(*a*) Includes the Bhopal-Itársi railway.
(*b*) Includes the Godhra-Rutlam railway.
(*c*) Total earnings from 2nd April to 21st July 1894.
(*d*) Includes the Guntakal-Mysore frontier section.
(*e*) Includes the Tirhoot state railway. Although for convenience classed amongst state railways, the company's section of this line is the property of the Bengal and North-Western Railway Company.
(*f*) Includes the Jammu and Kashmir and the Hyderabad-Shadipalli railways.
(*g*) Although for convenience classed amongst state railways, this line is the property of the Bengal Central Railway Company.
(*h*) Includes the Wardha Coal, Dhond-Manmád, Khámgaon, and Amráoti railways.
(*i*) Total earnings from 1st June to 21st July 1894.
(*j*) Includes the Mysore-Nanjangúd and the Yesvantpur-Mysore frontier sections.

F. B. HEBBERT,
Under Secretary.

The Gazette of India.

No. 32.] SIMLA, SATURDAY, AUGUST 10, 1895.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the Week ending at 8 a.m. on Saturday, August 3rd, 1895.

The general weather has been the same as that reported last week. Pressure has been steadily highest in the extreme south and lowest in the extreme north, while the normal monsoon trough of low pressure has existed over the Gangetic plain. This trough on the 28th July and again between the 30th of July and the 2nd of August was traversed by feeble depressions travelling from the head of the Bay into North-Western India. As these depressions passed northwestward they occasioned an increase in the amount of rain over Northern and Central India, and on these occasions the rainfall became heavy in places, but as a rule showery weather only prevailed, and on several days both in the northwest of India and in the centre and east of the Peninsula even these showers were very light and scattered, or were altogether wanting. Notwithstanding this lightness of the rainfall the temperature over a large part of the country remained steadily low, so that, though in Sind, Rajputana, and the Punjab the heat was steadily excessive, the mean temperature of the whole country for the week was very nearly normal.

General Summary.—*Sunday.*—Pressure had increased over a considerable part of the Punjab and the west of the North-Western Provinces, decreased in Sind and Kathiawar, and changed slightly elsewhere. The general distribution was fairly normal, and the winds blew from about the usual directions. A small shallow barometric depression existed near Allahabad. The rainfall was fairly general, except over the extreme north-west of India and the centre and east of the Peninsula, where there was little or none. The falls were heavy in the east of the Punjab, the west of the North-Western Provinces, and the Central

Provinces. The heat was excessive in the Punjab, Sind, and Rajputana, deficient in the North-Western and Central Provinces, and about normal elsewhere.

Monday.—Pressure had increased briskly to rapidly in the north of the Punjab, but had generally changed slightly elsewhere. The distribution was little changed, though the small depression noticed near Allahabad had disappeared. The wind directions were fairly normal, except at the head of the Bay, where a slight cyclonic circulation was apparently being initiated. Showery weather continued, except over a large part of Bengal, of North-Western India, and of the Peninsula. The rainfall amounts were less than on the preceding day. The heat continued excessive in Sind and Rajputana, in defect in the North-Western and Central Provinces, and normal elsewhere.

Tuesday.—Pressure had decreased in most parts of the country—most so in South-West Bengal. A small shallow depression had appeared over the head of the Bay and South-West Bengal, but in other respects the distribution was fairly normal. The winds continued to blow from about the usual directions. The rainfall was light generally, and there had been practically none over the extreme north-west of India and over the centre and east of the Peninsula. In the east of Rajputana the amounts were large. The mean temperature was in defect in the east of the Peninsula and the west of the North-Western Provinces, in excess in the west of the Punjab and in Bengal, and about normal elsewhere.

Wednesday.—Pressure had increased, except in part of West Bengal and of the Central Provinces. The recovery was greatest over Burma and the north of the Bay. The depression which lay over the north of the Bay on the 30th had commenced to move north-westward, and the centre was near Ranchi. In other respects the pressure distribution was fairly normal. The winds were feebly cyclonic within the depression area, but blew from monsoon directions elsewhere. The rainfall area had extended somewhat, but there was still hardly any rain over a large part of the Punjab, over Sind, Kathiawar, and the centre of the Peninsula. The mean temperature was in excess over the Punjab and Sind, in defect over Eastern Rajputana and the east of the Peninsula, and about normal elsewhere.

Thursday.—Pressure had continued to increase almost everywhere, the rise being greatest and brisk to rapid over Bengal and the north of the Bay. The depression had reached the neighbourhood of Allahabad, but this was the only change in the distribution, except that the pressure difference between Northern and Southern India had decreased. The winds were feebly cyclonic near the depression, and regular in direction elsewhere. The mean temperature was in considerable excess in the extreme north-west, in considerable defect over the central parts of the country, and nearly normal in most other places. There was little or no rain reported from Upper Burma, West Bengal, the extreme north-west of India, and the Carnatic. The amounts were moderately heavy over the Central Provinces, part of the Gangetic plain, and Southern Rajputana.

Friday.—Pressure had continued to increase—most in the north—and the depression to travel north-westward. The centre was close to Cawnpore, and the pressure difference between Southern and Northern India was less than the normal. The winds were little changed, and blew from about the usual directions. The force of the monsoon over the Bay was only moderate. The heat remained excessive in the extreme north-west, and less than usual over the central parts of the country. Rain was still very light over a large part of North-Western India, over Bengal, and over the centre and east of the Peninsula. It was, on the contrary, moderately heavy near the depression and over Eastern Rajputana.

Saturday.—Pressure had commenced to decrease very generally. The fall was greatest and brisk over Ganjam, Orissa, and the east of the Central Provinces, and a fresh slight depression was apparently developing over the north-west of the Bay. The general distribution was nearly normal, but the barometer read above the average almost everywhere—the excess being rather greater in the

north than in the south. The winds blew from the usual monsoon directions. The mean temperature was excessive over the Indus Valley; deficient over the north of the Punjab and over the central parts of the country. There was little or no rain reported from Lower Bengal, the Indus Valley, Kathiawar, the west of the Central Provinces, and the Carnatic.

Temperature.—The mean temperature of the whole of India has been very nearly normal throughout the week, and the mean variation for the whole week for the whole country was only —0·3°. The following table gives the variations of the mean temperature from the normal in the different provinces of India for each day of the week:

Province.	July 1895.				August 1895.			Mean variation of week.
	28th	29th	30th	31st	1st	2nd	3rd	
	°	°	°	°	°	°	°	°
Burma	+0·8	—0·8	—0·9	—0·2	—1·4	—1·6	+0·2	—0·6
Bengal and Assam	+0·6	+0·8	+0·6	+0·2	—1·2	—1·2	—0·4	—0·1
North-Western Provinces and Oudh	—1·6	—3·6	—1·6	—0·5	+0·1	—1·2	—1·6	—1·4
Punjab	+5·0	+0·2	+0·2	+1·3	+3·0	+2·1	—1·4	+1·5
Bombay	—0·4	—0·2	+0·4	+0·3	—0·9	—0·4	+1·0	—0·1
Central Provinces and Berar	—3·6	—1·6	—0·3	—2·2	—3·9	—4·0	—0·8	—2·3
Central India and Gujarat	+0·4	—0·7	+0·5	+1·1	—0·8	—1·8	—0·8	—0·3
Sind and Rajputana	+3·7	+2·4	+0·3	+0·7	+0·9	+0·5	—0·9	+1·1
Madras	—0·6	—0·1	—1·5	—1·2	—0·4	+0·6	+0·5	—0·4
Mean for whole of India	+0·5	—0·4	—0·3	—0·1	—0·5	—0·8	—0·5	—0·3

The most important variations were the slight excess in Sind, Rajputana, and the Punjab, and the moderate to slight deficiency in the North-Western Provinces and the Central Provinces. In the Indus Valley the heat was steadily excessive throughout the week, and the following maxima which were all recorded in that region were from 5° to 10° above the normal:

On July	28th	the highest maximum reported was	113·2°	at Jacobabad.
„	29th	„ „	110·8°	„ „
„	30th	„ „	105·9°	„ Mooltan.
„	31st	„ „	110·3°	„ Jacobabad.
On August	1st	„ „	109·9°	„ Mooltan.
„	2nd	„ „	111·8°	„ Jacobabad.
„	3rd	„ „	108·9°	„ „

Rainfall.—On the whole the rainfall of the week under review has been generally similar to that reported last week, and it has been determined largely by the existence of steady normal monsoon conditions. These conditions, unlike last week, have, however, been disturbed by the passage from the Bay up the Gangetic plain of two small and shallow cyclonic storms. In consequence of the existence of cyclonic conditions, the occurrence of rainfall has been irregular, patches of heavy rainfall being shown in different parts of the country with relatively light rainfall in neighbouring regions. The heaviest and most general rainfall of the week was associated with the very slight barometric depression, which was traversing the Gangetic plain at the commencement of the week, the second and more considerable disturbance which existed during the latter half of the week producing much less effect on the weather. The table at the close of the summary shows the rainfall data. In Sind and Madras (South) no rain whatever was received during the week. In all the other divisions effective rainfall was received, though in the case of the Punjab (West) and of Kathiawar the total amount received was very small. The first column of the table shows that the

actual average rainfall of the week was heaviest, 16·81 inches, in Arakan. This was followed by 10·65 inches in Tenasserim, by 10·04 inches in the hill districts of the Punjab, by 8·98 inches in Coorg, and by over 7 inches in Lower Burma, Assam (Surma), and the Konkan. From these areas the amount of the rainfall decreased, and the smallest falls reported were 0·11 inch in the west of the Punjab and 0·10 inch in Kathiawar, while, as stated above, no rain whatever fell in Sind and Madras (South). The column of average normal amounts shows that the rainfall is ordinarily about 9 inches in Tenasserim and Arakan, about 7 inches in Coorg and the Konkan, about 6 inches in Assam (Surma) and the hill districts of the Punjab, and about 5 inches in East Bengal, while the fall is ordinarily lightest in the south-east of the Peninsula and in the extreme north-west of India. The above comparison shows that the actual and normal distributions of rainfall for the week generally agree fairly well, but that there is considerable difference between the actual and normal amounts. The third column shows that the actual rainfall was in excess of the normal in thirty divisions, and in defect only in twenty, and exactly normal in one division. The regions of excessive rainfall included the following divisions, *viz.*, all the Burma divisions, both the Assam divisions, all the North-Western Provinces divisions (except submontane (*a*)), the central and hill divisions of the Punjab, Malabar, Coorg, Mysore, the Konkan, the Bombay Deccan, Khandesh, all the Central Provinces divisions, the Central India and Rajputana divisions, and the East Coast, North and Central Divisions. The abnormal excess was greatest, $7\frac{1}{2}$ inches, in Arakan, and was large on the hills and in the central parts of the country. The above figures show an improvement as compared with the previous week, when an excess of rainfall was reported only in twenty-two divisions, and the maximum excess was only about $3\frac{1}{4}$ inches. The comparative lightness of the rainfall over Lower Bengal, which is shown in the third column of the rainfall table, is apparently attributable to the abnormal amount of easting in the winds over that part of the country. The other region of considerably deficient rainfall is the extreme north-west of India, the divisions in the south and west of the Punjab, and in North Bombay, exhibiting abnormally light rainfall. The most remarkable case of excessive rainfall is given in the returns for Western Rajputana, which show that Jodhpur received 3·90 inches of rain on July 31st and 1·20 inches on August 1st.

The returns of the sudder stations show that rain fell daily during the week in Burma, Assam, Bengal, and the North-Western Provinces, on the first two and last two days of the week in the Punjab, daily in the west of the Peninsula and over the central parts of the country, and at irregular times over the east of the Peninsula.

The three concluding columns of the table show that the seasonal rainfall is fairly normal, *i.e.*, exhibits a departure of less than 20 per cent. from the average over a large part of the country. The principal cases of deficiency are Arakan, East Bengal, Deltaic Bengal, Central Bengal, the Punjab (Submontane and West), Gujarat, Rajputana (East), and the East Coast (South), where the deficiency ranges from 25 per cent. to 35 per cent., Madras (South), where it is 53 per cent., and Sind, where it is 77 per cent. The most marked cases of excessive rain are Orissa and Ganjam.

The following are the more important total falls recorded during the week under review: Pyantaza (Pegu) 16·90 inches, Rathedaung (Akyab) 19·90 inches, Noakhalli 14·03 inches, Nemotha (Cachar) 17·61 inches, Kunch (Orai) 10·17 inches, Sardhana (Meerut) 10·72 inches, Kangra 16·60 inches, Beltangody (Mangalore) 15·91 inches, Devala (Nilgiris) 12·32 inches, Thirthahalli (Shimoga) 17·00 inches, Roha (Colaba) 14·50 inches, Bowda (Kolhapur) 18·20 inches, Umrer (Nagpur) 10·80 inches, Murwara (Jubbulpur) 10·02 inches, Thanaghozi (Ulwar) 11·40 inches.

SIMLA, *8th August 1895.*

W. L. DALLAS,
Asst. Meteorological Reporter to the Government of India.

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 3rd August.*—Rainfall good in the greater portion of the Circars, on the West Coast, and in the Nilgiris; no rain in Madura and Tinnevelly; rain generally light elsewhere. Agricultural operations are progressing. The standing crops are generally fair, but more rain is needed in parts of Cuddapah and Nellore, and in the Central and Southern districts. Pasture is improving, and fodder is available. The condition of cattle is generally good. Prices are slightly dearer in parts of the Carnatic and Southern districts; elsewhere prices are practically stationary.

Bombay.—*For week ending 7th August.*—Rainfall slight in Sind and Kathiawar; generally moderate elsewhere. More rain is wanted in Sind and in parts of the Deccan, Carnatic, and Thana. The river in Sind is rising slowly, and prospects have improved in parts, but the standing crops in Karachi, Hyderabad, and Shikarpur are still suffering for want of water. Sowing of the early crops is progressing in nine districts, and transplantation is in progress in six districts, but is retarded in parts of Thana owing to insufficient rain. Preparations for the late crops are progressing in parts of three districts. Fodder is sufficient, and agricultural stock is in good condition, except in parts of Shikarpur and Broach. Prices are normal, except in parts of three districts.

Bengal.—*For week ending 5th August.*—There was rain all over the Province during the week, but in the greater part it was below the average of the time of year. More rain is needed in many districts, and in the Burdwan and Presidency divisions the transplantation and cultivation of the winter rice crop are still very backward. The reports of the early rice and jute crops are generally fair. These crops are being harvested in some districts; and new jute has begun to arrive in Calcutta. In Bihar and Chota Nagpur the prospects of the autumn crops are favourable. The price of common rice continues almost stationary.

North-Western Provinces and Oudh.—*For week ending 7th August.*—Good and general rain has fallen during the week. The autumn crops are thriving. Weeding and transplanting are in active progress. Prospects are favourable. Supplies and fodder are sufficient. Prices are rising in a few districts; elsewhere prices are generally stationary.

Punjab.—*For week ending 7th August.*—Rain has fallen in all districts, except in Umballa, Dera Ismail Khan, and Peshawar. The autumn sowings are in progress in Delhi and Lahore, but rain is wanted for the autumn crops in Hissar, Umballa, Lahore, Multan, Shahpur, and Dera Ismail Khan. Prospects are from average to good. The crops are withering for want of rain in Hissar and Jullundur. Cattle are generally in good condition, and fodder is sufficient in all districts, except in parts of Lahore and Multan. Prices are rising in Umballa, Jullundur, and Peshawar, below normal in Sialkot, and continue low elsewhere.

Central Provinces.—*For week ending 7th August.*—The weather continues cloudy and cool. Rainfall general, as during last week, with heavy falls in the North and East of the Provinces. Rice sowings are in full swing in Raipur, but in Seoni more rain is wanted for rice transplantation. Weeding operations are in progress. Prospects continue favourable. Prices are almost stationary.

Burma.—*For week ending 3rd August.*—In Lower Burma good rain has fallen in all districts during the week. Agricultural operations are in active progress, and prospects are everywhere favourable. In Upper Burma little or no rain has fallen during the week in Mandalay, Shwebo, Sagaing, and Lower Chindwin, and prospects in these districts are very poor, though there is still hope if rain falls within the next ten days. Thayetmyo, Pakokku, Minbu, Meiktilla, and Yamethin have received amounts, varying from a quarter to half an inch, and prospects are slightly more favourable than last week, though rain is still badly wanted. The price of paddy has decreased considerably in Tharrawaddy, and slightly in Prome, Henzada, and Shwebo; elsewhere prices are stationary.

Assam.—*For week ending 6th August.*—Weather seasonable. Prospects of the crops are indifferent in parts of Lower Assam owing to floods. The condition of cattle is fair. Fodder is abundant, except in Kamrup and Nowgong. Water is sufficient.

Mysore and Coorg.—*For week ending 7th August.*—MYSORE: Good rain in parts of Mysore, Hassan, Kadur, and Shimoga; slight elsewhere. The standing crops and prospects are fair. Sowing and ploughing operations are in progress in parts. Prices are almost stationary.

COORG: Rainfall good. Transplanting of rice is in progress. *Ragi* (*Eleusine coracana*) is coming into ear. Coffee and cardamom are fair. Water and fodder for cattle are abundant. Prices are normal.

Berar and Hyderabad.—*For week ending 7th August.*—BERAR: Weather warm and cloudy with sufficient rainfall during the week. The crops generally are in good condition. Cotton and *jowar* (*Sorghum vulgare*) are thriving well. The land is being prepared for the winter crop. Sowing and weeding operations continue. Fodder and water are sufficient. Prices are nearly stationary.

HYDERABAD: Rainfall good. Sowing of the autumn crops is progressing generally. The water-supply is sufficient. Prices continue normal.

Central India.—*For week ending 7th August.*—Rainfall general, but more rain is still wanted in Neemuch. Agricultural operations are in progress in all Agencies, except in Goona where operations have been stopped by excessive rain. Prospects are fairly good in all Agencies, except in Goona. Cattle are in fairly good condition, except in Bhopal and part of Bhopawar. Pasturage is good and sufficient everywhere, except in three districts of Gwalior. Prices of food-grains are high in Bhopal and Goona, rising in two districts of Gwalior, but are normal elsewhere.

Rajputana.—*For week ending 7th August.*—Good rain almost throughout; but more rain is needed in Meywar and Bikanir. Agricultural operations are generally satisfactory. The standing crops are fair. Agricultural stock is generally in good condition. Pasturage and fodder are generally sufficient. Prices have fallen in five States, but are steady elsewhere.

Kashmir.—*For week ending 6th August.*—KASHMIR VALLEY: The prospects of the autumn crops are good. Rain is wanted for dry-land crops. Irrigation is ample for rice. Prices show a tendency to rise.

JAMMU PROVINCE.—*For week ending 7th August.*—Report not received.

Nepal.—*For week ending 3rd August.*—Rainfall seasonable. Indian-corn is still being harvested. Prospects of the rice crop are good.

DENZIL IBBETSON,

Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.
PUBLIC WORKS DEPARTMENT.
RAILWAY STATISTICS.

STATEMENT OF APPROXIMATE GROSS EARNINGS OF INDIAN RAILWAYS FROM 1ST TO 28TH JULY 1894, AND FROM 1ST TO 27TH JULY 1895.

N.B.—As regards the figures in column *Total Earnings from 1st July 1895*, audited figures have been used as far as possible.

RAILWAY.	Average earnings per mile per week during the 2nd-half of 1894.	Week ending 28th July 1894. Mean mileage worked.	Earnings. Total.	Per mile open per week.	Week ending 27th July 1895. Mean mileage worked.	Earnings. Total.	Per mile open per week.	Earnings from 1st to 28th July 1894.	Earnings from 1st to 27th July 1895.	Increase.	Decrease.

SUPPLEMENT TO

The Gazette of India.

No. 33.} CALCUTTA, SATURDAY, AUGUST 17, 1895.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

CIVIL WORKS.

Irrigation.

REVIEW OF THE REVENUE AND EXPENDITURE RECORDED UNDER THE HEAD "IRRIGATION WORKS" IN THE ACCOUNTS OF THE GOVERNMENT OF INDIA FOR 1893-94.

No. 194-I., dated Simla, the 6th August 1895.

RESOLUTION—By the Government of India, Public Works Department.

READ—

Note by R. G. MACDONALD, Esq., Accountant General, Public Works Department, upon the Accounts of Revenue and Expenditure of Irrigation Works in India for 1893-94.

RESOLUTION.—The Irrigation Works in India are divided into Major Works and Minor Works.

Major Works are sub-divided into—

(*a*) **Productive Works, the Capital of which has been provided from borrowed money.**

(*b*) Protective Works, the Capital of which has been provided from the General Revenues of India.

Minor Works, for the purpose of the Accountant General's note, are sub-divided into—

(*a*) Works for which Capital and Revenue Accounts are kept.

(*b*) Works for which Capital Accounts are not kept.

2. Capital and Revenue Accounts are kept for all the 44 projects which are classified as Major Irrigation Works. Of these, 36 were sanctioned as Productive Public Works and the remaining 8 as Protective Works.

Under the head of Minor Works, there are 75 projects for which Capital and Revenue Accounts are kept, and for the remaining works under this category one

account only is kept in which are entered the receipts and charges for each work or group of works.

3. The following statement shows the return derived from the Irrigation systems, for which Capital and Revenue Accounts are kept. Purely navigation systems are excluded:—

Class of work.	Number of works.	Direct and Indirect Capital outlay to end of 1893-94.	Gross Revenue.	Working expenses, including indirect charges.	Net revenue.	Irrigated area.	Percentage of net revenue on Capital outlay.
		Rx.	Rx.	Rx.	Rx.	Acres.	
Irrigation.							
I.—Major Works—							
(*a*) Productive	35*	28,855,437	2,079,378	840,195	1,239,183	6,781,777	4·29
Add—On account of old irrigation—							
In Madras	...	...	289,700	37,775	251,925	...	...
In Sind	...	...	3,705	910	2,795	...	...
Total Productive	35*	28,855,437	2,372,783	878,880	1,493,903	6,781,777	5·18
(*b*) Protective	8	1,913,920†	44,974	29,775†	15,199	167,604	0·78
II.—Minor Works—							
Works for which Capital and Revenue Accounts are kept	69‡	2,996,984	§36,372§	198,608	437.764	2,116,964	14·61
Grand Total	112	33,796,341	3,054,129	1,107,263	1,946,866	9,066,345	5·76

* Excludes the Hijili Tidal Canal (Bengal).
† Includes outlay on Gokak Canal, 1st Section, which is now classed as a Minor Work and combined with Gokak Storage Works.
‡ Excluding two navigation canals in Bengal (the "Calcutta and Eastern," and the "Orissa Coast" Canals), and four navigation canals in Madras (the Chilka Lake, Buckingham, Vedaranniyam, Ganjam-Gopalpur Canals).
§ Includes share due to old irrigation in Madras and in Sind.

4. The net revenue derived from the Major Works as a whole was Rx. 132,709 less than that of the previous year. The decrease occurred principally in the Punjab and in Bengal. In the Punjab it was due to the rainfall which enabled crops to be brought to maturity without the aid of canal water, and in Bengal the net revenue is not fairly comparable with that of the previous year which was abnormally swollen by the recovery of arrears of water-rates due from former years.

The net revenue derived from Minor Irrigation Works is shown in the accounts as being Rx. 25,054 better than that of 1892-93. The accounts for 1892-93, however, included a sum of Rx. 78,047 on account of irrigation revenue for 1891-92 from certain works in Madras which was reported by the Board of Revenue too late to be included in the accounts of that year. Excluding this special item from the accounts of 1892-93, the net revenue realised during the year under review was Rx. 103,101 better than that of the previous year.

The increase occurred in Rajputana, Lower Burma, Punjab, Madras and Bombay, and is due to the larger area irrigated during the year, to enhancement of rates in the Lahore District in the Punjab and to the recovery of certain arrears in Baluchistan.

The Capital expenditure on the Periyar Project, a productive work in Madras, is included in the figures on which the net revenue percentage is calculated. This work has not yet begun to earn revenue, and the Chenab Canal, the Sirsa Branch of the Western Jumna Canal, the Rushikulya Project and other canals which have been recently opened for irrigation are not yet earning a revenue at all approaching that which may ultimately be expected. The financial results of the canals in full operation are therefore more satisfactory than is indicated by the figures in paragraph 3.

The total net profit on all Major Works up to the end of 1893-94 amounted to nearly 3·1 millions of Rx.

5. The following statement shows the area irrigated by, and the gross revenue derived from, the Major and Minor Irrigation Works during the last five years:—

Year.	Major Works.		Minor Works.		Total.	
	Area irrigated.	Gross revenue realized.	Area irrigated.	Gross revenue realized.	Area irrigated.	Gross revenue.
	Acres.	Rx.	Acres.	Rx.	Acres.	Rx.
1889-90	7,047,553	2,137,441	1,829,312	377,972	8,876,865	2,515,413
1890-91	7,172,468	2,312,787	2,101,586	483,127	9,274,054	2,795,914
1891-92	7,560,484	2,395,372	2,123,659	*431,279	9,684,143	2,826,651
1892-93	7,043,286	2,552,415	2,272,091	†607,549	‡9,315,377	3,159,964
1893-94	6,949,381	2,417,757	2,116,964	636,372	‡9,066,345	3,054,129

* Exclusive of figures for certain works in Madras, which were not given in the Revenue Report for 1891-92.

† The increase was due to the inclusion in the accounts for 1892-93 of irrigation revenue of certain works in Madras pertaining to the year 1891-92—*vide* note * above.

‡ Exclusive of the area irrigated in Native States in the Punjab.

The area irrigated and the gross revenue realized are both less than during the previous year. The former is slightly below and the latter is higher than the average of the preceding five years.

The area irrigated in Native States in the Punjab from the portions of the canals constructed from funds contributed by these States amounted to 153,163 acres in 1893-94.

6. The estimated value of the crops irrigated from the Major and Minor Works during 1893-94 amounted to Rx. 24,958,361, being an average of Rx. 2·75 per acre.

7. The average rate of revenue assessed per acre irrigated during 1893-94 was Rx. 0·35 and Rx. 0·24 for Major and Minor Works, respectively.

The corresponding figures for the previous year were Rx. 0·32 and Rx. 0·21.

For Major Works, the rate varies from Rx. 0·61 in Bombay (exclusive of Sind) to Rx. 0·18 in Bengal and Sind, and for Minor Works from Rx. 0·78 in Baluchistan to Rx. 0·14 in the Punjab.

8. The areas of the principal crops irrigated by the works for which Capital and Revenue Accounts are kept in the various Provinces during 1893-94 are given in the following statement :—

Province.	Rice.	Wheat.	Jowar and chari (*Sorghum vulgare*).	Bajra (*Panicillaria spicata*).	Sugar cane.	Cotton.	Barley.	Indigo.	Maize.	Ragi (*Eleusine coracana*).
	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.
Bombay (excluding Sind)	5,217	10,856	12,020	4,378	13,063	123	645	....	2,031	...
Sind	443,398	128,737	226,089	222,138	...	69,351	1,958	...	...	...
Punjab	156,282	962,074	138,509	29,556	60,346	246,452	40,709	79,594	132,183	...
Bengal	452,702	14,548	...	...	55,326	...	12,001	...	...	...
Madras . . .	2,615,393	...	...	...	...	...	...	...	...	56,339
North-Western Provinces	138,875	558,126	11,953	...	207,537	63,776	56,439	264,652	18,429	...

9. The following are the percentages on gross revenue of the cost of revenue management (including collection charges), and of the up-keep of the works for Major Works in the different Provinces :—

Province.	Revenue management, per cent.	Up-keep, per cent.	Total, per cent.
Madras	9·0	12·7	21·7
North-Western Provinces	14·5	24·3	38·8
Punjab	16·9	28·8	45·7
Bombay	16·1	31·1	47·2
Sind	10·6	22·2	3 ·8
Bengal	28·7	63·9	92·6*

* Excluding Tidal Canal.

10. The following statement shows the total cost of working per acre irrigated by the Major Works in the different Provinces :—

	1893-94.	
	Rx.	
Sind	·06	Including old maintenance charges.
Madras	·08	
Punjab	·14	
North-Western Provinces . .	·17	
Bengal	·27	Excluding maintenance of Tidal Canal.
Bombay, excluding Sind . .	·38	

The figures do not vary much from those of the previous year, except in the case of Bombay (excluding Sind), where the cost of working per acre irrigated has fallen from Rx. 0·51 in 1892-93 to Rx. 0·38 in 1893-94, the charges

for 1892-93 having been exceptionally high owing to special repairs necessitated by heavy floods.

11. The following statement gives, for the principal canals in each Province, details of the lengths of channels, of canal discharge, of area irrigated and of the duty of water :—

Province.	Canals.	Length of completed main and branch canal (miles).	Length of completed distributaries (miles).	Maximum discharge at head of canals (cubic feet per second).	Average discharge at head (cubic feet per second).		Area irrigated (acres).					Area irrigated per cubic foot per second of average discharge at head (acres).	
					Kharif.	Rabi.	Kharif.	Rabi.	Total.	Flow.	Lift.	Kharif.	Rabi.

	TOTAL .	8,621	20,326	...	...	...	4,983,897	2,674,533	7,658,430	6,506,734	[illegible],234	...	...

N.B.—The figures in brackets in columns 13 and 14 denote the number of days on which the irrigating duty is calculated.

12. The following statement shows the return derived from navigation works proper, for which Capital and Revenue Accounts are kept. Works in which navigation is combined with irrigation are excluded, being included in the statement in paragraph 3:—

Class of works.	Number of works.	Direct and indirect Capital outlay to end of 1893-94.	Gross revenue.	Working expenses, including indirect charges.	Net revenue.	Percentage of net revenue on Capital outlay.
NAVIGATION.		Rx.	Rx.	Rx.	Rx.	
I.—Major Works—						
(*a*) Productive	1	231,923	5,919	5,650	269	·11
II.—Minor Works	6	1,824,631	62,657	51,372	11,285	·62
TOTAL	7	2,056,554	68,576	57,022	11,554	·56

The percentage of net revenue on Capital outlay was 0·56 as compared with 1·04 in 1892-93 and 0·34 in 1891-92.

13. The following statement gives some details of the navigation operations of the year. Works on which navigation is combined with irrigation are included:—

Provinces.	Length of Canal open for navigation.	Ton-mileage.	Estimated value of cargoes.	Estimated value of rafts.	Number of passengers carried.
1	2	3	4	5	6
	Miles.	Millions.	Thousands of Rx.	Thousands of Rx.	
Punjab	432	...	...	41	6,313
Bengal	673	45·285	9,099	49	699,131
Madras	1,242	45·374	4,910	424	4,86,315
North-Western Provinces	535	6·347	232	27	89
TOTAL	2,882	97·006	14,241	641	1,191,848

The figures show a falling off as compared with the previous year, except in the number of passengers carried.

14. Besides the irrigation works for which Capital and Revenue Accounts are kept, there are numerous small works for which only Revenue Accounts are kept, or for which no Revenue Accounts are kept.

The direct outlay on such works, including those maintained by the Civil Department, was Rx. 633,398 against Rx. 694,718 during 1892-93, while the direct receipts were Rx. 67,465 against Rx. 62,752.

These direct receipts comprise only the sums realized by the Public Works Department, which alone are credited in the Public Works Accounts. The whole of the revenue due to irrigation is assessed and collected with the land revenue and is therefore credited as an indirect receipt.

The following statement gives some further information relating to these works, the figures being extracted from the Irrigation Revenue Reports of the different Provinces.

Certain receipts, *e.g.*, those realized by Civil Officers from irrigation works under their charge, do not appear in the Irrigation Revenue Reports, so that the figures in the statement are *approximate* only, but are sufficient to show the great importance of the works in question. Figures relating to works classed as "Agricultural" are excluded:—

Province.	Works for which Capital Accounts are not kept.			
	Gross revenue from all sources direct and indirect, as recorded in Irrigation Revenue Reports.	Working expenses, including collection charges.	Net revenue.	Area irrigated.
	Rx.	Rx.	Rx.	Acres.
Bombay, excluding Sind	54,633	28,057	26,576	147,393
Sind	219,344	*104,591	114,753	977,268
Punjab	40,963	22,628	18,335	313,035
Bengal	20,732	20,538	194	14,810
Madras	907,778	220,642	687,136	3,573,871
TOTAL	1,243,450	396,456	846,994	5,026,377

* Exclusive of indirect charges.

The total area irrigated by these works amounted to 55·4 per cent. of that irrigated by the Major and Minor Works as shown in paragraph 5.

15. The total area irrigated during 1893-94 from all works amounted to 14⅓ million acres.

If the value per acre of the irrigated crops be taken at the estimated rate of Rx. 2·75 per acre given in paragraph 6, the total value of the produce from irrigated lands amounted to nearly 39⅓ millions of Rx.

16. The following are particulars of works which are still under construction:—

Project.	Amount of estimate (direct outlay).	Expenditure to end of 1893-94 (direct outlay).	Ultimate area to be irrigated.	Ultimate estimated revenue.	Estimated percentage of net revenue on direct Capital outlay.	Remarks.
PRODUCTIVE:	Rx.	Rx.	Acres.	Rx.		
Chenal Canal (complete project of 1891)	2,568,417	1,287,475	1,100,000	535,911	16·1	
Sirsa Branch	289,269	222,034	126,290	32,000	11·0	
Periyar Irrigation	847,100	639,625	192,431	72,070	6·6	Revised Estimate sanctioned in Secretary of State's Despatch No. 38 P. W., dated 26th July 1894.
PROTECTIVE.						
Rushikulya	436,800	337,095	117,250	24,671	4·3	Second Revised Estimate sanctioned in Secretary of State's Despatch No. 34 P. W., dated 19th July 1894.

17. The following statement gives particulars of important irrigation projects, the estimates of which had been sanctioned but upon which work had not been begun up to the end of 1893-94 :—

Project.	Amount of estimate (direct outlay).	Ultimate area to be irrigated.	Ultimate estimated revenue.	Estimated percentage of net revenue on direct Capital outlay.	Date of sanction.
	Rx.	Acres.	Rx.		
Productive Works.					
Jhelum Canal . . .	1,202,407	423,360	154,875	8·2	8th November 1888.
Kalingaroyen channel .	82,500	23,000	6,650	6·7	29th January 1891.
Lower Ganges Canal, Cawnpore Branch Extension (title since changed to Fatehpur Branch).	342,000	116,000	42,050	8·9	16th March 1893.

18. In reviewing the Revenue Reports of the different Provinces, the Government of India have observed with satisfaction the approval expressed by the Local Governments of the manner in which the officers of the Irrigation Department in general have performed their duties, and the Governor General in Council desires to record his appreciation of the results exhibited by the figures in the Accountant General's note and in this Review of the Irrigation Operations throughout India during 1893-94.

ORDER.—Ordered, that the foregoing, with a copy of the note by the Accountant General, Public Works Department, be forwarded to the Local Governments and Administrations in the Public Works Department, noted on the margin, for information.

The Governments of Madras, Bombay, Bengal, the North-Western Provinces and Oudh, and the Punjab.
The Chief Commissioners of the Central Provinces, Burma, Assam, and Coorg.
The Resident at Hyderabad.
The Agents to the Governor General for Central India, Rajputana, and Baluchistan.
The Accountant General, Public Works Department.

Ordered also, that a copy of the Review and note be forwarded to the Revenue and Agricultural and Finance Departments, and that the papers be published in the Supplement to the *Gazette of India*.

Ordered further, that a copy of the Review and note be forwarded to Her Majesty's Secretary of State for India for information.

JOHN W. OTTLEY, *Lieut.-Col., R.E.,*
Deputy Secretary to the Govt. of India.

Document accompanying.

* Note by the Accountant General, Public Works Department, dated 25th March 1895.

Accompaniment to Public Works Department Review, No. 194 I. of 1895.

Note by R. G. Macdonald, Esq., Accountant General, Public Works Department, upon the accounts of Revenue and Expenditure of Irrigation Works in India for 1893-94.

The figures in the accounts submitted herewith agree with the Finance and Revenue accounts of the Government of India, but in this note certain figures are added from the Administrative accounts of the Public Works Department, Irrigation Branch, the Revenue Reports of Irrigation Works, and the Annual Statement of the Financial Results of Irrigation Operations in India.

2. The irrigation works in India are divided into two main classes, *viz.*, Major Works and Minor Works.

Major Works are sub-divided into—
(*a*) Productive Works, the Capital of which has been provided from borrowed money; and
(*b*) Protective Works, the Capital of which has been provided out of the general revenues of India.

Minor Works are for the purpose of this note sub-divided into—
(*a*) Works for which Capital and Revenue accounts are kept; and
(*b*) Works for which Capital accounts are not kept.

3. Capital and Revenue accounts are kept for all Major Irrigation Works. There are 44 projects classed as Major Works—*vide* statement given in paragraph 12 below.

Of these, 36 were sanctioned as works expected to be remunerative, *i.e.*, estimated to pay the cost of up-keep and interest on the Capital outlay. They were or are being constructed from funds provided from sources outside the general revenues. The remaining eight projects * were sanctioned as works of protection against famine, and the cost of their construction has been or is being paid for out of annual grants made from the general revenues under the head of famine insurance.

North-Western Provinces and Oudh.
1. Betwa Canal.
Punjab.
2. Swat River Canal.
Madras.
3. Kushikulya Project.
Bombay, Deccan and Gujarat.
4. Nira Canal.
5. Mhaswad Tank.
6. Chankapur Tank.
7. Maladevi Tank.
8 † Gokak Canal, 1st section.

† Now classed as a minor work and combined with the Gokak Storage Works.

4. The works classed as Minor Irrigation Works are numerous. Capital and Revenue accounts are kept for 75 separate projects of this class; for the others only one account of receipts and charges for each work or group of works is kept. It has lately been decided that Capital and Revenue accounts shall be kept of all new Minor Irrigation Works, the estimated Capital outlay on which is more than Rx. 5,000 inclusive of Establishment and Tools and Plant charges, provided there is good reason to anticipate that the revenue derived therefrom will more than cover the working expenses.

5. The general results of works for which Capital and Revenue accounts are kept are as follows :—

	Major Works. Rx.	Minor Works. Rx.	Total. Rx.
Capital outlay.			
During 1893-94 . . .	780,660	85,512	866,172
To end of 1893-94 . . .	31,031,280	4,821,615	35,852,895
Revenue Account, 1893-94.			
Gross Revenue . . .	2,130,271	560,806	2,691,077
Maintenance and Working . .	875,620	228,781	1,104,401
Net Revenue	1,254,651	332,025	1,586,676
Interest	1,165,554	...	...
Net profit after paying interest on Capital	89,097	...	...
Percentage of net Revenue of the year on the Capital outlay to end of the year	4·04	6·89	4·42
Against in 1892-93 .	4·59	6·48	4·84
„ 1891-92 .	4·29	3·02	4·11

The sudden decrease in the percentage of net revenue derived from Major Irrigation Works is due to a falling off in revenue as explained in the succeeding paragraph. The improvement in the return from Minor Irrigation Works is due chiefly to the development of irrigation in Madras.

6. As compared with 1892-93 the net revenue from Major Irrigation Works shows a falling off in 1893-94 of Rx. 132,709. The decrease occurred chiefly in the Punjab and in Bengal. In the Punjab it was due to heavy rainfall and to a large amount of water and owners' rates on the Western Jumna Canal remaining unrealized at the end of the year. In Bengal the decrease was nominal, as the revenue of the previous year had been abnormally swollen by the recovery of arrears of water-rates.

7. The net revenue from Minor Irrigation Works is shown at Rx. 332,025, against Rx. 306,971 in the previous year. The figures of 1892-93 included a sum of Rx. 78,047 on account of irrigation revenue for 1891-92 from certain works in Madras which was communicated by the Board of Revenue too late for inclusion in the accounts of 1891-92, *vide* para. 7 of my note on the accounts for 1892-93. Excluding this special item the figures compare as follows:—

	Rx.
1892-93	228,924
1893-94	332,025
Increase	103,101

The increase in revenue is explained in paragraph 43 below.

8. The capital spent on the Periyar project, which has not yet commenced to earn revenue, is included in the figure upon which the revenue percentage in paragraph 5 above is calculated. The Chenab Canal, the Sirsa Branch of the Western Jumna Canal, the Rushikulya project and other canals which have been recently opened for irrigation are not as yet bringing in a revenue in any way approaching the estimated ultimate return. Making due allowance for all this, the results must be looked upon as very satisfactory.

9. The receipts and charges of the year 1893-94 on Revenue account, exclusive of the figures relating to Minor Works for which Capital accounts are not kept, are detailed in the following statement by funds and provinces.

1893-94.

10. This table shows that after paying interest on borrowed money expended in the construction of Major Irrigation Works, the highest net profits are, as in the previous two years, obtained from the irrigation projects in Madras. Next follow the North-Western Provinces and Oudh, the Punjab, and Bombay.

11. One prominent feature in the table is the loss arising from the canals in Bengal; another is the small amount of net profit derived from the irrigation works in the Punjab and the large sum derived from those in Madras.

In Bengal the loss is due to the permanent settlement on account of which the land revenue cannot be enhanced. No credit is given to canals on account of this item.

In the Punjab the revenue is gradually increasing, owing to several irrigation works having been completed, but the falling off in 1893-94 is due to the causes explained in paragraph 6, *ante*.

In Madras the large profit is attributable chiefly to the growth of revenue from the Godavari, Kistna and Cauvery Deltas and certain other projects which have either been completed or are approaching completion.

Major Works.

12. The following statement shows in detail the financial results of individual Major Irrigation Works during and to the end of 1893-94.

(b) This is now classed as a minor work and combined with Gokak Storage Works.

13. Taken collectively by provinces the percentages of net revenue on the Capital outlay upon Major Works for the last three years are as follows :—

	1893-94.	1892-93.	1891-92.
1. Madras	6·70	6·46	6·19
2. Bombay—Sind	6·54	7·65	4·53
3. North-Western Provinces and Oudh	5·37	5·22	5·53
4. Punjab	3·95	6·24	5·65
5. Bombay—Deccan and Gujarat	1·27	1·19	1·16
6. Bengal	·19	·63	·25
Total	4·04	4·59	4·28

Madras is unfairly weighted with the Karnul Canal which was made by a company and which does not even yet pay its working expenses and maintenance. Without the Karnul Canal the figures for Madras would be :—

	Per cent.
1893-94	10·06
1892-93	9·91
1891-92	9·59

14. The systems which in 1893-94 paid over 4 per cent. are arranged below in the order of the rate paid, and are compared with the results in the two previous years :—

	Rate paid.		
	1893-94.	1892-93.	1891-92.
1. Cauvery Delta System	45·76	39·00	36·70
2. Eastern Jumna Canal	24·60	20·14	21·84
3. Sidhnai Canal	19·09	14·95	11·10
4. Begari Canal	17·12	17·71	10·25
5. Godavari Delta System	14·04	13·73	13·39
6. Kistna	12·68	12·53	12·83
7. Bari Doab Canal	9·47	10·26	7·16
8. Unharwah Project	8·50	8·81	1·78
9. Penner Anicut	7·23	7·40	...
10. Ganges Canal	7·23	7·17	7·61
11. Eastern Nara Works	5·50	5·92	5·68
12. Srivaikuntham Anicut System	5·43	2·59	5·74
13. Swat River Canal	4·42	5·20	2·81

15. The systems that have, up to the end of 1893-94, paid off the accumulated interest on the Capital expended on them are noted below :—

	Surplus. Rx.
1. Western Jumna Canal	3,075,892
2. Godavari Delta System	2,848,868
3. Cauvery " "	1,953,398
4. Eastern Jumna Canal	1,612,202
5. Kistna Delta System	1,444,978
6. Bari Doab Canal	388,685
7. Begari "	185,840
8. Ganges Canal	146,030
9. Penner Anicut System	82,163
10. Desert Canal	61,482
11. Sidhnai "	58,217
12. Unharwab "	14,978
13. Srivaikuntham Anicut System	2,682
Assuming that the works are still worth the amount charged in each case to the Capital account, this represents a net profit to the State at the end of 1893-94 on these systems of	11,875,415
The charge to the State on other Major Works is	8,791,231
And this leaves a net profit to date on all Major Works of	3,084,184

16. The following statement shows the net charge to the State to the end of each year for the last five years on account of further projects, which are expected eventually to pay off the accumulated interest on their Capital cost :—

	Date of Completion.	1889-90.	1890-91.	1891-92.	1892-93.	1893-94.
		Rx.	Rx.	Rx.	Rx.	Rx.
North-Western Provinces and Oudh.						
Lower Ganges Canal	1878	184,877	241,950	257,544	270,214	280,752
Agra Canal	1874	236,294	233,674	233,051	239,162	251,733
Punjab.						
Sirhind Canal	1887	871,825	854,540	800,557	717,678	762,105
Lower Sohag and Para Canal	1886	9,196	13,442	18,617	22,216	24,384
Chenab Canal	...	59,192	77,127	106,942	152,338	193,920
Madras.						
Sangam Anicut Project	1885	45,797	50,059	64,784	65,213	65,075
Barur Tank	1887	6,566	8,045	9,866	11,207	12,362
Bombay—Sind.						
Eastern Nara Works	...	62,227	51,227	41,222	27,910	17,357
TOTAL	...	1,475,974	1,530,064	1,532,583	1,505,938	1,607,688

Several of these projects are increasing the debit against them when they ought to be decreasing it.

17. The continued steady decrease of accumulation of interest against the Eastern Nara before completion of the project is satisfactory.

The continued increase against the Lower Ganges and Agra Canals is not altogether satisfactory; these canals have been opened 17 and 21 years respectively, and have not yet begun to pay the annual interest charges. The Sirhind, Lower Sohag and Para Canals and the Barur Tank have not been opened for 10 years; further increases may, therefore, be expected as the irrigation from these projects has not had time to develop fully. There is a slight decrease in the debit against the Sangam Anicut project; it has been opened for irrigation 10 years only.

Compared with two previous years the net revenue obtained from the Lower Sohag and Para Canal shows a steady increase, and when full credit is given for the indirect revenue due to its construction, it is expected that the net revenue will more than cover the annual interest charges.

18. The Chenab Canal shows a return of ·40 per cent. on the whole of its Capital outlay, although irrigation is only very partially developed, and water-rates have been levied on a small portion only of the area actually cultivated, and then only at half rates. It is reported that the return realized on this canal has been greatly in advance of the forecasts of 1891, while the area irrigated in 1893-94 was nearly double that originally anticipated. This indicates that the returns from the canal will rapidly increase when full rates are realized from the total area irrigated, and that the accumulated interest charges should soon disappear.

19. The total loss to the State on account of works entered in the above table has increased by Rx. 101,750 during 1893-94. But if the figures of the Chenab Canal are excluded, the loss would amount to Rx. 60,168 only, which may be attributed principally to a falling off in the collections from the Sirhind Canal in consequence of seasonable rainfall.

20. The undernoted works, which were allowed to be constructed from borrowed money prior to the introduction of the rules laying down the conditions which must now be fulfilled before a work may be classed as Productive, are not expected to repay the accumulated interest charges on the Capital invested in them :—

	Capital outlay to end of 1893-94.	NET GAIN OR LOSS IN WORKING EACH YEAR.				
		1889-90.	1890-91.	1891-92.	1892-93.	1893-94.

The Karnul Canal in Madras, which was purchased from the Madras Irrigation and Canal Company in 1882, does not appear likely to be ever a financial success.

21. The sources from which the revenue of the Major Works was derived during 1893-94 are exhibited in the following statement in comparison with those of the four previous years :—

Irrigation Revenue.														Totals of previous four years.			
	Share of enhanced land revenue due to Irrigation works.	Water-rates.	Owners' rates on Irrigated lands.	Sale of water.	Water-supply of towns.	Plantations.	Other canal produce.	Water-power.	Navigation receipts.	Rents of buildings.	Fines.	Miscellaneous.	Total.	1892-93.	1891-92.	1890-91.	1889-90.

22. The income is less by Rx. 137,783 than that of 1892-93; but considerably better than that of the two previous years.

The share of land revenue and the water-rates are increasing with the extension of the canals and other works; but the sale of water, the water-supply of towns, and the supply of water-power are not showing the improvement which might be expected.

23. The increment in Bengal, in the Punjab, and in Bombay was checked in the year under review; but the North-Western Provinces and Madras show steady upward progress.

24. The increase in the North-Western Provinces was chiefly due to an extension of irrigation from the Eastern Jumna Canal. The increase in Madras is ascribed mainly to expansion of irrigation in the Kistna Delta and to the recent revision of the rates of assessment on the Cauvery Delta System.

25. In Bombay the decrease is attributable chiefly to failure of water in the Desert Canal in consequence of which remissions had to be granted and to damage done to crops by hail-storms and locusts. The receipts from the Begari Canal were also reduced.

26. The following statement shows, for each Major Work for the five years ending 1893-94, the gross revenue and the irrigated area, and the mileage of canals completed at the end of each year:—

Major Works.	Gross Revenue.					Irrigated area in acres.					Mileage in operation (including distributaries).

29. The total working expenses amounted to Rx. 5,074 less than those of the previous year, the decrease being the net result of increases and decreases in different provinces. The principal increases and decreases were :—

	Rx.
Bengal	+5,574
Madras	—5,778
Bombay	—5,957

30. Bengal, which shows with the Punjab and Bombay, *vide* paragraph 23 above, a falling off in revenue, exhibits an increase in working expenses and maintenance. The Punjab, Madras, and Bombay show considerable reductions, and in the North-Western Provinces the increase of Rx. 1,741 is far more than counterbalanced by the increase of revenue, which was Rx. 16,210.

31. In Bengal the increased charges were due to the repairs of damages caused by the high floods of 1892 and 1893 in the Orissa and Midnapore Canal districts.

32. In Madras the decrease was chiefly due to a special payment of Rx. 3,660 having been made in 1892-93 to the Telegraph Department on account of the telegraph line along the Karnul Canal which has been dismantled.

33. In Bombay the decrease was due to the charges for maintenance and up-keep of the Desert, Begari, and Mutha Canals having been smaller than in the previous year.

34. The cost of maintenance and working per acre irrigated in the different provinces during the past five years, and the percentage of the outlay upon maintenance and working on gross revenue, are as follows :—

Cost of maintenance and working per irrigated acre.

Provinces.	1889-90.	1890-91.	1891-92.	1892-93.	1893-94.	Remarks.
	Rx.	Rx.	Rx.	Rx.	Rx.	
1. Bombay—Sind	·05	·06	·07	·06	·06	Including old maintenance charges.
2. Madras	·08	·08	·08	·08	·08	
3. Punjab	·12	·12	·11	·14	·14	
4. North-Western Provinces and Oudh	·15	·15	·14	·16	·17	
5. Bengal	·25	·25	·19	·22	·27	Excluding maintenance of Tidal Canal.
6. Bombay—Deccan and Gujarat	·32	·35	·29	·51	·38	

The provinces are arranged in the order of smallness of charge; the variations are considerable.

Percentage of maintenance and working on gross revenue.

	Rx.	Rx.	Rx.	Rx.	Rx.	
1. Madras	22·2	23·8	23·0	23·0	21·7	Including old revenue and working expenses.
2. Bombay—Sind	29·7	32·3	46·7	33·7	32·8	
3. North-Western Provinces and Oudh	47·1	42·1	38·0	39·5	3·88	
4. Punjab	42·6	37·3	37·3	36·0	45·7	
5. Bombay—Deccan and Gujarat	54·3	48·6	48·0	51·4	47·2	
6. Bengal	94·5	106·9	89·9	78·9	92·6	

The variations indicated here are also great.

35. The percentages of the cost of revenue management on the revenue collected in the different provinces during the five years ending 1893-94, were as follows :—

N.B.—In the term revenue management is included shares of Direction, Executive and Navigation Establishments and also a share of collection establishment.

Provinces.	1889-90.	1890-91.	1891-92.	1892-93.	1893-94.	Remarks.
	Rx.	Rx.	Rx.	Rx.	Rx.	
1. Madras	8·8	8·8	8·8	8·9	9·0	
2. Bombay—Sind	10·1	10·9	11·4	10·4	10·6	
3. North-Western Provinces and Oudh	13·5	14·3	12·8	13·6	14·5	
4. Bombay—Deccan and Gujarat	14·5	14·1	15·2	17·8	16·1	
5. Punjab	15·1	13·0	12·1	13·0	16·9	
6. Bengal	28·5	33·2	28·1	26·0	28·7	

It is interesting to observe how the provinces change places in the above three tables. Per acre irrigated the Sind Canals cost least, but the Madras works are kept up and managed for the smallest share of the gross income. The Punjab compares favourably with the North-Western Provinces by the first test, but not by the second and third.

MINOR WORKS.

Works for which Capital and Revenue Accounts are kept.

36. The following statement shews in detail the financial results of Minor Works for which Capital and Revenue accounts are kept during, and up to the end of, the year 1893-94 :—

(a) Exclusive of the Capital outlay on the Vedaraniem Canal, which has not yet been ascertained.
(b) Excludes Rx. 77,899, share due to old irrigation.
(c) Do. Rx. 39,125 do. do.
(d) Exclusive of Rx. 41,267, expenditure incurred from the grant under 35—Construction of Protective Irrigation Works which is shown under Major Works.

37. The net revenue derived in 1893-94 from the works constructed for irrigation purposes (excluding navigation) taken collectively amounted to 10·70 per cent. on the Capital outlay to end of the year against 9·82 in the previous year. Excluding the special credit of Rx. 78,047 from the figures of 1892-93 under Madras alluded to in paragraph 33 of the previous year's note, the percentage of net revenue in 1892-93 was 7·16. The improvement in the financial result attained in 1893-94 is, therefore, very satisfactory.

38. The revenue from the navigation canals exceeded the working expenses by Rx. 11,285 against the corresponding figure of Rx. 19,063 in the previous year. The low return is due to a falling off in revenue from the Calcutta and Eastern Canals in Bengal. This decrease is ascribed to a number of reasons, but principally to the very large increase in the number of steamers and flats plying *viâ* the Nadia rivers and the Sunderbunds. Another reason for the decline in traffic is the deterioration of certain parts of the canal route, which renders it necessary to close the route yearly for a greater length of time. Further, independently of the decrease in traffic, flats are being largely used instead of native boats and thus a considerable loss has resulted in tolls. While there was a fall in gross revenue from these (Calcutta and Eastern) canals, there was an increase of Rx. 3,495 in working expenses over the previous year.

39. The loss in working the Buckingham Canal during 1893-94 was Rx. 1,620 against Rx. 1,859 in 1892-93 and Rx. 7,460 in 1891-92. The total Capital outlay on this canal to the end of 1893-94 has amounted to Rx. 831,246 and the net loss to Rx. 12,005 against Rx. 10,385 at the end of 1892-93, excluding of course interest which does not appear in the accounts, as the canal was constructed from revenue and not from borrowed money. Part of this canal was opened in 1877-78.

40. The revenue derived from Minor Works for which Capital and Revenue accounts are kept during 1893-94 is detailed in the following statement, and compared with the revenue of the previous four years :—

	Irrigation Revenue.											Totals of previous four years.			
	Share of enhanced land revenue due to irrigation works.	Water-rates.	Owner's rates.	Sale of water.	Water-supply of towns.	Plantations.	Other canal produce.	Water-power.	Navigation receipts.	Rents of Buildings.	Fines.	Miscellaneous.	Total.	1892-93.	1891-92.	1890-91.	1889-90.

41. The Punjab is the province which shows the best result.

Bengal appears to show the worst result.

Bombay and the North-Western Provinces are steady, and Madras has done well except for the Buckingham Canal.

Lower Burma, Rajputana, and Baluchistan all show marked improvement.

42. It will be observed that there has been a great increase in water-rates. This was chiefly in the Punjab and Bombay. In the Punjab a large portion of the increase is due to the water-rates levied on the Fazilwah and Dori Canals, and the value of the Government share of produce on other canals hitherto credited under the sub-head "Other canal produce," were written back in the year under review to the proper head "Water-rates." This explains also the minus entry under the former head (Other canal produce).

There has been an increase under water-power which gives a satisfactory indication of a direction in which revenue might perhaps be developed.

The navigation receipts as have been noticed above are not increasing.

43. The following are the explanations of the principal increases by provinces:—

Rajputana.—The increase is due to certain arrears having been realized in 1893-94.

Lower Burma.—The improvement is due to larger area cultivated in 1893-94.

Punjab.—The increase is due chiefly to an improvement in revenue earned by the Upper Sutlej Canals owing to the good harvests of Rabi of 1892-93 and Kharif of 1893 and to the enhancement of rates in the Lahore District.

Madras.—Owing to the inclusion in the figures of 1892-93 under Madras of the Irrigation revenue of 1891-92 (Rx. 82,154), the comparison between the figures of the two years is vitiated. Excluding this special credit the figures compare as follows:—

	Rx.
1892-93	63,785
1893-94	107,282
Increase	43,497

The increase is due chiefly to the larger area irrigated during the year.

Bombay.—The increased revenue was realized chiefly from the canals in Sind.

44. The working expenses of the year 1893-94 and of the previous four years are shown in the following statement:—

	Extensions and improvements.	Maintenance and repairs.	Establishment.	Tools and plant.	Profit and loss.	Suspense.	Total direct charges.	Indirect charges.	Total.	Totals of previous four years.			
										1892-93.	1891-92.	1890-91.	1889-90.

The reduction in the outlay upon extensions and improvements is, no doubt, due to the new rule introduced as paragraph 36, Chapter V, P. W. D. Code, Vol. II.

45. The total decrease of Rx. 27,970, as compared with 1892-93, occurred chiefly in the undernoted provinces:—

Rajputana.—The decrease is due to the closing of famine relief works and to the withdrawal of the extra establishment entertained on this account.

Lower Burma.—The decrease is due to unusually large outlay having been incurred in the earlier year for raising, strengthening, and retiring several miles of the Irrawaddy embankments threatened by river encroachments.

Madras.—The decrease is due to expenditure in 1893-94 on projects in the North and South Arcot districts being less than in 1892-93 and partly to a write-back during the year of expenditure on the Cheyar Anicut from "Revenue" to "Capital."

46. The following table gives the percentages of expenditure on revenue in each province during the past five years:—

Provinces.	1889-90.		1890-91.			1891-92.			1892-93.			1893-94.		
	Revenue.	Expenditure.	Revenue.	Expenditure.	Percentage.	Revenue.	Expenditure.	Percentage.	Revenue.	Expenditure.	Percentage.	Revenue.	Expenditure.	Percentage.

Madras	26,543	31,099	73,862	44,932	117·1	25,760	58,467	227·0	145,939	47,905	32·83	107,282	28,218	26·30
Bombay	135,210	59,730	144,195	61,865	44·2	146,135	63,946	43·8	127,170	46,732	36·75	135,839	47,071	34·65
TOTAL	426,199	241,516	493,123	283,158	56·7	453,037	312,141	69·1	563,722	256,751	45·56	560,806	228,781	40·80

The percentage of expenditure on revenue for the whole of India during the year shows a slight decrease as compared with 1892-93. The figures for the respective provinces as a rule show uneven results.

In Rajputana and Lower Burma the results are most irregular, while in Baluchistan the percentages for the last two years have not largely fluctuated.

In Bengal the percentages vary.

In the North-Western Provinces there is a tendency towards reduction.

In Madras a comparison is hardly possible as explained in paragraphs 37 and 43, *ante*.

In Bombay the decrease has been steady and marked.

47. The rates per irrigated acre in the different provinces during the year 1893-94 were as follows :—

		Irrigation revenue (Assessed).	Irrigated acreage.	Rate of revenue per acre.	Compared with rate in	
					1892-93.	1891-92.
		Rx.	Acres.	Rx.	Rx.	Rx.
Baluchistan		4,891	6,251	·78	·38	·21
Bengal		1,100	1,568	·70	·31	·19
Bombay	Deccan and Gujarat	10,301	25,253	·41	·23	·18

Punjab		97,977	693,594	·14	·07	·09
	Total	498,931	2,116,964	·24	·21	·15
Lower Burma		(a) 95,697				
	Total	594,628				

(a) Represents actual collections.

NOTE.—No acreage is quoted against Lower Burma as the works concerned are only river embankments.

Works for which Capital Accounts are not kept.

48. The receipts and expenditure on account of these works during 1893-94, as recorded in the Finance and Revenue accounts, are shown in the following statement, in comparison with the transactions of the previous four years :—

Works for which Capital Accounts are not kept.

1890-91	5,840	156,076	46,102	423,563	6,192	7,834	58,134	587,473
1889-90	5,897	149,714	42,979	401,243	3,917	4,617	52,793	555,574

49. The foregoing table shows that while the total revenue realized from this class of Minor Works has slightly increased, there has been an appreciable decrease in expenditure, the decrease being contributed by all funds.

Under Imperial the outlay in 1892-93 was large owing to the construction of famine relief works in Upper Burma.

Under Provincial the decrease in 1893-94 is chiefly due to a change introduced in Madras under which expenditure on Minor Irrigation Works (Revenue Department), which has hitherto been adjusted finally in the accounts of the Public Works Department, is dealt with by the Civil Department with effect from 1st April 1893. The decrease in the Punjab is due to the completion of works on the Nowshera and Michni Canals.

Under Local the decrease occurred chiefly in Upper Burma and Madras. In Upper Burma it is due to smaller grants being made available for expenditure in 1893-94. In Madras it is due to outlay on the Thoortha and Ramasauger Channels, hitherto met from "Cess funds," having been carried out from Provincial grants.

50. Under this head appear at present the irrigation works in Upper Burma. Orders have been issued by the Government of India for the preparation of Capital and Revenue Accounts of all important works. Only one project estimate for the Kyauksi Tank has been sanctioned by the Government of India, in Public Works Department letter No. 411, dated 11th February 1895.

CALCUTTA; *The 25th March 1895.*

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the Week ending at 8 a.m. on Saturday, August 10th, 1895.

Fairly normal monsoon conditions have prevailed over the greater part of the Indian region during the week under review. Pressure was steadily highest in the extreme south and relatively high along the foot of the hills, while it was on most days lowest over North-Western India and relatively low over the Gangetic plain. Accompanying this normal distribution of pressure were the usual monsoon winds and more or less general moderate rainfall. Between the 6th and the close of the week there was superimposed on the above distribution a cyclonic system of considerable intensity. The storm first appeared over the north-west of the Bay on the 6th. It subsequently travelled quickly west-north-westward right across India, and reached the Indus Valley on the 10th. It gave heavy rain to Orissa, moderately heavy rain to the Central Provinces, and very heavy rain to Gujarat, and it also occasioned a considerable increase in the force of the wind along the west coasts of India. The mean temperature of the whole country was very nearly normal during the week.

Daily Summary.—*Sunday, 4th August.*—Pressure had changed very little during the preceding twenty-four hours, and the distribution was fairly normal. Readings were high in the extreme south, low over the western desert, and relatively low over the Gangetic plain. The winds were of the normal monsoon character, and the rainfall was fairly general. It was moderately heavy on and at the foot of the hills, as well as at a few places in Burma, the Central Provinces, and Rajputana. The mean temperature was in defect of the normal over North-Western India and Madras, and in excess over Central India and Gujarat; nearly normal elsewhere.

Monday.—Pressure had decreased everywhere—most over Bengal and the head of the Bay. The general distribution was little changed on the whole, but pressure was becoming abnormally low over the northern half of the Bay. Calms and variable breezes had appeared over the Gangetic plain, but elsewhere the normal monsoon breezes continued. Showery weather had prevailed throughout nearly the whole country, the exceptions being the Western Punjab, Sind, Kathiawar, the Bombay Deccan, and Lower Bengal. The mean temperature was in considerable defect over the Punjab, in moderate defect over Madras, and in slight defect over the North-Western Provinces.

Tuesday.—Pressure had decreased briskly over a large part of the country, and a depression had developed over the north-west of the Bay and the adjoining coasts. Pressure was largely below the normal average within the depression area. Calms and variable breezes continued to be reported from the Gangetic plain, and northerly winds from several Punjab stations, but elsewhere the directions were nearly normal. The monsoon was blowing strongly over the Arabian Sea. The mean temperature was below the normal average over Burma, the Gangetic plain, and the Punjab, and above elsewhere. The rainfall had been light or altogether wanting over a large part of North-Western India, over the Deccan, over South Madras, and over Lower Bengal.

Wednesday.—The barometer had fallen briskly across the head of the Peninsula, and the cyclonic storm over the north-west of the Bay had developed considerably, and become an important disturbance. The winds were cyclonic within the depression area, and were fairly normal in direction elsewhere. The force was strong both over the Bay and over the Arabian Sea. The mean temperature was in large defect over the east and centre of the Peninsula and in the Punjab. There had been no rain over Sind, Rajputana, and South Madras. The fall generally had increased, and was heavy over Orissa, the Central Provinces, North-Western India, and the West Coast.

Thursday.—The cyclonic storm had advanced quickly west-north-westward, and was central between Sutna and Jubbulpore. Pressure was in very large defect, as compared with the normal, over the central parts of the country. The winds were cyclonic around the storm area, and fairly normal elsewhere.

The distribution of temperature was the same as on the preceding day; there was a large defect over the east of the Peninsula and the Punjab, and considerable excess over Sind.

Friday.—The cyclonic storm had continued to advance quickly, and the centre at 8. A.M. lay close to Deesa. Pressure was increasing, except within the depression area. The winds were unchanged, except that the cyclonic circulation had travelled westward. The distribution of temperature with respect to the average was also unaltered. Rain had fallen more or less generally, and over Western India the amounts were large. The heaviest fall was 9 inches at Ahmedabad.

Saturday.—The cyclonic storm had moved slowly as far as the western frontier, and there it was apparently curving round towards north. Pressure had consequently increased rapidly over the central parts of the country, the Peninsula, and North Bombay, while, on the contrary, it had fallen in the Punjab. A fresh depression was advancing westward across Burma. The winds were not much changed. The mean temperature was in slight to large defect over North-Western India, and generally in slight excess elsewhere. The distribution of rain was generally irregular, and in Madras practically none had fallen. In the neighbourhood of the depression the fall had been heavy. Kurrachee reported about 2½ inches.

Temperature.—Though there have been considerable local variations in temperature, the general temperature of the whole of India has again been very nearly normal throughout the week. The following table gives the variations of the mean temperature from the normal in the different provinces of India for each day of the week:

Province.	August 1895.							Mean variation of week.
	4th	5th	6th	7th	8th	9th	10th	
	°	°	°	°	°	°	°	°
Burma	+0·7	+0·4	—1·4	—1·3	+0·2	+1·1	+1·0	+0·1
Bengal and Assam	—0·1	+0·2	+0·3	—0·6	—1·0	—1·2	+1·2	—0·2
North-Western Provinces and Oudh	—0·7	—1·1	—1·6	—1·5	—1·8	—1·1	+0·2	—1·1
Punjab	—2·1	—4·7	—2·3	—2·5	—3·1	—4·0	—1·5	—2·9
Bombay	+0·1	0	+0·2	—0·5	—1·1	—1·7	—0·4	—0·5
Central Provinces and Berar	+0·5	+0·4	+0·3	—1·6	—1·7	—1·9	+0·9	—0·4
Central India and Gujarat	+1·1	+1·1	+0·7	+0·2	+0·1	—1·2	—0·2	+0·3
Sind and Rajputana	—1·9	+0·3	—1·3	+2·2	+2·3	+0·9	—2·5	0
Madras	—2·1	—2·1	—1·0	—2·1	—2·1	—1·0	+0·8	—1·4
Mean for whole of India	—0·5	—0·6	—0·7	—0·9	—0·9	—1·1	—0·1	—0·7

The above shows that on each day there was a trifling deficiency of temperature, the mean for the whole of India for the whole week being —0·7°. The provincial variations show that the heat in the Punjab, the North-Western Provinces, and Madras was less than usual during the present week, but that elsewhere the departures from the normal were unimportant. In Sind the day temperatures continued high until the close of the week, when, with the extension of rainfall into the Indus Valley, temperature fell briskly. The following were the highest maxima reported on each day with the station recording the reading:

On August 4th	the highest maximum reported was	106·4°	at	Jacobabad.
„ 5th	„ „	108·4°	„	„
„ 6th	„ „	103·4°	„	„
„ 7th	„ „	106·9°	„	„
„ 8th	„ „	106·9°	„	„
„ 9th	„ „	109·8°	„	„
„ 10th	„ „	102·5°	„	„

Rainfall.—During the first two days of the week under review pressure and wind conditions over the Indian region were of the normal monsoon type.

They were accompanied by very general rainfall, which, though on the whole moderate in amount, was heavy on and near the Himalayas. On the 3rd day of the week a cyclonic system was superimposed on these ordinary monsoon conditions, and the rainfall became heavier over a large part of the country. The storm travelled on a west by north course from the Orissa Coast to Sind. The movement was rapid, and the storm occasioned a considerable increase in the barometric gradients on its southern quadrants. This was accompanied by a rise in the force of the wind over Western India, and these winds brought up heavy rain to the west coast districts and to the Central Provinces. When the storm reached North Bombay, which it did by the 9th, the rate of movement slackened, and the disturbance hung over the western desert districts during the 9th and 10th, and gave heavy rain to the whole of that region. On the latter date the rainfall ceased very largely over the west of the Peninsula and almost wholly over the eastern half of India. Over Burma the rainfall was in part due to the action of the disturbance described above, and in part to a second disturbance which crossed that province at the close of the week. The table at the close of the summary shows the rainfall data. Rain was received during the week in every one of the rainfall divisions, the average actual fall ranging from 14·28 inches in the Konkan to only 0·07 inch in Madras (South). After the Konkan the heaviest amounts of rain were 9·91 inches in Arakan, 8·25 inches in Coorg, and 7·17 inches in Tenasserim. In ordinary years the rainfall ranges from 9·78 inches in Tenasserim to 0·29 inch in Sind. The above comparison between the actual average and normal average of the week shows that the distribution of rainfall has been irregular; that the areas of heaviest and lightest rainfall have been, respectively, in the west and east of the Peninsula instead of as in normal years in the extreme south-east and extreme north-west of the Indian region. The third column of the table exhibits the difference of the actual from the normal rainfall for the week. From this it will be seen that the rainfall was in excess of the normal in twenty-seven and in defect in twenty-four of the rainfall divisions, the numbers last week being thirty in excess, twenty in defect, and one exactly normal. Consequently the area of defective rainfall has been somewhat greater in the present than in the last week. The region of deficient rainfall included, roughly, Burma, Assam, Bengal, the Gangetic plain, and the central and coast districts of Madras, while the region of excessive rain included, roughly, the Indus Valley, the west of the Peninsula, and the central parts of India. The most marked cases of excess were 8·36 inches in the Konkan, 2·98 inches in Gujarat, 2·37 inches in Coorg, and 2·32 inches in the central division of the Central Provinces, while the most marked cases of deficiency were 3·02 inches in Assam (Surma) and 2·6 inches in Tenasserim. The rainfall was, relatively to the average, very heavy over part of North-Western India: thus, in the Punjab (West) the actual rainfall was three times; in the Bombay Deccan more than twice; in Khandesh more than twice; in Gujarat more than twice; in Kathiawar more than twice; and in Sind nearly six times the normal average.

The returns of the sudder stations show that rain occurred almost daily in most parts of India, but in Upper Burma, part of North-Western India, and in Madras the rainfall occurred irregularly throughout the week.

The three concluding columns of the table show that the rainfall from June 2nd to date has been approximately normal over the greater part of the country. In Burma, except Arakan, in Assam, in North Bengal, Chota Nagpur, Bihar, the whole of the North-Western Provinces and of the Punjab, the whole of the west of the Peninsula, most of the central divisions, and in most parts of Madras the departures from the normal are less than 20 per cent., and practically the only cases of considerable deficiency are—Arakan, East Bengal, Deltaic Bengal, Central Bengal, Sind, the east of Rajputana, Central India (West), the East Coast (South), and Madras (South).

The following are the more important total falls recorded during the week under review: Akyab 14·43 inches, Noakhali 14·03 inches, Cherrapunji 12·61 inches, Kurseong 11·48 inches, Mohamdi (Lakhimpur) 6·33 inches, Azamgarh 8·98 inches, Chakwal (Jhelum) 6·31 inches, Kangra 9·83 inches, Karkal (South Kanara) 13·63 inches, Nagar (Shimoga) 19·40 inches, Karjat (Colaba) 22·41 inches, Bowda (Kolhapur) 14·02 inches, Balaghat 12·34 inches, Bulsar (Surat) 12·11 inches, Ahmedabad 10·18 inches, Sujawal (Kurrachee) 2·73 inches, Purushottopur (Ganjam) 7·37 inches.

W. L. DALLAS,
Asst. Meteorological Reporter to the Government of India.

SIMLA, *15th August 1895.*

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 10th August.*—Rainfall heavy in the northern portion of the Circars, on the West Coast, and Nilgiris; fair rain elsewhere, except in parts of the Central and Southern districts where light and scattered showers have fallen. Irrigation supplies are inadequate in parts of the Central and Southern districts. Agricultural operations are retarded by want of rain in parts of the Deccan, Central, and Southern districts, where also the standing crops are withering in parts. The crops on the whole are in fair condition, but more rain is wanted in many places. Pasture is improving, and fodder is available generally. The condition of cattle is generally good. Prices are practically stationary.

Bombay.—*For week ending 14th August.*—Good rain in Sind, Gujarat, Kathiawar, and the Konkan; generally moderate rain in the Deccan and Karnatic, where more rain is wanted. The river in Sind is rising, and the canal supply and crop prospects have improved. Cotton has been damaged by excessive rain in one taluka of Ahmedabad. Sowing of the early crops is progressing in nine, and transplantation in five, districts. Preparations for the late crops continue in seven districts. Fodder is sufficient and agricultural stock is in **good condition, except in one taluka of Broach. Prices are normal, except in** parts of Ahmednagar and Sholapur.

Bengal.—*For week ending 12th August.*—Rainfall general during the week, but, except in Orissa, it was usually light, and below the average of the season in most of the districts. The transplantation of winter rice is still retarded for want of sufficient rain over a considerable part of the Burdwan and Presidency divisions, and more rain would also be beneficial for transplanting purposes in some other districts. The early rice and jute crops are being reaped, and the normal outturn is expected to be fair. The prospects of the autumn crops in Bihar are generally satisfactory. In Champaran some damage to these crops has been caused by floods. Damage to the crops from floods is also reported from Pubna and Dacca. The price of common rice continues generally steady.

North-Western Provinces and Oudh.—*For week ending 14th August.*—**The rainfall has been general during the week, and somewhat heavy in a few districts. The autumn crops are in good condition, and agricultural prospects** continue favourable. Transplanting of rice and weeding are going on. Markets are well supplied, and prices are generally stationary.

Punjab.—*For week ending 14th August.*—Rain has fallen in all districts, except Peshawar. Sowings of the autumn crops are still in progress in Lahore. Ploughings for the spring crops have commenced in Multan. The present rain has benefited the crops in most districts, and prospects are said to be favourable. The crops are withering for want of rain in Hissar, where more

rain is wanted, as well as in Umballa and Rawal Pindi. The prospects of crops on land dependent on rain are poor at present in Lahore. Cattle are generally in good condition, and fodder is sufficient in all districts, except in Hissar and parts of Lahore. Prices continue high in Umballa, but low elsewhere. Wheat is selling at 20·23 seers per rupee in Shahpur.

Central Provinces.—*For week ending 14th August.*—The rainfall during the week was abundant in most districts. The weather is generally cloudy, but is clear at intervals. In the north of the Provinces a break appears to have set in during the last few days. Weeding continues. The crops are in good condition, except in parts of Seoni where more rain is wanted for rice transplantation. Prices remain stationary.

Burma.—*For week ending 10th August.*—In Lower Burma agricultural operations have been completed, or are in progress in all districts, and the prospects are favourable everywhere, except in the Paungde sub-division of Prome and in parts of the Tharrawaddy district where rain is badly wanted. In Upper Burma no rain has fallen during the week in Mandalay, Shwebo, Sagaing, Kyaukse, Meiktila, and Myingyan, and only very small amounts in the Lower Chindwin and in Magwe. Prospects in all these districts are more unfavourable than last week as many of the paddy nurseries and the standing crops of *jowar* (*Sorghum vulgare*), maize, and sesamum must have withered. More rain is also wanted in Minbu, Thayetmyo, and Yamethin; elsewhere the crop prospects are fair. The price of paddy has risen considerably in Mandalay; elsewhere prices are stationary.

Assam.—*For week ending 13th August.*—The weather is seasonable. Floods are subsiding. The reaping of the early and transplanting of the late rice continue. The condition of cattle is fair, and fodder is sufficient, except in Kamrup and Nowgong. The water-supply is abundant.

Mysore and Coorg.—*For week ending 14th August.*—MYSORE: Good rain in parts of Mysore, Kadur, and Shimoga; slight rain elsewhere. The standing crops and prospects are good. Sowing operations continue in parts. Prices have fallen in Bangalore, Kolar, Hassan, and Chitaldroog.

COORG: Rainfall good. Transplanting of rice is in progress. The *ragi* (*Eleusine coracana*), coffee, and cardamom crops are fair. Water and fodder for cattle are abundant. Prices are normal.

Berar and Hyderabad.—*For week ending 14th August.*—BERAR: The weather is getting cool, and the rainfall has been plentiful since the last report. The monsoon crops are in satisfactory condition throughout the Province. Ploughing of fields for the winter crops continues. Sowings have been completed in four districts, and weeding is in progress. Fodder and water-supply are ample. Prices are fluctuating in Wun, but are steady elsewhere.

HYDERABAD: Rainfall good. Sowings for the autumn crops have been completed in two divisions, and the sowing of the irrigated crops is progressing favourably. The water-supply is increasing. Prices continue normal.

Central India.—*For week ending 14th August.*—Rain fell throughout Central India, but more rain is still wanted in the Neemuch district. Agricultural operations have been resumed in Goona, and are in progress in all other Agencies. Cattle are in indifferent condition in four districts of Gwalior, and parts of Bhopal, but their condition is good elsewhere. Pasturage is good and sufficient everywhere, except in one district of Gwalior. Prices of food-grains are rising in two districts of Gwalior, high in Bhopal and Goona, but are normal elsewhere.

Rajputana.—*For week ending 14th August.*—Good rain has fallen almost throughout. Agricultural operations are satisfactory. The standing crops, prospects, and agricultural stock are generally good. Pasturage and fodder are generally sufficient. Prices have risen in one State, but are falling in three others, and are steady elsewhere.

Kashmir.—KASHMIR VALLEY.—*For week ending 13th August.*—Rainfall slight; more rain is wanted. The prospects of the standing crops are generally good. Prices show a tendency to rise.

JAMMU PROVINCE.—*For week ending 14th August.*—Rainfall moderate. The weather is cloudy. The crops are in good condition. Fodder is sufficient. Prices are normal.

Nepal.—*For week ending 10th August.*—Weather cloudy with little rain. Prospects are good.

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

RAILWAY STATISTICS.

STATEMENT OF APPROXIMATE GROSS EARNINGS OF INDIAN RAILWAYS FROM 1ST JULY TO 4TH AUGUST 1894, AND FROM 1ST JULY TO 3RD AUGUST 1895.

N.B.—As regards the figures in column *Total Earnings from 1st July 1895*, audited figures have been used as far as possible.

RAILWAY.	Average earnings per mile per week during the 2nd-half of 1894.	Week ending 4th August 1894.			Week ending 3rd August 1895.			Earnings from 1st July to 4th August 1894.	Earnings from 1st July to 3rd August 1895.	Increase.	Decrease.

FINANCE AND COMMERCE DEPARTMENT
Calcutta, 21st August 1895.

J. F. FINLAY,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

REVENUE AND AGRICULTURAL DEPARTMENT.

Brief memorandum on the weather in India during the months of June and July, and probabilities of the rains during the months of August and September 1895.

In the forecast issued in the beginning of June, it was stated that the monsoon forecasts as at present issued necessarily left out of consideration two important factors on which the agricultural value of the monsoon rainfall largely depends, *viz.* :

1st.—The probability of the occurrence of a prolonged break in the rains in July or August.

2nd.—The probability of the unusually early termination of the rains in Upper India or in Bengal.

It was stated in the forecast that the conditions which obtained in May 1895 were strikingly similar to those of May 1894, and it was hence inferred that the conditions in India itself were generally favourable for a strong and steady monsoon. It was, however, pointed out that "the information received up to date from ships and other sources of information of the pressure and weather conditions of the neighbouring seas, and more specially in the northern half of the Indian Ocean, suggests that the south-east trades are not strong this year, and hence that the conditions in the sea areas are less favourable for a strong monsoon than they were last year." The character of the monsoon rains in June and July indicates that the monsoon currents are much feebler than during the past two or three years, and this appears to be mainly due to unfavourable conditions in the sea area to the south of India and not to conditions in India itself.

A brief forecast for the months of August and September was drawn up for the information of Government in the beginning of August. The present memorandum is an extension of that forecast, and is published by order of the Government of India in the Gazette for general information.

In the present memorandum a brief statement is given: first, of the weather and snowfall in the mountain areas to the north-west of India during the last two months of June and July; and, secondly, of the character of the monsoon rains and weather during the same period; and, thirdly, an attempt is made to estimate the probable character of the rainfall of August and September based on these data.

Summary of the reports of snowfall on the North-Western Himalayas in May, June, and July 1895.

None have been received from any district, except Lahoul and Almora.

LAHOUL.—The Reverend Mr. Heyde, who has been for many years Superintendent of the Observatory at Kailang, writing on the 24th July says:

"The weather in Lahoul from the beginning of July has been strikingly cold. Whenever a little rain has fallen at Kailang, snow has always fallen on the higher hills, falling as low as 13,000 feet, which at this time of year is of very rare occurrence. There was little snow during the winter in Lahoul, and hence this cold is so much the more unusual. Dr. Hutchison, who came from Chamba by way of Pangi, arrived at Kailang four days ago. He had some rain on the way, and noticed that along his route the higher hills were being covered with fresh snow, such as he had never seen during his residence of twenty years in these parts. The glaciers round about Kailang, which usually begin to melt at the end of June, and give water for irrigating the fields, did not begin to melt until quite the middle of July, evidently on account of the prevailing cold. High and cold winds from the

west prevail in the afternoon. Skies are nearly always clear at nights at present, but are heavily clouded in the day time."

ALMORA DISTRICT.—According to the report for the period 15th May to 15th July, received from the Commissioner of the Kumaon Division, about a foot of snow fell on the higher passes of Malla Danpur, and 3 feet on those of Malla Johar during the period. No snow is reported to have been received in Mallas Byans, Chandans and Darma. The weather during the period was damper, and more cloudy than usual, and the snowfall on the higher elevations is believed to be somewhat greater than in the preceding year.

Summary of the snowfall information.

The reports are very few in number. As no reports have been received from officers on the North-West Frontier, it is almost certain no snow has fallen on the higher elevations in Afghanistan. The Kailang and Almora reports indicate that there has been somewhat more snow than usual on the higher elevations in the North-Western Himalayas. It is, however, almost certain there has been no heavy general and extensive snowfall, such as occurred in June and July 1880. This is confirmed by the appearance of the snows as seen from Simla, and the unusually low water in the Indus.

It was stated in the memorandum published in the *Gazette of India* that, although the snowfall of the early winter months was considerably heavier than usual, it melted much more rapidly than usual in April and May, and hence in the beginning of June the snow accumulation was probably somewhat less than usual. As the months of June and July were characterised by an unusual amount of fine, dry sunny weather, it is certain that the accumulation on the higher elevations (notwithstanding the occasional snowstorms in July) is considerably below the normal for the period.

Meteorological conditions of India in June and July.

The conditions in May 1895 in India were strikingly similar to those of May 1894. The advance of the Bombay current was considerably retarded, but occurred in the same manner as in June 1894. The monsoon set in almost simultaneously over the whole West Coast on the 12th, and gradually strengthened during the next five days, and blew strongly until nearly the end of the month. The current advanced with unusual rapidity to the East Punjab. The establishment of the Bengal current in the north of the Bay was slightly delayed. It gave rise to a cyclonic storm on the 17th and 18th, and the advance of this storm, by a westerly path across the Central Provinces into Rajputana, gave a heavy burst of rain to the Central Provinces and Central India, and a moderate burst to North-Eastern India. A second storm was generated in the north-west angle during the last week of the month. It marched west-north-westwards across Chota Nagpur and up the Gangetic plain, and gave general and heavy rain to the whole of Northern India. The whole of Northern and Central India and the North Deccan hence received general and, on the whole, abundant rain in June.

The currents were hence established somewhat later than in June 1894, but they advanced as rapidly into the interior as in that month, and the rainfall of the two months was similar in its general character and distribution.

Both currents were weak in July, more especially the Bay current, and unfavourable pressure conditions developed temporarily in North-Western India (the chief of which were a large general excess of pressure, and a largish local excess of pressure in Gujarat, Kathiawar and South-West Rajputana), such as are frequently associated with very deficient rainfall in Upper India. An almost complete break in the rains obtained during the greater part of the month in the Punjab, Sind, Rajputana and the western districts of the North-Western Provinces. Showery weather continued in Bengal, Bihar, the Central Provinces and the West Coast districts, but the rainfall in these areas was generally much less than usual. As, however, frequently happens during breaks in the rains in North-Western India, the Deccan, and Madras generally, and North Bengal

and Assam received frequent rain (which followed deficient rainfall in the preceding month, and was hence favourable and timely).

The chief feature in the meteorology of July was hence the prolonged break in the rains which was apparently due to weakness of the currents, more especially of the Bengal current.

The mean pressure of India for the month of July was ·022 inch above the normal. The local variations were small and of no importance, except in an area defined by the following stations:

	Pressure anomaly.
Deesa	+ ·024″
Neemuch	+ ·045″
Indore	+ ·031″
Saugor	+ ·022″

The rainfall of the month of July was considerably below the normal over the greater part of India, and hence, although the rainfall of June was abundant, the total of the two months was less than the average in 33 out of the 51 meteorological divisions of the Empire. It was normal or in slight to moderate excess in Orissa, the North-Western Provinces, Central Provinces, Khandesh, and the Bombay Deccan. The deficiency was more than 25 per cent. in South Madras (53 per cent. in defect), Sind (77 per cent. in defect), Gujarat (26 per cent. in defect), the West Punjab (28 per cent. in defect), East and Deltaic Bengal (35 per cent. in defect), and Arakan (33 per cent. in defect).

The currents (more especially the Bombay current) strengthened in the beginning of August, and gave general and favourable rain over nearly the whole of Northern India from the 1st to the 16th, and the total rainfall up to the 17th August was normal or in excess in twenty-eight divisions. It was more than 25 per cent. in defect in the following divisions:

Meteorological Division.	Variation from normal of rainfall from 1st June to 17th August.
South Madras	52 per cent.
Deltaic Bengal	32 „
Eastern Bengal	29 „
Arakan	27 „
Upper Burma	?

A break in the rains set in again on the 17th, and pressure became locally in considerable excess at Deesa, Neemuch, Indore, and Saugor, so that this feature is very persistent and pronounced.

The preceding remarks hence indicate that, on the whole, conditions in India are not unfavourable. There has been no untimely general fall of snow in the Himalayan area. Pressure conditions in India are, on the whole, favourable, the only persistent abnormal feature which may continue to modify the distribution of rainfall in North-Western India being a considerable excess in South-West Rajputana and Central India, or, more exactly, the area defined by the stations of Deesa, Neemuch, Indore, and Saugor.

The previous remarks have hence shown that, notwithstanding the existence of unusually favourable conditions in India before the establishment of the monsoon, the rainfall up to the present time has been more or less below the normal over the greater part of India. In this respect the present monsoon contrasts strikingly with that of the preceding year, although the pre-monsoon conditions of pressure and temperature and also of the winter snowfall were almost identical in general character in the two years. The monsoon currents (and more especially the Bengal current) are undoubtedly feebler this year than they were in the corresponding period of last year. The cause of this is almost certainly to be sought for in conditions prevailing in the seas to the south of India, and more especially in the Indian Ocean. The scanty information obtained from ships crossing the Equatorial Belt indicates that the winds in that area are not so strong or so steady as they were last year, and that this is more especially the case in the eastern half. These winds are the continuation of the south-east trades, and this, hence, suggests that the south-east trades are not so strong as usual this year. Whether this is related to or caused by the unusual prevalence of icebergs in the south of the Indian Ocean and their extension considerably further northwards than usual can as yet only be conjectured.

Occasional notices in the newspapers of the delay in the arrival of ships at the Australian Ports due to their meeting with numerous icebergs and heavy fog undoubtedly suggests that the weather conditions are very abnormal in the Southern Indian Ocean. The observations recorded at Seychelles and Zanzibar for May and June (the latest received to date) also indicate that gradients are somewhat feebler, and winds more unsteady than they were during the same period last year.

It is certain that, whatever the causes may be, the monsoon currents in the Indian seas are from the conditions in the sea areas over which they originate not so strong and steady as they were last year, and that the Bay current is unusually feeble and unsteady. It is probable that these features will be persistent during the remainder of the season, but that they will be less marked than at the commencement.

The chief feature of the monsoon up to the present time was the long break in the month of July. Similar breaks more or less prolonged occurred in the south-west monsoon of the years 1880, 1883, and 1884, but in each of these years the break occurred after unseasonable snowfall in the Western Himalayas in May or June. The conditions of the present year are entirely different, and hence it would be useless to make a comparison of the present season with the monsoons of those years.

The following are the chief inferences which can be drawn respecting the probable character of the distribution of rainfall in India during the months of August, September and October based on the snowfall data, the meteorological conditions in India and the general character of the monsoon currents as indicated by the marine and other data :

1st.—It is probable there will be no prolonged general break in Northern or Central India during the month of August, and that the monsoon currents will be normal, or slightly below their usual strength in the months of August and September.

2nd.—It is probable that the rains will cease slightly earlier than usual in Upper India. Conditions are (as indicated by the existence of a local high pressure area in South-West Rajputana and Central India, West) unfavourable in the West Punjab, Sind, Cutch and West Rajputana, and it is very probable the rainfall during the remainder of the season will be more or less considerably below the normal in these areas. The rainfall in the East Punjab and East Rajputana will probably be in slight to moderate defect.

3rd.—It is probable that the North-Western Provinces will obtain normal rain in August and September, and Bengal and Bihar favourable rain in September and October.

4th.—Conditions are favourable in the Central Provinces and North Deccan, and they will hence probably receive normal rain.

5th.—Conditions are at present favourable for normal rain in Southern India during the retreating south-west monsoon, but it is, on the whole, probable the rains of that period will cease earlier than usual.

6th.—It may be noted that, so far as can be judged from the present conditions, it is probable the cold-weather rains in Northern India will be below the normal.

7th.—The data for Upper Burma are too scanty and unreliable to enable an estimate of the probable character of the rains in that area to be made. Pressure conditions are generally favourable in Burma, and it will probably, as a whole, receive normal rain during the remainder of the season.

JOHN ELIOT,

SIMLA, *23rd August 1895.* *Meteorological Reporter to the Government of India.*

DENZIL IBBETSON,

Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the Week ending at 8 a.m. on Saturday, August 17th, 1895.

On most days during the week under review well marked monsoon conditions prevailed throughout India. In the early part of the week a well defined cyclonic system was superimposed on these conditions, while, on the contrary, towards the close of the week, not only had the cyclonic system disappeared, but the monsoon conditions had become less strongly marked. Hence the early part of the week was characterised by heavier and more general rainfall than the latter part, when, owing to the joint action described above, the rainfall had almost ceased over a large part of the country. The wind was strong on both sides of India in the early days of the week, but at the close a considerable decrease of the wind force was observable over the Bay area. The general temperature for the whole of India for the present, as for last, week has approximated closely to the normal, but the variations from the average in the different provinces have, on occasions, been considerable according as the weather varied from fine to disturbed. One of the most marked cases of this variation is that shown in the Punjab returns for the 13th and 14th. On the former date the mean temperature of the province was 3·8° above the normal average ; on the latter it was 0·3° below, showing a fall during twenty-four hours of more than 4° for the whole province.

Daily Summary.—*Sunday—11th August.*—The depression, which lay over the western desert at the close of the previous week, was moving northward towards the north of the Punjab, and at the same time a fresh cyclonic storm had appeared over the north-west of the Bay. Pressure had consequently changed considerably, having risen in Sind and Gujarat and in Tenasserim, and fallen in the Punjab and around the head of the Bay. In the Punjab and Gangetic plain calms and variable airs were reported, instead of the ordinary south-easterly winds, and in the neighbourhoods of the depressions the winds were cyclonic. Elsewhere the directions were normal. The mean temperature was high, except in North-Western India. Rain had fallen over North-Western India, the west and south of the Peninsula, Lower Burma, and part of Bengal. The amounts were not very large, except at Diamond Island.

Monday.—The depression over North-Western India had continued to move northward and was central over the Western Punjab, while the disturbance over the north-west of the Bay had moved very little. The barometer had fallen, except over Burma, Assam, and some parts of Madras. The winds were practically unaltered. The mean temperature was excessive, except over Gujarat, Central India, Sind, Rajputana, and Madras. Rain had been fairly general over North-Eastern India and the Peninsula, but in Northern India, except on and near the Hills, the rainfall was light and scattered.

Tuesday.—The two depressions were still shown. That over the Punjab had not moved, but had become deeper, while that over the Bay of Bengal had drifted north-westward without changing in intensity. Strongish southerly and south-south-westerly winds prevailed over North-Western India, and calms and variable breezes over the Gangetic plain, but elsewhere the directions were fairly normal. No rain had fallen over the extreme north-west of India, but elsewhere the fall had been general and in places very heavy. This was particularly the case over and near the Kumaun Himalayas. The mean temperature was fairly normal, except in the Punjab, where it was in considerable excess, and in Madras, where it was in moderate defect.

Wednesday.—Pressure had increased very generally and the depression in the north-west had filled up, while that over Bengal had become smaller. Pressure was still below the normal average almost everywhere. Normal monsoon winds prevailed in most places, but in the Gangetic plain and the Punjab the

ordinary south-east winds were altogether absent. The mean temperature was very nearly normal. There had been very little rain over Upper Burma, the centre and east of the Peninsula, and a large part of North-Western India. Heavy rain continued to be reported over and in the neighbourhood of the North-Western Himalayas.

Thursday.—Pressure had increased briskly over the Central Provinces, Ganjam, and West Bengal, and the depression recently noticed in that area had practically disappeared. Readings ranged from a high pressure area in the extreme south and south-east to a low pressure area in the extreme north-west. The winds were unchanged. The mean temperature was slightly excessive over the Peninsula and slightly defective elsewhere. Rain had fallen over Burma, Bengal, the Gangetic plain, and the north of the Punjab. Elsewhere rain had been very light or altogether absent. The amounts were again heavy near the Hills.

Friday.—Pressure had increased briskly in the south of the Peninsula, but had changed very little elsewhere. The general distribution was unchanged, but the general tendency of the barometer was to rise. The wind was inclined to draw into north and north-west on parts of the West Coast, but elsewhere the wind directions were little changed. The mean temperature was slightly excessive over Burma and the Peninsula, and slightly in defect elsewhere. Rain had again been fairly general over Bengal, the Gangetic plain, and the north of the Punjab, but in other parts of the country any fall had been light and scattered.

Saturday.—Pressure had changed very little and the general distribution was the same as that reported on Friday. Readings were in excess of the normal over the central parts of the Indian region. The wind was southerly over Burma, part of Bengal, and the Indus Valley; easterly at several of the submontane stations; and westerly elsewhere. Temperature had moved upward very generally, but the mean was still below the normal, except in the Peninsula and Burma. The rainfall distribution was the same as on the preceding day.

Temperature.—As was the case last week, considerable local variations of temperature had occurred during the week under review, but the general result for the country shows, for the whole of India, both in the daily and in the weekly means, hardly any departures from the average. The following table gives the variations of the mean temperature from the normal in the different provinces of India for each day of the week:

Province.	August 1895.							Mean variation of week.
	11th	12th	13th	14th	15th	16th	17th	
	°	°	°	°	°	°	°	°
Burma	+1·7	+0·2	—0·7	—0·4	—0·2	+1·1	+1·7	+0·5
Bengal and Assam	+2·6	+2·6	+0·5	+1·1	—0·1	—1·6	—1·7	+0·5
North-Western Provinces and Oudh	+1·5	+0·6	—1·0	—1·9	—2·3	—3·3	—2·6	—1·3
Punjab	—0·7	+1·6	+3·8	—0·3	—1·8	—1·6	—2·9	—0·3
Bombay	+0·7	+1·3	—0·6	—0·2	+0·9	+1·2	+1·2	+0·6
Central Provinces and Berar	+2·2	+0·4	+0·7	—0·8	—0·9	—1·0	+0·1	+0·1
Central India and Gujarat	—0·5	—0·2	+0·1	+0·2	—0·2	—0·9	—0·1	—0·2
Sind and Rajputana	—4·4	—2·5	—1·4	—1·3	—1·6	—1·3	—0·9	—1·9
Madras	+1·5	—1·9	—2·8	—0·6	+1·4	+1·5	+1·6	+0·1
Mean for whole of India	+0·5	+0·3	—0·2	—0·5	—0·5	—0·7	—0·4	—0·2

The above shows that on the 11th and 12th there was for the whole country a trifling excess and on the remaining five days a trifling deficiency of heat. The provincial variations show that on the average of the week the mean temperature

of the North-Western Provinces, of Sind and of Rajputana was in slight defect, but that elsewhere the mean temperature was normal. The variations from day to day were, however, as mentioned above, often very considerable. The following were the highest temperatures reported on each day:

On August	11th	the highest maximum reported was	102·6°	at	Trichinopoly.
,,	12th	,, ,,	102·0°	,,	Peshawar.
,,	13th	,, ,,	107·4°	,,	Montgomery.
,,	14th	,, ,,	105·0°	,,	Peshawar.
,,	15th	,, ,,	101·9°	,,	Montgomery.
,,	16th	,, ,,	102·4°	,,	Tinnevelly.
,,	17th	,, ,,	101·6°	,,	Sirsa.

The variability in the position of the area of highest temperature exhibits very clearly the instability of the temperature distribution during the week.

Rain.—During the week ordinary monsoon conditions have prevailed over a large part of the country. Pressure has been steadily highest in the extreme south and steadily lowest in the extreme north-west, and the wind circulation has been to a large extent of the ordinary character. Two important exceptions were, however, shewn at different times, and each had a considerable effect on the rainfall. The first of these was a cyclonic storm which passed from the north of the Bay on a curved course through Orissa and West and Central Bengal and occasioned heavy rain in its neighbourhood, and the second was the northward movement of the trough of low pressure from the Gangetic plain to the foot of the Himalayas. Owing to this change in the pressure distribution, the south-easterly winds which usually prevail up the Gangetic plain were interrupted and winds forming a continuation of the Arabian Sea monsoon currents blew straight into Northern India. These winds occasioned relatively little rain over the plains, but gave heavy rain to the hills and the submontane regions of the North-Western Provinces and of the Punjab. The result was that at the close of the week, while general and moderately heavy rain was falling over the north of the Punjab, the north side of the Gangetic plain, and over Bengal, hardly any rain was reported from other parts of India. In Burma the rainfall has been irregularly distributed. At the stations on the Arakan Coast and on the shores of the Gulf of Martaban rain has fallen fairly heavily and almost daily, while in the extreme north, in the neighbourhoods of Bhamo and Kindat, rain has also fallen moderately steadily, but in the more central regions any rainfall has been very light and very widely scattered. Thus, Mandalay had one shower, consisting of a few drops only, during the week, and some other stations were only slightly better. The table at the close of the summary shows the rainfall data. From this it will be seen that rain fell during the week in all the rainfall divisions except Rajputana (West), but that in the Punjab (South) the fall was quite unimportant, and in Rajputana (East), Central India (West), Kathiawar, and Madras (South) the fall was very light. The heaviest average actual rainfall reported was 12·23 inches in the hill districts of the Punjab. This was followed by 10·27 inches in Assam (Surma) and by 9·22 inches in Tenasserim. The column of the table giving the average normal rainfall for the week shows a fall of 8·11 inches in Tenasserim, of 7·74 inches in Assam (Surma), of 6·68 inches in Arakan, and of 6·31 inches in the Konkan, while the lightest rainfall was shown over Madras (South).

The above comparison shows that, with the exception of the heavy fall on the Punjab hills, the actual and normal distribution of rain for the week have not differred much in their general characteristics. The third column of the table shows that the actual rainfall has been in excess of the normal in twenty-eight of the rainfall divisions and in defect in twenty-three, so that the general condition was almost the same as that which prevailed in the previous week. The region of excessive rainfall included the Burma divisions, except Central and Upper Burma, the Assam divisions, the eastern, central, and northern divisions of Bengal, Chota Nagpur, and Bihar; all the North-Western Provinces divisions, except the central; all the Punjab divisions, except the south and central; the east of the Central Provinces, Sind, the East Coast (North and South), Hyderabad (South), and Madras (South Central). The above shows that, roughly, the

rainfall was, with a few exceptions, in excess over North-Eastern and Northern India, and, with a few exceptions, in defect over Central and Southern India. The most marked cases of excess were shown by the hill and submontane divisions of North-Western India, while the most marked cases of defect were shown on the west side of the Peninsula: thus, the amount received on the Punjab hills was more than three times the normal, while the amount received in the Konkan was less than half the normal.

The returns of the sudder stations show that rain occurred daily in Burma, with the exception of Upper Burma; daily in Bengal, Assam, and the North-Western Provinces; as scattered showers during the week in the Punjab; daily over the west of the Peninsula; and during the first days of the week over the central parts of the country and the east of the Peninsula.

The three concluding columns of the table exhibit the state of the seasonal rainfall. In the great majority of cases the rainfall since June 2nd has been about normal, *i.e.*, the actual shows a departure of less than 20 per cent. from the normal. In the case of Arakan, East Bengal, Deltaic Bengal, Central Bengal, Rajputana (East), Central India (West), Madras (Central), the East Coast (South), and Madras (South) this limit is exceeded, and the rainfall is deficient to an important extent.

The following are the more important amounts: Moulmein 9·22 inches, Akyab 10·42 inches, Kishorganj (Mymensingh) 11·20 inches, Cherra poonjee 37·61 inches, Bhagatpore (Jalpaiguri) 13·71 inches, Kurseong 11·25 inches, Colcong (Bhagalpur) 10·76 inches, Utraula (Gonda) 9·14 inches, Mawana (Meerut) 10·73 inches, Dehra Dun 23·20 inches, Una (Hoshiarpur) 7·85 inches, Dharmsala 23·68 inches, Udipi (South Kanara) 7·69 inches, Ankola (North Kanara) 7·23 inches, Hinganghat (Wardha) 8·02 inches, Tirutturaippúndi (Tanjore) 6·03 inches.

Simla, *22nd August 1895.*

W. L. DALLAS,
Asst. Meteorological Reporter to the Government of India.

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 17th August.*—Rainfall good in the Circars and on the West Coast; fair rain elsewhere, except in parts of the Deccan, Central and Southern districts where only light and scattered showers have fallen. Irrigation supplies are inadequate in parts of the Central and Southern districts. Agricultural operations are progressing, and the standing crops generally are in fair condition, but more rain is needed in parts of the Deccan, Central, and Southern districts. Pasture is improving, and fodder is available generally. The condition of cattle is generally good. Prices generally are almost stationary, but are slightly easier in the Carnatic.

Bombay.—*For week ending 21st August.*—Rain has fallen throughout the Presidency, except in Satara, Thar and Parkar, and Wadhwan; generally moderate in Sind, Gujarat, and the Konkan; slight elsewhere. More rain is urgently wanted in parts of the Deccan and Carnatic for the standing crops which are withering in Bijapur and parts of Sholapur. The water-supply in parts of Sind is insufficient. Cotton in one taluka of Ahmedabad has been injured by excessive rain. Sowing of the early crops is progressing in seven, and transplanting in four, districts. Preparations for the late crops continue in six districts. Fodder is sufficient, and agricultural stock is in good condition. Prices are normal, except in parts of Ahmednagar and Sholapur.

Bengal.—*For week ending 19th August.*—There was general rain during the week, but in the Burdwan division and in some parts of the Presidency division it is still very deficient. Except in these two divisions the cultivation of winter rice is generally making good progress. The harvesting of early rice and jute and the manufacture of indigo are in progress, and promise a good outturn. The prospects of the autumn crops in Bihar continue favourable. Sugarcane is generally doing well. Cattle are in good condition, except in a part of Purneah. The price of common rice continues steady.

North-Western Provinces and Oudh.—*For week ending 21st August.*—Good and general rain has fallen during the week, except in Allahabad where the fall has been slight; more rain is, however, needed in Cawnpore. In Farukhabad some villages have been flooded. The prospects of the autumn crops continue favourable. Weeding and transplanting are in active progress. The fields are being prepared for the spring sowings. Supplies and fodder are sufficient. Prices are generally stationary.

Punjab.—*For week ending 21st August.*—Rain has fallen throughout the Province. Weeding of the autumn crops has commenced, and ploughing for

the spring crops is in progress. Cotton-picking is going on in Lahore. The standing crops are generally good, and their condition has been improved by the recent rain. The crops are flourishing in all districts, except in Hissar where they are withering for want of more rain which is urgently needed. Cattle are generally in good condition, and fodder is sufficient in all districts, except in Hissar and Lahore. Prices continue high in Umballa, rising in Jullundur, normal in Ferozepore and Sialkot, and low elsewhere.

Central Provinces.—*For week ending 21st August.*—There has been a break in the rains in most districts during the past week which has been beneficial where the season's rainfall is up to the average, but in Damoh, Seoni, and Nimar more rain is now wanted. In Chhattisgarh the rainfall has been sufficient, and the rice crop is in good condition. Prices are steady.

Burma.—*For week ending 17th August.*—In Lower Burma agricultural operations are progressing favourably, and the crop prospects are good everywhere, except in the Paungde, Sub-division of the Prome district, where they are reported to be very poor. In Upper Burma no rain has fallen during the week in Sagaing and Pakokku, and very little in Shwebo, Lower Chindwin, Magwe, and Kyaukse. Meiktila has received nearly half an inch, Myingyan nearly an inch, and Yamethin nearly one and a half inches. It is now reported that the standing crops in Shwebo are dead in parts, and that in Pakokku the paddy nurseries have withered, and maize on high-land has failed. The sesamum crop in Meiktila is almost a total failure. In the other districts of the dry zone the position of affairs previously reported has been accentuated. The price of paddy has risen slightly in Rangoon and Shwebo; elsewhere prices are stationary.

Assam.—*For week ending 20th August.*—Weather seasonable. Harvesting of the early and transplanting of the late rice continue. Prospects of tea are good. The condition of cattle is fair, and fodder is sufficient, except in Kamrup and Nowgong. The water-supply is abundant.

Mysore and Coorg.—*For week ending 21st August.*—MYSORE: Good rain has fallen in parts of the Kadur and Shimoga districts; slight rain elsewhere. The standing crops are in good condition. Prices have fallen in Hassan, and risen in the Kolar, Kadur, and Shimoga districts.

COORG: Rainfall good. Transplanting of rice is in progress. The coffee and cardamom crops are fair, but the *ragi* (*Eleusine coracana*) crop is suffering from the past heavy rains. Water and fodder for cattle are abundant. Prices are normal.

Berar and Hyderabad.—*For week ending 21st August.*—BERAR: Weather cool and cloudy with occasional light showers. The crops generally are in thriving condition, except in parts of Akola where cotton and *tur* (*Cajanus indicus*) have been attacked by insects. Land is being prepared for the cold weather crops. Sowings still continue in two districts, and weeding is well advanced. The fodder and water-supply are sufficient. Prices are almost stationary.

HYDERABAD: Rainfall good. The prospects of the autumn crops are generally good. Preparations for the irrigated crops are progressing. Prices continue normal.

Central India.—*For week ending 21st August.*—Rain fell in all Agencies, except Western Malwa, but more rain is still wanted in three districts of Gwalior. Agricultural operations are in progress in all Agencies. The crops have been damaged in one district of Gwalior; elsewhere they are in good condition. Cattle are in indifferent condition in four districts of Gwalior and part of Bhopal, but their condition is good elsewhere. Pasturage is good and sufficient everywhere. Prices of food-grains are high in Bhopal and Goona, and rising in part of Gwalior; elsewhere prices are normal.

Rajputana.—*For week ending 21st August.*—Good rain in Bikanir; slight in ten other States. More rain is wanted in Meywar and Haraoti. Agricultural operations are satisfactory. The standing crops, prospects, agricultural stock, pasturage, and fodder are generally good. Prices are falling in five States, and rising in one, but are steady elsewhere.

Kashmir.—KASHMIR VALLEY.—*For week ending 20th August.*—Rainfall moderate. The prospects of the standing crops are good. Water is ample for irrigation. Ploughing for the spring crops has commenced. Prices are slightly above normal.

JAMMU PROVINCE.—*For week ending 21st August.*—Rainfall moderate. Weather clear. The standing crops are in good condition. Fodder is sufficient. Prices show a tendency to fall.

Nepal.—*For week ending 17th August.*—Weather cloudy with occasional showers. Prospects of the rice crop are good.

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

Railway Statistics.

Results of the working of continuous automatic brakes in use on railways in India during the six months ended the 31st December 1894.

No. 324 R. S., dated Simla, the 2nd August, 1895.

RESOLUTION—By the Government of India, Public Works Department.

Read again—

Public Works Department letter No. 62 R. Stat., dated the 19th October 1891.

Public Works Department letter No. 354 R. Stat., dated the 4th September 1894.

Public Works Department order No. 55 R. Stat., dated the 6th March 1895.

Read also—

Endorsement No. 304 Stat., dated the 26th July 1895, by the Director General of Railways, forwarding tables Nos. I and II showing the railways on which continuous automatic brakes were in use, the number and proportion of rolling stock fitted with the brakes, the progress made in fitting stock since the previous half-year, and the results of working the brakes during the six months ended the 31st December 1894.

ORDER.—Ordered, that tables Nos. I and II be forwarded, for information, to the Local Governments and Administrations, and to the officers noted in the margin.

The Governments of Madras, Bombay, Bengal, the North-Western Provinces and Oudh, and the Punjab.
The Chief Commissioners of the Central Provinces, Burma and Assam.
The Resident at Hyderabad.
The Resident in Mysore.
The Agents to the Governor General for Central India, Rajputana and Baluchistan.
The Director General of Railways.
The Consulting Engineers to the Government of India for Railways, Calcutta, Lucknow and Assam.

Ordered also, that copies be forwarded for the information of Her Majesty's Government.

Further, that this order, with the tables, be published in the Supplement to the *Gazette of India*.

F. B. HEBBERT,
Under Secretary.

TABLE No. I.

Statement showing, for the half-year ended the 31st December 1894, the railways on which automatic vacuum brakes were in use, the mileage run by trains fitted with the brakes, the number and proportion of rolling stock fitted, and the progress made in fitting stock since the previous half-year.

Railways (including branch lines worked).	Period.	Locomotives.		Vehicles.*			Number of miles run by trains fitted.	Total number of instances in which the brakes failed to act or caused delay in the working of trains.	Proportion per cent.		Number of failures as compared with mileage run by trains fitted.
		Fitted.	Not fitted.	Braked.	Piped.	Not fitted.			Of vehicles braked or piped on total.	Of mileage run by trains fitted or partially fitted on total train-mileage.

TABLE No. II.

Statement showing, for the half-year ended the 31st December 1894, all cases in which the automatic vacuum brakes failed to act when required to be brought into action, or caused delay in the working of trains.

1	2	3	4	5
Railway.	Name or description of brakes which failed or caused delay in the instances specified in column 4.	Date of failure.	Instances under the three following heads separately, of— (i) Failure or partial failure to act when required in case of an accident to a train, or a collision between trains being imminent. (ii) Failure or partial failure to act under ordinary circumstances to stop a train when required. (iii) Delay in the working of trains in consequence of defects in, or improper action of, the brakes, distinguishing whether they arose from neglect or inexperience of servants, or failure of machinery or material.	Number of miles run by trains fitted with automatic vacuum brakes.
STANDARD GAUGE.				
East Indian	Vacuum Automatic.		(i) and (ii)—*Nil.*	
		6th July 1894	(iii) Failure of material.—No. 2 down mail detained ten minutes at Ásansol and five minutes at Raneegunge, in consequence of the train pipe leaking.	
		21st July 1894	(iii) Failure of material.—No. 1 up mail lost ten minutes between Bhaupur and Túndla, owing to a defect in the train pipe.	
		24th July 1894	(iii) Failure of machinery.—No. 1 up mail started ten minutes late from Howrah owing to vacuum universal coupling of a carriage having broken in starting.	
		6th August 1894	(iii) Failure of material.—No. 2 down mail lost 13 minutes between Umballa and Thánesar-Kurukshetra, owing to the engine train pipe leaking.	
		10th August 1894	(iii) Failure of material.—No. 1 up mail detained two minutes at Dhúlkot in releasing brakes. **The driver was unable to maintain vacuum, owing to the drip valve being defective.**	
		14th August 1894	(iii) Neglect of servants.—No. 1 up mail detained three minutes at the Mokameh station. Vacuum failed whilst running over the points in consequence of the driver having allowed the steam pressure to drop.	
		14th August 1894	(iii) Neglect of servants.—No. 2 down mail lost 30 minutes between Thánesar-Kurukshetra and Gháziabad, owing to mismanagement on the part of the driver.	
		31st August 1894	(iii) Failure of material.—No. 2 down mail detained five minutes at Muhár to release carriage brakes, owing to a defect in the train pipe.	
		30th September 1894.	(iii) Failure of material.—No. 1 up mail delayed 14 minutes between Phaphúnd and Achalda in releasing brakes, owing to engine train pipe having broken.	
		10th October 1894	(iii) Failure of machinery.—No. 2 down mail lost four minutes between Moghal Sarai and Buxar. The driver was unable to maintain sufficient vacuum, owing to a leak in relief valve of the Oudh and Rohilkhand (state) railway carriage next the brake-van.	
		11th October 1894	(iii) Failure of machinery.—No. 2 down mail detained six minutes near Muthroopore block hut, owing to the engine, train pipe having broken.	
		15th October 1894	(iii) Failure of machinery.—No. 1 up mail detained 19 minutes at Dinapore in consequence of a defect in ejector relief valve.	
		21st October 1894	(iii) Neglect of servants.—No. 10 down loop mail detained six minutes at Sultangunge, owing to mismanagement on the part of the driver.	
		25th October 1894	(iii) Failure of machinery.—No. 10 down loop mail detained six minutes at Rampore Haut, owing to the driver not being able to create vacuum in consequence of a defect in the ejector.	

See page 1228.

TABLE No. II—*contd.*

Statement showing, for the half-year ended the 31st December 1894, all cases in which the automatic vacuum brakes failed to act when required to be brought into action, or caused delay in the working of trains—contd.

1	2	3	4	5
Railway.	Name or description of brakes which failed or caused delay in the instances specified in column 4.	Date of failure.	Instances under the three following heads separately, of— (i) Failure or partial failure to act when required in case of an accident to a train, or a collision between trains being imminent. (ii) Failure or partial failure to act under ordinary circumstances to stop a train when required. (iii) Delay in the working of trains in consequence of defects in, or improper action of, the brakes, distinguishing whether they arose from neglect or inexperience of servants, or failure of machinery or material.	Number of miles run by trains fitted with automatic vacuum brakes.
STANDARD GAUGE—*contd.*				
East Indian—*concld.*	Vacuum Automatic.	29th October 1894	(iii) Neglect of servants.—No. 2 down mail delayed five minutes at Dinapore, owing to coupling hose not having been recoupled after shunting.	538,016.
		29th October 1894	(iii) Failure of machinery.—No. 2 down mail lost 43 minutes between Túndla and Cawnpore, owing to the release valve of the front brake-van being defective.	
		30th October 1894	(iii) Neglect of servants.—No. 1 up mail detained three minutes at Bankipore, owing to the train pipes not having been properly coupled up after shunting.	
		11th November 1894.	(iii) Failure of machinery—No. 1 up mail started five minutes late from Cawnpore in consequence of a defect in the hose coupling on tender.	
		7th December 1894	(iii) Failure of material.—No. 10 down loop mail worked non-vacuum from Mollárpore to Howrah. The driver was unable to obtain sufficient vacuum in consequence of a leak in train pipes.	
		7th December 1894	(iii) Neglect of servants.—No. 9 up loop mail lost 27 minutes between Nalhátí and Jamálpur, owing to mismanagement on the part of the driver.	
		8th December 1894	(iii) Failure of material.—No. 2 down mail detained 11 minutes at Sonépat, owing to vacuum having failed in consequence of a defect in train pipes.	
		15th December 1894.	(iii) Neglect of servants.—No. 1 mail detained five minutes at mile 134¾ in consequence of failure of vacuum, owing to hose not having been properly coupled at Ásansol.	
North Western (state)	Vacuum Automatic.		(i) and (ii)—*Nil.*	See page 1229.
		13th July 1894	(iii) Neglect of servants.—No. 33 up local detained ten minutes at Muhiuddinpur to release brake block, owing to brake gear jamming.	
		15th August 1894.	(iii) Neglect of servants.—No. 25 up mixed started one hour late from Ráwalpindi, owing to vacuum not having been in proper condition.	
		28th September 1894.	(iii) Failure of machinery.—No. 15 up goods lost one hour and thirty minutes between Nákus and Shahrigh, owing to piston rod packing ring drawing air.	
		2nd November 1894.	(iii) Neglect of servants.—No. 17 up mixed detained ten minutes at Gháziabad after hooking on to train. The driver could not get the vacuum brake off, two pipes near the rear end of the train not having been coupled.	
		13th November 1894.	(iii) Neglect of servants and failure of material.—No. 12 down mixed detained five minutes over the Hindon bridge. Vacuum brake worked only in front brake-van and engine from Nágal to Begamabad, owing to a bogie third class carriage having been out of order. Vacuum could not be maintained on account of leakage somewhere in the carriage, owing probably to some defect in rubber washers.	

TABLE No. II—*contd.*

Statement showing, for the half-year ended the 31st December 1894, all cases in which the automatic vacuum brakes failed to act when required to be brought into action, or caused delay in the working of trains—contd.

1	2	3	4	5
Railway.	Name or description of brakes which failed or caused delay in the instances specified in column 4.	Date of failure.	Instances under the three following heads separately, of— (i) Failure or partial failure to act when required in case of an accident to a train, or a collision between trains being imminent. (ii) Failure or partial failure to act under ordinary circumstances to stop a train when required. (iii) Delay in the working of trains in consequence of defects in, or improper action of, the brakes, distinguishing whether they arose from neglect or inexperience of servants, or failure of machinery or material.	Number of miles run by trains fitted with automatic vacuum brakes.
STANDARD GAUGE—*contd.*				
North Western (state)—*concld.*	Vacuum Automatic.	22nd November 1894.	(iii) Failure of material.—No. 3 up mail detained five minutes at Murádnagar, owing to leakage of vacuum pipe of a horse box of the Great Indian Peninsula railway.	1,247,744
		26th November 1894.	(iii) Neglect of servants.—No. 3 up mail detained eight minutes at Umballa, owing to vacuum pipe washer being deficient.	
		27th November 1894.	(iii) Neglect of servants.—No. 6 down mail detained three minutes at mile 1,116 between Saháranpur and Sarsáwa. The vacuum pipe between two third class carriages was disconnected, owing to vacuum pipe on a luggage van having been cut and causing leakage.	
		8th December 1894.	(iii) Neglect of servants.—No. 3 up mail detained five minutes at Meerut, owing to vacuum pipe coming off brake dummy.	
		14th December 1894.	(iii) Inexperience of servants.—No. 12 down mixed detained three minutes at Khanna. **Brakes could not be released owing to the handle of guard's van having been pressed down.**	
		15th December 1894.	(iii) Neglect of servants.—No. 5 up mail started five minutes late from Saháranpur, attaching the rear vacuum brake pipe.	
		26th December 1894.	(iii) Failure of material.—No. 19 up mixed detained one minute at Muzaffarnagar, owing to leakage of vacuum pipe at the rear brake.	
Oudh and Rohilkhand (state).	Vacuum Automatic.		(i) and (ii)—*Nil.*	280,003.
		8th November 1894.	(iii) Inexperience of servants.—No. 6 down passenger detained ten minutes between Sandíla and Rahimabad, owing to hose pipe in front of the engine having been damaged.	
Great Indian Peninsula	Vacuum Automatic.		(i) and (ii)—*Nil.*	See page 1231.
		6th July 1894	(iii) Failure of material.—The driver of No. 158 up could not maintain sufficient vacuum to keep the blocks off the wheels of some of the vehicles, owing to a leakage which could not be traced. Two minutes lost at Shelárvádi station and 12 minutes at mileage 102-13 in leaking off the train and creating fresh vacuum.	
		9th July 1894	(iii) Failure of machinery.—Brake blocks of a 2nd class carriage on No. 158 up jammed on wheels and could not be released. A small piece of cane was found jammed in the air passage leading to the top of the cylinder. The train was detained 22 minutes at Byculla searching for the defect and uncoupling the brake of this carriage.	
		17th July 1894	(iii) Neglect of servants.—On No. 192 up, steam having been allowed to drop, the vacuum fell and the brake applied itself. The train was detained three minutes between Masjid and Victoria terminus in getting up sufficient vacuum to release the blocks.	

TABLE No. II—*contd.*

Statement showing, for the half-year ended the 31st December 1894, all cases in which the automatic vacuum brakes failed to act when required to be brought into action, or caused delay in the working of trains—contd.

1	2	3	4	5
Railway.	Name or description of brakes which failed or caused delay in the instances specified in column 4.	Date of failure.	Instances under the three following heads separately, of— (i) Failure or partial failure to act when required in case of an accident to a train, or a collision between trains being imminent. (ii) Failure or partial failure to act under ordinary circumstances to stop a train when required. (iii) Delay in the working of trains in consequence of defects in, or improper action of, the brakes, distinguishing whether they arose from neglect or inexperience of servants, or failure of machinery or material.	Number of miles run by trains fitted with automatic vacuum brakes.
STANDARD GAUGE—*contd.*				
Great Indian Peninsula—*contd.*	Vacuum Automatic.	19th July 1894 .	(iii) Neglect of servants.—Owing to the engine and brake on No. 130 up having been coupled up without washer of Clayton coupling on the brake-van, 53 minutes were lost between Ráichúr and mileage 396 in consequence of the driver being unable to maintain vacuum. The train was worked non-automatic from this mileage to Sholápur.	
		25th July 1894 . .	(iii) Failure of machinery.—No. 158 up detained 11 minutes at Masjid in uncoupling the brake gear of a 2nd class carriage, the brake of which could not be released at starting time.	
		12th November 1894.	(iii) Neglect of servants.—Fourteen minutes' delay to No. 174 down, at Mu-jid station, disconnecting brake on 3rd class carriage. The roller ring got over the top of the cylinder in consequence of working with brake blocks too thin.	
		14th November 1894.	(iii) Neglect of servants. No. 306 detained five minutes at Thána. The driver allowed steam to fall and was, in consequence, unable to maintain a working vacuum.	
		17th November 1894.	(iii) Neglect of servants.—Eighteen minutes lost in uncoupling the brake gear of a 3rd class carriage on No. 200 up train at the Kurla station. Roller ring was slack and required renewing.	
		17th November 1894.	(iii) Neglect of servants.—Seven minutes were lost by No. 236 up at Kurla. The roller ring of a 3rd class carriage was slack and required renewing. The train worked non-automatic from Kurla to Bombay.	See page 1231.
		25th November 1894.	(iii) Neglect of servants.—The drip valve on engine of No. 6 up mail was displaced, and the clappet valve failed to close properly, in consequence of some waste having got in. The train was detained 53 minutes at the Bhore Ghât Reversing station in trying to work and finally the driver had to give up the train.	
		11th December 1894.	(iii) Failure of machinery.—The driver reports that the brake of a 3rd class carriage on No. 152 up, Poona to Lonávla, could not be released and the piston was, therefore, uncoupled. The piston was coupled up again at Karjat and worked into Bombay. It is supposed the ball valve stuck, but released itself later on the journey. Thirteen minutes lost in trying to start at Shelárvádi and uncoupling the piston.	
		20th December 1894.	(iii) Neglect of servants.—Brake blocks of a 2nd class carriage on No. 147 down Poona passenger taken up, owing to insufficient clearance allowed between wheels and blocks. Two minutes lost at Neral on account of leaking of brake and ten minutes at Karjat in detaching the carriage.	

TABLE No. II—*concld.*

Statement showing, for the half-year ended the 31st December 1894, all cases in which the automatic vacuum brakes failed to act when required to be brought into action, or caused delay in the working of trains—concld.

1	2	3	4	5
Railway.	Name or description of brakes which failed or caused delay in the instances specified in column 4.	Date of failure.	Instances under the three following heads separately, of— (i) Failure or partial failure to act when required in case of an accident to a train, or a collision between trains being imminent. (ii) Failure or partial failure to act under ordinary circumstances to stop a train when required. (iii) Delay in the working of trains in consequence of defects in, or improper action of, the brakes, distinguishing whether they arose from neglect or inexperience of servants, or failure of machinery or material.	Number of miles run by train fitted with automatic vacuum brakes.
STANDARD GAUGE—*concld.*				
Great Indian Peninsula—*concld.*	Vacuum Automatic.	20th December 1894.	(iii) Neglect of servants.—A composite carriage was attached to No. 112 up passenger without India-rubber washers in the train pipe couplings. Four minutes lost at Kirkee in examining brake and 15 minutes in working non-automatically over the Ghauts.	599,246
Bombay, Baroda and Central India.	Vacuum Automatic.		(i)—*Nil.*	
		28th September 1894.	(ii) Neglect of servants.—Vacuum brake on No. 3 down ordinary train did not act properly when applied to stop the train at Church Gate, owing to brake blocks being at fault. No delay.	
		21st July 1894 .	(iii) Failure of material.—Owing to three pipe joints on 24 up local train leaking, sufficient vacuum could not be maintained. Six minutes lost between Bandra and Colaba using hand brake.	
		21st August 1894 .	(iii) Failure of material.—Vacuum chamber indicator pipe on engine of No. 8 up ordinary train broke. Twenty-five minutes were lost in repairing it at Ahmedabad station.	
		29th September 1894.	(iii) Failure of machinery.—Tender brake on the down mail train could not be released properly, owing to piston getting fast on account of a piece of dirt getting in. Five minutes' delay at Kósambá.	462,994
		5th October 1894 .	(iii) Inexperience of servants.—Piston on No. 127 down local train stuck up on account of insufficiency of steam pressure. Eight minutes' delay at Charni road.	
		3rd November 1894.	(iii) Failure of material.—After leaving Pálghar there was a little difficulty in keeping the brake off properly on the up mail train, and on examination at Virár the pipes between the tender and the front brake-van were found to be leaking on account of a chip of cast-iron from the face of the pipe getting in between the washers. Four minutes' delay at Virár.	
METRE GAUGE.				
Eastern Bengal (state)—Northern and Behar sections.	Vacuum Automatic.		(i) and (ii)—*Nil.*	
		3rd July 1894 .	(iii) Failure of machinery.—No. 21 up mail detained five minutes at Jalpáiguri, owing to the coupling pipe of a saloon carriage having come off the plug. Cause unknown.	
		16th July 1894 .	(iii) Failure of machinery.—No. 21 up mail of the 15th July 1894, while approaching Jalpáiguri, was detained five minutes about a mile from the station to put the vacuum brake out of operation on account of the small vacuum chamber of pipe having become disconnected through stripped screw.	54,883
		22nd September 1894.	(iii) Failure of machinery.—No. 22 down mail detained seven minutes at Párbatipur to put the vacuum brake out of operation on account of the vacuum steam pipe nut packing having blown out.

(*a*) Includes the Bhopal-Itársi railway.
(*b*) Includes the Godhra-Rutlam railway.
(*c*) Total earnings from 2nd April to 11th August 1894.
(*d*) Includes the Guntakal-Mysore frontier section.
(*e*) Includes the Tirhoot state railway. Although for convenience classed amongst state railways, the company's section of this line is the property of the Bengal and North-Western Railway Company.
(*f*) Total earnings from 1st July to 10th August 1895.
(*g*) Includes the Jammu and Kashmir and the Hyderabad-Shadipalli railways.
(*h*) Although for convenience classed amongst state railways, this line is the property of the Bengal Central Railway Company.
(*i*) Includes the Wardha Coal, Dhond-Manmád, Khámgaon, and Amráoti railways.
(*j*) Total earnings from 1st June to 11th August 1894.
(*k*) Includes the Mysore-Nanjangúd and the Yesvantpur-Mysore frontier sections.
(*l*) Total earnings from 1st to 10th August 1895.

Simla, the 22nd August 1895.

F. B. HEBBERT,
Under Secretary.

Printed and published for the GOVERNMENT OF INDIA *at the* GOVERNMENT CENTRAL PRINTING OFFICE, *Simla.*

SUPPLEMENT TO

The Gazette of India.

No. 35.} CALCUTTA, SATURDAY, AUGUST 31, 1895.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

FINANCE AND COMMERCE DEPARTMENT

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the Week ending at 8 a.m. on Saturday, August 24th, 1895.

During the week under review the weather over the Indian region has been governed by two very different sets of conditions. During the first part of the week the low pressure trough, which ordinarily lies, during the monsoon months, over the south side of the Gangetic plain, was pushed northward over the hills, and as a result there were none of the south-easterly winds which ordinarily prevail between the Himalayas and the Ganges. In place of the south-easterly winds, a westerly current was reported both there and over the central parts of the country and the Peninsula. This westerly current was dry, and, during its continuance, rain was practically confined to the extreme south of the Peninsula, Burma, Bengal, and a few places along the foot of the hills. These conditions lasted from the 18th to 21st. On the 22nd a depression began to appear over the head of the Bay, and at the same time easterly winds began to blow up the Gangetic plain, and rain to fall on the North-West Himalayas. From that date until the close of the week the storm very slowly intensified, and on the 24th was shown as a well-defined though shallow disturbance off the Orissa Coast, while the trough of low pressure over the Gangetic plain and other characteristics of the normal monsoon distribution of pressure began to appear. At the same time rain very slowly extended over India.

Daily Summary.—*Sunday, 18th August.*—Pressure had decreased over the Bay area and increased elsewhere, the change being rapid in the Indus Valley. Readings were highest in Ceylon, decreased slowly northward, and were lowest along the foot of the hills. The winds were variable in North-Eastern India and generally westerly elsewhere, with an inclination to draw into north on the West Coast. The mean temperature was excessive in the south and in defect in the north. Showers of rain had fallen in the south of the Peninsula, North-Eastern India, and along the line of the hills.

Monday.—Pressure had decreased briskly over Lower Burma and increased briskly over Lower Sind, but elsewhere the changes were generally small. The distribution of pressure was unaltered, and the wind directions were practically unchanged. The mean temperature was in defect in the extreme north and extreme south and in excess elsewhere. Rain had fallen over a considerable part of the Peninsula and a large part of North-Eastern India.

Tuesday.—Pressure had decreased almost everywhere, but the general distribution was still practically unchanged, readings decreasing from Ceylon northwards to the Himalayas. The winds were southerly in Burma and the Indus Valley and westerly to north-westerly elsewhere. The mean temperature was lower than usual in Assam and Madras and higher than usual elsewhere. Rain had again fallen over the south of the Peninsula and in North-Eastern India, while there had been practically none elsewhere.

Wednesday.—Pressure had decreased over North-Western India and increased elsewhere—most in Burma. The distribution was again unchanged in its main features, though there were indications of the appearance of a low pressure area over the Bay. The winds were southerly to south-easterly over Burma and Bengal, southerly in the Indus Valley, and generally westerly in other parts of the country, though on the West Coast the directions were variable. The mean temperature was generally excessive, except in Madras, Orissa, and Assam. Rain continued to fall over the south of the Peninsula and over North-Eastern India.

Thursday.—Pressure had changed very little, but the general inclination was upward. There were now evident signs of the development of a depression over the head of the Bay, but elsewhere the changes in the distribution were small. The winds were variable with a slight cyclonic tendency over North-Eastern India, but remained generally westerly elsewhere. The mean temperature was low in Madras, Assam, and North Bengal, and high in all the other provinces, the abnormal excess being large in the Punjab and Sind. Rain had again fallen over the Peninsula and North-Eastern India, but the fall was now extending, and rain was also reported from the North-West Himalayas.

Friday.—Pressure changes were small, comprising a slight fall over the Bay and a slight rise elsewhere. The depression over the Bay was developing, but was still a very feeble disturbance. The winds were cyclonic over North-Eastern India and easterly winds were beginning to spread up the Gangetic plain. In other places the winds were little changed. The mean temperature was low over the Bay area, North-Eastern India and the Indus Valley, and was high elsewhere. Rain continued over the Peninsula and North-Eastern India, and was extending slightly over the Central Provinces and the Gangetic plain.

Saturday.—Pressure was increasing over Upper Burma, the Gangetic plain and the Punjab, and decreasing in all other parts of the Indian region. The storm over the Bay was now a well defined though still very feeble disturbance. Gradients were steeper than of late—more particularly over the Bay. The winds were northerly on a large part of the West Coast, were cyclonic over Eastern and North-Eastern India, and south-westerly elsewhere. The mean temperature was in defect of the normal in North and West Bengal, the Indus Valley and the south of the Peninsula, and in considerable to large excess over North-Western and Central India. Rain continued to extend very slowly both over the Central Provinces and up the Gangetic plain.

Temperature.—As shown above, the rainfall of the week has been mainly confined to the south of the Peninsula and to North-Eastern India, and even in these two localities has been far from heavy. As a result, the temperature has been generally higher than usual, but especially so over the central and north-western parts of India, where practically no rain fell during the week. The following table gives the variations of the mean temperature from the normal in the different provinces of India for each day of the week:

Province.	August 1895.							Mean variation of week.
	18th	19th	20th	21st	22nd	23rd	24th	
	°	°	°	°	°	°	°	°
Burma	+0·5	+0·4	+1·4	+0·8	−0·4	−0·5	+0·9	+0·4
Bengal and Assam	−0·8	0	+1·3	+0·4	+0·5	−0·2	+0·1	+0·2
North-Western Provinces and Oudh	−1·3	+0·3	+1·3	+2·9	+3·2	+2·8	+2·2	+1·6
Punjab	−4·0	−0·6	+1·8	+3·6	+4·4	+4·4	+4·2	+2·0
Bombay	+1·3	+1·5	+1·1	+1·2	+0·2	+1·0	+0·7	+1·0
Central Provinces and Berar	+0·2	+1·6	+1·5	+2·1	+3·1	+2·9	+1·6	+1·9
Central India and Gujarat	+0·2	+0·4	+0·6	+1·3	+2·1	+2·3	+1·1	+1·1
Sind and Rajputana	−0·9	+0·2	+0·7	+1·9	+2·0	+1·3	+0·6	+0·8
Madras	+1·6	+0·6	−1·3	−1·4	−1·3	+0·9	+0·3	−0·1
Mean for whole of India	−0·4	+0·5	+0·9	+1·4	+1·6	+1·7	+1·3	+1·0

The means for the whole country show that temperature rose steadily during the greater part of the week, the coolest day relatively to the average having been the 18th—the warmest the 23rd; and that the mean variation for the week for India was 1·0° above the normal. On the 24th the mean temperature of all the provinces of India exceeded the normal average. The provincial variations show that the general temperature of the week was about normal in Burma, Bengal, Assam, Sind, Rajputana, and Madras, and was in excess in all the other provinces. The abnormal excess was greatest in the Punjab, where during the last four days of the week the variation was considerable. In Bombay and the whole of the central parts of India the mean temperature was steadily above the average throughout the week. The following were the highest temperatures recorded on each day:

On August	18th	the highest maximum reported was	101·5°	at Jacobabad.
,,	19th	,, ,,	103·1°	,, Sirsa.
,,	20th	,, ,,	103·9°	,, Jacobabad.
,,	21st	,, ,,	106·1°	,, Sirsa.
,,	22nd	,, ,,	106·6°	,, ,,
,,	23rd	,, ,,	105·6°	,, ,,
,,	24th	,, ,,	104·6°	,, ,,

The above shows that the area of greatest heat during the week lay over the south of the Punjab and Upper Sind.

Rain.—At the beginning of the week conditions were the same as those reported at the close of the last period. The trough of lowest pressure lay along and close to the Himalayas and there were no south-easterly winds blowing from the Bay into Upper India, while at the same time the monsoon current passing from the Arabian Sea into India was moderate in force and brought up very little rain. As a result, there was little or no rain over a large part of India, *viz.*, the north-west and the centre of India and the head of the Peninsula, during the early part of the week. On the other hand, in Burma, Assam, and Bengal, which were under the influence of the Bay current, the rainfall was fairly steady and continuous though not very heavy. About the middle of the week a change commenced. A depression appeared over the head of the Bay and the Bay current began to curve round towards Northern India and to penetrate some distance up the Gangetic plain. In addition, the appearance of the depression over the Bay occasioned a slight increase in the strength and rain bearing qualities of the Arabian Sea current, so that from both sides of India rainfall increased and at the close of the week became more general than at the commencement. Still, notwithstanding this improvement, the week's rainfall, as will be seen from the table at the close of the summary, has been generally and in places largely defective. In Central and Upper Burma the rainfall throughout the week was very light: thus, Yamethin had four light showers with a total of 0·13 inch, Myingyan one shower of 0·19 inch, and Kyaukse one shower of 0·19 inch. The table at the close shows the rainfall data. From this it will be seen that in only fourteen districts was the rainfall in excess of the average, while in thirty-seven it was in defect. The region of excess included the following divisions:—Tenasserim and Lower Burma, Assam (Surma), North Bengal, North Bihar, Madras (south-central), Mysore, the East Coast (all divisions), Hyderabad (south), and Madras (central and south). Roughly, the regions of excess were the centre and east of the Peninsula, the south of the Burma Peninsula and the foot of the Eastern Himalayas. The only case of large excess was the Tenasserim Division. The deficiency was largest, exceeding 2 inches, in the North-Western Provinces (east, central, and submontane divisions), Oudh, the hill districts of the Punjab, Coorg, the Konkan, the Central Provinces (west and centre), Central India, and Rajputana (east). The heaviest average actual rainfall was 12·38 inches in Tenasserim, followed by 6·26 inches in Assam (Surma), by 5·10 inches in North Bengal, and by 4½ inches in Lower Burma and Tenasserim; while Sind, Rajputana, and Central India (west) had absolutely no rain during the week, and the North-Western Provinces (central and west), the Punjab (south and west), Berar, and Central India (east) had less than one-tenth of an inch as the total fall for the week.

The returns of the sudder stations show that rain fell daily in Lower Burma, the greater part of Bengal and Bihar, as well as in Malabar, the Konkan, and Ganjam, and as scattered showers during the week in Upper Burma, Mysore, the Deccan, and Madras, while in other parts of India the rainfall occurred mostly on the first and on the last day of the week.

The three concluding columns of the table exhibit the state of the seasonal rainfall. Notwithstanding the shortness of the rain during the week under review, the rainfall since the beginning of June had in the great majority of cases been nearly normal, *i.e.*, it shows a departure from the average of less than 20 per cent. The exceptions are as follows. In Central Burma, Arakan, East Bengal, Deltaic Bengal, Central Bengal, Punjab (submontane), Berar, Gujarat, Rajputana, Central India (west), and Madras (south) the total rainfall is in defect by amounts varying between 21 and 34 per cent., while in Orissa and the East Coast (north and central) there is an abnormal excess of between 28 and 52 per cent.

The following are the more important totals recorded during the week:—Amherst 12·38 inches, Cherra Poonjee 14·91 inches, Kurseong 13·25 inches, Madhubani (Darbhanga) 8·94 inches, Karkala (South Kanara) 6·47 inches, Devala (Nilgiris) 8·76 inches, Bovda (Kolhapur) 5·44 inches, Drug (Raipur) 5·54 inches, Chipurupalle (Vizagapatam) 7·45 inches.

SIMLA, *29th August 1895.*

W. L. DALLAS,
Asst. Meteorological Reporter to the Government of India.

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 24th August.*—The rainfall has been general in most districts, but light in Tinnevelly. Agricultural operations are progressing and the standing crops are generally in fair condition, but are suffering for want of rain in parts of the Deccan, Central, and Southern districts, where irrigation supplies are also inadequate. Some harvest is in progress in almost every district, with generally moderate yield. Pasturage and fodder are sufficient. The condition of cattle is generally good. Prices are generally stationary, but some dry grains are cheaper in parts of the Carnatic, Central, and Southern districts.

Bombay.—*For week ending 28th August.*—Rain throughout the Presidency Proper, except in two districts and in Karachi; generally slight. More rain is required in Thana and in parts of Baroda territory and in all districts of the Deccan and Karnatak for the standing crops which are withering in Bijapur and parts of Ahmednagar and Sholapur. The water-supply is deficient in parts of Sind. Sowing of the early crops is progressing in five, and transplantation in three, districts. Transplantation is retarded in parts of Baroda territory for want of rain. Preparations for the late crops continue in eight districts. Fodder is scarce in parts of three districts. Agricultural stock in good condition, except in parts of Sholapur. Prices are normal, except in parts of Ahmednagar, Sholapur, and Satara.

Bengal.—*For week ending 26th August.*—There was rain throughout the Province during the week. The prospects of the winter rice crop are generally favourable, except in the Burdwan and Presidency divisions where considerable portions of land remain yet uncultivated for want of sufficient rain. The early rice and jute are being harvested. The former is expected to yield a good and the latter a fair outturn. The state of the autumn crops in Bihar and Chota Nagpur is satisfactory. Sugarcane is promising. The price of common rice is almost stationary. The flooding of the Raidak river which occurred in Jalpaiguri on the 9th of July is reported to have caused much loss of property and cattle in tahsil Kumangram. Advances are being given under the Agriculturists Loans Act.

North-Western Provinces and Oudh.—*For week ending 28th August.*—The rainfall has been very light during the week, and in four districts no rain fell. In most districts more rain is much needed. Slight damage to the crops from floods is reported from Gorakhpur and Meerut. The autumn crops are thriving and prospects continue favourable. Weeding and transplanting are still going on. Sugarcane is doing well. Preparations for the spring sowings are progressing. Fodder and supplies are sufficient. Prices are generally stationary, but are rising in a few districts.

Punjab.—*For week ending 28th August.*—Rain has fallen in eight districts only. The autumn sowings are completed and irrigation is in progress. Ploughings for the spring crops have commenced in some districts. The standing crops are generally flourishing, and their condition is said to be good to average. The crops in Hissar are withering, and more rain is urgently needed in most districts. Rats are damaging the crops in parts of Ferozepore. Cattle are generally in good condition and fodder is sufficient throughout the Province. Prices continue high in Umballa and are rising in Jullundur, but are normal in Ferozepore and Sialkot and continue low elsewhere.

Central Provinces.—*For week ending 28th August.*—There was but little rain during the first part of the week; since then good seasonable showers have fallen in most districts. The rainfall in Nagpur on the 25th was exceptionally heavy. Prospects have improved in Seoni and Damoh. The crops generally are in good condition, though more rain is required in the south of the Nerbudda Valley. Prices are above normal in the plateau districts.

Burma.—*For week ending 24th August.*—In Lower Burma the crop prospects are still very poor in the Paungde sub-division of the Prome district, but are good in all other districts. In Upper Burma prospects in Bhamo, Myitkyina, Katha, and the Ruby Mines are good. Fair rainh as fallen in Mandalay, Shwebo, Sagaing, Lower Chindwin, Pakokku, Thayetmyo, Minbu, and Magwe. This has had the effect of reviving some of the paddy nurseries and enabling agricultural operations to be carried on. More rain is still required for all crops, and if it comes a fair crop may still be obtained in these districts. Very little rain has fallen during the week in Kyaukse, Meiktila, Yamethin and Myingyan, and prospects in these districts are worse than last week. The standing crops in the Upper Chindwin are said to be backward. The price of paddy has risen slightly in Thongwa, Shwebo, and Magwe and fallen considerably in Thayetmyo; elsewhere prices are stationary.

Assam.—*For week ending 27th August.*—Weather seasonable. Reaping of the early and transplanting of the late rice continue. Tea blight is reported from Cachar. The condition of cattle is fair. The fodder-supply is indifferent, but water is sufficient.

Mysore and Coorg.—*For week ending 28th August.*—MYSORE: Rainfall good in parts of Bangalore, Kolar, and Mysore; slight rain elsewhere. The standing crops are in good condition. *Ragi* (*Eleusine coracana*) has been sown in parts. Prices have slightly risen in the Kadur and Chitaldroog districts.

COORG: Rainfall good. Transplanting of rice continues. The coffee and cardamom crops are maturing. *Ragi* (*Eleusine coracana*) is coming into ear. Fodder and water for cattle are abundant. Prices are normal.

Berar and Hyderabad.—*For week ending 28th August.*—BERAR: Weather cool. The crops are reported to be in good condition in Amraoti, Buldana, and Wun, and fair in the remaining districts, where more rain is much needed. Ploughing of fields for the ensuing winter crop is in progress. Sowings are nearing completion. Scarcity of water prevails in the Khamgaon taluka. The fodder-supply is sufficient. Prices are stationary.

HYDERABAD: Rainfall good. Sowings of the autumn crops are completed and of the irrigated crops are progressing. The general prospects are good throughout. The water-supply is increasing. Prices continue normal.

Central India.—*For week ending 28th August.*—Rain fell throughout Central India during the week, but more rain is still wanted in Bhopal, Bundelkhand, Baghelkhand, and the greater portion of Gwalior. Agricultural operations are in progress in all Agencies. Land is being prepared for winter sowings in Bhopawar. The crops have been damaged for want of rain in four districts of Gwalior and in Bhopal; elsewhere the crops are in good condition. Cattle are in indifferent condition in some districts of Gwalior and in parts of Bhopal, but are in good condition elsewhere. Pasturage is good and sufficient everywhere, except in some districts of Gwalior. Prices of food-grains are rising in three districts of Gwalior, and are high in Bhopal and Goona, but are normal elsewhere.

Rajputana.—*For week ending 28th August.*—No rain during the week, except at Abu and Jhallawar. More rain is needed in Sirohi, Marwar, Meywar, Haraoti, Kerauli, Dholepore, Ulwar, and Tonk. Agricultural operations and the standing crops are generally good, but the crops are suffering for want of rain in Meywar and Ulwar. Prospects, pasturage, and fodder are generally fair. Prices have fallen in two States and are rising in six others, but are steady elsewhere.

Kashmir.—KASHMIR VALLEY.—*For week ending 27th August.*—Rainfall moderate. The standing crops are very good. Water is ample for irrigation. Prices are slightly above the normal.

JAMMU PROVINCE.—*For week ending 28th August.*—Rainfall moderate. The weather is cloudy. The crops are in good condition. Fodder is sufficient. Prices are normal.

Nepal.—*For week ending 24th August.*—The days are clear, but the nights are wet and the weather is warm. The prospects of the crops are good.

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

GOVERNMENT

DEPARTMENT OF REVENUE

STATIS

OF INDIA.

AND AGRICULTURE.

TICS.

IMPORTS OF COTTON, WHEAT, LINSEED, AND INDIGO.

Statement showing in maunds the imports of Cotton, Wheat, Linseed, and Indigo by rail and river into Calcutta, Bombay Town and Karachi, during the month of June and from 1st January 1895 to 30th June 1895, compared with the corresponding periods of the years 1893 and 1894.

Articles, and whence exported.	Imports in June.												Imports from January to June, inclusive.												Articles, and whence exported.

(*j*) Includes the Wardha Coal, Dhond-Manmád, Khámgaon, and Amráoti railways.
(*k*) Total earnings from 1st May to 17th August 1895.
(*l*) Total earnings from 1st July to 18th August 1894.
(*m*) Includes the Mysore-Nanjangúd and the Yesvantpur-Mysore frontier sections.
(*n*) Total earnings from 1st to 17th August 1895.

SIMLA, *the 29th August 1895.*

F. B. HEBBERT,
Under Secretary.

Printed and published for the GOVERNMENT OF INDIA *at the* GOVERNMENT CENTRAL PRINTING OFFICE, *Simla.*

SUPPLEMENT TO

The Gazette of India.

No. 36.} CALCUTTA, SATURDAY, SEPTEMBER 7, 1895.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

J. F. FINLAY,

Secretary to the Government of India.

FINANCE AND COMMERCE DEPARTMENT.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the Week ending at 8 a.m. on Saturday, August 31st, 1895.

It will be remembered that at the close of last week a well-defined depression lay off the Orissa Coast, and that the trough of low pressure over the Gangetic plain as well as other characteristics of the monsoon period were appearing. At the same time rain was slowly extending over India. These conditions continued and intensified during the week under review, which was one of fairly general, moderate, monsoon rainfall throughout. The days of most general rain were the 29th and 30th, when the shallow trough of low pressure extended from the Orissa Coast north-westward as far as the Indus Valley, and rain was received over Northern and Central India both from the Bay and from the Arabian Sea. On the latter date a considerable and very unusual fall of rain occurred over the southern districts of Madras. At first, when the rainfall was relatively slight, the mean temperature of India was about normal or even a little above normal, but as the heavier rain set in, towards the close of the week, the temperature fell, and the mean became slightly below the average.

Daily Summary.—*Sunday.*—Pressure had increased over Burma, Bengal, the Gangetic plain, and the Punjab, and decreased elsewhere. The depression over the Bay had become deeper and better defined, and advanced close to the Ganjam Coast, and pressure was in moderate defect throughout the Bay area. The winds were cyclonic within the depression area, and blew from about the normal monsoon directions elsewhere. The mean temperature was in defect over Madras, Assam, and North Bengal, and in excess in most other places. The rainfall was fairly general, except in parts of North-Western India, the amounts being considerable in parts of Madras and of the Central Provinces.

Monday.—Pressure had increased briskly in parts of North-Western India, and changed by small amounts elsewhere. The depression had advanced slowly north-westward and had filled up considerably. Pressure was in slight to moderate defect over the Peninsula and central parts of the country, and in slight excess over Northern India. The winds were fairly normal in direction. The temperature distribution was irregular. Abnormally low temperatures were reported from Madras, Assam, the North-Western Provinces, and the Indus Valley, and more or less excessive temperatures elsewhere. There had been no rain over a large part of North-Western India, of North Bombay, and of South Madras, but moderate general rain has occurred elsewhere.

Tuesday.—Pressure had generally changed by small amounts, but had on the whole increased, except in North-Eastern India. The depression had changed very little either in position or intensity. A well-defined trough of low pressure lay over Northern India, and ordinary monsoon winds prevailed over the greater part of the country. Temperature had risen over Madras, but abnormally low temperatures were reported from Burma, the North-Western Provinces, and the Indus Valley. General rain had fallen over North-Eastern India, and showery weather had been experienced elsewhere. In places the amounts received were heavy.

Wednesday.—Pressure changes were again small throughout the country, and the general distribution was very little altered. The depression had nearly disappeared. Readings decreased from a high pressure area in the south to a low pressure area over the Punjab, with the usual trough of low readings over the Gangetic plain. Calms prevailed within the trough, and normal monsoon breezes else. here. The mean temperature was in defect over the Bay area and in excess over the Western desert, and was nearly normal elsewhere. The weather was again showery over nearly the whole country, with heavy falls of rain in parts of Northern India.

Thursday.—Pressure had risen briskly over the Punjab and part of Madras, and changed slightly elsewhere. The distribution of pressure was fairly normal, and the winds in most places blew from the usual monsoon directions. The mean temperature was below the normal average over a large part of the country, but particularly so over the Punjab, Ganjam, Orissa, and the east of the Central Provinces. The rainfall had been fairly general, except over parts of the Peninsula and of Sind and Kathiawar.

Friday.—Pressure had decreased over Burma, Bengal, the Gangetic plain, and the Punjab, and increased in other parts of India. The fall was brisk over Burma, but elsewhere the changes were slight. The distribution of pressure and the circulation of the winds remained fairly normal. The mean temperature was low over Northern and Central India and slightly excessive over the Peninsula.

There had been very little rain over the extreme north-west of India and the centre and east of the Peninsula, but elsewhere rain had been fairly general and in places heavy.

In South Madras and in parts of North-Western India the fall was exceptionally heavy for the time of year.

Saturday.—Pressure had decreased briskly over Burma, Assam, and East Bengal. In all other places the changes were generally slight. The trough of low pressure over the Gangetic plain was moving northward towards the hills, but this was the only important alteration in the distribution. Calms prevailed over the Gangetic plain, whence the normal south-easterly winds had disappeared. In all other places the usual monsoon circulation was shown. Showery weather was reported from nearly all parts of the country, but the rainfall was generally lighter than on the preceding day. The mean temperature was normal over Bengal, Bombay, and the Central Provinces; in excess in Burma and Madras; and in defect over the North-Western Provinces, the Punjab, Gujarat, Central India, Sind, and Rajputana.

Temperature.—As mentioned above, the rainfall gradually increased as the week advanced, and was heaviest on the 30th. The temperature returns show a general agreement with these conditions. Thus on the 25th the mean temperature was excessive in all provinces, except Madras; on the 26th in all provinces, except the North-Western Provinces and Madras; on the 27th in all provinces, except Burma, the North-Western Provinces, and Bombay; and on the 28th in all provinces, except Burma. On the 29th a change set in agreeing with the increase in the extent and amount of rain, and from that date until the close of the week the mean temperature was low in the majority of provinces. The following table gives the variations of the mean temperature from the normal in the different provinces of India for each day of the week:

Province.	August 1895.							Mean variation of week.
	25th	26th	27th	28th	29th	30th	31st	
	°	°	°	°	°	°	°	°
Burma	+0·4	+0·2	—1·3	—0·9	—0·3	+0·5	+1·4	0
Bengal and Assam	+0·2	+0·6	+0·6	+0·5	—0·2	—0·1	+0·7	+0·3
North-Western Provinces and Oudh	+1·1	—1·2	—0·6	+0·9	+0·1	—2·1	—1·4	—0·5
Punjab	+4·4	+3·3	+2·4	+0·5	—2·8	—5·7	—4·3	—0·3
Bombay	+0·6	+0·1	—0·1	+0·9	+1·3	+0·7	+0·2	+0·5
Central Provinces and Berar	+2·3	+1·4	+0·7	+0·6	—1·3	—2·0	—0·3	+0·2
Central India and Gujarat	+1·2	+1·8	+2·8	+0·2	—1·1	—1·2	—1·5	+0·3
Sind and Rajputana	+1·2	+2·1	+2·4	+2·0	—0·4	—1·1	—1·6	+0·7
Madras	—2·3	—1·4	+0·7	+1·5	—0·2	+1·1	+1·6	+0·1
Mean for whole of India	+1·0	+0·8	+0·8	+0·7	—0·5	—1·1	—0·6	+0·2

The means for the whole country show that for the whole week the variation from the normal was very small, but there was a slight excess on the first four days and a slight defect on the last three days. The provincial variations for the week show that the mean temperature was normal throughout, but the daily variations show that there were, in some places, large changes during the week: thus, in the Punjab the variation on the 25th was +4·4° and on the 31st —4·3°, showing a change of nearly 9°. The following were the highest temperatures recorded on each day:

On August	25th	the highest temperature was	105·4°	at	Montgomery.
,,	26th	,, ,,	106·9°	,,	,,
,,	27th	,, ,,	107·9°	,,	,,
,,	28th	,, ,,	104·4°	,,	Mooltan.
,,	29th	,, ,,	101·0°	,,	Jacobabad.
,,	30th	,, ,,	102·5°	,,	,,
,,	31st	,, ,,	102·5°	,,	,,

Rainfall.—As stated above, moderate monsoon conditions have prevailed fairly generally throughout the Indian area during the week under review. At first the distribution of pressure was somewhat abnormal. A low pressure area existed over the Punjab and a second low pressure area over the north-west of the Bay, but the characteristic trough of low readings over the Gangetic plain was not properly developed. In consequence, the rainfall area was somewhat restricted and no rain was falling over North-Western India. As the depression from the Bay advanced north-westward this condition was changed. The trough became better developed and extended from the Punjab south-eastward to Orissa, south-easterly winds blew up the Gangetic plain, and by Wednesday, 28th, rain was reported from as far west as Peshawar. Conditions favourable for rainfall over Northern and Central India lasted until Saturday, 31st, when the trough showed a tendency to travel northward to the hills, the south-easterly winds ceased, and the rainfall area began to contract. Over the Peninsula the rainfall has been less steady than over Northern India, and the weather has been nothing more than showery. At times these showers have been few and light, as on the 28th, when the heaviest fall was 0·69″ at Ratnagiri; and at other times they have been heavy, as on the 30th, when Cuddalore received 2·75,″ Trichinopoly 2·05″, and Salem 1·04″. The effect of these rainfall conditions has been to occasion a somewhat irregular distribution of rainfall for the week. The table at the close exhibits the rainfall data. From this it will be seen that the heaviest average rainfall, 11·44 inches, was received in Tenasserim. This was followed by about 4 inches in Lower Burma, Arakan, Assam (Surma), the Punjab (Hill districts), the Central Provinces (Centre and East), and Rajputana (West), while the lightest rainfall was reported from Khandesh and Sind. In normal years the rainfall is heaviest, 7 inches, in Tenasserim, and this is followed by about 6 inches in Arakan and Assam (Surma), while the smallest amount is reported from Sind. Consequently, the general features of the actual and normal distribution agree fairly well. There are, however, considerable local variations between the two, and these are shown in the third column of the table. From this it will be seen that twenty-five of the rainfall divisions report an excess and twenty-six report a deficiency of rain for the week. This result is a considerable improvement as compared with last week, when only fourteen divisions recorded an excess. The regions which received excessive rainfall included the following divisions:—Tenasserim and Central Burma, Orissa, all the North-Western Provinces and Oudh divisions, all the Punjab divisions, except the central, all the Central Provinces divisions, all the Central India and Rajputana divisions, the East Coast (North and South divisions), and Madras (South). In all other parts of the Indian region the rainfall was in defect. The most important cases of excess were Tenasserim with an excess of over 4 inches, Rajputana (West) with an excess of $3\frac{1}{4}$ inches, and the Punjab (Submontane) with an excess of 2·48 inches; while the most important instances of deficiency were Coorg with a defect of $3\frac{1}{4}$ inches, North Bengal with a defect of 2·61 inches, and Assam (Surma) with a defect of 2·42 inches. The excess in the case of Rajputana (West) was very marked, as the

actual rainfall received was four times the normal average of the week; on the other hand, Mysore received only a quarter and Coorg only a half of its normal supply. In Upper Burma much heavier falls were received in some places than was the case last week, but Saigaing and Bhamo received only two light showers during the present week.

The returns of the sudder stations show that rain was received daily over the whole of North-Eastern India except Upper Burma, and that it fell principally on the last four days of the week in Upper India. In the west of the Peninsula the showers were scattered throughout the week, while in the central parts of the country the falls were also daily. In the south-east of the Peninsula heavy rain fell during the last three days of the week.

The three concluding columns of the table show the state of the seasonal rainfall. As was the case last week and for several previous weeks, the general rainfall of India since the beginning of June approximates very closely to the normal. Taking a variation of less than twenty per cent. from the normal to represent a normal condition, the last column of the table shows that only in Arakan, East Bengal, Deltaic Bengal, Central Bengal, Mysore, Berar, Gujarat, Rajputana (East), Central India (West), and Madras (Central) is there any important deficiency of rainfall, while only in Orissa, the Central Provinces (East), the East Coast (North), and the East Coast (Central) is there any important excess.

The following are the more important totals recorded during the week:—Moulmein 11 inches, Fenny (Noakhalli) 6·05 inches, Sunamganj (Sylhet) 6·42 inches, Kurseong 5·60 inches, Jajpur (Cuttack) 7·92 inches, Rai Bareilly 9·87 inches, Mirganj (Bareilly) 10·72 inches, Karuprayag (Garhwal) 12·34 inches, Ferozepore 6·24 inches, Umballa 6·73 inches, Dharmsala 9·58 inches, Karkala (Mangalore) 5·27 inches, Bavda (Kolhapur) 6·00 inches, Nagpur 9·96 inches, Lanji (Balaghat) 14·09 inches, Kurwai (Bhopal) 7·29 inches, Narasannapeta (Ganjam) 7·01 inches, Tiruvadi (Tanjore) 6·57 inches.

SIMLA, *5th September 1895.*

W. L. DALLAS,
Asst. Meteorological Reporter to the Government of India.

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 31st August.*—Rainfall general and good in the greater portion of the Circars, South Arcot, Trichinopoly, and Tanjore; fair or moderate elsewhere, except in the Deccan districts, Nellore, and Tinnevelly, where only light or scattered showers have fallen. Irrigation supplies are inadequate in some of the Deccan, Carnatic, Central, and Southern districts. Agricultural operations are progressing, and the standing crops are generally in fair condition, but are suffering in parts of the Deccan, Central, and Southern districts, and have withered in parts of Tinnevelly. Some harvest is in progress in almost every district with generally fair outturn. Pasture and fodder are generally sufficient. Cattle are in good condition. Prices are easier in the greater portion of the Circars; elsewhere prices are generally stationary.

Bombay.—*For week ending 4th September.*—Rain throughout the Presidency, but the fall was generally slight. More rain is required in parts of Thar and Parkar, Gujarat, Kathiawar, the Deccan, and Carnatic for the standing crops, which are withering in parts of nine districts. Deficiency of water continues in parts of Sind. Preparations for the late crops are progressing in parts of seven districts. Agricultural operations have been retarded for want of rain in parts of Bijapur, Dharwar, and Baroda territory. Fodder is scarce in parts of two districts. Agricultural stock in good condition, except in one taluka of Sholapur. Prices are normal, except in parts of Ahmednagar, Sholapur, and Satara.

Bengal.—*For week ending 2nd September.*—Fine weather prevailed for the greater part of the week over the Province, and the rainfall was slight in almost all districts. Want of rain continues to be felt in most parts of the Burdwan and Presidency divisions; elsewhere the general prospects of the winter rice crop are favourable. Early rice and jute are being harvested. In Bihar the autumn crops are reported good. *Marua* (*Eleusine coracana*) and indian-corn are being harvested. The price of common rice continues steady.

North-Western Provinces and Oudh.—*For week ending 4th September.*—Rain has been ample and in most districts somewhat heavy. The crops are flourishing. Slight damage by floods is reported from Moradabad, and by continued rainfall from Garhwal; otherwise prospects are good. Harvesting of the autumn crops has commenced in some of the eastern districts, and preparations for spring sowings are in active progress. Supplies are sufficient, and prices are generally stationary.

Punjab.—*For week ending 4th September.*—Rainfall general. Agricultural operations, sowings, and weedings of the autumn crops are in progress. Ploughings for the spring crops are going on in some districts. The condition of the standing crops is reported to be good to average, but more rain is wanted in Hissar and Shahpur. Rats are damaging the crops in parts of Ferozepore. Cattle are generally in good condition, and fodder is sufficient throughout the Province. Prices continue high in Umballa, are rising in Jullundur and Peshawar, normal in Ferozepore and Sialkot, and low elsewhere.

Central Provinces.—*For week ending 4th September.*—There has been good rain in the north and east of the Provinces. In Sambalpur a break would be welcomed for sowing sesamum and pulses. Nimar has received only two-thirds of its average rainfall, and more rain is required. The prospects of the autumn crops are generally good; in Saugor and Damoh prospects are excellent. Land is being prepared for winter sowings. Prices are steady.

Burma.—*For week ending 31st August.*—In Lower Burma rain is badly wanted in parts of the Tharrawaddy district. Prospects are very poor in the Paungde and Thegon townships and not good in the Mahathaman township of the Prome district; elsewhere prospects are good. In Upper Burma good rain has fallen during the week in Mandalay, Shwebo, Thayetmyo, Pakokku, Minbu, Magwe, Meiktila, and Yamethin; Lower Chindwin and Myingyan received nearly an inch. The standing crops in these districts have somewhat revived, and if rain continues it is probable that fair crops will be obtained. In the Gangaw sub-division of the Pakokku district the crops are said to be withering for want of rain. Paddy and sesamum are said to have completely failed in the unirrigated tracts in Minbu. Rain is badly wanted in Bhamo. Cultivation is very backward in the Minzu and Singaing townships of Kyaukse, and broadcast sowing of short-lived paddy is being resorted to. On the whole, however, the general prospects have considerably improved during the week. The price of paddy has risen slightly in Thayetmyo, fallen considerably in Tharrawaddy, and slightly in Thongwa; elsewhere prices are stationary.

Assam.—*For week ending 3rd September.*—The weather is seasonable. Reaping of early and transplanting of late rice are progressing. Tea blight is reported from Cachar. The condition of cattle is fair. Fodder is scarce in Kamrup, Darrang, and Nowgong. Water is sufficient.

Mysore and Coorg.—*For week ending 4th September.*—MYSORE: Slight rain has fallen in parts. The crops and prospects are good. Prices have slightly fallen in Kolar and Chitaldroog and risen in Hassan and Kadur.

COORG: Rainfall moderate. Transplanting of rice continues. The *ragi* (*Eleusine coracana*), coffee, and cardamom crops are in good condition. Fodder and water for cattle are abundant. Prices are normal.

Berar and Hyderabad.—*For week ending 4th September.*—BERAR: Weather warm and cloudy with moderate rainfall during the week. Cotton and *jowar* (*Sorghum vulgare*) are withering in Akola and Basim owing to the long break in the rains. Land is being prepared for the next cold weather crop. Sowings have been completed throughout the Province, and weeding operations are now well in hand. Fodder and water are reported insufficient in the Khamgaon taluka. Prices are fluctuating in Buldana and Wun.

HYDERABAD: Rainfall moderate. The water-supply is increasing. The autumn crops are in good condition. Sowing of the irrigated crops is progressing, but more rain is required. Prices continue normal.

Central India.—*For week ending 4th September.*—Rain throughout Central India during the week, but more rain is still wanted in Neemuch, parts of Gwalior, and in the Bhopawar Agency. Agricultural operations are in progress in all Agencies. The crops have been damaged for want of rain in two districts of Gwalior. Agricultural stock in good condition in all Agencies, except parts of Gwalior. Pasturage is generally good, except in four districts of Gwalior. Prices are high in Bhopal and Goona, rising in three districts of Gwalior, low in Bhopawar, and normal elsewhere.

Rajputana.—*For week ending 4th September.*—Good rain has fallen almost throughout Rajputana, but more rain is wanted in Meywar, Ulwar, and Tonk. Agricultural operations and the standing crops are generally good. Prospects are fair. Agricultural stock are generally in good condition. Pasturage and fodder are generally sufficient. Prices have risen in one State, are falling in two, and fluctuating in one, but are steady elsewhere.

Kashmir.—KASHMIR VALLEY.—*For week ending 3rd September.*—Rainfall moderate. The standing crops are excellent. Water is ample for irrigation. Prices continue a little above normal.

JAMMU PROVINCE.—*For week ending 4th September.*—Rainfall moderate. Weather clear. The crops are in good condition. Fodder is sufficient.

Nepal.—*For week ending 31st August.*—The weather is warm. Upland rice is doing well, but lowland rice requires more rain.

DENZIL IBBETSON,

Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

RAILWAY STATISTICS.

STATEMENT OF APPROXIMATE GROSS EARNINGS OF INDIAN RAILWAYS FROM 1ST JULY TO 25TH AUGUST 1894, AND FROM 1ST JULY TO 24TH AUGUST 1895.

N.B.—As regards the figures in column *Total Earnings from 1st July 1895*, audited figures have been used as far as possible.

SUPPLEMENT TO

The Gazette of India.

No. 37.] SIMLA, SATURDAY, SEPTEMBER 14, 1895.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

HOME DEPARTMENT.

REVIEW OF THE REPORTS ON THE ADMINISTRATION OF JAILS IN THE SEVERAL PROVINCES OF BRITISH INDIA FOR THE YEAR 1894.

No. $\frac{\text{8-Jails}}{379\text{-}390}$.

Extract from the Proceedings of the Government of India in the Home Department (Jails),—under date Simla, the 10th September 1895.

Read again—

The Reports on the Administration of Jails in the Provinces of British India for the year 1893, the orders of the Local Governments and Administrations thereon, and Home Department Resolution No. $\frac{\text{9—Jails}}{593\text{—}604}$, dated the 30th October 1894, and accompaniments.

Despatch to the Secretary of State, No. 49 $\frac{\text{Judicial}}{\text{Jails}}$, dated the 21st November 1894.

Read also—

The Reports on the Administration of Jails in the Provinces of British India for the year 1894, with the orders of the Local Governments and Administrations thereon.

RESOLUTION.

THE Provincial Reports on the Administration of Jails should, under standing orders, reach the Government of India by the 1st June. The statement in the margin shows that the Reports for 1894 were on the whole submitted with fair punctuality, the Report of only one Province (the North-Western Provinces and Oudh) being delayed beyond the month in which it was due.

PROVINCE.	DATE OF RECEIPT BY THE GOVERNMENT OF INDIA OF THE REPORT FOR	
	1893.	1894.
MADRAS	30th May 1894 ...	11th June 1895.
BOMBAY	9th July 1894 ...	22nd June 1895.
BENGAL	14th June 1894 ...	10th June 1895.
NORTH-WESTERN PROVINCES AND OUDH.	2nd August 1894 ...	8th July 1895.
PUNJAB	2nd June 1894 ...	18th June 1895.
CENTRAL PROVINCES ...	28th July 1894 ...	29th June 1895.
BURMA	1st June 1894 ...	31st May 1895.
ASSAM	4th June 1894 ...	19th June 1895.
COORG	24th May 1894 ...	10th June 1895.
HYDERABAD	4th June 1894 ...	5th June 1895.

2. The general distribution of prisoners of all classes in the jails and subsidiary jails of British India is shown in Statement No. 1 appended to this Resolution. The number of Central Jails (39) increased by two owing to the abolition of the District Jail at Hyderabad in the Bombay Presidency and the construction of a second class Central Jail at that station, and the conversion of the District Jail at Montgomery in the Punjab into a Central Jail. The number of District Jails (196) was less by four than in 1893 (200). The statistics of only 497 subordinate jails and lock-ups are included in the returns as compared with 623 in the preceding year. This change was mainly the result of the orders conveyed in paragraph 3 of Home Department letter No. $\frac{9\text{-Sanitary}}{285}$, dated the 9th October 1894, that only the statistics of lock-ups administered by the Jail Department should be included in the Jail Statements, in consequence of which the figures relating to 126 lock-ups in charge of Magistrates in the Punjab have been excluded from the returns for 1894. The year opened with a somewhat smaller jail population (95,096, of whom 92,234 were males and 2,862 females) than did 1893, (95,296, of whom 92,261 were males and 3,035 females). The number admitted during the year was 436,377 (415,973 males and 20,404 females), compared with 451,836 (430,847 males and 20,989 females) admitted during 1893. As in the previous year, admissions were highest in the North-Western Provinces and Oudh, where 98,982 convicts (93,400 males and 5,582 females) were received into jail. The corresponding figures in the other large Provinces were Bengal 91,740 (88,130 males and 3,610 females), Madras 73,388 (69,979 males and 3,409 females), Bombay 67,329 (64,161 males and 3,168 females), the Punjab 46,933 (45,372 males and 1,561 females), and Burma 30,220 (29,254 males and 966 females).

The largest decrease in the number of prisoners admitted into jails occurred in the Punjab, where, chiefly owing to the orders already referred to, nearly 10,000 fewer under-trial prisoners were received.

The total jail population of the year amounted to 531,473; the corresponding figure in the preceding year was 547,132.

The number of prisoners discharged from all causes fell from 452,080 in 1893 to 435,162 in 1894, the greatest number of releases (96,570) having occurred, as in the preceding year, in the North-Western Provinces and Oudh. The year closed with a jail population of 96,311, as compared with 95,052 at the close of 1893. The jail population was higher at the end than at the beginning of the year in the North-Western Provinces and Oudh (26,809 prisoners in 1893 and 29,221 in 1894), Burma (11,826 in 1893 and 13,625 in 1894), the Central Provinces (4,506 in 1893 and 4,719 in 1894), Assam (1,413 in 1893 and 1,429 in 1894) and Coorg (110 in 1893 and 137 in 1894). The number of persons in jail, at the close of 1894 was very much larger in the North-Western Provinces and Oudh than in any other Province. The total daily average number of prisoners (95,177) was greater than in 1893 (94,964). The figures for the larger Provinces were: Madras (10,025), Bombay (8,139), Bengal (17,343), the North-Western Provinces and Oudh (27,947), the Punjab (11,586), the Central Provinces (4,505), Burma (12,647).

3. Statement No. 2 contains statistics relating to convicts only. The year opened with 88,279 (85,641 males and 2,638 females) convicts in jail against 88,572 (85,791 males and 2,781 females) at the beginning of 1893. The number imprisoned during the year was 174,305 (164,830 males and 9,475 females), as compared with 176,458 (166,690 males and 9,768 females) imprisoned during the year 1893. These figures when combined show a decrease in the total number of convicts in jail from 265,030 (252,481 males and 12,549 females) in 1893 to 262,584 (250,471 males and 12,113 females) in 1894. The number of convicts released will be gathered from the following figures:

		Males.	Females.	
Released on appeal ...	1893 ...	12,975	368	
	1894 ...	13,034	323	
Released on expiry of sentence ...	1893 ...	137,672	9,093	
	1894 ...	122,792	8,288	
Released under remission rules ...	1893 ...	13,116	325	
	1894 ...	23,374	612	
Released by order of Government (*a*) on account of sickness	1893 ...	113	3	
	1894 ...	109	3	
(*b*) on other grounds	1893 ...	120	1	
	1894 ...	167	3	
		Males.	Females.	Total.
TOTAL ...	1893 ...	163,996	9,790	173,786
	1894 ...	159,476	9,229	168,705

Bengal as usual heads the list in the matter of releases by the order of Government on the ground of sickness. The number so released in that Province was 67 excluding 13 moribund prisoners who were released, not in the hope that they would recover, but that they might have the comfort of dying at home, and are therefore shown among the deaths in the Jail statistics. Nineteen prisoners were released on account of sickness in Assam, and 13 in Burma; in the rest of India only 13 were released on this ground. Of the 167 male convicts liberated on grounds other than sickness, 119 were discharged in Burma, compared with 74 in 1893. During the year, 903 convicts (of whom 49 were females) were transported beyond the sea either to the Andamans or from Burma to India; 74 (3 females) were transferred to lunatic asylums; 66 (males) escaped; 382 (11 females) were executed; and 2,822 (93 females) died. The year closed with 1,009 more convicts in jail than there were when it began. The daily average number (88,064, the average of females being 2,691) was also higher than in 1893 (87,554, the average of females being 2,723).

An increase was noticed last year in the number of convicts deported to Port Blair, or from Burma to Indian jails, from 726 in 1892 to 800 in 1893, and there was a further rise in the year under report to 903. The greater part of the increase (103 to 166) took place among Burman convicts transferred to Indian jails. There was an increase of 40 in the numbers transported to the Andamans, but even so the number of women transported there declined from 65 in 1893 to 49 in 1894. The steady decline in the number of women deported to the Settlement is causing some inconvenience.

The number of convicts who escaped and were not recaptured fell from 120 in 1892 to 59 in 1893. There was a slight rise to 66 in the year under review. More than one-third (23) of the number escaped in Assam, where owing to the large number of convicts who broke jail, (60, of which 37 were recaptured), the number of escapes was higher than in any previous year. The escape of so many convicts undoubtedly displays a laxity of discipline; and the Governor General in Council trusts that the orders issued by the Chief Commissioner regarding the enforcement of proper discipline, and the recent increase in the pay of the warders, will prevent the recurrence of such discreditable results. The number of convicts who escaped and were not recaptured was 15 in Bombay. In all other Provinces the numbers were very small.

4. The religion, age, education and previous occupation of convicts are exhibited in Statement No. 3. The number of Christians increased from 2,162 in 1893 to 2,215 in 1894. The number of Europeans and Eurasians rose respectively from 630 and 185 to 694 and 191, while the number of Natives recorded as professing the Christian religion fell from 1,347 to 1,330. There was also a decrease in the number of Muhammadans from 46,288 to 43,494, and of Hindus and Sikhs from 112,698 to 109,061. But the number of Buddhists and Jains rose from 12,162 to 15,875, and the miscellaneous classes from 3,064 to 3,583. The proportion of convicts of each religion to the total convict population and to the total free population of their respective persuasions are compared below:

Religion.	Ratio per mille of each class of convicts to			
	Total convict population.		Total free population of each class.	
	1893.	1894.	1893.	1894.
Christians	12·3	12·7	0·9	0·9
Muhammadans	262·4	249·6	0·8	0·8
Hindus and Sikhs	639·0	626·0	0·5	0·5
Buddhists and Jains	68·9	91·1	1·4	1·8
All other classes	17·4	20·6	0·3	0·4

The classification of convicts according to the four main age-periods during the years 1893 and 1894 is as follows:

	Number of convicts admitted.	
	1893.	1894.
Under 16 years of age	2,051	1,825
From 16 to 40 years	141,243	138,261
From 40 to 60 years	29,836	30,866
Over 60 years	3,244	3,276

The Governor General in Council is glad to notice the decline (10·5 per cent.) in the number of juveniles of less than 16 years of age admitted into jails.

5. The figures just referred to do not include boys admitted to Reformatory Schools, the statistics of which will now be noticed. The Reformatory School at Chingleput had been 7½ years in existence on the 31st December 1894, and during this period 299 pupils had been received into the school. There were 151 boys in the school at the beginning of 1894, and 35 were admitted during the year. Thirty-three were discharged and of these 10, or over 30 per cent., continued to follow the trades they learnt at the Reformatory. Of the 126 boys who had left the school up to the 31st December 1894, only 23, or 18 per cent., had taken to the trades they had been taught in school; 16 had resorted to cultivation; 25 were pursuing occupations facilitated by the training received in school; 37 had resumed the occupations followed previous to conviction; 4 had emigrated; information could not be procured about 8; 2 had died; the conduct of 6 was not satisfactory; and 5 were in jail. There was a marked improvement in the general conduct of the boys, as evidenced by the comparatively small number of recorded punishments. The technical education of the school includes instruction in cabinet-making, blacksmith's work, weaving, tailoring, and drawing; and the pupils appear to have made satisfactory progress in every department except drawing. The health of the boys was satisfactory, though the number of patients in hospital increased. There was one death—the second in the record of the school. The number in the school at the close of the year was 149.

The number of boys at the Reformatory School at Yeraoda at the beginning of the year was 102. Twenty-seven boys were admitted during the year; while 25 were released, 2 were transferred to jails, and one died. There was an improvement in the conduct of the boys, as shown by the decline in the percentage of punishments from 44·2 in 1892 to 36·7 in 1893 and 33·7 in 1894. The total number of boys released on expiry of sentence since the opening of the Reformatory was 98. Eighteen were reported to be following the trades learnt in the school, 17 were otherwise employed, 2 died, and 3 had been relegated to jail. The information procured regarding their subsequent careers was imperfect. The accounts of the year showed a satisfactory increase in the factory receipts from Rs. 973 in 1893 to Rs. 1,300 in 1894. The increase in the profit per boy over the rate for the preceding year was over Rs. 10. The number of admissions to hospital rose slightly from 130 in 1893 to 134 in 1894.

There were 528 boys in the Alipur and Hazaribagh Reformatory Schools at the beginning of the year, and 143 were admitted during the year. One hundred and five were released and 4 died during the year and at its close there were 224 boys at Alipur and 338 at Hazaribagh. The health of the boys was good, and only 4 deaths (3 at Alipur and 1 at Hazaribagh) occurred. One boy escaped from Hazaribagh but was recaptured. The reports received of boys released from these schools show that 133 were well-behaved, 2 were viewed with suspicion, 2 bore bad characters, 11 were in jail, 3 had died, and only 4 were following trades taught in school. Many of the boys are said to be proficient in gymnastics, which were introduced into the course at Alipur in 1891 and at Hazaribagh in 1893. There is a day and a night school at both institutions at which attendance will in future be compulsory. The profits from manufactures amounted to Rs. 16,640.

The Bareilly Reformatory School, which was opened on the 1st April 1889, has accommodation for 232 boys. There were 193 boys at the school at the beginning of the year and 65 were admitted during the year. Six were transferred to jail, 3 were released by order of Government, 1 was released on appeal, and 44 were discharged on completion of sentence. There were thus 204 boys left in school at the end of the year. The conduct of the boys was not satisfactory. Out of 55 boys discharged from the Reformatory, only 4 relapsed into criminal habits, while 38 were engaged in agricultural or industrial occupations. The health of the boys was fairly good, and no deaths occurred. All the boys are put through a course of drill and gymnastics for an hour on alternate days. The occupations taught in the school are farming, gardening, cane-work, shoe-making, tailoring and carpet-weaving. Of these that carried on with the most satisfactory results is cane-work. The working of the farm and factories resulted in a net profit of Rs. 802.

The year opened with 80 boys in the Reformatory School at Jubbulpore. Seventeen were received during the year and 15 were released. There were thus 2 more on the rolls at the close of the year than at the beginning. The daily average rose from 69 in 1893 to 86 in 1894, and the cost of their maintenance from Rs. 4,795 to Rs. 5,546. Their health and discipline were satisfactory.

There were 75 boys in the Paungdè Reformatory School at the beginning of the year, and 18 were admitted during the year. Of these 13 were released on expiry of sentence, 4 on revision, 2 under the Reformatory Schools Act, and 3 were sent back to jail. The year thus closed with 71 boys on the rolls. Instruction was given in tinsmith's work, carpentry, farming and gardening. The conduct of the boys was good and their health excellent. It is observed that good progress was made in the construction of the Reformatory at Insein.

The Punjab Government is strongly convinced of the evil of sending boys to jail, but it has been compelled up to the present time to set aside the proposal to establish a Reformatory in that Province for want of funds.

The reports on the working of these institutions are, in the opinion of the Government of India, on the whole satisfactory, but the information as to the manner in which boys discharged from Reformatory Schools have managed to earn their living is imperfect. It is, however, not easy to obtain accurate information as to the manner of life of discharged boys without inquiries which are likely to be conducted in an inquisitorial manner so as to suggest that the persons regarding whom inquiry is made are still under the supervision of the police. The Governor General in Council is upon the whole inclined to agree with His Honour the Lieutenant-Governor of Bengal, who has directed that inquiries on this point shall only be made as to boys discharged during the particular year to which a report relates.

6. Of the 174,228 convicts received during the year under review, 148,724 (85·4 per cent.) were wholly illiterate, 7,595 (4·4 per cent.) were able to read, and 17,909 (10·3 per cent.) were able to read and write. The corresponding percentages in 1893 were 86·5, 6·3, and 7·2. The education imparted in jail is now restricted, under the orders in paragraph 25 of Home Department Resolution No. $\frac{10\text{-Jails}}{610\text{-}23}$, dated the 9th November 1892, to those prisoners under the age of 18 under sentences of at least one year. These are instructed not only in reading and writing, but also, if possible, in some simple handicraft.

7. The figures regarding the occupation of male convicts previous to admission into jail show that fewer convicts came during 1894 from persons employed under Government or municipal or local authorities, or engaged in agriculture, commerce and trade, mechanical arts, or miscellaneous pursuits. On the other hand there was an increase among professional persons and those in service or performing personal offices. By far the largest number of convicts (93,339) continue to come from the agricultural class, and the smallest number from persons in the service of Government or of municipal or local bodies. The following figures compare the numbers who had been following the avocations, among which the convicts are distributed in Statement 3, in 1893 and 1894:

	1893.	1894.
Employed under Government or municipal or local authorities	4,441	4,410
Professional persons	6,083	6,631
In service or performing personal offices	15,432	15,513
Engaged in agriculture or with animals	93,842	93,339
Engaged in commerce and trade	8,127	7,991
Employed in mechanical arts, manufactures, engineering operations, etc.	6,389	5,793
Engaged in miscellaneous pursuits	32,289	31,074

The following figures compare the condition of the female convicts in 1893 and 1894:

	1893.	1894.
Married	5,969	5,889
Unmarried	516	489
Widows	2,846	2,699
Prostitutes	440	400

8. The distribution of the convicts admitted into jail during the years 1893 and 1894, according to the length of their sentences, is shown in the following statement:

	Number of admissions.		Ratio per cent. on total admissions.	
	1893.	1894.	1893.	1894.
Not exceeding one month	63,582	59,483	36·05	34·14
Above one month and not exceeding three months.	33,890	33,855	19·22	19·43
Above three months and not exceeding six months.	29,934	31,274	16·97	17·95
Above six months and not exceeding one year.	24,249	24,474	13·75	14·05
Above one year and not exceeding two years.	13,872	14,608	7·87	8·39
Above two years and not exceeding five years.	6,812	6,365	3·86	3·65
Above five years and not exceeding ten years.	1,822	1,985	1·03	1·14
Exceeding ten years	85	94	0·05	0·06
Transportation ... (*a*) for life ...	1,007	1,079	0·57	0·62
Transportation ... (*b*) for a term ...	537	441	0·30	0·25
Sentenced to death	575	558	0·33	0·32

9. Statement No. 5 is designed to show what number of the convicts admitted into jail had been previously convicted. Of those admitted during 1894 (174,228), 22,740 (13·1 per cent.) were ascertained to have been previously convicted. The corresponding percentage in 1893 was 12·2. Fourteen thousand seven-hundred and fifty-one convicts (380 females) were found to have been previously convicted once; 4,424 (106 females) twice; and 3,565 (83 females) more than twice. More convicts were found to have been convicted more than twice in the North-Western Provinces and Oudh than in any other Province, but the proportion of convicts admitted to jail who were ascertained to have more than two convictions against them was larger in Bombay (3·8 per cent.) than elsewhere. The number of juveniles admitted to jail who had been previously convicted was 207 compared with 201 in 1893.

In Madras the general working of the Bertillon system of anthropometry for the recognition of habitual offenders is entrusted to the Police, but the descriptions of prisoners admitted into Central and District Jails will in future be

recorded in accordance with this system. The percentage (14·6) of convicts received into the Central and District Jails of the Province in 1894 who were recognized as old offenders was higher than in any of the four preceding years. The Bertillon system was introduced into Bombay during the year under review, but the system is yet in its infancy and no marked results can be expected from it yet. In Bengal 143 re-convictions were directly due to the identification afforded by this system, as compared with 23 identified the previous year. The progress is satisfactory, and still further improvement is expected from the co-operation of the Jail authorities with the Police. The anthropometric system is not yet in full working order in the North-Western Provinces and Oudh, and the percentage (10) of old offenders recognized remains much the same as in previous years. Here, as well as in the Punjab, the system is worked by the Police, who inspect weekly the prisoners confined in jail. The Jail authorities are required to afford every facility for the identification of old offenders and to report at once to the District Magistrate and the District Superintendent of Police every case of an under-trial prisoner who is known to have been previously in jail. Out of 2,106 convicts who were found in the Punjab to have been previously convicted, 251 were recognized by the Jail officials after arrival in jail after conviction. In the Central Provinces the number of previous convictions proved, increased from 1,173 in 1893 to 1,310 in 1894. In Burma, out of a total of 2,265 old offenders admitted during the year, 64 were identified by the Jail officials. In Assam out of 405 old offenders admitted, 260 were recognized before conviction, 38 were identified in jail, and 107 (nearly one-fourth the number) themselves admitted that they had been in jail.

10. The employment of convicts in jail during the years 1893 and 1894 is shown in Statement No. 6. The average number under sentence of labour on working days rose from 83,924 to 85,342. The actual number (76,652) available for labour in 1894, which is ascertained by deducting the average number sick (3,578), convalescent and infirm (4,450), and not employed for other reasons (661), was 2,710·47 in excess of the number (73,942) available in 1893. The following figures show the disposal of the convicts available for labour in the year under review:

	Average number employed.
Unremunerative labour	1,779
Prison officers	7,984
Prison servants	8,442
Gardening	5,739
Preparation of articles for consumption in jails ...	11,276
Jail repairs	2,799
Jail buildings	3,829
Manufactures	32,508
Labour under the Public Works Department	1,399
Labour under Municipalities, etc.	907

Of the number sentenced to labour (85,342), 9·58 per cent. were employed as prison officers, 10·13 per cent. as prison servants, and 39·01 per cent. on manufactures.

11. Statement No. 7 shows the prison offences committed by convicts and the punishments inflicted on them. The number of offences rose from 134,284 in 1893 to 138,265 in 1894. The number dealt with by Criminal Courts (374) was less than in 1893 (376). The increase in offences dealt with by Jail Superintendents was no doubt due to the greater accuracy with which prison offences have now to be recorded, but the proportion of offences to the prison population in different Provinces indicates that there is still great variety of treatment. The record was again highest in Bengal (41,348). In Burma, where the daily population in jail was 12,139, the number of offences was 39,623; in the Punjab, with an average population of 10,643, the number was 27,732; in Madras, where the average population was 8,891, there were 10,205 offences; in the North-Western Provinces and Oudh with a prison population of 26,039, there were 9,629 offences; in Bombay (population 7,227) 4,214; in the Central Provinces (population 4,264) 3,049; in the Hyderabad Assigned Districts (population 1,303) 1,266; and in Assam (population 1,367) 1,132

offences. The number of offences relating to work dealt with by Jail Superintendents diminished from 70,800 to 68,025; but there was an increase in the number relating to prohibited articles (from 15,356 to 16,687), in the number of cases of assault, mutiny and escape (from 1,997 to 2,539), and in other breaches of jail discipline (from 45,755 to 50,640). The number of offences relating to work was highest in Bengal (20,334); and the number relating to prohibited articles (4,778), cases of assault, mutiny and escape (882), and other breaches of jail rules (18,400) in Burma. In Bengal, the cases of assault, mutiny and escape numbered 661; in the North-Western Provinces and Oudh 307; in Madras 243; in Bombay 167; and in the Punjab 162.

Punishments are shown in Statement No. 7. The number rose from 134,273 in 1893 to 138,262 in the year under review. The increase occurred among punishments entered as minor in the Statement, which numbered 125,617 in 1894, as compared with 121,329 in 1893. The minor punishments consisted of warnings (29,248 in 1894, as compared with 32,321 in 1893), penal diet (13,553 in 1894, and 14,625 in 1893), separate and solitary confinement, under 14 and 7 days respectively, (11,182 in 1894 and 13,247 in 1893), imposition of handcuffs and link fetters (for not more than 30 days) (18,095 in 1894 and 18,322 in 1893), and other punishments (53,539 in 1894 and 42,814 in 1893). There was an increase among the major punishments of separate (over 14 days) solitary (over 7 days) and cellular confinement (from 700 to 1,144) and penal diet with solitary confinement (from 4,309 to 4,851); but fetters (link fetters for more than 30 days, bar fetters, and crossbar fetters) were imposed in fewer cases (from 2,980 to 2,526) and there were fewer corporal punishments (from 1,892 to 1,696). Major punishments of all kinds numbered 298 less than in 1893. The rise in the number of cases of separate, cellular and solitary confinement was due almost entirely to the fact that no such punishments were recorded in Madras or in the Punjab in 1893, while in 1894, 273 were shown against the former Province and 161 against the latter. The increase in the number of instances in which penal diet was combined with solitary confinement as a punishment was owing chiefly to a large increase in Burma from 1,443 to 2,183. Fetters were imposed in 446 cases in Burma compared with 179 in the previous year, but there was a substantial decline in their use in Bengal from 2,706 to 1,813 cases. They were not used as a punishment in Madras or Coorg; and only in 63 cases in the Central Provinces, 61 cases in the Punjab, 57 cases in the Hyderabad Assigned Districts, 46 cases in Bombay, and 25 cases in Assam. Corporal punishment was administered in more cases in the North-Western Provinces and Oudh (397), than elsewhere, and Burma (286), and Bengal (277) were the two next Provinces in this respect. But in each of these Provinces there was a substantial reduction as compared with the figures of the previous year, which were 440, 342 and 326 respectively, and the total number of whippings inflicted in all jails (1,696) and the percentage of male prisoners whipped (0·54) are the lowest recorded for some years. The average ratio of this form of punishment was exceeded in the Bombay Presidency (0·55 per cent.), the Punjab (0·56 per cent.), the Central Provinces (1·13 per cent.), Burma (0·91 per cent.), Assam (2·04 per cent.), Coorg (1·89 per cent.), and the Hyderabad Assigned Districts (0·55 per cent.). The proportion borne by corporal punishments to the total of major punishments imposed in jails fell from 15·04 per cent. in 1893 to 13·81 per cent. in 1894.

12. The working of the system of remission of sentence as the reward of good conduct is exhibited in Statement No. 12. The revised mark rules for the working of this system, which were approved by the Government of India in paragraph 36 of the Home Department Resolution of the 9th November 1892, received legal sanction under section 59 (5) of Act IX of 1894, which came into force on the 1st July of that year. The number of convicts who came under the remission system was nearly doubled during the year under review (13,467 in 1893 and 24,613 in 1894), and the number who actually gained remission was 24,550 compared with 13,441 in the preceding year. Seventy-five per cent. of those who earned remission were convicts sentenced for periods not exceeding two years. The largest number of convicts who gained remission in the jails of the North-Western Provinces and Oudh (8,031); the number in Bengal

was 4,529; in the Punjab 4,043; in Burma 2,680; in Madras 1,749; and in Bombay 1,651. The maximum remission in days (795) was earned by a convict in Burma under a sentence of ten years. The average remission earned by convicts under sentences exceeding ten years rose from 349 in 1893 to 457 days in 1894. The maximum gratuity earned by any convict released during the year was Rs. 20 (Central Provinces), as compared with Rs. 18, which was the maximum earned by a convict of the same Province in 1893. The highest amount earned in the Punjab was Rs. 18-12-0; in Madras, Rs. 15-3-3; in Bombay, Rs. 12; in the North-Western Provinces and Oudh, Rs. 3-6-0; and in Coorg, Rs. 3-2-9. The Government of India are, as has been previously observed, not desirous of rewarding, with larger sums than they need immediately on release, industrious and well-conducted prisoners, who by earning marks can gain a substantial reduction of their sentences. The Governor General in Council prefers that the working of the system should be made attractive to convicts so as to influence their conduct in jail for good, and that they should realize not only that the reduction of their sentences, but also that the grant of prison privileges and their selection for promotion to the grades of prison officer, largely depend upon the number of marks earned by them. It appears to the Government of India that the statistics of the year testify to the satisfactory working of the mark system, and that the system affords a powerful inducement to convicts to maintain good behaviour.

13. The financial aspect of the year's administration can be gathered from Statements Nos. 8 and 9, which show the expenditure in guarding and maintaining prisoners and their cash earnings during the years 1893 and 1894. The gross expenditure, which had fallen from Rs. 58,43,211 in 1892 to Rs. 57,02,019 in 1893, was still further reduced in 1894 to Rs. 56,16,756. The expenditure was highest in Bengal (Rs. 12,96,603), where it was in excess of that in 1893 (Rs. 12,02,131). In the North-Western Provinces and Oudh the expenditure was Rs. 11,56,944, as compared with Rs. 11,56,823 in 1893; in Burma, Rs. 8,27,891 against Rs. 8,60,192 in 1893; in the Punjab, Rs. 6,75,389 against Rs. 7,82,061; in Madras, Rs. 6,36,582 against Rs. 6,66,609; in Bombay, Rs. 5,53,495 against Rs. 5,60,401; in the Central Provinces, Rs. 2,67,387 against Rs. 2,72,113; in Assam, Rs. 1,06,819 against Rs. 1,03,350; in the Hyderabad Assigned Districts, Rs. 84,711 against Rs. 87,626; and in Coorg, Rs. 10,935 against Rs. 10,713. The gross cost of each prisoner was Rs. 58-11-9 compared with Rs. 60-5-4 in 1893.

The cost of rationing the prisoners fell from Rs. 24,39,862 to Rs. 22,74,728, and the cost per head of average strength from Rs. 25-14-9 to Rs. 23-14-6. The average charge on this account was reduced in every Province except Bengal, where it rose from Rs. 25-0-10 to Rs. 26-2-0. Excluding the small Province of Coorg, the cost per head was highest in Assam (Rs. 33-4-7). It was lowest in the Punjab (Rs. 17-2-8), where the rate for 1893 had been Rs. 23-1-2.

The cost of Jail establishments, which had risen from Rs. 19,61,688 in 1892 to Rs. 19,99,906 in 1893, rose again in the year under report to Rs. 20,95,081. An increase occurred under this head in all Provinces, but as a set-off against the increased expenditure of Rs. 95,175 shown under it must be taken the saving under police guards of Rs. 81,088, which is mainly the result of the substitution of warder guards charged under the head of Jail establishments for police guards debited against the police budget in the North-Western Provinces and Oudh from Rs. 3,79,403 to Rs. 4,23,865. The cost of Jail establishments per head of average strength was highest in Bengal (Rs. 27-5-0, compared with Rs. 25-11-10 in 1893). In Madras the rate was Rs. 25-4-2 against Rs. 23-5-3 in 1893; in the Punjab, Rs. 24-15-4 against Rs. 22-1-9; in Bombay, Rs. 24-14-3 against Rs. 23-11-6; in Burma, Rs. 23-14-7 against Rs. 25-1-9; in the Central Provinces, Rs. 23-6-10 against Rs. 23-0-1. The rate was lowest in Assam (Rs. 14-11-2).

The expenditure on account of hospital charges rose from Rs. 1,85,864 in 1893 to Rs. 1,97,779 in 1894. Charges under this head increased considerably in Bengal (from Rs. 52,541 to Rs. 70,148), and the North-Western Provinces

and Oudh (from Rs. 33,280 to Rs. 41,730). The increase in these two Provinces was due to the unhealthiness of the year, which was very marked among the free as well as among the jail population. The average of hospital charges per head of the prisoners in jail (Rs. 2-1-4) was higher than in 1893 (Rs. 1-15-6), but the cost per head of daily average number of prisoners in hospital fell from Rs. 56-4-8 to Rs. 53-1-1.

The total cost of clothing (Rs. 3,06,511) was slightly higher than in 1893 (Rs. 3,01,158), the amount being highest in the North-Western Provinces and Oudh (Rs 74,502), and, excluding Coorg, lowest in the Hyderabad Assigned Districts (Rs. 4,793). The average cost per head (Rs. 3-4-0) was much the same as in 1893 (Rs. 3-3-2). The rate was highest in Assam (Rs. 5-13-5) and lowest in Madras (Rs. 1-15-2).

The cost of contingencies rose from Rs. 5,36,209 to Rs. 5,81,795. This was due mainly to the great increase in Bengal from Rs 1,86,910 to Rs. 2,26,894, and in the North-Western Provinces and Oudh from Rs. 57,540 to Rs. 79,720. The increase in Bengal occurred chiefly under the following items: transfer charges, municipal taxes, cows, carts and bullocks and pumps. The excess under "transfer charges" was consequent on the transfer of a large number of prisoners for the benefit of their health and to relieve overcrowding. That under "cows, carts and bullocks" was due to the extension of the jail dairies and to the replacing of cattle which had died of foot-and-mouth disease. In the case of the North-Western Provinces and Oudh the increase was due to certain items being debited for the first time to the head of "Contingencies:" for instance, the Rs. 12,118 on account of the uniform and equipments of the reserve warder guard, the transfer of some lock-ups hitherto under the separate charge of Magistrates to the interior of jails, charges incidental to epidemics (cholera, influenza, etc.), water-taxes, badges and belts for the new grade of convict overseer, etc. Charges under the head of contingencies have not hitherto been debited on an uniform system in the different Provinces, but orders have recently been issued by the Government of India for the classification of such charges which will render comparison between the results in different Provinces easier in future years. The average cost per head on account of contingencies rose from Rs. 5-10-9 to Rs. 6-2-2, the rate being highest in Bengal (Rs. 13-1-4) and lowest in the North-Western Provinces and Oudh (Rs. 2-13-8).

14. The cash earnings of prisoners, which amounted to Rs. 12,51,424 in 1892 and Rs. 15,26,035 in 1893, rose to Rs. 16,70,557 in the year under review. They were highest in Bengal (Rs. 4,90,535) and in Burma (Rs. 4,83,125), and a great advance was made in both these Provinces. In the North-Western Provinces and Oudh the receipts (Rs. 2,10,338) were stationary; in the Punjab, there was a slight falling off from Rs. 1,55,748 to Rs. 1,44,395-8-0; in Madras they rose from Rs. 45,565 to Rs. 1,14,859. In Bombay there was a falling off from Rs. 1,34,397 to Rs. 92,787 and in the Central Provinces from Rs. 186,939 to Rs. 72,005. In Assam, (Rs. 34,921); the Hyderabad Assigned Districts, (Rs. 19,299), and Coorg, (Rs. 8,289), cash earnings slightly increased. The reduction of profits in Bombay and the Central Provinces is disappointing. In Bombay there was a decrease of Rs. 34,000 earned extramurally as no work could apparently be found for the Deccan and Sind gangs. This has now, it is understood, been remedied. The decrease in factory profits was also serious. There was a large falling off in the cash earnings of prisoners in the Central Provinces (from Rs. 1,86,939-5-0 in 1893 to Rs. 72,005-10-0 in 1894). This result was to a certain extent due to earnings of 1892 having been included in the accounts for 1893 at the Jubbulpore Jail, but also to the fact that clothing made for the Police at the Raipur Central Jail was not issued during the year and also to a falling off in the printing work at the Nagpur Central Jail.

After deducting the cash earnings from the gross cost of maintaining the jails and prisoners during 1893-94, the net cost in the former year is shown as Rs. 41,75,983, and in the latter as Rs. 39,46,198. The average net cost of a prisoner in India, which was Rs. 47-14-10 in 1892 and Rs. 44-3-0 in 1893, was Rs. 41-1-1 in 1894. These results are, in the opinion of the Government

of India, very satisfactory. The average net cost of a prisoner in the different Provinces during 1893 and 1894 is contrasted below:—

	1893.			1894.		
	Rs.	A.	P.	Rs.	A.	P.
Madras	58	4	10	52	0	8
Bombay	52	5	10	56	9	8
Bengal	46	5	3	46	7	9
North-Western Provinces and Oudh ...	35	9	1	32	3	10
Punjab	50	7	8	47	2	0
Central Provinces	19	4	5	43	5	11
Burma	42	15	4	27	4	2
Assam	53	12	8	48	3	8
Coorg	32	6	8	20	15	4
Hyderabad Assigned Districts ...	51	2	11	47	13	7

There was a marked increase in the Central Provinces, due to the falling off in the cash earnings of the prisoners noticed above, and, a reduction in all other Provinces except Bombay and Bengal.

15. The Government of India observe with regret that the health of the jail population in India, which had improved in 1893, again fell away in 1894. The ratios per mille of average strength of admissions into hospital (1,030 in 1894 and 907 in 1893), daily average number sick (39·29 in 1894 and 34·94 in 1893), and deaths (31·84 in 1894 and 24·30 in 1893) were all higher in the year under report than in 1893. There were 179 deaths from fever in 1894 against 178 in 1893; 933 deaths from bowel-complaints against 639; and 255 deaths from cholera against only 92 in 1893. The number of deaths from all three causes was highest in the North-Western Provinces and Oudh, where 59 resulted from fever, 262 from bowel-complaints, and 94 from cholera.

Of the prisoners discharged during the year (178,457), 38,017 (21 per cent.) had lost weight, 37,589 (21 per cent.) had neither gained nor lost weight, and 97,124 (54 per cent.) had gained weight while serving their sentences. Particulars regarding the remainder are not available.

16. The following statement compares the number of deaths and the ratio of mortality in each Province during 1893 and 1894, and also contrasts the jail death-rates with the maximum and minimum death-rates reported among the free population:—

		Number of deaths in jails.	Ratio per 1,000 of deaths in jails.	Provincial death-rate per 1,000 among free population.	Highest ratio of deaths among free population in any one district.	Lowest ratio of deaths among free population in any one district.
Madras	1893	247	23·19	19·3	41·4	12·3
	1894	199	19·85	...	...	...
Bombay	1893	207	25·44	27·20	38·00	14·62

	1894	39	28·53	42·0	44·5	39·1

* For Lower Burma only.

The comparison with the recorded death-rate among the free population must, however, be accepted with reserve.

17. In the Madras Presidency, although the ratios per mille of admissions into hospital (627) and daily average number sick (24·89) were higher than in 1893 (510 and 22·33, respectively), the death-rate (19·85) was lower (23·19) in 1893. Of the deaths which occurred in the jails of the Province 107 occurred among men who had been less than 6 months in jail. There was a decrease in the number of deaths from the chief diseases, except fever, respiratory diseases and ulcers and boils. There were 1,691 admissions to hospital on account of fever with 10 deaths, as compared with 1,172 admissions with 2 deaths in 1893. The number admitted suffering from respiratory diseases was greater than in the preceding year, but the number of deaths (32) was the same. There were 221 admissions for ulcers and boils with one death in 1894, against 165 admissions with no deaths in 1893. The jails which returned high death-rates in 1894 were Parvatipuram (135·20), Cuddapah (45·63), Mangalore (40·10), Palamcottah (31·98), Bellary (30·34), and Madura (29·68). In the Criminal Leper Ward at Madras the death-rate was 320 per 1,000, but only 4 deaths occurred. Similarly, the rate in the Mangalore District Jail (40·10 per 1,000) was occasioned by 3 deaths. The District Jail at Parvatipuram was visited by an epidemic of dysentery and diarrhœa which lasted from August to December, with the result that the jail returns show the appalling death-rate already mentioned. The jail was seriously overcrowded during the year, and short term prisoners employed on the jail buildings were accommodated in temporary sheds. A special inquiry made into the outbreak failed to ascertain its causation satisfactorily, but it was found that the jail yard had been overcrowded by the new buildings, and arrangements have now been made to remedy this. The Governor General in Council trusts that, under the orders of the Madras Government, the overcrowding of the jail will be prevented in future. Of the 140 prisoners admitted to hospital, 69 were suffering from dysentery and diarrhœa, and 20 of these died. The percentage of admissions from these diseases, which proved fatal at Parvatipuram (28·9), was out of all proportion to the rate for other jails of the Province (2·5).

Year.	Average daily strength.	Admissions.	Deaths.	Death-rate per 1,000.
1889	196	34	6	30·61
1890	202	77	5	24·75
1891	188	68	4	22·28
1892	204	61	4	19·61
1893	170	41	3	17·65
Average of quinquennium.	192	56·2	4·4	22·69
1894	214	69	20	93·46

The statement in the margin shows that the death-rate from dysentery and diarrhœa (93·46 per thousand) was higher than in any year of the preceding quinquennium, though the number of admissions (69) was almost equalled in 1891 (68). The striking feature of the outbreak, therefore, was not the number of cases, but the extreme gravity of the attacks. A description of the state of the prisoners' health on admission might have been useful towards forming an opinion as to the outbreak. It is difficult to avoid a suspicion that the disease was complicated by that scorbutic condition which always renders it so fatal.

The average jail population in 11 out of the 19 jails in the Bombay Presidency was in excess of the accommodation available, and two of the remainder were overcrowded at some period of the year. The death-rate per mille (33·21) was smaller than that for 1892 (36·5 per mille), but considerably higher than that for 1893 (25·8 per mille). One hundred and three out of the 240 deaths resulted from respiratory diseases and 41 from bowel-complaints. In 8 jails, the death-rate exceeded 40 per mille, and in Kaira and Shikarpur it was 113·1 and 52·1 respectively. The Kaira Jail has now been closed, and the opening of a new Central Prison at Hyderabad will prevent future overcrowding at Shikarpur. The Dhuliakot and Ahmedabad City Prisons, in which the mortality was 46·4 and 41·0 per mille, respectively, have been closed, and the status of the jail at Surat (death-rate 46·6 per mille) has been reduced. The Governor General in

Council trusts that the overcrowding which occurred in the year under report will not be permitted to recur.

As a result of the special inquiries instituted in Bengal regarding the state of the prisoners' health in 1892, much has been done to improve their hygienic surroundings. The provision of well-cooked and suitable food and adequate clothing has been a matter of solicitude to medical superintendents, arrangements for a better supply of water have been made in numerous instances, and many of the defects pointed out have been remedied. These improvements will, the Government of India entertain no doubt, tend to render the general health of the prison population more satisfactory. There has been a very material decline in the average death-rate in the last ten years (40·71 per 1,000) as compared with that of the previous decade (61·5). But the results for the year 1894 have not been satisfactory, owing to well-defined causes, and the death-rate (47·1 per 1,000) is higher than it has been since 1885, when it was 58·4 per 1,000. The exceptional unhealthiness of the year in Lower Bengal was no doubt the chief cause of the unsatisfactory condition of the health of the convicts, among whom the ratios per mille of admissions (1,244 per 1,000), daily sick (44), and deaths (46·8) were all higher than in 1893, when they were, respectively, 1,046, 37, and 32·9 per 1,000. Cholera proved fatal in 65 cases against 20 in the previous year. The disease appeared in 16 jails and was severest in Gaya (18 deaths), Chaibassa (13), and Darbhanga (6). The other diseases which contributed largely to the high death-rate were anæmia and general debility (60), scrofula and phthisis (71), respiratory diseases (105), and dysentery and diarrhœa (314). Of the prisoners released during the year, 54·56 per cent. had gained weight while in prison.

The year was an unhealthy one in the North-Western Provinces and Oudh, and the death-rate among the free population rose from 24·10 to 42·51. The general unhealthiness of the year is reflected in the statistics regarding sickness and mortality of the prisoners. The ratio per mille of admissions to hospital rose from 695 to 869, the daily average sick from 33·53 to 43·26, and the death-rate from 17·17 to 32·28. The deaths from cholera rose from 1 to 94, and the rate per mille from 0·04 to 3·36. There were serious outbreaks of cholera at Gorakhpur and Fatehgarh, and minor ones at Cawnpore, Benares and Banda. The Governor General in Council takes the opportunity of here calling public attention to the Report for 1894 of Mr. Hankin, Chemical Examiner for the North-Western Provinces and Oudh, containing the results of his bacteriological inquiries and investigations into cholera outbreaks which occurred during the year. In the opinion of the Government of India this report should be in the hands of every Superintendent of a Jail not only in the North-Western Provinces and Oudh but throughout India. Deaths from bowel-complaints rose from 111 to 262. In fact, Statement XVI shows that all the principal diseases were more fatal than in the preceding year. The increase in mortality was contributed to by no less than 42 (including all the Central Jails) out of the 54 jails in the Province. In the jails marginally noted the proportion of deaths which occurred among convicts who had been less than 6 months in jail was very marked and the figures support the conclusion that the increased mortality in the jails was in a great measure due to the unhealthiness of the year. There was, however, the Government of India regret to notice, some overcrowding in these jails.

	Number of deaths.	Number of deaths among convicts under 6 months in jail.

Total ...	259	151

In the Punjab the ratio of admissions to hospital was 179 per thousand in excess of that for 1893, but the fact that the daily average number sick fell from 40 to 39 per 1,000, and the death-rate from 26·60 to 18·73, shows that the sickness was of a milder type. There was an increase in the admission-rates for intermittent fever and dysentery and diarrhœa, but the death-rates diminished. There was a

marked decrease in the admission and death-rates from respiratory diseases and "other fevers." Prophylactics are generally used in the jails during the season in which malarial fever is most prevalent, and it is claimed that their use has not only helped to reduce the deaths from intermittent fever, but that it has also led to a great fall in the number of admissions to hospital for respiratory diseases and of deaths from these causes. While the Government of India think that it would be premature to conclude that the latter effect is entirely due to the use of prophylactics, the apparent success attending their use is of great interest, and it is, in the opinion of the Governor General in Council, desirable that the plan of distributing quinine or sulphate of cinchonidine to prisoners when malarial fever is present should be adopted in the jails of other Provinces. His Excellency in Council will await with interest the further result of the experiment now being made in the Punjab jails of the use of anti-malarial remedies and of those ordered in paragraph 14 of the Punjab Government's Resolution reviewing the provincial statistics in boiling the drinking water for prisoners. The Government of India consider this a most useful precaution, and they trust that Local Governments and Administrations will insist on the careful boiling of the water used for drinking purposes whenever there is any reason to suspect its purity.

The year was one of scarcity in some parts of the Central Provinces and was unhealthy. Four thousand two hundred and twenty-four convicts were admitted into jail hospitals against 3,501 the previous year, and the daily average number sick and the death-rate rose from 29·6 and 19·5 per 1,000, respectively, in 1893, to 35·3 and 32·3 per 1,000 in 1894. The deterioration in the health of the convicts was doubtless largely due to their bad state of health on admission and 68 of the 138 deaths occurred among prisoners who had been less than six months in jail. But this circumstance appears to have been only one factor in the general unhealthiness of the jails, for the number of convicts under six months in jail was nearly half the total jail population; and in the three Central Jails, while the mortality among convicts less than six months in jail was 18·02 per 1,000, the mortality among those from six to twelve months in jail was 27·48 per 1,000, and the mortality among those from one to two years in jail was 21·58 per 1,000. In District Jails, the ratios for the corresponding periods were 53·84, 63·02 and 87·15 per 1,000. There was some overcrowding especially in the jails at Narsinghpur and Bilaspur. Scurvy broke out in the Nagpur Jail towards the end of the year, and it appears from paragraph 88 of the Report that the Inspector-General is of opinion that the supply of vegetables to the prisoners previous to the outbreak was insufficient. The Government of India are disposed to agree with the remarks of the Inspector-General in paragraph 94 of the Report that the prisoners in the Jubbulpore Central Jail were not overtasked, as contended by the medical officer in charge of the jail, for it appears from Statement B that of the 1,361 prisoners discharged from the jail 253 were under-trial prisoners who were not weighed on release, and that of the remaining 1,108, 55 had neither gained nor lost weight; 115 (10·4 per cent.) had lost weight, while 938 (84·7 per cent.) had gained weight.

In Burma, the ratios of admission into hospital (875 per 1,000) and the daily average number sick (42·54 per 1,000) were lower than in 1893 (894 and 48·61, respectively), but the death-rate (28·78) was higher (24·65 per 1,000 in 1893). The rate of admission was highest in the Rangoon Central Jail for natives, (1,539 per 1,000), the provincial average being only 881 per 1,000 and the average for other Central Jails being less than half (763 per 1,000). The increase in the provincial death-rate was mainly due to the increase in the mortality from cholera (2·04 per 1,000) and bowel-complaints (6·69 per 1,000). There was an increase in the death-rates from most other causes, but "other fevers" and anæmia were less fatal than in 1893. The prevalence of scurvy in the Rangoon Jail, in spite of prophylactic measures, deserves attention. In 1894 there were 37 cases with 5 deaths and in 1893, 40 cases with one death.

The absence of cholera from the Assam jails in 1894 is satisfactory; but both sickness and mortality were nevertheless greater than in 1893, the ratio of the daily average number sick having risen from 51·36 per 1,000 in 1893 to 61·56 per 1,000 in 1894, and the death-rate from 51·0 to 58·73. The high death-rate in the Tezpur Jail (87·96 per 1,000) has been noticed in separate correspondence with the Chief Commissioner of Assam, and no further remarks are

called for here. The great mortality in the Assam jails generally is often attributed to the anæmic condition of the prisoners on admission; but this theory loses sight of the fact that, although prisoners received into jail in bad health are particularly liable to die, those who survive should, if properly cared for, improve in health and increase in weight. It is to be regretted in this connection that the figures in Statement B appended to the Report, which are reproduced in the margin, show a falling off in the health of prisoners released during 1894. It appears from Statement A that the superficial area allotted to each prisoner in the Sylhet, Tezpur, Nowgong and Dibrugarh jails during 1894, when the mortality was high, was far below what was recommended by the Jail Committee and the Government of India have no doubt that this contributed to the ill-health of the prisoners. They trust that in future years care will be taken to prevent such overcrowding.

Year.	Percentage of prisoners released who neither gained nor lost weight.	Percentage of those who gained weight.	Percentage of those who lost weight.
1893 ...	41·9	36·2	21·8
1894 ...	38·4	35·04	26·5

The health of the convicts in the Mercara Jail (Coorg) improved, the ratio per mille of the daily average sick and deaths having fallen from 32·37 and 82·73 per 1,000, respectively, to 24·72 and 55·55 per 1,000. All the convicts who died (6) had been less than six months in jail and 5 had been admitted in bad or indifferent health.

The health of the prisoners in Berar was much worse than in 1893. The admissions to hospital per mille rose from 905 to 1,381, the average daily sick from 28·13 to 51·52, and the death-rate from 28·72 to 29·13. The increase in sickness was general, but was specially marked in the jails at Akola and Amraoti. More than half the total deaths occurred at Akola, where scurvy was prevalent during the first three months of the year.

ORDER.—Ordered that a copy of this Resolution be forwarded to all Local Governments and Administrations for information and guidance and to the Department of Finance and Commerce for information.

Ordered also that the Resolution be published in the Supplement to the *Gazette of India*.

[True Extract.]

J. P. HEWETT,

Offg. Secretary to the Government of India.

No.

(a) Includes the Madras Debtors' Jail and the two District Jails of Kurnool and Guntur. The latter two were closed during the year.
(b) Exclusive of Civil Prisoners; the number of such prisoners admitted during 1893 was 1,814.
(c) Inclusive of 78 under-trials who were convicted and are twice counted over in the General Summary.
(d) The difference between the prisoners remaining at the end of 1893 and those in jail at the commencement of 1894 is due to the inclusion of Civil Prisoners and the figures for the Wadhwán Jail, incorporated for the first time this year.
(e) The difference between the prisoners remaining at the end of 1893 and those in jail at the commencement of 1894 is due to the exclusion of the statistics of 126 Judicial Lock-ups, not shewn this year, and 5 prisoners having been wrongly shewn as remaining in the Dera Ismail Khan Jail instead of 3 in 1893.

No.

(a) The difference between the number of convicts in jail at the commencement of 1894 and those remaining in jail at the close of 1893 is due to the inclusion of the figures for the Wardwan jail for the first time this year.

(b) Inclusive of convicts re-admitted after having been out on bail, etc.

No. 2—

* Exclusive of prisoners on punishment diet, undergoing quarantine, &c., who are not accounted for in columns 4 to 7.
† Exclusive of figures shown in columns 4 and 5.
‡ The difference between this and the total of columns 4 to 7 is due to (*a*) some convalescents and simple imprisonment prisoners being included in column 7 and (*b*) some prisoners in the Chenavan Central Jail not having been employed on work owing to rains, &c.
§ Includes an average of 16 convicts in Taluk Lock-ups, of whom no details are given. The *total* number of prisoners hired out to Municipalities, &c., is shown in column 8, and hence the difference between columns 3 and 4 to 7.

(*a*) The difference of 10 between the total of the figures shown in columns 4 to 7 and those shown in column 3 is due to simple imprisonment prisoners being employed on work.
(*b*) The difference of 3·38 between the total of the figures shown in columns 4 to 7 and those shown in column 3 is due to simple imprisonment prisoners being employed on work.
(*c*) Excludes an average of 3 prisoners unemployed on account of Sundays and holidays.
(*d*) Includes an average of 0·99 prisoners in Taluk Lock-ups of whom no details are given in columns 4 to 7.

No. 7.

* The Jails in Madras, Bengal, Central Provinces and Burma are guarded by warder guards.
† Excluding Civil Prisoners. The total charges for such prisoners amounted to Rs. 7,996 in 1893, the average cost per prisoner being Rs. 69-9-6.
‡ Including Rs. 19,739 on account of under-trials confined in out police stations, and as the number of such prisoners is not shown in the report the average cost per prisoner is worked out as Rs. 5,02,762—Rs. 19,739 = Rs. 4,83,023.
§ This sum represents only the cost of under-trials in Magistrates' Lock-ups and in Out-police stations. Hence the average cost per prisoner is not worked out.
¶ Partial exclusive of the figures for North-Western Provinces and Oudh.

(a) Including 1 State prisoner in the Vellore Central Prison.
(b) Excluding an average of 310 and 410 State prisoners confined in the Jails of Bengal during the years 1893 and 1894 respectively.
(c) Excludes Rs. 2,930 spent in the maintenance of Rampur State prisoners, of which details are given in columns 3 to 8, and includes the cost of under-trials in Magistrates' Lock-ups and in Out-Police Stations.
(d) Includes Rs. 1,871 recovered from the Rampur State on account of maintenance of the Rampur State prisoners, and includes Rs. 45,662, the cost of under-trials in Out-Police Stations. This latter sum has been left out of calculation in working the total cost of each prisoner.
(e) Including an average of 19·24 State prisoners.
Exclusive of Lock-ups.
(f) Including Rs. 45,662 the cost of under-trials in Out-Police Stations.

RATES OF PAY FOR OFFICERS OF THE PROVINCIAL SERVICE HOLDING APPOINTMENTS AS DISTRICT AND SESSIONS JUDGES IN THE NORTH-WESTERN PROVINCES AND OUDH.

NO. $\frac{14\text{-Public}}{1358-1368}$.

Extract from the Proceedings of the Government of India in the Home Department (Public), under date Simla, the 13th September, 1895.

Read—

Home Department Resolution No. $\frac{2\text{-Public}}{1342-1352}$, dated the 21st April 1892.

Despatch from the Secretary of State No. 14 (Public), dated the 21st February 1895.

Letter from the Government of the North-Western Provinces and Oudh No. 2465, dated the 13th July 1895.

RESOLUTION.

IN paragraph 5 of the Resolution cited in the preamble, the rates of pay for officers of the Provincial Service holding appointments as District and Sessions Judges in the North-Western Provinces and Oudh, which were listed as open to that service, were fixed as follows:

	Rs.
1st grade	2,000
2nd „	1,600
3rd „	1,200
4th „	1,000

2. A new grade of District and Sessions Judgeship having been recently sanctioned in those Provinces, on a pay of Rs. 2,250 when held by officers of the Indian Civil Service, the Governor General in Council is pleased to decide that the pay of an officer of the Provincial Service holding an appointment in this grade shall be fixed at Rs. 1,500. The rates of pay for officers of the North-Western Provinces and Oudh Provincial Civil Service holding listed appointments of District and Sessions Judges in the different grades will accordingly henceforth be as follows:

	Rs.
1st grade	2,000
2nd „	1,600
3rd „	1,500
4th „	1,200
5th „	1,000

ORDER.—Ordered that this Resolution be communicated to Local Governments and Administrations, and that it be published in the *Gazette of India* for general information.

(True Extract.)

J. P. HEWETT,

Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the Week ending at 8 a.m. on Saturday, September 7th, 1895.

The week under review has been one of generally feeble monsoon conditions and of generally light or moderate rainfall. This condition has been brought about by two modifications of the ordinary monsoon weather. In the first place, the Arabian Sea monsoon current has been light and unsteady, and hence has brought very little rain to a large part of North-Western India, or to the Central Provinces, or to the Peninsula. This appears to account for the lightness of the rainfall over Western and Southern India. On the opposite side of India the conditions were equally inimical to the fall of general heavy rain. On the 2nd the observations showed that a large shallow low pressure area had appeared over the Bay. Cyclonic movements were established within this area, so that the monsoon currents pouring into the Bay from the south circulated cyclonically over the surface of the Bay and hardly gave any rain to the surrounding coasts. Between the 2nd and the 5th a well-marked centre was developed within the low pressure area over the Bay, and this centre, travelling westward, struck the Madras Coast during the 5th. Its passage across the Peninsula resulted in much heavy rain over the Peninsula and to a considerable strengthening of the Arabian Sea monsoon current. The depression proved, however, to be wanting in vitality, and soon after reaching Khandesh it completely filled up. The mean temperature was generally above the normal average. At first the variations were small and unimportant, but from the 5th onward to the close of the week there was a general excess for the whole country of about $1\frac{1}{2}^{\circ}$.

Daily Summary.—*Sunday, 1st September.*—Pressure had decreased over the Bay area as well as over the Punjab and the Indus Valley. Over the central parts of the Bay the fall was brisk, and conditions there were unsettled. Readings were highest in Malabar and lowest over the Gangetic plain and the north of the Bay. Calms prevailed over the Gangetic plain, westerly to northerly winds over the Peninsula and central parts of the country, and southerly to easterly winds in Burma and Bengal. The mean temperature was excessive over Burma, Assam, Bengal, and Madras, and in defect in the other provinces. A good deal of scattered rain was received, except in North-Western India and in Madras.

Monday.—Pressure was decreasing slightly over the south of the Bay, the Peninsula, and Sind, and was increasing elsewhere. The rise was brisk to rapid over a considerable part of the country. Pressure was highest in Malabar and Ceylon and lowest over the Punjab, but a well-defined large low pressure area was developing over the Bay. The winds were cyclonic around the Bay, but were little changed elsewhere, except that the normal south-easterly winds had reappeared up the Gangetic plain. The mean temperature was in excess, except over the North-Western and Central Provinces, Central India, Gujarat, Sind, and Rajputana. Light scattered rain was reported from a large part of the country, and heavyish rain along the foot of the hills.

Tuesday.—Pressure had increased briskly over Tenasserim and Lower Burma, the Punjab, Sind, and the Gangetic plain, and had changed little elsewhere. The depression over the Bay was somewhat better developed. Pressure was in slight defect all over the Bay area, and in slight to considerable excess elsewhere. Moderate rain had fallen over Lower Burma, Ganjam, and the Gangetic plain, and as scattered showers elsewhere. The mean temperature was in defect over the Gangetic plain and in excess elsewhere.

Wednesday.—Pressure was decreasing in all places except Burma and Sind, and the depression over the Bay continued to develop.

The winds over a large part of the Indian region were more or less influenced by the depression. Scattered rain only had been received, except in Burma and Ganjam, where the fall had been fairly general.

The mean temperature was in defect in Tenasserim, the Bombay Presidency, and the east of the Punjab.

Thursday.—Pressure had increased slightly to briskly over Burma and Bengal, and decreased in all other provinces. The decrease had been very rapid on the Madras Coast, near the mouth of the Godaveri, and the depression from the Bay was crossing the coast at that point. Pressure was in slight to very large deficiency over Madras. The winds continued to be very largely influenced by the storm. Moderately heavy rain had fallen in North Madras, and showery weather had prevailed over a large part of the country. The mean temperature was low over Burma and parts of Madras and of Bombay.

Friday.—Pressure had increased over the Bay area and decreased elsewhere. The rise was rapid on the Madras Coast, and the fall was rapid over the Deccan and Berar. The depression from the Bay had advanced into the Nizam's Dominions, and the centre lay near Khamamet. Except in the north-west, winds were cyclonic, and circulated around the depression. Heavy rain had fallen over part of the east of the Peninsula, and showers were reported from other parts of the country. The mean temperature was in large defect in Madras, and in slight defect in Sind, Oudh, and Assam.

Saturday.—Pressure had decreased over Sind, Rajputana, Central India, North Bombay, Bengal, and Burma, and increased elsewhere. The rise was very rapid over the east of the Peninsula, the fall brisk over North Bombay, and the depression had been transferred from North Madras north-westward to Khandesh, where, however, it was filling up. The winds were abnormal in many places. They were cyclonic in the neighbourhood of the depression, and south-westerly all over Bengal and the Gangetic plain. General and rather heavy rain had occurred over the west of the Peninsula, and showers in other places. The mean temperature was low over the Peninsula, in the Indus Valley, and in Assam.

Temperature.—The heat has been very generally excessive during the week under review—a result due to the lightness of the rainfall during the early part of the week and to its localised character during the latter part of the week. On the 1st and 2nd the rainfall was more general than on subsequent days, and the mean temperature only just exceeded the normal; but on the 3rd, and from that day onward, the heat became generally and markedly excessive. When the storm from the Bay crossed the coast, it occasioned heavy rain in its immediate neighbourhood, and hence there was considerable depression of temperature exhibited in Madras on the 6th, and all over the Peninsula on the 7th.

The following table gives the variations of the mean temperature from the normal in the different Provinces of India for each day of the week:

Province.	September 1895.							Mean variation of week.
	1st	2nd	3rd	4th	5th	6th	7th

Mean for whole of India	0	+0·4	+0·5	+0·7	+1·7	+1·6	+1·4	+0·9

The mean for the whole country for the week shows a slight excess of nearly 1°. On the 1st the mean temperature of the whole country was exactly normal; on the 2nd, 3rd, and 4th there was an excess of about $\frac{1}{2}$°; and on the 5th, 6th, and 7th of about 1$\frac{1}{2}$°.

The provincial variations show that there was a slight excess of temperature for the week in Burma, Bengal, Assam, the Punjab, and the Central Provinces, but that elsewhere the heat was about normal.

The following were the highest temperatures recorded on each day.

On September	1st	the highest maximum was	105·9°	at	Jacobabad.
„	2nd	„ „	107·4°	„	„
„	3rd	„ „	104·4°	„	Montgomery.
„	4th	„ „	107·4°	„	„
„	5th	„ „	108·1°	„	Dera Ismail Khan.
„	6th	„ „	108·9°	„	Montgomery.
„	7th	„ „	107·4°	„	„

Rainfall.—During the early part of the week the rainfall was relatively light for the season, and much scattered; while, on the contrary, towards the close of the week heavy localised rainfall occurred over Southern India, accompanying the passage of a deepish depression across the Peninsula. This depression had a very important effect on the rainfall distribution of the week. During the period of incubation of the disturbance over the Bay, the eastern branch of the monsoon current poured into the low pressure area, within which the centre of depression was developing. Hence the storm at this period of its existence had the effect of checking rainfall over North-Eastern India; while, on the contrary, when it began to move, and commenced to cross the Peninsula, it occasioned a strengthening of the Arabian Sea current, and drew both that and the Bay current into Southern India. The main results of the action of the depression hence were: (1) to check rainfall over Northern India throughout the week; (2) to give heavy rain to Southern India at the close of the week. Slight special causes determined moderate rain to the North-Western Provinces on several days during the week, but these causes were not felt outside the area of the Gangetic plain. The table at the close shows the rainfall data. The first column shows that the average actual rainfall of the week ranged from 5·31 inches in Tenasserim, 4·62 inches in Assam (Surma), and 4·35 inches in the Konkan to about 0·05 inch in Kathiawar, the East Coast (South), and Madras (South); while two divisions, *viz.*, Rajputana (West) and Sind, had no rainfall whatever during the week. Under normal conditions the rainfall of the period under review ranges from 7·90 inches in Tenasserim and 7·14 inches in Assam (Surma) to about 0·25 inch in the Punjab (West) and Sind. This comparison shows that, while the general distribution was fairly normal, the rainfall was lighter than usual. The third column of the table exhibits the actual differences. In the case of thirteen divisions, the actual average rainfall exceeded the normal; while in all the remaining divisions, thirty-eight in number, the rainfall was short. This condition is much worse than that reported last week, when the numbers were twenty-five and twenty-six respectively. The region of excessive rain included the following divisions, *viz.*:—both the Oudh divisions, the central, west, and submontane divisions of the North-Western Provinces, the hill districts of the Punjab, the Konkan, the Bombay Deccan, Khandesh, the East Coast (North and Central), and Hyderabad (South). The principal cases of excess were 2$\frac{1}{2}$ inches in the Bombay Deccan and the East Coast (Central), and the principal cases of deficiency were 3·38 inches in East and North Bengal, 3 inches in Gujarat, and over 2 inches in Tenasserim, Arakan, Assam (Surma), Central Bengal, and the Central Provinces (West). In Upper Burma no averages exist for comparing the rainfall, but it is probable that this division should be included in the divisions having an excess, as heavy rain was received in some districts during the week: thus, Mandalay received 7$\frac{1}{2}$ inches, Sagaing over 5 inches, and Magok over 3 inches during the week. On the other hand, Yamethin received two light showers, giving a total of only 0·14 inch for the week.

The returns of the sudder stations show that rain fell during most of the week in Burma, East Bengal, and Assam (Surma), and only during the latter part of the week in other parts of Bengal; in Behar, the North-Western Provinces, and the Punjab the fall was generally at the commencement of the week and in the Peninsula at the close of the week; while over the central parts of the country showers were received throughout.

The three concluding columns of the table give the state of the seasonal rainfall, and show that over the greater part of the country the fall since June 2nd to date has been fairly normal. The cases of marked defect, *i.e.*, where the deficiency exceeds 20 per cent., are—Arakan, East Deltaic and Central Bengal, Mysore, Berar, Gujarat, Kathiawar, Rajputana (East), Central India (West), Madras (Central), and Madras (South). The principal cases of excess are Orissa, the East Coast, and the east of the Central Provinces.

The following are the more important totals recorded during the week:—Kyaikto (Thaton) 10·33 inches, Mandalay 7·45 inches, Akyab 5·08 inches, Sunamganj (Sylhet) 11·38 inches, Dibrugarh 6·22 inches, Bohea (Darbhanga) 5·75 inches, Bilgram (Hardoi) 7·56 inches, Mawana (Meerut) 9·64 inches, Sonepat (Delhi) 2·72 inches, Dharmsala 5·03 inches, Murree 3·65 inches, Coondapoor (Mangalore) 3·56 inches, Bassein (Thana) 11·54 inches, Indi (Bijapur) 8·74 inches, Jamkhed (Ahmednagar) 8·29 inches, Anakapalle (Vizagapatam) 5·85 inches, Bezvada (Kistna) 10·34 inches.

PROVINCE.	DIVISION.	Rainfall data for week ending September 7th, 1895. Average actual rainfall of division.	Average normal rainfall of division.	Excess or defect in inches.	Rainfall data from June 2nd to September 7th, 1895. Average actual rainfall of season to date.	Average normal rainfall, June 2nd to September 7th.	Excess or defect of (seasonal) rainfall expressed as a per-centage.

W. L. DALLAS,
Asst. Meteorological Reporter to the Government of India.

Simla, *12th September 1895.*

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 7th September.*—Rainfall good in the Circars and South Canara; light or none elsewhere. The standing crops are suffering from want of rain in the Deccan and parts of the Central and Southern districts and Nellore; elsewhere the crops are in fair condition. The paddy crops have withered in parts of Tinnevelly. Some harvest is going on with generally fair outturn. Pasture and fodder generally sufficient. Condition of cattle generally good. Prices are slightly easier in parts of the Circars, Trichinopoly, Tanjore, and Coimbatore districts, rising in the Deccan; elsewhere prices are generally stationary.

Bombay.—*For week ending 11th September.*—Rain heavy and beneficial to crops throughout the Deccan and Konkan and in Bijapur and parts of Gujarat; generally slight rain elsewhere. More rain is wanted in parts of Northern Gujarat, Kathiawar, Nasik, Poona, Belgaum, and Dharwar. Deficiency of water continues in Sind. The standing crops are good, except in parts of Hyderabad, Thar and Parkar, Ahmedabad, and Baroda territory where they are suffering for want of moisture. Transplantation of rice is progressing in parts of Thana and Ahmedabad, and preparations for the late crops in parts of five districts. Sowing of cotton continues in Ahmedabad, Bijapur, and Dharwar, but is retarded in parts of Dharwar for want of rain. Fodder-supply sufficient, except in one taluka of Sholapur. Agricultural stock good. Prices are normal, except in parts of Thar and Parkar, Ahmednagar, and Sholapur.

Bengal.—*For week ending 9th September.*—Fine weather with slight showers continued throughout the week, except in the east of the Province, where there was heavy rain. Transplantation of winter rice is nearly finished, but in many districts more rain is required for the growth of the plants. In the Burdwan and Presidency divisions considerable portions of rice land remain uncultivated owing to continued want of rain. The autumn crops in Behar and in Chota Nagpur and the early rice and jute are still being harvested. Sugarcane is doing well. The price of common rice continues almost stationary.

North-Western Provinces and Oudh.—*For week ending 11th September.*—The rainfall has been lighter during the week, and the condition of the standing crops is good. Harvesting of the earlier autumn crops is in progress almost everywhere, and active preparations are being made for the spring sowings. Prospects are favourable. Supplies and fodder are ample.

Punjab.—*For week ending 11th September.*—Rain has fallen in the Delhi and Rawal Pindi districts. Irrigation of the autumn crops is going on. Ploughing for the spring crops is in progress. The condition of the autumn crops is reported to be good to average. Crops dependent on rain are poor in Lahore. Rain is urgently needed in Lahore, Shahpur, and parts of Delhi. Cattle are generally in good condition. Fodder is sufficient in all districts, except in Lahore. Prices are rising in Jullundur, normal in Ferozepore and Sialkot, below normal in Shahpur, continue high in Umballa, and low elsewhere.

Central Provinces.—*For week ending 11th September.*—There has been but little rain during the past week, except in the Nerbudda Valley and Bilaspur. The fall was most opportune in Nimar, and has materially improved the outlook in that district. The condition of the autumn crops continues favourable. Harvesting of the early rice has commenced in Sambalpur, an outturn of twelve annas being estimated. Preparations for the winter sowings continue, while sowing of linseed and gram has been started in Seoni. Prices continue steady.

Burma.—*For week ending 7th September.*—In Lower Burma prospects are good everywhere, except in parts of the Tharrawaddy and Prome districts.

In Upper Burma heavy rain has fallen during the week in Mandalay and Sagaing, while Shwebo, Lower Chindwin, Thayetmyo, Minbu, Magwe, Kyaukse, and Meiktila have all received amounts varying from half an inch to nearly an inch. More rain is still required, but prospects have improved everywhere, and fair outturns are expected in most districts. The early sesamum crop has been reaped in Sagaing, Minbu, Magwe, and Meiktila; the outturn is generally poor, but in the Minbu sub-division it is better than last year. The price of paddy has declined slightly in Prome; elsewhere prices are stationary.

Assam.—*For week ending 10th September.*—Weather rainy. Reaping of early and transplanting of late rice continue. Prospects are good in the Surma Valley and in Upper Assam. Prospects of tea are fair in Darrang and Cachar. The fodder-supply is indifferent. Water is sufficient.

Mysore and Coorg.—*For week ending 11th September.*—MYSORE: Slight rain in all districts, except Kolar. The standing crops are reported to be in fair condition throughout the State, except in the Kolar, Bangalore, and Chitaldroog districts, where more rain is needed. Prices have risen in Kolar and Chitaldroog.

COORG: Slight rain. Transplanting of rice is still in progress. *Ragi* (*Eleusine coracana*), coffee, and cardamom crops are in good condition. Prices are normal. Fodder and water for cattle are abundant.

Berar and Hyderabad.—*For week ending 11th September.*—BERAR: Weather cool and cloudy with moderate rainfall during the week. The crops are doing fairly well, though more rain is much needed. Breaking up of land for the winter crop continues in two districts. Weeding operations are well advanced. Insufficiency of fodder and water still prevails in the Khamgaon taluka. Prices are almost steady.

HYDERABAD: Rainfall good. The water-supply is increasing. The standing autumn crop is in good condition. Sowing of irrigated lands continues in a few talukas. The general outlook is good. Prices are normal.

Central India.—*For week ending 11th September.*—Rainfall general, except in Western Malwa. More rain is wanted in Bhopawar. Agricultural operations are in progress everywhere. The crops in Dhar and the rice crops in Bhopal have been damaged slightly for want of rain; otherwise the crops are in good condition. Agricultural stock is in fairly good condition in all Agencies. Pasturage good, except in the Neemuch district of Gwalior. Prices are high in Bhopal and Goona; normal elsewhere.

Rajputana.—*For week ending 11th September.*—Good rain in Dholepur and Bickaneer. Agricultural operations are satisfactory. The standing crops, prospects, and agricultural stock are generally good. Pasturage or fodder is generally sufficient. Prices are fluctuating in two States, rising in one, and steady elsewhere.

Kashmir.—KASHMIR VALLEY.—*For week ending 10th September.*—Rainfall slight. The standing crops are excellent. Prices still continue somewhat above the normal.

JAMMU PROVINCE.—*For week ending 11th September.*—No rain. Weather clear and cool. The crops are in fair condition. Prices are unsettled. Fodder is sufficient.

Nepal.—*For week ending 7th September.*—Good rain. Weather cloudy, but warm. Upland rice is being harvested; lowland rice requires more rain.

DENZIL IBBETSON,

Offg. Secretary to the Government of India.

RAILWAY STATISTICS.

RETURNS OF ACCIDENTS ON INDIAN RAILWAYS FOR THE TWELVE MONTHS ENDING WITH THE 31st DECEMBER 1894.

No. 378 R. Stat., dated Simla, the 6th September 1895.

Read again—

Government of India resolution No. 402 R. Stat., dated the 31st August 1892.
Government of India resolution No. 300 R. Stat., dated the 3rd August 1893.
Government of India resolution No. 293 R. Stat., dated the 30th July 1894.

Read also—

Note by the Director General of Railways, No. 322 Stat., dated the 16th August 1895, with abstract returns of accidents to trains, etc., on the open lines of railways in India for the twelve months ending the 31st December 1894.

OBSERVATIONS.—Under abstract No. 4, on pages 14 and 15, of the accompanying returns the accidents to trains, rolling stock, permanent-way, etc., reported during the twelve months ending the 31st December 1894, are given—the different classes of accidents, the number of passengers and others, and the number of railway servants, killed or injured, in each class of accident being shewn separately.

The total number of accidents and the casualties resulting therefrom, as compared with the average of the three previous years, are summarised in the following table, under the heads "Standard gauge," "Metre gauge" and "Special gauges":—

	Number.			Number of Passengers and others.		Number of Servants.		Total all classes.	
	Accidents reported to Local Governments under section 83 of the Indian Railways Act (IX of 1890).	Other accidents.	Total.	Killed.	Injured.	Killed.	Injured.	Killed.	Injured.
Standard gauge.									
Twelve months ending the 31st December 1894	100	2,456	2,556	(a) 9	(b) 52	10	32	19	84
Average of the three previous years	126	2,313	2,439	39	72	10	59	49	131
Metre gauge.									
Twelve months ending the 31st December 1894	26	1,869	1,895	(c) 1	(d) 40	5	16	6	56
Average of the three previous years	34	1,766	1,800	4	20	7	12	11	32
Special gauges.									
Twelve months ending the 31st December 1894	...	85	85	...	...	...	...	...	...
Average of the three previous years	2	52	54	...	...	...	1	...	1
Total all gauges for twelve months ending the 31st December 1894	126	4,410	4,536	(e) 10	(f) 92	15	48	25	140
Average of the three previous years	162	4,131	4,293	43	92	17	72	60	164

(a) Of these, eight were not passengers.
(b) Of these, three were not passengers.
(c) Not a passenger.
(d) Of these, four were not passengers.
(e) Of these, nine were not passengers.
(f) Of these, seven were not passengers.

2. The following table shows, for each gauge separately, the percentage of increase or decrease in the number of accidents, in the mean mileage worked, and in the train-mileage run during the year 1894, as compared with the average of the three previous years:—

	INCREASE OR DECREASE, AS COMPARED WITH THE AVERAGE OF 1891, 1892 AND 1893.					
	ACCIDENTS.		MEAN MILEAGE.		TRAIN-MILEAGE.	
	No.	Per cent.	Miles.	Per cent.	Miles.	Per cent.

3. The principal variations in the number of accidents reported in connection with the working of the several gauges, as compared with the average of the three previous years, are shown in the statement below under the classification adopted in abstract No. 4 of the returns:—

GAUGE AND CASSIFICATION.	INCREASE OR DECREASE.			Percentage of increase, or decrease
	Serious.	Minor.	TOTAL.	
Standard gauge.				
Collisions between goods trains & parts of goods trains	—5	+21	+16	+23·88
Goods trains or parts of goods trains, engines, etc., leaving the rails	—6	—14	—20	—7·43
Trains running over cattle on the line	+2	+168	+170	+18·93
Trains running over obstructions on the line	+8	—22	—14	—13·73
The bursting of tubes, etc., of engines	+1	+64	+65	+89·04
The failure of machinery, springs, etc., of engines	+1	+26	+27	+ 8·82
The failure of couplings	+2	—22	—20	—24·39
The flooding of portions of permanent-way	—3	+42	+39	+78·00
Fire in trains	—2	—62	—64	—58·72
Fire at stations or involving injury to bridges or viaducts	—1	—19	—20	—45·45
Under head "Other accidents"	—8	—36	—44	—25·43
Metre gauge.				
The bursting of tubes, etc., of engines	...	+28	+28	+40·58
The failure of machinery, springs, etc., of engines	...	+40	+40	+28·57
Special gauges.				
Goods trains, or parts of goods trains, engines, etc, leaving the rails	—1	+20	+19	+111·76
The flooding of portions of permanent-way	...	+18	+18	+600·00

Standard gauge.

4. The increase under "Trains running over cattle on the line" was chiefly due to the occurrence, on the East Indian railway, of 63 and, on the North Western (state) railway, of 47 more accidents of this nature as compared with the average of the three previous years, and of 42 accidents on the East Coast (state) railway from which no returns were previously received.

5. Of the total increase of 65 accidents under "The bursting of tubes, etc., of engines," an increase of 50 occurred on the North Western (state) railway.

6. There was an increase of 39 cases under "The flooding of portions of permanent-way," of which 19 were on the Bombay, Baroda and Central India railway, and 12 on the North Western (state) railway.

7. Under "Fire in trains" the principal variations were decreases of 23 and 33 on the Great Indian Peninsula and the Madras railways respectively.

8. The decrease under the head "Other accidents" resulted chiefly from an increase of 11 accidents on the Great Indian Peninsula railway and decreases of 26 on the East Indian railway, 15 on the Bengal Nágpur railway and 13 on the North Western (state) railway.

Metre gauge.

9. Under "The faliure of machinery, springs, etc., of engines," the increase was chiefly due to the Southern Mahratta railway on which the number rose from 38 to 63.

Special gauges.

10. The accidents under "Goods trains or parts of goods trains, engines, etc., leaving the rails" numbered 36 against 17, of which 25 against 10 took place on the Jorhát railway alone.

11. The increase under "The flooding of portions of permanent-way" was mainly due to the number recorded on the Morvi railway having risen from 1 to 15.

---

12. Taking all gauges together, the number of cattle accidents was largest on the Southern Mahratta railway, *viz.*, 373; the South Indian railway comes next with 225, then the North Western (state) railway with 202, the Rajputana-Malwa railway with 195, the East Indian railway with 183, the Eastern Bengal (state) railway with 153, the Oudh and Rohilkhand (state) railway with 121, the Great Indian Peninsula railway with 91, the Madras railway with 83, and the Nizam's Guaranteed State railway with 81.

In proportion to train-mileage run the number of accidents was highest on the Nizam's Guaranteed State railway, which averaged 1 accident in 8,301 train-miles; the Southern Mahratta coming next with an average of 1 in 8,673; then the Dibru-Sadiya, the Jodhpore-Bickaneer, the Jorhát, and the East Coast (state) railways with averages of 1 in 9,705, 1 in 11,049, 1 in 11,494, and 1 in 12,441, respectively.

The lowest number recorded in proportion to train-mileage run was on the Great Indian Peninsula railway, *viz.*, 1 in 100,814; the Bombay, Baroda and Central India railway coming next with 1 in 84,940; then the Gaekwar's Dabhoi railway with 1 in 82,322; the Burma (state) railway with 1 in 67,122, the East Indian railway with 1 in 59,647, and the North-Western (state) railway with 1 in 47,051.

---

13. The casualties to passengers and to servants in the employ of railways or of contractors not coming under the classification adopted in abstract No. 4 of the returns, and the total casualties from all causes including trespassers, cases of suicide, etc. (which are detailed in abstract No. 2), are compared separately for each gauge, with the average of the three previous years in the table below:

GAUGES.	TWELVE MONTHS ENDING THE 31ST DECEMBER 1894.						AVERAGE OF THE THREE PREVIOUS YEARS.					
	PASSENGERS.		SERVANTS.		TOTAL ALL CAUSES.		PASSENGERS.		SERVANTS.		TOTAL ALL CAUSES.

Proportion of passengers killed and injured from all causes (*vide* abstract No. 2) to number carried	No.	1 in 429,579	1 in 496,441	1 in 853,126	1 in 459,348	1 in [illegible],887	1 in 361,150	1 in 378,535	1 in 353,351
Proportion of passengers killed and injured from all causes (*vide* abstract No. 2) to number of passenger units carried one mile	No.	1 in 17,908,949	1 in 18,936,798	1 in 22,619,319	1 in 18,222,632	1 in 13,834,395	1 in 22,603,050	1 in 10,076,770	1 in 14,724,979

16. Abstract No. 5 shows for the year 1894, as compared with the ten previous years, the proportion of passengers killed and injured while travelling on the several railways open for traffic in India from causes beyond their own control.

17. The accidents *for the fourth quarter of 1894* are dealt with in the following note:

Note on the accidents for the fourth quarter of 1894.

The following table gives the number of accidents, as classified in abstract No. 4 of the returns, which resulted in loss of, or injury to, life and limb, and shows the railways on which they occurred.

• Casualties resulting from accidents to trains, rolling stock, etc., for the fourth quarter of 1894.

(2) *East Indian railway.*—On the 12th November 1894 a collision took place at Shakrigali ghât between a shunting engine and certain wagons, owing to the former coming too fast on to the train. Four servants were injured.

(3) *North Western (state) railway.*—On the 6th October 1894 a ballast train, after the engine had been detached for water at the Shelabagh station, rolled down the incline and collided with No. 2 down mail, two miles from the station. A passenger and a railway servant were killed and four passengers injured; the rolling stock and permanent-way were also seriously damaged. The driver to whose neglect the accident was due was prosecuted.

On the 2nd December 1894 a collision took place in the Gháziabad station yard between a down special goods and a pilot engine, owing to the driver having disregarded signals. A railway servant was killed.

On the 24th December 1894 a down passenger train ran through the level-crossing gate near the down distant signal at Saháranpur. The gateman in attempting to open the gates, which were closed across the line, was killed.

On the 28th December 1894 a shunting engine collided with the outgoing engine of a down goods train in the locomotive yard at Saháranpur through the carelessness of the pointsman. A fireman was slightly injured.

(4) *Great Indian Peninsula railway.*—On the 6th October 1894 a collision took place at Karjat between an up ghât trip train and the rear wagon attached to a main line engine, while the latter was passing over the cross-over road from the down to the up line. The accident was due to the driver of the ghât train having failed to notice the obstruction in time. A railway servant was injured.

(5) *Bombay, Baroda and Central India railway.*—On the 9th October 1894 a buffalo was run over by a down mixed train at Chhárodi station on the Gaekwar's Petlád line, resulting in the derailment of a wagon. A railway servant was slightly injured.

(6) *Bengal and North-Western railway.*—On the 19th October 1894 a collision took place at Dalsinghsarai between a ballast and an up mixed train, owing to the latter having been admitted on to the wrong line. Three railway servants were killed and five passengers and five railway servants injured. There was also considerable damage to rolling stock.

(7) *Rajputana-Malwa railway.*—On the 7th October 1894 a collison took place at Achnera between a shunting engine and three 3rd class carriages standing on the line. The accident was due to the shunter having been unable to shut off steam in time. A railway servant was slightly injured.

On the 26th November 1894 the roof lamp of a 3rd class carriage on a down mixed train caught fire between Kivarli and Bhimána and exploded. Five passengers were slightly scalded.

On the 9th December 1894 stones were thrown by two boys at a down mixed train at mileage 133 between Nímbahera and Shambhúpúra. A passenger was struck on the forehead and was slightly injured. The boys were prosecuted and one of them was sentenced to receive twenty stripes.

On the 21st December 1894, while a steam crane was being shunted at Khandwa, the chimney of the crane, which was not lowered, came in contact with the roof of the locomotive shed and was damaged. The fireman in attempting to lower the chimney was injured.

(8) *Southern Mahratta railway.*—On the 9th November 1894 a down mixed train was derailed between Birar and Kadur, owing to an axle of a covered goods wagon having failed. A railway servant was injured.

(9) *Burma (state) railway.*—On the 30th December 1894 an engine with 20 vehicles ran into a bullock cart while the latter was crossing the line at a level-crossing near the Mandalay Shore station. An old woman, the occupant of the bullock cart, was killed and the driver injured.

Resolution.—The Government of India notice that, with an increase of 1,072 miles, or 6·11 per cent. in the mean mileage worked and of 3,899,853 miles, or 6·37 per cent. in the train-mileage run, the number of accidents to trains, rolling stock, permanent-way, etc., on Indian railways during 1894 shows

an increase of 243 or 5·66 per cent., as compared with the average of the three previous years.

2. The numbers of passengers killed and injured by accidents to trains, etc., were 1 and 85 respectively, against 39 and 87 the averages of the three previous years; while the numbers of passengers killed and injured from causes other than accidents to trains, etc., were 58 and 179 respectively, against 60 and 178.

3. Out of a total of 145,462,546 passengers travelling, there were 59 killed and 264 injured, or an average of 1 killed in 2,465,467 and of 1 injured in 550,994.

The proportion of passengers killed and injured by train accidents from causes beyond their own control, as compared with the numbers travelling, was 1 killed out of 145,462,546 and 1 injured out of 1,711,324.

4. The casualties to servants in the employ of railways or of contractors from accidents to trains, etc., were 15 killed and 48 injured, against 17 and 72, respectively, the average of the three preceding years. From causes other than accidents to trains, etc., the casualties were 178 killed and 487 injured, against 170 killed and 546 injured.

5. With an increase of 6·11 per cent. in the mean mileage worked and of 6·37 per cent. in the train-mileage run, it is observed that the total number of casualties from all causes over the whole of the Indian railway system, as compared with the average of the three previous years, increased under killed from 629 to 636 or by 1·11 per cent., and decreased under injured from 995 to 932 or by 6·33 per cent.

ORDER.—Ordered that this resolution, with the abstract returns and appendices thereto, be communicated, for information, to the Local Governments and Administrations, and to the officers noted in the margin.

The Governments of Madras, Bombay, Bengal, North-Western Provinces and Oudh, and the Punjab.
The Chief Commissioners of the Central Provinces, Burma, Assam, and Coorg.
The Resident at Hyderabad.
The Resident in Mysore.
The Agents to the Governor General for Rajputana, Central India, and Baluchistan.
The Director General of Railways.
The Consulting Engineers to the Government of India for Railways, Calcutta, Lucknow, and Assam.

Ordered, also, that copies be forwarded for the information of Her Majesty's Government.

Ordered, further, that this resolution, with the abstract returns, be published in the Supplement to the *Gazette of India*.

F. B. HEBBERT,
Under Secretary.

Documents accompanying.

Abstract returns of accidents for the twelve months ending the 31st December 1894.

Enclosure to P. W. D. No. 378 R. Stat., dated the 6th September 1895.

ABSTRACT No. 1.

GENERAL TOTAL.

NUMBER of PERSONS reported, during the twelve months ending 31st December 1894, as KILLED or INJURED on ALL RAILWAYS open for TRAFFIC in INDIA, distinguishing between PASSENGERS, RAILWAY SERVANTS, and OTHER PERSONS; and distinguishing also, in the case of the two former classes, between ACCIDENTS caused by ACCIDENTS to TRAINS, ROLLING-STOCK, PERMANENT-WAY, etc., and ACCIDENTS happening otherwise.

ABSTRACT

NUMBER of PERSONS reported, during the TWELVE MONTHS ending 31st December 1894, as KILLED or INJURED in INDIA by the TRAVELLING of TRAINS or the MOVEMENT of VEHICLES used exclusively upon RAILWAYS, distinguishing between PASSENGERS, RAILWAY SERVANTS, and OTHER PERSONS, and classifying, as far as practicable, the nature and causes of the ACCIDENTS occasioning the DEATH or INJURY.

ABSTRACT

ACCIDENTS to TRAINS, ROLLING-STOCK, PERMANENT-WAY, etc., on the several RAILWAYS open different CLASSES of ACCIDENTS and the number of PASSENGERS, and OTHERS, and of RAILWAY

No. 4.

for TRAFFIC in INDIA, reported during the TWELVE MONTHS ending 31st December 1894, distinguishing the SERVANTS KILLED or INJURED in each class of accident.

GOVERNMENT OF INDIA.

HOME DEPARTMENT.

MEASURES ADOPTED FOR THE DESTRUCTION OF WILD ANIMALS AND VENOMOUS SNAKES DURING THE YEAR 1894.

No. $\frac{15\text{-Public}}{1377-1388}$.

Extract from the Proceedings of the Government of India in the Home Department (Public), dated Simla, the 16th September, 1895.

Read—

Home Department Resolution No. $\frac{14\text{-Public}}{1548-59}$, dated the 20th September 1894, reviewing the reports on the results of the measures adopted for exterminating wild animals and poisonous snakes in British India during the year 1893.

Read also the following letters from Local Governments and Administrations, submitting returns for the year 1894:

From the Government of Madras, No. 276-A., dated the 16th May 1895, and enclosures.

From the Government of Madras, No. 991-A. R., dated the 18th June 1895.

From the Government of Bombay, No. 2954, dated the 17th July 1895, and enclosures.

From the Government of Bengal, No. 3654-J., dated the 4th July 1895, and enclosure.

From the Government of the North-Western Provinces and Oudh, No. 540, dated the 1st June 1895, and enclosures.

From the Government of the Punjab, No. 399, dated the 3rd May 1895, and enclosures.

From the Chief Commissioner of the Central Provinces, No. 4182, dated the 29th May 1895, and enclosures.

From the Chief Commissioner of Burma, No. 41-1 W.-1, dated the 2nd April 1895, and enclosures.

From the Chief Commissioner of Assam, No. $\frac{306\text{-Miscellaneous}}{1856\text{-G.}}$, dated the 9th April 1895, and enclosure.

From the Chief Commissioner of Coorg, No. $\frac{92}{455\text{-}85}$, dated the 18th January 1895, and enclosures.

From the Resident at Hyderabad, No. 88, dated the 5th April 1895, and enclosures.

From the Chief Commissioner of Ajmere-Merwara, No. $\frac{771}{165}$, dated the 8th July 1895, and enclosure.

From the Resident in Mysore, No. $\frac{247}{2386}$, dated the 23rd January 1895, and enclosure.

RESOLUTION.

The statement appended to this Resolution contains the figures returned from the various Provinces regarding the number of human beings and of cattle killed by wild animals or by the bite of poisonous snakes, the number of wild animals of various descriptions, and of snakes, destroyed in each Province, the amount of rewards paid for their destruction, and the number of licenses issued in Form XI under the Indian Arms Act, 1878, free of charge, allowing the possession of arms for purposes of destruction of wild animals or protection of crops. The figures for the year under report (1894) are compared in the statement with those for 1893.

2. The following figures show the loss of human life caused by wild animals that has been reported in these two years:

Province.	Number of persons killed during 1893.	Number of persons killed during 1894.
Madras	274	279
Bombay	38	40
Bengal	1,600	1,693
North-Western Provinces and Oudh	232	279
Punjab	37	40
Central Provinces	256	221
Burma	178	156
Assam	155	145
Coorg	2	1
Hyderabad Assigned Districts	27	37
Ajmere and Merwara	5	2
	2,804	2,893

The figures for each Province show little variation from the preceding year. Of the deaths in Bengal, 939 (as against 860 in 1893) are stated to have been due to "other" (unclassified) animals, mostly jackals, wild boars, and alligators, the latter being very destructive in all districts of the Dacca Division. The deaths due to tigers in Burma had in 1893 risen to 124 from 28 in 1892: the reported figures, however, were believed to be incorrect. Apparently those for the earlier year were defective, as the number of deaths caused by tigers was 108 in the year under report. The Provinces in which the loss of life caused by wild beasts was highest in proportion to population were: Assam, Bengal, Burma and the Central Provinces: the mortality in these Provinces was one in 37,771, 42,142, 48,754 and 48,798 of the population respectively. In Burma the rate of mortality, which had risen in 1893 to one in 42,728, was one in 48,754. Among the whole population of India, one person was killed by wild beasts out of every 76,436, as compared with one in every 78,862 in 1893 and one in every 74,677 in 1892.

3. The number of deaths due to snake-bite in each Province was as follows:

Province.	Number of persons killed by snakes during 1893.	Number of persons killed by snakes during 1894.
Madras	1,498	1,612
Bombay	1,192	1,233
Bengal	10,797	9,856
North-Western Provinces and Oudh	4,847	5,689
Punjab	917	1,037
Central Provinces	1,024	1,087
Burma	499	567
Assam	206	160
Coorg	...	...
Hyderabad Assigned Districts	192	231
Ajmere and Merwara	41	66
	21,213	21,538

Bengal and Assam shew a decrease in the number of deaths, and the other Provinces an increase, the largest increase being that of 842 in the North-Western Provinces and Oudh. The differences between the two years are in most cases fluctuations for which no cause can be assigned with certainty, as slightly more efficient reporting would produce such differences in the figures. In 1892 the deaths caused by snake-bite in the Lower Provinces of Bengal were 9,120, and last year the Government of India observed with regret that the number had risen to 10,797. Though the deaths in Bengal exceed those in other Provinces, there was apparently nothing permanent in the rise, as the number has receded to 9,856 in 1894. The decrease of mortality is ascribed both in Bengal and Assam to the low flood-levels of the year, the snakes not having been dislodged from their usual haunts as happens when the water is high. In Assam the mortality is the lowest recorded in the last ten years. The loss of life from snake-bite was highest in proportion to the population in Bengal, Ajmere and Merwara, the North-Western Provinces and Oudh and the Central Provinces, the figures being one person per 7,239, 8,218, 8,245 and 9,921 in these Provinces respectively. If all the Provinces be taken together, one person was killed in this manner among every 10,267 of the population in 1894, as compared with one in every 10,424 in 1893.

4. The total number of cattle returned as killed by wild animals and snakes was 97,371, against 94,666 in 1893.* It is acknowledged that little reliance can be placed on the accuracy of the total figures, since, especially in the case of deaths of cattle from snake-bite, the reporting is necessarily very defective, the owner having no motive to report and the occurrence often not coming to the knowledge of an official. There was an increase in the total number of cattle killed by wild animals (89,544 to 92,495), and a decrease in the number killed by snakes (5,122 to 4,876). The principal increases in the former figures were, from 8,343 to 10,228 in the Central Provinces, and from 17,446 to 19,594 in Assam. The reported deaths of cattle from snake-bite also in the Central Provinces increased from 95 to 235. 34,194 cattle were killed by tigers, and 33,696 by leopards, the greatest number of the former cases (12,620) being in Assam and of the latter (11,426) in Bengal. It is probable that tigers, leopards, or panthers are not much discriminated in the original returns.

The increase in Assam is ascribed by the Chief Commissioner to more accurate reporting. In the Central Provinces the same explanation has been offered for a continuous increase, but the Chief Commissioner views the statistics in general with distrust, and has desired the special attention of the officer who in each district has been placed in charge of the operations for the destruction of wild animals and snakes, to the reported increasing destruction of cattle. The increase in the last few years has been very large in the Lower Provinces of Bengal, where the average in 1884-86 was 11,792 cattle killed by wild animals, while the number for 1892 was 27,966 and for 1894, 35,519. The Local Government, however, ascribe the rise to better reporting.

5. The number of wild beasts destroyed was 13,447, the total amount of rewards paid being Rs. 1,04,927. The corresponding figures in the previous

* The figure shown for 1893 in the Resolution No. $\frac{14\text{-Public}}{1543\ \ 1549}$ of 20th September 1894 was 90,253. The Bengal Government have since supplied revised figures for 1893, *viz.*, 36,348 in place of 31,935.

year were 15,309 and Rs. 1,04,840. The numbers of the various kinds of wild animals destroyed do not differ much from those in 1893; the chief decrease was in the number of other (unspecified) animals destroyed (4,120 to 3,051): this was chiefly due to a falling-off (2,859 to 2,084) in the figures for Lower Bengal, where the number of "other animals" destroyed still far exceeds that in any other Province. The destructiveness of these animals (wild boars, alligators, etc.) to human life in Bengal has been alluded to in paragraph 2 of this Resolution. In the North-Western Provinces and Oudh (where the total number of animals killed and amount of rewards granted shew a small decrease) Rs. 1,405 were paid for the destruction of 514 bears against Rs. 873 for 316 in the preceding year. It is explained, however, that rewards for 471 bears were paid in the Kumaon Division, and it is suspected that some of the skins were purchased in Nepal and Thibet for the sake of the reward; the Local Government has directed that the matter should be specially enquired into.

6. The number of venomous snakes reported to have been destroyed, and the rewards granted on this account shown in the returns, fell respectively from 117,120 to 102,210 and from Rs. 12,607 to Rs. 10,150. (In 1892, however, the number of snakes killed was returned as only 84,789). In Madras no rewards are paid by the Government for killing snakes. In the Bombay Presidency also, if rewards paid by municipalities be excluded, no rewards were given during 1894 for the destruction of snakes. At one time a large number of venomous snakes (*phursas*) were killed in the Sátára and Ratnagiri districts; this ceased on certain restrictions being introduced in the system of rewards: and the Bombay Government decided to watch the mortality in case it should shew an increase. The Local Government consider that there are not yet sufficient data for a conclusion: but there has been no marked increase in the mortality in these two districts. In Sind 11,812 snakes (for which no rewards were paid) are stated to have been killed, against 6,450 in the preceding year. In the North-Western Provinces and Oudh the payment of rewards by Government has been discontinued since 1891; 14,829 snakes are reported to have been killed in 1894, against 21,139 in 1893. The chief decrease, however, took place in Assam, where the figures for the destruction of snakes were: in 1892, 2,329; in 1893, 9,443; and in 1894, 1,808. The rewards paid in Assam fell from Rs. 2,657 to Rs. 303. Practically the whole decrease took place in the Sylhet district, where 9,132 snakes were killed in 1893 and only 1,515 in 1894. The decrease is ascribed, like the reduced mortality from snake-bite in this Province, to the absence of high floods in 1894. The offer of a reward of Re. 1 per snake by the Local Board of North Sylhet, noticed in the Resolution of the Government of India reviewing the returns for 1893, has had no effect, the number of snakes killed in that sub-division having fallen largely. Thus recent experience in Bombay, the North-Western Provinces and Oudh, and Assam seems to confirm the view, based on earlier experiments, which was expressed in 1890 by the Government of India, that there is little practical utility in a system of rewards for killing snakes. In the Central Provinces (where 1,844 snakes were killed during 1894) the Chief Commissioner has approved a uniform rate of reward, *viz.*, one rupee for each poisonous snake killed: this rate has been brought into operation during 1895, and its effect will be visible hereafter. The largest number of snakes killed (52,063) was, as usual, in Lower Bengal, where Rs. 5,006 were paid as rewards.

7. Besides licenses for purposes of sport, which are issued in Form VIII under the Indian Arms Act, 1878, on payment of a small fee, 15,043 (against 16,321 in the previous year) licenses in Form XI were issued, free of cost, for possession of arms for the purposes of destruction of wild animals or protection of crops. Adding the licenses continued from previous years, the total number of licenses in Form XI in force during 1894 was 64,857, against 69,931 in 1893. The largest decrease in the number in force was in the North-Western Provinces and Oudh (16,827 to 15,035) and the Central Provinces (16,126 to 14,075) where such licenses are still more numerous than in any other Province. In the Central Provinces, however, the accuracy of the figures is considered doubtful. In regard to the decrease in the North-Western Provinces and Oudh, it is stated that greater discrimination was found necessary on the part of District Magistrates in granting licenses in order to secure that licenses are not issued in this Form for purposes which it is not intended to cover.

The Indian Arms Act was applied to the Hyderabad Assigned Districts by Foreign Department Notification No. 1875-I., dated 1st June 1894. The Resident has observed that the grant of licenses in Form IX (corresponding to Form XI) will, in these districts, require careful watching.

8. While the Governor General in Council deplores the loss of life which is annually reported to have been caused by wild beasts and snakes His Excellency in Council has nothing at present to add, on the subject of measures for reducing the mortality caused by wild beasts, to the remarks made in paragraph 7 of the Resolution in this Department of 20th September 1894, reviewing the statistics of 1893. So long as the habits of the natives of the country remain as they are and they continue to go barefooted and sleep upon the ground it will, in the opinion of the Government of India, be vain to expect that the number of deaths from snake-bite will fall to a very material extent. But the Government of India adhere to the opinion, which they expressed in 1890, that the removal of undergrowth and débris in or near village sites cannot fail to reduce the chances of loss of life from this cause. At the same time the Government of India admit that this precaution may be both more useful and more practicable in some parts of the country than in others. In places where vegetable growth is very rapid, it will be difficult to exercise any supervision over keeping it down; though a good deal can be done by the villagers themselves, if they can be convinced of the usefulness of this precaution. It is noticed with satisfaction that attention has generally been given to this subject, although opinions vary as to the amount of good to be expected. Considerable activity in the matter is reported to have been shown by district officers and Local Boards in Madras and Bombay. The Government of Madras, however, are inclined to think that the work of clearance is in many cases not very thoroughly done. In Lower Bengal a good deal has been done by Municipalities, but the villagers remain apathetic, and little, it is stated, can be done to remove the rapidly-growing vegetation of many village sites. The Local Government observes that it is not in those districts where jungle abounds near the houses that the mortality from snake-bite is greatest. In the North-Western Provinces and Oudh, although attention was everywhere paid to clearing inhabited sites, the deaths due to snakes rose from 4,847 to 5,689. In Burma it is expected that the rules regarding village sanitation which

have recently been published will have a beneficial effect in checking the breeding of snakes. In Assam, as already remarked, the mortality from snake-bite was the lowest for many years, and the results are considered by the Chief Commissioner fully to justify the measures which have been adopted for the preservation of human life. The Government of India remain of the opinion that any organised system, such as the appointment of special officers, for the destruction of wild animals and snakes would not be attended by any diminution of the loss of life at all commensurate with the expense which the adoption of such a system would involve. The experiment tried in the Madras Presidency in 1873 resulted in the destruction of 22 tigers and 8 leopards at a cost of Rs. 10,000. At the present time sportsmen and professional shikaris experience year by year greater difficulties in finding tigers to shoot and there is no doubt that the number of these animals in the populous parts of the country is rapidly diminishing. Whenever it is reported that an animal has taken to man-eating measures should, as directed in the Home Department Resolution of 4th December 1890, be promptly taken to exterminate it and Local Governments and Administrations should do all in their power, by the grant of liberal rewards and by requiring local authorities to give special assistance to sportsmen and shikaris, to effect this object. The Government of India adhere to the view expressed in the Resolution just referred to that the grant of rewards for the capture of venomous snakes had not appreciably affected the mortality from snake-bite, and they see no reason to depart from the decision then adopted that the question whether such rewards should be continued or not must be left entirely to the discretion of Local Governments and Administrations.

ORDER.—Ordered that a copy of this Resolution be forwarded to Local Governments and Administrations for information and guidance, and that it be published in the *Gazette of India* for general information.

Also, that a copy be communicated to the Foreign Department.

[True Extract.]

J. P. HEWETT,
Offg. Secretary to the Govt. of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the Week ending at 8 a.m. on Saturday, September 14th, 1895.

During the first few days of the week conditions over India were in progress of recovery from the effects of the rather severe cyclonic storm which advanced on a curved path from the mouth of the Godaveri into Khandesh. This period was marked by a slight to rapid recovery of pressure over the west of the Peninsula and in part over the whole of Western India. During this time pressure decreased moderately steadily from a high pressure area in the south to a low pressure area over the Punjab, and westerly to south-westerly winds prevailed fairly generally, though in the Punjab the directions were variable. On Thursday, the 12th, a change occurred—a large low pressure area appeared over the Bay,—and this feature in the weather gradually increased in importance as the week progressed. There has been a good deal of steady rain over Burma, Bengal, and Assam during the week, and there has also been a fair amount of rain over Madras—more particularly in the south; but elsewhere, after the burst which marked the breaking up of the cyclone previously noticed, rain was very light and scattered, and large parts of the country received hardly any during the week. The weather has been warmer than usual.

Daily Summary—*Sunday, 8th September.*—The barometer was falling over Northern India and Arakan, and rising elsewhere. The rise had been brisk to rapid over the west of the Peninsula, and the depression, which had previously existed there, had filled up. Readings were highest in Malabar and lowest over the Punjab, and westerly to south-westerly winds prevailed, except in the north of the Punjab, where the direction was south-easterly, and in Malabar, where the direction was northerly. Temperature was in considerable to large defect over the west of the Peninsula and in Assam, and in more or less excess elsewhere. Rain had fallen generally over North-Eastern India and Bombay, and, as scattered showers, over the Gangetic plain, the North-West Himalayas, and the Central Provinces.

Monday.—Pressure had increased, except over the Bay and at one or two stations in Northern India. The rise had been rapid over Gujarat, Southern Rajputana, and Central India. The general distribution was practically unaltered, except that a small centre of depression had been developed over the Punjab. The winds had backed somewhat in Bengal, and an irregular cyclonic circulation had appeared over the Punjab, but otherwise the wind directions were little changed. The mean temperature was still low in Assam and East Bengal and in Bombay, and in excess in other parts of the country. Rain had continued to fall over North-Eastern India, the west and head of the Peninsula, and at several central stations. In North-Eastern India the amounts were large.

Tuesday.—Pressure had generally decreased, except in North Bombay, the west of the Central Provinces, Rajputana, Central India, and part of the Punjab and of Sind, where it had risen slowly. Readings were high over the west of the Peninsula, the south of the Bay, and Tenasserim, and low over the Punjab and Gangetic plain. The winds were unchanged. The mean temperature was in large defect over North-Eastern India and in large excess over North-Western India, but elsewhere the variations from the normal were small. Light to moderate general rain was reported over North-Eastern India, but only scattered showers in other places.

Wednesday.—Pressure was increasing over the whole of Northern and Central India, and decreasing over the Peninsula and Lower Burma. The rise had been brisk over the Gangetic plain and North Bengal. The general distribution was little changed, readings remaining high over the west of the Peninsula and south of the Bay and low over the Punjab. The winds were on the whole westerly, but south-easterly to southerly winds were blowing over Burma and

Bengal, and variable winds over the Punjab and along the West Coast. Calms were numerous in the Punjab. The mean temperature remained low in the north-east and generally excessive elsewhere. Rain had again been general over North-Eastern India, but in other parts of India little or none had fallen.

Thursday.—Pressure still decreased over Lower Burma, the south of the Bay, and the Peninsula, and increased over Northern and Central India. The general distribution of pressure was changing, for, while the highest pressures were still reported from Southern India, and the lowest from the Punjab, a large shallow low pressure area was forming over the Bay. The winds were cyclonic around the Bay and generally between west and north elsewhere. The mean temperature remained in excess, except over North-Eastern India, where it was in large defect. Rain had fallen over Bengal and Madras, but elsewhere scattered showers, at most, had been received. In South Madras the amounts had been large for the season.

Friday.—Pressure changes were generally small. In North-Western India the barometer had generally risen, and elsewhere it had generally fallen. The distribution of pressure was the same as on the preceding day. The winds were generally between north and west, but around the Bay the directions were very variable. The mean temperature remained excessive, except over Bengal and Assam. Showers had occurred, except over North-Western India.

Saturday.—The barometer was falling, except in the extreme south, the decrease having been brisk over the whole of Northern India. Pressure remained highest in the extreme south and lowest over the Punjab, while readings remained relatively low over the Bay. The winds were south-westerly in the extreme north-west and between north and west in nearly all other parts of the country. The mean temperature was lower than usual in South Madras and in Assam, and generally in excess elsewhere. Rain had occurred over Lower Burma, the Peninsula, and parts of the Central Provinces.

Temperature.—As mentioned above, there has been during the week under review a good deal of steady, and moderate to heavy, rain over North-Eastern India, and also over the Peninsula—more particularly in the south; while, on the contrary, in other parts of the country the rainfall of the week has been generally light and scattered, and large tracts of country have been quite dry. The effect of this distribution of rainfall on temperature has been well-marked; the mean temperature of Assam and of South Madras having been largely below the normal, while all other parts of the country have had temperatures exceeding the average. The following table gives the variations of the mean temperature from the normal in the different provinces of India for each day of the week:

Province.	September 1895.							Mean variation of week.
	8th	9th	10th	11th	12th	13th	14th	
	°	°	°	°.	°	°	°	°
Burma	+1·0	—0·3	+0·2	+1·1	+1·6	+1·9	+1·3	+1·0
Bengal and Assam	+0·7	—1·2	—1·1	—1·3	—1·0	+0·2	+1·3	—0·3
North-Western Provinces and Oudh	+1·1	+0·6	+1·1	+1·0	+1·2	+0·9	+1·6	+1·1
Punjab	+3·3	+3·4	+2·9	+1·2	+2·0	+2·2	+2·9	+2·6
Bombay	—2·1	—0·3	+0·5	+0·4	+1·0	+1·7	+1·3	+0·4
Central Provinces and Berar	—0·4	—0·1	+0·6	+0·6	+2·4	+2·9	+3·2	+1·3
Central India and Gujarat	+2·5	+1·0	+0·3	—0·3	+0·3	+1·3	+2·0	+1·0
Sind and Rajputana	+2·7	+3·6	+1·3	+0·6	+0·6	+0·7	+1·5	+1·6
Madras	+0·5	+1·5	+1·6	+2·2	+1·2	+0·3	—1·0	+0·9
Mean for whole of India	+1·0	+0·9	+0·8	+0·6	+1·0	+1·3	+1·6	+1·1

The above shows that in Bengal and Assam the mean temperature was 0·3° below the normal and in Bombay and Madras only 0·4° and 0·9° above, while in the other provinces there was an abnormal excess of from 1·0° to 2·6°. The mean

temperature of the whole of India was above the normal average on all days, the general excess being greatest at the close of the week. The warmest day in North-Western India was the 9th, when the average excess was 3½°.

The following were the highest temperatures recorded on each day:

On September	8th	the highest maximum was	109·7°	at	Montgomery.
,,	9th	,, ,,	108·6°	,,	Sirsa.
,,	10th	,, ,,	106·4°	,,	Jacobabad.
,,	11th	,, ,,	104·9°	,,	,,
,,	12th	,, ,,	106·6°	,,	Sirsa.
,,	13th	,, ,,	106·1°	,,	,, and D. I. Khan.
,,	14th	,, ,,	104·6°	,,	,,

The above shows that the hottest region during the week was the south of the Punjab and Upper Sind, and that the height of the daily maximum decreased generally as the week advanced.

Rain.—At the commencement of the week under review rain was received over India from both branches of the monsoon current, moderate to heavy rain having fallen over Bombay as well as over Bengal and Burma on the 8th and 9th. On the 10th, however, accompanying the brisk barometric rise which occurred with the disappearance of the cyclonic storm noticed last week, the fall of rain over Western India ceased, and practically the only rain received over the whole country was from the Bay branch of the monsoon current. This condition lasted until the 12th, when, with the development of a large shallow depression over the Bay, rain became much less general over North-Eastern India; while, on the contrary, it recommenced and became increasingly more general over the Peninsula, till, on the 14th, more or less rain was reported from nearly all parts of the Peninsula, and the fall had almost ceased over Burma and Bengal. The rainfall was heavy in Bombay on the 8th, in North-Eastern India on several days of the week, and in South Madras on the 12th and 13th. No rain whatever was received during the week over a large part of North-Western India, but over the remainder of India, not including North-Eastern India and the Peninsula, light scattered showers were received. The effect of the development of a low pressure area over the Bay was very marked on the distribution of rainfall, the rain over North-Eastern India falling off immediately and simultaneously. The table at the close of the summary gives the rainfall data of the week. The first column shows that four of the rainfall divisions, *viz.*, the Punjab (South and West), Sind, and Rajputana (West), received absolutely no rain during the week, and that five more divisions, *viz.*, the North-Western Provinces (West), the Punjab (Central and Submontane), the Central Provinces (East), Rajputana (East), and Central India (West), received an average fall of less than 0·10 inch for the week. Omitting these divisions, the returns show that the average actual rainfall for the week ranged from 9·26 inches in Asssm (Surma), 7·26 inches in North Bengal, and 6·54 inches in Tenasserim to 0·15 inch in the north-west of the Punjab. According to the normal, the distribution should range from 7·08 inches in Tenasserim and 6·60 inches in Arakan to 0·09 inch in Sind. Consequently, this rough comparison shows that the rainfall was generally heavier than usual in North-Eastern India and generally lighter than usual in North-Western India. The third column of the table gives the excess and defect for each division. Of the fifty-one divisions, for which comparison with the normal is possible, thirty-seven received less and only thirteen more than the average, while one, *viz.*, Lower Burma, had exactly the normal amount. The regions which reported an excess of rain included the following divisions, *viz.*, East, Central and North Bengal, both the Assam divisions, North Bihar, the Bombay Deccan, Khandesh, Hyderabad (South), Madras (Central and South), and the East Coast (Central and South). The principal cases of excess were 3·64 inches in the Brahmaputra division of Assam, 3·39 inches in North Bengal, 2·92 inches in the Surma division, and to 2·31 inches in Eastern Bengal, but, relatively to the normal, the most important case of excess was in the East Coast (South), where the actual rainfall was nearly three times the normal. The most important instances of deficiency

were 2·04 inches in the North-Western Provinces (East), 2·13 inches in Malabar, and 2·21 inches in Coorg, but over a large part of the country the average deficiency exceeded 1 inch.

In Upper Burma there was a good deal of heavy rain during the week, but as no averages are available for comparison, it is not possible to say whether the normal was exceeded or not.

The returns of the sudder stations show that rain fell, on most days throughout the week in Burma; on the first five days of the week in most parts of North-Eastern India; on the first three days of the week in the west of the Peninsula and the central parts of India; on the last three days of the week in the east of the Peninsula, and as occasional scattered showers elsewhere.

The three concluding columns of the table exhibit the state of the seasonal rainfall, *i.e.*, from June 2nd to date. They show that the rainfall for that period has been more or less in excess of the normal in Assam (Brahmaputra), Orissa, Bihar (North), all the North-Western Provinces divisions, except the East, the hill districts of the Punjab, the Bombay Deccan, Khandesh, the Central Provinces (East), Hyderabad (South), and the East Coast (North, Central, and South), and more or less in defect elsewhere. On the whole, however, the variations have not been large, the only cases in which the abnormal deficiency has exceeded 20 per cent. being in Arakan, East, Deltaic and Central Bengal, the Punjab (Central), Mysore, Berar, Gujarat, Kathiawar, Rajputana (East), Central India (West), and Madras (Central).

The following are the more important totals recorded during the week:—Thaton (Tenasserim) 9·56 inches, Rangoon 6·24 inches, Kindat 4·90 inches, Kishorganj (Mymensingh) 13·25 inches, Sunamganj (Sylhet) 19·92 inches, Dhubri 17·56 inches, Sherpur (Bogra) 9·70 inches, Dinhata (Cooch Bihar) 14·72 inches, Araria (Purnea) 6·60 inches, Atur (Salem) 9·68 inches, Panvel (Colaba) 6·98 inches, Chakli (Surat) 5·90 inches, Alamur (Cocanada) 11·04 inches.

SIMLA, *19th September 1895.*

W. L. DALLAS,
Asst. Meteorological Reporter to the Government of India.

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 14th September.*—Rainfall generally good, but light on the West Coast, Coimbatore, and Tinnevelly. Agricultural operations are proceeding. The standing crops are generally fair and have been improved by recent showers, but more rain is wanted in parts of Nellore, the Deccan, and the Southern districts. The paddy crops have withered, or are withering in parts of Tinnevelly. Some harvest is going on with generally moderate yield. Pasture and fodder are generally sufficient. Cattle are in good condition. Prices are generally stationary, but some dry grains are slightly dearer in parts of the Deccan and Southern districts.

Bombay.—*For week ending 18th September.*—Good and seasonable rain throughout the Deccan and in Bijapur ; moderate or slight in Gujarat, Konkan, Belgaum, and Dharwar ; none in Kathiawar and Sind. More rain is wanted for the standing crops in parts of Gujarat, Kathiawar, Nasik, Poona, Belgaum, Dharwar, and Kanara. The deficiency of water continues in Sind, and the crops are suffering from drought ; some damage has also been caused by insects and rats in parts of Karachi. Harvesting of the early crops has commenced in parts of Karachi and Ahmednagar. Preparations for the late crops are progressing in eight districts, but sowing is retarded in parts of Ahmednagar and Sholapur owing to excessive moisture. Fodder is sufficient and agricultural stock are in good condition, except in parts of Baroda territory. Prices are normal, except in parts of Ahmednagar and Sholapur, where *jowar* (*Sorghum vulgare*) is cheaper.

Bengal.—*For week ending 16th September.*—There was heavy rain in some of the Northern and Eastern districts ; elsewhere light showers are reported, except in the Burdwan and Presidency divisions. The prospects of the winter rice crop continue so far good, but in several districts more rain is now required. Transplanting operations are nearly finished. Jute is still being cut and steeped in some districts, and the harvesting of autumn rice and other autumn crops is going on. The price of common rice is generally steady, but has fallen in a few districts.

North-Western Provinces and Oudh.—*For week ending 18th September.*—Light rain has been general, and prospects continue favourable. More rain is needed in several districts. The autumn crops are being reaped, and spring sowings are going on. Sugarcane is doing well. Supplies are sufficient, and prices are generally stationary.

Punjab.—*For week ending 18th September.*—Rain has fallen in the Delhi, Lahore, and Rawal Pindi districts. Irrigation of the autumn crops is going on. Ploughings for the spring crops are in progress. Cotton-picking has commenced in Dera Ismail Khan. The crops are generally reported to be in good condition ; but the unirrigated crops are withering in Hissar, Lahore, and Shahpur. Rain is urgently needed in most districts. Cattle are generally in good condition, and fodder is sufficient in all districts, except in Hissar and Lahore. Prices continue high in Umballa, rising in Hissar, Jullundur, and Peshawar, normal in Delhi and Ferozepore, and low elsewhere.

Central Provinces.—*For week ending 18th September.*—Weather cloudy and warm with slight rain, except in Seoni, Nimar, Nagpur, and Damoh. More rain is wanted in Jubbulpore and also in Damoh. The prospects of the autumn crops are generally good, while in Nimar prospects are excellent. Harvesting of rice has commenced in Narsinghpur. The recent rainfall in Seoni has greatly improved the rice crops in that district, and harvesting of millet is in full swing there. Preparation for the winter sowings are progressing. Prices are steady, except the price of gram which has risen in Narsinghpur.

Burma.—*For week ending 14th September.*—In Lower Burma agricultural operations are approaching completion. The standing crops promise well, except in part of the Tharrawaddy district, where rain is badly wanted, and in the Paungde and Thegon townships of the Prome district, where prospects are poor. In Upper Burma sowing and transplanting of lowland paddy are progressing in most districts, and have been completed in some. The rainfall has been general and fairly sufficient, but more rain is required in places. The crop prospects have much improved, and are now good everywhere, except in the Lower Chindwin district and the Minzu and Singaing townships of the Kyaukse district, where about a two-thirds average outturn is expected. Sowing of *jowar* (*Sorghum vulgare*) continues in Lower Chindwin and Magwe and of the later sesamum in Sagaing and Myingyan. Reaping of dry-weather paddy in Tilin, Pakokku district, and of early wet-weather paddy in the Southern Shan States has been completed. Reaping of hillside paddy in the Northern Shan States is in progress. The price of paddy has fallen slightly in Rangoon, Pegu, Prome, Magwe, and Myingyan ; elsewhere prices are stationary.

Assam.—*For week ending 17th September.*—Weather seasonable. Harvesting of the early and transplanting of the late rice are progressing. Tea is doing well. The condition of cattle is fair. The fodder-supply is insufficient in places, but water is sufficient.

Mysore and Coorg.—*For week ending 18th September.*—MYSORE : Good rain in Chitaldroog, Tumkur, and Kolar ; slight elsewhere. More rain is wanted generally. The standing crops are in fair condition. Prices have fallen in Hassan, Bangalore, and Chitaldroog.

COORG : Rainfall moderate. Transplanting of rice is nearly completed. The coffee and *ragi* (*Eleusine coracana*) crops are maturing. Picking of cardamoms has commenced. Fodder and water for cattle are abundant. Prices are normal.

Berar and Hyderabad.—*For week ending 18th September.*—BERAR : Weather warm and cloudy with occasional light showers. The present condition of the crops is reported to be satisfactory in Basim, Buldana, and Wun, but the crops are withering in the remainder of the province through insufficient

rainfall. Preparation of land for the ensuing winter crops is in progress. Weeding operations continue. Scarcity of fodder and water prevails in the Khamgaon taluka. Prices are fluctuating in Wun, but are steady elsewhere.

HYDERABAD :—Rainfall good. The standing autumn crops are in good condition. The spring sowings are still in progress. Agricultural prospects are favourable. Prices continue normal.

Central India.—*For week ending 18th September.*—Rain fell throughout Central India during the week, except in Gwalior. More rain is still wanted in some districts in Gwalior and in Baghelkhand. Agricultural operations are in progress in all Agencies. The crops have been slightly damaged in part of Bhopawar and in one district of Gwalior for want of rain; elsewhere the crops are in good condition. Pasturage is good and sufficient in all Agencies, except in two districts of Gwalior. Prices are high in Bhopal and Goona, but are normal elsewhere.

Rajputana.—*For week ending 18th September.*—Rainfall good in Meywar. More rain is needed in Ajmere, Haraoti, Jeypore, and Ulwar. Agricultural operations are satisfactory. Prospects are unfavourable in Jeypore, where the crops are suffering for want of rain. Want of rain is also felt in Ulwar. Pasturage and fodder are generally sufficient. Prices are rising in three States, falling in one, and steady elsewhere.

Kashmir.—KASHMIR VALLEY.—*For week ending 17th September.*—Rainfall moderate. Indian-corn is being harvested; the other standing crops are excellent. Prices are still somewhat above normal.

JAMMU PROVINCE.—*For week ending 18th September.*—No rain. Weather clear. The crops are suffering for want of rain. Fodder is sufficient. Prices are rising.

Nepal.—*For week ending 14th September.*—Heavy rain and thunderstorms, especially in the hills during the week. Lowland rice is doing well; upland rice is still being reaped.

RESOLUTION.

The establishment of a superior staff for the Civil Veterinary Department, which was sanctioned by the Secretary of State in his Despatch No. 18 (Revenue), dated the 18th February 1892, was intended only as the initial step towards the organization of a complete Veterinary Department for India. The consideration of the strength and constitution of the subordinate staff

was, however, deferred until the veterinary officers appointed should have acquired some practical experience of the requirements of their respective charges, and be in a position to advise Government on the subject. In September 1893 the question was discussed by a Conference of veterinary officers, and their proposals were laid before the Agricultural Conference of October 1893, which adopted them practically as they stood. These proposals were forwarded with the Circular from this Department, No. 4½, dated 27th October 1893, to all Local Governments and Administrations for opinion; and in that Circular, as well as in the Resolution of the Government of India, No. 26—133, dated 4th July 1893, certain information was called for and proposals invited regarding the strength and cost of the Subordinate Veterinary Establishment, present and future, the duties to be assigned to them, and the course and system of veterinary instruction to be adopted. The replies from Local Governments have now been received and considered, and the following are the general conclusions which the Governor General in Council has formed on the subject. It will be seen that it is proposed to modify the scheme as formulated in 1893 in some important respects; and it will be well to state the reasons for doing so with some fulness.

2. The subject falls naturally under the following main heads:—

i.—The Subordinate Establishment;
ii.—The Inspecting Establishment;
iii.—Schools and Colleges;

and it will be convenient to consider them in the above order. The question of strengthening the superior staff of the Civil Veterinary Department is one which may possibly have to be taken up at some future date, but it must await the further development of the present scheme, and need not therefore be discussed in connection with the proposals now under consideration.

3. The scheme as originally framed was open to the objection that it was too rigid, that it was not based upon the principle of requiring that local work should be paid for out of local funds, and that it did not sufficiently recognise the necessity of adapting the proposals to local circumstances so as to make them acceptable to local bodies. It is undesirable to strive after absolute uniformity throughout India in a matter that concerns men on Rs. 20 or Rs. 30 a month, whose chief business is with the tillers of the soil. What is required for the subordinate staff is a body of fairly qualified men who will work in the districts and villages, and among the people, and whose principal charge, since arrangements have already been made for the care of Government animals, will be stock belonging to private persons, and chiefly cattle, the number of which far exceeds the number of horses, mules, and donkeys. This being the case, it follows that the men should be paid from local funds, not only because the services they will render are essentially services which should be paid from that source, but also because, if they are Government servants, the people will be far less likely to get good work out of them than if their appointment, promotion, and dismissal rest solely with the local bodies. It is the main feature of the scheme as now formulated, that the district staff should be paid by the local bodies whom they are to serve, Government undertaking to supply a body of trained men for the purpose, and only the inspecting establishment necessary for the supervision of their work being paid for from Provincial funds.

4. The scheme, therefore, must be one which local bodies will accept. The men to be appointed to the subordinate district establishments will have to make their way, indeed to learn their work by practice; and they will have to gain the confidence of the people. It is possible that not much good will result at first, but everything must have a beginning, and the good to be attained in the end is incalculable. In view of the great annual loss to India from deaths by cattle-disease which very moderate skill might prevent, the Government of India are of opinion that every legitimate means should be employed to induce local bodies to introduce the system. Where the people who pay and administer the local cess are themselves the cultivators, and therefore the cattle owners of the district, but little difficulty will probably be experienced in doing so; but where such difficulty is experienced Government might assist in the first instance either by grants-in-aid, as is done at present in Bombay, or even by employing a small staff wholly at its own expense, as it is proposed to do in the Central Provinces and Bengal. But it is believed that such aid will seldom be required; and even when it is given in the first instance, it should gradually be withdrawn as the system gains ground with the people. Government might also, in places where circumstances justify their doing so, make some small permanent contribution towards the cost of the subordinate establishment, on condition that all animals the property of Government on an emergency, as well as branded mares and their stock by Government sires, are attended free, and that colts are castrated gratis. Subject to this exception, the ultimate object to be aimed at is the entire support of the subordinate establishments by local funds. Courts of Wards and Government Estates might also in many cases employ Veterinary Assistants. It is hoped that some day every tahsil in India will have at least one itinerant veterinary assistant, every municipality of any importance a veterinary dispensary, to the cost of which the municipal and district funds should alike contribute, and every three or four districts a Senior Veterinary Assistant.

5. The question has been raised whether local bodies are legally competent to spend their funds on the maintenance of veterinary assistants and dispensaries. In some provinces this difficulty has not arisen, and existing district establishments are paid either wholly or in part from local funds. It is probable that where objections have been raised on this ground they have been raised for the most part in order to evade expenditure. The matter is one of the utmost importance to the people, and if in any province the law does not cover expenditure of the kind contemplated, it should be amended. The Government of India will be glad to receive the proposals of Local Governments on this point wherever the law is held not to cover the object in view.

6. The Government of India do not propose to constitute, as in the case of the Medical Department, an organized pensionable service for the Subordinate Veterinary Establishment. To do so might lead to difficulties when the men are employed by local bodies; and in this matter the Government of India would prefer to follow the example of the Educational rather than that of the Medical Department. Local bodies are to be asked to spend money for a new and unfamiliar purpose, and it is essential to the success of the scheme that the proposals should be made as acceptable to them as possible. To ask them to pay a Government servant, which is what the scheme prepared by the Committee of veterinary officers amounts to, would not, in the opinion of the

Government of India, conduce to its acceptance by them. If any local body contributes for pension, all must do so, or the interchange of men which is sometimes advisable would become impossible; and there seems to be no sufficient reason for burdening local funds with claims for pension, when there is no likelihood of there being any lack of candidates for employment, even without any promise or prospect of pension. The existence of a pensionary claim not unfrequently makes it difficult for Government to get rid of inefficient men, and the Government of India are strongly opposed to local bodies being hampered in the same way.

7. As regards the district establishments to be employed, Government will provide for the training of qualified men; and having done so, will insist that public money, including local funds, shall not be spent on the employment of any others after due provision has been made for the cases of men already employed. The pay of the different grades proposed for establishment paid from Provincial revenues is shown in paragraph 9 below. As regards the subordinate establishments employed and paid by local bodies, the Government of India do not propose to prescribe a fixed rate of pay for each grade, as to do so would be to deprive individual Boards of the benefit of any local advantages (such as salubrity of climate, or the existence of good school) that they may enjoy, would condemn such Boards as have none to inefficient service, and would take away all inducement to good work which cannot be tested by examination. A *maximum* scale should however be fixed for each Province, to prevent jobbery. The scale suggested in paragraph 9 below might be taken as a basis; but the Government of India leave it to Local Governments to fix the actual scales, as it is improbable that the same scale would be suited to the varying circumstances of different Provinces. Local bodies should be allowed to pay any of their employés who fulfil the conditions for promotion to a certain grade, up to but not beyond the pay of that grade, and any departure from this rule would require the special sanction of Government. In order, however, to offer some certainty of prospects to students appointed in the first instance to the lowest grade, it would be well to fix some such sum as Rs. 15 per mensem as the minimum pay after the first three years of service. No allowance need be given for a knowledge of English. The grant of pony allowance will be left to Local Governments to decide, subject only to the condition that if it is given in one district of a Province it should ordinarily be given in all and at the same rates, or it will be used as a means of evading the maximum. It will be necessary for Local Governments to frame rules under their District Board and Municipal Acts to enforce these principles.

8. In order to supervise effectually the work of the subordinate establishment, a more highly qualified staff will be required; and as the inspection will remain in the hands of Government, even if District Boards ultimately contribute towards its cost, the same objections to the organization of a pensioned service do not apply as in the case of the subordinate establishment. For the work of inspection picked men are required, and as the inspecting staff will be recruited from the Bombay and Lahore Colleges only, a uniform scale of salaries can be prescribed, it being left to the Local Government in such places as Burma and Baluchistan to propose any local allowances that may be considered necessary.

9. As regards the scale of pay proposed by the Veterinary Conference, the Government of India are of opinion that it has been fixed too high. The amount of work to be done is so large that it will be better to have three men on lower pay in a district than one on higher. Moreover, they do not think it advisable that veterinary officers should receive higher pay than officers in the medical service now receive. Hospital Assistants are under training for four and Assistant Surgeons for five years, while the course prescribed for Veterinary Assistants is two and for Senior Veterinary Assistants three years only. Again, it is not desirable that the pay of the subordinate and inspecting establishments should be made continuous, as the latter will be of altogether superior standing and qualifications. The scale which the Government of India consider generally appropriate for Veterinary Assistants and Senior Veterinary Assistants is shown in the following table, and is compared with the corresponding scale for the medical service and with that proposed by the Veterinary Conference:—

Medical.			Veterinary.		
				Proposed by Conference.	Approved by the Government of India.
Assistant Surgeons.	Rs.		*Senior Veterinary Assistants.*	Rs.	Rs. (With pension, but 10 per cent. to be deducted for ignorance of English.)
After 14 years' service ...	200		1st grade ...	200—250	175
7—14 ditto ...	150		2nd grade ...	150—200	135
Up to 7 ditto ...	100		3rd grade ...	100—150	100
	With English.	Without English.		With English.	Without English.	
Hospital Assistants.	Rs.	Rs.	*Veterinary Assistants.*	Rs.	Rs.	Rs.
After 14 years' service ...	55	35	1st grade ...	75—100	70—95	40
7—14 ditto ...	35	25	2nd grade ...	50—75	45—70	30
Up to 7 ditto ...	25	20	3rd grade ...	25—50	25—50	20
	With pension, local allowances, and personal allowances for good service in special cases with sanction.			With pension and pony allowance.		No pension; pony allowance doubtful.

A deduction of 10 per cent. should be made from the pay of every Senior Assistant who has not passed in English. The question of granting extra allowances for long and approved service may be considered hereafter. The opinion of Local Governments upon this scale is desired by the Government of India together with proposals for local allowances where they are considered necessary.

10. Promotion from grade to grade should be made dependent on two conditions, *viz.*,—

(1) seven years' service in the next lower grade; and

(2) passing an examination.

The examination for grade promotions should be held annually, that for Senior Veterinary Assistants being conducted by the Staff of the Provincial School,

while that for Veterinary Assistants, *which will be almost entirely practical*, would be held by the Superintendents of the various Provincial Civil Veterinary Departments. The question of private practice is one which is intimately connected with the subject of pay. The Veterinary Conference proposed that Veterinary Assistants should be allowed to engage in private practice unless specially debarred therefrom by the orders of the Local Government, but the Government of India doubt whether such practice would be compatible with the due performance of their duties by inspecting officers or itinerating assistants. On the other hand, it will probably be undertaken whether forbidden or not; while it may help the growth of confidence in the skill of the men. On the whole, they would make it a rule that members of the Provincial Service should not be allowed to engage in private practice, and would leave local bodies to make their own rules in the matter for their veterinary assistants, it being understood that the following kinds of work should always be performed gratuitously:—

(*a*) attending all animals, the property of Government, on emergency, *e.g.*, in the absence of the Government salutri;
(*b*) attending branded mares and their stock by Government sires;
(*c*) the castration of colts.

These are the proposals which commend themselves to the Government of India; but they will be glad to receive any criticisms or suggestions from Local Governments.

11. Turning now to the question of schools and colleges, the Government of India agree to the proposal of the Punjab Government that the school at Lahore should add a third year to its course and rank as a 'College. The length of the course for a college diploma will be three years, and for a school certificate two years; a school certificate being obtainable at the Bombay and Lahore Colleges as well as at the schools already established at Calcutta, Rangoon, and Ajmere. It is not thought advisable at present to add to the number of schools until the permanent demand increases with the extension of the subordinate service. The curricula at the schools need not be identical so long as the standard is fairly uniform, but the course should conform as far as possible with the two years' course in the colleges. The question of the curriculum to be followed at both schools and colleges should be separately considered, and a Board should, as proposed by the Veterinary Committee, be constituted to advise Local Governments in the matter. The examinations for diplomas and certificates should be held annually by a Board locally appointed for the purpose, consisting of one or more officers of the Army Veterinary Department, an officer of the Civil Veterinary Department when one is available and, in order to secure uniformity of standard, the Assistant to the Inspector-General, Civil Veterinary Department. No one will be appointed a Senior Veterinary Assistant unless he has obtained a college diploma, or a Veterinary Assistant unless he has obtained a school certificate; and this condition will apply equally to all subordinates appointed by the Court of Wards or by local bodies. But as regards these matters also the criticisms and suggestions of Local Governments will be welcome.

12. As regards the School and College Staff, the Government of India are of opinion that they should be kept separate and distinct from the inspecting and subordinate services; otherwise, if an appointment of a particular grade is sanctioned in a school or college, the officer holding the appointment will wish to leave as soon as he qualifies for the next grade. The circumstances of capital towns differ greatly from place to place and from those of districts; and it would therefore seem preferable to sanction definite appointments for schools and colleges, as at present, quite distinct from the new service to be created. The Government of India will be glad to receive the opinions of the various Local Governments on this suggestion.

13. The foregoing paragraphs explain the general principles upon which the Government of India, as at present advised, desire to organize the Subordinate Veterinary Service which it is intended to create, and it remains for Local Governments to make definite proposals for giving effect to these principles in their several Provinces. In paragraph 6 of the Circular of the 27th October 1893, Local Governments were asked for a return showing the existing subordinate veterinary establishments as they stood on the 1st October 1893, as well as the cost and strength of the establishment which they proposed to adopt if the system of grading advocated by the Veterinary Conference was carried out. The required information has in the majority of cases been supplied, but the proposals that have been made will now have to be revised in accordance with the general principles formulated above. Moreover, the proposals framed by many Provinces relate rather to what may be hoped for in the distant future, than to what is possible within the next few years. With a view therefore to the settlement of the question for the present, the Government of India desire to be furnished with definite proposals by the several Local Governments and Administrations in order to give early effect to the general scheme; and especially as to the additional establishment which they propose to employ. So far as Provincial expenditure is concerned, the proposals should represent the maximum up to which the Provinces will be prepared to work within the next five years. As regards charges debitable to local funds, the proposals will merely indicate the establishment which in the opinion of the Local Government they may reasonably hope to work up to within that period, without, however, limiting the local expenditure to any fixed amount.

ORDER.—Ordered that a copy of the above Resolution be forwarded to the Local Governments and Administrations noted in the margin for information and favour of submission of the opinions and information called for.

Ordered also, that a copy be forwarded to the Foreign Department for communication to the Agents, Governor General, Rajputana and Baluchistan, for information and favour of submission of the required opinions and information.

Ordered also that a copy be forwarded to the Military and Finance Departments and the Inspector General, Civil Veterinary Department, for information.

Ordered also that it be published in the Supplement to the *Gazette of India* for information.

FINANCE AND COMMERCE DEPARTMENT,
Calcutta, 21st September 1895.

J. F. FINLAY,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the Week ending at 8 a.m. on Saturday, September 21st, 1895.

The principal feature in the weather of the week under review has been the depression which it will be remembered was developing over the Bay at the close of the previous week. While the depression was well to the south of the Bay, on the 15th showery weather was experienced over all parts of India, except the North-West, but as the disturbance concentrated and advanced northward (the 16th and 17th) the showeriness became less and very little rain was received, except in Burma. On the 18th the storm was over the head of the Bay and rain was falling over Lower Bengal as well as in Burma, and on the 19th and 20th the centre was passing north-westward to the east of the North-Western Provinces, while occasioning heavy rain all over North-Eastern India. On the 21st the storm had filled up and rain had almost ceased. Between the 16th and 18th a slight period of disturbance occurred over the north of the Punjab and thunderstorms were experienced on and near the hills.

Daily Summary.—*Sunday, 15th September.*—Pressure was decreasing almost everywhere, most at the head of the Bay, and the depression over the Bay was developing steadily. Readings were highest in the extreme south, lowest over the Central Punjab, and relatively low over the Bay area. Winds were irregularly cyclonic around the Bay and generally westerly elsewhere. The mean temperature was above the normal over the greater part of Northern India and below in other parts of the country. Showers of rain were reported, except from the North-West. In parts of the Peninsula and of Burma the amounts were large.

Monday.—Pressure was increasing over Western and decreasing over Eastern India. The fall had been brisk over Bengal and the head of the Bay. The depression over the Bay had continued to develop and had moved slowly northward. In other respects conditions were unchanged. Cyclonic winds continued around the Bay, variable winds on the West Coast, and westerly to north-westerly winds in other places. The distribution of mean temperature was unchanged. Scattered showers were reported over the Peninsula and more general showers over Burma, but elsewhere there was very little rain.

Tuesday.—Pressure had decreased slowly at the head of the Bay, but had increased elsewhere, the rise being brisk over Burma and the Punjab. The depression had now reached the north of the Bay, where readings were below 29·5 inches and about 0·15 inch below the normal. The winds were practically unchanged; cyclonic winds prevailing over and around the Bay and westerly to variable winds in other places. The mean temperature was excessive over the Gangetic plain and Bengal, and below the normal elsewhere. Rain was falling generally and heavily in Burma, and showers were reported over the head of the Peninsula and the central parts of the country. Thundershowers were also reported from the north of the Punjab.

Wednesday.—The barometer was falling very slightly over South-West Bengal, the east of the Central Provinces and in Mysore, and was rising elsewhere. The recovery was brisk to rapid over Burma, Assam, Bengal, and the Punjab. The depression was close to the head of the Bay, where readings were again below 29·5 inches and 0·15 inch below the normal average. Cyclonic winds prevailed within the storm area, north-westerly winds over the Peninsula and central parts of India, and variable winds in the North-West. The mean temperature was excessive in West Bengal and the Gangetic plain. Rain was falling generally around the northern half of the Bay, and a few showers were reported from the central parts of the Peninsula and from the Punjab.

A

Thursday.—Pressure had decreased rapidly over Chota Nagpur and slightly to briskly over the Punjab, while on the other hand there had occurred a rapid rise over Burma. The depression from the Bay had advanced north-westward and the centre was close to Chaibassa where pressure was 0·15 inch below the normal average. Readings were highest in Tenasserim, lowest in Chota Nagpur, and relatively low in the west of the Punjab. Cyclonic winds prevailed within the storm area, south-easterly winds in the east of the Gangetic plain, and north-westerly to westerly winds over the Peninsula. The mean temperature was in excess over the Gangetic plain and generally in defect elsewhere. Rain had fallen over Burma, Bengal, and the east of the North-Western Provinces, the amounts received being heavy in the neighbourhood of the depression.

Friday.—Pressure had decreased briskly to rapidly over the east of the North-Western Provinces and slightly to briskly over the whole of Western India, while there had been a slight to very rapid recovery over Bengal and the east of the Peninsula. The depression from the Bay lay over Benares, where pressure was below 29·50 inches, and was 0·20 inch below the normal. The winds over a very large part of the country were influenced by the depression. Heavy rain was falling within the storm area, moderate to heavy rain over Bengal, and showers in Burma and the Peninsula.

Saturday.—Pressure had fallen over Burma and risen elsewhere. The rise was very rapid over the North-Western and Central Provinces and amounted to 0·34 inch at Benares. The depression from the Bay had completely filled up. Readings had become very uniform and the winds varied a good deal in direction. The mean temperature was excessive over the central parts of the country, generally in defect elsewhere; the deficiency being very large over parts of the North-Western Provinces. Scattered showers were reported from different parts of the country, the amounts being considerable in some places.

Temperature.—The absence of general rain during the early part of the week resulted in a very general though moderate excess of temperature during that period. On the 17th the influence of the rainfall accompanying the depression noticed above began to make itself felt. On that day there was an abnormal deficiency of 1·9° over Burma; on the 18th the deficiency increased to 2·7°; on the 19th it extended to Bengal; on the 20th it extended to the whole of the Gangetic plain; and on the 21st, when rain began to cease, a recovery commenced in Burma. The following table gives the variations of the mean temperature from the normal in the different provinces of India for each day of the week:

Province.	September 1895.							Mean variation of week.
	15th	16th	17th	18th	19th	20th	21st	
	°	°	°	°	°	°	°	°
Burma	+1·8	0	—1·9	—2·7	—1·4	—0·3	+1·1	—0·5
Bengal and Assam	+1·1	+1·9	+2·6	+0·8	—2·1	—1·9	—0·3	+0·3
North-Western Provinces and Oudh	+2·0	+1·9	+2·5	+2·3	+2·3	—0·8	—2·7	+1·1
Punjab	+3·1	+1·6	+1·4	+1·2	+0·3	—0·4	—0·4	+1·0
Bombay	0	—1·0	—0·6	+0·2	+0·8	+1·0	+0·7	+0·2
Central Provinces and Berar	+2·6	+2·7	+1·1	+1·3	+1·6	+1·7	+2·5	+1·9
Central India and Gujarat	+2·6	+1·7	+1·0	+1·6	+2·1	+1·6	+0·8	+1·6
Sind and Rajputana	+1·1	+1·7	+0·8	+1·2	+0·5	—0·9	+0·1	+0·6
Madras	—0·8	—0·9	—0·3	+0·7	+1·1	+0·7	—1·1	—0·3
Mean for whole of India	+1·5	+1·1	+0·7	+0·7	+0·6	+0·1	+0·1	+0·7

The above shows that the mean temperature of the whole country exceeded the normal average on all days of the week, the abnormal excess ranging from 1·5° on the 15th to only 0·1° on the 20th and 21st. The provincial variations

show that the mean temperature was about normal in Burma, Bengal, Assam, Bombay, Sind, Rajputana, and Madras, and between 1° and 2° above the normal in the other provinces.

The following were the highest temperatures recorded on each day:

On September	15th	the highest maximum was	105·1°	at	Sirsa.
„	16th	„ „	105·6°	„	„
„	17th	„ „	104·6°	„	„
„	18th	„ „	101·5°	„	Jacobabad.
„	19th	„ „	101·6°	„	Sirsa.
„	20th	„ „	100·6°	„	„
„	21st	„ „	103·0°	„	Jacobabad.

The warmest district was thus the Southern Punjab and Upper Sind throughout the week.

Rain.—The rainfall of the week under review occurred under two different sets of conditions. During the period in which the depression was developing over the Bay, unsteady variable breezes prevailed over a large part of India, and these unsteady winds were accompanied with slight thunderstorm disturbances which gave showers over the Peninsula, the central parts of the country, and to a limited extent to North-Western India. As soon as the cyclonic storm over the Bay deepened and approached the Bengal Coast, these scattered showers ceased to a large extent and the rainfall of the Indian region was concentrated within the storm area, where a strong cyclonic circulation of the winds was reported and where a heavy downpour of rain occurred within and near the path of the storm. The rainfall recorded during the week was hence in part due to the scattered thundershowers which prevailed during the early part of the week and in part to the cyclonic rainfall which accompanied the depression which was developed over the Bay. The northward progression of the storm and of the rainfall area was very clearly shown. On Sunday, the 15th, the rainfall due to this cause was practically confined to Lower and Central Burma, on the 16th and 17th it had extended to Upper Burma, on the 18th to Lower Bengal, on the 19th to the whole of Bengal, and on the 20th to the east of the North-Western Provinces. The heaviest falls of rain within twenty-four hours during the week occurred in the west and north of Bengal and the east of the North-Western Provinces, when the storm centre was passing over that region, but it was remarkable what heavy falls of rain accompanied some of the thunderstorms which occurred in the early part of the week; thus, on the 15th, Malegaon reported 4·80 inches; Cuddalore 3 inches, and Bangalore 2·44 inches. The table at the close of the summary gives the rainfall data of the week. The first column shows that four divisions, *viz.*, the Punjab (Submontane and Hill districts), the North-Western Provinces (West Division), and Sind had absolutely no rain during the week, while four more divisions, *viz.*, the Punjab (South, Central, North-West and West), the total rainfall for the week averaged less than 0·10 inch per division. Excluding these divisions, the average actual rainfall varied from 9·21 inches in Tenasserim, 6·65 inches in Arakan, and 6·56 inches in Lower Burma to 0·10 inch in Kathiawar. The second column of the table shows that the normal rainfall ranges from 4·68 inches in Assam (Surma), 4·50 inches in Tenasserim and 4·11 inches in the Konkan to 0·01 inch in Sind. This rough comparison shows that large differences exist between the actual and normal distribution of the rainfall for the week. The third column shows these differences. In the case of 28 of the rainfall divisions there has been an excess and in the case of 23 divisions a deficiency of rain. The region of excess included all the Burma Divisions, Deltaic and Central Bengal, Orissa, Chota Nagpur, both the Bihar Divisions, East and Submontane Divisions of the North-Western Provinces, both the Oudh Divisions, the Punjab (West), Madras (South-Central and Central), Mysore, the Bombay Deccan, Khandesh, Berar, the Central Provinces (West), Central India (East), Rajputana (West), the East Coast (North (*a*), Central and South), and Hyderabad (South). The abnormal excess exceeded 4 inches in Tenasserim, 3 inches in Lower Burma, Arakan, and the North-Western Provinces (East

and Submontane), and 2 inches in Chota Nagpur and Hyderabad (South). The region of deficient rainfall included all the remaining divisions. The abnormal deficiency exceeded 2 inches in Assam (Surma) and the Konkan. The most marked instances of excess and defect relatively to the normal are the North-Western Provinces (East) and the Konkan respectively, the former division having received more than three times the normal amount and the latter only about one-third of the average. In Upper Burma general heavy rain was again received; but as no comparative data exist, it is not possible to say if the rainfall of the week has been excessive or the reverse.

The returns of the sudder stations show that rainfall was received daily in Burma; on the last four days of the week in North-Eastern India; and on the first three days of the week in the Peninsula and central parts of the country.

The three concluding columns of the table show the state of the seasonal rainfall. In most divisions a slight deficiency is shown, but in the case of Orissa, the Bombay Deccan, the East Coast (North and Central), and Hyderabad (South) the rainfall from June 2nd to date has exceeded the normal by 20 per cent. and over. The most marked cases of deficiency are:—Arakan, East, Deltaic and Central Bengal; the Punjab (Central and Submontane); Coorg; Mysore; Berar, Gujarat, Kathiawar, Rajputana (East), and Central India (West), in which divisions the deficiency equals or exceeds 20 per cent.

The following are the more important totals recorded during the week:—Kyaikto (Thaton) 13·01 inches, Rangoon 13·36 inches, Naaf (Akyab) 7·97 inches, Patuakhali (Barisal) 9·80 inches, Darjeeling 13·09 inches, Bagusarai (Champarun) 13·44 inches, Gonda 9·74 inches, Maharajganj (Gorakhpur) 10·40 inches, Devala (Nilgiris) 6·29 inches, Malur (Mysore) 6·10 inches, Malsiras (Sholapur) 7·49 inches, Malegaon 8·28 inches, Ganjam 6·75 inches, Proddatur (Cuddapah) 10·07 inches.

SIMLA, *26th September 1895.*

W. L. DALLAS,
Asst. Meteorological Reporter to the Government of India.

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 21st September.*—Rainfall good in Ganjam and Cuddapah; fair elsewhere, except in Coimbatore, Madura, and Tinnevelly. Agricultural operations are proceeding. The standing crops are generally fair and are improving after the recent rains, but are withered or withering in parts of Madura and Tinnevelly. Want of rain is felt also in parts of Nellore, Cuddapah, and North Arcot. Harvesting is in progress with generally moderate yield. Pasture and fodder are generally sufficient, and cattle are for the most part in good condition. Prices are falling in parts of the Deccan and are generally stationary elsewhere, but dry grains are slightly dearer in Godavari and Coimbatore.

Bombay.—*For week ending 25th September.*—Good rain has fallen throughout the Deccan and in Bijapur, but has been generally slight elsewhere. More rain is wanted for the standing crops in Gujarat and Kathiawar generally and in parts of Nasik, Poona, Belgaum, Dharwar, and Kanara. Crops are suffering from drought in parts of Karachi, Thar and Parkar, and Kanara. Rice has been damaged by rats in one taluka of Hyderabad. Harvesting of the early crops is progressing in parts of Kaira and Ratnagiri and preparations for the late crops in nine districts, but sowing is retarded in parts of Ahmednagar and Sholapur, owing to excessive moisture. Fodder is sufficient, except in parts of Sind. Agricultural stock are in good condition. Prices are normal, except in parts of four districts.

Bengal.—*For week ending 23rd September.*—There was general rain during the week, the falls being heavy in Orissa, Chota Nagpur, and South-West Bengal. The winter rice crop has been generally benefited by the rain. The prospects in the Burdwan and Presidency divisions, though still bad, have somewhat improved. The rain has also helped the preparation of lands for the cold weather crops. Early rice and jute are still being cut, and the harvesting of the autumn crops in Bihar and Chota Nagpur is in progress. Sugarcane is generally doing well. The price of common rice is steady, but in some districts there has been a fall, owing to the harvesting of the early rice crop.

North-Western Provinces and Oudh.—*For week ending 25th September.*—Beneficial rain has fallen in the Eastern and lighter in the Central districts. More is needed in some of the Sub-montane and Western districts. Slight injury is reported to the *jowar* (*Sorghum vulgare*) crop from worms in the Sikandra tahsil, Aligarh. The condition of standing crops is good, and prospects are favourable. Preparations for spring sowings continue. Supplies and fodder are ample. Prices are rising in a few districts, but are fluctuating elsewhere.

Punjab.—*For week ending 25th September.*—Rain has fallen in Amritsar, Shahpur, Peshawar, and in parts of Lahore, Mooltan, Rawal Pindi, and Dera Ismail Khan. Irrigation of the autumn crops is in progress. Inferior crops are being threshed in Sialkot. Cotton-picking has commenced in Dera Ismail Khan. Ploughings for the spring crops are going on, and sowing has commenced in Ferozepore and Sialkot. The condition of standing crops is generally good to average, but they are withering for want of moisture in Hissar, where more rain is wanted, as also in Delhi, Lahore, and Shahpur. Cattle are generally in good condition, and fodder is sufficient in all districts, except Hissar, Delhi, and Lahore. Prices are rising in Hissar, Jullundur, and Peshawar, are normal in Delhi and Ferozepore, below normal in Sialkot, continue high in Umballa, and are low elsewhere, except in Shahpur, where wheat is selling from 20 to 23 seers per rupee.

Central Provinces.—*For week ending 25th September.*—Weather generally clear and warm, there having been but little rain during the past week. Prospects of autumn crops continue favourable, and harvesting of early rice has commenced in Damoh, but in Raipur and Bilaspur want of rain is apprehended to cause injury to rice crops; more rain is very much needed in Jubbulpore also. Winter sowings have been started in Saugor, Seoni, and parts of Narsinghpur. Prices continue steady.

Burma.—*For week ending 21st September.*—In Lower Burma agricultural operations have been completed in all but four districts. Heavy rain has fallen in the affected parts of Tharrawaddy and Prome, and prospects there have improved. Crop prospects are generally good in Upper Burma. Sowing and transplanting for wet-weather paddy have been completed in three districts, and are progressing favourably in the rest. Rain has fallen everywhere, and standing crops are on the whole now doing well. In Shwebo some damage has been done owing to floods, while in the Lower Chindwin prospects are improving. Reaping of early sesamum is approaching completion in the Lower Chindwin, Minbu, Magwe, and Myingyan, and the sowing of a later variety is progressing in Sagaing. Sowing of millet is in progress in Sagaing, Minbu, Magwe, and Myingyan, and of gram in Pakokku. Reaping of hill paddy continues in the Northern Shan States. The price of paddy has fallen slightly in Rangoon, Tounghoo, and Pakokku, but is stationary elsewhere.

Assam.—*For week ending 24th September.*—Weather hot. Reaping of the early and transplanting of the late rice are almost finished. Prospects of tea are fair. Cattle are in fair condition, and fodder is sufficient, except in Kamrup and Nowgong. Water is sufficient.

Mysore and Coorg.—*For week ending 25th September.*—MYSORE: Good rain has fallen throughout the State, except in Mysore, Hassan, Kadur, and Shimoga. Prices have fallen in Kolar and Shimoga, but have risen in the Hassan and Kadur districts.

COORG: Rainfall moderate. Transplanting of rice has been completed. Picking of cardamoms continues. The coffee and *ragi* (*Eleusine coracana*) crops are in good condition. Prices are normal. Fodder and water for cattle are sufficient.

Berar and Hyderabad.—*For week ending 25th September.*—BERAR: Weather warm and cloudy with sufficient rain during the week. Recent rains have improved crop prospects generally. Land is being prepared for next cold weather crop. Weeding is in progress. Fodder and water are reported insufficient in parts of the Akola district. Prices have risen in two districts, fallen in one, and stationary elsewhere.

HYDERABAD:—Rainfall good. Agricultural prospects are hopeful; but excessive rain has done mischief to tanks in Teleingana, breaching 26 in the Nalgonda district. Fodder available. Prices normal.

Central India.—*For week ending 25th September.*—Rain fell everywhere in Central India during the week, except in Gwalior and Goona; more is wanted in Gwalior, Bundelkhand, and Baghelkhand. Agricultural operations are in progress everywhere. Indian-corn has been slightly injured in Bhopawar, owing to the long break in the rains, otherwise the crops are in good condition. Pasturage is good in all Agencies, except in four districts of Gwalior. Prices are high in Bhopal and Goona, and normal elsewhere.

Rajputana.—*For week ending 25th September.*—Moderate rain has fallen in Marwar, Kherwara, Pertabgarh, and Meywar. More is needed in Karauli and Ulwar. Agricultural operations are satisfactory. Standing crops are in good condition, but are withering for want of rain in Ulwar. Prospects are fair and agricultural stock good. Pasturage and fodder are generally sufficient. Prices are rising in three States, falling in one, fluctuating in two, and steady elsewhere.

Kashmir.—KASHMIR VALLEY.—*For week ending 24th September.*—Weather cloudy. Reaping of the maize crops is in progress. The other standing crops are excellent. Prices are somewhat above the normal.

JAMMU PROVINCE.—*For week ending 25th September.*—No rain. Weather clear and cool. The crops are withering from want of rain. Prices are rising. Fodder is sufficient.

Nepal.—*For week ending 21st September.*—Fair rain fell during the week, but the weather is now generally fine and sunny. The state and prospects of the crops are good.

DENZIL IBBETSON,

Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

EXECUTION OF DEEDS, CONTRACTS AND OTHER INSTRUMENTS ON BEHALF OF HER MAJESTY'S SECRETARY OF STATE FOR INDIA IN COUNCIL.

No. $\frac{\text{21-Judicial}}{\text{1455-1471}}$.

Extract from the Proceedings of the Government of India in the Home Department (Judicial),—under date Simla, the 4th October, 1895.

Read again—

Resolution of the Government of India in the Home Department No. $\frac{\text{3-Judicial}}{\text{485-501}}$, dated the 28th March 1895, on the subject of the execution of deeds, contracts and other instruments on behalf of Her Majesty's Secretary of State for India in Council.

Read also—.

Letter from the Government of Madras, No. 1572, dated the 26th July 1895, bringing to notice the omission from the above-mentioned Resolution of all provision for the execution of contracts and other instruments connected with the Registration Department in the Madras Presidency.

RESOLUTION.

In exercise of the power conferred by the thirty-third and thirty-fourth of Victoria, chapter fifty-nine, section two, and of all other powers enabling him in this behalf, the Governor General in Council is pleased to declare that the classes of contracts and other instruments specified under heading J-II of the Resolution of the Government of India in the Home Department No. $\frac{\text{3-Judicial}}{\text{485-501}}$, dated the 28th March last, and referred to in the twenty-second and twenty-third

of Victoria, chapter forty-one, section two, may be executed by the Inspector-General of Registration, Madras; and to direct that the words "and the Inspector-General of Registration" be added after the words at present standing against the said heading of the said Resolution.

ORDER.—Ordered that this Resolution be communicated to Local* Governments and Administrations and the several Departments of the Government of India for information and guidance, and that it be also published in the Supplement to the *Gazette of India*.

GOVERNMENT OF INDIA.

HOME DEPARTMENT.

The following papers are published for general information.

PAPERS REGARDING THE REQUIREMENT OF SPECIAL VERDICTS FROM JURIES IN CRIMINAL CASES.

Extract, paragraph 8, from a letter from the Chief Secretary to the Government of Bengal, to the Secretary to the Government of India, Home Department,—No. 122-J. D., dated the 22nd June 1891.

* * * * * *

8. It has been suggested by several of the most experienced Sessions Judges that section 303 of the Criminal Procedure Code should be altered so as to make it incumbent upon the Judge to ascertain and record fully the reasons of the jury for their verdict. It is pointed out that as long as the right of interference with a verdict exists, the reasons which guide a jury to a certain finding are among the most important elements in arriving at a conclusion whether a verdict is reasonable or not. His Honour is disposed to favour the proposal because it is a simple but reasonable way of enabling the Judge to be sure that he ought to disagree with the jury.

* * * * * *

Extract, paragraph $\frac{8}{10}$, from a circular letter from the Secretary to the Government of India, Home Department, to the Governments of Madras, Bombay, Bengal and the North-Western Provinces and Oudh,—Nos. 1105—1108, dated the 25th August 1892.

* * * * * *

8. It has, however, been suggested by the Bengal Government that, in order to facilitate the disposal of references under section 307 of the Code, the Sessions Judge should be specifically empowered or required to ascertain and record the reasons of the jury for their verdict. The Governor General in Council admits that the present system is defective in so far as the Judge, although bound by the Code to refer to the High Court cases in which he considers this course to be necessary for the ends of justice, is not in a position to place before the High Court in a proper shape materials for determining whether the verdict is a wrong one or not. His Excellency in Council, however, is averse to requiring or authorizing Sessions Judges to question juries as to the reasons for their verdict except in cases already provided for by section 303 of the Code. In the first place, no room should be allowed for anything approaching to a cross-examination of the jury by the Judge. Besides not only would it be difficult for untrained men, such as the jurors would be in most cases, to formulate their reasons in a satisfactory shape; but it is doubtful whether a mere statement of their reasons would help materially towards the disposal of the case. It seems to the Government of India that a statement of the *facts* found by the jury, rather than of the reasons for their finding, is what is desired for the purpose of enabling a satisfactory decision to be arrived at as to the correctness of their verdict. His Excellency in Council would therefore adopt the alternative proposal made by the Judges of the Bombay High Court named in the margin, and amend the law so as to empower the Sessions Judge, if he thinks fit, whether before or after a general verdict has been taken, to require special verdicts from the jurors on particular issues of fact, and perhaps on the general credibility of particular evidence. Such an amendment of section 303 would be sufficient both to place the Sessions Judge in a position to decide whether a reference should or should not be made to the High Court

Mr. Justice Birdwood.
" " Telang.
" " Candy.

under section 307 and to furnish the High Court with proper materials for determining whether the verdict is one which should be upheld or not. This point has accordingly been noted for further consideration when the Criminal Procedure Code may next come under revision.

* * * * * *

Extract, paragraphs 32 and 33, from the Report of the Jury Commission, dated the 24th March 1893.

* * * * * *

Section 303, Code of Criminal Procedure.

32. It has been suggested that the terms of section 303 of the Code of Criminal Procedure should be amended so as to enable a Sessions Judge to obtain more clearly the opinions of the jury on parts of the evidence so as to learn and place on record the grounds upon which the verdict was arrived at. We are not in favour of any alteration in the present law, which provides sufficient means for obtaining a verdict, and we think that there are strong objections to anything of the nature of a cross-examination of the jurors as to details of a case so as to obtain their opinion on portions of the evidence. Amongst these it will be sufficient to say that it must very frequently happen that the jurors may individually arrive at the same conclusion by different processes of reasoning, or they may find difficulty in expressing intelligently or logically a conclusion fairly arrived at on consideration of the entire case. No doubt in certain cases—for instance, in cases of culpable homicide not amounting to murder, or of house-breaking with intent to commit an offence—it may be necessary to give a special verdict to determine the exact offence, so as to regulate the sentence; but the terms of the present law sufficiently provide for this and we are opposed to any alteration for the purposes suggested.

It has also been proposed to permit questions to be put to the jurors after verdict delivered, so as to enable the Sessions Judge to determine whether he should refer the case to the High Court, as well as to enable the High Court itself in a referred case to learn whether a verdict was on reasonable and proper grounds; but the same objections equally apply. We prefer to adopt the course recommended by us, *viz.*, that each case referred by a Sessions Judge should be tried by the High Court on its merits on the evidence, as less likely to cause embarrassment and more certain to ensure a just and proper decision.

Special verdicts.

33. We have considered anxiously whether it is practicable to enable the Judge to direct the jury to return a special verdict on issues framed by him. This proposal is supported by high authority, and we are fully sensible of the advantages it would be to the High Court in referred cases to have a special, instead of a general, verdict to deal with, but we have reluctantly come to the conclusion that such a procedure would be liable to create greater evils than it would remedy.

* * * * * *

Extract, paragraph 3, from a circular letter from the Secretary to the Government of India, Home Department, to the Governments of Madras, Bombay, Bengal, North-Western Provinces and Oudh, the Chief Commissioner of Assam, and the High Court, Calcutta,—Nos. 545—50, dated the 6th May 1893.

* * * * * *

3. With reference to paragraphs 32 and 33 of the report, I am to say that the Government of India are disposed to adhere to the view stated in this Department's letter of the 25th August last that section 303 of the Code should be amended so as to empower the Sessions Judge to require a special verdict on particular issues of fact. The object is to enable the presiding Judge to ascertain, for his own guidance and (if necessary) for the information of the High Court, what elements of the charge have been established to the satisfaction of the jury. A charge of theft, based on evidence of recent possession, may be taken as an apt illustration. In a case of this kind which actually occurred the jury had brought in a general verdict of not guilty, but it was subsequently ascertained that they were all of opinion that the property was stolen, and that the accused was in possession of it at the time alleged, but they refused to

draw the inference that he was the actual thief. But if the case had been referred to the High Court upon the bare general verdict, it would probably have been assumed that the evidence as to the property being found on the accused had been thought untrustworthy. His Excellency the Governor General in Council will, however, be glad to receive the opinion of the Madras / Bombay / Bengal / North-Western Provinces and Oudh / Chief Commissioner of Assam / High Court Government on this as on the other amendments.

* * * * * *

Extract, paragraphs 4 and 5, from a letter from the Chief Secretary to the Government of Madras, to the Secretary to the Government of India, Home Department,—No. 1748 (Judicial), dated the 28th August 1893.

* * * * * *

4. In paragraph 32 of the report the Commission deals with the question of amending section 303 of the Code of Criminal Procedure in such a way as to empower the Sessions Judge to—

(1) obtain from the jury its opinion on parts of the evidence in order to enable him to learn the grounds for the verdict;

(2) question the jury as to the reasons for the verdict in view to deciding whether a reference to the High Court is called for.

The majority of the authorities consulted is opposed to amending section 303 in the manner indicated on the ground that anything approaching to a cross-examination of the jury is to be deprecated. The Government of India expressed a similar opinion in paragraph 8 of Home Department letter, dated 25th August 1892, No. 1105, Judicial; the Commission also is opposed to the amendment of section 303 in the manner suggested.

I am to say that His Excellency in Council concurs in thinking that the arguments which have been brought against the proposed amendment outweigh those which have been urged in its favour.

5. In the same paragraph (32) the Commission pronounces against a further proposal that section 303 should be so amended as to empower the Sessions Judge to direct the jury to return special verdicts upon issues framed by him.

This suggestion has been considered on a previous occasion and in Mr. Galton's letter, dated 6th February 1893, No. 268, Judicial, an opinion was expressed in favour of the amendment of section 303 so as to enable the Judge to take special verdicts regarding particular questions of fact and the general credibility of particular evidence.

Among the authorities now consulted by the Government there is a consensus of opinion in favour of the amendment, and His Excellency in Council fully concurs with the Government of India that the vague assertion by the Commission that the amendment would be likely to create greater evils than it would remedy ought not to be accepted as sufficient in the face of the obvious advantages which will result from the introduction of a system of special verdicts. It is understood that the Judge is to have the power of calling for verdicts upon special issues either before or after the general verdict is delivered; Mr. Justice Shephard, it will be observed, takes it to be the intention that special verdicts shall be called for only (1) after the general verdict has been given, (2) if the Judge disagrees with the general verdict.

* * * * * *

Extract, paragraph 10, from a letter from G. T. Mackenzie, Esq., Sessions Judge, Kistna, to the Chief Secretary to the Government of Madras,—No. 761, dated the 10th June 1893.

* * * * * *

10. I think that special verdicts are desirable. As an instance I may quote the difference of opinion in this district on the meaning of section 401 of the Penal Code. The District Magistrate and Police Superintendent think that this

section applies to men born and bred in the wandering tribes of Yanadis and Yerikulas. It is true that these tribes habitually steal, but these men never knew any other home. They have their wives and children with them in the encampment. I hold that section 401 does not apply to such men and was intended to meet the case of men who joined a gang of thieves. I so charged the jury in two cases committed to the Sessions and the juries gave verdicts of "not guilty." The Public Prosecutor moved the High Court, but the High Court refused to interfere. In such cases a special verdict on the facts might have been taken and the doubtful question of law might have been referred to the High Court.

* * * * * *

Extract, paragraph 5, from the opinion of J. H. Spring Branson, Esq., Advocate-General, Madras, forwarded by the Government Solicitor, Madras, to the Chief Secretary to the Government of Madras, with his No. 201, dated the 13th June 1893.

* * * * * *

5. It is very desirable that the reasons of the jury for their verdict should be elicited without subjecting the jurors to a cross-examination or to undue catechism by the presiding Judge. I think that Sessions Judges should be empowered to require from the jury special verdicts as suggested, but the power conferred should be so clearly stated and limited to the object sought as to preclude the chance even of the inquiry degenerating into a cross-examination.

* * * * * *

Extract, paragraph 4, from a letter from R. S. Benson, Esq., Sessions Judge, South Malabar, Calicut, to the Chief Secretary to the Government of Madras, —No. 160, dated the 13th June 1893.

* * * * * *

Section 303, Criminal Procedure Code.

4. I am opposed to anything like cross-questioning of juries as to their reasons for arriving at their verdict. It might often be impossible to record them fairly or intelligibly without writing a separate statement, amounting to a judgment, for each juror, but I think that section 303 of the Criminal Procedure Code should be amended so as to enable the Judge to require the jury to give a special verdict on particular issues of fact. Such a course will rarely be necessary, but it may be so occasionally, to enable the Judge to appreciate the ground on which the general verdict rests, and sometimes, too, in order to assist him in deciding on the appropriate penalty. Such a case occurred in a trial held before me yesterday. Three prisoners were being tried by a jury for dacoity. The acts of the prisoners might have been either simple extortion (section 383), or aggravated extortion (section 386), or robbery (section 390), or dacoity (section 391), according to the view taken of the violence used and the number of persons taking part in the extortion. The jury found the prisoners not guilty of dacoity, but found that one of them was guilty of extortion. I was able under section 303, Criminal Procedure Code, as it stands, to ascertain that the verdict was "guilty of simple extortion" (punishable under section 384, Indian Penal Code), not aggravated extortion (punishable under section 386), but I was unable to frame a special issue as to the violence used, though I would have valued a finding by the jury on that matter as a guide to me in determining the penalty appropriate to the offence.

* * * * * *

Extract, paragraph 1, from a letter from the Registrar, High Court of Judicature, Appellate Side, Madras, to the Chief Secretary to the Government of Madras,—No. 1592, dated the 16th June 1893.

With reference to G. O. dated the 16th ultimo, No. 1022, Judicial, forwarding certain papers regarding the system of trial by jury in Bengal and requesting the opinion of the High Court on the proposals for amending the Criminal Procedure Code dealt with in the report of the Jury Commission, I am directed to submit herewith a transcript of the minutes recorded by the Hon'ble the Chief Justice and Justices Sir T. Muttusami Aiyar, Shephard and Davies.

* * * * * *

MINUTES.

The Chief Justice.— * * * *
I see no objection to the proposed amendment of section 303 of the Code empowering the Sessions Judge to require a special verdict on particular issues of fact.

Justice Sir T. Muttusami Aiyar.— * * * As regards section 303, I see no objection to amending it so as to enable the Judge to require a special verdict on particular issues of fact. On the other hand, I venture to think that such amendment is an additional safeguard. It is not clear to me how the amendment is likely to initiate a system of cross-examining the jury as to grounds of decision. In his charge to the jury the Judge is bound to tell them what material issues of fact arise for decision in each case under trial, and what the findings of the jury ought to be on the several issues to warrant either a conviction or an acquittal. This being so, the power to call for a special verdict on particular issues of fact will only enable the Judge to see that effect is given to his directions and accustom the jury to consider whether their verdict is the outcome of their findings on the several issues. I do not, however, understand the amendment to permit the jury being questioned as to the reasons for their finding on each issue, and there appears to me, therefore, no weight in the objection that the power to call for a special verdict will end in initiating a system of vexatious cross-examination as to the reasons of the decision of the jury.

* * * * * *

Mr. Justice Shephard.—The most important proposals on which our opinion is asked relate to sections 303 and 307 of the Criminal Procedure Code. I would strongly deprecate any proposal to give Sessions Judges a general power to examine the jury as to the ground and reason for their verdict, but I do not see why a Sessions Judge should not be empowered, after a verdict with which he does not agree has been given, to put specific issues to the jury of a general character. For instance, in such a case as that stated by the Government of India (paragraph 3) there might be (1) a question as to whether any theft was committed; (2) a question as to recent possession; (3) a question as to the inference to be drawn from it; and, further, (4) a question might arise on evidence adduced to prove an *alibi*. It seems to me it would be proper and unobjectionable to ask the jury questions of this sort. The answers to them would afford great assistance as well to the Sessions Judge in deciding what action he should take as to the High Court in case of a reference. The power to put questions of the kind stated would be particularly useful in the case of forgeries when such offences are triable by a jury, for the prevailing notions about this offence are not in harmony with our English ideas, and a jury would be quite capable of returning a verdict of "not guilty" on such a charge, although they believed that the accused had altered the document in such manner as to make him clearly guilty of forgery. Other illustrations might no doubt be given.

Provided that it is made clear that the Judge is not to cross-examine the jury about the grounds on which they have arrived at their verdict, and that the questions are directed to ascertaining their opinion on the fundamental issues which the case involves, I think the proposed amendment of the law would be decidedly useful.

* * * * * *

Minute forwarded with a letter from the Registrar, High Court of Judicature, Appellate Side, Madras, to the Chief Secretary to the Government of Madras,—No. 1620, dated the 27th June 1893.

Mr. Justice Best.— * * * * I am also of opinion that the law should be altered so as to allow the Judge to put to the jurors, after the verdict is delivered, such questions as may be thought necessary to enable him to determine whether he should refer the case to the High Court.

* * * * * *

Extract, paragraphs 2 to 4, from a letter from W. J. Tute, Esq., Acting Sessions Judge, Salem, to the Chief Secretary to the Government of Madras,—No. 415, dated the 27th June 1893.

* * * * * *

2. The first suggestion discussed by the Commissioners (in paragraph 32 of their report) is whether section 303 of the Criminal Procedure Code should be so amended as to enable a Sessions Judge to ascertain the opinion of a jury on portions of a case submitted to them. I am clearly of opinion that this should be done. The Commissioners deprecate—and rightly—anything like the cross-examination of a jury. But such appearance of cross-examination would, in my opinion, be avoided (*a*) by allowing the Sessions Judge to ask the jury the necessary questions *before* their final verdict of guilty or not guilty is delivered (though, of course, only at the close of the trial and charge), and (*b*) by defining in the Statute the nature and scope of such questions.

3. I give an example. Take a case of dacoity brought against five prisoners, A, B, C, D and E. Against A and C there is only the evidence of witnesses who say they identify them as the actual dacoits; against B and D there is only evidence of recent possession of property stolen; against E there are both kinds of evidence. I would permit the Judge to put the following questions:—

(1) Having regard to the definition of "dacoity" as now explained to you, do you find that a dacoity really took place?

(2) If you do, are you satisfied with the evidence of identification against A, C and E, or against any of them (if so, against which?).

(3) Do you find that the property produced was found in the (exclusive) possession of B, D and E, or in that of any of them?

(4) Was that property, to their knowledge, stolen in the dacoity?

(5) Do you find A guilty or not guilty? (Similar question in respect of each prisoner.)

I fail to see that any one of questions 1, 2, 3 and 4 can, if put *before* question No. 5, be called a "cross-examining" question (for such questions tend to *form*, not *shake*, an opinion), while I am certain that the putting of such questions and the recording thereof and of the answers given to them (such recording is, of course, imperative and should be done *at the time*) would not only simplify and accelerate the work of the High Court in disposing of cases referred to them, but enable the Sessions Judge to see clearly what cases he ought to refer.

4. It may be said that it will be difficult to word the section so as to regulate the nature of the questions to be asked. But a little must always be left to the common sense of the presiding Judge. And it will be in every case open to the High Court in revision to point out that the questions were wrongly framed and put. In fact, the High Court would in this way be enabled to see into the working of the Judge's mind and into the real disposal of the case far better (as I think) than where, as at present, they are only aided by the perusal of the prescribed abstract charge; while, on the other hand, assuming the Judge's questions rightly put, the answers given to them by the jury would, at a glance, disclose any weakness in logical reasoning or perversity in finding. It is precisely the difficulty jurors feel in expressing a logical conclusion (see the words used by the Commissioners) which the above proposal will obviate by assisting them in doing so.

* * * * * *

Extract, paragraph 3, from a letter from Lewis Moore, Esq., Sessions Judge, Bellary, to the Chief Secretary to the Government of Madras,—No. 1287, dated the 12th July 1893.

* * * * * *

3. I am strongly of opinion that section 303 should be modified so as to give a Sessions Judge power either to require a special verdict on particular issues of fact or to demand from the foreman after the delivery of the verdict a

statement of the grounds on which it is based. During the recent controversy as to trial by jury in India, one fact has been brought prominently to notice, namely, that while Judges and others engaged in the administration of justice express themselves dissatisfied with a considerable number of the verdicts returned by juries, Sessions Judges make references to the High Court and the High Court interfere in a very small percentage of the cases tried. The reason in my opinion why so few references are made and so few verdicts set aside is that in the absence of any information as to the grounds on which a verdict is based, the Judges feel bound to assume that the jurors have considered the case in a rational and reasonable manner. Reference may be made to the case reported at I. L. R., 9 Calcutta, 53, where the Sessions Judge put certain questions to the jury after they had returned their verdict. The answers given to these questions showed that the jury had arrived at certain somewhat foolish conclusions upon the evidence, but the learned Judges of the High Court refused to consider these answers on the ground that the Sessions Judge had no power to put the questions to the jury; and Mr. Justice Norris, having pointed out that there were rational grounds on which the jury might have disbelieved certain evidence, observed that he had a right to assume that the estimate of the evidence arrived at by the jury corresponded with the one formed by himself. The opinions given by the assessors in a large number of cases show that they have not taken a rational view of the evidence put before them, and, if we had the power to ascertain the reasons which have led jurors to return their verdicts, we should often, I fear, find that they are not entitled to very great respect. In the only case in which I felt it possible to make a reference to the High Court under section 307 last year, the foreman of the jury having delivered the verdict volunteered a statement as to the grounds on which it was based. That statement was duly recorded by me, and as it showed that the jury had rejected evidence on most unreasonable grounds the verdict was set aside, and what would have been a palpable failure of justice was prevented. As observed by Mr. Justice Candy in the case reported at I. L. R., 15 Bombay, 452 (at page 482), "a clear and concise idea as to the grounds of the verdict is of the greatest aid in the furtherance of justice. On the one hand, it may show the Sessions Judge that the verdict is not unreasonable; on the other, it may indicate on the part of the jury such an inability to appreciate the evidence that the Sessions Judge will have less hesitation in disagreeing with the verdict."

* * * * * *

Extract, paragraphs 5 to 7, from a letter from E. J. Sewell, Esq., Sessions Judge, North Arcot, to the Chief Secretary to the Government of Madras,—No. 10, dated the 25th July 1893.

* * * * * *

5. With regard to section 32, I think that the proposal to question the jurors would be likely to lead to great confusion and often considerable delay. The jury might have to retire and discuss the questions put to them in order to be able to say if they were unanimous in their answers. If they were unanimous in their verdict, but not in their answers, there might be considerable doubt as to what they did really mean, and a wide field would be opened for the misapplied ingenuity of vakils.

6. *Section 33.*—I am of opinion that it would be of advantage to everybody that the jury should be called upon to return a special verdict on issues framed by the Judge. It would, in case of a disagreement between the Judge and jury, narrow the difference to clear and defined questions and greatly diminish the Judge's labour in referring the verdict and that of the High Court in considering it.

7. As far as my experience goes, juries are apt to be prejudiced by facts brought out in the evidence of which they disapprove, and to give such facts a weight not at all warranted by their bearing on the question of the prisoner's guilt or innocence. Thus if one or two witnesses are manifestly speaking falsely, a jury is very apt to disbelieve true evidence of other witnesses for or against the same accused person. A verdict on special issues would indicate more distinctly the part of the evidence about which this had been done.

* * * * * *

Extract, paragraph 4, from a letter from the Acting Secretary to the Government of Bombay, Judicial Department, to the Secretary to the Government of India, Home Department,—No. 5946, dated the 23rd September 1893.

* * * * * *

4. With regard to the first point, I am to state that this Government agree with the Government of India in considering an amendment of section 303, in the direction indicated, desirable. It will be observed that, whereas the majority of the Judges of the High Court do not consider the amendment called for, the majority of the Sessions Judges consulted approve of it, and I am to state that the Governor in Council concurs with the latter. The suggestion originated with an expression of opinion by the Honourable Messrs. Birdwood, Telang and Candy (JJ.), and for the reasons which are set forth by the Government of India in paragraph 15 of their Despatch No. 32, dated 21st December 1892, to the Secretary of State, it has the entire approval of the Governor in Council. I am, however, to invite a reference to Mr. Hammick's letter submitting his opinion on this point, and to observe that the wide difference between requiring special verdicts on particular issues of fact and requiring reasons for a decision does not appear to have been sufficiently recognized. Juries should certainly not be cross-examined, but if, as suggested by Mr. Hammick, the presiding Judge were required, before asking for a special verdict on a particular issue of fact, to state carefully in writing the points for determination, framing the essential issues with strict regard to the terms of the definition of the offence with which the accused is charged, there seems to the Governor in Council to be no reason to fear, as the Honourable Mr. Crowe does, that the proposed alteration of the law would in practice confuse and perplex jurors. At the same time the Governor in Council is of opinion that the amendment should provide that in all cases a general verdict on the whole case should be given, and that only thereafter, if it should appear necessary, the Sessions Judge should be empowered as proposed.

* * * * * *

Minutes forwarded with a letter from the Registrar, High Court, Appellate Side, Bombay, to the Secretary to the Government of Bombay, Judicial Department,—No. 1498, dated the 18th July 1893.

MINUTE BY THE HONOURABLE THE CHIEF JUSTICE.

* * * * * *

As to the proposed amendment to empower the Sessions Judge to require a special verdict on particular issues of fact, there is no reason why it should be exercised in one case rather than another, and the result will be that jurors will virtually be called upon to give their reasons, and will thus differ but little, if at all, from assessors. I agree with the Commission that "such a procedure would be liable to create greater evils than it would remedy."

The 22nd June 1893. C. SARGENT.

I concur.

The 3rd July 1893. L. H. BAYLEY.

Concurred.

The 7th July 1893. H. J. PARSONS.

I concur.

E. M. H. FULTON.

I concur.

The 5th July 1893. M. H. STARLING.

MINUTE BY THE HONOURABLE MR. JUSTICE CANDY.

* * * * * *

With regard to section 303, I would refer to my remarks in my minute of 28th June 1890, with which Mr. Justice Telang concurred in his minute of 30th June 1890, and which were apparently approved of by Mr. Justice Birdwood in his minute of 9th August 1890.

I cannot see the greater evils which, it is said, such an amendment would create. It is not intended that jurors should be called on to give the reasons for their verdict, but simply a special verdict on specific issues framed by the Sessions Judge.

Extract, paragraphs 4 and 5, from a letter from G. M. Macpherson, Esq., Judicial Commissioner in Sind, to the Secretary to the Government of Bombay, Judicial Department,—No. 5, dated the 24th June 1893.

* * * * * *

4. To enable the Sessions Judge to form a proper opinion of the jury's verdict in such cases, it is, I think, advisable that he should be empowered and required to learn the jury's opinion as to the different matters involved in the case, as showing accused's innocence or guilt. In paragraph 3 of my letter No. 8-Confidential of the 17th December last, I stated that I did not think that jurors should be asked for their reasons, and I said that "it would be unfair to expect from them the power of drawing and explaining the fine distinctions which admittedly at times exist between" murder and culpable homicide not amounting to murder. Moreover, reasons weighing much with one juror might weigh little with another. Often verdicts are a compromise, and even when they are not so, jurors may come to the common conclusion from very different reasons. To expect reasons from them would disgust them, and would often lead to much confusion and unpleasantness; but as to the main facts they should be agreed,—for instance, as to whether stolen property was found with a man and whether he accounted satisfactorily for his possession of it. This would necessitate a slight change in section 303.

5. I think it should also be provided that, on hearing their decision as to the facts proved or not proved (even if differing from the general verdict already given by the jury), the Sessions Judge might give judgment according to the proper legal inferences drawn from their decision as to particular facts, leaving it to accused to appeal, if he wished to do so, on the ground that the facts found proved did not warrant the decision. This would meet, *e.g.*, the case of jurors who insist, as many assessors do, that there must be an eye-witness of guilt. It would cover the case given in paragraph 3 of the letter No. 546 from the Government of India. If the Judge approved of these minor findings, there would, of course, be no need of referring such a case under section 307. The opinions as to the facts, if approved of, would take the place of the general verdict and would be acted on. By section 299 of the Code the jury are to decide as to matters of fact, and are bound to give their decision as to the conclusions to be drawn therefrom according to the Judge's direction, whether they agree with it or not. What I propose is simply to let the Judge in such cases draw that conclusion which the jury are bound by law to draw according to his directions, but which they refuse so to draw. I do not think there would be any hardship in the above, which would give full influence to the opinion of the jury in their own sphere, namely, that of deciding on the facts, and would simply leave the Judge to apply the law to the facts so found. It might at times be difficult for him to tell which of two sections the offence should come under, and he would have to act on the principle of convicting of the less serious offence laid down for similarly doubtful cases. If he disagreed with the decisions as to matters of fact, he would of course be able to refer the case for the orders of the High Court.

* * * * * *

Extract, paragraph 4, from a letter from W. H. Crowe, Esq., Sessions Judge, Poona, to the Secretary to the Government of Bombay, Judicial Department,—No. 316, dated the 4th July 1893.

* * * * * *

4. (Paragraph 32.) I am not in favour of any alteration of section 303 of the Code of Criminal Procedure in the direction suggested. My experience is that even when simple questions are put to jurors for the purpose of ascertaining what their verdict is they get hopelessly muddled and are unable to find intelligent and logical expression of the conclusion they have arrived at. There is always a difficulty in getting them to act independently. The most influential person of their number is usually chosen foreman and he carries great weight with the rest. The result would generally be that each juror would repeat the opinion given by the foreman from inability or unwillingness to enunciate a distinct expression of his own views, whether they really had differed or not.

* * * * * *

Extract, paragraph 2, from a letter from J. W. Walker, Esq., Sessions Judge, Satara, to the Secretary to the Government of Bombay, Judicial Department,—No. 2, dated the 22nd June 1893.

* * * * * *

2. I agree with the Government of India that a Sessions Judge should be empowered to require a special verdict on particular issues of fact. As a further illustration, besides that given by the Government of India, I may state that in a case recently tried in this Court with three assessors, the assessors were of opinion that the charge of murder was not proved, but in giving their reasons they stated that the accused had caused hurt to the deceased. On the evidence it was quite clear that if the accused caused hurt at all they were guilty of murder, and the accused were, in fact, convicted of murder and the conviction was upheld by the High Court. Here if the three assessors had been sitting as a jury, the Court would naturally have concluded that the jury disbelieved the whole evidence, whereas the evidence was believed, but the necessary conclusion that the offence amounted to that of murder was not drawn. It often happens that it is difficult to determine whether a particular act constitutes the causing of hurt, culpable homicide, or murder, and the only satisfactory mode is to ascertain what precise facts are held to be proved.

* * * * * *

4. I concur in the recommendation to amend section 303 so as to empower the Judge to require special verdicts on particular issues of fact. But it should be understood that this is not a provision to permit the Judge to cross-examine the jury as to their reasons after the verdict has been delivered. The special issues should be clearly stated in writing before the jury is called upon to decide, and should form a part of the record of the case. I think that the system of requiring special verdicts is likely to be of use not only to the High Court, but for the purpose of keeping the jury from going astray into irrelevant questions.

* * * * * *

3. The Jury Commission considered in paragraph 32 of their report whether the terms of section 303 of the Criminal Procedure Code should be amended so as to enable a Sessions Judge to obtain more clearly the opinions of the jury on parts of the evidence, so as to learn and place on record the grounds

upon which their verdict was arrived at, and also whether questions should be put to the jurors after verdict had been delivered, and came to the conclusion that no alteration in the law was necessary. This opinion has apparently been accepted by the Government of India. In paragraph 33 the Commission considered whether it was practicable to enable the Judge to direct the jury to return a special verdict on issues framed by him, but reluctantly decided that such a procedure would be liable to create greater evils than it would remedy. On this point the Government of India have expressed the opinion that they are disposed to adhere to the view that section 303 of the Code should be so amended as to empower the Sessions Judge to require a special verdict on particular issues of fact. The preponderance of opinion among officers consulted by this Government is undoubtedly in favour of the proposal of the Government of India, but there is an influential minority against it, consisting of the authorities enumerated in the margin. The principal objection taken is the risk of the Judges' enquiries degenerating into a cross-examination of the jury.

Mr. P. Nolan, Commissioner of Rajshahi.
„ J. Whitmore, Sessions Judge, Birbhum.
„ C. P. Caspersz, Sessions Judge, Chittagong.
„ H. Cox, Sessions Judge, Tirhut.
„ A. W. Mackie, Sessions Judge, Rangpur.
„ H. Holmwood, Sessions Judge, Bhagalpur.
„ C. M. W. Brett, Sessions Judge, Dacca.
„ H. P. Peterson, Sessions Judge, Burdwan.
„ J. H. Bernard, Magistrate, Nadia.
„ F. A Slack, Magistrate, Chittagong.
Kumar Gopendro Krishna Deb, Magistrate, Pabna.
Babu Chandra Narain Singh, Personal Assistant, Commissioner of Bhagalpur.
Members of the Jessore Bar.
Ditto Krishnaghar Bar.
Government Pleader, Nadia.

After full consideration the Lieutenant-Governor is disposed to agree with the Commission that there is no absolute necessity for a change, as, under the present law, a Judge can, and a good Judge does, put the issues before the jury, so that they should be obliged to give a verdict on each point; but since all Judges do not do this, Sir Charles Elliott would prefer to see such a change made in the wording of section 303 as shall show that the procedure should always be as above described, the Judge laying down each issue and calling on the jury for a special verdict on each.

* * * * * *

Extract from paragraph 3 from a letter from the Secretary to the Government of the North-Western Provinces and Oudh, to the Secretary to the Government of India, Home Department,—No. 2664, dated the 20th September 1893.

* * * * * *

3. * * * * With respect to point (2), I am to say that Sir Charles Crosthwaite entirely concurs in the views expressed in paragraph 3 of your letter under reply. He observes that the Jury Commission, while reluctantly rejecting the proposed procedure of requiring the return of special verdicts on issues framed by the Judge, refrained from explaining their reasons and from enumerating the evils which the adoption of such a course would, it was said, create. I am to invite the attention of the Government of India to the strongly expressed opinion of the High Court of Judicature for the North-Western Provinces—an opinion which must carry great weight—that if the system of trial by jury is to continue in this country it is absolutely necessary that the Judge should have the power proposed to be given to him. The reasons for the alteration of the law, which have been fully set forth in paragraph 8 of your letter No. 1108, dated 25th August 1892, and in paragraph 3 of your letter under reply, need not be repeated. * * * * * * * * *

Extract from paragraph 2 from a letter from the Registrar, High Court of Judicature, North-Western Provinces, to the Secretary to the Government of the North-Western Provinces and Oudh,—No. 5080, dated the 11th August 1893.

* * * * * *

2. (1) *Section 303.*—The Court is decidedly of opinion that if the system of trial by jury is to continue in this country it is absolutely necessary that the Judge should have the power to return a special finding or findings on any relevant issue or issues which he may choose to submit to them.

* * * * * *

Extract, paragraph 2, from a letter from J. Deas, Esq., Legal Remembrancer to the Government of the North-Western Provinces and Oudh, to the Secretary to the Government of the North-Western Provinces and Oudh, No. $\frac{1280}{F. 750}$, dated the 18th August 1893.

* * * * * *

2. As regards section 303 of the Code of Criminal Procedure, I differ from the conclusions arrived at by the Commission, and am of opinion that this section should be amended, either with the view of enabling the Judge to ascertain and fully record the reasons of the jury for their verdict, or with the view of empowering the Judge to require from the jury special verdicts on particular issues of fact. As the Judge will be bound, under section 307 (amended in the manner proposed), to make a reference to the High Court in all cases in which he disagrees with the verdict of the jury, and is of opinion that he cannot give effect to it without causing a failure of justice, it is, I consider, most desirable that he should be able to ascertain the reasons for the verdict. The great assistance which would thereby be afforded to the Judge in determining whether a reference should be made under section 307, and to the High Court in deciding the case, if referred to it, is an advantage which appears to me to outweigh the objection urged by the Commission against the proposed amendment.

* * * * * *

Extract, paragraphs 2 to 7, from a letter from H. G. Pearse, Esq., Judge of Agra, to the Secretary to the Government of the North-Western Provinces and Oudh,—No. —, dated the 26th June 1893.

* * * * * *

2. With regard to paragraph 3 of the Home Secretary's letter and paragraphs 32 and 33 of the Jury Commission's report, I am of opinion that section 303, Criminal Procedure Code, should be amended, not merely to *empower*, but to *direct*, a Sessions Judge to require and record a special verdict on particular issues of fact.

3. I consider that the reason given by the Jury Commission in paragraph 32 of its report, page 22, carries its own condemnation with it. The report objects to "anything in the nature of a cross-examination of the jurors as to details of a case so as to obtain their opinion on portions of the evidence. Amongst these it will be sufficient to say that it may very frequently happen that the jurors may individually arrive at the same conclusion by different processes of reasoning, or they may find difficulty in expressing intelligently or logically a conclusion fairly arrived at on consideration of the entire case."

4. If the above sentence had been a prelude to a recommendation for the abrogation of the whole system of trial by jury I could have understood it. As a prelude to a recommendation that one of the few safeguards against absolute perversity or ignorance on the part of jurors should be abolished, I simply cannot understand it. If jurors are unwilling or unable to express "intelligently or logically their conclusion," how is either a Sessions Judge or a High Court to say whether that "conclusion is fairly arrived at on consideration of the whole case" or not?

5. Section 303, Criminal Procedure Code, is entirely permissive. It says "and the Judge may ask them (the jury) such questions as are necessary to ascertain what their verdict is."

6. The different Calcutta rulings in the Weekly Reporter are absolutely at variance, and as the section at present stands I think the questioning power is not likely to be adequately utilised. I am, in short, in favour of stiffening and not relaxing the section.

7. The Commission in section 33, after giving excellent reasons why a Judge should be enabled to direct a jury to return a special verdict, *viz.*, that "the proposal is supported by high authority, and that it would be an advantage to the High Court in referred cases to have a special instead of a general verdict to deal with," stultifies that finding by declining to give effect to it, on the ground of greater, but entirely unspecified, evils that might accrue.

* * * * * *

Extract, paragraph 3, from a letter from the Secretary to the Chief Commissioner of Assam, to the Secretary to the Government of India, Home Department,—No. $\frac{86 \text{ L. L.}}{7331}$ J., dated the 9th September 1893.

* * * * * *

3. *Amendment of section 303, Code of Criminal Procedure.*—The general opinion of the officers whom the Chief Commissioner has consulted is that there is no sufficient reason for altering section 303 as proposed by the Government of India, on the ground that the section in question, as it stands, already allows the Judge to question the jury, and that it is not desirable to allow a Judge to cross-examine a jury either before or after a verdict has been delivered. Mr. Ward's experience, however, as a Judge, in jury districts, extending over seven years in the Assam Valley Districts and nine months in the district of Hugli in Bengal, compels him to dissent entirely from this conclusion. He certainly deprecates the unnecessary cross-examination of jurors, but at the same time there is no disputing the fact that a wrong verdict may arise either out of an erroneous view of the facts, or out of erroneous inferences or conclusions drawn from facts admitted by the jury to be proved; it also occasionally arises out of the jury totally disregarding the Judge's statement of the law applicable to the facts which the jury may find to be proved. When a juror returns a verdict which the Judge considers to be erroneous, the latter, unless he is empowered to question the jury, has no means of knowing whether the jury differ from him on the facts, or on the inferences to be drawn from them, or as to the law applicable to them; and there is no doubt, the Chief Commissioner thinks, that a Judge often refrains from referring to the High Court cases in which he differs from the verdict of the jury because of his uncertainty as to the view which the jury has taken of the evidence adduced by the prosecution. Mr. Ward can certainly say that, had he been in a position to remove this uncertainty, he would have troubled the High Court with many more references than he actually did during his term of service as a District Judge. Ordinarily he would have hesitated to refer any case in which the jury had unanimously come to the conclusion that the witnesses for the prosecution were not worthy of credit, because he is of opinion that the average native juryman can better estimate the degree of credibility to be attached to the evidence of native witnesses than a European Judge can. If, on the other hand, Mr. Ward had been in a position to report to the High Court that the jury had agreed with him in thinking that the facts, which the prosecution had undertaken to prove, had been proved, and that the witnesses for the prosecution were deserving of full credit, but that the jury had declined to act upon his charge to them that they must draw certain reasonable inferences from those facts and apply the law to them as stated in his charge and upon those inferences and his statement of the law find the accused guilty, the case would have been very different and a reference to the High Court would certainly have been made. References so made would, the Chief Commissioner thinks, result in a far larger percentage of referred verdicts being set aside by the High Court than are shown in the report of the Commission to have been actually set aside in past years; for so long as the High Court has no means of knowing what view the jury has taken as to the credibility of the evidence given in a case, the Court will naturally hesitate to set aside any verdict which is not shown on the record to be a manifestly perverse verdict; but where all doubt is removed on this point and the Court finds that both Judge and jury are agreed upon one or more issues of fact and differ only as to the conclusions which should be drawn from them or as to the law applicable to them, all ground for hesitation in deciding whether the verdict is erroneous or otherwise is at once removed.

It is this reluctance on the part of Judges to refer cases to the High Court and the reluctance of the High Court to set aside jury verdicts unless they are shown to be manifestly perverse that, in the opinion of the Chief Commissioner, renders the statistics of references, and of orders passed by the High Court on such references, of very little value for the purpose of determining whether the jury system in any part of India has proved successful or otherwise. This reluctance will not be removed by amending section 303 to the limited extent proposed by

the Jury Commission, but, Mr. Ward thinks, it will to a very great extent be removed by adopting the amendment proposed by the Government of India in paragraph 3 of the Home Department letter under reply.

In paragraphs 20 and 22 of the report of the Jury Commission it is assumed that when a Judge does not refer a case in which he differs from a verdict, this is due to the Judge's dissent not being complete. Mr. Ward's own experience does not support such an assumption. The reluctance of the High Court of Calcutta to set aside jury verdicts where the case against the accused depends entirely upon the degree of credibility to be attached to the witnesses for the prosecution is, the Chief Commissioner ventures to think, sufficiently well known to every District Judge in Bengal, and is quite sufficient to explain why a Judge hesitates to refer such cases even where his dissent from a verdict is complete. It necessarily follows that in cases in which the evidence for the prosecution is mainly circumstantial, a Judge will hesitate to make a reference to the High Court when he is not in a position to show the Court that the verdict was not in any way due to the jury having discredited the witnesses for the prosecution.

It is for these reasons that the Chief Commissioner strongly advocates the amendment of section 303 in the direction indicated by the Government of India. That section, as it stands, is altogether insufficient to enable the Judge to question the jury in order to ascertain the grounds of their verdict. It only allows of questions being put to ascertain what their verdict actually is. Improper cross-examinations of a jury by the Judge can be easily checked by the High Court, who would see that the amended section is not abused. If considered necessary, one or more examples might be attached to the amended section, indicating the kind of questions which should not be put to a jury. Thus, a Judge should, in the Chief Commissioner's opinion, certainly not be allowed to ask a juryman what witnesses he believed and what witnesses he did not believe, or on what grounds he discredited any particular witness or the evidence for the prosecution generally.

* * * * * *

Extract, paragraph 3, from a letter from the Registrar, High Court of Judicature at Fort William in Bengal, Appellate Side, to the Secretary to the Government of India, Home Department,—No. 2554, dated the 18th July 1893.

* * * * * *

3. As regards the proposal that section 303 of the Code should be amended so as to empower a Sessions Judge to require a special verdict on particular issues of fact, I am to say that the Judges agree with the Commission in the view expressed in paragraphs 32 and 33 of the report and do not recommend any change in the law, believing as they do that such a change would be followed by practical difficulties of an embarrassing and far-reaching nature. It would, for example, furnish an additional ground for appeal from a conviction on the verdict of a jury, either that particular issues were not framed when they ought to have been framed, or, if framed, that they were improperly put or misunderstood by the jury. Either argument might no doubt in some cases be legitimate and reasonable; but there would be a danger of its being abused, and this might lead to results which would not be in the interests of the administration of justice. Such difficulties as the proposed alteration might cause in the hearing of appeals would, in the opinion of the High Court, far more than counterbalance any benefit likely to arise therefrom in a case such as that mentioned in your letter, in which, if the Judge entertained any doubt as to the verdict on the charge of theft, he ought to have told the jury that it was their duty to convict on the charge of dishonestly receiving stolen property in the event of their believing the evidence adduced in proof of that offence only. The occurrence of such a case, moreover, would not, in the opinion of this Court, justify so radical and dangerous a change in the law.

* * * * * *

Extract, paragraphs 3 to 6, from a Despatch from the Government of India, to Her Majesty's Secretary of State for India,—No. 37 (Judicial), dated the 21st August 1894.

* * * * * *

3. It will be convenient to discuss first the proposals (2) and (3), mentioned above, with reference to the replies received. The question in (2)—as to whether power should be given to Sessions Judges to put specific issues of fact before the jury—appears to us to have been discussed by many of those who have given their opinion upon it under the impression that the power to require a verdict on specific issues of fact would, if granted, allow an indefinite and extended cross-examination of the jury, who might be questioned as to their reasons for arriving at their verdict, and as to their belief in the evidence of any particular witness. We do not dispute that if powers of this nature were given to a Judge there would be a possibility of abuse. But our proposal to amend section 303 of the Criminal Procedure Code does not contemplate anything in the nature of the cross-examination of a jury, and we desire to express our concurrence in the view of the Bombay Government (*vide* paragraph 4 of their letter No. 5946,* dated the 23rd September 1893) that if the particular issue of fact, on which a special verdict is desired, is carefully reduced to writing with a close regard to the definition of the offence charged, there is no danger of the jurors becoming confused.

* No. 8 in the list of enclosures to this Despatch.

4. In civil cases in India the functions of the jury and the Judge are combined in the presiding officer. The law† requires that officer, before he proceeds to a decision, to frame issues which set forth the conditions necessary to the establishment of the claim, and to record a separate finding on each issue. At present no such obligation is imposed in criminal cases. But in many criminal trials the questions regarding the offence committed are quite as complicated as they are in suits respecting a civil claim. The Code of Criminal Procedure (section 297) requires the Judge "to lay down the law by which the jury are to be guided," but great difficulty is often experienced by Sessions Judges in bringing the minds of the jury in contact with the various essential considerations on which in difficult cases depends a proper verdict as to the exact offence committed. In these circumstances it would, in our opinion, not only be a great assistance to the Judge, but also a great assistance to the jury themselves in arriving at a decision, if, as the Bombay Government suggest, the Judge were to cause the material issues upon which a finding is required to be laid before the jury and were to require them to give a separate verdict upon each issue.

† Civil Procedure Code, section 146.

5. We are, therefore, of opinion that the Judge should be allowed to require from the jury separate findings on any questions of fact which he may think material. The statement of these issues will in itself be calculated to assist the jury. Whether this can be more suitably done before the jury have delivered their general verdict or afterwards, is a matter which we are disposed to leave to the Select Committee if a Bill is introduced; but, as at present advised, we think that it can be more suitably done before the general verdict is given as a general rule, though in particular cases and to clear up doubtful points it might doubtless be usefully done afterwards. It is, however, to be noticed that if after a jury have returned a general verdict they are required to bring in separate findings on subordinate points, there will be some difficulty in avoiding at least the appearance of cross-examination. We think that an amendment of section 303 could be drafted without difficulty, which would, on the one hand, admit questions on particular issues of fact material to a charge, and, on the other, exclude questions relating to the reasons for a decision or the credibility of particular evidence.

6. There is a very large consensus of opinion among the authorities consulted in favour of the general course which we recommend. It is supported by the Governments of Madras and Bombay, by most of the officers consulted in Bengal, by the High Court of the North-Western Provinces, and by the Lieutenant-Governor of the North-Western Provinces and Oudh. On the other hand, the

members of the Jury Commission and the Judges of the Calcutta and Bombay High Courts are opposed to our proposal. We have given full consideration to the opinions expressed by these authorities, but we are unable to agree that the views which they put forward should be allowed to prevail. The Jury Commission, while reluctantly concluding that the proposed procedure would be liable to create greater evils than it would remedy, did not state the nature of the evils which they apprehended. The objection of the Judges of the Bombay High Court is, it appears to us, based upon a misapprehension of the proposed amendment which has led them to surmise that the jurors will virtually be called upon to give their reasons for their conclusion. It seems to us, however, that any possible danger of this nature could be obviated by such an amendment as is suggested in the last foregoing paragraph.

The Judges of the Calcutta High Court seem to have treated together the two proposals discussed in paragraphs 32 and 33 of the report of the Commission; but, as we have already pointed out, these two proposals are entirely distinct. The Honourable Court think that to allow the Judge to state issues of fact for the finding of the jury "would furnish an additional ground for appeal from a conviction on the verdict of a jury" on the basis, substantially, of misdirection by the Judge. We are, however, disposed to conclude that, on the contrary, appeals on the ground of misdirection by the Judge would be likely to become rarer than at present, if it were the practice for Judges to break up a complicated charge into its elements, and to ask the jury to come to a decision upon each of them separately. It would also, we think, be always evident if the issues were stated and separate findings taken upon them, whether an erroneous direction by the Judge had had any influence on the general verdict.

* * * * * *

Extract from paragraph 1 from a Despatch from Her Majesty's Secretary of State for India, to the Government of India, No. 3 (Judicial), dated the 31st January 1895.

I have considered in Council Your Government's letter No. 37, dated the 21st August 1894, in which you discussed the several amendments of the law which had been proposed in reference to the system of trial by jury in India. I accept generally the conclusions at which Your Excellency in Council has arrived. * * * * * *

J. P. HEWETT,

Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the Week ending at 8 a.m. on Saturday, September 28th, 1895.

During the whole of the week under review meteorological conditions throughout the Indian area have been very quiet. During the first three days pressure was highest in the south-west of the Peninsula, and lowest in the west of the Punjab, and slight or moderate barometric gradients prevailed. On the 25th a change in the distribution commenced. On this day a large shallow depression appeared over the Bay area, and barometric readings became more uniform over the Peninsula and Western India generally, while the winds became very variable and light. These conditions continued until the close of the week, and the only change of importance in the distribution was the gradual intensification of the low pressure area over the Bay. There has been practically no general rain during the week, but the weather has been showery over the Peninsula and North-Eastern India. On several occasions the showers were of considerable amount. These showers have helped to keep temperature down, so that, though on the whole excessive on each day of the week, the mean temperature has been less high than might have been anticipated from the generally scattered character of the rainfall.

Daily Summary.—*Sunday, 22nd September 1895.*—Pressure had decreased briskly over Bengal and Bihar, and changed little elsewhere. Readings were high in the west of the Peninsula, and low in the West Punjab and in Bihar. The winds were variable on the West Coast, and generally westerly in other places. The mean temperature was low over the extreme north-west of India and over the north of the Gangetic plain. Showery weather prevailed over North-Eastern India, and fine weather elsewhere.

Monday.—The pressure changes had been small and irregular generally, and readings ranged, as on the preceding day, from a high pressure area in the south to low pressure areas over the Punjab and over North Bihar. The winds were slightly cyclonic over North-Western India and between north and west in other parts of the country. The mean temperature was low over the Peninsula and over the Indus Valley. A few scattered showers were reported from North-Eastern India, and more general showers from the head of the Peninsula and the central parts of the country.

Tuesday.—Pressure had fallen almost everywhere, but the changes were again slight in most places. Readings remained highest in the extreme south-west, and were lowest over the Gangetic plain. Gradients were moderate. The wind blew generally from between north and west. The mean temperature was low in South Madras, in the north of the Gangetic plain, and in the Indus Valley. The rainfall distribution was the same as on the preceding day.

Wednesday.—Pressure had increased over the northern and decreased over the southern part of the Indian area, but the changes were again slight. Readings were still high over the west of the Peninsula, and low over the Punjab, but they were more uniform than of late, and a large area of low pressure was developing over the Bay. The winds generally blew from between north and west, but around the Bay they showed a slight tendency to cyclonic circulation. The mean temperature was low over Madras, the north of the Bombay Presidency, and the Indus Valley. Showers had occurred over Burma and the Peninsula.

Thursday.—The barometer continued to rise in the north and to fall in the south. The increase had been brisk over Bihar, North Bengal, and Assam, and the decrease brisk in Bombay. The low pressure area over the Bay was better defined, and moderate gradients were appearing on its eastern and southern sides, but elsewhere pressure was very uniform. The winds were cyclonic around the Bay, and northerly or variable elsewhere. The mean temperature was in defect in the extreme north and extreme north-east of India, and in Madras. Showers had again been received in Burma, Assam, and the Peninsula.

Friday.—The barometer had risen over the Gangetic plain, and fallen elsewhere. The fall was brisk over part of the Peninsula. Conditions over the Bay were practically unchanged, but pressure was becoming higher over Northern India. Northerly winds were reported over Bombay, and variable breezes elsewhere. The mean temperature was very generally excessive. Showers of rain continued to be received over Burma and the Peninsula.

Saturday.—The barometer had risen slightly over Assam, and the head of the Bay, but had continued to decrease elsewhere. The depression over the Bay had become deeper, but, except in its neighbourhood, readings were very uniform. The winds were irregularly cyclonic around the Bay, and the force was rising at Diamond Island. Calms were reported from several parts of India. The mean temperature was low in Madras—more particularly in Ganjam. Showers were reported from Burma, Assam, Bengal, the Peninsula, and the North-Western Himalayas.

Temperature.—The rainfall has been most general in the Peninsula, and the mean temperature has hence been relatively low in that region; but it is remarkable that in the extreme north-west of India, *viz.*, Sind, Rajputana, and the west of the Punjab, the weather was relatively cool, both as compared with the normal and as compared with surrounding regions. The greatest excess of heat was reported from North-Eastern and Central India. These regions ordinarily receive fairly heavy rain during the week under review, and the light rainfall of the present week was hence accompanied with a decided increase of heat. The following table gives the variations of the mean temperature from the normal in the different provinces of India for each day of the week:

Province.	September 1895.							Mean variation of week.
	22nd	23rd	24th	25th	26th	27th	28th	
	°	°	°	°	°	°	°	°
Burma	+1·6	+2·5	+2·2	+1·2	+1·8	+1·2	+0·8	+1·6
Bengal and Assam	+1·2	+1·5	+2·3	+2·6	+2·6	+3·1	+2·3	+2·2
North-Western Provinces and Oudh	—0·3	+0·3	—0·5	—0·2	+0·7	+0·9	+0·8	+0·2
Punjab	—0·1	—0·5	+0·2	+1·4	+0·9	+1·0	+1·8	+0·7
Bombay	+0·9	+0·5	+0·5	—0·1	+1·1	+1·3	+0·9	+0·7
Central Provinces and Berar	+1·9	+1·5	+1·6	+1·3	+2·0	+1·7	+1·4	+1·6
Central India and Gujarat	+1·7	+1·7	+0·9	+0·6	+1·4	+1·5	+2·0	+1·4
Sind and Rajputana	—0·8	—0·1	+0·4	+0·5	—0·4	—0·3	—0·3	—0·1
Madras	—0·3	—2·1	—0·3	—0·8	+0·1	+0·5	—0·9	—0·5
Mean for whole of India	+0·6	+0·6	+0·8	+0·7	+1·1	+1·2	+1·0	+0·9

The mean temperature of the whole country was, relatively to the normal, the same as during the preceding week, and each day's general temperature exhibited a slight excess compared with the normal. The provincial variations showed a normal temperature over the North-Western Provinces, the Punjab, Bombay, Sind, Rajputana, and Madras, and an excess elsewhere.

The following were the highest temperatures recorded on each day:

On September	22nd	the highest maximum was	104·4°	at	Jacobabad.
„	23rd	„	104·6°	„	Sirsa.
„	24th	„	104·1°	„	Dera Ismail Khan.
„	25th	„	103·6°	„	Sirsa.
„	26th	„	102·9°	„	Montgomery.
„	27th	„	103·4°	„	Multan.
„	28th	„	105·4°	„	Jacobabad.

The hottest region in India throughout the week was thus the south and west of the Punjab and Upper Sind.

Rain.—As mentioned in the earlier sections, there has been no definite disturbance within the Indian area during the week under review, but the weather has been feebly unsettled over North-Eastern India and over the Peninsula,

and showers giving more or less rain have occurred over those two regions. The most generally showery day was Sunday, the 22nd. The large shallow low pressure area over the Bay induced a cyclonic circulation of the winds around the Bay area, which affected the whole of the east of the Peninsula. At the same time southerly and south-westerly winds were blowing over the centre of the Peninsula. The result was much confusion in the air currents over this region, and much electrical disturbance. The table at the close of the summary gives the rainfall data of the week.

The first column shows that in the case of nine divisions no rainfall whatever was received during the week, and that in the case of eight more divisions the average rainfall per division for the week was less than one-tenth of an inch. In the remaining thirty-four divisions effective rainfall was received, which varied in amount from an average of 3·50 inches in Arakan, 3·19 inches in Madras (South-Central), and 2·85 inches in the East Coast (South) to 0·15 inch in Bihar (South). The third column of the table shows the differences between the actual and normal rainfall of the week. Of the fifty-two divisions thirty-seven record a deficiency, and only thirteen an excess, while in Sind there was no rain received or anticipated, and in Upper Burma there are no figures available for comparison. The regions which reported an excess included the following divisions, *viz.*, Tenasserim, Central Burma, Mysore, the Bombay Deccan, Berar, Rajputana (West), the East Coast (North and North (*a*)), Hyderabad (South), Madras (Central, South, and South-Central), and the East Coast (South). In all other parts of India the rainfall was in defect. The greatest excess both absolutely and relatively was over the south of the Peninsula, where Madras (South-Central) had an excess of 1·92 inches, the East Coast (South) of 1·54 inches, Madras (Central) of 1·41 inches, and Mysore of 1·25 inches. The greatest deficiency of rainfall was in Bengal and Assam, North Bengal reporting a deficiency of 3·13 inches, Assam (Surma) of 2·74 inches, and Bihar (North) of 2·16 inches.

In Upper Burma, as in the two preceding weeks, fairly heavy general rain had been received, and it is probable that the average fall for the district for the week at least equalled the normal amount. The returns of the sudder stations show that, as stated above, there was no period of general rainfall, but that the fall occurred as scattered showers on different days throughout the week.

The three concluding columns of the table exhibit the state of the seasonal rainfall, *i.e.*, the total average actual and total average normal rainfall from the 2nd of June to date. In the great majority of cases the rainfall has been less than usual, but in most of these cases the departure from the average has been small, that is, less than 20 per cent. The instances in which this variation has been equalled or exceeded are—Arakan, East, Deltaic, and Central Bengal, the Punjab (South, Central, and Submontane), Coorg, Berar, Gujarat, Kathiawar and Rajputana (East), and Central India (West). The greatest deficiencies relatively to the normal are in Deltaic Bengal, where only 29·43 inches has been received instead of the normal 43·17 inches, and in Rajputana (East) and Central India (West), where the amounts are 16·17 inches and 25·16 inches, respectively. The cases in which the seasonal excess has equalled or exceeded the variation of 20 per cent. are all reported from the Peninsula, and are as follows:—the Bombay Deccan, the East Coast (North), Hyderabad (South), and the East Coast (Central).

The following are the more important totals recorded during the week:—*Yandoon* (Maubin) 5·96 inches, Okpo (Henzada) 5·76 inches, Minbya (Akyab) 5·19 inches, Madhipura (Bhagalpur) 4·60 inches, Omalur (Salem) 9·85 inches, Devala (Nilgiris) 8·41 inches, Khanapur (Satara) 7·04 inches, Chalisgaon (Khandesh) 5·60 inches Ashta (Bhopal) 5·73 inches, Bukkapatnam (Anantapur) 6·65 inches, Tirukkoyilúr (South Arcot) 6·76 inches.

W. L. DALLAS,
Asst. Meteorological Reporter to the Government of India.

SIMLA, *3rd October 1895.*

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 28th September.*—Rainfall good in the Deccan, Central districts, and parts of the Carnatic; fair rain elsewhere, except in Tinnevelly. Ploughing and sowing are in active progress. The standing crops are generally fair, and are improving after the recent rains; but are withering in Tinnevelly. Want of rain is felt also in parts of Madura and Salem. The harvest is progressing with generally moderate yield. Pasture and fodder are sufficient. Cattle are in good condition. Prices are generally falling or stationary.

Bombay.—*For week ending 2nd October.*—Good rain throughout the Deccan and Karnatak; slight in the Konkan, two talukas of Gujarat, and parts of Kathiawar. More rain is wanted for the standing crops in Gujarat and Kathiawar generally, and in parts of Thana, Nasik, Poona, Dharwar, and Kanara. The crops are poor in parts of Sind, withering in parts of Ahmedabad and Kanara, and damaged by excessive rain in parts of Ahmednagar. Harvesting of the early crops is progressing in seven, and sowing of the late crops in twelve, districts. Fodder is scarce in parts of Shikarpur, Thar, and Parkar, and insufficient in Ahmedabad. Agricultural stock in good condition, except in parts of Baroda territory. Prices are generally normal.

Bengal.—*For week ending 30th September.*—In the Bihar districts, in Cuttack, and in the Burdwan division there was practically no rain during the week; in other districts the rainfall was usually light, except in the Murshidabad and Chittagong districts, where fairly heavy rain fell. Prospects of the winter rice crop continue generally good, except in parts of the Burdwan and Presidency divisions. The autumn crops in Bihar and the early rice and jute are still being harvested in some districts. Preparation of lands for the spring crops is in progress. The price of common rice continues almost stationary.

North-Western Provinces and Oudh.—*For week ending 2nd October.*—Heavy rain has fallen in Garhwal and showers in Benares; elsewhere the weather has been clear. Rain is needed in some of the Central districts. Harvesting of the autumn crops has commenced. The outturn is favourable, except in a part of Aligarh, where the crops have suffered for want of rain. Preparations for the spring sowings continue. Prospects on the whole are good. Supplies are sufficient. Prices are fluctuating.

Punjab.—*For week ending 2nd October.*—No rain. Irrigation of the autumn crops and picking of cotton are in progress. Harvesting has commenced in Umballa and Sialkot. Ploughings for, and sowings of, the spring crops are going on, but rain is needed in Hissar, Lahore, and Shahpur. The condition of the standing crops is generally reported good to poor. The crops have mostly dried up in

Hissar, and their prospects are getting worse in Delhi. Cattle are generally in good condition, and fodder is sufficient in all districts, except Hissar, Delhi, Jullundur, and Lahore. Prices are rising in Hissar and Jullundur, falling in Umballa, normal in Delhi and Ferozepore, below normal in Sialkot, and low elsewhere.

Central Provinces.—*For week ending 2nd October.*—The weather continues clear and warm with slight falls of rain. More rain is very much needed for the rice crops which are suffering. Prospects of other autumn crops continue favourable, and winter sowings are in progress in several districts. Prices are stationary.

Burma.—*For week ending 28th September.*—Report not received.

Assam.—*For week ending 1st October.*—The weather is unsettled. Harvesting of the early and transplanting of the late rice are nearly finished. Prospects of tea are fair. The condition of cattle is good. Fodder is scarce in Kamrup and Darrang. Water is sufficient.

Mysore and Coorg.—*For week ending 2nd October.*—MYSORE: Good rain throughout the State, except in Kadur, Shimoga, and parts of Chitaldroog. The standing crops are in good condition. Prices have fallen in Chitaldroog, but have risen slightly in Bangalore.

COORG: Rainfall good. The rice and coffee crops are in good condition. Reaping of *ragi* (*Eleusine coracana*) has commenced. Picking of cardamoms continues. Water and fodder for cattle are sufficient. Prices are normal.

Berar and Hyderabad.—*For week ending 2nd October.*—BERAR: Weather hot with moderate rainfall during the week. The crops are in good condition. Breaking up of the land for the ensuing winter crops continues. Fodder and water are insufficient in the Khamgaon taluka. Prices are almost stationary.

HYDERABAD:—Rainfall good. The autumn crops are thriving. Sowing of the spring crops is in progress in one district, and the fields are being prepared in others. Slight fall in prices.

Central India.—*For week ending 2nd October.*—Rainfall moderate in parts. More rain is required in Gwalior, Bundelkhand, and Baghelkhand. Agricultural operations are in progress in all Agencies. The rice crops have been slightly damaged in Bhopal and in districts of Bundelkhand and Gwalior for want of rain. Agricultural stock and pasturage are in good condition in all parts, except in some districts of Gwalior. Prices of food-grains are high in Goona, have fallen slightly in Bhopal, are rising in part of Gwalior, and are normal elsewhere.

Rajputana.—*For week ending 2nd October.*—Rainfall moderate in nine States; the falls were better in the Merwara district, Jeypore, Karauli, and

Ulwar. Agricultural operations are satisfactory. The standing crops are good, but the unirrigated crops are suffering in Merwara, Jeypore, and Ulwar for want of rain. Prospects are generally fair, except in Bhurtpore. Agricultural stock are in good condition. Pasturage and fodder are generally sufficient, but are failing in Dholepore and Bhurtpore. Prices are rising in four States, fluctuating in two others, and steady elsewhere.

Kashmir.—KASHMIR VALLEY.—*For week ending 1st October.*—Rainfall moderate. The maize crops are being harvested. Sowing for the spring crops has commenced. Prices continue above the normal.

JAMMU PROVINCE.—*For week ending 2nd October.*—The crops are suffering for want of rain. Indian-corn is being reaped. Fodder is sufficient. Prices are normal.

Nepal.—*For week ending 28th September.*—Weather fine. Prospects are good. Harvesting of the rice crop continues.

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

No. $\frac{27}{59-2}$.

Extract from the Proceedings of the Government of India in the Department of Revenue and Agriculture (Meteorology),—dated the 30th September, 1895.

Read—

Letter from the Meteorological Reporter to the Government of India, No. 4710, dated the 31st August 1895, submitting the annual Report on the Administration of the Meteorological Department for the year 1894-95.

RESOLUTION.

The number of observatories maintained by the Government of India under the control of the Meteorological Department during the year 1894-95 was 176 against 177 in 1893-94. The observatory at the Port Office, Madras, was closed as it was no longer required, and that at Kodaikanal was also temporarily closed pending the establishment of the new Solar Physics Observatory at that station; while a new second class observatory was established at Patiala by the State Authorities.

2. Observatory sheds were erected at Astor and Minimarg on the Srinagar-Gilgit road; the voluntary observatory at Kalimpong, which was in abeyance during 1892-93, was reopened; and at the instance of the Political Officer in Sikkim a voluntary observatory was started at Yatung in Tibet. It is hoped that records from these high altitudes will furnish new information of value.

The observations received from the Seychelles Islands proved interesting and valuable, and are throwing much light on the changes leading up to the establishment of the South-West Monsoon in India. The observatory has now been made permanent; and it is hoped that next year a daily weather telegram will be received from these islands from April to June.

A complete set of meteorological instruments was supplied during the year to Mr. Churchill, British Consul, Resht, Persia, for the purpose of recording meteorological observations at that station on the Caspian Sea. Observations from stations in Northern Persia are of much value in estimating the character of the cold weather disturbances and storms in that area, many of which pass eastwards and affect the weather of the winter months in Northern India.

3. During the winter of 1894-95 the same methods were employed as in the two previous years, to obtain as full and accurate information as possible of the amount, distribution and time of occurrence of the snowfall in the Himalayas and Afghan Mountain areas. Much interesting and valuable information was received on the subject, and the Government of India are indebted to the reporters for their assistance.

4. More observatories were inspected during the past year than in the previous four years, and the work of inspection was made selective rather than general. The system elaborated by Mr. Eliot for the detection of inaccurate observations worked successfully; with the result that the general standard of accuracy was improved.

5. The actinometric work done was less than usual, owing to the abnormally large amount of cloud during the cold weather months. It is noticed with regret that the Solar Physics Committee in London has expressed no opinion on the value of these observations nor offered any suggestions for their improvement.

6. It is satisfactory to learn that the remarks made last year by the Government of India on the necessity for the regular inspection of rain-gauges have received attention, and that a larger number of inspection reports were received from local officers. It is hoped that this improvement may continue, and that eventually every rain-gauge may be inspected at least once a year.

7. The collection of data for Marine Meteorology from ships entering Indian ports was extended and perfected, and has proved of great value. The daily weather reports and charts of the whole Indian Monsoon area were found to be so valuable, not only to the Indian Meteorologist and the shipping interest, but also to meteorologists in Europe and America, that the Government of India have sanctioned their continued publication for a further period of four years.

8. The system of storm and flood warnings was continued and extended, and the number of special warning messages sent out by the Simla Office during the year was 647 compared with 374 in the previous year. This is one of the most useful and important tasks, from a practical point of view with which the Meteorological Department is charged.

9. Meteorological observations in Forests continued to be regularly taken in order to throw light on the influence of forest growth upon Meteorological conditions. It will be well to observe the result of the improved methods of taking these observations over a sufficiently long period, before deciding upon the advisability of their continuance or otherwise.

10. The tabulation of the Trevandrum Observations, recorded during the period 1853-64 under the directorship of the late J. Allan Broun, Esq., was completed, and the greater part of the 1st volume has been printed and issued. The second volume will shortly be ready for distribution.

11. The Meteorological Department received valuable assistance in its work during the year from the Survey, Telegraph, and Postal Departments and from the Eastern Telegraph Company. The thanks of the Government of India are again due to Mr. Eliot, to his assistants, and to the provincial reporters for the excellent work done, and also to the many gentlemen unconnected with the Department who have rendered it valuable assistance.

ORDER.—Ordered, that the foregoing Resolution be forwarded to the several Departments of the Government of India, to Local Governments and Administrations, to the Surgeon General with the Government of India, to the Surveyor General of India, and the Meteorological Reporter to the Government of India.

Ordered also, that it be published in the Supplement to the *Gazette of India*.

[True Extract.]

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

(*a*) Includes the Bhopal-Itársi railway.
(*b*) Includes the Godhra-Rutlam railway.
(*c*) Includes the Guntakal Mysore frontier section.
(*d*) Includes the Tirhoot state railway. Although for convenience classed amongst state railways, the company's section of this line is the property of the Bengal and North-Western Railway Company.
(*e*) Includes the Jammu and Kashmir, and the Hyderabad-Shadipalli railways.
(*f*) Although for convenience classed amongst state railways, this line is the property of the Bengal Central Railway Company.
(*g*) Includes the Wardha Coal, Dhond-Manmád, Khámgaon, and Amráoti railways.
(*h*) Includes the Mysore-Nanjangúd and the Yesvantpur-Mysore frontier sections.
(*i*) The line is being worked by the Bombay, Baroda and Central India Railway Company, as a temporary measure.

F. B. HEBBERT.
Under Secretary.

(*a*) Includes the Bhopal-Itársi railway.
(*b*) Includes the Godhra-Rutlam railway.
(*c*) Total earnings from 2nd April to 22nd September 1894.
(*d*) Includes the Guntakal-Mysore frontier section.
(*e*) Includes the Tirhoot state railway. Although for convenience classed amongst state railways, the company's section of this line is the property of the Bengal and North-Western Railway Company.
(*f*) Total earnings from 1st July to 21st September 1895.
(*g*) Includes the Jammu and Kashmir, and the Hyderabad-Shadipalli railways.
(*h*) Although for convenience classed amongst state railways, this line is the property of the Bengal Central Railway Company.
(*i*) Includes the Wardha Coal, Dhond-Manmád, Khámgaon, and Amráoti railways.
(*j*) Total earnings from 1st May to 21st September 1895.
(*k*) Total earnings from 1st July to 22nd September 1894.
(*l*) Includes the Mysore-Nanjangúd and the Yesvantpur-Mysore frontier sections
(*m*) This line is being worked by the Bombay, Baroda and Central India Railway Company as a temporary measure.
(*n*) Total earnings from 1st August to 21st September 1895.

F. B. HEBBERT,
Under Secretary.

SIMLA, *the 3rd October 1895.*

Printed and published for the GOVERNMENT OF INDIA *at the* GOVERNMENT CENTRAL PRINTING OFFICE, *Simla.*

SUPPLEMENT TO

The Gazette of India.

No. 41.} CALCUTTA, SATURDAY, OCTOBER 12, 1895.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

FINANCE AND COMMERCE DEPARTMENT.

RETAIL PRICES FOR THE 2nd HALF OF AUGUST 1895.

QUANTITIES PER RUPEE IN SERS OF 80 TOLAS.

Districts.	Wheat.		Barley.		Rice, best sort.		Rice, common.		Jawar or cholum (*Sorghum vulgare*).		Bajra or cumbu (*Penicillaria spicata*).		Marua or ragi (*Eleusine coracana*). Weather Review of India for the Week ending at 8 a.m. on Saturday, 5th October 1895.

The only important feature in the meteorology of the week under review has been the important cyclonic storm which formed over the east of the Bay apparently on Sunday, the 29th, and travelled along a curved course up to the head of the Bay, and thence through Lower Bengal, north-eastward to Assam. The storm was a deep one if we accept the very doubtful barometric reading reported from Barisal on the morning of October 2nd. This reading showed that pressure at the centre of the storm was as low as 28·868 inches, or 0·925 inch below the normal average. The storm was accompanied with some heavy falls of rain, but, on the whole, the accompanying precipitation was less than might have been anticipated. In those parts of India which lay at a distance from the storm area, as well as in all parts of India, after the disappearance of the storm the general weather was fine or only slightly showery. This showeryness was most marked over the south of the Peninsula and Lower Burma during the early days of the week, and was least marked over North-Western India, where only a very few scattered showers were received. The mean temperature was generally excessive over India during the early part of the week, but the rainfall accompanying the storm reduced temperature quickly in Bengal on the 2nd and 3rd, and after the disappearance of the cyclonic storm, temperature conditions apparently changed, so that, though there was practically no rain, the general temperature on the 5th fell below the normal.

Daily Summary.—*Sunday, 29th September.*—Pressure had increased briskly to rapidly over Lower Burma, and briskly in North Bengal, but elsewhere the changes were small. The wind had suddenly shifted to south-east, and risen in force at Diamond Island, and a centre of depression had been developed over the east of the Bay. The winds were cyclonic around the Bay, and were very variable elsewhere with calms in many places. The mean temperature was excessive in all provinces, except Madras, where it was in slight defect. Rain had fallen over the south and east of the Peninsula, North Bengal, and parts of Burma. The showers were locally heavy in some places.

Monday.—Pressure had increased throughout the whole of the Indian area. The rise was brisk to rapid over Burma, and brisk over the Carnatic and in North-Western India, while it was least on the Orissa and Ganjam Coasts. Pressure was lowest over the Bay, highest over Tenasserim, and relatively uniform over India. There were no definite indications of the existence of the storm over the Bay. The wind, however, remained cyclonic around the Bay, and the force at Diamond Island, where the wind had veered to south, was fresh. The force was also freshening at Saugor Island. The mean temperature was in moderate defect in Madras, in slight defect in Burma, and normal in Bengal, while it was slightly to moderately excessive in the other provinces. Rain was falling over the south of the Peninsula, over Bengal, and over Lower Burma. The amounts received were large in Lower Burma, and locally considerable at two or three stations in the Peninsula.

Tuesday.—Pressure had increased over Lower Burma and the Peninsula, and decreased elsewhere. The fall was very rapid over Orissa, and brisk to rapid over the whole of Bengal. The depression which had been advancing up the Bay had struck the coast near False Point, where pressure was 0·342 inch below the normal. Cyclonic winds were blowing over the north of the Bay, the force being strong to a gale near the storm centre. In most other parts of India the winds were variable, but there was a fairly well defined easterly current up the north side of the Gangetic plain. The mean temperature was in moderate defect in Burma, in slight defect in Madras, normal in Bengal, and in excess elsewhere.

Heavy rain had been received around the north of the Bay, and moderate rain in the south of the Peninsula and in Lower Burma.

Wednesday.—Pressure had risen in Orissa and Ganjam, and fallen almost everywhere else. The storm had advanced north-eastward, and the centre lay over East Bengal. According to the Barisal report, the barometer had fallen 0·925 inch to 28·868 inches at that station, and the centre was between Barisal and Jessore. Strong cyclonic gales prevailed over Bengal, and the winds over the eastern half of India were largely influenced by the storm. Southerly winds prevailed along the west coast of India, and westerly or variable winds elsewhere. The mean temperature was in considerable defect over Bengal, normal in Burma and Madras, and excessive in the other provinces. Rain had fallen over Burma and Bengal, and there were a few scattered showers in other parts of the country. Barisal had received nearly 5 inches.

Thursday.—The barometer had risen briskly to very rapidly over Lower Bengal, and had fallen elsewhere. The storm had continued to move north-eastward, and had disappeared up the Assam Valley. Westerly and south-westerly winds prevailed over the greater part of the country. The mean temperature still exceeded the normal average over the more central parts of the country, but was below the normal elsewhere. Rain had almost ceased throughout India, only a few scattered showers being reported.

Friday.—Pressure had increased, except at Trivandrum and Colombo. The rise was brisk to rapid over Northern India, and readings, though lower in the north than in the south, were more uniform than on the preceding day. The winds were southerly or variable on both coasts of the Peninsula, and were westerly to south-westerly in most other places. The distribution of the mean temperature was the same as on the preceding day, but the excess over the central districts was much slighter. There was slightly more rain over the Peninsula, but elsewhere there was practically no rain.

Saturday.—Pressure had fallen over Lower Burma and risen elsewhere. The rise was again greater in the north than in the south, and readings were hence more uniform. Readings were highest over Bombay; lowest over Bihar. Winds were variable. The mean temperature was normal, or below the normal, except in Bengal, where there was a trifling excess. A few scattered showers of rain were reported.

Temperature.—The following table gives the variations of the mean temperature from the normal in the different provinces of India for each day of the week:

Province.	September 1895.		October 1895.					Mean variation of week.
	29th	30th	1st	2nd	3rd	4th	5th	
	°	°	°	°	°	°	°	°
Burma	+1·3	—1·1	—3·0	—0·3	—1·3	—1·3	—0·9	—0·9
Bengal and Assam	+0·8	—0·5	+0·1	—3·5	—2·5	+0·7	+1·1	—0·5
North-Western Provinces and Oudh	+1·4	+2·6	+2·5	+1·9	+1·9	+0·9	—0·2	+1·6
Punjab	+1·3	+2·7	+4·1	+2·2	—0·1	—0·7	—0·6	+1·3
Bombay	+1·6	+1·8	+1·1	+1·1	+1·3	+0·3	+0·1	+1·0
Central Provinces and Berar	+2·0	+1·3	+2·6	+1·5	+2·5	+1·2	+0·4	+1·6
Central India and Gujarat	+2·0	+3·1	+3·6	+3·2	+3·2	+1·0	—0·8	+2·2
Sind and Rajputana	+1·1	+1·6	+3·6	+2·5	+0·4	—1·3	—1·5	+0·9
Madras	—1·1	—2·8	—1·4	—0·4	—0·5	—0·9	—0·3	—1·1
Mean for whole of India	+1·2	+1·0	+1·5	+0·9	+0·5	0	—0·3	+0·7

The mean temperature of the whole country for the first five days exceeded the normal by amounts varying from 1·5° to 0·5°; on the 4th the general temperature was exactly normal; and on the 5th it was 0·3° below. The provincial

variations show that the heat was slightly less than normal in Madras, about normal in Burma, Bengal, and Assam, and in slight to moderate excess in the remaining provinces. It is remarkable that, during the development and passage of the cyclone noticed above, the mean temperature of India, except in those provinces which received heavy cyclonic rainfall, was above the normal, while after the disappearance of the storm, although the rainfall practically ceased all over the country, the temperature began to fall steadily and generally.

Rain.—The rainfall of the week under review has fallen principally under two sets of conditions. The more important cause of rainfall was the cyclonic storm which appeared off the Orissa Coast on the 1st, traversed Lower Bengal on the 2nd, and disappeared over Assam on the 3rd. On the two earlier days the rainfall was heavy within the storm area, the largest amount received being 4·75 inches at Barisal during the twenty-four hours ending at 8 A.M. on the 2nd. A second important cause of rainfall was the series of small thunderstorm disturbances which affected the Peninsula. These disturbances occasioned thundershowers throughout the whole week. They were most general and most effective in producing rain during the first two days of the week, but during the whole period there was no day on which these showers were not received in some part of the Peninsula. Outside these two areas of disturbed conditions, *viz.*, North-Eastern India and the Peninsula, rainfall was either altogether absent or very small in amount, and was due to slight scattered showers of little importance.

The table at the close of the summary gives the rainfall data of the week. The first column shows that in the case of eight divisions no rainfall whatever was received during the week, and in the case of eight more the total average rainfall for the week was less than 0·10 inch. These divisions practically covered the whole of the Gangetic plain and North-Western India. In other parts of the country effective rainfall was received, and the average actual ranged from 6·80 inches in Arakan, 6·44 inches in Assam (Surma), and 5·90 inches in Eastern Bengal to 0·15 inch in the hill districts of the Punjab, 0·10 inch in the East Coast (North (*a*)), and 0·27 inch in Madras (South). This general distribution agrees fairly well with the normal, but the actual amounts over North-Eastern India are, for reasons given above, considerably in excess of the average. The third column of the table gives the differences between the actuals and normals for the various divisions. Eighteen divisions report excessive rainfall, and thirty-two deficient falls. The region of excessive rain includes the following divisions:—*viz.*, Tenasserim and Lower Burma, Arakan, both the Assam divisions, East, Deltaic, Central and North Bengal, Orissa, Coorg, Mysore, the Bombay Deccan, Hyderabad (South), the East Coast (Central and South), and Madras (Central and South-Central). The greatest abnormal excess was reported from North-Eastern India, and amounted to 4·24 inches in East Bengal, 3·89 inches in Assam (Surma), 3·59 inches in Arakan, and over 2 inches in Lower Burma, Deltaic Bengal, and Orissa. The greatest defect was in Khandesh and perhaps in East Coast (North (*a*)).

In Upper Burma there was again a fairly heavy general fall of rain.

The returns of the sudder stations show that rain fell daily in Tenasserim and Lower Burma, on all but the last two days of the week in other parts of North-Eastern India, on most days of the week in the Peninsula, and only as scattered showers in other parts of India.

The three concluding columns of the table show the state of the seasonal rainfall. In nearly all parts of the country, except the Peninsula, the actual fall from June 2nd to date has been below the average, but in most cases the deficiency has been small, and generally less than 20 per cent. This limit has, however, been exceeded in the case of Arakan, East, Deltaic and Central Bengal, the Punjab (Central and Submontane), Berar, Gujarat, Kathiawar, Rajputana (East), and Central India (West).

The following are the more important totals recorded during the week:—Kyauktan (Hanthawaddy) 11·59 inches, Minbya (Akyab) 12·35 inches, Cox's Bazar (Chittagong) 11·36 inches, Cherra Poonjee 13·26 inches, Satkhira (Khulna) 9·58 inches, Bhagatpur (Jalpaiguri) 10·96 inches, False Point (Cuttack) 5·97 inches, Nilambur (Calicut) 5·67 inches, Bhatkal (Karwar) 8·74 inches, Chikodi (Belgaum) 8·74 inches, Siruguppa (Bellary) 6·97 inches.

SIMLA, *10th October 1895.*

W. L. DALLAS,
Asst. Meteorological Reporter to the Government of India.

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 5th October.*—Rainfall good in the Carnatic, and in parts of the Deccan and Central districts; fair rain elsewhere, except in Coimbatore, Madura, and Tinnevelly, where light or scattered showers have fallen. Ploughing, sowing and transplanting are in active progress. The standing crops are generally fair and are improving after the recent rains, but the paddy crop has withered, or is withering in parts of Tinnevelly. More rain is urgently wanted in this district and in parts of Madura. The harvest is progressing with generally moderate yield. Pasture and fodder are sufficient. Cattle are in good condition. Prices are generally falling or stationary, but the price of *cholum* (*Sorghum vulgare*) has risen slightly in parts of the Deccan.

Bombay.—*For week ending 9th October.*—Good rain throughout the Karnatak, moderate in the Deccan, and slight in parts of the Konkan, Surat, Broach, and Thar and Parkar. More rain is wanted throughout Gujarat and in parts of Khandesh, Poona, and Kolaba. The crops are poor in parts of Sind, and are withering in parts of Ahmedabad and Broach. Harvesting of the early crops is progressing in ten districts. Sowing of the late crops is general, but is retarded in one taluka of Sholapur owing to excessive moisture. Fodder is insufficient in parts of Sind. Agricultural stock in good condition, except in parts of Thar and Parkar and Ahmedabad. Prices are normal.

Bengal.—*For week ending 7th October.*—There was general rain during the week, except in parts of Bihar. In the Eastern and Central districts the rain was heavy being accompanied by a cyclone. The cyclone is reported to have done but slight damage to the crops, and the rainfall was generally beneficial. Reports of the winter rice crop continue generally favourable, except in parts of the Burdwan and Presidency divisions. In the Gaya and Purneah districts, where there has been little or no rain for the last two weeks, more rain is needed. The autumn harvest is almost completed, and the preparation of lands for the spring sowings is in progress. The price of common rice is, on the whole, stationary, but in Gaya it is reported to have risen from 17 to 14 seers per rupee.

North-Western Provinces and Oudh.—*For week ending 9th October.*—Light rain has fallen in a few districts; more rain is much needed for spring sowings in several districts. The crops are suffering from want of rain in Cawnpore, Farukhabad, Garhwal, Agra, Jhansi, and Aligarh. Harvesting of the autumn crops is progressing, and the spring sowings continue. The condition of the crops, and prospects on the whole, are favourable. Supplies and fodder are ample. Prices are fluctuating.

Punjab.—*For week ending 9th October.*—Rain has fallen in parts of the Rawal Pindi and Peshawar districts. Harvesting of the autumn crops is in progress. Ploughings for and sowings of the spring crops have commenced. Rain is badly wanted in most districts. The prospects of the standing crops are generally

reported to be good to fair, but the crops are drying up for want of rain in some districts. The crops have been slightly damaged by hail in one tahsil of the Lahore district. Cattle are generally in good condition, except in Hissar. Fodder is sufficient in all districts, except Hissar, Delhi, Jullundur, and Lahore. Prices are rising in Jullundur and Hissar, high in Delhi, normal in Ferozepore, and low elsewhere, except the price of wheat in Shahpur.

Central Provinces.—*For week ending 9th October.*—Weather clear and warm during the day, but the mornings are cool. Rain is much needed everywhere, especially in the Northern districts and in the Chhattisgarh country, where the rice crop is suffering for want of rain. Other autumn crops are doing well. Winter sowings are in progress. The price of wheat has risen slightly in two districts; elsewhere prices are stationary.

Burma.—*For week ending 28th September.*—In Lower Burma transplanting of wet-weather paddy is completed in all but three districts. Reaping of the early paddy has begun in Thaton. In Prome prospects have improved. In Thaton some damage has been caused by insects in one subdivision. The rainfall has been seasonable, and the standing crops promise well everywhere. In Upper Burma transplanting of wet-weather paddy is in progress in all but three districts, and reaping is going on in Shwebo and the Southern Shan States. Reaping of hill paddy continues in the Northern Shan States, and ploughing for and sowing of dry-weather paddy in Magwe. In Lower Chindwin prospects continue to improve, and in Shwebo a fair outturn is expected. In Magwe some crops in irrigated tracts have been destroyed by flood, and more rain is required there for tracts affected by the recent drought. The rainfall has been general, and prospects are on the whole favourable. Sowing of wheat has begun in the Southern Shan States. Sowing of sesamum is progressing in Sagaing and Myingyan, and reaping is nearly over in Lower Chindwin and Minbu. Sowing of millet continues in Lower Chindwin, Magwe, Minbu, and Myingyan, and of gram in Pakokku. Sowing of peas has commenced in Meiktila, and reaping is nearly completed in Lower Chindwin. The price of paddy has fallen slightly in Rangoon, Prome, Thongwa, and Magwe, and has risen considerably in Thayetmyo; elsewhere prices are stationary.

For week ending 5th October.—In Lower Burma prospects continue favourable, except in parts of Prome and Tharrawaddy. In Upper Burma transplanting of paddy is in progress everywhere, and is nearly completed in several districts. Ploughing for and sowing of *jowar* (*Sorghum vulgare*), maize, and peas are in progress. Good rain has fallen in Mandalay, Sagaing, Lower Chindwin, Thayetmyo, Pakokku, Minbu, Magwe, and Meiktila. A fair paddy crop may be expected, and the prospects of miscellaneous crops are generally good. Some destruction to the paddy crops has been caused by floods in the Pakokku district. The price of paddy has risen considerably in Minbu, slightly in Thaton, Pakokku, and Myingyan, and has fallen slightly in Rangoon, Prome, and Thayetmyo; elsewhere prices are stationary.

Assam.—*For week ending 8th October.*—Weather seasonable. Reaping of the early and transplanting of the late rice have been completed. Tea is doing well. The condition of cattle is fair. Fodder and water are sufficient.

Mysore and Coorg.—*For week ending 9th October.*—MYSORE: Good rain throughout the State. Prospects are favourable. *Ragi* (*Eleusine coracana*) has been harvested in parts of the Mysore, Hassan, and Shimoga districts. Prices have risen slightly in Chitaldroog and Hassan.

COORG: Rainfall moderate. Reaping of *ragi* (*Eleusine coracana*) continues. Rice is coming into ear. The coffee crop is in good condition. Picking of cardamoms continues. Water and fodder are ample. Prices are normal.

Berar and Hyderabad.—*For week ending 9th October.*—BERAR: Weather hot with scanty rainfall. The crop prospects are favourable, except in parts of Akola and Wun where more rain is needed. Preparation of land for the winter crops is in progress. Sowings have commenced in four districts. Weeding operations continue. Fodder and water are insufficient in the Khamgaon and Jalgaon talukas. Prices are fluctuating in Buldana, but are steady elsewhere.

HYDERABAD: Rainfall good. The standing crops are generally good. Preparations are being made for spring sowings. Prices are fluctuating.

Central India.—*For week ending 9th October.*—No rain during the week. More rain is still wanted in Bundelkhand, Bhopawar, Goona, and parts of Gwalior. Agricultural operations are in progress in all Agencies. The crops have been slightly damaged in Gwalior, Bundelkhand, and Bhopawar for want of rain. The condition of agricultural stock and pasturage is good, except in a few districts of Gwalior. Prices of food-grains are rising in one district of Gwalior and in Bundelkhand, and are high in Goona; in other Agencies prices are normal.

Rajputana.—*For week ending 9th October.*—Rain is much wanted in Kotah, Shahpura, the Merwara district, Jeypore, Karauli, and Ulwar, where the unirrigated crops are withering. Prospects are generally fair, except in Bhurtpore and Jeypore. Agricultural stock are generally in good condition. Pasturage and fodder are generally sufficient, except in parts of Meywar, but the supply is failing in Dholepore and Bhurtpore. Prices are rising in five States, fluctuating in one, and falling in another, but are steady elsewhere.

Kashmir.—KASHMIR VALLEY.—*For week ending 8th October.*—Rainfall moderate. The maize crop is being reaped. Wheat and barley are being sown. Prices are now normal.

JAMMU PROVINCE.—*For week ending 9th October.*—The standing crops are suffering for want of rain. Fodder is sufficient. Prices have fallen, but the price of rice at Ladakh is very high.

Nepal.—*For week ending 5th October.*—Weather seasonable and fine. Prospects are good.

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

(*a*) Includes the Bhopal-Itársi and Bína Guna railways.
(*b*) Includes the Godhra-Rutlam railway.
(*c*) Total earnings from 2nd April to 29th September 1894.
(*d*) Includes the Guntakal-Mysore frontier section.
(*e*) Includes the Tirhoot state railway. Although for convenience classed amongst state railways, the company's section of this line is the property of the Bengal and North-Western Railway Company.
(*f*) Total earnings from 1st July to 28th September 1895.
(*g*) Includes the Jammu and Kashmir, and the Hyderabad-Shadipalli railways.
(*h*) Although for convenience classed amongst state railways, this line is the property of the Bengal Central Railway Company.
(*i*) Includes the Wardha Coal, Dhond-Manmád, Khámgaon, and Amráoti railways.
(*j*) Total earnings from 1st June to 29th September 1894.
(*k*) Includes the Mysore-Nanjangúd and the Yesvantpur-Mysore frontier sections.
(*l*) This line is being worked by the Bombay, Baroda and Central India Railway Company as a temporary measure.
(*m*) Total earnings from 1st August to 28th September 1895.

F. B. HEBBERT,
Under Secretary.

SIMLA, *the 10th October 1895.*

Printed and published for the GOVERNMENT OF INDIA *at the* GOVERNMENT CENTRAL PRINTING OFFICE, *Simla.*

SUPPLEMENT TO

The Gazette of India.

No. 42.] CALCUTTA, SATURDAY, OCTOBER 19, 1895.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

FINANCE AND COMMERCE DEPARTMENT.

RETAIL PRICES FOR THE 1st HALF OF SEPTEMBER 1895.

QUANTITIES PER RUPEE IN SERS OF 80 TOLAS.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the Week ending at 8 a.m. on Saturday, 12th October 1895.

During the present week the change to the cold weather distribution of pressure has been completed. On Sunday and Monday the pressure was very uniform throughout the Indian area, but the area of high readings in the south which is characteristic of the summer distribution was still shown, and a large low pressure area existed over the Bay. On Tuesday, however, the barometer rose over Northern India, the highest pressures were developed over that region, and readings decreased steadily from the north, southward. At the same time the last instances of westerly and south-westerly winds disappeared, and northerly to easterly winds characteristic of the cold season set in throughout the whole Indian area. With this change of wind rain set in over the Carnatic and the whole of the south of the Peninsula. This change of wind and weather in Madras was accompanied with much electrical disturbance, but the force of the wind was gentle throughout, and the autumnal rains of the Carnatic appear to have set in most unusually quietly. With the setting of the northerly winds the skies became very clear of cloud throughout a large part of the country, and the nights hence became unusually cool—so much so that, although the days were generally hotter than the normal, the mean temperature of all the provinces was lower than the average.

Daily Summary.—*Sunday, 6th October 1895.*—Pressure had decreased very slightly over Lower Burma, the south of the Bay, and the west of the Peninsula, and had increased elsewhere—most in Bengal and the Gangetic plain. Pressure was very uniform throughout the Indian area, and the winds were very variable. The mean temperature was lower than usual, except in Bombay. Thunderstorms had given light rain to the east and south of the Peninsula and to one or two places in North-Eastern India.

Monday.—Pressure had decreased, except in Bengal. The changes had, however, been slight in all places except the neighbourhood of Madras, where the fall had been brisk. Pressure continued very uniform, and the only important feature in the distribution was the low pressure area stretching across the centre of the Bay. The winds were very variable. The mean temperature was above the normal over the Peninsula, and below elsewhere. Scattered showers of rain were reported over the Peninsula; in Mysore a heavy thunderstorm had apparently prevailed, and the town of Mysore reported 5 inches of rain.

Tuesday.—Pressure had fallen slightly over the west of the Peninsula, and briskly over Ceylon, while it had risen elsewhere, the change being brisk along the foot of the North-Western Himalayas. Pressure was highest and in excess of the normal over Northern and Central India, and lowest and in defect over the extreme south. The winds were northerly to easterly over the Bay and the Peninsula, and variable elsewhere. The mean temperature was below the normal over North-Eastern India, and above over the Central Provinces, and about normal elsewhere. Rain had become much more general over the south of the Peninsula, and showers had fallen in Lower Burma.

Wednesday.—The barometer had risen everywhere, the change being greater in the north than in the south. Pressure remained highest, and considerably above the normal over Northern India, and lowest and only slightly above the normal in the extreme south. The winds were northerly over the Bay, south-easterly along the West Coast, and variable elsewhere. The mean temperature was low in the east of the Indian area, and about normal in the west. Moderate to light showers had occurred in Burma and the south of the Peninsula.

Thursday.—Pressure had fallen briskly at Colombo, and changed slightly and irregularly elsewhere. The general distribution was unchanged, readings

remaining highest in the north and centre, and lowest in the south. The wind directions were practically unaltered. The mean temperature was low, except in Bombay, where it was in slight excess. Light showers of rain were reported from Burma and from Southern India.

Friday.—Pressure had again changed by very small amounts generally, and both the distribution of pressure and the circulation of the winds showed no important change. The mean temperature remained generally low. Scattered showers were received around the Bay.

Saturday.—The barometer was falling everywhere, but the change was fairly uniform, and the general distribution was unaltered. The wind directions were the same as on the 11th. The mean temperature was low, except in parts of the West Coast, Sind, and Rajputana, where it was in excess. Rain had fallen all around the Bay, but the amounts were small.

Temperature.—The most marked feature in the temperature returns of this period is the very large daily range which obtained throughout nearly the whole country during the whole week. In nearly every province on each day the means of the maximum readings were slightly above the normal, while the means of the minimum readings were slightly to considerably below. Perhaps the most marked instance of this was shown in the observations recorded over the North-Western Provinces, where on the 7th the mean abnormal excess of the day temperatures was 3·5°, and the mean abnormal deficiency of the night temperatures was 7·6°, giving an excess of 11° in the diurnal range.

The following table gives the variations of the mean temperature from the normal in the different provinces of India for each day of the week:

Province.	October 1895.							Mean variation of week.
	6th	7th	8th	9th	10th	11th	12th	
	°	°	°	°	°	°	°	°

Central India and Gujarat	—1·7	—1·4	—1·6	—1·2	—1·5	—1·3	—1·1	—1·4
Sind and Rajputana	—2·3	—2·4	—1·0	—0·8	—0·1	+0·5	+1·3	—0·7
Madras	—0·1	+0·5	—0·1	—1·8	—1·9	—1·9	—0·6	—0·8
Mean for whole of India	—1·0	—1·0	—0·9	—1·0	—1·0	—1·0	—0·4	—0·9

The mean temperature of the whole country was about 1° below the normal average on most days, and the provincial variations of temperature show that the heat was slightly less than usual in all parts of the Indian area.

Rain.—The whole of Northern and Central India was during the past week under the influence of the winter monsoon, the weather was fine, and all the rainfall received during the week was derived from the retreating south-west monsoon. The rainfall was consequently almost wholly confined to the southern portions of the Indian area, and fell in Burma and the Peninsula. In Assam and Bengal showers accompanying in most cases slight thunderstorm disturbances occurred on the first day of the week, but this disturbed weather quickly passed away, and the weather during the greater part of the week was as fine as in other parts of Northern India. In Southern India the setting in of the autumnal rainfall was carried out very quietly. On Sunday, Monday, Tuesday, and Wednesday thunderstorms giving moderate rain were reported over the south

of the Peninsula with very variable winds, but on Thursday the wind settled into north and north-east, rain commenced on the Madras Coast, and continued steadily till the close of the week. The northerly and north-easterly wind was, however, light, and the only heavy falls of rain at this time were 2·23 inches at Negapatam, reported on the 11th, and 1 inch at Madras, Cuddalore, Trichinopoly, and Negapatam, reported on the 12th.

The concluding table shows the rainfall data for the week. The first column shows that no rain whatever was received during the week in twenty-five of the rainfall divisions, and a total of less than one-tenth of an inch in the case of four more divisions, while effective rainfall was received in the case of twenty-three divisions. The regions which received effective rainfall included all the Burma divisions, except Arakan, both the Assam divisions, Eastern, Deltaic and North Bengal, Orissa, and all the peninsular divisions. The average actual rainfall ranged from 2·96 inches in Madras (South-Central), and 2·88 inches in Madras (South) to 0·11 inch in Assam (Brahmaputra) and Deltaic Bengal. The second column of the table shows that, on the average of a number of years, showers of rain are received over a large part of the country during the week under review, and that in parts of Burma, of Bengal, and of the Peninsula the fall is moderately heavy. The third column shows that the actual rainfall of the week was in defect of the normal in all divisions, except Madras (South-Central), Mysore, the Bombay Deccan, Madras (Central), Madras (South), and the East Coast (South), in each of which it was normal, or in trifling excess. The deficiency for the week was as much as 2·63 inches in Arakan, and over 1 inch in Tenasserim, East Bengal, Assam (Surma), Deltaic Bengal, Central Bengal, Bihar (North), the North-Western Provinces (Submontane), Malabar, Coorg, the East Coast (North), and the East Coast (Central). The principal deficiency was thus shown to be around the Bay area.

The returns of the sudder stations show that rain fell almost daily over the south of the Peninsula.

The columns giving the state of the seasonal rainfall exhibit a slightly deficient rainfall for the whole monsoon season over the greater part of the country. The exceptions are—Lower Burma, Assam (Brahmaputra), Orissa, Bihar (North), North-Western Provinces (Submontane (*a*)), Oudh (North), the hill districts of the Punjab, Madras (South-Central), the Bombay Deccan, Khandesh, the Central Provinces (East), Rajputana (West), the East Coast (North, Central and South), Hyderabad (South), Madras (Central), and Madras (South), where the total from June 2nd to date has been normal or slightly above. Although the seasonal rainfall is generally in defect, the amount of this defect is small in most cases, and amounts to or exceeds 20 per cent. only in the case of Arakan, East Bengal, Deltaic Bengal, Central Bengal, Bihar (South), the Punjab (South, Central and Submontane), Coorg, Berar, Gujarat, Kathiawar, Rajputana (East), and Central India (West).

The heaviest total falls reported during the week are Yandoon (Maubin) 3·40 inches, Karimganj (Sylhet) 6·00 inches, Perintalmanna (Calicut) 5·20 inches, Kotagiri (Nilgiris) 9·58 inches, Pavagada (Tumkur) 6·00 inches, Karadgi (Dharwar) 5·31 inches, Madakasira (Anantapur) 9·72 inches, Tranquebar (Tanjore) 3·82 inches.

W. L. DALLAS,
Asst. Meteorological Reporter to the Government of India.

Simla, *17th October 1895.*

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 12th October.*—Rainfall good in Anantapur, Salem, the Nilgiris, and the Southern districts; fair rain elsewhere. Agricultural operations are in active progress. The standing crops are generally fair, and the crops previously reported as withering have greatly improved, though more rain is still wanted in parts of Salem and Tinnevelly. The harvest is progressing with moderate yield. Pasture and fodder are sufficient. Cattle are in good condition. Prices are generally falling or stationary, but have slightly risen in Ganjam.

Bombay.—*For week ending 16th October.*—Rainfall moderate throughout the Karnatak, slight in parts of the Konkan, Poona, and Sholapur; no rain elsewhere. More rain is wanted in parts of Thana, Kolaba, Poona, and Satara, and throughout Gujarat, where the standing crops are suffering in parts. *Jowar* (*Sorghum vulgare*) has been damaged by insects in one taluka of Broach. Harvesting of the early crops is progressing in sixteen, and sowing of late crops in four, districts. Cotton-picking has commenced in two districts. Fodder is scarce in Shikarpur and Hyderabad. Agricultural stock in good condition. Prices are normal, except in parts of Sholapur.

Bengal.—*For week ending 14th October.*—There was no rain during the week, except a slight shower in the 24-Parganas. The general prospects of the winter rice crop continue good, but in some districts it is now in need of more rain. Considerable portions of the rice land in the Burdwan and Presidency divisions remain uncultivated owing to deficient rainfall. The preparation of lands for the spring crops is generally going on, and the early sowings have begun. The price of common rice is generally steady, but in Cuttack it has fallen owing to the appearance of the new crop in the market.

North-Western Provinces and Oudh.—*For week ending 16th October.*—The weather is clear. Rain is much needed. The crops are suffering for want of rain in a few districts. The autumn crops are being harvested, and the outturn is expected to be good. Spring sowings continue. Sugarcane is in good condition, but the *urd* (*Phaseolus radiatus*) crop is slightly damaged by insects in one tahsil of Moradabad. Prospects are generally favourable. Markets are well supplied, and fodder is ample, except in Cawnpore tahsil, where it is reported to be getting scarce. Prices are rising in a few districts; elsewhere prices are fluctuating.

Punjab.—*For week ending 16th October.*—In Jullundur a few drops of rain fell and the weather is cloudy. Harvesting of the autumn crops and the ploughing for and sowing of the spring crops have commenced, but rain is urgently wanted. Cotton is being picked. The condition of the standing crops is generally reported good to fair, but the crops are drying for want of rain in Hissar and Shahpur. The *bajra* (*Penicillaria spicata*) crop has been damaged considerably by grasshoppers in parts of Dera Ismail Khan. Cattle are generally said to be in good condition, and fodder is sufficient in all districts, except Hissar, Delhi, Jullundur, and Lahore. Prices continue high in Delhi, and are rising in Hissar, Umballa, Jullundur, and Peshawar. In Ferozepore prices are normal; elsewhere they are low, but in Sialkote wheat is selling from 17 to 20 seers per rupee.

Central Provinces.—*For week ending 16th October.*—Weather clear and warm during the day, but the nights and mornings are cool. The rice crop has suffered considerably in Seoni and Bilaspur for want of rain, and to some extent in Damoh, Raipur, and Sambalpur. The outturn in Sambalpur is estimated at ten annas. Prospects otherwise are favourable. The winter sowings are progressing. Prices are above normal in Seoni and Saugor.

Burma.—*For week ending 12th October.*—In Lower Burma agricultural operations have been completed everywhere, except in Tharrawaddy, Prome, and Bassein, where transplanting for the main paddy crop still continues. In Thaton reaping of early paddy is in progress. The rainfall so far has been favourable, and crop prospects are very good. In Upper Burma transplanting for wet-weather paddy continues in eight districts, and has been finished in others. Reaping of early paddy is progressing in three districts. Some damage has been done by floods in Bhamo, Myitkyina, Upper Chindwin, and Minbu, but the crop prospects on the whole are fair. Slight rain has fallen in most districts, but more is still wanted. Sowing for *jowar* (*Sorghum vulgare*), maize, and peas is in progress, also of wheat in the Southern Shan States. The price of paddy has fallen slightly in Thaton, and risen considerably in Magwe; elsewhere prices are stationary.

Assam.—*For week ending 16th October.*—Weather seasonable. The prospects of the crops are good. Tea is doing well. The condition of cattle is fair. Fodder and water are sufficient.

Mysore and Coorg.—*For week ending 16th October.*—MYSORE: Rainfall good throughout the State. The standing crops are in good condition. Sugarcane and *ragi* (*Eleusine coracana*) have been harvested in parts of the Kolar, Shimoga, and Tumkur districts. Prices have fallen slightly in the Kolar and Kadur districts.

COORG: Rainfall moderate. Reaping of *ragi* (*Eleusine coracana*) and picking of cardamoms continue. The rice and coffee crops are in good condition. Water and fodder for cattle are sufficient. Prices are normal.

Berar and Hyderabad.—*For week ending 16th October.*—BERAR: Weather cool and clear. The standing crops are in fair condition. Sowings are well advanced and weeding operations continue. Fodder and water are sufficient, except in parts of the Akola district. Prices are stationary.

HYDERABAD: Rainfall moderate. The autumn crops are being harvested in many talukas. Sowing of the spring crops is progressing. Prices are fluctuating.

Central India.—*For week ending 16th October.*—No rain during the week. Rain is still wanted in Goona, Bundelkhand, Bhopawar, and Nimar. Agricultural operations are in progress everywhere. The crops have been slightly damaged in Gwalior, Bundelkhand, and Bhopawar for want of rain. Cattle are in good condition, except in parts of the Bhopal Agency. Pasturage is good and sufficient in all Agencies, except in some districts of Gwalior. Prices of food-grains are high in Bundelkhand and Goona, and rising in some districts of Gwalior; elsewhere prices are normal.

Rajputana.—*For week ending 16th October.*—Rain is much wanted in Shahpura, Merwara district, Jeypore, and Ulwar, where the unirrigated crops are withering for want of it. Prospects are generally fair, except in Jeypore and Bhurtpore. Agricultural stock are generally good, but are suffering in Ulwar for want of fodder. Pasturage and fodder are generally sufficient, except in parts of Meywar, Shahpura, Ulwar, and Jaisalmere. Fodder is failing in Dholepore and Bhurtpore. Prices are rising in eight States, fluctuating in two others, and falling in one, but are steady elsewhere.

Kashmir.—KASHMIR VALLEY.—*For week ending 15th October.*—Rainfall moderate. Reaping of Indian-corn is almost completed. Sowings of wheat and barley are in progress. Prices continue normal.

JAMMU PROVINCE.—*For week ending 16th October.*—The crops have been reaped. Fodder is sufficient. Prices are normal.

Nepal.—*For week ending 12th October.*—The weather is fine. Reaping of low-land rice has commenced.

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

No. 4948-S.R.

GOVERNMENT OF INDIA.

FINANCE AND COMMERCE DEPARTMENT.

STATISTICS AND COMMERCE.
CUSTOMS.

Simla, the 17th October, 1895.

Read—

Customs Circular No. XXI.

Letter from the Finance and Commerce Department, No. 4373-S.R., dated the 11th September 1895.

Ordered, that the Circular be published for general information in the Supplement to the *Gazette of India*.

J. F. FINLAY,
Secretary to the Government of India.

Customs Circular No. XXI.

From—The Government of India, Finance and Commerce Department, No. 4373-S. R., dated 11th September 1895,

To—The Secretary to the Government of Bombay, Revenue Department.

I am directed to acknowledge the receipt of your letter No. 646, dated the 24th August 1895, on the subject of the liability to import duty of dredgers and component parts thereof.

2. I am to say that the Government of India are of opinion that a dredger may be held to be a piece of machinery, for although it is constructed on a floating bottom, it is not built or used for the purposes of navigation, and is not therefore exempt under No. 96 of the schedule.

Dredger buckets are in any case component parts of machinery, being indispensable for the working of the dredging machine and unsuitable for any other purpose.

3. The Government of India consider that although "dredging" is not specified as one of the purposes for which exemption from duty is allowed in No. 14 of the Tariff Schedule, the principles which govern the exemptions in that number are applicable thereto, and the buckets imported by the Karachi Port Trust may therefore be passed free.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

RAILWAY STATISTICS.

STATEMENT OF APPROXIMATE GROSS EARNINGS OF INDIAN RAILWAYS FROM 1ST JULY TO 6TH OCTOBER 1894, AND FROM 1ST JULY TO 5TH OCTOBER 1895.

N.B.—As regards the figures in column *Total Earnings from 1st July 1895*, audited figures have been used as far as possible.

Finance and Commerce Department
Calcutta, the 1st October 1895.

J. F. FINLAY,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the Week ending at 8 a.m. on Saturday, 19th October 1895.

During the week under review very quiet conditions have prevailed over the greater part of the Indian area. Barometer readings have been highest along and near the Himalayas, relatively high over the central parts of the country and the head of the Peninsula, and low over the Western Desert, over the Arabian Sea, and over the Bay. The low pressure areas over North-Western India and over the Bay have apparently been of relatively little importance, but within the low pressure area over the Arabian Sea cyclonic conditions apparently developed during the week, and these conditions affected the weather on the West Coast. Hence, while at the commencement of the week, when normal conditions prevailed, light or moderate rainfall was general along the East Coast and over the south of the Peninsula, by the middle of the week these conditions were changing, and the disturbed conditions over the Arabian Sea determined rainfall to the west and south of the Peninsula. The mean temperature was about normal over a large part of the country during the week, but there was a fairly steady excess over Bombay, due in part to the southerly winds and cloudy skies which resulted from the cyclonic winds over the Arabian Sea.

Daily Summary.—*Sunday, 13th October 1895.*—Pressure had changed by very small amounts, but had, on the whole, risen. Readings were highest along the foot of the Himalayas, lowest off the Malabar Coast, relatively low over the Bay of Bengal and the Arabian Sea. The wind directions were normal, but the weather was finer than usual, and rainfall was confined to the east and south of the Peninsula, where light or moderate showers had fallen.

Monday.—The barometer had fallen almost everywhere, the change being greatest over Northern India. Readings were high over Bengal and along the foot of the Eastern and Central Himalayas, and also over the central parts of the country, while, in addition to the low pressure areas over the Bay and Arabian Sea, a depression had appeared over North-Western India. The winds were little changed, and were fairly normal. General light to moderate rain had fallen over Southern India. The mean temperature was excessive, except in South Madras, Bengal, and across the head of the Peninsula.

Tuesday.—Pressure had again fallen everywhere—most in the north. The depression over North-Western India was better defined than on the 14th, but in other respects the distribution was little changed. The winds were cyclonic in the north-west, variable on the West Coast, and about normal elsewhere. The mean temperature remained above the normal, except in Bengal, the Central Provinces, and the south of Madras. General and rather heavier rain had occurred over the south of the Peninsula, and some snow and rain on the North-Western Himalayas.

Wednesday.—The barometer had risen briskly in the extreme north-west, and had fallen slightly on the West Coast. Elsewhere the changes were small. The depression in the north-west had moved very slightly eastward, and a depression was apparently developing over the Arabian Sea. Otherwise conditions were unchanged. The winds were irregularly cyclonic off the West Coast and over North-Western India, and were about normal in other parts of the country. Rain continued over the south of the Peninsula, and the fall was extending along the West Coast. At a few stations in the Peninsula the fall was heavy. The mean temperature was low over the Punjab, Bengal and Assam, and the South Carnatic, and above the normal elsewhere.

Thursday.—Pressure had increased briskly over the Southern Punjab, but had hardly changed in other parts of the country. The depression over North-Western India had continued to move eastward, and had entered the Gangetic

plain. Readings were highest in the North Punjab, and lowest off the Malabar Coast. The winds were cyclonic over the Gangetic plain and along the West Coast, but were about normal in direction in other places. The mean temperature was low over North-Western India, North-Eastern India, and the Carnatic, and high for the season elsewhere. Rain continued to fall over the Peninsula, but the fall was light in the east and was becoming much heavier in the west.

Friday.—The barometer had fallen slightly in the north-west and north-east, and risen in other parts of India. The changes were, however, small, and the general distribution was unchanged. The winds were northerly over the Bay area, easterly over Central and Western India, and variable elsewhere. The mean temperature remained low in the north-east and north-west of India and the South Carnatic, and above the normal elsewhere. Rain was falling over the Peninsula and Lower Burma, the fall being heaviest and most general over the west of the Peninsula.

Saturday.—The barometer had changed very little, but the low pressure area over the Arabian Sea seemed to be moving northward towards the Kathiawar Coast. The winds were northerly over the Bay area, easterly to southerly over the Peninsula, and variable with calms over Northern India. Scattered showers of rain had occurred over a large part of the country. The mean temperature remained low in the north-west and north-east and excessive in other places.

Temperature.—The temperature changes and variations from the normal during the week under review have agreed closely with the occurrence of rainfall. Thus the chief deficiency in temperature has been over the South Carnatic, where rain occurred daily, and on some occasions fell heavily. The next most important area of diminished temperature was in Northern India. A fall of snow on the inner ranges and of rain on the outer ranges occurred on Tuesday, and on Wednesday a considerable deficiency of temperature was reported from the Punjab. This fall of temperature advanced eastward, and by the close of the week deficient temperatures were reported all along the line of the Himalayas. Over Bombay temperature was steadily excessive throughout the week, and over the central parts of the country the variations were irregular from day to day.

The following table gives the variations of the mean temperature from the normal in the different provinces of India for each day of the week:

Province.	October 1895.							Mean variation of week.

Mean for whole of India	+0·1	+0·4	+0·9	+0·8	+0·4	+0·4	+0·3	+0·5

The mean temperature of the whole country for the whole week was $\frac{1}{5}$° above the normal, and the variations for the whole country from day to day were small and unimportant. The provincial variations exhibited a slight excess of heat in Bombay, Sind, and Rajputana, but in all the remaining provinces the heat was about normal.

Rainfall.—The rainfall during the week under review has been slightly more general, and in places heavier than was the case last week. The rainfall of India has occurred under three different conditions. In the first place, the weather has been slightly showery throughout Northern and Central India. The most important of these showers occurred over the Himalayas and their neighbourhood on Tuesday and Wednesday, when a considerable amount of snow fell on the higher ranges, and moderate showers of rain on the outer ranges. The unsettled conditions which produced these showers apparently travelled eastward along the line of the Himalayas, as snow occurred in Kashmir, etc., on the 15th and 16th, and at Gnatong on the 18th and 19th. In the second place, rain was received over the east and south of the Peninsula from the north-easterly winds forming part of the retreating south-west monsoon. This rainfall was heaviest and most general during the first few days of the week, and fell off both in amount and extent from the 17th to the close of the week. In the third place, rain was occasioned over the south and west of the Peninsula by the unsettled cyclonic weather which prevailed over the Arabian Sea. These unsettled conditions first assumed prominence on the 16th, when rain was falling in Malabar. The unsettled weather appeared to move northward up the coast, as on Saturday rain had ceased in Malabar, while it was falling at Goa and Ratnagiri. These three causes led to rain being recorded during the week in thirty of the rainfall divisions. Of these, however, no less than ten received during the week an average fall each of less than one-tenth of an inch, so that the number of divisions which received effective rainfall was only twenty. These twenty divisions included the whole of Burma, except Arakan, Assam (Surma), Deltaic and North Bengal, Chota Nagpur, the hill districts of the Punjab, Malabar, Coorg, Mysore, the Konkan, the Bombay Deccan, Gujarat, the East Coast (North, Central and South), and Madras (South-Central and South). In all other parts of India there had been either no rain whatever or only unimportant showers.

The actual average rainfall was generally less than the normal average, except in one part of the country, *viz.*, the south of the Peninsula. This region, it will have been noticed, received rainfall during the week both from the disturbed conditions over the Arabian Sea, and from the north-easterly winds of the retreating south-west monsoon. It was hence more favourably situated for rain than other districts, and the total rainfall was considerably in excess in the East Coast (South) and Madras (South), and slightly in excess in Malabar, Madras (South-Central), and Coorg. The rainfall of the hill districts of the Punjab was also in trifling excess, due to the heavy showers noticed above. In all other parts of India and Burma the rainfall was in defect. This deficiency equalled or exceeded 1 inch in the case of the following divisions:—Tenasserim, Lower Burma, Arakan, East Bengal, Assam (Surma), Central Bengal, Orissa, the East Coast (North and North (*a*)), Madras (Central), and the East Coast (Central).

The returns of the sudder stations show that throughout Northern and Central India the rainfall occurred as scattered showers at irregular intervals, while over the Peninsula the rainfall in the east occurred in the earlier and in the west in the later part of the week.

As the present is the first week of new rainfall period, the information in the three last columns of the table is the same as that given in the first three.

The heaviest total falls reported during the week are—Kyangin (Henzada) 3·97 inches, Perintalmanna (Calicut) 8·30 inches, Coonoor (Nilgiris) 9·16 inches, Satara 4·75 inches, Cuddalore 8·58 inches, Kulasekarapatnam (Tinnevelly) 7·60 inches.

PROVINCE.	DIVISION.	Rainfall data for week ending October 19th, 1895.			Rainfall data from October 13th to October 19th, 1895.		
		Average actual rainfall of division.	Average normal rainfall of division.	Excess or defect in inches.	Average actual rainfall of season to date.	Average normal rainfall, October 13th to October 19th.	Excess or defect of (seasonal) rainfall expressed as a percentage.

W. L. DALLAS,
Asst. Meteorological Reporter to the Government of India.

Simla, *24th October 1895.*

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 19th October.*—Rainfall good in the South and in parts of the Carnatic, light in the Circars and Deccan, and fair elsewhere. Agricultural operations are in active progress. The standing crops are generally fair, but more rain is still required in parts of the Central districts and Nellore. The harvest is progressing with moderate outturn. Cattle are generally in good condition. Prices are falling or stationary, but have slightly risen in Bellary and Madura.

Bombay.—*For week ending 23rd October.*—Rainfall generally moderate in the Deccan and Konkan; slight in parts of the Carnatic, Gujarat, and Sind. More rain is wanted in parts of Gujarat and in one taluka of Thana. The standing crops are suffering for want of moisture in parts of Ahmedabad and Baroda territory. Harvesting of the early crops and sowing of the late crops are general. Cotton-picking continues in Khandesh. Fodder is sufficient. Agricultural stock in good condition. Prices are normal, except in one taluka of Sholapur.

Bengal.—*For week ending 21st October.*—There was little rain during the week; more rain is generally required. In the Burdwan and Presidency divisions the winter rice crop is suffering severely for want of rain, and in parts of Bihar, especially in the Gaya district, the rice crop in the highlands is said to be withering. In parts of Bihar rain is also needed for the spring sowings. Cattle are in good condition, except in parts of Rangpur. The price of common rice continues generally steady.

North-Western Provinces and Oudh.—*For week ending 23rd October.*—The weather is clear. Showers have fallen in Sitapur, Garhwal, and Bareilly; in the Sitapur district the falls were accompanied by hail, but no damage was done. Rain is greatly needed in places. Harvesting of the autumn crops continues, and sowings for the spring crops are in progress. Prospects are generally favourable. Supplies and fodder are ample. Prices are fairly steady, but are rising in several districts.

Punjab.—*For week ending 23rd October.*—Rain has fallen only in parts of Sialkot and Rawalpindi. Harvesting of the autumn crops is in progress. Ploughings for and sowings of the spring crops have commenced, but rain is urgently wanted. The standing crops are in good condition in Amritsar and Peshawar; average to poor elsewhere. They are withering for want of rain in Hissar and Shahpur. The millet crop has been damaged by grasshoppers in part of the Dera Ismail Khan district. Cattle are generally in good condition, but in Hissar they are short of fodder. Fodder is scarce in Hissar, Delhi, Jullundur, and Lahore, but is sufficient elsewhere. Prices are high in Delhi, Umballa, and Amritsar, and rising in Hissar, Jullundur, and Peshawar, but are normal in Ferozepore and Lahore, and continue low elsewhere, except the price of wheat in Shahpur.

Central Provinces.—*For week ending 23rd October.*—Weather generally cloudy and warm, but no rain has fallen. The want of rain has considerably injured the autumn crops, especially rice, in the northern districts and in the Chhattisgarh country. Prospects are favourable in the lower Nerbudda valley. Winter sowings continue, but in Damoh the early sown wheat and linseed have suffered for want of rain and are being resown. In the Satpura districts also the early sowings are withering owing to want of rain. Prices are stationary.

Burma.—*For week ending 19th October.*—In Lower Burma the prospects continue favourable in all districts. Slight damage has been caused by insects in parts of the Kyaukpyu district. In Upper Burma the crop prospects have not changed materially, but more rain is wanted in Shwebo, Lower Chindwin, Pakokku, Meiktila, Yamethin, and Myingyan. The standing crops in the Myingyan sub-division will probably fail unless rain falls soon. The price of paddy has risen slightly in Rangoon and Magwe, and fallen slightly in Shwebo and Thayetmyo.

Assam.—*For week ending 22nd October.*—The weather is seasonable. The prospects of the crops are generally good, but more rain is wanted in some districts for tea and late rice. The condition of cattle is fair. Fodder is scarce in Kamrup, Darrang, and parts of the Khasi and Jaintia hills. Water is sufficient.

Mysore and Coorg.—*For week ending 23rd October.*—MYSORE: Rainfall good in the Mysore, Kolar, Bangalore, and Tumkur districts, and fair elsewhere. The standing crops are in good condition. *Ragi* (*Eleusine coracana*) has been harvested in parts of Mysore and Shimoga. Prices have fallen in three districts and risen in two others.

COORG: Rainfall moderate. The rice crop is in good condition. Reaping of *ragi* (*Eleusine coracana*) and picking of cardamoms continue. The coffee crop is ripening in some parts. Water and fodder for cattle are sufficient. Prices are normal.

Berar and Hyderabad.—*For week ending 23rd October.*—BERAR: Weather cool and cloudy. The crop prospects are favourable, except in parts of Akola and Wun, where more rain is needed. Preparation of land for the winter crop is almost completed. Weeding operations are well advanced. Insufficiency of fodder and water prevails in the Khamgaon and Jalgaon talukas. Prices are steady.

HYDERABAD: Rainfall moderate. The crops on irrigated areas are thriving. Sowing of the winter crops is almost completed in most talukas. Agricultural prospects are good. Fodder and pasture are available for cattle. Prices are normal.

Central India.—*For week ending 23rd October.*—No rain during the week. More rain is still wanted in Bundelkhand, Bhopawar, and Goona. Agricultural operations are in progress everywhere. The crops have been damaged for want of rain in Gwalior, Bundelkhand, Baghelkhand, and Bhopawar; elsewhere the crops are in good condition. Agricultural stock in fairly good condition, except in a few districts of Gwalior. Pasturage is good and sufficient in

all districts, except in parts of Gwalior. Prices of food-grains are rising in Gwalior and Bundelkhand, and are high in Goona; elsewhere prices are normal.

Rajputana.—*For week ending 23rd October.*—Rainfall slight in two States. The crops have been partly injured in Merwara and Jeypore, and have withered in Karauli and Ulwar for want of rain. Prospects are fair, except in Bhurtpore and Tonk. Agricultural stock are generally in good condition, but are suffering in Ulwar for want of fodder. Pasturage and fodder are generally sufficient, but fodder is scarce in parts of Meywar, Shahpura, Ulwar, and Jaisalmere, and is failing in Dholepore and Bhurtpore. Prices are rising in ten States and fluctuating in two others; elsewhere prices are steady. One thousand two hundred persons emigrated to Sind from Jaisalmere.

Kashmir.—KASHMIR VALLEY.—*For week ending 22nd October.*—Rainfall moderate. The spring sowings are in progress. Water is ample for irrigation. Prices continue normal.

JAMMU PROVINCE.—*For week ending 23rd October.*—No rain. Harvesting is in progress. Cattle are in good condition. Prices are rising slightly.

Nepal.—*For week ending 19th October.*—The mornings are foggy, but the days are fine. Low-land rice is still being harvested.

DENZIL IBBETSON,

Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Circular No. $\frac{18}{290-2}$ F.

Extract from the Proceedings of the Government of India in the Department of Revenue and Agriculture (Forests),—dated Simla, the 18th October, 1895.

Read the following despatch from Her Majesty's Secretary of State, forwarding copies of the Regulations for 1896 of the Forest Service Branch in Cooper's Hill College:

No. 98 (Revenue), dated London, the 5th September 1895.

From—The Right Honourable Lord George Hamilton, Her Majesty's Secretary of State for India,

To—The Right Honourable the Governor General of India in Council.

I forward herewith, for the information of Your Excellency's Government, ten copies of the Regulations for admission to the Forest Service Branch at Cooper's Hill College for the year 1896.

REGULATIONS FOR THE FOREST SERVICE BRANCH OF THE ROYAL INDIAN ENGINEERING COLLEGE, COOPER'S HILL, FOR 1896.

[*Post Town, Staines. Railway Station, Egham. Telegraph Station, Englefield Green.*]

STAFF OF THE COLLEGE.*

President, General Sir ALEXANDER TAYLOR, G.C.B., R.E.

Secretary, Lieutenant-Colonel W. J. BOYES.

Bursar, J. P. PASCO, Esq., R.N., Retired.

Chaplain, Rev. C. CROSLEGH, D.D.

Engineering Branch.

Assistant Professor of Engineering, A. H. HEATH, Esq., Assoc. Mem. Inst. C.E.

Professor of Surveying, Major-General E. H. COURTNEY, R.E.

Instructor in Geometrical Drawing, ARTHUR HICKS, Esq.

Lecturer in Accounts, J. C. HURST, Esq.

Instructor in Freehand Drawing, RUSSELL DOWSON, Esq.

Mathematical Branch.

Professor of Applied Mathematics, G. M. MINCHIN, Esq., M.A., F.R.S.

Professor of Pure Mathematics, A. LODGE, Esq., M.A., Fereday Fellow of St. John's College, Oxon.

Natural Science Branch.

Professor of Chemistry, HERBERT MCLEOD, Esq., F.R.S.

Professor of Physics, W. N. STOCKER, Esq., M.A., Fellow of Brasenose College, Oxon.

Lecturer in Geology and Mineralogy, Professor H. G. SEELEY, F.R.S.

Forestry Branch.

Principal Professor of Forestry, W. SCHLICH, C.I.E., Ph.D., late Inspector-General of Forests to the Government of India.

Assistant Professor of Forestry, W. R. FISHER, Esq., B.A., late Conservator of Forests, Northern India.

Professor of Botany, H. MARSHALL WARD, Esq., M.A., S.D., F.R.S., F.L.S., Fellow of Christ's College, Cambridge.

* The staff of the College is only given in so far as it concerns the Forest Branch.

Lecturer on Entomology, W. F. H. BLANDFORD, Esq., M.A., Fellow of Christ's College, Cambridge.

Lecturer on Chemistry of Soils and Vegetation, A. H. CHURCH, Esq., M.A., F.R.S.

Instructor in German, T. H. DITTEL, Esq.

Lecturer on Forest Law, B. H. BADEN POWELL, Esq., C.I.E., late of the Indian Civil Service.

Director of Practical Study in Forestry on the Continent, SIR DIETRICH BRANDIS, K.C.I.E., Ph. D., F.R.S., late Inspector-General of Forests to the Government of India.*

[*The arrangements hereinafter described are subject to revision under the orders of the Secretary of State for India.*]

1. The Royal Indian Engineering College is primarily maintained, under the orders of the Secretary of State for India in Council, for the education of candidates for the service of Government in the India Public Works, Telegraph, and Forest Departments; but it is open, to the extent of the accommodation available, to all persons desirous of following the course of study pursued in it.

India Forest Department Appointments.

2. The Examination, which is conducted by the Civil Service Commissioners, usually takes place towards the end of June; and candidates may undergo the written part of their examination in London, Edinburgh, or Dublin, or at any of the provincial centres at which the simultaneous examination of candidates for admission to the Royal Military College, Sandhurst, is to be held. A list of the probable centres may be obtained from the Civil Service Commissioners at any time after March 1896. The oral and practical parts of the examination will be held in London only.

A fee of £2 is required from candidates examined in London, but when the written examination is conducted elsewhere than in London the fee is £3. Candidates examined at a college or school will probably be required to pay a local fee in addition to the fee of £3 (in order to defray the expenses of superintendence), as to which they should obtain early information from the college or school authorities. The fee payable to the Civil Service Commissioners must be paid by means of stamps of the specified amount. Instructions on **this point will be issued to candidates about 10 days before the examination.**

3. The number of candidates to be selected annually varies according to the requirements of the Forest Service in India; the figures as regards each particular year will be advertised from time to time. *In* 1896 *there will be six appointments offered for competition. It is possible that after* 1896 *recruits for the Indian Forest Service will be selected from Cooper's Hill College students at the end of their first year's course of study.*

4. Candidates for the Indian Forest Department are selected under the following arrangements:

(*a*) An applicant must be a natural-born British subject, and must be above 17 and under 20 years of age on the 1st June of the year in which he competes for an appointment. He must be unmarried, and if he marries before reaching India he will forfeit his appointment.

(*b*) An applicant must send† to the Revenue Department of the India Office, on or before the 15th day of May of the year in which he proposes to compete:

(1) His name and parentage, a certificate or other satisfactory evidence of the date of his birth, and the written consent of parent or guardian that his name should be recorded as a candidate.

(2) A statement of the places of education at which he may have been, accompanied by testimonials of good conduct, during the last four years.

(*c*) Applicants will have to appear before a Medical Board‡ at the India Office, particular stress being laid upon good vision and hearing. A physical

* Sir D. Brandis is not on the staff of the College.

† There is no form of application; the documents specified in para. 4 (*b*), clauses (1) and (2), should be enclosed in a covering letter addressed to the Secretary, Revenue Department, India Office, London.

‡ With a view to prevent parents and guardians from incurring the inconvenience and expense of preparing candidates who may be physically unfit for the Forest Service, it is suggested that, before any such preparation is begun, candidates be submitted to examination by the medical adviser of the family, or any other qualified medical practitioner, with regard to the following points:

1. A weak constitution.
2. Defective vision.
3. Impaired hearing.
4. The existence of any congenital defect.

It is to be understood that this private examination is merely suggested to lessen the chances of disappointment and that it is by no means intended to take the place of, or to influence in any way, the official examination.

On the subject of the standard of eyesight required for the Indian services, a pamphlet has been published under the authority of the Secretary of State in Council, by Messrs. Churchill and Sons, 11, New Burlington Street.

test will also be imposed, so as to ensure the selection of persons of active habits and powers of endurance.

(*d*) The applicants who have successfully passed the medical examination and the physical test will be required to undergo an examination before the Civil Service Commissioners in the following subjects* (Classes I. to III.), marks being assigned as follows:

CLASS I.—OBLIGATORY SUBJECTS.†

	Marks.	
1. Mathematics (lower), *viz.*, Algebra up to and including the Binomial Theorem; the theory and the use of logarithms; Euclid, Books I to IV and VI; Plane Trigonometry up to and including the solution of Triangles and Mensuration	2,500	In each of these subjects a candidate must obtain not less than one-third of full marks in order to qualify.
2. English composition	1,000	
3. German (400 for colloquial)	2,000	

CLASS II.—OPTIONAL SUBJECTS.

4. Mathematics (higher), including Analytical Geometry, Conic Sections, Statics, and Dynamics	2,000	A candidate may take any two, but not more than two, of the optional subjects. Under "Optional Subjects" Nos. 9, 10, 11, and 12, the examination will be partly practical.
5. French (400 for colloquial)	2,000	
6. Latin	2,000	
7. Greek	2,000	
8. English History. There will be set: one general paper; one paper limited to a fixed period, which will be from the year 1702 to the year 1788 for the examination of 1896	2,000	
9. Botany, *viz.*, the elementary parts of vegetable morphology, histology, and physiology, and the principles of a natural system of classification as illustrated by the more important British natural orders. Candidates will be required to describe plants in technical language. Questions will not be set on vegetable palæontology or on the geographical distribution of plants	2,000	
10. Chemistry, *viz.*, the elements of Inorganic Chemistry	2,000	
11. Physics. Elementary properties of Electricity, Magnetism, Heat, Light, and Sound	2,000	
12. Physical Geography and Geology, chiefly economic; including the recognition of the more familiar minerals and rocks, and their properties and uses ...	2,000	

CLASS III.—ADDITIONAL SUBJECTS.

13. Freehand Drawing	500	Either or both of these subjects may be taken in addition to the obligatory and the two optional subjects.
14. Geometrical Drawing	300	

(*e*) The Secretary of State will nominate as probationers such competitors as attain the highest aggregate of marks (provided they obtain the minimum in the obligatory subjects and satisfy the requisite conditions in other respects). These probationers will then enter the College, where they will be further trained for the Forest Service of India.

(*f*) If the full number of competent probationers required in any year cannot be obtained from the persons so examined, the Secretary of State reserves a discretion to fill up the deficiency by selecting any other person or persons who may satisfy the authorities of the College that he or they are properly qualified to become probationers for the Forest Service.

5. The course of study for candidates for the India Forest Service extends over about three years, divided into seven terms, and a period of study in foreign forests. During seven terms the candidates will prosecute their studies mainly at the College, and during the period of foreign study, which may last for five or six months, they will visit, under suitable supervision, such Continental forests as may be selected for the purpose. Excursions may also be made for purposes of instruction, both during term time and during part of the vacations.

* Reprints of the papers set at previous examinations, together with tables of the marks assigned to the candidates, are published by the Civil Service Commissioners, and can be obtained through any bookseller. The price of each reprint is one shilling.

† Attention is invited to the appended Syllabus, giving further details regarding the extent and character of the examination.

6. Each annual session begins in September and is divided into three terms, with vacations of about four weeks at Christmas, two weeks at Easter, and eight weeks in the summer, except at the end of the visit to the Continent when the vacation will be shorter.

7. A charge of £61 is made for each of the seven terms spent at the College; for the period of foreign study the charge is £150 for each student; the amount must be paid terminally in advance to the Bank of England for the first seven terms, and the amount due for the period of foreign study must be paid before the period begins. Receivable orders, with full directions as to the mode of payment, will be forwarded from the India Office to the parents or guardians, shortly before the fees fall due. A student will not be allowed to come into residence or to start for his foreign study of forests until his fee has been paid.

8. A deposit of £5 is required to be paid by each student on admission to the College, as caution money, to cover charges incurred by him for damage to books, instruments, &c., or any College bills outstanding on leaving the College. Any balance over and above such charges will be repaid. This deposit is to be paid with the fee for the first term, making the total payment on that occasion £66.

9. The foregoing payments cover all charges for tuition, board according to the College tariff, lodging, with washing, up to a cost of 2*s.* a week, and ordinary medical attendance while in residence at the College. When students are on tour and during the course of practical instruction, whether in Great Britain or on the Continent, the Secretary of State will defray the expenses of (1) board, lodging, and washing (the aggregate maximum expenditure under these heads being 10*s.* per diem), (2) travelling expenses, and (3) fees to local Forest officers, &c.

Students are required to provide their own class books and drawing instruments. Drawing paper, drawing boards, and surveying instruments are provided by the College.

10. The prescribed course of study comprises the following subjects:

I.—*Auxiliary Subjects.*

1. Geometrical Drawing.
2. Freehand Drawing.
3. Surveying.
4. Forest Engineering.
5. Accounts.
6. German.
7. Mechanics.
8. Physics.
9. Chemistry.
10. Geology and Mineralogy.
11. Entomology.
12. Botany.
13. Drill and Gymnastics.

II.—*Forestry*, theoretical and practical, in all its branches.

11. Every student is required to conform to the College rules, to exhibit due diligence in his studies throughout the course, and to give evidence of satisfactory progress in such manner as may be required; failing which, or in the event of serious misconduct, he will be liable to be removed from the College, or to be sent back from the foreign study, which may entail the loss of his appointment.

12. During the course of study, the proficiency of the students will be tested by periodical examinations, and on the termination of their studies there will be a final examination. Each student may also, at the discretion of the Secretary of State for India, be required to appear before the Medical Board at the expiration of the first year of residence at the College, and should the result be unsatisfactory he cannot claim to be allowed to complete the course.

13. The subjects enumerated in paragraph 10 are grouped in certain main branches of study,* and a fixed minimum of qualification is required in each branch and in the subjects taught during the forest tours, as well as a certain minimum for all branches taken together. Students who obtain these minima will receive the College diploma in forestry.

14. Candidates who have obtained this diploma and are found to be of sound constitution and free from physical defects which would render them unsuitable for employment in the Forest Department (the final decision on which points will rest with the Secretary of State for India), will be appointed Assistant Conservators in the Forest Department of India in the order of their standing at the end of the final examination. They will be allowed, before leaving the College, to state their preference in respect to the Provinces to which they desire to be allotted; but the distribution will be made to the several Provinces according to the needs of the public service, at the discretion of the Secretary of State for India after consulting the President of the College and the Principal Professor of Forestry. The distribution will be made on the understanding that officers are at all times liable to be transferred from one Province to another at the pleasure of the Government of India.

* For details see Royal Indian Engineering College Calendar.

15. Within a month of his nomination as Assistant Conservator, each nominee must sign articles of agreement describing the terms and conditions of his appointment; he must embark for India when required to do so by the Secretary of State, and will be provided with a free passage. Failure to embark at the stated time will, in the absence of satisfactory explanation, lead to forfeiture of appointment.

16. The pay of an Assistant Conservator of Forests will begin from the date of reporting arrival in India. Probationers who acquit themselves creditably during their course at Cooper's Hill College will begin on a salary of Rs. 350 a month. It will, however, rest with the President of the College, in consultation with the Principal Professor of Forestry, to decide whether any of the probationers, though they have obtained the College diploma in Forestry, have failed to deserve that rate of initial salary. Such probationers, if any, will begin on a salary of Rs. 250 a month; and this difference of salary will continue until the first departmental examination is passed in India.

17. Promotion, leave, and pension will be regulated by the rules of the Service for the time being. The more favourable pension rules have recently been extended to Forest officers appointed from England, who are thus placed on an equality with Public Works officers appointed from Cooper's Hill College. Any Forest officer who has rendered not less than three years' approved service as head of his department, has also been made eligible for an extra pension of Rs. 1,000 per annum. A copy of the Regulations relative to these matters can be seen on application either at the Library or the Record Department of the India Office; the principal rules, however, are contained in the Abstract of the Civil Service Regulations, as given in the "India Office List" or the "India List," published respectively by Messrs. Harrison and Sons, 59, Pall Mall, and Messrs. W. H. Allen & Co., 13, Waterloo Place, S.W., either of which can be procured through any bookseller.

18. Every candidate before proceeding to India will be required to furnish to the President of the College satisfactory evidence of his competency in riding.

General Rules.

19. Chemical, physical, and botanical laboratories, a forestry museum, a forest nursery, a library, and gymnasium are attached to the College. Means are also provided for the practice of photography. Students making use of the laboratories are supplied with the needful apparatus.

20. The responsibility for the discipline and management of the College and for the superintendence of the studies is vested in the President, under the control of the Secretary of State for India.

21. The students are distributed in divisions, under personal charge of one of the Professors or Instructors selected by the President; such tutor being responsible for exercising the proper degree of personal supervision over each student in his division, and for conducting necessary correspondence with the student's parents or guardians.

22. Each student residing in the College is provided with a separate room, and with fuel and light, also with the necessary attendance. Furniture and bedding are supplied by the College, but students are required to provide their own towels and bed linen. Meals are taken in hall. Wine and beer are not included in the ordinary fare, but can be obtained from the College cellar at fixed prices.

23. A chapel is attached to the College, which the students residing in the College are expected to attend, unless specially exempted.

24. Every student will be required to go through a course of gymnastics and also of military exercises, including the use of the rifle.

25. Students are required to wear academical dress, under such regulations as may be prescribed from time to time.

Students not nominated for the Indian Forest Service, but desirous of obtaining a Diploma in Forestry from Cooper's Hill College.

26. Students not nominated for the Indian Forest Service may be received into the College, as far as the available accommodation permits. Such students may pass through the course of instruction prescribed for the nominees of the Indian Forest Service, as detailed above, or they may be permitted to participate in the instruction given in certain subjects only. On attaining the prescribed minima of marks in the several branches of study and in totals as laid down above, they will receive, as the case may require, either the College Diploma in Forestry, or special certificates showing in what subjects they have followed the instruction and with what result.

27. Candidates who desire to be admitted under paragraph 26 may submit the necessary application at any time, but not later than the 15th day of June of the year named for admission, except with the special permission of the President. The application must be made on the prescribed forms, which can be obtained from the Secretary of the College.

28. Candidates whose applications are found satisfactory as to character and in other respects will be required to undergo an examination, to be held at the College, about the last week in June of the year for admission. The object of the examination will be to ascertain whether the candidate is qualified to follow the course of instruction with advantage (or certain parts of it, as the case may be). Candidates who do not come up to the required standard will not be admitted to the College.

The President may dispense with the whole or any portion of this examination in the case of a candidate who produces an University diploma, or other similar certificate granted by a recognized examining body.

29. Candidates admitted to the College under paragraph 26, who propose to pass through the full prescribed course of study, will be required to pay the same fees in every respect as those paid by the nominees for the India Forest Service. Candidates who do not become resident, and are admitted only to certain subjects of study, will be required to pay the fees which may be fixed in each special case in consideration of the extent of their studies. The candidates of both classes will be required to abide by the general rules of the College.

India Office,
August 1895.

FOREST EXAMINATION.

SYLLABUS.

CLASS I.

Mathematics.—The extent of the Examination will be as follows:

(*a*) Algebra, up to and including the binomial theorem, the theory and use of logarithms;

(*b*) Euclid, Books I to IV and VI;

(*c*) Plane Trigonometry up to and including solution of triangles and mensuration.

***English Composition.*—The standard of positive merit will be looked for in logical arrangement of thought, and in accuracy and propriety of expression, but large deductions of marks will be made for faults of writing and spelling.**

Candidates are also warned that, for similar faults in the use of the English language similar deductions will be made from the marks obtained in the German papers in Class I.

German.—There will be translations of unseen passages from German into English, and from English into German; the passages for translation will be taken, mainly, from standard authors, and a few simple questions may be asked on the passages set, as to the structure and character of the language, and allusions of obvious and general interest. The *viva voce* Examination will include Dictation.

CLASS II.

Any two Subjects may be taken up.

Higher Mathematics.—

*** In all the following subjects great importance will be attached to accuracy in numerical results.

Further questions and problems on the subjects of the Examination in Mathematics, Class I.

And in addition:

Statics: The equilibrium of forces acting in one plane and of parallel forces, the centre of gravity, the mechanical powers, and friction. (The graphical or geometrical method of treating such problems should be studied as well as the analytical. No application of the differential calculus to Statics will be required.)

Dynamics: Uniform, uniformly accelerated, and uniform circular motion, falling bodies and projectiles *in vacuo*, collisions and work. (Analytical methods of solution, but not the use of the differential calculus, will be involved.)

Analytical Geometry: Problems on straight line and circle.

Conic Sections: Elementary properties, with easy problems both on the analytical and geometrical methods.

French.—The passages for translation will be taken mainly from standard authors, and in other respects the Examination will proceed on the same lines as in German.

Latin.—Passages selected from the authors usually read in schools will be set for translation into English. Passages from English authors will be given for translation into Latin prose and verse; but Candidates will be allowed, in the place of verse composition, to answer questions of a simple character, which will test whether they possess a fundamental knowledge of the grammar of the language, and such an elementary acquaintance with Roman History as is required for the intelligent study of the books they have read.

Greek.—Passages will be set for translation into English from the authors usually read in schools, and in other respects the Examination will proceed on the same lines as in Latin.

English History.—The General Paper in this subject will test whether the candidates are accurately acquainted with the facts of English History, and also possess an intelligent knowledge of the meaning of the facts. The paper on the fixed period will, of course, require from the candidates more minute knowledge than the General Paper.

Botany, Chemistry, Physics, Physical Geography, and Geology.—The standard of Examination in these subjects will be such as may be reasonably expected from the education given at schools possessing appliances for practical instruction, such as a laboratory, &c. A considerable portion of the marks will be allotted for the proficiency shown in the practical part of the Examination.

Chemistry will be limited to elements of inorganic chemistry.

Physics will include elementary properties of electricity, magnetism, heat, light, and sound.

Geology, chiefly economic, including the recognition of the more familiar minerals and rocks, and their properties and uses.

CLASS III.

Both subjects may be taken up.

Drawing, Freehand.

Drawing, Geometrical.

GENERAL.

Handwriting.—In estimating the papers of candidates, a limited number of marks, namely 100 out of the maximum allotted to each subject, is assigned for handwriting.

ORDER—Ordered, that a copy be forwarded, for information, to the Governments of Madras and Bombay, the Local Governments and Administrations noted in the margin, the Inspector General of Forests, and the Comptroller and Auditor General.

Bengal.	Assam.
North-Western Provinces and Oudh.	Coorg.
Punjab.	Ajmere.
Central Provinces.	Andamans.
Burma.	Baluchistan.
	Hyderabad.

Ordered, also, that these papers be published in the Supplement to the *Gazette of India.*

[True Extract.]

F. G. SLY,

Under-Secretary to the Government of India.

No. 5054-S.-R.

GOVERNMENT OF INDIA.

FINANCE AND COMMERCE DEPARTMENT.

STATISTICS AND COMMERCE.
CUSTOMS.

RESOLUTION

Simla, the 24th October, 1895.

Read the following reports on the proceedings taken by Customs officials under the Indian Merchandise Marks Act, 1889, during the year 1894-95:

From the Chief Commissioner of Burma, No. 172-1 C.-1, dated the 10th May 1895.

From the Government of Bombay, No. 5022, dated the 3rd July 1895.

From the Government of Bengal, No. 3615, dated the 6th July 1895.

From the Government of Madras, No. 585-A., dated the 28th August 1895.

RESOLUTION.—The aggregate number of detentions under the Act during the year was 955 against 1,287 in 1893-94 and 1,208 in 1892-93, the decline on the preceding year being nearly 26 per cent. It may perhaps be inferred from the reduction, which was very great in Bombay, that, as remarked by the Collector of Customs at that port, the requirements of the Act are now more generally known and complied with. The Collector of Customs at Calcutta, where also there was a substantial decrease, says that the requirement of the law in respect of the marking of piece-goods is now more generally complied with. Still the suddenness of the decline is hardly explicable by the reasons mentioned. In Madras the number of cases increased by 33, the increase being attributed to greater activity having followed an increase in the examining and appraising staff.

2. The following table shews the number of detentions at each port at which detentions were made in the last three years:

Ports.		Number of cases in which detention was ordered.	Detention followed by confiscation.	Detention followed by release.		Detention ordered on information received.	Detention ordered without information.
				With fine.	Without fine.		
Calcutta	1892-93	344	8	285	48	2	342
	1893-94	334	4	302	23	1	333
	1894-95	285	0	244	37	0	285
Madras Godavari Tanjore	1892-93	27	1	13	13	0	27
	1893-94	21	1	9	11	0	21
	1894-95	54	3	23	26	0	54
Malabar	1892-93	2	0	1	1	0	2
	1893-94	0	0	0	0	0	0
	1894-95	0	0	0	0	0	0
Rangoon Moulmein	1892-93	23	1	21	2	0	23
	1893-94	45	2	40	3	0	45
	1894-95	41	0	37	4	0	41
Bombay	1892-93	447	4	357	86	0	447
	1893-94	647	4	593	50	0	647
	1894-95	352	0	321	30	2	350
Karachi	1892-93	365	1	167	197	0	365
	1893-94	240	0	108	138	0	240
	1894-95	223	0	104	119	0	223
Total	1892-93	1,208	15	844	347	2	1,206
	1893-94	1,287	11	1,046	225	1	1,286
	1894-95	955	3	729	216	2	953

3. Of the total number of cases in which detention was ordered in 1894-95, 337, or nearly 35 per cent. came under clause (*f*) of sub-section 2 of section 10 of the Act, which requires all piece goods to be stamped with their lengths; in the previous year such cases were 430 in number or 33·4 per cent. of the whole. There were 409 cases of counterfeit trade marks or false trade descriptions against 320 in the preceding year, while the number of cases of non-description or false description of origin coming under clause (*e*) of sub-section (1) of the same section was 210, being less than the number in 1893-94 by 327. Detention was followed by confiscation in only 3 cases against 11 in 1893-94 and 15 in 1892-93. Fines were imposed in 76·33 per cent. of the cases; in a few cases the goods were allowed to be re-shipped without payment of fine; and in the remaining cases the goods were released with a warning.

4. The working of the Act appears to have been generally satisfactory.

ORDER.—Ordered that the foregoing Resolution and the papers read in the preamble be published in the Supplement to the *Gazette of India* for general information, and that copy be forwarded to the Governments of Madras, Bombay and Bengal, and the Chief Commissioner of Burma.

J. F. FINLAY,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

FINANCE AND COMMERCE DEPARTMENT.

Burma.

No. 172-1 C.—1., dated 10th May 1895.

From—F. C. GATES, Esq., Revenue Secretary to Chief Commissioner, Burma,

To—The Secretary to the Government of India, Finance and Commerce Department.

With reference to paragraph 4 of the instructions annexed to Finance and Commerce Department letter No. 295-S., dated the 28th November 1890, I am directed to submit for the information of the Government of India a copy of letter No. 38-8, dated the 27th April 1895, from the Chief Collector of Customs, Burma, to the Financial Commissioner, Burma, containing a report on the working of the Indian Merchandise Marks Act, 1889, in this province during the year 1894-95.

No. 38-8, dated 27th April 1895.

From—The Chief Collector of Customs, Burma,

To—The Secretary to the Financial Commissioner, Burma.

I have the honour to submit the report for the official year 1894-95 on the administration of the Indian Merchandise Marks Act, 1889, in Burma, with a statement showing the number of cases dealt with for breaches of the provisions of the Act during that period.

1. The total number of detentions ordered during the year was 41 (40 in Rangoon and one in Moulmein), showing a decrease of four when compared with the number during the year immediately preceding, which was 45 (42 in Rangoon and 3 in Moulmein).

2. There were 35 detentions of consignments of piece-goods owing to the yardage not being stamped on the pieces in accordance with the requirements of section 10, sub-section (2), of the Act. Of this number, 11 were importations from the United Kingdom, 5 from the Continent, 17 from the Straits Settlements, and 2 from India. In 33 cases a fine was imposed and the goods were released after every piece had been properly stamped under Customs supervision. In the remaining two no penalty was imposed as the goods were continuations of consignments on which fines had already been inflicted and sufficient time had not elasped to enable consignees to advise the manufacturers of the requirements of the law; every piece, however, was properly stamped before delivery was given.

3. Under the head of "False trade descriptions" there was only one detention. This was an importation of five cases of butter from Amsterdam *viâ* Liverpool. When the shipment arrived the consignees reported that they were ignorant of the actual contents of the packages, and asked that a sample should be tested. The tins were labelled "Finest Dutch Butter" and one was forwarded to the Chemical Examiner for analysis. He reported that the so-called butter contained "40 per cent. of fats other than butter fat." The consignees pleaded ignorance, and as they had made no declaration as to the contents in their import bill of entry, their explanation was accepted and the consignment was allowed to be re-shipped to Europe without the payment of any penalty.

4. Under the third head of the statement, namely, "indication of country of origin," there were five detentions of matches of Japanese manufacture from the Straits. In four cases fines were inflicted and the labels and wrappers ordered to be stamped with the place of manufacture. In one instance this order was complied with and the goods were released. In the other three the consignments were allowed to be re-exported to the Straits as the importers were of opinion that opening and stamping every packet would render the goods unsaleable. In the fifth case no penalty was imposed, as the provisions of the Act had been partly complied with, and the articles were allowed to be re-shipped to the Straits.

5. With the exception of the case of "False trade description" in which notice was given by the consignee, no information was received. The whole of the detentions were made by the Customs officers in the ordinary course of their duty.

6. The amount of the fines imposed and realised during the year aggregated Rs. 1,000.

Statement showing the number of cases dealt with under the Indian Merchandise Marks Act during the years 1893-94 and 1894-95.

RANGOON CUSTOM HOUSE:
The 27th April 1895.

E. DARLINGTON,
Chief Collector of Customs, Burma.

Bombay and Sindh.

No. 5022, dated 3rd July 1895.

From—J. MONTEATH, Esq., I.C.S., Acting Secretary to the Government of Bombay,

To—The Secretary to the Government of India, Finance and Commerce Department.

I am directed to forward herewith, for the information of the Government of India, a copy of the papers noted in the margin containing the reports received from the Collectors of Customs, Bombay and Karachi, on the working of the Merchandise Marks Act, IV of 1889, during the year 1894-95, together with a copy of the Resolution, No. 5021 of to-day's date, recorded thereon by this Government.

Memorandum from the Commissioner in Sind, No. 3001, dated 3rd June 1895, and its accompaniments.

Memorandum from the Commissioner of Customs, Salt, Opium and Abkari, No. 2827, dated 19th June 1895, and its accompaniments.

No. 1533, dated 30th May 1895.

From—W. E. YOUNG, Esq., Acting Collector of Customs, Karachi,

To—The Commissioner in Sindh.

I have the honour to submit my report on the working of the Indian Merchandise Marks Act during the year 1894-95. This is the fifth annual report since the Act came into force.

2. The attached statement shows the number of cases dealt with under the Act, that is, under each of the clauses (*d*), (*e*), and (*f*) of section 10.

3. There were 223 cases during the year 1894-95 as against 240 cases in the previous year.

4. Of the 223 cases, 124 came under clause (*d*), 42 came under clause (*e*), and 57 came under clause (*f*). In 104 of the 223 cases, fines were inflicted, and in the remaining 119 cases the goods were passed with a warning.

5. The 124 cases of detention under clause (*d*) were due to—

(*a*) 59 instances of omission of origin on goods of foreign manufacture bearing English description or words ;

(*b*) 10 cases of origin being shown in much smaller letters ;

(*c*) 39 cases of origin being shown on a separate label which was detachable, and 16 of false trade description.

6. In the cases of omission of origin, in 22 instances nominal fines ranging from Re. 1 to Rs. 25 were imposed, and the goods, together with those in the remaining 37 cases, were passed after due marking.

7. In the cases where origin was shown in smaller letters, in five instances small fines not exceeding Rs. 25 were inflicted, and the goods in all 10 cases were, after due compliance with the law, allowed to pass.

8. As regards the goods having separate labels showing origin, fines were imposed in 27 cases not exceeding Rs. 30 in each case, as there was reason to suspect fraud, and in these as well as the remaining 11 cases the goods were passed after the requirements of the Act had been fulfilled.

9. Of the 16 cases of false trade description, in 10, fines ranging from Rs. 5 to Rs. 75 were imposed. Slightly heavier fines were called for in these cases, as there was reason to suspect fraud on the part of the shippers or consignees. The goods were allowed in all the 16 cases to pass after compliance with the law.

10. The 42 cases of detention under clause (*e*) were due in all cases to the goods bearing the names of British or British Indian traders without being accompanied by origin. The bulk of these goods were imported from Hamburg, Antwerp, and Trieste.

11. In 10 out of the 42 cases, fines ranging from Rs. 5 to Rs. 50 were inflicted, and in the remaining 32 cases the goods were allowed to pass with a warning after they were correctly marked according to the requirements of the Act.

12. The total number of infringements of clause (*f*) was 57. In the majority of cases, namely, 47, the lengths were shewn in chalk or other easily effaceable material, while in the remaining cases the lengths were not shown at all. In 30 cases out of the 57 importers were permitted to duly stamp the goods on payment of fines ranging from Rs. 3 to Rs. 15. In the remaining 27 cases the goods were passed with a warning after being duly marked.

13. All the detections in the cases reported on were made by Customs officers in the course of examination of goods passing through the Custom House. There were no cases during the year out of the ordinary calling for special mention.

KARACHI;
31st May 1895.

W. E. YOUNG,
Acting Collector of Customs.

No. 3001, dated 3rd June 1895.

Endorsed by the Acting Commissioner in Sind.

Submitted to Government.

2. The Acting Commissioner has no remarks to make.

No. 8823-C., dated 17th June 1895.

From—J. M. CAMPBELL, Esq., I.C.S., C.I.E., Collector of Customs and Opium, Bombay,

To—The Commissioner of Customs, Salt, Opium and Abkari, Bombay.

I have the honour to submit the report for the official year 1894-95, being the fifth annual report on the administration of the Indian Merchandise Marks Act which came into operation on the 1st of April 1889.

2. *Statement A.*—The accompanying statement (marked A) has been prepared in accordance with the instructions of the Government of India conveyed in Government Resolution No. 8960, dated 15th December 1890, Revenue Department. It shows that the total number of cases under the Merchandise Marks Act during the year was 352 against 647 in 1893-94 showing a total decrease of 295. This large decrease in the number of cases under each of the clauses (*d*), (*e*), and (*f*) of section 10 of the Act is no doubt mainly due to the fact that the requirements of the Act are now generally known and complied with.

3. During the year under report 193 infringements under clause (*d*), 124 under clause (*e*), and 35 under clause (*f*) of section 18 of the Sea Customs Act as amended by section 10 of the Indian Merchandise Marks Act, were detected. Only one of the 352 cases shown in Statement A referred to goods imported by parcel post. Fines and confiscations were inflicted in 321 cases. In 30 cases the goods under detention were passed without penalties, as the requirements of the Act were held to have been partly or fully complied with. In the remaining case the goods are still under detention pending disposal of the case in the Presidency Magistrates' Court.

4. Except 12 cases which infringed clauses (*d*) and (*e*), all the cases adjudicated were under clauses (*d*), (*e*), or (*f*) of section 18 of the Sea Customs Act as amended by section 10 of the Merchandise Marks Act.

5. Under clause (*d*) of section 18 one case occurred of paper imported with a mark alleged to be a false trade mark. The case is still pending in the Presidency Magistrate's Court. On the other hand, several cases of false trade descriptions were detected, chiefly as regards place of manufacture, materials, number, weight, and measure. Other false trade descriptions consisted of the application to goods of descriptive expressions in languages (mostly English) other than those of the country of origin.

6. *Statement B.*—Statement B shows that of the 352 seizures 26 were adjudicated by the Collector, 3 by the First Assistant Collector, and 322 by the Assistant Collector in charge of the Branch Custom House at the Docks. One is still under enquiry at the Chief Presidency Magistrate's Court. One appeal was preferred to the Commissioner against the decision of the Collector, with the result that the order passed by the Collector was upheld. No appeals were instituted against the decision of the Assistant Collector in charge of the Branch Custom House. The total recoveries under fines and redemption penalties amounted to Rs. 4,719.

7. During the year 18,738 packages of different kinds of goods, 11,372 bundles and plates of steel and iron, 2,593 bars of iron, and 1,144 slabs of spelter were detained. Statement C shows in detail the disposal of the detained packages.

8. During the year under report in 35 cases length of piece-goods was not stamped upon the pieces as required by clause (*f*) of section 18. In all cases except one a fine was inflicted. In every case pieces were required to be stamped with their length in standard yards before they were allowed to be cleared from the Customs House.

9. During the year under report no case has occurred either so important or so different from those detailed in last year's report as to require detailed mention.

10. In conclusion I have pleasure in stating that, though during the year under report the staff was busily engaged in working the new Tariff Act, the results recorded above seem to me to show that the provisions of the Merchandise Marks Act have not been neglected. The care with which the Act has been worked, as shown by the absence of any appeals from the decision of the Assistant Collector in charge of the Branch Custom House, is, I venture to think, highly creditable to Mr. Jehangir Dosabhai Framji.

No. 2827, dated 19th June 1895.

Endorsed by Commissioner of Customs, Salt, Opium and Abkari.

Submitted to Government in the Revenue Department.

2. Mr. Campbell's report shows that there has been a large decrease in the number of cases dealt with under the Merchandise Marks Act; the decrease occurs under each clause of the amended section 18 of the Sea Customs Act, but it is greatest in cases coming under clause (*e*). It is no doubt due to the fact that the provisions of the Merchandise Marks Act are now well known and that shippers understand that they will be enforced.

3. As in former years the small percentage of appeals to decisions shows that the work has been carefully done by the Collector and his Assistants, especially by Mr. Jehangir Dosabhai Framji, on whom the bulk of the work falls.

BOMBAY CUSTOM HOUSE;
The 17th June 1895.

J. M. CAMPBELL,
Collector of Customs and Opium.

Extract from the Proceedings of the Government of Bombay, Revenue Department, No. 5021, dated 3rd July 1895.

Read the following—

Memorandum from the Commissioner in Sind, No. 3001, dated 3rd June 1895—Submitting a report, No. 1533, dated 30th May 1895, from the Collector of Customs and Salt Revenue in Sind, on the working of the Indian Merchandise Marks Act, IV of 1889.

Memorandum from the Commissioner of Customs, Salt, Opium, and Abkari, No. 2827, dated 19th June 1895—Submitting a report, No. C.—8823, dated 17th idem, from the Collector of Land Revenue, Customs and Opium, Bombay, on the administration of the Indian Merchandise Marks Act, IV of 1889.

RESOLUTION.—The number of cases of breaches of the provisions of the Merchandise Marks Act dealt with at Bombay and Karachi during the year 1894-95 was 575, as compared with a total of 887 dealt with in the preceding year. The Karachi figures do not show much variation, but in Bombay there was a decline of not less than 295 or 45 per cent. in the number of cases dealt with, principally in those falling under clause (*e*) of section 18 of Act VIII of 1878, as amended by the Indian Merchandise Marks Act, which is due to the fact that the requirements of the law are now more generally known and complied with. The working of the Act both at Bombay and Karachi was generally satisfactory, and its provisions appear to have been carefully and judiciously enforced.

2. Government notice with pleasure the commendations bestowed by the Collector of Land Revenue, Customs, and Opium, Bombay, and the Commissioner of Customs, Salt, Opium, and Abkari, on Mr. Jehangir Dosabhai Framji, on whom the main part of the work falls and against whose decisions no appeals were made.

3. A copy of the papers and of this Resolution should be forwarded to the Government of India for information.

Bengal.

No. 3615-S. R., dated 6th July 1895.

From—H. H. RISLEY, Esq., C.I.E., Secretary to the Government of Bengal, Financial Department,

To—The Secretary to the Government of India, Finance and Commerce Department.

In accordance with the orders conveyed in paragraph 4 of the enclosure of your letter No. 295-S., dated the 28th November 1890, I am directed to submit, for the information of the Government of India, the accompanying copy of a letter from the Board of Revenue, No. 522-B., dated the 19th June 1895, and its enclosure, from the Collector of Customs, Calcutta, reporting on the working of the Merchandise Marks Act, IV of 1889, in the port of Calcutta during the year 1894-95. No proceedings were taken under the Act by the Collector of Customs at Chittagong, Narainganj or the Orissa ports during the year.

No. 522-B., dated 19th June 1895.

From—N. K. BOSE, Esq., Officiating Secretary to the Board of Revenue, Lower Provinces,

To—The Secretary to the Government of Bengal, Financial Department.

With reference to Government order No. C $\frac{1A}{1}$ 16, dated the 8th December 1890, and paragraph 4 of the instructions of the Government of India therein enclosed, I am directed by the Board of Revenue to submit, for the information of Government, the accompanying copy of a report, No. 248, dated the 15th April 1895, from the Collector of Customs, Calcutta, on the proceedings taken by him under the Merchandise Marks Act, IV of 1889, during the year 1894-95. This report has been delayed owing to no report having been received from the Collector of Customs, Naraingan j.

CUSTOMS.

D. R. Lyall, Esq., C.S.I.

2. It will be seen that the total number of cases in which goods were detained for infringement of the Act was 285 against 334 in the preceding year, thus showing a decrease of 49 cases or 14 per cent. This falling off is entirely due to the diminution in the number of cases of importation of piece-goods without stamp under clause (*f*), section 18 of the Sea Customs Act, as amended by section 10 of the Merchandise Marks Act. On the other hand, cases of false trade description under clause (*d*) of the same section increased from 30 in 1893-94 to 91 in 1894-95. In thirty-seven cases the goods were released without fine against 23 in the preceding year. The amount realised in fines likewise fell off from Rs. 2,444 to Rs. 2,090 in the past year.

3. From the reports received from the outports other than Naraingan j, it appears that no proceedings were taken under the Act by the Collectors of Customs at any of the outports during the year under report.

No. 248, dated 15th April 1895.

From—C. R. MARRIOTT, Esq., Collector of Customs, Calcutta,

To—The Secretary to the Board of Revenue, Lower Provinces.

I have the honour to submit the annual report of the working of the Merchandise Marks Act at this port during the year 1894-95.

2. The tables appended show that out of 285 cases in which goods were detained there were under section 10—

Clause (*d*)	...	91
„ (*e*)	...	3
„ (*f*)	...	191
		285

Of the first of these classes 88 were detained owing to false indication of origin, the goods being marked with words implying that they were manufactured or produced in some country in which they had not been manufactured or produced; in two cases there were false statements as to the material; and in another (cotton yarn) a false statement as to length.

3. Amongst the above Japanese matches were imported having words implying Swedish origin, whilst the make of the boxes was clearly an imitation of well-known Swedish boxes.

In another case margarine was imported as butter, the label having a milch-cow depicted thereon.

4. Under clause (*e*) three cases were detected, and under clause (*f*) 191.

5. From the statement appended it will be seen that fewer cases in all have been discovered, and that the marking of piece-goods is now much more carefully attended to by importers. No goods were detained on information during the year. The total amount realised in fines during the year is Rs. 2,090-1.

Statement showing the number of cases dealt with under the Indian Merchandise Marks Act during the official year 1894-95.

Madras.

Extract from Proceedings of the Board of Revenue, Separate Revenue, No. 341, dated 22nd July 1895.

Read again the following—

Proceedings of the Board of Revenue (Separate Revenue), dated 16th May 1895, Mis. No. 2153 :

Read the following—

Letter from R. B. CLEGG, Esq., Acting Sub-Collector in charge, Tanjore, to the Secretary to the Commissioner of Salt, Abkari and Separate Revenue, dated 11th May 1895, No. 385-S.R. :

I have the honour to report on the working of the Indian Merchandise Marks Act in 1894-95, along with the statement called for in Board's Proceedings, dated 30th January 1891, No. 29.

2. In the year under report there was only one case in which cognisance had to be taken of the infringement of the provisions of the Act against four in 1893-94. Four hundred pieces of cambric were imported from Penang to be dyed in indigo and re-exported and none of them was stamped with the length thereof in standard yards [section 10, sub-section (2)], or bore indication as to the place of manufacture [section 10, sub-section (1)]. On inquiry, however, the place of manufacture was ascertained to be the United Kingdom, and, after having each piece duly stamped, the importer was allowed to clear the consignment with a warning.

3 As in 1893-94, in the year under report no instance has come to notice of goods having been imported bearing a counterfeit trade mark or a false trade description, nor was any instance detected of importation of goods marked with the object of deceiving people into the belief that they were of English or British Indian manufacture.

4. There were no importations during the year direct from Europe (excluding the United Kingdom), nor from America, China or Japan. From Ceylon, Penang and the United Kingdom alone were there any importations, and the only manufactured goods imported during the year were piece-goods manufactured in the United Kingdom.

5. The circumstances warrant the inference that the rules have been, during the year under report, better understood by the merchants than before.

Read again the following—

Proceedings of the Board of Revenue (Separate Revenue), dated 21st June 1895, No. 1609, Routine :

Read the following—

Letter from W. J. H. LE FANU, Esq., Acting Collector of Sea Customs, Madras, to the Secretary to the Commissioner of Salt, Abkari and Separate Revenue, dated 12th June 1895, No. 2576-G. :

I have the honour to submit the fifth annual report on the working of the Merchandise Marks Act, IV of 1889, together with a statement in the prescribed form showing the cases disposed of during the official year 1894-95.

2. Out of 1,170 packages opened during the year under review for the purposes of the Act, 53 were detained (against 16 in the previous year), as they were found to infringe the provisions of the law. Of these, 35 came under clause (*e*) and 18 under clause (*f*) of section 18 of Act VIII of 1878 as amended by the Merchandise Marks Act. No instance occurred during the year of goods being imported with a counterfeit trade mark, and no information was received with reference to any of the cases detected, the detections in all cases having been made by the Customs staff in the course of their examination of the goods.

3. The 18 cases coming under clause (*f*)—which requires that all piece-goods should be conspicuously stamped with their lengths in yards—were chiefly importations by retail and bazar dealers, the articles in some instances not being stamped with the number of yards, and in others the word "yards" being omitted ; small fines were imposed in 10 of the 18 cases, the goods being in all cases required to be stamped with their correct lengths before they were allowed to be cleared from the Custom House.

4. The 35 cases dealt with under clause (*e*) referred principally to consignments of wines and spirits which had marks or labels affixed to them in the English language, the necessary qualification of the country of origin being, in most cases, either omitted or so placed on the labels as to be easily removeable ; while in others separate labels with only the country of origin printed on them were placed round the necks of the bottles. In 15 of these cases fines were inflicted and the remainder were passed with a warning. In every instance, however, a satisfactory compliance with the provisions of the law was insisted upon, either by the country of origin being stamped by the importers in large and distinct letters on the main labels, or by the objectionable labels being removed, and proper ones substituted before the goods were allowed to pass out of the Custom House.

5. On the whole, I consider that the Act has worked very satisfactorily during the year, and with as little friction as possible. There has been a greater number of detections than in any previous year owing to the increase in the examining and appraising staff.

6. The following is a summary of the cases :

(1) Twenty cases of port wine were imported from *France* by Messrs. . . . . On examination the bottles were found to bear labels on which the works "Superior Port Wine" in English were printed without any indication of the country of origin. The description on the labels was misleading, and the consignment was accordingly ordered to be confiscated ; but the importers were given the option of redeeming it on paying a penalty of Rs. 20 and stamping the words "made in France" conspicuously on the main labels before removing the goods.

(2—11) In 10 consignments of liquor, the descriptions on the labels were either in English or were so contrived as to cause it to be believed that they came from countries other than those in which they were manufactured. In some the place of manufacture, instead of appearing on the main label was notified on a separate one which could be easily removed. In two of the cases fines were levied, the goods being allowed to pass in every case, only after the law had been duly complied with by the qualification being impressed on the main labels.

(12) Messrs. . . . . imported 53 cases of port wine, sherry, and champagne. On examination it was found that in the case of the port wine, sherry, and champagne (in the last of which there were two brands) the bottles bore English labels with the names of London manufacturers without any corresponding indication of the country of origin, except in the case of one of the brands of champagne, which had the country of origin marked on a separate label, attached to the necks of the bottles, and not on the main labels as required by the law. The cases were ordered to be confiscated, and a redemption fine of Rs. 25 awarded. The wines were then allowed to be cleared after the country of origin had been properly indicated on the labels.

(13) A consignment of thirteen cases of liquors imported by Messrs. . . . . had no indication of the country of origin though the labels bore the names of English traders. As in this case the liquor was shown to be intended for private use, the law was not enforced.

(14—15) There were two consignments of champagne which were imported by Messrs. . . . . without the country of origin being shown on the main labels which bore English traders' names. In one of the cases a small fine of Rs. 2 was imposed, the liquor being allowed to pass in both cases on the labels being altered in accordance with the law.

(16—17) An examination of two consignments of 120 cases of brandy imported by Messrs. . . . . disclosed the fact that the words "made in Germany" on the bottles were so arranged that they might be easily removed, leaving the words "*Jules Pierre and Cie.*" conspicuously on the labels, which could only lead to the belief that the brandy was of French manufacture, which it was not. The cases were passed with a warning after the words "made in Germany" were conspicuously stamped on the upper portion of the main label.

(18) . . . . imported a case containing nine bottles of wines and spirits. The bottles were labelled with the name of a Birmingham firm, leaving it to be implied that they were of English origin as declared by the importer, but the brandies appeared to be of French manufacture from the names of the brands borne on the labels. The port and sherry were also probably of continental origin, and, as the importer had no abkari license to possess or sell, he preferred to surrender the goods which were ordered to be confiscated.

(19) A consignment of soap was found on examination to contain samples of different kinds manufactured in Italy. The card-board boxes containing the tablets were correctly labelled "made in Italy," while the cakes themselves were moulded with words ("*Paris*" —in large letters—and "*Empress Toilet Fine Soap*") indicating quite a different origin. The offence being a deliberate attempt at deception, the consignment was ordered to be confiscated and destroyed and a penalty of Rs. 30 imposed on the importer.

(20—21) Two consignments of 200 drums of bloomless oil imported from Antwerp were found marked with the words "Bloomless Raw Oil" in English, besides having a brass plate with the following words stamped on it :—"J. T. Seddon, Paint, Colour, Varnish, Oil and Grease Manufacturer, Oxford St., Hull." As the oil was declared by the importers to be of German manufacture and was unaccompanied by any indication of origin, the drums were ordered to be confiscated and a redemption fine of Rs. 25 imposed in each case. One importer having since established by production of satisfactory evidence that the oil was of English origin, the fine in his case has since been refunded.

(22) The words "Best Refined" were found to be stamped on the bands of a consignment of Belgian hoop-iron without any indication of the country of origin, which was calculated to lead purchasers to believe that it was of English manufacture. The consignment was passed with a warning after removal of the objectionable bands.

(23) A consignment of 260 bundles of hoop-iron was found to have the words "Made in France" stamped on them in English, while they came from Belgium and were certified

to be of Belgian manufacture. The iron was confiscated, but the importer was given the option of redeeming and clearing it on payment of a fine of Rs. 50, and on altering the country of origin to Belgium, which he did.

(24—26) Three consignments of cut tacks were imported from Germany in packets, which had labels on them, describing the goods in English, without any indication of the country of origin. As the description was misleading, a fine of Rs. 20 was inflicted in each case and the packets ordered to be stamped with the place of origin before removal.

(27—29) As the labels on the casks of three consignments of Portland cement described the contents in English as "Best Portland Cement," the casks were detained as they were without any indication of the country of origin. The casks were ordered to be duly stamped with the country of manufacture (Belgium) and fines of Rs. 10 in two cases and Rs. 20 in the third were imposed.

(30) A German hand-organ imported by a local merchant had the words "Phœnix" on it in large gilt letters over a flag and eagle without being qualified by the country of origin. As this description was supposed to be calculated to lead to the belief that the organ was of English or American make, which it was not, the word "Phœnix" was ordered to be removed or qualified with the country of manufacture. The importer having adopted the latter course, the case was passed with a warning.

(31) The labels put on the packets of a consignment of needles from Germany described the goods in English as "Best Steel Needles" without any indication as to the country of origin. It was resolved to confiscate the goods and to award a redemption fine of Rs. 20, the importer being required to stamp the words "Made in Germany" on the labels before removal. He paid the fine and stamped his packets as directed.

(32) Out of a consignment of 150 cases of Japan matches, 10 contained boxes with labels describing the contents in English as "Best Matches, Madras, Queen Empress," with the importer's name in Tamil, without any indication on them of the country of origin. A fine of Rs. 20 was imposed and the cases were ordered to be correctly stamped before removal, the importer being allowed the alternative of re-exporting the cases under Customs supervision to the Straits Settlements, whence they were imported.

(33) Ten cases of Japan matches had labels on them describing the contents in English as "Robber Safety Matches," but as the words "Oaker, Japan," indicating the place of manufacture, appeared on the packets in small and indistinct letters, the importer was given the option of stamping them conspicuously or returning them to the shippers, and, having elected the latter course, was allowed to return them to the Straits Settlements, whence they were imported.

(34) A consignment of steel imported from America was found branded with the words "Best Cast-steel," without any indication of the country of origin. The consignment was allowed to pass with a warning, on the importers stencilling the words "Made in America" on the bars at the Custom House before removal.

(35) A sample case of wines and spirits was imported from Germany. The labels on the bottles were so got up with the names of English, French and other manufacturers as to make it appear that the whisky, brandy, rum, &c., were from Scotland, France and the West Indies, though they had the words "Made in Germany" on them in such small characters as to be hardly perceptible. As this was clearly intended as a test shipment and was manifestly calculated to deceive, the case was confiscated.

NOTE.—One of the two consignments of matches detained was reshipped and the other still remains, the penalty being unpaid.

Read also the following—

From L. C. Miller, Esq., Acting Collector, Vizagapatam, to the Secretary to the Commissioner of Salt, Abkari and Separate Revenue, dated 10th July 1895, Dis. No. 3679-Acc.:

In reply to Board's first reminder, dated 1st July 1895, I have the honour to subjoin below a *nil* statement of cases of detections under the Merchandise Marks Act, IV of 1889, during 1894-95.

ENCLOSURE.

Statement of cases of detections under the Merchandise Marks Act, IV of 1889, for the year 1894-95.

Nil.

No. 341, dated 22nd July 1895.

RESOLUTION.—The reports of the Collector of Sea Customs, Madras, and of the Collector of Tanjore on the administration of the Merchandise Marks Act (IV of 1889) during 1894-95 are submitted to Government. There were no detentions under the Act in the other districts.

2. The total number of detentions under the Act during the year was 54. Of these, 35 were under section 18, clause (*e*), of the Sea Customs Act, as amended by section 10 of the Merchandise Marks Act, which requires the country of manufacture to be stated on the labels of certain goods, and 19 were under section 18 (*f*), which requires all piece-goods to be stamped with their length. The following statement shows the particulars of detention:

Districts and ports.	Detention ordered.	Detention followed by confiscation.	DETENTION FOLLOWED BY RELEASE.		Detention ordered on information received.	Detention ordered without information.
			With fine.	Without fine.		
Madras	53	3	23	25	.....	53
Tanjore (Negapatam)	1	.....	.....	1	.....	1
Total ...	54	3	23	26	.....	54

Of the 53 cases of detention in Madras, 18 were under clause (*f*) and referred chiefly to importations by retail dealers. Small fines were imposed in 10 cases. The goods were passed after being stamped with their lengths. In 35 cases detention was ordered under clause (*e*) of imported liquor, oil, soap, iron, steel, cement and matches, on the ground that they had been made or produced beyond the limits of the United Kingdom and British India, but the descriptions on them were in English and the indication of the country of origin was insufficient or altogether omitted. In 15 cases fines were inflicted; in one of these the goods were also confiscated; in another the fined was refunded on its being proved that the goods were the produce of the United Kingdom. In two other cases the goods were confiscated, in two others permission was granted for re-exportation, and in the others a warning was considered sufficient.

One case is reported from Tanjore under clause (*f*). It related to a consignment of cambric from Penang intended for re-exportation after being dyed in indigo; it was passed after each piece had been stamped with its length.

(*a*) Includes the Bhopal-Itársi and Bína-Guna railways.
(*b*) Includes the Godhra-Rutlam railway.
(*c*) Total earnings from 2nd April to 13th October 1894.
(*d*) Includes the Guntakal-Mysore frontier section.
(*e*) Includes the Tirhoot state railway. Although for convenience classed amongst state railways, the company's section of this line is the property of the Bengal and North-Western Railway Company.
(*f*) Total earnings from 1st July to 12th October 1895.
(*g*) Includes the Jammu and Kashmir and the Hyderabad-Shadipalli railways.
(*h*) Although for convenience classed amongst state railways, this line is the property of the Bengal Central Railway Company.
(*i*) Includes the Wardha Coal, Dhond-Manmád, Khámgaon, and Amráoti railways.
(*j*) Total earnings from 1st June to 13th October 1894.
(*k*) Includes the Mysore-Nanjangúd and the Yesvantpur-Mysore frontier sections.
(*l*) The line is being worked by the Bombay, Baroda and Central India Railway Company as a temporary measure.
(*m*) Total earnings from 1st August to 12th October 1895.

F. B. HEBBERT,
Under Secretary.

SUPPLEMENT TO

The Gazette of India.

No. 44.} SIMLA, SATURDAY, NOVEMBER 2, 1895.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the Week ending at 8 a.m. on Saturday, 26th October 1895.

Throughout the week under review high pressures and quiet weather prevailed over the whole of Northern and Central India. On the contrary, in the south of the Indian region the weather was unsettled during the whole week; pressure was low, and first on one side of the Peninsula and later on the other, cyclonic conditions were developed, which, if they never reached the intensity of a well-defined cyclonic storm, were yet sufficiently disturbing to occasion strong winds and a good deal of rain over the Peninsula and the neighbouring seas. Temperature conditions were very unsteady during the week, so that, though the means for the whole country for each day exhibited comparatively little variation from the normal, the provincial variations frequently showed large changes from day to day.

Daily Summary.—*Sunday, October 20th.*—The barometer had risen briskly over North Bombay, but had changed by small amounts elsewhere. Pressure was low over the Bay, the south of the Peninsula, and the Indus valley, while it was relatively high and uniform elsewhere. The winds were easterly and south-easterly over the west and centre of the Peninsula, northerly over the

Bay area, and variable elsewhere. The mean temperature was in defect over North-Eastern India and along the West Coast, but was in excess of the average elsewhere. Rain had fallen over the west and south of the Peninsula.

Monday.—Pressure had decreased a little over North Bombay, over Assam, and over Upper Burma, and had increased elsewhere. Readings were high over Northern and Central India, and low over the Bay and the Arabian Sea. The winds were unchanged. The mean temperature was in large defect over North Bombay, over the South Carnatic, and over North-Eastern India. Elsewhere it was in excess. The rainfall area had extended, and showers were reported from the Peninsula, the central parts of the country, and Khandesh.

Tuesday.—Pressure changes were almost everywhere very small, and the barometric distribution was little changed. Readings were fairly uniform throughout the country, though slightly higher in the north than in the south. The winds were northerly over the Bay; variable elsewhere. The mean temperature was low over Assam, Bengal, the Gangetic plain, Central India, and the north of Bombay. Rain had fallen over the greater part of the Peninsula and in Khandesh and Kathiawar.

Wednesday.—Pressure had decreased almost everywhere, the change being generally slight. High pressure areas were shown in the north-west and centre, and very uniform readings elsewhere. The winds were northerly over the Bay, and south-easterly to southerly on the west coast of the Peninsula. The mean temperature was high in Sind and over the central parts of the country, and low elsewhere. Rain had fallen over the Peninsula and in North Bombay.

Thursday.—Pressure had decreased briskly at some western stations, and changed by small amounts elsewhere. Readings were high over North-Western and North-Eastern India, and were low over the Bay and the east of the Arabian Sea. The winds were northerly over the Bay area, cyclonic on the West Coast, and variable or between north and north-east elsewhere. The mean temperature was in excess all over the central parts of the country, and in defect over Bengal and Assam, over the south of the Peninsula, and over North Bombay. The variations from the normal were large. General rain had fallen over the south of the Peninsula, and showers on the West Coast and in the Central Provinces and Central India.

Friday.—The barometer had fallen briskly to rapidly over the Bay and the south of the Peninsula, and had risen slightly to briskly elsewhere. A well-defined depression had been developed over the Bay, while the low pressure area over the Arabian Sea was still shown. The winds were cyclonic on both sides of the Peninsula, and at 8 A.M. were blowing very strongly on the Madras Coast. The mean temperature was very low over Madras and over Gujarat, Central India, and Rajputana, and was more or less in excess of the normal elsewhere. Rain was fairly general over the Peninsula and the Central Provinces, and showers had fallen in Gujarat.

Saturday.—Pressure had fallen over the central districts of Madras, and a small centre of depression was shown between Nellore and Kurnool. Elsewhere

pressure had increased, but the low pressure area off the West Coast was still shown there. The winds were cyclonic around the depression near Nellore, but in other respects the wind directions were not much changed. The mean temperature was still very low over Madras, Khandesh, Gujarat, the Central Provinces, and Rajputana, and in slight or moderate excess elsewhere. Rain had fallen generally over the Peninsula, and as scattered showers over other parts of the country, except the north-west.

Temperature.—The distribution, as regards locality, of the mean temperature with respect to the normal has been very steady throughout the week under review. The mean temperature has been steadily higher than usual over the whole of the central parts of the country, and lower than usual over North-Eastern India, the south of the Peninsula, and part of North-Western India. Within these areas of deficient heat large variations in the amount of the deficiency have occurred depending on the amount of the rainfall. Thus, during the twenty-four hours ending at 8 A.M. on the 25th the mean temperature of Rajkote was 13°, of Deesa 10°, and of Neemuch 8° below the normal, while for the twenty-four hours ending at 8 A.M. on the 26th the temperature of Kurnool and of Cuddapah was 11° below the average. The principal defect was shown in the day temperatures, which on some occasions were more than 20° below the average.

The following table gives the variations of the mean temperature from the normal in the different provinces of India for each day of the week:

Province.	October 1895.							Mean variation of week.
	20th	21st	22nd	23rd	24th	25th	26th	
	°	°	°	°	°	°	°	°
Burma	0	+0·4	+2·8	+1·1	+1·5	+2·2	+2·2	+1·5
Bengal and Assam	−0·5	0	−1·2	−1·3	−0·6	−0·3	+1·3	−0·4
North-Western Provinces and Oudh	−1·3	−0·4	−0·2	−0·1	+1·6	−1·1	−2·5	−0·6
Punjab	+2·1	+3·3	+0·7	+1·1	0	−0·7	−0·3	+0·9
Bombay	+0·4	−2·2	0	−0·5	+0·4	−1·0	−0·9	−0·5
Central Provinces and Berar	+3·6	+0·8	−0·1	+2·8	+3·3	+2·3	+1·2	+2·0
Central India and Gujarat	+4·1	−2·0	−2·2	+0·8	+0·4	−5·5	−4·6	−1·3
Sind and Rajputana	+0·9	+0·8	+0·3	+1·3	+3·4	−1·0	−1·5	+0·6
Madras	+0·9	0	−0·5	−0·8	−1·8	−1·8	−3·7	−1·1
Mean for whole of India	+1·1	+0·1	0	+0·5	+0·9	−0·8	−1·0	+0·1

The mean temperature of the whole country for the whole week was practically normal, and the variations from day to day only on two occasions equalled 1°. The provincial variations also exhibited comparatively small departures from the normal when the figures for the whole week were considered, but when the daily variations are investigated the unsteadiness of the temperature in certain parts of the country becomes very apparent. Thus, in Central India and Gujarat there was an excess of 4·1° on the 20th, and a defect of 5·5° on the 25th; in Madras an excess of 0·9° on the 20th, and a defect of 3·7° on the 25th; and in the Central Provinces an excess of 3·6° on the 20th, and a defect of 0·1° on the 22nd.

Rain.—The rainfall of the week under review has been generally similar to that which was reported during last week. Thus, over the whole region influenced by the retreating south-west monsoon current, heavy general rain has been received. At the same time unsettled conditions over the Arabian Sea have occasioned a large departure from the normal in the winds over Western India, and have given damp southerly and easterly winds to the west of the Peninsula, Khandesh, Gujarat, Kathiawar, and Central India, in place of the dry north-easterly and northerly winds which normally occupy these regions. When these unsettled conditions were most pronounced their influence was felt even beyond the districts given above, and showers were received over the whole of the central parts of the country. In North-Western India one period of feeble disturbance occurred during the week. On Sunday showers commenced in Baluchistan, and continued during Monday. Thence they extended to Cherat and Srinagar on Monday, and to Murree on Tuesday, but this was the extreme limit, and over the plains of North-Western India the weather remained fine throughout the week.

The concluding table gives the rainfall data. Effective rainfall was received in twenty-four of the rainfall divisions; slight rainfall, averaging less than one-tenth of an inch per division, in ten divisions, and no rainfall whatever in eighteen divisions. The effective rainfall ranged from 4·82 inches in the East Coast (South) to 0·12 inch in Assam (Brahmaputra), and the regions affected included the following divisions:—all the Burma divisions, except Arakan, Assam (Brahmaputra), all the Peninsular divisions, Khandesh, Berar, the Central Provinces (West), Gujarat, Kathiawar, and Central India (East). In all other parts of the country there has been either no rain or only a few unimportant showers. The third column of the table shows that the rainfall of the week has been in excess of the normal in seventeen, and in defect in thirty-two divisions, while in the case of two divisions no rain is anticipated or has been received. The region of excessive rain includes all the Peninsula divisions (except Mysore), Tenasserim, Gujarat, Kathiawar, and Central India (East). The greatest excess is reported from the Peninsula, where the East Coast (South) reports an excess of nearly 3 inches, the East Coast (Central) of over 2 inches, and Malabar, the Konkan, the East Coast (North), Madras (Central) and Madras (South) of over 1 inch. The greatest deficiency is reported from North-Eastern India, where Arakan, East Bengal, Assam (Surma), and Orissa have received more than an inch less than the normal amount.

The three concluding columns of the table show very much the same information as that exhibited by the first three. The rainfall since the 16th of October has been excessive in Malabar, Madras (South-Central), Coorg, the Konkan, Gujarat, Kathiawar, Central India (East), and the east coast districts of Madras, and a deficiency elsewhere.

The heaviest totals received during the week are—Perintalmanna (Calicut) 6·66 inches, Dharapuram (Coimbatore) 7·00 inches, Bimlipatam (Vizagapatam) 14·36 inches, Cumbum (Kurnool) 9·58 inches, Cuddalore 16·58 inches, Shiyali (Tanjore) 10·88 inches.

Asst. Meteorological Reporter to the Government of India.

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 26th October.*—Rainfall heavy in Ganjam, Kurnool, Carnatic, the south and parts of central districts; moderate elsewhere. Agricultural operations are in active progress. Standing crops are generally fair. Harvest is progressing with moderate outturn. Cattle are generally in good condition. Prices have slightly risen in the Circars, Kurnool, South Arcot, and Madura, but elsewhere are falling or stationary.

Bombay.—*For week ending 30th October.*—Rainfall slight in parts of Hyderabad, Baroda territory, Poona, and Bijapur; generally good in other districts of the Presidency Proper. More rain is wanted in parts of Broach and Poona. Cotton in five talukas of Khandesh and standing or cut crops in parts of Surat, Kaira, Ahmedabad, and Kolaba have been slightly injured by the late rain, but prospects of cotton in Broach and of late crops generally in Gujarat have much improved. Harvesting and sowing operations are in progress generally. Cotton-picking continues in Khandesh and Thar and Parkar. Fodder is insufficient in parts of Hyderabad and Thar and Parkar. The condition of agricultural stock is good, except in parts of Broach and Thar and Parkar. Prices are generally steady.

Bengal.—*For week ending 28th October.*—There was rain on the 27th and 28th instant throughout the greater part of the province, except in Behar and parts of North and East Bengal. Rain will benefit the rice crop, and will be good for the spring sowings. In Behar the absence of the October rain has been detrimental to the prospects of the rice crop. The price of common rice is generally steady.

North-Western Provinces and Oudh.—*For week ending 30th October.*—Slight rain has fallen in Jhansi; elsewhere the weather has been clear. Rain is much needed in several districts for spring sowings. Harvesting of autumn crops is progressing; outturn favourable, except in Agra, Lalitpur, and Jhansi, where crops have suffered for want of rain. Supplies sufficient. Prices are generally stationary, but rising in a few districts.

Punjab.—*For week ending 30th October.*—No rain. Harvesting of autumn crops and picking of cotton are going on. Ploughings and sowings of spring crops are in progress. Rain is badly wanted in most districts. Condition and prospects of standing crops are reported good in Amritsar and Peshawar; average to poor in other districts. Autumn crops, especially rice, are drying for want of rain in Sialkot and Shahpur. Grasshoppers, which were damaging the crops in parts of Dera Ismail Khan, have mostly died off. Cattle are generally said to be in good condition. Fodder is scarce in Hissar, Delhi, Jullundur, Sialkot, and Lahore, and sufficient elsewhere. Prices are rising in Hissar, Umballa, Jullundur, Dera Ismail Khan, and Peshawar; high in Delhi; normal in Ferozepore, Amritsar, and Lahore; above normal in Sialkot, and continue low in Rawalpindi. In Shahpur wheat is selling from 16 to 18 seers per rupee.

Central Provinces.—*For week ending 30th October.*—Weather cloudy. Good rain in Chanda and slight showers in a few other districts. The rain has benefitted both autumn and winter crops. More rain is required, especially in the northern districts, for winter sowings. Prices are above normal in Seoni, and stationary elsewhere.

Burma.—*For week ending 26th October.*—In Lower Burma crop prospects continue good in all districts. Reaping of early wet-weather paddy commenced in places. In Upper Burma transplanting of wet-weather paddy is practically

completed everywhere. Reaping of early paddy is in progress in some districts. Standing crops are backward in several districts for want of rain; elsewhere prospects continue fair, but the late ripening showers are badly wanted throughout some districts. Damage caused to crops in Upper Chindwin and Minbu. Ploughing and sowing for cold weather crops are progressing favourably. The price of paddy has risen slightly in Rangoon and Sagaing, and considerably in Minbu, and has fallen slightly in Tavoy, Thaton, and Magwe; elsewhere stationary.

Assam.—*For week ending 29th October.*—Weather seasonable. Prospects of crops are good on the whole. More rain is wanted for late rice in Darrang and Nowgong. Condition of cattle is fair. Fodder and water are sufficient.

Mysore and Coorg.—*For week ending 30th October.*—MYSORE: Slight rain throughout the State. Crops and prospects good. Prices have slightly risen in Bangalore, Kolar, Kadur, and Chitaldrug, and fallen in the Hassan district.

COORG: Rainfall good. Rice crop is in good condition. Reaping of *ragi* (*Eleusine coracana*) and picking of cardamoms continue. Coffee is ripening. Prices are normal. Water and fodder for cattle sufficient.

Berar and Hyderabad.—*For week ending 30th October.*—BERAR: Weather cool. Standing crops are in fairly good condition. Picking of cotton is commenced. Preparation of land for ensuing crop is completed. Sowings of wheat and linseed are in progress. Scarcity of fodder and water is still felt in Khamgaon and Jalgaon talukas. Prices are stationary.

HYDERABAD: Rainfall slight. Standing crops are in good condition. Fodder and pasture are available for cattle. Prices are normal.

Central India.—*For week ending 30th October.*—Some rain fell in parts of Central India during the week: more rain is required in Bundelkhand, Bhopawar, and in the Neemuch district. Agricultural operations are in progress in all parts. Crops are damaged in some parts for want of rain, but are in fairly good condition elsewhere. Agricultural stock is in fairly good condition. Pasturage good and sufficient, except in some districts of Gwalior. Prices are rising in Bundelkhand and in parts of Gwalior; high in Goona; normal elsewhere.

Rajputana.—*For week ending 30th October.*—Rainfall slight in six States. Agricultural operations are satisfactory. Crops have withered in parts of Ulwar for want of rain; other prospects reported fair, except in Jeypore, Bhurtpore, Bikanir, Jaisulmere, and Tonk. Agricultural stock is generally good. Pasturage or fodder is generally sufficient, but scarce in parts of Meywar, Shahpura, Ulwar, and Jaisulmere, and failing in Bhurtpore. Prices are rising in six States, fluctuating in two, and steady elsewhere.

Kashmir.—KASHMIR VALLEY.—*For week ending 29th October.*—No rain. Rice-threshing is going on. Spring sowings are in progress. Prices continue normal.

JAMMU PROVINCE.—*For week ending 30th October.*—No rain. Autumn harvest continues. Prices stationary. Cattle in fair condition.

Nepal.—*For week ending 26th October.*—Slight rain. Weather cloudy. Low-land rice is still being reaped.

DENZIL IBBETSON,

Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Circular No. $\frac{20}{272-2}$ F.

Extract from the Proceedings of the Government of India in the Department of Revenue and Agriculture (Forests),—dated Simla, the 25th October, 1895.

Read—

(i) Circular Resolution of this Department, No. 11-F. dated 28th June 1893, promulgating rules to regulate the constitution of, admission to, and studies and discipline at, the Imperial Forest School, Dehra Dun.

(ii) Circular of this Department, No. 9-F. dated 29th May 1895, forwarding copies of the resolutions passed by the Board of Control of the Imperial Forest School in March 1895.

(iii) Letter from the Inspector General of Forests, No. 793 dated 9th September 1895, regarding the fourth and sixth of the resolutions passed by the Forest School Board of Control in March 1895.

RESOLUTION.

The Director of the Imperial Forest School and his staff having noticed the difficulty which the students experience in intelligently assimilating the lectures with which the School course commences, and which deal with technical subjects in their relation to the practice of forestry, proposed, following the example of the Forest Schools of Europe, that the students should join the School each year on the 15th April instead of on the 1st July, in order that they might commence their studies with practical work in the forests under an Instructor, and thus become to some extent familiar with the forests and the nature of the work to be done in them, as a preliminary to the study in the class-room of sylviculture and forest-mathematics.

Under this proposal, which has received the approval of the Government of India, and to which effect will be given from the beginning of the year 1897, the School course will last $23\frac{1}{2}$ instead of 21 months as at present; and it will be necessary to hold the examination for entrance into the School in January instead of in March. The additional expenditure entailed on each student by the change will be as follows:

	Rs.
(*a*) For a European student of the Upper Class	$112\frac{1}{2}$
(*b*) „ Native „ „ „	$87\frac{1}{2}$
(*c*) „ „ „ „ Lower „	70

2. The Government of India have also approved of a recommendation by the Board of Control that Rule 15 of the Forest School Rules should be amended, so as to allow of candidates for the Lower Class who are already in Government

service being admitted into the School, even though they may be 25 years of age or over and may have been in the Subordinate Forest Service for less than three years. The conditions now imposed by Rule 13 (ii), (*a*) and (*c*), may therefore bewaived by a special order of the Local Government or Administration in the case of any Government student whom it may be in future proposed to send to the Lower Class.

3. It has also been found desirable to make some other small corrections of minor importance in the rules. Appended to this Resolution is a copy of the Forest School Rules as now amended. The alterations effected in the rules noted in the margin* will not take effect till the 1st January 1897; but the amendments made in the remaining rules† will come into force on and after the 1st January 1896.

* 4, 5, 10, 12 (i) (*e*), (v) [except the addition to the fourth subject of examination], and (viii); 13 (last clause), 14, 15 (ii) and (iii); 18, 19, 20, and 21.

† 12 (v) [addition to fourth subject of examination]; 13 (*a*), (*b*), and (ii); and 15 [new clause (iv)].

ORDER.—Ordered that a copy of this Resolution, with its appendix, be forwarded, for information, to the Governments of Madras and Bombay, the Local Governments and Administrations noted in the margin, the Inspector General of Forests, and the Comptroller and Auditor General.

Bengal.	Assam.
North-Western Provinces and Oudh.	Coorg.
Punjab.	Ajmere.
Central Provinces.	A damans.
Burma.	Baluchistan.
	Hyderabad.

ORDERED, also, that a copy be forwarded to the Foreign Department for transmission to the Durbars of such Native States as have a Forest Department.

ORDERED, further, that the Resolution, with its appendix, be published in the Supplement to the *Gazette of India*.

(True Extract.)

DENZIL IBBETSON,

Offg. Secretary to the Govt. of India.

Appendix.

Rules to regulate the constitution of, admission to, and studies and discipline, at the Imperial Forest School, Dehra Dun.

Section I.—Constitution and Studies.

1. The School is under the administrative control of the Inspector General of Forests, who is assisted by a Board consisting of—

1. The Inspector General of Forests, *President ;*
2. The Director of Public Instruction, North-Western Provinces and Oudh ;
3. The Director of the School ;
4. One Conservator from each province (not more than three serving in any given year);

with, as *Secretary*, the Assistant Inspector General of Forests.

2. The Superior Staff of the School consists of—

1. The Director,
2. The Deputy-Director,
3. & 4. Two Instructors,
5. The Vernacular Instructor,

} assisted by the Forest Officers of the School Circle, North-Western Provinces.

The Conservator of Forests, School Circle, North-Western Provinces, will ordinarily be Director of the School. The Deputy Director and two Instructors are officers of the Indian Forest Service on the Imperial List. The Vernacular Instructor is an officer of the Provincial Forest Service, also on the Imperial List.

3. The Director of the School is charged with (1) the general administration of the institution, including the regulation of the course of study under the arrangements prescribed by the Board of Control, subject to the sanction of the Government of India ; (2) the supervision of the School buildings, quarters, and gardens ; (3) the control of the accounts, and the conduct of correspondence.

4. *Courses.*—There are two courses ; one in English, the other in the Hindustani language. Each course lasts $23\frac{1}{2}$ months. The English course is that followed by the "Upper Class"; the Hindustani course, that followed by the "Lower Class." The first year's students are called "Juniors"; the second year's students, "Seniors." In the English course, students are prepared for the certificate in Forestry by the "Higher Standard"; in the Hindustani course, for that by the "Lower Standard."

The subjects taught in these courses are the following, described in the School syllabuses :

1. Forestry, including Sylviculture, Utilisation and Forest Working-Plans ; both theoretical and practical.
2. Mathematics—elementary Arithmetic, Algebra, Trigonometry, and Mechanics ; in their application to forest questions.
3. Physical Science, including Chemistry, Physics, Physiography, Geology, Mineralogy and Soils.
4. Botany, both theoretical and practical ; including the collection and preservation of plants.
5. Zoology—the classification of animals and the study of useful and dangerous species, especially of insects ; including the collection and preservation of specimens.
6. Drawing, Surveying and Estimating ; as required for forest officers.
7. Forest Engineering, theoretical and practical.
8. Forest Law, the elements of Criminal Law, and departmental organisation.
9. Forest Accounts and Procedure.

5. *Terms.*—The terms of study are as follows :

1st year—
- Preliminary term—April 15th to June 15th, in camp.
- Vacation—June 16th to June 30th.
- Rains term—July 1st to October 31st, in Dehra Dun.
- Winter term—November 1st to December 22nd, in camp.
- Vacation—December 23rd to January 5th.
- Spring term—January 6th to March 31st, in camp.

2nd year—
- Hill tour term—April 1st to May 31st, in camp.
- Vacation—June 1st to 30th.
- Rains term—July 1st to October 31st, in Dehra Dun.
- Winter term—November 1st to December 22nd, in camp.
- Vacation—December 23rd to January 5th.
- Spring term—January 6th to February 15th, in camp.
- Examinations, including survey test—February 16th to March 31st.

6. *Examinations.*—The School Examinations are :

1. Monthly, to test progress and application.
2. Final.

The *Monthly Examinations* are usually held on the last two working days of each month, as the Director may order. The marks obtained at these examinations are counted for one-fourth of the aggregate at the Final.

The *Final Examinations* are held in March of the second year, and the marks then obtained count for three-fourths of the aggregate.

7. *Certificates.*—There are two certificates obtainable in each class, after the final examinations : a "pass" certificate and an "honours" certificate. The former is granted to students who obtain over 50 per cent. of the aggregate marks allotted to all subjects, provided this includes 50 per cent. of the marks allowed for each of the subjects of Forestry, Botany, Surveying, and Engineering. The latter is granted to students who obtain over 75 per cent. of the aggregate marks allotted to all subjects, including over 50 per cent. in each individual subject. These certificates are only granted on the orders of the Board of Control, who have authority to exercise their discretion in doubtful cases.

8. *Prizes.*—The School medals are awarded by order of the Board of Control, but only if "honour" marks (75 per cent.) have been obtained. Other prizes, whether given by Government or other donors, are also awarded by the Board of Control.

9. Should any student, of the three categories enumerated in Rule 11, be unable (*a*) to appear at the final examinations, or, having appeared, (*b*) fail to pass those examinations, he will not be permitted to appear at any subsequent final examination, unless he follows a second time the whole course of instruction at the School, or, at the discretion of the Director, the second year's course.

Section II.—Admission Rules.

10. The total number of students of each class who can be admitted into the School each year will be limited to such number as the Board of Control may decide, from time to time, can be accommodated in the School. The number of studentships to be allotted each year to the respective Provinces, as well as the number of nominations to be made by the Director, will, with due regard to the total prescribed by the Board of Control, be decided by the Director of the School before the 1st of November, after consultation with the Provincial authorities as to their requirements, and communicated to the Local Governments concerned.

A.—Upper Class.

11. There are three categories of students in the Upper Class—

(1) Private Students.
(2) Students already in the Government service.
(3) Students deputed by Native States.

12. *Private Students* comprise all those students who are at present without appointments in any Forest Service, and whose object it is, by becoming possessors of Forest School certificates, to obtain employment, either in the Forest Service of the Government of India, or in that of a Native State or some other owner of forest-property.

(i) Candidates for admission to the Forest School as private students must not be less than 18 or more than 25 years of age, and their applications must be sent to a Conservator of Forests* through a Divisional Forest Officer of rank not below that of an Assistant Conservator of the 1st grade, or through a Collector or other district officer. Neither the Conservator, the Divisional Forest Officer, nor the Collector need belong to the forest circle or province in which the candidate seeks employment; but Divisional Forest Officers and Collectors may not forward to Conservators applications unsupported by the five certificates enumerated below, namely:

* Conservator of Forests, Bengal Circle, at Darjeeling.
Conservator of Forests, Assam Circle, at Shillong.
Conservators of Forests, North-Western Provinces and Oudh—
School Circle, at Dehra Dun.
Central Circle, at Naini Tal.
Oudh Circle at Naini Tal.
Conservators of Forests, Central Provinces—
Southern Circle, at Nagpur.
Northern Circle, at Jabalpur.
Conservator of Forests, Berar Circle, at Amraoti.
Conservator of Forests, Punjab Circle, at Lahore.
Conservators of Forests, Upper Burma—
Eastern Circle, at Mandalay.
Western Circle, at Mandalay.
Conservators of Forests, Lower Burma—
Pegu Circle, at Rangoon.
Tenasserim Circle, at Rangoon.
Conservators of Forests, Madras Presidency—
Northern Circle, at Waltair.
Central Circle, at Madras.
Southern Circle, at Coimbatore.

(*a*) A certificate that the candidate is a "Native of India," within the meaning† assigned to those words by section 6 of 33 Vict., Cap. 3.

(*b*) A certificate of age.

(*c*) A health certificate in the form prescribed by article 61 of the Civil Service Regulations, signed by the Civil Surgeon of the district in which the said Divisional Forest Officer's or Collector's duties lie, and testifying to the candidate's sound constitution, good vision and hearing, and general physical fitness for a rough out-door life in the Forest Department.

(*d*) A certificate of respectability and good moral character from two or more persons whose social or official position can be accepted as a guarantee of reliableness.

(*e*) A certificate from an officer of the Educational Department, of a rank not less than that of a Deputy Inspector of Schools or the Head-master of a High School under public management, to the effect that the candidate's education appears sufficiently good to give hopes of his being able to pass the entrance examination.

The last three certificates must bear date not further back than the 1st August of the year preceding that in which the candidate proposes to present himself at the entrance examination.

If any person, giving certificates as above under (*c*), (*d*), and (*e*), is in a position to mention anything more to the credit of the candidate than the certificates actually call for, he may do so.

(ii) Upon the receipt by the Conservator of any application in respect to which the preceding conditions shall have been observed, that officer may either accept or reject the application, without assigning any reason for so doing; or he may require the candidate to produce other or better certificates in person before him.

† "Native of India" means any person born and domiciled within the dominions of Her Majesty in India, or within the territories of Indian Princes tributary to or in alliance with Her Majesty, of parents habitually resident in India, and not established there for temporary purposes only. (Article 45 Civil Service Regulations.)

(iii) Conservators may, at their option, test the fitness of a candidate who desires to enter the service of Government by practical work in the forests.

(iv) Those candidates who have been approved by the Conservator will be permitted, under his recommendation, to appear at the next entrance examination for the Forest School held in his circle.

(v) The *Entrance Examination* is held in the month of January each year, on such date as may be fixed by the Director, both at the Imperial Forest School and at such centres as may be fixed from time to time by Local Governments, and under such officers, Educational, Revenue, Forest, or other, as may be appointed: provided that the date shall be communicated by the Director to Local Governments and Conservators on or before 1st November. The subjects of examination are:

		Minima pass marks. Per cent.
1. English	Conversation	50
	Composition	33
2. Arithmetic		40
3. Algebra, up to and including quadratic equations ...		40
4. Elements of Euclid, books I to IV and book VI, with examples		25
5. Mensuration—lengths, areas and volumes, with examples ...		25

The examination papers on the above subjects will be forwarded by the Director, in sealed covers, to such officials as the Local Governments may direct, in the month preceding the examination.

(vi) A Local Government may lay down rules under which the number of candidates allotted, under Rule 10, to the Province for admission into the School, shall be selected from the number of passed candidates. In such rules due regard must be had to the place taken in the examination, but the Local Government shall not be debarred from preferring, for good and sufficient reasons, a passed candidate who may have taken a lower place in the list to one higher on the list; provided that the Director may, after inspection of the papers of the selected candidates, place before the Local Government an objection to the admission of any of such candidates on the ground that he is below the required standard.

(vii) The Local Government may, if it thinks fit, exempt from the entrance examination any candidate who is a Bachelor of Arts, or who has obtained a degree or diploma of about the same standard at any University in India or in the United Kingdom or in a British Colony, or at any educational institution to which the Government of India may extend the privilege: provided that such degree or diploma shall not give such candidate a preferential claim over any candidates who have passed the entrance examination and who may appear more eligible for the Forest Service.

(viii) Prior to the admission of a student, his parents or guardians must satisfy the Director that they are willing and able to defray the expenses of the student at the School. These expenses are estimated to be not less than Rs. 822½ for each student living in native fashion, and Rs. 1,057½ in the case of those living in European fashion (*vide* Rule 21). Of these sums, parents or guardians must deposit with the Director, before the course commences, a sum of Rs. 141 in the case of native students and Rs. 188 in the case of European students, to meet the initial cost of uniform, books, instruments, stationery, and camp-equipage (*vide* Rule 18), and, in addition, Rs. 50 as caution-money.

(ix) Local Governments may, on the recommendation of a Conservator or of the Director, and in exceptional cases, allow selected private

students who have passed the entrance examination a monthly stipend, not exceeding Rs. 50, to assist them through the School course; provided that such selected private students previously execute an agreement binding themselves to serve the Local Government concerned (in the event of their obtaining the School certificate) for a period of not less than five years (*vide* Rule 17). Such monthly stipend may, in case of misconduct or unsatisfactory progress at the School, be reduced or altogether withdrawn at the discretion of the Director.

(x) The names of those private students who succeed in obtaining the School certificate will be entered by the Director in a register to be kept for that purpose, and the Conservators of those circles, in which the non-stipendiary private students may severally desire or be willing to serve, will be addressed by him with the view of obtaining appointments for such students. The Conservators concerned will, for this purpose, be furnished with the original certificates already referred to in clause (i) of this rule, the School certificates, and such other useful information, more especially regarding the physical qualifications of the students, as the Director may be in a position to furnish.

(xi) A list of private students, who may not succeed in obtaining appointments, will be forwarded by the Director to the Inspector General of Forests, who will circulate the list amongst Durbars, Conservators, and other persons likely to be in need of the services of trained forest officials.

(xii) The appointment to the service of Government of passed private students depends on the existence of vacancies in the various circles, and even a stipendiary student has no claim to such appointment.

13. *Candidates in the Government Service*, who may be deputed to the Upper Class, will ordinarily be either—

(*a*) Forest Rangers who desire to qualify themselves for further promotion in their own or to a higher class; or

(*b*) other members of the Subordinate Forest Service (Foresters and other subordinate officials) similarly desirous of qualifying for promotion.

(i) Forest Rangers may be deputed by Local Governments, provided the candidates are certified, by the Conservator under whom they are serving, to possess sufficient knowledge of English and general education and ability to enable them to profit by the course. Such officers may be above 25 years of age, and need not pass the entrance examination. While at the School they will draw the pay of their grade, and the travelling allowances to which they may be entitled under the Civil Service Regulations.

(ii) Other officers of the Subordinate Service may be deputed by Local Governments, provided that—

(*a*) they have been in that service for not less than three years;

(*b*) they have passed the School entrance examination;

(*c*) they are under 25 years of age;

(*d*) they have executed the formal agreement referred to in Rule 17.

Such officers will, while at the School, draw the pay and travelling allowances of their grade in the service; provided that the total amount sanctioned to meet the cost of their training, inclusive of travelling expenses, shall not be less than Rs. 822½ in the case of students living in the native style, and Rs. 1,057½ in the case of students living in European fashion (*vide* Rule 21).

14. *Students deputed by Native States* may be admitted on the request of the State concerned; provided that—

(*a*) they have passed the entrance examination of the School;

(*b*) they have produced the certificates required for admission, specified in Rule 12 (i).

The Durbars of Native State sending students to the School shall, before the beginning of each term, or of each year if preferred, deposit with the Director a sum sufficient to meet the expenses of the students. This sum, for the whole course, must not be less than Rs. 822½ for students living in native fashion, and Rs. 1,057½ for those living in European fashion (*vide* Rule 21).

B.—Lower Class.

15. There are also three categories of students in the Lower Class—

(*a*) Private students.

(*b*) Students in Government service.

(*c*) Students deputed by Native States.

The rules for admission to the Lower Class are the same as those detailed in Rules 12, 13, and 14 for admission to the Upper Class, with the following exceptions:

(i) Instead of the Entrance Examination, the candidate must furnish a certificate of having passed the Middle Class Examination in the North-Western Provinces and Oudh, or an equivalent standard in another province, as well as a certificate that he possesses a competent knowledge of Hindustani.

(ii) The cost of training will not be less than Rs. 658 (*vide* Rule 21) for the whole course of 23½ months.

(iii) The required deposit will be Rs. 94, and the caution-money Rs. 25.

(iv) In the case of candidates who are already in the Subordinate Forest Service and below the rank of Ranger, the restrictions imposed by Rule 13 (ii) (*a*) and (*c*) may be specially relaxed under the orders of the Local Government.

C.—General.

16. No student of European or Eurasian extraction, not already in the permanent employment of Government or of a Native State, shall be admitted into the Forest School if he is married; nor shall any such student, whether in the permanent employment of Government or of a Native State or not, marry whilst at the School or until he has joined a permanent appointment. A breach of this rule will render the student liable to dismissal from the School, or to forfeiture of any appointment in the Forest Service which may have been promised to him, or to which he may otherwise have a claim.

17. *Agreement and Security-Bond.*—Officers of the Subordinate Service, deputed to the School by Local Governments under Rules 13 (ii) and 15, shall execute a formal agreement—the sureties for the fulfilment of which should be men of position and means—to continue in the Forest Service of the Local Government concerned for a period of not less than five years after passing out of the Forest School, and on such rates of pay as may be in accordance with the existing organisation of the Department. A breach of this condition will render the defaulter and his sureties liable for the refund of the entire cost of the student's education at the School. The agreement and security-bond shall be in the appended forms, and must be executed before the student is admitted to the School. The agreement will be signed by the student and, if he is a minor, by his father or guardian also; the bond by the student and two sureties. The amount of security to be taken will be—

		Rs.
For a Lower Class student	... ...	600
„ an Upper Class student	Native	750
	European	1,000

The agreement and security-bond need not be stamped.

The same rule shall apply to private students who may be granted stipends under Rule 12 (ix), subject, however, to the proviso of Rule 12 (xii). Should any such student not be appointed to the Forest Service of Government at the end of his School course, his agreement and security-bond will be returned to him.

18. *Uniform, book, and camp allowances.*—The Director is authorised to make deductions from the pay of Forest Ranger students under Rule 13 (i), or of students of the Subordinate Service under Rules 13 (ii) and 15, or from the stipends of private students under Rules 12 (ix) and 15, to the following amounts:

				Rs.
Lower Class students		...	4 monthly, or	94 in all
Upper Class students	Native	...	6 „ „	141 „
	European	...	8 „ „	188 „

in order to meet the following items of initial expenditure, *viz.*:

	Upper Class.		Lower Class.
	Native.	European.	
	Rs.	Rs.	Rs.
Uniform and equipment	35	68	20
Books and instruments	60	60	34
Camp outfit	46	60	40
TOTAL ...	141	188	94

The Director will charge off in his accounts such portions of the above as may be necessary from time to time to meet expenditure on the items mentioned, until the whole of the amounts are exhausted, after which the student will be required to pay in cash for articles supplied.

19. *Travelling allowances of private students in receipt of stipends.*—Students holding stipends from Local Governments under Rule 12 (ix) are not entitled to travelling allowance; but, as the tours entail greater expenditure in some months than in others, the Director is authorised to make a further monthly deduction from their stipends, of Rs. 5 from Upper Class Native students and Rs. 7 from Upper Class European students, and to disburse the amounts in the following manner:

		Native Students.	European Students.
		Rs.	Rs.
Monthly travelling allowances...	15th April-15th June, November-March, 1st year ...	4	8
	April-May, November-February, 2nd year...		
Or for 13 months ...		52	104
Special additional allowances for hill tours		30	22
„ „ „ for Punjab tour		35½	38½
TOTAL ...		117½	164½

20. Should the Conservator of a Circle from which any Government student of the Subordinate Service is deputed to the School, under Rule 13 (ii), prefer it, he can, subject to the orders of his Government, authorise the Director to pay travelling allowance to such student at the rates given in Rule 10, instead of at the rates allowed by the Civil Service Regulations. And in the case of Lower Class Government students, deputed to the School under Rule 15, he may similarly authorise the payment of travelling allowance at the following rates, instead of the rates permissible under the Civil Service Regulations:

	Rs.
Monthly travelling allowance @ Rs. 4	52
Special hill tour allowance	22
„ Punjab tour allowance	20
TOTAL ...	94

which rates are equivalent to a permanent travelling allowance of Rs. 4 per month for the whole course.

21. *Estimated expense of training.*—It has been calculated that, in addition to the amounts specified in Rule 18 for cost of uniform, books, &c., and camp-equipment, and in Rules 19 and 20 for travelling, the minimum monthly subsistence money for students comes to Rs. 20, 24 and 30, respectively; so that the minimum pay and travelling allowances of Government students under Rule 13 (ii), and the minimum stipends for stipendiary students under Rule 12 (ix), should not be less than Rs. 35 and Rs. 45, respectively, nor should the minimum pay and travelling allowances of Lower Class students (Rule 15) be less than Rs. 28. Thus, the minimum cost of training will be as follows:

	Lower Class.	Upper Class.	
		Native.	European.
	Rs.	Rs.	Rs.
Subsistence money	20	24	30
Uniform, books, and camp outfit	4	6	8
Travelling allowance	4	5	7
TOTAL PER MENSEM ...	28	35	45
Or for the whole course of 23½ months	658	822½	1,057½

The same amounts should be taken as minima in calculating the allowances to be deposited on account of students from Native States under Rules 14 and 15, or provided by parents and guardians for the cost of training of private students.

Section III.—Disciplinary Rules.

22. *Quarters.*—The Director will allot to students, on their arrival in Dehra, such quarters as may be available in the School buildings or in the houses rented by him for students' accommodation. The School quarters are tenable during

the whole period of the students' course, and the rent is Rs. 2 monthly for each student, or Rs. 4 for each room. Students for whom there is no accommodation in quarters or in houses rented by the Director, or who may prefer it, can, with the permission of the Director, reside in the town in lodgings selected by themselves; but in that case the Director will accept no responsibility for the rent.

All students, living in quarters or in the rented houses, are expected to abide by such orders as the Director may issue from time to time for the purpose of ensuring cleanliness and sanitation.

No dogs are allowed in quarters, nor may dogs or horses be brought inside the School grounds.

Breakages of furniture, &c., in the quarters or School buildings must be paid for by the students. Students are responsible for the acts of their servants.

23. *Uniform.*—All students must wear the School uniform, which consists of a suit of khaki drill with white-metal buttons, and a grey turban of prescribed pattern, for the hot weather, and of khaki serge with similar buttons for the cold weather and camp. Those students who become members of the Dehra Dun Mounted Rifles are, however, permitted to wear the undress uniform of the corps, which also consists of a suit of khaki drill, of pattern similar to that of the School. Students who are Volunteers will wear, as head-dress, a brown shikar hat while at the School, and the regular corps helmet when on parade. Native students may dispense with turbans, or wear other head-dress, only with the Director's special permission. Uniform must always be worn inside the School building. It must also be worn in the School grounds up to 5 P.M.

24. *Uniform and Camp Equipment.*—The uniform of members of the Dehra Dun Mounted Rifles may be obtained through the corps staff; that of other students through the Storekeeper of the School, on the Director's order. As camp equipment each student requires—

(1) A small tent, not larger than 10 feet × 8 feet.

(2) A camp bed.

(3) A small camp table.

(4) A camp chair or "morah."

These articles are made at the School and issued at cost price to students.

25. *Books and Instruments.*—The list of books and instruments required by each student will be published by the Director from time to time. The articles must be purchased from the Director, who endeavours to obtain them of the best quality procurable, consistent with cheapness. No article will, however, be issued by the Storekeeper, except (*a*) on order of the Director, or (*b*) on cash payment.

Copies of the Forest Acts and Forest Code, as also surveying instruments and herbarium presses, are issued on loan, and students using them will be responsible for their safe custody and return.

26. *Leave.*—During the course of instruction, no student may leave Dehra without the written order of the Director. Nor may students, while in camp, leave the camp head-quarters without the written order of the Deputy-Director or the Instructor in charge. Subsidiary rules regarding leave will be made by the Director from time to time.

27. *Holidays.*—During the rains term, Saturday will usually be observed as a holiday or devoted to excursions. In camp, it will ordinarily be a half-holiday. Such of the usual gazetted holidays as are allowed will be notified as such from time to time.

28. *Punishments.*—Students are liable to the following punishments:

(1) Reprimand by the teacher in class.

(2) Reprimand by the Director or the Deputy-Director at any time.

(3) Reprimand before a meeting, convened by the Director, of not less than three School officers, one of whom must be either the Director or the Deputy-Director. The proceedings of the meeting will be reported to the Conservator or the Native State deputing the student, or to his parents or guardians if he is a private student; and, if the meeting so decides, a note of them will be made on his final certificate.

(4) The Director, acting with the consensus of the meeting referred to under (3), has power to inflict, in addition, a fine to the extent of one-third of the salary or allowances of the student for a period not exceeding three months.

(5) The Director, acting with the consensus of a full meeting of the School officers presided over by himself, has power to dismiss any student for misconduct; and a student thus dismissed cannot be re-admitted to the School. The Director may remand any student who, in his opinion, is not sufficiently promising.

29. *Monthly Reports.*—A progress report on the work of each student will be issued monthly by the Director. It will record the number of marks obtained by the student at the last monthly examination, his application to his studies, and his conduct generally. It will be sent, for Government students or private students in receipt of stipends, to the Conservator of the Circle from which the student is deputed; for Native State students, to such person as the Durbar may direct; and for ordinary private students, to the parent or guardian concerned.

30. *Library.*—The books in the School Library are available for the use of students under such rules as the Director may make from time to time. Books of reference must be consulted in the library itself, and no books may be taken away except after application to the librarian and entry in a register.

31. *Museum.*—The Museum and Herbarium are also available for the use of students; but the objects in the museum may not be handled or removed without the express permission of the Director or the Deputy-Director. Permission to consult the herbarium may be obtained from the Director or the Deputy-Director, but the plants must be kept in their order as arranged, and no sheets removed or altered without permission.

32. *Athletic Sports.*—The gymnasium and the tennis-courts will be available for the use of students during all recreation hours on week-days. Cricket and football may be played on the old parade ground. Students are recommended to join the School Athletic Club, the subscription to which is Rs. 4 yearly, and half-rates for those who do not play all the games.

Forms of Agreement and Bond to be executed by students already in the service of, or in receipt of stipends from, Government, previous to entry into the Forest School, Dehra Dun.

Articles of Agreement made and entered into this day of 18

BETWEEN

of

of the first part

of

of the

son of the said

second part and the Secretary of State for India in Council hereinafter referred to as the Secretary of State of the third part. Whereby each of the parties hereto so far as the covenants and conditions on his own part are to be observed and performed covenants with the other of them as follows:

1. The said hereby of his own free will and consent and with the approbation and consent of the said testified by the execution by him of these presents agrees with and to the Secretary of State his successors in office and assigns that he the said shall well and faithfully pursue his studies at the Government Forest School, Dehra Dun, and qualify for the Forest Service of the Government of British India or of any Local Government.

2. The said shall after completing his studies at the said Forest School and if so required to do serve the Secretary of State his successors in office and assigns in the Forest Department of the Government of British India or of any Local Government for a period of not less than

five years and shall during the whole of such period diligently and efficiently do all acts and discharge all duties which may be required to be done by him in his capacity as an officer of the said Department.

3. The Secretary of State his successors in office and assigns hereby engages to educate the said at the Dehra Dun Forest School in all matters relating to forest service forest works and forest administration that it may be deemed necessary by the Director of the said School to teach the said .

4. The Secretary of State shall pay the said during the whole period of his stay at the said School at and after the rate of Rs. per month and thereafter while the said shall faithfully and diligently serve as an officer of the said Forest Department at and after the rate of not less than Rs. per month and the said shall be entitled to all the rights and privileges in respect of pay pension and promotion accorded to officers of the said Department for the time by the Rules and Regulations of the Department.

5. Lastly it is hereby agreed and declared that the Secretary of State his successors in office or assigns shall be at liberty to rescind this agreement on account of the negligence failure to attend to duty idleness or any insubordination or misconduct on the part of the said and to dismiss him from the said Forest School or the service of the said Department and the said shall not be entitled to any of the privileges hereby imposed on him but the said or shall thereupon refund to the Secretary of State his successors in office and assigns the total cost including the monthly payments made to the said while at the said School incurred by the Secretary of State or his successors in office or assigns in respect of the education of the said at the said School. IN witness whereof the said parties to these presents have hereunto set their respective hands and seals the day and year first above written.

Know all men by these presents that we of (principal obligor) of and of (sureties) are jointly and severally bound to the SECRETARY OF STATE FOR INDIA IN COUNCIL in the sum of Rs. to be paid to the said Secretary of State his successors in office or assigns or his or their certain attorney or attorneys for which payment well and truly to be made we bind ourselves our heirs executors administrators and representatives and each of us binds himself his heirs executors administrators and representatives firmly by these presents sealed with our seals and dated this day of 18 .

WHEREAS the Secretary of State for India in Council for himself and his successors in office and assigns has engaged to educate the said at the Dehra Dun Forest School in all matters relating to forest science forest works and forest administration that it may be deemed necessary by the Director of the said School to teach the said and has also agreed to pay him during the whole period of his stay at the said School at and after the rate of rupees per month and whereas the cost per annum of such education without any such allowance being included is estimated to be Rs. which shall be taken to be the actual cost for the purpose of these presents and whereas in consideration of such education and pay to be given to the said as aforesaid by the said Secretary of State and his successors in office and assigns the said has agreed with the said Secretary of State his successors in office and assigns that he will after completing his studies at the said School and if required to do so serve in the Forest Department of the Government of British India for a period of not less than five years during the whole of which time he will diligently and efficiently do all acts and discharge all duties which may be required of him to be done in his capacity as

an officer of the said Department. AND WHEREAS the said Secretary of State has also on his part agreed that the said shall be paid for such service at and after the rate of not less than rupees per month and shall be entitled to all the rights and privileges in respect of pay pension and promotion accorded to officers of the said Department for the time being by the Rules and Regulations of the Department. AND WHEREAS for the purpose of securing and indemnifying the said Secretary of State his successors in office and assigns against all loss and damage which he or they might or may in any way suffer by reason of the said leaving without permission the service of the said Secretary of State his successors in office or assigns in less than five years after the completion of his studies at the said School and for the purpose also of securing the refund to the said Secretary of State his successors in office and assigns of the total cost including the monthly payments made to the said while at the said School incurred by the said Secretary of State or his successors in office or assigns in respect of the education of the said at the said School and in consideration of the payment and education so as aforesaid to be made and given to the said at the said School and as one of the conditions of the admission of the said to the said School it has also been agreed that the said and the said and as his sureties should execute the above-written Bond subject to the condition hereinafter contained. Now the condition of the above-written Bond or obligation is such that if the said shall well and faithfully and diligently pursue his studies at the said School and qualify for the said forest service and shall also after completing his studies at the said Forest School and if so required to do serve the said Secretary of State his successors in office and assigns in the Forest Department of the Government of British India or of any Local Government for a period of not less than five years and shall during the whole of such period diligently and efficiently do all acts and discharge all duties which may be required to be done by him in his capacity as an officer of the said Department and if the said and or either of them their or either of their heirs executors administrators and representatives shall well and truly indemnify the said Secretary of State his successors in office and assigns against all loss and damage which he or they might or may in any way suffer by reason of the said giving cause for dismissal either while at the said School or while in the service of Government thereafter or of his leaving the service of the said Secretary of State his successors in office or assigns without permission in less than five years after the completion of the studies of the said at the said School and if the said and or either of them their or either of their heirs executors administrators or representatives shall also pay to the said Secretary of State his successors in office or assigns all sum or sums in any way expended paid or incurred by the said Secretary of State his successors in office or assigns in respect of the education of the said at the said School then the above-written Bond or obligation shall be void otherwise the same shall remain in full force and virtue. PROVIDED ALWAYS and it is hereby expressly agreed and declared that these presents shall be treated and considered as entered into under the orders of the Government of India for the performance by the said and and of a public duty and an act in which the public are interested within the meaning of section 74 of Act IX of 1872 of the Legislative Council of India.

In WITNESS, &c.

Notification by the Government of India, Finance and Commerce Department, No. 4760-S. R., dated Calcutta, the 29th November 1892.

In exercise of the powers conferred by section 8 of the Indian Stamp Act (I of 1879), the Governor General in Council is pleased to remit the duties payable on the agreements and security-bonds required to be executed, under the Rules to regulate appointments and promotions in the Provincial Forest Service, by students and their sureties previous to entry into the Forest School, Dehra Dún.

(*a*) Includes the Bhopal-Itársi and Bina-Guna railways.
(*b*) Includes the Godhra-Rutlam railway.
(*c*) Total earnings from 2nd April to 20th October 1894.
(*d*) Includes the Guntakal-Mysore frontier section.
(*e*) Includes the Tirhoot state railway. Although for convenience classed amongst state railways, the company's section of this line is the property of the Bengal and North-Western Railway Company.
(*f*) Total earnings from 1st July to 19th October 1895.
(*g*) Includes the Jammu and Kashmir and the Hyderabad-Shadipalli railways.
(*h*) Although for convenience classed amongst state railways, this line is the property of the Bengal Central Railway Company.
(*i*) Includes the Wardha Coal, Dhond-Manmád, Khámgaon, and Amráoti railways.
(*j*) Total earnings from 1st June to 20th October 1894.
(*k*) Includes the Mysore-Nanjangúd and the Yesvantpur-Mysore frontier sections.
(*l*) The line is being worked by the Bombay, Baroda and Central India Railway Company as a temporary measure.
(*m*) Total earnings from 1st August to 19th October 1895.

SIMLA, *the 31st October 1895.*

Printed and published for the GOVERNMENT OF INDIA *at the* GOVERNMENT CENTRAL PRINTING OFFICE, *Simla.*

SUPPLEMENT TO

The Gazette of India.

No. 45.} CALCUTTA, SATURDAY, NOVEMBER 9, 1895.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

FINANCE AND COMMERCE DEPARTMENT.

REPORTS OF REGISTRARS OF JOINT STOCK COMPANIES ON THE WORKING OF THE INDIAN COMPANIES ACT, VI OF 1882, DURING THE OFFICIAL YEAR 1894-95.

No. 256 S., Calcutta, the 9th November 1895.

RESOLUTION—By the Government of India, Finance and Commerce Department.

READ the following communications submitting the reports of Registrars of Joint Stock Companies on the working of the Indian Companies Act, VI of 1882, during the official year 1894-95 :—

From the Government of Madras, No. 1249, dated the 13th June 1895.

From the Government of Bombay, No. 5382, dated the 16th July 1895.

From the Government of Bengal, No. 2031-P., dated the 11th July 1895.

From the Government of the North-Western Provinces and Oudh, No. 494—VII—117-B., dated the 31st May 1895.

From the Government of the Panjab, No. 23, dated the 17th June 1895.

From the Chief Commissioner, Central Provinces, No. 5521, dated the 22nd July 1895.

From the Chief Commissioner, Burma, No. 196—I-T-7, dated the 13th May 1895.

From the Chief Commissioner, Assam, No. 726-Misc.—2469-G., dated the 6th May 1895.

From the Chief Commissioner, Ajmere-Merwara, No. 706—817, dated the 24th June 1895.

From the Chief Commissioner, Coorg, No. 1131, dated the 10th July 1895.

From the Secretary for Berar to the Resident, Hyderabad, No. 141, dated the 22nd May 1895.

From the Resident in Mysore, No. 2320, and Nos. 2664 and 4044, dated, respectively, the 15th July and 11th October 1895.

RESOLUTION.—The number of companies and the capital invested in them stood as follows at the end of each of the last two years :—

	At end of 1893-94.	At end of 1894-95.
Number of companies	1,065	1,204
Nominal capital, Rx.	36,251,188	38,158,518
Paid-up capital, Rx.	27,510,059	27,668,569

There was thus an increase of 139 in the number of companies, being at the rate of 13 per cent., and of Rx. 1,907,330 in the nominal capital, being at the rate of 5·3 per cent.

The changes made in the year, which produced the results shewn above, were :—

(1) the capital of 142 companies was increased by (nominal) Rx. 690,221, (paid-up) Rx. 799,312 ;

(2) the capital of 13 companies was reduced by (nominal) Rx. 22,500, (paid-up) Rx. 99,567 ;

(3) 57 companies with a nominal and paid-up capital of Rx. 1,385,777 and Rx. 1,009,152, respectively, ceased to work ; and

(4) 196 new companies with a nominal and paid-up capital of Rx. 2,625,386 and Rx. 452,454, respectively, were registered during the year.

The table in paragraph 3 shews that the greatest part of the increase in the paid-up capital, namely, Rx. 123,592, was in Bombay.

2. The formation in 1893-94 of small native provident companies in certain districts of the Bengal Presidency was continued on a larger scale in 1894-95 when the number of such companies registered was 87, the number registered in the preceding year having been 64.

The nature of the operations of these companies, which are mainly confined to some of the eastern districts of Bengal, is described in the subjoined extract from the report of the Commissioner of the Presidency Division for 1894-95:

The idea of these companies seems to have originated in Backerganj, and to have spread through the eastern sub-divisions of the district during 1893 and 1894. The details of the companies are given below:—

Death	companies	85
Marriage	,,	15
Birth	,,	3
Fever	,,	1
Pilgrimage	,,	1
	TOTAL	105

* * * The principles of all these companies are nearly the same. There is no capital in the ordinary sense of the word, and there are no funds invested. A maximum number of shares is fixed. The price of each share is generally a rupee—often less. There is an entrance fee of a few annas. In the smaller companies the share-capital seems to be mostly swallowed up in preliminary expenses, such as cost of registration, establishment, postage, printing, etc. In case of death companies each share-purchaser can hold only one share. He has the right to name another person, who on the death of the shareholder applies to the directors, who proceed to levy a sum from each of the other shareholders, which is called the death-fee and is generally of the same value as the share. The amount of fees thus collected is paid to the nominee, who then retires from connection with the company. The nominee has thus an interest in the speedy death of the shareholder by whom he is nominated. The marriage and birth companies are conducted on the same principles. When the nominee, who must be a female, is married, or when she has a child, the shareholder is entitled to collect a fee from each of the other shareholders. When a company is newly started, the first few calls for fees are paid with fair punctuality, and the first few nominees or shareholders, as the case may be, receive the intended benefits. After a time, as calls multiply, the shareholders get tired of paying, and cease to do so, preferring to forfeit their shares. The claims of the nominees or shareholders multiply, but there are no funds to meet them and the company collapses * * * The object of the fever company was to provide fever-stricken people with funds for treatment out of the subscriptions, which were at the rate of half an anna a month. It has ceased to exist. The Pilgrim's Provident Fund is divided into 2,000 shares. Each shareholder has to pay 8 annas on admission. Each group of eight persons has to pay a sum not exceeding R2 a month. If all the shares were taken up, eight persons would get R400 a month while on pilgrimage. But if more than eight persons go on pilgrimage in one month, four-fifths of the amount realised will be given proportionately to them. If any one of them dies in a holy place, his nominee or heir will get the amount three months after his death. But no person will get anything if he goes on pilgrimage within four months of his entering as a shareholder.

3. The following table shews the number of companies and the amount of paid-up capital in each of the provinces in the last two years:—

PROVINCE.	NUMBER OF COMPANIES.		PAID-UP CAPITAL.		Increase or decrease per cent. in capital in 1894-95.	Provincial proportion of paid-up capital to all paid-up capital in 1894-95.
	1893-94.	1894-95.	1893-94.	1894-95.		
			Rx.	Rx.		
Bengal	402	508	12,520,663	12,537,148	+ 0·13	45·3
Bombay	249	264	10,790,265	10,913,857	+ 1	39·5
Madras	195	206	1,946,082	1,922,616	— 1	6·9
North-Western Provinces and Oudh	55	61	916,923	931,802	+ 2	3·4
Panjab	21	20	462,685	478,100	+ 3	1·7
Burma	16	16	149,405	171,974	+ 15	·6
Cenrtal Provinces	12	12	261,222	264,607	+ 1·3	1·0
Assam	2	2	782	912	+ 17	...
Mysore	103	105	383,172	369,056	— 3·7	1·3
Hyderabad Assigned Districts	3	3	2,991	2,991	...	...
Ajmere-Merwara	7	7	75,809	75,506	— 0·5	·3
TOTAL	1,065	1,204	27,510,059	27,668,569	+ 0·58	...

These figures shew that 85 per cent. of the capital invested in joint stock enterprise is invested in companies registered in Bengal and Bombay.

4. The following table shews the distribution of the aggregate capital in the principal classes of joint stock enterprise:—

COMPANIES.		Number.	Nominal Capital.	Paid-up Capital.
			Rx.	Rx.
Banking, Loan and Insurance	Banking and loan	290	6,492,935	3,985,833
	Insurance	161	561,130	86,957
	TOTAL	451	7,054,065	4,072,790
Trading	Merchants and traders	143	3,126,807	1,925,946
	Navigation	8	1,061,500	874,546
	Railways and tramways	10	932,000	820,675
	Co-operative associations	24	94,740	59,433
	Shipping, landing, and warehousing	5	76,060	60,010
	TOTAL	190	5,291,107	3,740,570
Mills and Presses	Cotton mills	57	5,645 225	4,857,234
	Jute mills	13	2 144,225	1,463,476
	Mills for cotton, jute, wool, silk, hemp, etc.	75	6,190,762	4,420,484
	Cotton and jute screws and presses	105	1,704,551	1,424,316
	Other mills and presses	40	987,350	677,045
	TOTAL	290	16,672,113	12,842,555
Tea and other Planting Companies.	Tea	154	4,542,308	3,672,356
	Coffee and chinchona	5	43,100	39,199
	Others	13	148,900	100,724
	TOTAL	172	4,734,308	3,812,279
Mining and quarrying		58	2,679,450	1,801,163
Ice manufacture		11	217,875	172,804
Sugar manufacture		5	307,500	163,725
Breweries		3	170,000	169,540
Others		24	1,032,100	893,143
	GRAND TOTAL	1,204	38,158,518	27,668,569

Over 46 per cent. of the paid-up capital is invested in mills and presses, chiefly for working or pressing cotton, jute, wool, and silk. The greater number of these are registered in Bombay, that Presidency representing under this head a paid-up capital of Rx. 8,493,002, being nearly two-thirds of the whole, most of it invested in cotton mills and presses. Rx. 2,691,748 represent the paid-up capital invested in mills and presses registered in Bengal, a large number of them being jute mills and presses.

The paid-up capital invested in banking or loan companies amounts to Rx. 4,072,790, of which Rx. 2,381,132 are in companies registered in Bengal and Rx. 998,748 in Madras.

Trading companies have a paid-up capital of Rx. 3,740,570, of which Rx. 874,546 are invested in coasting and river steamer companies, and Rx. 820,675 in railways and tramways. The bulk of the railway and tramway capital is invested as follows:—

	Rx.
Bombay Tramways	309,800
Darjeeling-Himalayan Railway	175,000
Tarkessar Railway	175,000
Rangoon Steam Tramway	60,000
Powayan Steam Tramway	29,400
Deogarh Railway	27,500
Bengal Provincial Railway	20,200

The Nilgiri Railway with a paid-up capital of Rx. 192,500 went into liquidation during the year.

In tea, coffee, and other plantations Rx. 3,812,279 of paid-up capital are invested, of which Rx. 3,633,133 are held in Bengal, most of the tea companies being registered in Calcutta.

Of the Rx. 1,801,163 invested in mining and quarrying companies, Rx. 1,581,860 are in companies registered in Bengal, of which Rx. 760,955 are in coal-mining companies, and about Rx. 697,000 in gold-mining companies.

5. The figures below compare the paid-up capital of each of the last two years under each of the principal groups :—

	Paid up in—	
	1893-94.	1894-95.
	Rx.	Rx.
Banking and loan	3,731,032	3,985,833
Merchants and traders	1,878,060	1,925,906
Mills for cotton, jute, wool, silk, and hemp	10,730,887	10,741,194
Cotton and jute presses	1,416,803	1,424,316
Tea	3,713,089	3,672,356
Mining and quarrying	1,797,243	1,801,163
Navigation	873,940	874,546
Railways and tramways	990,800	820,675

There was a pause in the investment of capital in mills, the increase being only 0·1 per cent. In railways and tramways there was a decrease of 17·17 per cent. In mining and quarrying the increase was 0·22 per cent. In tea there was a decrease of 1·1 per cent. In cotton and jute presses the increase was 0·53 per cent. There was no appreciable increase in fact except in trading and money-lending: under merchants and traders there was an increase of 2·55 per cent., and under banking and loan the increase was 6·83 per cent.

6. The following table shews the number of companies under each category during the last five years :—

Companies.		1890-91.	1891-92.	1892-93.	1893-94.	1894-95.
Banking, Loan, and Insurance.	Banking and loan	275	259	256	266	290
	Insurance	13	14	8	72	101
	Total	288	273	264	338	451
Trading	Merchants and traders	107	119	117	120	143
	Navigation	7	8	7	8	8
	Railways and tramways	11	11	10	12	10
	Co-operative associations	18	24	24	25	24
	Shipping, landing, and warehousing	6	6	5	7	5
	Total	149	168	163	172	190
Mills and Presses	Cotton mills	56	57	59	57	57
	Jute mills	11	11	12	12	13
	Mills for working cotton, jute, wool, silk, hemp, etc.	63	63	68	71	75
	Cotton and jute screws and presses	76	83	87	101	105
	Other mills and presses	27	31	37	43	40
	Total	233	245	263	284	290
Tea and other Planting Companies.	Tea	140	144	142	148	154
	Coffee and chinchona	6	5	5	5	5
	Others	8	9	10	12	13
	Total	154	158	157	165	172
Mining and quarrying		63	57	54	52	58
Ice manufacture		12	12	12	10	11
Sugar manufacture		2	2	3	3	5
Breweries		3	3	3	3	3
Others		24	32	37	38	24
	GRAND TOTAL	928	950	956	1,065	1,204

The classification in the foregoing table of "cotton mills," "jute mills," and "mills for working cotton, jute, wool, silk, hemp, etc.," is taken from the articles of association ; but of the mills in the last of these three groups, the largest number are cotton mills.

7. The following table shews, so far as reported, the total number of joint stock companies at work in India with their nominal and paid-up capital at the end of each of the last ten years :—

Year.	Companies at work.	Nominal capital.	Paid-up capital.	Increase or decrease of paid-up capital.
		Rx.	Rx.	Rx.
1885-86	805	28,543,437	21,002,568	+ 366,724 = 2 %
1886-87	888	29,136,165	21,380,442	+ 377,874 = 2 „
1887-88	910	30,254,284	22,326,192	+ 945,750 = 4 „
1888-89	895	31,339,845	22,997,508	+ 671,316 = 3 „
1889-90	886	32,321,731	23,684,202	+ 686,694 = 3 „
1890-91	928	35,058,776	24,458,445	+ 774,243 = 3 „
1891-92	950	36,023,238	26,585,481	+ 2,127,036 = 9 „
1892-93	956	35,372,842	26,793,186	+ 207,70=0·578 „
1893-94	1,065	36,251,188	27,510,059	+ 716,873 =2·68 „
1894-95	1,204	38,158,518	27,668,569	+ 158,510 =0·58 „

8. The statistics of companies limited by guarantee, so far as they go, shew that there were 33 such companies at the close of 1893-94, and that, with the addition of 11 companies registered in 1894-95, there were 44 such companies at the close of the year.

9. The fees realised and the expenditure in each province last year were—

Province.	Fees.	Expenditure.
	₹ a. p.	₹ a. p.
Bengal	20,597 4 0	637 10 1
Bombay	10,781 8 0	1,045 10 1

Resolution passed in the Public Health Section of the Indian Medical Congress regarding the present organization of the Sanitary Service in India.

RESOLUTION.

AT the Indian Medical Congress held in Calcutta in December 1894, a discussion, which was initiated upon a paper read by Dr. W. J. Simpson, took place upon the need for a Sanitary Service for India. This discussion will be found recorded in the Transactions of the Congress to which the Governor General in Council desires to invite the attention of Local Governments and Administrations.

2. The Governor General in Council has, in connection with this discussion, had under consideration the question of the constitution of, and work performed by, the Sanitary Department. In the first place His Excellency in Council would remark that the sanitation of the army and of the military cantonments has already been completely separated from that of the general civil population, as was suggested at the Congress. The Cantonment Committee is the local authority responsible for the sanitation of a cantonment, in accordance with the regulations issued under the Cantonments Act. Neither do the local civil authorities control the administration of sanitary matters within cantonments, nor has the Sanitary Commissioner with the Government of India any executive power of interference in such matters within cantonments. He acts as the adviser of the Government of India on sanitary points connected with the construction of barracks and hospitals for European and Native troops, and on measures for improving the sanitary condition of cantonments and all matters connected with the health of the army in India. He also exercises a general supervision over the compilation of the mortuary and health statistics of the army. Whatever action is taken on his advice is the action of the Government of India and not that of the Sanitary Commissioner. The Governor General in Council sees no reason for reconsidering the existing arrangements in this respect. All that His Excellency in Council would say here in regard to the sanitation of cantonments is that, should the local military authorities at any time seek from Local Governments and Administrations the assistance or advice of the Sanitary Commissioner or the local civil district and medical officers, it should be freely given to them.

3. Turning to the question of the work of the Sanitary Department among the general civil population, it appears to the Governor General in Council to be a defect in the existing organization of the Department that it is too much separated from the Civil Medical Department which is responsible for the distribution of medical relief. The Sanitary and Vaccination Department is engaged on preventive, and the Medical Department on curative measures, but these two Departments, though working with the same aim in view, *viz.*, the improvement of the health and conditions of life of the civil population, have not in the past been associated together in such a manner as most efficiently to further this aim. The Sanitary Department consists in the larger provinces of a Sanitary Commissioner, aided by one or more Deputy Sanitary Commissioners who are officers of the Indian Medical Service, with a subordinate staff of inspectors, sub-inspectors and other supervising agents of the registration of vital statistics and vaccination, who have received no special education in sanitary matters. In the smaller provinces the duties of Sanitary Commissioner are combined with those of Inspector-General of Civil Hospitals, and there are no Deputy Sanitary Commissioners. The executive branch of the Department does not furnish the proper machinery for carrying on local sanitary work, and there is not an efficient agency either to advise or impel municipal or local boards in the matter of every-day sanitation as distinguished from larger schemes for the supply of pure water or the improvement of drainage. As a result of these defects in organization the duties of the superior officers of the Sanitary Department have, beyond inspections which lead to the discovery of local sanitary defects but not always, the Government of India fear, to their removal, been mainly limited to the collection of vital statistics and the control of vaccination. The Governor General in Council has much pleasure in acknowledging the good results which have been attained in the encouragement of vaccination, but the improvement secured in the registration of vital statistics (though, as the Government of India stated in the Home Department Resolution No. $\frac{3 \text{ Sanitary}}{106-117}$, dated 18th June 1894, there was a gradual, but slight improvement in the registration of both births and deaths between the census of 1881 and that of 1891) and in sanitation has not, in the opinion of His Excellency in Council, been hitherto at all commensurate with the expenditure on the Department.

4. It appears to the Governor General in Council that, if any tangible improvement is to be effected in sanitary work, particularly in rural areas, the quality of the supervising agency must be improved, and that it is essential, in order to make this agency efficient, to require that it should be specially trained in hygiene, though it will not, in the opinion of His Excellency in Council, be necessary to require that a very high standard of qualification in sanitary knowledge should be attained by the subordinate members of the Department. The Government of India understand that in some provinces at all events an attempt is made to give lectures on the principles of sanitation, but so far as the information before them goes, it would appear that present arrangements are incomplete and unsatisfactory. The Governor General in Council will be glad to learn from the different Local Governments and Administrations what is the present state of instruction in this subject, and how they would propose to improve and extend it. His Excellency in Council favours the idea of instituting a system of granting special diplomas in public health, and is anxious that Local Governments and Administrations should consider the course of teaching which should be prescribed, and the examinations which should be instituted for superior and inferior qualifications and for the grant of diplomas. The Government of India have at present under consideration the question of establishing an Imperial Laboratory, and if this proposal is carried into effect, it will probably be found possible to arrange for a certain number of the students in hygiene to attend a course of bacteriology at this Laboratory.

5. The Government of India would propose to substitute for the existing inefficient machinery of the Sanitary Department an agency specially trained in the manner indicated above. But the change can only be brought into effect gradually with due regard to financial considerations and to the claims of existing incumbents. Subject to these considerations it appears to the Governor General in Council that the duty of inspecting and checking the work of the vaccinators and of looking after village sanitation should be gradually

transferred to men who have gone through a course of hygiene and hold sanitary qualifications. It will have to be considered whether candidates for these appointments should be required to go through a full medical course, or to obtain a medical qualification. Among the advantages to be gained from taking officers for the Sanitary Department from members of the general body of Assistant Surgeons and Hospital Assistants, who have been through a special course of hygiene, would be that the field of selection would be wider and that men with medical qualifications, employed in the Sanitary Department and provided with appropriate medicines and instruments for treating minor ailments, would be able not only to afford proper medical relief to many who do not now obtain it, but also by this means to render their advice in sanitary matters more acceptable than it might otherwise be. They would also be extremely useful in outbreaks of epidemic disease. If Assistant Surgeons or Hospital Assistants are appointed, it will be necessary to give them some addition to their grade pay, which might perhaps be fixed at 15 per cent., as otherwise the better qualified men will not desire employment in the Department where they will lose the opportunity of private practice. Local Governments and Administrations are invited to consider what addition to their grade pay would be required.

6. The Government of India are in favour of the suggestion that each municipality or group of municipalities or local bodies should be required after a certain date to appoint a Health Officer to superintend vaccination, sanitation and the collection of vital statistics. The more highly qualified of those who obtain sanitary qualifications would naturally be appointed to such posts, and the Government of India would hope that in the course of next few years a sufficient supply of trained men will become available to justify the local bodies being required to appoint Health Officers before the beginning of the year 1900. Another method in which sanitation in municipalities might be improved would be by requiring that candidates for certain municipal offices should be required to possess the lower qualification in hygiene, and this suggestion is communicated to Local Governments and Administrations for their consideration. In large municipalities in which special Sanitary Committees have not hitherto been appointed for the control of sanitary matters, it is desirable, in the opinion of the Governor General in Council, to arrange for the appointment of such Committees, with a medical man (the Civil Surgeon if possible) as President to supervise the expenditure on sanitation. Under present circumstances though funds are in most cases readily provided by municipal bodies for sanitary work, they are not, the Governor General in Council fears, always expended to the best advantage. When a Health Officer is appointed to a municipality he would work under the control of this Committee.

7. The head of the district organization in vaccination and sanitary as well as in medical matters should, in the opinion of the Government of India, be the Civil Surgeon. The Governor-General in Council is aware that in nearly all provinces Civil Surgeons have now been entrusted with the work of supervising vaccination operations. They are also the sanitary officers of their districts, though, the Government of India believe, their duties in regard to rural sanitation have not in all cases been properly defined. In Provinces where this matter has not as yet been clearly provided for, steps should, in the opinion of the Governor General in Council, be at once taken to declare [illegible] authority and enforce the responsibility of the Civil Surgeon in such [illegible]. The duties of sanitary officer of a district cannot be efficiently [illegible] of visiting the interior of the district, and at the larger [illegible] the Civil Surgeon's duties at head-quarters are multifarious, it will be necessary to furnish him with an Assistant Surgeon of superior qualifications as his Personal Assistant either to relieve him from time to time of his head-quarter duties, or to visit the interior on his behalf and under his instructions. Where it is necessary to appoint an Assistant Surgeon for this purpose, he might also be employed as Health Officer of the head-quarters municipality, and, as he will in this position be debarred from private practice, he should receive some addition (say 25 per cent.) to his grade pay.

8. In the Home Department Resolution No. $\frac{10}{533-44}$, dated 29th September 1887, the Governor General in Council expressed his opinion that the Sanitary

Commissioners had not invariably shown themselves as active in the performance of their duties as the Government had a right to expect of them. His Excellency in Council observed that Sanitary Commissioners were in some cases permitted to spend time in the hills which should be employed on inspection duty in the plains, and requested Local Governments and Administrations to impress upon Sanitary Officers the imperative necessity of exercising vigour and activity in the discharge of their functions particularly in the work of inspection. The Governor General in Council left Local Governments to consider whether the work of Sanitary Commissioners might not be more efficiently discharged if younger officers were selected for the appointments. It appears to His Excellency in Council that Sanitary Commissioners are still kept too much at the head-quarters of the Local Governments, and that they do not spend sufficient time in moving about on tour through their charges. It ought, in the opinion of the Government of India, to be the rule that the Sanitary Commissioner of a Province should be engaged in moving about within it during the greater part of the year, and, in order to secure that this shall be done, it is desirable that junior officers with special qualifications should in future be posted to these appointments. By the Home Department Resolution No. 4—340-51, dated 7th June 1888, it was decided that the term of the tenure of the office should be fixed at 7 years subject to the condition that an extension not exceeding 3 years might be granted on the recommendation of the Local Government. In view of the appointment of junior officers to the post, it might, it appears to the Government of India, be desirable to reduce the initial pay to Rs. 1,000, and the Governor General in Council would be glad to receive the opinions of Local Governments upon this point as well as on the question whether any alteration is required in the rules laid down in the Resolution of 7th June 1888 as to the tenure of the appointment.

9. In the Resolution of 29th September 1887 referred to above, the Governor General in Council decided that it was not possible to amalgamate the offices of Sanitary Commissioner and Principal Civil Medical Officer under the Local Governments as is done in the case of similar appointments under Local Administrations. His Excellency in Council adheres to the decision that the two appointments should not be amalgamated in the larger Provinces where matters connected with town and village sanitation provide full employment for the whole energies of a Sanitary Commissioner, but it appears to him that the dissociation of the Surgeon General in Madras and Bombay and the Inspector-General of Civil Hospitals in Bengal, the North-Western Provinces and Oudh, and the Punjab, from any direct authority in sanitary matters has impeded the progress of sanitary reform. It appears to the Government of India that there is reason to apprehend that so long as Civil Surgeons who are in direct subordination to the Chief Civil Medical Officer in a Province are not ultimately responsible to him for the performance of their duties in connection with vaccination and sanitation, those duties may not receive proper attention, especially as many of the Civil Surgeons will be senior in service to the junior officers whom it is proposed to appoint in future to the post of Sanitary Commissioner. The Governor General in Council is therefore of opinion that the provinces in which there is a separate office of Sanitary Commissioner, the Sanitary Commissioner should be subordinated to the Head of the Medical Department. The amalgamation of the office establishments would probably lead to greater efficiency as well as economy, while the work of local inspection might be so distributed between the two superior officers as to bring a larger area annually under inspection.

10. The arrangements for the future administration of the Sanitary Department which approve themselves to the Government of India thus contemplate frequent inspection by Civil Surgeons and the Sanitary Commissioner, and control on the part of the Head of the Medical Department. It appears to the Governor General in Council that under these revised arrangements the necessity will no longer exist for retaining Deputy Sanitary Commissioners. They will certainly not be required for the supervision of vaccination operations, but it might possibly be desirable to retain in the larger Provinces one Deputy Sanitary Commissioner whose main function would be to inquire into special outbreaks of disease and their causes, or continued unhealthiness of any particular tract

of country. Any saving which could be effected in the cost of Deputy Sanitary Commissioner would be available for the most important point in the reorganization of the Department, *viz.*, the improvement of the District Sanitary Staff, and the duties now made over to Deputy Sanitary Commissioners of securing a proper supply of pure and efficient lymph for vaccination operations can be otherwise provided for. The matter is one which should be carefully considered by Local Governments.

11. The foregoing sketch of the general lines on which the reorganization of the Sanitary Department might, in the opinion of the Government of India, be effected is placed before Local Governments and Administrations for their consideration, and the Governor General in Council will be glad to receive in due course their opinions in regard to it. As has already been pointed out, the most important feature of the scheme, *viz.*, the substitution of a qualified agency to supervise vaccination and sanitary operations in place of the existing establishment of unqualified inspectors and other supervising agents, can only be gradually effected as properly qualified candidates for employment become available, and as vacancies occur to which they can be appointed. The Government of India will be glad if Local Governments and Administrations will now endeavour to formulate proposals for the eventual reorganization of the Sanitary Department as such agency becomes available. So far as the Government of India are able to judge, it should be possible to effect the changes required in the organization of the Department without increasing the cost of it, but if this is not possible, the question of how far local funds could be called upon to contribute towards any increase of expenditure involved in reorganizing it, should be carefully considered by Local Governments and Administrations.

ORDER.—Ordered that a copy of this Resolution be forwarded to all Local Governments and Administrations.

Ordered also that a copy be forwarded to the Foreign Department / Surgeon-General with the Government of India for information.

From the Government of Bombay (General Department), No. 3796, dated the 11th October 1894, and enclosures.

From the Government of Bengal, No. 327-T.M., dated the 5th September 1894, and enclosures.

From the Government of the North-Western Provinces and Oudh, No. 3479, dated 11th September 1894 and enclosures.

From the Government of the Punjab, No. 571-S., dated the 8th August 1894, and enclosures.

RESOLUTION.

In the circular letter to Local Governments of the 24th May 1894, quoted in the preamble, the Government of India circulated for their consideration a proposal that a small specially trained Department of Officers of the Indian Medical Service might be organized in order to provide suitable incumbents for the five appointments of Chemical Examiner under the Governments of Madras, Bombay, Bengal, the North-Western Provinces and Oudh and the Punjab, respectively. The scheme then formulated provided for an increase in the salaries of the several Chemical Examiners, and for the increase in the cadre of the Indian Medical Service by three. It was intended in this manner to provide probationers or supernumerary officers to fill sudden vacancies and an officer to eventually succeed Mr. Hankin as Chemical Examiner of the North-Western Provinces and Oudh.

2. The Local Governments are in favour of increasing the pay of the Chemical Examiners. Their replies to the suggestions contained in the circular of 24th May 1894 disclose considerable difference of opinion as to the source from which Chemical Examiners should be recruited, the employment and training of the supernumerary officers, and the reductions in the appointment of Laboratory Assistants, now held by Assistant Surgeons, proposed in order to provide for the salaries of the supernumerary officers. The Governments of Bengal and the North-Western Provinces and Oudh have advanved reasons for obtaining, in cases of necessity, specialists direct from England for these appointments. Again, the proposal for the employment of supernumerary officers has not received the unqualified support of Local Governments. The Government of Madras observe that the continuance of the appointment of Assistant Chemical Examiner in that Province is an absolute necessity if the multifarious

duties attached to the office of Chemical Examiner are to be efficiently and expeditiously discharged, and they do not think that a young officer, who is himself only learning the work would be able efficiently to conduct the duties of Assistant Chemical Examiner. The Lieutenant-Governor of the Punjab has stated that he would be unable to provide temporarily for such an officer as the obligation to give him employment in charge of a district might operate to prevent deserving Assistant Surgeons from being appointed to the charge of districts. The Bombay Government moreover consider that to appoint one of the proposed supernumeraries, when unemployed, to a civil station would have the effect of recruiting the Chemical Examiner's Department at the expense of the General Civil Medical Administration.

3. The first alternative to the recruitment for the Chemical Examiner's Department by adding to the cadre of the Indian Medical Service which suggested itself was the removal of the appointments of Chemical Examiner altogether from that cadre, and the engagement in England of specialists for fixed periods and on a fixed salary. The objections which occur to the Government of India to an adoption of such a method of recruitment are that it is doubtful whether officers thus recruited would be suitable as lecturers in the Medical Colleges, and that, until it is shown by further experience that members of the Indian Medical Service fail, owing to the absence of special training, to discharge the duties of Chemical Examiners in a satisfactory manner, it is undesirable to depart from the system in force in Europe, under which such appointments are uniformly entrusted to medical men. For the present therefore the Governor General in Council is disposed to defer making any more radical change in the conditions of appointment to and training for the Chemical Analysers' Department than is involved in the proposals which are set forth below.

4. While the question of revising the Chemical Analysers' Department has been under the consideration of the Government of India, that of devising means for furthering bacteriological researches has also been brought prominently before them. The scientific experiments of Dr. D. D. Cunningham in that branch of science and the practical application of similar investigations by Mr. Hankin, the Chemical Examiner and Bacteriologist to the Government of the North-Western Provinces and Oudh, together with the views generally entertained by the medical profession in India, as expressed in the Resolution passed at the Medical Congress in Calcutta in December 1894, led the Governor General in Council to consider whether the work of Chemical Examiners might not be combined with bacteriological research. His Excellency in Council is, however, advised that the work and observations in a bacteriological laboratory must, if they are to be considered satisfactory, be more or less continuous, and that the character of the materials associated with medico-legal analysis would be prejudicial to exact bacteriological observations.

5. The Government of India need not here enlarge upon the importance of encouraging bacteriological research in a country like India where so many problems in connection with disease await solution, and they are anxious to afford greater facilities, than at present exist, for the prosecution of such studies. With a view to giving practical effect to a scheme for the establishment of a Bacteriological Laboratory, in a manner which will not add to the expense to Local Governments of maintaining the staff necessary for the proper conduct of medico-legal work, the Government of India have had under consideration a scheme of which an outline is given below. It is hoped that this scheme will, by providing for the attachment of young Medical Officers for training, both to the Chemical Analyst's Office and the Bacteriological Laboratory, also meet to some extent the difficulties brought to notice of filling the offices of Chemical Analyser with properly qualified men.

6. The objects aimed at in the scheme set out below are (1) to secure a trained reserve for Chemical Examiners and (2) to establish an Imperial Bacteriological Laboratory. To secure these objects it is essential that the Government of India should be assured of the co-operation of Local Governments. It has been established by the testimony both of Dr. Cunningham, at Calcutta, and of Mr. Hankin, at Agra, that bacteriological investigations can be carried on in the plains of India in the hot weather, and the latter is of opinion that the dry climate of Agra is better adapted for the work

than that of Lower Bengal. The results already achieved by Mr. Hankin and the energy and enthusiasm with which he has pursued his investigations, combined with the searching and practical character of his enquiries, eminently fit him, in the opinion of the Government of India, for the charge of such a laboratory and for the work of training the officers who may be attached to it. Taking these two factors as a starting-point the Government of India propose, as the first step towards the attainment of their object, to relieve Mr. Hankin of his duties in connection with the office of Chemical Examiner in order that he may be able to devote his whole time to the work of the Bacteriological Laboratory at Agra.

7. The Government of India desire it to be understood that they do not contemplate the establishment at Agra of a Laboratory of purely local interest, but of one at which investigations relating to the whole of India may be undertaken. The Governor General in Council anticipates that an institution of this kind will be of special value to the Military authorities in helping them towards the discovery of the causes of enteric fever, cholera and other specific diseases and the means of preventing them, and in assisting them in the solution of the difficulties connected with the Sanitary surroundings of the troops which are constantly arising. The Sanitary Departments of Local Governments should derive material aid from the inquiries of a competent bacteriologist in all questions affecting the health of the civil population and in pursuing investigations as to the causes of the prevalence of particular diseases, while municipalities will be enabled to receive an authoritative opinion on the purity of their food and water supplies. In meeting all these wants the institution should, in the opinion of the Government of India, contribute materially to the general welfare of the people.

8. The Governor General in Council has had under his consideration the question how the above proposal can be carried out without incurring additional expenditure, and after carefully considering this matter His Excellency in Council is of opinion that this can best be done in the following manner. It will be necessary to relieve Mr. Hankin of his duties as Chemical Examiner to the Government of the North-Western Provinces and Oudh, and it appears to the Governor General in Council that the best arrangement will be to make these over to the Chemical Examiner at Calcutta, and to give that officer an addition to his staff to enable him to cope with the extra work that will thus be thrown on him. As at present advised, the Government of India do not anticipate that there will be any administrative objection to this arrangement, which has for its aim the establishment of a Chemical Laboratory at Calcutta, where the whole Chemical Analyst's work of Bengal, Assam, the North-Western Provinces and Oudh and the Central Provinces can be performed, and where, on account of the larger number of commercial analyses, there are greater facilities than at any other centre in Northern India for training young Commissioned Medical Officers as a reserve for the Chemical Analysers' Department. The existing facilities of railway communication between Calcutta and the Provinces the work of which would go to that centre are apparently sufficient to make it practicable to carry out this transfer. A further change which appears to the Government of India feasible, and which is necessary in order to effect the economies requisite for meeting the increase in expenditure involved in carrying out the whole scheme, is the reduction of an appointment of Deputy Sanitary Commissioner. As at present advised, the Government of India think this can be effected, without any material diminution in the efficiency of the Sanitary Department, in the Punjab. His Honour the Lieutenant-Governor of that Province should therefore be asked to consider whether, in view of the general advantages which, by the scheme as now set forth, may be expected to be derived from the establishment of an Imperial Bacteriological Laboratory, he will consent to the proposed reduction. The reduction of the appointment has been rendered feasible by the orders which the Government of India understand have been passed from time to time in the Punjab making Civil Surgeons responsible for the vaccination work of their districts; and the Government of India are considering the question of revising the constitution of the various Sanitary Departments, regarding which orders will issue separately. The abolition of the appointment of Deputy Sanitary Commissioner will render it possible to provide for one Commissioned Medical Officer being attached to the Chemical Laboratory at Calcutta. The Government of India further propose to effect eventually an additional saving of R3,600 per annum by discontinuing, when the present sanction expires in December 1896, the allowance of R300 per month at present granted to Dr. D. D. Cunningham, for conducting bacteriological and other investigations at Calcutta as Special Assistant to the Sanitary Commissioner with the Government of India. This work will then, under the proposed scheme, be centralized at the Agra Laboratory under Mr. Hankin.

9. It is intended eventually to attach young Medical Officers for a six months' course of training to the Chemical Analyst's Office or the Bacteriological Laboratory, and in this way to secure a knowledge of these subjects on the part of a considerable proportion of our Medical Staff.

10. The present financial effect of these proposals is thus summarized :—

	R	R
Yearly cost of establishing a Bacteriological Laboratory at Agra, including an increase to Mr. Hankin's pay from R1,000 rising to R1,250 per month by annual increments of R50, with effect from the end of the five years' engagement under which he is at present serving		26,392
Present yearly cost of the office of the Chemical Examiner to the Government ot the North-Western Provinces and Oudh is		20,550
Cost* of additional establishment at Calcutta owing to the transfer of the work of the Government of the North-Western Provinces and Oudh there :—		
1 Commissioned Medical Officer in training for the work of Chemical Analyser, R450 to R600	6,600	
Exchange compensation allowance	1,269	
House allowance	900	
Grade pay of 1 Assistant Surgeon (R100 to R200)	1,800	
Allowance to ditto (R50 to R150)	1,200	
Menial servants	192	
Stores and miscellaneous	1,000	12,961
Saving		7,589
Saving owing to the abolition of an appointment of Deputy Sanitary Commissioner in the Punjab.		
Pay R600 to R1,000	10,400	
Exchange compensation allowance	2,000	
Saving owing to the discontinuance, in December 1896, of the allowance of R300 per month to Dr. Cunningham	3,600	16,000
Total Savings		23,589

* This will appear on the accounts as Bengal Provincial expenditure; but an assignment to the Bengal Provincial revenues will be made to cover it; and it is here treated as a reduction of the North-Western Provinces Provincial saving.

Thus the ultimate financial effect of the measures now proposed will be an increase in Imperial expenditure of (R26,392—R3,600=) or 22,792 and a decrease in Provincial expenditure of—

(*a*) in the North-Western Provinces and Oudh of 7,589
(*b*) in the Punjab of 12,400 } or 19,989 in all

resulting, on the general account, in an ultimate increase of R2,803 a year.

In consideration of the fact that the Government of India will assume the responsibility of paying for the Chemical work of the North-Western Provinces and Oudh, His Excellency in Council trusts that His Honour the Lieutenant-Governor and Chief Commissioner will have no objection to their appropriating the amount at present expended on the Chemical Examiner's Office in those Provinces towards providing for the discharge in Calcutta of the work now done by that Office and towards establishing the Bacteriological Laboratory.

11. The Governor General in Council thinks it important to give effect to the arrangements above mentioned as soon as is feasible, and His Excellency in Council trusts that the Local Governments concerned will give their careful consideration to the proposals and submit their views thereon at an early date.

ORDER.—Ordered that a copy of this Resolution be forwarded to Local Governments and Administrations for information.

[True Extract.]

L. M. THORNTON,

Deputy Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 2nd November.*—Rainfall heavy in the northern half of the presidency and good elsewhere. The fall up to date is in excess of or up to the average everywhere, except at Madras. Agricultural operations are in active progress. The standing crops are generally flourishing, though excessive rain has caused some damage in parts. The harvest is progressing with moderate outturn. Cattle are generally in good condition. Prices have fallen generally, except in the Carnatic and on the West Coast where prices are stationary.

Bombay.—*For week ending 6th November.*—Rainfall generally good and beneficial to the late crops in the Karnatak, Poona, Ahmednagar, and Sholapur, moderate in the Konkan, slight in Nasik and Thar and Parkar; no rain elsewhere. The total rainfall is insufficient in Broach and two talukas of Poona. The standing crops are slightly damaged by untimely rain in parts of Kolaba, and rice by grass-hoppers in parts of Belgaum. Harvesting and sowing operations are general, but have been retarded by late rains in parts of Satara and Ratnagiri. Fodder is insufficient in parts of Hyderabad and Thar and Parkar. Agricultural stock are in good condition. Prices are generally steady.

Bengal.—*For week ending 4th November.*—The rain, which fell generally over Lower Bengal, Orissa, and part of Chota Nagpur towards the end of October, is reported to have done much good to the winter rice crop and facilitated the sowing of the spring crops. In Bihar the absence of rain in October has been harmful to the winter rice and has also affected the prospects of the spring crops. In parts of North and East Bengal too the rice crop is said to have suffered owing to the early cessation of the rains. Cattle are generally in good condition. The price of common rice continues steady.

North-Western Provinces and Oudh.—*For week ending 6th November.*—The weather is seasonable. Harvesting of the autumn crops and spring sowings are going on, but rain is needed for sowings in places. Prospects are favourable. The paddy and sugarcane crops in Benares and the spring crops in Fyzabad are reported to have been injured by insects. The markets are well supplied. Prices are fluctuating, with a tendency to rise in a few districts.

Punjab.—*For week ending 6th November.*—No rain. Harvesting of the autumn crops and picking of cotton continue. Sugarcane pressing has commenced in Sialkot. Ploughings for and sowings of the spring crops are in progress, but the latter is being delayed for want of rain in Umballa. Rain is badly wanted throughout the province. The condition of the standing crops is generally reported average to poor, being good in Amritsar only. The crops are dying and withering for want of rain in Shahpur and Hissar. Cattle are generally in good condition. Fodder is scarce in Hissar, Delhi, Jullundur, and Lahore, and insufficient in Sialkot, but is sufficient elsewhere. Prices continue low in Multan, but are rising in Hissar, Umballa, Jullundur, Dera Ismail Khan, and Peshawar, and are high elsewhere. Wheat is selling at 14 seers per rupee in Delhi and 14 to [illegible] seers in Shahpur.

Central Provinces.—*For week ending 6th November.*—Weather generally clear and warm during the day, but the nights and mornings are cool. No

rain except a few showers in the Nagpur country, which proved most opportune. Harvesting of the autumn crop is in progress. The crops have suffered in Damoh from deficient rain, and in Raipur the outturn of the rice crop is estimated to be barely eight annas. The winter sowings continue, but seedlings are withering for want of rain in the northern districts. In Raipur, a large area of wheat land is lying unsown for want of moisture. Prices are rising in the Hoshangabad and the Chattisgarh Districts.

Burma.—*For week ending 2nd November.*—In Lower Burma reaping of the early paddy continues. The crop prospects are good. In Upper Burma reaping of the early paddy and paddy on hill sides has been completed in some districts, and is progressing in others. Sesamum and millets are being reaped in Myingyan, and cotton-picking is progressing in Meiktila. Very little rain has fallen during the week; it is urgently needed in Mandalay, Shwebo, Sagaing, Lower Chindwin, Pakokku, Minbu Magwe, Meiktila, Yamethin, and Myingyan where the standing crops have been greatly damaged owing to drought. The price of paddy has risen slightly in Rangoon and Thongwa, but has fallen considerably in Minbu and slightly in Prome, Sagaing, Thayetmyo, and Magwe; elsewhere prices are stationary.

Assam.—*For week ending 5th November.*—Weather seasonable. More rain is wanted for the late rice in Kamrup, Darrang, and Nowgong. The prospects of the crops elsewhere are good. Cattle are in good condition. Fodder and water are sufficient.

Mysore and Coorg.—*For week ending 6th November.*—MYSORE: Good rain throughout the State except in parts of the Kadur district. The standing crops are in good condition. Prices have fallen in the Kadur, Kolar, and Chitaldrug districts, but have risen in the Bangalore and Hassan districts.

COORG: Rainfall moderate. The rice crop is in good condition. Reaping of *ragi* (*Eleusine coracana*) has been completed. Picking of cardamoms continues. Coffee is ripening. Water and fodder for cattle are sufficient. Prices are normal.

Berar and Hyderabad.—*For week ending 6th November.*—BERAR: Weather cool with moderate rainfall during the week. The crops are in good condition. Picking of cotton continues. Sowings are nearing completion and weeding operations are in progress. Scarcity of fodder and water prevails in the Khamgaon and Jalgaon talukas. Prices are fluctuating in Wun, but are steady elsewhere.

HYDERABAD: Rainfall heavy. The standing crops are in good condition though slightly injured by recent heavy rains. The winter sowings are nearly completed. Fodder and pasture are available for cattle. Prices are fluctuating.

Central India.—*For week ending 6th November.*—No rain during the week. Rain is required in Bundelkhand and in parts of Bhopawar, and it is badly wanted in Goona. Agricultural operations are in progress in all parts. The crops have been damaged in parts from want of rain, but are in fairly good condition elsewhere. Agricultural stock are in good condition. Pasturage is good and sufficient, except in some districts of Gwalior. Prices are rising in Bundelkhand, Neemuch, and parts of Gwalior, above normal in Goona, but normal elsewhere. Opium sowing has commenced in parts of Bhopawar.

Rajputana.—*For week ending 6th November.*—Agricultural operations are satisfactory. *Jowar* (*Sorghum vulgare*) is withering in two tehsils of Kotah. The crops have withered in Kerowli and Ulwar for want of rain and have been much damaged in Kerowli and Bikanir; prospects elsewhere are reported fair, except in Jeypore, Bhurtpore, Bikanir, Tonk, and Jaisalmere. Agricultural stock are generally in good condition, but are suffering in Ulwar for want of fodder. Pasturage and fodder are generally sufficient, but fodder is scarce in parts of

Meywar, Shahpura, Ulwar, and Jaisalmere, and is failing in Dholepore and Bhurtpore. Prices are rising in five States, fluctuating in one, and falling in two, but are steady elsewhere. Distress is apprehended in the central districts of Bikanir.

Kashmir.—KASHMIR VALLEY.—*For week ending 5th November.*—Weather fine. The *shali* crop is being threshed. Sowings for the spring crops are still in progress Prices continue normal.

JAMMU PROVINCE.—*For week ending 6th November.*—No rain. The autumn harvesting has been completed. Rain is urgently wanted for the spring sowings. Cattle are in fair condition. Prices are normal.

Nepal.—*For week ending 2nd November.*—Report not received.

DENZIL IBBETSON,

Offg. Secretary to the Government of India.

(*a*) Includes the Bhopal-Itársi and Bina-Guna railways.
(*b*) Includes the Godhra-Rutlam railway.
(*c*) Total earnings from 2nd April to 27th October 1894.
(*d*) Includes the Guntakal-Mysore frontier section.
(*e*) Includes the Tirhoot state railway. Although for convenience classed amongst state railways, the company's section of this line is the property of the Bengal and North-Western Railway Company.
(*f*) Total earnings from 1st July to 26th October 1895.
(*g*) Includes the Jammu and Kashmir and the Hyderabad-Shadipalli railways.
(*h*) Although for convenience classed amongst state railways, this line is the property of the Bengal Central Railway Company.
(*i*) Includes the Wardha Coal, Dhond-Manmád, Khámgaon, and Amráoti railways.
(*j*) Total earnings from 1st June to 27th October 1894.
(*k*) Includes the Mysore-Nanjangud and the Yesvantpur-Mysore frontier sections.
(*l*) The line is being worked by the Bombay, Baroda and Central India Railway Company as a temporary measure.
(*m*) Total earnings from 1st August to 26th October 1895.

F. B. HEBBERT,
Under Secretary.

SIMLA, *the 5th November, 1895.*

Printed and published for the GOVERNMENT OF INDIA *at the Office of the* SUPERINTENDENT OF GOVERNMENT PRINTING, INDIA.
No. 8, Hastings Street, Calcutta.

SUPPLEMENT TO

The Gazette of India.

No. 46.] CALCUTTA, SATURDAY, NOVEMBER 16, 1895.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

FINANCE AND COMMERCE DEPARTMENT.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the week ending at 8 a.m. on Saturday, November 2nd, 1895.

Fine, quiet weather has continued to prevail throughout Northern and Central India, but over the Peninsula conditions have been less settled. In the early part of the week low pressure areas surrounded by feeble and irregular cyclonic winds existed over the Bay and over the Arabian Sea off the Indian coast, and on Monday the 28th a small centre of depression crossed the Madras coast between Masulipatam and Nellore. During this period pressure was high over Northern India and consequently barometric gradients were steepish and the North-East winds of the retreating South-West monsoon blew freshly to strongly over the Bay area and Southern India. Hence also rain was plentiful and widely distributed. After the middle of the week, however, these conditions changed. Pressure rose over the Peninsula while it fell over Northern India, gradients decreased, the wind fell off and the rainfall became lighter and more scattered. During the early part of the week when, as mentioned above, there was a good deal of rain, the mean temperature of the greater part of the country was below the normal average, but with the falling off of the rainfall towards the close of the week the temperature rose, and from a mean excess of 0°·5 on the 31st increased to a mean excess of 1°·9 by the 2nd November.

Daily Summary.—*Sunday, Oct. 27th.*—Pressure had changed irregularly. Readings were high over Northern and low over Southern India, the Bay and the Arabian Sea. The gradient for Northerly to Easterly winds was somewhat greater than usual and moderate to fresh Northerly to Easterly winds were reported. The mean temperature was in defect of the normal over the greater part of the country, the abnormal deficiency being large in North-East India and over Gujarat. Rain was general over a large part of the Peninsula and scattered showers were reported from North-East India and from the Central Provinces.

Monday.—Pressure had fallen everywhere, briskly in the north and slightly elsewhere. The general distribution was unchanged except that a slight depression had appeared on the Madras coast and gradients for Northerly and Easterly winds were still somewhat steeper than usual. The winds were variable over North-West India and in Burma, but were generally between North and East elsewhere. The mean temperature exceeded the normal average along the West coast as well as over Lower Burma and South Madras, but was in defect elsewhere, the abnormal depression being very large over Assam, Bengal and the East of the Central Provinces. General rain had fallen over a large part of Bengal and of the Peninsula and showers over the Central Provinces and Burma. The amounts received were moderately heavy at some stations in Bengal and Madras.

Tuesday.—Pressure had again decreased almost everywhere. The fall was brisk in the North-West and slight in all other places. Readings were high and uniform in the North and low over the South of the Bay, the South of the Peninsula and the East of the Arabian Sea. The winds were variable and light over North-Western India and between North and East elsewhere. The mean temperature was excessive over the Indus Valley, the West and South of the Peninsula and Lower Burma, and in defect of the normal elsewhere. Rain had fallen over North-Eastern and Southern India and a few showers were reported from the central parts of the country. Largish amounts were reported from several stations.

Wednesday.—A recovery of pressure had set in, the increase had been brisk along the line of the Himalayas and over Madras and slight elsewhere. The general distribution was the same as on the preceding day and pressure was.

nearly normal over the greater part of the country. Rain had been general over the East of the Peninsula while showers had occurred over the West of the Peninsula and at a few stations in North-East India. The amounts received were considerable at a few stations.

Thursday.—Pressure had increased over the Peninsula and decreased over Northern India. Pressure remained high over Northern and Central India and low over the Bay and the Arabian Sea, but pressure was now above the normal in the South and below in the North, so that the barometric gradients were slighter than usual and the winds were variable. The mean temperature was lower than usual over Bengal and Assam and above elsewhere. Moderate rain had been received over the Peninsula and a few scattered showers over the central parts of the country and North East India.

Friday.—Pressure had increased everywhere, the change having been brisk over North-West India and over the Peninsula. Readings were very uniform and the only important feature in the distribution was the low pressure area over Burma and the East of the Bay. The winds remained very variable and light or moderate in force. The mean temperature was again in defect over Bengal and Assam and in excess in other parts of the country. Scattered showers had occurred over the same districts as on the 31st October.

Saturday.—Pressure had again increased but the rise was less than on the preceding day. Readings remained uniform generally, but the low pressure area over Burma and the Bay was better defined than on Friday. The winds remained variable and light or moderate in force. The mean temperature was in slight to considerable defect over Bengal and Assam and in slight to large excess elsewhere. Showers had been received over the Peninsula, but there was no rain elsewhere.

Temperature.—The variations of temperature from the normal have been large during the week under review. For the first three days of the week the mean temperature was in excess of the normal only in Lower Burma at a few coast stations in the South and West of the Peninsula and at a few places in the Indus Valley, while the whole of Northern and Central India and the Central part of the Peninsula was covered by temperatures considerably below the normal average. On Wednesday the 30th a change commenced, the high temperature areas extending and largely diminishing the size of the cool area, so that on Friday and Saturday temperatures lower than the average were reported only from Bengal and Assam and all other parts of India were occupied by temperatures exceeding the average.

The following table gives the variations of the mean temperature from the normal in the different provinces of India for each day of the week:—

Province.	October 1895.					November 1895.		Mean variation of week.
	27th.	28th.	29th.	30th.	31st.	1st.	2nd.	
Burma	+2·3	+1·6	+0·9	+1·1	+1·6	+0·8	+0·5	+1·3
Bengal and Assam	−2·5	−5·9	−4·3	−2·8	−2·5	−2·3	−1·8	−3·2
North-Western Provinces and Oudh	−2·6	−2·6	−3·3	−2·6	−1·2	−0·3	+1·5	−1·6
Punjab	−0·9	−2·1	−1·9	−0·1	+1·7	+2·2	+4·5	+0·5
Bombay	+0·4	−0·1	+0·1	+0·9	+1·5	+1·6	+1·7	+0·9
Central Provinces and Berar	−2·1	−3·2	−2·4	+0·4	+1·7	+1·1	+2·0	−0·4
Central India and Gujarat	−2·5	−2·5	−2·5	−2·5	−1·3	+0·7	+2·4	−1·2
Sind and Rajputana	−0·9	−0·2	−1·3	+0·6	+1·3	+2·0	+4·4	+0·8
Madras	−1·3	−0·8	+0·5	+0·4	+1·3	+1·5	+2·2	+0·5
Mean for whole of India	−1·1	−1·8	−1·6	−0·5	+0·5	0·8	1·9	−0·3

The mean temperature of the whole of India for the week was thus practically normal, the low temperatures of the early part of the week having been practically balanced by the high temperatures prevailing at the close. The provincial temperatures also showed, for the week, relatively small departures from the average except in the case of Bengal and Assam where the mean temperature was steadily low throughout the week and the mean for the period was as much as 3°·2 below the normal.

Rain.—As mentioned above, the rainfall was much more general, and on the whole heavier at the commencement than at the close of the week. On the 27th rain was reported from nearly all parts of the Peninsula, from several stations in the Central Provinces, from the greater part of Bengal and from a few places in Burma; on the 28th a similar distribution of rain was recorded but on the 29th the fall had become very light and scattered over the West of the Peninsula, had almost ceased over the Central Provinces and was much lighter in Bengal, Burma and the East of the Peninsula. On the 30th rain increased again over the Peninsula both in amount and extent, but remained very light over North-East India. On the 31st there was practically no rain in the North-East and only scattered showers in the West of the Peninsula and the Central Provinces, while in the East of the Peninsula, although the showers were fairly general, the amounts were small. On the 1st scattered showers were reported from both the Peninsula and North-East India, but on the 2nd rain had wholly ceased in the North-East.

This shows that the rainfall of the week was confined to Southern India, the Central Provinces and North-East India, and that it was only general and continuous in the first named region. The table at the close of the summary shows twenty-eight of the rainfall divisions received effective rain, that four more received slight showers and that twenty divisions received no rain whatever during the week. The regions which received either no rain or only slight ineffective showers included the following divisions, *viz.*, Arakan and Central Burma; North Bengal, both the Bihar divisions, all the North-Western Provinces and Punjab divisions; all the North Bombay divisions, and all the Rajputana and Central India divisions. In all other parts of the country effective rainfall was received, the average actual fall being heaviest, 4·63 inches in the East Coast (North). This was followed by 3·58 inches in Hyderabad (South), by 3·47 inches in the East Coast (Central), by 3·25 inches in Malabar, and by over 2 inches in Chota Nagpur, Madras (South-Central) and Mysore. The third column of the table shows that the rainfall of the week exceeded the normal average in Assam (Surma), Deltaic Bengal, Central Bengal, Orissa, Chota Nagpur, Malabar, Madras (South-Central), Mysore, the Konkan, the Bombay Deccan, Khandesh, Berar, all the Central Provinces divisions, the East Coast (North and Central), Hyderabad (South) and Madras (Central). The excess was small except in the Peninsula, where in some cases the rainfall was most exceptionally heavy.

The three concluding columns of the table show that the autumnal rainfall has been heavier than usual over the whole of the Peninsula as well as locally in Chota Nagpur, Gujarat and Kathiawar, while, on the contrary, it has been abnormally light over Burma, Assam and Bengal.

The following heavy totals are reported:—False Point 5·79 inches; Quilon (Travancore) 9·30 inches; Ledlagatta (Kolar) 6·53 inches; Shiralla (Satara) 4·85 inches; Brahma (Chanda) 5·07 inches; Berhampore (Ganjam) 13·02 inches; Ongole (Nellore) 13·97 inches; Villupuram (South Arcot) 6·48 inches.

Province.	Division.	Rainfall data for week ending 2nd November 1895. Average actual rainfall of Division.	Average normal rainfall of Division.	Excess or defect in inches.	Rainfall data from 13th October to 2nd November 1895. Average actual rainfall of season to date.	Average normal rainfall, 13th October to 2nd November. W. L. DALLAS,
Asst. Meteorological Reporter to the Government of India.

SIMLA, *the 7th November 1895.*

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 9th November.*—Rainfall good in South Arcot and the greater portion of the Central and Southern districts; light rain elsewhere. Agricultural operations are proceeding vigorously. The standing crops are generally fair. The harvest is progressing with moderate outturn. Cattle are generally in good condition. Prices are generally easier, but the price of dry grains has slightly risen in Godavari, Salem, and Tinnevelly.

Bombay.—*For week ending 13th November.*—Rainfall generally slight in parts of the Konkan, Deccan, and Karnatak. The standing crops have been slightly injured by untimely rain in parts of Kolaba, and rice by grasshoppers in parts of Belgaum; the crops otherwise are good. Harvesting and sowing operations continue and cotton-picking is in progress in Khandesh. Fodder is insufficient in parts of Sind. Agricultural stock are in good condition, except in parts of Broach and Thar and Parkar. Prices are normal except in parts of Sholapur.

Bengal.—*For week ending 11th November.*—With the exception of a light shower in Purnea, there was practically no rain in any of the reporting districts during the week. The prospects of the winter rice crop have suffered in many parts of the province owing to the early cessation of the rains, and the general outturn is not expected to be so good as originally anticipated. The sowing of the spring crops is generally progressing, but more rain is needed in parts of Bihar. Sugarcane is doing well. The price of common rice generally continues steady, but shows a decided tendency to rise in several districts.

North-Western Provinces and Oudh.—*For week ending 13th November.*—Report not received.

Punjab.—*For week ending 13th November.*—No rain. Harvesting of the autumn crops, pressing of sugarcane, and picking of cotton are in progress. Ploughings for and sowings of the spring crops are going on, but rain is badly wanted throughout the province. The condition of the autumn crops is good in Amritsar and Peshawar, but the prospect of the spring crops is said to be average to poor in most districts. The standing crops are drying and withering for want of rain in Hissar and Shahpur. Cattle are generally in good condition, but are suffering in Hissar. Fodder is scarce in Hissar, Delhi, Jullundur and Lahore and insufficient in Sialkot, but is sufficient in other districts. Prices are low in Multan, but are rising in Hissar, Jullundur, Dera Ismail Khan, Sialkot, and Peshawar; elsewhere prices are high. Wheat is selling at 14½ seers per rupee in Delhi and 14 to 16 seers in Shahpur.

Central Provinces.—*For week ending 13th November.*—The weather is [illegible] during the day time, but [illegible] at night. The sky is clear and no rain has fallen during the week. Rain is badly wanted in most districts, and the seedlings of the spring crops are withering in the lighter soils for want of moisture. The outturn of the rice crop on unirrigated and highlying lands is poor, but the irrigated and lowlying fields promise a very fair crop. Cotton-picking has commenced. Prices are rising in Chhattisgarh, Balaghat and the plateau districts.

Burma.—*For week ending 9th November.*—In Lower Burma the early paddy is being reaped in Hanthawaddy, Tharrawaddy, Tavoy, and Thaton. The crop prospects are very good, except in parts of Prome and Tharrawaddy. In

Upper Burma fair rain has fallen during the week in Mandalay, Shwebo, Sagaing, Lower Chindwin, and Pakokku, and the standing crops on unirrigated land have been slightly improved, but prospects are generally very poor. Little or no rain has fallen in the remaining districts of the dry zone and more rain is badly wanted in Mandalay. The crops in the plains in the south of Amarapura have failed and some of the upland paddy must fail in Sagaing. Ploughing for wheat is retarded for want of rain. If good rain falls within a short time a considerable improvement in crop prospects on dry lands will be effected, but even then the outturn will be very poor and at present prospects are distinctly bad. The price of paddy has risen slightly in Rangoon, Toungoo, considerably in Sagaing, and largely in Lower Chindwin, but has fallen slightly in Bhamo; elsewhere prices are stationary.

Assam.—*For week ending 12th November.*—Weather seasonable. Rain is much wanted for the late rice in Darrang and Nowgong; the prospect of the crops elsewhere is good. Tea is doing well. The condition of cattle is good. Fodder is scarce in Cachar, Darrang, and the Khasi and Jaintia hills. Water is sufficient.

Mysore and Coorg.—*For week ending 13th November.*—MYSORE: Good rain in parts of all districts, excepting Chitaldroog; slight rain elsewhere. Prices have risen in Kolar and Shimoga, and fallen in Chitaldroog.

COORG: Rainfall moderate. The rice crop is in good condition. Picking of coffee has commenced. Water and fodder for cattle are sufficient. Prices are normal.

Berar and Hyderabad.—*For week ending 13th November.*—BERAR: Weather cool and clear. The crops are reported to be in good condition, except in parts of Akola and Ellichpur owing to insufficient rainfall. Cotton-picking continues. Sowings have been completed in the Akola and Wun districts. The fodder and water-supply are insufficient in three talukas. Prices are almost stationary.

HYDERABAD: Rainfall moderate. Sowing of the irrigated crop continues. The autumn crop has been harvested. The spring crop is thriving Prices are normal.

Central India.—*For week ending 13th November.*—No rain during the week. More rain is still wanted in Bundelkhand, parts of Bhopawar, and Goona. Agricultural operations are in progress in all Agencies. The crops have been damaged for want of rain in Gwalior, Bundelkhand, Baghelkhand, Bhopawar, and Goona. Agricultural stock are in good condition, except in a few districts of Gwalior. Pasturage is good and sufficient in all Agencies, except in parts of Gwalior. Prices are rising in Western Malwa and in some districts of Gwalior, and are high in Goona and Neemuch; elsewhere prices are normal. Opium sowing is progressing in the Bhopawar Agency. The crop is in good condition in Western Malwa and Neemuch.

Rajputana.—*For week ending 15th November.*—Agricultural operations are generally satisfactory. *Jowar* (*Sorghum vulgare*) is withering on high lands in Kotah and the crops have withered in Ulwar for want of rain. Much damage has also been caused in Karauli and Bikanir. Prospects elsewhere are reported fair, except in Merwara, Jeypore, Bhurtpore, Bikanir, Tonk, and Jaisalmere. Agricultural stock are generally in good condition but are suffering in Ulwar for want of fodder. Pasturage and fodder are generally sufficient, but fodder is scarce in parts of Meywar, Kotah, Shahpura, Ulwar, and Jaisalmere, and is failing in Dholpore and Bhurtpore. Prices are rising in nine States and falling in two; elsewhere prices are steady. Distress is apprehended in the central districts of Bikanir.

Kashmir.—KASHMIR VALLEY.—*For week ending 12th November.*—Rainfall moderate. The rice crop is being thrashed. Sowings for the spring crops are still in progress. Prices continue normal.

JAMMU PROVINCE.—*For week ending 13th November.*—No rain. The spring sowings are in progress. Harvesting of the autumn crops is completed. Cattle are in good condition. Prices are rising.

Nepal.—*For week ending 9th November* —Weather cloudy and threatening with very slight rain. Harvesting of low land rice is not yet finished.

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

SUPPLEMENT TO

The Gazette of India.

No. 47.] CALCUTTA, SATURDAY, NOVEMBER 23, 1895.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

HOME DEPARTMENT.

POSTING OF INDIAN CIVIL SERVANTS WHO HAVE BEEN APPOINTED IN ENGLAND TO THE BENGAL PRESIDENCY.

No. 3-Estabts. / 676-727.

Extract from the Proceedings of the Government of India in the Home Department (Establishments),—under date Calcutta, the 22nd November 1895.

RESOLUTION.

The undermentioned gentlemen have recently been appointed in England to the Indian Civil Service (Bengal Presidency) in the order specified below :—

Mr. Alan William Pim, North-Western Provinces and Oudh, Punjab and Central Provinces.

„ William Malcolm Hailey, North-Western Provinces and Oudh, Punjab and Central Provinces.

„ Richard Sheepshanks, Lower Provinces.

„ Abdullah ibn Khan Bahadur Yusuf-Ali, North-Western Provinces and Oudh, Punjab and Central Provinces.

Mr. Robert Thomas Clarke, North-Western Provinces and Oudh, Punjab and Central Provinces.
,, Herbert Coupland, Lower Provinces.
,, Arthur Tabor Cunliffe, Burma.
,, Geoffrey Rothe Clarke, North-Western Provinces and Oudh, Punjab and Central Provinces.
,, Leycester Hudson Leslie-Jones, North-Western Provinces and Oudh, Punjab and Central Provinces.
,, Hugh Lansdown Stephenson, Lower Provinces.
,, Harry Christopher Moore, Burma.
,, Sidney George Hart, Lower Provinces.
,, Edward Cuthbert Allen, North-Western Provinces and Oudh, Punjab and Central Provinces.
,, Dewan Tek Chand, North-Western Provinces and Oudh, Punjab and Central Provinces.
,, Charles Morgan Webb, Burma.
,, Thomas Callan Hodson, Lower Provinces.
,, Hector Granville Sutherland Tyler, North-Western Provinces and Oudh, Punjab and Central Provinces.
,, Gerald Mowbray Foyster, North-Western Provinces and Oudh, Punjab and Central Provinces.
,, Loftus Otway Clarke, Lower Provinces.
,, John Ross Blackwood, Lower Provinces.
,, Charles Henry Berthoud, North-Western Provinces and Oudh, Punjab and Central Provinces.
,, Clement Newsham Trotman, Lower Provinces.
,, Alfred Hamilton Grant, North-Western Provinces and Oudh, Punjab and Central Provinces.
,, John Herbert Withers, North-Western Provinces and Oudh, Punjab and Central Provinces.
,, Henry William Paul Scroope, Lower Provinces.
,, John Sandbach Stevinson, North-Western Provinces and Oudh, Punjab and Central Provinces.
,, Godfrey Butler Hunter Fell, Burma.
,, Ralph Oakden, North-Western Provinces and Oudh, Punjab and Central Provinces.
,, Bernard Allen, Lower Provinces.
,, Alexander Langley, North-Western Provinces and Oudh, Punjab and Central Provinces.
,, Ali Ahmed Hussanally, North-Western Provinces and Oudh, Punjab and Central Provinces.
,, Hugh McElroy Fox, North-Western Provinces and Oudh, Punjab and Central Provinces.
,, William Monod Crawford, North-Western Provinces and Oudh, Punjab and Central Provinces.
,, James Mac Kenna, Burma.
,, Francis Pepys Rennie, North-Western Provinces and Oudh, Punjab and Central Provinces.
,, Frederick Charles Turner, North-Western Provinces and Oudh, Punjab and Central Provinces.
,, William Edward Lowry, Burma.
,, Francis Stewart Cowie, North-Western Provinces and Oudh, Punjab and Central Provinces.
,, Frederic Percival Dixon, Lower Provinces.
,, Henry Frederick Edward Berton Foster, Lower Provinces.
,, Edward Ellis Forrester, Lower Provinces.
,, Abraham Garrett, Lower Provinces.
,, Henry Archibald Colebrook Colquhoun, Lower Provinces.
,, William Henry Lawson Cabell, Burma.
,, Arthur Charles Francis Henry Maria Bernard Blennerhassett, North-Western Provinces and Oudh, Punjab and Central Provinces.

2. The Governor General in Council has been pleased to attach the above-mentioned gentlemen to the Province specified opposite each name, as follows:—

Mr. R. Sheepshanks	Bengal.
,, H. Coupland	
,, H. L. Stephenson	
,, S. G. Hart	
,, T. C. Hodson	
,, L. O. Clarke	
,, J. R. Blackwood	
,, C. N. Trotman	
,, H. W. P. Scroope	
,, B. Allen	
,, F. P. Dixon	
,, H. F. E. B. Foster	
,, E. E. Forrester	
,, A. Garrett	
,, H. A. C. Colquhoun	Assam.
,, A. W. Pim	North-Western Provinces and Oudh.
,, Abdullah ibn Khan Bahadur Yusuf-Ali	
,, G. R. Clarke	
,, E. C. Allen	
,, H. G. S. Tyler	
,, C. H. Berthoud	
,, J. H. Withers	
,, J. S. Stevinson	
,, R. Oakden	
,, A. A. Hussanally	
,, H. McE. Fox	
,, W. M. Hailey	Punjab.
,, R. T. Clarke	
,, L. H. Leslie-Jones	
,, Dewan Tek Chand	
,, G. M. Foyster	
,, A. H. Grant	
,, A. Langley	
,, W. M. Crawford	
,, F. P. Rennie	Central Provinces.
,, F. C. Turner	
,, F. S. Cowie	
,, A. C. F. H. M. B. Blennerhassett	
,, A. T. Cunliffe	Burma.
,, H. C. Moore	
,, C. M. Webb	
,, G. B. H. Fell	
,, J. Mac Kenna	
,, W. E. Lowry	
,, W. H. L. Cabell	

3. The Governor General in Council is further pleased to direct that the gentlemen posted to the Lower Provinces of Bengal shall, on arrival at Calcutta, report themselves to the Chief Secretary to the Government of Bengal. Should any of them land in Bombay, they should enquire of the Secretary to the Government of Bombay whether any orders are awaiting them from the Government of Bengal. The officer posted to Assam should report his arrival by telegraph from the port of arrival to the Secretary to the Chief Commissioner of that Province at Shillong, by whom he will be instructed to which portion

of the Province to proceed. The officers posted to Burma should proceed to Rangoon and report themselves to the Chief Secretary to the Chief Commissioner of that Province.

4. The officers posted to the North-Western Provinces and Oudh should report themselves to the Chief Secretary to the Government of the North-Western Provinces and Oudh, Allahabad. The officers posted to the Punjab should telegraph from Bombay to the Chief Secretary to the Government of the Punjab, Lahore, for orders as to their destination, in the event of their not finding instructions awaiting their arrival at Bombay. The officers posted to the Central Provinces should report by telegraph from Bombay their arrival to the Secretary to the Chief Commissioner of those Provinces at Nagpur, by whom they will be instructed to which portion of the Province to proceed.

5. Local Governments and Administrations are requested to inform the Government of India of the dates on which the gentlemen in question so report themselves. Should any officer attached to one of the Upper Provinces in India wish to exchange with an officer of his year attached to another of those Provinces, he is at liberty to do so; but he must report to the Government of India in the Home Department for previous sanction any arrangement of the kind he may be able to effect.

ORDER.—Ordered, that a copy of this Resolution be forwarded to the Governments of Bengal, the North-Western Provinces and Oudh, and the Punjab, and the Chief Commissioners of the Central Provinces, Burma, and Assam, for information and guidance. Also that the Resolution be published in the Supplement to the *Gazette of India*, and that a copy be forwarded to each of the gentlemen named therein.

(True Extract.)

J. P. HEWETT,

Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the week ending at 8 a.m., on Saturday, November 9th, 1895.

Pressure conditions have been steady throughout the week under review over the Indian area. The barometer has been steadily high over North-West India and over North-East India, relatively high and very uniform over the central parts of India and of the Peninsula, and relatively low over the Bay and over the east of the Arabian Sea off the Indian Coast. On different occasions during the week the low pressure area over the Bay has apparently intensified slightly, and the weather has probably been squally and unsettled over the centre of the Bay, and on the 7th and 8th a very slight disturbance appeared over the western desert. These were the only considerable changes which occurred and the influence they exerted on the weather was very slight. At times during the week the wind rose to considerable force at Diamond Island, but in general, the wind was light or moderate in force and blew from about the normal directions except on the West Coast of the Bay, where abnormal north-westerly and westerly winds obtained which, arriving from a dry quarter, gave fine weather to the Madras Coast districts. Fairly general rain was reported from the Peninsula on Monday, but from that day the amount and extent of the rainfall decreased and by the close of the week only a few light scattered showers were reported. The most important feature in the weather was the excessive temperature which prevailed throughout the greater part of the country. In Burma, where there was a good deal of northing in the wind, the mean temperature was low, and in Madras, where showers were prevalent in the early part of the week, there was some depression of temperature between the 5th and the 8th, but in all other places the mean temperature was steadily excessive and in parts of North-Western and Central India this excess was very large.

Daily Summary.—*Sunday, 3rd November.*—The pressure changes were small and the distribution of pressure steady. Readings were highest in the north-west, relatively high in the north-east, and low over the Bay and the Arabian Sea. The winds were northerly over the Bay area, easterly over the centre and west of the Peninsula, and variable elsewhere. The mean temperature was in defect over Burma, Assam and Bengal, and in excess in all other parts of the country, the excess being large over North-West India and over the Madras Deccan. Scattered showers of rain had fallen over the Peninsula and a moderately heavy shower at Tavoy.

Monday.—Pressure had increased briskly in Burma and changed slightly elsewhere. Readings remained high over North-Eastern and North-Western India and low over the Bay and the Arabian Sea—the pressure difference being small. The winds were practically unchanged. The mean temperature had increased except over the Peninsula. The area of deficient temperature was contracting and included only Ganjam, Lower Bengal and part of Burma. The excess in the north-west had increased and become large to very large. General and moderately heavy rain had been received over the southern half of the Peninsula and a few scattered showers over Burma.

Tuesday.—Pressure had risen briskly in the north-west and slightly in most other places. Readings were high over Burma and over North-Western and Central India and low over the Bay. The wind had become easterly and southerly over Burma, but was unchanged in direction elsewhere. The mean temperature was lower than usual over Burma and the south and centre of the Peninsula and higher elsewhere, the abnormal excess being again large over North-West India. Fairly general showers had been received over Upper and Central Burma and the South of the Peninsula. The amounts were not large.

Wednesday.—Pressure had decreased briskly in the north-west and changed slightly elsewhere. Readings were highest over Burma and Assam, relatively high over the central parts of the country and the North Punjab, and low over the Indus Valley and north of the Arabian Sea and over the Bay. The winds showed no change of importance except that the force had been high at Diamond Island. The mean temperature had fallen fast in Burma and was low for the time of year over that Province and over Madras. Elsewhere the abnormal heat continued and was greatest over the Punjab, Rajputana and Central India. A few scattered showers were received over North-East India and in the extreme south of the Peninsula.

Thursday.—Pressure had generally increased—most so in the north. Readings were highest in Assam and Upper Burma and relatively high in the North Punjab and in Rajputana, where feeble depressions existed, one over the western desert, and a second over the Bay. The winds exhibited very little alteration. Calms were very numerous over the central parts of the country. The mean temperature was again in considerable defect over Burma and in slight defect over Madras, while it was in considerable to large excess over North-West India.

Friday.—Pressure had decreased almost everywhere, but there was no change of importance in the general distribution. The winds were also unaltered. The mean temperature remained in moderate to considerable defect over Burma and in slight defect over Madras, while the abnormal excess over Northern and Central India was undiminished. The only rainfall reported was a few light showers over Central Burma.

Saturday.—Pressure had changed irregularly and in most places slightly. Readings remained high in the north-east, north-west and centre and low over the Bay and the Arabian Sea. The winds were little changed except that the directions over Madras had become even more westerly than on previous days. The mean temperature was low over Burma and the central parts of the Peninsula and excessive elsewhere, the abnormal excess in the Southern Punjab and Eastern Rajputana being very large. Light showers were reported from Srinagar and a few places in Bengal.

Temperature.—The following table gives the variations of the mean temperature from the normal in the different provinces of India for each day of the week :—

Province.	November 1895.							Mean variation of week.
	3rd.	4th.	5th.	6th.	7th.	8th.	9th.	
Burma	−0·6	+0·4	−1·2	−3·8	−4·7	−3·9	−3·1	−2·4
Bengal and Assam	−1·3	+0·1	+1·0	+1·0	+1·1	+2·0	+2·5	+0·9
North-Western Provinces and Oudh	+2·0	+3·5	+3·6	+3·4	+4·2	+4·5	+4·5	+3·7
Punjab	+5·6	+5·8	+5·2	+4·5	+5·1	+5·2	+3·4	+5·0
Bombay	+2·5	+1·5	+0·7	+0·7	+1·3	+0·8	+0·8	+1·2
Central Provinces and Berar	+1·7	+2·5	+2·9	+2·7	+3·1	+2·8	+2·6	+2·6
Central India and Gujarat	+3·4	+4·4	+5·0	+5·7	+4·7	+4·7	+5·0	+4·7
Sind and Rajputana	+4·2	+5·2	+5·2	+5·0	+5·8	+7·4	+7·4	+5·7
Madras	+3·0	+1·6	−1·2	−1·0	−0·8	−0·2	+0·9	+0·3
Mean for whole of India	+2·3	+2·8	+2·4	+2·0	+2·2	+2·6	+2·4	+2·4

The above figures show that for the whole country there was a mean daily excess of between 2° and 2°·8. The 4th was the hottest day when the mean temperature of every one of the provinces of India exceeded the normal by amounts ranging from 0°·4 in Burma to 5°·8 in the Punjab. The provincial variations show a moderate defect of temperature over Burma, normal temperature conditions over Bengal, Assam, and Madras, and a slight to large excess elsewhere. The greatest excess reported is 5° in the Punjab and 5°·7 in Sind and Rajputana. In the last named division the excess of the mean temperature over the normal on the 8th and 9th was as much as 7°·4.

Rain.—As is normally the case at this season the rainfall of the week under review has been practically confined to the Peninsula and to North-East India, the weather over the whole of the several and the north-western parts of the country having been fine and dry. As shown in the earlier portion of the summary the rainfall gradually fell off as the week advanced and at its close had almost ceased both in the Peninsula and in the north-east. In consequence the rainfall for the week was very generally short of the normal as is shown by the concluding table. This table shows that in the case of twenty-nine of the rainfall divisions no rainfall whatever was received during the week under review, in the case of six more divisions, the average actual rainfall was less than 0·10″ during the week, while in the case of the remaining seventeen divisions effective rainfall was received. Of these seventeen divisions, six received more and the rest less than the normal average. The regions which received effective rainfall included the following divisions:—Central and Upper Burma, Arakan, both the Assam divisions, North Bengal, Malabar, Coorg, Mysore, the Konkan, the Bombay Deccan, the East Coast (North, Central and South) and Madras (South-Central, Central, and South), and of these divisions both the Assam divisions, North Bengal, Madras (South-Central), Coorg, and Mysore received more rain than usual. The most serious cases of deficiency are shown in Burma and the Madras coast districts. Thus, Lower Burma reports an actual average fall of 0·06″ instead of 1·17,″ the East Coast (North (*a*)) an actual of *nil* instead of 1·16″; the East Coast (Central) an actual of 0·25″ instead of 1·55″, and the East Coast (South) an actual of 1·31″ instead of 2·59″.

The three concluding columns of the table show that from the 13th of October to the 9th of November there has been an excess of rain in Chota Nagpur, in Gujarat, Kathiawar and Central India (East), and in nearly all the peninsular divisions and a deficiency elsewhere. In Upper India, from Bihar to the Punjab, there has been practically no rain throughout, and in parts of Bengal and of Burma the total rainfall for the period is, compared with the normal, quite insignificant.

The heaviest totals received during the week are:—Calicut 3·01 ins.; Palladam (Coimbatore) 3·96 ins.; Magadi (Bangalore) 3·30 ins.; Vedaranniyam (Tanjore) 7·26 ins.; Musiri (Trichinopoly) 4·23 ins.; Tinnevelly 3·93 ins.

Province.	Division.	Rainfall data for week ending 9th November 1895. Average actual rainfall of Division.	Average normal rainfall of Division.	Excess or defect in inches.	Rainfall data from 13th October to 9th November 1895. Average actual rainfall of season to date.	Average normal rainfall, 13th Oct. to 9th Nov.	Excess or defect of (seasonal) rainfall expressed as a percentage.

W. L. DALLAS,
Asst. Meteorological Reporter to the Government of India.

SIMLA, *14th November 1895.*

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 16th November.*—No rain in the Circars and the greater portion of the Deccan, and only light scattered showers elsewhere. Agricultural operations continue. The standing crops are generally fair. The harvest is progressing with moderate outturn. Cattle are in good condition. Prices are generally stationary in the Northern and are falling in the Southern half of the presidency.

Bombay.—*For week ending 20th November.*—Rice in parts of Baroda territory and the late crops in two talukas of Khandesh are poor owing to insufficient moisture. The standing crops are otherwise good. Harvesting and sowing operations are progressing in several districts and cotton-picking in Ahmedabad, Khandesh and Ahmednagar. Fodder is insufficient in parts of Hyderabad and Broach. Agricultural stock are healthy except in two talukas of Broach. Prices are normal, except in one taluka of Sholapur.

Bengal.—*For week ending 18th November.*—There was light rain in Dacca and Chittagong during the week, but practically no rain in the other reporting districts. Except in Northern and parts of Eastern Bengal and in Orissa, the state of the winter rice crop is not satisfactory owing to the early cessation of the rains. The sowing of indigo in Lower Bengal and of the spring crops in Bengal and Bihar has commenced. In the Patna district the first sowirgs of poppy have failed owing to the unusual heat, and in Darbhanga the spring crop is suffering from a lack of moisture. Sugarcane is doing well, and pressing has begun in some districts. Cattle are in good condition, except in Champarun and Purnea. The price of common rice is generally steady.

North-Western Provinces and Oudh.—*For week ending 20th November.*—Except for a shower in Garhwal the weather has been clear and unusually warm. Rain is urgently needed in several districts for the spring sowings. The young crops have been somewhat damaged by insects in some parts. Irrigation of the crops is going on where practicable. Poppy sowings have been retarded by abnormal weather. Pressing of sugarcane is in progress. Fodder is sufficient. Markets are sufficiently supplied. Prices are almost stationary with a tendency to rise in a few districts.

Punjab.—*For week ending 20th November.*—Slight rain fell in the Amritsar, Sialkot, and Rawalpindi districts. Harvesting of the autumn crops and sowings of the spring crops continue, but rain is much wanted in all districts. The condition of the autumn crops is good in Amritsar and Peshawar, but the spring crops are generally poor and below average. The standing crops are withering in Hissar and Shahpur. Agricultural stock are generally in good condition, except in Hissar where they are getting lean. Fodder is scarce in Hissar, Delhi, Jullundur, and Lahore, but is sufficient elsewhere. Prices are low in Mooltan, but are rising in Hissar, Jullundur, Dera Ismail Khan, and Peshawar, and are high elsewhere. Wheat is selling at 14½ sers in Delhi, and 15 to 16 sers in Shahpur.

Central Provinces.—*For week ending 20th November.*—The weather is clear but unseasonably warm. Harvesting of the autumn crops is in progress everywhere. The prospects of the spring crops in the northern districts and

the Nerbudda Valley are unfavourable owing to want of rain. Prices are rising in Nagpur.

Burma.—*For week ending 16th November.*—In Lower Burma it is now reported that the crops in Henzada have been seriously affected by the failure of the later rains and the outturn will probably be much poorer than was expected. Prospects in all other districts continue good. In Upper Burma good rain has fallen during the week in Shewbo, Lower Chindwin, Kyaukse, and Meiktila, and the standing crops in these districts have been somewhat improved. Prospects in other districts of the dry zone continue unfavourable. Want of rain is much felt in three townships in the Upper Chindwin, and considerable damage has been done by floods in Kale Kabaw. The price of paddy has risen slightly in Shewbo, Thayetmyo, and Pakokku, and fallen slightly in Bhamo and Pegu; elsewhere prices are stationary.

Assam.—*For week ending 19th November.*—Weather seasonable. Rain is much wanted for the late rice in Darrang and Nowgong; the prospects of the crops elsewhere are good. Tea is doing well. The condition of cattle is good. Fodder and water are sufficient.

Mysore and Coorg.—*For week ending 20th November.*—MYSORE: The standing crops are in good condition. *Ragi* (*Eleusine coracana*) has been harvested in parts. Prices have slightly fallen in Kolar and Shimoga, but have risen in Chittaldrug.

COORG: The rice crop is in good condition. Picking of coffee and cardamoms continues. Water and fodder for cattle are sufficient. Prices are normal.

Berar and Hyderabad.—*For week ending 20th November.*—BERAR: The weather is cool, but there has been no rain during the week. Picking of cotton continues, and in parts of the province *jowar* (*Sorghum vulgare*) and *tur* (*Cajanus indicus*) are doing well. Sowings have been completed in Buldana and Ellichpur. Weeding is not entirely finished. Fodder and water are insufficient in parts of Akola only. Prices are fluctuating in Ellichpur and Wun, but are steady elsewhere.

HYDERABAD: Rainfall moderate. Agricultural prospects are promising. Fodder and pasture are available. Prices are almost stationary.

Central India.—*For week ending 20th November.*—No rain during the week. More rain is still wanted in Bundelkhand, Bhopal, Bhopawar, and Goona. Agricultural operations are in progress in all Agencies. The crops have been damaged for want of rain in Gwalior, Bundelkhand, Baghelkhand, and Goona. Agricultural stock and pasturage are in good condition, except in a few districts of Gwalior. Opium sowings have commenced in Bhopal and are in progress in Bhopawar. The crop is in good condition in Western Malwa and Neemuch. Prices are rising in Bundelkhand, Western Malwa, and in a few districts of Gwalior; they are above normal in Goona and Neemuch, but are normal elsewhere.

Rajputana.—*For week ending 20th November.*—Agricultural operations are generally satisfactory. *Jowar* (*Sorghum vulgare*) is withering in Kotah for want of rain, and the crops have withered in Ulwar and have been much damaged in Bikanir; elsewhere prospects are reported fair, except in Merwara, Jeypore, Kerauli, Bhartpore, Bikanir, Tonk, and Jaisalmere. Agricultural stock generally are in good condition, but are suffering in Ulwar for want of fodder. Pasturage and fodder are generally sufficient, but fodder is scarce in parts of Meywar, Kotah, Shahpura, Ulwar, and Jaisalmere, and it is failing in Dholepore and Bhartpore. Prices are rising in seven States, but are steady elsewhere. Famine is apprehended in Bikanir, but is not seriously felt anywhere at present.

Kashmir.—KASHMIR VALLEY:—*For week ending 19th November.*—Slight rain has fallen. The spring sowings are still going on. Prices continue normal.

Jammu Province.—*For week ending 20th November.*—Rainfall slight. The spring sowings continue. Cattle are in fair condition. Prices are rising.

Nepal.—*For week ending 16th November*—Weather bright and unusually warm. Low-land rice has been harvested; the outturn is good.

DENZIL IBBETSON,

Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.
PUBLIC WORKS DEPARTMENT.
RAILWAY STATISTICS.

STATEMENT OF APPROXIMATE GROSS EARNINGS OF INDIAN RAILWAYS FROM 1ST JULY TO 10TH NOVEMBER 1894, AND FROM 1ST JULY TO 9TH NOVEMBER 1895.

N.B.—As regards the figures in column *Total Earnings from 1st July 1895*, audited figures have been used as far as possible.

Railway.	Average earnings per mile per week during the 2nd-half of 1894.	Week ending 10th November 1894. Mean mileage worked.	Earnings. Total.	Per mile open per week.	Week ending 9th November 1895. Mean mileage worked.	Earnings. Total.	Per mile open per week.	Earnings from 1st July to 10th November 1894.	Earnings from 1st July to 9th November 1895.	Increase.	Decrease.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the week ending at 8 a.m. on Saturday, November 16th, 1895.

The week under review has been one of very light and scattered rainfall. Ordinarily Lower Burma and the East of the Peninsula receive, during the present week, considerable rainfall, but in the present instance the Eastern Peninsula, the centre of the Bay and the Madras coast districts have been the seat of high pressure areas. In consequence the low pressure area, on which depends the autumnal rainfall, has been displaced southward to Equatorial regions, and the air currents of the retreating south-west monsoon have in their turn been shifted southward, and have left the Burma and Indian Peninsulas wholly unaffected. As a consequence the only rainfall received has been a few scattered showers. The most marked feature in the weather during the week has been the excessive temperature which has prevailed over the greater part of the country. It might have been anticipated that this excess would have been most marked over Burma and Madras, where the abnormal absence of rainfall might have been expected to occasion an exceptional rise of temperature, but in both these regions cool northerly breezes kept down the heat and the greatest excess was felt over North-Western and Central India, where on some days both the day and night temperatures were exceptionally high. Accompanying these excessive temperatures was great dryness of the air, so that on some occasions in North-West India at 8 A.M. humidities of between 22% and 32% were registered.

Daily Summary.—*Sunday, 10th November.*—Pressure had given way slightly, but the general distribution was little changed, and uniform pressures

and light winds prevailed generally. A few light showers were reported from North-East India, but in Southern India the only rainfall was 0·41″ at Madura. The mean temperature was in defect of the normal over Burma and the Bombay Deccan, but was in excess elsewhere; the greatest abnormal excess being in the Jhansi district of the North-Western Provinces.

Monday.—Pressure had risen slightly to briskly over the whole of India. Slight high pressure areas were reported from the extreme north-west and extreme north-east and a slight low pressure area from the south-west of the Bay. Pressure differences, however, remained small. Northerly to easterly winds continued over the Peninsula and the Bay area and variable breezes elsewhere. Temperature had also risen and the mean temperature was in defect only in Burma. The abnormal excess was greatest in the South of the Punjab. Showers were reported from Burma and Madras.

Tuesday.—Pressure had increased in the north-west and changed little elsewhere. Readings were highest in North-West India and lowest over the south-west of the Bay and pressure differences were increasing slightly. Pressure was in considerable excess over the Peninsula. The wind was westerly down the Gangetic plain, between north and east elsewhere. Temperature had decreased slightly, but the mean temperature was still in excess except over Burma. The abnormal excess was greatest in the East Punjab. A few light showers were reported from North Bengal, Upper Burma, and the south of the Peninsula.

Wednesday.—Pressure had again increased in the north-west and had hardly changed elsewhere. Readings were lowest over the Gangetic plain and highest over the Bombay Deccan. Pressure was in considerable excess over the Peninsula. The wind directions were practically unchanged. Temperature had decreased in parts of North-Western and of Central India. The mean temperature was in excess of the normal average in all provinces—most so in North-West India. Light showers were again reported from North-East India and the south of the Peninsula.

Thursday.—The barometer had fallen briskly in the extreme north-west and slightly over the Peninsula, while it had been steady or had risen elsewhere. A low pressure area had appeared over the western desert. Winds were irregularly cyclonic in the north-west, but elsewhere the directions were the same as on the preceding day. The temperature had fallen briskly over the Gangetic plain. The mean temperature remained excessive in all provinces. Light showers had been received in North-East India and a heavy shower at Cochin.

Friday.—The barometer had risen everywhere. Readings were very uniform throughout the central parts of India and of the Peninsula. They were relatively low over the western desert and over the centre of the Bay. Irregular cyclonic winds continued to be reported from the north-west. The mean temperature remained excessive in all provinces—most so in Sind and Rajputana. A light shower was reported from Murree and showers had again been received in parts of North-East India.

Saturday.—Pressure had changed slightly, except over the north of the Punjab and Kashmir, where it had fallen briskly. A shallow depression was shown over the Central Punjab. Pressure was in considerable excess over Burma, the centre of the Bay and part of Madras. Moderate south-easterly gales were reported from Murree and Cherat. The mean temperature had fallen below the normal average over Burma, but remained in excess in all the other provinces. A few light showers were reported from Sikkim and the North-West Himalayas.

Temperature.—The excessive heat which set in over India at the commencement of the month has been very pronounced during the present week. On the whole the excess of temperature has been more marked in the case of the night than in the case of the day temperatures. This was particularly noticeable at the close of the week when the minimum temperatures were from 15° to 20° above the average in parts of North-West India.

The following table gives the variations of the mean temperature from the normal in the different provinces of India for each day of the week:—

Province.	November 1895.							Mean variation of week.
	10th.	11th.	12th.	13th.	14th.	15th.	16th.	
Burma	—1·4	+0·5	—0·4	+0·4	+0·4	+0·1	—1·8	—0·3
Bengal and Assam	+2·6	+3·0	+3·8	+3·8	+3·9	+4·1	+4·4	+3·7
North-Western Provinces and Oudh	+4·7	+5·6	+6·2	+6·6	+5·1	+5·8	+6·5	+5·8
Punjab	+6·6	+6·9	+7·0	+6·3	+6·9	+7·8	+7·7	+7·0
Bombay	+0·6	+1·8	+2·0	+1·9	+1·1	+1·0	+1·5	+1·4
Central Provinces and Berar	+3·5	+4·5	+4·9	+4·3	+4·8	+5·2	+5·6	+4·7
Central India and Gujarat	+5·3	+5·2	+5·1	+5·2	+5·4	+4·3	+4·6	+5·0
Sind and Rajputana	+6·8	+5·7	+5·5	+7·2	+6·3	+8·5	+7·4	+6·8
Madras	+1·5	+2·5	+2·1	+1·7	+1·8	+1·0	+0·8	+1·6
MEAN FOR WHOLE OF INDIA	+3·4	+4·0	+4·0	+4·2	+4·0	+4·2	+4·1	+4·0

The mean temperature of the whole of India for the whole week and practically for each day of the week was thus about 4° above the normal. In Burma there was a slight deficiency of temperature on the 10th, 12th, and 16th, and the mean temperature of the whole province for the week was 0°·3 below the normal, but this was the only case of deficient heat. In all the remaining provinces the heat was excessive, the abnormal excess ranging from 1°·5 in the Peninsula to 7°·0 in the Punjab.

Rainfall.—The daily distribution of rainfall has been described in the earlier sections of the summary and the information in the rainfall table at the close calls for little or no remark. The whole rainfall of the week occurred as scattered showers, and was practically confined to North-Eastern and Southern India. Upper Burma and Malabar had a total of about half an inch for the week, and Assam (Surma) and Madras (South) of about one quarter of an inch, while in all the other divisions which received rain, the totals were small and unimportant. The anticipated rainfall for the week under review is in nearly all cases small, and this small amount was in some instances, as, for example, in Assam (Surma), Deltaic Bengal, North Bengal, and Behar, exceeded, but in general the rainfall has been less than usual. Over a large part of the country, for the reason given above, the defect has been small, but in Lower Burma the total actual fall was only 0·06″, while the anticipated fall was 1·07″; in Arakan the actual was *nil*, and the anticipated fall 1·12″; in the East Coast (South) 0·14″ and 1·82″, respectively, and in Madras (South) 0·24″ and 1·24″ respectively. Hence in these regions there has been a decided deficiency of rainfall, while in some other parts of the country the deficiency, though actually and relatively to the normal small, is yet important in face of the long continued lightness of the rainfall.

The three concluding columns of the table giving the actual average and normal average rainfall from the 13th of October to date exhibit an excess of rain in the case of Chota Nagpur, of Malabar, of the Konkan, of Gujarat, of Kathiawar, of Central India (East), and of Hyderabad (South); and a normal rainfall in the case of Madras (South Central), Coorg, Mysore, the Bombay Deccan, Khandesh, the East Coast (North), Madras (Central), the East coast (Central), the East coast (South), and Madras (South). In all the remaining divisions there is a considerable to large deficiency, while in several of the North-West divisions there has been practically no rain throughout the whole period.

The only heavy totals are: Cochin 3·76 inches, Cottayam (Travancore) 2·26 inches.

Province.	Division.	Rainfall data for week ending 16th November 1895. Average actual rainfall of Division.	Average normal rainfall of Division.	Excess or defect in inches.	Rainfall data from 13th October to 16th November 1895. Average actual rainfall of season to date.	Average normal rainfall, 13th October to 16th November.	Excess or defect of (seasonal) rainfall expressed as a percentage.

W. L. DALLAS,
Asst. Meteorological Reporter to the Government of India.

SIMLA, *the 21st November 1895.*

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 23rd November.*—Rainfall heavy along the East coast, south of Nellore, and moderate falls in the remainder of the southern half of the Presidency; showers elsewhere. Agricultural operations are progressing. The standing crops are generally good. The harvest is going on with fair outturn. Pasture and fodder are sufficient. Cattle are in good condition. Prices are falling, especially in the Deccan, Southern, and West coast districts.

Bombay.—*For week ending 27th November.*—The late crops have been slightly injured by grasshoppers or other insects in two talukas of Karachi. The standing crops otherwise are good. Harvesting of the early crops is progressing in fifteen, and sowing of the late crops in twelve, districts. Cotton-picking continues in Ahmedabad, Khandesh, and Ahmednagar; and poppy sowing in parts of Baroda territory. Fodder is scarce in parts of Sind and Broach. Agricultural stock are healthy, except in parts of Broach and Thar and Parkar. Prices are normal, except in parts of Sholapur.

Bengal.—*For week ending 25th November.*—There was no rain during the week. The harvesting of winter rice has begun. Owing to the early cessation of the rains the outturn will probably be below the average, except in Northern Bengal and Orissa. The sowing of the spring crops is in progress, but complaints of a lack of moisture come from Gaya, Darbhanga, and Hazaribagh. Poppy is coming on well, though the recent heat in Bihar has necessitated resowings in places. Sugarcane is a good crop and is being harvested in some districts. The price of common rice continues generally steady, but the slight upward tendency continues.

North-Western Provinces and Oudh.—*For week ending 27th November.*—The weather is cool, and cloudy in places. Rain is much needed for the spring crops on the ground. Owing to the abnormal heat and insects, wheat has been slightly injured in Benares, and the first sowings of poppy have generally failed in Partabgarh. Irrigation of the crops, picking of cotton, and pressing of sugarcane are in progress. Fodder is sufficient. The markets are sufficiently stocked. Prices are fairly steady, but are rising in some districts.

Punjab.—*For week ending 27th November.*—Slight rainfall in Delhi only. Harvesting of the autumn crops and pressing of sugarcane are in progress. Picking of cotton is nearly finished. Sowings of the spring crops are going on, but rain is badly wanted in most districts. The condition of the standing crops is said to be good in Amritsar and Peshawar and average to poor in other districts. The crops are withering for want of rain in some districts. Cattle are generally said to be in good condition, except in Hissar where they are being sent away to the hills. Fodder is scarce in Hissar, Jullundur, and Lahore, is scanty in Ferozepore, and is getting dear in Delhi; in other districts fodder is sufficient. Prices are low in Mooltan, but are rising in Peshawar and Hissar and are high elsewhere. Wheat is selling at 15 to 16 sers per rupee in Shahpur and 13½ sers in Delhi.

Central Provinces.—*For week ending 27th November.*—The weather is clear but is still unusually warm. In the north of the provinces and in the

Nerbudda Valley where the prospects of the spring crops are deteriorating for want of moisture, rain is much needed to improve the outlook. Cotton-picking continues and favourable reports are received of the yield. The outturn of rice in Sambalpur is estimated at thirteen annas.

Burma.—*For week ending 23rd November.*—In Lower Burma some probable damage from failure of the later rains is now anticipated in Bassein, but the extent is not known. Prospects in other districts continue favourable. The early paddy is being reaped. In Upper Burma ploughing for dry-weather paddy has commenced in one township of Mandalay. Reaping of early wet-weather paddy is in progress in Bhamo, Myitkyina, the Ruby Mines, Shwebo, Upper Chindwin, Thayetmyo, Pakkoku, Minbu, Magwe, Kyaukse, and Myingyan. No rain has fallen during the week in any district. The *jowar* (*Sorghum vulgare*) crop in one sub-division of Minbu is said to be very poor, and the crop has failed altogether in some parts of Myingyan. On the whole, prospects are very poor. The price of paddy has risen slightly in Pakkoku and Magwe; elsewhere prices are stationary.

Assam.—*For week ending 26th November.*—The weather is dry and rain is badly wanted for the crops in Darrang and Nowgong. Reaping of late rice has commenced. Tea is doing well. The condition of cattle is good. Fodder and water are sufficient.

Mysore and Coorg.—*For week ending 27th November.*—MYSORE: Slight rain in parts. Prospects are favourable. *Ragi* (*Eleusine coracana*) has been harvested in parts. Prices have fallen in Kolar and Chitaldrug.

COORG: The rice crop is maturing. Picking of coffee and cardamoms continues. Water and fodder for cattle are sufficient. Prices are normal.

Berar and Hyderabad.—*For week ending 27th November.*—BERAR: The weather is cool. The standing crops are in fair condition. Picking of cotton is in progress. Fodder and water are insufficient in parts of Akola. Prices have risen in Ellichpur, but have fallen in Wun, and are stationary elsewhere.

HYDERABAD: No rain during the week. Agricultural prospects are favourable. Fodder and pasture are available. Prices are steady.

Central India.—*For week ending 27th November.*—No rain during the week. More rain is still wanted in Bhopal, Bundelkhand, Bhopawar, and Goona. Agricultural operations are in progress in all parts. The crops have been slightly damaged for want of rain in Gwalior, Bundelkhand, Baghelkhand, Bhopawar, and Goona. Agricultural stock and pasturage are in fairly good condition. Opium is being sown in Bhopal and Bhopawar, and the crop is good in Western Malwa and Neemuch. Prices are rising in Bundelkhand and parts of Gwalior and are above normal in Western Malwa, Goona, and Neemuch; elsewhere prices are normal.

Rajputana.—*For week ending 27th November.*—Agricultural operations are generally satisfactory. Wheat is withering in places in Kotah, and the unirrigated crops are suffering in Ajmere-Merwara and Ulwar, and are bad in Jeypore for want of rain. The crops have been much damaged in Bikanir, and injury to all the standing crops is also reported from Jhallawar. Prospects are generally fair, expect in Jhallawar, Merwara, Jeypore, Bhurtpore, Bikanir, Tonk, and Jaisalmere. Agricultural stock are generally in good condition, but are suffering in Ulwar and parts of Jaisalmere for want of fodder. Pasturage and fodder are generally sufficient, except in Shahpura, Ulwar, Jaisalmere, and Kherwara, and fodder is failing in Dholepore and Bhurtpore. Prices are rising in eight States, and falling in one; elsewhere prices are steady. Famine is impending in parts of Bikanir.

Kashmir.—KASHMIR VALLEY.—*For week ending 26th November.*—Rainfall moderate. The spring sowings are still going on. Prices continue normal.

JAMMU PROVINCE.—*For week ending 27th November.*—Report not received.

Nepal.—*For week ending 23rd November.*—The weather is warmer and drier than usual. The wheat and barley crops are promising.

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

(*a*) Includes the Bhopal-Itársi, the Bina-Guna, and the Bhopal-Ujjain railways.
(*b*) Includes the Godhra-Rutlam railway.
(*c*) Includes the Guntakal-Mysore frontier section.
(*d*) Includes the Tirhoot state railway. Although for convenience classed amongst state railways, the company's section of this line is the property of the Bengal and North Western Railway Company.
(*e*) Includes the Jammu and Kashmir and the Hyderabad-Shadipalli railways.
(*f*) Although for convenience classed amongst state railways, this line is the property of the Bengal Central Railway Company.
(*g*) Includes the Wardha Coal, Dhond-Manmad, Khámgaon, and Amráoti railways.
(*h*) Includes the Mysore-Nanjangud and the Yesvantpur-Mysore frontier sections.
(*i*) The line is being worked by the Bombay, Baroda and Central India Railway Company, as a temporary measure.
(*j*) Total earnings from 1st August to 16th November 1895.

CALCUTTA, *the 25th November 1895.*

H. BONHAM-CARTER, *Captain, R.E.,*
Asst. Secretary.

GOVERNMENT OF INDIA.
PUBLIC WORKS DEPARTMENT.
RAILWAY STATISTICS.

No. XXXI OF 1895-96.

STATEMENT OF APPROXIMATE GROSS EARNINGS OF INDIAN RAILWAYS.

N.B.—As regards the figures in column *Total Earnings from 1st April 1895*, audited figures have been used as far as possible.

Railway.	Average earnings per mile per week in 1894-95.	Week ending 17th November 1894. Mean mileage worked.	Earnings. Total.	Per mile open per week.	Week ending 16th November 1895. Mean mileage worked.	Earnings. Total.	Per mile open per week.	Earnings from 1st April to 17th November 1894.	Earnings from 1st April to 16th November 1895.	Increase.	Decrease.

SUPPLEMENT TO

The Gazette of India.

No. 49.} CALCUTTA, SATURDAY, DECEMBER 7, 1895.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the week ending at 8 a.m., on Saturday, November 23rd, 1895.

The general distribution of pressure has been very steady over the Indian area during the week under review. Readings have been steadily high over Northern India and low in the extreme south of the Indian area with moderate intervening gradients. On the 17th and 18th these conditions were temporarily and slightly disturbed by the passage across the Southern Punjab and the west of the North-Western Provinces of a very slight barometric depression, which broke up among the Kumaun Himalayas. As this depression crossed Northern India, the barometric changes were brisk, but at most other times the principal characteristic of the weather was the steadiness of the pressure distribution and the smallness of the barometric changes from day to day. Northerly winds prevailed almost uninterruptedly over the Bay area, and easterly winds over the centre and west of the Peninsula, while over Northern and Central India calms and variable breezes were generally prevalent. During the existence, however, of the depression on the 17th and 18th, strongish cyclonic winds were reported from North-West India. Temperature has been steadily excessive throughout the week. Light rain was reported from Srinagar on the 17th, and showers extended to the Kumaun Himalayas and the neighbouring plains on the 18th, but there was no rain in this region after the latter date. In the Madras coast districts rain commenced on the 18th, and light to moderate showers were received in this region daily until the close of the week.

Daily Summary.—*Sunday, 17th November 1895.*—Pressure was increasing briskly to rapidly over the Western Punjab, but was changing by small amount elsewhere. A slight depression was crossing the Punjab. Readings were highest in the north of the Punjab, and lowest in the south of the Bay. The winds were feebly cyclonic in the north-west; northerly over the Bay, easterly over the centre and west of the Peninsula, and variable elsewhere. The force has been strong on the North-West Himalayas. The mean temperature was normal over the Peninsula and Burma, and excessive elsewhere.

Monday, 18th November.—Pressure had again increased briskly in the north-west and changed by small amounts elsewhere. The slight depression had moved eastward and lay over the east of the Punjab and the west of the North-Western Provinces. In other respects the distribution of pressure was unchanged. The cyclonic circulation of the winds over North-West India was still shown, and in other parts of the country the winds were generally unchanged. The force had again been strong in the North-West Himalayas. The mean temperature was below the normal average over Burma and North-West India, and above elsewhere, the abnormal excess being greatest within the depression area. Light showers of rain had fallen over the Kumaun Himalayas and their neighbourhood, and moderate showers in Madras.

Tuesday.—Pressure had increased over the greater part of the country, the recovery in the north-west being again brisk. The slight depression had disappeared and pressure decreased steadily from a high pressure area in the north-west to a low pressure area over the south of the Bay. Northerly winds were blowing over a large part of Northern India as well as over the Bay area, and easterly winds over the Central Provinces and the west and centre of the Peninsula. The mean temperature was again low over Burma and the extreme North-West India, and high elsewhere.

Wednesday.—Pressure had decreased slightly over the extreme north-west of India and the west and south of the Peninsula, and increased elsewhere—briskly in Bengal. Pressure again decreased steadily from a high pressure area in the extreme north-west to a low pressure area over the south of the Bay. The winds were variable over Northern and Central India, and were unchanged in other places. The distribution of the mean temperature relatively to the average was unaltered. Temperature was in very large excess over Central India. Light showers of rain had fallen over the southern half of the Peninsula.

Thursday.—Pressure had changed by small amounts, and the distribution of pressure was practically unaltered. Calms and variable breezes prevailed over North-Western and Central India, and northerly to easterly winds in other parts of the country. The force was fresh in parts of Lower Burma and of the Peninsula. The mean temperature was about normal over the Western desert, and generally excessive elsewhere, the abnormal excess being again greatest over Central India. A few light showers were reported from the south of the Peninsula.

Friday.—Pressure had fallen everywhere, the decrease being brisk over a large part of the Indian region. Readings were high and uniform over Northern and Central India, and thence decreased slowly southward to allow pressure area over the south of the Bay. The winds were unaltered. The mean temperature remained normal over the Western desert, and excessive elsewhere. Showers were received over Madras and Ceylon; the only large rainfall amount was 3 ins. at Negapatam.

Saturday.—The pressure changes were small and there was no important change in the general distribution. The winds were also practically unchanged. The mean temperature was normal in Burma, Bengal, Sind, Rajputana, and Madras, and excessive elsewhere. Rain had again fallen over Southern India and Ceylon.

Temperature.—As shown by the earlier sections of this summary, the rainfall of the past week has been confined almost wholly to the extreme north-west

of India and to the Madras coast districts. Within these two regions, and also it may be added in Burma, the mean temperature fell at times to below the normal average, but with these exceptions there was a steady excess of heat experienced throughout the week. This abnormal excess was at times very large, and exceeded 9° at Meerut on the 18th, at Saugor on the 19th, and at Neemuch on the 20th and 21st. Very large temperature contrasts were shown over North-West India on some days, thus, on the 18th, the mean temperature at Dera Ismail Khan was only 58°·6, and that at Agra 77°·5, showing a difference of nearly 20° in that distance.

The following table gives the variations of the mean temperature from the normal in the different Provinces of India for each day of the week:—

Province.	November 1895.							Mean variation of week.
	17th.	18th.	19th.	20th.	21st.	22nd.	23rd.	
Burma	−1·1	−0·4	−0·4	+0·7	+1·2	+1·0	−0·6	+0·1
Bengal and Assam	+4·7	+4·6	+4·6	+3·8	+2·3	+1·2	+0·4	+3·1
North-Western Provinces and Oudh	+6·6	+7·1	+5·2	+3·5	+2·7	+1·9	+1·2	+4·0
Punjab	+5·1	+1·4	−0·3	+1·0	+1·2	+1·2	+1·2	+1·5
Bombay	+1·3	+1·5	+2·8	+3·7	+3·5	+3·2	+2·6	+2·7
Central Provinces and Berar	+5·4	+5·1	+5·3	+5·2	+5·1	+4·7	+4·2	+5·0
Central India and Gujarat	+5·3	+5·5	+5·1	+6·1	+6·9	+5·3	+4·2	+5·5
Sind and Rajputana	+5·4	+3·1	+0·9	−0·3	+1·7	+1·6	+0·9	+1·9
Madras	+1·0	+2·2	+2·6	+1·4	+1·7	+1·6	+0·9	+1·5
Mean for whole of India	+3·7	+3·3	+2·8	+2·8	+2·9	+2·4	+1·7	+2·8

The above figures show that, for the whole country on each day of the week, the heat was abnormally great, the excess gradually decreasing from 3°·7 on the 17th to only 1°·7 on the 23rd, while the variation for the whole country for the week averaged 2°·8. The provincial variations show that on four days during the week in Burma and on one day in the Punjab, the mean temperature was less than usual, but that on all other days in those two provinces and on all days in the other provinces temperature was largely above the normal. On the mean of the whole week the day temperatures were, relatively to the average, somewhat more excessive than were the night temperatures.

Rainfall.—The concluding table gives the rainfall data for the week. The returns show that the rainfall was confined to a few divisions of North-East and of North-West India, and of the coast and southern divisions of the Peninsula, and that, even in these regions, the total rainfall of the week was, with one or two exceptions, insignificant. One division, *viz.*, the East coast (south) received an average actual fall of 2·09″, another, Madras (south) of 0·97″, and a third, the East coast (central) of 0·81″, but in no other case did the average amount received equal half an inch, and in the case of eleven divisions it did not equal one-tenth of an inch. In thirty-four of the rainfall divisions no rain whatever was received during the week. In nearly all parts of the country the rainfall was less than the average, but there was a trifling excess in the case of Arakan and of the Submontane division of the North-Western Provinces, and a slight excess in the case of the East coast (south) and of Madras (south).

The returns for the period, October 13th to November 23rd, exhibit an excess of rain over Chota Nagpur, Gujarat, and Kathiawar, and normal or excessive rain over all the Peninsular divisions, but in all other parts of the country the rainfall has been deficient, in some cases considerably so.

The only instances of considerable totals being received during the week under review are reported from the south of the Peninsula, where Krishnapatnam (Nellore) reports 3·67″; Saidpet (Chingleput) 3·67″; Chidambaram (South Arcot) 7·91″; Shiyali (Tanjore) 11·79″; and Ramnad (Madura) 5·58″.

Province.	Division.	Rainfall data for week ending 23rd November 1895. Average actual rainfall of Division.	Average normal rainfall of Division.	Excess or defect in inches.	Rainfall data from 13th October to 23rd November 1895. Average actual rainfall of season to date.	Average normal rainfall, 13th Oct. to 23rd Nov.	Excess or defect of (seasonal) rainfall expressed as a per-centage.

W. L. DALLAS,
Asst. Meteorological Reporter to the Government of India.

SIMLA, *28th November 1895.*

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 30th November.*—Rainfall heavy almost throughout the Carnatic districts and in Tanjore, moderate in the Central and other Southern districts; no rain on the West Coast, and in the Deccan and Circars. The total rainfall to date is generally above average, except in Kurnool, Nellore, North Arcot, and Malabar where the deficiency is slight. Sowings still continue in parts. The water-supply is generally sufficient though more rain is required in parts of the Carnatic and Southern districts. The standing crops are generally good. The harvest is in progress with fair outturn. Pasture and fodder are sufficient. Cattle are in good condition. Prices continue falling in the Deccan, Central, and Southern districts, but are stationary elsewhere.

Bombay.—*For week ending 4th December.*—Slight rain in parts of Shikarpur and the Upper Sind frontier. The early crops have been damaged by drought, blight, and rats in parts of Karachi. The standing crops otherwise are good. Harvesting of the early, and sowing of the late, crops are progressing in a few districts and have been completed in others. Cotton-picking continues in Thar and Parkar, Ahmedabad, Khandesh, and Ahmednagar; and poppy sowing in parts of Baroda territory. Fodder is insufficient in parts of Shikarpur and Hyderabad. Agricultural stock are healthy. Prices are normal, except in one taluka of Sholapur.

Bengal.—*For week ending 2nd December.*—No rain fell during the week. Harvesting of rice is in progress, and the outturn, as previously reported, is expected to be below the average, except in parts of Northern and Eastern Bengal and in Orissa. The sowing of the spring and poppy crops is nearly over; the latter is doing well, but for the former the moisture is reported insufficient in Bihar and North Bengal. Sugarcane is generally a good crop, and the prospects of indigo are fair. Cattle are in good condition except in part of Purnea. The price of common rice continues steady.

North-Western Provinces and Oudh.—*For week ending 4th December.*—The weather has been generally cloudy with showers in some districts, but more rain is needed for the young crops, especially in some Eastern and Southern districts and in Rohilkhand and Kumaun. Irrigation is in progress where practicable. Slight injury to the crops by insects is reported from Gorakhpur, Fyzabad, and Allahabad. Sugarcane pressing continues. Prospects on the whole are fair. Fodder is ample. Markets are sufficiently supplied. Prices are almost stationary.

Punjab.—*For week ending 4th December.*—Slight rain fell in Delhi, Rawalpindi, Shahpur, Dera Ismail Khan, and Peshawar. Sugarcane is being pressed and the sessamum crop has been harvested. Sowings of the spring crops are not yet completed, and rain is urgently wanted. The condition of the standing crops is not very satisfactory, and the crops have dried up in Hissar. Cattle are generally in good condition, except in Hissar. Fodder is scarce in Hissar, Delhi, Jullundur, Sialkot, Lahore, and in parts of Dera Ismail Khan, but is sufficient in other districts. Prices are low in Mooltan and Peshawar, but are rising in Hissar and Jullundur, and are above normal in Sialkot; elsewhere prices are high.

Central Provinces.—*For week ending 4th December.*—Weather occasionally cloudy with slight falls of rain in five districts. Harvesting of the autumn

crops is approaching completion. The prospects of the winter crops are generally unfavourable owing to want of rain. Prices have risen slightly in Nagpur.

Burma.—*For week ending 30th November.*—In Lower Burma prospects continue good. In Upper Burma no rain has fallen during the week in any district, except Thayetmyo which received over an inch. Prospects have not materially changed since last week. In Mandalay the harvest is said to be normal. In Shwebo, a large part of Sagaing, Lower Chindwin, and Pakokku the crops are poor. In Minbu the paddy crop on irrigated lands will give a fair crop, but that on unirrigated lands has entirely failed. The cotton and millet crops in the Mu Valley are promising. The crops have entirely failed in five circles in Meiktila and are nearly a total failure in several other circles. In Myingyan the crops are poor, but are said to have slightly improved in the Northern subdivision. In Yamethin, the crops are very poor. The price of paddy has risen considerably in Toungoo and slightly in Magwe, but has fallen considerably in Rangoon and Myaungmya and slightly in Thongwa and Tavoy; elsewhere prices are stationary.

Assam.—*For week ending 3rd December.*—The weather is seasonable. Reaping of late rice has commenced. The condition of cattle is good. Fodder and water are sufficient.

Mysore and Coorg.—*For week ending 4th December.*—MYSORE: The standing crops are in good condition. *Ragi* (*Eleusine coracana*) has been harvested in parts. Prices have slightly risen in Kolar and Chitaldrug, but have fallen in Shimoga.

COORG: The rice crop is in good condition. Coffee-picking continues. The cardamom crop has been picked. Water and fodder for cattle are ample. Prices of food grains are normal.

Berar and Hyderabad.—*For week ending 4th December.*—BERAR: The weather is cool. The crops are doing fairly well, but more rain is needed. Cotton is being picked in all parts of the province. Fodder and water are inadequate in the Khamgaon and Jalgaon talukas. Prices are almost steady.

HYDERABAD: No rain during the week. The standing crops are in good condition. Agricultural prospects are favourable. Fodder and pasturage are sufficient. Prices have risen slightly.

Central India.—*For week ending 4th December.*—Rain fell in Gwalior, Bhopal, Baghelkhand, and Goona, but more rain is still wanted in Bhopal, Bundelkhand, Baghelkhand, parts of Bhopawar and Goona. Agricultural operations are in progress in all parts. The crops have been damaged for want of rain in Gwalior, Bundelkhand, Baghelkhand, Bhopawar, and Goona. Agricultural stock and pasturage are in good condition, except in six districts of Gwalior. Opium is being sown in Bhopal, and the crop is in fair condition in Western Malwa, Bhopawar, and Neemuch. Prices are rising in parts of Gwalior and in Bundelkhand, and are above normal in Western Malwa, Goona, and Neemuch; elsewhere prices are normal.

Rajputana.—*For week ending 4th December.*—Agricultural operations are generally satisfactory. The standing crops are withering in Kotah, and have been damaged in Jhallawar, and have mostly withered in Jaisalmere. The unirrigated crops are in bad condition in Jeypore. In Ajmere-Merwara and Ulwar the crops are suffering for want of rain. Prospects elsewhere are fair, except in Merwara, Jeypore, Tonk, and Jaisalmere. Agricultural stock are generally in good condition, but are suffering in Ulwar and parts of Meywar and Jaisalmere for want of fodder. Pasturage and fodder are generally sufficient, but fodder is scarce in Kherwara, Shahpura, Ulwar, and Jaisalmere and in parts of Meywar, and is failing in Dholepore and Bhurtpore. Prices are rising in ten States, but are steady

elsewhere. Scarcity is prevalent in some parts of the Jehazpore district of Meywar. Famine prevails in the Suratgarh tehsil of Bikanir and 445 persons are employed on relief works.

Kashmir.—KASHMIR VALLEY:—*For week ending 3rd December.*—No rain. The rice crop is still being threshed. Spring sowings are going on. Prices continue normal.

Jammu Province.—*For week ending 4th December.*—No rain. Spring sowings are in progress. Cattle are in good condition. Prices are rising.

Nepal.—*For week ending 30th November.*—The weather continues warm in spite of some rain. Prospects are good.

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

(*a*) Includes the Bhopal-Itársi, the Bina-Guna, and the Bhopal-Ujjain railways.
(*b*) Includes the Godhra-Rutlam railway.
(*c*) Total earnings from 2nd April to 24th November 1894.
(*d*) Includes the Guntakal-Mysore frontier section.
(*e*) Includes the Tirhoot state railway. Although for convenience classed amongst state railways, the company's section of this line is the property of the Bengal and North-Western Railway Company.
(*f*) Total earnings from 1st July to 23rd November 1895.
(*g*) Includes the Jammu and Kashmir and the Hyderabad-Shadipalli railways.
(*h*) Although for convenience classed amongst state railways, this line is the property of the Bengal Central Railway Company.
(*i*) Includes the Wardha Coal, Dhond-Manmád, Khámgaon, and Amráoti railways.
(*j*) Total earnings from 1st June to 24th November 1894.
(*k*) Includes the Mysore-Nanjangúd and the Yesvantpur-Mysore frontier sections.
(*l*) The line is being worked by the Bombay, Baroda and Central India Railway Company as a temporary measure.
(*m*) Total earnings from 1st August to 23rd November 1895.

F. B. HEBBERT,
Under-Secretary.

CALCUTTA, *the 6th December 1895.*

Printed and published for the GOVERNMENT OF INDIA *at the Office of the* SUPERINTENDENT OF GOVERNMENT PRINTING, INDIA.
No. 8, Hastings Street, Calcutta.

SUPPLEMENT TO

The Gazette of India.

No. 50.} CALCUTTA, SATURDAY, DECEMBER 14, 1895.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the week ending at 8 a.m. on Saturday, November 30th, 1895.

During the week under review pressure has been unsteady and has changed considerably from day to day over North-Western India, but in all other parts of the Indian region the barometer has been fairly steady, and the general distribution of pressure has not altered to any considerable extent throughout the week. The unsettled conditions over North-Western India apparently advanced to that position from the westward, as the first indication of disturbed weather was afforded by the Observatories in Persia on Sunday, 24th November. On Tuesday, the 26th, a very feeble depression was shown over Western Rajputana, and showers had occurred over Baluchistan, the North Punjab, and the North-Western Himalayas. This depression advanced eastward, showers accompanying it, but the barometer rose quickly in its rear, and the closing days of the week were marked by fine weather throughout nearly the whole Indian region. Some heavy showers of rain were received in the Madras coast districts during the first half of the week. The excessive temperatures which have prevailed during the past few weeks have held steadily over the greater part of India during the present week. In Burma this excess has not been felt, and the mean temperature has been below the normal average on all days.

Daily Summary.—*Sunday, 24th November.*—Pressure had increased everywhere and was above the normal average except over part of North-Western and Central India, and the south-west of the Peninsula. Readings were high over Northern India, and low over the south of the Bay and off the Malabar coast. The winds blew from between North and East. Numerous calms were reported from Northern India. The mean temperature was above the normal over the greater part of the country—most so in the centre. Showers of rain had fallen in parts of Burma and of the Madras coast districts.

Monday, 25th November.—Pressure had again increased almost everywhere within the Indian region, but had begun to fall in Baluchistan. The distribution of pressure was unaltered. Calms were again reported over Northern India, and northerly and easterly winds elsewhere. The mean temperature was lower than usual in Burma, and parts of Madras, and higher than usual elsewhere. Showers had been received in Sikkim, parts of Burma, and in the Madras coast districts.

Tuesday, 26th November.—Pressure had risen over the west of the Punjab and decreased elsewhere. A slight depression had appeared over Western Rajputana and the rise of the barometer in the Western Punjab was attributable to the recovery in the rear of this depression. The winds were irregular over North-West India, but were unchanged elsewhere. The mean temperature was again in defect of the normal over Burma and Madras, and in excess in all other places. Light showers had been received over Baluchistan, the North-West Himalayas, and the North Punjab and heavy showers over the Madras Coast Districts.

Wednesday, 27th November.—Pressure had increased very slowly over the Western desert and over parts of Madras and of Burma, but had decreased elsewhere. The shallow depression was shown over the Southern Punjab. The winds were again irregular, with a slight cyclonic tendency over North-West India, and were between North and East in other parts of the country. Calms were reported over the Gangetic plain. The mean temperature was below the normal average over Burma, Bengal, and Madras, and above in the other Provinces. Showers had occurred at the extreme North-Western Stations and in the Madras Coast Districts.

Thursday, 28th November.—Pressure had increased briskly to slightly over part of North-West India, but had hardly changed elsewhere. A large high

pressure area overlay North-West India. Readings were still lowest over the south of the Bay. Light Westerly winds and calms were reported from the Gangetic plain, but in other places the directions were generally from between North and East. The mean temperature was generally in excess over Northern and Central India and generally in defect in other parts of the country. A few light scattered showers were reported.

Friday, 29th November.—Pressure changes were again very small, except in the North-West where the barometer had fallen briskly. Readings were highest in the N. E., but they were fairly high and uniform throughout the whole of Northern India. The lowest pressures continued to be reported from the south of the Bay. Calms had reappeared over a large part of Northern and Central India, while elsewhere the wind directions remained between North and East. The mean temperature was in defect over Burma, the central parts of the Peninsula and Sind. Light scattered showers had again occurred in North-Eastern and Southern India.

Saturday, 30th November.—Pressure had increased almost everywhere, the rise being greatest in the north. Readings were highest along the foot of the Himalayas, lowest over the south of the Bay, with steepish intervening gradients. Northerly to Easterly winds prevailed over the greater part of the country. The mean temperature was below the normal over Burma and above elsewhere. Showers were again reported from a few places in the North-East and South.

Temperature.—The excessive temperatures recently prevailing were somewhat less pronounced during the week under review than in preceding weeks. In Burma, indeed, the mean temperature was steadily below the normal throughout the week, and in Madras on most days large portions of the Presidency had a lower temperature than usual. In the North-West the temperature was, owing to the occurrence of showers, unsteady and exhibited considerable differences from day to day, but in the centre high temperatures prevailed uninterruptedly.

The following table gives the variations of the mean temperature from the normal in the different provinces of India for each day of the week:—

Province.	November 1895.							Mean variation of week.
	24th.	25th.	26th.	27th.	28th.	29th.	30th.	
Burma	—0·8	—2·3	—1·5	—2·0	—2·1	—1·6	—0·5	—1·5
Bengal and Assam . .	+0·4	+0·7	+0·2	—0·4	+0·3	+1·5	+1·6	+0·6
North-Western Provinces and Oudh . .	+1·4	+1·3	+2·2	+2·2	+2·8	+1·9	+3·6	+2·2
Punjab	+1·3	+3·4	+3·7	+3·0	+0·9	+3·2	+2·6	+2·6
Bombay	+2·2	+2·0	+1·9	+1·2	+1·0	+0·8	+1·4	+1·5
Central Provinces and Berar	+4·2	+4·1	+3·2	+2·4	+3·3	+3·6	+5·1	+3·7
Central India and Gujarat .	+4·6	+4·3	+4·3	+3·7	+5·5	+4·9	+4·1	+4·5
Sind and Rajputana . .	+1·7	+3·0	+4·6	+4·8	+4·7	+1·3	+2·6	+3·2
Madras	+1·6	+0·5	—0·7	—0·7	+0·1	+0·6	+1·3	+0·4
Mean for whole of India	+1·8	+1·9	+2·0	+1·6	+1·8	+1·8	+2·4	+1·9

The mean temperature of the whole of India for the whole week was 1°·9 above the normal average. The daily variation was very nearly the same, but was slightly less on the 27th and slightly more on the 30th. In Burma the mean temperature was lower than usual throughout the week, the greatest abnormal deficiency being on the 25th, and in Madras the mean temperature was in defect on two days, *viz.* 26th and 27th. With these exceptions the mean temperature was steadily in excess of the normal, the abnormal excess being greatest over the central parts of the country. At the commencement of the week the day temperatures were as a rule higher than the night temperatures, relatively to the normals; but on the 26th high minimum temperatures appeared over the

Punjab, and thence spread to a large part of North-Western and Central India, the day temperatures at the same time decreasing over those regions.

Rainfall.—As shown by the earlier sections of the summary the rainfall of the week has been restricted to light showers in the extreme North-West and North-East, and to moderate showers in the extreme south. The concluding table exhibits the rainfall data. Effective rainfall occurred during the week in five of the rainfall divisions, *viz.*, Arakan, Madras (South Central), the East Coast (Central), the East Coast (South), and Madras (South), and slight ineffective rainfall in ten other divisions, *viz.*, Central and Upper Burma, Assam (Brahmaputra), North Bengal, the Punjab (North-West and West) Malabar, the Central Provinces (Central), Sind, and Madras (Central). In all the remaining divisions no rainfall whatever was received during the week under review. The heaviest average actual fall was 2·23″ in the East Coast (South), and in this division as well as in Sind and Arakan the total average fall of the week was slightly in excess of the normal. In all the other divisions the rainfall was less than usual. The column of average normal rainfall of the week shows that the anticipated rainfall during this period is very small generally, but in the Carnatic, the normal amount varies between 1¼″ and 1¾″, and in the centre and west of the south of the Peninsula between ¼″ and ¾″.

The three concluding columns of the table show the state of the seasonal rainfall, *i.e.*, the average actual and average normal rainfall for the period October 13th to November 30th. They show that normal or heavy rain has fallen over all the Peninsular divisions, as well as over Central India (East); Kathiawar, Gujarat and Chota Nagpur. In all other parts of the country the rainfall for the period has been more or less deficient, and, in parts of the Gangetic plain, no rain whatever has been received throughout the whole period. It will be noticed that over a considerable part of the country the normal rainfall for the period under review is small, but, in face of the early cessation of the summer rainfall, the absence of even this small amount becomes of importance.

The only heavy totals recorded during the week, November 24th to 30th, are reported from the south of the Peninsula. Coonoor (Nilgiris) reports a total of 2·86″; Saidapet (Chingleput) 7·05″; Cuddalore 4·28″; and Sheyali (Tanjore) 8·57″;

W. L. DALLAS,
Asst. Meteorological Reporter to the Government of India.

SIMLA, *the 5th December 1895.*

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 7th December.*—Good rainfall in parts of the Carnatic and Southern districts; light showers or no rain elsewhere. Sowing and transplanting continue in parts. The standing crops are generally good but require rain in parts of the Carnatic and Southern districts. Harvest is progressing with fair outturn. Pasture and fodder are sufficient. Cattle are in good condition. Prices are still falling, especially in the Southern half of the Presidency.

Bombay.—*For week ending 11th December.*—Slight rain in parts of Karachi; more rain is required for the late crops in parts of Sholapur. The early crops are suffering from drought in parts of Karachi. Wheat and groundnut in one taluka of Satara and cotton in parts of Dharwar have been damaged by blight. The standing crops otherwise are good. Harvesting of the early crops is progressing in eleven, and sowing of the late crops in six, districts. Cotton-picking is progressing in Broach, Khandesh, and Ahmednagar, and poppy sowing in parts of Baroda territory. Fodder is insufficient in parts of Sind. Agricultural stock are in good condition, except in parts of Thar and Parkar. Prices are normal, except in parts of Sholapur and Ahmednagur.

Bengal.—*For week ending 9th December.*—There was rain in Murshidabad, Rangpur, Patna, and Champaran during the week, but not in the other reporting districts. The harvesting of the winter rice is proceeding, and, as previously reported, the outturn over the greater part of the province is expected to be below the average. The spring crops are generally doing well, but in parts of Bihar the want of moisture is still felt. Poppy, which had to be resown in many places in Bihar, is coming on satisfactorily. Prospects of indigo and sugarcane are good; the latter is being harvested in some districts. The price of common rice continues steady.

North-Western Provinces and Oudh.—*For week ending 11th December.*—Weather generally clear and cold. Showers have fallen in some of the Eastern, Central, and Western districts, and prospects have somewhat improved. More rain is generally needed for the young crops. Irrigation of crops and sugarcane-pressing are in progress. Slight injury to poppy by insects is reported from Allahabad. Fodder is sufficient. Markets are well stocked. Prices are fairly steady.

Punjab.—*For week nding 11th December.*—Slight rain in Delhi only. Harvesting of the autumn crops and sowings of the spring crops are almost finished. Sugarcane-pressing continues. Canals are dry and rain is wanted. Prospects of the standing crops vary from good to poor. The crops have withered in Hissar. Cattle are generally in good condition, but are getting lean in Hissar. Fodder is dear in Delhi and scarce in Hissar, Jullundur, Ferozepore, Sialkot, Lahore, and Dera Ismail Khan, but is sufficient elsewhere. Prices

are above normal in Sialkot, low in Peshawar, rising in Hissar, Jullundur, and Mooltan, and high elsewhere.

Central Provinces.—*For week ending 11th December.*—No rain during the week. The weather is clear and cold. Threshing of the autumn crops is in progress; the outturn is generally good. The winter crops have been damaged for want of moisture. The linseed crop has been attacked by rust in the Chanda tehsil and by insects in the Simga tehsil. Prices are stationary.

Burma.—*For week ending 7th December.*—In Lower Burma reaping of early wet weather paddy is progressing. The crops continue good, except in parts of Tharrawaddy, Prome, Bassein, and Henzada, where they are suffering from want of later rain. In Upper Burma reaping of wet weather paddy is progressing and ploughing for and sowing of the dry weather crops continue. Slight rain has fallen in Myitkyina, Ruby Mines, and Meiktila. Crop prospects continue unfavourable. In Shwebo the crops have failed largely in five circles; in Pakokku they continue poor and in the non-irrigated parts of Minbu the crop has entirely failed; cotton and millet are, however, promising. In the irrigation tract of Magwe the crops have been destroyed and in Meiktila and Yamèthin they are very backward. In Myingyan *jowar* (*Sorghum vulgare*), sessamum, and peas are withering and in the Southern sub-division the later crops have entirely failed but are promising in the Northern sub-division. The price of paddy has risen considerably in Prome, Shwebo, and Meiktila and slightly in Thongwa but has fallen considerably in Tharrawaddy; elsewhere prices are stationary.

Assam.—*For week ending 10th December.*—Weather seasonable. Harvesting of late rice continues. Cattle in good condition. Fodder and water are sufficient.

Mysore and Coorg.—*For week ending 11th December.*—MYSORE: No rain. The standing crops are in good condition. Prices have slightly fallen in the Chitaldroog district, but have risen in the Shimoga and Hassan districts.

COORG: The rice crop is ripening. Picking of coffee continues. Prices of food grains are normal. Water and fodder for cattle are sufficient.

Berar and Hyderabad.—*For week ending 11th December.*—BERAR: No rain during the week. Weather cold. The present condition of crops is reported unsatisfactory, owing to continued break in the rainfall. Picking of cotton and reaping of *jowar* (*Sorghum vulgare*) continues. The water-supply is insufficient in three talukas of the Akola district. Prices are almost stationary.

HYDERABAD: No rain during the week. Prospects of the standing winter crops are good. Fodder is available for cattle. Prices continue rather high.

Central India.—*For week ending 11th December.*—Rain fell in Gwalior and Bundelkhand during the week; rain is still badly wanted in Goona. Agricultural operations are in progress in all parts. The crops have been damaged for want of rain in Gwalior, Bundelkhand, Baghelkhand, Bhopawar and Goona. Agricultural stock and pasturage are in fairly good condition, except in some parts of Gwalior. Prices are rising in parts of Gwalior and are high in Bundelkhand, Western Malwa, Goona, and Neemuch; elsewhere prices are normal.

The opium crop is in fair condition in Bhopal, Western Malwa, Bhopawar, and Neemuch.

Rajputana.—*For week ending 11th December.*—Rainfall slight in nine States. Agricultural operations are generally satisfactory, except in Jaisalmere. The crops are indifferent in parts of Meywar, damaged in Jhallawar, poor in Tonk and Shahpura. The autumn crops have mostly withered in Jaisalmere. The unirrigated crops are suffering in Ajmere-Merwara for want of rain. Prospects are fair, except in Jhallawar, Merwara, and Jaisalmere. Agricultural stock generally in good condition, but are suffering in Ulwar and parts of Meywar for want of fodder. Fodder is generally sufficient, except in Shahpura, Ulwar, Tonk, and Jaisalmere and parts of Meywar; indifferent in Kherwara and failing in Dholepore. Prices are rising in six States and fluctuating in one; elsewhere prices are steady. Scarcity is prevalent in some parts of the Jehazpore district of Meywar. One thousand nine hundred and eighty-six men are employed on relief works in the Suratgarh tehsil of Bikanir and 267 persons in Jaisalmere. Four persons are receiving gratuitous relief in Jaisalmere.

Kashmir.—KASHMIR VALLEY.—*For week ending 10th December.*—Falls of snow during the week. The spring sowings are almost finished. Prices continue normal.

JAMMU PROVINCE.—*For week ending 12th December.*—Rainfall slight. The spring sowings continue. Cattle are in good condition, Prices are rising.

Nepal.—*For week ending 7th December.*—Slight rain. The weather is seasonable. Prospects are good.

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

Calcutta, the 11th December, 1895.

READ—

Customs Circulars Nos. XXV and XXVI.

ORDERED that the Circulars be published for general information in the Supplement to the *Gazette of India*.

J. F. FINLAY,
Secretary to the Government of India.

Customs Circular No. XXV.

FROM—The Government of India, FINANCE AND COMMERCE DEPARTMENT,—No. 5294 S. R., dated the 6th November 1895.

To—The Secretary to the Government of Bengal, Financial Department.

I am directed to acknowledge the receipt of your letter No. 680 T.F., dated the 17th October 1895, referring for the orders of the Government of India a question regarding the levy of import duty on iron screws. The Collector of Customs at Calcutta has ruled that these articles are chargeable with duty at 1 per cent. *ad valorem* under the head "Iron Nails, Other Sorts," while the Board of Revenue, Lower Provinces, are of opinion that they are hardware and should be assessed at 5 per cent. *ad valorem* under No. 13 of Schedule IV of the Indian Tariff Act, 1894.

I am to say that the Government of India confirm the view taken by the Board.

* * * *

Customs Circular No. XXVI.

RESOLUTION—By the Government of India, FINANCE AND COMMERCE DEPARTMENT,—No. 5303 S. R. dated the 6th November 1895.

Read—

Resolution in the Finance and Commerce Department, No. 2111 S. R., dated the 6th May 1895.

Letter from the Chief Commissioner of Burma, No. 65—1 C.-2, dated the 2nd July 1895.

Letter from the Government of Madras, No. 2910, dated the 20th July 1895, and enclosures.

Letter from the Government of Bombay, No. 6475, dated the 26th August 1895, and enclosures.

Letter from the Government of Bengal, No. 650 T. F., dated the 5th October 1895, and enclosures.

In the Resolution cited above the Government of India invited the opinions of the local maritime Governments on the question whether the

practice of mixing spirit in bond with water before exportation is open to such objection that the sanction required by section 100 of the Sea Customs Act, VIII of 1878, should be withheld generally and the practice disallowed.

2. The replies of the Local Governments are to the following effect :—

(1) The Government of Madras are of opinion that certain difficulties stated by the Collector of Customs at Madras could be provided for by rules, and that the question resolves itself into one of providing an adequate supervising staff. The difficulties mentioned, however, apply to the case of admixture of water with spirit for home consumption rather than with spirit for exportation, and therefore are not relevant to the present issue.

(2) The Government of Bombay consider that, as long as operations are confined to the reduction of spirit with water for exportation, the practice may be allowed, but they would deprecate any proposal permitting the admixture with water or any other substance of spirit in bond which is not intended for exportation.

(3) The Government of Bengal propose to allow the practice even in the case of spirit for home consumption.

(4) The Chief Commissioner of Burma is of opinion that the operation need not be prohibited, and that rules might be framed which would sufficiently protect the revenue.

3. The Governor General in Council agrees in the opinion of the Government of Bombay and considers that there is no necessity for allowing the practice of mixing spirit in bond with water in the case of spirit for home consumption. The practice may be permitted in the case of spirit intended for exportation from bond, but not in regard to other spirit.

SUPPLEMENT TO

The Gazette of India.

No. 51.] CALCUTTA, SATURDAY, DECEMBER 21, 1895.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the week ending at 8 a.m. on Saturday, December 7th, 1895.

The daily weather charts of the week under review show that pressure has changed considerably from day to day, but that throughout the whole period and notwithstanding these changes, the general distribution of pressure has been practically unaltered during the week. Readings were, on most days, highest over the North Punjab and lowest over the south of the Bay, while throughout the whole week an area of relatively high pressure overlay Rajputana and the central parts of India. Gradients were generally moderately steep over the Bay and the Peninsula. In the early part of the week the messages received from Persia and Kashmir showed that unsettled conditions existed to the west and north-west of India. These unsettled conditions apparently reached India by the middle of the week and on Tuesday, the 3rd, showers of rain fell over the Gangetic plain and the north of the Central Provinces, and snow occurred on the North-West Himalayas as low down as 7,000 or 8,000 feet. On Wednesday, the 4th, a few scattered showers were reported from parts of Bengal and of Upper Burma. In the extreme South of the Peninsula on most days of the week, a few scattered showers have been received, but except at Negapatam the amounts have been small. The general temperature of India was in excess of the normal on all days, but, accompanying and following the rainfall and snowfall of the middle of the week, there occurred a decided fall of temperature over Gujarat, Rajputana, the Gangetic plain and North-East India. At the Hill stations also, from Tuesday until the close of the week, there was a very decided defect of

temperature as compared with the normal. The winds varied considerably over Northern India, but there was a steady Northerly current over the Bay area and an Easterly current over the centre and west of the Peninsula and the South of the Central Provinces.

Daily Summary.—*Sunday, 1st December.*—Pressure had increased in nearly all places, the rise had been brisk over the Indus Valley. Readings were highest in the extreme north-west and lowest in the extreme south, and generally exceeded the normal average. Variable winds and calms prevailed over the Punjab and the Gangetic plain, Northerly winds over the Bay area and Sind, and Easterly winds over the centre and west of the Peninsula. The mean temperature exceeded the normal average except in Assam and Burma, and the only rainfall recorded was in the extreme South.

Monday.—Pressure had decreased except in Sind and Kathiawar; the fall had been brisk over the greater part of Northern India. Readings remained highest in the extreme north-west and lowest in the extreme south, and still exceeded the normal in most places, though the excess was less than on the previous day. Northerly winds had appeared over North-West India, but in other respects the wind directions were little changed. The mean temperature still exceeded the normal average except in Burma and Assam. Light showers of rain were reported from Meerut, Delhi, Saugor, Indore, Neemuch as well as from several stations in Southern India.

Tuesday.—Pressure had risen very slightly at some central stations but had continued to fall elsewhere. Readings were still highest in the north-west and lowest in the extreme south, but they were now below the normal average almost everywhere. Calms and variable breezes prevailed over part of North-West India, Westerly winds in the Gangetic plain, Northerly winds over the Bay area, and Easterly winds over the centre and west of the Peninsula. A sudden fall of temperature had occurred over the west of the North-Western Provinces, Rajputana and Gujarat, and the mean temperature had fallen to more or less below the normal over that area. In other parts of India the mean exceeded the average. Showers were reported over the Gangetic plain, Rajputana, Central India, the Central Provinces, North Bengal and the south of the Peninsula.

Wednesday.—Pressure had decreased almost everywhere, the change being rapid in Lower Sind. Readings were highest over the central parts of the country and lowest over the south of the Bay, and were below the normal average in all parts of the Indian region. The winds had shifted to the southward in Sind and Kathiawar, and to south-east and east over Upper Sind and the Punjab. Elsewhere the directions were generally unchanged. The mean temperature remained below the normal average over Gujarat, Rajputana, the East of the Punjab and the Gangetic plain. A few scattered showers were reported from the North-East and from the South of India.

Thursday.—Pressure had changed very little, and the general distribution was similar to that reported on the previous day. Readings remained below the normal average everywhere. The southerly winds had disappeared from Sind and Kathiawar, but otherwise the directions were unchanged. The mean temperature also showed the same distribution, with respect to the normal, as on Wednesday. Hail and snow had been received at some of the Hill stations and showers of rain in Sikhim, Upper Burma and the South of the Peninsula.

Friday.—Pressure had risen briskly in the west of the Punjab and changed very slightly elsewhere. Readings were highest over the north of the Punjab, relatively high over the central parts of the country and lowest in the south of the Bay. Calms prevailed over the Gangetic plain and the central parts of the country and Northerly to Easterly winds elsewhere. The mean temperature maintained the same general distribution with respect to the normal. Snow was reported from Kashmir and the Eastern Himalayas and moderate rain from Negapatam.

Saturday.—Pressure had increased except in Burma, Assam, Bengal, and the South of the Peninsula. The distribution was the same as on Friday and readings were below the normal almost everywhere—very slightly so in the centre and north and considerably so over Lower Burma and in Ceylon. The

winds remained Northerly to Easterly. The mean temperature was low, with respect to the normal, over Burma, Bengal, the Gangetic plain, Central India, and Gujarat and high elsewhere. Slight snow had fallen at Gnatong and light rain at Colombo and Negapatam.

Temperature.—During the greater part of the week under review the distribution of the mean temperature with regard to the normal has been very steady. On the first two days the mean temperature was in excess over nearly the whole of India, but, on Tuesday, a sudden fall occurred over the East of the Punjab and the West of the North-Western Provinces, and from this centre low temperatures extended to Rajputana and Gujarat and to the Gangetic plain and Bengal. In other places the mean exceeded the normal and this distribution held until the close of the week.

The following table gives the variations of the mean temperature from the normal in the different provinces of India for each day of the week :—

Province.	December 1895.							Mean variation of week.
	1st.	2nd.	3rd.	4th.	5th.	6th.	7th.	
Burma	−0·2	+0·7	+1·3	+1·9	+1·3	+1·0	+0·7	+0·9
Bengal and Assam . .	+2·1	+2·3	+3·4	+0·8	+0·3	+0·4	−0·5	+1·4
North-Western Provinces and Oudh	+4·3	+5·3	+0·5	−1·2	−0·6	−0·4	−1·2	+1·0
Punjab	+2·8	+1·6	+1·9	+1·1	+1·1	+1·6	+1·2	+1·6
Bombay	+2·2	+2·6	+2·3	+1·4	+1·3	+1·1	+0·8	+1·7
Central Provinces and Berar	+5·2	+4·9	+4·1	+3·1	+4·0	+4·8	+4·3	+4·3
Central India and Gujarat	+5·6	+6·3	+1·5	−2·9	−1·3	−0·8	−0·8	+1·1
Sind and Rajputana . .	+4·0	+5·0	−0·7	0	−0·3	+1·0	+0·9	+1·4
Madras	+1·1	+2·0	+1·5	+1·4	+1·2	+1·1	0	+1·2
Mean for whole of India	+3·0	+3·4	+1·8	+0·6	+0·8	+1·1	+0·6	+1·6

The above shows that for the whole country for each day of the week, the temperature was excessive, the abnormal excess decreasing from 3° and 3½° on the 1st and 2nd to only 0°·6 on the 4th and 7th. The abnormal excess for the whole of India for the whole week was 1°·6. The provincial variations show that the mean temperature of the week was in excess in all provinces, the excess varying from 4°·3 in the Central Provinces to 0°·9 in Burma. In Central India and the North-Western Provinces on four days and in Burma, Bengal, Sind, and Rajputana on one day, the mean temperature fell below the normal.

Rainfall.—The rainfall which has occurred during the week under review has been attributable to two causes. That which occurred in the South of the Peninsula was apparently associated with the low pressure area which occupied the South of the Bay during the whole of the week, while that which occurred over Northern and Central India was due to the feebly unsettled conditions which appeared over North-West India on the 2nd, and subsequently spread Eastward and Southward affecting the weather over a very large area. The concluding table gives the rainfall data of the week. The returns show that during the week an average actual rainfall exceeding 0·10″ was received in thirteen divisions; some rainfall, but averaging less than 0·10″, in sixteen divisions, and no rain whatever in twenty-three divisions. The divisions which received effective rainfall were :—Assam (Surma); Central Bengal; the North-Western Provinces (East, Central and West); Oudh (South); the Punjab (Central and Hill districts); Malabar; Central India (East); the East coast (Central and South) and Madras (South). In all other parts of India the actual average rain was either *nil* or insignificant in amount. The second column of the table shows that except in parts of Madras the anticipated rainfall during the present week is small, and the third column shows that even this small amount has not in the majority of cases been received. In Central and North Bengal, Bihar, the North-Western Provinces and Oudh, the Punjab (Central and Hills) and the

East coast (Central) the normal rainfall has been exceeded by small amounts, but in all the other divisions the rainfall has been short of the average. In the case of the East coast (North) the deficiency amounts to 0·61″ and in the case of the East coast (South) to 0·70″, but these are the only instances of considerable deficiencies.

The returns for the season, *viz.*, from October 13th to December 7th, exhibit normal or excessive rain, for that period, in the case of Chota Nagpur, the North-Western Provinces (Central and West), Malabar, Madras (South-Central), the Konkan, the Deccan, Gujarat, Kathiawar, Central India (East), Hyderabad (South), the East Coast (South) and Madras (South), and more or less deficient rainfall elsewhere. In Western Rajputana no rainfall whatever has been received.

The only instances of considerable totals being received during the week under review are reported from the South of the Peninsula where :—Tranquebar (Tanjore) reports 9·24 inches and Nángunéri (Tinnevelly) reports 4·61 inches.

W. L. DALLAS,
Asst. Meteorological Reporter to the Government of India.

SIMLA, *the 12th December 1895.*

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 14th December.*—No rain except a few scattered showers in the Carnatic and Southern districts. Sowing, transplanting, and weeding continue in parts. The standing crops are generally good, but require rain in parts of the Central, Southern, and West Coast districts. The harvest is progressing with fair outturn. Pasture and fodder are generally sufficient. Cattle are in good condition. Prices continue to fall.

Bombay.—*For week ending 18th December.*—Slight rain in parts of Sind. More rain is required for the late crops in parts of Ahmednagar and Sholapur. Linseed and *jowar* (*Sorghum vulgare*) in parts of Sholapur, and cotton in parts of Dharwar have been blighted. *Jowar* in parts of Bijapur has been damaged by unfavourable winds. The standing crops otherwise are good. Harvesting of the early crops is progressing in seven, and sowing of the late crops in five, districts. Cotton-picking is progressing in Broach, Khandesh, and Ahmednagar. Fodder is insufficient in parts of Shikarpur and Hyderabad. Agricultural stock are in good condition. Prices are normal except in parts of Sholapur.

Bengal.—*For week ending 16th December.*—The principal feature of the weather during the week was a storm in the Bay, which struck the coast near Chittagong on the 12th instant and caused heavy rain in that station, and rain in less quantities over other parts of Eastern Bengal. The harvesting of winter rice is in full progress, and the outturn, as previously reported, will be below the average in most districts. The spring crops are doing well, but in some districts there is lack of moisture. Prospects of poppy are generally satisfactory. Indigo and sugarcane are thriving. The price of common rice continues steady.

North-Western Provinces and Oudh.—*For week ending 18th December.*—The weather continues clear and seasonable. Rain is urgently required for the young spring crops in some of the Central, Western and Submontane districts. Irrigation is in progress where practicable. Sugarcane-pressing continues. Prospects are generally fair. Fodder is ample. Markets are fairly well stocked. Prices are fairly stationary with a tendency to rise in places.

Punjab.—*For week ending 18th December.*—Slight rain in Amritsar, Sialkot, Mooltan, Dera Ismail Khan, and Rawalpindi only. Harvesting of the autumn crops and sowings of the spring crops are nearly completed. Sugarcane-pressing continues in Jullundur and Sialkot. Rain is needed in most districts. The prospects of the standing crops vary from good to poor, except in Hissar where the crops have withered. Cattle are generally in good condition. Fodder is dear in Delhi and scarce in Hissar, Jullundur, Ferozepore, Sialkot, Lahore, and Dera Ismail Khan, but is sufficient elsewhere. Prices are low in Peshawar and Shahpur and are normal in Sialkot, but are rising in Hissar, Jullundur, and Mooltan, and are high elsewhere.

Central Provinces—*For week ending 18th December.*—The weather is clear and cold. Threshing of the autumn crop is proceeding and, as previously reported, the outturn over the greater part of the province is good. The prospects of the winter crops are generally unsatisfactory owing to the want of rain. Prices are stationary.

Burma.—*For week ending 14th December.*—In Lower Burma reaping of early wet-weather paddy continues. Rain has fallen in several districts and prospects continue favourable, but in parts of Prome and Bassein, rain has fallen too late to do the crops much good, and in Henzada rain is still wanted. In Upper Burma ploughing for dry-weather paddy continues and reaping of wet-weather paddy has been completed in some districts; in others it is progressing. Sowing for the island crops continues in Minbu and Myingyan; and

reaping of *jowar* (*Sorghum vulgare*) and maize has been completed in parts of Magwe. Good rain has fallen in all districts and the crop prospects have improved. In Bhamo rain has damaged the crop to a slight extent, and in Shwebo a very poor outturn is expected. The recent rain is likely to improve the crops in Sagaing which are very poor. In the non-irrigated parts of Minbu the crops are now healthy, but more rain is wanted in one township. In parts of Kyaukse a poor outturn is expected, but in Meiktila and Myingyan the recent rain has benefited the crops. The price of paddy has risen slightly in Thaton, Shwebo, Thayetmyo, and Meiktila, but has fallen largely in the Northern Shan States.

Assam.—*For week ending 17th December.*—Rain fell in the Surma Valley, but the weather is seasonable. Harvesting of the late rice is progressing. Cattle are in good condition. Fodder and water are sufficient.

Mysore and Coorg.—*For week ending 18th December.*—MYSORE: No rain. The standing crops are in good condition. *Ragi* (*Eleusine coracana*) has been harvested in parts of the Kolar, Tumkur, Mysore, Chitaldroog, and Shimoga districts; and paddy has been sown in parts of Chitaldroog. Prices have slightly risen in the Bangalore, Mysore, and Shimoga districts, but are stationary in other districts.

COORG: Reaping of rice has commenced. Picking of coffee continues. Water and fodder for cattle are sufficient. Prices are normal.

Berar and Hyderabad.—*For week ending 18th December.*—BERAR: No rain during the week. The weather is cold. Picking of cotton and reaping of *jowar* (*Sorghum vulgare*) are in progress. The winter crops are in poor condition owing to insufficient moisture. Fodder and water are insufficient in parts of the Khamgaon and Jalgaon talukas. Prices have fallen in Wun, but are steady elsewhere.

HYDERABAD: No rain during the week. Fodder is available for cattle. The prospects of the winter crop are good everywhere. Prices are almost stationary.

Central India.—*For week ending 18th December.*—No rain fell during the week. Rain is still badly wanted in Goona. Agricultural operations are in progress in all parts. The crops have been damaged for want of rain in Gwalior, Bundelkhand, Baghelkhand, Bhopawar, and Goona. Agricultural stock and pasturage are in fairly good condition, except in some parts of Gwalior. The prospect of the opium crop is fair in Bhopal, Bhopawar, and Neemuch. Prices are rising in parts of Gwalior and are high in Goona and Neemuch; elsewhere prices are steady.

Rajputana.—*For week ending 18th December.*—Agricultural operations are generally satisfactory except in Jaisalmere. The crops are poor in Shahpura, Tonk, and the autumn crops have mostly withered in Jaisalmere. The unirrigated crops are suffering in Ajmere-Merwara for want of rain. Prospects are fair except in Merwara and Jaisalmere. Agricultural stock are generally in good condition, but are suffering in Ulwar and parts of Meywar and Jaisalmere for want of fodder. Pasturage and fodder are generally sufficient, except in Kherwara, Shahpura, Ulwar, Tonk, and Jaisalmere and parts of Meywar. Fodder is getting dear in Karauli. Prices are rising in four States, and fluctuating in one, but are steady elsewhere. The number of men employed on relief works in the Suratgarh tehsil is 2,467; in Kolat 186; in Sujangarh tehsil of Bikanir 24; and in Jaisalmere 459. Four persons are receiving gratuitous relief in Jaisalmere.

Kashmir.—KASHMIR VALLEY.—*For week ending 17th December.*—The weather is cloudy. Prices continue normal.

JAMMU PROVINCE.—*For week ending 18th December.*—No rain. The spring sowings are in progress. Cattle are in good condition. Prices are rising.

Nepal.—*For week ending 14th December.*—Weather cold with heavy hoar frosts. The prospects of the crops are good.

DENZIL IBBETSON,

Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the week ending at 8 a.m. on Saturday, December 14th, 1895.

During the past week pressure conditions over the greater part of India have been generally similar to those reported last week, that is to say, pressure has been high and uniform over the north-west and centre of India and low over the south of the Peninsula. On Sunday, Monday and Tuesday conditions were perhaps very slightly disturbed over Baluchistan and the North-Western Himalayas, and slight rainfall was received at a few stations. Over Eastern India, on the contrary, pressure has been seriously disturbed. On Tuesday the observations over the Bay showed that a depression was advancing northward up the Bay. On Wednesday this depression has become better defined and was steadily advancing, and on Thursday morning, by which time the depression had become a moderately deep storm, the centre of the disturbance struck the coast near Chittagong. Strong winds accompanied the depression. Rain connected with the storm commenced at Chittagong and Barisal on the 11th, and on the 12th general, and in places heavy, rain was reported over Burma and East Bengal. By the 13th the rainfall had ceased in East Bengal, but in Burma the fall continued until the close of the week. The mean temperature has been generally low throughout the week, the most marked feature being the remarkable depression of temperature over the Peninsula where on several nights the minima were lower than the night temperatures recorded in many parts of Northern India and very much below the normal average.

Daily Summary.—*Sunday, 8th December.*—Pressure had decreased briskly over Baluchistan and the Indus Valley, as well as in Upper Burma, while elsewhere the changes were small. Readings were high and uniform over North-Western and Central India, low over the south of the Bay, and were generally below the normal average except over the central parts of the country. The abnormal deficiency was considerable in Lower Burma. The winds were variable in the North-West, and blew from the normal directions elsewhere. Light rain had fallen at a few places in Burma and Sikkim, and moderate showers at Quetta, Colombo, Trivandrum and Negapatam.

Monday, 9th December.—Pressure had recovered over Baluchistan and the Indus Valley, but was decreasing briskly over the head of the Bay. Elsewhere the changes were unimportant. Pressure remained high and uniform over North-Western and Central India and low in the extreme south, but a depression had appeared over the east of the Bay. The barometer read below the normal average everywhere—largely so over Burma and the east of the Bay. Normal winds prevailed generally, but the force was stronger than usual over Lower Burma. The mean temperature was in excess of the normal over Lower Burma and over a considerable part of North-Western India. Moderate rain was reported from Quetta and a few drops of rain from a few places in the north-west and south of the Indian region.

Tuesday, 10th December.—The pressure changes were slight except over the central parts of the country where a brisk fall was reported. Readings were highest in the extreme north-west and lowest in the extreme south, but a depression apparently lay over the centre of the Bay. Calms prevailed over the Gangetic plain and the central parts of India and winds between North and East were blowing in other places. The force was strong to a gale at Diamond Island. The mean temperature was low except in Lower Burma and over part of North-Western India. Snow was falling over Kashmir and showers of rain were reported from Murree, Sialkote, Lahore, Cochin and Karachi.

Wednesday, 11th December.—Pressure was decreasing almost everywhere, the fall being greatest and considerable over Ganjam and Orissa. The depression over the Bay had developed considerably, but in other respects the distribution of pressure was not much changed. The winds were cyclonic around the Bay and blew strongly at Diamond Island, False Point and Gopalpur. Elsewhere the wind directions were generally between North-West and North-East. The mean temperature was high over Lower Burma, around the head of the Bay and in part of North-West and Central India. Light snow and rain showers had been received on the North-Western Himalayas and light rain showers in parts of Bengal and of Burma.

Thursday, 12th December.—Pressure had increased slightly over the Peninsula and the south and centre of the Bay, and decreased over Northern India and Burma. The fall over Bengal, Assam and Upper Burma had been brisk to rapid, and the storm which had been traced up the Bay had struck the coast near Chittagong at which station pressure was 0·366″ below the normal average. Cyclonic winds prevailed over the eastern half of India. At Diamond Island the force was strong to a gale, and all over the north of the Bay the force was strong. In other parts of India the directions were about normal. The mean temperature remained relatively high over Lower Burma and part of North-Western India. Rain had fallen over Burma, East Bengal and Assam. The principal amounts were 4·27″ at Chittagong, 3·25″ at Kendat and over 1″ at Akyab, Bhamo, Barisal and Silchar.

Friday, 13th December.—Pressure had increased everywhere. The increase had been very rapid over the region occupied by the cyclonic storm and had been brisk to rapid in most other places. The storm had wholly disappeared and pressure had reverted to its normal distribution, readings being highest in the Centre and North-West and lowest in the extreme South. The winds were north-westerly down the Gangetic plain and between North and East elsewhere. The mean temperature was below the normal average at the majority of stations. Rain had fallen over Burma and Assam. Minbu and Yamethin reported over 2″.

Saturday, 14th December.—Pressure had again increased almost everywhere. Readings were highest in the North-West and Centre and lowest in the South. The winds were practically unchanged. The mean temperature was in defect of the normal except in Burma, Assam, Lower Bengal and the west of the Punjab. Rain had fallen over a considerable part of Burma and a light local shower was reported from Cuddapah.

Temperature.—The mean temperature throughout the week has been low over the greater part of the country. The low pressure in the North-West was in part attributable to the slight rain and snow which fell during the early part of the week on the North-Western Himalayas just as the low temperature in Bengal, Assam and Upper Burma was in part due to the rainfall of the cyclonic storm, but these causes could hardly have affected the Peninsula where; however, the greatest depression of temperature was manifested. This abnormal depression was very remarkable. On several nights the minima in Southern India were as low or lower than the minima in Northern India and were lower than any recorded temperatures in December for several years. The abnormal coolness first appeared at Kurnool and the depression of temperature was most intense at this station throughout the week. The following were the minima reported with their differences from the normal:—

8th December	53°·2	6°·9
9th December	53°·7	6°·7
10th December	45°·6	14° 5
11th December	46°·1	13°·5
12th December	47° 7	11°·9
13th December	48°·2	11°·6
14th December	57°·8	2°·3

The following table gives the variations of the mean temperature from the normal in the different provinces of India for each day of the week:—

Province.	December 1895.							Mean variation of week.

Mean for whole of India	−0·2	−0·5	−1·4	−1·0	−1·2	−1·2	−0·9	−0·9

The mean temperature of the whole of India for the whole week was 0°·9 below the normal, and the daily variation for the whole country varied from −1°·2 on the 12th and 13th to only −0°·2 on the 8th. The provincial variations showed that there had been a trifling excess in the mean temperature, as compared with the normal in Burma, and a deficiency elsewhere. This abnormal deficiency was as much as 2°·7 in Madras and 2°·2 in Bombay.

Rain.—The rainfall of the week under review has been confined to three different parts of the country. The most important fall was connected with the cyclone which struck the Chittagong coast on the morning of the 12th and occurred over Deltaic and Eastern Bengal, Assam and a large part of Burma. As compared with the rainfall in this region the falls which occurred in other parts of the country were very small, but moderate showers were received during the early part of the week in Sind and the western and northern parts of the Punjab connected with the unsettled conditions which appeared in Baluchistan

on Sunday, and light showers were received in the south of the Peninsula at different times during the week. The table at the close of the summary gives the rainfall data. It shows that rain was received during the week in eighteen of the rainfall divisions. In the case, however, of nine of these divisions, the average actual rainfall for the week, was less than 0·10″ so that effective rain was received only in nine divisions, all other parts of the country reporting absolutely or practically no rain. The nine divisions which received effective rain were Lower, Central and Upper Burma, Arakan, Eastern Bengal, Assam (Surma), the Hill district of the Punjab, Malabar, and Sind. The third column of the table shows that the rainfall of the week exceeded the normal average in the following seven divisions, *viz.*, Lower and Central Burma, Arakan, East Bengal, Assam (Surma), Deltaic Bengal and Sind. In the case of Arakan the excess was very large, and in the case of Central Burma, Eastern Bengal and Assam (Surma) was considerable. The rain ordinarily received during the week under review is small in amount in most parts of India, hence the deficiencies are nearly everywhere small, but the East Coast (South) ordinarily received 1·02″ of rain and actually received only 0·08″, while Madras (South) ordinarily received 0·80″ and actually received only 0·03″, so that in these two instances the deficiency is considerable.

The three concluding columns of the table show that the rainfall for the whole period October 13th to December 14th was less than the normal over by far the greater part of the country. Chota Nagpur, the west of the North-Western Provinces, Malabar, the Konkan, Gujarat, Kathiawar, Sind and Hyderabad (South) have received more than the usual rainfall, while Madras (South Central), Coorg, Mysore, the Bombay Deccan, Central India (East), the East Coast (North), Madras (Central), the East Coast (Central and South), and Madras (South) have received about the normal amount, but in all other places the rainfall for the period has been considerably to largely in defect. In Western Rajputana there has been no rain during the whole period.

The only heavy totals recorded during the week December 8th to December 14th are reported from the North East. Minbu reports 4·12 inches; Meiktila 4·55 inches; Magwe 4·57 inches; one station in the Bhamo district 4·94 inches; Sandoway 5·75 inches; Chittagong 4·47 inches; and Fenny (Noakhali) 3·75 inches; one station, Garhi Hassan, in the Shikarpur district of Sind had, however, the heavy fall of 2·20 inches.

W. L. DALLAS,
Asst. Meteorological Reporter to the Government of India.

SIMLA, *the 19th December 1895.*

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 21st December.*—No rain except a few scattered showers in parts of the Carnatic and Southern districts. Sowing, transplanting, and weeding continue in parts. The standing crops are generally good, but require rain in parts of the Central and Southern districts. The harvest is progressing with generally fair outturn. Pasture and fodder are generally sufficient and cattle are in good condition. Prices are generally falling, but the price of dry grains has slightly risen in parts of the Central districts.

Bombay.—*For week ending 24th December.*—Slight rain in parts of Karachi; more rain is required for the late crops in parts of Shikarpur and Sholapur. *Jowar* (*Sorghum vulgare*) has been damaged in parts of Bijapur by unfavourable winds. Linseed and *jowar* in parts of Sholapur and cotton in parts of Bijapur and Dharwar have been blighted. The standing crops otherwise are good, except in parts of Sholapur where they are withering. Harvesting of the early crops and sowing of the late crops have been completed, except in a few districts. Poppy sowing continues in parts of Baroda territory, and cotton-picking in Broach, Khandesh, and Ahmednagar. Reaping of the late crops has commenced in parts of Satara. Fodder is insufficient in parts of Shikarpur and Hyderabad. Agricultural stock are in good condition. Prices are normal, except in parts of Sholapur and Ahmednagar.

Bengal.—*For week ending 23rd December.*—There was no rain during the week. The harvesting of winter rice is proceeding; the outturn, except in Northern and parts of Eastern Bengal and in Orissa, will be below the average, and is estimated to be a thirteen-anna crop for the whole province. The prospects of the spring crops continue generally good, but in parts of Central Bengal and Bihar and in Hazaribagh there is still lack of moisture. Poppy is doing well, but requires rain in Darbhanga. Indigo and sugarcane are good crops; the latter is being harvested in some districts. The price of common rice continues generally stationary.

North-Western Provinces and Oudh.—*For week ending 25th December.*—The weather is seasonable. Rain is much needed in places, especially in the Southern and Western districts and in Garhwal. Irrigation continues where practicable. Sugarcane is doing well. Prospects on the whole are fair. Supplies and fodder are sufficient. Prices show a tendency to rise in a few districts.

Punjab.—*For week ending 25th December.*—No rain. Harvesting of the autumn crops is nearly over. Sugarcane pressing is going on in some districts. Sowing of the spring crops is nearly completed. The condition of the standing crops is reported good to poor. The crops are dried up in Hissar. Rain is urgently wanted throughout the province to improve their condition. Cattle are generally reported to be in good condition. Fodder is reported to be sufficient in Amballa, Amritsar, Rawalpindi, and Peshawar, but is insufficient and scarce in other districts. Prices are high in Delhi, Ferozepur, Amritsar, Rawalpindi, and Dera Ismail Khan, and are rising in Hissar, Jullundur, Mooltan, and Umballa, but are below normal in Sialkot and Shahpur, and continue low elsewhere.

Central Provinces.—*For week ending 25th December.*—No rain. The weather is clear and cold. Harvesting of sesamum, *tur* (*Cajanus indicus*) and *jowar* (*Sorghum vulgare*) has commenced in the Nagpur country; the outturn of sesamum and *tur* is up to the average. Threshing of rice continues, and the yield varies greatly from village to village according to the class of soil and facilities for irrigation. Cotton has yielded well. The wheat stalks are stunted and the crop is coming into ear. Gram is doing well. In Saugor and in one tahsil of Damoh prospects have improved by the recent rainfall, but rain is wanted almost everywhere. Prices are stationary.

Burma.—*For week ending 21st December.*—In Lower Burma reaping is in progress. Prospects are generally good, though the crops in Bassein are said to have been much injured by the failure of the later rain. In Upper Burma reaping of the main paddy crop is in progress. Prospects have not changed materially since last week's report. Cultivation of dry-weather paddy is progressing in Mandalay, Myitkyina, Sagaing, Thayetmyo, and Kyaukse. The tobacco and onion crops in Thayetmyo have been damaged by the recent rain, but in Minbu wheat, gram, and the island crops generally have been benefited by it. The rain has caused some damage in Taungdwingyi, Magwe. There has been almost entire failure of the crops in Kyaukpadaung and the Southern part of Pagan in the Myingyan district, but peas are doing well. The price of paddy has increased considerably in Tharrawaddy and slightly in Amherst, Toungoo, Thayetmyo, and Magwe, but it has decreased considerably in Myitkyina and the Northern Shan States; elsewhere prices are stationary.

Assam.—*For week ending 24th December.*—The weather is seasonable. Harvesting of the late rice continues. Pressing of sugarcane has commenced. The condition of cattle is good, and fodder and water are sufficient.

Mysore and Coorg.—*For week ending 21st December.*—MYSORE: Prospects are favourable. Prices have fallen slightly in the Bangalore and Hassan districts, but are stationary elsewhere.

COORG: Reaping of rice and picking of coffee continue. Water and fodder for cattle are sufficient. Prices are normal.

Berar and Hyderabad.—*For week ending 25th December.*—BERAR: The weather is cold. Picking of cotton and reaping of *jowar* (*Sorghum vulgare* continue. The winter crops are in poor condition owing to insufficient rainfall. Fodder is insufficient in parts of the Akola district. Prices are almost steady.

HYDERABAD: No rain during the week. Agricultural prospects are good. Fodder is plentiful. Prices are almost stationary.

Central India.—*For week ending 25th December.*—No rain during the week. Rain is wanted particularly in Goona. Agricultural operations are in progress in all parts. The condition of the crops is fairly good, except in some parts of Gwalior, Baghelkhand, and Bundelkhand. Agricultural stock and pasturage are in good condition, except in parts of Gwalior. The opium crop is in fair condition. Prices are rising in parts of Gwalior and are high in Malwa and Goona; elsewhere prices are steady or normal.

Rajputana.—*For week ending 25th December.*—Agricultural operations are generally satisfactory except in Jaisalmere. The crops are poor in Shahpura, Tonk, and Jaisalmere, and the autumn crops have mostly withered in Jaisalmere. The unirrigated crops are suffering in Ajmere-Merwara for want of rain. Prospects are fair, except in Merwara, Bhurtpore, and Jaisalmere. Agricultural stock are generally in good condition, but are suffering in Ulwar and parts of Meywar and Jaisalmere for want of fodder. Pasturage and fodder are generally sufficient, except in Kherwara, Shahpura, Ulwar, Tonk, and Jaisalmere, and parts of Meywar. Fodder is failing in Dholepore. Prices are rising in three States, but are falling in two and are steady elsewhere. The number of men employed on relief work is 2,227 in the Bikanir tehsil, 2,862 in Kolat, and 2,817 in the Suratgarh tehsil of Bikanir, and 464 in Jaisalmere. Four persons are receiving gratuitous relief in Jaisalmere.

Kashmir.—KASHMIR VALLEY.—*For week ending 24th December.*—The weather is cloudy. The spring sowings are finished. Prices continue normal.

JAMMU PROVINCE.—*For week ending 26th December.*—Rain is urgently wanted. Sowings have been completed. Cattle are in fair condition. Prices are rising.

Nepal.—*For week ending 21st December.*—The weather is seasonable. Prospects are good.

DENZIL IBBETSON,

Offg. Secretary to the Government of India.
