st and 22nd when snow fell down to 5,750 feet.

February.—Heavy snow fell on the 1st, 2nd and 3rd down to 5,750 feet. There was slight snow on the 15th above 7,500 feet.

March.—Snow fell on eleven days during the month. The largest amounts were received on the 15th, when it occurred down to 8,500 feet. The falls on the other days were generally light.

The snowstorms in December, January and February were general over the whole of the mountains on both sides of the Sutlej. The weather was frosty, with cloudless skies, in the intervals between the snowstorms. High north-easterly winds off the Kailas snow-covered slopes prevailed in the month of March. The depth of snow in the middle of April on the Rupin Pass was 22 feet and on the Buldar Pass over 20 feet. The snowfall has been heavier than usual on the higher elevations and has done much damage to the shepherds' huts, etc. The natives of the district say that the snowfall commenced much earlier than usual and that it was abnormally heavy and continuous in March.

(B) NORTH-WESTERN PROVINCES HIMALAYAS.

Kumaon.—The following gives a statement of the estimated snowfall in this district, measured in the same manner as in former years in accordance with arrangements made in the year 1890 :

(D) ASSAM HIMALAYAS.

1. *Darrang.*—No accurate details are obtainable ; but the Bhutia chiefs, who came down in April to the plains to trade and receive payments of their annual stipend, declare the snowfall to be greater this year. This is borne out by the fact that the number of the Bhutia traders has been comparatively small. When the snowfall is very heavy, it blocks up the passes and renders them impassible.

2. *Lakhimpur.*—The Assistant Political Officer, Sadiya, reports that the fall of the snow during the cold season was normal. The Dufflas report that the snowfall on the higher ranges has been much the same as usual.

3. *Kamrup.*—The usual Bhutia darbars were held at Darranga and Subankhatta. According to the information received from the hill men at these darbars the fall in their hills was normal in amount and was much less than last year.

PERSIA.

The following gives the number of days on which snow fell during the past winter at the higher stations on the Indo-European Telegraph line, from which temperature and weather observations are now received by the Meteorological Department :

Summary of the Snowfall data.

The winter commenced earlier than usual in the Western Himalayas. The first heavy fall in the middle or lower ranges occurred in the last week of November. The weather was very unsettled throughout December and January, and frequent storms gave more or less heavy snow during these two months. A large and sudden change occurred in the first week of February, when fine weather set in and continued throughout the month, and until the first or second week of March. This period was chiefly remarkable for the high temperature which prevailed in Baluchistan and Upper India, more especially Sind and the West Punjab. Weather was unsettled in the last three weeks of March, and light to moderate snow fell during that period in the Western Himalayas. It was somewhat unsettled during the first three weeks of April, and numerous hot-weather storms occurred in all parts of India. They were most frequent and severe in Southern India, the Deccan and North-Eastern India, and only slightly affected the Punjab and Kashmir Himalayas. Snow fell on the higher ranges, but the total amount during the month was small, and probably less than the normal fall. Fine, dry and unusually hot sunny weather prevailed in the Upper India hill districts during the latter part of April and in May, and the snow melted with unusual rapidity.

The first noteworthy feature of the cold-weather season of 1894-95 was the very early commencement of the winter snowfall, and the second its excessive amount in December and January. A third noteworthy feature was that the snowfall was restricted to higher elevations than usual, and did not fall below 4,000 or 5,000 feet in the outer ranges. In this respect the precipitation resembled that of 1893-94. The snowfall of the past season was heaviest in the Kashmir and Punjab Himalayas, and was undoubtedly much heavier than usual in December and January. It was very heavy in the interior ranges, but the heavy snowfall did not extend into the Upper Indus valley and the Karakoram range, as it did in 1894. This is further confirmed by the fact that no snow fell at Kashgar during the season, and that the fall at Leh was very small. It **is noteworthy, however, that the season was one of the coldest that has ever been experienced at Leh and Kailang, resembling in this respect the winter of 1892-93.**

The snowfall in the Baluchistan and Afghan mountains and plateaux was undoubtedly much less than usual. It was received chiefly in December and January on the higher elevations, and little or no snow fell on the plateaux below 5,000 feet. It melted very rapidly during the month of February, and practically disappeared before the end of that month. The winter snowfall in that area exercised little or no influence on the meteorology of India from March. The meteorological data received from a number of stations on the Indo-European Telegraph line in Persia indicate that the precipitation in the plateau of Iran was small in amount in December and January, probably less than the normal. There was almost certainly no snow accumulation, except on the highest ranges, in Baluchistan, Afghanistan, and Persia at the end of March, and there was no large extension of snow-clad plateau surface throughout the whole winter.

It is hence almost certain that there has been less snow than usual during the past winter in Persia, Baluchistan, Afghanistan, and probably Turkistan, Thibet and Central Asia, and that the winter ceased unusually early and was very mild.

There were frequent heavy falls of snow in the Punjab and Kashmir Himalayas on the middle and higher ranges during the months of December and January ; and there was hence a moderate to large excess of snow in the beginning of February. Occasional heavy falls were also received in March and the first week of April but the weather was, on the whole, much drier and finer than usual in April and May, and the snow has hence (except perhaps on the higher ranges) melted more rapidly than usual. The result is that at the end of May the excessive accumulation of December and January has probably disappeared. The snow line was almost certainly somewhat higher than usual at the end of May in the Punjab Himalayas.

The winter was characterised by similar features in Kumaon. Snow commenced to fall very early and was heavy in December and January; but from March to May the fall has been comparatively light. The snowfall of the season was hence probably, on the whole, less than in the last winter, and, as it fell chiefly in the beginning of the season, the accumulation is now at the end of May much smaller than in May 1894.

The fall in the Sikkim and the Assam Himalayas is, so far as can be judged from the limited information, less than that of the preceding winter, and probably normal or in slight defect.

Abnormal features of the meteorology of the previous eighteen months.

The year 1894 in many of its meteorological features resembled the year 1893. The winter of 1893-94 was more stormy than usual in the Western Himalayas and the snowfall was heavier than usual, but did not descend to such low levels as it did in the winter of 1892-93. The winter ceased earlier than usual in March, when there was undoubtedly a large accumulation on the higher ranges and in Ladakh and on the Karakoram mountains; but the extension of the snow-clad surface was moderate in amount, due to the character of the precipitation in the hills stated above. Weather was slightly cooler in Upper India in March, and temperature was normal or in slight excess in Northern and Central India in April.

The snow accumulation was probably somewhat less than usual, except on the interior ranges, at the end of April, and ceased to affect the weather in India in the month of April. Weather was much hotter and drier than usual in May over the greater part of Northern and Central India. The hot-weather conditions were on the whole most strongly developed in the eastern half of the Gangetic Plain, West Bengal and Chota Nagpur. The monsoon set in slightly later than usual on the Ceylon and Malabar coasts in the first week of June, but advanced rapidly up the west coast and into the interior, and Central India, Rajputana and the Punjab received a heavy burst of rain in the third week of the month. The monsoon set in earlier in Bengal than usual and was characterised during the first six weeks of its prevalence by the formation of a series of storms of unusual intensity. The total rainfall of the south-west monsoon period from June to September did not differ largely from the normal, except in some of the driest parts of North-Western India, which received abnormally heavy rain from the cyclonic storms of June and July. The rains terminated earlier than usual in Upper India, but were continued much later than usual in the Gangetic Plain, due to slightly marked, but very persistent, abnormal pressure conditions. The central and eastern districts of the North-Western Provinces, Bihar, Baghelkhand and Bundelkhand, and the northern districts of the Central Provinces, received a succession of heavy downpours in October and the first week of November during feeble cyclonic storms, which gave in some districts a total rainfall for that short period almost as large as during the preceding four months of the rains proper. High pressure conditions giving fine weather set in over the Gangetic plain in the second week of November. Madras obtained moderate to heavy rain during the earlier stages of the cyclonic storms which gave such heavy bursts in the Gangetic plain, and also continued to receive moderate rain during the month of November. North-east winds and very dry, cool weather set in over Burma in the third week of November, and extended across the Bay into the Madras coast districts in the second week of December, and finer weather than usual prevailed in Southern India during the last half of the month. The rainfall of the south-west monsoon season was favourable over the greater part of India. There was a large excess in Sind, Cutch, Kathiawar and Gujarat, chiefly due to the cyclonic storms of July, and in the North-Western Provinces, largely due to the very abnormal and excessive rainfall in that area in October and November.

Frequent rain fell at the Persian stations in October and November, and the cold-weather rainfall in that area began at least six weeks earlier than usual. These abnormal conditions extended to Baluchistan and Upper India in the latter part of November, and weather was unusually disturbed in December. Numerous feeble disturbances occurred, which gave very early and more or less heavy snow in the Punjab and Kashmir Himalayas. The winter hence set in much earlier than usual, due apparently to conditions first shown in the Persian area.

The following gives a very brief summary of the chief features of the meteorology of India during the past five months:

January.—Pressure was ·009 inch in defect for the whole of India. Pressure was locally in slight excess in North-Western India, and in slight defect in Burma, Assam, and the Peninsula. Pressure was in moderately large defect at the hill stations, relatively to the plains. A series of ill-defined disturbances gave frequent rain in North-Western India. The precipitation was less than usual in Baluchistan, and the areas chiefly affected by these storms were the hill and submontane districts from Kashmir to Almora. The rainfall was largely in excess in these districts, and the snowfall very heavy in the higher ranges of the Kashmir and Punjab Himalayas. No rain fell in Burma or the Peninsula during the month, and the rainfall of the month was hence below the small normal of the period over the whole of the Peninsula, North-Eastern India and Burma. The day temperature was in moderate to large defect in North-Western India and in slight excess in Burma and the Peninsula. The night temperature was in moderate defect in Baluchistan, and in slight defect in the Indus Valley districts, and was in slight to moderate excess over the remainder of India. The only important features of the mean temperature conditions were a moderate deficiency in Sind, the Punjab, and Rajputana, and moderate excess in the Central Provinces. The character of the precipitation and the variations of the temperature conditions from the normal were similar to those of January 1894.

February.—The mean pressure of the Indian land area was ·009 inch above the normal. Pressure was in very slight local excess in North-Eastern India, and in slight local defect in the Indus Valley and Burma. Pressure was very largely in excess at the hill stations in Northern India, relatively to the neighbouring plain stations—a condition which accompanied the prevalence of unusually fine and dry weather throughout the month. The rainfall was small in amount and generally below the normal. The deficiency was large in Sylhet and South-East Bengal, which usually receive moderate rain from thunderstorms in February. The day temperature was in slight excess in Orissa and North and East Bengal, and in moderate to large excess in North-Western India. It was in moderate defect in Khandesh, the Bombay Deccan, Berar, and the western districts of the Central Provinces, where weather was more cloudy and showery than usual. The night temperature was generally above the normal, the excess being greatest in the Central Provinces, Berar, the East Punjab, and Central India (East). The variations of the mean temperature were generally small in amount, except in Upper Sind, Baluchistan, the Punjab and North Rajputana, where it was from 2° to 5° warmer on the mean of the month than usual. The air was somewhat more humid than usual in North-Western India, Central Provinces, and drier over the remainder of India. Skies were unusually free from cloud over the whole of India. The most noteworthy feature of the month was the excessive temperature in Upper India and Baluchistan.

March.—The mean pressure for the whole of India was ·018 inch below the normal. Pressure was in slight local excess in Central India, Chota Nagpur, the north and east of the Peninsula, and in defect elsewhere; but the local variations were small. Pressure was in slight excess at the hill stations in Northern India relative to the plain stations. The month was on the whole finer and drier than usual, but was disturbed in the North and Central Punjab and hill districts, which received frequent showers. The rainfall of the month was hence in moderate excess in the North-West and West Punjab, and in slight excess in Central India and the Central Provinces, but was more or less in defect in the remainder of India. The deficiency was large in Sylhet and East Bengal, which usually receive frequent rain in March. The mean rainfall of Assam Surma (*i.e.*, Sylhet and Cachar) was only 4·03 inches, or 5·17 inches below the normal. The mean temperature conditions of the month varied slightly from the normal. The chief feature was a moderate deficiency of temperature in the western half of the Central Provinces, chiefly due to decreased day temperature.

April.—The mean pressure of the Indian area was ·013 inch above the normal. Pressure was locally in moderate excess in North-Eastern India, more especially in North Bengal, where the pressure anomalies averaged ·04 inch. It was locally in

defect in Burma, the greater part of the Peninsula, and Western and Central India. The deficiency was greatest in Upper Sind, Cutch, Kathiawar and Gujarat. Weather was much more frequently disturbed than usual during the month, and numerous series of thunderstorms or duststorms occurred. They gave unusually frequent and heavy rain in the Deccan and Southern India. Malabar received an average of 5·1 inches (2·8 inches above the normal), Mysore 3·3 inches (1·9 inches in excess), Coorg 5·3 inches (2·8 inches in excess), and Madras South and South Central, 3·8 inches (2·0 inches in excess). The rainfall of the month was also in excess over the whole of Northern and Central India, with the exception of Assam and Deltaic Bengal. A cyclonic storm which formed near the Andamans and advanced across the Arakan coast into Burma during the last week of the month gave a heavy downpour. It is very noteworthy that 1894 is the third year in succession in which a cyclonic storm has formed in the Bay near the Andamans and passed into Burma during the last week of April.

Temperature was in moderate to considerable excess in Baluchistan, Upper Sind and the South-West Punjab. It was more or less in defect over the remainder of India, the deficiency being slightly more marked in the day than in the night temperature. It ranged between 2° and 4° in the North-Western Provinces, Bihar, West Bengal, Chota Nagpur, Orissa, the eastern districts of Central India, the eastern and central districts of the Central Provinces and the East Deccan, and was on the whole greatest in Chota Nagpur and West Bengal. This feature of lower temperature than usual prevailed from the beginning of the month to the end of the third week. Temperature increased rapidly in the last week, and dry, hot westerly winds prevailed in Northern and Central India.

May—The mean pressure of the Indian area was slightly below the normal (·007″). Pressure was relatively to the general conditions more or less considerably in defect in Northern and Central India and in excess in the Peninsula. This contrast of conditions, it may be noted, almost invariably obtains in years of strongly marked hot-weather conditions (following milder winters than usual in the Western Himalayas). The local deficiency was most marked in the Punjab and central districts of the North-Western Provinces, and the local excess was greatest in the west coast districts from Bombay to Karwar. The following gives data for stations in these two areas of greatest excess and deficiency of pressure:

Area of greatest deficiency of pressure.			Area of greatest excess of pressure.		
Station.	Variation of mean 8 A.M. pressure of month from normal.	Anomaly.	Station.	Variation of mean 8 A.M. pressure of month from normal.	Anomaly.
	″	″		″	″
Mooltan	—·056	—·049	Bombay	+·036	+·043
Dera Ismail Khan	—·051	—·044	Ratnagiri	+·045	+·052
Rawal Pindi	—·043	—·036	Goa	+·041	+·048
Lahore	—·045	—·038	Karwar	+·042	+·049
Ludhiana	—·046	—·039	Mangalore	+·031	+·038
Sirsa	—·041	—·034			
Allahabad	—·046	—·039			
Lucknow	—·036	—·029			
Agra	—·040	—·033			

A reference to last year's forecast will show that the general character of the pressure variations in May 1894 and May 1895 was very similar, the chief difference being that they were slightly more marked in 1894.

The combination of increased pressure in Western India and diminished pressure in Northern India displaced the trough of low pressure from the south of the Gangetic plain to the centre. On the mean of the month it was defined by the stations of Hazaribagh, Gaya, Allahabad, Lucknow, Cawnpore, Meerut and Montgomery. An important feature was the local deficiency of pressure at Allahabad. The trough of low pressure was during two periods of the month transferred to the submontane districts, and very strong, hot, dry westerly winds prevailed (as in May 1894) in the Gangetic plain during the greater part of the month.

Temperature was excessive over the whole of India, but was in slight to moderate defect in Burma, which received almost daily showers during the month. It was most largely in excess in Upper India, and the month was one of the hottest on record in the Punjab. The following gives data illustrating the temperature conditions of the month:

Division.	Variation from normal of month of		
	Maximum temperature.	Minimum temperature.	Mean temperature.
Burma	—2·4	+0·6	—0·9
Assam	+1·3	+1·6	+1·5
Bengal	+0·7	+1·7	+1·2
Bihar	+0·1	+2·7	+1·4
Chota Nagpur	+0·7	+3·0	+1·9
North-Western Provinces and Oudh	+2·1	+3·4	+2·8
Punjab	+6·5	+5·4	+6·0
Sind	+2·4	+0·9	+1·7
Rajputana	+4·4	+4·1	+4·3
Central India and Gujarat	+1·6	+1·5	+1·6
Central Provinces and Berar	+1·8	+1·9	+1·9
Bombay	+0·6	+1·1	+0·9
Madras	+1·6	+0·8	+1·2

It may be noted that the highest maximum temperatures recorded in North-Western India were no higher than have been recorded in several years previously, and more especially in the hot weathers of 1887 and 1892. But, so far as can be judged, the excessive temperature was unusually persistent, due to the comparative absence of hot weather duststorms and thunderstorms in the interior. The following gives a comparison of the mean temperature of the Punjab in May 1895, with the corresponding months of previous years:

	Variation of mean temperature from the normal in the month of May															
	1895.	1894.	1893.	1892.	1891.	1890.	1889.	1888.	1887.	1886.	1885.	1884.	1883.	1882.	1881.	1880.	1879.
Punjab	+6·0	+3·9	+1·4	+5·8	—1·4	+2·0	+0·1	+2·7	+5·4	+0·7	—3·1	+1·7	+0·7	+0·2	+1·7	+3·5	+3·0

The previous statement shows that the mean temperature of the month of May 1895 in the Punjab was higher than in the corresponding month of the previous sixteen years. The only years during that period in which the May temperature was almost as largely in excess were 1892 and 1887.

The following gives a summary of the rainfall of the cold weather and hot weather periods of the present year:

Division.	Cold weather Rainfall.		Hot weather Rainfall.	
	Variation from normal.	Percentage variation from normal.	Variation from normal.	Percentage variation from normal.
	Inches.		Inches.

Bihar	—0·34	—27	—1·29	—33
Chota Nagpur	—0·85	—56	+0·20	+4
North-Western Provinces and Oudh	+1·27	+79	—0·38	—24
Punjab	+0·13	+6	+0·39	+16
Sind	—0·30	—36	—0·37	—77
Rajputana	+0·03	+4	—0·29	—25
Central India and Gujarat	+0·35	+61	+0·21	+34
Central Provinces and Berar	+0·22	+29	—0·13	—7
Bombay	—0·23	—74	—2·82	—48
Madras	—0·45	—80	+0·06	+2

The following summarizes the chief features of the meteorology of the past five months, which require to be taken into account in estimating the distribution of the rainfall of the approaching monsoon:

1st.—The abnormal distribution of the snowfall of the past winter.

2nd.—The slightly marked abnormal pressure and temperature features of January and February, which were in accordance with the distribution of the snowfall in the Western Himalayas.

3rd.—The prevalence of somewhat more disturbed weather than usual in March and April, as is generally the case after heavier snowfall in January and February in the Western Himalayas. This disturbed weather was followed by very strongly marked hot-weather conditions in May over the whole of India.

The pressure conditions of the hill stations relative to the plains in May were in accordance with the strongly marked hot weather conditions in the plains. There has, however, been an undue prevalence of northerly winds at Murree and Simla, probably due mainly to the temperature and pressure conditions of the adjacent plains of Northern India, but in part perhaps to the local excess of snowfall in Kashmir.

Comparison with previous years.

During the past twenty-six years the snowfall in the Himalayas was heavy and more or less considerably above the normal in the years 1868, 1877, 1878, 1883, 1885, 1889, 1891, 1893 and 1894. In all these years, except 1889, 1893 and

1894, general heavy snow fell either in April and May in the Punjab and Himalayas, and these months were unusually cool in Northern or North-Western India. The pre-monsoon conditions of pressure and temperature were hence in the majority of these years very different from those prevailing during the present year up to the end of May. As already pointed out, the present year exhibits the combination of early and heavy snowfall during the normal winter period (December to March) in the Punjab and Kashmir Himalayas, and of strongly marked hot-weather conditions in Northern India, and more especially in Upper India, in May.

The following gives a brief statement of the chief features of the years 1887, 1890 and 1894, which more or less resemble 1895 in the general character of the winter snowfall and also of the hot-weather pressure and temperature conditions in India:

1887.—The cold weather was unusually free from cold-weather storms. Although little rain fell in the plains of Northern India, moderately heavy snow is stated to have fallen in January and March in the Western Himalayas. March and April were warmer than usual in North-Western India and the Central Provinces, and May was an excessively hot month in Upper and Central India. Pressure was in slight to moderate defect on the average of the whole of India during the period January to May. It was relatively to the general conditions in considerable defect in Northern India in May, the deficiency being large in Upper India (—·05 inch) and moderate in North-Eastern India. It was in considerable excess in the west of the Peninsula, the excess averaging ·06 inch in the Konkan and Malabar Coast districts. The mean temperature of the month of May was 6° above the normal in the Punjab and 3° in the North-Western Provinces. The Bengal current set in earlier than usual at the end of May, and the Bombay current about the normal time in the first week of June. Both currents gave fairly steady rain during the months of June, July and August. They retreated from Upper and Central India at the end of the third week of September. The monsoon rainfall was in slight defect in Arakan, Bengal, Assam and Orissa, normal in Burma and the Deccan, and in excess over nearly the whole of North-Western and Central India and the Central Provinces.

1890.—The cold weather was unusually dry and free from storms. The snowfall was less than usual in Baluchistan and Afghanistan, and occurred in January and February. It was very deficient in these months in the Western Himalayas. Moderate snow fell on the higher ranges in March, and heavy snow for a short period during the last week of April. It, however, melted rapidly, and its effect on the meteorology of Northern India was very brief. Pressure was in general defect from January to May in India. Pressure in May, relatively to the general condition, was in slight defect in Northern India, and in moderate excess in the western half of the Peninsula. Temperature was 2° in excess in Rajputana and the Deccan, and the variations of the temperature as of the pressure conditions were nowhere large. The south-west monsoon rains set in slightly earlier than usual on the Bombay coast and at their normal date on the Bengal coast. They advanced more rapidly than usual into the interior, and were fully established over the whole of India in the fourth week of June. The rainfall was unusually abundant in June and July, and on the whole normal, but unequally distributed, in August and September. The rainfall of the whole south-west monsoon period was hence normal or in excess over by far the greater part of India. The excess was greatest relatively to the normal in Bihar (34 per cent.), the Punjab, Orissa, Bengal and the Konkan (slightly exceeding 10 per cent.). The rainfall of the period was practically normal in the Central Provinces and the Deccan. It was in moderate defect in Upper Burma, Gujarat, Sind and Southern India.

1894.—The features of this year have been already in part stated, and the following hence gives a very brief summary. Moderate to heavy snow fell in the Western Himalayas in January and February. The snowfall in Baluchistan and Afghanistan was less than the normal. The snowfall did not come down to so low an elevation as in the preceding winter. Little or no rain fell in April and May. Temperature, which was below the normal to a slight extent in Northern India during the cold weather, increased rapidly in April and May, and was largely

in excess in the latter month, the area of greatest excess including Bihar, Chota Nagpur and the eastern districts of the Central Provinces. Pressure was in May locally in considerable defect in Northern India, and in considerable excess in the western half of the Peninsula. The south-west monsoon rains set in somewhat later on the Malabar coast than usual during the first four days of June. The monsoon currents advanced with unusual rapidity into the interior of Northern India, and monsoon conditions were established over the whole of India before the end of the third week of the month. The rainfall was in general excess. It was very unequally distributed in June and July, due to the occurrence of a series of cyclonic storms of unusual intensity. Those districts which received deficient rain in June and July, as a rule obtained abundant and well-distributed rain in August and September, and the rainfall for the complete period, June to September, was on the whole favourable and well-distributed. The rains were, however, prolonged to the first week of November in the North-Western Provinces, and that area received a succession of downpours such as have not been experienced in these months during the past fifty years.

The meteorology of the cold and hot weathers of the years 1884, 1888, 1889, 1891 and 1893 has some resemblance to that of the corresponding seasons of the present year; but the resemblance was very slightly marked; and hence of no value for the present comparison.

Probable character of the south-west monsoon of 1895.

The present year is the fifth of a series of years characterized by very marked and exceptional meteorological features. The year 1893 was the coolest year on record in India, and the rainfall of the year was much greater than had been received in any year during the past thirty years. The rainfall of the year 1891 was 0·30 inch in defect for the whole of India. The rainfall during the past three years has been very largely in excess, as is shown by the following data:

Year.	Average rainfall of whole of India and Burma.	Excess in inches.
1892	46·18	+5·09
1893	50·16	+9·07
1894	47·56	+6·47

These figures show that India is going through a cycle of heavy rainfall, such as it has not experienced for thirty years at least and probably for much longer.

The following give complete data of the rainfall and its anomalies (or variations from the normal fall) for the whole of India for the years 1864—1894. The twenty-four divisions into which India is arranged for the data of this table are the rainfall divisions adopted by Mr. Blanford in his monograph on the "Rainfall of India."

Rainfall anomalies.

Year.	Number of provinces.			Net anomaly or variation from the normal, Indian area only.	
	Fall excessive.	Fall normal.	Fall deficient.	Excess.	Deficiency.
1864	4	...	16	...	—5·52
1865	8	1	11	...	—0·77
1866	6	...	14	...	—2·09
1867	8	2	10	+2·77	...
1868	5	...	16	...	—6·63

Rainfall anomalies—contd.

Year.	Number of provinces.			Net anomaly or variation from the normal, Indian area only.	
	Fall excessive.	Fall normal.	Fall deficient.	Excess.	Deficiency.
1869	8	1	13	+0·40	...
1870	14	...	10	+1·49	...
1871	12	1	11	+0·93	...
1872	14	3	7	+2·31	...
1873	3	1	20	...	—4·46

1892	15	...	8	+4·55	...
1893	22	...	1	+8·94	...
1894	17	...	6	+6·48	...

The abnormal features of the pressure, temperature, and other conditions of the present year are strongly marked, and the probable effect of these in determining and modifying the rainfall of the approaching monsoon period is stated below. It should, however, be remarked that in drawing up the forecast, if too large or too small a weight or value be given to any one of these abnormal conditions, the divergence of the forecast from the actual will be greater in a year like the present year than in ordinary years.

The peculiar features of the meteorology of the cold-weather months of 1895 in India were:

(1) Heavier precipitations than usual in the plains of Northern India and in the Western Himalayas during the months of December and January. The precipitation occurred as rain to much higher levels in the hill districts, and in this respect resembled the previous winter of 1893-94.

(2) The snowfall was very deficient in Baluchistan and Afghanistan and probably also in Persia and Central Asia, and the winter considerably milder than usual.

(3) The winter commenced unusually early on the higher ranges of the Kashmir and perhaps the Punjab Himalayas in November, and continued until the middle or end of April. The snowfall of the period was much heavier than usual, and hence there was a considerable accumulation in March and April. It has probably melted much more quickly than usual in May, and the snow line at the end of that month was as high as usual.

(4) The snowfall in the Eastern Himalayas in January and February was almost certainly less than usual. It was probably normal in amount in March and April.

The snow accumulation at the beginning of the winter 1894-95 was probably normal or somewhat less than usual in November. The snowfall in the higher ranges of the Kashmir Himalayas was undoubtedly larger than usual from November to the middle of April; but has probably chiefly added to the depth of snow in the ordinary area of perpetual snow and the intermediate valleys, and has not given a large extension of snow-clad surface. The conditions in India in the months of February and March show fully that the influence of the snow accumulation was very slight at that time. Snow has fallen to some extent in both the Sikkim and Western Himalayas during the past two months. The few reports that have been received do not indicate to what extent this has modified the pre-existing conditions; but so far as can be judged from the statements, the snowfall during the past two months has not appreciably altered the character of the snowfall accumulation in that area.

This inference from the reports is confirmed by the character of the weather in India during the past month. The conditions of pressure and temperature in that month were such as usually occur when the winter in Baluchistan, Afghanistan and the Western Himalayas has generally been milder than usual. The following summarizes the chief features of the month of May:—

(1) Normal pressure on the average over the whole of India.

(2) Very deficient pressure and increased temperature in Northern India, more especially in the Punjab and North Rajputana. The local deficiency of pressure was greatest in the area in which temperature was most largely in excess and which was nearest to the area of heaviest snowfall during the winter.

(3) Increased pressure locally in the western half of the Peninsula and more especially in Gujarat, Cutch and South-West Rajputana.

It may be noted that the temperature and pressure conditions in India in May 1895 strongly resemble in all their larger features those of May 1894. These local conditions will undoubtedly modify the rainfall distribution of the south-west monsoon considerably. They will probably determine the Bay current more largely than usual towards Burma, the North-Western Provinces, and the Punjab and the Bombay current more to the Central Provinces and Upper India.

The mean position of the trough of low pressure will probably be slightly further north than usual on the average of the whole period, but to a less extent than in May 1894.

The antecedent hot-weather conditions in India during the past three months are favourable, and indicate that it is probable the monsoon currents will be at least of normal strength.

The information received up to date from ships and other sources of information of the pressure and weather conditions of the neighbouring seas, and more especially in the northern half of the Indian Ocean, suggests that the south-east trades are not strong this year, and hence that the conditions in the sea areas are less favourable for a strong monsoon than they were last year.

It should, however, be carefully remembered that the past three years have been a period of excessive rainfall in India, due to general conditions extending over the Indian Ocean as well as Southern Asia, and probably over a still larger area. There are slight indications that these general conditions are now changing, and in the absence of information for the greater part of the whole Indian monsoon land and sea area it is not possible to judge how far this change may be affecting the strength of the south-east trades in the Indian Ocean, and hence also the commencement and strength of the south-west monsoon currents during the present year. It is therefore necessary to accept the inferences given below with greater reserve than usual, and if it should result that the monsoon currents are (notwithstanding the presence of favourable conditions in India) as much below their normal strength as they were above it in 1893 (when the antecedent conditions in India were on the whole unfavourable), the inferences will require to be suitably modified.

Judging only from the conditions in India itself and the known conditions in the Indian seas, it is probable that the monsoon currents will be of normal strength, and that the Bay current is more likely to be above its normal strength than the Bombay current. Assuming that the currents will be of normal strength, the comparison with the previous years (more especially 1887, 1889, 1890, 1892 and 1894) indicates that it is most probable they will set in about the normal time on both the Bengal and Bombay coasts. The Bombay current is more likely to be retarded than the Bengal current, and there is a slight probability it may be not so strong as usual in June.

The following is a statement of the inferences respecting the character and distribution of the south-west monsoon rains of 1895 from the comparison of the antecedent conditions of the present year with those of previous years, and based chiefly on the facts and data stated above:

(1) Snowfall conditions in the Western Himalayas and the Afghan Mountains and the pressure conditions in India are favourable to the establishment of at least normal monsoon currents in India. The conditions in the Indian seas are very imperfectly known, but appear to indicate that the currents will most probably not be above their normal strength and may be below it. It is, however, probable that they will be of about normal strength, and the forecast is drawn up on that supposition. The Arabian Sea current will probably be established about its normal time on the Bombay coast in the second week of June; but there is a slight probability it may be weak during the month of June. The current will probably advance into the interior more rapidly than usual.

(2) Conditions are, on the whole, favourable to the prevalence of monsoon currents of at least normal strength in the Bay of Bengal. The rains will probably be established about the normal period in Bengal (the second or third week of June).

(3) Pressure conditions are favourable in Burma and Bengal. The rainfall in Upper Burma will probably be normal or in moderate excess and in Lower Burma normal. The conditions are slightly less favourable in Bengal, where it is probable that the rainfall will not be above the normal on the average of the whole area and may be in slight defect. It is very probable that it will be normal or in slight to moderate excess in Bihar, Chota Nagpur and Orissa, and probable that it will be normal or in slight defect in Assam and Bengal.

(4) Conditions in the North-Western Provinces are favourable. The rainfall on the average of the whole province will very probably

be at least normal. The rainfall will probably be in excess in the eastern and submontane districts, and normal or in slight defect in the south-western and western districts.

(5) Conditions are on the whole favourable in the eastern and southern districts of the Punjab. The rainfall will probably be less than usual in the south-western and perhaps the central districts, but be at least normal in amount in the submontane and southern districts, and may be in moderate excess.

(6) Conditions are somewhat unfavourable in Sind, Cutch, Kathiawar, and West Rajputana. The rainfall will probably be more or less in defect. The rainfall of the period in these areas, it should however be noted, depends very largely upon the tracks of the cyclonic storms of the rains, which it is not possible at present to forecast. In Eastern Rajputana the rainfall will either be normal or in slight excess, depending upon the actual strength of the Bombay current.

(7) Conditions are nearly as favourable in Central India as in the North-Western Provinces and Bihar, and it is hence very probable that area will receive at least normal rainfall and probable that it will be in moderate excess.

(8) Conditions are on the whole favourable in Berar, the Central Provinces, the Bombay Deccan, and Hyderabad. It is hence probable that they will receive normal rainfall. The conditions are most favourable in the eastern and northern districts of the Central Provinces, and there is hence a moderate probability they may receive rainfall in moderate to considerable excess of the normal.

(9) A comparison of the conditions in Southern India and the Carnatic with those of similar years indicates that the rainfall will probably be normal or in slight defect, more especially in the southern districts. It is, however, very difficult to forecast for this part of India, as rain in Southern India during the monsoon proper occurs chiefly during the intervals of breaks in the rains of Northern India, and is hence essentially of irregular occurrence.

It should be carefully noted that the preceding probabilities are obtained on the assumption that the currents will be approximately normal in strength.

The general conclusion is that the rainfall may be deficient to a slight or moderate extent in Sind, Cutch, the South-West and Central Punjab and West Rajputana; that it will very probably be at least normal in amount in the northern half of the Peninsula, Central India, East Rajputana, the East Punjab, the greater part of the North-Western Provinces, Bihar, Chota Nagpur, and perhaps Burma, and may be in moderate excess in the Gangetic Plain and Central India.

It is too early to estimate the probability of a longish break in the rains in July or August; but there are no indications at present of such an event.

It should be noted that, in the preceding statement, when it is stated that an event is probable, the chances in its favour are at least 5 to 2, and when very probable, at least 5 to 1.

JOHN ELIOT,

SIMLA, *3rd June, 1895.* *Meteorological Reporter to the Government of India.*

DENZIL IBBETSON,

Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the Week ending at 8 a.m. on Saturday, June 1st, 1895.

At the commencement of the week under review very strongly accentuated hot weather conditions prevailed throughout the whole Indian region. Pressure was highest in Ceylon and the south-west of the Peninsula, and from that region readings steadily decreased, and were lowest along the foot of the Himalayas. On the 26th the barometric difference between these two regions was 0·443 inch, on the 27th 0·529 inch, on the 28th 0·566 inch, and on the 29th 0·512 inch, so that as the normal difference at this period of the year is 0·235 inch, the barometric gradient between Northern and Southern India was more than twice its ordinary steepness. The 29th of May was the last day of these very accentuated hot weather conditions, for after that day the barometer rose rapidly to slightly over Northern India, and was steady in the south, so that gradients immediately decreased, and, though the general distribution was not altered, the intensity of the conditions was considerably modified. During the prevalence of the hot weather conditions in their most marked form, strong westerly (south-west —north-west) gales blew all over the country, the heat was excessive, and humidity very low with duststorms, and dusthaze reported from many places. Towards the close of the week, when pressure had risen fast over Northern India, and had begun to fall in the south, the winds became irregular along the Malabar Coast, and showery weather appeared there, but this was practically the only indication of the monsoon on the west side of India afforded by the observations. In Eastern India conditions have been similar to those reported last week. Very strong southerly winds have blown from the Bay into Burma and Bengal, and these winds have been accompanied with moderate to heavy showers of rain, which, however, have not been sufficient to keep the weather even as cool as is usual at this time of year. The warmest part of India both absolutely and relatively was the north-west, where the average temperature excess varied between $4\frac{1}{2}^{\circ}$ and $9\frac{1}{2}^{\circ}$ during the first four days of the week, though it was much less at the close.

Daily Summary—*Sunday.*—Pressure had decreased over the Gangetic plain and North-Eastern India, and increased elsewhere. It was highest in Ceylon, and lowest over the Gangetic plain, and gradients were steeper than usual. The wind was southerly in Burma and Lower Bengal, easterly in North Bengal and along the foot of the Hills, and northerly in the North Punjab, elsewhere the directions were generally between north-west and south-west. The force was strong, more particularly at the head of the Bay; the mean temperature was in defect of the normal in Bengal and Upper Burma, and in excess elsewhere—most so over the south Gangetic plain.

Monday.—Pressure had decreased briskly to rapidly over Northern India, and been nearly steady in the south. Hence the pressure difference had still further increased. The readings were highest in the extreme south, and lowest

in the extreme north. The winds were unchanged. A strong westerly gale prevailed over a large part of the country, and a southerly gale at the head of the Bay. The mean temperature was in defect in North Bengal and Upper Burma, and in excess elsewhere, the heat in relation to the average being greatest in West and Lower Bengal.

Tuesday.—Pressure had decreased slightly in the Punjab and Kashmir, and been steady elsewhere. Hence the changes were very slight, but such as they were they tended to increase gradients which had hence become very steep. Pressure was considerably in excess in the west and south of the Peninsula, and largely in defect in Northern India. The winds were the same as on the preceding day. Temperature was in slight defect in Assam and Upper Burma, normal in Sind, Kathiawar, and the West of the Peninsula, and in excess elsewhere. The excess was again greatest in West Bengal.

Wednesday.—Pressure had decreased slightly in the Peninsula, and increased slightly to briskly in Northern India. In consequence the contrast between the deficient pressure in Northern India and the excessive pressure in the south was less marked. The winds were practically unchanged as regards direction, but the force had decreased fairly generally. Temperature was below the normal over Sind, Kathiawar, and Gujarat, and normal in Bombay, while it was largely below the normal in Assam, but in all other places the heat was excessive—more particularly in the Punjab, the Gangetic plain, and West Bengal. The contrast of temperature over North-Eastern India was very striking.

Thursday.—Pressure had increased briskly to rapidly over Northern India, and slightly in the Peninsula. These changes had still further reduced gradients. Pressure was normal over Northern India, and in considerable excess over the west of the Peninsula. The winds had fallen off generally, both the southerly winds at the head of the Bay, and the westerly winds elsewhere. Easterly winds were extending eastward up the north side of the Gangetic plain. Temperature had fallen partly on account of the easterly winds, partly on account of dust-storms. Though still excessive over West Bengal, the Gangetic plain, and the Punjab, the excess was much less than on the last few preceding days. In Bengal and Gujarat there was a considerable deficiency.

Friday.—Pressure had increased slightly to briskly in Northern and Central India, and decreased in Ceylon and Southern India. Pressure was in considerable excess over North Bombay, Berar, Central India, and Rajputana. The winds were even less strong than on the previous day, and the easterly winds up the Gangetic plain continued to extend. The mean temperature remained in defect over Bengal, part of Burma, and the whole of Kathiawar, Gujarat, and Berar, and in excess elsewhere. The excess was very large in South-West Bengal.

Saturday.—Pressure conditions on this day were approximately normal, the only abnormal features of importance being a slight deficiency in the Punjab and a slight excess in North Bombay. Winds were generally unchanged, but the easterly current over the Gangetic plain continued to extend. The mean temperature was largely in defect over East Bengal, and moderately in defect over North Bombay, &c., but was in excess elsewhere, the heat relatively to the normal being most excessive over Madras.

Temperature.—The strongly marked hot weather conditions, which prevailed last week throughout India, have continued during the week under review. A largish fall occurred between the last day of last week and the first day of the present week, but on the 27th the temperature rose again, and the crest of the wave was registered on the 28th, after which date a rather rapid fall set in.

The following table shows the variation of the mean temperature from the normal in the different provinces of India for each day of the week:

Province.	May 1895.						June 1895.	Mean variation of week.
	26th	27th	28th	29th	30th	31st	1st	
	°	°	°	°	°	°	°	°
Burma	—0·4	+0·3	+0·3	0	+0·5	—1·1	+0·1	0
Bengal and Assam	—1·2	+2·6	+5·9	+4·6	+1·6	+0·8	—0·1	+2·0
North-Western Provinces and Oudh	+4·5	+5·2	+7·9	+9·7	+4·4	+1·8	+0·9	+4·9
Punjab	+5·2	+5·1	+7·1	+8·8	+4·3	+2·9	+2·7	+5·2
Bombay	+1·5	+1·0	+1·5	+0·7	+0·2	+0·4	+2·5	+1·1
Central Provinces and Berar	+4·3	+3·4	+2·9	+2·0	+0·3	+0·4	+1·3	+2·1
Central India and Gujarat	+2·7	+2·4	+1·1	+0·1	—1·9	—2·3	—0·9	+0·2
Sind and Rajputana	+4·7	+3·5	+2·4	+0·2	+0·1	—0·5	+0·1	+1·5
Madras	+0·5	+1·7	+2·9	+3·7	+2·6	+3·2	+4·3	+2·7
Mean for whole of India	+2·4	+2·8	+3·6	+3·3	+1·3	+0·6	+1·2	+2·2

The provincial variations show that the mean temperature of the whole week in Burma was exactly normal, and that in all the other provinces the heat was excessive, the abnormal variations ranging from +0·2° in Central India and Gujarat to +5·2° in the Punjab. In the case of Bengal the total variation for the whole week shows an excess of 2°. This result is somewhat misleading, as while West Bengal had almost throughout a very large excess, East Bengal, on the contrary, had, owing to the showery weather, a very steady deficiency. The last two days of the week were very much cooler than the previous five days in nearly all provinces, except Madras, where the excess increased, and reached its maximum on the 1st June.

The highest maxima reported on each day were—

On May	26th	120·0°	at	Jacobabad.
„	27th	120·5°	„	„
„	28th	123·0°	„	„
„	29th	122·0°	„	„
„	30th	118·0°	„	„
„	31st	117·6°	„	„
On June	1st	116·1°	„	„

The above shows that Upper Sind was steadily the seat of the absolutely greatest heat throughout India during the whole week. The hottest day was the 28th, when the very high maximum of 123° was registered.

Rainfall.—The weather conditions of the week under review have been generally very similar to those which prevailed during last week. The greater part of the country has been under the influence of hot, strong westerly winds which have brought up no moisture, and which have yielded only a few drops of rain during local dust and thunder storms. These winds have been confined to North-Western and Central India and the Peninsula, and have not penetrated into

Bengal, Assam, and Burma, in which provinces moist southerly winds from the Bay have held steadily throughout the week. These winds have been exceptionally strong and have brought up much moisture, so that all the rainfall divisions in North-Eastern India show good rainfall returns. On the contrary, in other parts of the Indian region, large tracks of country exhibit little or no fall. In the case of eighteen divisions the rainfall has been absolutely *nil*, and in the case of eight more it has been less than one-tenth of an inch as the total fall for the whole week. The regions which report absolutely or practically no rain include the following divisions: Bihar (South), all the North-Western Provinces divisions, except Oudh (North), and the North-Western Provinces (Submontane), all the Punjab divisions, except the Hill districts, Khandesh, Berar, all the Central Provinces divisions, Gujarat, Kathiawar, Sind, all the Central India and Rajputana divisions, the East Coast (North), Hyderabad (South), and the East Coast (Central). The rainless, or practically rainless, region was consequently larger than was the case last week. In all parts of the country, except the divisions quoted above, the rainfall received was effective, and in some places fairly heavy. The heaviest average actual rainfall reported was 14·88 inches in Assam (Surma); this was followed by 6·49 inches in Tenasserim, and 6·13 inches in Assam (Brahmaputra). The smallest effective falls reported were 0·10 inch in Chota Nagpur and 0·11 inch in the Konkan.

The third column of the table shows that the week's rainfall was largely in excess of the normal in Assam (Surma), considerably in excess in Assam (Brahmaputra), and slightly in excess in Eastern and Deltaic Bengal, Oudh (North), and Madras (South). In all other parts of the Indian area the rainfall was lighter than usual. In Tenasserim, Lower Burma, North Bengal, Coorg, the Konkan, and the East Coast (North) the abnormal deficiency varied between 1 and 2 inches, in Malabar it was over 3 inches, and in Arakan it was over 4 inches. This leads to the most important feature in the rainfall returns of the week, *viz.*, the delay in the establishment of the south-west monsoon current. In most years the rainfall attributable to the first advances of this current is heavy in the south of the Indian and Burmese Peninsulas by the end of May, but in the present year this rainfall has not commenced in either part of the Indian region, and consequently the fall has been short in Tenasserim, Lower Burma, and Arakan, as well as in Malabar, Coorg, and the Konkan.

The three last columns of the table giving the average actual and average normal rainfall from March 3rd to June 1st show deficient rainfall over by far the greater part of the country. In Tenasserim, Sind, and the East Coast (North) the fall for the season has been excessive, in Central Burma, East Bengal, Assam, Deltaic Bengal, Central Bengal, North Bengal, Chota Nagpur, the North-Western Provinces (East and Submontane), Oudh (North), the Punjab (North-West and West), Madras (South Central), Mysore, all the Central Provinces divisions, Madras (Central), the East Coast (Central), and Madras (South) the fall for the season has been normal, and in all the remaining divisions the fall has been more or less deficient. The greatest deficiency has been over North-Western India.

The following heavy falls of rain are reported: Thaton (Amherst) 6·73 inches, Kama (Thayetmyo) 5·16 inches, Minbya (Akyab) 8·95 inches, Brahminbaria (Tipperah) 7·89 inches, Memotha (Cachar) 19·03 inches, Cherrapunji (Khasia Hills) 47·42 inches, Sibsagar 10·95 inches, Goalundo (Faridpur) 5·93 inches, Kurseong (Darjeeling) 6·55 inches, Cochin 4·36 inches.

SIMLA, *6th June 1895.*

W. L. DALLAS,
Asst. Meteorological Reporter to the Government of India.

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 1st June.*—Moderate rainfall on the West Coast, Nilgiris, and the greater part of the Central districts; light showers in many other districts. Ploughing and sowing are proceeding in limited areas. The standing crops are generally fair. Pasture is scarce, but fodder is sufficient. Cattle are generally in good condition. Prices are generally steady, and rather easier in parts of the Circars, Deccan, and Carnatic.

Bombay.—*For week ending 5th June.*—Rain in parts of the Deccan, Konkan, and Karnatic; more rain is required in parts of Satara and Dharwar. The standing crops are good. Preparations for the next season are general. Sowing is progressing in parts of four districts, but is retarded in parts of Kanara for want of rain. Cotton-picking continues in one taluka of Broach. The fodder-supply is sufficient. Agricultural stock in good condition. Prices are low in parts of Sholapur and Ahmednagar.

Bengal.—*For week ending 3rd June.*—There was good rain during the week in almost all districts in Bengal Proper, and also in Champaran and Purneah. The present agricultural outlook is generally fair, but more rain is required in some districts. The sowing of early rice and jute is nearly completed, and the preparation of the land for the autumn crops in Bihar, and for the winter rice crop is in progress. Reports of the sugarcane, indigo, and other standing crops continue satisfactory. The price of common rice is almost stationary.

North-Western Provinces and Oudh.—*For week ending 5th June.*—Weather very hot. Showers have fallen in some of the Central, Western, and Submontane districts. Irrigation of sugarcane and extra crops continues. Preparations for the autumn crops are in progress. Threshing and winnowing of the spring crops are nearing completion. Supplies are ample. Fodder is still insufficient in Fyzabad. Prices are stationary, but with a tendency to rise in six districts.

Punjab.—*For week ending 5th June.*—No rain, except in Delhi. Harvesting of the spring crops is nearly over. Reaping of the extra spring and sowings of the autumn crops are in progress. Rain is much needed in Hissar for the autumn sowings. The standing crops are in good condition. An insect, said to be a kind of beetle, is reported to have done much damage to the melon and cotton crops. Cattle are generally in good condition, and fodder is sufficient in all districts. Prices are normal in Delhi and Umballa, and are low elsewhere.

Central Provinces.—*For week ending 5th June.*—Weather exceedingly hot. Ploughing of the land for the autumn crops is in progress. Prices are almost steady.

Burma.—*For week ending 1st June.*—In Upper Burma reaping of the dry-weather paddy is still incomplete. Cultivation of the wet-weather crops is progressing. Prospects of the standing crops are generally good. Considerable damage has been caused by floods in the Bhamo district. The price of paddy has risen slightly in Rangoon, Prome, and Toungoo, and considerably in Bassein, Henzada, Amherst, Thayetmyo, Kyaukse, and Meiktila.

Assam.—*For week ending 4th June.*—Weather wet. Sowing of the early rice is almost finished, and of late rice seedlings commenced. Fodder and water are sufficient.

Mysore and Coorg.—*For week ending 5th June.*—MYSORE: Good rain in parts of the Bangalore district, slight elsewhere. Crops and prospects are good. Prices have slightly fallen in Kolar, and risen in the Shimoga district.

COORG: Rainfall moderate. Ploughing continues. Water and fodder for cattle are sufficient. Prices are normal.

Berar and Hyderabad.—*For week ending 5th June.*—BERAR: Weather hot. Land is being prepared for the ensuing rain crops. Fodder and water are reported insufficient in the Wun district. Prices are fluctuating in two districts, but are steady elsewhere.

HYDERABAD: Rainfall moderate. The water-supply is getting scarce everywhere. No standing crops. Fodder is scarce in Aurangabad. Prices are normal.

Central India.—*For week ending 5th June.*—Rainfall slight in the Bundelkhand Agency during the week. Operations for the autumn sowings have commenced in Bhopal, Western Malwa, and Goona. Cattle are in good condition, except in parts of Bhopal and Gwalior. Pasturage is good and sufficient in all Agencies, except in parts of Gwalior. Prices of food-grains are high in Goona and Bhopal, rising in one district of Gwalior and in Baghelkhand; normal elsewhere.

Rajputana.—*For week ending 5th June.*—Agricultural operations are satisfactory. Land is being prepared for the autumn crops. Prospects and agricultural stock are generally good. Fodder is sufficient, except in Dholepore. Prices are rising in five States, stationary in one, but are steady elsewhere.

Kashmir.—*For week ending 4th June.*—KASHMIR VALLEY: Weather fine. Rice sowings are still going on in some places. Maize sowings have been finished. The standing spring crops are ripening. Water is ample for irrigation. Prices continue normal.

JAMMU PROVINCE: *For week ending 1st June.*—Rainfall slight. Harvesting is in progress. Prices are rising.

Nepal.—*For week ending 1st June.*—Rainfall slight, but the weather is cloudy. Prospects are good. Wheat has been harvested.

DENZIL IBBETSON,

Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

ACCOUNT.
RAILWAY.

EAST INDIAN RAILWAY.

Synopsis of transactions for, and to end of, the year 1894.

No. 271-A. R., dated Simla, the 3rd June, 1895.

RESOLUTION—By the Government of India, Public Works Department.

Read the following:

Note by R. G. MACDONALD, Esq., Accountant General, Public Works Department, on the synopsis of transactions of the East Indian Railway for the year 1894.

In continuation of my Note No. 472-R. of 1st June 1894, I beg to submit, for the information of the Government of India, a synopsis of the transactions of the East Indian Railway from the date of its purchase by the State (1st January 1880) to the close of the year 1894.

2. The Capital expenditure of the East Indian Railway may be thus stated.

Under the Purchase Act, 42 and 43 Vict., Cap. CCVI, the Capital Stock of the Company was taken over by Government at a commuted value of £125 for every £100 of Capital Stock:

	£	£
The share capital of the Company, amounting to £26,200,000, was accordingly stated at		32,750,000
Under the same Act the debentures and debenture stock were taken over by Government, and amounted to		4,450,000
TOTAL ...		37,200,000
	Rs.	
The Company had at 31st December 1879 overdrawn from Government on Capital Account ...	26,45,268	
The Cost of the land taken up for the Railway and paid for by Government had been	59,26,183	

and the further outlay to close of the year 1894 from grants by Government from borrowed moneys has been:

	Rs.		
On Construction Account ...	3,87,85,092		
„ Stores Suspense Account ...	67,21,256		
„ Capital Advance Account ...	—8,21,246		
		4,46,85,102	
		5,32,56,553	
Deduct—Assets on the 31st December 1879, received by Government on purchase of the line, and made over to the Company on working lease—			
	Rs.		
Stores in stock ...	76,65,340		
Balance of cash and other Suspense accounts ...	8,22,169		
	84,87,509		
Realization by the sale of surplus and obsolete stores originally valued at Rs. 16,06,079 not taken over by the undertaking, and other miscellaneous receipts	6,30,652		
		91,18,161	
making the Capital outlay at close of 1894	Rs.	4,41,38,392	+ £37,200,000

	Rs.
3. During the year the gross traffic earnings were ...	5,26,89,485
the working expenses	1,58,95,137
and the net earnings	3,67,94,348

4. These results of working the East Indian Railway affected the finances of the Government of India in the manner and to the extent exhibited in the following paragraphs.

5. The liabilities which the Government of India incurred in connection with the purchase of the East Indian Railway, so far as they are still outstanding, are as follows:

	Capital.	Interest.	
Sterling liabilities—	£	£	
(*a*) Debenture stock ...	1,500,000	67,500	
(*b*) Annuities, terminable in 1953	26,200,000	1,179,000	(inclusive of payment for redemption of Capital).
(*c*) Deferred annuities ..	6,550,000	262,000	
		1,508,500	
Less—Annual payment for redemption of Capital ...		65,500	
Net sterling annual liability ...		1,443,000	which

at 13·248*d*. per rupee = Rs. 2,61,41,304.

6. The liabilities incurred by Government since the purchase of the line have been—

	Rs.
Debentures discharged	3,54,66,835
Construction Account	3,87,85,092
Stores Suspense Account	67,21,256
Capital Advance Account	—8,21,246
Land charges by the State	59,26,183
Add—	
Capital overdrawn at date of purchase	26,45,268
	8,87,23,388
Less—Credits to Government for value of stores, &c., made over to the Company	91,18,161
TOTAL ...	7,96,05,227

The corresponding figure at the 31st December 1893 was Rs. 7,62,89,228, so that the average for the year may be taken at Rs. 7,79,47,227.

7. The following, therefore, seems to be a fair account of the transactions of the Railway, as they affect Government, for 1894:

	Rs.	
Traffic earnings	5,26,89,485	
Less—Working expenses	1,58,95,137	
Net earnings		3,67,94,348
Sterling liabilities, £1,443,000 at 13·248*d*. per rupee	2,61,41,304	
Interest on Rupee liabilities, Rs. 7,79,47,227 at 4 per cent.	31,17,889	
Payment of surplus profits to the Company	15,39,767	
Payment to the Company's Provident Fund	3,67,943	
Total payments		3,11,66,903
Net profit to Government		56,27,445

This is much smaller than usual owing to the fall in the sterling value of the rupee. The corresponding net profit was—

	Rs.
in 1893	85,22,279
„ 1892	73,98,751
„ 1891	1,02,36,236
„ 1890	71,13,115

8. The Capital outlay on the undertaking may be taken as under—

	£
Sterling (*vide* paragraph 2)	37,200,000
	Rs.
Converted into Indian currency at the average rate of 19·96 *d.* per rupee at time of purchase	44,72,72,180
Rupee debt Rs. 7,96,05,227 —3,54,66,835*	4,41,38,392
TOTAL ...	49,14,10,572
The interest at 1 per cent. on this Capital would be ...	49,14,106

* Rupee value of debentures discharged.

It follows from this, that—

(i) the net earnings of the Railway are $\frac{36794}{4914}$, or 7·49 per cent. on the Capital invested by Government in it;

(ii) the burden which Government bears in respect of it is $\frac{}{4914}$, or 6·34 per cent;

(iii) the clear profit to Government is 1·15 per cent.

ORDER.—Ordered, that a copy of the note and accompaniment now read, be forwarded to the Consulting Engineer to the Government of India for Railways, Calcutta, and to the Department of Finance, for information.

W. S. S. BISSET, *Lieut.-Colonel, R.E.*,
Secretary to the Government of India.

* Including outlay on unfinished construction work.
† Including Rs. 35,161-6-10, being the cash balance in hands of the Company but excluding outlay on unfinished construction works.

Printed and published for the GOVERNMENT OF INDIA *at the* GOVERNMENT CENTRAL PRINTING

SUPPLEMENT TO

The Gazette of India.

No. 24.} CALCUTTA, SATURDAY, JUNE 15, 1895.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

FINANCE AND COMMERCE DEPARTMENT.

RETAIL PRICES FOR THE 2nd HALF OF APRIL 1895.

QUANTITIES PER RUPEE IN SERS OF 80 TOLAS.

PUBLIC WORKS DEPARTMENT.

RAILWAY STATISTICS.

RETURNS OF ACCIDENTS ON INDIAN RAILWAYS FOR THE NINE MONTHS ENDING THE 30th SEPTEMBER 1894.

No. 213 R. Stat., dated Simla, the 5th June 1895.

RESOLUTION—By the Government of India, Public Works Department.

READ again—

Public Works Department Order No. 159 R. Stat., dated the 10th May 1892.
Public Works Department Order No. 172 R. Stat., dated the 13th May 1893.
Public Works Department Order No. 148 R. Stat., dated the 26th April 1894.

Read also—

The following note by the Director General of Railways, No. 214 Statistics, dated the 27th May 1895, with abstract returns of accidents to trains, etc, on the open lines of Railway in India for the nine months ending the 30th September 1894.

Abstract No. 4, on pages 14 and 15 of the accompanying returns, shows the accidents to trains, rolling-stock, permanent-way, etc., reported during the nine months ending the 30th September 1894, and distinguishes the different classes of accidents and the number of passengers and others, and of railway servants killed or injured in each class of accident.

The total number of accidents and the casualties resulting therefrom, as compared with the average of the three previous corresponding periods, are summarised in the following table under the heads "Standard gauge," "Metre gauge" and "Special gauges":

	Number.			Number of passengers and others.		Number of servants.		Total all classes.	
	Accidents reported to Local Governments under section 83 of the Indian Railways Act (IX of 1890).	Other accidents.	Total.	Killed.	Injured.	Killed.	Injured.	Killed.	Injured.
Standard guage.									
Nine months ending the 30th September 1894	81	1,950	2,031	(a)8	(b)48	7	25	15	73
Average of the corresponding periods of the three previous years	104	1,805	1,909	5	24	7	40	12	64
Metre gauge.									
Nine months ending the 30th September 1894	19	1,535	1,554	...	(b)28	2	8	2	36
Average of the corresponding periods of the three previous years	24	1,445	1,469	2	15	6	9	8	24
Special gauges.									
Nine months ending the 30th September 1894	...	69	69	...	...	...	...	...	...
Average of the corresponding periods of the three previous years	2	43	45	...	...	...	1	...	1
Total all gauges for nine months ending the 30th September 1894	100	3,554	3,654	(a)8	(c)76	9	33	17	109
Average of the corresponding periods of the three previous years	130	3,293	3,423	7	39	13	50	20	89

(a) Not passengers.
(b) Of these, three were not passengers.
(c) Of these, six were not passengers.

2. The following table shows, for each gauge separately, the percentage of increase or decrease in the number of accidents, in the mean mileage worked, and in the train-mileage run, during the nine months ending the 30th September 1894, as compared with the average of the three previous corresponding periods:

	Increase or decrease as compared with the average of the corresponding periods of 1891, 1892 and 1893.					
	Accidents.		Mean Mileage.		Train-mileage.	
	No.	Per cent.	Miles.	Per cent.	Miles.	Per cent.
Standard	+122	+ 6·39	+ 538	+ 5·01	+ 1,347,223	+ 3·94
Metre	+ 85	+ 5·79	+ 490	+ 7·47	+ 1,283,978	+ 9·81
Special	+ 24	+ 53·33	...	...	- 22,770	- 7·28
Total	+231	+ 6·75	+ 1,028	+ 5·86	+ 2,608,431	+ 5·48

3. The principal variations in the number of accidents reported in connection with the working of the several gauges, as compared with the average of the corresponding periods of the three previous years, are shown in the statement below under the classification adopted in abstract No. 4 of the returns:

Gauge and classification.	Increase or decrease.			Percentage of increase or decrease.
	Serious.	Minor.	Total.	
Standard gauge.				
Passenger trains or parts of passenger trains leaving the rails	—8	—10	—18	—40·91
Goods trains or parts of goods trains, engines, etc., leaving the rails	—3	—13	—16	—10·39
Trains running over cattle on the line	+1	+116	+117	+15·66
Trains running over obstructions on the line	+7	—20	—13	—17·81
The bursting of tubes, etc., of engines	+1	+55	+56	+109·80
The failure of machinery, springs, etc., of engines	+1	+50	+51	+23·61
The flooding of portions of permanent-way	—2	+40	+38	+77·55
Fire in trains	—1	—56	—57	—61·96
Fire at stations, or involving injury to bridges or viaducts	—2	—16	—18	—45·00
Under head "Other accidents"	—5	—11	—16	—12·90
Metre gauge.				
Trains running over cattle on the line	—2	+19	+17	+ 2·03
The bursting of tubes, etc., of engines	...	+16	+16	+28·07
The failure of machinery, springs, etc., of engines	...	+33	+33	+31·73
The flooding of portions of permanent-way	—4	+19	+15	+39·47
Special gauges.				
Goods trains, or parts of goods trains, engines, etc., leaving the rails	—1	+13	+12	+85·71
The flooding of portions of permanent-way	...	+19	+19	+950·00

Standard gauge.

4. The increase under "Trains running over cattle on the line" was chiefly due to the occurrence of 46 more accidents of this nature on the East Indian railway as compared with the average of corresponding periods of the three previous years, and of 36 accidents on the East Coast (state) railway from which no returns were previously received.

5. Of the total increase of 56 accidents under "The bursting of tubes, etc., of engines," an increase of 52 occurred on the North Western (state) railway.

6. Out of a total increase of 51 accidents under "The failure of machinery, springs, etc., of engines," 48 were due to accidents on the Great Indian Peninsula railway.

7. There was an increase of 38 cases under "The flooding of portions of permanent-way," of which 19 were on the Bombay, Baroda and Central India railway, and 12 on the North Western (state) railway.

8. The principal variations under "Fire in trains," were decreases of 19 and 28 on the Great Indian Peninsula and the Madras railways, respectively.

Metre gauge.

9. Under "The failure of machinery, springs, etc., of engines," the increase was chiefly due to the Southern Mahratta railway, on which the number rose from 28 to 53.

Special gauges.

10. The increase under "The flooding of portions of permanent-way" was mainly due to the number recorded on the Morvi railway having risen from 1 to 15.

11. Taking all gauges together, the number of cattle accidents was largest on the Southern Mahratta railway, *viz.*, 344; next to that line comes the South Indian. railway with 193, then the Rajputana-Malwa railway with 153, the East Indian and the North Western (state) railways with 149 each, the Eastern Bengal (state) railway with 126, the Oudh and Rohilkhand (state) railway with 95, the Great Indian Peninsula railway with 74, the Nizam's Guaranteed State railway with 72 and the Madras railway with 71.

In proportion to train-mileage run, the number of accidents was highest on the Rohilkhund and Kumaon railway, with an average of 1 accident in 6,367 train-miles run; the Nizam's Guaranteed State coming next with an average of 1 in 6,960; then the Southern Mahratta, the Dibru-Sadiya, the Jodhpore-Bickaneer and the East Coast (state) railways with averages of 1 in 7,220, 1 in 8,240, 1 in 9,803, and 1 in 10,675, respectively.

The lowest number recorded in proportion to train-mileage run was on the Bombay, Baroda and Central India railway, *viz.*, 1 in 108,822; the Great Indian Peninsula railway coming next with 1 in 108,749; then the Gaekwar's Dabhoi railway with 1 in 62,186, the Burma (state) railway with 1 in 59,349, the East Indian railway with 1 in 54,999, and the North Western (state) railway with 1 in 48,192.

12. The casualties to passengers and to servants in the employ of railways or of contractors not coming under the classification adopted in abstract No. 4 of the returns, and the total casualties from all causes including trespassers, cases of suicide, etc., are compared, separately, for each gauge with the average of corresponding periods of the three previous years in the table below (for details, *vide* abstract No. 2).

Gauges.	Nine months ending the 30th September 1894.						Average of the corresponding periods of the three previous years.					
	Passengers.		Servants.		Total all causes.		Passengers.		Servants.		Total all causes.	
	Killed	Injured.	Killed.	Injured.	Killed.	Injured.	Killed.	Injured.	Killed.	Injured.	Killed.	Injured.
Standard	37	94	116	292	386	522	39	104	103	342	341	558
Metre	6	38	26	72	87	181	7	28	25	76	112	154

(2) *Bengal-Nágpur railway.*—On the 22nd August 1894, a ballast train ran into a trolly at mileage 358-13 between Jamga and Kanika stations. A trollyman was injured.

(3) ***North-Western (state) railway.***—On the 16th July 1894, a trolly was derailed at mileage 554-4 near Mudgorge, in consequence of a piece of stone having got jammed between the check rail and the line. A trollyman was seriously injured.

On the 17th August 1894, the up mail was derailed at Chaman during shunting operations owing to the points not having been properly set. A pointsman was injured.

On the 13th September 1894, a collision took place at Kathála between the down mixed and the ferry train owing to the former having been turned on to the wrong line. Six passengers and three railway servants were injured. The station master to whose carelessness the accident was due has been prosecuted.

(4) *Oudh and Rohilkhand (state) railway.*—On the 25th August 1894, the down passenger train collided with an up light engine at the Malihabad station. Two servants were injured.

(5) *Eastern Bengal (state) railway.*—On the 6th September 1894, a dog-cart collided with the footboard of the engine of a down special train at a level-crossing gate in the Brace Bridge Hall yard. The accident was due to the driver of the dogcart having effected an entrance by breaking open the gate. The gateman was injured.

(6) *Great Indian Peninsula railway.*—On the 28th July 1894, a collision took place between an up goods and the down passenger train near Talegaon, resulting in the derailment of the former. The accident was due to the driver of the up goods train having left Talegaon without a "line clear." Eleven passengers and a railway servant were injured, and the rolling-stock considerably damaged. The driver, who was to blame for the accident, was prosecuted and sentenced to six weeks' simple imprisonment.

(7) *Bombay, Baroda and Central India railway.*—On the 2nd August 1894 the rear portion of a ballast train, which had been divided into two portions for facility of work, ran down a falling grade at mileage 41 between Dohad and Jékót stations on the Godhra-Rutlam section and collided with the front portion. A cooly was run over and killed.

(8) *Rajputana-Malwa railway.*—On the 18th August 1894, a bullock-cart was knocked off the line by the up passenger train at a level-crossing gate at mileage 334-2 near Choral. A girl, who was riding in the cart, was slightly injured.

On the 25th September 1894, the up through mixed train collided with a down goods train at Fatehgarh, owing to the pointsman having erroneously lowered the distant signal and opened the locked points of the line where the down goods train was waiting for the mixed train to cross. A passenger and a railway servant were slightly injured. The pointsman at fault was prosecuted.

(*Southern Mahratta railway.*—On the 30th August 1894, a down goods train ran into a gap in the bank, caused by a flood, behind the east abutment of a bridge at mile 292-5 near Rangapuram. The engine cannoned into the end of the bank still standing and falling back, knocked the east abutment down. The engine tender and a third class dropped into the nullah and were considerably damaged. A railway servant was killed and three others were injured. The watchman, to whose negligence the accident was due, was prosecuted.

On the 5th September 1894, a bullock-cart was run into by the up mixed train at a level-crossing gate at mileage 150-22 near Munirabad. The cartman was slightly injured. The gateman, who was to blame for having left the gate open, was prosecuted and sentenced to three months' rigorous imprisonment.

ORDER.—Ordered that the above note, with the abstract returns, be communicated for information to the Local Governments and Administrations, and to the officers noted in the margin.

The Governments of Madras, Bombay, Bengal, North-Western Provinces and Oudh, and the Punjab.
The Chief Commissioners of the Central Provinces, Burma, Assam and Coorg.
The Resident at Hyderabad.
The Resident in Mysore.
The Agents to the Governor General for Rajputana, Central India and Baluchistan.
The Director General of Railways.
The Consulting Engineers to the Government of India for Railways, Calcutta, Lucknow and Assam.

Ordered also that copies be forwarded for the information of Her Majesty's Government.

Ordered further that the note with the abstract returns, be published in the Supplement to the *Gazette of India*.

F. B. HEBBERT,
Under-Secretary.

Documents accompanying.

Abstract returns of accidents for the nine months ending the 30th September 1894.

Enclosure to P. W. D. No. 213 R. Stat., dated the 5th June, 1895.

ABSTRACT No. 1.

GENERAL TOTAL.

NUMBER of PERSONS reported, during the NINE months ending 30th September 1894, as KILLED or INJURED on ALL RAILWAYS open for TRAFFIC in INDIA, distinguishing between PASSENGERS, RAILWAY SERVANTS, and OTHER PERSONS; and distinguishing also, in the case of the two former classes, between ACCIDENTS caused by ACCIDENTS to TRAINS, ROLLING-STOCK, PERMANENT-WAY, etc., and ACCIDENTS happening otherwise.

	Standard gauge lines.		Metre gauge lines.		Special gauge lines.		Total all gauges.	
	Killed.	Injured.	Killed.	Injured.	Killed.	Injured.	Killed.	Injured.
PASSENGERS :—								
From accidents to trains, rolling-stock, permanent-way, etc.	...	45	...	25	...	...	...	70
By accidents from other causes, including accidents from their own want of caution or misconduct	37	94	6	38	...	...	43	132
SERVANTS :—

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the Week ending at 8 a.m. on Saturday, June 8th, 1895.

During the whole of the past week the appearance of the monsoon in Ceylon and along the west coast of India and its full establishment over the Bay have been anticipated. But throughout the week abnormal conditions have existed over Southern India and Ceylon, and have been opposed to an early and strong advance of monsoon winds. Over the Bay conditions have perhaps been a trifle less unfavourable to an advance of monsoon winds than they have been in the Arabian Sea, but the rainfall, which has occurred during the week in Burma, Assam, and Bengal, has been of an intermittent, and scattered character showing an absence of any steady current from the Bay. On Friday, the 7th, and the following day a somewhat remarkable fall of rain occurred along the North-Western Himalayas. On these days there was an entire absence of rain along the West Coast, and almost entire absence from Bengal, yet heavy monsoon rainfall occurred over the Kumaun and North-Western Himalayas, as well as over the plains at their foot. Owing to the delay in the establishment of the rains, there has been a general excess of temperature during the week, the excess being most marked in the Peninsula and the Central Provinces, where, under normal conditions, the rains would by now have been more or less established.

Daily Summary.—*Sunday.*—Pressure had increased slightly to briskly over the whole area. Pressure was above the normal, except in the extreme south, and gradients were only moderate. Strong westerly winds continued in Sind, Kathiawar, and the central parts of the country, but elsewhere the winds were light and unsteady, and on the Malabar Coast were north-easterly. Showers had occurred fairly generally in Burma, Bengal, and Assam, and at a few scattered places in the Peninsula. The heaviest fall was 4·46 inches at Diamond Island.

Monday.—Pressure had decreased at the majority of stations, but the changes were small, and the general conditions were unchanged. Pressure was normal in Malabar and the Punjab, and in excess elsewhere. Winds were practically unchanged. Calms were reported on the Malabar Coast. Showers had again occurred in Burma, Assam, East and North Bengal, and at a few places in the Peninsula.

Tuesday.—The barometer was steady at Colombo and in Southern India, and had risen elsewhere. Pressure was in large excess in Assam, in considerable excess in Bengal, Burma, North Bombay, and the central parts of the country, and in slight excess in other parts of the country. The winds were still unchanged, and calms and unsteady winds continued on the west coast of India and in Ceylon. Showers were very general over North-Eastern India, and scattered showers were reported from a few places in the Peninsula.

Wednesday.—The barometric changes were very small, and the general distribution was unchanged in character. The large excess of pressure over North-Eastern India, and the considerable excess over Central India and the north of the Peninsula had been firmly maintained. The winds generally were light in force and abnormal and unsteady in direction, except in Sind, Kathiawar, and Central India, where strong westerly winds, and along the foot of the Hills, where light easterly winds, were reported. A good deal of light rainfall was reported from Bengal and Assam, but elsewhere there was very little rain.

Thursday.—There was again no change of importance in the general distribution of pressure, and gradients were abnormally slight for the time of year. The winds were the same in direction and force as on the preceding day. Calms

and variable airs prevailed in Malabar. Light to moderate showers had fallen in Burma, Bengal, and the Peninsula. Cochin, Burdwan, Fort Stedman, and Moulmein had received over 1 inch.

Friday.—Pressure had changed irregularly. It had increased briskly to rapidly in a small area in the north-west of the North-Western Provinces, while it had decreased over the Peninsula, Bengal, and Assam. Pressure was in large excess over the west of the North-Western Provinces, and in considerable excess in Burma, Bengal, Rajputana, and North Bombay. The easterly current of wind up the Gangetic plain had increased in strength, and the wind at Colombo was rising slightly. Elsewhere there was little change. Light to moderate thundershowers had occurred in Burma, Lower Bengal, and the Peninsula, and a series of considerable thundershowers had given heavyish rain to the west of the North-Western Provinces and to the Kumaun Himalayas.

Saturday.—The barometer had risen rapidly over the North and Central Punjab, and slightly to briskly over the remainder of India. Pressure was in large excess in the north and slight defect in the south; hence gradients were abnormally slight over the whole Indian area. Winds were inclined to strengthen at Colombo, but were abnormally light and unsteady over the greater part of India. Scattered showers due to dust and thunder storms had occurred over Burma, East Bengal, the west of the North-Western Provinces, the Punjab, the North-Western Himalayas, the Deccan, Central India, and Mysore. The amounts in only a few cases exceeded 1 inch.

Temperature.—Owing to the delay in the establishment of the monsoon currents over Western and Central India and owing to the extensive, though comparatively light, rainfall over parts of North-Western India, the temperature conditions of the week under review have been remarkable; for, while in Bombay and the Central Provinces the mean temperature has been steadily excessive throughout the week, the mean temperature in the Punjab and the North-Western Provinces underwent a sudden and large fall at the close of the week. The following table shows the variations of the mean temperature from the normal in the different provinces of India for each day of the week:

Province.	June 1895.							Mean variation of week.
	2nd	3rd	4th	5th	6th	7th	8th	
	°	°	°	°	°	°	°	°
Burma	−0·7	−0·7	+0·3	+0·7	+1·7	+1·0	+0·4	+0·4
Bengal and Assam	+1·5	+0·8	+0·1	−1·2	−2·7	−1·1	+0·2	−0·3
North-Western Provinces and Oudh	+1·9	+0·1	−0·2	+0·4	+0·2	−2·1	−4·8	−0·6
Punjab	+4·4	+3·3	+2·2	+1·9	+4·7	+4·2	−2·2	+2·6
Bombay	+3·2	+4·3	+4·7	+4·8	+4·8	+4·2	+4·2	+4·3
Central Provinces and Berar	+3·6	+4·0	+4·7	+4·1	+5·1	+4·5	+3·9	+4·3
Central India and Gujarat	0	−0·2	+0·2	+0·8	+1·4	+1·2	+0·6	+0·6
Sind and Rajputana	+0·6	+0·2	+0·7	+1·0	+1·1	+0·8	+0·1	+0·6
Madras	+3·7	+2·9	+2·9	+3·7	+3·1	+1·8	+2·0	+2·9
Mean for whole of India	+2·0	+1·6	+1·7	+1·8	+2·2	+1·6	+0·5	+1·6

The final line of figures shows that the mean temperature of the whole of India was excessive on each day of the week, the amount of the excess being fairly uniform, except on the last day, when, owing to the rainfall described above, a decided fall had occurred. The provincial variations exhibit a slight defect of temperature over Bengal, Assam, and the North-Western Provinces, and an excess

elsewhere. In Bombay and the Central Provinces this excess amounted to over 4°, in Madras to 2·9°, and in the Punjab to 2·6°, but elsewhere it was small and unimportant.

The highest maximum reported on each day was—

On June	2nd	117·6°	at	Jacobabad.
„	3rd	113·7°	„	„
„	4th	114·2°	„	„
„	5th	112·2°	„	„
„	6th	115·4°	„	Montgomery.
„	7th	116·4°	„	„
„	8th	114·1°	„	Dera Ismail Khan.

Rainfall.—The most marked features about the rainfall of the past week have been (1) the delay in the setting of the monsoon rains on the south-west coast of India and in the south of the Bay; and (2) the sudden burst of rain which occurred in parts of the North-Western Provinces and of the Punjab at the close of the week.

Notwithstanding the delay in the establishment of the monsoon, fairly general rainfall has prevailed throughout the country, the only divisions which received absolutely no rainfall being Oudh (South), Gujarat, Kathiawar, Sind, and Rajputana (West), while the divisions, which received a total of less than 0·10 inch for the week are the North-Western Provinces (East and Central), the Punjab (Central and West), Berar, all the Central Provinces divisions, and the East Coast, South. In all these divisions the week was absolutely or practically rainless, but in all other parts of the country rain was received in effective amounts. The only large average actual rainfall was in Tenasserim, and amounted to 10·33 inches; this was followed by 3·93 inches in Arakan, by 3·37 inches in Assam (Surma), by 2·50 inches in North Bengal, and by 2·43 inches in East Bengal. These were the heaviest average rainfalls, while the lightest effective rainfall was an average of 0·13 inch in Madras, South. In nearly every part of the country the rainfall was lighter than is usually experienced during the week under review. This was particularly noticeable in the case of those divisions which are most exposed to the first advances of the monsoon; thus Arakan had a deficiency of 8·37 inches, Malabar of 9·40 inches, Coorg of 5·39 inches, and the Konkan of 5·33 inches. All the cases of excessive rain were small, and were confined, with one exception, to the Punjab and North-Western Provinces. The largest excess was 0·91 inch in Tenasserim, followed by 0·59 inch in the North-Western Provinces, Submontane division.

With the present report a new rainfall period, that of the south-west monsoon, is commenced; hence the information in the three last columns of the table is the same as that given in the first three.

The following heavy falls of rain are reported: Amherst (Tenasserim) 10·94 inches, Dedaye, (Maubin) 5·21 inches, Shwegyin 5·52 inches, Akyab 7·28 inches, Narayanganj 5·78 inches, Sylhet 9·18 inches, Jessore 5·55 inches, Pirganj (Rungpur) 7·13 inches, Alipur (Jalpaiguri) 8·29 inches, Man (Jhansi) 4·00 inches, Jansath (Muzaffarnagar) 3·20 inches, Dharmsala 3·35 inches, Khushab (Shahpur) 2·97 inches, Udipi (Mangalore) 2·33 inches, Huliyar (Tumkur) 2·54 inches, Gokak (Belgaum) 5·39 inches.

PROVINCE.	DIVISION.	Rainfall data for week ending June 8th, 1895. Average actual rainfall of division.	Average normal rainfall of division.	Excess or defect in inches. W. L. DALLAS,
Asst. Meteorological Reporter to the Government of India.

SIMLA, *13th June 1895.*

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 8th June.*—Rainfall moderate in parts of the Circars and the Deccan districts and Salem; light showers elsewhere. No rain in the Carnatic. The rainfall to date is generally below average on the West Coast and Carnatic districts. Ploughing and sowing are going on slowly in parts. The standing crops are generally fair. Pasture is scarce, but fodder is sufficient. Cattle are generally in good condition. Prices are practically stationary.

Bombay.—*For week ending 12th June.*—Rain in parts of the Deccan, Konkan, and Karnatak; more rain is required in parts of Thar and Parkar, Ahmednagar, and Dharwar. The standing crops are good, except in parts of Thar and Parkar where they have been damaged by high winds. Preparations for the monsoon crops are general. Sowing is progressing in parts of six districts, but is retarded in parts of Kanara and Ratnagiri for want of rain. Transplantation has commenced in Hyderabad. The fodder-supply is sufficient, and agricultural stock are in good condition. Prices are normal, except in parts of Ahmednagar and Sholapur.

Bengal.—*For week ending 10th June.*—There was rain in all districts of Bengal Proper and in Cuttack; in Bihar there were local showers only. The sowing of early rice and jute is almost over, and both crops so far are doing well. The preparation of the land for the winter rice has commenced in Bihar. Rain is generally required for the sowing of the autumn crops. Sugarcane, indigo, and other standing crops are in good condition. The price of common rice is stationary.

North-Western Provinces and Oudh.—*For week ending 12th June.*—Rain has fallen in all but four districts, and the falls have been somewhat heavy in the Gorakhpur, Bareilly, and Jhansi districts. Preparations for the autumn crops are in active progress. Sugarcane and extra crops are being irrigated, and are doing well. Threshing and winnowing of the spring crops have terminated. Supplies and fodder are ample, except in Fyzabad where fodder continues insufficient. Prices are rising in five districts, but are generally stationary elsewhere.

Punjab.—*For week ending 12th June.*—Slight rain has fallen in Hissar, Delhi, Jullundur, Ferozepore, Amritsar, and in parts of the Umballa, Lahore, Rawal Pindi, and Shahpur districts. Harvesting of the spring crops is nearly over. The ploughings for the autumn crops have commenced in Umballa. Sowings are in progress in Lahore, Mooltan, and Shahpur, and weeding in Sialkot. The condition of the extra spring crops is average in Jullundur, and good in Dera Ismail Khan. The autumn crops are good in Amritsar, but more rain is wanted to complete the autumn sowings in Hissar and Rawal Pindi, where prospects are average. Young locusts are reported as having been hatched in a village of one tahsil of the Dera Ismail Khan district, but steps are being taken for their destruction. Cattle are generally in good condition, and fodder is sufficient in all districts, except in parts of Dera Ismail Khan. Prices are rising in Shahpur and Peshawar, normal in Umballa, and low elsewhere.

Central Provinces.—*For week ending 12th June.*—Weather very hot and cloudy with rainfall in the northern districts, Narsinghpur, and Hoshangabad.

There was a severe hailstorm in Narsinghpur on the 8th and a thunderstorm accompanied by rain at Nagpur on the 9th. Preparation of the land for the autumn crops continues. Prices are almost stationary.

Burma.—*For week ending 8th June.*—Rain has fallen in most districts. In Lower Burma agricultural operations have commenced in five districts; elsewhere preparations are in progress. In Upper Burma reaping of the dry-weather paddy is approaching completion, and cultivation of the wet-weather paddy has begun in most places. Sowing of the miscellaneous wet-weather crops is in progress in five districts. The standing crops generally promise well, except in Bhamo where much damage to the plants has been caused by floods. The price of paddy has risen slightly in four districts, and fallen slightly in three others. In the Ruby Mines district the rise is very large; elsewhere the price is stationary.

Assam.—*For week ending 11th June.*—Weather sultry. Sowing of late rice seedlings continues. The condition of cattle is fair. Fodder and water are sufficient.

Mysore and Coorg.—*For week ending 12th June.*—MYSORE: Good rain has fallen in parts of Hassan, Shimoga, Chitaldroog, and Tumkur; slight rain elsewhere. Standing crops and prospects are good. Prices have risen slightly in Kolar, and fallen in Shimoga.

COORG: Rainfall moderate. Ploughing for rice continues. Sowing of *ragi* (*Eleusine coracana*) has been retarded for want of rain. Water and fodder for cattle are sufficient. Prices are normal.

Berar and Hyderabad.—*For week ending 12th June.*—BERAR: Weather warm and cloudy with moderate rainfall during the week. Ploughing of fields for the rain crop continues. The fodder and water-supply is inadequate in parts of two districts. Prices are almost stationary.

HYDERABAD: Rainfall moderate during the week. Prices are normal.

Central India.—*For week ending 12th June.*—Rain during the week in all Agencies, except Baghelkhand and Bhopawar. Agricultural operations for the autumn sowings have commenced in Bhopal, Western Malwa, Bhopawar, and Goona. Cattle are in fairly good condition, except in Bhopal. Pasturage is good and sufficient in all Agencies, except in parts of Gwalior. Prices of food-grains are high in Goona and Bhopal, rising in Baghelkhand and parts of Gwalior, but are normal elsewhere.

Rajputana.—*For week ending 12th June.*—Rain has fallen in parts, attended with thunder and lightning. Agricultural operations are satisfactory. Land is being prepared for the autumn crops in parts. Prospects and agricultural stock are generally good. Fodder is sufficient, except in Dholepore. Prices have fallen in one State and risen in two others, but are steady elsewhere.

Kashmir.—*For week ending 11th June.*—KASHMIR VALLEY: Rainfall slight. The weather is now fine. Reaping of the barley crops has commenced in some places. The wheat crops are ripening. Reaping of oil-seeds is in progress. The autumn crops have mostly been sown. Prices continue normal.

JAMMU PROVINCE.—*For week ending 12th June.*—Rainfall slight. Harvesting of the spring crops is completed. Sowings for the autumn crops have commenced. Cattle are generally in good condition. Prices are normal.

Nepal.—*For week ending 8th June.*—Thunderstorms, but little rain. Prospects of Indian-corn are good.

DENZIL IBBETSON,

Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

No. $\frac{13}{81-2}$.

Extract from the Proceedings of the Government of India in the Department of Revenue and Agriculture (Land-Surveys),—dated Simla, the 7th June, 1895.

Read—

The General Report on the operations of the Survey of India Department during the year 1893-94.

RESOLUTION.

Excluding the work of the Forest Survey Branch, which is noticed in paragraph 5 of this Resolution, the field operations during the year under review were carried on by twenty parties (of which two were double parties) and four small detachments. The various classes of work on which they were engaged are shown below:

Class of work.	Number of parties employed.	Number of detachments employed.
1. Trigonometrical	1	...
2. Topographical	3	2
3. Forest (excluding the Imperial Forest Survey Branch)	4	...
4. Cadastral	6 (two double)	2
5. Traverse	1	...
6. Scientific	3	...
7. Geographical	2	...
Total ...	20	4

Thus eleven parties and two detachments were engaged on remunerative operations connected with land or forest revenue, as compared with twelve parties and one detachment in 1892-93.

2. The aggregate area surveyed on all scales during the year under report was 127,477 square miles, against a total of 104,711 square miles in 1892-93. These figures do not include the traverse operations carried on in the Central Provinces as a basis for field surveys under the Settlement Department, or the skeleton survey of village boundaries in Bengal. These two operations covered a further total area of 3,572 square miles in 1893-1894, and of 3,563 square miles in the preceding year.

3. The party which has been employed during the past three years on trigonometrical surveys extended, during the year under report, the principal triangulation northwards in Upper Burma over a direct distance of 90 miles, besides carrying a secondary series of triangles over 70 miles along the coast south-eastwards from Karachi.

As in the preceding year, three parties were employed on topographical surveys in the Bombay Presidency, in Baluchistan and in the Himalayas; one detachment continued the survey of the river Indus in Sind; while another was formed for the survey of the peninsula of Aden and of that portion of the Yafi'i country in Arabia which was left unfinished in the year 1891-92. A total area of 16,072 square miles was topographically surveyed, as compared

with 10,215 square miles in the previous year, in addition to small areas surveyed by cadastral parties in the Shwebo and Amherst districts of Burma and by the Forest Survey Branch in the Bashahr State. The two parties employed on geographical survey in Upper Burma having practically completed their preliminary operations, a detachment from one of these parties has begun the topographical survey of that province.

4. The total area of forest surveyed in the Central Provinces, Bombay, Madras, and Lower Burma by the four parties of the Imperial Survey Department employed exclusively on that work, and in the Himalayas by a topographical party, amounted to 2,522 square miles.

5. The report under review includes for the first time an account of the operations of the Forest Survey Branch, which is under the administration of the Inspector General of Forests and under the superintendence of a Deputy Superintendent of the Survey of India Department. The officers of the Branch are now included in the cadre of that Department. During the year the Branch surveyed 1,433 square miles of forest proper, situated in the Punjab, the Central Provinces, Oudh, and Burma, as well as of 287 square miles of non-forest land in Bashahr (Punjab), which was surveyed on the 1-inch scale for incorporation with topographical surveys.

It is understood from the Inspector General of Forests that these forest maps, although they result from surveys conducted by cheaper agency than the Surveyor General feels able to rely upon, meet all forest requirements both in accuracy of detail and neatness of execution. Under these circumstances the Government of India do not consider it necessary to provide for more costly supervision. They are glad to observe that in other respects the system as carried out by the Superintendent, Mr. W. H. Reynolds, is held by the Surveyor General to be quite satisfactory.

6. Cadastral surveys were carried on by two double parties and a detachment in Bengal, by three parties in Burma, by one in Assam, and by a detachment in the North-Western Provinces. The total area completed during the year was 8,280 square miles, being an increase of 525 square miles as compared with 1892-93. The cost of the different operations of Traverse, Cadastral survey, and record-writing varies considerably from area to area. Explanations of excess cost are in most instances forthcoming; but there is nothing to show why record-writing should cost Rs. 74 per square mile in Palamau, Rs. 78 in Muzuffarpur, and Rs. 70 in Balasore, when it can be done for Rs. 50 in Sarun and for Rs. 54 in Champaran. Full explanation is always desirable in each case where the cost of cadastral work in India exceeds Rs. 70 per square mile. It is recognized that work cannot be carried out in Burma at anything approaching that rate as yet, though it has been found possible to reduce the cost in Magwe to Rs. 111.

7. One party was again employed in traverse surveys in the Central Provinces and the total area traversed amounted to 3,397 square miles, which compares favourably with the outturn for last year. In Bengal the Traverse survey of village boundaries in the Gya and Shahabad districts was completed over an area of 175 square miles.

8. The latitude observations of last year were continued by two astronomical parties; and the latitude and longitude observations are practically complete, and only await that connection with Greenwich which is now in progress. Tidal observations have been continued at 13 stations, and predictions will now be published for 35 tidal stations. In connection with these operations, 370 miles of

double levelling have been run; and the results in both cases reached a very high standard of accuracy.

The two parties employed on the geographical survey of Upper Burma covered an area of 14,790 square miles, thus bringing the task to completion. Reconnaissance surveys were made of over 84,000 square miles in Persia and Arabia and on the north-western frontier, of which the greater portion had not been previously mapped.

9. The work done in the various Head-Quarters offices seems to have been satisfactory. The value of the extra-departmental work done in the Photographic and Lithographic offices decreased from Rs. 91,118 to Rs. 71,141, owing to a smaller demand. On the other hand, the value of original maps and drawings reproduced for the Department itself increased from Rs. 81,128 to Rs. 98,760. The quality of the work executed under Colonel Waterhouse's supervision maintained its high standard of excellence. The two specimens of photo-etching bound up with the report are admirable specimens of what the department can do in the way of artistic finish: while the map work for accuracy and clearness leaves nothing to be desired.

The Drawing Office continued to be principally employed on maps of Burma. A Provincial Drawing Office for Bengal was organised during the year for the preparation of topographical maps from the results of cadastral surveys, as the field parties in Bengal could not cope with the heavy mapping work. The demands on the Mathematical Instrument office for scientific instruments were considerably less than in 1891-92 and 1892-93; but there was a larger outturn of work in the shape of repairs.

10. Pages 16 and 17 of the report contain a summary of the operations of the Department for the nine years during which it has been under the administration of Colonel Sir Henry Thuillier, R.E., who has recently retired from the office of Surveyor General of India. During that period the area covered by Cadastral, Forest, Topographical and Geographical surveys aggregated 844,218 square miles. The surveys of 17 cities and towns, including Calcutta, have also been mapped on various large scales; while 93,694 square miles of Traverse surveys and 25,140 square miles of principal and secondary triangulation have been completed during the same period. Upper Burma has been added to the Geographical map of India; the latitude and longitude observations have been completed; the system of tidal observations and predictions has been largely extended; and a double line of spirit levelling has been carried over a distance of more than 4,000 miles. The Governor General in Council has already taken occasion to express his sense of the value of Colonel Thuillier's services.

ORDER.—Ordered, that the above Resolution be forwarded to the Surveyor General of India, the Inspector General of Forests, Local Governments and Administrations noted on the margin, and to the Foreign, Military and Public Works Departments.

Madras.	Punjab.
Bombay.	Central Provinces.
Bengal.	Burma.
North-Western Provinces and Oudh.	Assam.
	Coorg.

Ordered also, that the Resolution be published in the Supplement to the *Gazette of India*.

[True Extract.]

DENZIL IBBETSON,

Offg. Secretary to the Government of India.

No. 2822-S.R.

GOVERNMENT OF INDIA.

FINANCE AND COMMERCE DEPARTMENT.

Simla, the 14th June, 1895.

Read—

Customs Circulars Nos. X to XII and XIV.

ORDERED, that the Circulars be published for general information in the Supplement to the *Gazette of India*.

J. F. FINLAY,
Secretary to the Government of India.

Customs Circular No. X.

From—The Government of India, Finance and Commerce Department, No. 4951-S. R., dated the 12th October 1894.

To—The Director General of the Post Office of India.

I am directed to acknowledge the receipt of your letter No. 179—L.M. 7 No. 57, dated the 14th September 1894, requesting sanction to the continuance of the procedure which was, until recently, in force in Bombay, of granting refunds of import duty on goods received by foreign parcel post which cannot be delivered in India and are re-exported beyond the limits within which they are liable to Customs duty, and to its application at all other ports at which parcels are received in India by the foreign parcel post.

2. I am to state that the Governor General in Council sanctions the proposal.

Customs Circular No. XI.

From—The Government of India, Finance and Commerce Department, No. 1950-S. R., dated the 29th April 1895.

To—The Director General of the Post Office of India.

I am directed to acknowledge the receipt of your letter No. 13 C.—L.M. 7-57 No. 1, dated the 16th April 1895, requesting sanction to the exemption from import duty of the contents of postal parcels originally posted in India and returned to the Indian Post Office as unclaimed, refused, or re-directed from any place whether in or out of India, without having at any time left the custody of the Post Office.

2. I am to state that the Governor General in Council sanctions the proposal.

Customs Circular No. XII.

From—The Government of India, Finance and Commerce Department, No. 2314-S. R., dated the 17th May 1895.

To—The Secretary to the Government of Bengal, Financial Department.

I am directed to acknowledge the receipt of your letter No. 1921-S. R., dated the 1st April 1895, on the subject of an appeal made by———— against the levy by the Collector of Customs, Calcutta, of import duty at five instead of one per cent. *ad valorem* on a consignment of dogspikes imported by the firm.

2. The Collector of Customs rightly refused to treat the articles as coming under No. 93 of Schedule IV, but the reason assigned for his refusal, namely, that the articles had not been imported by or under the orders of a Railway Company, was wrong. That condition is required only in the cases of cranes and water-cranes and standards, wire, and other fencing material, because,

though these articles are not strictly railway material and they may be used for other than railway purposes, an exception has been made in their favour when they are imported by or under the orders of a Railway Company that fact being considered sufficient evidence that they are intended to be used as railway material. Material of the other kinds specified in No. 93 is exempt from duty by whomsoever imported when the articles are intended for a railway as defined in that number.

3. Dogspikes are said to be spikes adapted to one particular purpose only, and if that purpose is use as railway material, and if they are not capable of being used for any other purpose, they come under the description of "spikes" which are specified in No. 93 of the schedule. Such imports are chargeable with duty only when it is found that, as a matter of fact, they are not imported for a railway as defined in the Tariff. In all cases where this is not apparent they are exempt from duty. As, however, most of the railways import their stores direct, the importers are bound, if they claim exemption, to furnish evidence that the material is intended for the use of a railway within the meaning of the Act.

4. When these conditions are not fulfilled the articles should, as the Board of Revenue suggest, be taxed at one per cent., under No. 15 of Schedule IV, as in the case of "rails, chairs, and fish-plates," with which it was intended that they should be classed. A notification (copy enclosed) has now been issued giving effect to this intention. The articles imported by————————may be treated in accordance with this decision.

NOTIFICATION—By the Government of India, Finance and Commerce Department, No. 2315-S. R., dated the 17th May 1895.

In exercise of the power conferred by section 23 of the Sea Customs Act (VIII of 1878), the Governor General in Council is pleased to direct that the duty of 5 per cent. *ad valorem*, leviable under No. 15 of Schedule IV of the Indian Tariff Act (VIII of 1894), as amended by Act XVI of 1894, on spikes (commonly known as dogspikes) of iron and steel, other than the spikes mentioned in No. 93 of the said schedule, shall be reduced to one per cent. ***ad valorem.***

Customs Circular No. XIV.

From—The Government of India, Finance and Commerce Department, No. 2509-S. R, dated the 30th May 1895.

To—The Secretary to the Government of Bengal, Financial Department.

With reference to your letters Nos. 2136-S. R. and 51-2 F., dated, respectively, the 11th April and 11th May 1895, I am directed to enclose copy of a Notification No. 2508-S. R., dated the 30th May 1895, exempting from the payment of import duty machinery (and component parts thereof) as defined in No. 14 of Schedule IV of the Indian Tariff Act, which is intended for the manufacture of tea in all its stages from the drying of the leaf to its packing for the market.

2. The effect of this exemption is to substitute for the item (*e*) in No. 14 of the schedule the following: "(*e*) the manufacture of tea in all its stages from the drying of the leaf to its packing for the market, inclusive."

NOTIFICATION—By the Government of India, Finance and Commerce Department, No. 2508-S. R., dated the 30th May 1895.

In exercise of the power conferred by section 23 of the Sea Customs Act, VIII of 1878, the Governor General in Council is pleased to exempt from the import duty leviable thereon under No. 14 of Schedule IV of the Indian Tariff Act, as amended by Act XVI of 1894, machinery (and component parts thereof) as defined in article 14 which is intended for the manufacture of tea in all its stages from the drying of the leaf to its packing for the market, inclusive.

ACCOUNT.
RAILWAY.

REVIEW OF THE REVENUE AND EXPENDITURE OF THE RAILWAY BRANCH OF THE PUBLIC WORKS DEPARTMENT FOR 1893-94.

No. 275 A.R., dated Simla, the 5th June 1895.

RESOLUTION—By the Government of India, Public Works Department.

READ—

Note by R. G. Macdonald, Esq., Accountant General, Public Works Department, on the Capital and Revenue Accounts of Railways in India for 1893-94, No. 252 R., dated 25th March 1895.

RESOLUTION.—The note by the Accountant General, copy of which is appended, exhibits the transactions of the Public Works Department with regard to railways during the year 1893-94, and shows the financial results to the State of the working of State and Guaranteed railways.

2. During the year under review, 346¼ additional miles were opened for traffic, and the further capital outlay incurred was as under :—

	Miles.	Capital Outlay. Rx.	£
State Railways —			
Productive	333¾	3,225,973	...
Defensive	...	848,452	...
TOTAL STATE RAILWAYS	333¾	4,074,425	...
Guaranteed railways	...	...	69,290
State lines leased to companies	12½	...	748,255
	346¼	4,074,425	817,545

The mileage open at the end of the year aggregated 16,392¾ miles, exclusive of 2,115¼ miles of lines belonging to Native States and other bodies and with which the Government of India have no financial concern.

The capital outlay incurred on construction of State and Guaranteed railways to the end of 1893-94, stood as under :—

	Rx.	£
(i) *On State lines*—		
Direct capital outlay	80,723,601	...
Redemption of liabilities	...	33,553,451
(ii) *On State lines leased to Companies*	...	24,061,335
(iii) *On Guaranteed railways*	...	45,276,701
	80,723,601	102,891,487

3. The gross revenue for the year showed an increase of Rx. 1,239,579 over that of the previous year, bringing the total up to Rx. 23,374,204, derived as under :—

1892-93. Rx.		1893-94. Rx.
15,814,807	State railways	16,879,10,
6,301,935	Guaranteed railways	6,461,043
17,883	Subsidised railways (repayment of advances of interest)	34,054
22,134,625	GRAND TOTAL	23,374,204

The gross charges for the year showed an increase of Rx. 928,030, bringing the total up to Rx. 24,909,707, expended as under :—

1892-93. Rx.		1893-94. Rx.
10,620,366	Working expenses	10,856,349
963,948	Surplus profits, share of net earnings, etc.	1,056,111
4,853,268	Interest on sterling outlay, including interest paid to Guaranteed Companies	5,068,542
4,779,107	Interest on rupee outlay	4,972,838
2,717,399	Terminable annuities issued for purchase of railways	2,797,424
47,589	Other charges	158,443
23,981,677	GRAND TOTAL	24,909,707

The transactions thus recorded result in a net charge to the State of Rx. 1,535,503 as compared with a net charge of Rx. 1,847,052 in the preceding year. In paragraph 7 of the Accountant General's note, the charge for the year will be seen to have been distributed as follows :—

1892-93. Rx.		1893-94. Rx.
—1,041,200	State railways	—666,180
—805,569	Guaranteed railways	—778,938
—11,143	Subsidised Companies	+13,054
+10,860	Miscellaneous	—103,439
—1,847,052	NET LOSS	—1,535,503

These charges are directly attributable to the low rate of exchange which obtained in both years, and the decrease in the amount of the loss is due to the traffic during the year having been considerably in excess of that of the previous year. In return for this annual charge the State receives all the indirect benefits arising from a railway system of 16,392¾ miles open.

4. Deducting the payments made to companies working State railways in respect of surplus profits or share of net earnings, the net receipts from State railways, including those worked by companies, gave a return of 5·95 per cent. on the capital outlay at the close of the year, as reckoned in rupees. The increased exchange charges on remitting to England the interest upon the sterling portion of the capital, has, however, converted this satisfactory return into a loss. The capital outlay on State lines, it should be observed, includes the outlay on lines under construction or abandoned, and certain other expenditure, referred to in paragraph 13 of the Accountant General's note, on which the Government derive no return. On the other hand, in the case of the old Guaranteed railways which have been purchased by the State, the capital outlay entered under State lines, as brought out in paragraph 2 above, does not completely represent the actual outlay incurred on them in England and in India, and supplementary figures are accordingly given by the Accountant General in paragraph 15 of the note.

Adopting, therefore, these several methods of stating the capital outlay, the results to the State of the working of State lines during the year may be set down briefly as under :—

	Rx.	Per cent.
(1) On **total capital outlay** as exhibited in paragraph 12 of the Accountant General's note, *viz.*	144,784,579	= 5·95
(2) On **open line capital outlay** as exhibited in paragraph 13 of the Accountant General's note, *viz.*	137,993,566	= 6·24
(3) On **total capital outlay** *including* supplementary figures given in paragraph 15 of the Accountant General's note, *viz.*	174,783,656	= 4·93
(4) On **open line capital outlay** including supplementary figures given in paragraph 15 of Accountant General's note, *viz.*	167,992,643	= 5·13

5. The working of the three Guaranteed railways during the year is reviewed in paragraphs 55 to 58 of the note. After excluding charges for land and supervision the result has been a loss to the State of Rx. 744,934. The Great Indian Peninsula and Madras railways entailed a loss of Rx. 418,409 and Rx. 349,513 respectively, while the Bombay, Baroda and Central India railway gave a profit of Rx. 22,988.

6. The net amount of guaranteed interest paid by the State to the 31st March 1894 on account of the three Guaranteed railways, after taking as a set-off the aggregate of the net revenue balances for the several half-years to the 31st December 1893, is £13,254,687.

ORDER.—Ordered, that the foregoing, with a copy of the note referred to, be forwarded to the Local Governments and Administrations noted on the margin, for information.

Ordered also, that a copy of the resolution and note be forwarded to the Finance Department, and that the papers be published in the *Gazette of Indic*.

The Governments of Madras and Bombay (Railway), Bengal, the North-Western Provinces and Oudh and the Punjab.
The Chief Commissioners of the Central Provinces, Burma and Assam.
The Resident at Hyderabad.
The Agents to the Governor General for Central India, Rajputana and Baluchistan.
The Accountant General, Public Works Department.
The Director General of Railways.
The Consulting Engineers to the Government of India for Railways, Calcutta, Lucknow and Assam.

W. S. S. BISSET, *Lieut.-Colonel, R.E.*,
Secretary to the Government of India.

Documents accompanying.
Note by the Accountant General, Public Works Department, No. 252 R., dated 25th March 1895.

Accompaniment to Public Works Department Resolution No. 275 A.—R., dated 5th June 1895.

Note by R. G. Macdonald, Esq., Accountant General, Public Works Department, upon the Capital and Revenue Finance Accounts of Railways in India for 1893-94.

The Revenue and Expenditure of the Railway Branch of the Public Works Department is recorded under the following major heads :—

Revenue—
XXVI.—State Railways (Gross Traffic Receipts).
XXVII.—Guaranteed Companies (Net Traffic Receipts).
XXVIII.—Subsidized Companies (Repayment of advances of interest).

Expenditure—
34.—Construction of protective Railways (charged against Famine Insurance).
37.—Construction of Railways (charged against Revenue in addition to that under Famine Insurance).
38.—State Railways—Working Expenses, Interest charges, etc.
39.—Guaranteed Companies—Surplus Profits, Land, Supervision, and Interest.
40.—Subsidized Companies—Land, Subsidies, and Advances of Interest.
41.—Miscellaneous Railway Expenditure (Surveys, etc.).
48.—State Railways—Construction.
50.—State Railways—Capital charge involved in Redemption of Liabilities.

2. In addition to the foregoing, this note and the accounts attached to it embrace the transactions recorded in the Finance and Revenue Accounts under the head "Capital Account of Indian Railway Companies," as well as the transactions of the following Native States Railways the accounts of which are dealt with in this Department :—

Bhopal State Railway (Bhopal Section).
Amraoti Railway.
Khamgaon Railway.

3. The Warora and Umaria Collieries, both as regards Capital and Revenue transactions, are classed under State Railways.

4. For convenience, this note is divided into the following sections :—

Section *A.*—State Railways—Revenue transactions (Major heads XXVI and 38).
„ *B.*—Guaranteed Railways—
(*i*) Revenue transactions (Major head XXVII).
(*ii*) Surplus Profits, Land, etc. (Major head 39).
„ *C.*—Subsidized Companies (Major heads XXVIII and 40).
„ *D.*—Miscellaneous Railway Expenditure (Major head 41).
„ *E.*—Construction Expenditure (Major heads 34, 37, 48, and 50).
„ *F.*—Capital account of Guaranteed Companies.
„ *G.*—Capital Account of Indian Railway Companies (exclusive of the three old Guaranteed Companies).
„ *H.*—Railways belonging to Native States.

General results of the year.

5. An account is submitted with this review exhibiting in abstract by funds and Finance heads the Revenue and Expenditure on account of State and Guaranteed Railways during the year, and a comparison is made therein of the results of the year, with the Budget and Revised Estimates and with the actuals of 1892-93.

6. The outlay on construction was as follows:—

	Rx.	£
34.—Construction of protective Railways (Famine Insurance)	1,060,954	
37.—Construction of Railways (charged against Revenue in addition to the above)	73,903	
48.—Construction of Railways (not charged to Revenue)	2,939,568	
Capital outlay by the old Guaranteed Companies	75,590	69,290
State lines constructed by the agency of Companies	1,050,788	748,255
TOTAL	5,200,803	817,545

7. The results shown by the Railway Revenue Account are as follows:—

	State Railways.	Guaranteed Railways.	Subsidized Companies.	Miscellaneous.	Total.
	Rx.	Rx.	Rx.	Rx.	Rx.
Gross Receipts	16,879,107	6,461,043	34,054	...	23,374,204
Working expenses	7,779,118	3,077,231	.	...	10,856,349
Net earnings	9,099,989	3,383,812	34,054	...	12,517,855
Charges upon net earnings.					
Surplus profits and share of net earnings, etc., paid to Companies	484,857	571,254	...	...	1,056,111
Interest on debt incurred for Capital	4,972,838	...	...	...	4,972,838
Annuities charged upon Revenue Account* £1,695,547	2,797,424	...	...	...	2,797,424
Interest on advances of Capital by the Secretary of State £216,948	357,935	...	...	...	357,935
Interest on Capital deposited by Companies £679,635	1,153,115	...	...	...	1,153,115
Guaranteed interest of the old Companies £2,154,720	...	3,557,492	...	...	3,557,492
Land charges, supervision and subsidies	...	34,004	18,208	...	52,212
Advances of interest to certain Companies	...	...	2,792	...	2,792
Miscellaneous Railway Expenditure	...	...	...	103,439	103,439
TOTAL CHARGES	9,766,169	4,162,750	21,000	103,439	14,053,358
Net gain + or loss — to Government	—666,180	—778,938	+13,054	—103,439	—1,535,503
Compared with —					
in 1892-93	—1,041,200	—805,569	—11,143	+10,860	—1,847,052
in 1891-92	+109,560	—333,228	—136	—92,060	—315,864
in 1890-91	—387,297	—145,989	—4,808	—149,197	—687,291
in 1889-90	—983,920	—699,530	—20,027	—149,124	—1,852,601

8. From the foregoing statement it will be seen that after meeting all charges for annuities and interest (including interest on capital expended on lines not opened for traffic), charges for land for Companies' lines and miscellaneous expenditure on surveys, etc., the result of the year is a net charge to the State of Rx. 1,535,503. The traffic was considerably in excess of that of previous years, and the loss now brought out may be directly attributed to the unfavourable rate of exchange which obtained during the year. The interest and annuities paid in England amounted to £5,744,313 which, at the exchange of 1*s.* 2·54664222*d.* the rupee, aggregated Rx. 9,477,341, the difference between this and the old par of exchange being no less than Rx. 3,733,028.

* These annuities are terminable between the years 1953 and 1958.

SECTION A.

STATE RAILWAYS.

(i)—Gross Receipts and Working Expenses.

9. At the beginning of the year under review 13,461 miles of State Railway were open for traffic,* *viz.* :—

	Miles.
State lines worked by the State—	
Standard gauge	3,552¼†
Metre gauge	1,281½
Special gauge	36¼
	4,870
State lines worked by Companies—	
Standard gauge	3,493¼
Metre gauge	5,097¾‡
	8,591
TOTAL	13,461

10. During the year 1893-94, the following lengths of line were opened for traffic:—

	Miles.
Godhra-Rutlam (Limkhera to Dohad)	20
Oudh and Rohilkhand (Lucknow to Rae Bareli)	48½
East Coast (Kistna Canal terminus to Bezvada)	4

‡ Includes Bengal and North-Western Railway.

{ Both these railways are the property of Companies, but for convenience are classified as State Railways.

§ Fair-weather line.

‖	Miles.
As per Administration Report on the Railways in India for 1893-94, Part I, Appendix C	13,804¼
Add—Cherra Companygunj Railway now treated as a tramway for administrative purposes	8
	13,812¼
Deduct—Calcutta Port Commissioners' Railway now treated as a Railway for administrative purposes	6¼
	13,806

¶ Includes Bengal Central and Bengal and North-Western Railways.

contributions to Provident Funds paid to Companies to Rx. 484,857 raising the total charges to Rx. 8,263,975, and leaving Rx. 8,615,132 as the net receipts accruing to Government from all the State lines during 1893-94. This result is better than that of 1892-93 by Rx. 745,193, owing chiefly to a large increase in third class passenger traffic consequent on *melas* and pilgrimages.

12. The Capital expenditure incurred by, or on the direct responsibility of, the State, including the Capital charge involved by incurring a specific amount of debt in purchase or redemption of liabilities in connection with lines formerly belonging to Guaranteed Companies and acquired by the State, is as under:—

	Rx.	£
(i) On State lines—		
(*a*) Direct Capital outlay . .	80,723,601	...
(*b*) Redemption of liabilities . .	...	33,553,451
(ii) On State lines leased to Companies (Capital raised wholly or in part by Companies under guarantee)	30,507,527*	...
TOTAL .	Rx. 111,231,128	33,553,451

13. This sum, however, includes expenditure on lines not opened for traffic at the close of the year under review, on materials held in reserve on the North-West Frontier and with storekeepers at ports, on projects abandoned or in abeyance, and inefficient expenditure incurred in connection with lines transferred to Companies, aggregating Rx. 6,791,013 (*vide* Schedule II). Excluding such expenditure, the open line Capital outlay at the close of 1893-94 may be stated at Rx. 137,993,566 (*vide* Schedule A).

14. The net receipts accruing to Government for the year, Rx. 8,615,132, give a return on the total Capital outlay at the close of the year at the rate of 5·95 per cent. and on the *open line* Capital outlay at the rate of 6·24 per cent.

15. The above results, although representing correctly the return on the Capital outlay actually incurred by the State, cannot be taken as giving the true returns from the State Railways on the actual money expended upon the various undertakings. The old Guaranteed Railways, which have been purchased by the State, were for the most part acquired by the payment of annuities, including the establishment of sinking funds which will redeem the capital at the expiry of the periods for which the annuities are to run. These charges are met from current revenues, and in respect of the capital thus to be redeemed, no charge appears in the Government account of Capital outlay. On the other hand, when a line was purchased outright, as in the case of the Oudh and Rohilkhand Railway, the outlay, as shown in the Government books, includes the premium paid on the Company's share Capital. The actual outlay incurred on the State Railways—taking, in the case of the Guaranteed Railways purchased by Government, the amounts expended by the several Companies *plus* the expenditure since incurred on construction—may† be stated at Rx. 174,783,656‡, and on open

* Excludes the outlay on the Bengal and North-Western Railway not guaranteed by the State.

† Sterling figures in the old Companies' accounts were converted at fixed contract rates. The difference between contract and actual average rates cannot be stated.

	Rx.	Rx.
‡ Outlay as recorded in Finance and Revenue Accounts (*vide* para. 12) . .		144,784,579
Add—Difference between outlay included above and actual rupee expenditure on lines purchased from Companies (*vide* Schedule A)—		
East Indian	21,643,501	
Eastern Bengal	1,970,053	
Sind, Punjab and Delhi	7,175,306	
South Indian	277,955	
	31,066,815	
Deduct—Premium on Oudh and Rohilkhand Railway . .	1,067,738	
		29,999,077
TOTAL .		174,783,656

lines at Rx. 167,992,643, on which amounts the net receipts for 1893-94 give a return at the rate of 4·93 and 5·13 per cent., respectively.

16. The receipts and charges, the Capital outlay, and the return per cent. on Capital outlay, of each line, will be found in the statement attached to this review as Schedule A. The following is a general summary:—

	Receipts.	Expenditure.	Net Receipts.	Percentage of working expenses on receipts.		Capital outlay to 31st March 1894.	Percentage of net receipts on Capital outlay to 31st March 1894.
				Including payments to Companies.	Excluding payments to Companies.		
	Rx.	Rx.	Rx.			Rx.	
Imperial . .	15,882,969	7,879,011	8,003,958	49·61	45·54	132,313,183	6·05
Provincial . .	996,137	384,964	611,173	59·90	59·90	5,680,383	4·54
TOTAL .	16,879,106	8,263,975	8,615,131	48·96	46·09	137,993,566	6·24

17. It will be seen from the above that the railways classed as Imperial yielded a return of 6·05 per cent. on the Capital outlay as recorded in the Government accounts, while those classed as Provincial yielded a return of 4·54 per cent.

18. The net receipts from the following railways exceeded the interest charges for the year:—

Railways.	Net Receipts (less surplus profits and net earnings paid to Companies).	Interest and annuities, etc.	Surplus to State.
	Rx.	Rx.	Rx.
IMPERIAL.			
East Indian	3,558,539	2,713,353	845,186
Rajputana-Malwa	1,229,839	528,341	701,498
Tirhoot	134,669	99,685	34,984
Eastern Bengal	706,969	569,966	137,003
Palanpur-Deesa	890	640	250
PROVINCIAL.			
Burma	253,085	212,754	40,331

19. The North Western Railway gave a return of 2·61 per cent. on the actual outlay incurred on the line. Owing to the Frontier sections not paying their working expenses and to the heavy loss by exchange on the sterling payments of interest and annuities, the net receipts fell short of interest and annuity charges by Rx. 1,026,220.

20. The financial results to the State of the working of the Companies' lines, classed as State Railways, are shown more fully in Schedule I.

Comparison with Actuals during 1892-93 and Budget and Revised Estimates.

21. The actual gross receipts and working expenses of State Railways for the year 1893-94 compare with the actuals of 1892-93, and with the Budget and Revised Estimates as under :—

	Actuals, 1893-94.	Revised Estimate.		Budget Estimate.		Actuals, 1892-93.
		Estimate.	Actuals, more or less.	Estimate.	Actuals, more or less.	
	Rx.	Rx.	Rx.	Rx.	Rx.	Rx.
Gross receipts .	16,879,107	16,775,300	+103,807	16,291,500	+587,606	15,814,807
Working expenses (including surplus profits, etc.)	8,263,975	8,259,100	+4,875	8,087,500	+176,475	7,944,868
Net receipts .	8,615,132	8,516,200	+98,932	8,204,000	+411,131	7,869,939

Receipts.

22. *With Actuals.*—The receipts are more than the actuals of the previous year by Rx. 1,064,300, due chiefly to passenger traffic having improved, in consequence of important pilgrimages and fairs having been held during the year. The traffic in goods was also favourable owing to a better season. The additional open mileage also contributed to the increase.

On the North Western Railway, there was a large increase, due chiefly to the third class passenger traffic, which had suffered in the previous year owing to a sickly season and a bad harvest, having recovered; to the goods traffic having been better owing to the wheat crops of 1893 being better than those of the previous year (the traffic in this commodity and oilseeds alone accounted for a large portion of the increase); to larger receipts for the hire of vehicles and from mileage and demurrage of stock, and to heavy freight charges due from the Commissariat Department, outstanding in Suspense at the end of the previous year, having been recovered during the year under review.

The increase on the Hyderabad-Umarkot Railway is due to the fact that the previous year's figures dealt with the transactions of only a portion of a year, as the line was opened on 18th August 1892.

The increase on the Bengal Nagpur Railway is attributed to a general improvement in passenger traffic, arising from the further acceleration of train service, and to increased passenger traffic consequent on pilgrimages and fairs, etc.; to large exports of linseed and increased despatches of limestone and wooden sleepers, and to a brisk traffic in salt and myrabolams.

The increase on the East Indian Railway is due to heavier passenger traffic, consequent on several fairs and pilgrimages to Jagganath and Allahabad, and to exceptionally heavy goods traffic in the months of December 1893, January and February 1894 in cotton, linseed, mustard, rapeseed and rice.

The transactions of the East Coast Railway include the receipts of the Bezvada-Godavari and Rajamundry-Vizianagram sections, which were opened to traffic during the last quarter of the previous and during the current years, respectively.

The large increase on the Oudh and Rohilkhand Railway is due to a considerable improvement in passenger traffic, especially in the third class in connection with fairs, and to the traffic over the Lucknow-Rae Bareli section. There was also a marked increase under goods traffic, due chiefly to the earnings for carriage of material for the Bareilly-Rampur-Moradabad Railway, and partly to the opening of the Lucknow Rae Bareli Branch.

The large increase on the Southern Mahratta Railway is due to improved goods traffic—the result of a more favourable season—in consequence of which the traffic in cotton and oilseeds was very brisk. The traffic in food-grains also showed a marked improvement. The opening of the Guntakal-Hindupur Railway has resulted in establishing heavy booking of Singareni coal over this Railway for the South Indian Railway. There was also some improvement in coaching traffic.

The whole of the increase on the Lucknow-Bareilly Railway was in the goods traffic, and is attributed to the Dudwa Branch having been open during nine months this year against three months in the previous year, as well as to normal development of traffic.

The large increase on the Rajputana-Malwa Railway, which was chiefly under coaching traffic, is due to large attendance at fairs and to the movements of Hindu marriage parties. Goods traffic shows a small increase ; the traffic in oilseeds and general merchandise improved considerably, the increase in these commodities alone amounting to nearly 15 lakhs. There was however a falling-off in the traffic in raw cotton, grains, salt, and sugar to the extent of about 14¼ lakhs.

The large increase on the Eastern Bengal Railway is attributed chiefly to improved passenger traffic, and to the opening of the Barsoi-Kissengunge Branch and Bengal-Dooars Railway.

The decrease on the Bengal and North-Western and Tirhoot Railway is attributed to a poor harvest, and to a temporary stoppage of traffic on the Durbhanga-Bairagnia Branch owing to floods.

The decrease on the Burma Railway under both coaching and goods traffic is due to a bad and late paddy harvest.

The Guntakal-Mysore Frontier Railway was practically opened to traffic during the year under review.

The decrease on the South Indian Railway is attributed to interruption of traffic owing to extensive breaches caused by floods in November 1893.

The decrease on the Indian Midland Railway is attributed chiefly to a large item, on account of freight due on material for the Bina-Guna Railway not having been paid before the close of the year owing to a dispute as to rates.

23. *With Budget.*—The actuals are more than the Budget Estimate by Rx. 587,606.

On the North Western Railway, there is a large increase, due partly to the causes mentioned in the preceding paragraph and partly to the estimate having been placed too low. It is extremely difficult on a large system like this to forecast the varying conditions of traffic which is subject to sudden and unexpected rises and falls.

On the Bengal Nagpur Railway, the passenger traffic increased, owing to the breaking up of the great fair at Jagganath, which abnormally increased the earnings, and to the acceleration of the through train service. The sundry earnings on this line also show an improvement, the result of increase in mileage and demurrage. On the other hand the goods traffic shows a falling-off, due chiefly to bad harvests in the Chhattisgarh and neighbouring districts.

There was a large increase on the East Indian Railway due chiefly to large earnings from intermediate and third class passengers. There were several Hindu festivals and fairs during the year principally at Jagganath and Allahabad, and the pilgrim traffic to or from these places was exceptionally heavy.

The increase on the East Coast Railway is due to the actuals of the year including the receipts of the Bezvada-Godavari Section of the Railway, while in the estimate, the receipts for this section were amalgamated with those of the Bezvada Extension Railway. The increase is also partly due to the development of traffic on the East Coast Railway generally.

On the Oudh and Rohilkhand Railway, the third class passenger traffic improved, and the receipts for carriage of railway material were larger than anticipated.

The increase on the Southern Mahratta Railway is due to the improvement in the export traffic arising from better harvests.

The increase on the Eastern Bengal Railway is attributed to a generally favourable traffic throughout the year.

The large increase on the Rajputana-Malwa Railway occurred chiefly in coaching traffic, and is due to traffic having proved very much more favourable than was expected. Goods traffic also proved slightly better, and this is due to heavy traffic in seeds, particularly oilseeds.

The decrease on the Burma State Railway is attributed to the estimate having been placed at too high a figure.

The decreases on the Bengal and North-Western and Tirhoot, South Indian and Indian Midland Railways are attributed to the causes mentioned in the preceding paragraph.

24. *With Revised.*—The actual receipts are more than the Revised Estimate by Rx. 103,807 only. The more important variations on individual lines are as under.

There is an increase on the North Western Railway attributed to the traffic in the latter part of February and March having proved much better than was expected.

The large increase on the Bengal Nagpur Railway is attributed to a general improvement in all descriptions of traffic; the passenger traffic towards the close of the year proved very favourable on account of the Kumbh fair as a number of passengers travelled over this line *viâ* Katni towards Allahabad, etc. Goods traffic was also very brisk in the last quarter of the year, especially in coal despatched from the Umaria Colliery. Wheat, rice and oilseeds were also despatched in large quantities, and the traffic in piece-goods, sleepers, firewood, bamboos and limestone also showed considerable increases.

The increase on the Oudh and Rohilkhand Railway is due to the traffic generally towards the close of the year having proved more favourable than was anticipated in the estimate.

The increase on the Southern Mahratta Railway is due to a sudden expansion of traffic towards the close of the year.

The increase on the Rajputana-Malwa Railway occurs chiefly under coaching traffic and is due generally to the steady development of third class passenger traffic.

The increase on the South Indian Railway is attributed to the earnings during the last few weeks of the year having proved more favourable than was anticipated.

The decrease on the Indian Midland Railway is attributed to the large outstanding referred to in paragraph 22 above.

The decrease on the Bengal and North-Western and Tirhoot Railway is attributed to the causes mentioned in paragraph 22 above.

Working Expenses.

25. *With Actuals.*—The increase of Rx. 319,107 in working expenses as compared with the actuals of the previous year, may be attributed generally to the increase in the traffic earnings. It was 30 per cent. of the increased earnings.

The increase on the North Western Railway is attributed to repairs of flood damages, to the strengthening and re-construction of bridges, to the improvement in traffic, and to heavier repairs and renewals of engines caused by the extra mileage run. The grant of exchange compensation allowances from the 1st April 1893 also contributed to the increase, while the low rate of exchange may also be said to have influenced the expenditure to some extent.

The increase on the Bengal Nagpur Railway is due to increased charges under maintenance and renewals of permanent way, more ballast being required for renewals; to cost of relaying; to abnormal expenditure incurred in connection with the re-roofing of staff quarters; to increased charges for ballast trains and for carriage of corrugated-iron sheets and tiles for staff quarters; to special repairs to coaching vehicles, and to abnormal expenditure in connection with the renewal of bearing springs for goods vehicles.

The increase on the Burma Railway is due principally to the relaying of three miles of permanent way in the Sittang district and to very heavy repairs to coaching and goods vehicles.

The increase on the Oudh and Rohilkhand Railway is due principally to the larger traffic worked and to the opening of the Lucknow-Rae Bareli Section.

The increase on the Southern Mahratta Railway is attributed to abnormal expenditure on the renewal of sleepers on various parts of the line, to the transfer from Capital of the cost of works and buildings at the Ghorepuri temporary station on its being closed for traffic, to the renewal of copper tube plates and tyres of locomotives, to the carriage of a larger quantity of fuel, to the fitting of Jones' patent buffers to carriage and wagon stock, and to increased expenditure consequent on increased earnings.

The increase on the Rajputana-Malwa Railway is due chiefly to a larger payment on account of surplus profits to the Bombay, Baroda and Central India Railway Company, consequent on the working results having proved more satisfactory, and partly to the payment during the year, instead of in the previous year, of 90 per cent. of the Company's share of surplus profits for the half-year ending 31st December 1892; and to heavy expenditure having been incurred on wheel and axle-changing operations. On the other hand, there was a large saving in locomotive expenses due to less train mileage run, to less coal having been carried during the year, and to three engines having been replaced and extensive repairs having been carried out in the previous year.

The increase on the Warora Colliery is due to an increase in the output of coal, to the issue of two boilers to Revenue, to the write-off to Revenue of Rx. 19,971 representing loss on stores; to an increase in the initial cost of coal, the value of the coal consumed by Revenue thereby being increased, and to a larger consumption of coal.

On the Bengal and North-Western and Tirhoot Railway there was a decrease due to smaller payment on account of the Company's share of net earnings consequent on a decrease in earnings.

The decrease on the East Indian Railway is due principally to an adjustment, by credit to Revenue working expenses and debit to Capital, of Rs. 8,22,827 representing the expenditure to end of 1892-93 on an 11th sleeper per rail laid on the line. This adjustment was carried out under the orders of Government. Excluding this special credit, the actuals are more than those of the previous year by Rx. 39,580, attributed chiefly to the causes mentioned in paragraph 26 below.

The decrease on the Wardha Coal State Railway is due chiefly to a special charge on account of extra renewals of sleepers having been made in the previous year.

The decrease on the South Indian Railway is due to a shorter length of line having been renewed with 50-lb rails, to the transfer of the Dharmavaram-Guntakal Section to the Southern Mahratta Railway Company, and to the accounts of the previous year having included the value of four engines which were replaced at the cost of Revenue.

The decrease on the Eastern Bengal State Railway is due to a special adjustment of Rs. 2,62,468, representing the depreciation charges on the Bengal Central Railway Rolling Stock, which was credited to Capital by debit to the Revenue Account under the orders of Government, having been included in the accounts of the previous year.

The decrease on the Indian Midland Railway is attributed chiefly to a provisional payment having been made to the Bombay, Baroda and Central India Railway in the previous year on account of share of the cost of joint works at Agra.

The Guntakal-Mysore Frontier Railway was practically opened to traffic during the year under review.

26. *With Budget.*—The actual working expenses exceeded the Budget Estimate by Rx. 176,475. The more important variations in line estimates are as under—

The excess on the Bengal and North-Western and Tirhoot Railway is attributed to an under-estimate for renewals of permanent way, to flood damages on the Durbhanga-Bairagnia Branch, and to heavier repairs to stations and buildings.

The excess on the North Western Railway is due to the heavier traffic worked, to a larger consumption of fuel, and to more extensive renewals of engines and vehicles.

The excesses on the Burma and Rajputana Malwa Railways are attributed to the causes mentioned in the preceding paragraph.

The excess on the East Coast Railway and the lapse on the Bezvada Extension are attributed to the cause mentioned in paragraph 22 above, and to extra working expenses consequent on increased earnings.

The excess on the Southern Mahratta Railway is due to an increase in the Company's share of net earnings for 1893, consequent on the improved traffic; to the payment of 90 per cent. of the Company's share of net earnings for the half-year ended 31st December 1892 not being provided for in the estimate; and to increased expenditure consequent on increased earnings.

The excess on the Mysore State Railway is due chiefly to the improved earnings, and to the payment of the Company's share of net earnings for three half-years as explained in the previous paragraph.

The excess on the Indian Midland Railway occurs chiefly under maintenance of way and works, and is attributed to sufficient provision not having been made in the estimate for extraordinary renewals.

The excess on the Warora Colliery is attributed to the issue of boilers to Revenue and to adjustments in the value of stores.

The lapse on the East Indian Railway is attributed to the special credit of Rs. 8,22,827 referred to in para. 25. Excluding this credit, the actuals are in excess, due chiefly to extensive renewals of sleepers; to renewals of rails and of fencing; to heavier charges than were anticipated for payments to other lines on account of hire of vehicles and mileage and demurrage charges; and to increased expenditure on fuel and running expenses, due to the heavier traffic worked.

The lapse on the Oudh and Rohilkhand Railway is attributed entirely to delay in the supply of wooden sleepers intended for renewals; and to the share of joint station charges of Moghal Serai and Aligarh stations for the year 1893 remaining unadjusted.

The lapse on the South Indian Railway is attributed principally to the renewals with 50-lb rails being less than estimated for.

27. *With Revised.*—The actual working expenses compare very favourably with the amount of the Revised Estimate, the result being a small excess of Rx. 4,875. The more important variations between the estimate and actuals on individual lines are detailed below :—

The excess on the North Western Railway is attributed entirely to the increased traffic at the close of the year, and to a credit for share of joint station expenses not having been received from the East Indian Railway.

The excess on the Bengal Nagpur Railway is attributed to the cost of working the increased traffic which sprang up suddenly during the last quarter of the year.

The excess on the East Coast Railway is attributed to the working expenses having been under-estimated.

The excess on the Eastern Bengal State Railway is attributed to fluctuations in the suspense accounts.

There is a small lapse on the East Indian Railway due chiefly to short expenditure on repairs and renewals of vehicles.

The lapses on the Oudh and Rohilkhand and South Indian Railways are attributed to the programme of work not being fully carried out.

The lapse on the Rajputana-Malwa Railway occurred principally under Locomotive expenses and is due to less train mileage run, and to less coal having been carried during the year than was anticipated.

(ii)—Interest and Annuities.

28. The charges for interest and annuities on account of State Railways for 1893-94 amounted to Rx. 9,281,312, as under :—

	England.		India.	Total.
	Sterling.	Rupee equivalent.		
	£	Rx.	Rx.	Rx.
Interest charged in India on debt incurred for direct outlay by the State	...	...	3,152,455	3,152,455
Interest on debt taken over or incurred in connection with lines transferred from Companies to the State :—				
On debentures since discharged	...	...	174,494	174,494
On debentures, debenture stock and on Indian stock issued in redemption of annuities, debentures and debenture stock and for purchase of undertakings	997,463	1,645,679	210	1,645,889
Annuities in purchase of Companies' lines	1,695,547	2,797,424	...	2,797,424
Interest on Capital deposited by Companies.	679,635	1,121,306	31,809	1,153,115
Interest chargeable against Companies on Advances by Secretary of State	216,948	357,935	...	357,935
Total	3,589,593	5,922,344	3,358,968	9,281,312

29. Interest is charged in India at 4 per cent. per annum on debt incurred for direct outlay by the State, except on a loan of Rx. 1,000,000 from His Highness the Maharaja Holkar for the Holkar State Railway which bears interest at 4½ per cent. per annum.

30. The debt taken over or incurred in connection with lines acquired by the State from Companies is on account of the East Indian, Eastern Bengal, Sind, Punjab and Delhi (incorporated in the North Western Railway), Oudh and Rohilkhand and South Indian Railways, and consists of debentures and debenture stocks of the Companies, of which the State assumed the direct liability on the transfer of the lines to Government; of India stock issued in purchase of the Oudh and Rohilkhand and South Indian Railways; and of stock issued from time to time in redemption of portions of annuities or of debentures and debenture stocks, which are bought up as opportunity offers.

The debentures discharged up to date are as under :—

	Rx.
East Indian Railway, £2,950,000 or expressed in Rx., converted at the contract rates for the years in which discharged	3,546,684
Eastern Bengal Railway, £612,350 or expressed in Rx., converted at the average rates for the years in which discharged	815,670

and interest is calculated at the rate of 4 per cent. per annum on these sums as in the case of direct outlay by the State.

31. The details of the interest charges and the charge on account of each line are as follows:—

	East Indian.	Eastern Bengal.	Sind, Punjab and Delhi (North Western).	Oudh and Rohilkhand.	South Indian.	TOTAL.
	Rx.	Rx.	Rx.	Rx.	Rx.	Rx.
On debentures discharged . .	141,867	32,627	...	...	...	174,494
On debenture and debenture stock	106,588	23,011	...	65,283	63,394	258,276
On India 3½ per cent. stock issued in redemption of portion of annuity and debenture stock .	395,090	33,507	271,198	—541	...	699,254
On India 3 per cent. stock issued in redemption of portion of annuity, debenture stock and debentures, and for purchase of undertakings from Railway Companies	12,267	34	...	487,801	184,736	684,838
On 4 per cent. rupee debt issued in redemption of portion of annuity	210	...	...	...	...	210
Discount Sinking Fund in redemption of debt incurred in excess of money raised	...	...	...	3,311	...	3,311
TOTAL .	656,022	89,180	271,198	555,854	248,130	1,820,383

32. The East Indian, the Eastern Bengal and the Sind, Punjab and Delhi Railways were purchased by annuities: the East Indian Railway annuity, terminating in 1953, at the rate of £5-12-6 for every £100 stock of the Company, the Eastern Bengal, terminating in 1957, at £6-3-4·79 per £100 stock, and the Sind, Punjab and Delhi, terminating in 1958, at the rate of £5-3-3·141 per £100 stock. In the case of the East Indian Railway a portion of the annuity equivalent to one-fifth of the commuted value of the capital stock, or £6,550,000, has been deferred, and on this interest at 4 per cent. is guaranteed. The holders of this portion of the stock participate in the surplus profits.

The charges in respect of each line were as follows:—

	East Indian.	Eastern Bengal.	Sind, Punjab and Delhi (North Western).	TOTAL.
	Rx.	Rx.	Rx.	Rx.
Annuity	1,394,044	192,785	612,682	2,199,511
Interest in lieu of deferred annuity	432,264	...	...	432,264
Sinking Fund	96,431	7,190	59,118	162,739
Contribution towards management of Sinking Funds, etc. . .	2,269	213	428	2,910
TOTAL .	1,925,008	200,188	672,228	2,797,424

33. The charges under "Interest on capital deposited by Companies" and "Interest chargeable against Companies on advances" relate to the newer Companies, the lines undertaken by which are classed as State Railways. During later years, the funds required for additional capital works have been provided by advances made to the Companies from funds raised by the Secretary of State under the provisions of Act 51, Vict., Cap. 5. The charges for interest on these advances appear under the heading "Interest chargeable against Companies on advances."

34. The charges incurred in connection with each line are given in the following table:—

RAILWAYS.	INTEREST ON CAPITAL DEPOSITED BY COMPANIES.			INTEREST CHARGEABLE AGAINST COMPANIES ON ADVANCES.	GRAND TOTAL.
	India.	England and Exchange.	Total.	England and exchange.	
	Rx.	Rx.	Rx.	Rx.	Rx.
Bengal Nagpur . .	19,415	282,539	301,954	145,805	447,759
Assam-Bengal . .	...	77,690	77,690	...	77,690
Bengal Central . .	...	28,873	28,873	26,810	55,683

South Indian . .	...	49,496	49,496	...	49,496
Southern Mahratta* .	...	332,923	332,923	113,199	446,122
TOTAL .	31,809	1,121,306	1,153,115	357,935	1,511,050

* Including Mysore.

35. The charge in India against the Bengal Nagpur Railway represents interest on capital expended by Government on the Katni-Umaria State Railway, which was subsequently taken over by the Bengal Nagpur Railway Company as a part of its undertaking. This expenditure has not been refunded by the Company, but the State ranks as a shareholder to the extent of the capital contributed by it. Interest on money raised by the Rohilkhand and Kumaon Company for expenditure on the Lucknow-Bareilly Railway—though a sterling capital—is paid in India.

SECTION B.

GUARANTEED RAILWAYS.

36. This section deals with (i) the revenue transactions of the Great Indian Peninsula, the Bombay, Baroda and Central India, and the Madras Railways; and (ii) the charges incurred by the State in the payment of surplus profits and contributions to Provident Funds; on land, which, under the several contracts, is supplied free of charge to the companies; on Government controlling establishments; and on interest on capital. The Government controlling establishments also exercise, in some instances, supervision over State lines leased to companies, and perform certain duties in connection with State Railways, but the entire cost is included under this head. Recoveries are, however, made from State lines leased to companies on account of Government supervision, and the amount of such recoveries is credited to this head.

I.—REVENUE TRANSACTIONS.

XXVII.—Net Traffic Receipts.

37. At the close of the year under review, the open mileage of the Guaranteed Railways was as follows* :—

	Total length open.	Length laid with two or more tracks.
	Miles.	Miles.
Great Indian Peninsula	1,286¾	462
Bombay, Baroda and Central India	460¾	60
Madras	839¼	42½
TOTAL	2,586¾	564½

*Administration Report on the Railways in India for 1893-94, Part I, Appendix C.

38. The net receipts of the Guaranteed Railways during 1893-94 amounted to Rx. 3,383,812. The transactions of each Railway for the year were as follows :—

	Great Indian Peninsula.	Bombay, Baroda and Central India.	Madras.
	Rx.	Rx.	Rx.
Receipts—			
Administrative	3,949,930	1,528,527	1,038,374
Suspense	280,480	1,337,424	119,872
TOTAL	4,230,410	2,865,951	1,158,246
Payments—			
Administrative	2,018,062	539,789	519,880
Suspense	337,355	1,347,846	108,363
TOTAL	2,355,417	1,887,635	627,743
Net Receipts—			
Administrative	1,931,868	988,738	518,994
Suspense	—56,875	—10,422	+11,509
TOTAL	1,874,993	978,316	530,503
Percentage of working expenses to earnings	51·09	35·31	50·02
Average earnings per mile per week	58·87	63·63	23·73

39. Taking the Capital expenditure as stated in rupees in the Indian Accounts (in which sterling figures have been converted at the fixed contract rates of 1*s.* 10*d.* the rupee) the return per cent. on Capital outlay incurred to the end of the year was as under :—

	Capital outlay to 31st March 1894.	Net Receipts, 1893-94.	Percentage on Capital outlay.
	Rx.	Rx.	Rx.
Great Indian Peninsula	27,692,205	1,874,993	6·77
Bombay, Baroda and Central India	9,659,233	978,316	10·13
Madras	12,041,326	530,503	4·40

40. The traffic on the Great Indian Peninsula Railway shows a falling-off compared with the previous year. This is chiefly due to smaller exports of wheat, and depletion of stock of food-grains in 1892, to meet the prevailing scarcity in the Madras Presidency. The total receipts were higher than in the previous year owing to increased recoveries under suspense, arising principally from traffic belonging to foreign lines. The Working Expenses of the year were greater than in the previous year, in consequence chiefly of heavy renewals of engines. The entertainment of additional staff to work an altered train service and the opening of new crossing stations contributed to the excess to a certain extent.

41. On the Bombay, Baroda and Central India Railway the results are more favourable than in the preceding year. There was an increase under *coaching*, due chiefly to an improvement in the third class passenger traffic. The *goods* earnings also showed an improvement, due to increased traffic under the items of oil, seeds, sugar, timber and other miscellaneous articles of merchandise. This increase was, however, to a certain extent counterbalanced by a falling-off in the carriage of wheat and railway materials.

The Working Expenses of the year were less than in the previous year. The decrease is due to there being no expenditure on renewals with *steel rails*, or on repairs to monsoon damages. Large credits for sale of old rails and less renewals and repairs to coaching and goods vehicles have also helped to reduce the expenditure.

42. On the Madras Railway, the traffic improved generally, the goods traffic especially, due to large quantities of coal having been despatched for the Gold Mining Companies at Kolar, to the improvement of traffic in raw cotton and to the increased traffic in grain. The Working Expenses were lower than in the previous year, owing to heavy repairs and renewals to permanent way and bridges, having been carried out in that year.

Comparison with Actuals of 1892-93 and the Budget and Revised Estimates.

43. A statement, attached to this review as Schedule B, compares in detail the transactions of the year with the Revised and Budget Estimates and the actuals of 1892-93. The following is a summary of the net results :—

RAILWAYS.	NET RECEIPTS.	REVISED ESTIMATE.		BUDGET ESTIMATE.		NET RECEIPTS.
	Actuals, 1893-94.	Estimate.	Actuals, more + or less —.	Estimate.	Actuals, more + or less —.	Actuals, 1892-93.
	Rx.	Rx.	Rx.	Rx.	Rx.	Rx.
Great Indian Peninsula	1,874,993	1,910,000	—35,007	1,960,000	—85,007	1,936,286
Bombay, Baroda and Central India	978,316	967,500	+10,816	840,000	+138,316	855,810
Madras	530,503	520,000	+10,503	435,000	+95,503	452,317
TOTAL	3,383,812	3,397,500	—13,688	3,235,000	+148,812	3,244,413

44. The increase in the actuals as compared with those of 1892-93 and with the Budget Estimate was due to the improvement in traffic on the Madras and Bombay, Baroda and Central India Railways. The difference between the actuals and the Revised Estimate is comparatively small.

II.—Surplus Profits, etc., Land, Supervision and Interest.

Surplus Profits and Contribution to Provident Funds.

45. Under the contracts with the Guaranteed Railway Companies, a moiety of the excess of net earnings over interest charges for each half-year ending 30th June and 31st December, taken separately, is paid to the Companies; but in calculating the total surplus for division the Secretary of State is able to place against the net earnings stated in rupees one rupee only for every 1*s.* 10*d.* of guaranteed interest which he has paid. The share falling to the Companies is, therefore, much in excess of a true moiety of the actual surplus after meeting the sum which the Secretary of State actually pays as interest charges. In any half-year during which the net earnings fall short of the interest charges, the deficiency is borne wholly by Government.

46. A contribution from net earnings is made in aid of the Provident Funds established on the Great Indian Peninsula and Bombay, Baroda and Central India Railways, for the benefit of the Companies' employés, when the net earnings on capital give a return of more than 6 per cent. per annum on the Bombay, Baroda and Central India, and of 3 per cent. half-yearly on the Great Indian Peninsula Railway. A Provident Fund was established during 1891-92 on the Madras Railway, but on a different basis, the contribution forming a charge to working expenses.

47. The payments to the Companies during the year 1893-94 on account of Surplus Profits and Contributions to Provident Funds were as follows:—

	Surplus profits.	Contribution to Provident Funds.	Total.
	Rx.	Rx.	Rx.
Great Indian Peninsula	292,737	12,460	305,197
Bombay, Baroda and Central India	248,169	17,888	266,057
Total	540,906	30,348	571,254

Land.

48. The charges for land for Guaranteed Railways during the year were comparatively small. They were as follows:—

	Rx.
Great Indian Peninsula	835
Bombay, Baroda and Central India	3,211
Madras	1,054
Total	5,100

Supervision.

49. The charges falling under this head represent the cost of the establishments of the Consulting Engineers and Government Examiners employed on the supervision, audit and control of the transactions of Companies' lines, and a moiety of the cost of the office of the Director General of Railways. The

amounts recovered from Railway Companies are credited to this head. The charges during the year under review were as follows:—

	Control.	Audit.
	Rx.	Rx.
Bombay	12,657	11,084
Madras	6,207	5,307
Calcutta	7,401	4,076
Central Division	6,268	4,252
North-Western Provinces and Oudh	8,715	3,215
Assam	4,664	2,401
Director General of Railways, etc. (share of office of)	15,806	...
	61,718	30,335
Total		92,053
Less—Recoveries from Companies		63,149
Net Charge		28,904

50. The contributions for Government supervision, audit and control, recovered from the several Railway Companies, were as follows:—

	Rx.
East Indian	10,000
Rajputana-Malwa	13,584
Bengal and North-Western and Tirhoot	3,024
Bengal Nagpur	6,900
Bengal Central	1,000
Indian Midland	5,419
Southern Mahratta (including Mysore)	10,717
Rohilkhand-Kumaon (including Lucknow-Bareilly)	1,113
South Indian	8,337
Assam-Bengal	3,055
Total	63,149

51. The contribution payable from East Indian Railway revenues has been fixed under the contract at Rs. 50,000 half-yearly. With the exception of the Bengal and North-Western and the Rohilkhand-Kumaon Railway Companies the contributions paid by Railway Companies are calculated at the rate of Rs. 40 per half-year per mile of line constructed or under construction. The contributions by the Bengal and North-Western and Rohilkhand-Kumaon Railway Companies are calculated at the rate of Rs. 20 per mile half-yearly.

52. No contribution is made by the old Guaranteed Railways towards the cost of Government audit and control.

Interest.

53. The charges for Interest during the year 1893-94 were as under:—

	On Capital held in England.		On Capital held in India.	On over-drawals on Capital Account.	Total.
	Amount. £	Equivalent. Rx.	Rx.	Rx.	Rx.
Great Indian Peninsula	1,203,816	1,986,134	2,071	...	1,988,205
Bombay, Baroda and Central India	417,517	688,847	272	152	689,271
Madras	533,387	880,016	...	...	880,016
Total	2,154,720	3,554,997	2,343	152	3,557,492

The foregoing figures represent the interest paid during the year, and not the liability for interest for the year 1893-94. No additional capital was raised during the year under review. The interest on overdrawn capital represents interest charged by Government at the rate of 4½ per cent. per annum on advances to the Bombay, Baroda and Central India Railway Company on Capital Account.

Comparison with Actuals of 1892-93 and the Budget and Revised Estimates.

54. In the statement attached to this review as Schedule C, a comparison in detail will be found of the actual charges for Surplus Profits, etc., Land and Supervision, and Interest, with the Revised and Budget Estimates and with the Actuals of 1892-93, of which the following is a summary :—

	Actuals, 1893-94.	Revised Estimate.		Budget Estimate.		Actuals, 1892-93.
		Estimate.	Actuals, more + or less —.	Estimate.	Actuals, more + or less —.	
	Rx.	Rx.	Rx.	Rx.	Rx.	Rx.
Surplus Profits, etc.	571,254	570,900	+354	562,800	+8,454	581,924
Land and Supervision.	34,004	34,900	—896	50,400	—16,396	29,423
Interest . .	3,557,492	3,544,400	+13,092	3,508,900	+48,592	3,438,635
Total .	4,162,750	4,150,200	+12,550	4,122,100	+40,650	4,049,982

The decrease in surplus profits, as compared with the actuals of the previous year, is due to the traffic on the Great Indian Peninsula Railway not having been so good as in 1892-93. The increase over the Budget Estimate is due to the Bombay, Baroda and Central India Railway Company's share of profits having been more than was anticipated owing to an improvement in traffic.

The increase in Land and Supervision over the actuals of the previous year is due principally to the charges for the offices of Consulting Engineer and Government Examiner of Accounts, Assam-Bengal Railway, being for the whole year, whereas in 1892-93 these offices were only in existence for five months, and to the outlay on land taken up for the Anand Station, Bombay, Baroda and Central India Railway. The lapse on the Budget Estimate is due to the fact that the provision for certain land made in the estimate for the Great Indian Peninsula and Madras Railways was not needed.

The increase in the interest charges over the actuals of 1892-93 and over the Budget Estimate is due chiefly to the fall in the rate of exchange.

Effect on State Revenues.

55. The following table shows the direct results to the State of the working of the Guaranteed Railways for the year :—

	Net Traffic Receipts.	Charges.				Gain or loss (+ or —).
		Interest.	Surplus Profits.	Contribution to Provident Funds.	Total.	
	Rx.	Rx.	Rx.	Rx.	Rx.	Rx.
Great Indian Peninsula.	1,874,993	1,988,205	292,737	12,460	2,293,402	—418,409
Bombay, Baroda and Central India.	978,316	689,271	248,170	17,887	955,328	+22,988
Madras . .	530,503	880,016	...	...	880,016	—349,513
Total .	3,383,812	3,557,492	540,907	30,347	4,128,746	—744,934

56. In addition to the above, the cost of land provided at the expense of the State and a proportionate share of the cost of the Government controlling establishments have to be taken into consideration, in order to arrive at the real financial results to the State of its connection with Guaranteed Railways. The above table, however, shows prominently the effects of the provision in the contracts under which surplus profits are declared half-yearly, and the sterling interest is converted for the purpose of this division at the fixed contract rate of 1*s.* 10*d.* (*vide* para. 45). Thus the Great Indian Peninsula Railway received as surplus profits during the year the sum of Rx. 292,737, while Government, although nominally entitled to share equally with the Company, sustained a loss of Rx. 418,409. During the second-half of 1893 the net earnings fell short of the guaranteed interest and Government had to make good the deficiency and to bear also the loss by exchange on interest paid in England. The Bombay, Baroda and Central India Railway Company received Rx. 248,169 as surplus profits, while the actual surplus accruing to the State was only Rx. 22,988.

57. In the following statement the results to the State of the working of these railways for the last five years are exhibited :—

Gain or Loss (+ or —).

Railways.	1889-90.	1890-91.	1891-92.	1892-93.	1893-94.
	Rx.	Rx.	Rx.	Rx.	Rx.
Great Indian Peninsula .	—197,044	+151,489	+20,680	—377,138	—418,409
Bombay, Baroda and Central India.	—14,905	+81,433	+39,382	+1,719	+22,988
Madras	—350,750	—236,283	—359,428	—400,727	—349,513
Total .	—562,699	—3,361	—299,366	—776,146	—744,934

58. The following statement shows the total amount paid on account of guaranteed interest to each of the Guaranteed Railway Companies still in existence on 31st March 1894, the net revenue of the several lines to the 31st of December 1893, appropriated towards the repayment of that amount, and the balance. For the purposes of this statement, the net revenue and the guaranteed interest paid in India are converted at the contract rates of exchange. The amounts shown as guaranteed interest paid in England represent true sterling :—

Railways.	Guaranteed Interest paid to 31st March 1894.			Aggregate of net revenue balances for the several half-years to 31st December 1893 inclusive—less moieties of surplus profits repaid to Companies.	Net amount paid.
	In England.	In India.	Total.		
	£	£	£	£	£
Great Indian Peninsula .	34,662,334	474,038	35,136,372	31,716,696	3,419,676
Bombay, Baroda and Central India.	12,117,937	87,985	12,205,922	10,563,393	1,642,529
Madras	16,543,595	2,332	16,545,927	8,353,445	8,192,482
Total .	63,323,866	564,355	63,888,221	50,633,534	13,254,687

There were of course similar figures relating to each Company whose railway Government purchased by annuities or on other terms.

SECTION C.

SUBSIDIZED COMPANIES.

(Major Heads XXVIII and 40.)

59. The transactions in connection with subsidized railways which appear in the Government accounts under the heading Subsidized Companies represent—

Under *Revenue*, Head XXVIII.—Repayments of advances of interest.

Under *Expenditure*, Head 40.—Cost of land supplied free, subsidies paid and advances of interest.

(i) *Repayments of Advances of Interest.*

60. The amounts credited as Revenue under this head comprise repayments of advances of interest by the Rohilkhand-Kumaon Railway Company and by the Mysore Durbar on account of the Mysore Railway.

61. In the case of the Rohilkhand-Kumaon Railway, the State advanced interest at the rate of 4 per cent. per annum on the Company's share capital while the line was under construction. In consideration of this payment the State is entitled, under the terms of the contract, to a moiety of any surplus earnings, after meeting working expenses, interest on borrowed capital, if any, and a sum sufficient to pay a dividend at the rate of 5 per cent. per annum on the Company's share capital, until such time as the interest advanced by the Secretary of State, together with interest thereon at the rate of 4 per cent. per annum, shall have been repaid. The following is a summary of the advances and repayments of interest to the close of 1893-94 :—

YEAR.	Advances.	REPAYMENTS.	
		England.	India.
	Rx.	Rx.	Rx.
1882-83	432	...	...
1883-84	4,667	...	...
1884-85	7,986*	...	...
1885-86	...	...	119
1886-87	...	...	32
1889-90	...	91	...
1890-91	...	975	...
1891-92	...	1,427	...
1892-93	...	...	...
1893-94	...	...	...
TOTAL	13,085	2,493	151

62. The payment by the Mysore Durbar on account of the Mysore State Railway represents the net charge for interest paid by Government to the Southern Mahratta Railway Company in connection with the Mysore Railway. The Secretary of State, acting on behalf of the Mysore State, has guaranteed the interest on the capital raised by the Southern Mahratta Railway Company for the construction of the Mysore Railway, and the Durbar makes good the excess of interest over net revenue, and will receive any excess of net revenue over interest charges. The receipts and working expenses and interest charges of the Mysore Railway are recorded in the Government accounts under their respective Railway heads, and the net charge for interest only (*i.e.*, interest on capital expended *minus* net receipts), which is recoverable from the Mysore Durbar, is credited under this head.

* Interest (£295) realised from investment of funds deposited by the Company for a fixed period taken in reduction of advances of interest.

63. The amount recovered from the Mysore Durbar during 1893-94 was Rx. 34,054, arrived at as under :—

	Rx.
Interest on capital	79,194
Less—Charge borne by Government for interest on the unexpended balance of the capital retained in their hands	8,460
Remainder	70,734
Net receipts	36,680
	34,054

Net charge for interest recovered from the Mysore Durbar—

Compared with, for	1892-93	17,883
,, ,,	1891-92	31,567
,, ,,	1890-91	30,505
,, ,,	1889-90	49,012
,, ,,	1888-89	42,768

(ii) *Land, Subsidies, and Advances of Interest.*

64. The charges for land, subsidies and advances of interest are borne partly by Imperial and partly by Provincial Revenues. The items falling on the Imperial Government are charges for land, provided free of cost under the terms of the contracts, in connection with the Bengal and North-Western, Delhi-Umballa-Kalka and Nilgiri Railways. The Nilgiri Railway was also entitled, under the terms of its contract, to interest at 3 per cent. on its capital deposited in a Government treasury for three years, or until the line is opened throughout for traffic, if earlier. The three years expired on the 30th September 1893.

65. The charges debited to Imperial Funds during 1893-94 on account of subsidized railways were—

		Rx.
Bengal and North-Western Railway	(Land charges)	970
Nilgiri Railway	(,,)	3,004
Ditto	(Interest)	2,792
	TOTAL	6,766

66. The charges borne by the Provincial Governments in connection with subsidized railways are—

Assam.—An annual subsidy, payable to the Assam Railways and Trading Company, Limited, on account of the Dibru-Sadiya Railway, of such amount—subject to a maximum of Rs. 1,00,000—as, together with the net earnings of the Railway, shall be sufficient to yield a return of 5 per cent. per annum on Capital outlay; and a share of the pay and allowances of the Examiner of Public Works Accounts, Assam.

Bengal.—Charges for land which, under the terms of the contracts, has to be provided free of cost to the Tarkessur, Dooars, and Deoghur Railways.

North-Western Provinces and Oudh.—An annual subsidy of Rs. 40,000 payable to the Rohilkhand-Kumaon Railway Company up to 31st December 1894, and charges for land in connection with that Railway.

67. The amounts debited against Provincial Revenues during 1893-94 were—

		Rx.
Dibru-Sadiya Railway	(Subsidy and audit)	10,042
Dooars Railway	(Land)	259
Rohilkhand-Kumaon Railway	(Subsidy)	4,000
Ditto ditto	(Land)	—67
	TOTAL	14,234

68. The total charges in connection with each line to the close of 1893-94 will be found in the statement attached to this note as Schedule D.

Comparison with Actuals of 1892-93 and the Budget and Revised Estimates.

69. The actual receipts during the year under Head XXVIII compare with the actuals of 1892-93 and the Budget and Revised Estimates as under—

	Actuals, 1893-94.	Revised Estimate.		Budget Estimate.		Actuals, 1892-93.
		Estimate.	Actuals, more or less.	Estimate.	Actuals, more or less.	
XXVIII.—Subsidized Companies.	Rx.	Rx.	Rx.	Rx.	Rx.	Rx.
Rohilkhand-Kumaon . . .	...	...	...	1,600	—1,600	...
Mysore	34,054	33,700	+354	23,600	+10,454	17,883
Total .	34,054	33,700	+354	25,200	+8,854	17,883

The Government share of surplus earnings of the Rohilkhand-Kumaon Railway for the year 1892 was not received during the year owing to questions having been raised as to the amount of that share.

The difference between actuals and the Revised and Budget Estimates of the repayment by the Mysore Durbar is due to the net revenue of the railway having been lower than the estimates.

70. The actual expenditure during the year under head 40 compares with the actuals of 1892-93 and the Budget and Revised Estimates as under:—

	Actuals, 1893-94.	Revised Estimate.		Budget Estimate.		Actuals, 1892-93.
		Estimate.	Actuals, more or less.	Estimate.	Actuals, more or less	
40—Subsidized Companies—	Rx.	Rx.	Rx.	Rx.	Rx.	Rx.
Imperial . . .	6,766	8,600	—1,834	14,200	—7,434	12,383
Provincial . . .	14,234	14,300	—66	14,200	+34	16,643
Total .	21,000	22,900	—1,900	28,400	—7,400	29,026

71. The lapse, under Imperial, is due to land not having been acquired for spoil on the Nilgiri Railway; to short payments of compensation charges in the districts of Gonda, Bahraich and Bari Banki, and to less land having been acquired during the year in connection with the Bengal and North-Western Railway; and to the interest paid to the Nilgiri Railway Company having been less than was estimated, the three years during which these charges were payable under the terms of the contract having expired on the 30th September 1893.

SECTION D.

41.—Miscellaneous Railway Expenditure.

72. The following expenditure is recorded under this head:—

(*a*) Outlay on surveys.
(*b*) Surplus Establishment and Miscellaneous charges.
(*c*) Director General of Railways' Establishment (share of).
(*d*) Port Storekeeper's Establishment.
(*e*) Abt material and engine suspense account.
(*f*) Land charges in connection with Native States Railways.

73. At the commencement of the year 1893-94 the following surveys were in hand:—

Imperial.

Rutlam-Bara Survey.
Mandalay-Kunlon Survey.
Chittagong-Akyab-Minhla Survey.
Mogoung-Irrawaddy Survey.
Cuttack-Midnapore-Calcutta Survey.
Monghyr Extension Survey.
Anarpur-Begum Serai Survey.
Rae Bareli-Benares Survey.
Dera Ismail Khan-Murtaza Survey.
Delhi-Minchinabad Survey.
Wazirabad-Multan Survey.
Kalka-Simla Survey.
Umballa-Patiala Survey.
Frontier Railway Surveys.
Sambalpur-Khurda Survey.

74. During the course of the year the undermentioned surveys were undertaken by the Imperial Government:—

Umarkot-Pachpadra Survey.—A detailed survey for a line of railway on the metre gauge from the river Nara, about 16 miles north-west of the town of Umarkot, to near Pachpadra where it joins a branch line of the Jodhpur-Bikaneer Railway system, at an estimated cost of Rs. 46,027.

Saugor-Katni Survey.—A reconnaissance survey for a new alignment of the section from Saugor to Katni on the Bilaspur-Etawah Railway, at an estimated cost of Rs. 26,404.

Raipur-Sonpur Survey.—A reconnaissance survey for a line of railway from Raipur on the Bengal Nagpur Railway to Sonpur, at an estimated cost of Rs. 9,990.

Thedaw-Myingyan Survey.—A survey for an alternative route for a branch line to Myingyan, at an estimated cost of Rs. 6,500.

Singhia-Madaripore-Chandpore Survey.—A reconnaissance survey for a line of railway to connect the Bengal Central and Assam-Bengal Railways, at a cost of Rs. 5,141.

Ghaziabad-Moradabad Survey.—A detailed survey for a line of railway on the standard gauge from the Ghaziabad junction of the North Western and East Indian Railways *vid* Gurmuktessur to Moradabad on the Oudh and Rohilkhand Railway and a branch from the 52nd mile of the main line near Gurmuktessur to Chandausi, also on the Oudh and Rohilkhand Railway, at a cost of Rs. 70,481.

Rampur-Ramnagar Survey.—A survey for the construction of a branch of the Oudh and Rohilkhand Railway to Ramnagar at the foot of the hills within easy reach of Naini Tal and Ranikhet, at an estimated cost of Rs. 28,560.

Bareilly-Soron Survey.—A survey for a line of railway from Bareilly, the terminus of the Rohilkhand and Kumaon Railway system, to Soron on the Cawnpore-Achnera Railway at an estimated cost of Rs. 20,092.

Ludhiana-Ferozepore Survey.—A detailed survey for a line of railway from Ludhiana on the North Western Railway to Ferozepore on the Rewari-Ferozepore Railway, at an estimated cost of Rs. 26,833.

Kotri-Karachi Survey.—A survey for doubling the North Western Railway between Kotri and Karachi, at an estimated cost of Rs. 15,840.

Kotri-Rohri Survey.—A reconnaissance survey for a line of railway on the left bank of the Indus between Kotri and Rohri, at an estimated cost of Rs. 3,896.

Bezvada-Madras Survey.—A survey for a line of railway on the standard gauge from Madras to Bezvada, the present southern terminus of the East Coast Railway, at an estimated cost of Rs. 1,30,000.

75. The following surveys were undertaken during the year by the Governments of Bengal and Madras,—

BENGAL.

Sultanpore-Bogra Survey.—A survey for a branch line of railway as a feeder to the Northern Section of the Eastern Bengal State Railway, at an estimated cost of Rs. 1,207.

MADRAS.

West Coast Railway Survey.—Reconnaissance surveys for lines of railway from Mangalore to Arsikere on the Southern Mahratta Railway, Hassan to Mysore and Nanjangode to Erode, at a cost of Rs. 20,745.

76. The expenditure incurred during the year 1893-94 amounted to Rx. 103,439 as under :—

	Rx.
Imperial	102,252
Provincial	1,187
TOTAL	103,439

77. The Imperial outlay includes the following :—

Outlay on surveys	79,204
Surplus Establishment and Miscellaneous charges	5,027
Director General of Railways' Establishment (share of)	15,806
Port Storekeeper's Establishment	2,184
Land charges in connection with Native States Railways	31
TOTAL	102,252

78. The details of outlay on surveys will be found in the statement attached to this review as Schedule E.

79. The items debited during 1893-94 to the account "Surplus Establishment and Miscellaneous charges" were—

	Rx.
Leave allowances (other than privilege leave) of pensionable employés of Rajputana-Malwa Railway	587
Salaries and allowances of the following officers :—	
Mr. M. Gregory, Assistant Engineer	158
„ B. A. Maine	161
„ H. B. Addis, Executive Engineer	703
„ J. Willcocks, ditto	99
„ E. A. Lee, Examiner of Accounts	21
„ P. P. Dease, Engineer-in-Chief	62
„ A. C. Chatterjee	44
„ R. K. Biernackie, Assistant Locomotive Superintendent	166
„ J. Lightfoot, Examiner of Accounts	829
Petty items	28
Salary of Mr. H. P. Burt while employed as Secretary to the Railway Conference	260
Police supervision charges, not agreed to by the Bengal and North-Western Railway	218
Deficiency in value of stores taken over from Nalhati State Railway	910
Bonuses to—	
Mr. Cole for report on Railway working in England and France	80
Mr. E. A. Ryles for use of his patent for painting and varnishing railway carriages	500
Contribution to Clerks' Provident Fund	201
TOTAL	5,027

80. The amount debited to this head on account of the establishment of the Director General of Railways represents half the fixed monthly charge of

Rs. 21,000 debited by the Civil Department, under the authority of Public Works Department Resolution No. 6125, dated 9th November 1888, and half the actual salary and travelling allowances of the Consulting Engineer to the Government of India for State Railways. The other moiety of these charges is debited to the major head "39—Guaranteed Companies—Land and Supervision."

81. The amount shown under Port Storekeeper's Establishments represents—

	Rx.
(1) The cost of the Port Storekeeper's office at Calcutta	1,995
(2) Establishment entertained by the Marine Storekeeper, Bombay, in connection with the local purchase of stores for State Railways	189
TOTAL	2,184

The expenditure recorded as Provincial represents outlay on—

	Rx.
Provincial Surveys in Madras	1,066
Ditto in Bengal	121
TOTAL	1,187

Comparison with Actuals of 1892-93 and the Budget and Revised Estimates.

82. The actual outlay during the year under "41—Miscellaneous Railway Expenditure" compares with the actuals of 1892-93 and the Budget and Revised Estimates as under :—

HEAD OF ACCOUNT.	Actuals, 1893-94.	REVISED ESTIMATE.		BUDGET ESTIMATE.		Actuals, 1892-93.
		Estimate.	Actuals, more or less.	Estimate.	Actuals, more or less.	
	Rx.	Rx.	Rx.	Rx.	Rx.	Rx.
41.—Imperial	102,252	110,000	—7,748	107,500	—5,248	—10,860
41.—Provincial	1,187	1,200	—13	...	+1,187	...
TOTAL	103,439	111,200	—7,761	107,500	—4,061	—10,860

83. The larger outlay, as compared with the actuals of the previous year, is due to the accounts for that year having included the refunds by the Assam-Bengal Railway Company of the past outlay on the Bengal-Assam and Chittagong-Comilla Surveys which were credited to this head. The lapses as compared with the Budget and Revised Estimates are due to the provision made for new surveys not having been utilised in full; some of the surveys not having been undertaken, and others having been put in hand later than was anticipated.

SECTION E.

STATE RAILWAYS—CONSTRUCTION EXPENDITURE.

Major heads 34, 37, 48 and 50.

84. At the beginning of the year under review the following railways or sections were under construction from funds provided by the State :—

	Miles.
By State agency—	
Lucknow-Rae Bareli-Benares (Lucknow-Rae Bareli Section)	48½
Bareilly-Rampur-Moradabad	56
East Coast	430½
Meiktila Branch—Burma State Railway	13
Mu Valley	156½
Mari-Attock	85
Mushkaf-Bolan	85¾
By the agency of Companies—	
Palanpur-Deesa	17½
Godhra-Rutlam	90½
Guntakal-Hindupur	56½
Mayavaram-Mutupet	53¾
East Indian—Jherriah and Toposi Extensions	66½

85. The Mayavaram-Mutupet Railway is being constructed by the agency of the South Indian Railway Company, partly from funds provided by the Tanjore Local Board and partly from the Provincial funds of the Madras Government, on the condition that the profits to be derived from the undertaking be shared between the Government of Madras and the Local Board in proportion to the capital contributed by each.

86. During the course of the year, sanction was accorded to the construction of the Damoodur Branch (Jherriah Extension) of the East Indian Railway.

A possible saving of Rs. 2,00,000 having been reported on the construction of the Jherriah Extension, East Indian Railway, it was decided to run a branch line from this extension to further open up the Jherriah coal-fields, and sanction has been given to an estimate of Rs. 8,63,839. This branch, known as the Damoodur branch, commences at the 28th mile from Barákar and will be about 10 miles in length.

87. In the Budget Estimate a sum of Rx. 3,929,400 was provided for Capital expenditure on State Railways as under :—

	Rx.
34.—Construction of Protective Railways	1,054,300
37.—Construction of Railways (charged against Revenue in addition to that under Famine Insurance)	75,100
48.—State Railways—Construction	2,800,000
TOTAL	3,929,400

and this sum was distributed for expenditure as follows :—

	Rx.
For outlay in England (treated as final charges in the Home accounts)	1,151,800
For outlay in India	2,055,300
„ Exchange	722,300
TOTAL	3,929,400

88. The allotments to lines were as below :—

	Rx.
By State agency—	
Mu Valley	395,000
Frontier Railway Reserve	3,000
East Coast	918,000
Open lines	428,200
Stores (Fluctuations in reserves and stores in transit)	—500
Lucknow-Rae Bareli-Benares	60,000
Bareilly-Rampur-Moradabad	180,000
Mari-Attock	50,000
Mushkaf-Bolan	600,000
North Western—Gradient improvement works	140,000
TOTAL	2,773,700
By agency of Companies—	Rx.
East Indian—Jherriah Extension	110,000
Palanpur-Deesa	9,200
Dharmavaram-Hindupur	17,800
Godhra-Rutlam	385,000
Assam-Bengal (Land)	40,000
Mayavaram-Mutupet	67,500
Open lines	390,200
TOTAL	1,019,700
Reserve	1,000
Indents thrown forward to 1893-94	152,200
Nagpur-Chhattisgarh depreciation account	—17,200
GRAND TOTAL	3,929,400

89. The grant was modified during the year by the following additions and reductions, and the amount available ultimately stood at Rx. 4,104,500 :—

	Rx.
Add—	
Additional grant sanctioned by the Finance Department for the Bareilly-Rampur-Moradabad Railway representing the balance available from funds provided by the Durbar estimated at	169,000
Less—	
Estimated excess over ordinary grant for expenditure during 1892-93	50,500
	118,500
Add—	
Transfer from 49—Irrigation Works	54,600
Additional grants under 37—Provincial	2,000
Total increase	175,100

90. The Revised Estimate was submitted for the amount of the grant available, *viz.*, Rx. 4,104,500. In submitting the Revised Estimate for this increased amount, it was assumed that there would be lapses on the final allotments for several lines which might amount to Rx. 112,900, and allowance was made accordingly. The estimate was not, however, fully worked up to, and the results show a small lapse of Rx. 30,076.

91. The amount of the Revised Estimate, *viz.*, Rx. 4,104,500, was provided as follows:—

	Rx.
34.—Construction of Protective Railways	1,079,700
37.—Construction of Railways (charged against Revenue in addition to that under Famine Insurance)	77,100
48.—State Railways—Construction	2,947,700
TOTAL	4,104,500

and was distributed for expenditure as under:—

	Rx.
For outlay in England	782,000
For outlay in India	2,819,000
For Exchange	503,500
TOTAL	4,104,500

92. The actual outlay amounted to Rx. 4,074,424 as under:—

	Rx.
In England	711,971
In India	2,899,768
Exchange	462,685
TOTAL	4,074,424

resulting in an excess of Rx. 145,024 on the Budget Estimate and a lapse of Rx. 30,076 on the Revised Estimate of the year. Compared with the Revised Estimate, the actuals in India and in England stand as follows:—

	Revised Estimate.	Actuals.	Actuals. More.	Actuals. Less.
	Rx.	Rx.	Rx.	Rx.
India	2,819,000	2,899,768	80,768	...
England	782,000	711,971	...	70,029
Exchange	503,500	462,685	...	40,815
TOTAL	4,104,500	4,074,424	—30,076	

93. The distribution of the outlay of the year by finance heads is as under:—

	Rx.
34.—Construction of Protective Railways	1,060,954
37.—Construction of Railways (charged against Revenue in addition to that under Famine Insurance)	78,902
48.—State Railways—Construction	2,939,568
TOTAL	4,074,424

94. No expenditure was incurred during the year in connection with the redemption of liabilities.

Comparison with the Budget and Revised Estimates.

95. In the statement attached to this review as Schedule F will be found full details of the expenditure of the year compared with the Budget and

Revised Estimates, and showing the details of classification by Fund heads. The following is a general abstract:—

RAILWAYS.	Actuals, 1893-94.	BUDGET ESTIMATE. Estimates.	BUDGET ESTIMATE. Actuals + more or — less.	REVISED ESTIMATE. Estimates.	REVISED ESTIMATE. Actuals + more or — less.

* Includes Nagpur-Chhattisgarh Depreciation account.

Budget Estimate.

96. The more important variations from the Budget Estimate materially affecting the results are explained below :—

State Agency.

Open lines.—The actuals fell short of the Budget Estimate by Rx. 29,306. The principal lapses occur on the Warora Colliery and Eastern Bengal and Oudh and Rohilkhand Railways, and are due to the supplies of English stores having fallen short of the estimate, and to less work having been carried out than was contemplated.

The lapse on the Warora Colliery is attributed to the provision made for sinking two new pits not having been utilised owing to their location being undecided, and to the non-receipt of machinery from England for these pits, provision for the cost of which was made in the Budget Estimate.

The lapse on the Umaria Colliery is attributed to the provision made for sinking a pit, both for outlay in India and on English stores, and for quarters for subordinates not having been utilised.

The lapse on the Oudh and Rohilkhand Railway is due to smaller purchases of stores in England than were anticipated.

The lapse on the Eastern Bengal Railway is due to less work having been carried out than was provided for in the estimate, to larger issues of stores and workshop outturn to Revenue, and to a credit of Rs. 1,10,399 representing depreciation on the flotilla hired to the India General Steam Navigation Company written back from Revenue earnings under the orders of Government.

The excess on the Nagpur-Chhattisgarh depreciation account is due to unanticipated heavy liabilities having been incurred for freight and depreciation charges, and to further stores having been taken over for sale. Provision for the sale of these stores was not made in the estimate, and they were not fully disposed of within the year.

The excess on the Burma Railway is due to the whole quantity of rails required for relaying in the Sittang district having been purchased during the year. The estimate provided for the purchase of 12 miles of rails only. These rails, moreover, were received late in the year, and not more than 3 miles out of the 12 miles provided for could be issued.

The excess on the North Western Railway is due to the issues of stores to Revenue being smaller than estimated, owing to the late arrival of material from England, to the low rate of exchange, and to a deficiency in the anticipated credits from Revenue on account of workshop charges.

Lines under construction.—The actuals fell short of the Budget Estimate by Rx. 91,915.

The lapse on the Mu Valley Railway is due to the prevalence of sickness during the year and to the difficulty experienced in procuring carts for the carriage of material. Smaller progress was in consequence made on the construction of the line. The lapse was also partly due to smaller purchases of English stores than was provided for in the estimate.

The lapse on the Mushkaf-Bolan Railway is due chiefly to the supply of English stores having fallen short of what was expected.

The lapse under *stores transactions* is due to smaller payments for stores in England than were anticipated.

The excess on the Bareilly-Rampur-Moradabad Railway is attributed to greater progress of work than was anticipated when the estimate was framed.

The excess on the Frontier Railway Reserve is due chiefly to purchases of English and local stores provided for in the previous year having only been brought to account during the year under review, and to payment to the North Western Railway for depreciation on engines used on the Chaman Extension.

Only Rx. 50,000 were allotted for outlay on the Mari-Attock Railway during 1893-94, the works, with the exception of tunnels and bridges, having been practically stopped during the year in accordance with the orders contained in Government of India, Public Works Department, letter No. 1404 R. C.,

dated 21st December 1892. The actual outlay for the year exceeded the Budget Estimate by Rx. 33,602, and this excess is due chiefly to work, done prior to 31st March 1893 but remaining unpaid, not having been provided for in the Budget Estimate, and to payments having been made by the Civil Department on account of compensation for land in excess of the provision made in that estimate.

The excess on the East Coast Railway is due to the greater progress of work than was contemplated at the time the estimate was prepared.

Companies' Agency.

Open lines.—The actuals exceed the Budget Estimate by Rx. 201,613.

The excess occurs principally on the East Indian Railway, and is due to the provision for engines and tenders to the extent of Rs. 4,44,000 and for an increase in the stores balances of Rs. 8,08,000, which were disallowed in the Budget Estimate, having been subsequently restored by Government; to a special debit to Capital by credit to Revenue account of Rs. 8,22,827, representing the cost of an 11th sleeper per rail laid in the line, and to expenditure on machinery and plant, and on two steamers and four flats for the Azamgung ferry service not having been provided for in the Budget Estimate.

The lapse on the Bhopal State Railway occurred chiefly under stations and buildings, and is due to the provision made for work at crossing stations and additional staff quarters not having been fully utilised.

The lapse on the Tirhoot State Railway is due to fluctuations in stores transactions which were not anticipated in the Budget Estimate.

The lapse on the South Indian Railway is due to the provision made in the estimate for the purchase of English stores not having been fully utilised.

The lapse on the Dhond and Manmad Railway is due to the Great Indian Peninsula Railway Company not having been able to utilise the full provision for works.

Lines under construction.—The actuals exceeded the Budget Estimate by Rx. 65,632.

The principal excesses were—

On the Jherriah Extension, due to a sum of Rs. 3,68,000 disallowed in the Budget Estimate having been subsequently restored by Government.

The Budget Estimate for land charges on the Assam-Bengal Railway has been largely exceeded. This is due to more money having been spent on the acquisition of land than was anticipated at the time the estimate was prepared.

On the Godhra-Rutlam Railway, due to more work having been carried out than was contemplated in the estimate, as work was pushed on with a view to completing the line by March 1894.

The principal lapse was on the Guntakal-Hindupur Railway, due to large credits having been obtained from the South Indian Railway for permanent-way and bridge materials returned into stores before the transfer of the line to the Southern Mahratta Railway Company. These credits were not contemplated in the Budget Estimate.

Revised Estimate.

97. Compared with the Revised Estimate, the principal variations and the reasons assigned for them are briefly as follows :—

State Agency.

Open Lines.—The actuals fell short of the Revised Estimate by Rx. 46,556.

The principal lapse occurred on the North Western Railway and is attributed to the short supply of stores from England.

The lapse on the Oudh and Rohilkhand Railway is attributed to credits received for land relinquished, and for plant sold, which were not anticipated; to a failure to complete to the full extent the purchases of local stores sanctioned towards the close of the year, and to some extent, to delay in receipt and short supplies of English stores.

Lines under construction.—The actuals fell short of the Revised Estimate by Rx. 72,765.

The principal lapses were—

On the Mu Valley Railway and *stores transactions*, attributed generally to the causes mentioned in the preceding paragraph.

On the East Coast Railway, to short outlay on stores in England.

The principal excesses were—

On the Bareilly-Rampur-Moradabad Railway, chiefly to charges for land which were not anticipated; to the adjustment of arrear charges for ballast trains, the rates for which had for some time been in dispute, and to some extent to the low rate of exchange.

On the Mushkaf-Bolan State Railway, due to more progress having been made on construction during March than was anticipated, and to the provision for expenditure in England having proved insufficient.

Companies' Agency.

Open lines.—The actuals fell short of the Revised Estimate by Rx. 18,487.

The lapse occurred chiefly—

On the East Indian Railway, under ballast and permanent way, station and buildings and rolling stock, and is due to less work having been undertaken, and smaller outlay having been incurred than was provided for in the estimate.

On the Tirhoot State Railway, due to less work having been carried out than was anticipated, and to short supply of stores from England.

Lines under construction.—The actuals fell short of the Revised Estimate by Rx. 5,168.

The principal lapse occurred on the Assam-Bengal Railway, Land charges, and was due to land acquisition officers having over-estimated their requirements for the last quarter of the year.

The excess on the Jherriah Extension is due to larger issues of permanent-way material in the last quarter of the year than were anticipated in the Revised Estimate.

98. *Total Capital Outlay.*—The total outlay incurred on State Railways up to the end of the year has amounted to Rx. 114,277,051 as under:—

	Rx.
Indian outlay	60,239,516
Debits to the Indian books by credits to "Expenditure in England" for value of English stores received and other items charged off in England	54,037,535
TOTAL	114,277,051

the distribution by finance heads being as follows:—

	Rx.
34.—Construction of Protective Railways	5,464,197
37.—Construction of Railways (charged against Revenue in addition to that under Famine Insurance)	6,478,433
48.—Capital Expenditure on State Railways not charged against Revenue	68,780,970
50.—Capital charges involved in redemption of liabilities	33,553,451
TOTAL	114,277,051

99. Full details of the above will be found in the statement attached to this review as Schedule G.

SECTION F.

CAPITAL ACCOUNT OF GUARANTEED COMPANIES.

100. Each of the Guaranteed Railway Companies has a sterling Capital. Under the respective contracts entered upon many years ago, funds required to meet expenditure in India are advanced at the fixed rate of exchange of 1*s.* 10*d.* the rupee, and advances in England when converted into Indian currency are converted at the same rate of 1*s.* 10*d.* the rupee. The figures relating to Capital expenditure in this section, where stated in sterling, represent as regards withdrawals by the Companies in England true sterling, and as regards withdrawals in India the equivalent in rupees at the rate of 1*s.* 10*d.*; where stated in Rx., sterling has been converted into rupees at the same rate.

101. The following table shows the amount of Capital raised to the 31st March 1894:—

	Share Capital.		Debentures.		Debentures Stock.		Capital not bearing Interest.		Total.
	India.	England.	Nominal amount.	Cash received.	Stock represented.	Cash received.	India.	England.	
	£	£	£	£	£	£	£	£	£
Great Indian Peninsula	496,897	19,503,103	*2,970,900*	2,970,900	*2,701,450*	2,475,559	74,929	215,145	25,736,533
Bombay, Baroda and Central India	21,672	7,528,628	*1,238,500*	1,238,500	...	...	...	18,419	8,807,219
Madras	...	10,257,630	*800,000*	800,000	...	...	...	12,014	11,069,644
TOTAL	518,569	37,289,361	*5,009,400*	5,009,400	*2,701,450*	2,475,559	74,929	245,578	45,613,396

102. Interest on the Share Capital, Debentures, and Debenture Stock is guaranteed by the Secretary of State, the rates of interest being as under:—

	Great Indian Peninsula.	Bombay, Baroda and Central India.	Madras.	Total.
	£	£	£	£
Share Capital at 5 per cent.	20,000,000	7,550,300	8,757,670	36,307,970
,, ,, 4¾ ,,	...	...	999,960	999,960
,, ,, 4½ ,,	...	...	500,000	500,000
Debenture Stock at 4 ,,	2,701,450	...	...	2,701,450
Debentures at 3½ ,,	804,800	...		804,800
,, ,, 3½ ,,	1,866,100	1,238,500	462,200	3,566,800
,, ,, 3 ,,	300,000	...	337,800	637,800
TOTAL	25,672,350	8,788,800	11,057,630	45,518,780

103. The average rate of interest payable in gold on the Capital of these Guaranteed Companies is a little under 4·74 per cent. Under the contracts, the State must continue to pay interest on the Share Capital at the rates

guaranteed until the contracts terminate, and it is consequently unable to obtain any advantage from the increasingly easy condition of the money market. The State can now raise money at about 3 per cent., but it has to continue to pay 5 per cent. on the bulk of the Share Capital which, with the low exchange at the average rate for 1893-94, is equivalent to a payment of interest at a rate of nearly 8 per cent. on the sterling Capital converted at par.

104. No fresh debentures were issued in England during the year 1893-94. Debentures to the extent of £140,000 bearing interest at 3½ per cent. fell due during the year, and were renewed at 3 per cent.

105. The following table shows the amounts withdrawn by the several Companies on Capital account up to the 31st March 1894 and the balances of Capital at their credit, or amount of overdrafts, on that date:—

	Paid-up Capital.	Capital withdrawn.			Balance at	
		India.	England.	Total.	Credit.	Debit.
	£	£	£	£	£	£
Great Indian Peninsula . .	25,736,533	6,632,262	18,752,260	25,384,522	352,011	...
Bombay, Baroda and Central India.	8,807,219	2,275,030	6,579,267	8,854,297	...	47,078
Madras	11,069,644	4,131,393	6,906,489	11,037,882	31,762	...
Total . .	45,613,396	13,038,685	32,238,016	45,276,701	383,773	47,078

or, as stated in the Indian accounts, sterling being converted into rupees at the contract rates of exchange, the figures stand as under:—

	Paid-up Capital.	Capital withdrawn.			Balance at	
		India.	England.	Total.	Credit.	Debit.
	Rx.	Rx.	Rx.	Rx.	Rx.	Rx.
Great Indian Peninsula . .	28,076,218	7,235,195	20,457,011	27,692,206	384,012	...
Bombay, Baroda and Central India	9,607,875	2,481,851	7,177,382	9,659,233	...	513,58
Madras	12,075,975	4,506,974	7,534,352	12,041,326	34,649	...
Total .	49,760,068	14,224,020	35,168,745	49,392,765	418,661	51,358

106. The net Capital expenditure during the year on the Guaranteed Railways amounted to £69,290 as below:—

	Withdrawals.			Refunds.			Net withdrawals.
	In India.	In England.	Total.	In India.	In England.	Total.	
	£	£	£	£	£	£	£
Great Indian Peninsula . .	367,440	228,629	596,069	647,996	684	648,680	—52,611
Bombay, Baroda and Central India	154,576	163,365	317,941	230,224	733	231,717	86,224
Madras	154,239	73,612	227,851	191,466	708	192,174	35,677
Total .	676,255	465,606	1,141,861	1,070,446	2,125	1,072,571	69,290

107. The large refunds in India represent chiefly the value of stores issued to Revenue for working and maintenance which, in the first instance, are paid for from Capital funds.

Comparison with Budget and Revised Estimates.

108. The following table compares the actual net withdrawals during the year with the actuals of 1892-93, and with the Budget and Revised Estimates of 1893-94:—

	Actuals, 1893-94.	Revised Estimate.		Budget Estimate.		Actuals, 1892-93.
		Estimate.	Actuals, more or less.	Estimate.	Actuals, more or less.	
	Rx.	Rx.	Rx.	Rx.	Rx.	Rx.
Great Indian Peninsula . . .	—57,394	—37,500	—19,894	309,700	—367,094	68,933
Bombay, Baroda and Central India .	94,063	105,500	—11,437	130,500	—36,437	—17,131
Madras	38,921	47,200	—8,279	105,500	—66,579	24,838
Total .	75,590	115,200	—39,610	545,700	—470,110	76,640

109. The difference between the actuals of 1892-93 and 1893-94 is comparatively small. The decrease as compared with the Budget and Revised Estimates is owing chiefly to the provision for stores for the Great Indian Peninsula Railway not having been worked up to.

SECTION G.

CAPITAL OF INDIAN RAILWAY COMPANIES.

(Exclusive of the old Guaranteed Companies.)

110. The accounts reviewed in this section represent the capital transactions of the following Railway Companies:—

Bengal Central.
Bengal Nagpur.
Indian Midland.
Southern Mahratta.
Mysore.
Rohilkhand-Kumaon (Lucknow-Bareilly undertaking).
Assam-Bengal.

111. Each of these Companies has a sterling capital, consisting partly of share capital and debentures raised by the Companies direct on guarantees by the Secretary of State, and partly of advances made by the Secretary of State from funds raised by him under the provisions of Act 51, Vict., Chap. 5. The sums thus raised and advanced to the Companies are considered as part of the Companies' capital. Interest on such advances is charged against the Railway Revenue Account and has to be met before surplus profits can be declared.

112. The financial terms of the contracts, the rates of interest guaranteed and the rates of exchange at which the capital is converted into Indian currency vary in each case. These points are briefly stated below.

113. *Bengal Central Railway.*—This line is the property of the Bengal Central Railway Company and is merely, as a matter of convenience, classed among State Railways. This Railway was originally constructed under a limited guarantee of interest at the rate of 4 per cent. per annum while the line was under construction, such interest, together with interest thereon, being repayable out of surplus profits. But a revised contract was entered into, with effect from the 1st July 1885, under which the Company receives a guarantee of $3\frac{1}{2}$ per cent. on share capital and a quarter of net earnings paid half-yearly, the claim to the repayment of interest advanced under the original contract being at the same time waived. The capital when stated in Indian currency is converted at the rate of 1*s.* 5·262*d.* the rupee.

114. *Bengal Nagpur Railway.*—This Company receives a guarantee at the rate of 4 per cent. per annum on share capital, and is entitled to a quarter share of surplus profits,—*i.e.*, of the excess of net earnings over interest—calculated annually. The rate of exchange for the conversion of sterling capital into Indian currency is £1=Rs. 13.

115. *Indian Midland Railway.*—This Company also receives a guarantee of 4 per cent. per annum on its share capital, and is entitled to a quarter share of surplus profits calculated annually. The rate of exchange for the conversion of sterling capital into Indian currency is £1=Rs. $12\frac{1}{2}$.

116. *Southern Mahratta Railway.*—This Company now receives a guarantee of $3\frac{1}{2}$ per cent. (4 per cent. up to 31st December 1890) and a quarter of net earnings. The rates of exchange for the conversion of sterling Capital into rupees are, as regards the Capital (£530,957), specially raised for the completion of the Bellary-Kistna Railway, which was taken over by the Company, £1=Rs. 14, and for, the remainder of the Capital, £1=Rs. 12. The Company also gets the advantage of outlay by the State on the construction of the Bellary-Kistna Railway to the extent of Rx.1,657,753, without any charge for interest.

117. *Mysore Railway.*—This line was completed and is worked by the Southern Mahratta Railway Company. That Company raised sufficient funds by the issue of debenture stock to repay to the Mysore Durbar the outlay previously incurred by that State and to complete the extension to link in with the Southern Mahratta system. Acting on behalf of the Mysore Durbar, the

Secretary of State has guaranteed interest at 4 per cent. on the nominal amount of the debenture stock issued. The Southern Mahratta Railway Company also receives a quarter of net earnings. The rate of exchange for conversion of the sterling capital into Indian currency is 1*s.* 5·931*d.* the rupee.

118. *Rohilkhand-Kumaon Railway (Lucknow-Bareilly Section).*—The Rohilkhand-Kumaon Railway Company took over, with effect from the 1st January 1891, the Bareilly-Pilibhit and the Lucknow-Sitapur State Railways, undertaking to complete the link between these lines and to work the whole with their own line of Railway. The Company agreed to raise capital to the extent of £160,000 by the issue of debentures, with the power to discharge any portion of this obligation by the payment of rupees in India, the amount so paid being deemed the equivalent of sterling money at the average rate of exchange during the half-year immediately preceding the date of such payment. The Company subsequently issued sterling debentures for £147,000, which sold for Rs. 20,34,195. This sum was paid into the Calcutta treasury, and, at the rate fixed by the contract, is deemed to be equivalent to a sterling payment of £160,837. The debentures were issued under a guarantee of the Secretary of State at the rate of $3\frac{1}{4}$ per cent. per annum. The previous outlay incurred by the State has not been refunded to Government, and it has been further agreed that any additional capital required shall be provided by the Secretary of State. Any surplus profits after paying the debenture interest and interest at 4 per cent. on the outlay by the State are to be divided between Government and the Company in the ratio of their respective shares of capital.

119. *Assam-Bengal Railway.*—This Company took over, in November 1892, the construction work in progress on the Gauhati-Lumding Section of the Railway which had been commenced by the State. The capital authorised to be raised by the Company is £1,500,000, and the rate of interest guaranteed is $3\frac{1}{3}$ per cent. per annum up to the 1st July 1898, and after that date 3 per cent. The rate for the conversion of sterling capital into Indian currency is the average rate of exchange obtained by the Secretary of State for bills payable on demand drawn on India during the calendar half-year next preceding the time at which the conversion is required to be made.

120. The following table shows the amount of capital raised to the 31st March 1894:—

	Bengal Central.	Bengal Nagpur.	Indian Midland.	Southern Mahratta.	Mysore.	Rohilkhand-Kumaon.	Assam-Bengal.
Share Capital—	£	£	£	£	£	£	£
India (at contract rates)	...	...	...	8,460	...	...	...
England	500,000	3,000,000	3,000,000	3,491,540	...	...	1,402,560
Debentures—							
Nominal amount	...	*1,500,000*	*2,754,100*	*943,100*	...	*147,000*	...

Debenture Stock—							
Stock represented	...	...	...	...	*1,200,000*	...	...
Cash received	...	...	...	...	1,200,000*	...	...
Capital not bearing interest—							
India (at contract rates)	...	...	...	34	...	...	...
England	...	5,781	2,016	30,923	24,000	...	...
Total subscribed by Companies	500,000	4,505,781	5,756,116	4,474,057	1,224,000	160,837	1,402,560
Advances made from money raised under Act 51, Vict., Cap. 5	500,000	2,760,000	1,345,000	2,129,900	...	...	...
TOTAL	1,000,000	7,265,781	7,101,116	6,603,957	1,224,000	160,837	1,402,560
Equivalent in Rx.	Rx. 1,390,337	Rx. 9,445,515	Rx. 8,876,395	Rx. 8,030,939	Rx. 1,638,280	Rx. 203,419	Rx. 2,039,298

* The cash received in this case was £1,224,000, of which the sum £24,000 is included under "Capital not bearing interest." Rupees 20,34,195 were actually paid into the Treasury, and this, under the contract, is taken as equivalent to £160,837.

121. The following abstract shows the different rates of interest guaranteed in the case of each line on the share and debenture capital :—

	Bengal Central.	Bengal Nagpur.	Indian Midland.	Southern Mahratta.	Mysore.	Rohilkhand-Kumaon.	Assam-Bengal.	Total.
	£	£	£	£	£	£	£	£
Share Capital at 4 per cent.	...	3,000,000	3,000,000	...	...	...	..	6,000,000
Share Capital at 3½ per cent.	500,000	...	...	3,500,000*	...	...	1,402,560	5,402,560
Debenture stock at 4 per cent.	...	...	...	...	1,200,000	...	...	1,200,000
Debentures at 3½ per cent.	...	1,000,000	1,000,000†	255,000	...	...	...	2,255,000
Debentures at 3¼ per cent.	...	500,000	1,754,100	688,100	...	147,000	...	3,089,200
TOTAL	500,000	4,500,000	5,754,100	4,443,100	1,200,000	147,000	1,402,560	17,946,760

* 4 per cent. up to 31st December 1890, thereafter 3½ per cent.
† These debentures which matured on the 1st January 1894 have been renewed or replaced at 3½ per cent.

122. During the year 1893-94, the only capital raised by Companies direct was the sum of £88,688 subscribed on account of share Capital by the Assam-Bengal Railway Company: advances were made from moneys raised under Act 51, Vict., Cap. 5, to the Bengal Nagpur Railway Company to the extent of £60,000, the total addition to the Companies' capital being £148,688.

123. The following table shows the amounts of capital withdrawn by the several Companies up to the 31st March 1894, and the balances of capital at their credit, or the amounts of overdrafts, on that date. In this table the amounts shown as withdrawn in England represent true sterling, the amounts shown as withdrawn in India represent rupees converted at contract rates, and also take into account the differences between remittances from England converted at contract rates and the average rates of exchange at which they are incorporated in the Indian books :—

	Paid-up Capital (including advances).	Capital withdrawn.			Balance at	
		India.	England.	Total.	Credit.	Debit.
	£	£	£	£	£	£
Bengal Central	1,000,000	332,740	491,113	823,853	176,147	...
Bengal Nagpur	7,265,781	5,083,721	2,451,209	7,534,930	...	269,149
Indian Midland	7,101,116	4,717,854	2,266,775	6,984,629	116,487	...
Southern Mahratta	6,603,957	5,770,589	1,759,240	7,529,829*	208,128	...
Mysore	1,224,000					
Rohilkhand-Kumaon	160,837	184,807	72,762	257,569	...	96,732
Assam-Bengal	1,402,560	590,248	340,277	930,525	472,035	...
TOTAL	24,758,251	16,679,959	7,381,376	24,061,335	1,062,797	365,881

or, as stated in the Indian accounts, the sterling capital being converted at the contract rates, and the withdrawals in England being converted at the

average rates of exchange applicable under the contract, the figures stand as under :—

	Paid-up capital.	Capital withdrawn.	Balance at	
			Credit.	Debit.
	Rx.	Rx.	Rx.	Rx.
Bengal Central	1,390,337	1,010,622	379,715	...
Bengal Nagpur	9,445,515	9,795,408	...	349,893
Indian Midland	8,876,395	8,729,201	147,194	...
Southern Mahratta	8,030,939	7,860,422	170,517	...
Mysore	1,638,280	1,429,440	208,840	...
Rohilkhand-Kumaon	203,419	339,281	...	135,862
Assam-Bengal	2,039,298	1,343,153	696,145	...
TOTAL	31,624,183	30,507,527	1,602,411	485,755

124. The overdraft shown against the Bengal Nagpur Railway is due to the inclusion in the Capital account of the sum of Rx. 485,383* expended by the State on the Katni-Umaria State Railway, which was subsequently taken over by the Company (*vide* para. 35 above). A sum of Rx. 1,657,753 expended by Government on the Bellary-Kistna State Railway, now incorporated in the Southern Mahratta Railway system, has not been included in the foregoing tables of expenditure. Similarly, a sum of Rx. 512,114 expended by Government on the Bareilly-Pilibhit and Lucknow-Sitapur Railways, prior to their transfer to the Rohilkhand-Kumaon Railway Company, has not been included in these statements. These items are classed, as originally charged, under 48.—*State Railways—Construction*, and are included in the expenditure dealt with in Section E.

Comparison with actuals during 1892-93, and the Budget and Revised Estimates.

125. In the following table the actual expenditure during the year is compared with the Revised and Budget Estimates, and with the actuals during 1892-93 :—

Railway.	Actuals, 1893-94.	Revised Estimate.		Budget Estimate.		Actuals, 1892-93.
		Estimate.	Actuals, more or less.	Estimate.	Actuals, more or less.	
	Rx.	Rx.	Rx.	Rx.	Rx.	Rx.
Bengal Central	2,830	4,700	—1,870	15,500	—12,670	11,801
Bengal Nagpur	119,415	187,300	—17,885	239,800	—120,385	413,654
Indian Midland	68,641	92,300	—23,659	188,100	—119,459	96,737
Southern Mahratta	32,049	34,800	—2,751	100,000	—67,951	77,781
Mysore	8,767	11,500	—2,733	67,900	—59,133	—81,294
Rohilkhand-Kumaon (Lucknow-Bareilly)	21,027	27,800	—6,773	44,100	—23,073	26,969
Assam-Bengal	798,059	841,100	—43,041	1,229,900	—431,841	545,094
TOTAL	1,050,788	1,149,500	—98,712	1,885,300	—884,512	1,090,742

* Equivalent at contract rate to £373,372.

Compared with actuals of previous year.

126. The decrease in the expenditure during 1893-94, as compared with the outlay during 1892-93, Rx. 39,954, is due to the more advanced stage of construction and the gradual completion of works on the older lines, especially on the Bengal Nagpur Railway. The construction by the Company of the Assam-Bengal Railway was, however, in actual progress during the year.

The principal variations between the outlay of the year and that of the previous year are as under—

The decrease on the Bengal Central Railway occurred chiefly under bridgework, and is due to the completion of flood works.

The decrease on the Bengal Nagpur Railway is due to the construction of the Sambalpur Extension, and the erection of rolling stock having been practically completed in the previous year.

The decrease on the Indian Midland Railway is due to expenditure decreasing as the works for the general equipment of the line approach completion, and to considerable expenditure having been incurred in the previous year on rolling-stock, and on the construction and equipment of the workshops at Jhansi.

The decrease on the Southern Mahratta Railway is due to the expenditure in the previous year, including a transfer from the Mysore State Railway of about Rs. 2,75,000 on account of stores suspense accounts of that line at the end of December 1892, owing to the amalgamation of the stores of the two Railways. In the previous year there was also heavier outlay in England on account of plant, buffer fittings, and fencing.

The increase on the Mysore State Railway is due to the account of the previous year having been reduced by the adjustment on account of stores suspense accounts referred to above, and to the total cost of the Nanjangud Extension having been recovered from the Mysore Durbar in that year.

The increase on the Assam-Bengal Railway is due to the progress of works. The construction of this Railway was commenced by the Company in the previous year only. Construction operations were also started on four extra divisions towards the latter end of the year under review.

Compared with Budget Estimate.

127. As compared with the Budget Estimate, the lapse is Rx. 834,512, and occurs principally on the Assam-Bengal, Bengal-Nagpur, and Indian Midland Railways, due to the causes detailed below.

Lapses occur on all the Railways dealt with in this section, and are attributed chiefly to the following causes: —

On the Bengal Central Railway, principally to the construction of the siding to the small arms factory at Dum Dum not having been undertaken as was expected, and to smaller outlay on ballasting owing to the contractors having been unable, through unfavourable weather, to supply the material required.

On the Bengal Nagpur Railway, to less work having been carried out or put in hand than was provided for in the estimate, and to short purchases of stores in England.

The large lapse on the Indian Midland Railway is due to the provision made for works in connection with the junction with the Bina-Guna Railway not having been fully utilised; to a large number of engines and vehicles not having been delivered during the year, and to larger issues of stores than were expected.

On the Southern Mahratta Railway, to smaller purchases of materials in England than were anticipated when the estimate was prepared.

On the Mysore State Railway, to less work having been carried out than was provided for in the estimate, and to the disapproval of the Mysore Durbar of the proposal to fence the line from Harihar to Gubbi with wire fencing, provision for which was made in the estimate.

On the Lucknow-Bareilly Railway, to smaller purchases of stores in England than were anticipated when the Budget Estimate was prepared.

On the Assam-Bengal Railway, to less progress having been made on construction than was anticipated in the estimate, and to short expenditure on stores in England.

Compared with Revised Estimate.

128. Compared with the Revised Estimate, the lapses amount to Rx. 98,712. Here also lapses occur on all the Railways dealt with in this section, the more important of which have been explained as follows :—

On the Bengal Nagpur Railway, chiefly to unanticipated credits from the Great Indian Peninsula Railway on account of the cost of an over-bridge and culvert at Nagpur Station having been written back to Joint Station Capital Account; to unanticipated writes-back for proportionate charges for the renewal of 24 ballast and coal wagons by debit to Revenue; to larger issues of stores to Revenue and the Assam-Bengal Railway than were provided for, and to short outlay on stores in England.

On the Indian Midland Railway, principally to larger credits from Revenue than were anticipated, to smaller purchases of stores in India, and to large bills for carriage of coal not having been paid before the end of the year, owing to disputes.

On the Lucknow-Bareilly Railway, to payments for land estimated for not having been made; to larger issues of stores to Revenue than were provided for in the estimate, and to certain works not having progressed as rapidly as was anticipated.

On the Assam-Bengal Railway, to floods which materially hindered work, to the prevalence of sickness, and to short expenditure on stores in England.

SECTION H.

NATIVE STATES RAILWAYS.

Capital and Revenue Transactions.

129. The accounts reviewed in this section represent the transactions of the following Railways belonging to Native States, the accounts of which are dealt with in this Department :—

Bhopal State Railway (Bhopal Section).
Khamgaon Railway.
Amraoti Railway.

130. It may be mentioned that the transactions of the following foreign Railways, with the accounts of which this Department has no concern, are not dealt with in this review :—

* The Gaekwar's.
* Jodhpore-Bickaneer.
Nizam's Guaranteed.
Morvi.
* Rajpura-Bhatinda.
Bhavnagar-Gondal-Junagad-Porbundar.
* Jammu-Kashmir (Kashmir Section).
* Kolhapur.
* Cooch Behar.
Bina-Guna.
Bhopal-Ujjain.
West of India Portuguese.
Pondicherry.
Mysore { Mysore-Nanjangud Section. / Bangalore to Frontier at Hindupur. / Kolar Gold-fields.

131. An officer of the Public Works Accounts Department is lent to the Native States for the purpose of keeping the accounts of the Bhavnagar-Gondal-Junagad-Porbundar Railway, and the accounts of the lines marked with an asterisk are either kept or supervised by Public Works Accounts officers. It has been decided that the accounts of the Bina-Guna and Bhopal-Ujjain Railways shall be audited annually by a Public Works Accounts officer.

BHOPAL STATE RAILWAY.

132. *Capital.*—The Bhopal State Railway is the joint property of the Imperial Government and the Bhopal Durbar. The line connects Itarsi, on the Great Indian Peninsula Railway, with Bhopal, crossing the river Nerbudda in the neighbourhood of Hoshungabad. The line runs for 13 miles through British territory and for 44 miles through the Native State of Bhopal.

133. Funds for the construction of this line were at first provided as follows :—

	Rx.
By the British Government	125,000
By the Bhopal State	500,000

But as further moneys were required to meet the cost of additional works and alterations necessary to bring the line up to the required standard to carry the heavy traffic anticipated on the opening of the Indian Midland Railway, and as Her Highness the Begum of Bhopal was not prepared to advance more than the 50 lakhs, it was decided to provide the necessary money from Imperial resources. The contribution made by the Durbar had all been utilised before the end of 1890-91, so that the expenditure incurred subsequently was met from grants under the head "48.—State Railways—Construction," and as such is reviewed in the section pertaining thereto.

134. The capital expended on the line to the close of 1893-94 has amounted to Rx. 713,820, and has been found as follows :—

	Rx.
By the British Government	213,820
By the Bhopal State	500,000

135. *Revenue.*—The line is worked by the Indian Midland Railway on the following terms : on payment of such sum as shall bear the same rate per cent. to the gross receipts of the Bhopal State Railway for any half-year as the aggregate working expenses (excluding cost of maintenance) of the amalgamated undertaking shall bear to the aggregate gross receipts of the amalgamated undertaking for the same half-year, *plus* the actual expenditure incurred on the maintenance of way and works, *plus* 5 per cent. of the gross earnings for supply of rolling-stock. The earnings and expenses are adjusted by the calendar half-year, and the amounts included in the accounts for the official year 1893-94 represent the results of working during the calendar year 1893.

136. The revenue receipts and charges of the year are, under the terms of the agreement with the Durbar, divided between the British Government and the Bhopal State in the proportion of the capital contributed by each, and on this basis the division of the transactions of the year 1893 was made as shown in the following table :—

	Government.	Bhopal State.	Total.
	Rx.	Rx.	Rx.
Receipts	16,916	42,424	59,340
Expenditure	11,712	29,331	41,043
Net Receipts	5,204	13,093	18,297

137. The Durbar share of the net earnings for the year is equivalent to a return of 2·62 per cent. per annum on the capital provided by the Durbar. The amount was paid to the Durbar under the instructions conveyed in Public Works Department letter No. 383 A.—R., dated 9th September 1889.

KHAMGAON AND AMRAOTI RAILWAYS.

138. *Capital.*—These railways have been constructed from funds provided from the surplus revenues of Berar. The Khamgaon Railway, 7½ miles in length, runs from Jalamb Station, on the Great Indian Peninsula Railway, to Khamgaon; and the Amraoti Railway, 5½ miles in length, connects Budnera with Amraoti.

139. The capital expended on these lines to the end of 1893-94 is as under :—

	To end of 1892-93.	During 1893-94.	Total to date.
	Rx.	Rx.	Rx.
Khamgaon Railway	48,861	—205	48,656
Amraoti „	45,004	—58	44,946

140. *Revenue.*—Both these lines are worked by the Great Indian Peninsula Railway Company on the following terms: the payment to the Company of the same percentage of the gross receipts of the State line that the working expenses of the Great Indian Peninsula Railway and branch lines, taken together, bear to the earnings of the Great Indian Peninsula Railway and

branch lines, *plus* 5 per cent. of the gross receipts of the State lines for the use of rolling-stock. The transactions are adjusted by the calendar half-year, and the results incorporated in the accounts of the year 1893-94 represent the transactions of the calendar year 1893.

141. The receipts and charges of the year 1893 are shown in the following table:—

	Receipts.	Expenditure.	Net Receipts.
	Rx.	Rx.	Rx.
Khamgaon Railway	5,100	2,930	2,170
Amraoti „	10,204	5,898	4,306

142. The net receipts represent returns of 4·46 and 9·58 per cent. per annum on the total capital expended on the Khamgaon and Amraoti Railways, respectively.

Comparison with Budget and Revised Estimates.

143. The actual Capital outlay on the lines dealt with in this section compares with the Budget and Revised Estimates as under:—

Railway.	Actuals, 1893-94.	Revised Estimate.		Budget Estimate.	
		Estimate.	Actuals, more or less.	Estimate.	Actuals, more or less.
	Rx.	Rx.	Rx.	Rx.	Rx.
Khamgaon	—205	—150	—55	—50	—155
Amraoti	—58	—20	—38	—30	—28
Total .	—263	—170	—93	—80	—183

The credit on the Khamgaon Railway represents the sale of permanent-way material to the Great Indian Peninsula Railway. The lapse on the Budget Estimate is due to more material having been sold than was expected.

144. The actual revenue transactions compare with the actuals of 1892-93 and the Budget and Revised Estimates as under:—

	Actuals, 1893-94.	Revised Estimate.		Budget Estimate.		Actuals, 1892-93.
		Estimate.	Actuals, more or less.	Estimate.	Actuals, more or less.	
	Rx.	Rx.	Rx.	Rx.	Rx.	Rx.
Bhopal—						
Receipts . .	42,424	40,600	+1,824	46,000	—3,576	44,780
Expenditure .	29,331	29,000	+331	28,000	+1,331	28,192
Net Receipts .	13,093	11,600	+1,493	18,000	—4,907	16,588
Khamgaon—						
Receipts . .	5,100	5,100	...	6,600	—1,500	6,555
Expenditure .	2,930	3,000	—70	3,600	—670	3,464
Net Receipts .	2,170	2,100	+70	3,000	—830	3,091
Amraoti—						
Receipts . .	10,204	10,200	+4	10,800	—596	10,576
Expenditure .	5,898	5,700	+198	6,000	—102	5,712
Net Receipts .	4,306	4,500	—194	4,800	—494	4,864

145. The decrease in receipts on the Khamgaon and Amraoti Railways as compared with the actuals of the previous year and the Budget Estimate is attributed to a falling-off in merchandise traffic. The decrease in expenditure on the Khamgaon Railway is ascribed to the same cause. The increase in expenditure on the Amraoti Railway as compared with the actuals of the previous year is attributed to the percentage for working expenses paid to the Great Indian Peninsula Railway Company having been higher than that of the previous year.

CALCUTTA,
The 25th March 1895.

R. G. MACDONALD,
Accountant General, P. W. Dept.

Acctt. Genl., P. W. Dept., memorandum No. 252 R., dated 25th March 1895.

Submitted to the Secretary to the Government of India, Public Works Department.

Document accompanying.

Abstract and Detailed Accounts of Revenue and Expenditure on Railways in India durin and to the end of, 1893-94.

Accompaniment to Accountant General's, P. W. Dept., Note No. 252R., dated 25th March 1895.

Abstract by Fund and Finance Heads of the Revenue and Expenditure on Railways in India during 1893-94 compared with the Budget and Revised Estimates of the year and the Accounts of 1892-93.

* In the case of lines worked by Companies two percentages have been entered, the first including, and the second excluding, surplus profits and share of net earnings paid to the Companies.

(*a*) This figure represents the Capital outlay recorded in the Finance and Revenue Accounts of the Government of India. The actual rupee outlay, expressed in Rx., is as follows :—

	Rx.
By Company to date of purchase	33,686,941
„ Government after purchase (excluding Jherria extension)	3,227,292
	36,914,233 on which the net receipts would give a return of 9·64 per cent.

(*b*) The Provincial share of the Eastern Bengal Railway receipts has been included in calculating these percentages.

(*c*) This figure represents the Capital outlay recorded in the Finance and Revenue Accounts of the Government of India. The actual rupee outlay on the line is as follows :—

	Rx.	
By Company to date of purchase	9,268,311	
By Government after purchase	290,485	
Total	9,558,796	on which the receipts would give a return of 5·44 per cent.

(*d*) This figure represents the Capital outlay recorded in the Finance and Revenue Accounts of the Government of India. Taking the actual rupee outlay on the old Sind, Punjab and Delhi Railway by the Company to date of purchase, the outlay is as follows :—

	Rx.	
By Company to date of purchase	12,086,927	
By Government after purchase and on system before and after acquisition	30,880,516	
Total	42,967,443	on which the net receipts would give a return of 3·61 per cent.

(*e*) This figure represents the Capital outlay recorded in the Finance and Revenue Accounts of the Government of India. The actual rupee outlay on the line is as follows :—

	Rx.	
By Company to date of purchase	4,970,512	
By State to end of 1892-93	2,592,807	
Total	7,563,319	on which the net receipts would give a return of 3·84 per cent.

(*f*) Substituting the actual rupee outlay in the case of purchased lines, the net receipts, including the Eastern Bengal Railway Provincial share, give a return of 5·13 per cent.

(*g*) Capital expended on Tirhoot State Railway.

(*h*) This figure represents the Capital outlay recorded in the Finance and Revenue Accounts of the Government of India. The actual rupee outlay expressed in Rx. is as follows :—

	Rx.	
By Company to date of purchase	3,539,837	
By Government after purchase and on other sections constructed by the State and opened for traffic	7,067,764	
	10,607,601	on which the net receipts (including the Provincial share) give a return of 6·66 per cent.

(*i*) Percentages calculated on total net receipts, including Provincial Share.

SCHEDULE A—*concluded.*

Detailed Account of State Railways Gross Traffic Receipts and Working Expenses for 1893-94—concluded.

Provincial.		Receipts. Budget. Estimate.	Receipts. Revised Estimate.	Receipts. Actuals.	Expenses. Budget Estimate.	Expenses. Revised Estimate.	Expenses. Actuals.	Net Receipts. Budget. Estimate.	Net Receipts. Revised Estimate.	Net Receipts. Actuals.	Capital outlay to 31st March 1894.	Percentage of net receipts on total outlay on 31st March 1894.	Percentage of charges on receipts.

The difference between the net receipts and interest on the actual Capital expenditure incurred on the line is recovered from the Mysore Durbar, and the balance, representing interest on the unexpended balance of capital retained in its hands, is borne by the State. The amounts so recovered from the Mysore Durbar are as follows:—

	Rx.		Rx.
1886-87	1,584	1890-91	30,505
1887-88	24,764	1891-92	31,567
1888-89	42,768	1892-93	17,883
1889-90	49,012	1893-94	34,054

and deducting these amounts from the net charge for interest shown in the last column of the preceding statement, the balance will represent the charge borne by Government, as shown below:—

	Rx.
1886-87	47,209
1887-88	34,351
1888-89	16,296
1889-90	9,970
1890-91	6,857
1891-92	5,855
1892-93	6,582
1893-94	8,460
	135,580

SCHEDULE I—*concluded.*

J. F. FINLAY,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

HOME DEPARTMENT.

The following Resolution on the subject of the confirmation of Officiating Cantonment Magistrates is published for general information :

No. 16-Judl.
965—975.

Extract from the Proceedings of the Government of India in the Home Department (Judicial),—under date Simla, the 21st June, 1895.

Read again—

The undermentioned papers on the subject of the reorganisation of the Cantonment Magistrates' Department :

Despatch to Her Majesty's Secretary of State, No. 185 (Financial), dated the 19th July 1892.

Despatch from the Secretary of State, No. 133 (Military), dated the 28th October 1892.

Letter to the Government of the North-Western Provinces and Oudh, No. 875, dated the 26th July 1893.

Resolution No. $\frac{\text{6-Judicial}}{774-774}$, dated the 18th July 1894.

RESOLUTION.

Officers holding the sole-charge Cantonment Magistracies entered in the list appended to the Resolution No. $\frac{\text{6-Judicial}}{774-774}$, dated the 18th July 1894, were, by the orders contained in that Resolution, formed into an Imperial service under the Government of India. It is therefore necessary to lay down a definite rule regulating the confirmation of officers officiating in the Department.

2. The Governor General in Council is accordingly pleased to direct that the claims of Officiating Cantonment Magistrates to substantive appointments shall in future be considered by the Government of India in the order in which they entered the Department, irrespective of the Province in which they are serving or in which the vacancy occurs. In accordance with this ruling, when a vacancy takes place in consequence of the death, retirement, etc., of a sole-charge Cantonment Magistrate in one Province, the vacancy will be considered as a vacancy in the Department. The officer selected to fill such vacancy will ordinarily be the officer who has had the longest officiating service in the Department, irrespective of the Province in which he has been so officiating, provided that he is considered by the Local Government under which he is serving, and by the military authorities, to be deserving of confirmation. It will not, however, follow that he will be transferred to the particular cantonment in which the vacancy has occurred. The principle enunciated in the Resolution of the 18th July 1894, that local knowledge and experience should be made use of, as far as possible, will be kept in view, and, in pursuance of this principle, it may at any time be found necessary to place the cantonment vacated in the manner referred to in charge of an officiating officer having local experience. The distribution of the officers, permanent or officiating, in the Department, who are located in a particular Province, will continue to be left to the discretion of the Local Government or Administration under which they are serving and, as was intimated in paragraph 5 of the Resolution of the 18th July 1894, the Government of India will not make transfers from one Province to another without consulting the Local Governments concerned.

ORDER.—Ordered, that this Resolution be communicated to the Local Governments and Administrations noted in the margin, and to the Foreign, Military and Finance and Commerce Departments for information.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the Week ending at 8 a.m. on Saturday, June 15th, 1895.

During the week under review monsoon weather has appeared and spread over the greater part of the country, but the mode of advance has been hesitating and uncertain, and the commencement of the monsoon has not been marked by any of those phenomena which it has been usual to associate with the setting in of the rains. The closing days of the week were marked by unsettled weather on the West Coast, where the wind shifted to south or south-south-east, and where conditions were under the influence of a cyclonic storm, progressing north-north-westward over the Arabian Sea at some distance from the west coast of the Peninsula. With the gradual extension of rainfall over the country, there has occurred a gradual decrease of temperature. On the 9th and 10th the mean temperature of the whole of India was 2° above the normal average, but after the 10th the excess disappeared, and by the 15th the mean was 1½° in defect.

Daily Summary.—*Sunday.*—The barometer was falling generally, but pressure was still in large excess in Northern India, and in considerable excess in Central India, the Deccan, and Burma. Winds were much lighter and more variable than usual, and on the West Coast what wind there was, was blowing from some northerly direction. The rainfall has been very scanty. Showers had occurred in Lower Burma, in the West Coast districts, in the Central Provinces, and in the Deccan. In most cases the rainfall accompanied dust and thunder storms.

Monday.—The reports showed that pressure had been steady, or had risen slightly over the southern and eastern parts of the Indian area, and had fallen in the north-west. The distribution was hence a trifle more favourable to the advance of the monsoon. Readings were highest in Tenasserim and the east of the Bay, and lowest in the Punjab. They were above the normal average, except in the extreme south. Light to moderate easterly winds prevailed up the Gangetic plain, and light unsteady winds elsewhere. There had been very little rain in the Peninsula or in North-Western India, but thunderstorms and duststorms had given rain over other parts of the country. Mymensingh had received nearly 3 inches, but the other heavyish amounts were generally between one and one-and-a-half inches.

Tuesday.—Pressure had increased over the west of the North-Western Provinces and the east of the Punjab, and had decreased elsewhere. The distribution was irregular. A shallow low pressure area overlay the western desert, while elsewhere readings were very uniform. There was a large excess of pressure over Northern India, and a slight defect over the south of the Peninsula. Easterly winds continued up the Gangetic plain, and light or moderate irregular winds elsewhere. A good deal of scattered rainfall was reported from Northern and Central India and the south of the Peninsula. The heaviest amounts between 1½ and 2½ inches were reported from the North-Western Himalayas and from the Deccan.

Wednesday.—Pressure had increased a little over the Punjab, and decreased in all other places. There was very little change in the general distribution, pressure being abnormally uniform throughout the Indian region. Moderate irregular winds continued to prevail. The monsoon had set in feebly along the West Coast, and rain had fallen generally in the West Coast districts, West Ceylon, Mysore, and the Deccan. At the same time dust and thunder storms continued to give rain to the Central Provinces, Central India, Rajputana, the Punjab, and the North-Western Provinces.

Thursday.—Pressure had begun to increase again in Ceylon and Malabar, but had fallen briskly in the Konkan, and a disturbance was forming off the coast

opposite Ratnagiri. Elsewhere the pressure changes were generally small. Readings were highest in Ceylon, and lowest in the Indus Valley. The winds were blowing from cyclonic directions on the West Coast, while elsewhere moderate and irregular breezes were reported. There was very little rain over North-Eastern India or on the plains of North-Western India, but elsewhere there was a good deal of scattered rainfall.

Friday.—Pressure had increased over the Peninsula, and decreased over Northern India. The increase had been very slight on the Konkan Coast, and the disturbance over the Arabian Sea was probably in the latitude of Bombay. The winds were increasing from south-south-east on the west coast of the Peninsula, but elsewhere they remained moderate or light, and rather variable. Heavy rain had fallen in Malabar, and light to moderate rain in the Konkan, while numerous thunderstorms had given a good deal of rain to other parts of the country.

Saturday.—Pressure had been steady over the south of the Peninsula, but had fallen elsewhere. The fall had been brisk in Kathiawar, and the depression off the West Coast was advancing northward. The winds had increased at the West Coast stations, and were blowing strongly from cyclonic directions. South-westerly and westerly winds prevailed in most other places, and south-easterly winds up the Gangetic plain. Rain had been fairly heavy, except in the east and centre of the Peninsula and part of North-Western India. The amounts were large on the West Coast and in parts of Bengal.

Temperature.—The temperature variations have been considerable during the week. On the first two days the mean temperature of nearly all parts of India was in excess, but on the 11th a fall of rain over part of North-Western India reduced temperature suddenly and very largely in the North-Western Provinces, and considerably in the Punjab and the central parts of the country. This fall continued and extended, so that on the 12th over the greater part of India the mean temperature was in defect. These conditions lasted until the close of the week. The following table shows the variations of the mean temperature from the normal in the different provinces of India for each day of the week:

Province.	June 1895.							Mean variation of week.
	9th	10th	11th	12th	13th	14th	15th	
	°	°	°	°	°	°	°	°
Burma	+1·6	+1·7	+3·1	+2·9	+1·8	+2·1	+2·0	+2·2
Bengal and Assam	+1·2	+1·2	+0·1	+0·7	+2·6	+2·7	+2·5	+1·6
North-Western Provinces and Oudh	+0·2	+0·7	—8·1	—5·4	—1·9	—5·4	—9·3	—4·2
Punjab	+0·9	+3·9	+1·0	—3·3	—1·1	—4·3	—5·1	—1·1
Bombay	+5·6	+4·1	+4·0	+3·0	+1·0	+0·1	—0·6	+2·5
Central Provinces and Berar	+4·1	+3·3	+0·3	—1·2	—1·2	—1·4	—1·2	+0·4
Central India and Gujarat	+1·8	+2·5	+0·4	—2·1	—0·6	—1·6	—2·8	—0·3
Sind and Rajputana	—0·2	+1·3	+0·9	—0·2	—0·2	—0·6	—1·6	—0·1
Madras	+2·6	+1·0	+2·3	—0·5	+1·2	+1·7	+2·3	+1·5
Mean for whole of India	+2·0	+2·2	+0·4	—0·7	+0·1	—0·7	—1·5	+0·3

The final line of figures shows that the mean temperature of the whole country was in excess on the 9th and 10th, normal on the 11th, 12th, 13th, and 14th, and in defect on the 15th. The provincial variations exhibit an excess of temperature in Burma, Bengal, Bombay, and Madras, normal temperature over the central parts of the country, and deficient temperature in the North-Western Provinces and the Punjab.

The returns of maximum temperature exhibit no points of particular interest.

Rainfall.—As mentioned in the earlier portion of this summary, monsoon rainfall commenced fairly generally on the 11th. Previous to that date there had been, as was the case in the preceding week, a good deal of abnormal rainfall on and near the North-Western Himalayas, and a good deal of scattered rainfall in other parts of the country, but it was not until the 11th that general rain set in. The result of the appearance of the monsoon is shown in the change which has taken place in the rainfall table given at the close. Last week there were no less than fourteen divisions which reported practically or absolutely no rain during the period, while for the present week there are only two, namely, Sind and Rajputana (West). In all the other divisions effective rainfall was received, the average actual fall ranging from 0·19 inch in the Punjab (West) to 7·71 inches in Malabar. The divisions which received the heaviest average falls after Malabar were the Konkan with 4·58 inches, Arakan with 4·45 inches, and the Punjab hill districts with 4·19 inches.

The third column of the table shows the amount of the excess or defect of the week's rainfall in inches in the different divisions. The results show, first, that the abnormal rainfall which commenced over North-Western India, both hills and plains, last week, has been maintained, and that all over the North-Western Provinces and the Punjab the actual rainfall has been moderately to largely in excess of the normal. They show also that the delay in the setting in of the rains until the middle of the week has resulted in a large deficiency of rainfall over those parts of the country, where, as a rule, the rains are firmly established before the commencement of the week under review. Thus there is a deficiency of over 9 inches in Arakan, of over 7 inches in Assam (Surma) and Tenasserim, of over 4 inches in East Bengal, and of over 3 inches in Assam (Brahmaputra), North Bengal, and Coorg. There was a slight excess of rain over the central parts of the country and the head of the Peninsula and in the Madras divisions.

The three concluding columns of the table show the state of the seasonal rainfall, that is the rainfall from June 2nd to date. The most marked features are the considerable excess over the Punjab and a large part of the North-Western Provinces, and the considerable deficiency in most other parts of the country.

The following heavy falls of rain are reported: Thaton (Amherst) 5·55 inches, Mandalay 6·79 inches, Akyab 5·68 inches, Jalpaiguri 5·53 inches, Nanpara (Bahraich) 5·77 inches, Shikohabad (Mainpuri) 5·70 inches, Man (Jhansi) 7·30 inches, Baheri (Bareilly) 5·25 inches, Bansi (Basti) 8·92 inches, Kangra 6·76 inches, Murree 5·51 inches, Badagara (Calicut) 14·28 inches, Kasaragad (Mangalore) 12·19 inches, Devala (Nilgiris) 5·21 inches, Ankola (Karwar) 10·48 inches, Sangameshwar (Ratnagiri) 9·45 inches, Kagal (Kolhapur) 7·30 inches, Nevasa (Ahmednagar) 6·52 inches, Chodvaram (Vizagapatam) 5·27 inches, Tuni (Godaveri) 6·68 inches.

W. L. DALLAS,

Asst. Meteorological Reporter to the Government of India.

SIMLA, *20th June 1895.*

DENZIL IBBETSON,

Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 15th June.*—Rainfall good on the West Coast, Circars, parts of the Deccan, and in North Arcot and the Nilgiris; moderate showers in most other districts. Ploughing and sowing are generally going on. The standing crops are generally fair. Pasture is scarce, but fodder is sufficient. Cattle are generally in good condition. Prices have slightly risen in parts of the Central and Southern districts; elsewhere prices are almost stationary.

Bombay.—*For week ending 19th June.*—Rain throughout the Presidency; more rain is required in parts of Sholapur. The standing crops are good. Preparations for the monsoon crops are progressing in parts of thirteen, and sowing in parts of seventeen, districts. Sowing is retarded in parts of Ahmednagar owing to insufficient rain. Harvesting of the early crops continues in parts of Karachi. The fodder-supply is sufficient. Agricultural stock are in good condition. Prices are normal, except in parts of Sholapur and Ahmednagar.

Bengal.—*For week ending 17th June.*—There was rain over the whole Province during the week, it has been generally very beneficial, especially in Bihar, where it was much needed. The cultivation of lands for the autumn crops and for the winter rice is in progress. The standing crops of jute, early rice, sugarcane, and indigo are generally reported promising. In Dacca the early rice is being harvested, and the manufacture of indigo has begun in Purnea. Cattle are in good condition, except in one thana of Purnea. The price of common rice continues stationary, it is below the average of the previous four years.

North-Western Provinces and Oudh.—*For week ending 19th June.*—Rain has been general during the week. The sugarcane and indigo crops have benefited by the rain. Fields are being prepared for the autumn crops, and sowing has commenced in places. Markets are well supplied. Fodder is inadequate in Fyzabad, elsewhere it is sufficient. Prices are generally stationary, but have risen slightly in seven districts.

Punjab.—*For week ending 19th June.*—Rain has fallen in all the districts, except Sialkote and Lahore. Autumn ploughings are in progress in Hissar and Umballa, and have commenced in Jullunder. Sowings have commenced in Rawalpindi, but have been completed in Mooltan. Threshing of wheat is over. The extra spring crops of cotton and sugarcane are being irrigated in Lahore. The spring crops have been harvested in Shahpur and Mooltan, and the grain is being cleaned in Rawalpindi. The condition of the autumn crop is good in Amritsar, while the extra spring crops have been improved in Dera Ismail Khan by the rain. More rain is wanted for the autumn crops in Hissar and Shahpur. The young locusts which lately appeared in one tehsil of the Dera Ismail Khan district have been destroyed. Cattle are generally in good condition, and fodder is sufficient in all districts, except in parts of Dera Ismail Khan. Prices are rising in Umballa and Shahpur, approaching normal in Sialkote, and low elsewhere.

Central Provinces.—*For week ending 19th June.*—Weather generally cloudy. Rain fell throughout the Provinces, and was very heavy at Saugor, Seoni, and Raipur. In Bilaspur also there was a fall of nearly 5 inches. Good falls of rain in Wardha, Damoh, and the Nerbudda Valley and lighter falls in other districts. Preparations of land for the autumn crop are in full swing, and sowings have commenced in some places. Prices continue steady.

Burma.—*For week ending 15th June.*—Rainfall fairly general. In Lower Burma ploughing operations are progressing in seven districts; elsewhere preparations are in hand. In Upper Burma reaping of the dry-weather paddy is nearly completed. Ploughing for and sowing of wet-weather paddy are progressing in most places. Planting of miscellaneous crops continues. Except for the destruction of the sessamum and cotton crops by insects in Lower Chindwin, and damage by floods to the dry-weather paddy in Bhamo, the standing crops are generally good. The price of paddy has fallen slightly in two districts of Lower Burma and in three districts of Upper Burma, while it has risen slightly in Katha; elsewhere prices are stationary.

Assam.—*For week ending 18th June.*—Weather hot and sultry. Sowing of the late rice seedlings continues. Tea is doing well. The condition of cattle is fair. Fodder and water are sufficient.

Mysore and Coorg.—*For week ending 19th June.*—MYSORE: Good rain in parts of Bangalore and Kadur; slight rain elsewhere. Crops and prospects are good. Prices have risen slightly in Kolar, Hassan, Kadur, and Shimoga.

COORG: Rainfall good. Ploughing of rice and *ragi* (*Eleusine coracana*) fields continues. Water and fodder for cattle are sufficient. Prices are normal.

Berar and Hyderabad.—*For week ending 19th June.*—BERAR: Weather hot and cloudy. The rainfall is sufficient for sowing operations which have commenced in five districts. Breaking up of the land is in progress. Scarcity of water and fodder prevails in Buldana and Wun. Prices are fluctuating in one district, but are otherwise steady.

HYDERABAD: Rainfall moderate. Land is being prepared for the autumn sowings. Scarcity of fodder in Aurangabad. Prices are normal.

Central India.—*For week ending 19th June.*—Rainfall general. Agricultural operations are in progress in six Agencies. Cattle are in good condition, except in Bhopal and part of Gwalior. Pasturage is good and sufficient in all Agencies, except in Gwalior where it is indifferent. Prices of food-grains are high in Goona and Bhopal, rising in Baghelkhand and parts of Gwalior, and normal elsewhere.

Rajputana.—*For week ending 19th June.*—Good rain in Abu, Sirohi, Kherwara, Kotah, and Bhurtpore; moderate rain elsewhere, except in Ulwar. Agricultural operations have commenced in parts. Crops, prospects, and agricultural stock are generally good. Fodder and pasturage are generally sufficient. Prices are fluctuating in one State, rising in four others, and steady elsewhere.

Kashmir.—*For week ending 18th June.*—KASHMIR VALLEY: Weather fine. Rain is wanted. The barley crop is ready for harvesting, and the crop is being reaped in some places. The wheat crops are also ripening. Reaping of oil-seeds is in progress. Prices continue normal.

JAMMU PROVINCE.—*For week ending 18th June.*—Rainfall good. Rivers are swollen by floods. Ploughing for the autumn crops is in progress. Prices are normal.

Nepal.—*For week ending 15th June.*—Weather showery and cloudy. Prospects are good.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

HOME DEPARTMENT.

RED SEA PILGRIM TRAFFIC.

No. $\frac{\text{6-Sanitary}}{172-179}$.

Extract from the Proceedings of the Government of India in the Home Department (Sanitary), dated Simla, the 28th June 1895.

RESOLUTION.

IN the beginning of 1894 an International Sanitary Conference was convened at Paris to consider especially the best means of preventing the spread of cholera westwards by way of the Red Sea and Persian Gulf. The British Government accepted an invitation to join in its deliberations and a Convention drawn up by the Conference in April 1894 was accepted by Her Majesty's Government, with reservations upon three points (to be mentioned below). The agreement is binding for five years, and is to be renewed unless notice of withdrawal is given six months before the end of that period.

As the provisions of the Convention were intended directly to affect the pilgrim traffic by sea between British India and Arabia, it became necessary to consider what amendments should be made in the law by which that traffic is at present controlled. The Government of India have been in communication with Her Majesty's Secretary of State and the Local Maritime Governments as to the best way of giving effect to these provisions, some of which introduce considerable changes into the existing arrangements. It has eventually been decided that the course which may most conveniently be adopted in all the circumstances of the case, is to remove from the operation of the Native Passenger Ships Act, 1887, vessels engaged in the pilgrim traffic and to provide for them separately. A Bill drawn with that object is about to be

introduced in the Council of the Governor General for making Laws and Regulations, and rules aimed at carrying out all needed changes in the regulations are now being prepared and are intended to be brought into force under and simultaneously with the new law. Meanwhile the Governor General in Council is desirous of taking this opportunity of placing before the public as early as possible full information regarding the impending changes, which are in some respects of considerable importance, and which will it is expected be in force in time to regulate the pilgrimage to the Hajj of the year 1896.

2. The following are the matters in which changes have to be made by legislation :—

(i) *The definition of a "pilgrim ship."*

By section 5 (*2*) of the Native Passenger Ships Act, 1887, a passenger on a ship to which that Act applies is defined to be "a native of Asia or Africa of the age of twelve years or upwards, who is not on the articles of the ship as one of the crew," but the term does not include either a passenger in attendance on a person other than a native of Asia or Africa, or a child under one year of age, and in the computation of passengers for any of the purposes of the Act, two persons of the age of one year or upwards and under the age of 12 are reckoned as one passenger. The Act does not apply to any steam-ship not carrying as passengers more than 60 natives of Asia or Africa (or any less number down to 30 which may be fixed by the Local Government, with the previous sanction of the Governor General in Council, as the minimum). In accordance with the terms of the Convention every individual, of whatever age, will be reckoned as a pilgrim in the proposed Bill, the provisions of which will be made applicable to all vessels carrying pilgrims, subject to the proviso that no vessel is to be reckoned as a pilgrim ship which, besides its ordinary passengers, among whom may be included pilgrims of the superior classes, embarks pilgrims of the lowest class in a smaller proportion than one pilgrim to 100 gross tonnage.

The object of the Conference, in extending the scope of the regulations to vessels to which they do not now apply, was to prevent pilgrims from being carried in ill-found craft, the sanitary arrangements on which might be insufficient or incomplete.

(ii) *Notice of sailing.*

By section 7 (*ii*) of the Native Passenger Ships Act, 1887, the master, owner, or agent of a ship is required to give not less than 24 hours' notice of his intention to sail. The Conference determined that in the case of a pilgrim ship the interval should be extended to three days, and the Bill will contain a provision modified accordingly.

(iii) *The upper deck.*

The Convention provides that the deck must, during the voyage, remain clear of all encumbering articles and be reserved day and night for the persons embarked, and placed gratuitously at their disposal.

A provision to this effect will be embodied in the Bill.

(iv) *Hospital accommodation.*

The Conference determined that there should be hospital accommodation for 5 per cent. of the pilgrims at 3 square metres (32 square feet) per head. This is considerably in excess of the present allowance. The necessary provision will be included in the Bill.

(v) *Medical inspection previous to embarkation.*

The Conference attached considerable importance to this matter. In addressing the Local Maritime Governments on the subject in October last, the Government of India expressed their opinion that the practice of allowing pilgrims to go on board before inspection is open to serious objection, as it opens the way to the introduction on board a pilgrim vessel of infectious or contagious diseases by persons suffering from them. The Local Governments agree in this view, though there are some practical difficulties which will have to be met. Provision

will accordingly be made in the Bill in order to give effect to the decisions of the Conference that the medical examination should take place on land immediately before embarkation and that articles contaminated by persons who have suffered from cholera or choleraic diarrhœa should not be taken on board until disinfected, nor persons suffering from those diseases permitted to embark.

(vi) *Sanitary taxes at Camaran and Jeddah.*

It is provided in the Convention that the Master of a pilgrim vessel must pay the whole amount of the sanitary taxes at the ports visited and it is suggested that the amount of them might be included in the price of the ticket. The Bill will contain a provision requiring the Master to pay these fees.

This decision was adopted by the Conference because of complaints made by the Turkish authorities that Indian pilgrims often fail to pay any fees at all, and the members of the Conference felt that, unless help is given to the local authorities in realizing the proper fees, it will be less easy to press for the carrying out of local sanitary reforms the cost of which is, or should be, partly defrayable from the fees collected from pilgrims.

It is necessary here to explain that the immediate adoption of this provision presents difficulties, owing to the fact that the Turkish Government did not agree to the conditions on which the retention of Camaran as a quarantine station was assented to by the British delegates at the Conference. Those conditions were that vessels should be subjected to differential treatment according as they were declared, after medical inspection, to be* *indemnes, suspects*, or *infectés*. If of the first class, pilgrim ships were to be detained for 48 hours only at Camaran; if *suspects* they were to be detained 48 hours and to undergo a second medical inspection at Jeddah; and if *infectés* they were to be detained at Camaran for five days from arrival, or from the occurrence of the last case, and to undergo a second medical inspection at Jeddah. The past practice has been for all pilgrims on vessels coming from Indian ports to be detained for ten days on shore at Camaran; if cholera or choleraic diarrhœa exists on board or breaks out during quarantine, they are detained for longer periods. It is impossible for the Government of India to declare finally what sum will have to be added on account of sanitary dues to the cost of a ticket for the voyage to Jeddah; but according to the figures supplied by the Turkish Consul-General at Bombay, about Rs. 12-8 may be taken to be the present minimum cost per pilgrim in respect of the sanitary taxes for a stay of ten days at Camaran, besides a charge of nearly Rs. 2 at Jeddah.

* *Indemnes*—are vessels on which no case of cholera has occurred either at the port of departure or on the voyage.

Suspects—are vessels on which there has been cholera but no fresh case within seven days before arrival at Camaran.

Infectés—are vessels on which fresh cases of cholera have occurred within seven days of arrival at Camaran.

As the Turkish delegates at the Paris Conference announced that they would agree to the abolition of the requirement that every ship from India should be detained for ten days if the periods of detention proposed, as mentioned above, were raised to three days for *indemnes*, five days for *suspects*, and ten days for *infectés*, the Government of India have requested Her Majesty's Government to address the Porte with the suggestion that the rules which the Turkish delegates were prepared to accept may be adopted for the future. If this is effected, there will be a very considerable reduction in the amount of the sanitary taxes to be paid for with the price of the steamer ticket.

The Government of India, recognizing that a rigid rule requiring the prepayment of sanitary dues by every pilgrim may operate with hardship in the case of poor pilgrims, who it appears from the reports of the Turkish authorities are at present excused the sanitary fees when they are unable to pay them, have decided to suggest for the consideration of the Porte that really needy pilgrims might be excused from payment of the sanitary taxes in addition to the steamer fare if they are granted passes signed by a District Officer or Political Officer on the advice of respectable Muhammadan residents of the neighbourhood in which they live, and countersigned by a Turkish Consul in India certifying that their pecuniary position justifies their exemption. It appears to the Governor General in Council that such a measure would afford effectual relief in the case of poor Muhammadans resident in India, and His Excellency in Council trusts that it may be found possible to carry it into effect.

(vii) *A second medical officer on board.*

The Convention requires every vessel embarking 100 pilgrims or more to have on board a duly qualified medical officer, and a second such officer when the

number of pilgrims exceeds 1,000. The first provision is in accordance with the present law; but though under the provision for the increase of space for each pilgrim (see paragraph 3 (*a*) below) it is unlikely that many steamers will carry more than 1,000 pilgrims, it is necessary to give effect to the Convention in this respect. This requirement will be entered in the Bill. The qualifications which these medical officers must possess will be set forth in the rules.

(viii) *Abandonment of the call at Aden on the journey from the Red Sea to India.*

The Government of India, with the acquiescence of the Government of Bombay, have decided that the present compulsory call at Aden on the return journey to India is unnecessary and inconvenient in many cases. The Bill which is about to be introduced will contain the requisite provision which is not necessary to carry out the terms of the Convention, but it is in no way opposed thereto. The present requirement that every pilgrim ship from India must call at Aden, and shall not leave that port for the Red Sea without a clean bill of health, will be retained.

3. The chief points in the existing rules under the Native Passenger Ships Act, in respect of which changes have been rendered necessary by the terms of the Convention, are the following:—

(*a*) *Increase in the space for each pilgrim.*

This is the most important point in the Convention, as it will involve a considerable increase in the cost of the journey by steamer. As the law stands (section 21 of Act X of 1887), the allowance in the between decks for a steamer passenger on a long voyage (of 5 days or over) is a space of at least 9 superficial and 54 cubic feet; two children under 12 years of age, and not under one, counting as one pilgrim, and children under the age of one year not counting. By section 56 of the Act, the Governor General in Council has power to prescribe in the case of any class of ships other provisions as regards superficial or cubic space to be available for passengers.

The Convention provides for two square metres (21½ square feet) for each pilgrim of whatever age. This is one of the points upon which the British Government made a reservation. Her Majesty's Government has, however, intimated to the French Government that a minimum standard of 1½ square metres (16 square feet) for every pilgrim of whatever age will be prescribed on all Indian pilgrim ships, and the Bill will be drawn in such a manner as to enable the Governor General in Council to give effect thereto. This decision was arrived at as some increase of space was dictated by the best sanitary authorities and by the voice of all the European Powers, including the Porte, who are interested in the matter, though it is recognized that the additional space will cause increase in the cost of steamer tickets to the pilgrims.

(*b*) *Water.*

In accordance with the Convention, the allowance of a gallon of drinking-water a day will be made for every pilgrim of whatever age, instead of to each pilgrim of 12 years of age and over (children not over 12 years, but not under one, counting as one pilgrim and children under one year of age not counting at all) as under the present rule.

(*c*) *Disinfecting stove.*

The new rules will provide for a disinfecting stove on board ship to purify the clothes and effects of pilgrims who have suffered from cholera or choleraic diarrhœa. Provisions will also be made regarding the method of disinfecting.

(*d*) *Latrines.*

The Government of India will take this opportunity to raise the number of seats from the rate of two to that of four for every hundred pilgrims, in accordance with the recommendation of the Committee which enquired into the working of the Native Passenger Ships Act in 1890. Provision will also be made for a staff of sweepers at the rate of two for every hundred pilgrims. Further provisions will be added for the better cleansing and disinfecting of the latrines.

(*e*) *Pilgrims' luggage.*

The Convention provides that pilgrims' heavy luggage must be registered, numbered and deposited in the hold, and that pilgrims are to be allowed to keep with them only such articles as are absolutely necessary (not to exceed a maund in weight for each pilgrim). A rule will be framed to carry this provision into effect.

(*f*) *Daily medical inspection on board.*

One of the terms of the Convention requires that when there are cases of cholera in port, pilgrims shall not be embarked until after they have been collected and subjected for five days to an observation which will admit of an assurance that none of them are affected with cholera. It was however agreed on the representation of the British delegates, that this observation could be practised on board ship between the time of departure from India and the call at Aden. A rule will be framed to provide for this.

(*g*) *Second medical inspection before departure from India.*

A reference was made to the Local Governments on a suggestion put forward by Her Majesty's Secretary of State as to the desirability of adding a second medical inspection of pilgrims on board just before a steamer weighs anchor. The Governor General in Council proposes to make a rule to the effect that in cases where a pilgrim ship may be detained in harbour for more than 48 hours after the embarkation of the pilgrims, and there is reason to suspect that small-pox, cholera, yellow fever or plague may have attacked some of the pilgrims, a second medical inspection shall be made by a competent medical officer.

4. The reservations made by Her Majesty's Government from the terms of the Convention were, as noticed above, upon three points. One of these as regards space has already been mentioned in paragraph 3 (*a*) *supra*. The second reservation was regarding arrangements in the Persian Gulf, and does not call for notice here. The third was as to a provision of the Convention requiring that all pilgrims must have ample funds in their possession before they are allowed to embark. The British Government, acting on the previously declared views of the Government of India who have always desired to facilitate the pilgrimage to the Hedjaz as much as possible, felt that this restriction upon the religious liberty of Muhammadan subjects of Her Majesty was not justifiable, and declined to accede to it.

5. It will be observed that the changes in the regulation of the pilgrim traffic between India and Arabia which are necessitated by the Paris Convention made between the chief European powers have for their object the amelioration of the conditions under which Muhammadans perform their journey to and from the Hedjaz. At the same time it is fully recognized both by Her Majesty's Government and by the Government of India that some of these changes, especially that as regards space, will add very materially to the cost of the sea voyage. The Governor General in Council is therefore glad to be able to intimate that the British Government have undertaken to lose no opportunity of pressing upon the Turkish Government—and, if requested, they will lend skilled officers to assist His Majesty the Sultan's Government in fulfilling—the duty of remedying the condition of affairs at Camaran in the manner indicated by the Paris Convention, and of improving the sanitary administration at Jeddah and Mecca in the way proposed by the Sanitary Council of Constantinople and the able officers who have from time to time reported to the Porte on the requirements of the situation. The Governor General in Council also wishes to assure the Muhammadan community that he is most anxious, whilst taking measures to bring about improvements in the conditions of both the sea and the land journeys to Mecca to impose no additional expense of an unnecessary nature, and he is also not without hope that it may be found possible to induce the Turkish Government to lessen the time for which Indian pilgrims are placed in quarantine at Camaran, and thereby to reduce the sanitary taxes which will have to be recovered from pilgrims, and also to exempt really needy pilgrims from payment of these dues.

6. It is proposed that the provisions of the Bill and the new rules shall come into force on the 1st October 1895, so as to apply to the pilgrimage which will take place in the spring of 1896. Local Governments and Administrations are requested to make the contents of this Resolution generally known as soon as possible.

ORDER.—Ordered, that a copy of this Resolution be published in the *Gazette of India*, and that copies be forwarded to the Governments of Madras, Bombay, Bengal, and the Chief Commissioner of Burma and to the Foreign, Finance and Commerce and Legislative Departments, for information.

[True Extract.]

J. P. HEWETT,

Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the Week ending at 8 a.m. on Saturday, June 22nd, 1895.

The weather has been unsettled over a large part of the country during the week under review, and, though rain has occurred at a large number of stations, the weather was not of the simple monsoon type. A deepish cyclonic storm passed along the North Bombay, the Kathiawar, and the Sind Coasts between the 16th and 19th, during which period heavy rain and strong winds and gales were experienced at the West Coast stations. On the 18th a cyclonic storm appeared at the head of the Bay, and advancing westward, occasioned heavy rain over the Central Provinces, and finally on the 21st a third depression appeared, this time over Lower Bengal, and gave heavy rain to South-West Bengal and Orissa. It will be observed that the centre and east of the Peninsula as well as the north-west of India were practically out of the influence of these depressions, and the returns show that these regions had relatively little rain during the week. The mean temperature of the whole of India has been below the normal average throughout the week, but in Sind, Rajputana, the Punjab, Bengal, and Burma the mean temperature on some days was excessive.

Daily Summary.—*Sunday.*—Pressure was decreasing almost everywhere. The fall was rapid in Kathiawar, and the cyclonic storm noticed in last week's summary was progressing north-westward, and had its centre to the west of Veraval. Pressure was highest in Malabar and Ceylon, and moderate gradients prevailed over Western and Southern India, while readings were abnormally uniform in the east and north. Strong cyclonic winds and gales prevailed on the Bombay coasts. Moderate to light winds prevailed elsewhere. The changes of temperature were unimportant. Rain had fallen more or less generally over the west of the Peninsula, and a large part of Central and North-Eastern India, as well as on the North-Western Himalayas.

Monday.—The centre of the cyclonic storm in the Arabian Sea lay to the west of the Runn of Cutch, the storm having advanced north-westward. Pressure was becoming more uniform, and the isobaric lines wider apart over the Bay, but in other respects the distribution was little changed. Strong winds and gales continued to blow on the Bombay coasts, while light or moderate winds were reported elsewhere. At the head of the Bay the directions were irregularly cyclonic. Temperature had changed very little. Rain had fallen generally along the West Coast, and there had been a good deal of scattered rainfall in the centre and north of India and in Burma.

Tuesday.—The cyclonic storm in the Arabian Sea had continued to move north-westward, and pressure had increased over nearly the whole of Northern India. But, while the Arabian Sea cyclonic storm was moving away, a new storm was developing over the head of the Bay. The winds were cyclonic on the north Bombay coasts and around the head of the Bay, while elsewhere the directions were fairly normal. The mean temperature was considerably to largely below the normal in the North-Western Provinces and the Punjab. Rain had again fallen generally over the west of the Peninsula, and as scattered showers elsewhere.

Wednesday.—The storm off the West coast had disappeared, though pressure remained low over Kathiawar. The principal area of defective pressure was, however, over South-West Bengal and the east of the Central Provinces, where a slight but well defined cyclonic storm existed. The wind was cyclonic around the head of the Bay, but elsewhere the winds blew from the normal monsoon directions. The mean temperature was in considerable defect in the North-Western Provinces, and in considerable excess in Sind and Rajputana. The rainfall was general, except in South Madras and North-Western India.

Thursday.—The cyclonic storm from Orissa had advanced west-north-westward, and was central near Jubbulpore. Pressure was highest in Ceylon, and gradients were steep, except over North-Western India. The winds were little changed, except that the cyclonic circulation had progressed westward. The

mean temperature was still in excess in Sind and Rajputana, and in defect elsewhere. There was little rain over the whole of North-Western India, and very little over the Madras coast districts.

Friday.—Three depressions were shown over India on this day. One over Sind, a second near Neemuch, and a third over Lower Bengal. Pressure remained highest over Ceylon, and gradients were still rather steep. The wind directions were irregular in the neighbourhoods of the depressions, but were about normal elsewhere. The mean temperature remained high in Sind and Rajputana, but was low, or very low elsewhere. There had again been very little rain in Upper India and Madras, and general rain elsewhere.

Saturday.—The central depression had apparently moved westward, and coalesced with the Sind depression, while the low pressure over Bengal had hardly moved. Pressure had increased generally, more in the north than the south, and gradients were slighter. Winds were practically unchanged. Temperature had fallen fast in Sind and Rajputana, and the mean was below the normal almost everywhere. There was again little or no rain in Madras and Upper India (except the hills), and moderate scattered rain elsewhere.

Temperature.—There have been very strong contrasts of temperature in different parts of the country during the past week. These contrasts were, on the whole, most marked over North-Western India, though they were shown over North-Eastern India also. On the 18th the mean temperature at Rawalpindi was twelve degrees below, and that at Kurrachee eight degrees above the normal, on the 19th the abnormals were — 7·4° at Agra and + 4·5° at Ajmere, on the 20th + 7·0° at Silchar and — 4·8° at Burdwan, on the 21st + 8·4° at Hyderabad (Sind) and — 7·8° at Neemuch, &c. These large local variations of temperature were due to variations in the amount of rainfall. The mean temperature of the whole of India was below the average on each day of the week, the abnormal deficiency ranging from only 0·5° on the 19th to 2·1° on the 21st. The following table shows the variations of the mean temperature from the normal in the different provinces of India for each day of the week:

Province.	June 1895.							Mean variation of week.
	16th	17th	18th	19th	20th	21st	22nd	
	°	°	°	°	°	°	°	°
Burma	+2·4	+2·1	+1·0	—0·6	—2·2	—0·3	+0·1	+0·4
Bengal and Assam	+0·2	+0·5	+0·2	+1·1	—1·0	—1·2	—0·8	—0·1
North-Western Provinces and Oudh	—5·9	—6·6	—4·4	—4·9	—3·2	—3·9	—4·3	—4·7
Punjab	—4·5	—4·1	—7·4	—2·2	+0·2	—0·1	+0·5	—2·5
Bombay	—1·2	—1·1	+0·1	—0·5	—3·3	—3·4	—1·7	—1·6
Central Provinces and Berar	—2·2	—1·6	—0·3	—1·4	—3·3	—7·4	—4·9	—3·0
Central India and Gujarat	—2·8	—1·4	—1·0	+1·5	+0·5	—4·2	—5·6	—1·9
Sind and Rajputana	0	+1·1	+4·8	+4·4	+4·3	+4·0	—0·7	+2·6
Madras	+2·1	+1·3	+0·9	—1·8	—5·3	—2·4	+0·4	—0·7
Mean for whole of India	—1·3	—1·1	—0·7	—0·5	—1·5	—2·1	—1·9	—1·3

The provincial variations show that the mean temperature was about normal in Burma, Bengal, and Madras, in moderate excess in Sind and Rajputana, and in defect in all other provinces. The deficiency was greatest in the North-Western Provinces and Central Provinces.

Rain.—During the week under review only two divisions, *viz.*, Rajputana (West) and the East Coast (South) had actually or practically no rain throughout. In all other parts of the country effective rainfall was received. Much of the rainfall was due to the cyclonic storm which passed up the West coast, and to

those storms which appeared in the Bay and Bengal, and passed westward across the country, consequently the incidence of the rainfall was irregular, some divisions receiving a large excess, while other divisions at no great distance had a deficiency, or only a trifling excess of rainfall. The average actual rainfall was heaviest in Coorg, where 21·38 inches was received; this was followed by 16·31 inches in Malabar, by 15·53 inches in the Konkan, and by 8·19 inches in Tenasserim. In normal years the rainfall of the present week is heaviest in Arakan (13·69 inches), Assam (Surma) (10·29 inches), Tenasserim (8·77 inches), and finally Malabar (7·79 inches). This difference in the distribution shows the influence of the Arabian Sea cyclone on the rainfall of the West Coast. The third column of the concluding table shows that the week's rainfall was in excess of the normal in thirty, and in defect in twenty-one of the divisions. The regions of excess included Lower and Central Burma, Deltaic Bengal, Orissa, Chota Nagpur, Bihar (South), the North-Western Provinces (East and Submontane), the Punjab (South, North-West and West), all the divisions in the west of the Peninsula, all the central divisions, Gujarat, Kathiawar and Sind, the East Coast (North and Central), and Madras (South). In all the remaining divisions the rainfall was in defect. The deficiency was large in Arakan, East Bengal, and Assam, (Surma), while the excess was large in Malabar, Coorg, the Konkan, and the Central Provinces (West).

The three concluding columns of the table show the state of the seasonal rainfall, *i.e.*, the actual and normal rainfall for the period, June 2nd to June 22nd. They exhibit a deficiency all over Burma and North-Eastern India, an irregular distribution over the east of the Peninsula, and an excess over North-Western, Western, and Central India. The relative excess is greatest in parts of the Punjab, while the deficiency is greatest in Arakan, East Bengal, and Assam.

The following are the principal large totals recorded for the week ending on the 22nd: Kyaikto (Shwegyin) 10·71 inches, Cherrapunji 6·83 inches, Contai (Howrah) 8·08 inches, Balasore 9·20 inches, Dinapur 7·08 inches, Khalilabad (Basti) 9·35 inches, Montgomery 4·43 inches, Vayitri (Calicut) 38·09 inches, Naduvatam (Nilgiris) 21·20 inches, Veerajpett (Coorg) 22·87 inches, Nagar (Mysore) 20·35 inches, Dapoli (Ratnagiri) 24·25 inches, Bawda (Kolhapur) 27·21 inches, Harda (Hoshangabad) 13·13 inches, Godhra 8·30 inches, Ashta (Bhopal) 9·39 inches, Parvatipur (Vizagapatam) 7·42 inches, Tinkasi (Tinnevelly) 4·29 inches.

W. L. DALLAS,
Asst. Meteorological Reporter to the Government of India.

SIMLA, *27th June 1895.*

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 22nd June.*—Rainfall heavy on the West Coast, good in the Circars, Coimbatore, and Nilgiris; light rain elsewhere. Cultivation and sowing are generally proceeding. The standing crops are good generally. Pasture is improving, and fodder is sufficient. The condition of cattle is generally good. Prices are rising in North and South Arcot, Tanjore, and Salem, but are stationary elsewhere.

Bombay.—*For week ending 26th June.*—Rain throughout the Presidency, but more rain is required in parts of Sholapur. The standing crops are good. Preparations for the monsoon crops are progressing in parts of twelve districts. Sowing is general, but has been retarded in parts of Poona and Dharwar owing to deficiency or excess of rain. The fodder-supply is sufficient. Agricultural stock in good condition. Prices are normal, except in parts of Ahmednagar and Sholapur.

Bengal.—*For week ending 24th June.*—Monsoon conditions prevailed all over the Province. In Burdwan, Midnapore, Cuttack, Patna, and in the Central districts there was fairly heavy rain. Agricultural prospects are favourable, but in some districts more rain is required. Jute, early rice, indigo, and sugarcane are doing well. The autumn crops and winter rice are being sown, and in some districts the transplanting of the seedlings has begun. The price of common rice continues almost stationary.

North-Western Provinces and Oudh.—*For week ending 26th June.*—Rain has been general during the week. Ploughings for and sowings of the autumn crops are progressing everywhere. The sugarcane crop is reported to have been damaged by insects in Meerut. Markets are well supplied, and fodder is sufficient. Prices show a tendency to rise in eight districts, and are fluctuating elsewhere.

Punjab.—*For week ending 26th June.*—Rain has fallen in all districts, except Sialkot and Peshawar. Weeding of the extra spring crops has commenced in Jullundur. Ploughings for the autumn crops are in progress in Delhi and Lahore. Sowings are progressing in Hissar, Umballa, and Rawal Pindi, and have been finished in Mooltan. Rain is wanted for the sowings in Hissar, Sialkot, Shahpur, and Lahore. The spring crops have almost been harvested in Mooltan, and cleaned in Rawal Pindi. The autumn prospects are average in Rawal Pindi. The condition of the standing crops are good in Peshawar. The condition of the extra spring crops in Dera Ismail Khan and of the autumn crops in Amritsar is good. The crops are also promising in Sialkot. Cattle are generally in good condition, and fodder is sufficient in all districts, except in parts of Dera Ismail Khan. Prices are rising in Peshawar, approaching normal in Sialkot, and low elsewhere.

Central Provinces.—*For week ending 26th June.*—There was rain in general, Wardha registering the heaviest fall of upwards of eleven inches, and Nagpur more than nine inches; in Jubbulpore and Hoshangabad also the rainfall was over seven and eight inches respectively. Sowings of rice have commenced everywhere, and are in full swing in Chhattisgarh. Cotton sowings also have begun, though in Wardha continuous rain has somewhat retarded the operations. Prices continue steady.

Burma.—*For week ending 22nd June.*—In Lower Burma ploughing for the main paddy crop is in progress in all the chief districts, except Prome and Tharrawaddy. Sowing has commenced in some parts of Bassein. Nurseries

are being planted in Thongwa and Amherst. In Upper Burma reaping of the dry-weather paddy is completed in all districts, except Minbu. Cultivation of the early wet-weather paddy and of miscellaneous unirrigated crops is progressing everywhere. Ploughing for the main wet-weather paddy crop is in progress in Mandalay, Katha, Ruby Mines, Lower Chindwin, Thayetmyo, Minbu, Magwe, Kyaukse, and Meiktila. In Amherst the nursery plants have been slightly damaged by insects. In part of Mandalay and Bhamo the dry-weather paddy crop has been much damaged by floods. In one township of the Sagaing district the early sesamum crop has been damaged by heavy rain, and in another township the cotton and sesamum plants have been slightly damaged by insects. Elsewhere the crop prospects are good. The price of paddy has risen slightly in Thayetmyo, fallen largely in Katha, considerably in Rangoon, and slightly in Bassein; elsewhere prices are stationary.

Assam.—*For week ending 25th June.*—Weather hot. Sowing of late rice seedlings continues. Ploughing for the late rice has commenced. Fodder and water are sufficient.

Mysore and Coorg.—*For week ending 26th June.*—MYSORE: Rainfall good in the Mysore, Hassan, Kadur, and Shimoga districts, slight rain in parts of Bangalore, Kolar, and Chitaldroog. The standing crops and prospects are good. Prices have fallen in three districts.

COORG: Rainfall heavy. Ploughing of land for the rice crop continues. Sowing of *ragi* (*Eleusine coracana*) has been completed. Water and fodder for cattle are sufficient. Prices are normal.

Berar and Hyderabad.—*For week ending 26th June.*—BERAR: Weather warm and cloudy with seasonable rainfall during the week. Ploughing of fields continues. Sowing operations are in progress. Fodder is insufficient in parts of the Wun district. The water-supply is adequate. Prices have risen in two districts, but have fallen in one, and are stationary elsewhere.

HYDERABAD: Rainfall good. Sowing of the autumn crops has commenced in some districts, and the land is being prepared for the crop in others. The water-supply is sufficient. Prices are normal.

Central India.—*For week ending 26th June.*—Rain fell throughout Central India during the week. Agricultural operations are in progress in all Agencies. Cattle are in indifferent condition in Gwalior. Pasturage is good, and sufficient in all Agencies, except in Gwalior. Prices of food-grains are high in Bhopal and Goona, rising in one district of Gwalior and in Baghelkhand, but are normal elsewhere.

Rajputana.—*For week ending 26th June.*—Rainfall general; heavy in Kherwara and Pertabgarh, good elsewhere, except in Marwar and Deoli where there were showers. Preparation of land for the monsoon crops continues. Sowings have commenced in parts. The crops, prospects, and agricultural stock are generally good. Fodder is sufficient. Prices are rising in three States, stationary in one, and steady elsewhere.

Kashmir.—*For week ending 25th June.*—KASHMIR VALLEY: Slight rain has fallen. The weather is now fine. Reaping of barley and oil-seeds is in progress. Prices continue normal.

JAMMU PROVINCE.—*For week ending 26th June.*—Rainfall heavy. Sowings of the autumn crops continue. Prices are stationary.

Nepal.—*For week ending 22nd June.*—Weather showery. Planting of upland paddy has commenced.

DENZIL IBBETSON,

Offg. Secretary to the Government of India.

(*a*) Includes the Bhopal-Itársi railway.
(*b*) Includes the Godhra-Rutlam railway.
(*c*) Total earnings from 2nd April to 16th June 1894.
(*d*) Includes the Guntakal-Mysore frontier section.
(*e*) Includes the Tirhoot state railway. Although for convenience classed amongst state railways, the company's section of this line is the property of the Bengal and North-Western Railway Company.
(*f*) Includes the Jammu and Kashmir and the Hyderabad-Shadipalli railways.
(*g*) Although for convenience classed amongst state railways, this line is the property of the Bengal Central Railway Company.
(*h*) Includes the Wardha Coal, Dhond-Manmád, Khámgaon, and Amráoti railways.
(*i*) Total earnings from 1st to 16th June 1894.
(*j*) Includes the Mysore-Nanjangud and the Yesvantpur-Mysore frontier sections.

F. B. HEBBERT,
Under Secretary.

SIMLA, *the 27th June 1895.*

STATEMENT OF FINANCIAL STATISTICS OF STATE RAILWAYS (EXCLUDING THE EAST INDIAN RAILWAY) FOR, AND TO END OF, THE YEAR 1894.

Railways.	I	II	III	IV	V	VI						VII	VIII	IX	X				XI	XII	XIII					XIV	Railways.
						Total Capital Outlay to end of 1894.									Indirect Charges for 1894.						Indirect Charges from commencement of operations to end of 1894.						
	Length of line open to traffic on 31st December 1894.	Mean length of line open during 1894.	Length of line under construction on 31st December 1894.	Length of line under survey on 31st December 1894.	Total Capital expenditure on open lines up to 31st December 1894.	*a* On works including actual payments for land.	*b* On stores in stock.	*c* On other suspense accounts.	*d* Total of *a, b & c.*	*e* *Deduct* Receipts on Capital account.	*f* Total Capital outlay.	Traffic Earnings brought to account in 1894.	Working Expenses for 1894.	Net Receipts for 1894.	*a* Interest on Capital outlay.	*b* Abatement of land-revenue capitalized.	*c* Leave and pension allowances.	*d* Total *a, b & c.*	Net charge to the State for 1894.	Net Receipts from commencement of operations to end of 1894.	*a* Interest on Capital outlay.	*b* Abatement of land-revenue capitalized.	*c* Leave and pension allowances.	*d* Indirect establishment charges.	*e* Total of *a, b, c & d.*	Net charge to the State from commencement of operations to end of 1894.

* This line is the joint property of the British Government and the Bhopal State. The British Government has contributed Rs. 20,25,058 towards construction; the balance being found by the Bhopal State. The net earnings are divided between the British Government and Bhopal State in proportion to the capital contributed by each.

† Converted at the contract rates of exchange.

‡ Although for convenience classed among State railways, this line is the property of the Bengal Central Railway Company, Limited.

(a) Excluding portion of the old Quetta loop (98·88 miles) which is under construction on a new alignment, but including 6·13 miles (Mean Meer chord and Ferozepore cantonment to Hussainwala) used for military traffic.

(b) Excludes the mileage of the Gradient Improvements to North-Western Railway.

(c) Excludes Rs. 16,05,769 incurred on account of land for the railway while in the hands of the Company and charged to General Revenues.

(d) Excludes outlay on Bolan temporary line charged to the Military Department, amounting to Rs. 34,54,457.

(e) Excludes Rs. 15,54,171, incurred up to 31st December 1890 on account of land for the railway while the property of the Company.

(f) Excludes Rs. 7,27,797, borne by Government on account of land charges prior to 1st July 1885.

(g) Includes Rs. 48,53,830, expended by Government on the Katni-Umaria section.

(h) Includes Rs. 1,85,77,535, expended by Government on the Bellary-Kistna Railway.

(i) Working expenses include share of surplus profits paid to the Bombay, Baroda and Central India Railway Company in 1894, Rs. 15,63,148, and interest on Rolling Stock provided by the Company for the Godhra-Rutlam Railway, Rs. 58,481.

(k) Working expenses include share of surplus profits paid to the Company in 1894, Rs. 1,06,449, and additional contribution to Provident Fund, Rs. 8,697.

(l) Working expenses include share of net earnings paid to the Company in 1894, Rs. 5,57,556, and contribution to Provident Fund, Rs. 22,545.

(m) Working expenses include share of net earnings paid to the Company in 1894, Rs. 1,43,566 and contribution to Provident Fund, Rs. 5,812.

(n) Working expenses include share of net earnings paid to the Company in 1894, Rs. 79,310.

(o) Includes annuity charges.

(p) Excludes the net receipts accruing to the Mysore State to 30th June 1886, amounting to Rs. 7,33,828.

(q) Includes Rs. 2,09,06,968 net loss on South Indian Guaranteed Company up to 31st December 1890.

(r) Excludes charges affecting the Mysore State to 30th June 1886, amounting to Rs. 12,61,970.

(s) These figures appertain to the Bellary-Kistna Railway.

(t) Loss to the State under the terms of the new contract. The amount does not include interest advanced to the Company under the old contract.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the Week ending at 8 a.m. on Saturday, June 29th, 1895.

General.—The general distribution of pressure has been remarkably constant during the week under review. From the first to the last day pressure has been high over Malabar, Ceylon, and the south of the Bay, while it has been low over the Indus Valley on the one side, and over South-West Bengal and the head of the Bay on the other. The relation between these areas of low pressure and the area of high pressure has undergone change from day to day, so that, while on the 23rd the barometric difference between Colombo and Chaibassa was 0·416 inch, on the 29th the difference between the same pair of stations was 0·619 inch, but the positions of the low areas with regard to the high area have altered very little. In consequence the wind directions have been characterised by great steadiness. They have been cyclonic around the depression in the north-east, westerly across the Peninsula and the central parts of the country, south-easterly up the north side of the Gangetic plain, and south-westerly across the Sind and Kathiawar Coasts. The rainfall of the week, though, on the whole, fairly general, has yet been mainly confined to the West Coast districts, North-Eastern India, and the hill and submontane portions of the North-Western Provinces and the Punjab. The rain has, however, been sufficiently heavy, and sufficiently general to have a marked influence on the temperature, which over the greater part of the country has been considerably below the average.

Daily Summary.—*Sunday.*—Pressure had risen over Western, and fallen over Eastern India, the respective changes being at a maximum in Kathiawar and Orissa. Pressure was highest in Malabar and Ceylon; low in the Indus Valley and in South-West Bengal. In the former region there was a large irregular area of low pressure; in the latter a small and well defined depression. The winds were westerly across the Peninsula and the central parts of the country, cyclonic around the depression, and variable in the Gangetic plain. Rain had been more or less general, except over North-Western India, Upper Burma, and Madras, where there had been little or none. In the neighbourhood of the depression the falls varied between 1½ and 2½ inches.

Monday.—The barometer was falling everywhere, more particularly in the north-west. The depression over South-West Bengal had spread out, and covered more space than on the 23rd, but was no deeper, while, on the contrary, the low pressure area in the north-west was much more pronounced. The winds were little changed. The rainfall was nowhere very heavy, but it was fairly general over the centre and south of India.

Tuesday.—On the 25th the barometric changes were very irregular. The most marked change was a rapid rise over the submontane districts of the Punjab. Pressure had hardly changed at all in South-West Bengal, where the storm still existed. Readings ranged from 29·899 inches at Travancore to 29·486 inches

at Chaibassa, and 29·373 inches at Dera Ismail Khan. The winds were still generally unchanged, though the south-easterly current up the north side of the Gangetic plain was more marked, and extended further north-westward than on the preceding days. Rain had been fairly general, except in West Bengal, the adjoining part of the North-Western Provinces, the west of the Punjab and Sind and Rajputana. The amounts were heavier than of late, particularly in the central and north-western districts.

Wednesday.—A very slight barometric rise was reported from Western India, but over the greater part of the country the barometer was falling. The fall was greatest over the north-east of the Bay. The depression over South-West Bengal had apparently moved very irregularly, and was central over the north-west of the Bay. In other respects the distribution was unchanged. The winds were not much changed, but the cyclonic circulation around the depression was more extensive than on the 25th. Rain was again fairly general, except over West Bengal, the South Punjab, Sind, Rajputana, and Madras. In Oudh and the submontane and hill districts of the Punjab the amounts were fairly large.

Thursday.—The barometer had fallen almost everywhere. The decrease was greatest within the depression area, and was rapid at False Point. The depression had hence become much deeper, and gradients were very steep over the Bay. In other parts of the country there was little change. The wind was strong over the Peninsula and the south and centre of the Bay, but was still only moderate in the depression area. The region of scanty rainfall was increasing, and included Upper Burma, West Bengal, West Punjab, the Deccan, Gujarat, Central India, Sind, Rajputana, and Madras. Elsewhere rain was general, and at some central and north-western stations was moderately heavy.

Friday.—A further rapid barometric fall over South-West Bengal, and the head of the Bay had occasioned a further increase in the depth of the cyclonic storm in the north-west angle of the Bay, and gradients were very steep over the Bay. At Saugor Island pressure was 0·30 inch below the normal. Elsewhere the changes were unimportant. The winds in the storm area had become somewhat stronger, and strong monsoon winds continued to blow over the Peninsula and the south and centre of the Bay. Rain was general, except in the Peninsula, Sind, and Rajputana, where it was light and scattered, or altogether wanting. In the centre and north-west and also near the storm the falls were heavy.

Saturday.—The barometric changes in the storm area were large, a rapid rise having occurred in Lower Bengal, and a rapid fall in West Bengal. The storm had moved north-westward, and was central near Chaibassa. Elsewhere the changes were unimportant. Strong cyclonic winds and gales prevail around the depression, and strong monsoon winds over the Peninsula, the central parts of the country, and the south of the Bay. In the Punjab and Kashmir the wind was northerly. The rainfall was heavy in the neighbourhood of the depression, and fairly general over the whole of North-Eastern India, the North-Western Provinces, and the east of the Central Provinces, but elsewhere the fall was scattered and light. The amounts were largest in Orissa and the east of the Central Provinces.

Temperature.—On the 23rd the area of greatest depression of temperature was shown over Orissa; thence it travelled on the 24th to the south of the

Central Provinces, on the 25th to the centre of the Central Provinces, on the 26th to the North-Western Provinces, and on the 27th to the Punjab, on the 28th a fresh area of low temperature began to appear over Orissa, and on the 29th this area was becoming strongly marked. The returns showed, as was the case last week, very strong contrasts of temperature between neighbouring places. The following table shows the variations of the mean temperature from the normal in the different provinces of India for each day of the week:

Province.	June 1895.							Mean variation of week.

Mean for whole of India	—0·7	—0·7	—1·4	—2·1	—0·7	—1·0	—0·9	—1·1

The mean temperature of the whole country was below the normal on each day of the week—most so on the 26th, when the general deficiency amounted to 2°. The provincial variations show that the mean temperature of the week was about normal in Burma, Bengal, Assam, Bombay, and Madras, and slightly above the normal in Sind and Rajputana, but elsewhere the mean temperature was in defect—by 2·7° in the Punjab, Central India, and Gujarat, by 3·3° in the North-Western Provinces, and by 3·6° in the Central Provinces. In the Punjab there was a fall of 10·6° between the 24th and 26th, and from the 26th onward to the close of the week the mean temperature was in large defect.

Rain.—The daily distribution of rainfall was given in the earlier portions of the summary. The concluding table shows the average total rainfall of the week for the different divisions. Two divisions, *viz.*, Madras (South) and Rajputana (West) had absolutely no rain during the week, and the East Coast (South) had practically none, but in all the remaining divisions effective rainfall was received. The distribution was irregular, and the variations in the amount of the rainfall in the different divisions were large. Thus in Tenasserim the average actual rainfall was 17·00 inches; this was followed by 10·81 inches in Akyab, by 10·06 inches in the Central Provinces (East), by 8·13 inches in the hill districts of the Punjab, and by 7·99 inches in Orissa, while, as shown above, the lightest rainfall was reported from the western desert and from the south of the Peninsula. Comparing these falls with the distribution of the normal rainfall of the divisions, important differences are shown. Ordinarily the heaviest rainfall is 9·53 inches in Arakan; this is followed by 8·92 inches in the Konkan, by 8·88 inches in Tenasserim, and by 8·12 inches in Assam (Surma). Roughly speaking, these

differences indicate a strong monsoon over the Burma Peninsula, a weak monsoon over the west of the Peninsula, and heavy local rainfall over Orissa, the east of the Central Provinces and the North-Western Himalayas. The third column of the table shows the differences between the actual and normal rainfall of the week. This column shows an excess of rain in Burma, in Orissa, in Chota Nagpur, in Oudh, in the North-Western Provinces (Central, West, and Submontane), in all the Punjab divisions, in all the Central Provinces divisions, and in the East Coast (North), and a deficiency in all the remaining divisions, the numbers being twenty-three divisions with greater or less excess, and twenty-seven with greater or less deficiency. The largest actual excess is 8·12 inches in Tenasserim; the largest actual deficiency is 5·92 inches in Assam (Surma).

The three concluding columns of the table show the condition of the rainfall since the commencement of the south-west monsoon period. For the four weeks, June 2nd to 29th, the rainfall is deficient in Central Burma, Arakan, both the Assam divisions, all the Bengal divisions, both the Bihar divisions, Berar, Central India (West) and Rajputana, the East Coast (South) and Madras (South). In all the remaining divisions the rainfall has been normal or in excess of the normal. The greatest excess relatively to the average is in the north-west and west of the Punjab, and the greatest deficiency in the adjoining division of Rajputana (West). In Bengal and Assam the actual seasonal rainfall has been about half the normal.

The following are the principal large totals recorded during the week ending on the 29th: Thaton (Amherst) 22·35 inches, Rathedaung (Akyab) 18·95 inches, Darjeeling 9·36 inches, Kendrapara (Cuttack) 20·45 inches, Bettiah (Motihari) 6·30 inches, Sidhouli (Sitapur) 14·63 inches, Momana (Meerut) 13·61 inches, Jansath (Muzaffarnagar) 12·20 inches, Umballa 8·72 inches, Palampur (Kangra) 13·63 inches, Hasdrung (South Kanara) 11·87 inches, Kumpta (North Kanara) 11·47 inches, Bawda (Kolhapur) 9·48 inches, Sakoli (Bhandara) 13·79 inches, Burgurh (Sambalpur) 18·66 inches, Sutna 11·01 inches.

The lightness of the monsoon rainfall in North-East India is well shown by the returns from Cherrapunji. At this well known station the ordinary total rainfall for the week, June 23rd to 29th, is 26·41 inches, while for the same days of the present year it is only 2·15 inches.

SIMLA, *4th July 1895.*

W. L. DALLAS,
Asst. Meteorological Reporter to the Government of India.

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 29th June.*—Rainfall good on the West Coast, Nilgiris, and parts of the Circars; light and scattered showers elsewhere, except in the South where there was no rain. Cultivation is proceeding generally, but sowings are retarded in many districts. The standing crops are generally fair but require rain, especially in the Carnatic, Central and Southern districts. Pasture is improving, and fodder is sufficient. The condition of cattle is generally good. Prices have risen slightly, except in the Carnatic and Circars.

Bombay.—*For week ending 3rd July.*—Rain throughout the Presidency, generally slight. More rain is required in parts of three districts. The standing crops are good. Preparations for the monsoon crops are progressing in parts of eight districts. Sowing is general, but is retarded in parts of six districts for want of rain. Transplantation has commenced in parts of Thana. The fodder-supply is sufficient. Agricultural stock in good condition. Prices are normal, except in parts of Ahmednagar and Sholapur.

Bengal.—*For week ending 1st July.*—The feature of the week was the unusually heavy rain in Orissa, and generally speaking the absence of heavy rain elsewhere. More rain is much wanted, especially in parts of Bihar and North Bengal, though the crops in the ground have not as yet suffered, and the cultivation of the autumn crops and winter rice continues. In Cuttack the lands sown with rice are submerged in places, and rice is being harvested in Rangpur and Dacca. Cattle are in good condition, except in Dinajpur. The price of common rice continues steady.

North-Western Provinces and Oudh.—*For week ending 3rd July.*—Good and general rain during the week, heavy in the Meerut division and Rohilkhand. Damage by flooding is reported from the Meerut district. Agricultural operations are in rapid progress. Sugarcane is flourishing. Supplies and fodder are sufficient. Prices are rising in three districts; elsewhere prices are generally stationary.

Punjab.—*For week ending 3rd July.*—Rain has fallen in all districts, except Peshawar. The autumn sowings are in progress in Hissar, Umballa, Jullundur, and Rawal Pindi generally; sowings have also commenced in Delhi, and are in progress in two tahsils of Dera Ismail Khan, but have been finished in Mooltan, except for cotton and sesamum. More rain is wanted for sowings in Hissar. Sugarcane and cotton prospects are good in Jullundur, and the autumn prospects are average in Rawal Pindi. The condition of the autumn crops in Amritsar and Shahpur and of the standing crops in Peshawar are good, and the crops are flourishing in Sialkot. Rain has improved the extra spring crops in Dera Ismail Khan. Cattle are generally in good condition, and fodder is sufficient throughout the Province. Prices are rising in Peshawar, normal in Umballa, and low elsewhere.

Central Provinces.—*For week ending 3rd July.*—Heavy rain has fallen in Chhattisgarh; Sambalpur registers upwards of nine inches and Bilaspur over ten; Damoh and Jubbulpore received over six and seven inches respectively; about two inches have fallen in Saugor and the Satpura districts, and three inches in the Lower Nerbudda Valley, but in Nimar there has been very little. In the Nagpur country there appears to have been a break which is reported to be opportune for cotton sowings which are being pushed on. Sowings of rice are in progress, though the excessive rain has slightly retarded them in Chhattisgarh. Prices are stationary.

Burma.—*For week ending 29th June.*—In Lower Burma ploughing for the main paddy crop is in progress in all districts, except in Tharrawaddy. In Upper Burma cultivation of the wet-weather paddy crop is in progress everywhere. Transplanting has commenced in Katha, Ruby Mines, and Minbu. Slight damage has been caused by heavy rain to the early sesamum crop in Myothe and Sagaing, and by insects in Taungdwingyi and Magwe. In the Lower Chindwin cotton and sesamum have been slightly damaged by insects. In Minbu the paddy and maize plants have been partially destroyed by rust. Elsewhere crop prospects are good. The price of paddy has fallen slightly in Rangoon and Bassein, and considerably in Kyaukse, while it has risen considerably in Upper Chindwin and Pakokku, and slightly in Sagaing and Lower Chindwin; elsewhere prices are stationary.

Assam.—*For week ending 2nd July.*—Weather hot. Sowing of late rice seedlings and ploughing for the late rice continue. Prospects of tea are unfavourable in Cachar. The condition of cattle is fair. Fodder and water are sufficient.

Mysore and Coorg.—*For week ending 3rd July.*—MYSORE: Good rain in four districts; slight elsewhere. The standing crops are in good condition, and prospects are fair. Prices have slightly fallen in three districts, and risen in one.

COORG: Rainfall good. Ploughing of rice continues. Prospects of coffee and cardamom are fair. Water and fodder for cattle are sufficient. Prices are normal.

Berar and Hyderabad.—*For week ending 3rd July.*—BERAR: Weather hot and cloudy. The cotton plants have sprung up in parts of three districts and are thriving well. Sowings are in progress. The water-supply is sufficient. Fodder is insufficient in the Wun district. Prices are almost steady.

HYDERABAD: Rainfall moderate. The autumn sowings which had commenced have ceased for want of rain. The water-supply is sufficient. Prices continue normal.

Central India.—*For week ending 3rd July.*—Rain fell throughout Central India during the week, and, except in Western Malwa, the fall seems sufficient generally. Agricultural operations are in progress in all Agencies. Cattle are in indifferent condition in Gwalior and Bundelkhand. Pasture is good and sufficient in all Agencies, except in Gwalior. Prices of food-grains are high in Bhopal and Goona, rising in Baghelkhand and one district of Gwalior; normal elsewhere.

Rajputana.—*For week ending 3rd July.*—Rainfall good in Kherwara, Jhallawar, Jeypore, Dholepore, Bhurtpore, Ulwar, and Bikanir, and slight rain elsewhere, except in Sirohi, Marwar, Kotah, and Tonk where there was no rain. Ploughing and sowing are in progress. Crops, prospects, and agricultural stock are good. Pasturage or fodder is generally sufficient. Prices are rising in three States, but are steady elsewhere.

Kashmir.—*For week ending 1st July.*—KASHMIR VALLEY: Rain has fallen. The weather is now fine. The wheat crops are ripening. Reaping of barley and oilseeds is in progress. Prices continue normal.

JAMMU PROVINCE.—*For week ending 3rd July.*—Rainfall good. Autumn ploughings are in progress. Prices are normal.

Nepal.—*For week ending 29th June.*—Weather seasonable with daily showers. Lowland and upland rice is being rapidly transplanted.

DENZIL IBBETSON,

Offg. Secretary to the Government of India.

Director General of Statistics.

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

C

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

ACCOUNT.
RAILWAY.

Grants for construction expenditure on Railway and Irrigation Works during 1895-96.

No. 303-A. R., dated Simla, the 26th June, 1895.

RESOLUTION—By the Government of India, Public Works Department.

Read again the following papers:

Financial Statement for 1895-96, published in the *Gazette of India* of 21st March 1895.

Telegram from the Secretary of State, dated 19th March 1895.

READ also—

Telegram from the Secretary of State, dated 1st May 1895.

RESOLUTION.—In the Financial Statement for 1895-96, the following grants were recited as having been provided—

	Rs.
"48—State Railways Construction"	3,70,00,000
"49—Irrigation Construction"	70,00,000
Total	4,40,00,000

2. Subsequent to the issue of the financial statement and in accordance with the Secretary of State's telegram, dated 19th March 1895, an additional grant of Rs. 50,00,000 was made.

3. The grants referred to above, provided a sum of Rs. 50,00,000 only, for Capital Expenditure on the Assam-Bengal Railway during 1895-96. The requirements for this line for the current official year are estimated to amount to Rs. 2,09,58,000. The funds available to meet this anticipated expenditure are:

	Rs.
Estimated balance of Company's Capital, £30,000 =	5,50,000
Debentures to be raised by Company, £500,000 =	91,67,000
Grant allotted for 1895-96	50,00,000
Total	1,47,17,000

thus leaving a balance of Rs. 62,41,000 still to be provided, and in accordance with the Secretary of State's telegram of 1st May 1895, a further grant to this extent is now allotted, so far as it may be required for the Company's operations.

4. In the forecast of Capital Expenditure on State Railways and Irrigation works, approved by the Secretary of State, a sum of Rs. 75,00,000 was appropriated for outlay on irrigation projects during 1895-96, but, owing to the restriction of the grant placed at the disposal of the Public Works Department, a reduction of the allotment to Rs. 70,00,000 was rendered necessary.

In view, however, of the additional grant of Rs. 50,00,000 sanctioned in Secretary of State's telegram of the 19th March 1895, it has been found possible to restore the Rs. 5,00,000 temporarily withdrawn. The grant for "49—Irrigation Construction" therefore now stands at Rs. 75,00,000.

5. The total grants under "48" and "49" for 1895-96 are therefore as under—

	Rs.
"48—State Railways Construction"	4,77,41,000
"49—Irrigation Construction"	75,00,000
Total	5,52,41,000

and are at present distributed as follows:

FINANCE AND COMMERCE DEPARTMENT
(Statistical Branch)
Calcutta, 10th July 1895.

J. F. FINLAY,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the Week ending at 8 a.m. on Saturday, July 6th, 1895.

During the past week the weather has undergone a sudden and striking change. At the close of last week a deepish cyclonic storm was proceeding from the Bay north-westward into Upper India. It was occasioning steep gradients and a strong monsoon throughout the greater part of the country, and the rainfall over a large part of India was general and fairly heavy. This storm reached the west of the North-Western Provinces on Wednesday, July 1st, and there it broke up, giving very heavy rain to the Meerut and Roorkee divisions and to the Kumaon Himalayas. Immediately on the disappearance of this storm a large change occurred. The barometer rose generally—rapidly over parts of Northern India,—gradients decreased, the wind shifted to north-west on the West Coast, and rain ceased almost everywhere. On the 3rd a few showers were reported from the West Coast, Lower Burma, and Northern India, while a very large proportion of the country had received no rain whatever. As the week progressed the rainfall became more general over the Peninsula, as well as over Burma, Assam, and Bengal, but over a large part of India the break in the rains continued. As one result of this change of weather there occurred a marked rise of temperature during the week. The greatest change was between the 2nd and 3rd, when the general temperature of the whole country rose suddenly nearly 2°, and when, as mentioned above, the rainfall suddenly ceased over the greater part of the country.

Daily Summary.—*Sunday.*—The cyclonic storm which at the close of the previous week had been central near Chaibassa had advanced north-westward, and the centre lay between Allahabad and Benares. Pressure had consequently decreased rapidly in the east of the North-Western Provinces, while it had increased even more rapidly over Orissa and South-West Bengal. A strong monsoon was blowing over the greater part of the country, but in Upper India calms and variable breezes prevailed. Rain had fallen fairly generally over North-Eastern India, the Gangetic plain, and along the foot of the Himalayas, but in the Peninsula the fall had been confined to the West Coast and in Central and North-Western India (away from the hills) to a few scattered showers.

Monday.—The cyclonic storm had continued to progress north-westward, and was central between Lucknow and Cawnpore. Pressure had increased very rapidly over the east of the North-Western Provinces, while elsewhere the changes were generally moderate. The cyclonic storm was filling up quickly. The winds were irregularly cyclonic around the depression, but blew from the normal monsoon directions elsewhere. There had been a good deal of rain over the Gangetic plain—heaviest on the north-western quadrant of the depression,—but the fall in Bengal had ceased, and elsewhere the amount and distribution of rain was much the same as on the 30th June.

Tuesday.—The cyclonic storm had broken up, apparently among the Kumaon Himalayas, and pressure had risen rapidly over the west of the North-Western Provinces, Rajputana, and Gujarat, and slightly over nearly the whole of India. Readings were highest in the extreme south, and lowest over the Punjab, but the

relative distribution was irregular, owing to the large excess of pressure which was developing over the north of the Bombay Presidency. South-easterly winds prevailed over a considerable part of the Punjab, but they had disappeared from other parts of Northern India, and abnormal westerly and north-westerly winds prevailed over a large part of the country. There had been a good deal of rain over the North-Western Provinces, particularly in the west, but elsewhere any rainfall was light and scattered, and over a large part of the country none whatever was recorded.

Wednesday.—Pressure had decreased briskly over Bengal, but elsewhere the baric changes were slight. The changes were, however, all directed to intensifying the abnormal conditions noticed on the preceding day, and pressure exhibited a still greater excess over the north of Bombay than on the 2nd. The wind had shifted to north-north-west along the west coast of the Peninsula, and abnormal westerly and west-north-westerly winds were reported elsewhere. The rainfall had been moderate and general over Lower Burma, but in all other parts of the country only scattered showers generally of small amount were received.

Thursday.—Pressure had increased in Burma; decreased elsewhere. The changes were nowhere very important, and the abnormal conditions of considerable excess over the north of the Bombay Presidency continued. Winds were westerly to north-westerly over the Peninsula and the central parts of the country. Elsewhere the directions were very variable, and calms prevailed over the Gangetic plain. Light moderately general rain was reported from Burma and Bengal, and scattered showers from the Peninsula and the Central Provinces, but elsewhere the weather was dry.

Friday.—Pressure had decreased in the west and increased in the east, but the changes were small, and the distribution was practically unchanged. Readings were highest in Ceylon, and lowest in the West Punjab, but pressure was abnormally high over Central India. Winds were again more northerly than usual over the Peninsula, and were south-westerly and westerly instead of south-easterly and easterly over the Gangetic plain, but the abnormal features of the wind direction were less pronounced than on the 4th. Rain had again been fairly general over Lower Burma and Bengal; light scattered showers were reported from the Peninsula and the Central Provinces, while elsewhere there was practically no rain.

Saturday.—Pressure had increased briskly around the head of the Bay, but had not changed much elsewhere. The general distribution was unchanged, but a small centre of depression had appeared over Central Bengal. The wind had backed over the Peninsula, and the general directions were westerly and south-westerly over the Peninsula, Central India, and South-West Bengal, southerly and south-south-easterly over Burma and East Bengal, easterly in North Bengal, westerly in the Gangetic plain, and southerly in the Punjab. Rain continued to fall fairly generally over Lower Burma, Assam, and Bengal, and as scattered showers over the Peninsula, the Central Provinces, and along the line of the Himalayas.

Temperature.—The changes of temperature have as usual agreed closely with the changes in the rainfall. During the passage of the cyclonic storm northwestward up the Gangetic plain, the heaviest rainfall was shown close to the central area of depression, and the temperature chart exhibited an area of abnormally low temperature at Sutna on June 30th, at Jhansi on July 1st, at Meerut on July 2nd, and at Roorkee on July 3rd. While the rainfall which

accompanied the passage of this cyclonic storm continued, the general temperature of India was in defect of the normal as is shown by the following table, which gives the variations of the mean temperature from the normal in the different provinces of India for each day of the week:

Province.	June 1895.	July 1895.						Mean variation of week.
	30th	1st	2nd	3rd	4th	5th	6th	
	°	°	°	°	°	°	°	°
Burma	+1·0	+1·0	+2·2	+2·0	+0·2	+2·2	+3·0	+1·7
Bengal and Assam	—1·4	—0·4	+1·2	+2·4	+2·4	—0·2	—0·4	+0·5
North-Western Provinces and Oudh	—4·2	—7·9	—7·2	—2·2	+2·2	+2·7	+2·9	—2·0
Punjab	—9·6	—6·5	—3·7	+0·6	+3·3	+4·3	+3·9	—1·1
Bombay	+2·0	+1·8	+1·5	+2·8	+2·4	+2·1	+1·0	+1·9
Central Provinces and Berar	—0·3	—1·5	+2·8	+4·5	+4·1	+3·5	+3·3	+2·3
Central India and Gujarat	—1·6	—0·4	—0·6	+1·4	+2·2	+2·0	+2·0	+0·7
Sind and Rajputana	—0·1	+0·1	+1·3	+2·0	+2·4	+2·2	+2·7	+1·5
Madras	+1·6	+2·5	+3·7	+4·3	+4·5	+1·6	—0·7	+2·5
Mean for whole of India	—1·4	—1·3	+0·1	+2·0	+2·6	+2·3	+2·0	+0·9

The above shows that on the first two days the mean temperature was low. On July 2nd it was normal and on July 3rd it rose above the normal, and so continued until the close of the week. The provincial variations show that in the Punjab and North-Western Provinces, where the rainfall, as the cyclonic storm was advancing, was heavy, the mean temperature of the whole week was low, but these were the only instances, the temperature in all the other provinces being excessive. The variations of temperature were very large in Upper India during the week; thus the mean temperature of the Punjab on the 30th June was 9·6° below, and on the 5th July 4·3° above, the normal. During the whole of the latter part of the week the maxima or day temperatures were very excessive over Central and North-Western India.

Rainfall.—The concluding table of the summary shows the rainfall received during the week, etc. In one division, *viz.*, Rajputana (West), there was no rainfall during the week, and in four more, *viz.*, the Punjab (West), Kathiawar, Sind, and Madras (South), the average actual rainfall of each division was less than 0·10 inch, so that in these divisions also the rainfall for the week was practically *nil*, but in all other parts of the country effective rainfall was received. The amount of this effective rainfall varied from 11·87 inches in Tenasserim and 10·95 inches in Malabar to 0·13 inch in the Punjab (North-West) and Berar. Hence the general distribution of the rainfall was fairly normal and regular, the amount decreasing from a maximum in the south-west of the Peninsula and in the south of the Burmese Peninsula to a minimum in the extreme north-west of India, though the lightness in Berar was abnormal. The normal distribution of rainfall for the week, given in the second column, exhibits a decrease in the amount of rain from 11 inches in Tenasserim, Arakan, and the Konkan to 0·33 inch in the west of the Punjab and to 0·19 inch in South Madras, so that, though the general features of the actual and normal fall are similar, it is evident that considerable local variations exist. These variations are shown in the third

column of the table. In the first place, the figures show a general lightness of the rainfall, for whereas there are only eleven divisions which exhibit an excess of rain for the week, there are no less than forty which exhibit a defect. The divisions which have received more than the normal fall are Tenasserim, East Bengal, Chota Nagpur, Oudh (South), the North-Western Provinces (West), Madras (South-Central), the East Coast (North), and the East Coast (South) with an excess of less than 1 inch, the North-Western Provinces (Central and Submontane) with an excess of over 2 inches, and Malabar with an excess of over 3 inches. The cases of large defect are Arakan, Assam (Surma), North Bengal, Coorg, the Konkan, Berar, the Central Provinces, and Gujarat, but, relatively to the normal, some of the divisions with smaller rainfall exhibited much larger deficiencies,—for instance, the deficiency in Arakan was as much as 5·06 inches, and that in the Konkan was 7·44 inches, yet the former division had more than half its proper fall, and the latter nearly one-third, while Kathiawar received only 0·09 inch instead of its normal 1·98 inches, and hence had only one-twenty-second of the average amount. One of the most marked regions of deficient rainfall was that comprising the Central Provinces, the west of Central India, Gujarat, and Kathiawar, which it will be remembered was the region occupied by the area of abnormally excessive pressure during the greater part of the week.

The returns of the sudder stations show that in Burma, Assam, and Bengal rain fell almost daily; in the North-Western Provinces the rainfall more or less ceased after the 2nd; in the Punjab, except on the hills, where showers occurred almost daily, there was a little rain on June 30th and July 1st, and none thereafter; in Malabar, Coorg, and along the West Coast generally rain fell on most days; over the central parts of the Peninsula and the central parts of India there were light showers throughout the week, but no general rainfall, though, on the whole, June 30th and July 1st were the days of most general rain; in the east of the Peninsula there were scattered light showers, but no general rain.

The three concluding columns of the table exhibit the state of the seasonal rainfall. From the 2nd of June to date the monsoon rains have been in excess over Orissa, the North West Provinces (Central, West, and Submontane), the Punjab (South, Submontane, and Hill districts, North-West, and West), Madras (South-Central), and the Central Provinces (East); they have been normal over Tenasserim, Lower and Central Burma, Chota Nagpur, the North-Western Provinces (East), Oudh (North and South), the Punjab (Central), Malabar, Coorg, Mysore, the Deccan, Khandesh, the Central Provinces (West and Central), Central India (East), the East Coast (North), Madras (Central), and the East Coast (Central), and they have been in defect elsewhere. Briefly, the principal deficiency has been over Bengal and Assam, over Bombay (North), and over Rajputana.

The following are the principal large total falls during the week ending July 6th: Moulmein 12·43 inches, Rathedaung (Akyab) 9·25 inches, Cox's Bazar (Chittagong) 9·27 inches, Cherrapunji 18·07 inches, Kurseong 11·13 inches, Motihari 10·92 inches, Nakur (Saharanpur) 12·94 inches, Jagadhri (Umballa) 5·83 inches, Pantval (Mangalore) 24·02 inches, Bhatkal (Karwar) 9·53 inches, Bawda (Kolhapur) 9·22 inches.

PROVINCE.	DIVISION.	Rainfall data for week ending July 6th, 1895.			Rainfall data from June 2nd to July 6th, 1895.		
		Average actual rainfall of division.	Average normal rainfall of division.	Excess or defect in inches.	Average actual rainfall of season to date.	Average normal rainfall, June 2nd to July 6th.	Excess or defect of (seasonal) rainfall expressed as a percentage.

SIMLA, *11th July 1895.*

W. L. DALLAS,
Asst. Meteorological Reporter to the Government of India.

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 6th July.*—Rainfall very heavy on the West Coast and Nilgiris, and generally good or moderate elsewhere, except in the extreme south where only scattered showers have fallen. Irrigation supplies in the large rivers are adequate. Cultivation is proceeding generally, though retarded by want of rain, especially in the extreme south. The standing crops are generally fair, but need rain, especially in the Carnatic, Central and Southern districts. Pasture is improving, and fodder is sufficient. The condition of cattle is generally good. Prices have risen slightly in a few districts, but are generally steady. The recent rainfall will improve prospects.

Bombay.—*For week ending 10th July.*—Rain throughout the Presidency, but generally slight. More rain is required in parts of Gujarat, the Deccan, and Kathiawar, and urgently in Ahmednagar and Sholapur. The standing crops are good. Preparations for the monsoon crops are progressing in parts of seven districts. Sowings continue in parts of seventeen districts, but are retarded in parts of seven for want of rain. Transplantation has commenced in parts of Kolaba and Ratnagiri, but is retarded in parts of Thana for want of rain. The fodder supply is sufficient, but water is deficient in parts of Shikarpur and the Upper Sind frontier. Agricultural stock are in good condition. Prices are normal, except in parts of Ahmednagar and Sholapur.

Bengal.—*For week ending 8th July.*—There was rain in all districts during the week, but more rain is wanted in parts. The condition of the standing crops is reported good. The transplanting of the winter rice seedlings has commenced in several districts, and in the Patna division the sowing of the autumn crops is in progress. The jute crop is beginning to be cut in the north of the Rajshahi division, but unless heavy rain falls soon there will not be water enough for steeping. In Cuttack the floods are said to have done some damage on low lands. The price of common rice is almost stationary.

North-Western Provinces and Oudh.—*For week ending 10th July.*—Moderate rain has been general during the week, except in three districts where the fall has been slight. Crops on low lying lands in Meerut have been damaged by flooding. More rain is needed in Benares, Cawnpore, and Agra. The autumn crops are germinating well, and weeding has commenced in places. Sugarcane and indigo are doing well. Markets are well supplied, and fodder is sufficient. Prices are fluctuating with a tendency to rise in five districts.

Punjab.—*For week ending 10th July.*—Slight rain has fallen in seven districts. The autumn sowings have commenced in Delhi, in progress in Umballa, Jullundur, Sialkot, Lahore, and Rawal Pindi, and have been finished in Multan, except millet and cotton. The autumn ploughing has commenced in Ferozepore. Rain is wanted in Lahore and Shahpur. Sugarcane and cotton prospects are good in Jullundur. The condition of the autumn crops in Amritsar, Rawal Pindi, and Shahpur, of the extra spring crops in Dera Ismail Khan, and of the standing crops in Peshawar are good. The existing crops are promising in Sialkot, but the young autumn crops are withering in Hissar for want of rain. Cattle are generally in good condition, and fodder is sufficient throughout the Province. Prices are rising in Umballa, below normal in Sialkot, and continue low elsewhere, except that of wheat in Shahpur.

Central Provinces.—*For week ending 10th July.*—The weather has been cloudy and warm. Rain has fallen irregularly: Nagpur received about 2½ inches, and Seoni a little below 2 inches, but the fall was very light in the Narbudda Valley, and there was no rain in Hoshangabad and Saugor. In the Chhattisgarh division Sambalpur had nearly 3 inches, but Raipur and Bilaspur had but little. Autumn sowings continue. Prices are almost stationary.

Burma.—*For week ending 6th July.*—In Lower Burma ploughing and sowing for the main paddy crop is now in progress in all districts. Ploughing on high lands in Akyab is being retarded for want of rain. In Amherst the nursery plants are slightly damaged by insects. In Upper Burma cultivation of early wet-weather paddy and ploughing for wet-weather paddy are in progress in all districts. In the Ava township of the Sagaing district the standing crops are withering for want of rain. In the Salingyi township of Lower Chindwin cotton and sesamum have been damaged by insects. The sesamum plants have also been slightly damaged by heavy rain in one township in Minbu, and in Magwe by insects. In parts of Yamethin the standing crops are very poor. In the Myingyan sub-division the cotton and sesamum plants are withering for want of rain. Elsewhere the crop prospects are good. The price of paddy has risen considerably in Mandalay and Kyaukse, fallen considerably in Thongwa, Amherst, and Upper Chindwin, and slightly in Rangoon, Bassein, and Sagaing; elsewhere prices are stationary.

Assam.—*For week ending 9th July.*—Weather rainy. Sowing of late rice seedlings and ploughing for the late rice continue. Fodder and water are sufficient.

Mysore and Coorg.—*For week ending 10th July.*—MYSORE: Good rain in parts of all districts, excepting Mysore and Chitaldroog; slight rain elsewhere. The standing crops and prospects are good. Prices have fallen in two districts, and risen in two others.

COORG: Rainfall moderate. Ploughing of rice and weeding of *ragi* (*Eleusine coracana*) fields continue. Prospects of coffee and cardamom are fair. Water and fodder for cattle are sufficient. Prices are normal.

Berar and Hyderabad.—*For week ending 10th July.*—BERAR: Weather warm with moderate rainfall during the week. The cotton plants are in poor condition through want of rain. The land is still being prepared for the rain crop. Sowings are retarded on account of the scanty rainfall. Fodder is reported insufficient in the Wun district. The water-supply is adequate. Prices are almost stationary.

HYDERABAD:—Rainfall moderate. Sowings of the autumn crops have been suspended in many taluks owing to want of rain. The water-supply is sufficient, except in Gulburga. Prices are normal.

Central India.—*For week ending 10th July.*—Slight rain fell in four Agencies during the week. More rain is wanted in Gwalior and Goona. Agricultural operations are in progress everywhere. Cattle are still in indifferent condition in Gwalior, but are in good condition in the other Agencies. Pasturage is generally good and sufficient. Prices of food-grains are high in Bhopal and Goona, rising in three districts of Gwalior and in Baghelkhand, but normal elsewhere.

Rajputana.—*For week ending 10th July.*—Rainfall fair in Haraoti, Dholepur, and Bikaneer, slight in Abu, Kotah, Ajmere, Kerowli, Bhurtpore, and Ulwar; no rain elsewhere. More rain is needed throughout Rajputana. Agricultural operations are generally satisfactory. The crops have failed to germinate over a considerable area in Ajmere for want of rain. Agricultural stock is generally in good condition. Pasturage or fodder is generally sufficient. Prices have risen in six States, and fallen in one, but are steady elsewhere.

Kashmir.—*For week ending 9th July.*—KASHMIR VALLEY: Rainfall moderate. Weather now fine. Water is ample for irrigation. Prices are normal.

JAMMU PROVINCE.—*For week ending 10th July.*—Rainfall general. Sowings for the autumn crop are in progress. Fodder is sufficient. Cattle are in good condition. Prices are stationary.

Nepal.—*For week ending 6th July.*—More rain is badly needed. Transplanting of rice is still in progress.

DENZIL IBBETSON,

Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.
PUBLIC WORKS DEPARTMENT.
RAILWAY STATISTICS.

STATEMENT OF APPROXIMATE GROSS EARNINGS OF INDIAN RAILWAYS FROM 1ST JANUARY TO 30TH JUNE 1894, AND FROM 1ST JANUARY TO 30TH JUNE 1895.

N.B.—As regards the figures in column *Total Earnings from 1st January 1895*, audited figures have been used as far as possible.

RAILWAY.	Average earnings per mile per week during the 1st-half of 1894.	Week ending 30th June 1894. Mean mileage worked.	Earnings. Total.	Per mile open per week.	Last 8 days of June 1895. Mean mileage worked.	Earnings. Total.	Per mile open.	Earnings from 1st January to 30th June 1894.	Earnings from 1st January to 30th June 1895.	Increase.	Decrease.

(*a*) Includes the Bhopal-Itársi railway.
(*b*) Includes the Godhra-Rutlam railway.
(*c*) Earnings for seven days ending 29th June 1895.
(*d*) Total earnings from 1st April to 29th June 1895.
(*e*) Total earnings from 2nd April to 30th June 1894.
(*f*) Includes the Guntakal-Mysore frontier section.
(*g*) Includes the Tirhoot state railway. Although for convenience classed amongst state railways, the company's section of this line is the property of the Bengal and North-Western Railway Company.
(*h*) Includes the Jammu and Kashmir and the Hyderabad-Shadipalli railways.
(*i*) Although for convenience classed amongst state railways, this line is the property of the Bengal Central Railway Company.
(*j*) Includes the Wardha Coal, Dhond-Manmád, Khámgaon, and Amráoti railways.
(*k*) Total earnings from 1st to 30th June 1894.
(*l*) Includes the Mysore-Nanjangud and the Yesvantpur-Mysore frontier sections.

F. B. HEBBERT,
Under Secretary.

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the Week ending at 8 a.m. on Saturday, July 13th, 1895.

The most marked characteristic of the weather changes during the past week has been the steady decrease in the amount of the barometric gradient between Southern and Northern India. The pressure difference between Ceylon and the Punjab at the middle of the monsoon period is ordinarily 0·40 inch to 0·45 inch, and the strength and extent of the monsoon currents vary directly as this difference increases or diminishes. In the present week the barometric difference was less than the normal throughout. On the 7th it amounted to 0·38 inch, on the 10th to 0·27 inch, and on the 13th to 0·18 inch only, so that not only was the difference low at the commencement, but the amount of the difference steadily diminished as the week progressed, and at the close was less than half the normal. Accompanying this decrease there has been a steady falling off in the monsoon current and the resulting rainfall, so that by the close of the week there was nothing more than moderate rainfall anywhere, and over a large part of North-Western and Central India no rain at all. In addition to the above mentioned change, an interesting feature in the weather has been the appearance of a slight cyclonic storm over the Arabian Sea off the Bombay, Kathiawar, and Sind Coasts on the 12th and 13th. The development of this storm, which commenced apparently on the 10th, occasioned a backing of the wind to south-south-east and south along the West Coast. This backing was accompanied with heavy rain all along the west coast of India, but with the wind at south there could be no considerable extension of rainfall inland, and the returns show that heavy rain was confined wholly to the coast districts. Although the rainfall has been generally so light—more especially over Upper and Central India—

the occurrence of rain has never wholly ceased, scattered showers having fallen over the regions where the rain was most deficient. These showers have had a marked effect upon the temperature, which, though of course abnormally high, has yet been less excessive than might have been expected.

Daily Summary.—*Sunday.*—The chart showed that pressure was increasing slightly to briskly over North-Eastern India and the north of the Punjab, but was decreasing elsewhere. The general distribution was fairly normal, though the pressure difference between Ceylon and the Punjab was less than usual. Calms and variable breezes prevailed in the Gangetic plain, and winds of the normal direction elsewhere. The mean temperature was in general excess. General rain had fallen over Burma, Assam, and Bengal, as well as along the coasts of the Peninsula and the line of the Himalayas.

Monday.—The barometric increase noticed in the north of the Punjab on the 7th had continued briskly and extended to Oudh, but elsewhere the pressure changes were generally slight. Readings were highest in Tenasserim and lowest in the West Punjab, but pressure was largely above the normal over Northern India, and gradients were slighter than usual. Southerly breezes had suddenly appeared on the North Konkan Coast, and an east-north-east wind at Diamond Island, while variable breezes continued over the Gangetic plain. Elsewhere the winds blew from the normal monsoon directions. The mean temperature exceeded the normal, except in Bengal and Madras. Rain was more general than on the 7th, but the extension had taken place principally in the south; Upper and Central India having still no general rain. The amounts were heavyish in parts of Bengal, Assam, and the West Coast.

Tuesday.—Pressure had again risen slightly to briskly over the Punjab and Upper Sind, but elsewhere the movement was generally downward. Readings were highest in Ceylon; lowest within a narrow band stretching from Sind across the south of the Punjab into the Gangetic plain. Abnormal northerly breezes had appeared over parts of Kashmir and of the Punjab. Elsewhere the wind directions were the same as on the preceding day. Temperature varied very largely from the normal in different parts of the country. There was a large excess over the central divisions and Burma, and a considerable defect in Northern India and Madras. Rain had been general in Lower Burma, Bengal, and Assam, and moderately general in parts of Upper India. Elsewhere scattered rainfall only was reported.

Wednesday.—Pressure had changed irregularly, but had generally risen in Northern and fallen in Southern India. Readings were highest in Malabar and lowest in Sind; but pressure was largely above the normal average in Northern India, and gradients were much less than usual. Winds were westerly over the centre and east of the Peninsula, between south and east over Burma and Bengal, and variable elsewhere. On the Konkan Coast southerly winds had appeared. Mean temperature was largely below the normal average over the Punjab, but was normal or excessive elsewhere. Heavy rain had fallen over North Bengal and along the west coast of India, and there had been a good deal of scattered rainfall in other parts of the country except Madras.

Thursday.—Pressure had increased slightly to briskly over the extreme north-west of India and over the Gangetic plain, but had changed by small amounts elsewhere. Readings were highest in Ceylon; lowest in Sind. Moderate gradients prevailed over the Peninsula, but all over Northern and Central India pressure was very uniform. The winds were unaltered. The most noticeable features were the light variable winds over Northern and Central India, and the southerly and south-south-easterly winds on the Konkan Coast. The mean temperature remained excessive over the central parts of the country and in Burma. Heavy rain had continued along the West Coast, but elsewhere nothing more than showery weather was reported.

Friday.—Pressure had decreased at some western stations and increased elsewhere, the rise having been brisk in parts of North-Western India. A slight depression had appeared over Kathiawar and the north-east of the Arabian Sea, but there was no other important change in the distribution. The winds

varied very much, and the force was unusually light. The mean temperature was excessive, except in the Punjab and Bombay. Rain had again been heavy along the West Coast, but elsewhere at most only showery weather had been experienced, and over considerable tracts of country no rain whatever had fallen.

Saturday.—Pressure had risen briskly to rapidly over the western half of the Peninsula, but had changed by small amounts elsewhere. The depression off the Kathiawar Coast was still shown. Pressure was highest in Ceylon and lowest in Kathiawar, but all over Northern and Central India readings were very uniform. The mean temperature was excessive almost everywhere. Scattered showers had occurred over a large part of the country, but in the centre and north-west hardly any rainfall had occurred.

Temperature.—The scattered nature of the rainfall produced large and sudden changes of temperature. This is particularly noticeable in North-Western India and Madras. Thus in the Punjab the mean temperature was 2·9° in excess of the average on the 7th, and 6·5° in defect on the 11th; in Rajputana it was 0·7° in defect on the 11th, and 3·5° in excess on the 13th; and in Madras it was 1·0° in excess on the 7th, and 3·1° in defect on the 8th. The following table gives the variations of the mean temperature from the normal in the different provinces of India for each day of the week:

Province.	July 1895.							Mean variation of week.
	7th	8th	9th	10th	11th	12th	13th	
	°	°	°	°	°	°	°	°
Burma	+3·0	+2·9	+3·0	+2·3	+2·4	+2·8	+2·1	+2·6
Bengal and Assam	—0·6	—1·1	—1·0	—0·6	—0·2	+0·6	+1·4	—0·2
North-Western Provinces and Oudh	+1·8	+2·6	+2·6	+3·2	+0·8	+1·1	+0·7	+1·8
Punjab	+2·9	+1·5	—2·9	—5·4	—6·5	—3·2	—0·7	—2·0
Bombay	+1·3	+0·3	—0·8	—0·2	—0·7	—1·1	—0·1	—0·2
Central Provinces and Berar	+3·9	+4·7	+4·6	+3·9	+3·0	+3·2	+3·9	+3·9
Central India and Gujarat	+2·2	+2·7	+3·0	+4·0	+3·3	+1·2	+3·7	+2·6
Sind and Rajputana	+2·0	+2·2	+2·8	+1·2	—0·7	+1·9	+3·5	+1·8
Madras	+1·0	—3·1	—1·6	+1·0	—1·2	—0·3	—0·2	—0·6
Mean for whole of India	+1·9	+1·4	+1·1	+1·0	0	+0·7	+1·6	+1·1

The above shows that the mean temperature of the whole country was exactly normal on the 11th, and was slightly above the normal on all the remaining days. The variations of temperature in different parts of India on the same day were as large as were the variations in the same part of India on different days; hence the variations from the normal in some instances give but a poor idea of the temperature experienced. In Burma and the central parts of India the temperature was steadily excessive, but in other parts of the area the temperature was unsteady, and the mean for the week generally lower than usual.

Rainfall.—The general conditions of the week's rainfall have been described in the earlier portions of the summary. The concluding table shows the actual results of the week and the general state of the seasonal rainfall.

During the week under review two divisions, *viz.*, Rajputana (West) and Madras (South) received absolutely no rain throughout, while a third division, *viz.*, Sind received a total fall of 0·03 inch only. In all other parts of India effective rainfall was received, the average actual rainfall per division ranging from 17·99 inches in Assam (Surma) and 17·92 inches in North Bengal to 0·29 inch in the North-Western Provinces (West) and to 0·46 inch in the East Coast (South). The second column of the table, which shows the average normal distribution of rainfall for the week under review, shows that, under ordinary conditions, the

rainfall varies from 11·41 inches in Tenasserim, 11·14 inches in the Konkan, and 10·88 inches in Arakan to 0·40 inch in Sind and 0·23 inch in Madras (South). This comparison of the actual with the normal distribution of the average rainfall shows that the fall for the week has been very irregular, the excessive rainfall in Assam and North Bengal being very exceptional, as also is the lightness of the rainfall in Burma and the Konkan.

The third column of the table shows that the principal characteristic of the past week's rainfall has been its almost general lightness. Only seven divisions, *viz.*, Assam (Surma and Brahmaputra), Bengal (Central and North), Bihar (North), Khandesh and the East Coast (Central) have received excessive rainfall, while all the remaining forty-four divisions have had less than the average amount. Assam had nearly three, North Bengal nearly four times, and North Bihar over twice the normal fall for the week, but in the case of the remaining three divisions the abnormal excess was small. The largest absolute deficiency is reported from Burma, where Tenasserim has had nearly 10 inches and Arakan nearly 9 inches less than the average, but in parts of the Peninsula and of the central parts of India the absolute deficiency is also large, amounting to 5½ inches in Coorg to over 3 inches in the East Coast (North), the Central Provinces (East), and Lower Burma, and to over 2 inches in the North-Western Provinces (East and Submontane), the Konkan, Berar, and the Central Provinces (Central).

The three columns which exhibit the state of the seasonal rainfall show that in general and up to date the monsoon rainfall has been deficient. The exceptions are found in the following divisions: Orissa, the North-Western Provinces (Central, West, and Submontane), the Punjab (North-West and West), the Central Provinces (East), and the East Coast (North). In the case of the East Coast (North), Orissa, and the Central Provinces (East) the excess in the seasonal rainfall is attributable to heavy cyclonic rainfall which occurred during the progress of two cyclonic storms, the paths of which lay over these divisions, while in the case of the excess over the North-Western Provinces and of the Punjab the rainfall is in part due to the heavy rain which accompanied the breaking up of these two storms and in part to the early setting in of the rains over Upper India.

The final column of the table shows that the rainfall has been about normal in the following divisions: Burma (Tenasserim, Lower Burma, Central Burma), Assam (Brahmaputra), North Bengal, Chota Nagpur, North Bihar, Oudh (South and North), Punjab (South, Central, Submontane, Hill districts), Malabar, Madras (South-Central), Coorg, Mysore, the Deccan, Khandesh, the Central Provinces (West and Central), Madras (Central), and the East Coast (Central).

In all the remaining divisions the rainfall has been more or less in defect.

The returns of the sudder stations show that over North-Eastern India and the south-west of the Peninsula the rainfall was spread over the whole week, while in all other parts of the country the fall occurred in scattered and occasional showers.

The returns of heavy total falls of rain during the week, July 7th to 13th, show that almost all the considerable amounts were received in the north-east. The sudder station of Magok received 12·47 inches, Netrokona (Mymensingh) 8·83 inches, Sunamgunj (Sylhet) 26·38 inches, Cherrapunji (Khasia Hills) 55·78 inches, Dhubri 26·84 inches, Cooch Behar 35·45 inches, Julpaiguri 40·65 inches, Kishengunj (Purnea) 15·96 inches, Hosdrug (Mangalore) 17·26 inches, Karwar 20·68 inches.

PROVINCE.	DIVISION.	Rainfall data for week ending July 13th, 1895.			Rainfall data from June 2nd to July 13th, 1895.		
		Average actual rainfall of division.	Average normal rainfall of division.	Excess or defect in inches.	Average actual rainfall of season to date.	Average normal rainfall, June 2nd to July 13th.	Excess or defect of (seasonal) rainfall expressed as a percentage.

SIMLA, *18th July 1895.*

W. L. DALLAS,
Asst. Meteorological Reporter to the Government of India.

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 13th July.*—Rainfall heavy on the West Coast, good in the Circars and parts of the Deccan and Carnatic; light to moderate elsewhere. Cultivation is proceeding generally, though somewhat retarded by want of rain in parts of the Central and Southern districts. The standing crops are generally fair, but require more rain in parts. Pasture is improving, and fodder is sufficient. The condition of cattle is generally good. Prices are slightly easier in parts of the Deccan and Central districts, but are getting dearer in the Southern districts.

Bombay.—*For week ending 17th July.*—Rain throughout the Presidency, moderate in the Konkan and parts of Gujarat, Deccan, and Karnatak; slight elsewhere. More rain is required in all districts of the Deccan and in parts of Gujarat, Thana, Belgaum, and Dharwar. Agricultural operations are progressing generally, but sowing in parts of four, and transplantation in parts of two, districts are retarded for want of moisture. The river is low in Sind and water is deficient in parts. Fodder is sufficient, and agricultural stock in good condition. Prices are normal, except in parts of Ahmednagar and Sholapur.

Bengal.—*For week ending 15th July.*—The week was characterised generally by fine weather and an absence of rain, but in North Bengal and in Champaran the rainfall was abundant, and in other districts of Bihar and in Bhagalpur and Purneah there were fairly heavy showers. In Rangpur the very heavy downpour is reported to have caused floods in places. Early rice and jute are generally reported good, but the cultivation of winter rice is retarded in many districts for want of rain. In the Patna division the sowing of the autumn crops and paddy is in progress, and millet is being transplanted. The price of common rice continues almost stationary.

North-Western Provinces and Oudh.—*For week ending 17th July.*—Light rain has been general during the week in all districts, but more rain is urgently needed in most districts. Weeding continues, and prospects are generally favourable, provided good rain falls soon. The condition of sugarcane and indigo is good. Supplies and fodder are sufficient, but prices show a rising tendency.

Punjab.—*For week ending 17th July.*—Rain has fallen in all districts, except Umballa and Peshawar. More rain is wanted in Hissar, Lahore, and Sialkot. Autumn sowings are in progress in Delhi and Rawal Pindi, and also sowings and ploughings in Lahore. Rain is wanted, especially for the rice crops in Umballa, and also for cotton, sugarcane, and maize sowings in Jullundur. Land is being prepared for the autumn sowings in Dera Ismail Khan. The condition of the autumn crops is good in Amritsar, Multan, Shahpur, Dera Ismail Khan, and Peshawar, but the crops are withering in Hissar. Cattle are generally in good condition, and fodder is sufficient in all districts, except in parts of Lahore. Prices are rising in Umballa, normal in Hissar, and low elsewhere.

Central Provinces.—*For week ending 17th July.*—The weather continues cloudy and warm, and the rainfall has been irregular. As in last week, Nagpur received upwards of 4 inches, and the fall ranges from 2 to 4 inches in the north, but is wanting in the Lower Nerbudda Valley and Satpura districts. In the Chhattishgarh division also there was no rain. In Sambalpur the autumn sowings are in progress, but rice planting is somewhat retarded for want of rain. In Seoni and Hoshangabad too the crops are suffering owing to insufficient rain. Prices continue stationary.

Burma.—*For week ending 13th July.*—In Lower Burma cultivation of the main paddy crop is progressing. Ploughing on high lands in Akyab and

Tounghoo is retarded for want of rain, and transplanting in Thongwa, Amherst, and Tavoy from the same cause. In Amherst the standing crops have been partially destroyed by insects. In Upper Burma more rain is wanted for wet-weather paddy cultivation in Shwebo, Minbu, and the Southern Shan States. The standing crops in the Ava subdivision of Sagaing are withering for want of rain, and in Meiktila the paddy nurseries have withered from drought, and the sesamum plants in parts, but the damage hitherto is slight. The cotton and sesamum plants are withering in Myingyan. Elsewhere crop prospects are good or fair. The price of paddy has risen considerably in Upper Chindwin and Myingyan, slightly in Bassein, Sagaing, and Lower Chindwin, and fallen slightly in Rangoon, Thongwa, and Pakokku.

Assam.—*For week ending 16th July.*—Weather rainy. Sowing of late rice seedlings and ploughing for late rice are progressing. Tea is doing well. The condition of cattle is fair. Fodder is scarce in Kamrup, but is sufficient elsewhere. Water is sufficient.

Mysore and Coorg.—*For week ending 17th July.*—MYSORE: Good rain in parts of Bangalore, Tumkur, Kolar, and Kadur, and slight rain elsewhere. The standing crops and prospects are good. Sowing operations are in progress in parts. Prices have fallen in Hassan and Shimoga, and risen slightly in Chitaldroog.

COORG: Rainfall good. Ploughing of rice fields continues. Prospects of the *ragi* (*Eleusine coracana*), coffee, and cardamom crops are fair. Water and fodder for cattle are abundant. Prices are normal.

Berar and Hyderabad.—*For week ending 17th July.*—BERAR: Weather warm and cloudy with favourable rainfall during the week. The cotton plants are thriving well in most parts of the Province. Ploughing of fields continues. Sowings are in progress, and weeding has commenced. Fodder is insufficient in the Wun district. The water-supply is adequate. Prices are nearly stationary.

HYDERABAD:—Rainfall moderate. The water-supply is sufficient everywhere, except in the Gulburga division. Sowing of the autumn crops has just begun, but more rain is badly wanted. Prices are normal.

Central India.—*For week ending 17th July.*—Rain fell in all Agencies during the week, except in Baghelkhand. More rain is very badly wanted for the standing crops in Gwalior and Bhopawar. Agricultural operations are in progress everywhere. The condition of agricultural stock and pasturage is good in all Agencies. Prices of food-grains are high in Bhopal and Goona, rising in parts of Gwalior and in Bhopawar; normal elsewhere.

Rajputana.—*For week ending 17th July.*—Rainfall good in eight stations, but slight in Kherwara, Pertabgarh, Kerowli, Bhurtpore, Ulwar, Bikanir, and Tonk. No rain in Marwar. More rain is still wanted. Agricultural operations are satisfactory. Agricultural stock generally in good condition. The crops have germinated in parts, and prospects are good. Pasturage or fodder is generally sufficient. Prices are rising in seven States, stationary in one, have fallen in one, but are steady elsewhere.

Kashmir.—*For week ending 16th July.*—KASHMIR VALLEY: Rainfall moderate. The weather is now fine. Reaping of the wheat crop is nearly completed. Prices continue normal.

JAMMU PROVINCE.—*For week ending 17th July.*—Rainfall slight. Autumn sowings are in progress. Cattle in good condition. Prices are stationary.

Nepal.—*For week ending 13th July.*—Weather rainy but seasonable. Transplanting of rice is nearly finished.

DENZIL IBBETSON,

Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

ACCOUNT.
RAILWAY.

GUARANTEED RAILWAYS.

Synopsis of transactions for, and to the end of, the year 1894.

No. 328-A. R., dated Simla, the 10th July, 1895.

RESOLUTION—By the Government of India, Public Works Department.

Read again—

Public Works Department Resolution No. 501 A. R., dated 21st August 1894.

Read also the following—

Note by R. G. Macdonald, Esq., Accountant General, Public Works Department, No. 439 R., dated 18th June 1895.

I beg to lay before the Government of India the usual synopsis of transactions of the three Railway Companies still designated as Guaranteed Railways for, and to end of, the year 1894.

2. The subscribed Capital on 31st December 1894 of these Railway Companies bears interest as shown below:

Railway.	Capital bearing interest at							Premium on stock.	Discount on stock.	Total Capital raised
	3%	3½%	3¾%	4%	4½%	4¾%	5%			
	£	£	£	£	£	£	£	£	£	£
Madras	337,800	462,200	...	...	500,000	999,950	8,757,694	12,014	...	11,069,644
Bombay, Baroda and Central India	300,000	1,238,500	...	...	...	...	7,550,300	18,419	...	9,107,219
Great Indian Peninsula ...	300,000	1,866,100	804,800	2,701,450	...	...	21,000,000	250,074	225,891	25,730,533
(1) Total to end of 1894 ...	937,800	3,566,800	804,800	2,701,450	500,000	999,950	36,307,970	320,507	225,891	45,913,396
(2) Ditto ditto 1893 ...	637,800	3,566,800	804,800	2,701,450	500,000	999,950	36,307,970	320,507	225,891	45,613,396
(3) Ditto ditto 1892 ...	238,200	3,566,800	944,800	2,701,450	500,000	999,950	36,307,970	320,507	225,891	45,353,796
(4) Ditto ditto 1891 ...	...	3,565,800	1,083,000	2,701,450	500,000	999,950	36,307,970	320,507	225,891	45,253,796
(5) Ditto ditto 1890 ...	...	1,250,000	1,871,500	2,701,450	500,000	999,950	36,307,970	334,507	230,891	44,725,496
(1) Compared with (2) Increase	300,000	...	...	...	...	...	...	...	...	300,000
(1) Compared with (2) Decrease	...	...	...	...	...	...	...	...	...	...

3. The following table shows the growth of the Capital account of the Guaranteed Railways during the last five years, the net increase to the aggregate subscribed Capital during that period being £1,259,600.

Total Capital Subscribed. Year.	Amount.	Increase.	Decrease.	Remarks.
	£	£	£	
To end of 1890	44,725,496	71,700	...	
,, 1891	45,253,796	528,300	...	
,, 1892	45,353,796	100,000	...	
,, 1893	45,613,396	259,600	...	
,, 1894	45,913,396	300,000	...	
		1,259,600	...	
Net increase ...	...	1,259,600		

Capital outlay.

4. The aggregate outlay charged off to "Construction" stood at the end of each of the last five years as follows:

	£	Increase. £
To end of 1890	43,715,546	242,938
,, 1891	44,015,818	300,272
,, 1892	44,188,000	172,182
,, 1893	44,394,765	206,765
,, 1894	44,605,625	210,860
Increase in five years		1,133,017

5. The expenditure charged to "Construction" during and to end of the year, gives the following as the cost of open lines per mile:

Railway.	Construction Expenditure per open mile.		Remarks.
	During 1894.	To end of 1894.	
	Rs.	Rs.	
Madras	304·30	1,40,298·54	
Bombay, Baroda and Central India	2,842·28	2,16,717·61	
Great Indian Peninsula	619·90	2,12,734·28	
Average outlay per mile open	896·82	1,89,715·44	

The cost expressed in rupees is, as regards payments in England, at the contract rates of exchange, which for many years have been higher than the actual rates, and consequently the cost is understated by the difference between the contract rate of exchange and the actual rate prevailing.

Capital locked up in stores.

6. The subjoined table shows the fluctuations in the value of stores in stock during the past five years. The figures in antique type represent increases of stock:

Railway.	Reduction in Stock.					Total reduction in five years.
	1890.	1891.	1892.	1893.	1894.	
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Madras	9,68,360	56,105	60,783	94,080	3,881	7,53,511
Bombay, Baroda and Central India	18,918	3,25,769	3,73,517	2,39,793	8,35,484	5,84,727
Great Indian Peninsula ...	10,85,351	16,41,878	11,25,422	7,46,049	10,44,501	13,83,497
Total ...	20,72,629	20,23,752	15,59,722	10,79,922	18,76,054	12,14,713

7. The increase in the stores balances on the Bombay, Baroda and Central India Railway is stated to be due to permanent-way materials received during the year under review for doubling the line, to heavy purchases of coal and to large shipments of bridgework, boilers and roofing which were in transit on 31st December 1894. The increase on the Great Indian Peninsula Railway is attributed principally to large purchases of coal to replenish depleted stock and partly to importation of vacuum brake gear, ironwork for open highsided wagons and gas apparatus which remained unissued at the close of the year.

8. On 31st December 1894 the value of the stores in stock on Guaranteed Railways compared with the limits provisionally assigned for Capital to be locked up in stores was as follows:

Railway.	Limit assigned.	Stock in hand.	Difference.
	Rs. Lakhs.	Rs. Lakhs.	Rs. Lakhs.
Madras	22½	28½	5¾
Bombay, Baroda and Central India	21½	28¾	7¼
Great Indian Peninsula	63	55½	—7½
TOTAL ...	107	112½	5½

Revenue Account.

9. The gross earnings, working expenses and net earnings of the three Guaranteed Railways during the last five years have been as under:

Year.	Gross earnings.	Working expenses.	Net earnings.
	Rs.	Rs.	Rs.
1890	6,05,91,746	2,94,21,830	3,11,69,916
1891	6,87,37,790	3,31,02,310	3,56,35,480
1892	6,45,34,775	3,11,40,766	3,33,94,009
1893	6,44,14,823	3,06,56,630	3,37,58,193
1894	6,25,43,792	3,04,89,810	3,20,53,982

10. For the year 1894 the net earnings amounted to ... Rs. 3,20,53,982

Deduct—

	Rs.	Rs.
Interest on overdrawn capital	42,097	
Moiety of surplus profits to shareholders ...	57,76,044	
Contributions to provident fund	2,28,084	
Amount payable by the Great Indian Peninsula Railway Company on account of rent of leased lines ...	5,50,478	
Irrecoverable outstanding earnings written off ...	13,797	
		66,10,500
Net receipts by Government		2,54,43,482

11. The results of the working of the Guaranteed Railways for the year 1894, based on the contract rates of exchange, is shown in the following table, as also the percentage of interest and net profits on the Capital received. The figures in antique represent gain:

Railway.	Net receipts after deducting from net earnings payments on account of moiety of Surplus Profits and contribution to the Provident Fund and interest on overdrawn Capital, etc.	Guaranteed interest at contract rates.	Loss to State. Amount.	Loss to State. Per open mile.	Loss to State. Per cent. of guaranteed interest.	Per cent. of interest paid on total Capital received.	Per cent. of Net Earnings realised during 1894 on Capital received.
	Rs.	Rs.	Rs.	Rs.			
Madras	49,47,863	58,14,950	8,67,087	1,033·21	*Loss.* 14·91	4·81	4·10
Bombay, Baroda and Central India	72,93,164	45,57,450	27,35,714	6,234·82	*Gain.* 60·02	4·59	7·34
Great Indian Peninsula ...	1,32,02,455	1,31,54,992	47,463	36·88	·36	4·68	4·70
Total 1894 ...	2,54,43,482	2,35,27,392	19,16,090	747·03	8·14	4·70	5·08
1893 ...	2,75,54,175	2,35,29,464	40,24,711	1,569·23	17·10	4·73	5·54
1892 ...	2,70,15,863	2,34,38,575	35,77,288	1,394·77	15·26	4·74	5·46
1891 ...	2,80,40,977	2,31,23,122	49,17,855	1,916·31	21·27	4·63	5·68

Printed and published for the GOVERNMENT OF INDIA *at the* GOVERNMENT CENTRAL PRINTING OFFICE, *Simla.*

SUPPLEMENT TO

The Gazette of India.

No. 30.] CALCUTTA, SATURDAY, JULY 27, 1895.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

RESOLUTION.

In Home Department Circular of the 2nd February 1895, it was observed that the practice of the Government of India had hitherto been to provide first class passages by railway as well as by steamer for persons selected to hold Gilchrist and Government scholarships tenable in England, but that the Governor General in Council inclined to the opinion that the provision of first class fares in these cases was quite unnecessary. Before making a change, however, the opinion of Local Governments and Administrations was asked in the matter.

2. It is reported that scholars returning from England have frequently asked for the grant of a second class passage and of the difference in money between the cost of first and second class fares, and the authorities consulted are unanimously in favour of the reduction proposed. It has accordingly been decided that the practice of providing first class accommodation by railway and steamship for Gilchrist and Government scholars shall be discontinued. It is, therefore, notified that in future second class accommodation only by railway in India and on the sea voyage to London will be allowed to persons selected to hold Gilchrist or Government scholarships tenable in England.

ORDER.—Ordered, that a copy of this Resolution be forwarded to all Local Governments and Administrations for information and communication to the authorities of the * and to $\frac{\text{other the}}{\text{Educational}}$ authorities in the $\frac{\text{Madras Presidency}}{\&c.}$; also to the Registrar of the Calcutta University for information.

* Madras University.
Bombay University.
Allahabad University.
Punjab University.

Ordered also, that the Resolution be published in the Supplement to the *Gazette of India*.

(True Extract.)

J. P. HEWETT,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the Week ending at 8 a.m. on Saturday, July 20th, 1895.

During the week under review there has occurred a marked change in the distribution of pressure over the Indian region and a considerable change in the general weather. At first barometric pressure, though highest in Southern and lowest in Northern India, exhibited very slight differences as compared with those normally experienced at this season, but on the 15th pressure gave way rapidly over the Punjab, Upper Sind, and Baluchistan, and the pressure difference between Ceylon and the west of the Punjab rose to nearly half an inch, which is approximately the normal difference of the monsoon period. This change to more normal conditions was emphasised on the 17th by the appearance of a small cyclonic storm off the Ganjam and Orissa Coasts. This storm subsequently travelled north-westward, and on Saturday, the 20th, when the storm lay over Chota Nagpur, both the pressure distribution and the wind circulation were fairly normal. This steady change from abnormal towards normal conditions has been accompanied with a fairly steady increase of rainfall and decrease of temperature. On the first two days of the week there was no rain whatever over a large part of North-Western India, and very little elsewhere, except on the West Coast and in Assam, while the mean temperature was 2½ in excess: on the 16th scattered showers were reported in the north-west, and rain was a little more general elsewhere, while the mean temperature had fallen ½°: on the 17th showery weather continued, and the influence of the showers was more marked, so that the mean temperature was normal, and this condition of showery weather and of normal temperature lasted until the close of the week.

Daily Summary.—*Sunday.*—Pressure had decreased generally, the fall having been rapid in parts of North-Western India. The pressure difference between Ceylon and Malabar and the Punjab amounted to 0·31 inch. The winds were unsteady and variable along the west coast of the Peninsula, and calms and variable breezes prevailed along the line of the Himalayas. Elsewhere the directions were fairly normal, but the force was unusually low. There had been little or no rain in Lower Bengal, Upper India (west of Cawnpur), North Bombay, Central India, Rajputana, and South Madras. Elsewhere the rainfall, though moderate, had been general.

Monday.—The barometer had been steady at some central and southern stations, but had continued to fall elsewhere, the change being still rapid in the north-west. In consequence the pressure difference between the north and south had increased to 0·49 inch. The winds were practically unchanged, though the force was increasing in the west. The distribution of rainfall was much the same as on the preceding day, but the amounts were heavier along the West Coast and in North Bengal and Assam. Dhubri reported 7½ inches.

Tuesday.—During the previous twenty-four hours pressure had decreased across the central parts of the country, and had increased elsewhere—briskly over the Punjab. The area of lowest pressure had in consequence been transferred southward to Upper Sind, and the pressure difference between Colombo and Jacobabad was 0·48 inch. The winds were similar to those reported on the two preceding days. They were westerly across the Peninsula and the central parts of the country, southerly in North-Eastern India, and variable in Upper India. There had occurred a slight extension of rain over North-Western India, but the fall was still scanty over Lower Bengal, North-Western India, the Central Provinces, and South Madras. Elsewhere the rainfall had been moderately general, though not heavy.

Wednesday.—Pressure had increased, except around the northern half of the Bay. The distribution was the same as on the preceding day, with this important exception that a depression was developing over the head of the Bay. The winds were assuming cyclonic directions over the north of the Bay. Elsewhere the directions were fairly normal, except over the Gangetic plain, where the wind was very variable. Rain had fallen over North-Eastern India, the west and centre of the Peninsula, North Bombay, and the Central Provinces. In other parts of the country the weather was rainless, or only slightly showery.

Thursday.—Pressure had decreased over North Bombay and over Orissa and Ganjam, and had changed slightly elsewhere. The depression over the north of the Bay had apparently not changed its position, but had increased somewhat in intensity. A feeble cyclonic circulation of the winds was shown around the depression area, and a strong monsoon was blowing across the Peninsula, while the variable breezes over the Gangetic plain had been replaced by a south-east current. In Upper India only a few showers were reported, but elsewhere there had been a general moderate rainfall.

Friday.—The barometric changes had been generally slight. The depression noticed over the Bay on the two preceding days had crossed the coast, and was advancing north-westward through Orissa. It was only a feeble disturbance. Pressure was highest in the extreme south and relatively high along the line of the Himalayas, while a broad band of low pressure stretched across northern India. The winds exhibited about the normal circulation, except near the depression, where the directions were irregularly cyclonic. The force was generally moderate. The rainfall was more extensive than of late, though there was still none reported from South Madras or the Punjab. The amounts were heavy throughout a large part of the Bombay Presidency.

Saturday.—Pressure had increased briskly around the north-west angle of the Bay and in North Bombay, but had changed slightly elsewhere. The depression from the Bay had advanced north-westward, and lay over Chota Nagpur. The wind directions were fairly normal, but the force remained only moderate. The weather was slightly showery over Upper India, the centre and east of the Peninsula, and part of Burma, while elsewhere the rainfall had continued fairly general.

Temperature.—During the past week excessive heat has characterised the weather over a large part of India, more particularly in the north-west, where, owing to the absence of rain and cloud, the day temperatures have been very high. The following table gives the variations of the mean temperature from the normal in the different provinces of India for each day of the week:

Province.	July 1895.							Mean variation of week.
	14th	15th	16th	17th	18th	19th	20th	
	°	°	°	°	°	°	°	°
Burma	+2·6	+2·7	+0·8	—0·8	+0·4	+0·1	+1·4	+1·0
Bengal and Assam	+0·8	+0·1	+0·5	+0·8	—0·2	0	—0·6	+0·2
North-Western Provinces and Oudh	+1·9	+2·0	+2·1	+1·1	+2·0	+0·1	+1·0	+1·5
Punjab	+1·5	+4·5	+2·6	—1·3	+1·1	+2·8	+4·2	+2·2
Bombay	+0·7	+0·8	+0·2	—1·7	—2·1	—2·7	—1·8	—0·9
Central Provinces and Berar	+5·5	+4·5	+3·9	+0·8	+0·9	+1·2	+0·6	+2·5
Central India and Gujarat	+4·9	+4·4	+4·7	—0·4	+0·1	—0·1	+1·3	+2·1
Sind and Rajputana	+6·4	+6·0	+5·9	+2·0	+3·3	+4·2	+3·8	+4·5
Madras	—0·8	+0·5	—0·7	—2·5	—3·9	—5·2	—2·6	—2·2
Mean for whole of India	+2·6	+2·8	+2·2	—0·2	+0·2	0	+0·8	+1·2

The mean temperature of the whole country was more than 2½° above the normal average on the 14th and 15th, and more than 2° above on the 16th, but fell to about normal on the 17th, and so remained on the two succeeding days. On the 20th the mean showed a tendency to rise again. The mean temperature of the whole week was 1·2° in excess of the average. The provincial variations showed a considerable excess of temperature over Sind and Rajputana, a moderate excess over the Punjab, the Central Provinces, Central India, and Gujarat, a slight excess in the North-Western Provinces and Burma, and a moderate defect in Madras. In Sind and Rajputana the mean temperature was steadily excessive throughout the week.

The following are the highest recorded maxima on each day of the week:

On the July	14th	the highest maximum was	109·8°	at	Jacobabad.
,,	15th	,, ,,	115·1°	,,	,,
,,	16th	,, ,,	118·0°	,,	,,
,,	17th	,, ,,	110·4°	,,	Khushab.
,,	18th	,, ,,	109·3°	,,	Jacobabad.
,,	19th	,, ,,	110·3°	,,	,,
,,	20th	,, ,,	113·2°	,,	,,

Rainfall.—In the concluding table will be found the rainfall data for the week ending on July 20th. During the week under review rain was received in all the divisions, and the average actual rainfall for the week exceeded 0·10 inch, except in two cases, *viz.*, the Punjab (Central division) and Madras (South division). Excluding these two divisions, the average rainfall ranged from 15·93 inches in the Konkan and 14·04 inches in Assam (Surma), to 0·17 inch in the Punjab (North-West). In normal years the rainfall ranges from 12·60 inches in Arakan, 10·00 inches in Tenasserim, and 9·59 inches in Coorg, to 0·20 inch in Madras (South), so that it is evident that during the week under review very considerable differences have prevailed between the actual and normal distribution of rainfall. These differences are shown in the third column of the table. In the case of only seventeen divisions has the rainfall of the week been excessive. These divisions are the two Assam divisions, North Bengal, the two Bihar divisions, Malabar, the Konkan, the Bombay Deccan, Khandesh, Gujarat, Kathiawar, Rajputana (West), Hyderabad (South), Madras (Central), and the East Coast (North, Central, and South divisions). In all the remaining divisions the rainfall has been deficient. It has been a matter of frequent remark that the rainfall of Northern India is usually in marked contrast to that of Southern India, and the returns of the present week form no exception, for while over nearly the whole of Northern and Central India the rainfall has been in defect of the normal, over the greater part of the Peninsula the fall has been in excess. In the case of the excess in Gujarat, Kathiawar, and Western Rajputana the observations show that there was, firstly, a very strong monsoon blowing from the north of the Arabian Sea into those regions, and, secondly, that at the close of the week a small depression formed over the north of the Bombay Presidency, and occasioned heavy local falls of rain over that region. The excess in Assam and North Bengal was attributable to some slight local pressure disturbance in that locality at the commencement of the week. Turning next to the instances of deficiency it would appear that the general lightness of the rainfall is attributable to the general weakness of the monsoon and to the absence of any considerable cyclonic action within the current. The deficiency is largest in Burma and Coorg, but it is also considerable in the North-Western Provinces, especially the submontane division, in the Punjab, especially in the hill districts and in the Central Provinces.

The returns of the sudder stations show that rain was of daily occurrence in Burma (except Upper Burma), Assam, and Bengal; that it occurred as scattered showers throughout the week in the North-Western Provinces and Oudh; that it occurred generally on the 20th in the Punjab; and that it fell daily over the central parts of the country and the Peninsula, except in the south of the Peninsula, where the fall took place during the first few days of the week.

The three concluding columns of the table show the state of the seasonal rainfall, and in the great majority of cases exhibit a deficiency. This deficiency is not, however, large, except in the following cases, *viz.*, Arakan; East, Deltaic and Central Bengal, South Bihar, the North-Western Provinces (East), Berar, Gujarat, Sind, Rajputana, Central India (West), and Madras (South).

The following are the most important total falls recorded: Rathedaung (Akyab) 13·55 inches, Netarkona (Mymensingh) 10·17 inches, Sunamganj (Sylhet) 25·06 inches, Cherrapoonjee (Shillong) 36·98 inches, Dhubri 15·23 inches, Dinhata (Kuch Bihar) 14·99 inches, Kishanganj (Purnea) 8·11 inches, Domariaganj (Basti) 4·55 inches, Kangra 4·62 inches, Shek-Budin (Dera Ismail Khan) 2·37 inches, Karkala (Mangalore) 18·91 inches, Tirthahalli (Shimoga) 11·49 inches, Rajapur (Ratnagiri) 23·99 inches, Bavda (Kolhapur) 25·90 inches, Murwara (Jubbulpore) 7·50 inches, Bulsar (Surat) 19·09 inches, Bhuj 5·54 inches, Biaro (Bhopal) 7·19 inches, Alawut (Godavery) 7·22 inches, Tirnour (Kistna) 6·71 inches.

PROVINCE.	DIVISION.	Rainfall data for week ending July 20th, 1895. Average actual rainfall of division.	Average normal rainfall of division.	Excess or defect in inches.	Rainfall data from June 2nd to July 20th, 1895. Average actual rainfall of season to date.	Average normal rainfall, June 2nd to July 20th.	Excess or defect of (seasonal) rainfall expressed as a percentage.

SIMLA, *25th July 1895.*

W. L. DALLAS,
Asst. Meteorological Reporter to the Government of India.

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 20th July.*—Rainfall heavy on the West Coast, good in the Circars, Madras, and Nilgiris; fair rain elsewhere, but light in the Southern and parts of the Central districts, where more rain is wanted. Agricultural operations are progressing. Pasture is improving, and fodder is sufficient. The condition of cattle is generally good. Prices are slightly easier in the Circars and Deccan, but are rising in parts of the Carnatic and Southern districts.

Bombay.—*For week ending 24th July.*—Rain throughout the Presidency, slight in Sind, but good elsewhere. More rain is required in Sind and in parts of the Deccan, Broach, and Belgaum. The river is low in Sind and agricultural operations are generally suspended, and the crops in parts are suffering owing to deficiency of water. Agricultural operations are progressing in the Presidency Proper, but sowing is retarded in parts of Poona for want of moisture, and in parts of Ahmednagar owing to excessive moisture. Preparations for the late crops are progressing in parts of Bijapur and Sholapur. Fodder is sufficient, except in parts of the Upper Sind frontier. Agricultural stock in good condition. Prices are normal, except in parts of Ahmednagar and Sholapur.

Bengal.—*For week ending 22nd July.*—There was good general rain all over the Province, except in the Burdwan and Presidency divisions, where the falls were scanty. In almost all districts of these two divisions the cultivation of the winter rice crop is much retarded, and in parts of Bihar and Orissa too more rain is required for transplanting operations. Prospects of all autumn crops, including early rice and jute, and of sugarcane are generally favourable. In Pubna and Dacca the crops on low lands are reported to have been somewhat damaged by floods. Cattle are in good condition, except in Dinajpur. The price of common rice continues almost stationary.

North-Western Provinces and Oudh.—*For week ending 24th July.*—Light rain has been general during the week, but more rain is required. The crops are suffering from drought on the high lands in Jhansi; otherwise prospects are fair. The sugarcane and indigo crops are doing well. Markets are well supplied. Fodder is ample. Prices are rising generally.

Punjab.—*For week ending 24th July.*—Rain has fallen in all districts, except Delhi, Umballa, and Peshawar. The autumn sowings are retarded for want of rain in Sialkot, but the sowings of the autumn and reaping of the extra spring crops are in progress in Lahore. Rain is wanted for the autumn crops in Hissar, Delhi, Umballa, Jullundur, Lahore, and Shahpur. Rain has benefited the young crops in Hissar, but the crops were being injured for want of rain in Jullundur. The condition of the autumn crops in Amritsar and Multan, of cotton and *jowar* (*Sorghum vulgare*) in Dera Ismail Khan, and of the standing crops in Peshawar are good. The condition of cotton and *jowar* is fair in Jullundur. Cattle are generally in good condition, and fodder is sufficient throughout the Province. Prices are rising in Umballa, approaching normal in Sialkot, and continue low elsewhere, except the price of wheat in Shahpur.

Central Provinces.—*For week ending 24th July.*—The weather was cloudy, and the rainfall general; light in Nagpur, but heavier in the Nerbudda Valley and Satpura districts. In the Chhattisgarh division Raipur and Sambalpur received upwards of 3 and 5 inches respectively. The autumn sowings are approaching completion, and prospects seem favourable. Prices remain stationary.

Burma.—*For week ending 20th July.*—In Lower Burma heavy rain has fallen in Akyab, and ploughing on high lands has been resumed, but is still retarded on high lands in Tounghoo. Cultivation is retarded in one township of Amherst for want of rain, and more rain is also required in Prome and parts of Tharrawaddy. Elsewhere ploughing, sowing, and transplanting are progressing. In Upper Burma reaping of the early wet-weather paddy has commenced in parts of Mandalay and Kyaukse. Ploughing for paddy is retarded in Taungdwingyi in Magwe for want of rain. Nurseries in Mandalay and Magwe are dying from the same cause. Elsewhere ploughing, sowing, and transplanting of paddy is progressing. The early wet-weather paddy crops are somewhat damaged by floods in part of Mandalay. More rain is badly wanted in the Ava township of Sagaing, Thayetmyo, Pakokku, and Meiktila, where the standing crops are withering. Elsewhere crop prospects are good or fair. The price of paddy has risen slightly in Sagaing and Upper Chindwin, fallen slightly in Thongwa, and considerably in Tounghoo; elsewhere prices are stationary.

Assam.—*For week ending 23rd July.*—The weather is seasonable. Sowing of late rice seedlings and ploughing for late rice continue. Prospects of tea are fair. Fodder is abundant, except in Kamrup. Water is sufficient.

Mysore and Coorg.—*For week ending 24th July.*—MYSORE: Good rain in parts of all districts, excepting Mysore. The standing crop and prospects are fair. Sowing operations continue in parts. Prices have fallen in Mysore, and risen in Bangalore, Kolar, Hassan, and Kadur.

COORG: Rainfall moderate. Transplanting of rice has begun. Prospects of *ragi* (*Eleusine coracana*), coffee, and cardamom are fair. Water and fodder for cattle are abundant. Prices are normal.

Berar and Hyderabad.—*For week ending 24th July.*—BERAR: Weather hot with moderate rainfall. The crops are thriving satisfactorily, except in parts of the Akola district, where more rain is much needed. Sowings are well advanced, and weeding operations continue. Fodder and water are ample. Prices are fluctuating in Wun, but are otherwise steady.

HYDERABAD:—Rainfall good. Sowing of the autumn crops is progressing in two districts, and completed in one. The crops are withering in one district for want of rain. Prices are normal.

Central India.—*For week ending 24th July.*—Rain fell in all Agencies during the week, but more rain is still wanted in Bundelkhand, Baghelkhand, and Bhopawar, and in some districts of Gwalior. Agricultural operations are in progress everywhere. The crops have been slightly damaged for want of rain in Gwalior, and by insects in parts of Bhopawar. Cattle are in fairly good condition in all Agencies, except Bhopal. The condition of pasturage is good and sufficient everywhere. Prices of food-grains are high in Bhopal and Goona, rising in two districts of Gwalior, falling in Neemuch, but normal elsewhere.

Rajputana.—*For week ending 24th July.*—Rainfall good in thirteen States; scarcely any rain in Jeypore, Shahpurah, Kerowli, Dholepore, and Ulwar where it is urgently wanted. Agricultural operations are progressing satisfactorily, except in Jeypore. Agricultural stock and pasturage or fodder are generally good, but fodder is scarce in Jeypore and Ulwar. Crop prospects are fair. Prices are rising in four States, but are steady elsewhere.

Kashmir.—*For week ending 23rd July.*—KASHMIR VALLEY: Rainfall slight. The weather is now fine. Prices continue normal.

JAMMU PROVINCE.—*For week ending 24th July.*—No rain. The weather is abnormally hot, and the crops are suffering. Cattle are in good condition. Prices are stationary.

Nepal.—*For week ending 20th July.*—Weather showery and seasonable. Transplanting of rice is finished.

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

No. 3508-S. R.

GOVERNMENT OF INDIA.

FINANCE AND COMMERCE DEPARTMENT.

Simla, the 23rd July, 1895.

Read—

Customs Circular No. XVI.

Letter from the Finance and Commerce Department, No. 3276, dated the 10th July 1895.

Ordered, that the Circular be published for general information in the Supplement to the *Gazette of India*.

J. F. FINLAY,

Secretary to the Government of India.

Customs Circular No. XVI.

From—The Government of India, Finance and Commerce Department, No. 3276-S. R., dated the 10th July 1895,

To—The Chief Secretary to the Government of Bombay.

I am directed to acknowledge the receipt of your letter No. 1756, dated the 2nd March 1895, referring for consideration and orders the following questions which have arisen in connection with the working of the Indian Tariff Act as amended by Act XVI of 1894:

(1) Whether materials for foot-bridges and over-bridges, which are not part of the permanent way of a railway, are included in the exemption of "railway material for permanent way" under No. 93 of Schedule IV;

(2) Whether, in the same number, the words "component parts thereof" refer to all the articles mentioned before those words, or only to engines, tenders, carriages, waggons, trollies and trucks; and whether signal wire comes within the exemption as a component part of a signal;

(3) Whether the component parts of articles specified as "railway material" are to be charged with duty on the analogy of component parts of machinery, though capable of being used for other purposes;

(4) Whether parts of telegraph instruments and apparatus, such as wire, carbon blocks and plates, copper wire covered with silk or cotton, and ebonite sheets, are included in the exemption in No. 64 of Schedule IV; and if so, whether such parts and materials as are capable of being used for other purposes than those of a railway should be charged with duty;

(5) Whether imports of copper coin of the Government of India are chargeable with duty;

(6) How the words "a public place" in No. 19 of Schedule IV are to be interpreted, and whether statues and pictures intended for erection in the places marginally noted are exempted under this entry.

(a) A Roman Catholic church.
(b) An institute consisting of a library and a lecture hall.
(c) A railway station.
(d) A hospital.
(e) A municipal hall.
(f) A cemetery.

2. In reply I am to communicate the views and orders of the Government of India on the several points raised, in the order in which they are noted in the foregoing paragraph.

(1) The whole of Article 93 of Schedule IV down to the word "also" is governed by the phrase "for permanent way and rolling stock," and nothing is exempt which does not come within that limitation. Over-bridges, whether for foot-passengers or wheel traffic, cannot ordinarily be regarded as part of "permanent way."

(2) The words "component parts" refer to all the articles mentioned in the entry precedent thereto. Component parts of railway signals are therefore exempt. Whether any particular importation of wire is or is not a component part of a signal must be decided by the Collector of Customs on the facts of each case, his decision having reference to the size of a wire, its shape, and other qualities, and the circumstances of the importation.

(3) The limitation applied to component parts of machinery by the second proviso to Article No. 14 should be held by Customs officials to apply equally to component parts of railway material.

(4) Telegraphic instruments and apparatus, when imported by or under the orders of a railway company, are exempt under No. 64, and the heading of the entry shews that component parts of such instruments and apparatus are included in the exemption. Whether or not any particular articles of the kind mentioned in this question are component parts is a point which must be decided by the Collector on the facts of each case, as with machinery and railway material.

(5) Copper coin of the Government of India, which is legal tender, should not be held to be taxable.

(6) Much risk of error would attend an attempt to give a precise and exhaustive definition of the words "public place," although for the purpose of Article No. 19 of Schedule IV it will probably not be difficult to determine, on the merits of the case, whether any particular picture or statue comes within the exemption or not. The principle of the exemption lies in the distinction between works of art imported for the benefit, use, or enjoyment of private persons, and those imported for devotion to general public use. In elucidation of this principle, the following illustrations are given:—

(*a*) A place which is private property cannot be a "public place," for example, a shop, a private gallery or museum.

(*b*) A place devoted to the uses of a portion only of the community cannot be a "public place," *e.g.*, a church, or a cemetery. The public have not free access to any of these places, for it is in the power of certain private individuals or bodies to exclude them.

(*c*) A place which is the property of a public body, such as a municipality, and is by it opened to public use, is a public place. A municipality is expressly constituted to hold property and manage local affairs as trustees for the public.

(*d*) A railway station is not a public place, for the railway company have the right to exclude people from it.

(*e*) Neither is a hospital, from which, by the nature of the case, the public are excluded. At the same time it may be admitted that a statue erected in front of a hospital and in full view of the passengers on a public road is erected in a public place, just as much as any other statue which stands in the middle or on the side of a public road, from which it is fenced off by a railing.

It is believed that there will be no difficulty in disposing of individual cases in accordance with the principles here explained, but I am to say that definite rulings can be given by the Government of India only as actual cases arise in which it is necessary to come to a definite decision. Works of art, such as are exempted under Article No. 19, are not likely to be very numerous, and it will always be easy to obtain the orders of the Government of India in any case of doubt.

GOVERNMENT OF INDIA.

(*a*) Includes the Bhopal-Itársi railway.
(*b*) Includes the Godhra-Rutlam railway.
(*c*) Total earnings from 2nd April to 14th July 1894.
(*d*) Includes the Guntakal-Mysore frontier section.
(*e*) Includes the Tirhoot state railway. Although for convenience classed amongst state railways, the company's section of this line is the property of the Bengal and North-Western Railway Company.
(*f*) Includes the Jammu and Kashmir and the Hyderabad-Shadipalli railways.
(*g*) Although for convenience classed amongst state railways, this line is the property of the Bengal Central Railway Company.
(*h*) Includes the Wardha Coal, Dhond-Manmád, Khámgaon, and Amráoti railways.
(*i*) Total earnings from 1st June to 14th July 1894.
(*j*) Includes the Mysore-Nanjangúd and the Yesvantpur-Mysore frontier sections.

Simla, the 25th July 1895.

F. B. HEBBERT,
Under Secretary.

Printed and published for the GOVERNMENT OF INDIA *at the* GOVERNMENT CENTRAL PRINTING OFFICE, *Simla.*

SUPPLEMENT TO

The Gazette of India.

No. 31.] CALCUTTA, SATURDAY, AUGUST 3, 1895.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

FINANCE AND COMMERCE DEPARTMENT.

J. F. FINLAY,
Secretary to the Government of India.

* Not sold.

GOVERNMENT OF INDIA.

FINANCE AND COMMERCE DEPARTMENT.

REPORT UPON THE OPERATIONS OF THE CURRENCY DEPARTMENT FOR THE YEAR 1894-95.

No. 118, dated Calcutta, the 24th July, 1895.

From—The Head Commissioner of Paper Currency, Calcutta,

To—The Secretary to the Government of India, Finance and Commerce Department.

I have the honour to submit the report upon the operations of the Currency Department for the year 1894-95.

Arrangement of Subjects.

PARAS.

2. OFFICERS IN CHARGE.
3. ACCOUNTS AND AUDIT.
4. CIRCULATION.
21. ANALYSIS OF CIRCULATION.
22. THE RESERVE.
24. The Investment.
25. Profits of Circulation.

TRANSACTIONS WITH THE PUBLIC—

26. Issue and Receipt of Notes.
33. Encashment of Foreign Notes.
38. Issue and Receipt of Coin.
42. State of the Coinage.
48. Exchange of small Coin.
49. Transactions at Agencies.
51. CLAIMS ON LOST NOTES.
53. FRAUD AND FORGERY.
62. REMITTANCES OF SILVER.

PARAS.

64. TREASURY STATISTICS.
68. RECEIPTS AND EXPENDITURE.

Prescribed Statements.

No. I.—Statistics of Circulation during 1894-95.
„ II.—Statement of Notes issued, received and cancelled during 1894-95.
„ III.—Statement of Receipts and Expenditure.
„ IV.—Classification of Treasuries according to encashment of Notes.
„ V.—Statistics of Treasury and other Balances on 31st December 1894.

Other Statements.

No. VI.—Issues and Receipts of Home Notes.
„ VII.—Issues and Receipts of Coin.
„ VIII.—Value of Notes in circulation from 1863-64.
„ IX.—Details of ditto ditto 1883.

OFFICERS IN CHARGE.

2. Mr. A. F. Cox officiated as Head Commissioner during the whole year except from the 27th September to the 3rd October 1894, when Mr. G. E. Manisty held temporary charge.

The other Circle offices were in charge of the officers mentioned below:—

Bombay.—Mr. O. T. Barrow was Commissioner throughout the year, except for the period from 22nd April to 10th June 1894, when Mr. J. C. E. Branson held temporary charge.

Madras.—Mr. T. W. Rawlins was Commissioner throughout the year, except from 6th September to 6th October 1894, when Mr. R. Morris officiated.

Rangoon.—Mr. T. Hesketh Biggs was Commissioner during the whole year.

ACCOUNTS AND AUDIT.

3. The monthly audit of the accounts has been duly reported for each Office to the Comptroller General, and special audits have also been made of the Calcutta and Bombay Offices.

CIRCULATION.

4. The following figures show the gross and net circulation* at the beginning and end of the year :—

	Gross circulation.	Retired by other offices.	Net circulation.
	₹	₹	₹
1st April 1894 . . .	30,93,16,170	51,99,860	30,41,16,310
31st March 1895 . . .	31,27,02,390	57,02,285	30,70,00,105

The net circulation at the end of the year exceeded that at the commencement by ₹28,83,795 or a little less than one per cent. The highest figure in the year, which is also the highest point yet touched by the circulation, was reached in November 1894. The circulation was then upwards of 32,35 lakhs of rupees.

5. The average net circulation at the end of each month of the last six years was as follows :—

	₹
1889-90	16,15,14,963
1890-91	22,88,92,275
1891-92	25,43,62,371
1892-93	27,09,95,630
1893-94	28,29,15,237
1894-95	31,11,11,406

The average net circulation in 1894-95 is nearly double that of 1889-90—a very large increase in five years.

6. These figures, however, do not afford any satisfactory indication of the extent of the real circulation in the hands of the public; inasmuch as they are largely affected by the varying amounts of notes held (1) in Government Treasuries, and especially in the Reserve Treasuries of the Presidency Towns, and (2) in the Head Offices of the Presidency Banks. The Reserve Treasury Balances are held almost entirely in notes, and these notes may be issued and again withdrawn without ever passing into effective circulation. So also the Presidency Banks hold the bulk of their balances in notes of large value, which may be issued to them and again returned almost immediately to the Currency Department without passing into any other hands. The notes mentioned above cannot be said to be in active circulation, and a much truer idea of the real circulation can be gained by excluding them, as is done in the following table, which, for the last three years, brings out first the balances, excluding the notes held in Government Treasuries, and then the balances excluding also those held in the Head Offices of Presidency Banks.

* A note is in "Gross Circulation" when it is not yet returned to the original office of issue; but if it has meantime been paid off by another office of issue, and is held by it pending return to the original office of issue, then it has ceased to be in "net circulation," though it is still part of the "Gross circulation."

Last day of month.	Circulation in lakhs on last day of month.			Balance being notes in circulation with the public.			Total held in Treasuries.			Amounts held in Reserve Treasuries.			Amounts held in other Treasuries.			Notes held by Presidency Banks at Head Offices.			Balance.

January . . .	26,61	30,52	29,50	22,99	18,91	22,34	3,62	11,61	7,16	1,85	10,00	4,72	1,27	1,61	2,44	3,01	1,32	2,63	19,98	17,59	19,71
February . . .	25,86	30,20	30,35	22,26	17,95	21,68	3,60	12,25	8,67	1,84	10,67	6,46	1,26	1,58	2,21	2,69	1,29	2,24	19,57	16,66	19,44
March . . .	26,40	30,41	30,70	21,80	18,84	21,67	4,60	11,57	9,03	2,41	9,98	6,78	2,19	1,65	2,25	2,32	2,00	2,61	19,48	16,84	19,06
Average . . .	27,10	28,29	31,11	23,33	20,83	22,24	3,77	7,46	8,87	2,27	6,08	7,16	1,50	1,58	1,71	3,80	2,98	3,74	19,53	17,85	18,50

7. It will be observed that while the total circulation has, during the three years, varied from a minimum of 23,96 lakhs to a maximum of 32,35, or by 8,39 lakhs, the active circulation as brought out in the last three columns of the preceding table has varied from 16,84 lakhs to 21,11 lakhs, or by 4,27 lakhs only. Also while the total circulation has risen steadily, and especially since the Mints were closed in June 1893, the real circulation (whether we include in that term all the notes held elsewhere than in Government Treasuries, or only such of those notes as are not held in the Head Offices of the Presidency Banks) was higher in 1892-93 than in either of the two succeeding years, though in the year under report there has been some recovery from the falling-off in 1893-94.

8. It was explained in last year's report that the closing of the Mints and the inability of the Secretary of State, for a great portion of the year, to sell his bills had led to an accumulation of money in the Government Treasuries, and consequently to a contraction of the currency in actual circulation; and it was shown that the Paper Currency had shared in this contraction. During the year 1894-95 the current has turned in the opposite direction; the Secretary of State has sold his bills freely and at such low rates that their amount in rupees far exceeds the total of any previous year; considerable amounts have also been expended on Public Works, and the Government balances, though still high, have been reduced during the year by 3,04 lakhs. The Paper Currency in active circulation has accordingly increased again, and though the average circulation is considerably below that of 1892-93, yet the circulation of the last four months of the year has approximated closely to that of the closing months of the earlier year.

9. The contraction of the Paper Currency circulation owing to the closing of the Mints has, therefore, been merely temporary. Allowing for the special circumstances of last year, the active circulation seems to be extending, and, accordingly, we may say to be steadily growing in favour; the effects of the temporary check sustained last year are passing away, and we may soon expect to see the active circulation rising again as largely as it has done in the past.

10. For the reasons given in previous reports it is of no use to attempt to explain in any detail the variations in individual Circles; but it is usual to give the figures for each Circle, and the net circulation is accordingly distributed over the various Circles in the following table:—

Last day of	Calcutta.	Allahabad.	Lahore.	Bombay.	Karachi.	Madras.	Calicut.	Rangoon.	Total.
	(Thousands of Rupees.)								
March 1894 . .	12,80,80	1,14,54	1,21,40	10,36,24	71,65	3,64,80	12,20	39,53	30,41,16

March „ . .	13,48,39	1,06,09	1,55,64	9,27,79	60,10	4,01,80	13,93	56,26	30,70,00
Average of last twelve figures.	13,17,43	1,31,76	1,67,15	10,12,75	68,06	3,52,54	12,76	48,66	31,11,11
Average of 1893-94 .	11,55,00	1,26,79	1,46,94	9,98,02	68,76	2,63,56	15,51	54,57	28,29,15
„ 1892-93 .	10,42,49	1,28,28	1,56,39	9,09,50	82,27	2,83,90	11,61	95,52	27,09,96

11. It is not possible to bring out for each Circle the active circulation in the method employed above in respect of the total circulation, because both Treasuries and Presidency Banks hold notes of Circles other than their own. The Reserve Treasuries, however, hold practically the whole of their balances in notes of their own Circles; and in the following table the circulation of the three larger Circles is accordingly reduced by the note balances of the Reserve Treasury, and is compared with the corresponding results for the preceding two years:—

Last day of	Calcutta.			Bombay.			Madras.			Other Circles.			Total.		
	1892-93.	1893-94	1894-95.	1892-93.	1893-94.	1894-95.	1892-93.	1893-94.	1894-95.	1892-93.	1893-94.	1894-95.	1892-93.	1893-94.	1894-95.

12. This table furnishes a nearer approximation to the active circulation than that in paragraph 10. It will be observed that the results for each Circle do not differ materially from those arrived at for the whole of India. In each sub-division of the table the average circulation of 1894-95 shows some recovery from the falling-off which occurred in 1893-94. The recovery has been greatest in Madras, where the circulation of 1894-95 exceeds even that of 1892-93.

13. The course of the circulation from month to month returned to the normal standard, from which, owing to special circumstances, it had been materially deflected in 1893-94.

In ordinary course the circulation is at its minimum at the end of April; it then rises gradually, reaching its maximum in October and November; and then drops gradually again till the minimum is reached. The figures tabulated in paragraph 6 show that this general description applies pretty closely to the course of the circulation in 1894-95.

14. The details of the net circulation of 31st March 1895 for each denomination of notes are as follows:—

	Number of Notes for Rupees								Total	
	5.	10.	20.	50.	100.	500.	1,000.	10,000.	Pieces.	Value.
Calcutta .	81,428	2,807,327	75,018	56,308	210,558	22,146	27,924	4,199	3,284,908	13,48,38,970
Allahabad .	14,953	50,097	25,449	20,233	28,019	3,830	3,096	70	145,747	1,06,09,265
Lahore . .	26,481	69,591	48,089	26,557	34,567	5,887	3,396	265	214,833	1,55,64,145
Bombay .	353,844	1,073,160	137,869	89,317	110,174	8,392	21,672	3,617	1,798,045	9,27,79,450
Karachi .	3,614	90,752	17,491	10,187	11,284	923	1,495	114	135,860	60,09,660
Madras .	60,421	181,616	44,409	26,870	196,224	5,639	2,688	1,070	518,937	4,01,79,845
Calicut . .	14,745	13,151	5,360	3,310	6,951	132	44	11	43,694	13,92,835
Rangoon .	7,529	42,664	11,225	7,493	19,415	916	853	131	90,226	56,25,935
	563,015	4,328,358	364,900	240,275	617,192	47,865	61,168	9,477	6,232,250	30,70,00,105
Total for 31st March 1894	499,652	3,744,839	332,023	219,828	519,248	42,390	53,818	11,960	5,423,758	30,41,16,310
Total for 31st March 1893	495,456	3,917,336	330,083	232,482	568,068	50,648	67,981	5,403	5,667,457	26,40,18,200

15. There has been a considerable increase in notes of all denominations except those of ₹10,000, the reduction in which is fully accounted for by the diminution in the balances of the Reserve Treasuries and Presidency Banks. In most cases the circulation also exceeds that of 1892-93, the only exceptions being the notes of the value of ₹500 and ₹1,000.

16. The percentage of increase or decrease in each denomination as compared with 1893-94 is given below:—

	Increase (+) Decrease (—)
Five Rupee	+ 12·7
Ten „	+ 15·6
Twenty „	+ 9·9
Fifty „	+ 9·3
One hundred Rupee	+ 18·9
Five „ „	+ 12·9
One thousand „	+ 13·7
Ten „ „	— 20·4

17. Dividing the net circulation between notes of ₹500 and upwards and notes below ₹500, the values at the end of each of the last three years are—

(Thousands of Rupees.)

	Notes of ₹100 and under, value.	Percentage of total.	Notes of ₹500 and upward, value.	Percentage of total.	Total.
	₹		₹		₹
1892-93 . .	11,66,83	44	14,73,35	56	26,40,18
1893-94 . .	10,95,03	36	19,46,13	64	30,41,16
1894-95 . .	12,71,30	41	17,98,70	59	30,70,00

The excess in the case of the larger values is due to the continued high proportion of notes of ₹10,000. The proportion is, however, less than last year.

18. The varying proportions in which notes of each denomination have circulated in the whole of India and in the principal Circles during the last two years, are exhibited below:—

Years.		Calcutta.		Allahabad.		Lahore.		Bombay.		Madras.		Total of all Circles.	
		1893-94.	1894-95.	1893-94.	1894-95.	1893-94.	1894-95.	1893-94.	1894-95.	1893-94.	1894-95.	1893-94.	1894-95.
Rupees	5 .	2·9	2·5	10·8	10·25	13·0	12·3	18·9	19·7	11·5	11·6	9·2	9·0
„	10 .	85·2	85·5	34·5	34·3	31·6	32·4	59·4	59·7	35·0	35·0	69·05	69·5
„	20 .	2·4	2·3	17·9	17·5	21·8	22·4	7·9	7·6	8·6	8·6	6·1	5·9
„	50 .	1·8	1·7	14·0	13·9	13·35	12·4	5·2	5·0	6·0	5·2	4·05	3·9
„	100 .	6·1	6·4	18·0	19·2	16·1	16·1	6·4	6·1	36·9	37·8	9·6	9·9
„	500 .	·6	·7	2·2	2·7	2·6	2·7	·6	·5	1·2	1·1	·8	·7
„	1,000 .	·8	·8	2·4	2·1	1·5	1·6	1·3	1·2	·6	·5	1·0	1·0
„	10,000 .	·2	·1	·2	·05	·05	·1	·3	·2	·2	·2	·2	·1
	Total .	100·	100·	100·	100·	100·	100·	100·	100·	100·	100·	100·	100·

19. The ten-rupee notes form 69½ per cent. of the total circulation, and in the Calcutta Circle they mount up to 85½ per cent. Their circulation and that of 100-Rupee notes (which come next, though after a long interval) have about doubled in the last ten years. Five-rupee notes, on the other hand, show hardly any increase over the number in circulation ten years ago. This is owing to a successful forgery of these notes some years ago in the Calcutta Circle, which reduced their circulation from 316,193 on 31st March 1885 to 88,304 on 31st March 1890 and to 81,428 on 31st March 1895. They are used to a large extent in the Bombay Circle. In Madras, as has been noticed in previous reports, 100-rupee notes enjoy a special popularity; the only explanation suggested by the Acting Commissioner being that possibly they are more used for remittance purposes there than in other Circles. It may be noted that while the proportion of notes of this denomination is highest in Madras, the actual number in circulation is largest in Calcutta.

20. It has been usual to give the average value of each note in circulation in each Circle on the last day of the year, compared with the corresponding figures for previous years, but fluctuations in the circulation of 10,000-rupee notes so materially affect these figures that I have thought it best to exclude them, and the figures now given accordingly show the average values for notes of ₹1,000 and less:—

	1894-95.	1893-94.	1892-93.	1891-92.
	₹	₹	₹	₹
Calcutta Circle . . .	28	26	29	30
Allahabad „ . . .	68	68	79	79
Lahore „ . . .	60	59	69	66
Bombay „ . . .	31	34	37	34
Karachi „ . . .	35	38	36	38
Madras „ . . .	56	57	58	58
Calicut „ . . .	29	27	31	28
Rangoon „ . . .	47	45	59	54
All India . . .	34	34	37	36

It will be noticed that the tendency is generally towards a diminution in the value.

ANALYSIS OF CIRCULATION.

21. There is nothing new to report on the subject of the analysis of circulation. As stated last year, all differences have been ascertained, even where they have not been reconciled, and current work can now, therefore, be proved, allowing for the known differences.

RESERVE.

22. The Currency Reserve upon 31st March 1895 stood as follows :—

	₹ a. p.	₹ a. p.
Silver Coin—		
At Calcutta . .	4,48,91,402 0 0	
„ Allahabad . .	4,04,39,880 0 0	
„ Lahore . . .	2,99,10,110 0 0	
„ Bombay . .	5,95,35,473 0 0	
„ Karachi . .	37,68,555 0 0	
„ Madras . . .	3,51,41,260 0 0	
„ Calicut . . .	18,24,175 0 0	
„ Rangoon . .	1,14,89,250 0 0	
		22,70,00,105 0 0
Invested in Government securities . .	8,00,00,000 0 0	
		8,00,00,000 0 0
Total agreeing with net circulation (*vide* paragraph 4).		30,70,00,105 0 0

The proportion of the Currency Reserve held in coin remains, as last year, at nearly 74 per cent. of the total net circulation. It is largely in excess of the amount really required for an adequate Reserve. The minimum circulation in the hands of the public during the last three years exceeds double the amount invested in Government securities, the amount so to be invested having been fixed by legislation when the maximum gross circulation was barely 18 crores.

23. The half-yearly verifications of the Currency balances on 30th September 1894 and 31st March 1895 were held for all Circles and Sub-Circles, the balances being verified in accordance with the orders issued on the subject by a gazetted officer unconnected with the Currency Department.

INVESTMENTS.

24. No change was made during the year in the amount of the investments as the full amount allowed under Act XV of 1890 has been invested. But the whole of the investment has been converted under the general conversion proceedings of last year from the 4 per cent. loan of 1842-43 to the guaranteed 3½ per cent. loan bearing the same title. The nominal value of the investment is ₹8,15,95,000 which is held at a book-value of ₹8,00,00,000. The average rate at which the whole investment is held on the books is thus a little over ₹98 against a present market-rate of over ₹107.

PROFITS OF CIRCULATION.

25. The interest realised and credited under the head "Profits on Note circulation" during the year is ₹34,52,284. This is in excess of the interest on the nominal amount of the investment, even at 4 per cent., as it includes the anticipation interest up to 1st August 1895 paid in connection with the conversion mentioned above.

ISSUE AND RECEIPT OF NOTES.

26. The following are the gross issues and receipts of the year, the detail by Circles being shown in Statement VI :—

	₹	₹
Gross circulation, 1st April 1894		30,93,16,170
ISSUES—		
Over the counter	83,52,44,020	
At Agencies	1,70,02,900	
In remittance transactions { Between Head Offices and Agencies	6,78,68,225	
In remittance transactions { Between Circles	8,56,08,000	
		1,00,57,23,145
		1,31,50,39,315
RECEIPTS—		
Over the counter	75,06,03,490	
At Agencies	91,52,590	
From other Currency Circles	10,58,94,845	
In remittance transactions { Between Head Offices and Agencies	5,60,56,000	
In remittance transactions { Between Circles	8,06,30,000	
		1,00,23,36,925
Balance, being gross circulation, March 31st, 1895 (*vide* paragraph 4)		31,27,02,390

27. The Agencies deal exclusively with Treasuries and the bulk of the transactions are in the Punjab. The receipts from other Currency Circles represent the receipts in each Circle of its own notes cashed in other Circles; the amounts so received fell off this year by 183 lakhs, but these transactions were specially large in 1893-94.

The remittances are for the most part payments and receipts of one Currency Office, in consideration of receipts or payments at another. The amounts issued and received in Remittance transactions in notes and coin taken together must of course agree, and this agreement is brought out in the note at foot of Statement VII.

The total remittances do not differ materially from those of last year.

28. The total issues and receipts for the last three years are as follows :—

	Issues. ₹	Receipts. ₹
1892-93	1,14,81,21,500	1,12,33,59,880
1893-94	1,03,97,64,180	99,92,60,205
1894-95	1,00,57,23,145	1,00,23,36,925

29. The issues have decreased by about 340 lakhs, while the receipts

have increased by about 31 lakhs as compared with the previous year, the difference being made up as follows:—

	Issues.	Receipts.
Over the counter	−3,10	+4,00
Remittance transactions	−19	−96
From other Currency Circles	...	−1,83
Other heads	−11	−90
	−3,40	+31

The decrease in the issues over the counter occurs mainly in the Bombay Circle, and the increase in the similar receipts occurs chiefly in the Calcutta Circle. In both cases the greatest variation occurs in the case of notes of R10,000 and is due to the fact, already set out, that the Reserve Treasury and Presidency Bank balances have been gradually decreasing throughout the year.

30. It is noticeable that the issues and receipts in the various Circles bear no fixed proportion to the circulation. This is brought out in the following table which gives for each of the larger Circles, the value of the gross circulation, the mean value of the receipts and issues, and the percentage of the former on the latter:—

Name of Circle.	In lakhs of Rupees.		Percentage of amount in column 2 on that in column 3.
	Average circulation on last day of month.	Mean value of Receipts and Issues.	
1	2	3	4
Calcutta	13,17	44,83	29
Allahabad	1,32	3,57	37
Lahore	1,67	7,22	23
Bombay	10,13	21,62	47
Madras	3,53	14,91	24
Rangoon	49	6,33	8

These percentages seem to indicate some difference of practice in the various Currency Offices. The matter is being enquired into and will be reported upon next year. The case of Rangoon is altogether peculiar; the circulation is never large, but during the rice season a very considerable business is done, the trade being financed by the Currency Office through the agency of the Bank of Bengal. Notes of high value are issued in payment of the Currency transfers, but are returned almost immediately to the Currency Office for encashment; thus both issues and receipts are largely swelled while the circulation is not materially raised.

31. The aggregate gross issues and receipts of the several denominations of notes at both Offices of Issue and Agencies during the year were as follows:—

	Number of notes for Rupees.								Total.	
	5	10	20	50	100	500	1,000	10,000	Number.	Value.
Issues	920,265	5,459,886	646,943	449,664	1,361,379	173,014	286,326	40,213	9,337,690	1,00,57,23,145
Receipts	857,349	4,860,560	605,821	426,426	1,262,794	167,344	278,825	42,723	8,501,842	1,00,23,36,465
More Issues	62,916	599,326	41,122	23,238	98,585	5,670	7,501	...	835,848	33,86,680
,, Receipts.	...	...	...	...	...	...	...	2,510	...	...

The issues exceeded the receipts in every case except in that of notes of R10,000, the decrease in the circulation of which has already been explained.

32. The average number of notes that passed over the counters at each Head Office on each working day during the past three years, and the daily average of cancellations are given in the following table:—

	Notes cashed.			Notes issued.			Notes cancelled.		
	1892-93.	1893-94.	1894-95.	1892-93.	1893-94.	1894-95.	1892-93.	1893-94.	1894-95.
At Calcutta	13,328	14,421	12,880	15,076	14,494	15,437	10,827	10,505	10,053
,, Bombay	8,102	7,938	7,720	9,037	8,282	8,878	5,785	5,397	5,032
,, Madras	3,014	2,981	3,275	3,115	3,009	3,527	2,799	3,019	3,161
,, Rangoon	888	924	1,050	982	975	1,184	793	857	1,007

The proportion of cancellations continues high; but it shows a tendency to decrease in both Calcutta and Bombay. It must, however, be remembered, as stated last year, that the prompt cancellation of soiled notes is considered here, as also by the Bank of England, to afford a special safeguard against forgery.

ENCASHMENT OF FOREIGN NOTES.

33. The following is the Foreign Note account of the Circles in aggregate:—

	₹	₹
Balance held on 1st April 1894		51,99,860
Received over the counter	10,46,40,690	
Otherwise than in exchange	1,60,000	
From other Circles	12,32,055	
Received at Agencies (net)	15,96,580	
		10,76,29,325
Total		11,28,29,185
Remitted to Circles concerned		10,71,26,900
Balance on 31st March 1895		57,02 285
Total		11,28,29,185

34. The details by Circles of the amount received over the counter in the above statement are as follows:—

Statement of Foreign Circle Notes cashed.

Circle.	Cashed by								Total.			
	Calcutta.	Allahabad.	Lahore.	Bombay.	Karachi.	Madras.	Calicut.	Rangoon.	1894-95.	1893-94.	1892-93.	1891-92.

The letter (c) indicates the value of Foreign Notes which were legally encashable, *i.e.*, the amount of Sub-Circle notes encashed by their respective head circles.

35. The total for 1894-95 shows a considerable decrease in the Foreign Circle note encashments, the main variations being decreases of 161 lakhs and 53 lakhs in the payments at Calcutta and Allahabad, and an increase of 41 lakhs in the payments at Lahore. The difference at Calcutta is mainly in the encashment of Allahabad and Lahore notes, and at Allahabad and Lahore

in the encashment of Calcutta notes. Bombay has cashed 21 lakhs less of foreign notes (chiefly Madras) and Madras 14 lakhs more than last year, mostly made up of an increase of 24 lakhs of Bombay notes, diminished by a reduction of 11 lakhs in Calicut notes.

36. The encashment of Foreign Circle notes represents the transfer of funds by the public from one Circle to another, and the following statement compares, in lakhs of rupees, the net transfers thus made between each of the Cicles during the last two years. The plus figures indicate that transfers *to* the Circle exceeded those *from* it, and the minus figures represent an opposite movement:—

	1893-94.	1894-95.	Difference.
Calcutta	+420	+270	−150
Allahabad	−187	−161	+26
Lahore	−194	−62	+132
Bombay	+70	+6	−64
Karachi	−8	−13	−5
Madras	−77	−38	+39
Calicut	−6	+3	+9
Rangoon	−18	−5	+13

The most important transfers are those from Allahabad, Lahore and Bombay to Calcutta and from Bombay to Madras. The main difference in Calcutta occurs in respect of Lahore notes, the smaller net encashment of which at Calcutta accounts for 120 out of the decrease of 150 lakhs shown against Calcutta in the preceding table.

37. It is noticeable that the closing of the Mints has caused a very considerable difference in the encashment of Bombay notes by other Circles. Before the Mints were closed the transfers from that Circle always exceeded the transfers to it, but since that event the transfers to it have been in excess. The net figures for Bombay for the last five years are:—

1890-91.	1891-92.	1892-93.	1893-94.	1894-95.
−168	−68	−161	+70	+6

The difference occurs largely in the encashment of Bombay notes at Calcutta, the amounts so encashed having been in the last five years 266, 184, 258, 112 and 132 lakhs respectively. When the Mints were open, silver was chiefly imported at Bombay and tendered to the Currency Department, and the notes received in payment were to a large extent remitted to Calcutta and paid in as revenue; but this has ceased with the closing of the Mints.

ISSUE AND RECEIPT OF COIN.

38. The transactions in coin are as follows (for details by Circles see Statement VII):—

	Coin. ₹	a.	p.
Balance, 1st April 1894	22,41,16,310	0	0
Receipts—			
Over the counter	13,97,83,515	0	0
From small coin account	40,000	0	0
At Agencies	1,68,55,000	0	0
In remittance transactions—			
Between Head Office and Agencies ₹9,31,44,695			
Between Circles ₹8,09,60,000	17,41,04,695	0	0
Total Receipts	33,07,83,210	0	0
Total Balance and Receipts	55,48,99,520	0	0

		Coin. ₹	a.	p.
ISSUES—				
Over the counter		15,98,23,675	0	0
At Agencies		97,16,270	0	0
In remittance transactions—				
Between Head Office and Agencies	₹8,22,17,470			
Between Circles	₹7,61,42,000	15,83,59,470	0	0
TOTAL ISSUES		32,78,99,415	0	0
BALANCE, 31st MARCH 1895 (see paragraph 22)		22,70,00,105	0	0

39. The receipts and issues for the past three years are given below :—

	Receipts. ₹	a.	p.	Issues. ₹	a.	p.
1892-93	42,52,47,054	9	6	39,28,49,705	3	6
1893-94	38,56,14,881	2	1	33,68,84,315	2	5
1894-95	33,07,83,210	0	0	32,78,99,415	0	0

40. The net result was an increase in the coin reserve of 29 lakhs. As no fresh investment was made during the year, and as no portion of the Currency Reserve is now held in bullion, this increase exactly corresponds with the increase in the net circulation as shown in paragraph 4.

41. The receipts fell short of those of the previous year by 548 lakhs and the issues by 90 lakhs, the differences being made up as follows :—

	LAKHS OF RUPEES. Receipts.	Issues.
Over the counter	—479	—184
Remittance transactions	+99	+14
Other items	—168	+80
	—548	—90

The explanations for the receipts and issues of notes given in paragraph 29 account generally for the changes in the issues and receipts of coin.

STATE OF THE COINAGE.

42. The following table shows the withdrawal of shroff-marked coin from circulation during the year and the remittance of such coin to the Mint :—

	SHROFF-MARKED COIN. Opening balance	Receipts from the public.	TOTAL.	Remitted to Mints.	Closing balance.
	(In thousands of Rupees.)				
India	40	31	71	55(*a*)	16
Central Provinces	2	3	5	...	5
Burma	...	...	...	...	...
Assam	10	4	14	11	3
Bengal	2	4	6	2	4
North-Western Provinces	2,74	4,94(*b*)	7,68	...	7,68
Punjab	1,74	3,71(*c*)	5,45	...	5,45
Madras	12	11	23	12	11
Bombay	9	61	70	64	6
TOTAL	5,23	9,79	15,02	1,44	13,58

(*a*) Remitted to North-Western Provinces 32 and Punjab 22.
(*b*) Includes 32 received from India.
(*c*) „ 22 „ „ „

43. The total amounts withdrawn from circulation in the last six years are shown below :—

1889-90	23,44
1890-91	20,68
1891-92	20,43
1892-93	13,06
1893-94	11,87
1894-95	9,79

The steady decrease in the receipt and withdrawal of shroff-marked coin, which has been noticed in previous years, has continued during the year under report. The question whether shroff-marked coin should continue to be received as legal tender was under consideration during the past year, and it was decided not for the present to disturb the existing procedure.

44. The following statement shows the number of coins cut and broken under the Coinage Act during the calendar year 1894 :—

NAME OF PROVINCE.	Number of treasuries in which coins were cut.	Believed to have lost by reasonable wear more than 2 per cent. in weight. ₹	½₹	¼₹	⅛₹	Believed to be counterfeit. ₹	½₹	¼₹	⅛₹	Believed to have been reduced in weight otherwise than by reasonable wear. ₹	½₹	¼₹	⅛₹	Considered unfit for further circulation by reason of obliteration of device or for other causes. ₹	½₹	¼₹	⅛₹
India	8	887	1,696	...	...	1,378	26	27	9	12,187	859	474	120	...	...	...	...

Madras	25	32,581	12,754	...	...	1,475	204	178	71	184	4	...	...	...	...	...	...
Bombay	25	40,855	1,090	1	...	506	126	112	25	914	3	1	...	...	...	...	...
Hyderabad	...	1	...	...	..	2	...	...	...	6	...	...	...	...	...	...	...
	...	100,485	16,441	21	255	10,212	436	428	148	34,989	2,216	2,184	413	...	...	...	...

45. The number of counterfeit coins dealt with has increased, but the total number is not large. The withdrawal of rupees which have become light by reasonable wear has slightly decreased. Sweated rupees have again chiefly come from the North-Western Provinces, and their number has increased considerably.

46. There was no coinage of whole rupees during 1894. I append the usual statements of whole rupees coined and issued from the Indian Mints from 1835 to 1893, and of the proportion of each of those annual issues found on examination in each District Treasury of a certain number of rupees of the coin ordinarily current in each district.

Statement of whole Rupees coined and issued from the Indian Mints from 1835 to 1893.

	Coined in Calcutta.	Coined in Madras.	Coined in Bombay.	Total coined.

47. The total coinage of Rupees now current amounts to 335½ crores. There was no rupee coinage in 1894, the last rupee coined having been struck in December 1893, though small silver has been coined since then.

The rupee census of this year shows that the proportion of all the earlier coinages has risen and of the later fallen. So marked is this result that if a line be drawn down the above table to the right of the 1884 column, it will be seen that, with one single exception on each side, the proportion of each batch has increased or remained stationary in the case of the columns to the left of that line, and has decreased in the case of the columns to the right of that line.

It was remarked last year (quoting Mr. F. C. Harrison's opinion) that, though the older coinage might to a slight degree have returned to the circulation, the movement had been far less than was commonly supposed. The above return shows that the tendency to an increase in the circulation of the older coin is this year much more marked. The mere cessation of the annual additions of new coinage to the circulation would in no way account for this result, but the return to the circulation of hoarded rupees owing to the substitution of bar silver for such rupees would do so; for it is natural that the hoards should contain a larger proportion of the older rupees, both because the older coinages have been so much longer liable to be hoarded, and because the tendency to hoard is probably diminishing owing to the feeling of security which prevails and the enlarged opportunities for trading which are afforded under British rule.

The returns have been analyzed and examined by Mr. F. C. Harrison, and his note is appended to this Report. The conclusion at which he arrives is that there has been in fact an expansion of the circulation during the past year, owing to the return of hoarded and exported rupees into the circulation.

I am, on the whole, inclined to think that this view is correct; especially in consideration of the large imports of bar silver which cannot all be required for the manufacture of ornaments. But, before drawing final conclusions, it seems very desirable that local reports should be obtained as to the extent to which rupees are in fact being brought out of hoards; for though, as will be seen from the detailed returns which follow, the movement in the circulation has varied considerably in the different provinces, it will be noticed that the largest increase in the proportion of the older coins occurs, on the one hand, in Bengal and Bombay, where there have been large importations of bar silver; and, on the other hand, in Burma, where bar silver has not been imported at all and where consequently the movement must be due to other causes than that indicated above.

Proportion of the several issues of Government Rupees in actual circulation in each Province in the years 1875, 1880, 1885, 1886, 1887, 1888, 1889, 1890, 1891, 1892, 1893, 1894, and 1895 as ascertained by the examination, each year, of a bag containing R2,000 in every Government Treasury.

In what year examined.	Before 1835.	William IV.	VICTORIA. 1840. 1st issue.	1840. 2nd issue.	1862.	1874.	1875.	1876.	1877.	1878.	1879.	1880.	1881.	1882.	1883.	1884.	1885.	1886.	1887.	1888.	1889.	1890.	1891.	1892.	1893.	1894.	Ulwar.	Surat, Arcot and Portuguese.	Total.

* So shown in the returns, which must, however, be erroneous as no Rupees of 1894 were coined. The error was confined to a single treasury.

Proportion of the several issues of Government Rupees in actual circulation in each Province in the years 1875, 1880, 1885, 1886, 1887, 1888, 1889, 1890, 1891, 1892, 1893, 1894, and 1895 as ascertained by the examination, each year, of a bag containing R2,000 in every Government Treasury—continued.

In what year examined.	Before 1835.	William IV.	VICTORIA. 1840. 1st Issue.	1840. 2nd Issue.	1862.	1874.	1875.	1876.	1877.	1878.	1879.	1880.	1881.	1882.	1883.	1884.	1885.	1886.	1887.	1888.	1889.	1890.	1891.	1892.	1893.	1894.	Ulwar.	Surat, Arcot and Portuguese.	Total.

EXCHANGE OF SMALL COIN.

48. The receipts and issues of small change at the Currency Offices during the year were as follows :—

	Receipts.			Issues.			Net Issues.		
	R	a.	p.	R	a.	p.	R	a.	p.
Half Rupees	7,34,691	0	0	13,22,615	0	0	5,87,924	0	0
Quarter Rupees	11,69,505	4	0	18,40,643	8	0	6,71,138	4	0
One-eighth Rupees	7,42,223	8	0	11,62,176	14	0	4,19,953	6	0
Copper	4,71,732	2	9	4,49,482	1	6	—22,250	1	3
TOTAL	31,18,151	14	9	47,74,917	7	6	16,56,765	8	9
TOTAL, 1893-94	27,16,363	7	2	43,58,787	14	11	16,42,424	7	9

The transactions have been rather larger than last year, but the total net issues have varied but slightly. The receipts of copper appertain almost entirely to Calcutta (which is responsible for Rs. 4,70,548 out of the total of Rs. 4,71,732), and the issues (Rs. 3,41,449) are also much larger there than in any other office.

AGENCIES.

49. The only Province in which the Currency Agency system, properly so called, is at all thoroughly worked, is the Punjab. The issue of notes from the Agencies in that Province at Simla, Rawal Pindi, Umballa, and Peshawar, shows a slight falling-off, the total issues amounting to 1,58 lakhs against 1,64 lakhs in 1893-94 and 1,58 lakhs in 1892-93. The issues from Agencies form a very large proportion (18 per cent.) of the total issues in this Circle.

50. The other so-called Agencies are really Currency chests, established with the object of more conveniently and rapidly effecting the resource operations of Government, as explained in full detail three years ago. This system is being developed every year.

At the end of the year, the total number of Currency chests was 101 against 88 in 1893-94, and the total balance of coin deposited in them was upwards of 724 lakhs of rupees against 586 in 1893-94 distributed as follows :—

	1893-94. R	1894-95. R
Calcutta Circle	1,08,68,578	1,63,32,573
Allahabad ,,	1,42,75,000	1,83,50,000
Lahore ,,	1,40,74,317	1,55,30,276
Bombay ,,	76,90,000	1,13,61,000
Madras ,,	75,82,500	1,01,95,000
Rangoon ,,	41,16,640	6,57,670
	5,86,07,035	7,24,26,524

CLAIMS ON LOST NOTES.

51. The following is a statement of lost and mutilated notes paid during the year on bond of indemnity :—

Nature of loss.	Number of notes for Rupees.								Total.	
	5	10	20	50	100	500	1,000	10,000	Number.	Value.
Whole notes, lost or destroyed	...	...	...	2	17	2	1	...	22	3,800
Half notes { lost by post	16	90	36	47	160	6	4	...	359	27,050
Half notes { lost accidentally	21	143	46	77	284	19	7	...	597	51,205
Mutilated notes	16	78	10	7	29	3	1	...	144	6,810
1894-95	53	311	92	133	490	30	13	...	1,122	88,865
1893-94	40	260	111	105	416	34	12	...	978	80,870
1892-93	34	250	83	139	444	40	20	...	1,010	95,680

52. The total value of claims on lost and mutilated notes is, as remarked in previous reports, infinitesimally small when compared with the value of the notes in circulation. The number and value of notes has increased slightly, but the value is considerably less than in 1892-93. A very large proportion of the claims arises in Calcutta.

FRAUD AND FORGERY.

53. The forgeries which came to light during the year were as follows :—

R	Number.
5	12
10	25
20	2
100	11
500	2
1,000	1
	53

The most important forgery was that of notes of Rs. 100 of which further details are given in para. 57.

54. The number of forged 5-rupee notes presented shows no variation from last year. There were no new forgeries; 7 were of the Rangoon series $\frac{Q}{11}$, 3 of the Calcutta series $\frac{R}{74}$, 1 of the Bombay series $\frac{S}{73}$, and 1 of the $\frac{U}{40}$ series, a clumsy forgery as explained last year.

55. Of the 10-rupee notes, twenty are old forgeries, eighteen belonging to the $\frac{R}{85}$ series, an old and extensive forgery mentioned in previous reports. The re-appearance of notes of this series in large numbers is somewhat suspicious, as the forger was released on the expiration of his sentence in July last. The remaining five belong to the extensive forgery of notes of this denomination which was discovered in Jessore in 1893-94, and was described in the report for that year.

56. The two twenty-rupee notes were the product of an old forgery.

57. Of the notes of Rs. 100, ten pertained to a single forgery, the series being $\frac{T}{8}$, $\frac{T}{12}$ and $\frac{T}{28}$, which belong to the Madras Circle though the notes purported to be Bombay Circle notes. The notes are reported to be fairly good imitations, produced apparently by some photographic process; and as the forgery appeared to be an extensive one, Government offered a reward of Rs. 5,000

for information leading to the conviction of the offenders. Several of the notes were traced to a single village in the Bhaunagar State, and a Police officer was deputed to make a special enquiry and, with the hearty co-operation of the police of the State, he succeeded in tracing out the offenders.

Two men were arrested and charged before the Bhaunagar Courts with having forged and uttered the notes. They were convicted by the lower Court, but on appeal one was acquitted and the other was convicted of uttering only, and not of forging, and was sentenced to 10 years' imprisonment. Other persons have been arrested in connection with the same forgery and are still under trial.

The remaining 100-Rupee note appears to be a new and isolated forgery; it belongs to the Calcutta series $\frac{V}{41}$ and was tendered to the Post Office, Bhagalpur. No clue to the forger has been obtained.

58. Of the Rs. 500 notes, one of the $\frac{R}{94}$ series belongs to the Etawah forgeries for which Thakur Das and his accomplices were a few years ago sentenced to various terms of imprisonment. A man was detected in the Muttra District attempting to borrow money on a pledge of half of this forged note; he was placed on his trial for uttering it, and was convicted and sentenced to 10 years' imprisonment.

The other note is of the $\frac{R}{64}$ series and was presented at the Allahabad Office. It is a poor specimen and probably belongs to the same series as that just mentioned.

59. The 1,000-rupee note was received from the Sambhur Treasury. It is a new forgery ($\frac{V}{18}$ Calcutta). It was eventually traced to one Kandhai Lal in Cawnpore who could not account for his possession of the note, and was accordingly placed on his trial but was acquitted. No further clue has been obtained.

60. Besides the cases enumerated above, a prosecution for a suspected forgery was instituted at Burdwan. The Police received information, which led them to search the house of one Bissesar, where some suspicious liquids and the fragments of a note for Rs. 1,000 pasted between two pieces of glass were found. The fragments appeared, however, to belong to a genuine note; and no forged notes being found, the Magistrate held that the evidence was insufficient to show that forgery was attempted or intended, and the accused was accordingly discharged.

61. There were two or three cases of attempted fraud of the usual kind in respect of claims on half notes, etc., but none presented any features meriting special mention.

REMITTANCES OF SILVER.

62. The following is the detail of silver remittances:—

	R
Through Circle Offices—	
Allahabad to Calcutta	1,00,00,000
Bombay to Karachi	25,90,000
Bombay to Rangoon	30,00,000
Karachi to Bombay	5,000
Through Agencies—	
Allahabad to Calcutta	1,00,00,000
Allahabad to Lahore	60,00,000

63. Owing to the utilisation of Currency Agencies for facilitating the resource operations of the general Treasury, these remittances, though made through the Currency Department, are partly due to Treasury requirements. The figures in para. 34 show that Allahabad notes to the extent of 144 lakhs net (*i.e.*, deducting Calcutta notes cashed at Allahabad) were encashed at Calcutta. The large remittance of 2 crores from Allahabad to Calcutta is a consequence partly of these remittances and partly of the large surplus of Revenue transferred to Currency chests and not required for trade purposes owing to slackness of business. Thirty lakhs were sent from Bombay to Rangoon to meet the trade demands for funds, this transfer being in reality a convenient method of moving the money from Bombay to Calcutta, where it is required by Government. Lahore is always in deficit, the transfers to the Treasury absorbing large amounts to make up a portion of which 60 lakhs of coin were remitted from the Moradabad and Meerut Agencies.

TREASURY STATISTICS.

64. The transactions in notes at the several Treasuries in India during 1892-93, 1893-94, and 1894-95 have been as follows:—

	1892-93.	1893-94.	1894-95.
	R	R	R
Receipts from the Public in payment of Government dues	14,66,58,760	13,09,88,093	14,69,48,715
Receipts from the Public in exchange for silver	3,79,30,257	2,96,51,857	3,37,97,101
Receipts from the Public for other notes	30,03,963	26,22,775	28,65,120
TOTAL RECEIPTS	18,75,92,990	16,32,62,725	18,36,10,936
Issues to the Public in payment of Government dues	4,20,91,645	5,74 51,680	6,34,63,665
Issues to the Public in exchange for silver	4,33,08,767	4,11,59,365	3,83,79,781
Issues to the Public for other notes	30,03,963	26,22,775	28,65,120
TOTAL ISSUES	8,84,04,375	10,12,33,820	10,47,08,566

The receipts show a considerable and the issues a slight increase. The issues would be larger if we could always issue notes when demanded; but the greater part of the Government Revenue being collected in silver, payments in the mofussil must to a large extent be made in silver also. We cannot send notes to surplus Treasuries, even though they be in demand.

65. The total Treasury transactions in notes during the last three years have been as follows (in lakhs of rupees) :—

	1892-93.	1893-94.	1894-95.
Government of India	514	300	361
Central Provinces	58	53	59
Burma	77	52	66
Assam	62	69	78
Bengal	606	572	562
North-Western Provinces and Oudh	346	289	278
Punjab	235	423	479
Madras	474	392	510
Bombay	381	487	482
Hyderabad	7	7	7
TOTAL	2,760	2,644	2,882

The figures show curious fluctuations from year to year which do not admit of any general explanations.

66. The following statement gives details regarding the encashment of notes by Treasuries :—

	1892-93.	1893-94.	1894-95.
Where notes were cashed throughout the year to the extent of the public demand	170	176	188
Where notes were ordinarily but not always cashed	53	51	38
Where notes were not usually cashed	20	18	18
TOTAL	243	245	244

The number of Treasuries where notes are not usually cashed remains at the figure 18 as in 1893-94.

67. Statement V shows the proportion of Treasury and Bank balances, which in each Province were held in the form of Currency Notes.

Including Reserve Treasuries the percentage of balances held in notes was :—

	1893.	1894.
Calcutta Circle	68 per cent.	64 per cent.
Bombay ,,	76 ,,	53 ,,
Madras ,,	24 ,,	27 ,,

But if Reserve Treasuries were omitted the figures would be :—

	1893. Balance in		1894. Balance in		Percentage of Notes.	
	Notes.	Cash.	Notes.	Cash.	1893.	1894.
	In thousands of rupees.				Per cent.	Per cent.
Calcutta Circle	34,40	1,83,01	57,28	2,34,96	15	19
Bombay ,,	17,35	1,00,70	19,23	91,07	14	17
Madras ,,	16,86	1,18,22	23,38	1,11,11	12	17

RECEIPTS AND EXPENDITURE.

68. The figures of receipts and expenditure given in Statement III are only approximate, as the accounts for 1894-95 are not yet closed. The actual receipts in 1893-94 were less by ₹43, and the expenditure more by ₹929, than the approximate figures given in last year's report. Details of the differences are given in the foot-note to Statement III. The charges for 1894-95 were more than in the previous year by ₹47,000 due almost entirely (₹44,000) to increased charges for note forms.

No.

Note upon the Rupee Census.

I give below the same table as I gave last year showing the composition of the circulation. It is constructed, as was then explained, by weighting the provincial figures according to their importance.

The composition of the rupee circulation.

	1876.	1877.	1878.	1879.	1880.	1881.	1882.	1883.	1884.	1885.	1886.	1887.	1888.	1889.	1890.	1891.	1892.	1893.	1894.	1895.

An attempt has been made this year to ascertain the nature of the circulation of our two great cities Bombay and Calcutta, which each contain more than three-quarters of a million of inhabitants. The table that follows has been derived from an extensive examination over a considerable period of the receipts at the Municipal Offices of these cities. For the sake of comparison, I place in juxtaposition the figures showing the composition of the Bombay and Bengal circulations together with the general average for all India:—

Year of coinage.	Bengal.	Calcutta Municipality.	Bombay.	Bombay Municipality.	Mean average of the two Municipalities.	General average.
William IV	1·95	1·73	·45	·55	1·14	1·54
1840 (1st Issue)	4·55	3·73	1·8	1·92	2·82	4·4
Do. (2nd Issue)	10·9	10·91	7·6	7·5	9·2	11·23
1862	18·1	17·26	18·2	16·8	17·03	19·85

Year of coinage.	Bengal.	Calcutta Municipality.	Bombay.	Bombay Municipality.	Mean average of the two Municipalities.	General average.
1874	·95	·89	·55	·51	·72	·79
1875	1·15	1·06	1·	1·	1·03	1·19
1876	1·3	1·59	1·3	1·27	1·43	1·45
1877	5·05	3·8	2·45	2·73	3·27	4·26
1878	3·2	2·92	2·	2·01	2·46	2·95
1879	2·1	2·08	2·2	2·07	2·07	2·61
1880	1·85	1·7	3·2	3·08	2·39	2·60
1881	·5	·58	·25	·17	·38	·39
1882	2·8	2·34	2·65	2·71	2·52	2·92
1883	1·15	1·39	7·5	·73	1·06	1·02
1884	1·75	1·98	2·2	2·11	2·05	2·16
1885	4·05	3·32	3·75	3·56	3·44	4·18
1886	2·15	2·84	2·75	2·69	2·76	2·39
1887	5·9	5·65	3·3	3·73	4·69	4·50
1888	3·05	3·52	4·75	4·7	4·11	3·58
1889	4·1	5·01	3·9	3·81	4·41	3·87
1890	6·25	6·72	8·05	8·04	7·38	6·03
1891	3·05	3·85	6·75	6·69	5·27	3·87
1892	8·8	8·92	9·35	9·8	9·36	6·82
1893	5·35	6·21	10·8	11·82	9·01	5·42

As was anticipated, this investigation shows that the circulation of these cities is composed of newer coin than that generally in use either in these Presidencies or elsewhere. I do not, however, propose to raise the general average on this account, for the circulation in Central India, Rajputana, Mysore and other Native States is probably at least as large or larger than in these cities and is certainly of an older type than the average. Proceeding then upon my first table it will be noted that this year the mintages of 1892 and 1893 constituted 12·22 per cent. of the circulation. The coinage, however, for these two years was 18·33 crores. We cannot, however, argue that the above percentage is equal to this number of crores, for these mintages must have suffered some loss since their emission, and have also not yet entered completely into the circulation. Taking the former point first—from figures kindly furnished to me by Mr. O'Conor,—I find that the sea export of rupees from August 1893 to May 1895 was about 177 lakhs of rupees, whilst the import was somewhat greater. The mintages, however, of 1892 and 1893 during this period constituted about 11 per cent. of the circulation. It is, therefore, reasonable to suppose that 11* per cent. of 177 lakhs has been exported. Of this 19 lakhs, a considerable quantity must have returned in the recorded and unrecorded import. Again some of these mintages (not much, for they are scarce in the north for some years after issue) must have crossed our land borders. A few must have been melted and hoarded, though melting must be less practised than formerly, and there are indications that hoarding is less common. We shall,

* Coin is not picked for export.

therefore, I think, be making a liberal allowance, if we assume that the loss of these mintages amounted to 30 lakhs.

I now come to the deduction to be made on account of new unissued coins. Lahore holds none. Allahabad has about 19 lakhs. I hold about 15 lakhs. Bombay has about 3 crores and 28 lakhs. At my request Mr. Barrow very kindly has made an attempt to ascertain its nature by examining at random 200 bags. The result is given below:—

9	bags were of	1893 coin.
57	ditto	1892 ,,
16	ditto	1891 ,,
108	ditto	1890 ,,
4	ditto	1889 ,,
6	ditto	Earlier coin.

In the absence of more perfect information we may take it that 1 crore 9 lakhs is therefore coin minted in 1892 and 1893. Calcutta holds 228½ lakhs at the Fort and 35½ lakhs at the Currency Office which may be new coin, for in 1893 the remittances from Bombay were upwards of 350 lakhs. Now when we take into consideration (1) the facts disclosed by the Bombay Examination, (2) the date of receipt, *i.e.*, more than 18 months ago when coin of earlier years must have been a large part of the Bombay stock, (3) the fact as shown by last year's census that the 1890 and 1891 coinages were not so largely represented in the circulation as was to be expected, and (4) that much of this 228½+35½ lakhs may be old coin received from the public, we may not unreasonably hold that the quantity of 1892 and 1893 coinage in this stock is not very large. I propose to place it at 88 lakhs. In this connection, I wish very respectfully to point out that the question of the composition of the Government reserves vitally affects these calculations. Instead of making a resort to hypotheses more or less probable a necessity, Government could settle the matter by examining at random about 25 per cent. of the Calcutta and Bombay reserves. The cost of doing this would not be very great, and in view of the importance of the question and the fact that each year these calculations will become more speculative owing to the absence of fresh data, it should not stand in the way.

To return, however, to the question of deduction, we now have 30+19+15+109+88=261 lakhs. Deducting this total from 18·33 crores, we get 15·72 crores. To ascertain the circulation, our formula will be—

12 : 22 : : 100 : 15·72

and the result is 128 crores.

I now pass to a consideration of the meaning of the alterations in the percentages of this year's census. It is noticeable that the percentages of all the earlier years from 1835 to 1876 have all increased (except the 2nd issue of 1840) whilst the percentages of the later years have diminished. *Ceteris paribus*, these alterations could be due to—

(*a*) a reappearance of the old mintages coupled with a slight reappearance of the new mintages; or

(*b*) a disappearance of the old mintages coupled with a greater disappearance of the new mintages; or

(*c*) a reappearance of the old mintages coupled with constancy of the new; or

(*d*) a disappearance of the new coupled with constancy of the old; or
(*e*) a reappearance of the old coupled with disappearance of the new.

Alternatives (*a*) and (*b*) involve a considerable expansion or contraction of the circulation. An adequate cause for either state of things does not exist. The remaining three alternatives are all possible solutions. Alternative (*c*) would mean an expansion, alternative (*d*) a contraction of the currency, whilst alternative (*e*) might mean either, or a constant circulation. The question, therefore, is which of these solutions most probably represents the facts. Now reappearance of a mintage must either be from outside India or from hoards. Statistics already quoted show that the reappearance of coin from abroad cannot have been of any great moment. Moreover, such reappearance would not be of coins materially older than that mainly current. I take it, therefore, that there has been a reappearance from hoards. Old coin having been longer in existence must have suffered more from hoarding and conversely gains more when hoards return to the circulation. Assuming, then, it to be a fact that coin has returned from hoards, it may be that coin has come back from old and new mintages in quantities such that in the latter case the accession is only equal to the loss: this is alternative (*c*). Or it may be that the disappearance of the new is greater than its accession, whilst in the case of the old the two are equal: this is alternative (*d*). Or it may be as in alternative (*e*), the old coinages have gained more than they have lost whilst the new coinages have lost more than they have gained. In this case (alternative (*e*)) the circulation has contracted, expanded or remained constant according as the old coinages have gained more or less or the same as the new coinages have lost. I do not, however, think that this alternative (*e*) correctly represents the facts, for if on balance the old coinages have gained and the new coinages lost, I should have expected this movement in opposite direction to have had a greater effect upon their percentages as shown in the census. Again alternative (*d*) is not quite so probable as alternative (*e*). Melting is now less practised, hoarding for the present has not only ceased but accumulations are returning to the circulation. The causes for disappearance are therefore less operative than before. There is, therefore, some ground for the belief that the circulation has slightly expanded this year, or if it has not expanded, that it has remained nearly constant. As, however, the independent line of reasoning followed in the earlier part of this note points also to the conclusion that the circulation has expanded, we may, with some confidence, hold that there has, in fact, been a slight expansion. We may perhaps place it at about three crores.

16th July 1895.

FINANCE AND COMMERCE DEPARTMENT
Calcutta, 1st August, 1895.

J. F. FINLAY,
Secretary to the Government of India

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the Week ending at 8 a.m. on Saturday, July 27th, 1895.

During the past week the weather has been showery throughout almost the whole country. Pressure has been highest in the extreme south and lowest in the Punjab with, on some days, a slight depression over Bengal, while the pressure differences over India have been rather larger than usual. Monsoon winds have prevailed all over the country, except perhaps over the Gangetic plain, where the normal south-easterly current from the Bay was less developed than is ordinarily the case. On the West Coast, and more particularly on the Kathiawar, Sind, and North Konkan Coasts, the monsoon has blown very strongly, and at times at the head of the Bay the force has been above the average, but elsewhere the wind has had less than its normal force. The mean temperature has been generally slightly above the average—more particularly on the last two days of the week, when, owing to the rainfall ceasing altogether over Sind, Rajputana, and the Punjab, the mean temperature became very excessive over those provinces, and raised the general average of the whole country. The day temperatures over the Central and Southern Punjab and Rajputana reported on the 27th were exceedingly high.

Daily Summary.—*Sunday.*—The barometer had risen over Southern and fallen over Northern India. In consequence gradients had suddenly increased, and the pressure difference had risen to 0·476 inch. The wind was southerly in Burma and the Indus Valley, south-west to south-east in Bengal, south-easterly to easterly in the north of the Punjab and on the hills, and south-westerly to westerly elsewhere. The directions were hence abnormally westerly over the Gangetic plain, and southerly in the Indus Valley, but were fairly normal elsewhere. The mean temperature was excessive in the extreme north-west, and about normal elsewhere. Rain had been general over North-Eastern India, Central India, and the west of the Peninsula, and showers had occurred elsewhere.

Monday.—Pressure had decreased almost everywhere—more in the north than in the south—and the pressure difference had mounted to 0·61 inch. The winds were little changed in direction, and there had been no increase of easterly winds in the Gangetic plain. The force was strong on both sides of India. The mean temperature was still excessive in the extreme north-west, and nearly normal elsewhere. Rain had extended somewhat up the Gangetic plain, and had become heavier in North Bengal, while, on the contrary, it had fallen lighter on the West Coast.

Tuesday.—The pressure changes were irregular, but on the whole downward, and the pressure difference between Southern and Northern India was 0·592 inch. A shallow low pressure area was shown over Bengal and Bihar. The winds were still abnormally westerly and south-westerly in Northern India, but blew from about the usual quarters elsewhere. The force was fresh to strong along the west coast of India. The mean temperature had fallen very generally, though it still remained excessive in Sind and Rajputana. Over North-Western India only scattered rainfall had been received, but in other parts of the country the fall had been fairly general.

Wednesday.—Pressure had increased over Western and decreased over Eastern India. In the Punjab the rise had been brisk to rapid, and as a consequence the area of lowest pressure had been transferred southward, and lay over Upper Sind instead of over the Western Punjab. In other respects conditions were little changed, and the pressure difference amounted to 0·474 inch. The winds were light and variable over the Gangetic plain and the Punjab, but blew from the normal directions elsewhere. The force was high on the coasts of the Bombay Presidency. The mean temperature had generally decreased, and was low over Northern India and Madras. General rain had fallen over North-Eastern India, and showery weather in most other parts of the country, but in Sind, Rajputana, and South Madras there had been no rain.

Thursday.—The barometer had risen, except in Lower Burma, but the general distribution was not much changed, though the pressure difference between Ceylon and Northern India had decreased to 0·453 inch. The winds remained light and irregular over the Gangetic plain and the Punjab, and were feebly cyclonic in Bengal, but elsewhere the directions were fairly normal. The mean temperature had increased slightly. Little or no rain had fallen over the Punjab, the Hills, the Bombay Deccan, Gujarat, Sind, Rajputana, and Madras. Elsewhere it has fallen generally, though lightly.

Friday.—Pressure had generally increased in the north, and decreased in the centre and south. The pressure difference between Ceylon and the Punjab had hence again decreased, and amounted to 0·447 inch. The winds were little changed generally, but some instances of south-east winds were shown over the Gangetic plain. The mean temperature was generally above the normal, except in the North-Western Provinces and Madras. In the Punjab, Sind, and Rajputana the excess was large. The rainfall had again been light, and the distribution had been rather irregular.

Saturday.—Pressure had decreased over the greater part of the Indian region, the fall in most places being brisk to rapid. The distribution of pressure was almost normal, and the winds were normal, except over the Gangetic plain, where the south-east current from the Bay was still undeveloped. The mean temperature continued excessive in nearly all places, but especially so in the north-west. The rainfall had been very heavy at Nagpur, and moderately heavy at several of the more central stations, but was again very light over a large part of North-Western and Northern India.

Temperature.—The mean temperature, though less excessive than on several days of last week, has yet been, for the whole of India, above the normal average on most days of the week. The general excess amounted to about 1° on the 21st and 22nd and to about 1½° on the 26th and 27th, while on the three intervening days the mean was nearly normal. The following table gives the variations of the mean temperature from the normal in the different provinces of India for each day of the week:

Province.	July 1895.							Mean variation of week.
	21st	22nd	23rd	24th	25th	26th	27th	
	°	°	°	°	°	°	°	°
Burma	+1·4	+0·4	—1·0	0	+0·9	+1·6	+1·7	+0·7
Bengal and Assam	—0·3	—0·9	—2·4	—1·5	—0·7	+0·4	+0·7	—0·7
North-Western Provinces and Oudh	+1·4	+0·7	—1·1	—2·4	—0·8	—1·1	+1·1	—0·3
Punjab	+3·6	+2·7	+1·3	—2·2	+1·0	+4·6	+6·8	+2·5
Bombay	—0·5	+1·1	+0·8	+0·8	+0·9	+0·2	+1·0	+0·6
Central Provinces and Berar	—0·5	+0·1	+0·4	—0·1	+0·1	+0·4	—1·0	—0·1
Central India and Gujarat	+0·2	0	+0·3	+0·2	+0·6	+0·9	+0·9	+0·4
Sind and Rajputana	+3·6	+3·6	+3·3	+2·3	+2·9	+4·6	+4·6	+3·7
Madras	—0·1	+0·1	—2·1	—2·8	—1·3	—0·8	—0·6	—1·1
Mean for whole of India	+1·0	+0·9	—0·1	—0·6	+0·4	+1·2	+1·7	+0·6

The mean temperature of the whole country for the whole week was ½° above the average. The provincial variations showed a mean excess of 3·7° for Sind and Rajputana and of 2·5° for the Punjab, but elsewhere the variations were small and unimportant. The following are the highest recorded maxima on each day of the week. They were all recorded in the extreme north-west, and were in each case largely above the average:

On July	21st	the highest maximum reported was	113·2°	at Jacobabad.
„	22nd	„ „	111·8°	„ „
„	23rd	„ „	115·1°	„ „
„	24th	„ „	109·3°	„ „
„	25th	„ „	107·1°	„ Dera Ismail Khan.
„	26th	„ „	110·3°	„ Jacobabad.
„	27th	„ „	112·2°	„ „

Rainfall.—As was shown in the previous sections, there has been no cyclonic storm to affect the rainfall during the past week, and the weather has been determined by the existence of steady normal monsoon conditions. As a consequence the reports have exhibited more or less general moderate rain without any of those heavy downpours which characterise the weather during the existence of cyclonic storms. The region of least steady rainfall was the north-west, where, except under exceptional conditions, the monsoon rainfall is normally lighter and more precarious than that of other parts of India. The table at the close of the summary shows the rainfall data. During the week ending on July 27th rain fell in all the rainfall divisions, except Sind, the average actual rainfall received ranging from 13·88 inches in Tenasserim to 0·28 inch in Madras (Central). In normal years the rainfall for the week under review ranges from 10·68 inches in Tenasserim to 0·29 inch in Madras (South), so that as regards general distribution the actual and normal rainfall agree fairly closely. As regards details, however, considerable differences in the distribution are shown. The third column of the table exhibits these differences. In the case of twenty-two divisions the actual rainfall has been in excess of the normal, while in twenty-nine it has been in defect. This is an improvement as compared with last week, when in only seventeen divisions was any excess recorded. The regions which received an excess during the week under review include the following divisions: Tenasserim; Lower Burma; Arakan; East, Central, and North Bengal; the Surma division of Assam, Chota Nagpur, and both the Bihar divisions; both the Oudh divisions; the east and submontane divisions of the North-Western Provinces; Khandesh; Berar; the north, north (*a*), central and south divisions of the East Coast; Hyderabad (South); and the south division of Madras. All other parts of the country received less rain than usual. The most marked instances of excess were 3¼ inches in Tenasserim and the North-Western Provinces (East), and over 2 inches in Bihar (North and South), Oudh (South), and the East Coast (North (*a*)), while the most marked cases of defect were 3·95 inches in Coorg, 3·05 inches in the hill districts of the Punjab, and 1·89 inches in the Konkan. The comparative absence of rainfall over the Gangetic plain and the Punjab appears to have been due to the absence of the normal south-east current from the Bay over that region, the lightness of the rainfall over the Central Provinces, Rajputana, and the North of Bombay to the existence of abnormally high pressures over that district, and the scanty rainfall over the west of the Peninsula to a somewhat feeble monsoon over the centre of the Arabian Sea.

The returns of the sudder stations show that rain fell practically on all days of the week over Tenasserim, Lower Burma, Central Burma, Arakan, Assam, Bengal, the North-Western Provinces, Malabar, Coorg, the Konkan, the Deccan, Khandesh, the central parts of the country, and Ganjam; principally on the 22nd, 23rd, and 24th in the Punjab, on the 21st, 22nd, and 23rd in Mysore; from the 21st to the 25th in Gujarat and Kathiawar; and on the 21st, 22nd, and 23rd in Madras.

The three concluding columns of the table show the state of the seasonal rainfall. In the majority of cases the actual seasonal rainfall exhibits departures of less than 20 per cent. from the average, and in these cases the rainfall may be regarded as fairly normal. Deficiencies exceeding 20 per cent. are reported from Arakan, East Bengal, Deltaic Bengal, Central Bengal, the Central Punjab, the submontane division of the Punjab, Mysore, Berar, Gujarat, Sind, Central India, Rajputana, and South Madras. The principal cases of excess are shown by Ganjam and Orissa.

The following are the more important total falls recorded during the week ending on the 27th: Amherst (Tenasserim) 13·88 inches, Maubin 11·27 inches, Akyab 16·15 inches, Chittagong 12·74 inches, Cherrapunji 26·48 inches, Thakurgaon (Dinajpur) 12·59 inches, Buxar 11·64 inches, Kandipur (Sultanpur) 16·79 inches, Jagraon (Ludhiana) 4·77 inches, Dharmsala 11·95 inches, Beltangady (Mangalore) 9·83 inches, Bavda (Satara) 14·36 inches, Marwara (Jubbulpur) 25·47 inches, Kazole (Godaveri) 7·12 inches.

SIMLA, *1st August 1895.*

W. L. DALLAS,
Asst. Meteorological Reporter to the Government of India.

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 27th July.*—Rainfall good in the Circars, on the West Coast and Nilgiris, and in parts of the Carnatic and Central districts; light rain elsewhere. Agricultural operations are progressing. The standing crops are generally fair, but more rain is needed in parts of the Carnatic, Central and Southern districts. Pasture is improving, and fodder is available. The condition of cattle is generally good. Prices are slightly easier in the Circars; have risen in parts of the Central and Southern districts, but are stationary elsewhere.

Bombay.—*For week ending 31st July.*—Rain generally sufficient in the Konkan and Gujarat; moderate or slight elsewhere. More rain is wanted urgently in Sind and in parts of the Deccan and Carnatic. The river continues low in Sind, agricultural operations are generally suspended, and the crops are suffering owing to deficiency of water. Sowings of the early crops are progressing in eleven districts, but are retarded in parts of Ahmednagar owing to excessive moisture. Transplantation is progressing in four districts, but is retarded in parts of two owing to insufficient moisture. Preparations for the late crops are progressing in parts of five districts. Fodder is sufficient, and agricultural stock are in good condition, except in parts of Sind and Broach. Prices are normal, except in two districts of Sind and three of the Deccan.

Bengal.—*For week ending 29th July.*—There was sufficient rain throughout the Province during the week, except in the Burdwan and Presidency divisions, where the rainfall is still scanty, and is causing some apprehension. Except in those two divisions, the cultivation of the winter rice crop is progressing favourably, and the prospects of the early rice and jute crops and of other autumn crops and also of sugarcane are satisfactory. In parts of North and East Bengal early rice and jute are being harvested. The price of common rice continues steady.

North-Western Provinces and Oudh.—*For week ending 31st July.*—Rain has been general during the week, and in most districts the fall was heavy. The autumn crops are flourishing, and agricultural prospects have generally been improved by the rainfall. The sugarcane crop has been damaged by insects in one tahsil of Farukhabad, and the rice crop has slightly suffered from drought in Lalitpur, Jhansi district. Supplies are sufficient, and prices fairly steady, but have fallen in a few districts.

Punjab.—*For week ending 31st July.*—Rain has fallen in all districts, except in Multan and Peshawar. The autumn sowings are in progress in Delhi and Lahore, but rain is wanted in Hissar, Amritsar, Lahore, Shahpur, and Multan. The rainfall has benefited the crops in Hissar and Umballa. The condition of the standing autumn crops is good to fair in Lahore, Amritsar, Dera Ismail Khan, Peshawar, and Multan. The crop prospects are average in

Rawal Pindi. The river is very low in Dera Ismail Khan. The autumn crops are being damaged, and fodder is drying up in Jullundur for want of rain. Cattle are generally in good condition, and fodder is sufficient in all districts, except in parts of Lahore. Prices are high in Umballa, rising in Jullundur and Peshawar, approaching normal in Sialkot, and low elsewhere.

Central Provinces.—*For week ending 31st July.*—Weather cloudy and cool. Rain has been general with very heavy falls in Nagpur and Saugor; more rain is required in the rice districts of Raipur and Seoni. The breaks during the month have been suitable for weeding operations, and prospects are favourable. Prices are steady.

Burma.—*For week ending 27th July.*—In Lower Burma ploughing and sowing have been completed in Akyab; elsewhere ploughing, sowing, and transplanting are in progress. In Upper Burma reaping of the early wet-weather paddy continues in Mandalay and Kyaukse. There is a general complaint of want of rain in the districts of Mandalay, Shwebo, Sagaing, Lower Chindwin, Thayetmyo, Pakokku, Minbu, Magwe, Meiktila, Yamethin, and Myingyan. Ploughing and sowing are retarded, and nurseries where sown are withering. The standing crops of sesamum and cotton are also withering, and the want of rain is now becoming serious. In Kyaukse the nurseries at the tail of canals are withering; in other districts the crop prospects are good. The price of paddy has fallen considerably in Thayetmyo, and slightly in Upper Chindwin; elsewhere prices are stationary.

Assam.—*For week ending 30th July.*—Weather seasonable. Late rice seedlings have been damaged by floods in Kamrup and Sibsagar. Tea is doing well. The condition of cattle is fair. Fodder is abundant, except in Kamrup. Water is sufficient.

Mysore and Coorg.—*For week ending 31st July.*—MYSORE: Rainfall good in the Bangalore, Kadur, and Shimoga districts; slight rain elsewhere. The standing crops are in good condition. Sowing operations continue. Prospects of the season are generally good. Prices have fallen in Kadur and Chitáldroog.

COORG: Rainfall good. Transplanting of rice continues. Prospects of *ragi* (*Eleusine coracana*), coffee, and cardamom are fair. Water and fodder for cattle are abundant. Prices are normal.

Berar and Hyderabad.—*For week ending 31st July.*—BERAR: Weather cool and cloudy with occasional light showers. The crops are in good condition. Land is being prepared for the next winter crop. Sowings are nearing completion. Weeding operations are in progress. Fodder and water are sufficient. Prices are almost stationary.

HYDERABAD: Rainfall good during the week. Sowing of the autumn crops is progressing generally, and of the irrigated crops in Warangal only. The water-supply is sufficient. Prices are normal.

Central India.—*For week ending 31st July.*—Rainfall general, but the fall is still insufficient in Baghelkhand and in some districts of Gwalior. Agricultural operations are in progress in all Agencies. The crops are in good condition, but some damage has been done in parts of Gwalior, and to the cotton crops in Bhopawar. Cattle are in good condition, except in parts of Gwalior and Bhopal. Pasturage is fairly good in all Agencies. Prices of food-grains are rising in three districts of Gwalior and in the Baghelkhand Agency, high in Bhopal and Goona, but normal elsewhere.

Rajputana.—*For week ending 31st July.*—Rainfall good in eight States, slight in seven others, no rain in Marwar. More rain is much needed in Meywar, Marwar, Deoli, Ajmere, Tonk, and Dholepore. Agricultural operations are generally satisfactory. Pasturage and fodder are generally sufficient. Prices have risen in seven States, fallen in one, high and fluctuating in another, but steady elsewhere.

Kashmir.—*For week ending 30th July.*—KASHMIR VALLEY: Weather fine. No rain. Prices continue normal.

JAMMU PROVINCE.—*For week ending 31st July.*—Rainfall slight. Weather still cloudy. The autumn crops have been slightly injured by the early rains. Cattle in good condition. Prices are rising.

Nepal.—*For week ending 27th July.*—Heavy showers have fallen during the week. The Indian-corn crop is being gathered. The outturn is good.

DENZIL IBBETSON,
Offg. Secretary to the Government of India.
