

SUPPLEMENT TO

The Gazette of India.

No. 1.} CALCUTTA, SATURDAY, JANUARY 5, 1895.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

STEPHEN JACOB,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the week ending at 8 a.m. on Saturday, December 22nd, 1894.

General Summary.—With the exception of a few light showers in East Bengal, the week opened with fine weather over the whole of India and Burma. The first indications of a change were observable on Tuesday, when skies began to cloud over in Baluchistan. By next morning a diffused disturbance covering a large tract of country was causing slightly unsettled weather over the whole of Baluchistan and North-Western India. No rain was, however, reported until next day, when the disturbance had advanced to Bundelkhand and gave light rain to the Central Provinces and Central India. A very shallow secondary depression appeared the same day in the Central Punjab, but it filled up during the day without causing any rainfall. The primary depression continued to advance eastwards, and by Friday morning was central near Bogra in Bengal. Rain had continued in Central India and the Central Provinces, and showers had fallen in Chota Nagpur. The depression filled up during the next 24 hours after giving light to moderate rain to North Bengal, Assam and Upper Burma. Skies had, however, begun to cloud over in Baluchistan on Friday, and on Saturday morning a brisk fall of the barometer indicated the advance of another depression from the west.

Temperature was normal or in defect in North-Western India during the week, but over the remainder of India and Burma it was in excess of the normal, the excess being greatest in the Central Provinces where it was due chiefly to unusually high night temperatures. For the whole of India the mean temperature of the week was 1°·4 above the normal.

Less rain than usual was received in most provinces, the only parts of the country where rainfall in excess of the normal fall for the week was received being the eastern states of Central India, the Central Provinces, North and East Bengal and the Brahmaputra Valley.

Daily Summary.—*Sunday.*—Pressure had fallen in the Punjab and Upper Sind and was steady or had changed by small amounts elsewhere. It was practically normal at the head of the Bay and in the Peninsula, but in excess of the normal elsewhere. Weather was slightly disturbed in East Bengal. Barisal had received ·67 inch of rain, and light showers had fallen at Chittagong, Colombo and Negapatam.

Monday.—The barometer had fallen slightly in North-Western India and had risen slightly in North-Eastern India, but was steady in the Peninsula. Pressure was in general slight excess, the excess being greatest in Sind, the North-Western Provinces and Lower Burma. A few light showers were received in East Bengal and the Coromandel coast districts.

Tuesday.—Pressure had risen briskly to rapidly over the Punjab, East Baluchistan, Upper Sind and Rajputana, but was steady in West Baluchistan and North Bombay, and had risen slightly over the remainder of India. Winds had shifted to southerly and easterly directions in Baluchistan and Lower Sind, and skies were heavily clouded in Baluchistan. Light showers were reported from Chittagong, Colombo and Southern India. Colombo had received ·47 inch and Cuddalore ·29 inch.

Wednesday.—The barometer had fallen briskly in North-Western India and East Baluchistan and had changed by small amounts elsewhere. Winds were unchanged in direction in Baluchistan and a diffused disturbance was apparently affecting a large tract of country, including Baluchistan and North-Western India, where weather was slightly unsettled.

Thursday.—Pressure had fallen slightly in the West Punjab, Rajputana and Bundelkhand, and was steady or had risen slightly over the remainder of the Indian area. The depression had advanced to Bundelkhand and the adjacent districts where pressure was relatively low and winds were feebly cyclonic in direction. An area of low pressure also covered the Central Punjab, and strong north-westerly winds were blowing at Cherat. Light showers had been received in the Central Provinces and Central India, the more important being: Neemuch ·47 inch, Saugor ·42 inch and Jubbulpore ·25 inch. Cuddalore, in Southern India, reported a fall of 1·06 inches.

Friday.—Pressure had risen slightly in the Punjab and the secondary depression in the Central Punjab had filled up. Pressure had fallen generally elsewhere, and the primary depression had advanced into Eastern and Central Bengal and was central near Bogra. Showers had been received in the Central Provinces, Central India and Chota Nagpur, the principal falls being ·66 inch at Pachmarhi, ·48 inch at Hoshangabad and ·3 inch at Ranchi.

Saturday.—Pressure had risen slightly to briskly in North-Eastern India and Burma, and the depression in Bengal had filled up. The barometer had fallen briskly in Baluchistan and slightly in the Punjab and Sind, and another depression was indicated approaching from the west. Winds were south-easterly in Baluchistan, and a gale of wind was reported from Chaman. Light to moderate rain had been received in North Bengal, Assam and Upper Burma. Kindat reported a fall of 1·01 inches, Lashio ·83 inch and Dhubri ·68 inch.

Temperature.—Unusually high temperatures, chiefly due to excessive night temperatures, prevailed during the week over the whole of India and Burma, with the exception of the Punjab, Sind and Rajputana. Temperature was most in excess in the Central Provinces, where the excess over the normal ranged from 3°·6 on the 21st to 6°·4 on the 20th. For the whole week the mean temperature averaged 4°·6 in excess in the Central Provinces, 2°·5 in Bombay, 2°·2 in Burma and Bengal and 1°·9 in Madras. It was 2° below the normal in Sind and Rajputana.

The mean temperature for the whole of India was in excess throughout the week, the excess being most marked on the 20th when it averaged 2°. For the whole week it was 1°·4 above the normal.

The following table gives the variations of the mean temperature from the normal on each day of the week for the different provinces of India :—

Province.	December 1894.							Mean Variation of week.

Rainfall.—Rain fell during the week in 20 of the 52 rainfall divisions, but the amounts received in all divisions were small. The largest average rainfall was ·47 inch in the Madras East Coast (South). Assam (Brahmaputra) received ·42 inch, and the Central and Eastern districts of the Central Provinces and East Bengal received amounts slightly exceeding ·25 inch, but in no other divisions did the rainfall exceed a quarter of an inch, and in 11 divisions it was below a tenth of an inch. The rainfall of the week was in excess of the normal in the Central Provinces, the Brahmaputra Valley, East and North Bengal and the eastern states of Central India.

For the period from the 14th October to the 22nd December rainfall was in defect of the normal amount in Burma, the North-West and West Punjab, Sind, and East Coast (South). It was either practically normal or in excess of the normal in all other divisions.

Province.	Division.	Rainfall data for week ending 22nd December, 1894.			Rainfall data from 14th October to 22nd December, 1894.		
		Average actual rainfall of Division.	Average normal rainfall of Division.	Excess or defect in inches.	Average actual rainfall of season to date.	Average normal rainfall, 14th October to 22nd December.	Excess or defect of (seasonal) rainfall expressed as a percentage.

W. A. BION,
Actg. Asst. Meteorological Reporter to the Government of India.

SIMLA, *27th December 1894.*

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 29th December.*—Scattered showers have fallen in the Southern districts, moderate rain in Tanjore. The water-supply is generally sufficient, but rain is urgently wanted in many districts. Agricultural operations continue. The standing crops are generally fair, but need rain. The harvest continues with fair to average outturn. Pasture and fodder are generally sufficient. Prices are generally steady, but rising slightly in parts of the Deccan and Central districts.

Bombay.—*For week ending 2nd January.*—Slight rain in Shikarpur. The standing crops have been damaged by blight in parts of Bijapur and Dharwar, and are suffering for want of rain in parts of Poona, Sholapur, and Belgaum. Sowing of the late crops is progressing in nine, and reaping of early crops in four, districts. Cotton-picking continues in parts of Ahmednagar. Fodder supply sufficient. Agricultural stock in good condition. Prices are normal.

Bengal.—*For week ending 31st December.*—There was slight rain in Bihar, but no rain is reported elsewhere. Reports of the crops continue satisfactory. The harvesting of winter rice is proceeding with good results. Prospects of the spring crops and sugarcane are favourable. Poppy is generally doing well, but in Hazaribagh the crop is backward. Cattle are in good condition. The price of common rice is normal and is falling in some districts.

North-Western Provinces and Oudh.—*For week ending 2nd January.*—Weather generally cloudy with showers in several districts. Hail is reported from Jhansi, but no damage has been done. The condition of the crops and prospects are good. Prices are normal, but rising in places.

Punjab.—*For week ending 2nd January.*—Rain has fallen in all districts except Lahore and Sialkot. Harvesting of the autumn crops is almost over. Sugarcane-pressing and cotton-picking continue. Sowings of the spring crops have been finished. The standing crops are generally in good condition except on low-lying lands in Delhi and Peshawar. Prospects are promising, but a spell of sunny weather is needed in Umballa for the growth of the crops. Cattle are generally in good condition and fodder is sufficient throughout the province. Prices are rising in Umballa, normal in Delhi, low elsewhere.

Central Provinces.—*For week ending 2nd January.*—Weather generally clear and cold. Harvesting of the autumn crops is in progress. Winter sowings have been completed. In parts of a few districts the linseed crop has been attacked by rust, otherwise the crops are doing well and prospects are favourable. Prices are steady.

Burma.—*For week ending 29th December.*—No rain. Reaping of the main paddy crop is well advanced in Lower Burma, the outturn is poor. In Upper Burma reaping of wet-weather paddy is nearly completed in several districts and cultivation of the dry crops is progressing everywhere. Prospects are good, except in the south of the Central Zone. Fodder and water are sufficient. The price of paddy is about normal in Lower Burma, but very high in Tharrawaddy; steady and below normal in Upper Burma.

Assam.—*For week ending 1st January.*—Weather seasonable. Harvesting of winter paddy continues. Condition of cattle fair. Fodder and water are sufficient.

Mysore and Coorg.—*For week ending 2nd January.*—MYSORE: The standing crops are in good condition. Prospects are favourable. *Ragi* (*Eleusine coracana*) has been harvested in parts of six districts. Prices continue steady.

COORG: Reaping of rice and picking of coffee are still in progress. Fodder and water for cattle sufficient. Prices of food grains remain normal.

Berar and Hyderabad.—*For week ending 2nd January.*—BERAR: Weather clear and cool. The winter crops are thriving well. Picking of cotton and cutting of *juar* (*Sorghum vulgare*) continue. Fodder and water are sufficient. Prices have risen in two, fallen in one, and steady in the remaining three districts.

HYDERABAD: No rain during the week. Harvesting of the autumn crops is very nearly completed. Land is being ploughed for the hot-weather crops. Prices continue normal.

Central India.—*For week ending 2nd January.*—Rain fell during the week in four Agencies. Agricultural operations have been completed in Bhopal; in progress elsewhere. The standing crops are in fairly good condition, though some damage has been done by recent rain and hail storms. The condition of agricultural stock is indifferent in Gwalior, but fairly good elsewhere. Prices of food grains are normal in Bhopal and Bhopawar, above normal in Gwalior, Bundelkhand, Goona, and the Neemuch district. The condition of the opium crop is good.

Rajputana.—*For week ending 2nd January.*—Rainfall good in Bhurtpore, Jeypore, and Ulwar; slight in Kotah, Harowtee, Dholepur, and Ajmere. Agricultural operations are satisfactory. The standing crops and harvest prospects are good. Cattle generally in good condition. Fodder is sufficient, but failing in Dholepur and Bhurtpore. Prices are rising in four States, falling in one, and normal elsewhere.

Kashmir.—KASHMIR VALLEY.—*For week ending 1st January.*—Weather cloudy. Sowings for the spring crops have been completed in most places. Prices continue normal.

JAMMU PROVINCE.—*For week ending 2nd January.*—Slight rain. Weather cloudy. Crops in good condition. Fodder sufficient. Prices show a tendency to fall.

Nepal.—*For week ending 29th December.*—Weather foggy. Wheat sowing finished.

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

No. 57-S. R., dated Calcutta, the 4th January 1895.

ORDER—By the Government of India, Finance and Commerce Department.

READ—

Despatch from Her Majesty's Secretary of State for India, No. 169 (Revenue), dated the 13th December, 1894.

INDIA OFFICE,
London, 13th December 1894.

REVENUE,
No. 169.

To His Excellency The Right Honourable The Governor General of India in Council.

MY LORD,—I have considered in Council your Excellency's confidential letter, No. 210, dated the 7th August 1894, with your colleague Mr. Westland's Minute, regarding the imposition of import duties on cotton goods.

2. So far as a judgment can be formed at the present time, the Indian treasury requires an addition of a crore or a crore and a half to the present revenues. I observe that you still are of opinion that this addition can best be secured by the imposition of import duties on cotton goods. But Her Majesty's Government consider that, in accordance with the resolution of the House of Commons, these duties must not be protective in their nature.

3. Mr. Westland's Minute, embodying the results of a careful inquiry made by him into the circumstances of the Bombay cotton industry, concludes by recommending that import duties be imposed at the rate of,—

(*a*) 5 per cent *ad valorem* on all cotton piece goods;
(*b*) 3½ per cent. *ad valorem* on all cotton yarns of counts above 24;

and that an excise duty of,—

(*c*) 3½ per cent. *ad valorem* be levied on all machine-made cotton yarns, produced at mills in British India of counts above 24.

Indian-made piece goods would thus pay excise duty on the yarn of which they are woven, whenever such yarns are finer than 24s. It is proposed that a drawback be paid on exported yarns or goods, and that negotiations be undertaken with Native States in view to their levying a similar excise duty upon yarns made at mills within their borders.

Your Government consider Mr. Westland's proposals to be the best way of meeting the requirement of Her Majesty's Government that Indian cotton duties must not be protective.

4. I think that these proposals would comply with the requirements laid down, subject to two modifications of detail. First, I consider that the duty (import and excise) upon yarns should be at the same rate, 5 per cent. *ad valorem*, as on woven goods. I share the view expressed by the late Mr. James Wilson in his Financial Statement of the 18th February 1860, that, for reasons which he there states, "the same duty may be placed on yarns as is charged on "goods, without any perceptible injury to the trade." Moreover, I am not certain that a 3½ per cent. duty on yarns used in Indian fabrics might not to some extent protect Indian manufactures against imported goods of the same description, paying a 5 per cent. duty. Secondly, I am not satisfied that counts above 24 are, without doubt, the right line at which duty on yarns should begin. Mr. Westland shows good grounds for believing that imported yarns below 30s, and imported goods containing yarns below 30s, constitute a small proportion of the total importations of cotton goods. But it seems

that such goods are imported to some extent. Complete information on the subject does not appear to be available. On the whole, in order to prevent any possibility of the duties being protective, I consider the duty on yarns should begin with counts above 20, instead of 24 as proposed by your Government. I have no objection to your reserving to yourself in the Act power to raise the line by executive action, with the consent of Her Majesty's Government, in case experience should hereafter show that it has been drawn unnecessarily low.

5. You are aware that in July 1877 the House of Commons passed a Resolution to the effect that "the duties now levied upon cotton manufactures imported into India, *being protective in their nature*, are contrary to sound "commercial policy;" and that, in reply to a question in the House of Commons on the 27th July last, I said that the above-mentioned Resolution dealt "with duties which are protective in their nature," and I proceeded "I have "already stated to the House that, in my opinion, the Executive Government "ought not to sanction steps which would reverse that decision without giving "an opportunity for discussion in this House." Again, in the Indian Budget debate on the 16th of August 1894, I said that the House had resolved, "that "it will not sanction a protective duty on cotton goods; therefore the position "I have taken up is that the imposition of such a duty is a step which must not "be taken, until the House has had some opportunity of discussing the question, ". . . . I have said all along, and I say now, that, if the manufacturers of "India are prepared to submit to a countervailing duty which will destroy the "element of protection, I do not see why the import duty should not be imposed. . . . If there be any necessity for increasing the taxation of India, I "see no reason why this tax could not be fairly and justly imposed, and at the "same time deprived of any protective character, so that it shall go into the "Treasury of India, and not into the pockets of the manufacturers. Then no "injustice would be done to the English manufacturer on the one hand or to the "Indian consumer on the other." It will, therefore, be understood that Her Majesty's Government are precluded by the pledges above quoted from sanctioning the imposition of import duties on cotton goods, unless under such conditions as will ensure beyond question that the duties thus imposed will have no protective effect.

6. Subject to the two modifications stated in paragraph 4, I agree to your moving the Legislature to impose import and excise duties upon cotton manufactures in the way you propose.

I have the honour to be,
My Lord,
Your Lordship's most obedient, humble Servant,
(Signed) HENRY H. FOWLER.

Ordered, that the despatch be published for general information in the Supplement to the *Gazette of India*, in continuation of No. 6168-S.R., dated the 17th December, 1894.

Home Department Resolution No. $\frac{\text{2-Sanitary}}{102-14}$, dated the 3rd May 1887.

Correspondence with, and reports from, the Government of Bombay and Messrs. Thomas Cook & Son on the arrangements made by the latter in connection with the conveyance of pilgrims to and from the Hedjaz from 1888 to 1894.

RESOLUTION.

IN the Resolution of the 21st January 1886, cited above, it was stated that in October 1884 a communication had been received from Messrs. Thomas Cook & Son expressing the readiness of that firm to undertake the conveyance of Muhammadan pilgrims between India and the Hedjaz. The success which had attended the extensive schemes of Messrs. Cook & Son for lessening the difficulties and increasing the comfort of travellers in different parts of the world seemed to the Government of India to afford an assurance that that firm would be successful in placing the arrangements for the conveyance of pilgrims between this country and Arabia on a footing more satisfactory to the Government, and

more convenient to the pilgrims themselves, than had hitherto been found possible. After carefully considering the matter in personal communication with Mr. J. M. Cook, the Governor General in Council came to an agreement with the firm by which they were to be appointed pilgrim agents for the whole of India. Local officers and officers in charge of treasuries were instructed to assist the firm in making known the terms of through conveyance to Jeddah and back, and in disposing of through tickets; and the Government of Bombay were requested to make over to the representatives of the firm the issue of passports in Bombay after they had been signed by the proper authorities, and to instruct the Protector of Pilgrims to work in harmony with the firm and to render them every assistance. On their part, Messrs. Cook & Son agreed to arrange with the railway administrations, steamship proprietors and others concerned for the conveyance of the pilgrims, at through fares, from all the chief stations in India to Jeddah and back, and to do all in their power to secure the transit of the pilgrims in satisfactory ships supplied with proper accommodation in accordance with the regulations laid down by the Government. The firm were prepared to provide the requisite agency for the work, Muhammadans being appointed for that purpose in all cases where necessary; to establish a special pilgrimage office in the most convenient position in Bombay, and possibly also at Jeddah; and to make all detailed arrangements in connection with the issue of the necessary announcements, forms of tickets, etc. They also expressed their readiness to comply with the requirements and regulations which might be laid down from time to time by the Government of India in the same manner as though they were in the service of the Government.

2. During the winter of 1886-87 Mr. F. H. Cook made a tour in India with the view of personally working out the details of the scheme in communication with the Government of India and of explaining to the Muhammadan community what the firm proposed to do. In their Resolution of the 3rd May 1887, the Government of India announced the detailed arrangements which had been completed with Messrs. Cook & Son. These were to last for three years from the beginning of 1887 and to be terminable at the end of that period at the option of either the Government or Messrs. Cook & Son. In the event of the Government withdrawing after three years from the scheme, Messrs. Cook & Son were to be at liberty to continue it as a private enterprise. It was explained that, though the Government gave their countenance and assistance to Messrs. Cook & Son's enterprise, they had no desire to constitute a monopoly in favour of the firm. As, however, the firm engaged to convey pilgrims to Jeddah at a fair charge, to protect them while on the journey from extortion and ill-treatment, and to provide them with comforts and facilities in the way of supplies of food and banking arrangements, the Government were, it was stated, satisfied that pilgrims would do well to take advantage of the firm's arrangements. The prices of single and return steamship fares were fixed on the representation of Mr. F. H. Cook and the advice of the Government of Bombay. Tickets, inclusive of the railway and steamer fares, were to be kept for sale at the office of the Collector or Deputy Commissioner of every district in India, and district officers were instructed to give the widest publicity to the advantages to be secured which were set forth in a prospectus approved by the Government of India. A guarantee against actual loss in the execution of these arrangements, up to £2,000 for the first year and £1,000 for each of the two following years, was given by the Government of India, on the understanding that Messrs. Cook & Son should furnish their accounts for audit by the Accountant-General of Bombay.

3. The report of Messrs. Cook & Son on the arrangements carried out by them in connection with the Hajj of 1887 showed that, out of a total of 9,839 pilgrims, who sailed from ports in British India for Jeddah and Yembo, 1,936 (or 19·8 per cent.) were booked by the firm. The chief advantage which the pilgrims had secured was stated by the firm to be that of through booking at fixed rates, inclusive of landing and baggage charges. Messrs. Cook & Son were endeavouring to charter vessels themselves for future voyages in order to be able to furnish improved accommodation on board. The accounts of the firm showed a loss of £2,592, and the sum of £2,000 guaranteed by Government was accordingly paid to them.

4. On the 27th February 1888, Messrs Cook & Son reported that they had chartered for the coming season four steamers from Bombay to Jeddah and two from Jeddah to Bombay. The dates of departure of these vessels were published in the *Gazette of India*, and the Local Governments and Administrations were requested to give every publicity to them. The report on the working of the arrangements during 1888 showed that 13,532 pilgrims left Bombay for the Hajj, in 16 steamers, of whom 3,961 (or 29·3 per cent.) were conveyed by Messrs. Cook & Son in four steamers. A loss was incurred by the firm above the amount of the guarantee of £1,000, and the guaranteed sum was accordingly paid by Government. In his letter dated the 17th April 1889, Mr. J. M. Cook stated that, from the experience they had gained, Messrs. Cook & Son were convinced that it was quite impossible for them to convey the pilgrims in the way they were doing at existing rates for a profit, and that, unless the Government of India expressed satisfaction with, and appreciation of, the past working of the arrangements, they did not consider that they would be justified in incurring the great responsibility and personal labour involved. The Home Secretary's letter of the 15th October 1889 conveyed the reply of the Government of India to the effect that, after making enquiries from the Local Governments and Administrations, they were assured that the conditions under which Indian pilgrims could proceed to the Hedjaz had been materially improved, particularly in the reduction of opportunities for extortion, since Messrs. Cook & Son had undertaken the work, and that the Governor General in Council believed that this was not only the case in the ships by which pilgrims proceeded with the firm's tickets, but also that the example set on the vessels chartered by the firm had raised the standard of comfort on the vessels belonging to other firms. The Government of India accordingly indicated their willingness to continue the arrangements with Messrs. Cook & Son for the years 1890 and 1891, with a guarantee against loss up to £1,000 in each year. Mr. J. M. Cook, the Managing Partner of the firm, when replying to this letter on the 9th December 1889, took exception to some of the criticisms contained in the reports of the local authorities, and stated that he would leave the decision as to the acceptance of a continuance of the arrangements for the years 1890 and 1891 to his son, Mr. F. H. Cook, who was then proceeding to India. On the 15th January 1890, the latter gentleman intimated that he had decided to continue the arrangements for at least the period of two years during which the Government had offered to continue its assistance.

5. The report on the working of the arrangements during 1889 showed that 11,514 pilgrims left Bombay for the Hajj, in 15 steamers, of whom 4,460 (or 38·6 per cent.) were conveyed in the four steamers chartered by Messrs. Cook & Son. The amount of compensation claimed by the firm was R3,266 on account of the losses sustained in connection with the pilgrim traffic to the Hedjaz in 1889, and R4,969 representing the losses incurred in previous years which had not been covered by the guarantee. The former sum was paid to Messrs. Cook & Son, but the Government of India did not consider the firm to be entitled to the latter sum.

6. The report on the arrangements made in 1890 showed that of 9,953 pilgrims, who left Bombay for the Hedjaz in eleven steamers, 4,220 (or 44½ per cent.) were conveyed in the four steamers chartered by Messrs. Cook & Son. The statement of account submitted by the firm showed a claim against the Government of R12,761-15-4, which sum included R6,272 on account of losses incurred in previous years. In Home Department letter dated the 25th August 1891, the Government of India sanctioned the payment of the sum of R6,489-13-10, being the amount of actual loss sustained during 1890.

7. On the 29th June 1891, the firm again addressed the Government of India regarding the question of continuing the arrangements. They expressed their conviction that the business of conveying pilgrims to the Hedjaz under the conditions proposed by them and accepted by the Government of India could never be made self-supporting, and enquired whether the Government was prepared to guarantee them against actual monetary loss. They stated that to enable the arrangements to be carried out in a satisfactory manner, it would be necessary to put on a special service of steamers to compete with the shippers who had been in the trade for many years, and that an increase in the amount guaranteed would

be necessary. The Government of India were reluctant to withdraw from the scheme without a further trial of it, and expressed their willingness to continue existing arrangements for a further period of two years (1892 and 1893). This was eventually arranged on condition that the Government of India should pay to the firm the sum of R6,272 claimed as losses over the sums guaranteed in previous years, and should continue the indemnity and allow losses accruing to the firm in 1892 to be carried on to the accounts for 1893, provided that the total indemnity for those two years should not exceed £2,000. These terms were accepted by the firm in their letter dated the 21st April 1892.

8. The report of the arrangements for the year 1891 showed that, out of a total of 12,032 pilgrims who left Bombay for the Hajj in 18 steamers, 4,485 (or 37·2 per cent.) were conveyed in four steamers chartered by Messrs. Cook & Son. The amount of compensation paid to the firm for the losses of the year was R14,471-8-5.

9. The report on the pilgrim traffic for the year 1892 showed that 12,466 pilgrims left Bombay for the Hedjaz in 19 steamers, and that only 2,939 (or 23·5 per cent.) were carried by Messrs. Cook & Son in three steamers chartered by them. In addition to these the firm conveyed 732 pilgrims in one steamer from Calcutta. The Government of India sanctioned the payment to the firm of the sum of £1,000 towards the loss of R36,147-2-9 (=£2,259-3-9) sustained by them during the year.

10. In a letter dated the 20th July 1893, Messrs. Cook & Son enquired what were the intentions of the Government of India as to any further continuation of the arrangements with the firm for the conveyance of pilgrims to the Hedjaz, and the Government of India consulted the Government of Bombay upon the matter. The report of the Government of Bombay showed that during the official year 1892-93, the number of pilgrims embarked from Bombay was 11,896, of whom only 1,656 or not quite 14 per cent. were booked by Messrs. Cook & Son. The Bombay Government considered that the influence of Messrs. Cook & Son on the working of the pilgrim traffic was diminishing, and were unable to recommend that the existing arrangements should be continued. The Government of India came reluctantly to the conclusion that they would not be justified, in view of the diminishing number of pilgrims carried through the agency of Messrs. Cook & Son, in continuing the subsidy to Messrs. Cook & Son after 1893. This decision was intimated to the firm and communicated to Her Majesty's Secretary of State for India.

11. The report of Messrs. Cook & Son on the working of the arrangements during 1893 has now been received and considered by the Government of India, and the accounts for the year have been audited by the Accountant-General. The report shows that, in 1893, 18,468 pilgrims left Bombay for the Hedjaz in 29 steamers, but Messrs. Cook & Son only conveyed 1,767 (or 9·5 per cent.) in two steamers. These figures, it appears to the Government of India, are sufficient in themselves to justify the decision come to in October 1893 to terminate the arrangements with Messrs. Cook & Son. The accounts of the pilgrim traffic for that year show that the receipts to the firm from all sources amounted to R65,636-10-0, and the expenditure to R61,348-2-11. There was thus a net gain of R4,288-7-1 on the year. In pursuance of the conditions accepted by the firm in 1892, the Government of India have to make good the losses of the two years 1892 and 1893 together up to the limit of £2,000. The payment of R16,023-10-10 has accordingly been sanctioned. With the payment of this sum Messrs. Cook & Son will be recouped for all losses shown in their accounts and admitted on audit by the Accountant-General of Bombay which have been incurred by the firm since 1887 in connection with their transactions for the conveyance of Indian pilgrims to and from Arabia.

12. In sanctioning the above payment the Governor General in Council has thought fit to review the history of the arrangements, which were brought to a termination last year, between Messrs. Cook & Son and the Government of India. His Excellency in Council fully recognizes the good work done by the firm in improving the conditions under which Indian pilgrims during the last few years proceeded to the Hedjaz. Its influence has in his

opinion been especially manifested in the reduction of the opportunities for extortion. The Governor General in Council is aware that difficulties were encountered by Messrs. Cook & Son in the opposition of the shippers interested in the traffic, but His Excellency in Council was not without hope that the popularity of the vessels of so influential a firm would have been so great that in time the continuance of the arrangements would not have necessitated a guarantee. This hope has not been realized, and the reports for recent years show that the firm's vessels have lately been less popular as compared with those of other charterers than they were. In these circumstances the Governor General in Council was forced to conclude that the experiment which had been fully and fairly tried was not likely to be more successful in future, and that the time had come for the discontinuance of the annual subsidy.

ORDER.—Ordered that a copy of this Resolution be forwarded to all Local Governments and Administrations, to the Foreign and Financial Departments, and to Messrs. Thomas Cook & Son, Bombay, for information.

Ordered also that the Resolution be published in the Supplement to the *Gazette of India* for general information.

(True Extract.)

J. P. HEWETT,

Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the week ending at 8 a.m. on Saturday, December 29th, 1894.

General Summary.—The depression, the approach of which was indicated by the observations of the 22nd December, crossed the North-Western frontier by Sunday morning and was central in Rajputana. Light rain and snow had fallen in Baluchistan. By next morning the depression had travelled as far as Bundelkhand and a secondary depression had formed in the Punjab. Winds were irregularly cyclonic in both depression areas, and had strengthened considerably at Cherat and Murree. Showers had fallen in Bundelkhand and Rajputana, and light general rain in the Punjab and western districts of the North-Western Provinces. Murree and Srinagar had received light falls of snow. The primary depression was almost stationary during the next 24 hours having moved only slightly eastwards by Tuesday morning and it was very faintly marked. The secondary depression had partly filled up. Snow had fallen in the Western Himalayan hill districts, and rain in the Punjab, the North-Western Provinces, Bihar, and Central India. Ludhiana received a heavy fall of 2·38 inches, and Chakrata, Nowgong, Dehra Dun, Mussoorie, Simla, and Rurki amounts ranging between one and two inches. By next morning, however, both depressions had practically filled up and only a few light showers were reported from the hill and submontane districts of the North-Western Provinces. The next day was rainless over the whole of the Indian area. But fine weather did not continue long, for, on Wednesday morning, the first indications of the approach of another depression were observable in the increase of temperature and cloud in Baluchistan. The barometer fell slightly in Baluchistan next day and briskly the day following, but it was not till Saturday morning that the depression was shown crossing the frontier near Jacobabad. It had given light rain and snow to Baluchistan and the North-West Punjab. Quetta received ·57 inch, Chaman ·25 inch, and Murree ·21 inch.

Practically no rain has fallen during the week in Southern India. A heavy local fall of over three inches was reported from Negapatam on Sunday, but only light local showers were received at other stations, and on the last four days of the week no rain whatever was reported.

Daily Summary.—*Sunday.*—Pressure was steady in Rajputana and Gujarat, but had risen slightly to briskly in Baluchistan and the remainder of Northern India. The depression which was shown approaching from the west on the previous day had crossed the North-West Frontier and was central in Rajputana. The air was damper in Baluchistan where light rain and snow had fallen, and skies were heavily clouded in Baluchistan and North-Western India. A heavy local fall of rain, amounting to 3·12 inches, was reported from Negapatam.

Monday.—The barometer had risen in Baluchistan and Sind, but had fallen elsewhere, the fall being rapid in the central and eastern districts of the Punjab, and also in Bundelkhand and the adjacent districts of the North-Western Provinces. The depression had advanced to Bundelkhand and was central near Nowgong.

A secondary depression had formed in the Central Punjab. Winds had increased considerably at Murree and Cherat and were irregularly cyclonic in direction in both depression areas. Light general rain had fallen in the Punjab and the western districts of the North-Western Provinces, and showers in Rajputana and Bundelkhand. Nowgong reported a fall of ·97 inch, Khushab ·9 inch, Delhi ·62 inch, and Agra ·49 inch.

Tuesday.—Pressure had risen in Rajputana and Central India and had fallen elsewhere, the fall being brisk to rapid in North-Eastern India and Burma. The primary depression had advanced slightly eastwards, but was very faintly marked. The secondary depression was still in existence, but had commenced to fill up. Temperature had decreased very rapidly in the Upper India hill districts, Gujarat, Lower Sind and Rajputana and rapidly in the Punjab. Several stations reported maximum temperatures more than 15° in defect of the normal. Snow had fallen in the Western Himalayan hill districts and rain in the Punjab, the North-Western Provinces, Bihar, and Central India. Ludhiana had received 2·38 inches, Chakrata 1·9 inches, Nowgong 1·21 inches, Dehra Dun 1·13 inches, Mussoorie 1·11 inches, Simla 1·05 inches, and Rurki 1·04 inches.

Wednesday.—Pressure had risen briskly to rapidly in North-Western and Central India and fallen slightly in Bengal, Burma, and the greater part of the Peninsula. The secondary depression in the Punjab had filled up completely and the primary depression had practically filled up. Temperature was in considerable to large defect in North-Western India. A few showers had been received in the hill and submontane districts of the North-Western Provinces. Mussoorie reported a fall of 1·18 inches and Dehra Dun ·4 inch. Skies were clouding over again in Baluchistan where temperature had risen rapidly.

Thursday.—The barometer had risen over the whole of India and Burma, but had fallen slightly in West Baluchistan, Upper Sind, and Gujarat, and winds had shifted to east at Chaman and Jacobabad. Skies were overcast in Baluchistan and another depression was apparently approaching from the west. Temperature had risen rapidly in Baluchistan and had fallen briskly to rapidly in the North-Western and Central Provinces and Bengal. No rain was reported.

Friday.—Pressure had fallen briskly in Baluchistan and North-Western India, and slightly in the Central Provinces. It was steady in the south of the Peninsula, North-Eastern India, and Burma. A shallow low-pressure area covered the submontane districts of the North-Western Provinces, where pressure was in slight defect, and winds were cyclonic in direction. Darjeeling and Gnatong reported light falls of rain and snow.

Saturday.—The barometer had risen rapidly in West Baluchistan. It had fallen briskly in Upper Sind and the West Punjab, and the depression approaching Baluchistan the day before was crossing the frontier near Jacobabad. Strong south-easterly winds were blowing at Murree and winds at Chaman had shifted to east-north-east. Light rain had fallen in Baluchistan and the North-West Punjab. Quetta received ·57 inch and Chaman ·25 inch.

Temperature.—Unusually low temperatures prevailed during the latter part of the week in Northern India. A cool wave entered the Punjab, Sind, and Rajputana on the 25th causing a rapid fall of temperature in these provinces. By

next day it had entered the North-Western Provinces and Central India, the fall of temperature averaging 6° in Central India. By the 27th temperature had begun to fall in the Central Provinces, and on the next day the wave had reached Bengal where it reduced the mean temperature of the province by 3°.

The following table gives the variations from the normal temperature of the different provinces of India for each day of the week:—

Province.	23rd.	24th.	25th.	26th.	27th.	28th.	29th.	Mean variation of week.
	°	°	°	°	°	°	°	°
Burma	+0·3	—1·2	—1·9	—1·5	—1·2	—1·7	—1·9	—1·3
Bengal and Assam	+1·0	+0·3	+0·4	+1·7	+0·4	—2·8	—3·0	—0·3
North-Western Provinces and Oudh	+0·8	+2·5	+0·5	—3·2	—4·7	—3·3	—1·3	—1·2
Punjab	+3·5	—1·0	—3·5	—4·8	—4·4	—1·0	+1·6	—1·4
Bombay	+2·5	+1·8	+0·5	—0·8	+0·2	+0·6	+0·6	+0·8
Central Provinces and Berar	+4·9	+6·2	+5·6	+2·3	—1·4	—4·4	—3·0	+1·5
Central India and Gujarat	+3·3	+4·4	—1·1	—7·4	—7·1	—4·2	+0·2	—1·7
Sind and Rajputana	+3·2	—0·3	—5·8	—7·9	—7·6	—4·9	—1·8	—3·6
Madras	+1·5	+0·7	—0·4	+0·1	—0·2	+0·2	—0·2	+0·3
MEAN FOR WHOLE OF INDIA.	+2·3	+1·5	—0·6	—2·4	—2·9	—2·4	—1·0	—0·8

The mean temperature of the whole week was in slight excess in the Central Provinces, practically normal in Bengal, Bombay, and Madras and in defect elsewhere, the deficiency being most marked in Sind and Rajputana where it amounted to 3°·6.

The average mean temperature for the whole of India was in excess of the normal on the first two days of the week, and below the normal during the remainder of the week, the defect being greatest on the 26th, 27th, and 28th. For the whole week it was 0°·8 below the normal.

Rainfall.—The depression travelling through Northern India during the week gave moderate general rain to the Punjab, North-Western Provinces, Central India, and East Rajputana. Very little rain fell in other provinces. Twenty-five of the fifty-two rainfall divisions received rain during the week, but in only the hill and submontane districts of the Punjab did the average rainfall for the week amount to one inch, and in eight of the remaining divisions it was below a tenth of an inch.

The rainfall of the period 14th October to 29th December was either practically normal or in excess of the usual quantity everywhere, with the exception of Burma, the North-West Punjab, Sind, and the southern districts of the Madras east coast, where it was in defect by more than 20 per cent. of the normal quantity. In the Surma Valley the excess amounted to 14·53 inches.

SIMLA, *the 3rd January 1895.*

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 5th January.*—No rain, except a few scattered showers in parts of Tanjore. The water-supply is insufficient for irrigation in many districts. Agricultural operations continue. The standing crops are fair, but greatly need rain. The harvest continues with fair to average outturn. Pasture and fodder are generally sufficient. Prices almost stationary.

Bombay.—*For week ending 9th January.*—Slight rain in Sind. The standing crops have been damaged by blight in parts of Shikarpur, Bijapur, and Dharwar, and are suffering for want of rain in parts of Poona, Sholapur, and Belgaum. Sowing of the late and reaping of the early crops are progressing in nine districts. Cotton-picking continues in two districts. The fodder supply is sufficient. Agricultural stock in good condition. Prices are normal except in parts of Ahmednagar and Sholapur.

Bengal.—*For week ending 7th January.*—There was a little rain in North Bihar, but no rain is reported elsewhere in the province. General agricultural prospects continue favourable. The rice harvest is being rapidly completed, and a good outturn is generally expected. The spring crops and poppy are promising. Sugarcane is generally a good crop; it is being cut and pressed in parts of the Patna division. The price of common rice continues generally normal.

North-Western Provinces and Oudh.—*For week ending 9th January.*—Weather generally cloudy with rain in nearly all districts. Hail is reported from Gorakhpore and Cawnpore. The condition of the crops is good. Prospects are also good, but damage to crops is apprehended in Agra and Saharanpur if rain and cloudy weather continue. Supplies are ample. Prices are rising in several districts.

Punjab.—*For week ending 9th January.*—Rain has fallen in all districts, except Sialkot and Peshawar. Harvesting of the autumn crops is generally finished. Cotton-picking and sugarcane pressing are going on. Irrigation of the spring crops is in progress. The condition of the standing crops is generally reported good to average. Prospects are promising, but the crops on low-lying lands have suffered a little in Delhi and Peshawar. A spell of sunny weather is needed for the development of the crops in Umballa. The dry land crops are suffering for want of rain in parts of Amritsar. The crops are being damaged by field rats in parts of Ferozepore and Lahore. Cattle are generally in good condition, and fodder is sufficient in all districts, except Sialkot. Prices are high in Delhi, rising in Lahore, Umballa, and Jullundur; low elsewhere.

Central Provinces.—*For week ending 9th January.*—The weather has been occasionally cloudy in parts with slight rain in two districts. Harvesting of the autmn crops is approaching completion. Except the linseed crop which has been attacked by rust in places, the other winter crops are reported to be generally in good condition. Prices are rising in Seoni but are steady elsewhere.

Burma.—*For week ending 5th January.*—No rain. Threshing of the main paddy crop has commenced in Lower Burma. In Upper Burma reaping of wet-weather paddy is nearly completed and cultivation for the dry-weather

crops continues. Prospects are generally good except in the south of the Central zone. Fodder and water are sufficient. In Lower Burma the price of paddy is steady and above normal; in Upper Burma it is below normal, but unsteady.

Assam.—*For week ending 9th January.*—Weather dry. Reaping of winter paddy continues. The condition of cattle is fair. Fodder and water are sufficient.

Mysore and Coorg.—*For week ending 9th January.*—MYSORE:—Crops and prospects are good. Harvesting of *ragi* (*Eleusine coracana*) continues in five districts. Prices have slightly fallen in Hassan.

COORG: Reaping of rice and picking of coffee still continue. Fodder and water for cattle sufficient. Prices of food-grains remain normal.

Berar and Hyderabad.—*For week ending 9th January.*—BERAR: Weather clear and cool. The spring crops are thriving well, except linseed which has been damaged in parts of three districts and wheat in the Malkapur taluka through blight. Picking of cotton and cutting of *juar* (*Sorghum vulgare*) continues. Fodder and water are sufficient. Prices are fluctuating in the Wun district; otherwise prices are stationary.

HYDERABAD: No rain during the week. Harvesting of the autumn crops very nearly completed. Land is being ploughed for the hot-weather crops. Prices are normal.

Central India.—*For week ending 9th January.*—Rain fell during the week in three Agencies. Agricultural operations have been completed in Bhopal; in progress elsewhere. The standing crops are in fairly good condition though slightly damaged by recent rains and hail storms. The condition of agricultural stock is good. Prices of food-grains are above normal in three Agencies, rising in parts of Gwalior, normal elsewhere. The condition of opium is indifferent in the Neemuch district, but good elsewhere.

Rajputana.—*For week ending 9th January.*—Rainfall moderate in Kotah and Dholepur, slight in Kherwara, Ajmere, Kerowlee, Bickanir and Ulwar. Agricultural operations are satisfactory. The standing crops and harvest prospects are good. Cattle are generally in good condition. Fodder is sufficient, but is failing in Dholepore and Bhurtpore. Prices are fluctuating in one State, have risen in four; steady elsewhere.

Kashmir.—KASHMIR VALLEY.—*For week ending 8th January.*—Rain has fallen in the Mozaffarabad district. Snow falling in Kashmir proper and Gilgit. Weather unsettled. Spring sowings have been finished. Prices continue normal with tendency to fall.

JAMMU PROVINCE.—*For week ending 9th January.*—Report not received.

Nepal.—*For week ending 5th January.*—Weather alternately bright and foggy. Prospects are good.

DEFINITION OF THE TERM "MACHINERY" FOR THE PURPOSES OF THE INDIAN TARIFF ACT, 1894.

No. 324 S. R., dated Calcutta, the 18th January 1895.

RESOLUTION—By the Government of India, Finance and Commerce Department.

READ—

(1) Resolution in the Finance and Commerce Department, No. 5559, dated the 3rd November 1894.

(2) Letter from the Government of Madras, No. 4928, dated the 14th December 1894, and enclosures, containing a letter from the Madras Chamber of Commerce, dated the 26th November 1894.

(3) Letter from the Government of Bengal, No. 6844, dated the 27th December 1894, and enclosures.

(4) Letter from the Bengal Chamber of Commerce, No. 1272—94, dated the 22nd December 1894.

(5) Letter from the Government of the North-Western Provinces and Oudh, No. 317—XIII—370 A., dated the 22nd December 1894, and enclosures, containing a communication from the Upper India Chamber of Commerce, dated the 20th December 1894.

(6) Abstract of the Proceedings of the Council of the Governor General for making Laws and Regulations, dated respectively, the 17th and 27th December 1894.

(7) Letter to the Government of Madras, No. 6370, dated the 31st December 1894.

In the Resolution of the 3rd November 1894, read in the preamble, the Local Governments concerned were requested to furnish the Government of India with an expression of their opinion on the definition of the term "Machinery," which was given therein, for the purposes of the Indian Tariff Act, VIII of 1894.

2. The replies received were duly considered by the Select Committee on the Tariff Amendment Bill, and the grounds of their decision are enunciated in the speeches of the Honourable Sir James Westland contained in the Abstract of the Proceedings of the Legislative Council read above. Accordingly the definition of the term "Machinery" and its component parts finally adopted by the Legislature (*vide* entry No. 11 of Schedule IV of the Indian Tariff Act Amendment Act, XVI of 1894) allows of the free import of—

Machinery, namely, prime-movers, and component parts thereof, including boilers and component parts thereof; also including locomotive and portable engines, steam rollers, fire-engines and other machines in which the prime-mover is not separable from the operative parts.

Machinery (and component parts thereof), meaning machines or sets of machines to be worked by electric, steam, water, fire, or other power not being manual or animal labour, or which before being brought into use require to be fixed with reference to other moving parts; and which are intended for—

(*a*) the preparing, ginning, pressing, spinning, weaving, sewing, knitting, bleaching, and dyeing of cotton, jute, hemp, silk, wool, or other fibres and any other process intervening between the raw material and the finished product as packed ready for the market;
(*b*) the smelting and milling of iron and other metallic ores and the manufacture of iron, steel, and other metals;
(*c*) the manufacture of leather, sugar, indigo, silk, paper, soap, gas, oil, flour, cordage, rope, and twine;
(*d*) the milling of rice;
(*e*) the drying and rolling of tea;
(*f*) the pulping of coffee;
(*g*) printing presses;
(*h*) foundries and workshops of iron and other metals;
(*i*) railway workshops;
(*j*) the refining of petroleum, and the manufacture of vegetable oils;
(*k*) the crushing of bones and bricks;
(*l*) the manufacture of lac;
(*m*) potteries;
(*n*) saw mills;
(*o*) mining, navigation, agriculture, and pumping;
(*p*) **such other manufactures and industries as the Governor General in Council may from time to time specify.**

Provided that the term does not include tools and implements to be worked by manual or animal labour, and provided also that only such articles shall be admitted as component parts of machinery as are indispensable for the working of the machinery and are, owing to their shape or to other special quality, not adapted for any other purpose.

Note.—Machinery and component parts thereof made of substances other than metal are included in this entry;

while under entry No. 13 of the same schedule the only machines, tools, and implements to be worked by manual or animal labour, which can be admitted free, are—

water-lifts, sugar-mills, oil-presses, and parts thereof, and any other machines and parts of machines ordinarily used in processes of husbandry, or for the preparation for use or for sale of the products of husbandry which the Governor General in Council may, by notification in the *Gazette of India*, exempt.

3. As regards the question as to what are and what are not component parts of machinery, the attention of all Collectors of Customs should be invited to the express provisions of the law and to the remarks in elucidation of this point contained in the Honourable Sir J. Westland's speech of the 27th December 1894. No hard-and-fast lines other than those contained in the Act itself can be prescribed, but if the general principles laid down in the above-mentioned speech are borne in mind, Collectors of Customs should have but little difficulty in giving effect to the intentions of the Legislature. They should bring to notice any points arising in ordinary practice in which they think that the words of the law oblige them to impose a duty, where they have reason to believe that the intention of the law was to exempt.

4. In the letter to the Government of Madras of the 31st December 1894, the Government of India undertook to adopt the suggestion of the Madras Chamber of Commerce regarding the publication in the Gazettes and the communication to Mercantile and Trade representative bodies of all Government decisions on questions raised and adjudicated upon under the Tariff Act. The Governor General in Council is of opinion that the best way of giving effect to this suggestion is to publish such decisions in the Supplement to the *Gazette of India*, and to communicate them without delay to Chambers of Commerce and the Press, and further to collect the decisions and notifications and rules issued under the Act periodically into volumes of "Selections from the Records of the Government of India," which will be for sale to the public. This course will be followed in future, and this Resolution, together with the Resolution of the 3rd November 1894, cited in the preamble, and extracts from the speeches referred to in paragraph 2 are accordingly published for general information.

ORDER.—Ordered, that copy be forwarded to the Governments of Madras, Bombay, Bengal, and the North-Western Provinces and Oudh, to the Chief Commissioner of Burma; also to the Chambers of Commerce, Madras, Bombay, Bengal, Karachi, and Rangoon, and to the Upper India Chamber of Commerce.

Ordered also, that this Resolution and the papers mentioned in the last paragraph be published for general information in the Supplement to the *Gazette of India*.

STEPHEN JACOB.
Offg. Secy. to the Govt. of India.

GOVERNMENT OF INDIA.

FINANCE AND COMMERCE DEPARTMENT.

Enclosures of Resolution No. 324 S.R. of 1895.

No. 5559 S. R., dated 3rd November 1894.

RESOLUTION—By the Government of India, FINANCE AND COMMERCE DEPARTMENT.

Read—

Resolution in the Finance and Commerce Department, No. 873, dated 31st May 1881.
Resolution in the Finance and Commerce Department, No. 3172, dated 25th June 1894.
Letter from the Government of Bombay, No. 5964, dated 13th July 1894.

In the letter from the Government of Bombay read in the preamble, the orders of the Government of India are requested on proposals made by the Collector of Customs, Bombay, for the adoption of some general principle for the guidance of Customs officers in differentiating between machines and machinery for the purpose of the levy of duty under the Indian Tariff Act.

2. The question has more than once engaged the attention of Government in connection with the working of former Tariff Acts. It was considered very fully in 1880 in view to the removal of the great diversity of practice which prevailed in the Custom Houses at that time in the classification of articles as machines (hardware) and machinery. On the suggestion then made that Government should either issue a general definition as to articles which should be deemed machinery, or frame an authoritative list of articles to be passed free as machinery, the decision arrived at, as stated in the Resolution of the 31st May 1881 read above, was as follow:—

These reasons have led the Government of India to the conclusion that neither a definition of machinery, nor a list of articles which should be exempted under that head, can be issued which would not be open to objection as including or excluding much which the law and the Government of India do not intend to include or exclude, as the case may be. The only feasible course to adopt is that local officers should exercise their discretion in determining what articles should be passed free as "machinery," bearing in mind the distinction between "machinery" and "machines" or articles so named, doubtful points being referred, as hitherto, to the Government of India.

3. The Government of India are still of opinion that it is practically impossible to frame in general terms a definition of machinery which would not be open to the objections expressed in 1881 and still leave much opening for doubt and discussion. It may be possible, however, by supplementing a general definition by particular limitations, to lessen to a material extent the occasions for doubt; and in view of the difficulties experienced by Customs officers and the complaints by importers it is expedient that the question should again be fully considered.

4. It appears to the Government of India that the principle of imposing indirect taxation in the form of import duties for revenue purposes having been accepted, no reasonable claim can be urged for the exemption from duty of articles of common domestic use merely because they are called machines, articles, for instance, like coffee-grinding machines, which are found in every household, or sodawater machines. But a fair claim can be made for the exemption of machinery which represents fixed capital directly employed in the productive industries of the country. Any definition which failed to bring out this distinction clearly would obviously be defective.

5. The following definition has been suggested to the Government of India as substantially meeting the necessary conditions. It is both general and specific, and while the specification has been so framed as to include all important industries now existing in India, it also contains a proviso enabling Government to add to the list—

Machinery, meaning machines or sets of machines which are worked by electric, steam, water, or other power not being manual or animal labour, or which before being brought into use require to be fixed with reference to other moving parts; and the term includes all such machines or sets of machines intended for—

(*a*) the pressing, spinning, and weaving of cotton, jute, silk, wool or other fibres;
(*b*) the smelting of iron-ore and manufacture of iron;
(*c*) the manufacture of leather, paper, sugar, indigo, soap, gas, and flour;
(*d*) the milling of rice;
(*e*) the drying and rolling of tea;
(*f*) the pulping of coffee;
(*g*) printing presses;
(*h*) foundries and workshops of iron and other metals;
(*i*) the refining of petroleum;
(*j*) mining, navigation, and agriculture;
(*k*) any other manufacturing or other industry that may be specified from time to time by the Governor General in Council;

Provided that the term does not include tools or implements.

6. On the suitability of this definition, which will require legislation to give it effect, the Governor General in Council desires to be favoured with an expression of the opinion of

His Excellency the Governor in Council / His Honour the Lieutenant-Governor / the Chief Commissioner — and of the Madras / Bombay / Bengal / Upper India / Rangoon Chamber of Commerce. As it is desirable to consider, as soon as possible, the questions that have been raised, it is requested that the Chamber of Commerce may be consulted and an answer sent with the least possible delay.

ORDER.—Ordered, that copy be forwarded to the Governments of Madras, Bombay, Bengal, and the North-Western Provinces and Oudh, and to the Chief Commissioner of Burma.

Extract from the Speeches of the Honourable Sir James Westland, K.C.S.I., contained in the Abstract of the Proceedings of the Legislative Council, dated 17th and 27th December 1894.

The second cause of the difficulties to which I am alluding is the indefiniteness of the lines which divide machinery which is free, articles made of iron which are taxed at one per cent., and hardware and cutlery, including ironmongery, which pays the five per cent. rate of duty. The exemption of machinery was based on the principle that it was undesirable to burden with a five per cent. duty capital employed in the productive industries of the country; but, even while the old Tariff was in force, difficulties were found in restricting the application of the exemption within its intended limits. 'Machinery' is a somewhat wide term, and it gives rise to claims for exemption of 'machines,' which is a still more indefinite and extensive term. We have met this difficulty by giving a somewhat precise definition of machinery, which will, we hope, have the effect of opening the door freely to such articles as represent what may be called the fixed capital employed in productive industries, but will at the same time prevent claims arising for exemption of articles which, though they may bear, in common parlance, the name of machines, have no right to expect entry into India without the same payment of duty which we levy upon nearly all other imported articles. The proposed definition of machinery was circulated to Chambers of Commerce, and other authorities, a short time ago, and has been slightly expanded in consequence of suggestions received.

The second point which the Select Committee took up was the question of the definition of machinery.

We have carefully considered this question, and I may mention to the Council the point of view from which, in the Bill as now framed, we have dealt with the subject, especially as it involves certain considerations which relate generally to the question of customs taxation.

The principle of the Bill, as has been so often said, is that of levying a general import duty of five per cent. If the rate were not only general but universal, the working of the Tariff would be easy, and, as a matter of fact, the difficulties which arise in applying a Tariff arise almost entirely out of the exemptions. The exemptions are the peculiarities which we have carefully to hedge round, so as to prevent their being extended beyond the grounds upon which they are based.

Now the question may fairly be asked, if we exempt the large and costly machinery of wealthy companies, is it not inconsistent to continue to tax the small machines used by workers in their own trades? But the principle on which the exemption of machinery is justified is this: looking to the fact that there is a certain amount of capital which is seeking investment in some productive line of business, we want to attract that capital to those lines of business in which India is interested, or, at any rate, to prevent it being discouraged by the weight of any initial taxation. We therefore proclaim this exemption in their favour, and we consider ourselves compensated by the fact that they will add to the production of the country, which eventually pays its dues to us in some shape or other.

Now this ground of exemption, whether it be a good one or a bad one, does not apply to the small producers of the country; there is in their case no new capital to attract in the same sense. They may or may not invest their savings in labour-saving machines, but at least they do not require the enticement of an exemption from taxation to determine the precise line in which they shall invest their money, if they invest it at all.

The operation may look at first sight like taxing the poorer and exempting the richer. But this is a question that unfortunately arises in every individual case touched by the customs duty. In each case, taken by itself, it may be urged that it is hard that the burden of tax should be imposed. It is hard lines that the village carpenter should be unable to get his tools unweighted by a tax: it is hard lines that an old woman should not be able to get a warm garment without having a duty added on to its price. There is no answer to these arguments except to say that the money is absolutely required for the purposes of the administration, and that we cannot admit exemptions which are based upon the mere ground that the people who pay the tax would have somewhat fuller pockets if they did not pay it. You cannot work an Import Tariff on eleemosynary principles, and your exemptions must be based on some other ground than the mere hardship of having to pay the tax.

The exemption of machinery I base upon the economic ground I have stated, and I would rather reconsider the question of its exemption than admit a corresponding claim in the case of the innumerable other interests which might argue that they have as much claim to consideration as wealthy mill owners and industrial companies. The comparative estimation of claims to consideration must to my mind be based upon economic grounds, and not on questions of comparative ability to meet the tax-collector's demands.

These remarks will explain the general scheme of our definition of machinery; and I have only further to remark with reference to it that what we sought was not a scientific definition of machinery, as such, but a definition which would as accurately as possible include the kind of articles which on the grounds I have stated we proposed to exempt, and could not be stretched so as to include others to which those grounds do not apply. We want a working definition for our Custom Houses, and not merely one that will pass a dialectic scrutiny.

We had some discussion over the question of component parts, with reference to which more than one suggestion was made to us; and objection has been taken especially to the limitation expressed in the words 'which are not adapted for any other purpose.'

Now, I admit there is a certain difficulty in defining exactly what is a component part of machinery and what is not. It is easy to see that what are ordinarily classed as 'renewals' and 'spares'—duplicates of those parts of a machine which wear out most rapidly—are component parts. It is easy also, I take it, to see that nuts and bolts are not component parts except when they are actually in their place in the machine, or at least are not separately imported. But at intermediate stages between these there may be some difficulty. A cog-wheel, for example, may be imported for the particular purpose of being fitted into a particular part of a machine ready for it, or it may be imported without reference to any particular purpose, and simply as hardware. I cannot help thinking that the circumstances of importation are in such cases a guide to the Customs Collector; and I do not know any better way of indicating the test than that of its being, owing to the special shape, adapted for the particular purposes and not for general use for miscellaneous purposes. Again, there are articles which may be described as parts of machinery, which are perpetually being used up in its working and requiring continual replacement. Take, for example, asbestos packing; there is no more reason why that should be exempt merely because it is used for machinery than for the exemption of lubricating oil. The principles on which we base the exemption of machinery do not apply to what may be called the stores used up in its working.

It is not possible to work a Tariff upon the principle that the same article may be taxed, or may be exempt, according to the purpose which the particular importer has in view. Wire gauze, for example, is used for a hundred different purposes. We cannot allow a paper manufacturer to claim an exemption for his importation on the ground that he requires it for the working of his paper machines, and tell all other importers that because they are not paper manufacturers they must pay duty. It is not therefore the mere fact that an article is to be used with, or fitted into, a place in a machine that gives it its claim to exemption, but the fact that in ordinary practice that and no other is the purpose for which the article is imported and used; and that the article is such and of such special character that on its importation it may be at once presumed that use as part of an exempted piece of machinery is the purpose for which it is required.

We have considered all the suggestions that have been made to us in respect of these definitions, and we have adopted several of them, but some of them we considered to go too far, and to be framed on such a principle that, though they were good so far as they went, they did not sufficiently bear in mind the necessity of restricting the exemption to those things alone which ought, on our principles, to go untaxed—a necessity which, from the point of view of the Government, is just as important as that of declaring the exemptions itself.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the week ending at 8 a.m. on Saturday, January 5th, 1895.

General Summary.—The only important feature in the meteorology of the past week was the passage of another depression across Northern India. The first indications of its approach were shown on Wednesday the 26th December, when temperature rose and skies began to cloud over in Baluchistan. Cloud increased and the barometer fell on both the 27th and 28th, but it was not till the 29th that the observations showed the depression crossing the Sind frontier. Light to moderate rain was reported from Baluchistan and North-West Punjab. By Sunday morning, the 30th, the depression had advanced as far as South-East Rajputana, and light showers had fallen in Baluchistan and the hill and submontane districts of the Punjab. During the next 24 hours the depression travelled in a south-easterly direction to Bundelkhand and the adjacent districts, and a secondary depression was formed in the North-West Punjab, where pressure was nearly a tenth of an inch in defect. Practically no rain, however, had fallen, the only shower exceeding a tenth of an inch being one of ·25 inch at Quetta, where a brisk fall of barometer had taken place and weather continued unsettled and showery. The primary depression was almost stationary during the 31st December, and had advanced only slightly eastwards by the morning of the 1st January. Light to moderate rain and snow had been received in the Upper India hill districts and in the North-Western Provinces. Chakrata reported a fall of 1·13 inches and Cawnpore ·87 inch. By next morning the secondary depression in the Punjab had filled up and the primary depression had advanced in a south-easterly direction and was shown covering Orissa and the head of the Bay, where pressure was in moderate defect. Light rain and snow had fallen in the Upper India hill districts, and the North-Western Provinces and Quetta reported a light fall of snow. Pressure then rose over the whole of the Indian area, and the depression at the head of the Bay filled up without giving any more rain. Skies were lightly to heavily clouded in North-Western India on the last two days of the week, and a few showers were received in the North-Western Provinces, but the showers were in all cases light, and fine weather prevailed generally on Friday and Saturday over the whole country. On Saturday morning, however, temperature commenced to rise in Baluchistan and cloud to increase, which with a falling barometer indicated the probable approach of another depression from the west.

Daily Summary.—*Sunday.*—Pressure had risen briskly in Baluchistan, the West Punjab and Sind, and fallen briskly in Rajputana and the North-Western and Central Provinces. The depression entering North-Western India the day before had advanced to South-East Rajputana and had given a few light showers in Baluchistan and the hill and submontane districts of the Punjab. Strong winds were reported from Cherat and Murree.

Monday.—The depression had travelled in a south-easterly direction to Bundelkhand and the adjacent districts of the Central Provinces where the barometer had fallen briskly. The barometer had fallen rapidly in the North-West Punjab and a secondary depression had formed in the Central Punjab, but practically no rain had fallen anywhere except at Quetta where a fall of ·25 inch was recorded. Cloud had increased in Baluchistan and the barometer had fallen briskly at Quetta.

Tuesday.—Pressure had risen slightly in the Punjab and Rajputana and the secondary depression had commenced to fill up. The primary depression had moved slightly eastwards and was central to the east of Sutna. Strong northerly winds were blowing at Cherat and winds had increased in strength slightly at Chaman. Light to moderate rain had fallen in the Upper India hill districts, the North-Western Provinces and Rajputana. Chakrata received 1·13 inches and Cawnpore ·87 inch.

Wednesday.—The barometer had risen briskly to rapidly in the Punjab, Rajputana, the North-Western Provinces and Bundelkhand, and the primary depression had advanced in a south-easterly direction to Orissa and the head of the Bay, where pressure was in moderate defect and winds were irregularly cyclonic in direction. The secondary depression had filled up completely. The Upper India hill districts and the North-Western Provinces had received light rain and snow.

Thursday.—Pressure had risen everywhere and the depression covering the head of the Bay had filled up. Strong winds continued at Cherat and easterly winds were blowing at Chaman. Quetta had received a light fall of snow, but skies were clearing in Baluchistan and conditions were more settled than they had been for some days past. Sibsagar and Colombo reported light showers of rain.

Friday.—The barometer was steady or had risen over the whole of the Indian area, the rise being brisk in the submontane districts of the Punjab, Berar and the Central Provinces. Gradients were unusually steep in the Bay and winds had increased at Diamond Island and on the Madras Coast. Skies were clear or only lightly clouded in Baluchistan and the North-West Punjab, but were heavily clouded over the remainder of North-Western India, where weather conditions were slightly unsettled. Lucknow reported a light shower of rain.

Saturday.—Pressure had fallen briskly in West Baluchistan, where both temperature and cloud had increased, and also in Bihar and parts of Bengal. It was steady or had fallen slightly elsewhere. Strong winds were reported from Cherat and Murree. A few light showers of rain had fallen in the North-Western Provinces, the heaviest fall being ·19 inch at Lucknow.

Temperature.—From the 1st January to the end of the week both day and night temperatures were in moderate to considerable excess in the Central Provinces, the mean temperature ranging from 2°·8 to 3°·6 above the normal. A cool wave following the depression which travelled across Northern India during the week, entered North-Western India on the 1st, and temperature fell rapidly in the Punjab, Sind and Rajputana. It caused a rapid fall of temperature next day in Central India and the North-Western Provinces, and a slight fall in Bengal on the 4th.

The following table gives the variations of the mean temperature from the normal on each day of the week for the different provinces of India :—

Province.	December 1894.		January 1895.					Mean variation of week.
	30th.	31st.	1st.	2nd.	3rd.	4th.	5th.	
	°	°	°	°	°	°	°	°
Burma	—1·7	—0·1	+0·2	+1·1	+0·6	—0·2	+0·9	+0·1
Bengal and Assam	—1·3	—0·5	0	+1·3	+2·2	+1·5	+0·6	+0·5
North-Western Provinces and Oudh	—0·1	+2·1	+3·6	—2·1	—0·7	+1·1	+0·5	+0·6
Punjab	—0·2	+1·1	—1·1	—2·0	—3·0	—0·5	—1·6	—1·0
Bombay	—0·3	—0·7	+0·3	—0·3	—0·3	+0·3	+0·5	—0·1
Central Provinces and Berar	—0·7	+1·0	+3·3	+2·8	+2·8	+3·6	+2·8	+2·2
Central India and Gujarat	+2·6	+2·7	+1·7	—2·0	—0·2	+1·5	+2·8	+1·3
Sind and Rajputana	+1·3	+1·0	—2·5	—1·1	—1·2	—0·3	—2·4	—0·7
Madras	—1·5	—1·6	—1·1	—0·3	+0·2	+0·8	+0·3	—0·5
	°	°	°	°	°	°	°	°
Mean for whole of India	—0·2	+0·6	+0·5	—0·3	0	+0·9	+0·5	+0·3

The mean temperature of the week was approximately normal in most provinces. It was 2°·2 in excess in the Central Provinces and 1°·3 in Central India and 1° in defect in the Punjab. For the whole of India the average mean daily temperature was nearly normal throughout the week, the largest variation from the normal occurring on the 4th when it was +0°·9.

Rainfall.—Rain has fallen only in the provinces affected by the depression which crossed Northern India during the week. No rain has fallen in Southern India. Rainfall was heaviest in the Punjab hill districts and in Oudh, where it averaged between half and three quarters of an inch. The largest amount received at any station during the week was 2·1 inches at Kanauj in the Farakhabad district.

Rainfall in excess of the normal fall of the week was received in the majority of the districts of the North-Western Provinces, Oudh, the Central and hill districts of the Punjab, Sind, Rajputana and Central India.

A new rainfall period commences with this week.

Province.	Division.	Rainfall data for week ending 5th January, 1895.			Rainfall data from 30th December to 5th January, 1895.		
		Average actual rainfall of Division.	Average normal rainfall of Division.	Excess or defect in inches.	Average actual rainfall of season to date.	Average normal rainfall, 30th December to 5th January.	Excess or defect of (seasonal) rainfall expressed as a per-centage.

W. A. BION,
Actg. Asst. Meteorological Reporter to the Government of India.

SIMLA, *10th January 1895.*

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 12th January.*—No rain except slight scattered showers in the southern districts. The water-supply is insufficient for irrigation in most districts. Agricultural operations continue. The standing crops are fair, but greatly need rain. The harvest continues with fair outturn. Pasture and fodder are generally sufficient. Prices are falling in parts of the Circars, Kurnool, Nellore, Cuddapah, and Madura; elsewhere prices are generally steady.

Bombay.—*For week ending 16th January.*—Slight rain in Sind and Ahmednagar. The standing crops have been damaged by blight in parts of Bijapur and Dharwar and are suffering for want of rain in parts of Poona, Ahmednagar, Sholapur, and Belgaum. Sowing of the late crops continues in two, and reaping of the early crops in four, districts. The fodder-supply is sufficient. Agricultural stock in good condition. Prices are low in Ahmednagar and Sholapur; otherwise prices are normal.

Bengal.—*For week ending 14th January.*—There was no rain during the week. The general prospects of the crops are satisfactory. The harvesting of winter rice is nearly finished, and the outturn is generally good. The condition of the cold-weather crops continues generally satisfactory. Poppy is also a promising crop, but is somewhat backward. Prices of common rice continue generally normal.

North-Western Provinces and Oudh.—*For week ending 16th January.*—Weather generally cloudy with rain in nearly all districts. In some districts the rain has been beneficial, but in others the crops are being damaged by excessive moisture; bright sunshine is now needed. Hailstorm reported from Agra, causing injury to the crops in some villages. Prospects are however fair. Fodder and supplies are sufficient. Prices are fluctuating.

Punjab.—*For week ending 16th January.*—Rain has fallen in all districts except Sialkot and Peshawar. Harvesting of the autumn crops is finished. Pressing of sugarcane and irrigation of spring crops in progress. The condition of the standing crops is generally reported to be good to average. The recent rain has improved prospects save in Delhi where hail and heavy rains have done some damage. Sunny weather is also needed at Umballa for the development of the crops. The crops are being injured by field rats in parts of the Lahore and Ferozepore districts. Cattle are generally reported to be in good condition, and fodder is sufficient throughout the province. Prices are high in Delhi, and are rising in Lahore and Umballa; elsewhere prices are low.

Central Provinces.—*For week ending 16th January.*—Weather cloudy with slight falls of rain in seven districts. The damage caused to the linseed crops by rust is extending and a poor outturn is estimated. The wheat crop in one of the tahsils of the Hoshangabad District has been slightly attacked by rust; otherwise prospects continue generally favourable.

Burma.—*For week ending 12th January.*—No rain. Threshing of the main paddy crop has commenced in Lower Burma; rather less than a 14-anna crop is expected. In Upper Burma reaping of the wet-weather crop is nearly completed and cultivation of the dry-weather crops continues. Crop prospects are good except in Thayetmyo and parts of Minbu and Magwe. Fodder and water are sufficient. In Lower Burma the price of paddy is generally above normal, but is falling in the Tenasserim division; in Upper Burma the price is generally below normal.

Assam.—*For week ending 15th January.*—Weather seasonable. Reaping of the late rice continues. The condition of cattle is fair. Fodder and water are sufficient.

Mysore and Coorg.—*For week ending 16th January.*—MYSORE: The standing crops are in good condition. Harvesting of *ragi* (*Eleusine coracana*) continues in six districts. Prices have slightly risen in Kolar.

COORG: Rainfall slight. Reaping of rice and picking of coffee nearly completed. Fodder and water for cattle are sufficient. Prices of food-grains normal.

Berar and Hyderabad.—*For week ending 16th January.*—BERAR: Weather cool and occasionally cloudy. The winter crops are in good condition, except linseed which has been damaged through blight in parts of two districts. Threshing of *juar* (*Sorghum vulgare*) is in progress and cotton-picking continues. Fodder and water are ample. Prices have risen in one district, but are steady elsewhere.

HYDERABAD: No rain during the week. Harvesting of the autumn crops almost completed. Land is being ploughed for the hot-weather crops. Prices are normal.

Central India.—*For week ending 16th January.*—Rain fell during the week in five Agencies. Agricultural operations have been stopped by rain in Goona, completed in Bhopal, and in progress elsewhere. The standing crops are in fairly good condition though slightly damaged by rain, hail, and blight. The condition of agricultural stock is good except in parts of Bhopal and Bewani. Prices of food-grains are above normal in three Agencies, rising in parts of Gwalior, low in Dhar, and normal elsewhere. Opium has been partly damaged by rain in Goona, but the crop is good elsewhere.

Rajputana.—*For week ending 16th January.*—Rainfall good in Jhallawar, Harowtee, Karowli, Dholepore, Bhurtpore, Jeypore, and Ulwar; slight rain elsewhere. Agricultural operations are satisfactory. The standing crops prospects and agricultural stock are generally good, but some damage has been caused to the crops in Jhallawar, Kotah, Kerowlee, and Ulwar by rain and hail. Fodder is sufficient, and is improving in Dholepore. Prices have risen in four States, below average in one, and normal elsewhere.

Kashmir.—KASHMIR VALLEY.—*For week ending 15th January.*—Rain has fallen in the Mozaffarabad district. Heavy snow fell in Kashmir proper and Gilgit. The weather is now fine. Prices are falling.

JAMMU PROVINCE.—*For week ending 16th January.*—Report not received.

Nepal.—*For week ending 12th January.*—Weather fine, with high winds. Wheat is germinating.

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

FINANCE AND COMMERCE DEPARTMENT
(*Statistical Branch*)
Calcutta, 19th January 1895.

STEPHEN JACOB,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the week ending at 8 a.m. on Saturday, January 12th, 1895.

General Summary.—Unsettled and showery weather has prevailed during the greater part of the week in North-Western India, especially in the hill and submontane districts of the Punjab and North-Western Provinces. A depression crossed the North-Western Frontier on Sunday and had advanced as far as Jeypore by Monday morning. During the next 24 hours it travelled in a south-easterly direction and was central in Bundelkhand next day. Another disturbance, but of a very feeble and ill-defined character, was transferred across the frontier from Baluchistan, and by Wednesday morning had advanced as far as Rajputana, while its predecessor was practically stationary near Nowgong. Both disturbances, either directly or through the secondary depressions they gave rise to in the Punjab, gave light to moderately heavy rain and snow in the Upper India hill districts, the Punjab, Rajputana and the North-Western Provinces. No rain, however, was given by either of them east of the North-Western Provinces, except a few light showers in Bihar, and thus the rainfall of the week has been confined mainly to North-Western India. A few showers were received in Southern India, but they were in all cases light, the largest amount received during the whole week at any station in the south of the Peninsula being only ·57 inch at Ambasamudram in the Tinnevelly district.

The temperature conditions of the week have been marked by excessive night temperatures in Northern India, due to the unusual amount of cloud present, while day temperatures in North-Western India were in general defect. The mean temperature for the whole of India for the week was 1°·6 in excess of the normal.

Daily Summary.—*Sunday.*—The barometer had fallen rapidly in Baluchistan and the North-Western Frontier districts, and had fallen slightly to briskly elsewhere. Pressure was in large defect in Baluchistan, and in considerable defect in Sind and Guzarat. A depression was passing through Baluchistan, where light rain and snow had fallen.

Monday.—Pressure had risen briskly to rapidly in Baluchistan and had fallen slightly to briskly in Rajputana and Bundelkhand. The depression had crossed the frontier and was central near Jeypore. Temperature had fallen very rapidly in Baluchistan, and had risen rapidly in Rajputana and the North-Western Provinces. Light to moderate rain and snow had fallen in Baluchistan and the Punjab, the more important falls being Chaman ·74 inch, Quetta ·67 inch, Murree ·7 inch, and Sialkot ·55 inch. Colombo received ·9 inch.

Tuesday.—The barometer had risen slightly to briskly in Baluchistan and North-Western India and fallen slightly in Bundelkhand and the adjacent districts. It was steady elsewhere. The depression was shown central near Nowgong, and a secondary depression had formed in the Punjab, but had nearly filled up again after giving light to moderately heavy rain and snow to the Upper India hill districts and the submontane districts of the Punjab. Light to moderate rain had also been received in the eastern districts of the Punjab and the adjacent districts of the North-Western Provinces. Chakrata, Murree, and Srinagar had each received over an inch.

Wednesday.—Pressure had given way briskly to rapidly in Baluchistan and North-Western India and slightly to briskly in North-Eastern India and Upper Burma. The primary depression was in practically the same position, but the secondary depression had intensified considerably owing to another disturbance which had crossed the frontier and was central in Rajputana. Rain and snow had continued in the same area as on the previous day. Delhi reported a fall of ·85 inch, Bickaneer ·55 inch, Sialkot ·61 inch, and Srinagar ·6 inch.

Thursday.—The barometer was steady in Baluchistan, Bengal, and Burma, had risen slightly to briskly in North-Western India, and had fallen slightly in the south of the Peninsula. The secondary depression in the Punjab had filled up, and the primary depression had advanced in an easterly direction and was shown covering the head of the Bay, but it was very faintly indicated and was no longer of any importance. The disturbance in Rajputana the day before had apparently advanced eastwards, but it was not clearly marked. Light to moderately heavy rain and snow had fallen in the Upper India hill districts, the submontane and eastern districts of the Punjab, and in the North-Western Provinces. Meerut received 1·51 inches, Dehra Dun 1·37 inches, Delhi 1·28 inches, Mussooree 1·2 inches, and Roorkee and Chakrata each 1·09 inches.

Friday.—Pressure had fallen everywhere with the exception of Baluchistan, Sind, Guzarat, Rajputana and the south of the Peninsula, where it had risen slightly to briskly. The fall was largest in the North-West Punjab, where an area of low pressure was shown, and pressure was in moderate defect. The disturbance in Rajputana on Wednesday was more clearly marked apparently being central in Bundelkhand. Light to heavy snow had been received in the Upper India hill districts, and light to moderate rain in the North-Western Provinces and the submontane districts of the Punjab. Srinagar reported a fall of 1·75 inches, Sialkot ·72 inch, and Murree ·68 inch.

Saturday.—The barometer had risen briskly to rapidly in Baluchistan and North-Western India, and the depression in the Punjab had filled up. Pressure had fallen slightly in North-Eastern India and Burma, and the disturbance in Bundelkhand the day before had advanced into Bengal. Rain and snow had fallen in the Upper India hill districts and the North-Western Provinces, Srinagar receiving 1·35 inches, Mainpuri ·56 inch, and Murree ·5 inch.

Temperature.—The unsettled and cloudy weather prevailing during the week was the cause of unusually high night temperatures over the greater part of Northern India. Day temperatures were, on the other hand, in general defect in the Punjab, Sind and Rajputana, the deficiency on the 8th averaging 10° in the Punjab.

The following table gives the variations from the normal temperature of the different provinces of India for each day of the week:—

Province.	6th.	7th.	8th.	9th.	10th.	11th.	12th.	Mean variation of week.
	°	°	°	°	°	°	°	°
Burma	+0·2	+0·7	+0·7	+0·3	+0·1	+0·4	+1·0	+0·5
Bengal and Assam	+0·8	+1·3	+1·6	+1·8	+2·5	+3·4	+4·9	+2·3
North-Western Provinces and Oudh	+1·4	+4·2	+4·1	+4·5	+1·7	+5·6	+5·0	+3·8
Punjab	+1·5	+2·0	—1·6	+0·9	0	—0·6	—3·6	—0·2
Bombay	—0·3	+0·7	+1·7	+1·6	+0·1	+0·2	+0·3	+0·6
Central Provinces and Berar	+1·7	+1·4	+2·9	+3·6	+3·6	+3·4	+4·1	+3·0
Central India and Guzarat	+2·1	+3·1	+3·7	+5·1	+1·5	+1·6	+1·6	+2·7
Sind and Rajputana	+0·3	+2·7	+3·1	+1·6	0	—1·7	—3·2	+0·4
Madras	+1·0	+1·2	+0·9	+0·8	+1·3	+1·2	+1·3	+1·1
	°	°	°	°	°	°	°	°
Mean for whole of India	+1·0	+1·9	+1·9	+2·2	+1·5	+1·5	+1·3	+1·6

The mean temperature of the week was either practically normal or in excess in all provinces. The excess was largest in the North-Western Provinces, where it averaged 3°·8. It averaged 3° in the Central Provinces, 2°·7 in Central India, and 2°·3 in Bengal.

The average mean temperature for the whole of India was in excess of the normal on every day of the week, the excess ranging from 1° on the 6th to 2°·2 on the 9th. For the whole week it was 1°·6 above the normal.

Rainfall.—Twenty-four of the fifty-two rainfall divisions have received rain during the week. In the Punjab hill districts the average rainfall of the division amounted to 2·38 inches. In four other divisions it exceeded 1 inch, but in ten divisions it did not exceed a tenth of an inch. The only provinces in which rainfall averaged over half an inch were the Punjab and the central and western districts of the North-Western Provinces.

The stations that have recorded the largest amount of rain during the week are Murree (7·4 inches) and Dharmsala (4·38 inches).

The rainfall of the period 30th December to the 12th January was in excess of the normal in Oudh, the central and western districts of the North-Western Provinces, the Punjab, Central India, Rajputana and Khandesh. It was normal or in defect over the remainder of India.

Province.	Division.	Rainfall data for week ending 12th January, 1895. Average actual rainfall of Division.	Average normal rainfall of Division.	Excess or defect in inches.	Rainfall data from 30th December, 1894, to 12th January, 1895. Average actual rainfall of season to date.	Average normal rainfall, 30th December to 12th January.	Excess or defect of (seasonal) rainfall expressed as a percentage.

W. A. BION,
Actg. Asst. Meteorological Reporter to the Government of India.

SIMLA, *the 17th January, 1895.*

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 19th January.*—No rain except a few scattered showers in parts of Madura and Tinnevelly. The water-supply continues insufficient for irrigation in many districts. Agricultural operations are progressing. The standing crops are fair, but greatly need rain. The harvest continues with fair outturn. Pasture and fodder are generally sufficient. Prices are falling generally.

Bombay.—*For week ending 23rd January.*—Slight rain has fallen in parts of Sind and Khandesh. The standing crops have been damaged by frost in parts of Sind, by blight in parts of Karachi, Shikarpur, Satara, Bijapur, and Dharwar, and are suffering for want of rain in parts of Poona, Ahmednagar, and Sholapur. The sowing of late crops continues in two, and reaping of early crops in four districts. The reaping of late crops and preparations for next season are in progress in Ahmednagar and Sholapur. The fodder-supply is sufficient and agricultural stock in good condition. Prices are normal except in Ahmednagar and Sholapur.

Bengal.—*For week ending 21st January.*—There was general rain in Bihar, and light local showers are also reported from some districts of Bengal. The harvest of winter rice is nearly finished, and has yielded a good outturn for the whole province. The cultivation of spring rice is in progress. The spring and poppy crops are generally reported to be doing well, and to have benefitted, especially in Bihar, from the rainfall. Cattle are in good condition. The price of common rice is generally steady, but shows a fall in some districts.

North-Western Provinces and Oudh.—*For week ending 23rd January.*—The weather is cloudy and cold with showers in almost all reporting districts and a somewhat heavy fall in Saharanpur. In some districts crops have been slightly injured by excessive moisture, while in others damage is apprehended if rain and cloudy weather continue. Clear weather and sunshine are now needed. Prospects are, however, generally favourable, supplies and fodder ample, and prices fairly steady.

Punjab.—*For week ending 23rd January.*—Rain has fallen in the Hissar, Delhi, Umballa, Lahore, and Dera Ismail Khan districts. Pressing of sugarcane and irrigation of spring crops still continue. The condition of standing crops is generally reported to be good to average. Rain is wanted at Dehra Ismail Khan and clear weather at Umballa. Field rats are injuring the crops in parts of the Lahore and Ferozepore districts. Cattle are generally reported to be in good condition, and pasturage and fodder are sufficient throughout the province. Prices high at Jullundur, normal at Delhi, stationary at Umballa, below normal at Sialkot, and low elsewhere.

Central Provinces.—*For week ending 23rd January.*—The weather is cold and occasionally cloudy. There have been slight falls of rain in two districts. Hail storms are reported in the north of the Damoh district. Prospects of winter crops, except linseed, are generally promising. Prices remain steady.

Burma.—*For week ending 19th January.*—No rain. Threshing of paddy continues in Lower Burma and prospects are fairly good. In Upper Burma threshing has begun and cultivation of the dry-weather crops continues. Prospects are good except in the southern portion of the Central zone. In Lower Burma

the price of paddy is above normal with a tendency to rise, but in Upper Burma prices are unsteady and below normal. Fodder and water are sufficient.

Assam.—*For week ending 22nd January.*—Weather seasonable. Harvesting of the winter paddy crop is nearly finished. The condition of cattle is fair. Fodder and water are sufficient.

Mysore and Coorg.—*For week ending 23rd January.*—MYSORE: Crops and prospects are good. Harvesting of *ragi* (*Eleusine coracana*) continues in four districts. Prices have slightly fallen in the Bangalore, Kolar and Mysore districts.

COORG: The reaping of rice and picking of coffee has been completed. Fodder and water for cattle are sufficient. In some parts the prices of food-grains are normal.

Berar and Hyderabad.—*For week ending 23rd January.*—BERAR: Weather cool with moderate rainfall during the week. The winter crops are in fair condition, except gram which has been somewhat damaged by insects, and linseed through blight. Fodder and water are sufficient. Prices are fluctuating in the Wun district but are otherwise steady.

HYDERABAD: No rain during the week. Harvesting of the autumn crops very nearly completed. Land is being ploughed for the hot-weather crops. Prices are normal.

Central India.—*For week ending 23rd January.*—Rain fell during the week in four Agencies. Agricultural operations have been completed in Bhopal and are in progress elsewhere. Standing crops are in fairly good condition though slightly damaged by rain, hail, blight and insects in some Agencies. The condition of agricultural stock is indifferent in parts of Gwalior and Bhopawar, but good elsewhere. Pasturage in good condition except in parts of Bhopawar. Prices of food-grains are above normal in three Agencies, rising in parts of Gwalior, low in Dhar, and normal elsewhere. Opium has been partly damaged by rain in Goona, the crop is indifferent in the Neemuch district, but good elsewhere.

Rajputana.—*For week ending 23rd January.*—Rainfall good in Bickaneer, and slight in six States. Agricultural operations are satisfactory. Standing crops and harvest prospects are good. Cattle are generally in good condition. Fodder is sufficient but failing in Dholepore. Prices have risen in three States, are fluctuating in one, and normal elsewhere.

Kashmir.—KASHMIR VALLEY.—*For week ending 22nd January.*—Weather cloudy. Snow has fallen. Prices falling.

JAMMU PROVINCE.—*For week ending 17th January.*—Heavy rain has fallen accompanied with hailstones. The crops are in good condition, but prices are rising rapidly. Fodder is scanty.

For week ending 23rd January.—Heavy rain continues, and weather is still cloudy. Crops are in good condition and prices high. Fodder is scanty.

Nepal.—*For week ending 19th January.*—Slight rain during the week, but the weather is again fine, and prospects of crops are fair.

DENZIL IBBETSON,

Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

STATISTICS.

IMPORTS OF COTTON, WHEAT, LINSEED, AND INDIGO.

Statement showing in maunds the imports of Cotton, Wheat, Linseed, and Indigo by rail and river into Calcutta, Bombay Town, and Karachi, during the month of November 1894, and from 1st January to 30th November 1894, compared with the corresponding periods of the years 1892 and 1893

Articles, and whence exported.	Total of month.									Total from January 1st, including total of month.									Articles, and whence exported.

General Matters.

REVIEWING THE ADMINISTRATION REPORT OF THE POST OFFICE OF INDIA FOR 1893-94.

No. 527 S. R., dated Calcutta, the 30th January 1895.

RESOLUTION.—By the Government of India, Finance and Commerce Department.

READ—

Report on the Post Office of India for the year 1893-94.

RESOLUTION.—The continuous and steady progress evinced in previous years in the operations of the Post Office was maintained in the year under review, the transactions in the several branches of business showing a satisfactory increase. The noticeable events in the working of the Inland Post were—

(1) The abolition of the separate postal circle of Oudh, and its amalgamation with the North-Western Provinces circle.

(2) The general introduction of a system of movable hour plates for letter-boxes in towns, and day plates for those in the interior, the system affording a real check on the regular and punctual clearance of letter-boxes.

(3) The extension to all the districts of the Central Provinces of the system of remitting revenue and rent through the Post Office.

(4) The extension to several other provinces of the arrangement experimentally introduced in Bengal, Assam, and Burma for the sale of Government quinine to the poorer classes through the agency of the Post Office.

2. The principal events under "Foreign Post" were—

(1) The introduction of a telegraphic money order exchange with Ceylon, and of an ordinary money order exchange with the German Protectorate in East Africa, and the arrangement of a direct money order exchange with New Zealand which did not come into operation, however, until after the close of the year.

(2) The conclusion of arrangements for the transmission of postal parcels to and from Italy, Persia, the British East Africa Company's territory, and the German Protectorate in East Africa.

(3) The extension of the parcel exchange with Gibraltar to Tangiers, and the addition of Mashonaland to the list of countries to which parcels can be sent through the United Kingdom.

(4) The removal of the restriction which previously existed against the insurance of parcels containing money transmitted by post to and from the United Kingdom.

(5) The inclusion of Cape Colony, the Orange Free State, Bechuanaland and Ascension in the list of countries outside the Postal Union, to which post-cards can be sent.

3. The transactions of the Imperial Post Office in the year under review, compared with those of the previous year, are briefly summarised below:—

		1892-93.	1893-94.	Increase or decrease per cent.
Number of post offices		8,832	8,978	1·65
„ letter-boxes		13,292	13,875	4·38
„ letters and post-cards issued for delivery		311,014,049	326,862,219	5·09
„ newspapers	„ „	26,637,963	26,363,793	—1·02
„ parcels	„ „	2,169,715	2,339,416	7·82
„ packets	„ „	12,149,494	14,702,537	21·01
„ letters and parcels insured		263,811	285,038	8·04
„ inland money orders issued		8,237,855	8,754,940	6·27
Value of „ „ „		₹17,19,16,585	18,35,34,008	6·75
Commission realised on „ „		₹ 21,58,398	22,95,946	6·37
Number of telegraphic „ „		107,401	115,528	7·56
Value of „ „ „		₹ 1,16,01,119	1,24,72,233	7·51
Commission realised on „ „		₹ 1,21,637	1,33,998	10·16
Number of foreign money orders issued by India		43,490	52,944	21·73
Value of „ „ „		£ 143,738	186,569	29·79
Number of foreign money orders paid in India		21,599	23,171	7·27
Value of „ „ „		£ 113 718	121,842	7·14
Mileage of Mail lines.				
Railways		17,540	18,099	3·18
Mail carts		4,630	4,859	4·49
Runners and boats		45,732	44,805	—2·02
Steamers		12,550	12,603	0·42

4. With the single exception of newspapers which show a decrease of 1·02 per cent., the transactions of the year show an increase under each head, the largest increase being in the number of packets issued for delivery, and in the number and value of foreign money orders issued by India. The total estimated number of postal articles of all kinds (excluding money orders) issued for delivery was upwards of 370 millions, against nearly 352 millions in the previous year. The increase in the year thus amounted to about 18¼ millions, of which 11⅛ millions or 62 per cent. was on account of post-cards, the popularity of which continues undiminished. The balance (6¾ millions) consisted of increases of 3¾ millions under ordinary letters, 2¼ millions under newspapers and packets and upwards of half a million under registered letters. The value-payable system shows a remarkable development, the number of articles sent under it having risen regularly and rapidly from year to year: the number was only 7,408 in 1878-79 (the first full year of the working of the system), 287,377 in 1883-84, 999,731 in 1888-89, and 1,596,952 in 1893-94, the highest now on record. The declared value of value-payable articles in the last year was ₹1,76,14,628 against ₹1,51,64,846 in 1892-93, the commission realised thereon during the two years being ₹3,19,561 and ₹2,77,845, respectively. As a result of the reduction of foreign postage, correspondence with the United Kingdom, as well as with foreign countries, increased to a considerable extent, the increase being exceptionally large under "newspapers, book packets, and samples."

5. Of the total number of articles (including money orders) received for delivery, *viz.*, upwards of 371 millions, the number actually delivered was nearly 368 millions, or 99·12 per cent. as compared with 99·09 per cent. in the preceding year. The remainder were sent for disposal to the Dead Letter Offices, and the number ultimately found not to be disposable either by delivery to the addressees or by return to the senders amounted to only ·2 per cent. of the total number given out for delivery.

6. The steady increase in the money order business noticed in the review of the report for 1892-93 was maintained in the year under review; the entire transactions under this head during the last two years being as follows:—

	1892-93.	1893-94.	Increase per cent.
Number of inland, Native State, and foreign money orders issued	8,325,457	8,853,225	6·33
Value of „ „ „	₹17,57,24,054	18,80,21,454	6·99
Commission realised on „ „ „	₹ 21,94,419	23,37,323	6·51
Number of inland, Native State, and foreign money orders paid	8,365,203	8,892,976	6·30
Value of „ „ „	₹17,75,28,369	18,95,16,965	6·75

There was thus an increase of more than 6 per cent. under each head. The number and value of inland money orders issued increased by 6·27 and 6·75 per cent., respectively, and the average value of an inland money order was ₹20-15-5 against ₹20-13-10 in 1892-93. The revenue money order system continued to make steady progress in the North-Western Provinces and Oudh, the Lower Provinces of Bengal, the Punjab, and the Central Provinces, but was discontinued in Madras as unnecessary for that Presidency, the people being able to pay their revenue through other means. There was also an increase in the number and value of rent money orders.

7. The operations of the Post Office Savings Banks increased generally. The following is a summary of the transactions during the year as compared with the previous year:—

	1892-93.	1893-94.
Number of banks	6,408	6,358
„ accounts at the close of the year	520,967	574,050
Amount of deposits during the year	₹414,52,425	4,40,72,754
„ withdrawals during the year	₹3,65,51,950	4,25,38,122
„ balance at the close of the year	₹7,81,87,727	8,26,57,319
Average balance of each account	₹ 150·08	143·98

There was a decrease of 50 banks due to the withdrawal of Savings Bank powers from certain small branch post offices at which the transactions were nominal. Otherwise there was no reduction in the normal rate of increase in the number of accounts, notwithstanding the fact that the public were informed beforehand that the rate of interest would be reduced from 1st April 1894 from ₹3¾ to ₹3½ per cent.

8. The insurance business during the year developed considerably, the number and value of insured articles having exceeded the number and value in

the preceding year by 8·04 and 9·62 per cent., respectively. The increase occurred under insured parcels, the number and declared value of insured letters having fallen off slightly, as shown in the following figures :—

	Number.		Value.		Average value of each.	
	1892-93.	1893-94.	1892-93.	1893-94.	1892-93.	1893-94.
			R	R	R	R
Letters . .	89,845	89,332	2,36,54,593	2,31,75,043	263	259
Parcels . .	173,966	195,706	4,94,06,117	5,69,14,359	284	290
TOTAL .	263,811	285,038	7,30,60,710	8,00,89,402	276	280

The amount of insurance fees realised was R2,10,714 against R1,93,250 in 1892-93.

9. The number of complaints made by the public against the Post Office was 9,448, being more than the number in the previous year by 777 or 8·96 per cent. This increase was to be expected in proportion to the increase in postal transactions generally. On investigation it was found that the complaints were well-founded in only 37 per cent. of the total number.

10. As observed in the review of the report for 1892-93, the changes introduced from October 1892 in the system of receiving salt revenue through the Post Office have considerably reduced the transactions on this account, the number of indents received by the Post Office being 479 only for 78,843½ maunds of salt, and the amount of salt revenue received being R2,19,539 against 49 lakhs in the previous year. The Government of India will await the result of the consideration which the Director General is giving to the question whether the system should be discontinued or measures taken to stimulate it.

11. The financial results of the working of the Post Office during the last three years were as follows :—

	1891-92.	1892-93.	1893-94.
	R	R	R
Revenue . . .	1,44,59,253	1,48,88,627	1,55,75,971
Expenditure . .	1,49,64,174	1,51,85,555	1,55,82,814
+surplus or—deficit .	—5,04,921	—2,96,928	—6,843

Making the same adjustments as in previous years, the results are :—

	1891-92.	1892-93.	1893-94.
	R	R	R
Surplus or deficit according to Appendix XI to the Report .	—5,04 921	—2,96,928	—6,843
Add—Indirect expenditure .	—6,40,718	—6,07,041	—6,72,311
TOTAL .	—11,45,639	—9,03,969	—6,79,154
Deduct—District Post charges (excluding charges in British Baluchistan) . . .	11,42,554	11,54,907	11,97,134
Resulting surplus or deficit .	—3,085	+2,50,938	+5,17,980

12. The Department was administered for the greater part of the year by Mr. Fanshawe, and from November 1893 to the end of the year by Mr. Kisch. Both these officers have earned the commendation of the Government of India for their able administration of the Department. The Governor General in Council is also glad to notice the names of the officers favourably mentioned in paragraph 63 of the Report.

ORDERED, that a copy of the Resolution be forwarded to the Director General of the Post Office of India, and that the Report and the Resolution be published in the *Gazette of India*.

STEPHEN JACOB,
Offg. Secretary to the Government of India.

ANNUAL REPORT

ON

THE POST OFFICE OF INDIA

FOR THE YEAR

1893-94.

No. 12—III, dated the 31st December 1894.

From—H. M. KISCH, Esq., *Officiating Director General of the Post Office of India,*

To—*The Secretary to the Government of India, Department of Finance and Commerce.*

I have the honour to submit the annual report on the Post Office of India for the official year 1893-94.

Charge of the Post Office.

2. The administration of the department was in the hands of Mr. A. U. Fanshawe from the 1st April to the 6th November 1893 and in my charge as officiating Director General for the remainder of the year.

Principal events—Inland post.

3. The principal administrative measures of the year in connection with the inland post were the abolition of the separate postal circle of Oudh and its amalgamation with the North-Western Provinces circle, the abolition of the irregular local post of the Kumaon division and its absorption into the district post administered by the Imperial Post Office, and the general introduction of a system of moveable hour-plates for town letter-boxes and day-plates for letter-boxes in the interior. This last measure, by far the most important of the year, will it is hoped afford a real check on the regular and punctual clearance of letter-boxes, the moveable plates being kept in responsible custody in the post office and given out and returned at prescribed times. In the interior, where letter-boxes are cleared by village postmen when making the village deliveries, the moveable day-plates will be a check on the visits of the postman and his deliveries as well as on the clearances of the letter-boxes. The special operations of the Post Office on behalf of other branches of the public service were materially extended. The system for the remittance of revenue and rent through the Post Office was extended to all the districts of the Central Provinces; arrangements were made for the extension to several other provinces of the scheme introduced in Bengal in 1892 for the sale of closed packets of quinine at post offices in the interior; sanction was given to the application to the Delhi district of the system for the payment of military pensioners through the Post Office, and to the further use of the Post Office in several provinces for the sale of court-fee and non-judicial stamps; and the number of telegraph offices worked by the Post Office was increased from 845 to 979. Although the Post Office was not required during the year to send any offices into the field with any expedition on active service, the special postal services and offices provided in the Kuram valley and for the military posts at Kajuri Kach and Jandula beyond the Gomal pass were main-

tained throughout the year, and a temporary line with camp offices was organised to accompany the 23rd Pioneers for its march and road operations from Abbotabad to Chilas through the Kagan valley and over the Babusar pass. Owing to the heavy rainfall and floods in the Punjab and Madras, the breaks in railway communication during the rains were unusually numerous in those provinces and in many cases temporary boat, cart, tonga, runner, and trolly lines had to be established at the shortest notice to maintain postal communication.

There were altogether 116,607 miles of mail lines and 10,387 post offices at the close of the year and the total number of postal articles dealt with was 370 millions. The general progress of the year in the main branches of Post Office business was an increase of 2,250 miles of permanent mail lines, 248 post offices, 297 money order offices, 635 letter-boxes, 18¼ millions of postal articles (excluding money orders), six lakhs of rupees in the sales of postage stamps, more than half a million money orders, and 53,000 Savings bank accounts.

Principal events—Foreign post.

4. The following were the principal events of the Foreign Post. A telegraphic money order exchange with Ceylon and an ordinary money order exchange with the German Protectorate in East Africa were introduced. Owing to the fluctuations of exchange, between India and countries retaining a silver monetary standard, which followed the passing of the Indian Coinage and Paper Currency Act of 1893, the money order business with Hong-Kong and the Straits Settlements was suspended at the request of the postal administrations of those colonies; and although the latter exchange was soon afterwards resumed, the former remained in abeyance until July 1894. Negotiations took place for a direct money order exchange with New Zealand, but the exchange did not actually come into operation until after the close of the year. Arrangements were made for the transmission by post of parcels to and from Italy, Persia, the British East Africa Company's territory, and the German Protectorate in East Africa; the parcel exchange with Gibraltar was extended to Tangier; Mashonaland was added to the list of countries to which parcels can be sent through the United Kingdom; and the limit of weight for postal parcels exchanged between India and Canada was raised from 7lbs. to 11lbs. The system under which parcels between India and the United Kingdom can be insured for the entire transit was completed by the removal of the restriction that previously existed against the insurance of parcels containing money. The list of countries outside the Postal Union to which post-cards can be sent was extended by the inclusion of Cape Colony, the Orange Free State, Bechuanaland, and Ascension.

Working of the P. and O. contract.

5. According to the terms of the contract with the Peninsular and Oriental Steam Navigation Company, the steamers with the European mails are due in Bombay at 8 A.M. on Monday of each week, and during the year under review they arrived on all occasions in advance of the contract time—in four instances on the previous Friday, in nineteen instances on the previous Saturday, and in twenty-three instances on the previous Sunday, while on six occasions there was an early Monday arrival. The average time occupied by the mail from London to Bombay was 15 days 6 hours and 31 minutes, against 16 days 11 hours and 35 minutes according to the terms of the contract. The average time in the opposite direction (from Bombay to London) was 15 days 8 hours and 28 minutes, the contract time for only the sea voyage from Bombay to Brindisi being 14 days 8 hours in the fair season and 16 days 8 hours in the monsoon. Twice during the year advantage was taken of the despatch of an extra passenger steamer from Bombay, *viâ* Marseilles, to send an additional mail to London. Only articles specially marked for transmission by these steamers were forwarded, and they amounted to 2,511 letters and papers in one case, and to 2,326 in the other.

Section I.—Post Offices, Letter-Boxes, Postmen and Village Postmen.

Post offices, letter-boxes, and rural delivery.

6. In Appendix I, the numbers of post offices, letter boxes, and village post-men of the Imperial Post in each circle on the 31st March 1894 are compared with the numbers at the close of the previous year; and in the marginal abstract will be found the figures of the past two years for the whole of India for both the Imperial and District Post, separately and together, with an entry also of the number of postmen as distinguished from village postmen whose beats do not admit of their returning daily to the post office. The total number of post offices has increased by 248, and of this number more than 63 per cent. belong to the class of offices entrusted to the charge of village school-masters and other persons who are not permanent servants of the department. Of the new offices, 99 were opened in the Punjab, and the increase of letter-boxes was also greatest in that circle.

	Imperial Post.		District Post.		Total.		
	Number at close of 1892-93.	Number at close of 1893-94.	Number at close of 1892-93.	Number at close of 1893-94.	Number at close of 1892-93.	Number at close of 1893-94.	Increase.
Post Offices	8,832	8,978	1,307	1,409	10,139	10,387	248
Postmen	9,051	9,184	129	132	9,180	9,316	136
Letter-Boxes (in addition to those at post offices).	13,292	13,875	2,595	2,647	15,887	16,522	635
Village Postmen	3,837	3,970	2,924	3,047	6,761	7,017	256

The following table shows for each circle and for the whole of India the number of post offices and letter-boxes compared with the area, total population, and literate population:—

Circle.	Area in square miles.	Population.	Literate population.	Post offices.	Letter-boxes (including those at post offices.)	1 Post office serves			1 Letter-box serves		
						Square miles.	Population.	Literate population.	Square miles.	Population.	Literate population.

Total	1,512,491	285,255,502	12,044,293	10,387	26,909	145	27,462	1,159	56	10,600	447

* Enumeration not taken under this head.

It will be seen that although there are 10,387 post offices and 26,909 letter-boxes there is only one post office for every 145 square miles and only a single letter-box for 56 square miles. Even Eastern Bengal, the circle most favoured with offices and letter-boxes, has only one post office for every 52 square miles and only one letter-box in 14 square miles, while in Burma there is only one office for 803 square miles and in Central India only one letter-box for 391 square miles. According to population, Sind, the Punjab, and Bombay are most favoured with post offices, and Bombay, Bengal, and Eastern Bengal the most favoured with letter-boxes, while the least fortunate circle in these respects is Central India with only one office for 81,895 persons and one

letter-box for every 51,853 persons, the averages for the whole of India being a post office for every 27,462 and a letter-box for every 10,600 of the population. Taking only the literate population into consideration letter-boxes and post offices may be said to be liberally provided, there being a letter-box for every 447 and a post office for every 1,159 persons who can read and write. In these respects the most favoured circles are Eastern Bengal and the Central Provinces, the former of which has a letter-box for every 297 of the literate population and the latter a post office for every 564 of its literate inhabitants.

Section II.—Postal Lines.

Postal communication.

7. Appendix II shows, according to postal circles, the distances over which mails are conveyed by the various agencies used by the post office on Imperial postal lines; and an abstract of that appendix is given on the margin with additional columns for District Post lines and political lines administered by the Imperial Post Office. Altogether there were 116,607 miles of mail lines, or an increase of 2,250 miles over the total of the previous year. The mileage was greater than in 1892-93 under each class of mail line, the increase being greatest, 1,119 miles, under runner and country boat lines. The increase of 559 miles of railway postal lines is mainly accounted for by the opening of two sections of the East Coast Railway, the completion of the Bangalore-Guntakul section of the Southern Mahratta Railway system and the Lucknow-Rae Bareli section of the Oudh and Rohilkand Railway, the opening of the Kuch Bihar, Bengal Duars, Pálanpur-Deesa, and Jetalsar-Rajkot Railways, and the completion of a further section of the Godhra-Rutlam Railway.

Nature of Lines.	1893-94.				Total mileage in 1892-93.	1893-94.

Section III.—Correspondence and Parcels.

Postal traffic.

8. The estimated number of postal articles of all kinds, exclusive of money orders, issued for delivery during the year, amounted to over 370 millions, or more than 18¼ millions in excess of the number in the preceding year. The increase has been 45·34 per cent. in the past seven years and 54·97 per cent. in the past eight years. Statistics showing the different classes of articles delivered in the various postal circles during 1893-94 will be found in Appendix III, and a summary is given in the statement below:—

Year.	Post-cards.	Letters paid.	Letters unpaid.	Letters registered.	Total of letters and post-cards.	Newspapers.	Book and pattern packets.	Parcels.	Grand Total (all postal articles except money orders).
	No.	No.	No.	No.	No.	No.	No.	No.	No.
1892-93 . .	119,802,516	158,555,165	26,202,595	6,453,773	311,014,049	26,637,963	12,149,494	2,169,715	351,971,221
1893-94 . .	131,218,154	161,844,129	26,667,602	7,132,334	326,862,219	26,363,793	14,702,537	2,339,416	370,267,965
Increase or Decrease . .	11,415,638	3,288,964	465,007	678,561	15,848,170	...	2,553,043	169,701	18,296,744
	...	...	...	...	...	274,170	...	...	...
Percentage of— Increase or Decrease . .	9·52	2·07	1·77	10·51	5·09	...	21·01	7·82	5·19
	...	...	...	...	...	1·02	...	...	...

It will be seen that, except as regards newspapers, there was an increase in the total number of articles under each head, and, as the rates of postage for newspapers other than privileged publications not exceeding 3 tolas in weight are the same as for book packets, it is not possible to distinguish clearly between newspapers and book packets passing through the post. Taking newspapers and packets together there was also an increase of 2,278,873 or 5·87 per cent. The percentage of increase in all articles (excluding money orders) taken together was highest in the Burma Circle where it was 10·77 per cent.; Assam comes next with an increase of 9·46 per cent., the Bombay Circle next with an increase of 8·98 per cent., and then the Punjab, Central India, and the Central Provinces. As in the preceding three years, the increase in the number of post-cards far exceeded the increase in any other class of postal article, more than 62 per cent. of the whole increase of 18¼ millions of articles being accounted for by an increase of 11½ millions in the number of post-cards. The other 6¾ millions of articles in excess of those in 1892-93 included increases of 3¾ millions of ordinary letters, 2¼ millions of newspapers and book and pattern packets, and more than half a million registered letters.

The following table prepared from the returns of the last census shows for each circle the number of letters and other postal articles per head of the total population and per head of those who can read and write. Bombay, Sind, Burma, and the Punjab rank highest and in that order as regards the number of articles per head of the population, and Sind, the Punjab, and Bombay rank highest and in that order as regards the number of articles per head of the literate population:—

Circle.	Total population.	Number who can read and write.	Total number of postal articles (excluding money orders).	Number of postal articles per head of population.	Number of postal articles per head of those who can read and write.
Bengal	40,879,787	1,993,584	54,380,203	1·33	27·27
Bombay	26,372,106	1,416,474	71,653,046	2·71	50·58
Madras	55,984,761	3,128,788	66,422,465	1·18	21·23
North-Western Provinces and Oudh	47,697,576	1,308,145	48,703,280	1·02	37·23
Punjab	25,13,0127	819,383	42,611,351	1·69	52·10
Assam	5,476,833	168,314	6,539,966	1·19	38·85
Bihar	23,578,585	712,383	15,078,697	·63	21·16
Burma	8,098,014	1,608,591	15,608,182	1·92	9·70
Central India . .	10,318,812	*	4,198,438	·40	
Central Provinces . .	15,842,296	345,761	15,387,096	·97	44·50
Eastern Bengal . .	10,082,923	427,814	12,870,969	1·27	30·08
Rajputana	12,762,701	*	8,155,299	·63	
Sind	3,030,981	115,056	8,173,106	2·69	71·00
Total .	285,255,502	12,044,293	369,782,098	1·29	30·70

* Enumeration not taken under this head.

The commercial activity of the inhabitants of the Bombay circle sufficiently explains its position according to the figures of the last two columns. The position taken by the Sind circle which includes Baluchistan is accounted for by the comparatively high proportion of the population of Sind engaged in trade and by the correspondence of the troops and foreign labourers in Baluchistan, while the position of the Punjab is solely due to the large number of English and native troops stationed in the province at a distance from their homes. In Burma while the number of articles per head of the population is comparatively high, owing to the large foreign population and the diffusion of a knowledge of reading and writing among the Burmese, the number of articles per head of the literate population is much lower than in any other circle. This is natural, as a considerable amount of correspondence is necessarily carried on everywhere on behalf of the illiterate, and, other conditions being the same, the lower the proportion of the illiterate to the total population the less correspondence on their behalf falls to those who can read and write. Also as comparatively few of the Burmese who can read and write leave their homes they have not the same need for correspondence as the literate population elsewhere.

Foreign correspondence, including that with the United Kingdom.

9. The figures in Appendix III include the foreign correspondence received in India for delivery, but a special table is given at the end of this paragraph showing separately the amount of correspondence in each direction between India and the United Kingdom and between India and foreign countries. It will be seen that though the increase in the mails exchanged with the United Kingdom was not of such an abnormal character as in 1892-93 when it was 18·58 per cent., there was again last year a large development of the traffic in newspapers and other packets in each direction, while the great increase in the number of letters and post-cards which followed the reductions of postage in 1891 and 1892 was maintained and increased further by about $2\frac{1}{4}$ per cent. in each direction. As regards correspondence exchanged between India and foreign countries, statistics are taken only once in three years, alternately in May and November, and the percentages of increase shewn in the table below represent the progress from May 1890 to November 1893, a period of $3\frac{1}{2}$ years. The rate of increase (36 per cent.) in the number of letters and post-cards exchanged with foreign countries during this period was more than twice as great as the rate of increase in the interval between the statistical periods of 1887 and 1890. This is accounted for by the general reduction of foreign letter postage made by India in 1891 and by the reductions made by other countries, about the same time and after the Vienna Congress, in the direction of uniform rates of foreign postage.

Class.		Estimated Aggregate Number.		Percentage of		Remarks.
		1892-93.	1893-94.	Increase.	Decrease.	
Despatched from India to the United Kingdom.	Letters and post-cards	2,855,220	2,920,744	2·29	...	The figures relating to correspondence despatched from India to the United Kingdom are based on statistics taken for each mail, and those showing the number of articles received from the United Kingdom are based on special statistics taken during the year.

Grand Total of all Correspondence exchanged with the United Kingdom.	Letters and post-cards	5,936,974	6,072,101	2·27	...	
	Newspapers, book-packets, and samples	4,898,812	5,546,208	13·21	...	
Despatched from India to Foreign Countries other than the United Kingdom.	Letters and post-cards	1,446,332	1,677,481	15·98	...	Under the system of the Universal Postal Union, statistics of international correspondence are taken for 28 days every third year. The figures shown under 1892-93 are based on statistics taken in May 1890: the figures shown under 1893-94 are based on statistics taken in November 1893. The percentages of increase therefore represent the development of correspondence in $3\frac{1}{2}$ years.
	Newspapers, book-packets, and samples	571,520	691,096	21·45	...	
Received in India from Foreign Countries other than the United Kingdom.	Letters and post-cards	1,436,752	2,244,411	56·21	...	
	Newspapers, book-packets, and samples	1,364,180	1,653,225	21·19	...	
Grand Total of Correspondence exchanged with Foreign Countries other than the United Kingdom.	Letters and post-cards	2,883,084	3,921,892	36·03	...	
	Newspapers, book-packets, and samples	1,935,700	2,347,321	21·26	...	

The number of letters and post-cards exchanged between India and the United Kingdom has doubled in the past twenty-one years: the number of newspapers and packets between the same two countries has doubled in the past sixteen years. The corresponding periods relating to the exchanges with all other foreign countries are respectively six years and five years.

Foreign parcels.

10. The following statement gives details of the Foreign parcel traffic both to and from India during the last two years. In the year under report there was an increase of 18,810 or 10·14 per cent. in the number of foreign parcels and of ₹15,067 in the Indian share of the revenue from the foreign parcel post.

* Net revenue is calculated after deduction of customs duty and sums due to the Peninsular and Oriental Steam Navigation Company, the British Post Office, and other administrations.

Parcel exchange with the United Kingdom.

As was the case in 1892-93, more than 80 per cent. of the whole foreign parcel traffic was with the United Kingdom; and in that branch of the traffic there was a satisfactory increase of 14,330 parcels or 9·5 per cent. during the year under report, the exchange in each direction showing a marked advance.

The number of parcels sent to and from India so as to reach their destinations just before Christmas and New Year is almost exactly double the average number sent by the rest of the mails of the year.

Parcel exchange with foreign countries other than the United Kingdom.

In the exchange with Continental Europe there was a small increase in the numbers of parcels in each direction; but the net revenue derived by the Indian Post Office was about ₹800 less than in the previous year. In the exchange with other countries there was a material development, there being an increase of 4,147 parcels or 14·99 per cent., and a corresponding increase of ₹3,400 in the net Indian revenue. The whole increase of about 2,000 parcels from India to non-European countries is accounted for by the growth of the parcel traffic with Ceylon due to the value-payable post; and half of the increase (2,236) in parcels to India from those countries is due to the importation of cigarettes from Egypt by private consumers.

Progress in foreign parcel traffic in 20 years.

11. The progress of the foreign parcel traffic as a whole in the past 20 years is shown in the table in the margin. Owing to the reduction of the postage on book packets from 1½*d.* to ½*d.* per 2 ozs. in 1892, some 40,000 parcels of books, which but for the reduction would have been sent to India by parcel post through the Peninsular and Oriental Steam Navigation Company, are now sent as packets by book post; but the decline in the number of parcels by this transfer of an entire class has been nearly compensated in two years by the progress of the traffic in other directions. Altogether the business has more than doubled in the past ten years, and the number of foreign parcels exchanged with India is now between nine and ten times the number of such parcels twenty years ago.

Year.	Number of Parcels.	Year.	Number of Parcels.
1873-74	21,923	1884-85	110,590
1874-75	25,563	1885-86	133,054

1883-84	98,296		

Delivery work of the year.

12. The figures given in paragraph 8 of this report show that 370,267,965 letters, post-cards, newspapers, packets, and parcels were issued for delivery during the year. These figures, which are calculated from actual enumerations made for a week at a time twice during the year, represent approximately the delivery of mail articles properly so called. In order, however, to ascertain the entire delivery work of the year, it is necessary to add the number of money orders which are now delivered and paid by postmen. The entire delivery work of the year is shown by the following figures:—

Sent out for delivery (including 8,895,316 money orders) . .	379,163,281
Received back undelivered (deducted as representing articles either again sent out and delivered or sent to the Dead Letter Office) .	11,304,492
Balance actually delivered	367,858,789
Sent to Dead Letter Offices	3,275,610
Total number received for delivery (counting each article only once)	**371,134,399**

These figures show that the percentage of articles delivered to the whole number received for delivery was 99·12 as compared with 99·09 in the previous year.

Dead Letter Offices.

13. The total number of letters, post-cards, and other articles, excluding money orders, that reached one or other of the ten Dead Letter Offices was 4,299,445 as compared with 4,290,795 received in the previous year. The distribution of these articles among the different Dead Letter Offices and the ways

in which the articles were disposed of are shown in detail in Appendix IV, of which a summary is given below:—

			Number.		Percentage.	
			1892-93.	1893-94.	1892-93.	1893-94.
Total number of articles received in Dead Letter Offices			4,290,795	4,299,445		
	1892-93.	1893-94.				
DEDUCT—						
Articles issued by Dead Letter Offices for delivery to the addressees or senders and received back again as undeliverable . .	258,448	247,764				
Articles transferred to other Dead Letter Offices . .	1,181,804	1,129,104				
			1,440,252	1,376,868		
Net receipts to be disposed of by the Dead Letter Offices			2,850,543	2,922,577	100	100
Articles disposed of by the Dead Letter Offices excluding articles returned undeliverable . .	Disposed of by redirection to addressees . .		408,653	447,706	14·34	15·32
	Disposed of by return to senders .		1,724,322	1,705,345	60·49	58·35
Articles undisposable			717,568	769,526	25·17	26·33

Of the total number of articles, 447,706 were successfully disposed of by being redirected and then delivered to the addressees, while 1,705,345 were returned to the senders and 769,526 were found to be unreturnable. This last figure is only ·2 per cent. of the total number of articles given out for delivery in the year, and a large proportion of the 769,526 articles were from their nature not capable of delivery. Some statistics were kept by the Lucknow Dead Letter Office, and in that single Dead Letter Office 7,572 such articles were received during the year: there were 2,368 unpaid letters which were refused by the addressees and contained only blank pieces of paper apparently sent to annoy the recipients or as a pre-arranged mode of communication involving only the cost of stationery and no charge for postage; there were 3,796 post-cards without any address at all and without sufficient information regarding the senders to enable the Post Office to re-deliver the cards; there were 1,056 newspapers received without wrappers and without any names written on the papers; and there were 352 wrappers without any contents, the packets themselves having been disposed of through other offices, probably because the papers or other contents themselves bore the names of the senders or addressees.

As usual, a large amount of valuable property was found in letters and other articles posted without address or with addresses so incorrect or incomplete that the covers had to be opened in order that the senders might be traced. In articles opened in the Dead Letter Offices of Bengal, Bombay, Madras, and the Punjab were found cheques, bills of exchange, currency notes, jewellery, and other property amounting in value to ₹1,97,445, £1,096-10-6½, and 200 Francs 65 Centimes, and the whole of this property, with the exception of

money and other articles of the total value of ₹10,082 and £89-18, was successfully delivered to the owners in the year. In one out of the ten Dead Letter Offices money and other valuables to the amount of ₹22,259 and £76-9-2 were found in covers posted without any address at all.

Sale of postage stamps, etc.

14. Particulars regarding the issues from treasuries of post-cards, postage stamps, and embossed envelopes for sale will be found in Appendix V, and similar information regarding service post-cards and service postage stamps in Appendix VI. A statement compiled from these appendices, showing the issues of each kind of post-card, postage stamp, and embossed envelope, is given at page 11. Altogether the issues of ordinary stamps amounted to ₹1,03,10,627 and of service stamps to ₹23,04,255, there being an increase over the preceding year of ₹4,77,857 in the value of ordinary stamps and of ₹62,016 in the value of service stamps.

The largest sales of ordinary stamps were in the Bombay Circle, where they amounted to over 21 lakhs of rupees. Madras was next with sales of nearly 19 lakhs of rupees, and then Bengal with sales of over 18 lakhs of rupees. The inland single post-card commanded a higher sale than any other single stamp, the total sales of this card being over 91¾ millions: next comes the small ½-anna envelope with a sale of 67½ millions: next the ½-anna adhesive stamp 47¼ millions: and then the ½-anna reply post-card 10¼ millions, and the 1-anna adhesive stamp 8½ millions. There was a slight improvement in the sales of the special square and registration envelopes of which the actual cost is charged to the public in addition to the face value of the impressed stamps; but the sales of the larger registration envelope were still so small that it was decided at the close of the year to use part of the stock for service purposes.

Apart from the sale of postage stamps, 1-anna revenue or receipt stamps to the value of ₹3,04,118 were sold during the year through the agency of the Post Office. Non-judicial and court-fee stamps are also sold at a large number of post offices; but except in Burma the postmaster acts, as regards these stamps, as a private vendor, and the stamps do not form part of the Post Office balance. In Burma, where general stamps are kept by the postmaster in the same way as other stamps, the sales were ₹42,106.

[The figures represent issues from treasuries to postmasters and licensed vendors for sale to the public.]

Section IV.—District Post.

Scope and management of the District Post.

15. The following somewhat important administrative measure in connection with the District Post of the North-Western Provinces was carried out during the incumbency of Mr. Stewart-Wilson and by his exertions. The funds of the irregular "Mulki" or local post of the Kumaon Division were amalgamated with other District Post funds, and the "mulki" post itself was abolished. This post was an outgrowth of the ancient obligations of the landholders of the division to convey official correspondence, and had developed into an exceptional and dangerous system under which unregistered local correspondence was carried in unsealed bags or bundles open to search by every traveller and villager. Although the post was free of charge it was necessarily irregular, unpunctual, and insecure, while its existence was a bar to the extension of the imperial post and any facilities beyond the carriage of unregistered correspondence. Apart from this measure, no material change was made during the year in the District Post which was administered as usual by the heads of postal circles, but subject to the control of the several local governments and administrations. Although District Post offices and lines are opened and maintained with reference to the requirements of the administration, without regard to the special financial considerations which govern the Imperial Post Office, the District Post services when once established form for all practical purposes part of the general postal system of the country and are available to the general public as well as for official correspondence. Whenever therefore it is necessary to do so in order to convey a correct impression of the extent and scope of any branch of the postal service, the figures of the District Post are, in this report, shown along with the corresponding figures of the Imperial post.

General results of the year.

16. A comparative statement is however given on the following page showing separately in the usual form the establishments, income, expenditure, and operations of the District Post for the years 1892-93 and 1893-94. There was an increase of 102 in the number of post offices, of 126 in the number of postmen and village-postmen, and of 52 in the number of letter-boxes. In District Post mail lines there was an increase of 2,251 miles, due chiefly to the opening of new lines in the North-Western Provinces and Oudh, the Central Provinces, and Bengal. There was an increase of 742,831 or 5·39 per cent. in the number of articles, including money orders, delivered by the District Post agency, and an increase of 590,672 or 6·49 per cent. in the number posted in District Post offices and letter-boxes. The percentage of articles returned as undeliverable fell slightly—from 4·82 to 4·73. Details of letters and other postal articles sent to and received from the District Post are given according to circles in Appendix VII.

(a) Includes contributions from Tributary States.
(b) These are dry season distances: during the rains these lines are increased in length.
(c) Includes contributions from Frontier Police Fund, ₹3,104, and the State of Hill Tipperah, ₹300.
* The Oudh Circle was amalgamated with the North Western Provinces from the 1st May 1893.
(d) Includes lines paid from the revenues of Feudatory States.
(e) Grant made available from Bombay District Post Funds.
(f) Includes contributions from Feudatory States, ₹8,745.
† Revised figures obtained from the Accountant-General, Bengal.

Section V.—Money Orders.

Inland money orders. General results.

17. The total number of money order offices at the close of the year was 10,393, as compared with 10,096 at the close of the previous year. The number of inland money orders issued, including telegraphic money orders but excluding all transactions with Native States, was $8\frac{3}{4}$ millions of the aggregate value of $18\frac{1}{3}$ crores of rupees, and the commission realised amounted to nearly 23 lakhs of rupees. The table in the margin shows the yearly progress made in this branch of business since it was undertaken by the Post Office in 1880. The transactions have doubled in the last eight years and quadrupled in the last twelve years, and are now thirty-five times as numerous as in the last year—15 years ago—before the Post Office undertook money order work. During the year under report there was an increase of 6·27 per cent. in the number of inland money orders issued, of 6·75 per cent. in their value, and of 6·37 per cent. in commission. The average value of an inland money order was R20-15-5, against R20-13-10 in the previous year.

Total for 1893-94	**8,754,940**	**18,35,34,008**	**8,752,600**	**18,35,54,999**	**100**	**100**
Total for 1892-93	8,237,855	17,19,16,585	8,228,184	17,17,55,882	...	...
Increase	517,085	1,16,17,423	524,416	1,17,99,117	...	...

As in former years, the money order business of the Bengal circle was far greater than that of any other circle, and the three circles (Bengal, Bihar, and Eastern Bengal) which together form the Lower Provinces account for 36·51 per cent. of the whole number of money orders issued and 38·85 per cent. of the whole number of money orders paid. In the North-Western Provinces and Oudh, and Bihar the payments were as usual largely in excess of the issues, owing mainly to the remittances of sepoys, police, and labourers serving in other provinces; whereas in Burma, the Central Provinces, Assam, Sind, and Central India, the issues were more important than the payments. There was a falling off in the value of money orders issued in Burma, which is attributed to a reduction in the remittances of Madrasis employed in Burma and in part to a decline in immigration. In other respects there was no change in the general character of the money order business in the different provinces.

Revenue money orders.

19. The revenue money order system continued to make steady progress in the North-Western Provinces and Oudh, and also in the Lower Provinces of Bengal, the Punjab, and the Central Provinces. In the North-Western Provinces and Oudh, the total number of revenue money orders issued rose from 134,893 in 1892-93 to 140,237 during 1893-94, the amount of revenue remitted being R30,68,812 as compared with R30,31,817 in the preceding year. In the Lower Provinces, comprising the postal circles of Bengal, Bihar, and Eastern Bengal, the number of revenue money orders rose from 180,922 to 189,942, and the total amount of revenue remitted from R16,31,709 to R16,40,422. The revenue money order system was extended to the whole of the Punjab from 1st April 1894 and to the whole of the Central Provinces from 15th March 1894, and during the year under report 2,276 revenue money orders for R1,56,853 were issued in the former province and 3,478 for R1,83,285 in the latter. The system which had been tried in a few districts of Madras since 1890 was discontinued from the 10th April 1894 as unnecessary for that presidency owing to the ryots being able to pay their revenue through the village headmen.

Remittance of miscellaneous Government dues by money orders.

20. Remittances of miscellaneous Government dues by money orders paid by book transfer also increased in the year under report in the Lower Provinces and the North-Western Provinces and Oudh where this mode of remittance has been provided. In the Lower Provinces, 74,142 official money orders of the aggregate value of R14,12,682 were paid during the year by book transfer, as compared with 67,859 orders of the total value of R12,60,468 paid during the previous year; while in the North-Western Provinces and Oudh, the number of such orders issued during the year was 18,391 of the aggregate value of R3,59,423 as compared with 17,409 orders for R3,42,893 in 1892-93.

Rent money orders.

21. In rent money orders there was also an increase in each of the provinces in which the rent money order system was in force throughout the year. In the North-Western Provinces and Oudh 70,059 rent money orders were issued for R9,11,506, as compared with 63,862 for R8,37,599 in 1892-93; and in the Lower Provinces of Bengal there were 48,042 rent money orders for R6,40,716, as compared with 44,444 for R5,70,390 in the previous year. The system was extended to all the districts of the Central Provinces from the 15th March 1894.

Money order business with Native States.

22. The following statement shows the money order transactions with Native States :—

STATE.	ISSUES IN THE STATE.		PAYMENTS IN THE STATE.	
	Number.	Value.	Number.	Value.
		₹		₹
Gwalior	45,197	11,86,324	14,341	4,20,255
Patiala	15,336	5,60,387	12,115	3,73,551
Jhind	2,545	92,116	2,501	86,582
Nabha	2,790	84,484	2,622	85,935
Chamba	1,333	46,685	425	15,870
Faridkot	1,201	37,413	388	13,625
TOTAL	68,402	20,07,409	32,392	9,95,818
Total for 1892-93	64,113	17,60,576	32,115	10,39,081

Compared with the previous year, there was a slight decrease in the value of the payments in the States but a material increase of nearly 2½ lakhs of rupees in the issues from the States to British territory.

Telegraphic money orders.

23. The transactions in telegraphic money orders in each circle are given in the following table :—

NAMES OF POSTAL CIRCLES.	ISSUES.			PAYMENTS.	
	Number of money orders.	Value of money orders.	Commission realised.	Number of money orders.	Value of money orders.

Increase	8,127	8,71,114	12,360 12	7,566	8,74,781

The number of telegraphic money orders issued was 115,528, for the aggregate amount of nearly 125 lakhs of rupees, as compared with 107,401 orders for 116 lakhs of rupees in the previous year. The postal commission on these orders was ₹1,33,998, in addition to ₹1,15,528 the cost of the telegrams which is paid by the remitters along with the postal commission but credited to the Telegraph Department. The average value of a telegraphic money order was ₹107-15-4 against ₹108-0-3 in 1892-93.

As in previous years, telegraphic money orders were far more freely issued from Burma than elsewhere, the telegraphic money orders from that province being in the year under report 46·32 per cent. of the number for the whole of India.

Foreign money orders in sterling.

24. Foreign money orders for and from the United Kingdom, most of the British colonies and possessions, Foreign European countries and most of their colonies and possessions, and Egypt are issued in sterling, payments being made by the remitters and to the payees in India at the rates of exchange fixed by the Post Office from time to time for this purpose. Details of the sterling money order exchanges of the year are given in the table below :—

The number of money orders issued on foreign countries rose from 43,490 in 1892-93 to 52,944 in the year under report, and the value from £143,738 to £186,569. The orders advised by foreign countries and paid in India rose by 1,572 in number and £8,124 in value. The increase in both issues and pay-

* Includes 309 money orders of the value of £1,124 18s. 11d. issued in March 1894 but adjusted in the accounts for April 1894.

† From July 1892 the exchange with North Borneo was converted into a rupee money order exchange.

ments was principally in the exchanges with and through the United Kingdom. Nearly two-thirds of the payments, amounting to £84,765, on money-order advices from London were on account of orders through London, consisting chiefly of remittances from Indian emigrants and labourers in Cape Colony, Natal, British Guiana, and the West Indies. The average value of a money order issued by India in 1893-94 was £3-10-5 against £3-6-1 in 1892-93, and that of a money order paid in India was £5-5-2 against £5-5-3 in the preceding year. The average of the rates of exchange in force was the same in both years, *viz.*, 14¾*d.* per rupee. There was a net gain of ₹21,031 in the year by exchange owing to fluctuations between the dates of the actual transactions in India and the dates on which the accounts were settled with the several foreign administrations.

Foreign money orders in Indian currency.

25. The following table shows the money order transactions with foreign countries with which the Indian Post Office has exchanges based on Indian currency :—

* Includes Ceylon telegraphic money orders introduced in 1893-94.

The exchanges with the Straits Settlements and with China and Japan were suspended soon after the passing of the Indian Coinage and Paper Currency Act, 1893, but the exchange with the Straits Settlements was resumed after two months and with China and Japan after eleven months, arrangements having been made in the interval for more frequent and rapid settlements of the accounts so as to avoid any material risk of loss to any of the administrations concerned. Excluding these two exchanges there was altogether an increase of 1,109 foreign rupee money orders for ₹33,261. The money order transactions with Ceylon increased by ₹11,061, those with British East Africa by ₹702, and a new exchange was opened with German East Africa from 1st November 1893. The average value of a foreign rupee money order issued by India in 1893-94 was ₹36-9-9 against ₹37-4-0 in 1892-93, and that of an order paid in India was ₹41-0-2 against ₹42-13-0 in the preceding year.

Telegraphic money orders between India and Ceylon.

26. An exchange of telegraphic money orders with Ceylon was introduced from the 1st May 1893, and during the 11 months of the year for which the exchange was in operation, 297 telegraphic money orders for ₹20,225 were issued by India on Ceylon, and 1,672 telegraphic money orders for ₹1,07,168 issued by Ceylon were paid in India.

Money orders telegraphed to Bombay for advice by post to foreign countries.

27. The table on the margin shews the number and amount of money orders telegraphed to Bombay to be advised to foreign countries. Of the rupee orders, 36 were for Goa and one for Singapore. Of the sterling orders, 212 were for the United Kingdom and the rest for Italy, Germany, France, and Sydney.

British Postal orders.

30. The statement on the margin shows the sales of British postal orders during the year. The total number of orders sold in 1893-94 was 38,872 against 28,529 in the preceding year, and the total value, (including poundage) ₹2,54,081 against ₹1,80,116 in 1892-93. There was an increase in the sale of orders of all denominations; but the 5*s.*, 10*s.*, and 20*s.* orders continue to be most in demand, 29,424 of these orders

Denominations of British Postal Orders.	Number sold during 1892-93.	Number sold during 1893-94.	Increase.
From 1*s.* to 1*s.* 6*d.*	1,511	1,932	421
From 2*s.* to 10*s.* 6*d.*	13,438	17,339	3,901
From 15*s.* to 20*s.*	13,580	19,601	6,021
Total	28,529	38,872	10,343

having been sold during the year under report while the total number sold of all other denominations was only 9,448.

The commission of the Indian Post Office on the sales of British postal orders was ₹1,190.

Section VI.—Savings Banks.

General results of the year.

31. On the following page is given a statement showing in detail, according to postal circles, the Savings Bank transactions of the year as compared with those of the previous year. At the close of the year there were 303 Head Banks and 6,055 Sub-Banks, or a total of 6,358 offices performing Savings Bank business against 6,408 in the preceding year. The decrease of 50 offices was due to the withdrawal of Savings Bank powers from certain small branch post offices in the North-Western Provinces and Oudh and the Punjab at which the transactions were nominal. The number of accounts on the books of the Post Office Savings Banks at the close of the year was 574,050 as compared with 520,967 at the end of 1892-93—an increase of 53,083 or 10·18 per cent. Excluding transfers from one post office to another, the amount deposited in the year was 333 lakhs of rupees as compared with 327¾ lakhs in 1892-93; the amount withdrawn was 317¼ lakhs as compared with 278¾ lakhs in 1892-93; and the interest paid was 29⅜ lakhs as compared with 27 lakhs in 1892-93. The total amount standing at the credit of depositors at the close of the year was 826½ lakhs of rupees or an increase of over 44½ lakhs, and the average balance of each account was ₹143·98 as compared with ₹150·08 in the previous year. Of the 574,050 active accounts at the end of the year, 26,739 were security deposit accounts, with a balance in favour of depositors of over 39½ lakhs of rupees; 5,030 were Public accounts—held principally by provident, charitable, religious, and educational institutions—with a balance of ₹28,18,459; and 127 with a balance of ₹7,20,976 were Regimental and Police accounts. Of the remaining 542,154 active accounts with a balance of over 751 lakhs, 77,220 with a balance of over 162¼ lakhs of rupees were accounts held on behalf of minors, by their parents, relatives, and guardians, and the rest were accounts opened and held by depositors on their own behalf. It will be seen, therefore that 94·44 per cent. of all the accounts in the Post Office Savings Banks and 90·93 per cent. of the total balance of over 8¼ crores were the savings of private persons deposited either for their own benefit or for the benefit of their children, minor relatives, and wards. It was widely notified in the last quarter of the year that the rate of interest would from the 1st April 1894 be reduced from 3¾ to 3½ per cent., but the notification had a very slight effect in reducing the normal rate of increase in the number of Savings Bank accounts. This fact, the high proportion of personal and minors' accounts, and the low average balance of all accounts would seem to show that the banks are generally used for the purpose of thrift for the encouragement of which they were established. In 1881-82, the year before Post Office Savings Banks were opened, the number of accounts in the Presidency Savings banks and the banks at treasuries (now closed) was 90,336. In the twelve years since then, the number of accounts at Post Office Savings Banks alone has risen to 574,050, but even now there is only one such account for every 500 of the population.

Statement showing the Post Office Savings Bank Transactions during 1893-94 compared with 1892-93.

[Arranged in the order of aggregate balances as shown in column 13.]

* Inclusive of ₹1,07,63,338, the aggregate balance of accounts transferred from one post office to another.

Incidence of Savings Bank work according to circles.

32. Bombay continued to head the circles in having the highest number of accounts open and far the largest balance in favour of depositors. The average balance of each depositor was also highest in Bombay (₹203), though in that circle, as well as in every other circle except Rajputana, the average balance fell in the year under report. The average balance per account was lowest in Madras where it was ₹83.

Depositors, Europeans and Natives of India.

33. The statement below shows the number and value of accounts held by Europeans and Eurasians as compared with the number and value of accounts held by Natives of India. The proportion of accounts held by Europeans and Eurasians is highest in the Madras and Bombay circles, but 90 per cent. of the total number of accounts were at the close of the year held by natives of the country.

Depositors according to occupation.

34. In the following statement depositors are classified according to their occupation. Those included in class VI, who have no occupation or whose incomes are derived from others or from their own property, hold the highest number of accounts, *viz.*, 40 per cent. of the whole. Next in importance are the professional classes with fixed incomes, and then the domestic class which increased by more than 21 per cent. in the year.

Investments in Government securities.

35. There were in the year 460 investments in Government securities through the Post Office, the aggregate amount of the investments being ₹3,79,100, as compared with 270 purchases for ₹2,62,100 in the preceding year. The sales of securities through the Post Office were only 27 against 26 in 1892-93. The value of the securities held in the custody of the Comptroller General at the close of the year on account of depositors in the Post Office Savings Bank was ₹4,50,300 as compared with ₹3,97,400 on the 31st March 1893.

Section VII.—Insurance.

Insurance business.

36. The progress of the insurance business of the Post Office since it was first undertaken is given in the following statement :—

Year.	Letters.		Parcels.		Total.		Insurance fees.
	No.	Value.	No.	Value.	No.	Value.	
		₹		₹		₹	₹
1877-78, last quarter, being the commencement of the system	Details not available.	6,66,320	Details not available.	18,60,191	Details not available.	25,26,511	13,230

1887-88	76,237	2,43,93,295	149,109	5,29,89,932	225,346	7,73,83,227	1,83,494
1888-89	76,564	2,52,60,326	151,474	5,39,54,694	227,838	7,92,15,020	1,99,928
1889-90	77,245	2,49,65,787	160,228	6,40,09,236	237,473	8,98,75,023	2,29,659
1890-91	85,889	2,31,91,674	176,838	5,67,24,543	262,727	7,99,16,217	2,10,873
1891-92	88,741	2,31,67,897	176,869	5,33,72,377	265,610	7,65,40,274	2,02,737
1892-93	89,845	2,36 54,593	173,966	4,94,06,117	263,811	7,30,60,710	1,93,250
1893-94	**89,332**	**2,31,75,043**	**195,706**	**5,69,14,359**	**285,038**	**8,00,89,402**	**2,10,714**
Percentage of increase (+) or decrease (—)	—·57	—2·02	+12·49	+15·19	+8·04	+9·62	+9·03

It will be seen that there was an increase in the total business of the year as regards both the number and value of the articles insured and also an increase of ₹17,464 in the insurance fees. The reduction in the total amount of fees that followed the restriction imposed in 1890 on the amount (now ₹1,000) for which an article can be insured has been nearly made up by the increase in the number of articles insured. The total number of parcels insured was 21,740 more than the number in the previous year, and the total value was 569 lakhs of rupees as compared with 494 lakhs in 1892-93. The chief increase occurred in Bombay where the number of insured parcels rose from 40,240 in 1892-93 to 55,566, and in Bengal where the number of insured parcels was 5,746 more than in the previous year. The number of insured parcels posted in the Bombay Circle (55,566) was, as usual, far greater than in any other circle ; and the exceptional increase in that circle of 15,327 insured parcels, insured for 83¼ lakhs, is explained by the despatch into the interior of a large number of parcels containing silver bullion owing to the closing of the mints against the coinage of silver. The number of parcels insured in Madras was 37,298, the number in Bengal was 28,776, and so far as the other circles are concerned there was no material change. There was a slight fall in the number and aggregate value of insured letters, but it was too small to have any significance.

The average value for which each letter was insured during the year 1893-94 was ₹259 as compared with ₹263 in the previous year, and the average value for which each parcel was insured was ₹290 against ₹284 in 1892-93.

Claims for compensation.

37. There were 19 claims for compensation for loss or abstraction from insured articles during the year under review, as compared with 35 such claims in 1892-93 and 28 in 1891-92 ; and out of the 19 claims, 18 were admitted.

In 13 of the cases the loss was caused by fraud or negligence on the part of servants of the Post Office; in one case the loss was due to an accident; and in 4 cases to highway robbery. A statement of the cases in which compensation was actually paid or in which the claims were admitted during the last two years is given on the margin, and it will be seen that the claims admitted by the Post Office in the year under report amounted to only Rs. 3,032-1-10 or 1·44 per cent. of the total amount realised from insurance fees, as compared with a percentage of 2·21 in the previous year.* In the single instance in which compensation was refused, the Post Office declined to accept responsibility as the insured article had been delivered in good condition under a clear receipt and there was good reason to believe that the articles said to have been abstracted were not in the parcel when it was posted. In another case, in which however no claim was made against the Post Office, it was judicially established that currency notes for Rs. 700 which were declared by the sender to form the contents of an insured letter were not put into the letter at all. In this case the sender was prosecuted for attempting to cheat the addressee and was convicted and sentenced to six months' rigorous imprisonment.

Cases in which compensation was paid or the claim admitted.	1892-93.				1893-94.

Section VIII.—Value-payable system.

Value-payable post.

38. The development of the value-payable business since its introduction in 1877 is shown in the marginal table, and it will be seen that the uninterrupted and rapid progress of this branch of Post Office work was fully maintained during the year under report, and that the business has more than doubled in the past six years. The total number of articles of all kinds sent through the post under the value-payable system was 1,596,952 as compared with 1,415,595 in the previous year, the total amount specified for recovery from the addressees was more than 176 lakhs of rupees against 151½ lakhs, and the commission realized was over 3·19 lakhs against 2·77 lakhs in the previous year. There was thus an increase of 12·81 per cent. in the number of articles, of 16·15 per cent. in the value specified for recovery, and of 15·01 per cent. in the commission realized. Two-fifths of the entire business of the year was transacted in the Bengal Circle and practically the whole business of that circle originated in Calcutta. Out of a total of 644,742 articles sent by the value-payable post in the whole of the Bengal Circle

Year.	Articles sent under the value-payable system.	Value declared for realization.	Commission.
	No.	₹	₹
1877-78 (from the commencement of the system in December 1877), 4 months	413	6,721	195
1878-79	7,408	1,32,109	3,942
1879-80	25,589	3,49,857	11,498
1880-81	49,389	5,76,574	13,413
1881-82	99,416	10,80,543	19,838
1882-83	174,301	16,86,098	32,568
1883-84	287,377	28,08,873	53,450
1884-85	338,930	34,35,045	65,571
1885-86	436,115	45,32,803	85,530
1886-87	596,296	58,78,016	1,17,247
1887-88	775,928	76,02,734	1,59,708
1888-89	999,731	92,67,984	2,04,015
1889-90	1,010,410	1,03,84,966	1,92,970
1890-91	1,108,888	1,16,41,972	2,12,200
1891-92	1,251,004	1,34,50,286	2,44,865
1892-93	1,415,595	1,51,61,846	2,77,845
1893-94	1,596,952	1,76,14,628	3,19,561
Increase per cent. in 1893-94	12·81	16·15	15·01

* In the Annual Report for 1892-93 the percentage was entered as 1·11, but this was calculated with reference to the amount actually paid as compensation during the year in cases reported during the year, whereas in the present report the calculation has been made on the total of the admitted claims including those not paid before the close of the year.

619,786 were posted at the Calcutta General Post Office and its town sub-offices; and of the 70·4 lakhs of rupees recovered from the addressees of value-payable articles posted in the Bengal Circle nearly 68 lakhs were paid to tradesmen in Calcutta in return for articles sent by post to their constituents in the interior under the system of payment on delivery. This amount was 7½ lakhs of rupees above the corresponding figure of the preceding year. The value-payable business with Ceylon, introduced in 1891, is steadily increasing. During the year under report 8,692 value-payable articles of the aggregate value of ₹1,00,164 were despatched from India to Ceylon as compared with 7,095 articles in the preceding year. The value-payable system has not yet been introduced between India and any other foreign country.

Classification of value-payable articles.

39. In the statement on the margin details are given of the different classes of articles sent through the post under the value-payable system. Compared with the figures of the previous year, the result is an increase of 12·78 per cent. in value-payable parcels, of 24·73 per cent. in value-payable railway receipts, of 8·75 per cent. in value-payable registered letters and packets, and of 10·75 per cent. in value-payable unregistered packets. The average value of each article, taking all classes of articles together, was ₹11-0-5 as compared with ₹10-11-4 in the preceding year. The average commission on each article was practically the same as in the preceding year.

	No.	Value.	Commission.	Average value of each article.	Average commission on each article.

Section IX.—Miscellaneous.

Post Office Guarantee Funds.

40. The statement below shows the transactions of the Post Office Guarantee Fund during the year. The small balance of ₹2,994 at the credit of the old *pro formâ* account on the 31st March 1893 was more than covered by the expenditure of the year, and all charges as well as all receipts from subscriptions are now shown in the accounts of the new fund which was created in 1883 The balance at the credit of the fund, including the value of Government securities purchased on behalf of the fund, rose from ₹5,03,866 on the 31st March 1893 to ₹5,57,743 at the close of the year under report.

				Balance on 31st March 1894†	5,57,743
Total	...	...	5,75,318	Total	5,75,318

* Inclusive of Government Securities of the nominal value of ₹1,39,000
† Ditto ditto ₹2,49,000

Owing to the general honesty of the servants of the department the fund as increased very rapidly in recent years, although the subscriptions have been only 4 annas, 8 annas, and 1 rupee half-yearly, while large classes of inferior servants have been altogether exempted from subscribing. The rates of subscription have therefore been halved since the close of the year by being made payable yearly instead of half-yearly, and the 4 annas' rate of subscription has been extended to a number of servants who have hitherto subscribed at the 8 annas' rate.

Complaints by the public.

41. The number of complaints made by the public which came to the knowledge of the heads of postal circles was 9,448 as compared with 8,671 in the previous year. These figures represent all complaints made by the public to heads of circles and to postmasters of presidency offices as well as all complaints received direct by postal superintendents and other officers and subsequently reported to heads of circles, and therefore embrace not only all serious complaints but also the great majority of complaints which are not mere enquiries. There was an increase of 8·96 per cent. in the total number of complaints received during the year, but it was found on investigation that there was valid ground for complaint against the post office in only 37 per cent. of the total number of complaints while in 42 per cent. of the cases the complaints were entirely groundless. In the remaining cases either the enquiries instituted were unfinished at the close of the year, or no definite conclusion could be arrived at.

It is natural when a letter miscarries between two persons having friendly or business relations with each other that it should be assumed at first that the post office was at fault; but the experience of the past year, as of previous years, showed that the assumption is more often wrong than right. A few examples are given here from the records of complaints in the year under report. A cheque for over ₹5,000 posted by an English firm miscarried, but it was eventually found that it had been misappropriated and cashed by a trusted servant of the addressee who regularly took delivery of his letters in his absence. The sender of a registered letter complained of the abstraction of the contents, consisting of a number of half and whole currency notes, but the enquiry proved that the contents were abstracted by the sender's servant before posting. In both these cases the real culprits were not only detected but convicted. A gentleman complained that two letters containing large cheques and addressed to well-known mercantile houses in Madras had not been delivered, but it was found on investigation that the letters were by accident not posted at all. A well-known firm complained that a letter containing a life insurance policy had not been received by the addressee, but it was ascertained on enquiry that the letter was duly delivered and afterwards mislaid by a member of the addressee's household. A certain number of complaints appear to be prompted by bad feeling towards individual members of the postal staff and this is specially the case with complaints against school-masters in charge of post offices, and a considerable number of complaints in the past year were found on enquiry to have originated with schoolboys apparently from no other motive than to gain experience in English official correspondence. It is now a fixed principle of postal administration that all complaints should be welcomed, and there is one class of complaint that the Post Office would gladly see multiply many times—complaints against the missending and consequent delay of ordinary unregistered letters and post-cards. When the missending of a letter is noticed in the post office, a slip is attached to the envelope asking for its return for enquiry, but only a small proportion of the covers thus asked for are returned by the addressees. Apart from complaints relating to particular postal transactions, complaints regarding errors and abuses of a more general character are often received and are most useful. Thus, in the past year, the fact that a post office had been placed

in a quarter of a village which low caste Hindus were not allowed to visit was brought to notice by a letter in the public press, and a complaint regarding another post-office led to the discovery of a serious abuse in connection with delivery work arising from the employment of high caste postmen in delivery beats which included quarters occupied by Pariahs and low caste Hindus.

Complaints regarding special classes of articles.

42. The usual statement is given below showing the number of complaints received during the year regarding registered letters, ordinary parcels, insured articles, and value-payable articles:—

	1893-94.				Total.	
	Registered Letters.	Ordinary Parcels.	Insured Letters and Insured Parcels.	Value-payable Parcels and Value-payable registered articles.	1893-94.	1892-93.
I.—Cases in which enquiry showed either that no loss occurred or that the loss had not occurred through the fault of Postal Officials	130	100	19	35	284	244
II.—Cases in which the postal establishment was proved to be in fault, or in which there was strong ground for believing it to be so . . .	96	43	22	25	186	150
III.—Cases in which no definite conclusion was arrived at or which were pending at the close of the year . . .	38	50	3	11	102	102
Total .	264	193	44	71	572	496

It will be seen that the total number of these complaints regarding special classes of postal articles was 572 as compared with 496 in 1892-93, and that the number of cases in which blame was established against the Post Office was 186 as compared with 150 in the previous year. The number of cases in which no definite conclusion was arrived at or which were pending at the close of the year was the same as in the previous year, *viz.*, 102, while the number of groundless cases rose from 244 in 1892-93 to 284 in the year under report. Against the increase of 76 in the number of complaints it should be noted that there was an increase of over 678,000 registered letters, over 169,000 parcels, over 181,000 value-payable articles, and over 21,000 insured articles. Complaints which proved to be well-founded were made by the public in respect of only 96 out of over 7 million registered letters, 43 out of over 2¼ million parcels, 22 out of 285,000 insured articles, and 25 out of 1⅛ million value-payable articles. A considerable proportion of the complaints regarding parcels arise from impatience and thoughtlessness in packing; but when, as is often the case, the parcels have been opened for examination by the customs authorities the Post Office has sometimes to accept responsibility even though there is no reasonable doubt that the damage was due to carelessness on the part of the sender and not to carelessness in re-packing. The following extract from the report of the Postmaster-General, Bombay, will show how much need there is still for greater care in packing articles that have to undergo long journeys and frequent transhipments and handling:—

"Two models of the 'Agra Taj' were delivered in England broken. Both were of the most fragile material and packed without any care. One of them had been put in a box too small for it and the lid had had a hole cut in it to make room for the top of the model. A costly ivory box of delicate workmanship was used as a packing case for some articles of silverware, and was covered only with a piece of gunny cloth. The ivory box was of course found broken on delivery. Enquiry showed that the ivory box

had not even been mentioned in the declaration. The sender stated that he did not consider this necessary, and thought that he was fairly entitled to compensation for its value. A costly bonnet was sent out to India enclosed in a common card-board box. The sender was surprised that it had been crushed. A fragile ornament for a wedding cake valued at R20 was sent to England in a tin box without packing. It was of course broken, as it would have been had it been sent in this way for a mile by train. A number of cases of butterflies are reported to be damaged every year. The pins get detached in some, and the insects undergo decomposition in others. It is curious that the senders should find their patience exhausted just when they begin packing such valuable collections for despatch. A cornet sent by a firm of instrument makers was received damaged. The committee held by the addressee's regiment to enquire into the cause of damage came to the conclusion that the instrument had been forced into a box too small to hold it safely."

Offences by servants of the Post Office.

43. Appendix VIII shows the number of cases in each postal circle in which servants of the Post Office were found guilty of offences punishable by law, and the usual summary of the figures is given on the margin.

	1892-93.	1893-94.
Number of legal convictions	176	190
Number of cases departmentally punished	106	150
	282	340

Of the 340 offences, 41 were cases of misappropriation of office cash, 138 were frauds in connection with the money order business of the Post Office, and 12 in connection with the savings bank, while the remaining offences related to letters, parcels, and other mail matter properly so called and included comparatively minor cases of negligence punishable under the Post Office Act as well as cases of theft from the mails. Excluding petty cases not involving any actual loss, the offenders consisted of 94 departmental postmasters and clerks, 49 extraneous agents in charge of post offices, 84 postmen and village postmen, 9 mail carriers, 2 packers, and 2 letter-box peons. The amount of defalcations and losses from the dishonesty or negligence of postal servants was less by R8,600 than in the previous year, the total amount being R30,118-14-4, of which R17,389-10-5 was recovered from the offenders or their sureties, R5,819-12-9 was decreed against the guarantee fund, R6,884-7-2 remained unadjusted at the close of the year, and only R25 was written off as a loss to Government. The only case of special interest is one in which two fictitious money orders for R600 each were prepared with forged impressions of post office stamps and introduced into the travelling post office. The money orders were paid in the ordinary course on reaching their destination; but the fraud was quickly detected, the money recovered, and the offender convicted. As in the previous year, there were two cases in which postal officials committed suicide when they found that they could no longer prevent the detection of their offences.

Offences by persons not belonging to the Post Office.

44. The most serious fraud against the Post Office by a man not at the time in the employment of the department was committed by an Assamese, K. N. Baruah, who had been a postal signaller and had absconded to avoid arrest for offences committed while in the service. The absconding signaller obtained employment at different railway stations under various assumed names and managed to place on the wires a number of fictitious telegraphic money orders of which five were paid at their destinations to the man himself before he was arrested and convicted. Excluding cases of highway robbery, which are separately dealt with, there were 40 cases of house-breaking and theft of Government money from post office safes and mails, as compared with 24 in the previous year. The total amount stolen was R4,501-14-2, of which R2,710-13-7 was recovered, R523-9-11 was written off as finally lost, and R1,267-6-8 was unadjusted at the close of the year.

Highway robberies and attacks upon the mail.

45. From the abstract given in the margin it will be seen that in the whole of India, including those Native States to which the operations of the Imperial Post Office extended, there were during the year only 18 highway robberies of the mail as compared with 27 in 1892-93. The number of cases in Native State territory was 4, the same as in the previous year, the reduction being in the number of cases in British territory. No cases occurred in Bengal, Eastern Bengal, Bihar, Assam, Rajputana, or Burma.

	1892-93. Number of Highway Robberies.			1893-94. Number of Highway Robberies.

	Total	14	2	Total	4	1

* Owing to conflicting evidence it has not been determined with certainty whether the robbery was committed within the limits of the Baroda State or of Mahi-Kanta.
† There is some doubt whether this case was really one of highway robbery.

Character of mail robberies.

46. In 14 out of the 18 cases of highway robbery the mail carriers or their escorts were wounded or otherwise injured at the time of attack or while defending the mail. In one case, in the Basim district (Central Provinces), the mail tonga was stopped by a large band of robbers, and both the driver and a passenger were beaten with sticks and stones and left insensible on the road while the mail was carried away to a field some distance off and there opened and plundered. In another case, on the line from Kohat to Thull (Punjab circle), the mail ekka was fired at and both the driver and horse were hit, the former being severely wounded. The whole mail was then carried away and no trace of it was afterwards found. In both these cases the efforts of the police to discover the robbers were unsuccessful. In another case, in the Thana district (Bombay), the runner was killed, but fortunately in that case the murderers were detected and convicted and nearly all the contents of the mail were recovered. The only case in which Government suffered any considerable loss occurred in the Kistna district of Madras, where the mail included 4 parcels insured for R1,365-8; in 6 cases the entire mail was recovered; in 8 cases a portion was recovered and the loss to Government was altogether only R52-6; and in the remaining 3 cases the entire mail was stolen but the loss to Government was only R400. Prosecutions were instituted in 5 cases and convictions obtained in 4 cases.

Casualties of the year.

47. Besides the casualties in connection with mail robberies there were, as usual, cases of loss of life and mail property from floods and fire and other causes. Two runners were drowned, one in the Chittagong district and the other in the Palamau district in Chota Nagpur, while attempting to ford streams that were in flood. A postman of the Pandalur sub-office in the Nilgiri District in Madras was murdered by the sub-postmaster, who immediately afterwards committed suicide. The actual cause of the murder was not ascertained, but it was known that the men did not work well together and arrangements to transfer the postmaster had been made before the tragedy took place. A clerk of the Chakdaha sub-office in Bengal was run over by a goods train and killed while on his way from the Post Office to take his morning meal. During the riots in Bombay between Hindus and Mahomedans in August 1893, sixteen postmen and six other postal servants were injured, three of them seriously; but by the personal exertions of the Presidency Postmaster and other supervising officers the general postal arrangements of the town and suburbs were maintained throughout the riots without interruption, though the payment of money orders by postmen at the houses of the payees had to be temporarily suspended. In Assam there were several accidents to mail boats in floods and rapids. The boat from Jhalnacherra for Changsil and Fort Aijal was lost on the 30th June with the mails; on the 3rd July another mail boat was lost on the same line, though the boatmen succeeded in saving the mail; and again on the 8th July, a third mail boat was upset on the same line, though on that occasion both the boat and mails were saved. In Burma, on the 7th May, the mail boat from Myaungmya to Labutta was capsized in a storm and lost with the mails; in June the mail boat from Lohajang to Bahar in the Dacca district was capsized in the river Padma, the runner and the mails being saved by another boat; and on the 27th June the mail boat on the Chhatak-Sonamganj line in Sylhet sank with all the mails. There were 16 cases of fire at post offices in different parts of the country; but in none of them was there any serious loss of mail matter or other property in charge of the Post Office, though the buildings, in most cases made of wood and mats, were in several instances completely destroyed. A number of post offices were destroyed or seriously damaged by a cyclone which visited the Backergunge District and the Island of Dakhin Shabazpur in October 1893, but the loss to Government was small, as most of the buildings were held on rent. The post offices at Srinagar in Kashmir, Muzaffargarh in the Punjab, and Faridpur

in Bengal had all to be temporarily vacated owing to the heavy floods in July and August, and mail communication with Kashmir was seriously interrupted for eight days owing to the destruction of the bridge at Kohala on the 20th July. A mail van on the Mettapalleyam branch of the Madras Railway was broken to pieces in a serious accident at night due to the destruction of a culvert on the line by a sudden flood, and the sorter was buried for some hours before he and the mails could be recovered.

Post Office staff.

48. The staff of the Imperial Post Office in the different grades is shown circle by circle in Appendix IX, and an abstract of this Appendix is given on the margin. The total numerical strength of the Post Office staff was 47,225 on the 31st March 1894 as compared with 46,857 on the same date of the previous year. The increase under the several heads was due to the general development of Post Office work, while the decrease of more than 500 men on the road establishment was caused by the closing of a number of runners' lines in the Madras circle on the opening of sections of the East Coast Railway.

Postal Officials.	1892-93.	1893-94.
Chief Officers of the Directorate and Account Office, and Heads of Circles	24	23
Superintendents and Inspectors of Post Offices	395	406
Postmasters, including Deputy, Assistant, Sub and Branch Postmasters	4,986	4,981
Extraneous agents, such as school-masters and station-masters	3,932	4,089
Clerks	6,740	6,933
Postmen and other servants	13,304	13,571
Road establishment	12,477	11,957
Village Postmen	3,837	3,970
Signallers, and other servants employed for telegraph work in Combined Offices	1,162	1,295
TOTAL	46,857	47,225

The postal staff included at the close of the year 171 pensioned soldiers of the native army, of whom 32 were non-commissioned officers and 139 privates. These men were employed in numerous capacities as sub and branch postmasters, clerks, overseers, mail guards, mail peons, postmen, village postmen, telegraph messengers, letter-box peons, watchmen, and packers, and even in a few cases as runners. Out of the whole number of Military pensioners 95 were in the Punjab, and the scheme for the employment of retired native soldiers in the Post Office may be said now to have made a fair start in that province.

In the whole staff of 47,225 postal officers and servants there are only 19 women; but it is only under the most exceptional circumstances that the employment of any native woman is possible in the Post Office, and 18 out of the 19 women in the service are Europeans or Eurasians. Of the 18 women, 1 is postmistress of a head office, 5 are postmistresses of sub-offices, 11 are clerks, and 1 is a telegraph signaller.

Cost of printing by private presses.

49. The cost of printing work done by private presses during the year amounted to R13,328 as compared with R33,311 in 1892-93 and R35,655 in the previous year. The reduction in expenditure occurred mainly in the railway mail service, and was due to the printing of certain departmental publications being transferred from a press at Allahabad to the contractors for printing Government stock forms.

Receipt of sovereigns and half sovereigns in payment of postal dues.

50. After the passing of the Indian Coinage and Paper Currency Act, 1893, the Presidency Post Offices and a few other large offices were authorised to accept sovereigns and half sovereigns at the rate of 15 rupees to the sovereign; but, with the prevailing rates of exchange, the permission given to the public to pay postal charges in gold was naturally used to an extremely limited extent, and only seventy-two sovereigns and six half sovereigns were paid in by the public during the remainder of the year.

Section X.—Non-Postal Branches of the Post Office.

Postal Telegraph (combined) Offices.

51. The most important of these branches of postal administration is the combined office system under which the Post Office has a large number of its postmasters and clerks trained as telegraph signallers and employs them to work telegraph offices in post offices, the lines and instruments being set up and maintained by the Telegraph Department. During the year under review 142 new postal telegraph offices were opened and 8 such offices were closed. There was, therefore, an increase of 134 in the total number of combined offices, as compared with an increase of 91 during the previous year. Of the 142 new combined offices, 125 were at places which had previously been without a Government telegraph office and 96 at places where there had previously been no Government or Railway telegraph office.

Traffic statistics of combined offices.

52. The statement given below shows the traffic statistics of combined offices under the Post Office according to Postal Circles, and it will be seen that Madras again heads the list with a total of 193 combined offices and a revenue of over 2¾ lakhs of rupees derived from telegrams. The number of combined offices in the three circles forming the Lower Provinces of Bengal was 206. The number of messages dealt with by all the combined offices in India shows an increase of 149,005 or 12·90 per cent. as regards messages sent, and of 143,699 or 11·94 per cent. as regards messages received. The revenue shows an increase of ₹1,19,698 or 9·92 per cent. over the figures of the previous year, while the total revenue from messages sent from combined offices exceeded the expenditure on the establishments of the offices by ₹9,98,443 :—

Traffic Statistics of Postal Telegraph (Combined) Offices for the year 1893-94.

Names of Circles.	Number of combined offices open on 31st March 1894.	Total cost of local Postal Establishments and fixed contingent allowances debitable to the Telegraph Department for working combined offices during the year.	Number of Messages. * Excluding 66,374 free messages.

Progress of combined office system.

53. The first combined office was opened on the 1st October 1883, so that the year under report was the tenth year of the system. The following figures show the progress of the system from the beginning :—

Year.	Number of postal telegraph (combined) offices in post offices.	Total number of departmental and postal telegraph offices (excluding railway offices).
1882-83 (last year before commencement of combined office system).	.....	314*
1883-84	55	349
1884-85	267	521
1885-86	388	634
1886-87	440	699
1887-88	486	745
1888-89	552	797
1889-90	632	880
1890-91	689	949
1891-92	754	1,001
1892-93	845	1,100
1893-94	979	1,224

* On 31st March 1883. The number when the first postal telegraph office was opened on 1st October 1883 was 318.

In the 10½ years from the commencement of the system the total number of Government telegraph offices has increased from 318 to 1,224; and, of the 1,224 offices on the 31st March 1894, 979 were postal telegraph offices. Of the latter, 135 are at the head-quarters of districts. There were 1,711 trained and qualified signallers in the employment of the Post Office at the close of the year.

Boy messengers.

54. The employment of boys as messengers for the delivery of telegrams has been under trial for some time, and on the 31st March 1894 there were 88 boy messengers employed in combined offices. Since the close of the year the measure has been recognised as having passed the experimental stage, and adult messengers have already been replaced by boys in more than 150 postal telegraph offices at a material saving of expenditure without any sacrifice of efficiency.

Telegraph Receiving Offices. Delivery of deferred telegrams.

55. Apart from the 979 combined offices at which telegrams are despatched and received by wire, 1,751 post offices were authorised to receive telegrams for despatch by post to the nearest telegraph office. This number was 36 less than at the close of 1892-93, the decrease being a consequence of the increase in the number of combined offices. The number of telegrams booked and the revenue realized at these receiving offices were also slightly less than in the previous year, being 36,350 messages and ₹33,491, as compared with 40,746 messages and ₹38,073, during the year 1892-93. The Post Office also undertakes the delivery everywhere of deferred telegrams whether the telegraph office of address is departmental or postal. These telegrams form now more than 56 per cent. of the total number of telegrams in India and about two million deferred telegrams were delivered by post in the year under report.

The number of messages collected by post offices in the Persian Gulf on account of the Indo-European Telegraph Department was 310 against 380 in 1892-93, and fees to the amount of ₹2,307-14-0 were realised as compared with ₹2,635-1-0 in the previous year.

Post Office passenger and bullock train services between Kalka and Simla.

56. The Government passenger and goods services between Kalka and Simla were worked satisfactorily and economically during the year under report. As was stated last year it is impossible to divide the charges of the two services, the workshop and many members of the establishment being common to the combined service and the bullocks relieving the horses from drawing returning tongas up and down the line. The gross expenditure on the combined service was ₹2,93,556 and against this there were receipts amounting to ₹1,68,163 from the passenger service and ₹78,565 from the bullock train. The excess of charges over receipts was thus ₹46,828 and this represents the cost of the Kalka-Simla mail service. The corresponding figure in 1892-93 was ₹71,362. As throughout the year, on the average, five mail tongas travel daily up the hill and four tongas down the hill, the cost to the Post Office of each service of 58 miles was in the year under report only ₹14-4-0. It would be impossible to make a contract for such a service on such moderate terms.

Receipt of salt revenue at post offices.

57. The modified system of receiving salt revenue at Post Offices, described in last year's report, remained in force throughout the year in the North-Western Provinces and Oudh, the Punjab, the Central Provinces, Rajputana, and Central India, but the transactions were insignificant, only 479 indents in all being forwarded through the Post Office for 78,843⅛ maunds of salt of the gross value of ₹2,19,539. The question whether the Post Office should cease to act as an agent in this matter, or whether an attempt should be made to make its agency more popular is now under consideration.

Sale of quinine at post offices.

58. Since the last quarter of the year 1892 the services of the Post Office have, wherever they have been asked for, been placed at the disposal of Local Governments and Administrations for the retail sale of quinine in small closed packets. The Post Office merely acts as an agency for the sale, each postmaster receiving a small permanent advance of quinine and a commission of one anna in the rupee on his sales, and being required to remit by money order to the supplying depôt the price of all supplies indented for after the original permanent advance. This scheme, which was introduced in the Lower Provinces of Bengal in 1892, has since been sanctioned for all provinces in India with the exception of the North-Western Provinces and Oudh where it is still under consideration, but it was in force only in the Lower Provinces throughout the year under report. The total permanent advance of quinine held by postmasters in the three circles of Bengal, Bihar, and Eastern Bengal, which form the Lower Provinces, was 337½ lb at the close of the year; and ₹20,756, the proceeds of sales of more than 1½ millions of 5-grain packets, was remitted by postmasters during the year to the central depôt for further supplies of quinine. The quinine is sold in packets of 5 grains at the price of one pice per packet.

Postal Life Insurance and Monthly Allowances.

59. A separate report has, as usual, been submitted on the operations of the schemes under which the Post Office issues life insurance policies and contracts for monthly allowances in favour of servants of the postal and telegraph departments. The scheme for monthly allowances is practically inoperative and there were only six contracts in existence at the close of the year. This is however natural with the present scope of the scheme, as the general pension rules provide for Government servants in their old age. On the other hand the popularity of the life insurance scheme continues, and 244 new policies for the aggregate amount of ₹3,52,700 were issued in the year. In the 10 years since the scheme was started on the 1st February 1884, 2,023 lives have been insured; and at the close of the year under report there were 1,731 active policies existing, 1,401 of which were held by post office servants and 330 by servants of the telegraph department. The aggregate amount insured at the end of the year was ₹24,56,350. Twenty-four claims for ₹34,000 were paid during the year on the deaths of insurants.

Payment of native military pensioners through the Post Office.

60. The special scheme for the payment of native military pensioners through the Post Office which was introduced in the Punjab in 1890 continued to work satisfactorily in that circle, and there was no attempt at fraud of any kind. The total number of pensioners paid during the year was 22,271 and the amount paid to them was ₹15,75,526-4-0. By an arrangement concluded after the close of the year the Post Office receives from the Military Department a credit of 12 annas per cent. to meet its expenses in respect of these payments.

Section XI.—Financial Results.

Receipts and expenditure according to departmental accounts.

61. The receipts and charges of the year, as shown in the Post Office accounts, are given in detail in Appendix X under two main heads, Postal Service proper and Non-postal branches, and a summary will be found in the statement below:—

	Receipts.		Charges.	
	1892-93.	1893-94.	1892-93.	1893-94.
	₹	₹	₹	₹
1. Postal Service proper	1,45,46,185	1,52,45,783	1,15,56,908	1,17,78,376
2. Non-Postal Branches—				
(a) Bullock Train	96,185	73,773	2,55,039	2,42,703
(b) Passenger Service	1,58,854	1,68,930		
(c) Mail Steamer Subsidies	...	...	6,66,394	6,28,335
(d) Contributions from Native States	11,295	11,364	...	...
Total	1,48,12,519	1,54,99,850	1,24,78,341	1,26,49,414

Under Postal Service proper the receipts were in round figures 7 lakhs in excess of those for 1892-93, while the charges rose by less than 2¼ lakhs. The improved receipts included an increase of ₹5,29,483 from the sale of ordinary postage stamps, an increase of ₹66,499 from the sale of service postage stamps, and a net increase of ₹1,07,404 from money order commission and postage paid in cash. Under the head of "Non-postal branches" the receipts were ₹12,267 less than in the preceding year, the falling off being in bullock-train receipts. None of the items of postal expenditure call for any special notice. Altogether the receipts exceeded the charges by ₹28,50,436.

Financial position of the Post Office.

62. In Appendix XI is given a comparative abstract of the receipts and charges of the Post Office for the year, including, under a distinct head (III) certain receipts and charges which find a place in the Finance and Revenue accounts but not in the Post Office accounts. The entries under this head are quoted in the margin, and if these totals be added to the totals given in the preceding paragraph, the entire receipts of the year amount to ₹1,55,75,971, and the entire charges to ₹1,55,82,814. There was thus a deficit of ₹6,843 on the year's transactions, as shown in the Finance and Revenue accounts. The charge on account of District Post establishment has, however, to be excluded, as it is entirely met by grants from District Post funds which, with the exception of the item of ₹76,121 shown in the marginal table, are not credited

Receipts, 1893-94.	₹	Charges, 1893-94.	₹
District Post collections, including zemindary dâk receipts in Bengal	76,121	District Post establishment, including zemindary dâk in Bengal	12,17,660
		Stores from England	4,25,180
		Payments under postal arrangements with Lords of the Treasury	6,14,750
		Exchange on charges in England	6,75,810
Total	76,121	Total	29,33,400

to the Post Office in the Finance and Revenue accounts. The actual accounts of the year, therefore, show a surplus of ₹11,34,696. In order, however, to bring out the year's financial results of the Post Office in the usual way, the net balance of the items shown in the margin must be deducted from the surplus just noted, and the net financial result is then a surplus of ₹4,62,385, as compared with ₹1,95,057 in 1892-93. In this estimate of the financial position of the Post Office the entire charge estimated at ₹2,85,000 for establishments employed in connection with the Post Office Savings Bank is debited to the Post Office, and no credit is taken on account of the reduced rates of postage for inland official correspondence.

	Details.	Total.
	₹	₹
Add—Railway free service estimated	95,081	
Rent of Government buildings	3,08,145	
Gratuities	5,755	
Leave allowances paid in Great Britain	23,574	
Pension (being the average of five years, capitalized at 10·165 years' purchase)	3,78,368	
		9,01,823
Deduct—Share of Marine subsidies which should strictly have been borne by the Military, Political, and other Departments	1,94,779	
Postage on unpaid official correspondence sent from India to the United Kingdom (formerly collected and brought into account)	34,733	
		2,29,512
Net amount to be added		6,72,311

Section XII.—Notice of Post Office Officials.

Mention of special services.

63. In the course of this report I have had occasion to notice the services of Mr. Stewart-Wilson, when acting as Post Master General of the North-Western Provinces, in negotiating and carrying out the arrangements for the absorption of the irregular "Mulki" post of Kumaon into the general postal system. On Mr. Stewart-Wilson also fell the labour of organising and giving effect to the scheme for the amalgamation of the North-Western Provinces and Oudh circles. The following officers, whose names have during the year been prominently brought to notice by the heads of their circles, deserve also to be specially mentioned:—Mr. Merrett, Presidency Post Master of Bombay, for successfully maintaining the local postal arrangements during the riots of August 1893; Rai Bahadur Daulat Ram, Superintendent of Mails and Superintendent, Simla Division, for the financial success and efficiency of his administration of the Simla-Kalka mail and coaching services; Mr. Pereira, Superintendent of Town Sub-Offices, Calcutta, for unusual detective ability and for his labours in reorganising the Calcutta local deliveries; Mr. Dinwiddie, Superintendent of Coimbatore (Madras), for exceptional zeal and success in the administration of his division; Mr. L. C. Byrne, Superintendent, Railway Mail Service, for excellent work during the breaks on the South Indian Railway; and Messrs. Peter and Chard, Superintendents attached to the offices of the Post Masters General of Madras and the Punjab, for valuable assistance given to the heads of their circles in technical matters. Since the close of the year the Post Office has, I regret to record, lost the services of Mr. G. J. Hynes, an experienced and able officer who, after a long and successful career in the department in different administrative capacities, held for three years the rank of Post Master General and the position of Deputy Director General of the Post Office. Mr. Hynes left India in September 1894 on long leave preparatory to retirement. Mr. A. G. Faichnie, the senior Deputy Post Master General, who thirty years ago gained a high reputation by the organisation and administration of the Punjab Military Horse Van Post, retired in October 1894 after a service in the Post Office of more than 36 years.

SCHEDULE OF PRINCIPAL STEAM SERVICES (1893-94).

By the British India Steam Navigation Company.	
(1) Weekly communication between Calcutta, Rangoon, and Moulmein. (2) Weekly communication between Calcutta and Rangoon *viâ* Chittagong, Akyab, Kyouk-Phyu, and Sandoway. (3) Weekly communication between Rangoon and Mergui *viâ* Tavoy. (4) Fortnightly communication between Madras and Rangoon, touching at certain intermediate ports on the north-east coast of Madras. (5) Weekly direct communication between Bombay and Karachi. (6) Weekly communication between Bombay and Karachi *viâ* the Coast ports. (7) Weekly communication between Karachi and Basrah *viâ* the Persian Gulf ports.	Under contract with the Post Office for ten years, from 1st May 1884, on an annual subsidy of ₹4,39,000.
(8) Fortnightly communication between Madras and Bimlipatam *viâ* Masulipatam, Coconada, and Vizagapatam. (9) Weekly communication between Tuticorin and Colombo.	Under supplementary contract with the Post Office, from 6th May 1886 to 30th April 1894, on an annual subsidy of ₹15,000.
(10) Bi-weekly communication between Tuticorin and Colombo.	There is no regular contract with the British India Steam Navigation Company for this supplementary service, which began on the 1st March 1892, but the understanding is that it may be used up to the 30th April 1894 by the Indian and Ceylon Post Offices, on payment of an annual subsidy of ₹3,000, to be shared equally between the Governments of India and Ceylon.
(11) Weekly communication between Kyouk-Phyu, Cheduba, and Ramree.	Under contract with the Local Administration for ten years, from 18th November 1884, on a monthly subsidy of ₹1,500 for the first five years and ₹1,200 for the second period of five years, subject to other arrangements if intermediately made.
(12) Additional services between India and Burma and Burma and the Straits.	These additional services are not included in the contract with the British India Steam Navigation Company, but it has been arranged that the Post Office may use them until 30th April 1894 on payment of ₹50,000 annually.
By the Asiatic Steam Navigation Company.	
(13) Six-weekly communication between Calcutta and Port Blair, with extensions to Madras and Rangoon.	The consideration is not in the form of subsidy, but of guaranteed rates for the transport of Government stores: the contract is for five years, from 1st January 1888, and is terminable after the five years by a notice of six months.
By the Irrawaddy Flotilla Company.	
(14) A daily service between Mandalay and Myingyan to and fro each way (except on Sundays). (15) A daily service between Myingyan and Pokôkku to and fro each way (except on Sundays). (16) A daily service between Prome and Thayetmyo to and fro each way (except on Sundays). (17) A bi-weekly service between Thayetmyo and Pokôkku to and fro each way. (18) A weekly service between Pokôkku and Kindat to and fro each way. (19) A weekly express service between Mandalay and Bhamo to and fro each way.	Under contract with the Local Administration for five years from the 1st January 1891 to the 31st December 1895. The subsidy is ₹9,000 per mensem, towards which the Post Office contributes ₹3,500 per mensem.
(20) A tri-weekly service between Rangoon and Bassein. (21) A bi-weekly service between Bassein and Henzada.	Under contract with the Local Administration from 1st July 1880, and to continue in force until six months' notice is given by either party, the subsidy being ₹2,500 per mensem, towards which the Post Office contributes ₹500.
(22) A bi-weekly service between Rangoon and Pyapon.	Under contract with the Local Administration from 1st October 1882, and to continue in force until six months' notice is given by either party. The subsidy is ₹800 per mensem.
(23) A daily service between Rangoon and Kyauktan, and *vice versâ*.	The service is under contract with the Post Office from 1st September 1892; period not fixed, but terminable at any time by two months' notice. Monthly subsidy is ₹125.

(24) A bi-monthly service between Sinbo and Myitkyina and *vice versâ*. (25) A bi-monthly service between Bhamo and Sinbo and *vice versâ*.	Under contract with the Local Administration from 1st April 1893, and to continue in force until 1st April 1894, but terminable at any time by 30 days' notice from either party. Monthly subsidy is ₹500.

By the Euphrates and Tigris Steam Navigation Company.

(26) Weekly communication on the River Tigris between Basrah and Bagdad.	Under contract for ten years, from the 1st May 1884, with Her Majesty's Secretary of State for India. Subsidy is ₹30,000 per annum; steamers run in connection with line No. 7.

By Messrs. Apcar & Co., Calcutta, and Jardine, Matheson & Co., Hong-Kong.

(27) Communication at irregular intervals between Calcutta and the Straits and Hong-Kong, the dates of departure being regulated mainly with reference to the Calcutta opium sales.	No subsidy.

By the Peninsular and Oriental Steam Navigation Company.

(28) Fortnightly communication between Calcutta and Colombo, touching occasionally at Madras. (29) Fortnightly communication between Bombay and Colombo.	Non-contract lines maintained by the Company in connection with the China and Australian mail services. The Post Office pays by weight for the conveyance of mails sent by these non-contract steamers.

By other Agencies.

(30) By River Steam Navigation Company.—Daily communication between Jatrapur and Dibrugarh on the Brahmaputra River.	Under contract with the Post Office from the 1st May 1893 to the 1st May 1898. Annual subsidy ₹75,000, towards which the Bengal Government and the Assam Administration contribute ₹40,000.
(31) By India General Steam Navigation Company.—Daily communication between Naraingani and Silchar. (These steamers, however, only run as far as Fenchuganj from 1st November to 15th May and as far as Karimganj during the month of October.)	Under contract with the Post Office for five years from 1st January 1892 on an annual subsidy of ₹20,000, of which the Assam Administration pays half.
(32) By India General Steam Navigation Company.—Bi-weekly communication between Calcutta and Cuttack *viâ* Chandbali.	Under contract with the Post Office from the 14th September 1887; period not fixed, but terminable at any time by one calendar month's notice. Monthly postal subsidy is ₹300.
(33) By Messrs. Shepherd & Co.'s Steamers.—Daily communication between Bombay and Goa.	Under contract with the Local Government, from 1st October 1893 to 31st May 1894. The monthly subsidy is ₹3,000, towards which the Post Office contributes ₹969-6 and the Portuguese Government ₹200.
(34) By Bengal Central Flotilla Company.—Daily communication between Khulna and Barisal.	Under contract with the Post Office from 1st July 1889 to 30th June 1894, but terminable at any time by six months' notice. Monthly postal subsidy ₹350, of which the Imperial Post Office contributes ₹183.
(35) By Bengal Central Flotilla Company.—Four times a week between Barisal and Taktakhali.	No contract has been entered into with the Company, but they have been carrying the mails since 1st April 1892 on a monthly subsidy of ₹100.
(36) By Messrs. Hoare, Miller & Company.—Daily communication between Calcutta and Midnapore.	No contract was entered into with the Company, but they have been carrying the mails since December 1882. Subsidy ₹60 a month.
(37) By Mr. G. E. L. Dawson of Mandalay.—A tri-weekly steamer service between Buthidaung and Akyab and *vice versâ* from 1st October to 30th April in each year and during the remaining months of each year a bi-weekly service. (38) By Mr. G. E. L. Dawson of Mandalay.—A bi-weekly steam launch service between Akyab and Paletwa and *vice versâ* throughout the year.	Under contract with the Local Administration for five years from 15th February 1890, but terminable at any time by either party giving six months' notice. Subsidy ₹15,000 a year.
(39) By Messrs. Dawson and Thompson of Moulmein.—A daily steam launch service except on Sundays from Moulmein to Duyinzeik and *vice versâ* and a tri-weekly service from Moulmein to Shwegon and *vice versâ*.	Under contract with the Local Administration, from 1st May 1891 to 1st May 1895, on a monthly subsidy of ₹500.
(40) By Salween Steam Navigation Company of Moulmein.—A bi-weekly steam launch service between Moulmein and Kyondo and *vice versâ*, and a daily service between Moulmein and Natmaw and *vice versâ*.	Under contract with the Local Administration for two years from 1st February 1893. The Local Government may terminate contract by giving six months' notice. Subsidy ₹3,000 a year.

Appendix No. I.

Statement showing the numbers of Post Offices and Letter-Boxes (excluding those at post offices) opened, and Village Postmen entertained during the year 1893-94, and the total numbers at the end of the official years 1892-93 and 1893-94.

[This Appendix relates only to the Imperial Post and does not include figures of the District Post.]

Railway Mail Service	4	28	32
Total of 1893-94	190	150	340
Total of 1892-93	170	106	276

NOTE.—The figures in this Appendix show the cases in which punishment was awarded during the year, as it is only when a case is closed that it can be entered with certainty as having been committed by a Post Office servant.

Besides the 340 cases shown above, there were 56 cases in which offences were apparently established against postal officials, but in which no punishment was imposed owing to the cases not being concluded or to the death or escape of the offenders.

* The Oudh Circle was amalgamated with the North-Western Provinces from the 1st May 1893.

Column 2.—These figures represent the net proceeds of the sale of ordinary postage stamps after deducting discount to vendors.

Column 3.—The great differences observable in this column are due mainly to changes of system in the treatment of official correspondence, which was charged at full letter rates up to 1865-66, at the same rates as ordinary correspondence (letters, packets, etc.,) from that year to 1872-73, and afterwards at a low privileged letter rate of one anna for 10 tolahs (about 4 oz.)

Column 8.—The figures in this column show the revenue undisturbed by the changes of system in respect of official correspondence mentioned in the note regarding Column 3.

Column 12.—The figures in this column show the proportion of the cash collections in column 4 to the total postal revenue of columns 2, 3, and 4. The comparison commences with the year 1872-73, when the official postage rate was reduced (see note on column 3) and the whole collected in stamps.

Columns 21 to 26.—Three digits are omitted from the figures in these columns.

Columns 27 and 28.—These figures cannot be given prior to 1873-74, owing to a difference in the system of statistical record.

Column 29.—The registration of newspapers only commenced in the year 1871-72 and ended in 1877-78.

(a) Revised so as to include letters to Gibraltar, Malta, and places east of Suez.

(b) Revised so as to show the number of articles exchanged with the United Kingdom instead of the number of postage rates.

* Including post cards from 1879-80.

† 1,712 miles of lines under this head have in 1884-85 been included in column 19.

GOVERNMENT OF INDIA.

FINANCE AND COMMERCE DEPARTMENT.

ANNUAL REPORT ON THE OPERATIONS OF THE SAVINGS BANKS IN INDIA DURING THE YEAR 1893-94.

No. 518 A., dated Calcutta, the 30th January 1895.

ORDER—By the Government of India, Finance and Commerce Department.

READ—

Report by the Comptroller and Auditor General on the operations of the Savings Banks in India for the year 1893-94 and annexed statements.

ORDERED—That the Report and the statements be published in the *Gazette of India* for general information.

STEPHEN JACOB,
Offg. Secretary to the Government of India.

No. 25, dated Calcutta, the 8th January 1895.

From—The Comptroller and Auditor General,
To—The Secretary to the Government of India, Finance and Commerce Department.

I have the honour to submit my Annual Report on the operations of the Savings Banks in India during the year 1893-94.

The Banks which are open to the public are the Presidency and Post Office Savings Banks. In addition to these there are certain Service Institutions, *viz.*, (1) The State Railway Provident Institution, (2) the Civil Engineers' Provident Fund, and (3) the Military Banks. The first of these is open to non-pensionable employés of the State Railways, the second is for members of the Public Works and Telegraph Departments, and the last for Non-Commissioned Officers and Privates of British Regiments.

I enclose the usual Statements marked I to VII, containing the accounts and statistics for the year.

The principal features of the returns are shown in the following table, which also compares them with those of the previous year :—

DESCRIPTION OF BANKS.	BANKS.		DEPOSITORS.		INTEREST EARNED.		BALANCE.		NOMINAL VALUE OF GOVERNMENT PROMISSORY NOTES.		AVERAGE OF DEPOSITOR'S BALANCE.	
	Number.	Increase + or Decrease − over previous year.	Number.	Increase + or Decrease − over previous year.	Amount.	Increase + or Decrease − over previous year.	Amount.	Increase + or Decrease − over previous year.	Balance of Government Promissory Notes held for depositors.	Net purchased or received + sold or returned − during the year.	Amount	Increase + or Decrease −.
		₹		₹	₹	₹	₹	₹	₹	₹	₹	₹
Presidency, Calcutta	1	...	10,823	−145	91,605	+1,987	24,88,355	−76,626	44,200	+14,000	229	−4

Military	171	−1	15,920	+2,673	50,791	+2,402	14,61,719	+2,98,074	...	...	91	+4
Post Office	6,358	−50	574,050	+53,083	29,34,960	+2,40,867	8,26,57,319	+44,69,592	4,50,300	+53,900	143	−7
TOTAL	6,544	−50	644,658	+56,307	36,72,399	+2,81,648	10,32,24,306	+54,77,754	5,83,400	+67,900		

The statement shows that on the 31st March 1894 there were 6,544 Government Savings Banks in India, containing 644,658 accounts, which earned from Government ₹36,72,399 in the shape of interest and possessed balances at their credit, aggregating ₹10,32,24,306, exclusive of Government Securities of the nominal value of ₹5,23,400 held on behalf of depositors. There has been an increase during the year of 56,307 in the number of depositors, ₹2,81,648 in interest, and ₹54,77,754 in the balance as compared with 1892-93.

As the detailed report on the working of the Post Office Banks has been submitted by the Director General of the Post Office, it is only necessary here to make some observations in respect of the other Banks.

The tendency which has been before observable in Calcutta and Madras to prefer the Post Office Savings Banks to the Presidency Savings Banks is again apparent in the year under report. In Bombay the number of depositors has ceased to increase and is stationary, but the amount deposited has decreased considerably, indicating perhaps that the Post Office Savings Bank is about to be preferred there also.

The Military Banks show a great increase both in the number of accounts and balance.

The balances of the Service Institutions continue gradually to increase and now amount to ₹82,74,741, while the balances of the Savings Banks proper, including the Military Savings Banks, aggregate ₹9,49,49,565, showing an increase of 45 lakhs during the year of money deposited with Government at call. The effect of the reduction in the rate of interest in Government Promissory Notes will naturally be to make over Savings Banks deposits increase most rapidly in future than they have in the past, and to discourage the investment of deposits in Government paper.

My ledgers relating to the Civil Engineers' Provident Fund have been agreed with the amounts kept by the Examiner of Acounts, Military Works, but the Finance and Revenue account are not finally closed, and the figures for the year 1893-94 are subject to revision.

Statement I.

Number of Working Banks and of the Depositors therein on the 31st March 1894.

STATISTICS AND COMMERCE.
Customs.

To

THE SECRETARY TO THE GOVERNMENT OF BOMBAY,
REVENUE DEPARTMENT.

Calcutta, the 23rd January 1895.

SIR,

I AM directed to acknowledge the receipt of your letter No. 7447, dated the 6th September 1894, making enquiries as to the liability of certain articles to assessment under Schedule II of the Indian Tariff Act, 1894.

2. I am to observe that under this schedule, as amended on 27th December last by Act XVI of 1894, *first*, every article that is ordinarily known as "ammunition" or "military stores" will be assessed as such, unless it is specifically mentioned in another schedule of the Act; and, *secondly*, such other articles (if any) will be so assessed as the Governor General in Council may declare to be "ammunition" or "military stores" for tariff purposes.

L

3. Applying these principles to the specific instances mentioned in your letter, it will be evident—

(1) that gunwads, wire cartridges, and bullets, being ordinarily known as "ammunition," are chargeable with duty under Schedule II of the Tariff Act; while

(2) sulphur, lead, and bird-shot, being specifically mentioned in Schedule IV, and not having been declared to be "ammunition" or "military stores" for the purposes of the Tariff Amendment Act, are chargeable with duty at 5 per cent. under the appropriate heads of Schedule IV.

I have the honour to be,

SIR,

Your most obedient Servant,

G. H. R. HART,

Offg. Asstt. Secy. to the Govt. of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the week ending at 8 a.m. on Saturday, January 19th, 1895.

General Summary.—A feeble cold weather disturbance, which travelled across Northern and Central India from Khandesh and the adjacent districts of the Central Provinces, gave light to moderate general rain in the North-Western Provinces, Bihar, Chota Nagpur and North Bengal on the 15th, Meerut receiving 1·43 inches and Mainpuri and Benares each nearly 1 inch. It passed through Bengal next day, and light showers of little importance were received in Chota Nagpur, Bihar, Bengal and Assam. On the 13th and 14th pressure gave way briskly in Baluchistan and North-Western India, and skies were moderately to heavily clouded, especially in Baluchistan and the Punjab hill districts, but the barometer rose rapidly on the 15th and the disturbance filled up, after having given only a few light falls of snow in the Upper India hill districts. During the greater part of the week fine and unusually cool weather prevailed over Northern and Central India. Temperature was in general excess of the normal in Burma and Madras, and during the first part of the week in Bengal, Bombay and the Central Provinces, but in all other parts of India temperature was in moderate to large defect. The mean temperature for the whole of India for the week was nearly 2° below the normal.

A heavy fall of rain, amounting to 2·08 inches, was received at Colombo on the 16th, but no rain fell in Southern India during the week.

Daily Summary.—*Sunday.*—Pressure had given way briskly in Baluchistan, the North-West Punjab, Gujarat and Assam. A shallow low-pressure area was covering North Bengal, where pressure was considerably below the normal. Cloud had commenced to form in West Baluchistan, and skies were heavily clouded in the hill districts of the North-West Punjab. No rain was reported.

Monday.—The barometer had fallen briskly in Baluchistan, the West Punjab, Sind, Rajputana and Gujarat, and weather was slightly disturbed in North-Western India. It had risen briskly to rapidly in Bengal and Assam. Pressure was in moderate to considerable defect in Khandesh and the Central Provinces, and was nearly normal elsewhere. Winds had increased at Cherat and Murree and were irregularly cyclonic in direction in Khandesh and the Central Provinces. Nowgong and Sutna had received light showers.

Tuesday.—The barometer had risen briskly to rapidly in Baluchistan, North-Western India and Khandesh, and the low-pressure area in Khandesh had advanced eastwards, giving light to moderate general rain to the North-Western Provinces, Bihar, Chota Nagpur and North Bengal. Meerut received 1·43 inches, Mianpuri ·84 inch and Benares ·83 inch. Light snow had fallen at the Upper India hill stations, but the disturbance affecting Baluchistan and North-Western India had filled up without giving any rain to the plains.

Wednesday.—Pressure had increased slightly in North-Western and Central India, and was in moderate to considerable excess in Sind and Rajputana. Pressure had given way slightly to briskly in Bengal, Assam and Burma, and the feeble disturbance from Khandesh was passing through Bengal. Light

showers were reported from Chota Nagpur, Bihar, Bengal and Assam, and from the Upper India hill districts. The heaviest fall, however, was only ·35 inch at Simla. Colombo had received a heavy fall of 2·08 inches.

Thursday.—Pressure had fallen briskly to rapidly in Sind and the Punjab, and had changed by only small amounts elsewhere. The relative distribution of pressure was practically normal. Skies had cleared in the Central Provinces, Baluchistan and the Punjab, and the only showers of rain reported were Colombo ·4 inch and Chaibassa ·31 inch.

Friday.—The pressure changes were small in amount over the greater part of India, and the distribution of pressure varied but little from the normal. Fine weather prevailed generally with unusually low temperatures in Northern and Central India, the Central Provinces and the North Deccan. Temperature was in excess of the normal in Lower Burma and Southern India. With the exception of some parts of Bengal and Madras, skies were clear over the whole of India and Baluchistan. Sibsagar reported a light shower of ·4 inch.

Saturday.—Pressure had decreased slightly in Baluchistan and North-Western India, and had increased slightly in North-Eastern India, Burma and the Peninsula. Skies had clouded over in Baluchistan and the Upper India hill districts, where weather conditions were slightly unsettled. Pressure was in moderate defect in the hill districts of the Punjab and North-Western Provinces, but was practically normal over the remainder of the Indian area. Sibsagar had received a light fall of rain amounting to ·2 inch.

Temperature.—Unusually low temperatures have been recorded in the Punjab, Sind, Rajputana, Gujarat, Central India, the North-Western Provinces and, towards the end of the week, in Bengal and the Central Provinces. In Burma and Madras, on the other hand, temperature has been in excess of the normal. In Sind and Rajputana during the first four days of the week temperature was in large defect; the deficiency ranging from 6°·2 on the 16th to 10°·2 on the 15th. On the 15th Jacobabad reported a maximum temperature 19°·6 below the normal of the day.

The following table gives the variations of the mean temperature from the normal on each day of the week for the different provinces of India :—

Province.	January, 1895.							Mean variation of week.
	13th.	14th.	15th.	16th.	17th.	18th.	19th.	
	°	°	°	°	°	°	°	°

Bengal and Assam	+5·5	+3·2	+2·0	—0·3	+1·2	—1·8	—3·5	+0·9
North-Western Provinces and Oudh	—2·8	—4·1	—4·4	—2·6	—3·0	—4·8	—3·9	—3·7
Punjab	—5·6	—6.1	—6·3	—3·8	—2·7	—3·0	—2·3	—4 3
Bombay	+1·6	+2·5	+1·1	—0·1	—0·1	—1·0	—0·6	+0·5
Central Provinces and Berar	+2·9	+1·0	+4·6	+2·3	—1·2	—4·7	—5·2	0
Central India and Gujarat	—4·7	—4·2	—4·4	—4·8	—7·7	—6·8	—4·8	—5·3
Sind and Rajputana	—6·8	—7·4	—10·2	—6·2	—6·6	—3·8	—2·3	—6·2
Madras	+1·5	+2·3	+2·3	+1·8	+2·3	+1·7	+1·3	+1·9
	°	°	°	°	°	°	°	°
Mean for whole of India	—0·7	—1·2	—1·4	—1·2	—1·7	—2·4	—2·2	—1·6

The mean temperature of the week was exactly normal in the Central Provinces and nearly normal in Bombay and Bengal. It was in slight excess in Madras and in moderate excess in Burma. In all other provinces it was in considerable to large defect, the deficiency being most marked in Sind and Rajputana (—6°·2) and Central India and Gujarat (—5°·3).

The average mean temperature of the whole of India was approximately normal on Sunday, but was in slight to moderate defect on the remaining six days of the week. For the whole week it was 1°·6 below the normal.

Rainfall.—During the week under review rain has been received in 27 of the 52 rainfall divisions, but the largest average fall was only ·77 inch in the central districts of the North-Western Provinces. In only 3 other divisions did the rainfall amount to half an inch, in six others it amounted to a quarter of an inch or slightly above, while in no less than 13 divisions it did not exceed a tenth of an inch. The rainfall of the week has been mainly restricted to the North-Western Provinces, and very little rain was received elsewhere. The station of Shahabad in South Oudh recorded the largest amount of rain during the week, *viz.*, 1·9 inches.

Less rain than usual has fallen in most divisions during the period, 30th December to 19th January. The only parts of the country where rainfall has been received in excess of the normal are the North-Western Provinces, the Punjab (with the exception of the western districts), Central India and East Rajputana.

W. A. BION,
Offg. Asst. Meteorological Reporter to the Government of India.

SIMLA, *24th January, 1895.*

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 26th January.*—No rain except slight scattered showers in Vizagapatam and Godavari. Water-supply continues insufficient for irrigation in most districts. Agricultural operations progressing Standing crops fair, but suffering from want of rain. Harvest continues with fair outturn. Pasture and fodder generally sufficient. Prices falling generally, except in Coimbatore and Madura where they are rising.

Bombay.—*For week ending 30th January.*—Slight rain in parts of Karachi, Shikarpur, and Hyderabad, more wanted in parts of Shikarpur. Standing crops damaged by frost in parts of Karachi, Shikarpur, and Upper Sind frontier, by blight in parts of Karachi and Dharwar, by insects in parts of Surat and withering for want of moisture in parts of Poona. Reaping continues in parts of seven districts and preparations for next season in parts of three. Fodder-supply sufficient. Agricultural stock good. Prices normal, except in parts of Ahmednagar and Sholapur.

Bengal.—*For week ending 28th January.*—There was rain in Bihar and in parts of Western and Central Bengal during the week. The general agricultural prospects are favourable. The harvesting of winter rice is over except on low lands in a few districts, and a good outturn has been generally obtained. The spring and poppy crops are doing well, but poppy is backward in Hazaribagh. Sugarcane is being pressed in some districts. The sowing of spring rice is in progress, and the preparation of lands for the hot-weather crops has begun in North Bengal. No cattle-disease is reported. The price of common rice continues generally steady and normal.

North-Western Provinces and Oudh.—*For week ending 30th January.*—Weather generally clear. Showers reported from nine districts. The crops are now promising well. In a few districts slight injury has been done by damp weather. Sugarcane-pressing in progress. Prospects are generally favourable. Supplies and fodder ample and prices fairly normal.

Punjab.—*For week ending 30th January.*—Rain has fallen in all districts, except Sialkot, Lahore, and Peshawar. Sugarcane pressing still going on in some districts. Irrigation of spring crops in progress. Crops flourishing;

condition is said to be good to average. The recent rain and sunshine have improved the prospects of spring crops, but fine weather is still needed in Umballa. Field rats are damaging the crops in parts of Ferozepore. Cattle generally in good condition. Fodder sufficient throughout the Province. Prices rising in Umballa, normal in Delhi, below normal in Sialkot, and low elsewhere.

Central Provinces.—*For week ending 30th January.*—Weather generally cloudy with slight falls of rain in three districts. Insects are reported to have attacked the false crop in places. Harvesting of the linseed crop commenced in one district. Prices normal.

Burma.—*For week ending 26th January.*—In Lower Burma threshing progressing and crop prospects fair. In Upper Burma threshing of the main paddy crop is in hand and sowing of dry-weather paddy and other crops has made some progress. Crop prospects are good, except in the Southern Division where want of rain has been felt. In Lower Burma prices rose during the week and are above normal. In Upper Burma prices remained steady and are low in consequence of good crops. Fodder and water sufficient.

Assam.—*For week ending 29th January.*—Slight rain throughout the province. Reaping of late rice almost over. Condition of cattle fair. Fodder and water sufficient.

Mysore and Coorg.—*For week ending 30th January.*—MYSORE:. Standing crops in good condition. Harvesting of *ragi* (*Eleusine coracana*) continues in Bangalore and Kadur districts. Rice harvested in Bangalore, Hassan, and Kadur districts. Prices fallen in Kolar district.

COORG: Reaping of rice nearly completed. Picking of coffee completed. Prices of food grains normal. Fodder and water for cattle sufficient.

Berar and Hyderabad.—*For week ending 30th January.*—BERAR: Weather cool and clear. Winter crops generally in fair condition, except linseed which has been much damaged through blight. Fodder and water ample for requirements. Prices almost stationary.

HYDERABAD: No rain during week. Land being ploughed for hot-weather crops. Prices normal.

Central India.—*For week ending 30th January.*—Rain fell during week in some parts of Gwalior, Bhopawar, and Goona. Agricultural operations in progress, though crops somewhat damaged by recent rain and hail-storms. The condition of standing crops is fairly good. Agricultural stock in fairly good condition. Pasturage good except in parts of Bhopawar. Prices of food-grains above normal in Bhopawar, Goona, Neemuch district,

Bundelkhand, and parts of Gwalior. Opium crop partly damaged by rain in Goona, in bad condition in Neemuch district; good elsewhere.

Rajputana.—*For week ending 30th January.*—Rain slight in Ajmere and Marwar. Agricultural operations satisfactory. Standing crops, prospects, and agricultural stock good. Fodder sufficient except in Dholepore. Prices risen in three States, below average in one, and normal elsewhere.

Kashmir.—KASHMIR VALLEY: *For week ending 29th January.*—Weather cloudy. Prices continue normal.

Jammu Province.—*For week ending 30th January.*—No rain. Weather cloudy. Crops in good condition. Prices stationary. Fodder scanty.

Nepal.—*For week ending 26th January.*—Slight rain. The winter this year has been somewhat mild and short, and warm weather is already setting in. Prospects good.

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

(*l*) Includes the Mysore-Nanjangúd and the Yesvantpur-Mysore frontier sections.
(*m*) Total earnings from 15th September 1893 to 20th January 1894.
(*n*) Total earnings from 12th April 1893 to 20th January 1894.

CALCUTTA, *the 1st February, 1895.*

F. B. HEBBERT,
Under Secretary.

Printed and published for the GOVERNMENT OF INDIA *at the Office of the* SUPERINTENDENT OF GOVERNMENT PRINTING, INDIA, *No. 8, Hastings Street, Calcutta.*

SUPPLEMENT TO

The Gazette of India.

No. 6.] CALCUTTA, SATURDAY, FEBRUARY 9, 1895.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

(*Statistical Branch*).

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the week ending at 8 a.m. on Saturday, January 26th, 1895.

General Summary.—The most important feature in the meteorology of the past week was the passage of a disturbance through Northern India, which, though of very feeble intensity itself, gave rise to a deepish secondary depression in the Punjab. The barometer fell slightly in Sind and Gujarat on Sunday morning showing that a disturbance had crossed the frontier from Baluchistan, but it was very faintly indicated and had given no rain to Baluchistan or Sind. Pressure, however, gave way very rapidly in the South-East Punjab and adjacent hills on Monday morning, the fall being greatest at Ludhiana where it amounted to nearly three-tenths of an inch, and a secondary depression was formed with pressure more than two-tenths of an inch in defect in its central area. Strong to stormy winds prevailed in the Punjab hill districts and winds had increased in Rajputana, to which province the primary depression had advanced. Falls of snow or rain were reported from the Upper India hill districts, the Punjab and Rajputana, but the falls were generally light, the heaviest being only ·74 inch at Chakrata. The secondary depression filled up within the next 24 hours the barometer rising very rapidly over the greater part of North-Western India by Tuesday morning. Moderately heavy snow had, however, fallen in the hill districts, Simla registering a fall of 1·65 inches, Chakrata 1·51 inches and Mussoree ·91 inch; and general rain had fallen in the East Punjab and the greater part of the North-Western Provinces, the principal falls being ·86 inch at Rawalpindi, ·81 inch at Ludhiana and ·77 inch at Sialkot. The primary depression had by Tuesday morning advanced as far as Baghelkhand and the eastern districts of the North-Western Provinces. During the next two days it travelled through Bengal and Upper Burma and gave a few showers in West Bengal, Behar, Chota Nagpur and the eastern districts of the North-Western Provinces, but the falls were in most cases light and of little importance. Anti-cyclonic conditions were established in North-Western India after the secondary depression in the Punjab had filled up, and fine dry weather with unusually low temperature prevailed during the remainder of the week.

Daily Summary.—*Sunday.*—Pressure had changed by only small amounts and its distribution was approximately normal except in the western Himalayan hill districts and in Sind and Gujarat where it was in slight to moderate defect. A very feeble disturbance had crossed the Sind frontier from Baluchistan and skies were moderately to heavily clouded in Baluchistan and North-Western India. No rain was reported.

Monday.—Pressure had fallen very rapidly in the South-East Punjab and adjacent hills, and a deepish secondary depression was formed in which pressure was upwards of two-tenths of an inch in defect. The primary depression was advancing through South Rajputana and Central India. Light to moderate showers had fallen generally in the Punjab and Rajputana, and snow-storms were reported from the Upper India hill stations. Chakrata received ·74 inch Montgomary ·65 inch, and Ranikhet ·55 inch.

Tuesday.—Pressure had increased very rapidly over the greater part of North-Western India and the secondary depression had filled up after giving moderately heavy snow to the Upper India hills and rain to the adjacent districts in the East Punjab. The primary depression had advanced to the eastern districts of the North-Western Provinces and Baghelkhand and moderate rain had fallen over the greater part of the North-Western Provinces. The more important falls reported were: Simla 1·66 inches, Chakrata 1·51 inches, Mussooree ·91 inch, Bareilly ·86 inch, Ludhiana ·81 inch and Sialkot ·77 inch. Temperature had fallen very rapidly in Sind, Rajputana, Central India and the Punjab, and very low minimum temperatures were registered at the hill stations in Upper India.

Wednesday.—The barometer had again risen in North-Western India and had risen briskly to rapidly in Central India, the Central Provinces and the eastern districts of the North-Western Provinces. It had fallen briskly in Bengal. Well marked anti-cyclonic conditions prevailed over the whole of North-Western and Central India where temperature was largely below the normal. Showers had been received in West Bengal, Bihar, Chota Nagpur and the eastern hill districts of the North-Western Provinces. Burdwan reported a fall of 1·2 inches, Bahraich ·59 inch and Sibsagar ·39 inch. Conditions were slightly disturbed in Baluchistan.

Thursday.—Pressure had increased slightly to briskly in North-Eastern India and Upper Burma and had given way briskly to rapidly in North-Western India, the fall being greatest in the East Punjab.

Local showers had fallen in East Bengal and Assam, the largest amount, however, being only ·28 inch at Jessore.

Friday.—The barometer had risen briskly in the Punjab and had fallen briskly in North Bombay and Berar. It had changed by only small amounts elsewhere. Pressure was in moderate to considerable excess in North-Western India, in slight defect in North Bombay, and normal in Burma and Southern India. Temperature had increased briskly to rapidly in Bombay, the Central Provinces and Central India, and had decreased slightly in the Ganjetic plain and Bengal. Sibsagar reported a light shower.

Saturday.—Pressure was practically unchanged in Southern India and had increased slightly to briskly in Northern India. It was in considerable excess in North-Western India and was normal in Burma and the Peninsula. Temperature had risen generally, the rise averaging 4° in the Central Provinces and 2° in Central India, where it occurred in the night temperature, due to the presence of moderate cloud. Rajahmundry reported a light shower of rain amounting to ·4 inch.

Temperature.—Unusually cool weather prevailed over the whole of India during the week, except in Madras, where temperature was either normal or in slight excess. A cool wave following in the rear of the depression which advanced across Northern India began affecting North-Western and Central India on Tuesday when it reduced the mean temperature in Sind and Rajputana by amounts averaging 8°. Very low minimum temperatures were registered the night before at the hill stations of Upper India, Quetta reporting 20°·3 and Simla 25°·2. Temperature fell 8° next day in the Central Provinces and 4° in the North-Western Provinces and Central India, and the mean temperature averaged 9°·6 below normal in Sind and Rajputana, 9°·4 in Gujarat and Central India, 5°·9 in the Central Provinces and Berar, and 5° in the Punjab.

Temperature then began rising in North-Western and Central India, but it fell rapidly in Bengal on Thursday by amounts averaging 5°.

The following table gives the variations from the normal temperature of the different provinces of India for each day of the week:—

Province.	January, 1895.							Mean variation of week.
	20th.	21st.	22nd.	23rd.	24th.	25th.	26th.

Sind and Rajputana	+0·2	—2·3	—10·3	—9·6	—7·4	—6·0	—3·0	—5·5
Madras	+1·6	+0·7	+0·6	0	+0·6	+0·9	+1·2	+0·8
	°	°	°	°	°	°	°	°
Mean for whole of India	—1·5	—0·5	—2·6	—4·2	—4·1	—3·0	—1·4	—2·5

The coolest days of the week were the 23rd and 24th, when the mean average temperature for the whole of India was more than 4° below the normal. For the whole week temperature was 5°·5 in defect in Sind and Rajputana, 4°·3 in Central India and Gujarat, and 3°·4 in the Punjab. For the whole of India it averaged 2°·5 below the normal.

Rainfall.—Rain fell in 30 of the 52 rainfall divisions the average fall amounting to 1·75 inches in the Punjab hill districts and ·98 inch in the Punjab submontane districts. It exceeded half an inch in the western submontane districts of the North-Western Provinces and in the South Punjab. In all other divisions it was below half an inch, and in 12 did not exceed a tenth of an inch. Bengal received a few light showers, but rainfall was chiefly restricted to the Punjab and the North-Western Provinces.

For the period from 30th December 1894, to the 26th January 1895, rainfall in excess of the normal has been received in the North-Western Provinces and the Punjab (with the exception of the western districts) and also in Rajputana and Central India. In all other provinces it has been in defect of the normal.

Province.	Division.	Rainfall data for week ending 26th January, 1895. Average actual rainfall of Division.	Average normal rainfall of Division.	Excess or defect in inches.	Rainfall data from 30th December, 1894, to 26th January, 1895. Average actual rainfall of season to date.	Average normal rainfall, 30th December to 26th January.	Excess or defect of (seasonal) rainfall expressed as a percentage.

SIMLA, *the 31st January, 1895.*

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 2nd February.*—There has been practically no rain during the week and the water-supply is diminishing. Agricultural operations continue. Standing crops fair but withered in parts from want of water. Rain is generally required. The harvest continues with fair outturn. Pasture and fodder are sufficient but growing scarce. Prices are steady or falling generally except in Coimbatore and Madras where they are rising.

Bombay.—*For week ending 6th February.*—There has been slight rain in parts of Sind and Kathiawar. Standing crops have been damaged by frost, rust or blight in parts of Sind; by blight in parts of Dharwar; by cloudy weather in parts of Broach; by insects in parts of Surat and Baroda and are withering for want of rain in parts of Poona. Reaping of late crops continues in parts of nine districts and preparations for next season's crops in parts of four. Cotton-picking is progressing in parts of Kathiawar and Baroda territory. The fodder-supply is sufficient, agricultural stock in good condition, and prices normal except in Sholapur.

Bengal.—*For week ending 4th February.*—There was rain generally over Bihar and Chota Nagpur and in parts of North Bengal during the week. It has done good to the spring crops except the *arhar* (*Cajanus indicus*) and to the poppy. Both the spring and the poppy crops are promising well. In Eastern Bengal rain is needed for the spring crops. The harvesting of winter rice is finished except in a few low-lying tracts, and the general results have been satisfactory. Mustard is being gathered, and other early spring crops are coming into flower. Sugarcane is being cut and pressed in some districts. The cultivation of spring rice is in progress. Cattle are generally reported well. The price of common rice continues normal and almost stationary.

North-Western Provinces and Oudh.—*For week ending 6th February.*—The weather has been unsettled during the past week and rain has fallen everywhere. In some places the falls have been heavy. Except in a few districts where slight damage has been caused by excessive moisture, the crops are doing well and prospects are favourable. Sugarcane-pressing is in progress, supplies are ample, and prices generally steady with a tendency to fall.

Punjab.—*For week ending 6th February.*—The rainfall has been general. Sugarcane-pressing still continues in some districts. The condition of standing crops is generally reported to be good to average and they have benefited by the recent rain and sunshine in certain districts; but those on low-lying land have suffered in parts of the Delhi and Peshawar districts. More rain is needed in Shahpur and Dera Ismail Khan and sunny weather in Umballa. Hail has fallen in parts of Lahore and Umballa and has slightly damaged the wheat and gram crops in the latter district. Cattle are generally in good condition and pasturage and fodder are sufficient throughout the province. Prices are rising in Umballa, falling in Jullundur, normal in Sialkot, below normal in Shahpur, and continue low elsewhere.

Central Provinces.—*For week ending 6th February.*—Weather generally cloudy in the beginning of the week with slight showers of rain in four districts. Hail is reported to have fallen in parts of three of the Northern Districts. Rust has attacked the wheat crop in two districts and is likely to extend to this crop in other districts if clouds reappear. Linseed and early sown wheat are being harvested. Prices above normal in one district but steady elsewhere.

Burma.—*For week ending 2nd February.*—There has been no rain in Lower Burma. Threshing operations are in progress and crop prospects fair. In Upper Burma threshing continues, and cultivation of the dry-weather crops is in progress. Prospects are generally good. The price of paddy is above normal and unsteady in Lower Burma and below normal in Upper Burma. Fodder and water are sufficient.

Assam.—*For week ending 5th February.*—The weather is seasonable Harvesting of winter paddy is over, but pressing of sugarcane continues. The condition of cattle is good and fodder and water are sufficient.

Mysore and Coorg.—*For week ending 6th February.*—MYSORE: Crops and prospects are good. Rice has been harvested in Bangalore, Tumkur, Mysore, and parts of the Kadur district, and *ragi* (*Eleusine coracana*) in Bangalore and parts of Kadur. Prices have slightly risen in the Kolar and Chitaldroog districts.

COORG.—The harvesting of rice is completed and threshing operations have commenced. Prices of food-grains are normal and fodder is sufficient.

Berar and Hyderabad.—*For week ending 6th February.*—BERAR: The weather is cool. Standing crops are thriving satisfactorily with the exception of linseed which has been considerably damaged through blight in Amraoti, and gram also has been affected by rust in parts of Akola. The fodder and water-supply are adequate. Prices are fluctuating in Wun, but are otherwise stationary.

HYDERABAD.—No rain has fallen during the week. The weeding of hot-weather crops has been completed. Prices are normal.

Central India.—*For week ending 6th February.*—Rain fell during the week in five Agencies. Agricultural operations have been completed in Bhopal and are in progress in other Agencies. The condition of standing crops is fairly good, though some damage has been done by rain and frost in all Agencies. Cattle are still in indifferent condition in Gwalior and Bhopawar. Pasturage is good and sufficient except in Bhopawar and three districts of Gwalior. Prices of food-grains are above normal in Bundelkhand, Goona and one district of Gwalior and normal elsewhere. The opium crop is indifferent in one district of Gwalior, partly damaged by rain in Goona, but fairly good elsewhere.

Rajputana.—*For week ending 6th February.*—The rainfall has been fair in Bickaneer, Bhurtpore and Dholpore and slight in eight States. Agricultural operations are satisfactory. Standing crops, prospects, and agricultural stock good. Fodder is sufficient but failing in Dholepore. Prices have risen in four States, are below the average in one, and normal elsewhere.

Kashmir.—*For week ending 5th February.*—KASHMIR VALLEY: Heavy snow has fallen. Prices continue normal.

JAMMU PROVINCE.—*For week ending 6th February.*—Heavy rain has fallen and the weather is stormy. Crops are in fair condition. Prices are normal and fodder sufficient.

Nepal.—*For week ending 2nd February.*—Rain fell during the week, and has done some good to the wheat seedlings. The weather is still cloudy and wet.

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

FINANCE AND COMMERCE DEPARTMENT.

No. 666 S.R., dated Calcutta, the 6th February, 1895.

ORDER—By the Government of India, Finance and Commerce Department.

Read—

Customs Circular No. III.—Notifications in the Finance and Commerce Department, Nos. 338 S. R. and 599 S. R., dated the 18th January and 1st February, 1895, respectively.

Letter from the Government of India in the Finance and Commerce Department, No. 601 S.R., dated the 2nd February 1895.

Ordered, that the Circular be published for general information in the Supplement to the *Gazette of India*.

STEPHEN JACOB,
Offg. Secretary to the Government of India.

Customs Circular No. III.

No. 338 S. R.

STATISTICS AND COMMERCE.
Customs.

NOTIFICATION.

Calcutta, the 18th January 1895.

In exercise of the power conferred by section 23 of the Sea Customs Act (VIII of 1878), and in supersession of the Notification in the Finance and Commerce Department, No. 188 S.R., dated the 10th January 1895, the Governor General in Council is pleased to direct that the duty of five per cent. *ad valorem*, leviable under No. 15 of Schedule IV of the Indian Tariff Act (VIII of 1894) as amended by Act XVI of 1894 on the following descriptions of iron and steel, namely:—

(1) iron, bar, of any kind not specified in that number;
(2) steel, cast and blistered, of any kind not specified in that number;
(3) steel, bar and blooms;
(4) steel angle, channel and spring;
(5) steel nails;

shall be reduced to one per cent. *ad valorem*.

STEPHEN JACOB,
Offg. Secy. to the Govt. of India.

To

THE SECRETARY TO THE GOVERNMENT OF MADRAS. BOMBAY. BENGAL.
THE CHIEF COMMISSIONER OF BURMA.

Calcutta, the 2nd February 1895.

SIR,

As it has been brought to the notice of the Government of India that doubts have arisen as to the proper mode and rate of assessment to customs duty of various descriptions of galvanised or tinned iron and steel if imported under the provisions of the Tariff Amendment Act, XVI of 1894, I am desired to request that Collectors of Customs may be instructed that galvanised or tinned iron or steel of any of the descriptions specified in No. 15 of Schedule IV of Act XVI of 1894, or in any Notifications issued subsequently to the passing of that Act under the provisions of section 22 or 23 of the Sea Customs Act, VIII of 1878, must be held to be a species of iron or steel coming under

such general description, that is to say, galvanised or tinned iron wire, rivets, washers, etc., or galvanised steel plates, sheets, wire, etc., are still iron wire, rivets and washers, and steel plates, sheets and wire: and unless specifically distinguished in the Schedule of the Tariff Amendment Act as altered by Notifications under sections 22 and 23 of the Sea Customs Act, the galvanised descriptions are assessable to duty precisely as if they were ungalvanised.

2. Galvanised iron and steel are, however, generally of greater value than other kinds of iron and steel coming under the same general description. Where, therefore, the general description is assessed to duty *ad valorem*, the galvanised kinds will be fully assessed under the above instructions, but in the case of iron and steel of descriptions on which duty is levied on a fixed Tariff valuation, it is necessary to prescribe separate valuations for the galvanised kinds; and the Governor General in Council has accordingly issued a Notification, No. 599 S.R., dated the 1st February 1895, in which the descriptions most commonly imported are specified.

3. The opportunity has been taken to alter the Tariff valuation on steel wire, which enquiry has shown to be incorrect.

4. For the guidance of Collectors of Customs and the convenience of the public, I am to point out that, as regards iron and steel, No. 15 of the Schedule as so altered stands as in the appendix to this letter.

5. I am to request that if duty has been levied at a higher rate than the rate admissible under the Schedule entry as reproduced in the appendix on any descriptions of iron or steel imported since the 27th December 1894, the duty so levied in excess may be refunded to the parties concerned.

6. I am to take this opportunity of explaining that the intention of the amended Tariff Act and its Schedule was to specify and tax at one per cent. all iron and steel imported for the purpose of being worked up into manufactures, and to tax at five per cent. such manufactures of iron and steel as might reasonably be treated as hardware. I am to request that Collectors of Customs may be informed accordingly, and instructed to report at once for orders any case in which that purpose appears likely to be defeated owing either to the unintentional omission of any sort of iron or steel which is of the class that is imported merely to be worked up, or to the unintentional inclusion of any descriptions of those metals which ought properly to be regarded as hardware or manufactures.

I have the honour to be,
SIR,
Your most obedient Servant,

G. H. R. HART,
Offg. Asstt. Secy. to the Govt. of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the week ending at 8 a.m. on Saturday, February 2nd, 1895.

General Summary.—Fine settled weather prevailed over the whole country during the first part of the week, but pressure gave way briskly in Baluchistan on the 31st January, and by next morning a disturbance had entered Rajputana which caused the formation of a deepish secondary depression in the North Punjab. The fall of the barometer exceeded two-tenths of an inch at the Northern Stations, and pressure was nearly a quarter of an inch in defect in the central area of the depression. Light to moderate general rain had fallen in the Punjab, Rajputana, Central India and the North-Western Provinces, and snow had fallen at Quetta and Srinagar, the fall amounting to two feet at the latter station. The secondary depression commenced to fill up during the next 24 hours, but the pressure changes were very irregular, and weather continued unsettled, especially in the Simla and Mussooree hill districts, where heavy falls of rain and snow were received. Chakrata and Mussooree were visited by severe thunderstorms. The precipitation at Chakrata amounted to 3·17 inches, at Mussooree 3 inches, Dehra Dun 2·25 inches, and at Simla 1·31 inches. The primary disturbance had advanced eastwards, and on Saturday morning lay over Baghelkhand, Chota Nagpur and the adjacent districts of the Central Provinces, but pressure was in very moderate defect in its central area, and the depression was hence one of only moderate intensity. Light to moderate general rain had fallen over the South-East Punjab, the North-Western Provinces and Bihar, the heaviest falls reported being Patna ·71 inch, Gaya ·62 inch and Gorakhpur ·52 inch.

The changes in temperature were large during the week. On Sunday it was in slight defect over the greater part of Northern India. On the 31st it

was 6° above the normal in Sind and Rajputana and decreased nearly 5° during the next 24 hours. In the Central Provinces it was nearly 8° in excess of the normal on the 1st February, while on the 27th January it was practically normal. The increase in Central India was almost as great. The average mean temperature for the whole of India for the week was 1°·4 in excess of the normal.

Daily Summary :—*Sunday.*—Pressure had given way slightly in Northern India and Burma, and was steady or had risen slightly in Baluchistan and the Peninsula. Humidity had decreased generally over the whole country, the lowest humidity percentages recorded being 16 at Murree and 18 at Simla. Colombo reported a light shower.

Monday.—Pressure had decreased slightly in Northern India and was practically unchanged in the Peninsula. Temperature had risen briskly to rapidly in Rajputana, Central India and the Central Provinces, and was 4° above the normal in Central India. No rain had fallen in India. Aden reported a fall of ·54 inch.

Tuesday.—Pressure had fallen slightly in Sind and Rajputana and was in slight defect in Lower Sind, Kathiawar and Gujarat where skies were partially clouded. Temperature had increased 3° in Sind, Rajputana, Gujarat, Central India, Berar and the Central Provinces, and was 6° above the normal in Central India, 5° in the Central Provinces and 3° in Rajputana. Light showers had fallen at Jubbulpore and Saugor.

Wednesday.—The barometer had fallen briskly in Baluchistan, the West Punjab, Sind, Kathiawar, Rajputana and Central India, and a shallow depression in which pressure was upwards of an eighth of an inch below the normal was shown covering Lower Sind and Kathiawar. Winds were cyclonic in direction in the depression area and were of moderate intensity at the stations on the Kathiawar coast. Temperature was 6° above the normal in Central India and the Central Provinces and 5° in Sind and Rajputana. Jubbulpore and Gnatong reported very light showers, and Aden a fall of ·2 inch.

Thursday.—Pressure had increased slightly in Cutch and fallen briskly in East Rajputana, Central India and the Northern districts of the Central Provinces and the depression in Sind the day before had advanced to South-East Rajputana and Central India. The barometer had fallen briskly in Baluchistan, showing the probable approach of a disturbance from Persia. Temperature had increased rapidly in the North-Western Provinces and was, more or less, considerably above the normal over the whole of North-Western and Central India. Showers had fallen in Rajputana, the South-East Punjab, and the western districts of the North-Western Provinces, and at the hill stations eastwards from Simla to Ranikhet. Aden had received another fall of rain amounting to ·32 inch.

Friday.—The barometer had fallen briskly in Baluchistan and briskly to very rapidly in the Punjab. A disturbance had advanced into Rajputana from Baluchistan and had given rise to the formation of a deepish secondary depression in the North Punjab. Weather was very unsettled in North-Western and Central India, and light to moderate general rain had fallen in the Punjab, Rajputana, Central India and the North-Western Provinces. Two feet of snow had fallen at Srinagar. Temperature had decreased largely in Baluchistan, rapidly in Sind and Rajputana, and briskly in Central India.

Saturday.—The secondary depression in the Punjab had commenced to fill up, but the pressure changes were very irregular, and weather hence continued somewhat unsettled. The primary disturbance had travelled eastwards to Baghelkhand, Chota Nagpur and the adjacent districts of the Central Provinces. Light to moderate rain had fallen in the South-East Punjab, North-Western Provinces and Bihar, and heavy rain and snow in the Simla and

Mussooree hill districts. Chakrata reported a fall of 3·17 inches, Mussooree 3 inches, Dehra Dun 2·25 inches and Simla 1·31 inches.

Temperature.—The following table gives the variations from the normal temperature of the different provinces of India for each day of the week :—

Province.	January, 1895.					February, 1895		Mean variation of week.
	27th.	28th.	29th.	30th.	31st.	1st.	2nd.	
	°	°	°	°	°	°	°	°
Burma	−0·6	−0·7	−0·8	−0·9	−1·3	−0·3	+2·0	−0·4
Bengal and Assam	−1·9	−1·6	−0·7	+0·1	+0·3	+2·1	+4·1	+0·3
North-Western Provinces and Oudh	−2·0	−1·5	−0·9	−0·4	+3·1	+3·8	+1·2	+0·5
Punjab	−0·6	0	+0·4	+1·7	+0·9	+2·2	−0·1	+0·6
Bombay	+2·1	+2·2	+2·5	+2·4	+2·0	+0·4	−0·8	+1·5
Central Provinces and Berar	+0·8	+2·6	+5·3	+5·7	+7·1	+7·8	+4·8	+4·9
Central India and Gujarat	+0·6	+3·7	+6·5	+6·2	+5·7	+3·1	−2·3	+3·4
Sind and Rajputana	−1·9	−0·1	+2·6	+5·1	+6·0	+1·2	−0·7	+1·7
Madras	+0·7	−0·1	−1·0	−1·0	−0·6	+0·7	+0·8	−0·1
	°	°	°	°	°	°	°	°
Mean for whole of India	−0·3	+0·5	+1·5	+2·0	+2·6	+2·3	+1·0	+1·4

As will be seen from the above, unusually high temperatures prevailed during the week. The average mean temperature for the whole of India was 0°·3 in defect of the normal on Sunday, but on all other days of the week it was in excess, the excess amounting to 2°·6 on the 31st. Temperature was most above the normal in the Central Provinces, Central India, Sind and Rajputana, the excess being chiefly shown in the night temperatures, especially in the Central Provinces and Central India. Night temperatures were in large excess also at the Upper India hill stations during the first part of the week, while at the neighbouring stations in the plains they were in defect. Some striking instances occurred of the inversion of temperature which is of occasional occurrence during the cold weather, the actual minimum temperatures registered in the plains being lower than those of the adjacent hill stations. At the hill station of Murree on the 28th, for example, the minimum temperature recorded was 11°·2 higher than at Rawalpindi and 7°·2 higher than at Peshawar.

The mean temperature for the whole week was 4°·9 above the normal in the Central Provinces and Berar, and 3°·4 in Central India and Gujarat. For the whole of India it was 1°·4 in excess of the normal.

Rainfall.—The rainfall of the week was unusually heavy in the Punjab and North-Western Provinces, especially in the hill and submontane districts. The following gives the largest amounts received during the week :

Dharmsala (Kangra)	4·43 inches.
Mussooree	3·72 ,,
Chakrata	3·77 ,,
Una (Hoshiarpur)	3·36 ,,
Dehra Dun	2·95 ,,

No rain fell in Burma and the Peninsula, where the rainfall for the period 30th December to 2nd February is in large defect. The only provinces in which it is in excess of the normal amount are the North-Western Provinces, Oudh, the Punjab, Central India and Rajputana. The excess considered as a percentage of the normal is greatest in the Central and Western districts of the North-Western Provinces. The actual absolute excess is greatest in the Punjab hill districts where it averaged 3·72 inches.

W. A. BION,
Offg. Asst. Meteorological Reporter to the Government of India.

SIMLA, *7th February, 1895.*

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 9th February.*—Slight showers of rain fell in Ganjam and Vizagapatam. Water-supply is insufficient, except in the Circars. Agricultural operations continue. Standing crops are fair, but suffering in many districts from drought. Rain is generally wanted. Harvesting continues with fair outturn. Pasture and fodder are growing scarce in parts. Prices are easier in the Circars, slightly risen in parts of the Carnatic and Central districts, and nearly steady elsewhere.

Bombay.—*For week ending 13th February.*—Slight rain fell in parts of Karachi and Thar and Parkar. Standing crops damaged by frost or blight in parts of Sind, by insects in parts of Surat, by blight in parts of Dharwar, and withering for want of moisture in parts of Poona. Reaping of late crops continues in parts of twelve districts, and preparations for next season's crops in parts of five. Cotton-picking is progressing in parts of Kathiawar and Baroda territory. Fodder-supply sufficient, and agricultural stock in good condition. Prices are normal except in Sholapur.

Bengal.—*For week ending 11th February.*—There was a little rain in Hazaribagh, but practically none in the other reporting districts. The general prospects of the spring crops continue favourable, but in East Bengal the crop requires rain. Mustard is being gathered, and in many districts the pressing of sugarcane is going on. Spring rice is being sown and transplanted, and the young plants are doing well. In parts of North and East Bengal the lands are under preparation for the autumn crops. The reports of the poppy crop in Bihar and Hazaribagh are promising; lancing has begun in Patna. No cattle-disease is reported. The price of common rice is generally steady and normal.

North-Western Provinces and Oudh.—*For week ending 13th February.*—Weather generally clear, but showers have fallen in some places. Slight damage to crops reported in a few districts either by insects, rust or excessive moisture. The prospects of the spring crops are generally favourable. Sugarcane-pressing is in progress. Fodder and supplies are ample, except in Sitapur and Rae Bareli, where fodder is said to be getting scarce. Prices are normal.

Punjab.—*For week ending 13th February.*—Rain has fallen in all districts except Hissar, Sialkot, and Lahore. Sugarcane-pressing still continues in some districts. The condition of standing crops is good to average, and prospects are favourable except on low-lying lands in Peshawar. Sunny weather is necessary for the development of crops in Umballa, and rain is needed in Shahpur and Dera Ismail Khan. Crops have been slightly damaged by hail in parts of Lahore. Cattle are generally in good condition and pasturage and fodder sufficient throughout the Province. Prices are rising in Umballa, falling in Jullundur, normal in Sialkot, below normal in Shahpur and continue low elsewhere.

Central Provinces.—*For week ending 13th February.*—Weather generally cloudy with showers of rain in most of the Northern districts. There was also a heavy fall on the 10th instant in Wardha. Hail has again fallen in parts of the Northern districts where linseed has been badly damaged by rust, and wheat has also suffered but only to a slight extent. Harvesting of winter crops

progressing and prospects generally favourable. Prices rather high in Damoh and Seoni, but normal elsewhere.

Burma.—*For week ending 9th February.*—No rain. Harvesting of the main paddy crop is nearing completion. Transplanting of dry-weather paddy is progressing in Upper Burma where other agricultural operations continue. Crop prospects are good in Upper Burma and fair in the Lower province. The price of paddy is everywhere above normal in Lower Burma. In Upper Burma it is below normal but rising. Fodder and water are sufficient.

Assam.—*For week ending 12th February.*—Weather seasonable. The mustard crop is being gathered, and pressing of sugarcane continues. The condition of cattle is good and fodder and water are sufficient.

Mysore and Coorg.—*For week ending 13th February.*—MYSORE: Standing crops are in good condition. Rice harvested in Tumkur and in parts of Bangalore and Kolar. Prices have slightly risen in the Kolar and Chitaldrug districts.

COORG: Threshing of rice continues. Prices of food-grains are normal and fodder for cattle sufficient.

Berar and Hyderabad.—*For week ending 13th February.*—BERAR: Weather clear and cool. Winter crops in good condition, with the exception of linseed and gram which have been damaged through blight. Fodder and water sufficient. Prices fluctuating in Wun district, otherwise steady.

HYDERABAD: No rain fell during the week. Weeding of hot-weather crops completed. Tanks and wells are full. Prices continue normal.

Central India.—*For week ending 13th February.*—Slight rain fell in three Agencies during the week. Agricultural operations completed in Bhopal and are in progress in other Agencies. Condition of standing crops fairly good, though somewhat damaged by rain and blight in all Agencies. Condition of agricultural stock still indifferent in Gwalior and Bhopawar. Pasturage good and sufficient in all districts except Gwalior. Prices high in Bundelkhand, Bhopawar, Goona, Nimach, and in one district of Gwalior, but normal elsewhere. The opium crop is in indifferent condition in one district of Gwalior, bad in Nimach, partly damaged by rain in Goona, and fairly good elsewhere.

Rajputana.—*For week ending 13th February.*—Slight rain fell in Bickaneer. Agricultural operations are satisfactory. Standing crops, prospects, and agricultural stock good. Fodder sufficient, but failing in Dholepore. Prices have risen in two States, are below average in one, and steady elsewhere.

Kashmir.—*For week ending 12th February.*—KASHMIR VALLEY: A little snow fell in Kashmir Proper. Condition of crops good in Gilgit. Prices continue normal.

JAMMU PROVINCE.—*For week ending 13th February.*—No rain. Weather fair. Crops are in good condition. Prices are normal and fodder sufficient.

Nepal.—*For week ending 9th February.*—No rain during the week. Weather cold and foggy. Condition and prospects of crops good.

SUPPLEMENT TO

The Gazette of India.

No. 8.} CALCUTTA, SATURDAY, FEBRUARY 23, 1895.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

HOME DEPARTMENT.

PROGRESS OF EDUCATION IN INDIA DURING THE YEAR 1893-94.

No. $\frac{3 \text{ Education}}{91-102}$.

Extract from the Proceedings of the Government of India in the Home Department (Education),—dated Calcutta, the 19th February 1895.

READ—

The several Reports on the Progress of Education in India during the year 1893-94, with the orders passed on them by Local Governments and Administrations.

RESOLUTION.

IN the Resolution recorded in the Home Department, dated the 7th September 1894, the Government of India reviewed at length the state and progress of education in India during the quinquennium 1887-88 to 1891-92 as shown in the Report of Mr. A. M. Nash of the Bengal Educational Service, and noticed also the results of education in the year 1892-93. In publishing for general information the statistics of education for 1893-94, therefore, only a brief summary is necessary of the most important features presented by the figures.

2. The total number of Public and Private Institutions to which the Educational Reports relate, rose from 141,793 in 1891-92 and 144,699 in 1892-93 to 147,297 in 1893-94. The increase was shared by both classes of Institutions, Public Institutions having numbered 102,145 in 1892-93, and 103,172 in 1893-94, and Private Institutions having numbered in those years 42,554 and 44,125. The number of Primary (public) institutions, which had fallen from 97,109 in 1891-92 to 96,409 in 1892-93, rose again to 97,325 in the year under

review. There was also an increase in the number of Secondary (public) Schools from 4,962 in 1892-93 to 5,066 in 1893-94. The number of elementary Private Institutions rose from 37,111 in 1892-93 to 38,395 in 1893-94, an increase of over 500 having occurred in Koran Schools.

3. The percentage of scholars to the total population of school-going age (calculated at 15 per cent. on the statistics of population according to the last Census) was 11·67 in 1893-94, as compared with 11·38 in 1892-93. The percentages of male (20·82) and female (2·19) scholars on the total male and female population of school-going age showed a slight advance over the figures for the previous year (20·32 and 2·12, respectively). The total number of pupils under instruction in schools of all classes increased from 3,966,267 in 1892-93 to 4,066,235 in 1893-94. Of these, there were 3,602,492 males and 363,775 females in 1892-93, against 3,691,292 males and 374,943 females in 1893-94.

4. The statement given in the margin compares the average monthly attendance at the different classes of public institutions during the years 1892-93 and 1893-94. The average monthly number of scholars attending these institutions rose from 3,228,114 in 1892-93 to 3,308,121 in the year under report. As observed in previous years, similar statistics regarding private institutions (advanced and elementary) are not available. On the 31st March 1894 there were 14,360 students in Arts Colleges, as compared with 13,387 on the 31st March 1893. The number on the rolls of Colleges or Departments of Colleges for Professional Training on those dates were, respectively, 3,824 and 3,344. It is satisfactory also to observe that the increase noticed last year in the number of pupils at Secondary and Primary Schools has been maintained, the former having risen from 488,261 at the end of March 1893 to 507,658 at the end of March 1894, and the latter from 2,890,824 to 2,947,530. There were 4,370 pupils attending Training Schools for Masters on the 31st March 1894, against 4,327 on the corresponding date in 1893; but the number attending Training Schools for Mistresses, which had risen from 793 at the close of 1891-92 to 1,092 at the close of 1892-93, again fell away to 909 at the close of 1893-94. There was, however, a steady increase in the number attending other special schools, from 16,586 at the end of 1891-92 and 17,681 at the end of 1892-93 to 18,363 at the end of 1893-94.

Public Institutions.		Average monthly attendance. 1892-93.	1893-94.
Managed by Government.	Colleges	6,540	6,940
	Secondary Schools	51,427	51,082
	Primary Schools	24,168	22,748
	Schools for special instruction	13,064	13,901
Managed by Local Fund and Municipal Boards.	Colleges	305	248
	Secondary Schools	111,979	117,728
	Primary Schools	767,011	788,683
	Schools for special instruction	1,222	1,390
Maintained by Native States.	Colleges	84	83
	Secondary Schools	7,573	8,027
	Primary Schools	126,777	130,581
	Schools for special instruction	276	312
Aided by Government or by Local Funds or Municipal Boards.	Colleges	5,772	6,325
	Secondary Schools	220,741	231,889
	Primary Schools	1,429,935	1,465,952
	Schools for special instruction	5,149	5,151
Unaided	Colleges	4,002	4,259
	Secondary Schools	77,312	79,510
	Primary Schools	371,848	370,877
	Schools for special instruction	2,327	2,435
Total		3,228,114	3,308,121

5. Of the total number (4,066,235) of pupils (including those in private institutions) receiving instruction, 404,591 were studying English, as compared with 388,650 in the previous year. The number (579,361) studying a classical language showed a small increase (575,789 in 1892-93); and the number learning a vernacular (3,690,391), a substantial increase (3,607,327 in 1892-93). The greatest increase among pupils learning English was among those attending Secondary Schools (301,376 in 1892-93 and 310,621 in 1893-94). The highest rise in the number of those studying a classical language also occurred among the pupils at Secondary Schools, and the increase among those studying a vernacular was naturally greatest at Primary Schools. The number of pupils in private institutions studying English, a classical language and a vernacular was, respectively, 4,784, 296,176 and 325,979 in 1893-94, as compared with 5,086, 284,132 and 316,445 in 1892-93.

6. The following statement shows the race and religion of the pupils, and the proportion borne by each class to the total number, during the past two years:—

Race and Religion.	1892-93. Number.	1892-93. Proportion to total number.	1893-94. Number.	1893-94. Proportion to total number.
Hindus	2,661,136	67·09	2,732,186	67·19
Muhammadans	894,241	22·55	905,571	22·27
Europeans and Eurasians	26,952	·68	27,975	·69
Native Christians	98,423	2·48	99,887	2·46
Miscellaneous races or religions	285,515	7·20	300,616	7·39

Owing to the general increase of numbers, the percentage of Muhammadans to the total has slightly fallen: but the number of Muhammadan pupils shows an increase yet greater than that (from 887,236 to 894,241) in the preceding year. Of the students receiving a Collegiate education, the greatest number (15,303) were Hindus; 1,212 were Muhammadans; 528, Europeans and Eurasians; 548, Native Christians; and 593 belonged to other classes. Of the pupils in Secondary Schools, 367,413 were Hindus, 70,816 Muhammadans, 23,078 Europeans and Eurasians, 26,124 Native Christians, and 20,227 belonged to other classes. Of those under Primary instruction in public institutions 2,116,506 were Hindus, 580,272 Muhammadans, 3,431 Europeans and Eurasians, 68,311 Native Christians, and 179,010 belonged to other classes.

7. The total expenditure (direct and indirect) on public instruction, which had risen from ₹3,05,19,632 in 1891-92 to ₹3,16,72,827 in 1892-93, reached ₹3,22,79,706 in 1893-94. The direct expenditure increased from ₹2,50,54,254 in 1892-93 to ₹2,58,51,608 in the year under review. The increase was mainly due to a rise in the expenditure on Secondary and Primary Schools, from ₹1,03,29,480 and ₹99,73,177, respectively, in 1892-93 to ₹1,06,36,125 and ₹1,03,23,037 in 1893-94. The expenditure on Arts Colleges increased from ₹21,10,205 to ₹22,13,938; that on Professional Colleges from ₹7,97,427 to ₹8,22,866; and that on Training Schools for teachers from ₹6,82,740 to ₹7,06,347. The expenditure on all other special schools decreased from ₹11,61,225 to ₹11,48,395. The indirect expenditure on education (which includes charges on account of direction, inspection, scholarships, buildings and miscellaneous items) fell from ₹66,18,573 to ₹64,28,098.

8. The expenditure on education was met from Provincial, Local and Municipal Funds, from fees, and from miscellaneous sources, such as subscriptions, endowments, etc. The following statement compares the sums spent from each of these sources, and the proportion of each sum to the total cost of education in the years 1892-93 and 1893-94:—

Sources from which Expenditure on Education is met.	1892-93. Amount.	1892-93. Proportion to total cost.	1893-94. Amount.	1893-94. Proportion to total cost.
	₹	Per cent.	₹	Per cent.
Provincial Revenues	88,60,611	27·98	89,80,555	27·82
Local Funds	54,44,351	17·19	55,52,107	17·20
Municipal Funds	14,54,454	4·59	14,31,670	4·43
Fees	92,61,649	29·24	95,05,271	29·45
Miscellaneous	66,51,762	21·00	68,10,103	21·10
Total	3,16,72,827	100·0	3,22,79,706	100·0

The Government of India regret that the contribution from Municipal Funds, the smallness of which has been noticed in previous reviews, has declined, but the increase in the income from fees and miscellaneous sources is satisfactory; and the general results summarised above afford, in the opinion of the Governor General in Council, satisfactory evidence of the continued progress in the work of public instruction during the year 1893-94.

ORDER.—Ordered that a copy of the above Resolution be forwarded to the Local Governments and Administrations marginally noted, and to the Department of Revenue and Agriculture for information.

Madras.	Central Provinces.
Bombay.	Burma.
Bengal.	Assam.
North-Western Provinces and Oudh.	Coorg.
Punjab.	Hyderabad.

Ordered also that the Resolution be published in the Supplement to the *Gazette of India*.

[True Extract.]

J. P. HEWETT,

Offg. Secy. to the Govt. of India.

(a) Includes R14,320 from Imperial Revenues in the Punjab.
(b) Includes R6,983 from Imperial Revenues in the Punjab.
(c) Includes R6,156 received in Coorg from "Plough tax" which was formerly considered to be a local cess.
(d) Excluding the cost of the Akola Industrial School in the Hyderabad Assigned Districts which is not shown in the Provincial Return.
(e) Includes R17,935 received in the Punjab from Imperial Revenues.
(f) Includes R873 received in the Punjab from Imperial Revenues.
(g) Includes R240 paid by the Shillong Municipality to the Shillong Unaided Mission School.
(h) Includes R366 paid from the local cess levied in Native States in the Bombay Presidency.
(i) Includes R60 received from a Municipality in Assam, and a Building grant from Provincial Revenues of R3,000 to an Unaided School in Calcutta.
(j) Includes R90,070 received in the Punjab from Imperial Revenues.
(k) Includes R1,404 paid by Local Fund Boards to Schools under private management in Assam of which R627 only is shown in column 24.

EDUCATION—GENERAL TABLE IV.

liture on Public Instruction in the several Provinces comprised in British India for the Official year 1893-94.

(a) Includes R14,820 from Imperial Revenues in the Punjab.
(b) Includes R3,968 from Imperial Revenues in the Punjab.
(c) Includes R6,156 received in Coorg from "Plough tax" which was formerly considered to be a local cess.
(d) Excluding the cost of the Akola Industrial School in the Hyderabad Assigned Districts which is not shown in the Provincial Return.
(e) Includes R17,995 received in the Punjab from Imperial Revenues.
(f) Includes R873 received in the Punjab from Imperial Revenues.
(g) Includes R240 paid by the Shillong Municipality to the Shillong Unaided Mission School.
(h) Includes R366 paid from the local cess levied in Native States in the Bombay Presidency.
(i) Includes R60 received from a Municipality in Assam, and a Building grant from Provincial Revenues of R3,000 to an Unaided School in Calcutta.
(j) Includes R90,070 received in the Punjab from Imperial Revenues.
(k) Includes R1,404 paid by Local Fund Boards to Schools under private management in Assam of which R627 only is shown in column 24.

EDUCATION—GENERAL TABLE V.

Return of the Stages of Instruction of Pupils in Public Schools for General Education in the several Provinces comprised in British India for the Official year 1893-94.

CLASS OF SCHOOLS.		Number of schools.	Number of Pupils on the rolls on 31st March.	HIGH STAGE. Comprising all Pupils who have passed beyond the Lower Secondary (Middle) Stage, but have not passed the Matriculation Examination. 1			MIDDLE STAGE. Comprising all Pupils who have passed beyond the Upper Primary Stage, but have not passed beyond the Lower Secondary (Middle) Stage. 2			UPPER PRIMARY STAGE. Comprising all Pupils who have passed beyond the Lower Primary Stage, but have not passed beyond the Upper Primary Stage. 3			LOWER PRIMARY STAGE. Comprising all Pupils who have not passed beyond the Lower Primary Stage. Reading printed Books. 4			Not reading printed Books. 5			TOTAL.			REMARKS.
				Boys.	Girls.	Total.	Boys.	Girls.	Total.	Boys.	Girls.	Total.	Boys.	Girls.	Total.	Boys.	Girls.	Total.	Boys.	Girls.	Total.

(*a*) This table does not include figures for the Law class attached to the Midnapore College, Bengal, where the income from fees amounted to R230.
(*b*) This does not agree with the corresponding entry in column 35 of Table IV owing to a difference of R28 in the Punjab figures.
(*c*) Includes a grant of R1,349 to the University from Local Funds in the Punjab.
(*d*) Excludes R1,120 received from "Subscriptions" in the Central Provinces, which is included in columns 11 and 26 of the Provincial Return.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the week ending at 8 a.m. on Saturday, February 9th, 1895.

General Summary.—The secondary depression, which had formed over the Punjab towards the close of the previous week and which had commenced to fill up on Saturday, was still in existence on Sunday morning, but consisted only of a shallow residual depression, covering the South-East Punjab and the adjacent districts. The primary depression in Baghelkhand and Chota Nagpur had advanced eastwards into the western and central districts of Bengal. Light to moderate rain or snow had fallen in the Upper India hill districts and the Punjab, and a few light showers had been received in Chota Nagpur. Weather improved during the next 24 hours, and a cool dry wave following the disturbance reduced temperature to 5° below the normal in Rajputana and Sind and 4° in the Punjab and Central India. Fine clear weather, with unusually low temperature in Northern and Central India, obtained until the close of the week, when a shallow depression was formed over Baluchistan and Sind and gave a few light showers in Baluchistan.

Remarkably low night temperatures were registered at Srinagar during the week, partly due to heavy snowfall on the surrounding mountains, but chiefly to its position in a closed mountain valley. On Thursday the minimum temperature reported was 3° or 29° below freezing point, while at Murree at a higher elevation it was 35°. On Friday the thermometer fell to 2° below zero. The only stations which have hitherto reported such low temperatures are Leh and Kailang.

Daily Summary.—*Sunday.*—The barometer had risen briskly to rapidly in Baluchistan and the West Punjab, and the secondary depression in the Punjab had continued to fill up, only a shallow residual depression being shown in the South-East Punjab and the adjacent districts. Pressure had given way slightly to briskly in North-Eastern India, Burma and the Peninsula, and the primary depression had entered the western and central districts of Bengal. Skies had cleared in Baluchistan, Sind and Rajputana, and cloud had decreased in the Punjab and North-Western Provinces. Light to moderate rain or snow had fallen in the Upper India hill districts and the Punjab, and a few light showers had been received in Chota Nagpur. The more important falls were : Cherat 1·1 inches, Rawalpindi ·75 inch, and Murree and Lahore each ·45 inch.

Monday.—Pressure had increased briskly to rapidly in Upper India and had fallen slightly to briskly in North-Eastern India and Burma, where it was in considerable to large defect. It was in slight excess in the Indus valley. Strong westerly winds prevailed in the Gangetic plain and strong northerly winds in Sind and Kathiawar. Local showers were received in Upper Assam and the East Punjab and falls of snow at Chakrata and Simla. Sibsagar reported a fall of ·58 inch and Chakrata ·55 inch.

Tuesday.—Pressure had fallen briskly in Upper India but had continued to rise in Baluchistan. Pressure had risen briskly to rapidly in North Bengal, Assam and Upper Burma, and the depression in that area had partially filled up. Temperature had decreased by 2° in Central India and the Central Provinces and 3° in the North-Western Provinces and Bengal. It was 6° below the normal in Central India, 5° in Sind and Rajputana, 4° in the North-Western Provinces and 3° in the Punjab and Central Provinces. Aden and Colombo reported light showers.

Wednesday.—Pressure had increased slightly to briskly in the Gangetic plain and Bengal, and the depression in Assam and North Bengal on the 4th had filled up completely. Pressure had given way slightly in Baluchistan and briskly in Sind, and an area of deficient pressure was shown covering the Indus valley, where pressure was in considerable defect. Skies had commenced to cloud over in Baluchistan. No rain had fallen in India or Burma.

Thursday.—The barometer had fallen briskly in Baluchistan and had risen briskly at the Upper India hill stations, over the East Punjab, the greater part of the North-Western Provinces, Bengal, Assam and Upper Burma. Pressure was in considerable defect in Baluchistan, Sind, North Bombay, Berar and the Deccan. Skies were partially clouded in Baluchistan and parts of the North-Western and Central Provinces and Central India. Gopalpore had received a light shower and Gnatong a light fall of snow.

Friday.—Pressure had decreased slightly in Northern and Central India and was unchanged in Burma and the Peninsula. An area of local moderate deficiency of pressure lay over Baluchistan, Lower Sind, Cutch and South-West Rajputana. Temperature had increased briskly to rapidly in North-Western and Central India. Skies were overcast in Baluchistan and were more or less clouded in the Punjab, Rajputana, Sind, Central India, Berar and the Central Provinces. Very light showers had fallen in Baluchistan.

Saturday.—Pressure had increased briskly in Baluchistan and the Punjab and slightly in Central India and the Peninsula. The depression in Sind and South-West Rajputana had commenced to fill up and was not of much importance. Skies continued heavily clouded in Baluchistan, but had partially cleared in Sind, Rajputana, the Punjab, Central India, and the Central Provinces. A few stations reported very light showers of rain.

Temperature.—Unusually cool weather has prevailed during the week over the whole country with the exception of Madras, where temperature was above the normal as very often happens when unusually cool weather obtains in Northern India. The coolest days were the 5th, 6th and 7th, when the average mean temperature for the whole of India was more than 2° below the normal. The mean temperature for the week was nearly normal in Burma, and 2° in excess in Madras. It was 3°·5 in defect in Central India, 3° in the North-Western Provinces, 2°·5 in Sind and Rajputana, and between 1° and 2° in Bengal, the Punjab, Bombay and the Central Provinces. For the whole of India it was 1°·4 in defect.

The following table gives the variations from the normal temperature of the different provinces of India for each day of the week :—

Province.	February, 1895.							Mean variation of week.
	3rd.	4th.	5th.	6th.	7th.	8th	9th.

Rainfall.—The rainfall of the week has been small in amount and restricted to only 17 of the 52 rainfall divisions. The largest amount received was an average of ·71 inch in the Punjab hill districts, and only two other divisions (also in the Punjab) received amounts exceeding half an inch. In 9 of the 17 divisions the rainfall did not exceed a tenth of an inch, and in 3 others it was below a quarter of an inch. The rainfall of the week was hence in general defect of the normal, the only divisions which received amounts slightly in excess being the Brahmaputra valley, the central submontane and north-western districts of the Punjab, the central districts of the Central Provinces and the North Madras Coast.

For the period 30th December to 9th February less rain than usual has fallen over the greater part of the country, the only provinces that have received amounts in excess of their normal rainfall being the North-Western Provinces, the Punjab, Central India, Rajputana and the North Madras Coast.

Province.	Division.	Rainfall data for week ending 9th February, 1895.			Rainfall data from 30th December to 9th February, 1895.		
		Average actual rainfall of Division.	Average normal rainfall of Division.	Excess or defect in inches.	Average actual rainfall of season to date.	Average normal rainfall, 30th December to 9th February.	Excess or defect of (seasonal) rainfall expressed as a percentage.

W. A. BION,
Actg. Asst. Meteorological Reporter to the Government of India.

Simla, *the 14th February, 1895.*

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 16th February.*—Slight showers of rain fell in Ganjam and Vizagapatam. The water-supply is insufficient, except in the Circars. Agricultural operations continue. Standing crops fair, but suffering in many districts from drought. Harvesting continues with fair outturn. Pasture and fodder growing scarce in parts. Prices are rising in Trichinopoly and Tinnevelly, but nearly steady or falling elsewhere.

Bombay.—*For week ending 20th February.*—Slight rain fell in parts of Karachi and Khandesh. Water is deficient in canals in the Upper Sind Frontier for irrigation purposes. Standing crops damaged by frost or blight in parts of Sind, by blight in parts of Dharwar, and suffering for want of moisture in parts of Poona. Reaping of late crops continues in parts of twelve districts and preparations for next season's crops in parts of four. Cotton-picking still continues in parts of Kathiawar and Baroda territory. Fodder-supply sufficient except in Shikarpur. Agricultural stock in good condition. Prices normal except in parts of Ahmednagar and Sholapur.

Bengal.—*For week ending 18th February.*—There was no rain in the Province during the week. The spring crop is generally promising, but in Eastern Bengal it requires rain. The preparation of the soil for the autumn crops is going on in parts of Eastern and Northern Bengal. In some districts the harvesting of mustard and peas has begun, and the pressing of sugarcane is in progress. The lancing of poppy is going on in Patna, Gya, and Monghyr. Tobacco is being harvested in Purnea with a fair outturn. The price of common rice continues generally steady and normal. No outbreak of cattle-disease is reported.

North-Western Provinces and Oudh.—*For week ending 20th February.*—Weather continues clear, but showers have fallen in a few districts. Slight damage caused to crops by blight, insects and rust in the Benares, Banda, Partabgarh, Moradabad, and Almora districts, otherwise crops are thriving and prospects are favourable. Supplies ample. Fodder is reported to be getting scarce in some districts. Prices fluctuating.

Punjab.—*For week ending 20th February.*—Slight rain has fallen in the Delhi, Amballa, Amritsar, and Rawalpindi districts. Sugarcane is being pressed in some districts. The land is being prepared for the autumn crops in Lahore. Condition of standing crops is generally reported good and prospects are favourable, except in parts of Peshawar. Crops are withering for want of rain in Shahpur, where, as well as in Dera Ismail Khan, more rain is wanted. Cattle are generally reported to be in good condition. Pasturage and fodder are sufficient throughout the Province, except in parts of Dera Ismail Khan. Prices rising in Amballa, below normal in Sialkot, falling in Shahpur, and continuing low elsewhere.

Central Provinces.—*For week ending 20th February.*—Weather somewhat cloudy with light rain in most districts. The linseed crop has been greatly damaged by rust, especially in the Northern districts, and wheat and gram have also suffered to some extent. Harvesting of winter crops continues. Prices continue steady.

Burma.—*For week ending 16th February.*—No rain during the week. In Lower Burma the threshing of the main paddy crop is nearly completed. In

Upper Burma the main crop has been gathered and other agricultural operations continue. Crop prospects are good. Price of paddy is above normal and unsteady in Lower Burma, and below normal, but rising in Upper Burma. Fodder and water are sufficient.

Assam.—*For week ending 19th February.*—Slight rain fell in most districts. Gathering of mustard and pressing of sugarcane continue. Condition of cattle fair. Fodder and water sufficient.

Mysore and Coorg.—*For week ending 20th February.*—MYSORE: Crops and prospects are good. Harvesting of rice continues in the Bangalore, Tumkur, Mysore, Chitaldroog, and Shimoga districts. Prices have slightly risen in Kolar, Kadur, and Chitaldroog.

COORG: Threshing of rice still continues. Prices of food-grains normal. Fodder for cattle sufficient.

Berar and Hyderabad.—*For week ending 20th February.*—BERAR: Weather cloudy and cool with moderate rain during the week. Cutting of winter crops in progress. Preparation of land for ensuing crop commenced in Buldana. Fodder and water sufficient. Prices fluctuating.

HYDERABAD: No rain fell during the week. Weeding of hot weather crops completed. Tanks and wells full. Prices normal.

Central India.—*For week ending 20th February.*—Slight rain fell in three Agencies during the week. Agricultural operations completed in Bhopal and in progress in other Agencies. Condition of standing crops fairly good in all districts though somewhat damaged by excessive rain and blight. Cattle in good condition, except in Rajgarh, Bhopal, and Gwalior. Pasturage good and sufficient in all Agencies. Prices of food-grains continue high in Bundelkhand, Goona, Nimach, and six districts of Gwalior, rising in Bhopal and steady elsewhere. Opium partly damaged by rain in Goona, but in good condition in other Agencies.

Rajputana.—*For week ending 20th February.*—Agricultural operations are generally satisfactory. Standing crops, prospects, and agricultural stock good. Some damage to crops is reported in Meywar, Jhallawar, Kotah, and Kerowli by frost and insects. Fodder sufficient, but failing in Dholepore. Prices fallen in two States, but steady elsewhere.

Kashmir.—*For week ending 19th February.*—KASHMIR VALLEY: The weather is getting finer. Very little snow fell during the week. Prices continue normal.

JAMMU PROVINCE.—*For week ending 20th February.*—No rain. Weather fair. Crops are in good condition. Prices normal. Cattle in good condition and fodder sufficient.

Nepal.—*For week ending 16th February.*—Moderate rain fell during the week. The weather is now bright. More rain is required for the wheat crop.

DENZIL IBBETSON,

Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.
PUBLIC WORKS DEPARTMENT.
RAILWAY STATISTICS.

STATEMENT OF APPROXIMATE GROSS EARNINGS OF INDIAN RAILWAYS FROM 1ST JANUARY TO 3RD FEBRUARY 1894, AND FROM 1ST JANUARY TO 2ND FEBRUARY 1895.

N.B.—As regards the figures in column *Total Earnings from 1st January 1895*, audited figures have been used as far as possible.

DENZIL IBBETSON,

Offg. Secretary to the Government of India.

DEPARTMENT OF REVENUE AND AGRICULTURE:

Calcutta, the 21st February 1895.

Printed and published for the GOVERNMENT OF INDIA *at the Office of the* SUPERINTENDENT OF GOVERNMENT PRINTING, INDIA, *No. 8, Hastings Street, Calcutta.*

SUPPLEMENT TO

The Gazette of India.

No. 9.} CALCUTTA, SATURDAY, MARCH 2, 1895.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

FINANCE AND COMMERCE DEPARTMENT.

STEPHEN JACOB,
Offg. Secretary to the Government of India.

FINANCE AND COMMERCE DEPARTMENT
(*Statistical Branch*).

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the week ending at 8 a.m. on Saturday, February 16th, 1895.

General Summary.—Two disturbances effected the weather in Northern India during the week, but they were both feeble and gave only a few showers chiefly accompanying thunderstorms. The first was the depression lying over Sind and South-West Rajputana at the close of the previous week which commenced moving eastwards on Sunday, and by Monday morning had advanced as far as Baghelkhand and the north-eastern districts of the Central Provinces. It gave light to moderate showers in Central India and the Central Provinces and very light local showers in the Gangetic Plain. Saugor reported a fall of ·91 inch and Sutna and Jubbulpore each half an inch. The disturbance was passing through Bengal on Tuesday morning, but the only shower of rain reported exceeding a tenth of an inch was ·34 inch at Balasore. Rain continued next day in some parts of Assam, Bengal, Orissa and Ganjam, the principal falls reported being False Point ·8 inch, Balasore ·54 inch and Gopalpur ·37 inch. Practically no rain fell over the whole of India and Burma on Thursday and Friday. On Friday, the barometer fell briskly in Baluchistan and North-Western and Central India, and pressure was in moderate local defect in Sind. Another fall of the barometer took place on Saturday over the same area and a shallow depression was shown lying over Sind, where pressure was in considerable defect. Weather was slightly disturbed in North-Western and Central India, and light thunder showers were received at several stations in Berar and the Central Provinces. Amraoti reported a fall of ·34 inch and Hoshangabad, Nagpur, Seoni and Pachmarhi each two-tenths of an inch. This disturbance was not one of the ordinary cold-weather type, but was due to the rapid increase and excess of temperature in the area in which it originated.

Unusually warm weather has prevailed during the week in the Punjab, Sind, Rajputana and the North-Western Provinces, the mean temperature of the whole week averaging 3°·4 above the normal in the Punjab and 2°·8 in Sind and Rajputana. In Burma, on the other hand, temperature has been in general defect the deficiency amounting to 2°·5 on the 10th. Fine dry weather with temperature slightly above the normal has obtained in Madras. The mean temperature for the whole of India for the week was 1°·1 in excess.

Daily Summary.—*Sunday.*—Pressure had given way slightly in the Punjab, Upper Sind, Rajputana and the North-Western Provinces and had risen over the remainder of India and Baluchistan, the depression in Sind and South-West Rajputana had nearly filled up, but pressure continued in slight to moderate defect in North Bombay and the western districts of the Central Provinces. It was nearly normal elsewhere. Temperature had risen briskly to rapidly over the whole of Northern India and the Central Provinces. Skies were overcast in Baluchistan and were moderately to heavily clouded in North-

Western India. A few light showers of rain were reported, the heaviest being one of ·3 inch at Seoni.

Monday.—The barometer had risen briskly to rapidly in Baluchistan, Sind, Cutch and South-West Rajputana, and pressure was in slight to considerable excess in that area. The disturbance in Sind and Rajputana had moved eastwards and was shown covering Baghelkhand and the north-eastern districts of the Central Provinces. Skies were heavily clouded at the hill stations of Upper India and in the Gangetic Plain. Light to moderate showers had fallen, chiefly during thunderstorms, in Central India and the Central Provinces, and very light local showers in the Gangetic Plain. Saugor reported ·91 inch, Sutna and Jubbulpore each half an inch and Seoni four-tenths of an inch.

Tuesday.—Pressure had increased briskly in Baluchistan and slightly in North-Western India. It had decreased slightly to briskly in North-Eastern India and the feeble disturbance, in Baghelkhand the day before, was passing through Bengal, where pressure was in slight defect. Anti-cyclonic conditions prevailed in Baluchistan and North-Western India where pressure was in slight to large excess. Light showers had fallen in the Upper India hill districts and locally in some parts of South-West Bengal and Chota Nagpur. Murree received ·75 inch, Balasore ·34 inch and Simla ·22 inch.

Wednesday.—Pressure had increased slightly in Baluchistan, Sind, Kathiawar and the west of the Peninsula, and had decreased slightly in North-Eastern India. It was in moderate to considerable excess in Baluchistan, at the Upper India hill stations, in Central India and the Central Provinces, and was nearly normal elsewhere. Rain had fallen in some parts of Assam, Bengal, Orissa and Ganjam. False Point reported a fall of ·8 inch, Balasore ·54 inch and Gopalpur ·37 inch.

Thursday.—The barometer had fallen slightly in Baluchistan, where skies had commenced to cloud over, and had risen generally in India and Burma, the rise being brisk in North-Eastern and Southern India. Pressure was in considerable excess in Baluchistan, at the Upper India hill stations, and over the greater part of North-Eastern and Central India and the Central Provinces. It was practically normal in Sind and Burma. Sibsagar and Gnatong reported very light showers, less than a tenth of an inch in amount.

Friday.—Pressure had given way briskly in Baluchistan and North-Western and Central India and slightly elsewhere. It was in moderate local defect in Sind. A feeble disturbance was affecting the weather in North-Western India and was causing cloud and an increase of temperature over that area. The mean temperature of the past 24 hours was 6° in excess in the Punjab and 4° in Sind and Rajputana. Gnatong reported a very light fall of snow.

Saturday.—Pressure had decreased over nearly the whole country, the fall being brisk over Northern and Central India and slight in the Peninsula and Burma. Pressure was in considerable defect in Sind, the South-West Punjab and West Rajputana, and a shallow depression was shown covering Sind which was causing slightly unsettled weather in North-Western and Central India. Winds had increased at Murree and were blowing with a velocity of 24 miles per hour at 8 A.M. Light thunder showers were reported at several stations, the heaviest fall being ·34 inch at Amraoti.

Temperature.—The following table gives the variations from the normal temperature of the different provinces of India for each day of the week:—

Province.	February, 1895.							Mean variation of week.
	10th.	11th.	12th.	13th.	14th.	15th.	16th.	
	°	°	°	°	°	°	°	°
Burma	−2·5	−1·9	−1·0	+0·3	+0·7	−0·6	−1·8	−1·0
Bengal and Assam	−0·4	+1·6	+0·9	+2·5	−0·4	−1·2	−0·9	+0·3
North-Western Provinces and Oudh	+0·6	+3·9	+2·7	+0·8	+0·3	+1·3	+2·6	+1·7
Punjab	+2·3	+1·2	+2·5	+3·0	+4·2	+5·6	+5·2	+3·4
Bombay	+1·4	0	−2·1	−1·7	−0·1	+1·2	+1·0	0
Central Provinces and Berar	+4·2	+4·2	−0·6	−1·4	−2·7	+0·3	+3·1	+1·0
Central India and Gujarat	+3·2	+1·2	−0·7	−0·6	−0·7	+1·9	+4·0	+1·2
Sind and Rajputana	+3·7	+2·0	+1·6	+1·0	+2·4	+3·8	+5·3	+2·8
Madras	+1·2	+1·4	+1·6	+1·4	+0·9	+0·3	−0·8	+0·9
	°	°	°	°	°	°	°	°
Mean for whole of India	+1·5	+1·5	+0·5	+0·6	+0·5	+1·4	+2·0	+1·1

In Burma temperature was, with the exception of the 13th and 14th, below the normal, the deficiency being greatest on the 10th, 11th and 16th. In Bombay, the Central Provinces and Central India, unusually low temperatures were registered on the 12th, 13th and 14th, but during the remainder of the week temperature was in general excess, the excess amounting to 4° in the Central Provinces on the 10th and 11th, and in Central India on the 16th. In Bengal and Madras, the first part of the week was warmer than the second, but the variations from the normal in these provinces were on the whole not large. In the Punjab, Sind, Rajputana and the North-Western Provinces temperature was in constant excess throughout the week, the excess being most marked in the first three provinces on the 15th and 16th. In the Punjab, on the 15th, the mean temperature on an average for all stations was nearly 6° above the normal. The mean temperature of the whole week was in slight defect in Burma, normal in Bengal and Bombay, in slight excess in Madras, the North-Western and Central Provinces, and Central India, and in moderate to considerable excess in the Punjab, Sind and Rajputana.

The mean temperature of the whole of India was above the normal every day of the week, the excess for the whole week averaging 1°·1.

Rainfall.—The rainfall of the week has been small in amount and has slightly exceeded the normal quantity only in Berar, the Central Provinces and Orissa, and in parts of the Punjab, Central India and Madras East Coast. Rain was received in 24 of the 52 rainfall divisions, but the largest average fall was below half an inch, and in 14 divisions the fall did not exceed a tenth of an inch.

For the period 30th December to 16th February, rainfall was in defect in all provinces except the Punjab, North-Western Provinces, Central India, Rajputana, the central districts of the Central Provinces and on the North Madras Coast.

Province.	Division.	Rainfall data for week ending 16th February, 1895. Average actual rainfall of Division.	Average normal rainfall of Division.	Excess or defect in inches.	Rainfall data from 30th December to 16th February, 1895. Average actual rainfall of season to date.	Average normal rainfall, 30th December to 16th February.	Excess or defect of (seasonal) rainfall expressed as a per-centage.

W. A. BION,
Acting Asst. Meteorological Reporter to the Government of India.

SIMLA, *21st February, 1895.*

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 23rd February.*—Slight scattered showers in Vizagapatam. Water-supply insufficient except in the Circars. Usual hot-weather crops being sown. Standing crops generally fair but withered or withering in parts from want of water. Harvest continues with fair outturn. Pasture and fodder growing scarce in parts. Prices slightly easier in parts of the Circars and Deccan, risen in parts of the Central and Southern districts, and nearly steady elsewhere.

Bombay.—*For week ending 27th February.*—Rain has fallen in parts of twelve districts of the Presidency Proper and is required throughout Shikarpur. Standing crops damaged by frost or blight in parts of Sind, by rain in parts of Ahmednagar and Kathiawar, and suffering for want of moisture in parts of Poona. Harvested crop damaged by rain in one taluka of Broach. Reaping of late crops continues in parts of sixteen districts and preparations for next season's crops in parts of four. Cotton-picking in progress in parts of Bijapur, Dharwar, Kathiawar, and Baroda territory. Fodder-supply sufficient except in **Shikarpur. Condition of agricultural stock good. Prices normal except in parts of Ahmednagar and Sholapur.**

Bengal.—*For week ending 25th February.*—There was no rain during the week; the weather is becoming warmer throughout the province. Reports of the spring and other standing crops continue generally favourable, but rain is required in some of the eastern districts and also in Rangpur. Lands are being prepared for the hot-weather crops in parts of Northern Bengal and for the sowing of early paddy in Darbhanga and Bhagalpur. Mustard is still being harvested, and the pressing of sugarcane is going on in some districts. Prospects of poppy are good; the lancing is in progress and the outturn is reported satisfactory. Cattle are in good condition. The price of common rice is generally normal and almost stationary.

North-Western Provinces and Oudh.—*For week ending 26th February.*—Weather clear and seasonable. Crops are reported to have been slightly damaged by insects, rust and blight in seven districts. Prospects of the spring and poppy crops are generally favourable. Sugarcane-pressing continues and harvesting of peas and barley has commenced in places. Supplies and fodder are sufficient, except in a few places where fodder is scarce. Prices still fluctuating.

Punjab.—*For week ending 27th February.*—Rain has fallen in Rawalpindi and Peshawar only. Ploughing of land for tobacco and sugarcane is in progress in some districts, and sowing of cotton and onions has commenced. Condition

of standing crops is generally reported good, except on low-lying lands in parts of Peshawar. Crops on rain lands are drying for want of moisture in Shahpur where, as well as in Dera Ismail Khan, rain is badly wanted. Cattle are generally said to be in good condition. Pasturage and fodder are sufficient in all districts, except in one tehsil of Dera Ismail Khan. Prices rising in Dera Ismail Khan, normal in Umballa, below normal in Sialkot and Shahpur, and continue low elsewhere.

Central Provinces.—*For week ending 27th February*—Weather cloudy and warm with light rain in four districts. Harvesting of wheat and other winter crops continues in parts. Prices remain steady except in Seoni where they are above normal.

Burma.—*For week ending 23rd February.*—Rain has fallen in Tavoy, but none elsewhere. Reaping and gathering of dry-weather crops has commenced in Upper Burma. Prospects good. Price of paddy steady, but above normal in Lower and below normal in Upper Burma, except at Thayetmyo where it is high. Fodder and water sufficient.

Assam.—*For week ending 26th February.*—Weather dry. Gathering of mustard and pressing of sugarcane continue. Condition of cattle fair. Fodder and water sufficient.

Mysore and Coorg.—*For week ending 27th February.*—MYSORE: Standing crops in good condition. Rice sown in parts of Bangalore and Tumkur districts. Harvesting continues in Kadur district. Prices have slightly fallen in Bangalore, Kolar, Hassan and Kadur districts.

COORG: Threshing of rice and ragi (*Eleusine coracana*) continues. Prices of food-grains normal. Fodder for cattle fairly sufficient.

Berar and Hyderabad.—*For week ending 27th February.*—BERAR: Weather cool and cloudy with occasional showers of rain. Cutting of winter crops and threshing of jowar (*Sorghum vulgare*) continues. Prospects favorable except in parts of Akola, where damage has been caused through insects and hail-storms. Fields are being ploughed for next rain crop in three districts. Fodder and water-supply ample. Prices fluctuating in one district, but are otherwise steady.

HYDERABAD: Moderate rain fell during the week. Weeding of hot-weather crops nearing completion in some tehsils. Prices normal.

Central India.—*For week ending 27th February.*—Slight rain fell in four Agencies during the week. Standing crops are in fairly good condition though damaged in places by rain, blight and insects. Cattle in good condition, except in Rajgarh, Bhopal and Bhopawar. Pasturage good and sufficient except in parts of Gwalior. Prices of food-grains rising in Bhopal, Dhar and four districts of Gwalior; above normal in three Agencies and one district of Gwalior; and normal elsewhere. Opium damaged by rain in parts of Dhar and Manpur.

Rajputana.—*For week ending 27th February.*—Slight rain in Pertabgarh, Ulwar and Bikanir. Agricultural operations satisfactory. Standing

crops, prospects and agricultural stock generally good. Linseed much damaged in Kotah. Fodder sufficient but failing in Dholepore. Prices fallen in two States, rising in one and steady elsewhere.

Kashmir.—*For week ending 26th February.*—KASHMIR VALLEY.—No rain. Weather cloudy. Prices falling.

JAMMU PROVINCE.—*For week ending 27th February.*—No rain. Crops and agricultural stock in good condition. Prices stationary. Fodder sufficient.

Nepal.—*For week ending 23rd February.*—Slight rain fell during the week. Weather cloudy. State and prospects of the crops good.

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the week ending at 8 a.m. on Saturday, February 23rd, 1895.

General Summary.—Fine settled weather has prevailed generally over the whole of the Indian area during the week. The most important feature in the pressure conditions was a remarkable rise of pressure over the whole country on Monday due to some general action, the nature of which was not directly indicated by the observations of the day. The increase of pressure was largest in the West Punjab and ranged from a tenth to nearly a quarter of an inch in Northern and Central India. Pressure was in excess over the whole country, the excess increasing in amount northwards from ·01 inch at Colombo to ·10 inch in Assam and the North Punjab. These high pressure conditions were accentuated by a further rise next day, and though pressure fell on Wednesday, the excess of pressure, especially in Baluchistan and the Upper India hill districts, continued to be a more or less strongly marked feature in the pressure conditions during the remainder of the week.

Unusually high temperatures were registered throughout the week in the Punjab, Sind, Rajputana and Central India, the excess over the normal averaging 7° in the Punjab on the 17th, 18th and 19th. A large fall of temperature took place on the 22nd in Berar and the Central Provinces due to the occurrence of hailstorms in that area. The fall was most marked in the day tem-

peratures, the maximum or day temperature at Chanda, for instance, being 18½° below the normal of the day and at Amraoti and Akola 17°½ and 17° respectively.

Humidity decreased by large amounts on the 19th in the Upper India hill districts, the Gangetic Plain and on the West Coast and the air was very dry at the Western Himalayan hill stations during the latter part of the week. Murree recorded the remarkably low humidity of only 6 per cent. on Friday morning.

Daily Summary.—*Sunday.*—Pressure had changed irregularly, being nearly steady in Gujarat and Central India, increasing slightly in Lower Burma and giving way slightly over nearly the whole of the remainder of the Indian area. The depression in Sind shown by the previous day's observations was still in existence but was of but little importance. The chief feature in the pressure distribution was its great uniformity. Temperature had fallen briskly to rapidly in the Central Provinces and Central India and risen slightly in the Punjab, Sind and Rajputana. It averaged from 6° to 7° above the normal in North-Western India. A few thundershowers were reported, the largest falls being at Sibsagar ·72 inch, Murree ·57 inch, Peshawar ·35 inch and Nagpur ·2 inch.

Monday.—Pressure had increased generally over the whole of the Indian area, the increase ranging between a tenth of an inch and ·23 inch in Northern and Central India, and being greatest in the West Punjab. Pressure was in excess everywhere and was most in excess in the Punjab and Assam where the excess amounted to a tenth of an inch. Temperature had increased in Bengal and the Central Provinces and was in general excess except in Bombay, Madras and Burma. In Burma it was 2° below the normal. Very light showers fell at several stations in Berar, the Central Provinces and the North Punjab. Srinagar reported a fall of snow equivalent to ·34 inch of rain.

Tuesday.—Pressure had again increased over the whole country. The rise was brisk to rapid in Baluchistan, North-Western and Central India and the Deccan and pressure was in considerable to large excess over Northern and Central India, the Central Provinces and the Deccan. Temperature continued largely above the normal in the Punjab, Sind and Rajputana and in considerable excess in the North-Western Provinces and Central India. The maximum temperatures registered at Quetta, Mooltan, Jacobabad and Bickaneer were from 10° to 14° above the the normal of the day. Humidity had decreased by large amounts in the Upper India hill districts, the Gangetic Plain and on the West Coast. A few light showers were reported from Central India and the Central Provinces and a light fall of snow from Gnatong.

Wednesday.—Pressure had given way briskly to rapidly in Baluchistan and North-Western India. Pressu re was nearly normal in the West Punjab, Cutch, Kathiawar and along the West Coast, and in general excess elsewhere, the excess being greatest in Baluchistan, the Upper India hill districts and North-Eastern India. Temperature had increased briskly in Bombay and Central India, and had decreased slightly to briskly in Bengal, the North-Western Provinces, Sind and Rajputana. Day temperatures in North-Western India averaged 8½° above the normal. Ahmednagar had received ·64 inch of rain and Gnatong about half a foot of snow.

Thursday.—Pressure had risen briskly in the hill and submontane districts of the Punjab and locally in Khandesh and Berar and had changed by small

amounts elsewhere. Pressure was upwards of a seventh of an inch in excess of the normal in Baluchistan and the Upper India hill districts. Temperature had changed by small amounts and continued in large excess in North-Western India. Maximum or day temperatures averaged 10° above the normal in the Punjab, 9½° in Sind and Rajputana and 8° in Gujarat. Rangoon registered the highest temperature, *viz.*, 97°·1. A few showers had been received in Berar, the Central Provinces and Central India. Akola reported a fall of ·88 inch and Amraoti and Indore each a third of an inch.

Friday.—Pressure had changed by only small amounts and its distribution hence was practically unchanged. Pressure continued in large excess in Baluchistan and in moderate to considerable excess in Northern India, the Central Provinces and the Deccan. Temperature had fallen very rapidly by amounts averaging 7° in the Central Provinces and Berar due to hailstorms in that area. The mean temperature of the Central Provinces was 5½° below the normal while in North-Western and Central India it was 3° to 5° above. Hoshangabad reported rainfall amounting to ·7 inch and Pachmarhi ·39 inch.

Saturday.—Pressure had fallen briskly in the Punjab and Upper Sind and had changed chiefly by small amounts elsewhere. It had changed irregularly in the Central Provinces and Deccan. A shallow low pressure area was shown lying over Upper Sind and the South-West Punjab. Temperature had risen briskly in the Central Provinces but was still 3° in defect in that area. Temperature continued in large excess in the Punjab, Sind and Rajputana. Both day and night temperatures were in large excess at Murree, the minimum temperature reported being 49°·1 or nearly 8° higher than at Rawalpindi. A thunderstorm had given Tavoy 1·87 inches of rain and Poona and Ratnagiri had received light showers.

Temperature.—The following table gives the variation of the mean temperature from the normal in the different provinces of India for each day of the week:—

Province.	February, 1895.							Mean variation of week.
	17th.	18th.	19th.	20th.	21st.	22nd.	23rd.

Mean for whole of India	+1·8	+2·2	+2·4	+2·5	+2·5	+1·3	+1·3	+2·0

In Madras temperature has been slightly lower than usual throughout the week but in all other provinces it has been in general and, in the case of North-Western and Central India, large excess. The excess was largest in the Punjab, Sind and Rajputana where it averaged from 5° to 7°. The mean tempera-

ture of the week was 6°·4 in excess in the Punjab, 5°·7 in Sind and Rajputana 3°·2 in Central India and 2°·7 in the North-Western Provinces. It was nearly normal in Burma and the Central Provinces and 1°·4 in defect in Madras. The average mean temperature for the whole of India was in excess of the normal on every day of the week. For the whole week it was 2° above the normal.

Rainfall—Rain was received in 17 of the 52 rainfall divisions, but the amounts recorded were in all cases small. In only four divisions the average fall exceeded a quarter of an inch and in ten it was below a tenth of an inch. The rainfall of the week was less than the normal in all divisions except in the Konkan, Bombay Deccan, Khandesh, Berar, the Central Provinces, Kathiawar and the Northern districts of the Madras East Coast. Berar received the most rain during the week, the rainfall averaging ·72 inch for the whole division.

The rainfall for the period 30th December to 23rd February was in excess of the normal quantity in the North-Western Provinces, Oudh, the Punjab, Bombay Deccan, Khandesh, Berar, the western and central districts of the Central Provinces, Central India, East Rajputana, and the North Madras East Coast. In all other parts of the country it was in defect.

W. A. BION,
Acting Asst. Meteorological Reporter to the Government of India.

SIMLA *28th February, 1895.*

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 2nd March.*—Slight scattered showers in parts of the Circars, Kurnool, Coimbatore, the Nilgiris and Madura. Water-supply generally insufficient. The hot-weather crops are being sown. Standing crops generally fair, but withered or withering in parts of the Deccan, Carnatic, Central and Southern districts. Harvest continues with fair outturn. Pasture and fodder growing scarce. Prices have risen in Ganjam, Madura and Tinnevelly, but are nearly steady elsewhere.

Bombay.—*For week ending 6th March.*—Rain fell in parts of eight districts. Standing crops damaged by frost, blight or insects in parts of Sind, by rain in parts of Ahmednagar, by frost in parts of Baroda territory and suffering for want of moisture in parts of Poona. Reaping of late crops continues in parts of fourteen districts and preparations for next season's crops in parts of five. Cotton-picking in progress in parts of Bijapur, Dharwar, Kathiawar and Baroda territory. Fodder-supply sufficient, and agricultural stock in good condition. Prices normal except in parts of Ahmednagar and Sholapur.

Bengal.—*For week ending 4th March.*—No rain during the week; the weather is seasonable. The spring crops are doing well, and the earlier kinds are being gathered. In Eastern Bengal the spring crops are still in need of rain, and rain is also required there for the cultivation of the hot-weather crops. The collection of opium is going on well, the weather being favourable for lancing. No cattle-disease is reported. The price of common rice continues generally steady and normal.

North-Western Provinces and Oudh.—*For week ending 6th March.*—Weather clear and warm. Sugarcane-pressing still going on and sowing commenced in places. Spring crops ripening in some districts and prospects generally favourable. Poppy crops doing well and collection of opium is in progress. Supplies and fodder ample and prices fairly steady.

Punjab.—*For week ending 6th March.*—Slight rain has fallen in parts of Hissar, Lahore, Rawalpindi, Dera Ismail Khan and Peshawar. Ploughings for autumn crops and sowings of cotton, sugarcane and onions have commenced. Condition and prospects of crops are generally reported good to average except on low-lying lands in the Peshawar District. Rain is badly wanted in Shahpur and Dera Ismail Khan. Cattle are generally reported to be in good condition and fodder is sufficient in all districts except Sialkot and parts of Dera Ismail Khan. Prices rising in Dera Ismail Khan, continue normal in Umballa, below normal in Sialkot and Shahpur and continue low elsewhere.

Central Provinces.—*For week ending 6th March.*—The weather continues cloudy and warm. Slight rain has fallen in five districts. Harvesting of wheat and other winter crops continues. A fourteen to sixteen anna outturn is anticipated from the early sown wheat crop, while a twelve anna outturn may be expected from the later sowings in all but a few districts of the Provinces, if clear weather sets in; otherwise the outturn may fall considerably below this. The outturn of the linseed crop is not expected to be higher than three annas for the Province. Gram and other pulse crops are being attacked by insects. Prices steady.

Burma.—*For week ending 2nd March.*—Rain fell in nearly all districts but the showers were light in most places and there are no reports of damage to grain lying in threshing floors. Both in Lower and Upper Burma threshing of wet-weather paddy is approaching completion and in the Upper Province the reaping and gathering of dry-weather crops is commencing. Prospects of standing crops are good Price of paddy steady but with a tendency to fall. Prices are above normal in Lower Burma and below normal in Upper Burma. Fodder and water-supply sufficient,

Assam.—*For week ending 5th March.*—Weather seasonable. Pressing of sugarcane continues and gathering of mustard almost over. Condition of cattle fair. Fodder and water sufficient.

Mysore and Coorg.—*For week ending 6th March.*—MYSORE: Crops and prospects good. Rice sown in parts of Bangalore and Tumkur. Prices slightly risen in Bangalore and Hassan districts.

COORG: Threshing of rice is nearly completed. Prices of food-grains normal. Fodder and water fairly sufficient.

Berar and Hyderabad.—*For week ending 6th March.*—BERAR: Weather getting warm but at times cloudy. Cutting of winter crops nearing completion and threshing of *jowar* (*Sorghum vulgare*) in progress. Land under preparation for ensuing crop. Fodder and water sufficient. Prices almost stationary.

HYDERABAD: Slight rain during the week. State of hot-weather crops favourable. Water in tanks and wells sufficient for cultivation. Prices normal

Central India.—*For week ending 6th March.*—Slight rain fell in four Agencies and in the Nimach district during the week. Standing crops in fair condition. Probable outturn will be fairly good, though some damage has been done by rain, blight and insects. Cattle in good condition except in Bhopal and parts of Gwalior. Pasturage good and sufficient in all Agencies except Gwalior. Prices of food-grains high in Bundelkhand, Western Malwa, Goona, Nimach and one district of Gwalior, rising in Bhopal, Bhopawar, and five districts of Gwalior, and normal elsewhere. Condition of opium fairly good, but some damage has been caused by winter rain in parts of Bhopawar, Goona and Nimach.

Rajputana.—*For week ending 6th March.*—Slight rain fell in Kherwara, Pertabgarh and Meywar. Agricultural operations satisfactory. Standing crops prospects and agricultural stock generally good. Wheat partially damaged in Kotah by rust. Fodder sufficient but failing in Dholepore. Prices below average in one State, rising in one and steady elsewhere.

Kashmir.—*For week ending 5th March.*—KASHMIR VALLEY.—Weather cloudy in Kashmir, but fine at Gilgit. Crops reported to be in good condition in the Mozaffarabad district. Prices falling in Kashmir Proper but continue normal in Gilgit and the Mozaffarabad district.

JAMMU PROVINCE: *For week ending 6th March.*—No rain. Crops in good condition. Prices rising. Fodder sufficient.

Nepal.—*For week ending 2nd March,*—Moderate rain during the week. Weather seasonable. State and prospects of the crops good.

DENZIL IBBETSON,

Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.
PUBLIC WORKS DEPARTMENT.
RAILWAY STATISTICS.

STATEMENT OF APPROXIMATE GROSS EARNINGS OF INDIAN RAILWAYS FROM 1ST JANUARY TO 24TH FEBRUARY 1894, AND FROM 1ST JANUARY TO 23RD FEBRUARY 1895.

N.B.—As regards the figures in column *Total Earnings from 1st January 1895*, audited figures have been used as far as possible.

Railway.	Average earnings per mile per week during the 1st half of 1894.	Week ending 24th February 1894. Mean mileage worked.	Earnings. Total.	Per mile open per week.	Week ending 23rd February 1895. Mean mileage worked.	Earnings. Total.	Per mile open per week.	Earnings from 1st January to 24th February 1894.	Earnings from 1st January to 23rd February 1895.	Increase.	Decrease.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Extract from the Proceedings of the Government of India in the Department of Revenue and Agriculture,—No. $\frac{7}{3}$, dated 7th March 1895.

COMMERCIAL EXHIBITIONS.

RESOLUTION.

READ the following:—

Prospectus of the Empire of India Exhibition to be held in London in 1895.

THE EMPIRE OF INDIA EXHIBITION, 1895.

TO BE HELD AT EARL'S COURT, LONDON, S.W.

Proprietors:

THE LONDON EXHIBITIONS, LIMITED.

Directors:

PAUL CRÉMIEU-JAVAL, *Chairman.*
HAROLD THOMAS HARTLEY.
JAMES MARSHALL FRESHWATER.

Managing Director:

IMRE KIRALFY.

This Exhibition will open early in May 1895, for a period of about six months, and will be held in the well-known Earl's Court Exhibition Grounds, which cover an area of about 22 acres, and will be characterised by brilliant and unique attractions.

Ample capital has been provided for this purpose by the London Exhibitions, Limited, who have a capital of £100,000, of which £90,000 is subscribed in cash. It is intended to expend the whole of this amount in preparing THE EMPIRE OF INDIA EXHIBITION.

The Exhibition will be divided into sections, *viz.*:—The Art and Loan Section, the Industrial Section, and the Spectacular Section.

The Company will be glad to receive particulars of proposed Loan Exhibits from the owners of Artistic and Historical Objects emanating from or connected with India, such as Arms, Furniture, Costumes, Pictures, Jewellery, etc., for which, if approved, the Company will provide carraige to the Exhibition free of cost, and ample space for exhibiting, also every possible protection in the way of safes, show-cases, police, fire insurance, etc., and will guarantee to return the same at the end of the Exhibition at their own expense. This Section will be under the Direction of Sir JAMES LINTON, President of the Royal Institute of Painters in Water Colours.

Industrial Exhibitors—whether of Indian produce and manufactures, or manufacturers of goods for the markets of India—who are desirous of securing space, should state the nature of their Exhibits, the space required, and whether process of manufacture employing native or other labour will be shown. To those Exhibitors showing working exhibits employing native Indian operatives special facilities will be afforded.

"THE EMPIRE OF INDIA" is so suggestive of Oriental splendour and of the manifold interests which are associated with this Great Dependency of the British Crown, that it affords abundant inspiration for this Exhibition. Only of late years has any attempt been made to meet the long-felt and pressing need of London for a Pleasure Resort easily accessible from all parts of the Metropolis, and it is confidently believed that this magnificent Exhibition of 1895 will fulfil this requirement; support and co-operation from the highest and most influential quarters have been secured to the enterprise.

The Exhibition will comprise Illustrations of Historical, Artistic, and Industrial India—not only by means of Oriental Pageants, but also by exemplifications of the Customs and Amusements of the various Races; and in order to make THE EMPIRE OF INDIA EXHIBITION really and instructively representative it is intended to reproduce all the leading characteristics of the varied and picturesque phases of life in an INDIAN CITY, comprising Bazaars, Streets, and Shops, peopled by Natives engaged in their various avocations. Arrangements have been made by the Company's Official Delegates in India for securing the presence, during the term of the Exhibition, of a number of Native Craftsmen and other typical representatives of Hindoo and Mahommedan Bazaar-life. In order to stimulate the best artizans of India to take part in the Exhibition and exhibit their choicest works, valuable prizes, amounting to about 7,000 rupees, will be offered by the Company for the best examples of the various native Indian Arts and Crafts.

To ensure a thorough and impartial examination of the Exhibits for the Awards, which will be made in money prizes, the Company invited the co-operation and assistance of the Society for the Encouragement and Preservation of Indian Art, of which Sir MOUNTSTUART GRANT DUFF, G.C.S.I., is President, Sir GEORGE BIRDWOOD, K.C.I.E., C.S.I., is Chairman of the Executive Committee, Mrs. DAVID CARMICHAEL, Mr. C. PURDON CLARKE, C.I.E., and MR. MARTIN WOOD, Honorary Secretaries. This responsible and onerous task has been undertaken by the Society as a duty in the interest of Indian Arts and Manufactures.

MR. IMRE KIRALFY has undertaken the Composition and Production of a Great Indian Spectacle, which it is intended shall eclipse anything of the sort that has hitherto been produced, and his name, so well known as the author and producer of "Venice in London," "Nero," "America," and numerous other triumphs, familiar to the inhabitants of both hemispheres, will guarantee both the novelty and the artistic excellence of this Section. The Artistic and Architectural Features of the Exhibition also are his conception and design.

The present buildings being inadequate for the purposes above enumerated, a special feature of the new Exhibition will be the erection in the grounds of one of the finest glass and iron structures in the world, covering 66,014 superficial feet, to be known as THE IMPERIAL PALACE, in which the Exhibits will be displayed.

A New Theatre, probably the largest in the world, will be constructed for the purpose of adequately presenting Grand Spectacular Productions, and will be named "THE EMPRESS THEATRE."

The existing Gardens—which, with their manifold natural charms, have always been a great feature of attraction at Earl's Court—will be improved, and Electric Illuminations, First-class Bands, and other attractions will be provided therein.

Arrangements will also be made with persons having control of typical Indian Amusements, or Shows connected with India, which they are desirous of exhibiting to the British public for special payment at the doors. Such arrangements can be made either on the basis of a fixed rental or of sharing the receipts for admissions. Spaces for this purpose will be provided in the grounds separate in every way from the Exhibition Buildings.

Arrangements have been made with Messrs. SPIERS & POND to provide an efficient system of Restaurants and Refreshment Bars to suit all classes of visitors, at prices varying from the cheap tourist tariff to the celebrated Quadrant Dinners provided by them at the well-known South Kensington Exhibitions of 1885 and 1886.

Intending Exhibitors should fill up the Preliminary Form attached, giving particulars of their Exhibit, and forward the same, addressed to the Secretary, at the Offices of The London Exhibitions, Limited, 10, 11 and 12, New Bridge Street, London, E. C., from whom all information can be obtained, as well as at the Offices of Messrs. KING, KING & Co., at Bombay, and KING, HAMILTON & Co., of Calcutta.

After receipt of the Preliminary Form above referred to, the Applicant will be informed if the space can be allotted to him, and on what conditions, when the Rules and Regulations and Form of Agreement will be sent for his approval and signature.

THE EMPIRE OF INDIA EXHIBITION, 1895.

THE LONDON EXHIBITIONS, LIMITED.

Offices:—10, 11, 12, New Bridge Street, E. C.

To Manufacturers and Importers desirous of developing or establishing trade with India, the commercial importance of this Exhibition cannot be overstated. It will not only bring the manufacturer into practical touch with the consumer, but will also afford

an unrivalled opportunity of making brands prominently known in the most desirable of markets.

The solid support the Exhibition meets with both here and in India, in the very highest and most influential quarters, indicates the serious interest taken in it.

The important trade already existing between the two countries is clearly shown in the following Government Statistics of Exports to which we particularly invite the attention of Merchants and Manufacturers of all classes; a trade to which it is believed. the Empire of India Exhibition will afford an enormous impetus.

THE EMPIRE OF INDIA EXHIBITION, 1895.

EARL'S COURT, LONDON, S. W.

Proprietors :

THE LONDON EXHIBITIONS, LIMITED.

Directors :

PAUL CRÉMIEU-JAVAL, *Chairman.*
HAROLD THOMAS HARTLEY.
JAMES MARSHALL FRESHWATER.

Managing Director :

IMRE KIRALFY.

Director of Fine Art and Loan Section.

SIR JAMES D. LINTON,

President of the Royal Institute of Painters in Water Colours.

FINE ART AND LOAN SECTION.

REGULATIONS FOR EXHIBITORS.

CONDITIONS ON WHICH WORKS WILL BE RECEIVED.

1. The Exhibition will consist of Paintings in Oil and Water Colours, Black and White Drawings, Miniatures, Pastels, Engravings, Etchings, all of which must be of Indian or allied subjects, and Loan Objects of Indian Art. Owners of Historical Pictures, Portraits of Governors-General and other personages who have figured conspicuously in the History of India, are particularly invited to co-operate in this Section.

2. The Receiving Days for Pictures intended for the Exhibition will be from Monday, March 18th, to Wednesday, March 20th; for all Loan Objects other than Pictures from March 11th to the 13th, inclusive. All Works must be sent in to the Galleries at Earl's Court on one of those dates, as nothing can be admitted after the last named day. The hours for receiving will be from 10 A.M. to 5 P.M.

3. All Works, except those specially invited, will be subject to the approval of the Fine Art Committee, whose decision will be notified to the Artists and Contributors with as little delay as possible.

4. All Works, except such as are specially invited or promised, must be delivered at the Galleries free of charge and without packing cases, and Artists or Contributors living in the country or abroad must send their Works to an Agent in London to be unpacked and delivered at the Galleries on one of the appointed days.

5. All specially invited Works will be returned by THE LONDON EXHIBITIONS, LIMITED, to the various Contributors free of charge after the close of the Exhibition.

6. The Number and Title of the Work, or description of the Object, with the name and address of the Artist or Contributor, and the price (if the Work or Object be for sale), must be placed on labels, one to be fixed to the back and the other to hang over the front of the Picture or attached to the Object; and the same information with corresponding numbers must be placed upon the form herewith, *which form must be delivered with the Works or Objects.* On receipt of a stamped directed envelope the Curator will forward form and labels.

7. All Pictures and Water-colour Drawings must be in Gilt Frames. This rule does not apply to Black and White Drawings, Engravings and Etchings All Pictures must be Glazed with the exception of Oil Paintings, which may be glazed or not at the option of the Artist. Drawings with white or other coloured mounts are admissible.

8. No exhibited Work or Object can be removed before the close of the Exhibition.

9. A commission of 15 per cent. upon the price first sent in will be charged upon all Works sold in the Galleries, whether the sale be effected by the Exhibition Company or

by the Contributor. In the case of Loan Objects other than Pictures from abroad, a commission of 10 per cent. will be charged; and any expenses incurred by the Exhibition Company's Committee will also be deducted from the proceeds of the sale before the amount is remitted to the Contributor.

10. On any Work or Object being sold privately by the Artist or Contributor, intimation should at once be sent to the Curator, as a sale in the Gallery will take priority of a sale effected by the Artist or Contributor unless due notice be given.

11. In case the purchaser of any Work or Object sold in the Galleries cannot be found within a reasonable period after the close of the Exhibition, the deposit, if any, shall be forfeited to the Artist or Contributor, after deducting the commission as mentioned in Regulation 9; but the Exhibition Company will not hold itself responsible for more than the amount of such deposit.

12. Every reasonable care will be taken of the Works and Objects contributed, but THE LONDON EXHIBITIONS, LIMITED, does not hold itself reponsible for any injury or loss which may occur to such Works or Objects whilst in the Exhibition or in transit thereto or from, except in the case of such Pictures and Objects which are specially invited by THE LONDON EXHIBITIONS, LIMITED, and which will be insured by them.

13. At the close of the Exhibition an order for the delivery of the Works (except those sold and such as are specially invited) will be sent to each Artist or Contributor, and it is earnestly requested by THE LONDON EXHIBITIONS, LIMITED, that all Works be removed on one of the appointed days, otherwise they will be warehoused at the expense of the owner.

14. ALL CORRESPONDENCE must be addressed: Fine Art and Loan Section, The Empire of India Exhibition, 10, 11, 12, New Bridge Street, London, E.C.

TO INDIAN EXHIBITORS.

No Loans can possibly be received unless a full description, including dimensions, of the proposed objects be previously sent to SIR JAMES D. LINTON, The Fine Art and Loan Section, Empire of India Exhibition, 10, 11, and 12, New Bridge Street, London, E.C., for consideration; when, if acceptable, due notification will be given and the Exhibitions Company's Agents—Messrs. KING, KING & Co., Bombay, and Messrs. KING, HAMILTON & Co., Calcutta, will be advised to receive the same, provided they are properly packed for shipment and delivered free to them. THE LONDON EXHIBITIONS CO. will then defray all charges for freight to and from their Agents' Offices.

FINE ART AND LOAN SECTION DEPARTMENT.

THE EMPIRE OF INDIA EXHIBITION, 1895.

EARL'S COURT, LONDON, S.W.

RECEIVING DAYS.

For Loans—March 11th, 12th, and 13th. For Works—March 18th, 19th, and 20th.
Between the hours of 10 A.M. and 5 P.M.

Exhibitor's List.

Please write legibly the Number and Description of each Work.
Do not write on the back of this paper.
Let the Numbers and Description correspond with the labels of the Works.
All Works must be delivered at the Galleries *free of any expense or charge* to The London Exibitions, Limited.
Works cannot be received packed in cases, or by parcel post.

Number of Work.	Description of Work, whether Oil or Water Colour, Etching, Engraving, etc.	Title of Work.	Price		
		This form must NOT be sent by post, but should be delivered with the Pictures.	£	s.	d.

I beg to submit the above-mentioned Works for Exhibition, subject to the printed conditions on which they are received, as set out on the other half of this sheet.

EMPIRE OF INDIA EXHIBITION, LONDON, 1895.

CLASSIFICATION OF EXHIBITS FOR AWARDS AND DIPLOMAS.

MONEY PRIZES AND DIPLOMAS OF MERIT.

IN order to stimulate the best Artizans of India to take part in the Exhibition and exhibit their Choicest Works, the following valuable prizes are offered by the Company for the best examples of the various Native Indian Arts and Crafts; and to ensure a thorough and impartial examination of the exhibits for the awards, which will be made in money prizes, the Company invited the co-operation and assistance of the Society for the Encouragement and Preservation of Indian Art, of which Sir Mountstuart Grant Duff, G.C.S.I., is President, Sir George Birdwood, LL.D., K.C.I.E., C.S.I., Chairman of the Executive Committee, Mrs. David Carmichael, Mr. C. Purdon Clarke, C.I.E., and Mr. Martin Wood, Honorary Secretaries. This responsible and onerous task having been undertaken as a duty in the interest of Indian Arts and Manufactures, the Society has allotted the sum of ₹7,000 placed at their disposal by "The Empire of India Exhibition," in the following manner, and in addition, will on their part, award Special Diplomas to all those who obtain these awards, and also for work which may be considered of sufficient merit.

" 24.—Cottons of all kinds.
" 25.—Woollens of all kinds.
Class 26.—Carpets and Rugs.
" 27.—Mats, Baskets, and Straw Work.

GENERAL INSTRUCTIONS AND RULES AND REGULATIONS.

I.—Only articles enumerated in the Classification will be admitted, these must be of Indian manufacture.

II.—Preference will be given to articles adapted to the European market, but in which Indian Art characteristics have been preserved.

III.—Articles will not be esteemed on account of excessive labour employed in their decoration, but for excellence of design, good workmanship, and moderate price.

IV.—Every article sent must be for sale, and the price asked by the sender clearly stated on a label attached to each object. The Exhibition Company reserves the right to add to this price such charges as it may consider necessary in order to cover the transit and packing expenses with regard to each article.

V.—All articles unsold at the close of the Exhibition will be returned free of expense to the senders.

VI.—The articles in competition will be judged by a Committee of the Society for the Encouragement and Preservation of Indian Art, who will award the Money Prizes, and, in addition, grant Special Diplomas of Merit, in several grades, to those receiving the prizes and also to those whose exhibits are honourably mentioned.

VII.—The Commercial Exhibitors and Importers can also enter any articles in their stalls for competition, and will also be eligible to receive prizes for general excellence of collective exhibits in each class should any prizes remain unawarded, owing to a lack of merit, after the Committee has inspected the articles sent specially for competition.

VIII.—Every article must bear a label giving a full description, also stating its Class number and the full name and address of the maker as well as that of the Exhibitor, should they be different persons, and selling price asked by the sender. These details must all be given in English.

IX.—All articles must be securely packed and forwarded with the attached duplicate forms correctly filled up, one being enclosed in the case with the articles, to Messrs. KING, KING & CO., Bombay; or Messrs. KING, HAMILTON & CO., Calcutta; and must arrive at Bombay not later than the 7th February, or Calcutta on the 1st February 1895. In order to ensure safe delivery, special attention is called to the packing of all objects as they will be forwarded to London by the Company's Agents in the condition received and will in no instance be re-packed. Every package must be addressed "The Empire of India Exhibition, London," and bear the name of the sender.

X.—The Exhibition Company will insure the goods against all possible risks, but will not be responsible for any loss or damage which may not be covered by such insurance.

XI.—No Exhibitor may send more than two articles in any one class, but he may compete in several classes.

All particulars and information can be obtained from Messrs. KING, KING & CO., Bombay; Messrs. KING, HAMILTON & CO., Calcutta; and THE LONDON EXHIBITIONS, LIMITED.

LOAN EXHIBITION OF RELICS AND MEMORIALS OF THE LATE HONOURABLE EAST INDIA COMPANY.

HONORARY COMMITTEE OF ADVICE.

SIR GEORGE C. M. BIRDWOOD, K.C.I.E., C.S.I., M.D., LL.D., *Chairman.*
DAVID F. CARMICHAEL, Esq., *late Member of the Government of Madras.*
C. PURDON CLARKE, Esq., C.I.E., F.S.A., *Assistant Director, South Kensington Museum.*
FREDERICK C. DANVERS, Esq., *Registrar and Superintendent of Records, India Office.*
SIR JOSEPH FAYRER, K.C.S.I., M.D., LL.D., F.R.S., *Hon. Physician to H. M. The Queen and T. R. H. The Prince of Wales and Duke of Saxe-Coburg-Gotha.*
GEORGE W. FORREST, Esq., B.A., *Director of Records, Calcutta.*
SIR WILLIAM W. HUNTER, K.C.S.I., C.I.E., M.A., LL.D., *late Member of the Governor General's Council.*
CLEMENTS R. MARKHAM, Esq., C.B., F.R.S., *President of the Royal Geographical and Hakluyt Societies.*
GENERAL JAMES MICHAEL, C.S.I., J.P., *late Military Secretary, Madras Government.*
JOSEPH PARKER, Esq., *Director General of Stores, India Office.*
J. R. ROYLE, Esq., C.I.E., *Curator, Indian Section, Imperial Institute.*
WILLIAM FOSTER, Esq., B.A., *Honorary Secretary.*

The Directors of The Empire of India Exhibition, to be opened at Earl's Court, Kensington, in May next, desiring to make it as useful and instructive as possible, have decided to form a Loan Collection of Relics and other Historical Memorials of the late Honourable East India Company.

The Directors have been much gratified by the warm approval the proposal has received. A number of distinguished Anglo-Indian officials have already kindly consented to act as an Honorary Committee of Advice, to assist the Directors in their efforts to secure a collection which shall recall to the minds of the present generation of Englishmen the remarkable achievements of the great Merchant Company of the City of London, to which we owe our Indian Empire, and shall be worthy of the heroic record they fill in the pages of our National history.

The Directors will be glad to receive particulars of any proposed Loan Exhibits from the owners of objects connected with the history of the Honourable East India Company, such as Portraits, Drawings, Sketches, Maps and Plans, Original Commissions, Arms, Medals, Coins, Old Plate, China and Glass, or other Historical Relics associated with the H. E. I. C. in India or in this country. For all approved Exhibits the Company will provide free carriage to the Exhibition, and ample exhibiting space, and they will return the same at the close of the Exhibition at their own cost.

Every reasonable protection will be afforded in the way of safes, show cases, police supervision and fire insurance by the Company.

The Directors further beg to state that the Loan Collection will be suitably installed in the Imperial Palace, in one of the finest glass and iron structures in the world, now in course of construction.

Intending contributors to this section of The Empire of India Exhibition should fill up the attached form and forward it to

WILLIAM FOSTER, Esq., B.A.,
Honorary Secretary, H.E.I. Co. Loan Collection,
Empire of India Exhibition,
Earl's Court, London, S.W.

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

COMMERCIAL EXHIBITION.

No. $\frac{761}{2}$.

Calcutta, the 7th March, 1895.

The following notices of a proposed Exhibition of Photography have been received from the Imperial Institute, London. Persons wishing to send Exhibits are requested to communicate direct with the Secretary to the Photographic Exhibition, Imperial Institute, London, S. W.

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

GENERAL PROSPECTUS OF THE PHOTOGRAPHIC EXHIBITION.

IMPERIAL INSTITUTE OF THE UNITED KINGDOM, THE COLONIES AND INDIA.

UNITED KINGDOM SECTION.

SPECIAL EXHIBITION OF PHOTOGRAPHY IN ITS APPLICATIONS TO THE ARTS, SCIENCES AND INDUSTRIES THROUGHOUT THE EMPIRE, 1895.

COMMITTEE OF ADVICE.

Representatives of the Imperial Institute :

The Right Hon. THE LORD CHANCELLOR, G.C.B., Chairman (*ex-officio*).
Professor HENRY E. ARMSTRONG, F.R.S. (*President of the Chemical Society*).
Major-General Sir OWEN TUDOR BURNE, K.C.S.I., C.I.E.
Sir John EVANS, K.C.B., D.C.L., LL.D., D.Sc. (*Treasurer of the Royal Society*).
Mr. C. WASHINGTON EVES, C.M.G.
Sir JAMES F. GARRICK, K.C.M.G., Q.C.
The Right Hon. LORD KNUTSFORD, G.C.M.G.
Sir FREDERICK LEIGHTON, Bart, P.R.A.
The Most Noble The MARQUIS OF LORNE, K.T.
Mr. CLEMENTS R. MARKHAM, C.B., F.R.S. (*President of the Royal Geographical Society*).
Sir WESTBY BROOK PERCIVAL, K.C.M.G.
Sir SAUL SAMUEL, K.C.M.G., C.B.
Mr. ALFRED WATERHOUSE, R.A.
Sir ALEXANDER WILSON.

Specially Invited Representatives of the Imperial Institute :

Dr. WILLIAM ANDERSON, D.C.L., F.R.S.,
Sir GEORGE BIRDWOOD, K.C.I.E., C.S.I., M.D.
Mr. EDWARD NORTH BUXTON.
General Sir CHARLES WILSON, R.E., K.C.B., K.C.M.G., F.R.S., D.C.L.

Other Members.

Captain W. de W. ABNEY, R.E., C.B., D.C.L., F.R.S. (*President of the Royal Astronomical Society*).
Mr. C. CHREE, M.A.
Mr. W. H. M. CHRISTIE, M.A., F.R.S., F.R.A.S. (*Astronomer Royal*).
Mr. LYONEL CLARK, C.E.

Mr. A. A. COMMON, D.C.L., F.R.S.
Major LEONARD DARWIN, M.P., R.E. (*Secretary of the Royal Geographical Society*).
Mr. HORACE DARWIN, M.A.
Mr. GEORGE DAVISON.
Major-General Sir E. F. DU CANE, R.E., K.C.B.
Mr. H. M. ELDER, M.A. (*Hon. Secretary of the Physical Society*).
Colonel J. FARQUHARSON, R.E., C.B. (*Director-General of the Ordnance Survey*).
Colonel J. GALE.
Mr. FRANCIS GALTON, F.R.S.
Mr. W. A. GREENE.
Captain E. H. HILLS, R.E.
Dr. J. HOPKINSON, F.R.S
Mr. WILLIAM HUGGINS, D.C.L., LL.D., F.R.S.
Mr. R. INWARDS (*President of the Meteorological Society*).
Lt.-Col. DUNCAN A. JOHNSTON, R.E. (*Assistant Director-General of the Ordnance Survey*).
Mr. CHAPMAN JONES (*Hon. Secretary of the Royal Photographic Society*).
Professor J. N. LOCKYER, C.B., F.R.S.
Professor MELDOLA, F.R.S.
Mr. C. G. MURRELL, M.A. (*Hon. Secretary of the Camera Club*).
Mr. A. PRINGLE.
LORD RAYLEIGH, D.C.L., LL.D., F.R.S. (*Secretary of the Royal Society*).
Mr. ISAAC ROBERTS, D.Sc.F.R.S.
Professor W. C. ROBERTS-AUSTEN, C.B., F.R.S.
Mr. H. P. ROBINSON.
Mr. F. SEYTON SCOTT.
Mr. J. SPILLER.
Mr. J. W. SWAN.
Professor H. H. TURNER, M.A. (*Oxford University Observatory*).
Mr. LEON WARNERKE.
Mr. G. S. WATERLOW, J.P.
Sir HENRY TRUEMAN WOOD, M.A. (*President of the Royal Photographic Society*).

Sir FREDERICK ABEL, Bart., K.C.B. (*Secretary and Director*).
Sir SOMERS VINE, C.M.G. (*Assistant Secretary and General Sub-Director*).
Mr. C. JOHNSON (*Chief Clerk*).

EXHIBITION OF PHOTOGRAPHY, 1895.

The Executive Council of the Imperial Institute having determined that the United Kingdom Section of the Institute will be for the present best utilised and the resources of the Home Country effectively displayed by a series of exhibits, illustrative of the progress and present condition of leading industries and manufactures of Great Britain and Ireland, such as the Pottery, China and Glass Exhibition of 1894, arrangements are being made for holding during the forthcoming Summer Season, 1895, a Special Exhibition of Photography in its Application to the Arts, Sciences and Industries throughout the Empire.

The Exhibition will include examples which may be received from the Colonies and India.

The gentlemen whose names are given on the above of this circular have consented to serve, and have been appointed by the Executive Council as a Committee of Advice in connection with the Exhibition.

The Exhibition, which will be open daily (except Sundays) from 11 A.M. until 11 P.M. from the middle of May to the middle of September, 1895, will be divided into the following Seven Classes :—

[Individuals and firms wishing to exhibit in the exhibition may obtain further particulars concerning the Division in which they wish to enter, on application to "The Secretary, Photographic Exhibition, Imperial Institute, London, S.W."]

DIVISION I.—THE HISTORY OF PHOTOGRAPHY.

(*To be accommodated in apartments in the Main Building.*)

SECTION A. Illustrations of the results of *early* Processes and of apparatus and materials used in their practice.

SECTION B. Illustrations of the progressive development of *modern* Processes.

SECTION C. Illustrations of the early processes of Photo-mechanical work, and of materials and implements used in their practice.

SECTION D. Photographic Literature, early and modern.

DIVISION 2.—ARTISTIC PHOTOGRAPHY.

(To be accommodated in the East apportionment of the Upper Intermediate Gallery.)

SECTION A. A thoroughly representative exhibition of all Schools, embracing known as well as new works.

SECTION B. Illustrations of the present condition of Photographic Art in various Colonies and in India. *(To include illustrations of the application of Photography as a medium for promoting Colonial Industries and Settlement.)*

DIVISION 3.—PHOTORGAPHY AS AN INDUSTRY.

(To be accommodated in the North Gallery)

SECTION A. Illustrations of apparatus used in Photography, and of its manufacture; special processes, such as the grinding and polishing of lenses, the production of brass fittings, cameras, etc., being shewn in actual operation.

SECTION B. The preparation of dry plates, coating of sensitive media, and the various printing processes, shewn in actual operation.

SECTION C. Illustrations of commercial portraiture. Production of portraits, etc., in studios by daylight and artificial light.

DIVISION 4.—PHOTOGRAPHY IN ITS APPLICATIONS TO INDUSTRIES.

(To be accommodated in the North Gallery.)

SECTION A. Processes of Reproduction, having Photography as their basis, as applied to Illustrated Journalism, Literature, and to purely artistic reproductions; the more common of these processes to be shewn in operation, and details connected with rarer processes to be illustrated.

SECTION B. Industrial applications of Photography to ornamentation, such as Vitreography; and uses of Photography in the Decorative Arts.

DIVISION 5.—APPLICATIONS OF PHOTOGRAPHY TO THE SCIENCES.

(To occupy a portion of the West allotment of the Upper Intermediate Gallery.)

SECTION A. ORTHOCHROMATICS:—

Reproduction of objects in colours, pictures, etc.
Results obtained by various stains, screens etc.
Special appliances used in Orthochromatics.

SECTION B. ACTINOMETRY, PHOTOMETRY, AND SENSITOMETRY.

SECTION C. OPTICS:—

The Optical Lantern, including processes and appliances for producing enlargements or reductions.

Illustrations of processes for producing lantern positives or transparencies.

Apparatus, instruments and appliances connected with the Optics of Photography.

(Special exhibitions of lantern-transparencies as lecture illustrations.)

SECTION D. STEREOSCOPY:—

Illustrative examples of Stereograms; apparatus and appliances used for producing and exhibiting stereograms.

SECTION E. PHOTOMICROGRAPHY, IN ITS APPLICATIONS TO ORDINARY MICROGRAPHICAL RESEARCH, TO PATHOLOGY, BACTERIOLOGY, ETC.:—

Apparatus and appliances used in connection with Photomicrography

SECTION F. SPECTROSCOPY:—

The Spectra of the heavenly bodies, of gases, metals, etc.
Apparatus and appliances used in spectroscopy.

SECTION G. METEOROLOGY AND MAGNETISM:—

Cloud-and-Lightning-Photographs.
Measurement of Heights of Clouds.
Illustrations of Photographic Recording Apparatus, and their uses.

SECTION H. ASTRONOMY:—

Photographs of Heavenly Bodies.
Photographic Charts of the Heavens.
Photographic Astronomical Records.
Apparatus, instruments and appliances used in Astronomical Photography.

SECTION I. AUTOMATIC RECORDING APPARATUS.

SECTION K. GENERAL:—

Other applications of Photography to the Sciences, illustrating the results of researches in connection with which Photography has been applied (*e.g.*, Experiments on light and thermography, chemical action of light upon liquids, etc.)

DIVISION 6.—APPLICATIONS OF PHOTOGRAPHY TO EDUCATIONAL PURPOSES.

(To be accommodated in apartments in the Main Building.)

DIVISION 7.—MISCELLANEOUS APPLICATIONS OF PHOTOGRAPHY.

(To be accommodated in a portion of the West allotment of the Upper Intermediate Gallery.)

SECTION A. Illustrations of the applications of Photography to Architecture and Archæology.

SECTION B. Applications of Photography to Engineering.

SECTION C. Chronography.

SECTION D. Applications of Photography to Surveying; Cartography, etc.
Apparatus and appliances used in Photographic Surveying.

SECTION E. Photography as applied to Military and Naval purposes.

SECTION F. Applications of Photography to Legal purposes and to Zoology (*e.g.*, detection of forgeries, erasures, etc.; production of photo-anthropometric records).

The Imperial Institute, in pursuance of its objects as defined by the Royal Charter, which include the encouragement and development of British manufactures and industries, will provide attendants, lighting, and all needful supervision and general facilities incidental to the Exhibition as a whole.

Exhibitors will be expected to provide, at their own cost, the Exhibits, Glass Cases and Fittings, and to incur the cost of transit to and from the Institute, and of the necessary attendants for the installation and arrangement of the Exhibits.

As regards processes, the Imperial Institute will be prepared to receive applications, and to provide motive power to a moderate extent, for the display of such processes subject to the Executive Council being of opinion that the utility and attractiveness of the process to be illustrated is sufficient to justify the outlay thereby involved.

The Committee of Advice has selected and recommended to the Council a preliminary list of Firms to whom invitations to exhibit are being transmitted, but applications for permission to exhibit will be received from individuals and firms from all parts of the British Empire.

No Sales will be allowed in the Exhibition Galleries, but Exhibitors will be permitted to take orders for articles at the Exhibition. No circulars or trade cards must be distributed by Exhibitors.

A Catalogue will be issued and sold in the Exhibition, in which a reasonable description of the Exhibits, and of any special features to which attention is called by the manufacturers, may be inserted free of charge.

The exhibiting space will be allotted by the Committee of Advice in proportion to the demand, amongst those individuals and firms included in these lists (or in subsequent lists), to be approved by the Committee, who may wish to exhibit.

All Exhibits, Glass Cases, Fittings, etc., must arrive at the Institute not later than noon on SATURDAY, APRIL 27th, 1895. No Cases or Exhibits will be received after that date. The Exhibits must be installed and arranged in their cases not later than noon on THURSDAY, 2nd MAY, 1895.

Screens or other erections, must not exceed 8 feet in height.

The Executive Council reserve to themselves the right of refusing to admit to the Institute premises any Cases, Fittings, or Exhibits arriving after noon on the 27th April, and to remove from the Exhibition Gallery, at the cost of the Exhibitor, any Exhibits, Cases or Fittings, the arrangement of which may not be completed to the satisfaction of the Council by noon on the 2nd May. In such instances the Executive Council reserve the right to dispose, at their absolute discretion, of the space which thus may become available. Exhibitors will not be allowed to supplement or change their Exhibits during the time the Exhibition remains open, without the permission in writing of the Council.

The acceptance by a firm or individual of the invitation to exhibit will be taken as consent on his part to allow all his Exhibits, Cases and Fittings to remain undisturbed in the Galleries until the close of the Exhibition, and as an agreement on his part to the right of the Council to order, or, if necessary, to cause, without explanation, the removal of the Exhibit at any time they may think proper, and, further, as an agreement to abide by the Regulations here set out.

The conditions above stated are subject to the provisions which are set out in the Special Prospectus issued in connection with each division of the Exhibition.

The Executive Council, while undertaking to supply adequate general control, watching, and care, accept no responsibility or liability as regards the Exhibits in respect of damage or loss by fire or accidents, or otherwise.

An invitation to a firm or individual to exhibit will be considered as cancelled if a definite reply is not received by the 2nd February.

All communications should be addressed to—

THE SECRETARY TO THE
PHOTOGRAPHIC EXHIBITION (1895),
IMPERIAL INSTITUTE,
LONDON, S.W.

The Council reserves to itself the right, in the event of the space applied for considerably exceeding the accommodation available, or for other causes, to allot space only to certain of the applicants.

1st January, 1895. BY ORDER.

NOTE.—*The Exhibition Galleries may be viewed on any week day after the 8th January, 1895, by the representative of any firm or individual proposing to exhibit, on application to the Chief Clerk, at the Institute, between the hours of* 11 A.M. *and* 3 P.M. (1 P.M. *on Saturdays*).

DIVISION 2.

Division 2.—ARTISTIC PHOTOGRAPHY.
EXHIBITION OF PHOTOGRAPHIC PICTURES.

In this division will be included only such photographs as have distinct artistic merit. It is hoped that all schools of artistic photography may be represented, and, contributions, whether new or previously exhibited pictures, are invited from Home, Colonial and Indian photographers. Contributions from the representatives of deceased artists (except such works as might better be displayed in the Historical Division) will also be welcomed.

The maximum number of pictures that may be sent in by any one exhibitor will be six.

A selection will be made by the Committee, whose decision will be final.

The Exhibition will open early in May, 1895, and will remain open till about the middle of September or probably a little later.

No charge will be made for space occupied by pictures accepted for this Section.

Each picture should be separately framed. On the back of the frame must be written the name and address of the Exhibitor with the title or description of the picture, and the number (if there is more than one) corresponding to the number in the entry form.

The pictures must be received not later than Monday, 15th April, 1895, at 12 noon.

They must be addressed "Exhibition of Photography," Division 2, Imperial Institute, London, S.W.

Pictures must be delivered, carriage paid, at the Imperial Institute, or by hand between 10-0 A.M. and 4-0 P.M. (1 o'clock on Saturdays.)

The Imperial Institute will unpack, repack, and dispatch, carriage forward, all exhibits sent in cases, which may be selected by the Committee of Advice.

Every care will be taken of exhibits, but the Institute will not be responsible for loss or damage.

BY ORDER,

20th December, 1895.

Printed and published for the GOVERNMENT OF INDIA *at the Office of the* SUPERINTENDENT OF GOVERNMENT PRINTING, INDIA, *No. 8, Hastings Street, Calcutta.*

SUPPLEMENT TO

The Gazette of India.

No. 11.] CALCUTTA, SATURDAY, MARCH 16, 1895.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

APPROPRIATION REPORT ON THE ACCOUNTS OF 1893-94.

GENERAL REVIEW.

Throughout the report the figures are tens of rupees (Rx. 1=Rio), with the last two figures cut off for brevity, thus, 149,7 reads one hundred and forty-nine thousand seven hundred tens of rupees.

1. In the Budget Estimate for 1893-94 the total revenue was estimated at 90,005,7 and the expenditure chargeable against it at 91,600,8, leaving a net deficit of 1,595,1. This unfavourable result was due primarily to the low rate of exchange, which was taken in the Budget Estimate at 1*s.* 2¾*d.* against 1*s.* 4*d.* adopted in the Estimates of the previous year. It was explained in the Financial Statement that the future of Indian finance largely depended on the course of exchange. As the question of influencing exchange was then under the consideration of Lord Herschell's Committee, the Government of India, though unwilling to budget for a deficit, considered it inexpedient to take measures for the restoration of financial equilibrium until the Secretary of State had received the report of Lord Herschell's Committee, and had given his decision on the Currency question. The introduction of the reforms recommended by the Committee, however, brought but little relief to the finances, for at the end of the year exchange stood at a much lower level than at its commencement, the average rate obtained during the year by the Secretary of State for his bills being only 1*s.* 2·547*d.* (notwithstanding a considerable speculative advance for a part of the year) against 1*s.* 2·75*d.* adopted in the Estimates. Soon after the introduction of the currency reforms, the Government of India decided to give its non-domiciled European and Eurasian officers an Exchange Compensation Allowance, sufficient to enable each officer to remit to Europe one-half his salary subject to a maximum limit of £1,000 a year, at a privileged rate of 1*s.* 6*d.* The financial position having thus failed to improve after the Budget Estimates were published, the Government of India found it necessary, towards the close of the year to strengthen its position by the imposition of import duties on all articles, except cotton goods and yarn. This, however, did not affect materially the results of the year under review, as it brought in only a small amount of revenue during its last few days. Apart from the fall in exchange, the results of the year may, however, be considered to be satisfactory. They show a net deficit of 1,547,0, which agrees practically with that anticipated in the Budget Estimate (1,595,1), though the fall in the rate of exchange involved a net loss of 355,6 and Exchange Compensation Allowance caused an additional expenditure of 391,0 on the Imperial account, excluding 227,5 on the Provincial account. The net revenue from Opium and Salt also showed a considerable falling off (310,2 and 322,5) from the anticipations in the Budget, but these disappointments were more than counterbalanced by a steady and satisfactory growth of the Ordinary and Railway Revenues, and by a curtailment of the programme of Special Defence Works. The actual revenue and expenditure of the year, under the different groups, are compared in detail in the following paragraphs with the actuals of the previous year and the Budget Estimate.

2. No important changes of classification of revenue and expenditure requiring special notice here were made during the year.

3. The following summary gives the Budget and Account figures of 1893-94 to be reviewed in this report, and the details will be found in the statements on pages 148 to 160:—

Receipts. Budget.	Receipts. Accounts.	Revenue and Expenditure.	Outgoings. Budget.	Outgoings. Accounts.
60,490,5	60,193 6	A Principal Heads of Revenue .	10,387,3	9,865.6

39,624,3	41,493,2	GRAND TOTAL .	39,624.3	41,493.2

Comparison with the year 1892-93.

4. The comparison in respect of revenues with the year 1892-93 is as follows:—

Revenues.	1892-93.	1893-94.	Difference. 1893-94, greater (+) or less (—).
Principal Heads of Revenue . . .	61,067,4	60,193.6	—873,8
Interest	869,7	875.5	+5 8
Post Office, Telegraph, and Mint . .	2,736,9	2,747,7	+10,8
Civil Departments	1,607,9	1,631,3	+23,4
Miscellaneous	877,0	999,1	+122,1
Railways	19,077,1	20,297,0	+1,219,9
Irrigation	2,418,9	2,296.4	—122,5
Buildings and Roads	653,2	674.4	+21,2
Army Services	864,3	850,2	—14,1
TOTAL	90,172,4	90,565,2	+392,8

5. The important variations under *Principal Heads of Revenue* are the following:—

Land Revenue	+684,3
Opium	—1 395 6
Salt	—427,2
Stamps	+60,8
Excise	+146,1
Provincial Rates	—191,9
Customs	+64,8
Forest	+131,7
TOTAL .	—897,0

6. Of the total increase under *Land Revenue*, Madras alone contributed 307,0, out of which 107,9 was nominal, being due to the transfer to this head, from *Provincial Rates*, of the revenue of Village Service Inams, and the remainder was due to a favourable season; the other provinces also showed a steady growth of the revenue under this head. Under *Opium* the decrease occurred almost wholly in Bengal opium, due partly to a reduction in the number of chests sold owing to the depletion of the reserve in consequence of successive unfavourable crops, and partly to a heavy decline in the average price; there was a small decline (70,2) under Malwa opium also, due to diminished exports. *Salt* revenue was also worse, partly owing to unfavourable weather having retarded the manufacture of Sambhar and Orissa salts and partly to the low price of Government paper having stimulated credit in lieu of cash sales in Madras. *Stamps* and *Excise* showed a steady growth, but the collections from *Provincial Rates* showed a decline, a part of which was only nominal, being due to the transfer of the revenue of Village Service Inams to *Land Revenue* as mentioned above, and the remainder was due to the suspension of the collection of village cess in the Tanjore and Malabar districts in Madras. The additional revenue under *Customs* was obtained from the Indian Tariff Act of 10th March 1894, partly counterbalanced by a falling off in the export duties, due to a low demand for rice in Europe, while that under *Forests* resulted from a steady development of the department. *Post Office* and *Telegraph* exhibited normal growths, but *Mint* receipts fell off in consequence of the closing of the mints early in the year. Recoveries on account of punitive police quartered for the prevention of riots swelled the receipts of *Civil Departments*. The better result under *Miscellaneous* was due mainly to the loss on account of exchange on the miscellaneous remittance transactions between India and England having been much larger in the previous year, in consequence of the official rate of exchange fixed in that year for the adjustment of transactions between England and India having differed widely from the average rate obtained for Council Bills. *Railway Revenue* showed excellent results in consequence of an exceptionally favourable pilgrim traffic, and of improvements in general passenger and goods traffic. The North-Western and the East Indian Railways were the chief contributors to the improvement. *Irrigation* revenue showed a decrease, due partly to heavy rainfall in Punjab, having reduced the necessity for artificial irrigation, and partly to the actuals of 1892-93 having been swelled by arrear collections in Bengal. The improvement under *Buildings and Roads* was due chiefly to the recovery of the Government share of the profits of the Darjeeling-Himalayan Railway for the four years ending June 1893. The slight falling off under *Army Services* may be attributed to a special credit in 1892 93 for value of horses taken to Egypt by the 7th Dragoon Guards.

7. The comparison of the expenditure side is given below. The average rate of Exchange for the Secretary of State's drawings in 1893-94 was 1s. 2·5466429*d.* against

1s. 2·9847775*d.* in 1892-93. The increases under the different heads due to the fall in the rate of Exchange, and to Exchange Compensation Allowance, are shown separately :—

	1892-93.	1893-94.	Difference, 1893-94, greater + or less — Due to Exchange.	Due to Ex. Com. Allce.	Due to other causes.	Total.
Direct Demands on the Revenues	9,461,7	9,865,6	+ 2,1	+ 64,1	+ 337,7	+ 403.9
Interest	4,374·3	4,446,4	+ 120,9	...	— 48,8	+ 72,1
Post Office, Telegraph, and Mint	2,505,6	2,550,7	+ 12,0	+ 12,5	+ 20,6	+ 45,1

8. The increases due to the fall in the rate of Exchange and to Exchange Compensation Allowance require no explanation, and it is necessary to explain only the differences shown above as due to other causes.

9. Under the *Direct Demands on the Revenues*, Opium alone accounts for 271,3 out of the total excess of 337,7, the increase being due to a better outturn of Bengal Opium. The remainder of the increase occurred principally under Land Revenue, due to normal growth of the charges of District Administration, and under Forest, due to continued development of the department; Salt, Stamps and Registration also showed comparatively small increases, while Assignments and Compensations produced a decrease owing to the charges of the previous year on account of adjustments of alienated lands in Bombay having been specially high. Notwithstanding an additional charge of 132,4 on account of discount on the new 3½ per cent. loan raised in India, the charges under Interest showed a decrease due mainly to the transfer of a much larger portion of the charges in India to the Railway Revenue Account in consequence of an increase in the Capital expenditure on Railways and Irrigation. *Post Office* and *Telegraph* showed excesses as usual, due to continued growth of the departments, but the excesses were largely counterbalanced by savings under *Mint* consequent on the discontinuance of the free coinage of silver. In the *Civil Departments* the charges were higher partly in consequence of the increase of the Amir's subsidy by 60,0 coupled with the payment of arrears amounting to 31,1, and partly in consequence of a general increase in nearly all the heads due to the growing needs of administration. Under *Miscellaneous* charges for special commissions of enquiry, Superannuation and Retired Allowances and Stationery and Printing charges would have brought about an increase, but for lapses under Territorial and Political Pensions. The programme of the year for the construction of railways was considerably smaller than that of the previous year and only a small amount has been charged to the head *Construction of Railways*. *Railway* expenses show a large advance chiefly in the working expenses of the State Railways owing to the larger traffic, to larger payments of surplus profits to the Southern Mahratta Railway Company, and on account of the Rajputana Malwa Railway to the Bombay, Baroda and Central India Railway Company and to repairs of damages caused by floods and strengthening of bridges. The investment of further capital on the construction of State Railways also increased the interest charges. Again in 1892-93 the expenditure was reduced by a special recovery of 89,1 on account of the Survey charges of the Assam-Bengal Railway. *Irrigation* charges were higher in the previous year principally in connection with Famine Relief works in Rajputana, Upper Burma and Madras, while those under *Buildings and Roads* were enhanced by large expenditure on mobilisation works, on the Duncan Dock at Bombay and on Famine Relief works in Madras. Under *Army* the actuals of 1892-93 included an arrear payment of 212,4 in respect of the Home charges of British forces serving in India, and the charges for pay and pensions of non-effective and retired officers of the Indian service were high owing to their disbursement monthly instead of quarterly as before; the charges for special expeditions were also higher in that year. On the other hand the payment of British Troops in the year under review at a rate of exchange of 1*s.* 2⅝*d.* against 1*s.* 4⅝*d.* in 1892-93 added considerably to the expenditure, but this was nearly counterbalanced by a substantial decrease in the charges on account of stores and deferred pay. The expenditure on *Special Defence Works* is gradually decreasing owing to the approaching completion of the important works included in the programme.

Comparison of Accounts with Budget Estimates of 1893-94.

10. The following figures exhibit the differences in the net accounts between the Budget and the actuals, the differences due to the fall in the rate of exchange, which was taken in the Budget at 1*s.* 2⅝*d.* and to Exchange Compensation Allowance being shown in separate columns. The comparison of the gross figures has been given before under paragraph 3 :—

	Better + Worse — Due to fall in exchange.	Due to Exchange Compensation Allowance.	Due to other causes.	Net.
Principal Heads of Revenue	— 1,0	— 64,1	+ 289,9	+ 224,8
Interest	— 56,8	...	— 341,8	— 398,6
Post Office, Telegraph, and Mint	— 5,6	— 12,5	+ 103,6	+ 85,5
Civil Departments	— 13,2	— 209,7	+ 52,9	— 170,0
Miscellaneous	— 45,0	— 8	— 46,8	— 92,6
Famine	...	...	+ 42,0	+ 42,0
Construction of Railways	...	...	+ 1,2	+ 1,2
Railways	— 130,6	— 21,5	+ 610,7	+ 458,6
Irrigation	...	— 11,7	— 32,0	— 43,7
Buildings and Roads	— 1,8	— 32,1	+ 364,2	+ 330,3
Army Services	— 99,4	— 264,6	+ 202,9	— 161,1
Special Defence Works	— 2,2	— 1,5	+ 215,3	+ 211,6
COMBINED DEFICIT, IMPERIAL AND PROVINCIAL	— 355,6	— 618,5	+ 1,462,1	+ 488,0

11. The net improvement of 224,8 under the *Principal Heads of Revenue* was caused by a falling off of 521,7 in the expenditure, partly counterbalanced by a decrease of 296,9 in the revenue. The decrease in the revenue occurred principally under the heads Opium (688,6), Salt (358,9), Provincial Rates (192,5), and Registration (13,2), counterbalanced by improvements under Land Revenue (432,4), Excise (242,7), Forest (134,2), Stamps (73,2), and Assessed Taxes (52,0). The saving in the expenditure occurred under Opium (378,4), Land Revenue (90,7), Forests (83,8), and Salt (36,4) counterbalanced by excesses under Refunds (31,1) and Assignments and Compensations (50,4). The unfavourable result under *Interest* occurred partly (18,1) in the revenue, due to the failure for a part of the year to sell Council Bills having left no balance available for temporary investment, but the chief cause of the deterioration was an increase in expenditure as the Budget did not provide for the discount (18,6) on the sterling loan raised in England, nor for that (132,4) on the 3½ p. c. loan raised in India. The Budget Estimate did not fully provide for the growth of the *Post Office* and *Telegraph* departments, while under *Mint*, the profit made from the coinage of the silver taken over from the Exchange Banks more than compensated for the falling off due to the closing of Mints. In the *Civil Departments*, the net result would have been an improvement, if the increases due to the fall in the rate of Exchange and to Exchange Compensation Allowance were left out of account. The improvement was brought about mainly by larger receipts from hire of vessels under Marine, and by large savings in the Police charges, counterbalanced by a heavy increase in the Political charges. The worse result under *Miscellaneous* was due to a falling off in the Gain by Exchange, owing chiefly to diminished transactions of the subsidised Railways, to larger Stationery and Printing charges, and to heavy expenditure on account of special commissions of enquiry under Miscellaneous, partly counterbalanced by increased Miscellaneous Receipts and Receipts in Aid of Superannuation. Under *Famine* the better result was due mainly to the provisions made under Famine Relief in Bengal and Madras having been only partially required. Completion of works on the Mayavaram-Mutupet and the Hyderabad-Umarkot Railways accounts for the saving under *Construction of Railways*. The improvement in the *Railway Revenue Account* occurred principally on the East Indian, North-Western, Rajputana-Malwa, Bombay, Baroda and Central India, and the Madras Railways. The net *Irrigation* revenue showed a falling off chiefly owing to orders, on the new settlement scheme in Tanjore, having been issued later than anticipated. Under *Buildings and Roads* there was an increase in the receipts, chiefly due to the recovery of the Government share of the profits of the Darjeeling Himalayan Railway for the four years ending June 1893, to an improvement in the ferry receipts and tolls on roads in Madras and Bombay, and to the receipt of large contributions from Municipalities and private parties; but the major portion of the net improvement was due to the expenditure for the year having been considerably over-estimated. *Army Services* would have shown an improvement if the effects of the fall in the rate of Exchange and of Exchange Compensation Allowance were left out of account. There were large sales of malt liquor and rum, and of clothing necessaries and medical stores, arrear recoveries on account of commissariat provisions and stores issued on payment, large contributions towards Indian Military Service Family Pensions, and an increase in the value of articles in possession of regiments on transfer from [illegible] to British service. The expenditure side also showed savings principally in stores [illegible] the charges for deferred pay. The saving in the *Special Defence Works* was due to the approaching completion of works as well as to a curtailment of the programme during the course of the year.

12. The Budget estimated for an expenditure of 2,346,3 in excess of the revenue on the whole account, but a sum of 751,2 out of the Provincial and Local expenditure was payable from past accumulations of balances, leaving a net deficit in the Imperial account of 1,595,1. The accounts close with a deficit of 1,547,0 in the Imperial account and a deficit in the Provincial and Local account of 311,3. The net Imperial Revenue has, therefore, been better than the Budget by 1,595,1 —1,547,0 or 48,1, and the Provincial and Local expenditure by

751,2 —311,3 or 439,9. The details of these fluctuations are given below, the sign + meaning better,—worse, than the estimate.—

	Revenue Side.			Expenditure Side.		
	Imperial.	Provincial.	Total.	Imperial.	Provincial.	Total.
Principal Heads of Revenue .	— 304,4	+ 7,5	— 296,9	+ 445,5	+ 76,2	+ 521,7

Section A.—PRINCIPAL HEADS OF REVENUE.

1892-93. Accounts.		1893-94. Budget.	1893-94. Revised.	Accounts.
61,067,4	REVENUE	60,490,5	60,214,2	60,193,6

14. The actuals are less than the Budget Estimate by 296,9. There was a decline of 688,6 in the Opium revenue, partly owing to the low prices realised at the Bengal sales, and partly to a smaller number of chests being sold in consequence of the depletion of the reserve by successive unfavourable crops. Salt revenue was less than the Estimate by 358,9, due to reduction of stock of the Sambhar and Orissa salts, caused by failure of manufacture, and to a fall in the price of Government Paper having led to more extended sales in Madras on the credit system in lieu of cash sales. Provincial Rates also fell short by 192,5, but the greater part of this was nominal, being due to the transfer to I—Land Revenue, of the revenue derived from Village Service Inams in Madras. Registration receipts were also less by 13,2. The decreases under the above heads were however largely counterbalanced by improvements under Land Revenue 432,4, Stamps 75,2, Excise 242,7, Assessed Taxes 52,0, and Forest 134,2.

15. Compared with the actuals of the previous year there was a decline of 873,8. The falling off in Opium and Salt amounted to 1,365,6 and 427,2, respectively, and in Provincial Rates, Registration, and Tributes to 191,9, 14,0, and 15,8. There was an improvement in the other heads, notably under Land Revenue 684,3, Excise 146,1, and Customs 64,8, being due in the last case to the operations of the Indian Tariff Act of 10th March 1894. The total receipts under the new Act were considerably larger, but a portion went to meet the falling off in the receipts from the export duty on rice, due to smaller exports from Bengal and Burma.

Section A.—PRINCIPAL HEADS OF REVENUE—*continued.*

I.—Land Revenue—*continued.*

16. The receipts under this head show improvements of 432,4 and 684,3 over the Budget Estimate and the actuals of the previous year, respectively. Of the improvement over the Budget 402,0 occurred in Madras, due partly to an exceptionally favourable season, and partly to the transfer to this head, from Provincial Rates of the revenue of Village Service Inams. The improvement over the previous year also occurred mainly in Madras, but there were small improvements in the other Provinces also excepting Central Provinces.

17. Under *Ordinary Revenue* there was an improvement in India, which occurred partly under fixed collections, due to recovery of arrears outstanding in Ajmere on account of the scarcity of 1891-92, and partly under fluctuating collections in Baluchistan, owing to arrear collections and to a particularly rich harvest. In the Central Provinces there was a falling off as compared both with the actuals of 1892-93 and with the Estimates of 1893-94, which provided for enhanced assessments in consequence of the revision of settlements in progress, but the realisations fell short of the anticipations. There was also a stoppage of advance collections. In Upper Burma the enhancement of rates anticipated in the Budget Estimate was not fully sanctioned, and the rates, as sanctioned, were not wholly realised owing to the non-completion of rent rolls. In Lower Burma, the Budget Estimate allowed for a normal improvement due to enhancement of rates, extension of cultivation, assessment of grants on expiry of the period of exemption, and the assessment of fallow lands at full rates, but the full demand was not realized owing to a fall in the price of paddy, which induced cultivators to hold over their stock. There were also no purchasers for land put up for auction for default, owing to tightness of the money market. Assam shows a slight improvement due to enhanced rates in the Assam Valley Districts, extension of cultivation, and progressive enhancement of rate on waste lands, etc. In Bengal the actuals exceeded the Budget Estimate, owing to increased collections in Purnea, Gya, Puri, Champarun, and Jalpaiguri, partly counterbalanced by smaller collections in Midnapore, Muzufferpore, and Backergunj. In the North-Western Provinces the Budget Estimate was pitched too high, credit having been taken for enhancements not due during the year, and allowance having been made for collections which there was no expectation of realising within the year. Apart from this, the season was not uniformly favourable, remissions of revenue having been necessary in respect of deteriorated lands and damage caused by hail; the improvement over the previous year was obtained chiefly from the revision of settlements in Jhansi and Unao. The improvement in the Punjab is due partly to enhancement of assessment and recovery of arrears, and partly to an under-estimate, but owing to suspensions and postponement of re-assessment in some districts, the Revised Estimate was not reached. Of the increase in Madras, 107,9 represents revenue of Village Service Inams, which used before to be credited erroneously to head VI—Provincial Rates; the remainder is due to an exceptionally favourable season, to the extension of cultivation and irrigation, and to advance collections in some districts. In Bombay the improvement is attributed to advance collections, recovery of arrears, revised rates of assessment, and, largely, to extensive rabi cultivation due to favourable floods; these improvements occurred principally in Surat, Khandesh, Poona, Hyderabad, Karachi, and Shikarpur.

18. Under *Assessment of Alienated Lands less Quit Rents* the Budget Estimate in Bombay did not provide for the increased assessment, due to the re-measurement in 1892-93 of a large tract of alienated land in Shikarpur, which proved to be of a much greater area than previously shown. The improvement due to this was partly counterbalanced by a falling off in Shikarpur and Hyderabad, owing to a survey of Jaghir lands, under which only lands fit for cultivation have been assessed, whereas formerly the whole of the holdings, including unarable waste lands, were assessed, to less cultivation and to lapsing to Government of certain Jaghirs on the death of the holders.

19. The head *Sale of Proprietary Right, etc.*, is very uncertain, and no particular reasons can be assigned for the variations under it. In the Punjab the Budget was placed too low.

20. Under *Miscellaneous Revenue* the Budget Estimate has, on the whole, agreed closely with the actuals. In India, cattle-grazing fees in Baluchistan show a progressive increase. In Central Provinces and Upper Burma the Budget Estimates were too low; the under-estimate in the latter being chiefly under "Thathameda." In Lower Burma, too, no provision was made for Pearl Fishery receipts, which amounted to 4,5, while other petty receipts, such as birds' nest tax, fruit trees tax, etc., were also better than anticipated. In Assam the improvement is due to an increase in the number of elephant mahals worked and in the number of elephants caught. In Bengal there was a special item of 3,0 on account of sale of timber from Government estates in Chittagong. There was a falling off in the other provinces, that in Madras being exceptional, that in the Punjab occurred in the Chenab Land colonisation receipts, owing to large outstandings and to yeomen and capitalist grantees, who are required to pay nazarana on entry, having failed to come forward in as large numbers as was anticipated.

21. Under *Land Revenue due to Irrigation* the Budget Estimate in Punjab did not allow for the Nahri Parta rate on the Bari Doab Canal, the receipts from which were also higher than in the previous year. In Madras orders were not issued on the new settlement scheme in the Tanjore district till late in

Section A.—PRINCIPAL HEADS OF REVENUE—*continued.*

I.—Land Revenue—*concluded.*

the year, in consequence of which the improvement anticipated in the Budget Estimate was not fully realised, but there was an increase over the previous year owing to the introduction of this new settlement, and to an extension of irrigation from the Kistna Delta and Sangam anicut systems. The Bombay Estimates were taken too high.

22. The following statements A and B give the usual particulars regarding the distribution of Land Revenue between the Imperial and the Provincial Governments :—

A.—Transactions affecting the Distribution of Land Revenue in 1893-94.

Provinces.	Credits + Debits — to Provincial.				
	Transfers under contract.	Subsequent Recurring Transfers.	Special Transfers.	Miscellaneous Adjustments	Total Adjustments.

Section A.—PRINCIPAL HEADS OF REVENUE—*continued.*

II.—Opium—*concluded.*

24. The revenue from the *Sale of Bengal Opium*, during the year, has been the lowest since 1876-77. It fell short of the Budget Estimate by 654.6 and of the actuals of the previous year by 1,284.9. The Budget was based upon the sale of 43,704 chests at R1,250 per chest, but only 43,353 chests were actually sold, while the average price per chest, which declined almost from the beginning of the year, averaged only R1,109. The higher receipts in 1892-93 were due partly to a larger number of chests having been sold, and partly to the average price per chest having been R1,247. The trade was largely affected by the Indian Currency Legislation of June 1893, which caused fluctuations in the price of opium in China, and in the rupee value of dollars and taels in the exchange with Hongkong and Shanghai, and resulted in a falling off under *Bombay Opium Pass Fees*, which occurred chiefly in the closing months of the year. The effect of a reduction of freight was also over-estimated in the Revised. Under *Excise Opium*, the increase in Central Provinces is due to large quantities of opium having been purchased by Feudatory Chiefs, Zamindars, and Jagirdars; that in Upper Burma is due partly to the possession of opium by the Burmans, for the purposes of tatooing and medicine, having been legalised, and partly to the adoption of repressive measures in Lower Burma having stimulated prices and raised the sales in Upper Burma; the restrictive measures were adopted much later in the year than anticipated. In the North-Western Provinces the Budget Estimate proved too low, the effect of the abolition of the minimum clause in licenses for sale of opium and of the discontinuance of chandu licenses having been over-estimated. In the Punjab there was a very large demand for Excise Opium.

25. The following table gives the usual statistics for the last ten years of the produce and sales in Bengal and the exports from Bombay :—

Year.	Bengal: Produce of season. For export. Chests.	For Excise. Chests.	Total. Chests.	Chests sold.	Average price per Chest. ₹	Total price. ₹	Bombay: Chests.	Rate. ₹	Amount. ₹
1883-84	38,214	4,318	42,532	54,400	1,250	6,803,7	38,586	650	2,508,5

Section A.—PRINCIPAL HEADS OF REVENUE—*continued.*

III.—Salt—*concluded.*

26. The actuals for the past six years, during which no change in the rates of duty has occurred, have been as follows :—

	India.	Burma.	Bengal.	Madras.	Bombay.	Total.
1888-89	1,852,0	30.9	2,281,7	1,649,9	1,861,1	7,675,6
1889-90	1,959,2	132,0	2,270,7	1,756,8	2,069,0	8,187,7
1890-91	1,930,5	158,8	2,319,5	1,951,8	2,162,8	8,523,4
1891-92	1,971,2	161,0	2,404,5	1,772.9	2,326,6	8,636,2
1892-93	2,118,1	162,2	2,410,1	1,721,2	2,244,5	8,656,1
1893-94	1,838,7	167,6	2,374,1	1,629,8	2,218,7	8,228,9

It will be seen that the gradually diminishing improvement, noticed last year, has given way to a large falling off in the year under review. The decrease has occurred chiefly under the head *Excise on Local Manufactures*, and is due, in India, almost entirely to shortness of stocks of Sambhar salt, following upon the large sales of 1892-93, added to the failure of manufacture in 1892-93 and in the early part of 1893-94; in Madras the decrease is mainly due to more extended sales on the credit system in place of cash sales, caused by a fall in the price of Government paper, but to a small extent a falling off under Orissa salt, due to smaller outturn, is also responsible. The falling off in Bombay is due to two consecutive bad seasons which raised prices and checked sales.

27. On account of the change in classification, noticed in the last report, under which the revenue from the Kohat Mines, and the Government share of the Mandi Revenue, as well as the duty on Government salt in Madras, are now taken under the head *Excise on Local Manufacture*, instead of under *Sale of Government Salt*, under which they were provided for in the Budget, a comparison between the actuals and the Budget Estimate, under these two minor heads, has been vitiated, but taking the two heads together, the variations may be attributed partly to an over-estimate in India and Madras, and partly to the reasons that led to the variations between the actuals of the two years as mentioned above. In Lower Burma the Budget Estimate provided for a falling off, as it was apprehended that locally manufactured salt would not be able to compete with that imported; but the apprehension proved to be unfounded.

28. Under *Sale of Government Salt* there was an improvement of 27.3 over the actuals of the previous year, chiefly in India and Bombay, due to the shortness of stock combined with the good quality of the Sambhar salt having enabled it to fetch a very high price, and having also stimulated the sales of Pachbadra salt in India and Baragara salt in Bombay.

29. Under *Duty on Imported Salt* the excess in Lower Burma is due to large clearances from bond under the impression that the duty was about to be raised, while that in Madras is due to increased imports at the West Coast ports; Bombay seems to have recovered after the heavy falling off on the termination of the Anglo-Portuguese Treaty, owing to which facilities for the exportation of Goa salt had been diminished. The Estimate has, however, proved to have been framed too high. The improvements in these provinces have, however, been more than counterbalanced by a falling off in Bengal, which was to a large extent anticipated in the Budget Estimate.

30. Under *Miscellaneous* the most noticeable variation is the decrease in Madras, due to the levy of lower rates of cess for licensees' works in certain excise factories, and to no cess having been realised in certain others, in consequence of excess collections in the previous year. In India the Budget proved slightly too high owing to the decline in the Sultanpur salt trade, which commenced in 1892-93, having continued in the following year also; the deficiency due to this in the previous year had been nearly made up by higher receipts under the through traffic system at Sambhar and the Mayo mines, but the improvement was not maintained in 1893-94.

31. The revenue under this head shows, as usual, an improvement in almost all the provinces which occurred chiefly under *Court-fee Stamps*.

32. The head *Court-fee Stamps* shows an increase in every province excepting Bombay, where the falling off is due to the Budget Estimate having been based on the probable actuals of 1892-93, which included a special receipt of 12,7 on account of Probate duty on the estate of a Parsee Millionaire. The increase is attributed generally to an increase of litigation, chiefly civil and rent-suits. In Assam the re-settlement of the Jaintiah Purgunnahs accounts for the increase of litigation; in Lower Burma it is attributed to agricultural distress, which compelled money-lenders to resort to law, while in the Punjab agricultural prosperity is said to have been considered favourable for speedy realisation of loans by law-suits. In Bengal there were also larger receipts from Probate duties in the Presidency town, and in Madras the opening of additional Courts and the introduction of stamped copy papers into all the Revenue Offices of the Presidency helped to swell these receipts.

33. Under *Commercial and other Stamps* the increase in the Central Provinces is due chiefly to the expansion of business in the three new Railway districts of Raipur, Bilaspur, and Sambalpur; that in Bengal to the execution of a larger number of deeds, arising from the renewal of bonds, owing to bad crops, transfers of landed property of higher value, renewal of leases, etc. There was a large falling off in Lower Burma, Punjab and Madras, due, in the first case, to agricultural distress having caused money-lenders to be more cautious, and in the other two cases to agricultural prosperity having lessened the demand for loans. The Budget Estimate in Madras was also placed too high.

34. Under *Fines and Penalties and Miscellaneous* the only variations of importance are those between the Budget Estimate and the actuals in Bengal and Bombay. Both in 1892-93 and in 1893-94 the Bengal figure was unusually low, and the Bombay figure was high, while the Budget Estimates had, in both cases, been calculated on the actuals of previous years then available.

Section A.—PRINCIPAL HEADS OF REVENUE—*continued.*

V.—Excise—*concluded.*

35. The revenue shows an improvement of 146,1 over the actuals of the previous year, and of 242,7 over the Budget Estimate, the improvements having been contributed to by all the provinces except India and Burma.

36. Under *License and Distillery Fees* the decrease in India occurred partly in Baluchistan and Coorg due to over-estimates, and partly in Bangalore, where the high receipts of 1892-93, due to a new system of working Arrack shops, have not been maintained. In the Central Provinces there was a small improvement due to recoveries of arrears and advance collections. In Upper Burma, increased receipts on account of license fees and rent of toddy trees, were more than counterbalanced by a decrease under distillery fees and still-head duty, owing to diminished issue of spirits from licensed distilleries. In Lower Burma there was a decrease, due chiefly to less importation of Madras liquor, owing to enhancement of the rate of duty, but the falling off was partly made up by an increase in license fees for the sale of country fermented liquor. The improvement in Assam is due partly to settlements having been made at higher rates in some districts, and partly to settlements in Debrugarh not having been made until April 1893, when only the fees payable in advance were credited. In Bengal, a favourable settlement of excise shops, and an enhancement of the duty on wholesale licenses for the sale of imported liquor in Calcutta, led to a considerable improvement in the receipts under this head. In the North-Western Provinces there were increased receipts from license fees and still-head duty, the effect of the new country liquor excise system, introduced in 1891, having been more fully felt. In the Punjab the falling off in 1892-93, due to bad season, was followed by a reaction in the next year. Improvements in administration, helped by a good season, caused a further large development of the revenues in Madras, while in Bombay there was, in addition to a good season, the recovery of arrears amounting to 12,1.

37. Under *Opium* the variations are mostly due to the same causes as those mentioned under II—Opium—Excise Opium. The only other noticeable facts are, that in Burma there were increased imports of Shan and Chinese opium, and that in Bombay a large reduction, on account of the abolition of the minimum guaranteed vend system, and the closing of the Chandu and Madat shops, was anticipated but did not actually come about.

38. Under *Duty on Ganja* the improvement in the Central Provinces was derived from large supplies made to Feudatory Chiefs and Zamindars and to the Bastar State, where the cultivation of ganja was prohibited. In Assam there was increased consumption specially of the class of ganja which bears a higher rate of duty. In Bengal the duty on all kinds of ganja was raised by one rupee per seer with effect from the beginning of the year, and the increased revenue derived from this enhancement was larger than anticipated. In Bombay the amount provided in the Revised, and that adjusted in, the accounts of the previous year under this head, are mostly on account of fees for retail licenses for the sale of ganja which, in the accounts of 1893-94, have been shown under the first minor head.

39. Under *Other Receipts* the Madras Budget was an over-estimate.

40. The revenue under this head is worse than in the preceding year by 191,9, which is the result of a large falling off in Madras (234.5), partly counterbalanced by improvement in most of the other provinces.

41. The Budget Estimate in *India* was not realised, chiefly in consequence of the receipts from the local cess in Coorg having amounted to 2,3 only instead of 4,2 as was anticipated. In the *Central Provinces* the Budget Estimate was too sanguine in regard to the revision of settlements in Damoh district; the Patwari Fund receipts fell off, and the making over of the Bhonsla State to the Raja accounts for the decrease under Rate on Wards' Estate. In *Burma*, *Assam*, *Punjab*, and *Bombay* the variations are mostly due to the same causes as those which affected the ordinary collections under I—Land Revenue, but there were also some arrear collections in *Punjab*. *Bengal* shows a small falling off as compared with 1892-93, chiefly under Public Works Cess in Gya and Muzufferpur, counterbalanced by an excess under Rate on Wards' Estates, due to enhanced rates; the Budget Estimate of the collections of the Road and District Post Cesses appears to have been framed too low. The small excess in the *North-Western Provinces* is due to a revision of settlements in Jhansi and Unao, and to the further extension of the village watch system in Oudh. In *Madras*, District and Local Rates and Cesses shows an increase, due to the same causes as led to an increase under Land Revenue, but there was a much larger decrease under Village Service Funds. The collection of the Village Cess in districts other than Tanjore and Malabar was suspended for Fasli 1303 in order to exhaust the balance of the Village Service Funds, and the contributions, usually made to the Fund, were discontinued, and the revenue derived from Village Service Inams was credited to *Imperial* under Land Revenue. There was also a decrease in the receipts from the Public Works Cess, due chiefly to the abandonment of the voluntary irrigation cess in the Bellary district.

VII.—Customs.

			Burma, Lower.	Bengal.	Madras.	Bombay.	TOTAL.

Section A.—PRINCIPAL HEADS OF REVENUE—*continued.*

VII.—Customs—*concluded.*

			Burma, Lower.	Bengal.	Madras.	Bombay.	TOTAL.
Land Customs and Miscellaneous	Accounts	1892-93	2,6	5,1	12,8	9,6	30,1
	Budget	1893-94	2,3	5,6	11,0	9,6	28,5
	Revised	1893-94	2,8	5,6	11,5	9,2	29,1
	Accounts	1893-94	3,3	5,9	13,1	9,2	31,5
TOTAL	Accounts	1892-93	600,0	505,4	166,4	345,8	1,617,6
	Budget	1893-94	650,0	500,0	170,0	345,2	1,665,2
	Revised	1893-94	578,7	525,0	175,0	380,0	1,658,7
	Accounts	1893-94	523,6	540,9	174,2	443,7	1,682,4

42. The revenue shows an improvement of 17,2 over the Budget Estimate, and of 64,8 over the previous year, the heavy falling off in the export duties having been more than counterbalanced by the receipts from the new import duties.

43. Under *Import Duties* the increase was substantially swelled by the introduction of the Tariff Act of 10th March 1894. In Burma there was a heavy falling off in the duties on liquor and petroleum, but the fall was nearly counterbalanced by the receipts under the new Tariff Act. In Madras there was a heavy falling off in spirits. In Bengal the increase was due partly to the new Tariff Act, and partly to increased imports of kerosine oil, while in Bombay there was, in addition to these causes, increased imports of spirits and wines; the receipts under the new Tariff Act amounted to 64,2 in this province alone.

44. Under *Export Duties* Madras alone shows an improvement, chiefly due to a larger export of rice as the result of a favourable season. There was, however, a falling off in the other provinces. In Bengal a high price kept down exports of rice, and in Burma the demand from Europe was slack, and heavy shipments were made to India, on which no duty was leviable.

45. Under *Land Customs and Miscellaneous* the rise in Burma is accounted for by improved receipts from Warehouses and Wharf rents, owing to a large stock of liqour having remained in bond, in consequence of the dull season, and by receipts on account of Sunday labour fees. In Madras the Budget Estimate of the receipts from Land Customs on the rice exported from Karikal was framed low in view of the possibilities of famine, but the actual exports proved to be exceptionally favourable. In Bombay a falling off arising from certain concessions to Portuguese India, was almost counterbalanced by larger receipts from transhipment fees, owing to the re-export of a large quantity of kerosine oil to Foreign ports, and to these fees being now levied on all goods brought under the new Customs Tariff Act.

VIII.—Assessed Taxes.

1892-93. Accounts.		1893-94. Budget.	1893-94. Revised.	1893-94. Accounts.
215,8	India	218,6	224,2	221,7
49,1	Central Provinces	48,0	49,6	48,5
8,2	Burma — Upper	8,2	8,2	8,6
61,2	Burma — Lower	61,4	66,0	67,7
22,6	Assam	22,5	26,0	26,1
422,8	Bengal	433,0	430,0	435,0
225,6	N.-W. Provinces and Oudh	223,0	232,0	232,4
121,8	Punjab	122,5	127,0	126,2
185,3	Madras	175,0	202,5	206,2
373,8	Bombay	375,0	364,8	366,8
1,686,2	TOTAL	1,687,2	1,730,3	1,739,2

46. This head shows an improvement of 52,0 over the Budget Estimate and of 53,0 over the actuals of the preceding year. There was a general improvement due to enhanced assessment and to additional tax levied on Exchange Compensation Allowance. *Bombay* shows a falling off, which is attributed to fluctuations in Exchange having reduced the profits of trading companies. In *Burma* the operation of the Income Tax Act was extended, and in *Madras* there was a brisk export trade in skins and indigo consequent on a favourable season. In *Bengal* the steady growth of the revenue received a check in 1892-93, but the actuals of the year under review show that the falling off was only temporary.

Section A.—PRINCIPAL HEADS OF REVENUE—*continued.*

VIII.—Assessed Taxes—*concluded.*

47. As usual the *India* figures include, in addition to the collections made in the districts directly administered by the Government of India, the recoveries in the Non-Civil Departments from the salaries of Government officers. The details are given below :—

1892-93. Accounts.		1893-94. Budget.	1893-94. Revised.	1893-94. Accounts.
97,5	Civil Department, India	101,0	98,7	92,4
51,0	Military Department	51,6	56,5	58,3
51,1	Public Works Department	49,6	52,3	54,1
1,9	Marine Department	2,1	2,1	2,0
6,6	Post Office Department	6,6	6,7	6,9
7,7	Telegraph Department	7,7	7,9	8,0
215,8	TOTAL AS ABOVE	218,6	224,2	221,7

48. The falling off in the Civil Department, as compared with the Budget Estimate, is attributed to the extent of 3,9 to the tax on interest on Government securities, of 2,5 to the transfer of payments of salaries of employés of the Rajputana-Malwa Railway to Bombay, and of 1,9 to the tax levied on the East Indian Railway Company's share of surplus profits. The *Military* and *Public Works Departments'* Budget Estimates proved inadequate, chiefly on account of the tax levied on Exchange Compensation Allowance.

IX.—Forest.

	Accounts	1893-94	1,7	2,7	6,7	48,7	10,5	3,8	4,5	9,8	7,4	14,6	110,4
TOTAL	Accounts	1892-93	58,3	123,1	566,0		38,3	74,5	165,2	81,3	157,7	326,9	1,591,3
	Budget	1893-94	53,4	140,0	485,0		37,4	77,4	164,6	90,0	190,0	351,0	1,588,8
	Revised	1893-94	64,9	121,0	570,0		45,4	78,2	167,6	85,0	190,0	355,0	1,077,1
	Accounts	1893-94	65,6	113,4	578,5		48,9	80,2	171,0	91,3	194,7	379,4	1,723,0

49. The revenue under this head has exceeded the Budget Estimate by 134,2, and the actuals of the previous year by 131,7. The improvement is due generally to the steady development of the department. The following statement shows the actual revenue for the past few years :—

1888-89	...	1,349,1	1891-92	...	1,490,6
1889-90	...	1,486,3	1892-93	...	1,591,3
1890-91	...	1,448,0	1893-94	...	1,723,0

50. In *India* the improvement occurred almost wholly under the first head, due partly to larger sales of timber, and partly to recoveries on account of sandal wood trees standing on waste lands in Coorg, and to more favourable prices having been obtained in the London market for Andaman Forests timber.

51. In the *Central Provinces* there was a heavy falling off in all the heads. Under the first head there was a large stock of Hurra collected in the previous year, but not sold owing to a fall in the prices, and the demand for timber fuel and bamboos, the rates for which had been reduced by the Chief Commissioner,

Section A.—PRINCIPAL HEADS OF REVENUE—*continued.*

IX.—Forest—*concluded.*

showed a considerable decline. Under the second head the decrease is due to unregulated and indiscriminate fellings, by license holders, having been stopped, to a general change in the grazing and other rates, and in the grazing concessions, and to large forest areas having been made over to the Agricultural Department for settlement purposes. The decrease in the last head is mainly on account of compensations in compounded cases.

52. In *Upper Burma* there was a falling off, as compared with the Budget Estimate, under head I, due to contractors having either not been available or to their having commenced work late in the year, but the outturn of timber was better than in the previous year, when it was exceptionally low. There was, however, a very large improvement in head II, due to increased quantity of timber worked out by lessees and traders, that by the Bombay-Burma Trading Corporation having been exceptionally large. In head III there were larger receipts of drift timber than estimated for.

53. In *Lower Burma* there was a considerable improvement over the Budget Estimates under all the heads, but the results were not quite so good as in the preceding year. In head I better prices were obtained in Tenasserim for teak timber, but in the previous year there was a much larger sale of logs in Pegu. In head II there were brisk sales and extraction of timber, but the results were even better in the previous year in Pegu. The improvement in Other Receipts is partly on account of drift timber and partly on account of duty on foreign timber.

54. The improvement in *Assam* in head II has been brought about by unexpectedly large demands for timber throughout the province, and in head III by greater demands for standing trees, increased exports of home and foreign rubber, final settlement of some waste lands, and increased receipts from drift timber. There was a falling off compared with the Budget in head I, due to anticipated sales of timber at the Goalpara, Kamrup, and Garo Hills selling depôts not having been realised.

55. *Bengal* shows but a small improvement. There was a discontinuance of departmental operations under head I, but this was more than made up under head II by an increase in the Sunderbunds Division, due to an enhancement of the rate on royalty on timber and fuel from 1st July 1893. In the Chittagong Division heavy rainfall increased exports, and in Jalpaiguri there were larger demands. The actuals of the previous year under head III included the sale-proceeds of two elephants.

56. In the *North-Western Provinces* the improvement under head I is due to the realisation of the value of sleepers supplied to the North-Western Railway in the previous year, to increased sales of firewood to the Commissariat Department for troops at Chakrata, and to the sale of the old stock of turpentine for which a market was established. Under head II an extension of direct sales augmented the revenue, but in head III there was a falling off both in the drift receipts and in the realisations from forest offences. The actuals of the previous year, under this head, included a special receipt of 1,0 on account of royalty paid by the Balarampur Estate for elephants captured in Government Forests.

57. In the *Punjab* the total collections correspond closely with the Budget Estimate. There was a falling off in head I, due partly to short delivery of fuel to Railways, and partly to floods having washed away timber, which, however, caused a large excess in drift receipts under head III. There was an improvement in head II, due to increased prices for fuel in the Rawalpindi Division.

58. In *Madras* the revenue of 1892-93 was comparatively low owing to the scarcity in several districts. In the year under review the Budget Estimate under head I was not realised, owing to the curtailment of felling operations in some districts, to the difficulty of obtaining labour, and to a falling off in the revenue from firewood, chiefly in the Kistna district. There was, however, an improvement in head II, due to very large supplies of sleepers to the East Coast Railway, to a large increase under grazing and fodder grass in Kistna, owing chiefly to competition among grazing contractors, and to the favourable character of the season in general. The improvement would have been greater, but for the transfer of revenue from trees on unassessed or waste lands, not under the direct control of the Forest Department, to I—Land Revenue. Other Receipts show an increase in the revenue realised from composition of forest offences.

59. In *Bombay* the Budget Estimate under head I was nearly realised, a falling off in firewood and charcoal being counterbalaced by the improvement due to a rise in the price of timber. The Revised Estimate was framed too low, while the excess under this head, compared with the actuals of the preceding year, is explained partly by large supplies of fuel to the Southern Mahratta Railway, and partly by the general prosperity in the year and the consequent high prices, while agricultural distress in the preceding year led to a falling off in the demand. Under head II there was a considerable improvement due to higher prices for "coupes" and timber, to further development of the "coupe" system in lieu of departmental fellings, and to larger grazing and fodder grass receipts. The increase in head III is due to Government having sold its half share of trees standing in an Inam forest in certain villages owing to the co-sharer having sold his share.

60. The steady improvement, noticed under this head in previous reports, has not been maintained. There were slight improvements in Central Provinces, North-Western Provinces, and Bombay, due to the normal growth of the department, and to the increased appreciation of the advantages of registration, but the total improvement thus brought about has been more than counterbalanced by a heavy falling off in Bengal and Madras. In Bengal the decrease is wholly under *Fees for Registering Documents*, and is attributed to the reduction of the minimum *ad valorem* fee on documents, not exceeding Rs. 50 in value, from As. 12 to As. 8. In Madras the falling off is partly under this head due, to some extent, to the reaction of the famine of 1892-93, and partly under *Other Receipts*, due to the decline of recoveries of searching fees, on account of the restrictions placed on the grant of loans, under the Land Improvement and Agriculturists' Loans Acts. In Punjab the higher figure in the previous year was due to bad harvest and high prices having caused an increase in the loan transactions on the security of registered transfer of land.

61. As explained in the last report, the receipts under this head are, for the most part, fixed, the fluctuations that occur being due to non-payment of dues and arrear or advance payments. In the case of Oodeypur, the Budget Estimate provided for the realisation of arrears, amounting to 5,0, in addition to the regular instalments, but only 1,0 of the arrears was actually realised. There were larger outstandings at the close of the year in Kathiawar. In the case of the Baroda State, the full amount of the claim is 37,5 and there were arrears amounting to 4, which go to make up the Revised Estimate, but 3,0 remained due by some States in the Mahikantha Agency; the Budget was fixed low, on the assumption that the balance of the claim of the Durbar (7,0) for maintenance of the Gaekwar's contingent, after its nominal disbandment, would be paid and deducted from the full amount of the subsidy, but the refund was not claimed during the year. The balance under Malwa Contingent (Dewas Jowrah), represents the amount unpaid till 1894-95, pending settlement of the question whether payment could not be claimed, except in new Halicoins. The actuals of 1892-93 for Southern Mahratta Horse were high owing to two years' contributions (1,5) having been received from two small States, due to a change introduced in that year of recovering contributions in the year for which they are due.

62. As regards *Tributes and Contributions under Rx. 5,000* there were heavy arrear collections in Burma in 1892-93, while in the year 1893-94 also the collections exceeded the Budget Estimate. In Assam the figure for 1892-93 represents the tribute due from 21st August 1891 to 30th March 1892, at 5,0 per annum, while in 1893-94 the tributes for 1892-93 and 1893-94 have both been realised.

63. Under *Fees on succession to Native States*, the instalments of Nazarana paid by the Sarangarh State in Central Provinces ceased in 1893-94, while the Punjab receipt in 1892-93 represents Nazarana paid by the Raja of Kapurthala, on his being vested with full powers over his territories. The Bombay receipt is composed of the first instalments of Nazaranas payable by Ranasan, the Jath State, and the late Ram Samat's estates of Jetpur; the Budget Estimate did not take account of the last, and also took the second amount at 2,4 instead of at 3,6.

Section A.—DIRECT DEMANDS ON THE REVENUE.

1892-93. Accounts.		Budget.	1893-94. Revised.	Accounts.
9,461,7	EXPENDITURE	10,387,3	9,961,1	9,865,6

64. The total charges in this section showed a saving of 521,7 on the Budget Estimate but exceeded the actuals of the previous year by 403,9. Compared with the Budget, the largest saving amounting to 378,4 occurred in the Opium charges in consequence of the outturn of opium having fallen short of the Estimate. The other notable savings occurred under Land Revenue (90,7) in the charges for Survey and Settlement and for Kanungoes and Patwaries, under Salt (36,4) due to a smaller outturn in consequence of the unfavourable character of the season, and under Forests (83,8) due to contraction of operations as well as to more economical management. On the other hand, there were excesses of 31,1 under Refunds chiefly in India and Bombay, and of 50,4 under Assignments and Compensations mainly in adjustments of alienated lands in Bombay.

65. Compared with the actuals of the previous year, the largest variation occurred also under Opium under which the charges were higher by 274,1 in consequence of a better outturn. The other excesses of importance are, 85,2 under Land Revenue, 15,7 under Salt, 15,3 under Stamps, 41,2 under Forests, and 10,6 under Registration, which were partly counterbalanced by a decrease of 39,5 under Assignments and Compensations under which the charges connected with the alienated lands in Bombay were higher in 1892-93.

	Accounts 1893-94	13,1	4.4	23,8		1,9	64.4	21,6	8,1	35,8	82,9	256,0

66. This head is of a fluctuating character and is not susceptible of an accurate forecast. The excess in the total charges of 31,1 over the Budget Estimate, and the small saving of 1,3, as compared with the actuals of the previous year, are the net results of variations in all the minor heads.

67. Under *Land Revenue Refunds* there was an exceptional payment in the Katha District in Upper Burma; in Bengal provision was made in the Budget for a special payment of 6,0 on account of mesne profits, payable to proprietors of an estate resumed under the Diarah Act and released under Civil Court decree, but only a portion of the amount was paid during the year under review; in the North-Western Provinces there were some special payments in the previous year. In Madras also there was a large saving, while there was an increase in Bombay.

Section A.—DIRECT DEMANDS ON THE REVENUE—*continued.*

1.—Refunds and Drawbacks—*continued.*

68. The falling off in the Salt Revenue in India and Bombay was followed by a falling off in the *Salt Refunds*. Under *Stamps Refunds* there was a special refund of 3,1 to the Bombay Port Trust in 1892-93, on account of a composition of stamp duty on the Prince's Dock Loan. The chief variation under *Customs* also occurs in Bombay, the Budget Estimate having proved too low owing partly to an improvement in the revenue, and partly to a special refund of 4,0 to the Portuguese Indian Government, on acccunt of duties levied on articles re-exported by land from Bombay to Daman; the charges for 1892-93 were swollen by a special payment of 19,5 to the Portuguese Government, representing its share of the common customs receipts for the 10th, 11th and 12th years of the Treaty.

69. Under *Assessed Taxes* there was a large excess in India due to a refund of 9,1 to the employés of the Rajputana-Malwa Railway, residing and drawing their pay in Native States, while in Bombay, there was a special refund in 1892-93 of 1,5, to the employés of the Great Indian Peninsula Railway residing in Berar and the Nizam's Dominions.

70. Under *Other Revenue Refunds* there were large refunds of Forest Revenue in Central Provinces and Burma. In Bengal there was a special refund of extra duty on liquor amounting to 4,2 levied under Financial Department Notification, dated 5th April 1892, which was afterwards withdrawn by Notification letter No. 98-Ex., dated 9th January 1894. In the Punjab the duty on Malwa opium has been credited net in the accounts for the first time in 1893-94 after deducting what was levied upon imports into Native States which used formerly to be debited under this head, the gross realisations being credited as revenue. In Madras there was a special refund of 5,5 from the Village Service Fund of the Kurnool District, on account of amounts over credited to cess in previous years, in consequence of an erroneous apportionment of assessment. The increase in Bombay occurred chiefly in Excise refunds.

71. The charges under this head exceeded the Budget Estimate by 50,4, but fell short of the actuals of the previous year by 39,5, the variations occurring chiefly in Bombay.

Section A.—DIRECT DEMANDS ON THE REVENUE—*continued*

2.—Assignments and Compensations—*continued.*

72. Under *Land Revenue Compensations*, there were arrear payments in Assam in the year under review, as also in Bengal in the previous year. In the North-Western Provinces the Budget Estimate did not allow for the transfer from "3—Land Revenue" to this head, of the allowances to the heirs of the late Raja Sumbhu Narain Singh of Ghazipur (4,9), to the Maharaja of Benares (1,6) to the Raja of Bariapur (2), and to the Rani of Chilari, Oudh (1); there was also an arrear payment of 1,2 to Raja Sumbhu Narain Singh which was not anticipated in the Revised Estimate. These excesses were partly counterbalanced by smaller payments on account of allowances to excluded proprietors. In Madras some amounts due were not claimed. The largest difference, however, occurred in Bombay, where the excess of 37,4 over the Budget Estimate, was chiefly in the adjustments made in connection with the revenue of alienated lands, being due to remeasurements in 1892-93 in Sikarpur, which brought in a corresponding increase in the revenue This excess was to some extent counterbalanced by a saving in the payments to district and village officers.

73. Under *Opium Compensations* there were arrear payments to the Palanpur Durbar in Bombay in 1892-93. *Salt Compensations* were higher in India in the year under review, due to arrear payments to the Meywar Durbar, and to higher payments to the Jeypore and Jodhpur States, consequent on larger sales of Sambhar salt in the preceding year; in Madras, the actuals included a payment in advance of 1,6 to the French Government against an advance of 8 only in the previous year, while in Bombay the payments for compensation for salt pans in Portuguese India amounted to 3,9 against 5,0 provided in the Budget and 9,5 paid in the previous year. Under *Excise Compensations* 4,1 was provided in the Central Provinces in the Revised for payment to zemindars on account of the resumption of Abkari rights by Government, but only 1,2 was actually paid in the year; in Bombay there were large arrear payments in the previous year. Under *Customs Compensations* the payment in 1892-93 in Bombay was on account of the Goa Customs Tariff Compensation for the last 3 years of the Treaty. Under *Miscellaneous Compensations* there were arrear payments in Bengal in the year under review, while the actuals of 1892-93 in the North-Western Provinces and Bombay were enhanced by the commutation of the annual remission of revenue enjoyed by Sirdar Gulab Singh and Sirdar Narain Singh of the Rae Bareli District and by a compensation of 1,5 to the Mantri of Islampur in the Satara District for the abolition of certain haks levied by him.

74. The Indian expenditure is less than the Budget Estimate by 89,8, and is more than that of the previous year by 86,1. Variations have occurred in almost all the provinces. Bengal alone shows an appreciable excess over the Budget Estimate, and Bombay alone shows a considerable decrease as compared with the charges of the previous year.

75. The comparison of the transactions by minor heads is vitiated by a change in classification made during the year, under which Kanungo and Patwari charges, formerly shown under *Charges of District Administration* and *Allowances to District and Village Officers*, have been now shown under *Land Records and Agriculture.* If the change had not been made, the comparison of the three minor heads affected would have stood as follows:—

	India.	Central Provinces	Burma. Upper.	Burma. Lower.	Assam.	Bengal.	North-Western Provinces.	Punjab.	Madras.	Bombay.	Total.
Charges of District Administration.	31,6	117,9	82,5	77,8	60,0	294,8	683,6	199,0	407,7	292,0	2,246,9

Allowances to District and Village Officers.	...	...	...	...	...	...	2	123,6	417,7	308,1	849,6
	...	...	...	...	...	...	8,9	129,5	462,4	314,7	915,5
	...	...	...	...	...	...	2	129,2	442,0	296,7	868,1
	...	...	...	...	...	...	1	131,2	442,9	292,4	866,6

* Does not include ⅓th of the charges for Revenue Inspectors which but for the change would have been shown under "19A.—Law and Justice, Criminal Courts."

76. *Charges of District Administration* would have then exceeded the Budget Estimate by 14,5, the excess occurring in India, Lower Burma, Bengal, Punjab, Madras, and Bombay, counterbalanced to a small extent by savings in Assam under Contingencies, and Purchase of lands otherwise than under Act X of 1870, etc, in the Central Provinces, under Salaries of Officers, etc., and in the charges of the Patwari Fund, which were over-estimated, and in the North-Western Provinces by a recovery of 5,6 from the Court of Wards on account of supervision exercised by District Officers.

77. Generally speaking, Exchange Compensation Allowance is largely responsible for the excesses in every province. Taking Upper and Lower Burma together the Budget Estimate appears to have been very nearly realised; the district of Pyinmana was abolished in Upper Burma, while a new district was created in Myaung Mya in Lower Burma. Compensation for land taken up for public purposes showed a saving in Upper, but an increase in Lower Burma, and lastly there were vacancies in both provinces in many of the appointments owing to absences on leave and to want of qualified officers, and to Myooks having in many cases occupied the place of Extra Assistant Commissioners. In Bengal, Punjab, and Bombay the payments on account of salaries were larger than estimated for, and in Madras travelling allowance and sub-divisional establishment charges proved very high. A considerable portion of these excesses was, however, counterbalanced by the savings mentioned in the preceding para. by the provision for the reorganisation of the Sind Collectorates not having been utilised, and by savings in supplies and services and contingencies in Bombay.

78. Under *Land Records and Agriculture* the additional expenditure in the Central Provinces, due to absences on privilege leave and to Exchange Compensation Allowance, was nearly met by a decrease in the Patwari Fund charges. In Burma, the savings in the pay of establishments, in travelling allowances and in contingencies, more than covered the extra expenditure on account of Exchange Compensation Allowance, and the appointment of an Assistant Director of Land Records in Lower Burma. The saving in Assam is due to the second Superintendent of Land Records and his establishment not having been entertained, while the excess in Bombay is accounted for by the establishment of a Land Records Department in place of the Sind Revenue Survey.

Section A.—DIRECT DEMANDS ON THE REVENUE—*continued.*

3.—Land Revenue—*continued.*

79. Under *Allowances to District and Village Officers* the North-Western Provinces Budget Estimate provided for allowances to certain Rajahs which have been taken in the accounts under 2—Assignments and Compensations as noticed under that head, while additional establishments paid from the Patwari Fund enhanced the charges in the Punjab. The saving in Madras is due to a provision, made in the Budget Estimate, for the introduction of a revised scale of village establishments in some districts, not having been fully required, and that in Bombay partly to the Budget Estimate having been placed too high, in view of an increase anticipated from revised settlements, and partly to some of the allowances not having been claimed within the year.

80. Under *Survey and Settlement* there was a saving of 35,5 contributed by almost all the provinces—Madras alone showing an appreciable excess. The savings are due chiefly to over-estimates in Burma, Assam, and North-Western Provinces, to a gradual completion of settlement operations in some districts of the Punjab, and to a department of Land Records having taken the place of the Sind Revenue Survey in Bombay, with effect from 1st November 1893. The excess in Madras was caused by the supply of instruments to village accountants, and by additional temporary establishments for *Survey* as well as for *Settlement*, that for the latter having been necessitated by the introduction of new settlement rates in the Tanjore District.

81. Under *Management of Government Estates* the increase over the actuals of the previous year in Bengal was due to larger outlay on improvements.

82. Under *Commission on Collection* there were savings chiefly in India, Burma, and Assam, that in India being nominal, and due to the showing of charges under this head instead of by deduction from the receipts, not having been fully followed in Baluchistan. An increase in the revenue in Upper Burma was followed by an increase in the charges, but the excess was more than made up in Lower Burma, partly by reduced collections of revenue and partly by the payment of a lower rate of commission on capitation tax than was estimated for. In Assam the Budget was framed too high.

83. In England the decrease was partly in the *Law Charges of Appeals from cases in India*, and partly under *Stores*, the demand for which was much less than estimated for.

4.—Opium.

1892-93. Accounts.		Budget.	1893-94. Revised.	Accounts.
	Bengal—

1,601,4	TOTAL	2,253,9	1,883,1	1,874,5
7	England	7	11	1,3
4	Exchange	4	7	8
1,602,5	GRAND TOTAL	2,255,0	1,884,9	1,876,6

84. The Indian expenditure shows a saving of 379,4 as compared with the Budget Estimate, and an increase of 273,1 as compared with the actuals of the previous year. As usual these variations were the result mainly of variations in the outturn of the crop, which in the year under review amounted to 83,308 maunds against 100,000 maunds estimated in the Budget and 70,424 maunds, the actual production of the previous year.

85. The *Payments to Cultivators* form the bulk of the expenditure, and their details are shown below :—

	Advances to Cultivators.	Final payments on delivery of the Crude drug.	Miscellaneous.	TOTAL.
1892-93.				
Behar	282,7	355,1	8,3	646,1
Benares	193,5	557,3	10,0	760,8
TOTAL	476,2	912,4	18,3	1,406,9
1893-94.				
Behar	277,4	521,9	13,7	813,0
Benares	195,5	662,3	9,0	866,8
TOTAL	472,9	1,184,2	22,7	1,079,8

Section A.—DIRECT DEMANDS ON THE REVENUE—*continued.*

4.—Opium—*continued.*

Miscellaneous Charges in the above table include payments for leaves and trash and for purchase of opium. Under *Opium Factory* there were considerable savings in both the agencies, due to a smaller outturn of opium having required a smaller outlay on freight and manufacturing charges in both the agencies and smaller payments for timber in the Behar Agency.

86. Under *Superintendence* there was a small excess in the Benares Agency due to Exchange Compensation Allowance and to increased travelling allowance and contingencies, but this was more than counterbalanced by savings in the Behar Agency on the latter account. Under *District Staff* Exchange Compensation Allowance brought about a small excess in the Behar Agency, but in the Benares Agency there were large savings in the salaries of Sub-Deputy Opium Agents; the Revised was an under-estimate in Behar and an over-estimate in Benares. Under *Other Charges*, charges for storing opium at Calcutta were lower than anticipated.

87. The increase in England is due to demands for stores having been larger than estimated for.

5.—Salt.

	Accounts	1893-94	1,1	8	1,9		Accounts	1893-94	474,4

88. The Indian charges show a saving of 37,3 on the Budget Estimate and an excess of 14,9 over the actuals of 1892-93. In India, the saving on the Budget occurs chiefly under *Manufactures and Excavation*, and is due to a failure of manufacture in the Sambhar Lake in the early months of the year; the charges were lower in 1892-93 owing to the unfavourable season having been more protracted. Under *Salaries, etc.*, in India, savings under Medical and temporary establishments, travelling allowance and contingencies, due to contraction of operations, were absorbed by increased expenditure due to Exchange Compensation Allowance and higher through traffic charges at Pachbudra. In Bengal, the accounts for 1892-93 included a special payment of 7,5 to Mr. Kilby for his patent scales and there was some special expenditure on improvements in the Sulkea Salt Golahs, while in 1893-94 the Budget Estimate contemplated some improvements at Sulkea, Chittagong, and Naraingunj which were not carried out. In Madras, there was a small increase under *Salaries, etc*, over the Budget Estimate, due partly to Exchange Compensation Allowance (1,8), and partly to higher expenditure on rewards and petty construction and repairs, but *Purchase and Freight* showed large savings, due to a smaller outturn of salt at the Government factories in consequence of the unfavourable character of the season. In Bombay, the

Section A.—DIRECT DEMANDS ON THE REVENUE—*continued.*

5.—Salt—*continued.*

saving on the Budget Estimate is due chiefly to anticipated re-organisation of the Portuguese Indian Frontier establishments having been carried out only gradually during the year; the increase compared with the previous year occurred in the clothing charges owing to the supply of great coats in the year.

89. The increase in the expenditure in England is on account of stores, the demand for which was greater than estimated for.

90. The only noticeable point regarding *Charges on Sale of Stamps, including Discount*, is that the Estimates in Madras did not turn out correct; the Budget was too low, while the Revised was a little too high. *Stamps supplied from Central Stores* were greater than in the previous year by 7,9, chiefly in Central Provinces, Bengal, and North-Western Provinces, due to larger issues and to a fall in the rate of exchange having enhanced the rupee price of the stamps. The Budget Estimate in Madras, where the recovery was made for the first time in 1892-93, was based on imperfect data and has not therefore been borne out by the actuals.

91. In England the sterling charges practically agree with the Estimates.

7.—Excise.

Section A.—DIRECT DEMANDS ON THE REVENUE—*continued.*

7.—Excise—*continued.*

92. The charges are less than the Budget Estimate by 15,4, the savings occurring chiefly in *Madras*, *North-Western Provinces and Bengal*, partly counterbalanced by an excess in *Burma*. The actuals agree closely with those of the previous year.

93. In *India* the charges were enhanced in 1892-93 in consequence of the entertainment of additional establishment in Bangalore. In *Burma* the excess over the Budget Estimate and the actuals for 1892-93 is due to rewards paid out of fines in excise and opium cases being debited to this head instead of to 19A—Law and Justice, Courts of Law—Refunds, while the saving on the Budget Estimate in *Bengal*, has resulted from a smaller expenditure on contract contingencies, and on the construction of distillery buildings. In the *North-Western Provinces* the variations are due to the discontinuance of the payment of discount on the sale of opium and to savings under Salary of Tahsildars, Rewards and Purchase of Distillery Apparatus. There were also savings in *Madras*, where one-fourth of the combined Department of Salt and Excise, less the charges for Orissa Salt and for petty construction and repairs of Licensees' works, is debited to this head; and in *Bombay*, where the grants for petty construction and for rewards to informers were not fully utilised, and the charges for petty supplies were lower than anticipated.

8.—Provincial Rates.

1892-93. Accounts.		Budget.	1893-94. Revised.	Accounts.
	Establishment and other Charges—			
4,7	Burma, Lower	6,0	5,7	3,0
2	Assam	3	3	3
44,3	Bengal	40,6	43,4	43,5
6	N.-W. Provinces and Oudh	7	7	7
5	Punjab	7	6	4
5,3	Bombay	5,2	6,0	5,9
55,6	Total	53,5	56,7	53,8

94. In *Burma* the charges consist almost wholly of commission paid to Thugyis; and a falling-off in the collections diminished the commission payable, a part of which was also not paid within the year. In *Bengal* the Budget was fixed low owing to the approaching completion of the re-valuation work, but the actuals show an increase due to larger outlay on account of process-serving charges. In the *Punjab* charges on account of Patwari's share of mutation fees were estimated too high. In *Bombay* there were some arrear payments.

Section A.—DIRECT DEMANDS ON THE REVENUE—*continued.*

9.—Customs—*continued.*

95. The Indian charges are less than the Budget by 1,0 and more than the actuals of 1892-93 by 2,9, the differences being the net results of a number of small variations including those due to Exchange Compensation Allowance.. The only points which require special notice are, that in *Burma* the Chief Collector, Rangoon, was absent on long leave, and that the provision for additional preventive establishment and for salt scales and a still and accessories was not fully required, while in *Bengal* the Municipal tax on the Customs Buildings at Calcutta was not paid withia the year. In Madras the expenditure was enhanced by an increase to the establishment at the Madras port, and by the absence on privilege leave of the Collector.

96. The expenditure in England does not call for any remarks.

10.—Assessed Taxes.

1892-93. Accounts.		1893-94. Budget.	1893-94. Revised.	1893-94. Accounts.
1	India	4	4	4
1	Central Provinces	1	1	...
1,7	Burma, Lower	2,2	2,3	2,1
1	Assam	2	1	1
18,4	Bengal	19,3	18,3	17,9
1,9	N.-W. Provinces and Oudh	1,8	2,0	2,1
1,1	Punjab	1,2	1,1	1,1
1,7	Madras	2,0	2,0	2,1
5,1	Bombay	5,2	5,2	5,3
30,2	TOTAL	32,4	31,5	31,1

97. The Accounts show a saving of 1,3 on the Budget Estimate, chiefly in Bengal, under Establishment and Allowances. In Madras the increase over the actuals of 1892-93 is due to the re-organisation of the Income Tax Establishment in the Madras Town Deputy Collector's Office.

	Budget.	1893-94	9	6	1,5		Budget.	1893-94	990,2
	Revised.	1893-94	1,2	8	2,0		Revised.	1893-94	921,0
	Accounts.	1893-94	1,3	8	2,1		Accounts.	1893-94	906,4

98. The charges in India show a saving of 84,4 on the Budget Estimate and an excess of 41,9 over the actuals of the previous year, but this excess has been more than counterbalanced by an excess in the revenue.

99. Under *General Direction* there is a small excess, partly due to Exchange Compensation Allowance.. Under *Timber, etc. removed by Government Agency* there is a saving of 35,3 on the Budget Estimate contributed by almost all the provinces. India and Central Provinces alone show slight excesses, the former being chiefly on account of the charges incurred for the despatch of cargoes of Andaman timber for sale in the London market, and also on account of the purchase of a steam launch; while in the Central Provinces timber operations were carried out on a somewhat larger scale than provided for in the Estimate, in anticipation of the demand being stimulated by a reduction in rates. In Upper Burma, Assam, and Bengal the decrease in expenditure has followed a decrease in revenue.; in Lower Burma a smaller outturn reduced the expenditure in the Pegu circle, but the decrease was, to some extent, counterbalanced by an increase in the Tenasserim circle due to higher rates paid to contractors owing to the realization of better prices for teak timber; in the North-Western Provinces and the Punjab there was a contraction of departmental operations, while in the latter there were also less charges for the launching of logs, and the dues of the sweeping contractors were not paid during the year; in Madras the saving on the Budget was due to a falling off in the receipts, to diminished fellings of timber in North Malabar, to the cheaper rate at which sandal wood was collected in North Coimbatore, and to the non-payment within the year, of the remuneration to the catechu contractor in South Canara; in Bombay the decrease is chiefly due to a falling off in the revenue from firewood and charcoal.

100. Under *Timber, etc., removed by consumers or purchasers* the variations are small and do not call for any special explanations.

101. *Other Charges* show a saving of 29,6 on the Budget Estimate due generally to short expenditure on demarcation, construction of buildings, repairs of roads and bridges, protection from fires, and similar operations. In Bombay there were also savings under feed and keep of cattle, due to Government cattle having been sold out and no new cattle having been purchased during the year. In India two miles of tramway were purchased; there was also increased expenditure on buildings and plantations in this province as well as in the North-Western Provinces.

102. There were large savings in *Establishment Charges*, in all the provinces except India and Bombay, due partly to establishments having been under sanctioned strength in most provinces, and partly to the scheme of re-organisation of the subordinate staff having been postponed. These savings were partly counterbalanced by the charges on account of Exchange Compensation Allowance which are also responsible for the excesses in India and Bombay. In the latter province the number of officers present on duty was also larger than usual.

103. The increase in England was chiefly in the expenses of Forest Officers visiting continental forests while on leave out of India.

Section A.—DIRECT DEMANDS ON THE REVENUE—*concluded.*

12.—Registration—*concluded.*

104. The charges exceeded the actuals for the year 1892-93 by 10,6 and the Budget Estimate by 1,7. The excess over the previous year occurred wholly under *District Charges*, and was contributed more or less by all the provinces except India, the largest increases having occurred, in Bengal and Madras owing generally to the gradual growth of business and in the Punjab, to increased charges on account of commission, owing to the substitution of non-official for official Sub-Registrars. As compared with the Budget Estimate, the only noticeable variation is a saving in Madras, due to the scheme for the re-grading of Registrars and Sub-Registrars and for the revision of the clerical staff not having been carried out during the year, and also to the provision for the opening of new Sub-Registry offices not having been fully utilised.

1892-93. Accounts.		1893-94. Budget.	1893-94. Revised.	Accounts.
869,7	RECEIPTS	893,6	874,6	875,5

105. The receipts in this section show a falling off of 18,1 as compared with the Budget Estimate, and an excess of 5,8 over the actuals of the previous year. The falling off occurs chiefly in England, where, owing to the inability of the Secretary of State to sell Council Bills for a part of the year, there was a considerable diminution in his cash balance, and consequently in the amount available for investment at interest. The falling off, compared with the actuals of the previous year due to this, was however more than balanced by increased receipts in India from larger loans to Municipalities and other Public Corporations in the North-Western-Provinces, and from larger Advances to Cultivators in Madras. But these were fully provided for in the Budget Estimate.

Section B.—INTEREST—*continued.*

XII.—Interest—*continued.*

106. As explained in previous reports, the receipts under this head in India arise chiefly from the Paper Currency Investment and from loans granted by Government to Municipalities and other public bodies, Native States, and cultivators. No alteration has been made in the amount of the first since 1891-92, and the interest thereon consequently exhibits no variations.

107. The following statement shows the balances of the different kinds of loans during the last five years:—

	31st March 1890.	31st March 1891.	31st March 1892.	31st March 1893.	31st March 1894.

Percentage reckoned on balance at end of year	4·032	4·032	3·964	3·882	4·469

108. The interest paid in 1893-94 by the Local Governments to the Government of India on account of the loans held on the Provincial Account amounted to 109,5, while the actual sum realised by them and credited to Provincial Revenues amounted in the aggregate to 114,9. The fluctuations under the different heads are explained in detail below.

109. Under *Loans to Native States* the receipts in Bengal are on account of the loan granted to the Cooch Behar State for the construction of the Cooch Behar Railway; and there were no receipts in Bombay as the Cambay State loan was repaid in 1892-93. Under *Loans to Presidency Corporations* the increase over the previous year in Bengal is on account of new loans granted to the Calcutta Port Fund for the Kidderpore Docks, while that in Madras is on account of the yearly advances made to the Harbour Trust for the construction of the harbour; the decrease in Bombay is due to the new consolidated loan of the Bombay Municipality having been fully repaid on 1st July 1893.

110. Under *Loans to Municipalities and Public Corporations* the increase in India is due to the realisation of arrears of interest on the new loan of 21,8 to the Ajmere Municipality for water-works. In the Central Provinces a new loan of 10,0 was granted to the Raipur Municipality, and this was taken up on the 27th January 1893 instead of on the 31st March 1893 as in the Budget. In Bengal 6,7 was provided for in the Budget, calculated on further advances being made during the year to the extent of 128,6, but only 48,6 was actually sanctioned by the Government of India. The Durbhanga District Board and the Patna Municipality did not pay the interest, which became due by them during the year, and the Chittagong Port Trust paid the interest for one quarter only, in consequence of the date of annual payment having been changed from March to July. The excess in the North-Western Provinces is due to the original allotment for loans to Municipalities having been increased by 60,0 during the course of the year, to the advances having been made earlier than expected, and to the realisation, with effect from August 1893, of interest on a loan of 23,0 to the Naini Tal Municipality, on which interest was not charged before. The recovery of some arrears due from the Simla Municipality swelled the receipts in the Punjab. The Budget Estimate in Madras proved too low owing to recovery of interest on loans sanctioned during the year, while the increase over the previous year is due also to the large amount of loan granted in 1892-93.

Section B.—INTEREST—*continued.*

XII.—Interest—*continued.*

In Bombay there was an increase of 2,0 in the recoveries from the Ahmedabad Municipality, in consequence of one annual payment on 1st April having been changed into two half-yearly payments on 30th September and 31st March each year; this was partly counterbalanced by a loan to the Satara Municipality not having been taken up, and by the loan to the Dhulia Municipality having been taken up later than anticipated.

111. Under *Interest on Loans to Landholders and other Notabilities*, the increase in India is due to recovery of arrears in Ajmere; in Lower Burma the whole of the balance of the loan of 10,0 sanctioned for the construction of the Rangoon Cathedral, was not taken up, and the Budget Estimate of interest receipts was not accordingly realised; in Bengal the increase over the previous year is on account of a loan of 7¼ lakhs to Prince Ferok Shah which was allowed for in the Budget Estimate, but in the Revised a recovery of 1,0 from the Deo State in Gya was not anticipated. In Punjab and Bombay no new loans were granted either in 1892-93 or in 1893-94, but re-payments were made which led to a diminution in the receipts from interest. In Madras the low figure in the preceding year was due to remission of interest due from the Nawab of Banganapalli for that year.

112. The receipts from *Interest on Advances to Cultivators* fluctuate mainly with the balance of the advances outstanding at the beginning of the year. This balance was exceptionally large in Madras, owing to the heavy advances granted in 1892-93 under the Land Improvement and Agriculturists' Loans Acts, and there was also a greater promptitude in the realisation of interest; in India recoveries of interest on the heavy advances made in Ajmere during the scarcity of 1891-92 were not fully made until 1893-94; and in the Punjab the effect of new loans granted during 1892-93 was not fully allowed for in the Budget Estimate. In Upper Burma, interest on the heavy advances made during the scarcity of 1892-93 swelled the receipts in that year.

113. Under *Securities of Provincial Funds*, the Budget in Madras calculated on the sale of a large amount of Government Securities in connection with the Railway Guarantee Fund, Tanjore, but the sale was not made. *Interest on Overdrawn Capital* represents the interest on the drawings of the Railway Companies in excess of the balances at their credit; the amounts realised in 1893-94 were on account of the Lucknow-Bareilli Railway. Under *Other Items* the receipts in India in 1892-93 included the interest on some special advances to the Bank of Bengal.

114. In England there was a large decrease, as, in consequence of the failure for a time to sell Council Bills, there were no sums to invest during the greater part of the year.

Section B.—INTEREST.

1892-93. Accounts.		Budget.	1893-94. Revised.	Accounts.
4,374,3	EXPENDITURE	4,065,9	4,432,2	4,446,4

115. The total expenditure in this section exceeded the Budget Estimate and the actuals of the previous year by 380,5 and 72,1 respectively. There were excesses of 111,1 and 71,8 in the sterling expenditure in England and of 126,6 and 164,0 in the charges for exchange due partly to the increase in the sterling expenditure and partly to a fall in the rate of exchange. The Indian expenditure also exceeded the Budget Estimate by 142,8, but fell short of the actuals of the previous year by 163,7. The excess over the Budget in England is due to the discount on the 3 per cent. stock issued during the year, and to the interest paid on the India bills and debentures issued in consequence of the failure to sell Council Bills for a part of the year. The excess over the previous year is slightly smaller, as the actuals of that year included £44,000 on account of discount on stock against £18,600 in 1893-94. The charges in India exceeded the Budget Estimate, mainly in consequence of the discount and interest on the 3½ per cent. loan raised during the year. The excess over the previous year due to these causes, was more than counterbalanced by the transfer of a much larger portion of the charges to the Railway Revenue account in consequence of additional capital expenditure on Railways and Irrigation Works.

13.—Interest on Ordinary Debt.

116. Before proceeding to examine the interest charges in detail, it is usual to ascertain first the amount of Loans raised or discharged during the year, and the following figures supply the necessary particulars for 1892-93 and 1893-94 :—

1892-93. Accounts.		Budget.	1893-94. Revised.	Accounts.
	INDIA—			
250,0	Debt incurred	3,220,0	3,719,1	3,719,1
4,8	Debt discharged	5,0	1,101,0	1,110,6
+245,2	NET IN INDIA .	+3,215,0	+2,618,1	+2,608,5
	ENGLAND—			
	Debt incurred—			
1,300,0	At 3 per cent.	1,300,0	1,300,0	1,300,0
...	At 3½ per cent. Debentures	...	1,386,0	1,386,0
1,300,0	TOTAL INCURRED .	1,300,0	2,686,0	2,686,0
	Debt discharged—			
4	At 5 per cent.	...	1	1
9	At 4 per cent.	...	2,0	1,9
...	At 3½ per cent.	...	...	...
1,770,3	Oudh and Rohilkhand Railway Debentures .	729,0	729,0	729,0
150,0	South Indian Railway Debentures . . .	520,2	520,2	520,2
1,921,6	TOTAL DISCHARGED .	1,249,2	1,251,3	1,251,2
−621,6	NET IN ENGLAND .	+50,8	+1,434,7	+1,434,8*
−376,4	NET IN INDIA AND ENGLAND .	+3,265,8	+4,052,8	+4,043,3
	ENGLAND—			
	Temporary Loans Incurred	...	10,750,0	10,750,0
	Temporary Loans Discharged . . .	...	4,750,0	4,750,0
		...	6,000,0	6,000,0

* The above amounts are exclusive of 100,8 cancelled, comprising 90,5 charged to Railways on account of Sinking Funds of the East Indian, Eastern Bengal, and Sind, Punjab and Delhi Railways, and 10,3 to Discount Sinking Fund.

117. The Budget in India provided for a public loan of 3,000,0 and for 220,0 to be taken from the Nawab of Rampur. The public loan was, however, subsequently raised to 3,500,0, of which 9 was not issued owing to a tenderer having failed to take up the amount. During the year the 4½ per cent. Loans of 1878 and 1879 were ordered for discharge under Finance Department Notification No. 2985, dated 14th July 1893, and the provision made on this account in the Revised Estimate proved a little too low. In *England*, provision was made in the Budget only for the issue of 3 per cent. Stock for 1,300,0 for advances to Railway Companies and for the discharge of debentures of the Oudh and Rohilkhund and South Indian Railways, but, owing to failure for a time to sell Council Bills, temporary loans to the extent of a net sum of £6,000,000 and India 3½ per cent. debentures for £1,386,000 were issued during the year.

Section B.—INTEREST—*continued.*

13.—Interest on Ordinary Debt—*continued.*

118. The usual Statement analysing the charge for Interest on Ordinary Debt is given below :—

1892-93. Accounts.	Rate. DEBT IN INDIA ON 31ST MARCH 1893.	Principal.	Interest due.	Budget.	1893-94. Revised.	Accounts.
490,0	4½	2,377,1	107,1	106,1	109,9	99,9

1,4	3½	52,2	1,8	1,8	38,7	41,4
4,5	Provincial . . .	86,0	3,4	3,5	3,4	4,0
1	Stock Notes . . .	1,1	1	...	...	...
4,256,1	TOTAL .	102,900,8	4,127,8	4,127,4	4,156,2	4,128,5
9	Interest on Loans in course of discharge . .			1,6	8	12,9
10,8	Discount on Loans and Miscellaneous . . .			...	133,0	132,4
4,267,8	TOTAL INTEREST PAID IN INDIA .			4,129,0	4,290,0	4,273,8
3,655,7	England			3,609,2	3,712,7	3,719,7
2,199,4	Exchange			2,263,4	2,390,3	2,417,3
5,855,1	TOTAL INTEREST PAID IN ENGLAND .			5,872,6	6,103,0	6,137,0
10,122,9	GRAND TOTAL .			10,001,6	10,393,0	10,410,8

Divided into—

1892-93. Accounts.		Budget.	1893-94. Revised.	Accounts.
	Interest on Ordinary Debt—			
−40,1	India	−380,0	−223,0	−238,3
2,433,5	England	2,394,2	2,498,3	2,505,3
1,464,1	Exchange	1,501,5	1,608,5	1,628,1
3,857,5		3,515,7	3,883,8	3,895,1
	Interest on Debt for Railways and Irrigation Works—			
4,307,9	India	4,509,0	4,513,0	4,512,1
1,222,2	England	1,215,0	1,214,4	1,214,4
735,3	Exchange	761,9	781,8	789,2
6,265,4		6,485,9	6,509,2	6,515,7
10,122,9		10,001,6	10,393,0	10,410,8

119. A considerable portion of the 4½ per cent. Loans of 1878 and 1879 were converted into 4 per cent. in 1892-93, and the payments of interest on the 4½ per cent. Loans were consequently smaller, while those on the 4 per cent. Loans were considerably larger in 1893-94 compared with the previous year. The amounts shown under the 4½ per cent. were further reduced in consequence of the interest on the 4½ per cent. Loans of 1878 and 1879 having been compiled under *Loans in course of discharge* with effect from the date of their discharge. Taking the two heads together, there is a slight excess over the Budget, due to the stoppage of interest having brought out arrear claims. Under 4 per cent. the Budget Estimate provided for the full amount due in the year, but 32,2 does not appear to have been claimed. The saving due to this was, however, more than counterbalanced by the payments on account of interest on the new 3½ per cent. Loan raised during the year. The figure under *Discount on Loans and Miscellaneous* is on account of discount on the new 3½ per cent. Loan.

120. The following are the details of the interest paid in *England* :—

1892-93. Accounts.		Budget.	1893-94. Revised.	Accounts.
2,433,5	Interest not charged to Railways . . .	2,394,2	2,498,3	2,505,3
1,464,1	Exchange	1,501,5	1,608,5	1,628,1
1,017,1	Interest charged to State Railways . . .	998,1	997,5	997,5
611,9	Exchange	625,9	642,2	648,2
205,1	Interest charged against Companies on advances .	216,9	216,9	216,9
123,4	Exchange	136,0	139,6	141,0
5,855,1	TOTAL AS ABOVE .	5,872,6	6,103,0	6,137,0

121. Under *Interest not charged to Railways*, the excess over the Budget Estimate consists of 77,6 on account of interest on India Bills, 17,3 on India Debentures and 5,6 on temporary loans from the Bank of England, of 18,6 on account of discount on the issue of India 3 per cent. Stock, which it was not considered expedient to provide in the Budget and of 9 for commission on the sale of India Debentures not anticipated in the Budget Estimate. These excesses were partly counterbalanced by a decrease of 9,3

Section B.—INTEREST—*continued.*

13.—Interest on Ordinary Debt—*continued.*

in the interest on 3 per cent. India Stock, mainly owing to the loan of 1,300,0 not having been raised as early as had been anticipated. The Revised Estimate under-estimated the interest on temporary loans.

14.—Interest on other Obligations.

	Budget 1893-94		2	1	3		550,2
	Revised 1893-94		2	1	3		548,4
	Accounts 1893-94		2	1	3		551,3

122. The accounts show an excess of 34,5 over the actuals of the previous year, of which 28,6 occurred under *Savings Bank Deposits*. Under *Interest on Special Loans*, the increase over the Budget is due to payment of arrears of interest on the 8 per cent. Madras Perpetual Loan. The usual details of the interest on *Treasury Notes and Service Funds* and *Savings Bank Deposits* are noted below. The growth of the Post Office and the Presidency Savings Banks received a check towards the close of the year owing to the then impending reduction of the rate of interest.

123. Under *Miscellaneous* there was a special payment of 2,6 to the purchasers of the Sandamangalam mitta in the Salem District.

Interest on Treasury Notes and Service Funds.

1892-93. Accounts.		Budget.	1893-94. Revised.	Accounts.

124. The net result of the transactions of the Postal Department has been as follows during the last few years:—

	Net Expenditure.	Net Revenue.
1889-90	75,4	...
1890-91	...	5,8
1891-92	47,0	...
1892-93	29,6	...
1893-94	...	3,8

125. The operations of the Department yielded a net revenue for the first time in 1890-91. In the following year there was again a large net expenditure owing to the Department being charged for the first time from that year with the cost of stationery supplied to it and of printing work done for it at Government presses which were formerly charged as ordinary Stationery and Printing charges and also to a heavy reduction in the rates for letter postage to the United Kingdom and Aden from 1st January 1891. Since this date there has been a steady improvement in the net receipts, and the operations of the Department have again yielded a small net revenue in 1893-94. The Budget Estimate of the year anticipated a heavy net expenditure as it did not provide sufficiently for the normal growth of the revenue of the Department and over-estimated the charges on account of Stationery and Printing and the conveyance of mails.

126. The improvement in the net earnings of the Telegraph Department over the Budget Estimate is due to sufficient allowance not having been made in the latter for the normal development of message traffic. The slightly unfavourable result, as compared with 1892-93, is due partly to the grant of Exchange Compensation Allowance, partly to the fall in exchange, and partly to a higher capital expenditure incurred in the construction of a larger number of new lines.

127. As explained in last year's report the Mint receipts were unusually large in 1892-93 owing to the exceptionally heavy silver coinage of that year caused by the large importations of the metal in expectation of the closing of the Mints to the free coinage of silver. In 1893-94 the closure of the Mints early in the year would have noticeably affected the net Mint receipts but for the fact that a large quantity of silver which had been shipped by the Exchange Banks prior to the closure, was purchased from them and coined at the Mints, the operation yielding a net profit of 71,1 in addition to the ordinary seigniorage duty which would have been charged on the bullion taken over.

1,481,3	TOTAL	1,531,4	1,541,8	1,553,7
	DISTRICT POST COLLECTIONS—			
8	Central Provinces	8	1,2	9
1,7	Bengal	1,5	1,4	1,1
5,0	Punjab	5,1	5,3	5,6
1	Madras	...	...	...
7,6	TOTAL	7,4	7,9	7,6
1,488,9	GRAND TOTAL	1,538,8	1,549,7	1,561,3

128. The total revenue exceeded the Budget Estimate by 22,5 and the actuals of the preceding year by 72,4. The bulk of these improvements occurred as usual in the *Sale of Ordinary Postage Stamps*, due to the normal expansion of the operations of the Department.

129. The revenue from *Parcel and other postage collected in cash* has been falling off steadily during the past four years owing to a decrease in the number of unpaid letters. The total receipts under this head have been as follows:—

1890-91	155,2
1891-92	154,1
1892-93	150,8
1893-94	147,4

130. The receipts from the *Sale of Ordinary Stamps* have been steadily increasing, but the rise in the year under review was unprecedentedly large, having been nearly double of what was anticipated in the Budget Estimate. The *Sale of Service Stamps* also had its normal growth, but the estimates were a little too sanguine. Under *Payments to English, Colonial, and Foreign Post Offices* no payment was made during the year to the London Post Office for open and closed mail transit for which the Budget provided 4,7 and for which 3,8 was paid in the previous year. The payments to the London and Foreign Governments for letter and parcel postage however exceeded the Budget Estimate and the actuals of the previous year by 1,7 and 5,6 on account of arrear adjustments. The excesses would have been much larger if the amounts due to certain Colonial and Foreign Governments had not been left in arrears owing to the non-settlement of the accounts during the year. The provision of these in the Revised accounts for its excess over the actuals. Under *Mail Cart and Parcel Van Passenger Service* there was an increased traffic on the Simla-Kalka line compared with the previous year, but this was fully provided for in the Budget Estimate. The *Money Order Receipts* show a steady increase from year to year, but the improvement during the year under review was smaller than usual, as also the anticipations in the Budget Estimate by 5,0, owing to the gain by exchange from Foreign Money Order transactions having been very small. This was due to the sudden rise in exchange in July 1893, followed by the closing of the Mints to the free coinage of silver, having converted into a loss an anticipated gain in the adjustment of the sterling money order balances of 1892-93 with the Foreign countries and colonies with which India has direct exchanges. The falling off in the *Bullock Train Collections*

Section C.—POST OFFICE, TELEGRAPH, AND MINT—RECEIPTS—*continued.*

XIII.—Post Office—*continued.*

occurred during the latter part of the year, and is probably accounted for by the competition of Messrs. Burn & Co., the out agents of the East Indian Railway Company on the Simla-Kalka line. The difference between the actuals and the Budget Estimate under *Other Receipts* is due to the provision in the latter of a large amount for recoveries of service payments of previous years which have, in the accounts, been adjusted by deduction from the charges instead of being credited as revenue. The deficiency of the actuals would have been larger, but for an unanticipated credit of 1,2 on account of commission on Native Military Pension payments which accounts for the increase over the actuals of the previous year.

Indian Telegraph.

131. The receipts during 1893-94 were better than those of the previous year by 31,0. The increase was due chiefly to a development of private traffic and partly to the extension of railway telegraph lines. It would have been larger had it not been for a falling off of 10,9 in State traffic, owing to the closing of temporary lines erected for military expeditions. The increase of 15,8 over the Budget Estimate is attributed to the development of private traffic being greater than was anticipated. Compared with the Revised Estimate the actual receipts show an increase of 3,3, which was mainly due to an improvement in message revenue and rent of wires and instruments leased to railways.

Indo-European Telegraph.

132. The total receipts during 1893-94 were 9,6 less than those of 1892-93. The falling off was the net result of a decrease of 11,8 under England and Exchange, and of an increase of 2,2 in the receipts in India due to larger collections of message revenue. The decrease in England was due chiefly to the receipts in 1892-93 having been swelled by the recovery from the Imperial Ottoman Telegraph Administration of the traffic balances for the previous two years, and partly owing to the Turkish Government not having paid during the year under review the traffic balance in their hands.

133. Compared with the Budget Estimate the actuals show a decrease of 8,2, which was chiefly due to a falling off in the receipts in England, and partly to the *Message Revenue* in India having been overestimated. The Revised Estimate also was placed too high.

Section C.—POST OFFICE, TELEGRAPH, AND MINT—RECEIPTS—*continued.*

XV.—Mint.

1892-93. Accounts.		Budget.	1893-94. Revised.	Accounts.

310,3	GRAND TOTAL	230,5	228,1	227,3

134. The closing of Mints to free coinage of Silver in June 1893, accounts for the large decrease under *Seignorage on Silver*. The following table shows the importations of silver and the silver coinage at the Mint in recent years :—

	Net Importation.	Silver Coinage.	Seignorage.
1886-87	7,155,7	4,616,5	93,1
1887-88	9,228,8	10,788,4	149,8
1888-89	9,246,7	7,282,3	138,9
1889-90	10,937,9	8,541,2	168,8
1890-91	14,175,1	13,193,5	264,9
1891-92	9,022,2	5,554,0	116,1
1892-93	12,863,6	12,611,5	256,1
1893-94	13,719,8	4,902,5	94,9

135. The Revised Estimate provided for the whole of the gain arising from the Coinage of 191,87,249 tolahs of silver taken over from the Exchange Banks after the closure of the Mints, under the head *Other Receipts*, but in the actuals, an amount equal to the Seignorage duty has been credited under the head *Seignorage on Silver* and the actual net gain under the head *Other Receipts*. This accounts for the variations of the actuals under these heads from the Revised Estimates, and also fort he large excess of the actuals over the Budget Estimate under *Other Receipts*.

136. The *Gain on Copper Coinage* varies with the absorption of copper coin which was less than was anticipated in the Budget Estimate, but was greater than that of 1892-93.

	ENGLAND—			
59,9	Payments to the English Post Office	59,9	61,5	61,5
35,8	Stores	39,0	41,0	42,5
95,7		98,9	102,5	104,0
57,5	EXCHANGE	62,0	66,0	67,6
1,518,5	GRAND TOTAL	1,588,3	1,560,2	1,557,5

137. The actuals show a saving of 30,8 on the Budget Estimate, due partly to some of the allotments for *Presidency and District Offices* not having been utilised in full, partly to non-payment of certain subsidies and office rents during the year, but chiefly to *Stationery and Printing* and *Railway Charges* having been over-estimated by 24,7. The excess over the actuals of the previous year is due chiefly to the normal development of the operations of the Department, and in a smaller degree to the grant of Exchange Compensation Allowance.

138. The *Presidency and District Offices* show a saving of 3,8 on the Budget Estimate due to the provision for the normal increase in the establishments not having been fully required. The saving would have been much larger, but for the charges on account of Exchange Compensation Allowance and additional local and house rent allowances in Burma and an increase in the charges for travelling allowance, and also those for office rent, owing to the rents of offices at Railway stations having been charged under this head instead of under *Railway Charges* as before. Under *Road Establishment* the Budget provided for a considerable extension of runners, lines in the Punjab and Madras, but the increase was largely counterbalanced by reductions effected in Madras on the opening of the East Coast Railway. The *Railway Charges* show a large decrease, due mainly to more economical management, but partly also to the charges for office rents having been shown in the accounts under *Presidency and District Offices* as explained under that head and to certain payments having been left in arrears. The saving under *Mail Cart and Bullock Train Establishment* occurred principally in the Simla-Kalka Passenger Service and Bullock Train line, owing to certain sums not having been drawn during the year. The decrease under *Subsidies* is accounted for by the non-payment during the year of certain sums due to the Tigris and Euphrates Steam Navigation Company, the Rivers Steam Navigation Company, and the India General

Section C.—POST OFFICE, TELEGRAPH, AND MINT—EXPENDITURE—*continued.*

15.—Post Office—*continued.*

Steam Navigation Company. The saving under *Stationery and Printing* has already been noticed. The excess under *Miscellaneous* is due chiefly to a payment of 3 from the *pro formâ* account to clear that head.

139. Under *District Post Charges* the only differences which call for any remarks are those in the Punjab, where the actuals exceeded those of the previous year owing to extension of the District Dák service, but fell short of the Budget Estimate as the latter was pitched too high.

140. In England the *Payments to the English Post Office* exceeded the estimate owing to an increase in the annual rate of payment with effect from 1st January 1892. Under *Stores* the demands proved to be greater than expected.

Indian Telegraph.

141. The expenditure in 1893-94 was 26,3 more than that of the previous year. The increase was due partly to the construction of a larger number of departmental lines, partly to larger establishments necessitated by the opening of new offices and by the growth of message traffic, and partly to the grant of Exchange Compensation Allowance.

142. The decrease of 7,1, as compared with the Budget Estimate, was due partly to the recovery of 3,4 from the Kashmir State on account of the cost of the telegraph lines chargeable to that State having been adjusted by reduction of the charges, and partly to the amount payable to the Eastern Telegraph Company on account of the Zanzibar-Mauritius cable having been recorded as a separate item in the accounts, although budgetted for as a charge of the Indian Telegraph Department.

Section C.—POST OFFICE, TELEGRAPH, AND MINT—EXPENDITURE—*continued.*

16.—Telegraph—*continued.*

143. The saving of 9,2 on the Revised Estimate, was due to adjustment of the recovery of 3,4 from the Kashmir State by reduction of expenditure and to an over-estimate of the outlay, chiefly on repairs of lines.

INDO-EUROPEAN TELEGRAPH.

144. The decrease in the expenditure, as compared with the Budget and Revised Estimates, was chiefly due to the out-payments of revenue in England not having been so large as was anticipated.

17.—Mint.

6,2	„ Exchange	4,3	2,8	3,0
112,0	GRAND TOTAL	104,2	83,1	91,1

145. The actuals under *Establishments* in Calcutta have exceeded the Budget Estimate by 2,2. The excess consists of 9 on account of Exchange Compensation Allowance, 7 on account of acting allowance drawn by the Mint Master, Calcutta, as the senior Mint Master, in consequence of the departure on furlough of the Mint Master, Bombay, 4 on account of the absence on privilege leave of the Assay Master, and 2 on account of extra-operative establishment. In Bombay, on the other hand, there was a saving of 5,8 due to the absence on leave of the permanent Mint Master, to several appointments having been left vacant, and to the discontinuance of the coinage of silver for the public, partly counterbalanced by an increase of 1,0 on account of Exchange Compensation Allowance.

146. Under *Loss of weight in Coinage* the saving in Calcutta is attributed to the recoinage of a smaller quantity of uncurrent coin, while in Bombay the actual charges have been swollen by the loss arising from the issue to the Bikanir Durbar of ₹4,10,000 new Bikanir rupees at their metallic value.

147. Under *Other Charges* the Budget for the Calcutta Mint was an over-estimate, while the saving in the Bombay Mint was due to a smaller consumption of coal and other stores in consequence of the discontinuance of coinage for the public.

1,607,9	RECEIPTS	1,635,5	1,636,1	1,631,3

148. The total receipts in this section fell short of the Budget Estimate by 4,2 but exceeded the actuals of the previous year by 23,4. There was a heavy falling off compared with the Budget Estimate in the Marine receipts, due to recoveries from Other Departments and Local Governments, which were provided for in the Estimate under receipts, having, in the accounts, been adjusted by deduction from expenditure, but the falling off due to this was nearly counterbalanced by increases under other heads, chiefly Police, which also accounts for the increase over the previous year.

149. For the first time since 1887-88, the receipts under this head showed a falling off in the year under review as compared with the previous year. It also fell short of the Budget Estimate by 4,8. The falling off, compared with the previous year, occurred chiefly in the receipts from *Sale-proceeds of Unclaimed and Escheated Property*, which are necessarily fluctuating, and which included some special items in the previous year. The deficiency compared with the Budget occurred chiefly in Burma under *General Fees, Fines, and Forfeitures.*

150. The receipts under *Sale-proceeds of Unclaimed and Escheated Property* show a falling off, compared with the actuals of the previous year, as the latter included some special credits in India and Bombay.

151. Under *Court-fees realised in cash*, the actual revenue shows a slight improvement over both the actuals of the previous year and the Budget Estimate, contributed mainly by Bombay, where there were large recoveries in pauper suits, and by Central Provinces, where large Process-servers' (Dastak) fees were realised.

152. *General Fees, Fines, and Forfeitures* show a more or less satisfactory improvement in most of the provinces, except in Assam, where the receipts have been practically stationary, in the Punjab, where the Budget Estimate did not make sufficient allowance for the decline under this head which has been steady since 1890-91, and in Upper and Lower Burma, where there was an unexpected falling off in the receipts from magisterial fines.

153. The variations under *Other Receipts* do not call for any remarks.

	Accounts .	1893-94	32,6	20,9	34,4		4,8	80,8	46,0	22,7	36,6	21,4	306,2

154. The total receipts showed a falling off of 6,1 as compared with the Budget Estimate and of 3,0 as compared with the actuals of the previous year, but there were considerable differences in the several provinces.

155. Under *Sale-proceeds of Jail Manufactures* there was a considerable falling off in Bengal and Burma, but this was largely counterbalanced by improvements in the North-Western Provinces, Madras and Bombay. In Bengal the Budget anticipated an improvement over the receipts of the previous year in view of the orders of the Secretary of State, that the requirements of the public consuming Departments should, as far as possible, be obtained from the Jail Department, but the anticipation was not realised, and there was a falling off in the supplies to the Military and the Opium Departments. In Lower Burma, the Estimate was not realised on account of prisoners being more extensively employed on public works, the receipts from which are shown under *Other Receipts*. The Upper Burma Budget was pitched too high. In the North-Western Provinces and Madras, there was a steady development of manufacturing operations; in the former, there were also larger recoveries of transportation and Jail charges from Native States, and larger receipts from hire of convicts. In the Punjab the actuals were unusually low in the preceding year, owing to the prevalence of cholera; in the year under review the Budget Estimate was not realised, owing chiefly to the cessation of brick-making at the Montgomery Jail. The net receipts under this head, after deducting the corresponding charges under 19B, are given below.

			India.	Central Provinces.	Burma. Upper.	Burma. Lower.	Assam.	Bengal.	N.-W. P. and Oudh.	Punjab.	Madras.	Bombay.	TOTAL.
Net Receipts from Jail Manufactures.	Accounts .	1892-93	7	4,3	6,8	13,7	5	20,3	13,9	—2	8,9	2,1	71,0
	Budget .	1893-94	6	1,1	4,9	7,2	4	15,5	13,9	2,1	6,5	—1	52,1
	Revised .	1893-94	8	2,1	5,2	8,1	3	27,4	15,6	—6	3,9	1,2	64,0
	Accounts .	1893-94	7	1,5	3,7	8,1	2	18,3	15,4	1,6	2,5	1,2	53,2

156. It will be noticed that although the gross *Sale-proceeds of Jail Manufactures* fell short of the Budget Estimate in Bengal, the net receipts were better than anticipated. The reverse is the case with Madras. On the whole, the actual net receipts approximated closely to the Budget Estimate, the Revised Estimate proving too high especially in Bengal.

157. Under *Other Receipts* there has been an improvement of 2,0 over the Budget Estimate and of 2,6 over the accounts of the previous year. The excess over the previous year was contributed mainly by India, Burma, and the Punjab. The increase in India was due to increased receipts from Native States on account of the cost of maintenance of their convicts in Government Jails, and that in Burma to the more extensive employment of convicts on public works, as mentioned under *Sale-proceeds of Jail Manufactures*. The actuals in the Punjab exceeded those of the preceding year by 1,0, but fell short of the Budget Estimate by 1,1 on account of the cessation of extra-mural work in the Montgomery Jail, on the completion of the Central Jail building at that station.

Section D.—RECEIPTS BY CIVIL DEPARTMENTS—*continued.*

XVIB.—Law and Justice—Jails—*continued.*

158. The falling off of 1,8, as compared with the Budget Estimate under *Convict Receipts at Port Blair*, occurred partly in Tea Garden receipts owing to an unfavourable season, and partly in the sale-proceeds of Jail Manufacture and stores.

	Accounts .	1,7	20,0	20,0		15,3	94,3	50,7	79,3	40,0	70,4	417,5

159. The receipts under this head show an improvement of 46,7 over the Budget Estimate, and of 21,5 over the actuals of the previous year, due mainly to larger recoveries counterbalanced partly by larger expenditure on account of Punitive Police employed in Burma, Assam, Bengal, and North-Western Provinces, to a large credit in the Punjab on account of ordnance stores returned to arsenals, and to an improvement in Cattle Pound receipts in most of the provinces.

160. Under *Police supplied to Municipal, Cantonment, and Town Funds*, the variations are small and call for no special remark except that the improvement in Bengal was due to recoveries on account of Police supplied to the Dinapore cantonment.

161. Under *Police supplied to Public Departments, Private Companies and Persons*, the actuals exceeded both the Budget Estimate, and the actuals of the previous year in Lower Burma, Assam, Bengal, and the North-Western Provinces owing to larger recoveries on account of Punitive Police. In Madras the actuals of 1892-93 included 3,2 on account of recovery of seven-tenths of the cost of the police employed on the South Indian Railway, for which no provision was made in the Budget, but which was recovered during the year for six months' charges.

162. The head *Fees, Fines, and Forfeitures*, which consists chiefly of Cattle Pound receipts, showed an improvement in most of the provinces. In Bengal fines levied under the Village Chowkidari Act of 1892, and in Burma fines under the Gambling Act, and Slaughter-house licenses, which were not provided for in the Budget, also contributed to the increase. In Bombay the improvement would have been larger, but for a falling off in Steam Boiler Inspection fees, and the transfer of receipts under the Public Conveyance Act to Personal Ledger Accounts.

163. Under *Presidency Police* recoveries from the Frontier Police for supplies made, and a special credit on account of surplus receipts of the Hackney Carriage Fund, augmented the receipts of the previous year in Bengal. In 1893-94 there was a further falling off as compared with the Budget, due to a decline in the miscellaneous receipts. In Bombay the receipts in 1892-93 were swelled by the recovery from the Bombay Port Trust of the arrears of its contribution towards the Harbour Police since 1888-89.

164. *Other Receipts* also show an improvement chiefly in Assam, Punjab and Madras. Recoveries on account of clothing and rations supplied in the Lushai Hills account for the increase in Assam, and credits for value of muskets returned to the Ordnance Department in connection with the re-arming of

Section D.—RECEIPTS BY CIVIL DEPARTMENTS—*continued.*

XVII.—Police—*continued.*

the Mofussil and Agency Police, account for the increase in Madras and the Punjab. Such credits in Bombay also caused an excess over the Budget Estimate, but the corresponding credits in the previous year were much larger. In Burma there was a falling off, due to cash recoveries of service payments in previous years having been adjusted by reduction of the charges, and also to smaller miscellaneous receipts.

	Accounts .	25,4	27,4		...	93,4	...	6,2	152,4

165. The apparently large falling off in the actual receipts under this head, as compared with the Budget Estimate, is due to the introduction, after the Estimates were framed, of the system of adjusting recoveries from other departments and Local Governments, by deduction from expenditure instead of taking them as receipts under *Dockyard Services, etc.* If allowance be made for this charge, the revenue under the head would show an improvement, due to larger realisations from "Hire of Vessels."

166. *Pilotage Receipts* vary with the amount of shipping visiting the port. The small improvement in Bengal occurred in the last month of the year, and was not provided for in the Revised.

167. Under *Dockyard Services, etc.*, the falling off, as compared with the Estimate, is due to the change in the method of adjustment mentioned above. The discrepancy between the Revised Estimate and the actuals is due to the write-back of the amount debited to Her Majesty's Imperial Government by credit under this head, in connection with the employment of the *Clive* on trooping duties between India and Natal in 1892. The actuals include 13,3 on account of the amount realized from the lease of the *Sladen* and her flats to the Mu Valley Railway, and from the employment of the *Clive* and the *Canning* in conveying troops to Suez. Nothing was provided in the Budget on this account and the actuals of the previous year included similar receipts of 2,4 only.

168. Under *Sale-proceeds of Vessels and Stores*, the actuals of 1892-93 included the sale-proceeds of the Hydraulic Lift at Hog Island, in Bombay, and of the light vessel *Colombo* in Burma.

169. The general depression of trade, and the small demand for rice in Europe, kept shipping away from the Burmese ports and diminished the receipts under *Coast Light Dues*. The falling off occurred in the closing months of the year, and was not foreseen when the Revised Estimate was framed.

170. Under *Other Receipts* there was a falling off in Burma, due partly to recoveries of service payments in previous years having been adjusted by deduction from charges, partly to smaller earnings of steam launches; and lastly, to the non-payment of the monthly contribution towards the maintenance of the light vessel *Colombo* by the Rangoon Port Trust, owing to a vessel belonging to the Port Fund having taken the place of that vessel, and to fewer miscellaneous receipts.

	Accounts } 1893-94	1,3	8,6	2,4		4,5	61,5	28,1	11,4	40,2	58,2	216,2

171. The receipts under this head exceeded the Budget Estimate and the actuals of the previous year by 4,5 and 5,9 respectively. The improvements occurred chiefly in the North-Western Provinces, the Punjab and Madras.

172. Under *Fees and Fines* the decrease in Central Provinces is accounted for by the transfer of certain schools to the control of Municipalities. There was a general improvement in all the other provinces, due, in Madras, chiefly to the opening of additional schools, and, in the others, partly to improved attendance, and partly to increases in the rates of fees. In Bombay the Budget was framed low, as it was anticipated that the Revised L. L. B. Regulations of the Bombay University would affect the attendance at the Law Schools, but the anticipation was not realized.

173. The receipts under *Contributions* were unusually low. The decrease in Bombay is due to private contributions for school buildings, hitherto credited under this head, having been transferred to XXXII Civil Buildings; that in the Central Provinces is due to the same cause as the decrease in *Fees and Fines*, while in Madras the actuals of 1892-93 included some special receipts. The falling off in Bengal is said to have been unusual. Under *Other Receipts* the increase in Central Provinces is consequent on the sale-proceeds of books of the Government Book Depôt at Nagpur, on its transfer to a private firm, having been credited to this head, while that in the Punjab is due to recoveries of over-payments of grants-in-aid to certain Municipalities for District and Primary Schools.

174. The receipts in India show an increase of 8,9 over the Budget Estimate, and of 5,0 over the actuals of the previous year. The increase was partly anticipated in the Revised Estimate, and has been contributed chiefly by improved receipts under *Medical College and School Fees* and *Hospital Receipts* in Bengal, and by certain special credits in Central Provinces, North-Western Provinces, Madras and Bombay.

175. Under *Medical College and School Fees* the receipts in Bengal have been steadily increasing during the last few years, but in spite of this the Budget Estimate was framed lower than the actuals of the previous year. The variations in the other provinces do not call for any special remarks.

176. The Budget Estimate of *Hospital Receipts* was placed too low in most of the provinces. The enhancement, with effect from January 1893, of the rate of recovery from the Hospital Port Dues Fund for charges incurred on account of seamen sent to hospital, and larger receipts from paying patients also contributed to the increase in Bengal.

177. Under *Contributions* a receipt of 5 for village sanitation in Central Provinces was not anticipated in the Budget Estimate. The falling off in Bombay, as compared with the Budget Estimate, is due partly to the discontinuance by the Baroda Durbar of its contribution towards the salary of the additional professor of Clinical Medicine and Pharmacology in the Grant Medical College, and partly to the estimate for "other contributions" having been fixed too high.

178. Under *Other Receipts* the actuals include special credits on account of the sale-proceeds of Government Promissory Notes, belonging to certain dispensaries in the North Western Provinces and Madras, of the transfer from the Savings Bank Deposits of the cash balance of dispensaries in the Bulandshahr district in the North-Western Provinces, and also on account of the transfer of the balances of certain Excluded Dispensary Funds to District Local Boards in Bombay.

179. The receipts in England in 1892-93 included a special credit, on account of the sale-proceeds of the furniture and effects of the Ealing Asylum when it was closed.

180. The receipts in India are better than those of the previous year by 5,1, and the Budget Estimate by 6,4. The improvement has occurred chiefly in the North-Western Provinces owing to the large receipts on account of the Kumbh Mela at Allahabad.

181. Under *Receipts on account of Experimental Cultivation* the improvement over the Budget Estimate was obtained in the North-Western Provinces from reclamation of waste lands, in the Punjab from the Bruceabad Farms in the Dera Ghazi Khan District, in consequence of good crops, and the realisation of outstanding balances, and in Bombay from the Bhadgaon Farm.

182. Under *Botanical and other Public Garden Receipts* there was an improvement in the receipts from the Saharanpur and Dehra Dun Botanical Gardens, and the Taj Gardens at Agra.

183. Large supplies of Sulphate of Quinine by Bengal to the Medical Store Department, Mean Meer brought in a large receipt. The Budget Estimate under *Cinchona Plantations* in Madras was framed too high.

184. *Receipts on account of public Exhibitions and Fairs* were swelled by the unusually high receipts from the Magh (Kumbh) Mela which is held at Allahabad every twelfth year. The increase was partly counterbalanced by a small falling off in the Punjab, due to expected credits from sales, commission, and gate money in the Punjab Exhibition in December 1893, not having been credited in the year, and to an over-estimate of some local receipts.

185. Under *Veterinary and Stallion Receipts*, the actuals for 1892-93 in Bengal represent the amount contributed by Sir Dinshaw Manockjee Petit towards the Veterinary school and hospital at Belgachia. The favourable character of the season diminished the receipts under *Labour and Emigration* in Madras, while fees for use of debarkation depôts, and increased immigration brought in a larger revenue in Assam. *Sale of maps, instruments, etc., by the Survey and Mathemetical Instrument Departments* appears to have been under-estimated, and smaller receipts from *Examination fees* led to a decrease under *Other Receipts*.

186. The receipts in England consist of sale-proceeds of books, maps, etc., and have turned out better than anticipated.

14,259,9	EXPENDITURE	14,472,0	14,559,6	14,637,8

187. The total expenditure exceeded the Budget Estimate and the actuals of the previous year by 165,8 and 377,9 respectively. The excess over the Budget Estimate would have been much larger but for considerable, though nominal, savings under "Marine" due to the introduction of the system of adjusting recoveries by deduction from expenditure instead of by credit to revenue.

188. The greater part of the actual excess is explained by the payment of Exchange Compensation Allowance amounting to 209,7. The only other noticeable points are the increase of the Amir's subsidy by 60,0 a year, the payment of arrears of his subsidy to the extent of 31,1, the appointment of the Kabul Mission, and the further fall in the rate of exchange, which added substantially to the charges in this section.

189. The increase over the Revised Estimate is due partly to the arrear payment of the increased subsidy to the Amir and partly to the Police charges having been under estimated.

190. The Indian expenditure exceeded the Budget Estimate by 40,5, and the actuals of the previous year by 56,6, but agreed closely with the Revised Estimate. The increase was pretty general, but largest under *Secretariat*, *Commissioners*, and *Account Offices*, being due to a large extent to the grant of Exchange Compensation Allowance, which amounted, in the aggregate, to 38,9, under this head.

191. Charges on account of Exchange Compensation Allowance caused an excess under the first head in all the Provinces, but this was more than counterbalanced in the Central Provinces and Burma by the Chief Commissioners having been acting officers for parts of the year, and in Bombay by the absence on leave of the Commissioner in Sind. The expenditure in Bengal was further augmented by the payment at the Presidency of a part of the salary of the Chief Commissioner, Central Provinces, and of the leave allowances of the Chief Commissioner, Burma, and the Lieutenant-Governor, Bengal.

192. Under *Staff and Household* there was a saving in India, chiefly under Hill journey charges, but this was nearly counterbalanced by an excess in the charges for telegrams. The payments on account of Exchange Compensation Allowance caused an excess in most of the other provinces. In Bengal the payments on account of furniture and sumptuary allowance of the Lieutenant-Governor in Bengal were also larger than provided for, while in the North-Western Provinces and Oudh no provision had been made for the payment of water-rate for the Allahabad Government House. In Assam a sumptuary allowance was granted to the Chief Commissioner for the first time in 1893-94. The high figure in Madras for the previous year is explained by the payment in advance of 1,0 on account of the contract allowance of the Governor. Under *Durbar Fund*, 2,0 out of the excess of 3,5 is for payment in arrears of the household expenses of the Viceroy for two months of 1892-93, and 1,5 is for the payment made in advance in March 1894 of the furniture grant for 1894-95. Exchange Compensation is almost wholly responsible for the excess under *Executive Council*, but the excess was nearly balanced in the case of *Legislative Council* by savings under other detailed heads, as also by the transfer of a portion of the grant in Bombay to the Public Works Department for furniture required for the Council Hall at Bombay and Poona.

18.—General Administration—*continued.*

193. Under *Secretariat* there was an excess of 24,6 over the Budget Estimate, contributed by all the Provinces except Bombay, where there was a saving, being the net result of several minor fluctuations one of which was caused by the grant of Exchange Compensation Allowance. The excess in India is the largest. The details are shown in the following table, in which the last column shows the portion of the charges for 1893-94 incurred on account of Exchange Compensation Allowance :—

1892-93. Accounts.		1893-94. Budget.	1893-94. Revised.	1893-94. Accounts.	Exchange Compensation.
	Secretariat (India).				
35,3	Financial Department	33,8	35,3	36,1	9
24,2	Home Department	23,5	25,2	25,7	1,1
44,4	Foreign Department	37,4	42,4	44,9	1,1
19,2	Revenue and Agriculture	20,3	20,8	21,6	6
8	Translator's Department	7	7	7	...
28,9	Public Works Department	31,0	30,4	31,4	1,6
3,7	Government Record Department	3,3	3,7	3,5	3
44,4	Military Department	44,5	47,4	45,1	1,1
209,9	Total	194,5	205,9	209,0	6,7

194. Even if the charges on account of Exchange Compensation Allowance be left out of account, the charges of the first four secretariats would show an excess, due mainly to the deputation of officers on special duty in all of them, and in the case of the Foreign and Finance Departments to heavy telegram charges, and also to the payment in advance of the Financial Secretary's pay for March when proceeding on leave out of India. Savings under other heads compensated for the excess due to Exchange Compensation Allowances in the other Departments. As regards the other provinces the payment of this allowance has led to an excess more or less in all of them, and the only other points worth special mention are that a revision of the Establishment added to the increase in Assam, while in Burma and Bengal there was a further excess due to the deputation of officers on special duty, and in Madras, to the absence on privilege leave of the Revenue Secretary.

195. The decrease under *Tour Charges* has occurred mainly in India in those of the Staff and Household of the Governor General, slightly counterbalanced by an increase in the Central Provinces, due to the purchase of tents and tent gear, and in the Punjab due to the tour of the Lieutenant-Governor having been more extended than usual. In Bengal the charges were higher during the first eight months, but fell off towards the close of the year.

196. The slight increase under *Board of Revenue and Financial Commissioner* has been contributed by Bengal, North-Western Provinces and the Punjab, chiefly on account of Exchange Compensation Allowance and the extra expenditure on account of privilege leave, partly counterbalanced in the case of the North-Western Provinces by recoveries from the Court of Wards on account of supervision exercised by the Board over private estates under management. The expenditure on account of *Commissioners* show an increase of 11,7 over the Budget Estimate which has been contributed by all the provinces except India, and is due, in addition to Exchange Compensation Allowance in all the Provinces, to privilege leave arrangements in Burma, Assam, Bengal, and Bombay. The excess would have been larger but for some minor savings in Burma and Bombay, and for recoveries from the Court of Wards on account of supervision exercised by Commissioners in the North-Western Provinces.

197. The total charge for *Account and Currency Offices* is shown below :—

	Civil Account and Currency Offices.	Office of A. G., P. W. D.	Total.
Accounts 1892-93	223,6	24,8	248,4
Budget 1893-94	231,0	24,3	255,3
Revised 1893-94	236,2	24,8	261,0
Accounts 1893-94	235,9	24,6	260,5

There is an excess of 4,9 in the Civil Account and Currency offices chiefly due to privilege leave of officers and the payment of Exchange Compensation Allowance. In Burma a special compensation of 7 was paid to the Comptroller.

198. The small saving under *Allowances to Presidency Banks* was chiefly in the payment for Savings Bank duties to the Bank of Bombay, and in the allowances to the Bank of Bengal for the management of the public debt.

199. The Budget Estimate under *General Establishment of Local Fund Offices* was pitched high, and there was a saving on it of 4,5, but compared with the actuals of the previous year there was an excess of 2,2 due mainly to the establishment of additional Union Panchayats in Madras.

200. Of the excess under England, 10,0 is due to the supply of currency notes being larger than anticipated, 3·5 is for the passage and outfit allowances of the Governor General in India, 2,5 is for heavy telegram charges, and 1,1 is for repairs to the India Office.

201. The Indian accounts show an increase of 95,6 over the Estimate and of 120,0 over the actuals of the previous year, 69,9 out of these being due to Exchange Compensation Allowance. With the exception of Central Provinces, Burma, and Assam, which show small savings, there is an excess everywhere, the most marked being in Bengal, the North-Western Provinces and the Punjab. The charges in connection with the Himalaya Bank case forms a special feature of the North-Western Provinces excess—Exchange Compensation Allowance being a general reason, the effect of which however has, in many cases, been greatly modified by unexpected savings.

202. Under *High Court, Chief Courts, Recorder's Court, and Judicial Commissioner*, there is an excess of 5,2 over the Estimate, chiefly in North-Western Provinces, partly counterbalanced by savings in Madras and Bombay. The large excess in North-Western Provinces is due, in addition to Exchange Compensation Allowance, to the continued entertainment of a 5th Judge in the Allahabad High Court, high charges on account of allowances to witnesses and jurors in the Himalaya Bank case, the absence of the Judicial Commissioner on privilege leave, and the payment of arrear pay and furlough allowances to the Hon'ble Justice Mahmud. In Madras the Estimate provided for the retention of an additional temporary Judge, but as this was not sanctioned by the Secretary of State a saving was effected, which was, however, almost absorbed by the increased expenditure, under Translation and Printing executed by the High Court, arrear payment of the assessment of the new High Court building, and Exchange Compensation Allowance. In Bombay the saving was caused chiefly by a temporary vacancy on the Bench, due to the death of the

Section D.—SALARIES AND EXPENSES OF CIVIL DEPARTMENTS—*continued.*

19A.—Law and Justice—Courts of Law—*continued.*

Hon'ble Mr. Telang, and by the absence of a large number of officers on long leave; the difference between the actuals of the two years being due chiefly to Exchange Compensation Allowance. Under *Law Officers*, the increase is mostly in North-Western Provinces, due to the payment of arrear privilege leave allowances of the Legal Remembrancer, and to the high charges in connection with the Himalaya Bank case. Under *Civil and Sessions Court* the increase is chiefly in Bengal and North-Western Provinces. In Bengal this head shows a progressive annual increase since 1888-89; the increase in the year under review is chiefly on account of additional Munsiffs and their establishments. Privilege leave absences, larger outlay on remuneration to copyists, and smaller savings under Process-serving establishments also contribute to the excess. In North-Western Provinces the chief causes are, the creation of temporary additional Judicial appointments, high charges on account of diet allowance to complainants and witnesses, and on account of process-serving establishments. Under *Courts of Small Causes*, the small saving which occurs in Bengal is due partly to revision of establishment, and partly to the appointment of lower paid officers, in place of senior incumbents. Under *Criminal Courts* the chief excesses are 9,3 in Bengal, 9,9 in North-Western Provinces, 10,5 in Punjab, and 7,1 in Bombay. Apart from Exchange Compensation Allowances, the causes of the excesses are, in Bengal, privilege leave absences, and increased remuneration to copyists; in North-Western Provinces, smaller savings under salaries than were anticipated, and high charges for purchase of tents; in the Punjab increased expenditure on account of extra Assistant Commissioners, entertainment of additional temporary establishment, and higher charges for diet and road money to witnesses, postage and travelling allowance, and lastly in Bombay a larger number of officers than was anticipated being on duty, a revised scale of salaries for Cantonment Magistrates, and increased payments to officers of other provinces. In Madras, the saving is nominal, as the Budget and Revised Estimates include provisions of 5,6 for one-fifth of the charges for Village Officers subordinate to *Charges of District Administration* under "3.—Land Revenue." These charges being now classified as *Land Records and Agriculture*, no debit of one-fifth was passed on to *Criminal Courts*.

203. The excess in Bombay under *Other Courts of Justice* is due to the payment of privilege leave allowances, to some special charges for furniture, and to Exchange Compensation Allowance. The expenditure under *Other charges* (*Pleadership Examination*) in North-Western Provinces is comparatively high, but is met by a saving in Madras.

204. Under *Refunds* there is an excess of 6,2 contributed generally by all the provinces excepting Burma and Bombay, but chiefly by India, on account of refund of escheated estates at Calcutta, and in North-Western Provinces, on account of large refunds of Magisterial fines. The saving in Burma is due partly to fewer refunds owing to a falling off in receipts from Magisterial fines, and partly to rewards paid out of fines in excise and opium cases having been debited to "7—Excise," instead of to this head.

205. The excess provision in *England* was for the outfit allowances of three Judges, but no Judge was sent out during the year.

Section D.—SALARIES AND EXPENSES OF CIVIL DEPARTMENTS—*continued.*

19B.—Law and Justice—Jails—*continued.*

206. In the expenditure under this head, India, North-Western Provinces and Madras show excesses over the Estimate, but these are more than covered by savings in the other provinces. *Jail Manufactures* and *Other Jail Charges* show savings reduced by excess under *Convict Charges at Port Blair, etc.*

207. The saving under *Jail Manufactures*, which occurs chiefly in Bengal, is in that Province consequent on supplies to public departments having been over-estimated, and in Burma owing to prisoners having been largely employed on Public Works. The savings are partly counterbalanced by excesses in North-Western Provinces and Madras, due to the development of jail industries and to the establishment of a Dairy Farm at the Lucknow Jail. The increase over the previous year is due to the development of jail industries.

208. Under *Other Charges*, Bengal and Madras show some excess, due in the former case to higher prices of food-grains, and in the latter to under-estimate for rations and diet for under-trial prisoners. These excesses are more than covered by savings in the other provinces, due, in the Central Provinces, to the daily average number of prisoners being lower than was expected; in Burma less allowances drawn by Jail Superintendents, owing to decrease in the number of prisoners, and to savings in pay of establishment, and less outlay on rations, clothing and bedding, etc., in consequence of the Pyinmana Jail being closed; in the North-Western Provinces, to low prices of food-grains; in Punjab to permanent guards not having been entertained to the extent anticipated, to the provision for re-organization of District Jails not having been utilized, and the low prices of food-grains; and in Bombay, to the provisions for improving the pay of warders, and for temporary establishment not being fully utilized. *Convict Charges at Port Blair* show an excess, due partly to Exchange Compensation Allowance, but chiefly to large supplies of timber due to increased demands for works, and to store supplied to the Military and Marine Departments—the value of which is deducted from *Convict Charges*—having been less than were anticipated.

209. The accounts show a saving of 40,7 on the Estimate, contributed chiefly by Bombay and Burma under *District Executive Force*, due to expected increase of police forces not having been carried out during the year. The excess expenditure on Punitive Police, grant of Exchange Compensation Allowance, and Abor expedition, none of which had been foreseen in the Budget Estimates, was more than counterbalanced by unexpected savings.

210. Under *Presidency Police* the excess in Bombay is due chiefly to an increase in the strength of the Police force from 1st September 1893, and to the refund of Municipal contribution, (3,3) overpaid in 1892-93, partly counterbalanced by an enhancement in the rate of the contribution. That in Bengal is due chiefly to Exchange Compensation Allowance, but partly also to increased hospital charges, and arrear payments of contribution to the Port Commissioners for the River Police. In Madras savings, anticipated in the Budget, did not occur.

211. Under *Superintendence* the excess is contributed mainly by Burma, Bengal, North-Western Provinces and Madras, due partly to the payment of Exchange Compensation Allowance and privilege leave allowances, and in Burma, partly to arrears of pay drawn by a Deputy Inspector General, and the appointment of officers on higher pay as Personal Assistants; in Bengal, to increased charges consequent on the opening of a branch office in Bankipur, and the appointment of an additional officer; in the North-Western Provinces, to extra expenditure on account of the removal of the Inspector General's Office from Lucknow to Allahabad.

212. Under *District Executive Force* there is a saving of 48,6, chiefly in Bombay (28,9) and Burma (15,9). The saving in Bombay is due to a special provision of 20,0, for improving the District force, not having been utilised, and, in a smaller degree, to savings under establishments, petty construction, and ammunition, counterbalanced by payments of grain compensation in the Kanara district and Exchange Compensation Allowance. The saving in Burma is due chiefly to the force having been under the sanctioned strength, and to the abolition of the Pyinmana district, and to a smaller extent to less expenditure on arms and accoutrements, cost of escorts, and petty construction and repairs, but the payment of Exchange Compensation Allowance and quartering of Punitive Police at Rangoon have reduced these savings. The saving in North-Western Provinces is due to decrease under Salaries and Police Force, and to adjustments on account of Ordnance Stores returned by District Superintendents of Police, to the Military Department, by deduction from charge; in Bengal the saving is due to the re-organization of the Bengal Military Police, the charges for which are adjusted under the head *Special Police*, and to the provision for the purchase of elephants not having been utilized. Punjab and Madras are the only provinces which show slight excesses due to Exchange Compensation Allowance, and in Punjab to increases under "Allowances," "Supplies and Services" and "Contingencies," partly counterbalanced by savings under "Salaries" and "Police Force," and in Madras to the supply of arms, and the cost of stores supplied from England, being much larger than anticipated in the Estimate. To this last-mentioned cause, to the payment of Exchange Compensation Allowance, and to the charges in connection with the Punitive Police, may be ascribed the excess of the actuals for 1893-94 over those for 1892-93.

213. Under *Municipal and Cantonment Police* the under-strength of the force and smaller outlay on clothing, arms, and accoutrements in Burma account for the saving under this head. The transfer of the Howrah Police to this head accounts for the difference between the actuals of 1893-94 and of 1892-93.

Section D.—SALARIES AND EXPENSES OF CIVIL DEPARTMENTS—*continued.*

20.—Police—*continued.*

214. Under *Government Railway Police* the savings occur chiefly in Madras due to over-estimate, and in Punjab and Bombay, to the transfer of the Sind Section, of the North-Western Railway Police, to the control of the Punjab Government from 1st September 1893, provision for the whole year having been made in both the provinces. The extra expenditure in India is on account of the Godhra-Rutlam Railway Police, and in North-Western Provinces is due to share of cost recoverable from East Indian Railway not having been recovered in full during the year.

215. Under *Village Police* the excess in North-Western Provinces is due to a further extension of the village watch system in Oudh, and payment of arrear pay of village chaukidars in some districts in Oudh, the saving in Burma, which almost covers the excess in the North-Western Provinces is accounted for by the gradual introduction of the Village Act.

216. Under *Special Police*, the excess expenditure has been almost wholly on account of the Abor expedition in Assam, counterbalanced by savings in Bengal and Bombay. In Bengal a special provision of 7,5 for unforeseen charges of the Lushai Hill Police was made in the Estimate, but only utilized to the extent of 1,8; this saving, however, was reduced by the charges of the Bengal Military Police, which were not provided for in the Budget. The saving in Bombay is chiefly under Mahi Kantha Agency Police, and Mewasis and Bhils. The difference between the actuals of the year 1892-93 and of the year 1893-94 is chiefly due to high expenditure on account of the Lushai Hill Police in the previous year, partly counterbalanced by the high charges on account of the Abor expedition in the year under review.

217. The variation under *Cattle Pounds* is due chiefly to an over-estimate in the case of Madras. The increase under *Other Charges* occurs mainly in India under Thuggee and Dacoity, due to the payment of Exchange Compensation Allowance, to the privilege leave of the General Superintendent, and to the appointment of two additional officers on a re-organisation of the department.

218. The small excess under *General Supervision and Accounts* is due to Exchange Compensation Allowance. The small difference under *Marine Survey and Establishment* does not call for remarks. The saving under *Dockyards* is due to the introduction, after the framing of the Estimate, of the system of adjusting recoveries, for work done for other departments and Local Governments, by deduction from charges, instead of by addition to receipts. The decrease under receipts, due to the same cause has been noticed under XVIII—Marine. The decrease under *Salaries and Allowances of Officers and men afloat*, as compared with the Estimate, occurs chiefly in India, where it is due to the establishment being under the sanctioned strength, and to the late arrival of the steamer *Minto*. The saving in Burma is due to some launches having been lent to other departments, and the late arrival of steamers constructed for the Burma Administration; in Madras a provision of 2,6 to supplement, in cases of necessity, the expenditure incurred by the Port Funds for the maintenance of the dredger *Wenlock* was not required. Under *Marine Stores and Coal for Building and Repairs of Ships*, the minus entries are the result of the system of adjusting recoveries by deduction from charges, the charges also were lower under this head on account of the late arrival of steamers, and loan of launches to other departments as mentioned above; in Assam the Estimate proved too high. Recoveries for work done having been larger than anticipated, chiefly account for the difference between the actuals and the Revised. The variation in Bombay is due to the transfer to *Other Charges* in March 1894 of a charge, provided for under this head in the Revised. The charges under *Pilotage*, *Pilot Establishment*, *and Vessels* are liable to large fluctuations, as they depend on the tonnage of shipping visiting the port. For purposes of comparison the following table is added showing both receipts and expenditure for the seven years commencing from 1887-88:—

	1887-88.	1888-89.	1889-90.	1890-91.	1891-92.	1892-93.	1893-94.
Receipts	88,4	85,2	80,8	84,5	88,9	84,4	85,5
Expenditure	60,2	58,9	55,3	58,3	59,2	55,1	52,7

219. Under *Other Charges* there is a decrease, which was partly anticipated in the Revised Estimates. An under-estimate for construction of new vessels and special payments of 7,0 to the Madura port for repayment of a loan on account of purchase of the Pamban dredger, and of 1,4 to the Ganjam ports, account for the increase in Madras. The excess in Bombay has been referred to under *Marine Stores, etc.* The decrease in India is due chiefly to the appointment of interpreters for vessels in the Persian Gulf having been vacant, to savings in the Perim Light House and the Coal Depôts, and to the provision for the hire of a vessel for the annual tour of the Lieutenant-Governor not having been required; many of the charges under this head are liable to fluctuations for which no particular reasons can be ascribed. The decrease in Burma is due chiefly to the non-construction of the port light tender, to the provision for ration allowances and for construction of vessels not having been fully expended, to the reduction of the subsidy for the Attaran-Natmaw and Kyondo line, and to the discontinuance of the contribution paid to the Akyab Port Trust from June; the decrease in Assam is due to a Ferry steamer not having been taken over from the Gauhati Municipality; in Bengal the saving is due chiefly to part payment of the cost of construction of the vessel to replace the *Coleroon*, having been made in 1892-93, though provided for in the year under review, partly counterbalanced by further payments sanctioned by Government.

220. The excess in England is mainly due to the postponement to this year of payments on account of the Indian troop ship *Warren Hastings* which, when the Budget was framed, was expected to be made in 1892-93, to the increase in the pay and passage of Marine officers on appointment, and to adjustment of arrears for the years 1891-92 and 1892-93 on account of subsidy to the Admiralty.

221. The Indian expenditure shows an increase over the previous year of 34,8, but a decrease of 44,0 compared with the Budget Estimate. The increase is generally due to the normal development of the department and to the grant of Exchange Compensation Allowance amounting to 10,7. The saving on the Budget Estimate has been contributed to by almost all the heads, but is greatest under *Government Schools*. The transfer of certain schools in Central Provinces to Municipalities, the abolition of the Nagpur Book Depôt, the transfer to the Public Works Department and to the adjusting heads of charges for construction of Local Board School Buildings in Bombay and the high estimate under result and salary-grants and grants to technical schools in Burma, Madras and Bombay are some of the causes of the decrease with reference to the Budget Estimates.

222. The payment of Exchange Compensation Allowance has reduced the saving which would otherwise have accrued under *Direction* owing to the appointments of Inspector General of Education in the Central Provinces, and of Directors in Madras and Bombay being held by acting officers. The excess over the previous year's expenditure is chiefly on account of payments of Exchange Compensation Allowance. Under *Inspection*, the saving in Central Provinces is due to anticipated additional appointments not having been fully sanctioned by the Government; in the North-Western Provinces it is nominal, as the charges on account of the Oudh Book Depôt have been transferred from this head to *Other*

Section D.—SALARIES AND EXPENSES OF CIVIL DEPARTMENTS—*continued.*

22.—Education—*continued.*

Charges. The *University* grant in Bombay was reduced by half after the framing of the Budget Estimates. Under *Government Colleges* the excess over the Budget Estimates in North-Western Provinces is due to the appointment of a new Law Professor in the Benares College, smaller savings from Salaries, special charges in connection with a workshop established in the Muir Central College, and the purchase of physical science apparatus; in Madras the increase is almost wholly in the charges of the College of Engineering under which the provision for Salaries and Supplies and Services proved quite insufficient. Under the latter head no provision was made for cost of Europe Store, the charge for which amounted to 1,4. The saving in Bombay which nearly counterbalanced these excesses, is due to absentees and changes in the *personnel* of the staff, and to the lapsing of the provision for the Principal, Law College. Under *Government Schools* there are savings in most of the provinces. The decrease in Central Provinces is due, partly to the expenditure on primary education, for which 5,0 was provided under this head, being debited against *Grants-in-aid* and partly to some schools within Municipal limits having been transferred to the control of Municipalities. In Punjab the saving is due partly to over-estimate, and partly to a vacancy in the appointment of the Principal, Mayo College. In Madras the estimate for primary education, the charges for which are rising annually, consequent on an order of Government requiring local bodies to spend on primary education all funds set free by the transfer to Government of charges for technical education, was pitched too high and resulted in the large saving shown under this head. Under *Grants-in-aid and Payments by Results*, there is a saving of 7,2, chiefly in Burma, Madras, and Bombay, counterbalanced by an excess in the Central Provinces. In the first two provinces the saving is due to payments on account of results-grants, grants to technical schools and salary—grants to certificated teachers not having been as high as anticipated. The saving in Bombay is nominal, as it represents transfers to the Public Works Departments (3,5) and to the adjusting heads Contributions from Provincial to Local (1,8), in connection with school buildings being constructed by Local Boards. The excess in the Central Provinces is due to the transfer to this head of expenditure on primary education as has been explained under *Government Schools*. The saving under *Scholarships* is chiefly due to the transfer of certain schools in the Central Provinces to the control of Municipalities, to over-estimate in Punjab, and to decreased payment on account of secondary and training schools in Bombay. Under *Other charges* the savings in the Central Provinces is due to the abolition of the Government Book Depôt at Nagpur, and in Bombay chiefly in the Purchase and Publication of Books for the Local Book Depôt. The excess in North-Western Provinces has been explained under *Inspection*.

223. The small increase in England is in respect of Indian Government scholars.

224. The variations in the Indian expenditure requiring explanation occurred almo st entirely under the head *Church of England*. The increase of 4,7 over the Budget and of 8,0 over the actuals of the previous year under this head are due chiefly to Exchange Compensation Allowance. In Bombay the charges were further enhanced by the presence on duty of a larger number of Chaplains; on the other hand there were savings in Burma consequent on the abolition of the Toungoo Chaplaincy, and some of the other appointments having remained vacant for a part of the year. The savings in Bengal also were larger than anticipated. *Allowances to Other Clergymen* were under-estimated in the Punjab.

225. The Indian expenditure shows an increase of 30,2 over the Budget Estimate, occurring chiefly in Bengal, North-Western Provinces, and Madras under nearly all the heads and being highest under *Medical Establishment* (19,0) of which the larger portion is on account of Exchange Cmpensation Allowance. Other reasons for excess under this minor head are, in Burma, the creation of the new District of Myaungmya, in the North-Western Provinces, increased expenditure under travelling allowance to Civil

Section D.—SALARIES AND EXPENSES OF CIVIL DEPARTMENTS—*continued.*

24.—Medical—*continued.*

Surgeons touring in their newly-sanctioned capacity of District Superintendents of Vaccination, and in Madras and Bombay, the presence on duty of a larger number of officers than anticipated. Under *Vaccine Establishments and Sanitary Commissioner* the accounts show a saving of 5,7 as compared with the Budget, and an excess of 5,0 over the actuals of the past year. In Central Provinces the provision for sanitary improvements was not fully utilised; in Burma the provision for a Sanitary Engineer was not utilised, as the appointment was not sanctioned during the year; and in Madras, the Budget was an over-estimate. These savings are partly counterbalanced by excesses in India, Bengal, and North-Western Provinces. Payment of Exchange Compensation Allowance, and of allowances to Dr. Haffkine for cholera inoculation experiments, account for the small increase in India; that in Bengal is due to an over-estimate of the probable savings, and the excess in North-Western Provinces is due chiefly to purchase of tents for District Superintendents of Vaccination. In Bombay the charge for Exchange Compensation Allowance absorbed a provision for special vaccination establishments which was not utilised. The excess under *Medical Colleges and Schools*, besides being due to Exchange Compensation Allowance, is accounted for by large payments on account of scholarships and stipends in Bengal and Madras, high contingent expenditure of medical schools in Bengal, and increased charges on account of cost of Europe stores and privilege leave in Madras. The saving in Punjab is due to an over-estimate and that in Bombay to the abolition of the chair of Clinical Medicine in the Grant Medical College. The increase under *Government Hospitals and Dispensaries* occurs chiefly in Bengal, and is due chiefly to adjustment under this head of the salaries of reserve medical subordinates provided for in the original Estimate under "Medical Establishments," and to the charges for diet and clothing of patients having been unusually high; the excess in Assam is attributable to the opening of new dispensaries; that in Madras is owing to revision of Establishment and increased expenditure on dieting, which is increasing with the increase of patients; the high figure in the North-Western Provinces is accounted for by increased charges on account of salaries of Assistant Surgeons and new grants to Female Hospitals and other dispensaries; the saving in Bombay occurs chiefly under supplies and services and contingencies of the Presidency Hospital. The actuals of past year in Bombay include some special charges such as purchase of furniture for St. George's Hospital and expenditure on water-supply to Jamsetji Jijibhoy and Kama Hospitals. Under *Lunatic Asylum* the increase in India is chiefly on account of diet of lunatics in the Mysore Assigned Tracts sanctioned after the Revised Estimates had been framed, and in Madras anticipated savings under salaries were not realized. These excesses are almost counterbalanced by savings in Assam and Bombay under Supplies and Services. Absence of epidemics in the Central Provinces accounts for decrease under *Grants for Medical Purposes*, the increase in Burma is due to transfer of management of certain dispensaries to Municipalities and payment of fixed grants, and the excess in Madras is accounted for by the grant to the Victoria Caste and Gosha Hospital. Under *Other Charges* the excess in North-Western Provinces is due to the appointment of an Assistant Chemical Examiner and to additional grants sanctioned by Government for science apparatus and furniture for the laboratory of the Chemical Examiner.

226. The expenditure in England does not call for explanation.

227. The charges in India show an excess of 129,5 over the Budget Estimates, and of 123,2 over the actuals of the previous year. The excess over the Budget Estimate is almost wholly in *India*, chiefly under *Political Subsidies*, 91,1 on account of increased payment to His Highness the Amir of Afghanistan under the new agreement and for arrears due, and under *Other Charges* for special political missions of Herat and Kabul, exploration of the Borkhampti country and Afghan Border Demarcation charges, amounting in all to 22,4. There is also an excess of 15,8 chiefly in the first minor head on account of Exchange Compensation Allowance.

228. Under *Political Agents* the increase is due, apart from Exchange Compensation Allowance, in India chiefly to increased travelling expenses in Baluchistan, counterbalanced by savings under salaries due, to the appointment of junior officers on lower pay in place of officers on leave, and in Punjab to want of provision for increase of salary to the Resident in Kashmir, to arrear payment of salaries of officers attached to the Gilgit Political Agency, and to adjustment of salary and other charges of the Special Assistant in Kashmir for Chinese affairs, for which provision was made under *Other Charges*. The saving in Assam is due to short expenditure under "Transport and Commissariat Establishment." The high figures of 1892-93 in this province are accounted for by the quasi-military operations in the North Lushai Agency and those in Madras by the charges incidental to His Excellency the Viceroy's visit. The excess over the actuals of the previous year in Punjab is due to Exchange Compensation Allowance and to charges for the Gilgit Political Agency as explained above.

229. There are savings both in India and Punjab under *Charges on the North-Western Frontier.* Those in India are 8 in Zhob Levy Corps, 6 in Kelat, 2 in South-Eastern Baluchistan, 1,7 on account of the appointment of the Agent, Governor General, Khorassan and Seistan having been temporarily vacant, 4 on account of the appointment of a junior Medical Officer in the Khorassan Agency and 7 on account of minor variations. In Punjab the saving was due chiefly to the grant for guarding hill passes not having been fully utilised.

230. The increase under *Political Subsidies* has been explained above.

Section D.—SALARIES AND EXPENSES OF CIVIL DEPARTMENTS—*continued.*

25.—Political—*continued.*

231. The excess under *Entertainment of Envoys and Chiefs* is due in Burma to expenditure incurred on account of the Viceroy's visit in Punjab to an under-estimate and in Bengal, the charges incurred in the South Lushai Hills, provided for under this head, were adjusted under *Other Charges*. The heavy expenditure in 1892-93 was on account of the visit of the Prime Minister of Nepal.

232. The decrease under *Durbar Presents and Allowances to Vakeels* as compared with the Budget, is due chiefly to savings in India, Bengal, and Punjab, partly counterbalanced by excesses in Central Provinces, Burma, and Bombay. In India the Budget was an over-estimate; in Bengal the Estimate which was based on the normal expenditure of previous year proved to be too high, the charges of this and the previous year being unusually low, and in Punjab the grant was not fully utilised. The excess in Central Provinces represents expenditure incurred in connection with the installation of the Feudatory Chiefs in the Chhatisgarh Division, which was not anticipated when the Budget Estimate was framed; that in Burma is due to the Viceroy's visit, and that in Bombay to expenditure in connection with a Durbar held at Ahmedabad, and for purchase of horses for the Rajah of Kolhapur in connection with his installation.

233. Under *Refugees and State Prisoners* the Bengal expenditure of 1892-93 is on account of Burmese prisoners at Hazaribagh. The saving in Bombay is due to the lapsing of certain allowances owing to the holders having returned to Afghanistan.

234. The excess under *Other Charges* occurs chiefly in India, Burma, and Bengal. In India it is due to special political expenditures of 3,3 on account of Herat Mission, 15,6 for Kabul Mission, 1,0 for exploration of the Borkhampti country and 2,5 on Afghan Border Demarcation charges. There has also been an increase of 1,2 on account of Exchange Compensation Allowance, under charges for organisation of Imperial Service Troops which was however covered by a saving of 1,8 under Secret Service. The charges for Kengtung Kencheng Mission, extra military expenditure in connection with the Anglo-Siamese Boundary Commission and heavier miscellaneous expenses to frontier expeditions, in Burma, and in Bengal, the continued employment of Mr. Paul, on special duty in connection with the Sikkim negotiations, were not anticipated, and caused the excesses in these provinces. In Punjab the saving under this head, consequent on the transfer to the head *Political Agents* of charges on account of the Chinese Turkestan Mission, has not been sufficient to meet the charges connected with the administration of the Kurram country.

235. The sterling expenditure in England practically agrees with the Budget Estimate.

236. The Indian expenditure exceeded the Estimates by 18,7 and the actuals of the previous year by 23,8, owing to fluctuations in several heads, notably *Survey of India* and *Cinchona Plantations*. *Census charges* decreased considerably in the year under review, but yet proved higher than was anticipated.

Section D.—SALARIES AND EXPENSES OF CIVIL DEPARTMENTS—*continued.*

26.—Scientific and other Minor Departments—*continued.*

237. The excess under *Survey of India* is due to the payment of Exchange Compensation Allowance, and to recoveries on account of mathematical instruments and maps supplied to other Governments and Departments having been less than estimated by 5,2. Under *Geological Survey* an excess of 1,0 on account of Exchange Compensation Allowance and appointment of Inspector of Mines, is more than covered by the savings under establishment and travelling allowance. In the *Meteorological Department* the increase is due chiefly to heavy telegram charges largely in connection with the Madras daily weather reports, and to privilege leave of the Meteorological Reporter. In the *Archæological Department* the saving, as compared with the Budget Estimate, is due to a provision of 1,5 in India for Dr. Burgess's work for publishing reports on Archæology not being utilised, and to the charges in connection with the deputation of Messrs. Fisher and Oertel not having been finally brought to account in Burma in the year under review, partly counterbalanced by heavier travelling allowance and contingent expenses in Madras than were provided for. Under *Museums*, the provision of 1,7 for the Reay Industrial Museum in Bombay was not utilized. Under *Other Scientific Departments* the variations in Burma are due to the termination of tin mining operations in the Mergui Districts in May 1893, and to the donation to the Agricultural Society, provided for under this head, having been taken against *Botanical and other Public Gardens*. The India figure is on account of donations to Scientific Societies.

238. Under *Experimental Cultivation* the saving in India is due chiefly to expenditure to the extent of 1,8 against the miscellaneous grant of the Revenue and Agricultural Department, being adjusted under other heads in accordance with the orders of the Government of India, and in Burma the Estimates proved a little too high. In the Punjab, provision was made in the Revised Estimate for water-supply to the Bruceabad Farms, but the expenditure was not incurred to the extent anticipated. Under *Cinchona Plantations* the large expenditure in Bengal is due to payment of 5,0 to Messrs. Kilburn & Co., as the first instalment of the purchase-money of the Nimbong Cinchona plantation, and to purchase of quinine (1,6); the saving in Madras is in working expenses and cost of Europe stores. Under *Public Exhibitions, and Fairs* heavy charges were incurred in North-Western Provinces, in connection with the Magh mela at Allahabad, but in the Punjab, the expenses on account of the Lahore Exhibition did not prove as high as anticipated in the Revised Estimate.

239. Under *Veterinary and Stallion Charges*, the excess over the Estimate in the Punjab is due to an increase in the local charges which was not sufficiently allowed for in the Budget Estimate, and that over the actuals of the previous year to the appointment of new officers in the Civil Veterinary Department, in addition to the above. The absence of pony-breeding charges for which the Budget provided, mainly accounts for short expenditure in Madras. The excess in India, and the saving in Bombay, are due to charges (3,6) of the Assistant Inspector-General and Imperial Bacteriologist having been adjusted in the India, though provided for in the Bombay Estimates. The excess in Bengal over the previous year is due to the establishment of a veterinary school at Belgachia.

240. An *Inspector of Factories* was provided for in Bombay, but no officer was appointed during the year. Under *Provincial Statistics* the Madras Estimates under charges for Trade Returns and for expenditure in connection with the revision and republication of District Manuals proved a little too high, these causes also account for the difference in the actuals of the two years. The variations under *Other Statistical Charges* are almost wholly on account of the census operations; in Bengal the payment of a moiety of the cost incurred by the Calcutta Municipality in connection with the census operations at Calcutta, was sanctioned after the framing of the Estimates. Under *Miscellaneous* there was in Punjab special refund of 1,1 from the Local Fodder and Fuel Reserve Fund in the Rohtak District and examination charges in Madras were higher, owing chiefly to the Higher Examination for women having been held a second time in May 1893, and to the larger remuneration paid in connection with the Local Secondary and Primary School Examinations.

241. In the expenditure in England, there was a saving due to the demand for stores having been less than was provided for in the Estimates.

Section E.—MISCELLANEOUS.

1892-93. Accounts.		Budget.	1893-94. Revised.	Accounts.
877,0	RECEIPTS	982,9	960,9	999,1

242. The receipts exceeded the Budget Estimate by 16,2 and the actuals of the previous year by 122,1. Compared with the Budget Estimate there was a falling off of 73,1 under Gain by Exchange, due to smaller net withdrawals in India of the Subsidised and other Railway companies, but this was more than counterbalanced by larger Receipts in aid of Superannuation, due to increased recoveries from the Hyderabad Assigned Districts and to the extension of the Indian Service Family Pension Regulations to Marine officers, and larger Miscellaneous receipts due to large recoveries on account of Insurance and Departmental charges on English stores, exceptionally high partition fees in Bengal, and larger receipts from premium on bills. The increase, compared with the actuals of the previous year, was furnished mainly by Gain by Exchange (87,2), the miscellaneous remittance transactions having involved a greater loss in 1892-93 in consequence of a heavy fall in the rate of exchange during that year. Larger contributions from Hyderabad Assigned Districts under Receipts in aid of Superannuation and higher receipts from partition fees under Miscellaneous also contributed to the excess.

243. As noticed in last report, *Subscriptions to the Military, Military Orphan, and Medical Retiring Funds* are declining every year owing to retirement and death of old subscribers, the Funds being closed to new entrants. During the year the subscriptions were for the first time adjusted finally in the respective provinces, where they were realised instead of in India, Madras, and Bombay as before. This led to a decrease in India and an increase in the other provinces in the Bengal Presidency. The increase in Bengal was, however, nearly swallowed up by a decrease in the net receipts of the Orphangunj

Section E.—MISCELLANEOUS—*continued.*

XXII.—Receipts in aid of Superannuation, Retired, and Compassionate Allowances—*concluded.*

Bazar at Kidderpore. The Estimates in Madras and Bombay were pitched too low, and in Bombay there were also some large special payments by retired officers residing in Europe. The actuals of the previous year included some large repayments of loans in Madras.

244. Under *Subscriptions to the Civil Funds* the receipts from deductions from Exchange Compensation Allowance led to a general increase in most of the provinces, which was still further augmented in India by the realization of heavy fines from subscribers.

245. Under *Contributions for Pensions and Gratuities* the increase was greatest in India, being due partly to an under-estimate which was corrected in the Revised, and partly to increased contributions recovered from Berar revenues in respect of British officers employed in the Hyderabad Assigned Districts. Arrear contributions for officers lent to the Guna-Bina Railway account for the increase in Central Provinces, while an increased number of officers in Foreign service in Bengal and Bombay and of officers on duty with the South Indian Railway in Madras brought in large receipts in those provinces. In Upper Burma the Budget provided for the contributions of an officer lent to the Ruby Mines Company, but owing to his death, nothing was realised.

246. Under *Other Items* the only noticeable variation is an increase in the receipts in India, due to the extension of the Indian Service Family Pension Regulations to officers of the Marine Department.

247. In England the sterling receipts agree with the Budget Estimate.

248. The variations under *Receipts from Sale of Stationery* are mainly due to variations in the supply of stationery to State Railways. The falling off in Burma due to this cause has been partly counterbalanced by the receipts on account of the cost of forms supplied to Municipalities and Local Funds having been better than anticipated, and by a special receipt of 4 on account of the cost of paper supplied for the publication of Stevenson's Burmese-English Dictionary. In Bombay the cost of stationery supplied to the Berar administration was as large as in 1892-93, but the Budget for 1893-94 was framed on the actuals for 1891-92, which were considerably lower. The high figure for 1892-93 in Bengal was due to recoveries on account of stationery supplied in previous years.

249. Under *Sales of Gazettes and other Publications* there was an excess over both the Estimates for 1893-94 and the actuals for 1892-93, chiefly due to larger sales of Gazettes, Indian Law Reports, and Acts. The increase in Bengal may be ascribed to the printing of back numbers of the Indian Law Reports.

250. Under *Other Press Receipts* the falling off in India is due to over-estimate, and that in the Punjab to the anticipated receipts from lithographic printing at the Lahore Central Jail Press not having been fully realised. These decreases have been partly counterbalanced by increased receipts in Central Provinces, due chiefly to the large amount of printing work done at the Nagpur Central Jail Press for the quasi-commercial departments, in Bengal due to larger amount of printing work performed for Local Funds, Municipalities, etc., and in Madras due to supplies of printed forms to the East Coast Railway.

251. The total receipts fell short of the Budget Estimate by 73,1, but exceeded the actuals of the preceding year by 87,2. The rate of exchange fell from 14·98, the average of the previous year, to 14·55 in the year under review, against 14·75 adopted in the Budget Estimate and 14·6 in the Revised. Compared with the previous year there was thus a fall in the rate of exchange of ·43*d* in the rupee, which consequently widened the difference between the average and the contract rates with the several Subsidised Railway Companies. This, coupled with a heavy increase in the withdrawals in India on capital account augmented the gain on account of the Assam-Bengal Railway over that of the previous year. There was a similar but smaller increase in the case of the Southern Mahratta and Mysore Railways, but in the case of the other Railways, specially the Bengal-Nagpur Railway, there was a large decrease owing to the amount of withdrawals being much less than in 1892-93. As regards the transactions adjusted through the Remittance Accounts with England, there was a considerable decrease in the net loss by exchange involved by them. The decrease is most noticeable in the case of the East Indian Railway advances, and the family and other miscellaneous remittances which are adjusted at the official rate of exchange, mainly because the difference between the official and the average rates of the year was only ·1*d.* in the rupee against 1·77*d.* in the rupee in the previous year. The family remittances were also smaller in amount, owing to the withdrawal of the privilege of making these remittances at a favourable rate from non-domiciled European officers who were granted Exchange Compensation Allowance. As compared with the Budget Estimate, there was a decrease in the gain in connection with the transactions of the Subsidised Railways, owing to the withdrawals for capital expenditure in this country having been considerably smaller than anticipated, but the decrease due to this was to some extent counterbalanced by the slight fall in the rate of exchange. In the case of the Remittance transactions, the Budget Estimate did not provide for any loss due to the difference between the average and the official rates, as the average rate was taken at the official rate. Owing to the fall in the average rate there has, therefore, been an increase in the estimated loss on these transactions, which would have been much larger but for the stoppage of family remittances mentioned above.

252. The increase under *Gain by Exchange* is due, in India, to a rise in the market rate for the conversion of Hali Sicca Rupees, and in Bombay to the purchase, at a favourable rate, of Dollars at Aden for the payment of pensioners and for Durbar presents. Under *Premium on Bills* the improvement is due generally to the extension of the system of drawing off surpluses by means of Supply Bills; in Burma there was a large increase, in the sales of telegraphic transfers in Lower Burma, and in Upper Burma,

Section E.—MISCELLANEOUS—*continued.*

XXV.—Miscellaneous—*concluded.*

of bills drawn by Mandalay on Mogok and Rangoon; in the Punjab there was a large demand for Supply Bills on Calcutta and Bombay; but the most important increase occurred in Bombay, due partly to an unprecedented demand for bills on Bijapur, Dharwar, and other District Treasuries consequent on a good cotton and seed crop, which required a large amount of coin for financing and partly to larger sales of telegraphic transfers on Calcutta and Madras in connection with the payment of Rs. 1,76,00,000 to the Exchange Banks for the silver bullion, received from them after the closure of the Mints, which the Banks in great part remitted to Calcutta and Madras. The head *Unclaimed Deposits* is liable to considerable fluctuations; a heavy falling off in Bengal and the North-Western Provinces was to a great extent counterbalanced by an abnormal rise in Assam, chiefly in the Sylhet District; the actuals of 1892-93 in Bombay included some special adjustments in connection with some old outstanding items of the Bombay Small Cause Court, and a special item of 1,2 on account of unclaimed Civil Court Deposits; there were some special receipts in 1893-94 also, but they were smaller. Under *Miscellaneous Fees, Fines, and Forfeitures* the excess has been contributed chiefly by Bengal, due to exceptionally high partition fees, specially in the closing months of the year.

253. Under *Government Audit Fees* the excess in India is partly on account of increased commission on sale and purchase of Government Securities, and partly on account of increased audit fees. In Bengal the receipts were higher in 1892-93 on account of arrear and advance recoveries.

254. Under *Contributions* the slight increase in Central Provinces is due to the realisation of contributions from the Feudatory States towards the payment of the local allowance to the Political Agent, and also to meet the cost of establishment attached to the Office of the Commissioner, Chhattisgarh Division, for auditing the accounts of the Feudatory States. Under *Rent* the excess was contributed by several Provinces,—that in Upper Burma being due to receipts from Shan Poays (temporary Stalls) having been budgetted for under *Other Receipts*, and that in Bengal being partly on account of recovery of arrears, and partly on account of recovery of rent of the suburb Hastings, which occurred for the first time in 1893-94.

255. Under *Extraordinary Items* the Assam figure represents the fine recovered from the Manipur State, of which a larger instalment was recovered in 1892-93; the Punjab receipt was on account of recoveries in connection with the administration of the Kurram country, which were smaller than anticipated, and in Bombay the sale of certain plots of land provided for in the Budget not having been made, accounts for the low Revised Estimate, while an additional item of 1,4, recovered from the Bombay Port Trust on account of capitalised outstandings increased the actual receipts. The India figure of the previous year represents the value of confiscated property of the Manipur Chiefs, and that in the North-Western Provinces is composed chiefly of special credits on account of the capitalised value of abatement of land revenue, for land taken up for the Lucknow-Nilbhit and Cawnpur-Achnera Railways.

256. Under *Other Items* the high receipts in India are due, to a small extent, to increased recoveries from Berar officers of advances made to them in England, but chiefly to credits, which were higher than anticipated, for recovery of insurance and other charges on English stores, having been adjusted in the books of the Comptroller, India Treasuries, instead of the Accountant General, Bengal. The corresponding diminution in Bengal has been partly covered by special credits for rent and sale of B and C class Railway lands at Muzufferpur, for sale of elephants amounting to 2,6, and for amount (1,5) contributed by Government to the District Road Committee of Dumka for improvement of Government estates. In Bombay the increase over the Budget is due partly to improved customs and Zariba receipts in the revenues of Berbera and Bulhar owing to a prosperous coffee season in the Harrar District, and to a large demand for grain in the interior consequent on scanty rainfall, and partly to the sale-proceeds of the Nazars received at the Ahmedabad Darbar, and of the Bhadgaon farm in Khandesh.

257. Of the increase over the Budget Estimate in England, 1,3 is on account of the escheated estate of a person who died intestate, and the remainder is due mainly to fines and penalties incurred by defaulting contractors. The higher figure of 1892-93 was due to a special receipt in that year for value of stores lost in transit to India.

Section E.—MISCELLANEOUS.

1892-93. Accounts.		Budget.	1893-94. Revised.	Accounts.
5,537,9	EXPENDITURE	5,538,1	5,619,1	5,646,9

258. The charges under this group exceeded the Budget Estimate and the actuals of the previous year by 108,8 and 109,0 respectively. Of these 39,0 and 75,6 occurred in exchange being due to a fall in the rate; the excesses would have been much larger but for savings amounting to 13,3 and 41,3 respectively in the sterling expenditure, resulting chiefly from a decrease in the absentee allowances of officers of the Covenanted Service and from pensions for more than 12 months having been paid in 1892-93 owing to the payment of pensions from that year monthly instead of quarterly as before. In Indian expenditure there were excesses of 83,1 and 74,7, due to the normal increase under Superannuation and Retired allowances owing to new pensions exceeding the lapses by death, and under Stationery and Printing charges, consequent on the growth of public business, and to an increase under Miscellaneous on account of the charges of the Indian Hemp Drugs Commission and the Royal Commission on Opium. These excesses were largely counterbalanced by a decrease under Territorial and Political Pensions due to lapses by deaths.

27.—Territorial and Political Pensions.

	Accounts	1893-94	22	14,2	36,2		Accounts 1893-94	508,4

259. As noticed in previous reports, the payments on account of *Territorial and Political Pensions* are decreasing year by year owing to lapses on the death of pensioners. In India the decrease has occurred in pensions through deaths in the Mysore family and in the family of the late Shah Gasi Ali Mahomed; in Central Provinces casualties amongst pensioners drawing Rs. 5,000 and under, and the stoppage of certain pensions by the Chief Commissioner account for the decrease; in Bengal sufficient allowance was not made for lapses, which occurred chiefly in the Nizamut family pensions; in the North-Western Provinces there were lapses by the death of certain members of the ex-Royal family of Oudh; in Madras there was a lapse of a part of the pension of Nawab Ahmad-un-nissa Begum of the Carnatic family, the remainder of the pension being assigned to her heirs; in Bombay the saving was due partly to His Highness Mir Ali Murad Khan of Khairpore having declined to accept his pension of 6,6, and partly to the transfer of a pension to the Bengal Presidency. In the Punjab there was a saving under this head owing to lapses but it was counterbalanced by an excess under *Charitable Allowances*, under which head there is also an excess in Burma, due partly to the transfer of a pension, and partly to the sanction of a new pension. The excesses in these two provinces were, however, more than made up by a saving in the North-Western Provinces.

260. The saving in England was due to the death of His Highness the Maharaja Dhuleep Singh, a smaller allowance having been made to the members of his family.

Section E.—MISCELLANEOUS—*continued.*

28.—Civil Furlough and Absentee Allowances.

1892-93. Accounts.		1893-94. Budget.	1893-94. Revised.	1893-94. Accounts.

Section E.—MISCELLANEOUS—*continued.*

29.—Superannuation Allowances and Pensions—*concluded.*

263. The total Indian expenditure shows an excess of 22,0 over the Budget Estimate and of 29,4 over the actuals of the previous year, almost wholly under the head *Superannuation and Retired Allowances.* The variation, as between the several provinces, is due partly to transfer of pensions from one province to another, and partly to *Pensions of the Military Funds* and *Medical Orphan and Medical Retiring Funds* being now adjusted in the provinces where they are paid instead of in India, Madras, and Bombay books as heretofore.

264. The charges for *Superannuation and Retired Allowances* continue to increase yearly owing to the amount of new pensions exceeding the lapses. The figures for the last five years are as follow:—

1889-90	721,8
1890-91	765,5
1891-92	792,6
1892-93	830,4
1893-94	863,5

265. The increase over the Budget Estimate is due mainly to sufficient allowance not having been made for the normal growth of the expenditure, specially in India. There were some arrear payments in the Punjab, and in Bombay the reduction in the Survey Department increased retirements, and was thus partly responsible for the excess.

266. Under *Compassionate Allowances* the decrease in Bombay is due to lapses of pensions from the Warden's Official Fund. Under *Gratuities* the Bengal figure includes a sum of 1,0 paid to Captain E. W. Petley for his loss of appointment as Port Officer, Calcutta.

267. The *Pensions of the Military Funds* are declining year by year, and in that under review there was a large decrease in Madras, the decrease in India being counterbalanced by an increase in the other Provinces of the Bengal Presidency, owing to the adjustment of these pensions in the provinces where they are paid instead of in India as before. Under *Pensions of the Civil Funds* two pensions were re-transferred during the year from England to Bombay, while the annuity paid in Madras terminated during the year. Under *Other Charges* there was no provision for refunds in Punjab.

268. In England an excess in the pensions of officers of the Uncovenanted Service, was nearly counterbalanced by a saving in the Military Fund pensions, owing to provision having been made in the Budget Estimate for a larger number of these pensions being drawn monthly instead of quarterly than has proved to be the case.

269. Under *Stationery Office at the Presidency* the excesses in Bengal and Madras and the saving in Bombay all occurred in the charges for conveyance of stationery.

270. Under *Purchase of Stationery* the charges in Bengal again exceeded the Budget Estimate. There would have been an excess in Bombay also as provided for in the Revised, owing to the purchase in India, from an Indian mill, of printing paper which used to be obtained before from England, but the excess did not occur, as some bills for stores received during the year were not submitted for payment within the year. The small saving, in Lower Burma, is due to country stationery charges of the smaller offices, which were provided for under this head, having been debited to the offices concerned.

271. The charges under this head have been steadily increasing, partly owing to the growth of public business and partly owing to the substitution of writing paper and other articles of Indian manufacture for those of European manufacture, in consequence of which almost the whole of the increase has occurred in the Indian expenditure, while that in England has remained practically stationary as will appear from the figures given below :—

	India.	England. Sterling.
1889-90	195,5	39,4
1890-91	218,9	44,5
1891-92	262,5	35,1
1892-93	268,9	46,5
1893-94	293,7	45,1

272. Under *Government Presses* the falling off in India, as compared with the actuals of the previous year and the Budget Estimate, is nominal, as a sum of 32,5 on account of printing work done for the Postal and Telegraph Departments has been shown, for the first time, in 1893-94, by deduction from this head, instead of being added to the minus entry under *Stationery supplied to the Postal and Telegraph Departments* as used to be done before; allowing for this, the expenditure would show an increase of 4,7 over the Budget, which occurred chiefly in the Central Press under overtime allowance, purchase of printing materials and postage. The expenditure in the other provinces also exceeded the Budget Estimate, as it did not provide sufficiently for the normal growth of the expenditure under this head.

273. Under *Stationery supplied from Central Stores* the charges were over-estimated in Bengal and the Punjab, and under-estimated in the Central Provinces, where the demands appear to have been specially high; and in Lower Burma and Madras where the demands of the Land Revenue, Registration, and Printing Departments were also specially high. The high charge in Bengal in the previous year is attributed to the expensive paper used for certain forms and registers, prescribed by the High Court for the use of the District Courts in Bengal.

274. Under *Stationery supplied to Postal and Telegraph Departments* the difference between the Budget Estimate and actuals is due partly to printing work done for these departments having been shown by deduction from the expenditure under *Government Presses*, as already mentioned, and partly to the supplies of stationery to the Post Office having been over-estimated as noticed under that head.

Section E.—MISCELLANEOUS—*continued*

30.—Stationery and Printing—*continued.*

275. The head *Other Charges* is necessarily fluctuating. In the Central Provinces the charges of the previous year were swelled by extensive printing work having been done by the Bombay Educational Press for the Commissioner of Settlements and Agriculture. In Bengal the printing work done at private presses for District and Local Boards proved to be smaller than anticipated, while in the North-Western Provinces and the Punjab it exceeded the anticipations in the Budget. In Madras there was an increase as provided in the Revised due to the printing of settlement registers, but this was nearly counterbalanced by savings in the grants sanctioned for the Government Astronomer and the Board of Revenue.

276. The demands for *Stores* from England were lower than budgetted for, but under *Other Charges* there was a small increase in the charges for printing for the India Office.

Section E.—MISCELLANEOUS—*continued.*

32.—Miscellaneous—*concluded.*

277. The Indian expenditure showed an excess of 27,7 over the Budget Estimate, which occurred chiefly under *Special Commissions of Enquiry*, owing to the appointment of the Indian Hemp Drugs Commission and the Royal Commission on Opium. The writing off in the North-Western Provinces of the balance of the advance for the Almora water-works, and of the loan granted to the Naini-Tal, Municipality for sanitary purposes, as well as a special payment of 4,3 under *Rents, Rates, and Taxes* in Bengal on account of arrear allowances, from December 1881 to March 1893, for the maintenance of the tomb of Khaja Anwar Sahib, also contributed to the excess.

278. Under *Allowances and Rewards* the only noticeable variation is the small saving in Upper Burma, due to fewer officers having appeared in the language examinations and earned the rewards. Under *Remittance Charges* the variations are small. The Budget in India, Burma, and Assam was an under-estimate, while in most of the oher provinces, notably in Bengal, it was placed too high. During the year there was a further decrease in the charges under this head owing to the extension of the system of drawing off surpluses by means of supply bills, and the receipts from premium on these bills (32,1) considerably exceeded the total expenditure under this head. The figures under these heads for the six years ending with 1893-94 are shown below :—

	Revenue from Premium on Bills.	Expenditure under Remittance Charges.
1888-89	22,7	29,4
1889-90	21,8	30,6
1890-91	22,3	24,6
1891-92	24,5	23,2
1892-93	24,2	24,0
1893-94	32,1	23,4

279. Under *Charitable Donations* the saving on the Budget was due chiefly to the non-utilisation of a grant in Bengal for the purchase of a site for the Leper Asylum. Bombay shows an over-estimate under *Rewards for Destruction of Wild Animals*. Under *Petty Provincial and Local Establishments* the Budget in Bengal was exceeded, owing partly to the adjustment under this head of the charges on account of the Khedda operations which were provided for under *Other Charges*, and partly to an under-estimate of Staging Bungalow charges. The excess was, however, nearly counterbalanced by savings in other provinces, specially in Burma, where the provision for Circuit House contingencies was only partially utilised, and there were savings in the pay of Conservancy and Bazar Establishments.

280. Under *Special Commissions of Enquiry* the charges incurred in the previous year were on account of the Police Commission in Bengal, Rampur and Wheeler Commissions in North-Western Provinces, and the Commission appointed to enquire into the working of the Deccan Agriculturists' Relief Act in Bombay, while those incurred in the year under review were on account of the Hemp Drugs Commission, and of a moiety of the cost of the Royal Commission on Opium. Under *Irrecoverable Loans written off* as mentioned already, the balance of the advance for the Almora water-works, and of the loan to the Naini-Tal Municipality for sanitary purposes were written off in the North-Western Provinces and Oudh, while under *Rents, Rates, and Taxes* the charges in Bengal were swelled, by an arrear payment of 4,3 on account of the tomb of Khaja Anwar Sahib from December 1881 to March 1893.

281. The amount shown under *Extraordinary Items* is on account of compensation paid for loss of property during the Manipur disturbance. Under *Other Items* the excess in India was due to the payment of a portion of the charges in connection with the visit of His Imperial Highness the Archduke of Austria Estè, and that in Bengal to a special payment of 1,2 on account of the capital cost and maintenance of the telegraph lines between Demagiri and Chittagong, and to larger payments of refunds, partly counterbalanced by a saving due to the transfer of the Khedda charges to *Petty Establishments*. There was, on the other hand, a saving in the Punjab, owing to a provision of 7,0 in the Budget as a Provincial reserve having been more or less appropriated to meet expenditure under other heads, and in Bombay owing to smaller repayments of loans by Local Funds.

282. In England there was an excess on account of stamp duty on India Bills, but this was partly counterbalanced by a saving in the expenses and allowances of candidates for the Civil Service of India.

Section F.—FAMINE RELIEF AND INSURANCE.

1892-93. Accounts.		Budget.	1893-94. Revised.	Accounts.
1,116,1	EXPENDITURE . . .	1,159,8	1,138,3	1,117,8

283. Both the Budget and the Revised Estimates provided for the full amount of 1,500,0 for the Famine Insurance Grant including the net charge on the revenues (shown under the Railway Revenue Account) on account of the Protective Railways constructed through the agency of companies, namely, the Indian Midland and the Bengal-Nagpur Railways, but the actual charges debitable to the grant amounted to 1,489,6, chiefly owing to smaller expenditure on Famine Relief. As the year closed with a heavy deficit, it was considered unnecessary to show the unspent balance of the grant under Reduction of Debt.

284. The following statement shows how the above sum of 1,489,6 was applied :—

Famine Relief and Insurance.

1892-93. Accounts.		Budget.	1893-94. Revised.	Accounts.
70,8	Famine Relief	40,5	2,8	5
984,5	Construction of Protective Railways	1,054,3	1,079,7	1,060,9
60,8	Construction of Protective Irrigation Works . . .	65,0	55,8	56,4
1,116,1	TOTAL .	1,159,8	1,138,3	1,117,8

Railway Revenue Account.

253,7	Net charge on account of Indian Midland Railway .	223,5	248,3	275,2
130,2	" " " Bengal-Nagpur Railway .	116,7	113,4	96,6
383,9	TOTAL .	340,2	361,7	371,8
1,500,0	**GRAND TOTAL** .	1,500,0	1,500,0	1,489,6

33.—Famine Relief.

17,2	India	...	...	...
1	Burma, Upper	...	...	...
28,7	Bengal	10,0	2,5	3
24,4	Madras	30,0	3	2
4	Bombay	5	...	...
70,8	TOTAL .	40,5	2,8	5

285. In 1892-93 large expenditure was incurred in the relief of distress in Ajmere-Merwara in India, in Durbhanga in Bengal, and in the Madras Presidency. In 1893-94 provision was made for charitable relief in Bengal and Madras, but only a small expenditure was incurred, in Madras on account of honoraria sanctioned to Local Fund Engineers employed during the distress in previous years and in Bengal in the relief of distress in Backergunge and Tipperah.

34.—Construction of Protective Railways.

1892-93. Accounts.		Budget.	1893-94. Revised.	Accounts.
984,5	EXPENDITURE	1,054,3	1,079,7	1,060,9

286. This head includes a portion of the capital expenditure on Railways and Irrigation. The total expenditure and the manner in which it has been distributed under the various heads, is shown in para. 444; the amount charged here is the total expenditure on the three railways mentioned below, which are the only state lines which can be classed as Protective.

34.—Construction of Protective Railways—*continued.*

2,2	Exchange	...	1	1

287. The decrease in the expenditure in 1893-94, as compared with that of 1892-93, was chiefly due to the approaching completion of the Rushikulya project in Madras. The decrease, as compared with the Budget Estimate, was due partly to the Nawadand aqueduct of the Swat river canal in the Punjab for which provision was made in the Budget Estimate, having been postponed, and partly to heavy rains up to the middle of November 1893 having retarded the progress of work on the Rushikulya project.

Section G.—CONSTRUCTION OF RAILWAYS (charged against Revenue in addition to that under Famine Insurance).

1892-93. Accounts.		Budget.	1893-94. Revised.	Accounts.
339,5	EXPENDITURE	75,1	77,1	73,9

The following are the details:—

1892-93. Accounts.		Budget.	1893-94. Revised.	Accounts.
	IMPERIAL.			
	MADRAS—			
201,2	East Coast Railway	...	...	...

	BOMBAY—			
42,2	Hyderabad-Umarkot Railway	6,3	8,2	7,6
138,3	TOTAL PROVINCIAL	75,1	77,1	73,9
339,5	GRAND TOTAL	75,1	77,1	73,9

288. Under *Imperial* in 1892-93 was shown the balance of the Capital Expenditure on State Railways in excess of the amounts recorded under "Capital Expenditure not charged to Revenue" and "Construction of Protective Railways." No expenditure has been charged to this head in 1893-94.

289. Under *Provincial* the decrease, as compared with the actuals of the previous year, is 64,4. The smaller expenditure on the Mayavaram-Mutupet and the Hyderabad-Umarkot Railways is due to the completion of works.

Section H.—RAILWAYS.

290. The following is a general statement of the Revenue Account :—

1893-94.	State Railways.	Guaranteed Railways.	Subsidised Companies.	Miscellaneous.	TOTAL.
GROSS RECEIPTS . .	16,879,1	6,461,1	34,1	..	23,374,3
WORKING EXPENSES.	7,779,1	3,077,3	...	...	10,856,4
Surplus Profits . .	484,9	571,2	...	...	1,056,1
Interest . . .	6,483,9	3,557,5	2,8	...	10,044,2
Annuities . . .	2,797,5	...	...	...	2,797,5
Land and Supervision	...	34,0	18,2	...	52,2
Miscellaneous Railway Expenditure . .	...	...	...	103,4	103,4
TOTAL EXPENDITURE	17,545,4	7,240,0	21,0	103,4	24,909,8
NET GAIN OR LOSS TO THE GOVERNMENT—					
1893-94 . .	*—666,3*	*—778,9*	+13,1	*—103,4*	*—1,535,5*
1892-93 . .	*—1,041,2*	*—805,6*	*—11,1*	+10,9	*—1,847,0*
1891-92 . .	+109,5	*—333,2*	*—1*	*—92,0*	*—315,8*
1890-91 . .	*—387,4*	*—145,9*	*—4,8*	*—149,2*	*—687,3*
1889-90 . .	*—983,9*	*—699,5*	*—20,1*	*—149,1*	*—1,852,6*

291. These figures show that *State Railways* did better than in 1892-93 by 374,9. Under Receipts there was a marked increase in passenger traffic, while the traffic in wheat and seeds was also more favourable than in the previous year. The receipts from general traffic on most of the railways also show an increase in 1893-94. As regards expenditure, there was an increase in working expenses and in surplus profits paid to Companies due to the larger traffic. The exchange on interest and annuities paid in England was 180,1 more than in the previous year, chiefly due to the fall in exchange.

292. The *Guaranteed Railways* also did better than in the preceding year by 26,7. The increase in the net traffic receipts amounting to 139,4 has done little more than cover the increase 109,6 in the charges for interest due to the fall in exchange.

293. The net loss to Government on the Revenue Account of Railways during the last few years, as shown above, has been considerably affected by the fluctuations in the rate of exchange. If the rate had not varied from that of 1886-87 the amounts of net loss or gain would have been as shown below :—

	State Railways.	Guaranteed Railways.	Subsidised Companies.	Miscellaneous.	TOTAL.
1893-94 . .	+316,6	*—188,9*	+13,1	*—103,4*	+37,4
1892-93 . .	*—234,1*	*—321,7*	*—11,1*	+10,9	*—556,0*
1891-92 . .	+315,5	*—210,2*	*—1*	*—92,0*	+13,2
1890-91 . .	*—552,5*	*—262,0*	*—4,8*	*—140,2*	*—968,5*
1889-90 . .	*—746,0*	*—529,6*	*—20,1*	*—149,1*	*—1,444,8*
1888-89 . .	*—991,1*	*—682,1*	+14,7	*—70,6*	*—1,729,1*
1887-88 . .	*—1,002,0*	*—811,4*	*—18,8*	*—51,8*	*—1,884,0*
1886-87 . .	*—375,1*	*—675,6*	*—43,6*	*—94,4*	*—1,188,7*

294. The opening of the Frontier lines and the commencement of the Bengal-Nagpur Railway increased the net loss considerably in 1887-88; but since then the loss steadily decreased year by year to the end of 1891-92, when the growth of the revenue received a check owing to a falling off in the export traffic in wheat. In 1893-94 the revenue shows a considerable improvement over that of the previous year, and but for the fall in exchange, the results would have been a net gain to Government.

Section H.—RAILWAYS—RECEIPTS.

1892-93. Accounts.		1893-94. Budget.	1893-94. Revised.	Accounts.
19,077,1	RECEIPTS . .	19,551,7	20,206,5	20,297,0

295. The following are the items comprised in this group. Particulars of them are given in the succeeding statements :—

1892-93. Accounts.		Budget.	1893-94. Revised.	Accounts.
15,814,8	State Railways (gross) .	16,291,5	16,775,3	16,879,1
3,244,4	Guaranteed Railways (net) .	3,235,0	3,397,5	3,383,8
17,9	Subsidised Companies .	25,2	33,7	34,1
19,077,1		19,551,7	20,206,5	20,297,0

296. *State Railways.*—The gross receipts are 1,064,3 more than those of the previous year. The principal improvements are on the East Indian and the North-Western Railways, and there is also an appreciable increase on the Southern Mahratta, the Bengal-Nagpur, the Rajputana-Malwa, the Eastern Bengal, and the Oudh and Rohilkhand Railways.

297. On the East Indian, the Rajputana-Malwa, and the Oudh and Rohilkhand Railways, the increase is chiefly from pilgrim traffic. The wheat traffic on the North-Western Railway was larger than in the previous year, and the traffic in oilseeds was also favourable. On the Southern Mahratta Railway, the traffic in raw cotton, oilseeds, rice and wheat shows a marked improvement, and passenger traffic also shows a steady development. On the Bengal-Nagpur Railway the improvement is in through passenger traffic attributed to an accelerated train service, and in goods traffic due to general development. On the Eastern Bengal Railway the increase is due to an improvement in passenger traffic, and to the opening of the Barsoe-Kissengunge branch.

298. Compared with the Budget Estimate, there is an improvement of 587,6, of which the East Indian Railway contributes 172,6, owing to a large pilgrim traffic, the North-Western Railway, 231,5, owing largely to improved traffic in wheat and oilseeds, and the Rajputana-Malwa Railway, 97,6, owing to steady development of passenger traffic and to traffic in oilseeds.

299. The increase of 103,8 over the Revised Estimate is due to the traffic on the North-Western and Bengal-Nagpur Railways having proved better towards the close of the year than was expected.

300. *Guaranteed Railways.*—The net receipts are 139,4 above those of the previous year. The traffic on the Bombay, Baroda and Central India Railway was better than in the previous year, the improvement being chiefly in passenger traffic and oilseeds; and on the Madras Railway there was also an increase in passenger traffic, and in the traffic in coal, cotton, and grains. On the Great Indian Peninsula Railway the traffic shows a falling off due chiefly to smaller exports of wheat.

* Net receipts.

Section H.—RAILWAYS—RECEIPTS—*continued.*

STATE RAILWAYS—IMPERIAL.

East Indian Railway.

1892-93. Accounts.	Earnings—	Budget.	1893-94. Revised.	Accounts.
1,547,4	Coaching	1,550,0	1,720,0	1,725,2
3,286,7	Goods	3,310,0	3,330,0	3,327,4
54,8	Miscellaneous and Suspense	90,3	70,3	70,3
4,888,9	Total .	4,950,3	5,120,3	5,122,9

* 301. The receipts during the year are 234,0 and 172,6 in excess of those of the previous year and the Budget Estimate respectively. The increase is principally in coaching traffic, due to the large pilgrim traffic to and from Allahabad, Baidyanath, and Jagganath, as well as to riverside stations on the occasion of bathing festivals. Under Goods Traffic there was an increase in the receipts from cotton, linseed, and other seeds.

Eastern Bengal Railway.

Including Provincial Share.

1892-93. Accounts.	Earnings—	Budget.	1893-94. Revised.	Accounts.
405,4	Coaching	400,0	442,6	442,0
678,0	Goods	685,0	717,1	717,5
99,6	Miscellaneous and Suspense	95,0	100,3	90,0
1,183,0	Total .	1,180,0	1,260,0	1,249,5

302. The receipts are better than those of the previous year and the Budget Estimate, owing chiefly to an improvement in passenger traffic and to the opening of the Barsoe-Kissengunge branch and the Bengal Dooars Railway. The decrease as compared with the Revised Estimate is due to the outstanding earnings at end of the year being larger than was anticipated.

Rajputana-Malwa Railway.

1892-93. Accounts.	Earnings—	Budget.	1893-94. Revised.	Accounts.
612,5	Coaching	610,0	660,0	675,9
1,586,5	Goods	1,574,0	1,590,0	1,591,4
48,6	Miscellaneous and Suspense	26,0	30,0	40,3
2,247,6	Total .	2,210,0	2,280,0	2,307,6

303. The receipts are 60,0 more than those of the previous year. Under *Coaching* there is an increase of 63,4 due to a larger attendance at fairs, and to the movements of Hindu marriage parties. The traffic in oilseeds and general merchandise showed an increase, but this was nearly counterbalanced by a falling off in that in raw cotton, grains, salt, and sugar traffic. The increase over the Budget Estimate is due to heavy traffic in oilseeds, to a steady development of 3rd class passenger traffic, and to the provisional adjustment under this head of the Indian Midland Railway Company's share of interest charges on joint works at Agra. The last two of these causes also account for the increase over the Revised Estimate.

North-Western Railway.

1892-93. Accounts.	Earnings—	Budget.	1893-94. Revised.	Accounts.
920,9	Coaching	940,0	950,0	955,0
1,619,9	Goods	1,810,0	1,966,5	1,989,6
29,1	Miscellaneous and Suspense	50,0	63,5	86,9
2,569,9	Total .	2,800,0	2,980,0	3,031,5

Section H.—RAILWAYS—RECEIPTS—*continued.*

North Western Railway—*concluded.*

304. Compared with the actuals of the previous year, the receipts are more by 461,6. The increase in coaching traffic (34,1) is due to a general improvement in 3rd class passenger traffic, which had suffered in the previous year owing to a sickly season and a bad harvest. The wheat crop of 1893 was better than in 1892, and the traffic in this commodity as well as in oilseeds contributed largely to the increased receipts (369,7) under Goods Traffic. The Budget Estimate provided for a moderate improvement over the unfavourable results recorded in 1892-93, but owing to the causes stated above, has been exceeded by the actuals by 231,5. The Revised Estimate has been exceeded by 51,5, owing to the traffic in the latter part of February and March having been more favourable than was expected.

Oudh and Rohilkhand Railway.

1892-93. Accounts.		Budget.	1893-94. Revised.	Accounts.
	EARNINGS—			
368,1	Coaching	380,0	392,5	396,0
442,6	Goods	452,5	450,0	467,8
35,2	Miscellaneous and Suspense	37,5	36,5	34,2
845,9	TOTAL	870,0	885,0	898,0

305. The receipts are in excess of those of the previous year by 52,1, due to the movements of passengers in connection with *melas*, to the new traffic over the Lucknow-Rae Bareli section, to the steady growth of 3rd class passenger traffic, and to increased receipts from carriage of material for the Bareilly-Rampur-Moradabad Railway. The last two causes caused the actuals to exceed the Budget Estimate by 28,0, while the Revised Estimate did not fully anticipate the traffic towards the close of the year.

Bengal-Nagpur Railway.

1892-93. Accounts.		Budget.	1893-94. Revised.	Accounts.
	EARNINGS—			
113,8	Coaching	115,0	131,5	136,3
449,4	Goods	495,0	463,2	482,4
40,1	Miscellaneous and Suspense	40,0	55,3	62,2
603,3	TOTAL	650,0	650,0	680,9

306. Compared with the actuals of the previous year, there is an improvement under all the heads of earnings. The increase in *Coaching* is attributed to the further acceleration of the train service, which has attracted through passengers between Bombay and Calcutta, and to pilgrim and coolie traffic. The increase in *Goods* is ascribed to the large export of linseed, and to the traffic in limestone and wooden sleepers for other railways. Compared with the Budget Estimate, the improvement in Coaching traffic is due to the breaking up of the fair at Jagganath, as owing to the opening of the Sambalpur extension the line has been more used by pilgrims; but the goods traffic shows a falling off owing to bad harvests in the Chattisgurh and other districts. The Revised Estimate has been exceeded by 30,9 owing to an improvement towards the close of the year, specially in the traffic in coal from the Umaria Colliery, in piece goods, sleepers, firewood, bamboos, and limestone.

Bengal and North-Western and Tirhoot Railway.

1892-93. Accounts.		Budget.	1893-94. Revised.	Accounts.
	EARNINGS—			
204,9	Coaching	200,0	208,3	205,6
272,1	Goods	276,0	261,7	251,5
61,4	Miscellaneous and Suspense	54,0	65,0	67,0
538,4	TOTAL	530,0	535,0	524,1

307. The receipts are less than the Budget Estimate and the actuals of the previous year by 5,9 and 14,3 respectively owing to a falling off in goods traffic in consequence of a poor harvest and to a temporary stoppage of traffic on the Bairagnia branch owing to floods.

Section H.—RAILWAYS—RECEIPTS—*continued.*

Indian Midland Railway.

1892-93. Accounts.		Budget.	1893-94. Revised.	Accounts.
	EARNINGS—			
198,8	Coaching	200,0	210,0	207,0
282,6	Goods	304,6	283,9	289,3
—37,0	Miscellaneous and Suspense	—37,1	—38,9	—63,9
444,4	TOTAL	467,5	455,0	432,4

308. The coaching traffic shows a small improvement due to the growth of traffic along the system. The traffic in wheat and food-grains shows a large falling off, while the traffic in oilseeds has increased, and there have been substantial increases in the traffic in cotton and piece goods, and in materials carried for the construction of the Bina Guna and Bhopal-Ujjain Railways; but owing to a dispute as to rates, the freight due on the material for the Bina Guna Railway was not paid before the close of the year, and the total receipts have consequently fallen short of both the estimates and the actuals of the previous year.

Southern Mahratta Railway.

1892-93. Accounts.		Budget.	1893-94. Revised.	Accounts.
	EARNINGS—			
201,7	Coaching	215,5	208,0	213,4
263,0	Goods	275,0	357,5	354,7
—1,6	Miscellaneous and Suspense	9,5	4,5	8,9
463,1	TOTAL	500,0	570,0	577,0

309. Compared with the actuals of the previous year, the receipts are more by 113,9. The increase under *Coaching* is due to general development of passengers, luggage and parcels traffic and that under *Goods* to a large development in the traffic in raw cotton and oilseeds, while the traffic in rice and wheat shows a marked improvement. The increase, as compared with the Budget Estimate, is due to the improvement in the export traffic arising from better harvests.

South Indian Railway.

1892-93. Accounts.		Budget.	1893-94. Revised.	Accounts.
	EARNINGS—			
421,1	Coaching	444,7	396,2	402,8
353,4	Goods	350,0	350,0	358,6
23,1	Miscellaneous and Suspense	15,3	23,8	20,1
797,6	TOTAL	810,0	770,0	781,5

310. The decrease in the receipts, as compared with those of the previous year and with the Budget Estimate, is chiefly under *Coaching* Traffic, and is attributed to the interruption of traffic owing to extensive breaches caused by heavy rains in November 1893. The actuals exceeded the Revised Estimate owing to more favourable traffic towards the close of the year.

Other State Railways—Imperial.

1892-93. Accounts.	Budget.	1893-94. Revised.	Accounts.
522,7*	590,7	625,2	631,0

* Excludes Imperial share of the earnings of the Burma State Railway.

311. Compared with the actuals of the previous year, there is an increase of 108,3. The earnings of the open section of the Godhra-Rutlam Railway in 1892-93 were included in those of the Rajputana-Malwa Railway, but they are now recorded separately, and this accounts for an increase of 7,4. There is an increase of 5,0 on the Mu Valley Railway owing to the opening of the section of the line from Shwebo to Wuntho, of 7,2 on the Lucknow-Bareilly Railway owing to the opening of the Dudwa branch, and of 8,4 on the Mysore Railway due to general development of 3rd class passenger traffic and traffic in food-grains. The Dharmavaram-Mysore Frontier section of the Guntakal-Mysore Frontier Railway was opened for traffic during the year, and the earnings of the Guntakal-Dharmavaram section, which were treated as a part of the South Indian Railway in the previous year, have now been included with those of that section,

Section H.—RAILWAYS—RECEIPTS—*continued.*

Other State Railways—Imperial—*concluded.*

and these circumstances account for an increase of 29,2. The opening for traffic of a section of the East Coast Railway accounts for an increase of 75,0. On the other hand, there is a falling off of 28,7 in consequence of the amalgamation of the Patna-Gya Railway with the East Indian Railway.

312. The actuals are better than the Budget Estimate by 40,3, due to the opening of a section of the East Coast Railway and the Dudwa branch of the Lucknow-Bareilly Railway. The traffic on the Mysore Railway also continued more favourable than was anticipated, and shows an improvement of 7,1, while there has been a falling off of 6,9 on the Mu Valley Railway.

STATE RAILWAYS—PROVINCIAL.

Burma Railway.

1892-93 Accounts		1893-94. Budget.	1893-94. Revised.	1893-94. Accounts.
	EARNINGS—			
425,6	Coaching	710,0	622,5	333,2
283,2	Goods			273,1
6,4	Miscellaneous and Suspense			12,7
695,2*	TOTAL	710,0	622,5	619,0

* Includes Imperial share of the earnings of the Railway.

313. The receipts are 76,2 below those of the previous year, and 91,0 below the Budget Estimate, the decreases being due to the low price of paddy. It is also explained that the paddy season of 1893 was an early one, and that of 1894 a late one, which had the effect of throwing earnings that would ordinarily have come into the accounts of 1893-94 into the accounts of 1892-93 and 1894-95.

Other Railways—Provincial.

1892-93. Accounts.	Budget.	1893-94. Revised.	Accounts.
14,9	23,0	22,3	23,7

314. The increase over the actuals of the previous year is mainly on the Hyderabad-Umarkot Railway, which was open for eight months only in 1892-93.

XXVII.—Guaranteed Companies—Net Traffic Receipts.

ACCOUNTS, 1892-93. Gross Receipts.	Working Expenses.	Net.	GUARANTEED RAILWAY COMPANIES.	BUDGET, 1893-94. Gross Receipts.	Working Expenses.	Net.	REVISED, 1893-94. Gross Receipts.	Working Expenses	Net.	ACCOUNTS, 1893-94. Gross Receipts.	Working Expenses.	Net.	Guaranteed interest, 1893-94.	Percentage of charges on receipts.
1,435,2	579,4	855,8	Bombay, Baroda and Central India	1,400,0	560,0	840,0	1,515,0	547,5	967,5	1,518,1	539,8	978,3	689,3	35·56
3,887,5	1,951,2	1,936,3	Great Indian Peninsula	3,960,0	2,000,0	1,960,0	3,930,0	2,020,0	1,910,0	3,893,1	2,018,1	1,875,0	1,988,2	51·84

6,301,9	3,057,5	3,244,4	TOTAL	6,335,0	3,100,0	3,235,0	6,505,0	3,107,5	3,397,5	6,461,1	3,077,3	3,383,8	3,557,5	47·63

GROSS RECEIPTS.

315. The increase, as compared with the actuals of the previous year, is due to an improvement on all three railways, but chiefly on the Bombay, Baroda and Central India and Madras Railways. On the first, the increase is due to larger consignments of oil seeds, sugar, and timber, and to improvement in the 3rd class passenger traffic, and in receipts belonging to foreign lines. On the Madras Railway the passenger and parcel traffic improved in consequence of more favourable seasons; the traffic in cotton and grains also showed an improvement, and the traffic in coal was considerably improved by large bookings to the Kolar gold-fields. Under earning heads, the receipts on the Great Indian Peninsula Railway showed a falling off, due to

Section H.—RAILWAYS—RECEIPTS—*concluded.*

XXVII.—Guaranteed Companies—Net Traffic Receipts—*concluded.*

smaller exports of wheat and to the depletion of stocks in food-grains in 1892 to meet the prevailing scarcity in the Madras Presidency, but this decrease was more than counterbalanced by an increase in suspense transactions arising from through traffic transactions.

316. The decrease, as compared with the Revised Estimate, is on the Great Indian Peninsula and Madras Railways; the suspense transactions on these lines are liable to large fluctuations, so that it is difficult to frame a correct forecast.

WORKING EXPENSES.

317. The increase, as compared with the actuals of the previous year, occurs only on the Great Indian Peninsula Railway in consequence of heavy renewals of engines and to the entertainment of additional station and train staff required for the working of the altered train service. The working expenses of the Bombay, Baroda and Central India and Madras Railways were lower than in the previous year. The reduction on the former was due to there being no expenditure on renewals with steel rails and repairs to flood damages; large credits for sale of old rails to the Telegraph Department and the Godhra-Rutlam Railway, and less renewals and repairs to coaching and goods vehicles have also contributed to the reduction to a certain extent. The reduction on the Madras Railway is due to the heavy outlay which was incurred in 1892-93 on repairs and renewals of permanent-way and bridges. The variations between the Revised Estimate and actuals show a decrease of 30,2 as under—

Bombay, Baroda and Central India Railway	7,7
Great Indian Peninsula Railway	1,9
Madras Railway	20,6

318. The decrease on the Madras Railway is due to the requirements for all departments, especially Locomotive, having been over-estimated.

XXVIII.—Subsidised Companies (Repayment of Advances of Interest).

1892-93. Accounts.		1893-94. Budget.	1893-94. Revised.	1893-94. Accounts.
	INDIA—			
17,9	Mysore Railway	23,6	33,7	34,1
	ENGLAND—			
...	Rohilkhand-Kumaon Railway	10	...	...
...	Exchange	6	...	...
17,9	TOTAL	25,2	33,7	34,1

319. The credit under India represents the amount recoverable from the Mysore Durbar in settlement of the net charge for interest paid to the Southern Mahratta Railway Company in connection with the Mysore Railway. The receipts, working expenses, and interest charges of the Mysore Railway are recorded in the accounts under their respective railway heads, and the recovery of the net charge for interest (*i.e.*, interest on Capital expended, *minus* net receipts) from the Mysore Durbar is credited under this head. The settlement with the Mysore Durbar is effected outside the Railway accounts. The details of the amounts recoverable are given below:—

1892-93. Accounts.		1893-94. Budget.	1893-94. Revised.	1893-94. Accounts.
	INDIA—			
	MYSORE RAILWAY—			
76,9	Interest on Capital	78,1	78,9	79,2
6,6	*Less*—Charge for interest borne by Government for the unexpended balance of the Capital retained in its hands	7,0	8,2	8,4
70,3		71,1	70,7	70,8
52,4	Net receipts	47,5	37,0	36,7
17,9	Net charge for interest recoverable from Mysore Durbar	23,6	33,7	34,1

320. The Budget Estimate provided for credits under England representing the Government share of surplus profits of the Rohilkhand-Kumaon Railway for the years 1891 and 1892, to be taken in reduction of the Company's debt for advances of interest. No payment has, however, been made pending a decision on certain questions materially affecting the Government share of surplus profits.

Section H.—RAILWAYS—EXPENSES.

1892-93. Accounts.		Budget.	1893-94. Revised.	Accounts.
20,924,1	EXPENDITURE . . .	21,545,8	21,803,5	21,832,5

321. These figures comprise the expenditure under the following heads:—

	STATE RAILWAYS—			
7,944,9	Working Expenses . .	8,087,5	8,259,1	8,264,0
4,779,1	Interest on debt . .	4,945,3	4,967,5	4,972,9
2,717,4	Annuities . . .	2,765,6	2,787,0	2,797,5
1,086,1	Interest on Capital Deposits	1,136,5	1,140,1	1,153,1
328,5	Interest on Advances .	352,9	356,5	357,9
	GUARANTEED COMPANIES—			
611,3	Surplus Profits, etc. . .	613,2	605,8	605,2
3,438,7	Interest	3,508,9	3,544,4	3,557,5
	SUBSIDISED COMPANIES—			
27,1	Land, etc. . . .	22,3	20,1	18,2
1,9	Advances of Interest .	6,1	2,8	2,8
—10,9	MISCELLANEOUS RAILWAY EXPENDITURE . .	107,5	111,2	103,4
20,924,1		21,545,8	21,803,5	21,832,5

322. The actuals exceeded those of the previous year by 908,4, and the Budget Estimate by 286,7. The charges on account of exchange were higher by 289,7 and 128,2, chiefly on account of the fall in the rate of exchange. Excluding exchange the total charges are higher than those of the previous year and of the Budget Estimate by 618,7 and 158,5 respectively.

323. The increase, compared with the actuals of the previous year, occurred chiefly in the working expenses of State Railways, owing to the larger traffic worked, to larger payments of surplus profits to the Southern Mahratta Railway Company and on account of the Rajputana-Malwa Railway to the Bombay, Baroda and Central India Railway Company, and to repairs of flood damages, and strengthening of bridges. There is also an increase in the interest charges resulting from the progress of construction of State Railways. The expenditure on surveys was greater than in the previous year, owing to new surveys being undertaken and to a special recovery of 89,1 in 1892-93 from the Assam-Bengal Railway Company on account of the past outlay incurred by Government on surveys connected with that line. The excess over the Budget Estimate is in the working expenses of State Railways, owing chiefly to the improved traffic, to the payment of surplus profits to Companies which it was anticipated would have been paid in the previous year, and to repairs of flood damages, and heavy renewals of way and rolling-stock. The excess over the Revised Estimate is on account of exchange, the actual average rate of exchange for the year having been slightly lower than the rate adopted for the purposes of the estimate.

38.—State Railways—Working Expenses.

1892-93. Accounts.		Budget.	1893-94. Revised.	Accounts.
7,944,9	EXPENDITURE	8,087,5	8,259,1	8,264,0

324. The particulars of these charges by individual Railways are given on page 88. The increase over the actuals of the previous year and the Budget Estimate is due to the larger traffic worked, to larger payments of surplus profits to the Southern Mahratta Railway Company, and to the Bombay, Baroda and Central India Railway Company for working the Rajputana-Malwa Railway, and to repairs of flood damages.

Section H.—RAILWAYS—EXPENSES—*continued.*

STATE RAILWAYS—IMPERIAL.

East Indian Railway.

1892-93. Accounts.		Budget.	1893-94. Revised.	Accounts.
	WORKING EXPENSES—			
327,1	Maintenance	339,3	289,5	293,5
408,7	Locomotive	405,5	420,5	423,5
120,9	Carriage and Wagon	129,6	125,5	104,7
276,5	Traffic	278,1	284,7	280,9
225,5	General, Miscellaneous, and Suspense . .	222,5	244,7	253,2
1,358,7	TOTAL WORKING EXPENSES .	1,375,0	1,364,9	1,355,8
248,4	Share of surplus profits paid to the Company and contribution to Provident Fund . . .	240,0	205,1	208,5
1,607,1	TOTAL .	1,615,0	1,570,0	1,564,3

325. The actuals for the year are 42,8 less than the actuals of 1892-93 and 50,7 less than the Budget Estimate. But for a special credit of 82,3 afforded to Revenue by debit to Capital during the year on account of outlay charged to Revenue to the end of 1892-93 in providing an additional sleeper to each 30′ rail, the expenditure would have been 39,5 and 31,6 in excess of the actuals of the previous year and the Budget Estimate respectively. More extensive renewals of sleepers and fencing and additional relaying of rails were carried out during the year; and the expenditure connected with the running of trains and on fuel was heavier in consequence of the increased traffic. The decrease in the payments to the Company on account of their share of surplus profits is due to the lower rate of exchange at which the sterling annuity and interest charges falling against the net revenue have had to be converted into Indian currency.

Eastern Bengal Railway.

1892-93. Accounts.		Budget.	1893-94. Revised.	Accounts.
	WORKING EXPENSES—			
122,6	Maintenance	121,0	120,3	123,5
122,8	Locomotive	118,0	120,1	119,4
47,6	Carriage and Wagon	51,5	50,3	48,2
118,2	Traffic	112,0	120,9	121,5
150,4	General, Miscellaneous and Suspense . .	137,5	123,4	129,9
561,6	TOTAL .	540,0	535,0	542,5

326. The total expenditure is less than that of the previous year, due chiefly to the debit in 1892-93 of the amount of depreciation on the Bengal Central Railway rolling-stock to Revenue by credit to Capital. The increase, as compared with the Revised Estimate, is due to larger debits to demands payable account than were provided for.

Rajputana-Malwa Railway.

1892-93. Accounts.		Budget.	1893-94. Revised.	Accounts.
	WORKING EXPENSES—			
162,0	Maintenance	168,0	155,5	162,8
407,6	Locomotive	411,0	403,7	367,1
77,2	Carriage and Wagon	95,0	91,3	98,5
145,6	Traffic	140,0	141,3	147,6
125,6	General, Miscellaneous, and Suspense . . .	126,0	134,2	135,9
918,0	TOTAL WORKING EXPENSES .	940,0	926,0	911,9
100,7	Share of surplus profits paid to the Bombay, Baroda and Central India Railway Company, and contribution to Provident Fund	130,0	164,0	165,9
1,018,7	TOTAL .	1,070,0	1,090,0	1,077,8

327. The working expenses are less than those of the previous year, and of the Budget Estimate by 6,1 and 28,1 respectively. The savings have occurred chiefly under *Locomotive* expenses, due to less coal carried

Section H.—RAILWAYS—EXPENSES—*continued.*

Rajputana-Malwa Railway—*concluded.*

during the year, to the replacement of three engines and extensive repairs in 1892-93, for which there were no corresponding charges in 1893-94, and to smaller charges for fuel and running expenses in consequence of less train mileage run. There has been an increase under *Carriage and Wagon* expenses due to heavy expenditure on wheel and axle-changing operations, and under *Special and Miscellaneous* due to payments to the East Indian Railway for arrear shunting charges at Cawnpore, and to a larger number of compensation claims settled during the year.

328. The increased payments on account of surplus profits, as compared with the actuals of the previous year and with the Budget Estimate, are due partly to the working results of the year having proved more satisfactory, and partly to the payment of 90 per cent. of the Company's share of surplus profits for the second-half of 1892 having been made in this year instead of in the previous year as anticipated.

North-Western Railway.

1892-93. Accounts.		Budget.	1893-94. Revised.	Accounts.
	WORKING EXPENSES—			
627,5	Maintenance	702,5	677,4	675,2
622,7	Locomotive	549,5	653,5	656,6
163,9	Carriage and Wagon	166,5	160,0	160,9
244,6	Traffic	250,5	250,5	252,5
153,1	General, Miscellaneous, and Suspense	166,0	158,6	163,0
1,811,8	TOTAL	1,835,0	1,900,0	1,908,2

329. The expenditure is 96,4 more than in the previous year, due to repairs of flood damages and the strengthening and reconstruction of bridges, to heavier repairs and renewals of engines, and to increased traffic. The increase, as compared with the Budget Estimate, is due to larger consumption of fuel, and to more extensive renewals of engines and vehicles.

Oudh and Rohilkhand Railway.

1892-93. Accounts.		Budget.	1893-94. Revised.	Accounts.
	WORKING EXPENSES—			
116,5	Maintenance	115,6	117,4	111,9
103,2	Locomotive	114,6	113,7	115,4
34,5	Carriage and Wagon	42,0	40,6	40,2
65,0	Traffic	69,5	70,5	70,8
49,5	General, Miscellaneous, and Suspense	48,3	47,8	39,6
368,7	TOTAL	390,0	390,0	377,9

330. Contrasted with the actuals of the previous year, the expenditure shows an increase of 9,2, which is due to the opening of the Lucknow-Rae Bareli section and to the larger traffic worked, which involved an increase in establishment and in fuel and running expenses generally. The expenditure would have been still larger, but for delay in the settlement of the share of joint station charges of the Moghul Serai and Aligurh stations for the year 1893. The short outlay, as compared with the Budget and Revised Estimates, is due to delay in the supply of wooden sleepers intended for renewals, and to the share of joint stations charges for 1893 having remained unadjusted.

Bengal-Nagpur Railway.

1892-93. Accounts.		Budget.	1893-94. Revised.	Accounts.
	WORKING EXPENSES—			
85,7	Maintenance	90,0	100,0	103,4
87,4	Locomotive	95,0	80,2	81,4
17,6	Carriage and Wagon	19,7	25,8	28,1
47,7	Traffic	47,0	46,4	47,7
71,3	General, Miscellaneous, and Suspense	73,3	65,1	69,1
309,7	TOTAL	325,0	317,5	329,7

Section H.—RAILWAYS—EXPENSES—*continued.*

Bengal Nagpur Railway—*concluded.*

The increase occurred chiefly under *Maintenance* and *Carriage and Wagon* expenses, and is due to larger outlay on ballast for renewals, to cost of relaying commenced on the Katni-Umaria section, to abnormal expenditure in connection with the re-roofing of staff quarters, and to special repairs to coaching vehicles and renewals of bearing springs of goods vehicles. The decrease under *Locomotive* is due to cheaper fuel and to general economy effected in the working of this Department.

Bengal and North-Western and Tirhoot Railway.

1892-93. Accounts.		Budget.	1893-94. Revised.	Accounts.
	WORKING EXPENSES—			
44,1	Maintenance	36,0	50,0	52,9
53,3	Locomotive	49,0	48,0	45,6
14,3	Carriage and Wagon	15,3	12,9	12,7
39,6	Traffic	38,0	40,9	42,4
72,7	General, Miscellaneous, and Suspense	71,7	71,2	70,5
171,4	Share of net earnings paid to the Company, and contribution to Provident Fund	170,0	167,0	165,4
395,4	TOTAL	380,0	390,0	389,5

332. The working expenses are slightly below the actuals of the previous year. Owing to a decrease in earnings, the share of net earnings paid to the Company is less by 6,0. There has however been increased expenditure on repairs to the breaches caused by floods on the Bairagnia branch. The increase over the Budget Estimate is due to repairs of the damages caused by floods, to larger expenditure on renewals of sleepers, on repairs of stations and buildings and on printing forms for the use of stations.

Indian Midland Railway.

1892-93. Accounts.		Budget.	1893-94. Revised.	Accounts.
	WORKING EXPENSES—			
71,7	Maintenance	65,0	76,5	75,4
101,8	Locomotive	95,0	95,8	98,3
23,3	Carriage and Wagon	21,5	23,0	24,5
48,3	Traffic	47,0	45,0	46,7
47,0	General, Miscellaneous, and Suspense	46,5	42,7	40,8
292,1	TOTAL	275,0	283,0	285,7

333. The actuals are less by 6,4 than those of the previous year. Under *Maintenance* there is an increase due to extraordinary renewals on the Scindia section and on the Bhopal Railway, but this is more than counterbalanced by a decrease under *Locomotive* expenses due to the reduced cost of fuel and to a reduction in the running expenses, and under *General and Miscellaneous* expenditure due to the payment made in the previous year to the Bombay, Baroda and Central India Railway on account of share of joint works at Agra for the period from 1st March 1889 to 31st December 1892. As compared with the Budget Estimate there is an excess due to insufficient provision having been made for extraordinary renewals.

Southern Mahratta Railway.

1892-93. Accounts.		Budget.	1893-94. Revised.	Accounts.
	WORKING EXPENSES—			
69,4	Maintenance	77,0	87,6	83,2
99,4	Locomotive	106,0	122,0	130,3
20,1	Carriage and Wagon	23,4	25,0	24,1
50,9	Traffic	51,5	57,6	56,0
64,8	General, Miscellaneous, and Suspense	57,1	58,6	58,8
304,6	TOTAL WORKING EXPENSES	315,0	350,8	352,4
19,1	Share of net earnings paid to the Company, and contribution to Provident Fund	45,0	74,7	76,1
323,7	TOTAL	360,0	425,5	428,5

Section H.—RAILWAYS—EXPENSES—*continued.*

Southern Mahratta Railway—*concluded.*

334. The large increase in working expenses, as compared with both the actuals of the previous year and the Budget Estimate, is due to abnormal renewals of sleepers, to the transfer from Capital of the cost of works and buildings at a temporary station on its being closed for traffic, to renewals of engines, and to heavier expenditure consequent on improved earnings.

335. The increase in the share of net earnings paid to the Company is due to improved traffic and to 90 per cent. of the Company's share of net earnings for the half-year ended 31st December 1892 not having been paid in the previous year.

South Indian Railway.

1892-93. Accounts.		Budget.	1893-94. Revised.	Accounts.
	WORKING EXPENSES—			
131,4	Maintenance	133,8	121,7	119,1
188,1	Locomotive	174,3	176,3	172,0
45,4	Carriage and Wagon	48,8	58,9	58,7
67,6	Traffic	67,9	68,5	67,8
74,5	General, Miscellaneous, and Suspense	75,2	74,6	71,2
507,0	TOTAL WORKING EXPENSES	500,0	500,0	488,8
...	Share of net receipts paid to the Company, and contribution to Provident Fund	...	1,7	2,0
507,0	TOTAL	500,0	501,7	490,8

336. The maintenance charges were below those of the previous year owing to less renewals of rails and to a decrease in mileage in consequence of the transfer of the working of the Guntakal-Dharmavaram section of the Guntakal-Mysore Frontier Railway to the Southern Mahratta Railway Company. The locomotive expenses were also less owing to replacement of four engines and adjustment of arrear charges in 1892-93, for which there were no corresponding debits in 1893-94. The lapse on the Budget Estimate is due to the decrease in maintenance charges as explained above.

Other State Railways—Imperial.

1892-93. Accounts.	Budget.	1893-94. Revised.	Accounts.
383,5	429,3	468,1	484,1

337. The actuals exceeded those of the previous year by 100,6. The opening of the East Coast Railway accounts for 59,6 of the increase. On the Mysore Railway the increase is 24,1, due to the payment in this instead of in the previous year to the Southern Mahratta Railway Company of 90 per cent. of their share of net earnings for the second half of 1892, and to improved traffic. The Guntakal-Mysore Frontier Railway accounts for an increase of 17,4 due to the opening for traffic of the Dharmavaram-Mysore Frontier section, and to the Revenue accounts of the Guntakal-Dharmavaram section being now separated from the South Indian Railway accounts. On the Warora Colliery there is an increase of 6,0 due to a larger output of coal, to the charges for new boilers, and to a write-off of 2,0 on account of railway stores to "Loss on stores." The increase of 5,1 on the Lucknow-Bareilly Railway is due to the larger traffic worked, and to additional maintenance charges consequent on the opening of the Dudwa branch.

338. The actuals exceeded the Budget Estimate by 54,8. The principal excesses are on the East Coast and Mysore Railways and the Warora Colliery, and are due chiefly to the causes that led to the excesses over the actuals of the previous year. The excess over the Revised Estimate is mainly due to an underestimate of expenditure on the East Coast Railway.

State Railways—Provincial.

Burma Railway.

1892-93. Accounts		Budget.	1893-94. Revised.	Accounts.
	WORKING EXPENSES—			
120,6	Maintenance	350,0	370,0	123,7
107,8	Locomotive			105,2
25,5	Carriage and Wagon			33,8
63,0	Traffic			64,6
35,0	General, Miscellaneous, and Suspense			38,6
351,9	TOTAL	350,0	370,0	365,9

339. The actuals are 14,0 in excess of those of the previous year, and 15,9 in excess of the Budget estimate, due to the relaying of a portion of the Sittang section and to heavy repairs to coaching and goods stock having been found necessary.

Section H.—RAILWAYS—EXPENSES—*continued.*

Other Railways—Provincial.

1892-93. Accounts.	Budget.	1893-94. Revised.	Accounts.
13,7	18,2	18,3	19,1

340. The increase, as compared with the actuals of the previous year, is on the Hyderabad-Umarkot Railway. This line was open for traffic throughout the year as against eight months in 1892-93.

38.—State Railways.

Interest on Debt.

1892-93. Accounts.		Budget.	1893-94. Revised.	Accounts.

4,779,1	TOTAL INTEREST ON DEBT	4,945,3	4,967,5	4,972,9

341. There was an increase over the actuals of the previous year, and the Budget and Revised Estimates in the charges for exchange owing to a fall in the rate. Omitting exchange, the charges approximate closely to the Budget and Revised Estimates, but exceed those of the previous year by 157,5, as the charges for interest on capital found by Government are increasing year by year with the progress of construction.

Interest on Capital found by Government.

342. The following statement shows how the amount charged in the accounts of 1893-94 as interest on capital found by Government has been computed :—

CAPITAL EXPENDITURE ON WHICH INTEREST IS CHARGEABLE—

	E. I. Ry.	E. B. Ry.	Other State Railways.	TOTAL.
Capital Expenditure at end of 1892-93	3,036,4	6,962,2	66,650,6	76,649,2
Capital Expenditure during 1893-94	543,4	105,5	3,425,5	4,074,4
Capital Expenditure at end of 1893-94	3,579,8	7,067,7	70,076,1	80,723,6

396,7	EXCHANGE	425,7	437,6	441,7
1,086,1	TOTAL	1,136,5	1,149,1	1,153,1

Interest.

344. The increase in the sterling payments over the actuals of the previous year is on account of the Assam-Bengal Railway consequent on the additional capital paid up by the Company.

Exchange.

345. The increase in the actuals, compared with those of the previous year and with the Budget Estimate, is due partly to a fall in the rate of exchange, and partly to the larger payment of interest to the Assam-Bengal Railway Company.

Section H.—RAILWAYS—EXPENSES—*continued.*

Interest chargeable against Companies on Advances.

1892-93. Accounts.		Budget.	1893-94. Revised.	Accounts.
	ENGLAND—			
16,2	Bengal Central Railway	16,3	16,3	16,3
81,3	Bengal-Nagpur Railway	88,3	88,3	88,5
41,4	Indian Midland Railway	43,7	43,7	43,7

205,1		216,9	216,9	216,9
123,4	EXCHANGE	136,0	139,6	141,0
328,5	TOTAL	352,9	356,5	357,9

Interest.

346. As explained in previous reports, the capital required by the above Companies has, from 1889-90, been advanced by the Secretary of State from funds raised under the provisions of the Oudh and Rohilkhand Railway Purchase Act, and the interest chargeable against the Companies on the advances is shown under this head.

347. The increase over the actuals of the previous year is due to further advances having been made to Companies by the Secretary of State.

Exchange.

348. The increase in exchange, compared with the actuals of the previous year, is due partly to larger charges on account of interest, and partly to a less favourable rate of exchange. The increase, as compared with the Budget Estimate, is due to a fall in the rate of exchange.

39.—Guaranteed Companies—Surplus Profits, Land and Supervision.

1892-93. Accounts.		Budget.	1893-94. Revised.	Accounts.
	MOIETY OF SURPLUS PROFITS—			
186,7	Bombay, Baroda and Central India Railway	181,2	265,0	266,0
395,2	Great Indian Peninsula Railway	381,6	305,9	305,2
581,9	TOTAL SURPLUS PROFITS	562,8	570,9	571,2
	LAND AND SUPERVISION—			
15,6	India—Share of Office of Director General of Railways	15,9	16,2	15,8
11,0	Central Provinces	10,6	10,7	10,5
2,1	Assam	6,5	7,0	7,1
10,9	Bengal	10,8	11,0	11,5
12,5	North-Western Provinces and Oudh	12,5	11,1	11,9
13,4	Madras	16,0	13,8	12,6
23,4	Bombay	33,9	28,3	27,7
...	Reserve	6,3	...	...
88,9		112,5	98,1	97,1
59,5	*Deduct*—Amount recoverable from Companies on account of Government Supervision	*62,1*	*63,2*	*63,1*
29,4	TOTAL LAND AND SUPERVISION	50,4	34,9	34,0
611,3	GRAND TOTAL	613,2	605,8	605,2

SURPLUS PROFITS.

349. The decrease of 10,7, as compared with the actuals of the previous year, is due to the smaller earnings of the Great Indian Peninsula Railway in the first-half of the year. The difference would have been larger, but for the increase in the share of surplus profits paid to the Bombay, Baroda and Central India Railway Company consequent on the improvement in traffic, which also led to an increase over the Budget Estimate.

Section H.—RAILWAYS—EXPENSES—*continued.*

39.—Guaranteed Companies—Surplus Profits, Land and Supervision—*continued.*

LAND AND SUPERVISION.

350. The increase over the actuals of the previous year is due principally to the charge for the offices of Consulting Engineer and Government Examiner of Accounts, Assam-Bengal Railway, during the year under review having been for twelve months, while that for 1892-93 was only for five months, and to the outlay on land taken up for the Anand station on the Bombay, Baroda and Central India Railway. The saving on the Budget Estimate is due mainly to the requirements for land having been over-estimated.

351. The increase over the actuals of the previous year and the Budget Estimate, in the amount recoverable from Companies on account of Government supervision, is chiefly due to the larger recovery from the Assam-Bengal Railway in consequence of a greater length of line being under construction. The difference between the Budget and the actuals of 1893-94 would have been more, but for no recovery having been made from the Southern Mahratta Railway Company on account of the Guntakal-Hindupur line, Government having decided not to levy any charge until receipt from the Secretary of State of the agreement for working the line.

39.—Guaranteed Companies—Interest.

1892-93. Accounts.		Budget.	1893-94. Revised.	Accounts.
	INTEREST—			
2,7	India	2,6	2,4	2,5
2,145,3	England	2,154,9	2,154,7	2,154,7
2,148,0		2,157,5	2,157,1	2,157,2
1,290,7	EXCHANGE	1,351,4	1,387,3	1,400,3
3,438,7	TOTAL	3,508,9	3,544,4	3,557,5

352. The increase in the payments in England, compared with those of the previous year, is due to the additional debentures raised by the Great Indian Peninsula and Bombay, Baroda and Central India Railways.

353. The increase under Exchange is chiefly due to the less favourable rate of exchange.

40.—Subsidised Companies.—Land, Subsidy, and Interest.

1892-93. Accounts.		Budget.	1893-94. Revised.	Accounts.
	IMPERIAL—			
3,9	Bengal and North-Western Railway—(*Land*)	1,7	2,8	1,0
2	Delhi-Umballa-Kalka Railway—(*Land*)	1,4	...	...
6,4	Nilgiri Railway—(*Land*)	5,0	3,0	3,0
1,9	Ditto (*Interest*)	6,1	2,8	2,8
12,4	TOTAL IMPERIAL	14,2	8,6	6,8
	PROVINCIAL—			
4,0	Rohilkhand-Kumaon Railway—(*Subsidy*)	4,0	4,0	4,0
1	Ditto ditto (*Land*)	...	—1	—1
10,0	Dibru-Sadiya Railway—(*Subsidy and Audit*)	10,1	10,1	10,0
2,5	Dooars Railway—(*Land*)	1	3	3
16,6	TOTAL PROVINCIAL	14,2	14,3	14,2
29,0	GRAND TOTAL	28,4	22,9	21,0

354. Compared with the actuals of the previous year there is a net decrease of 8,0. There was less acquisition of land for the Bengal and North-Western Railway, and short payments of compensation. The land required for the Nilgiri and the Dooars Railways was for the most part paid for in previous years. Owing to additional deposits of capital in the Government treasury, the interest paid to the Nilgiri Railway Company exceeded the amount paid in the previous year.

355. The lapse on the Budget Estimate is partly due to the interest payable to the Nilgiri Railway Company having been calculated for twelve months, whereas the payment ceased on the 30th September 1893, the date on which the limit of three years expired under the contract. The Budget Estimate also provided for the cost of demarcating land relinquished by the Delhi-Umballa-Kalka Railway Company, which it is considered expedient to retain in the hands of Government, but the provision was not utilised, and for land for the Nilgiri Railway, which was not acquired.

...	TOTAL PROVINCIAL	...	1,2	1,2
—10,9	TOTAL IMPERIAL AND PROVINCIAL	107,5	111,2	103,4

356. The total outlay under *Imperial* is more than that of the previous year by 113,1. The accounts for 1892-93 included special credits amounting to 89,1 on account of the refund of the past outlay on surveys in connection with the Assam-Bengal Railway. Eliminating this amount, the outlay in 1892-93 was 78,2 against 102,2 during 1893-94. No useful comparison can be made between the outlay of the two years by individual projects, as surveys are being completed and new surveys are being started every year. During the year new surveys were sanctioned, and others, for which provision was made in the Budget Estimate, were not commenced, the result being that the expenditure is 5,3 less than the Estimate. Two surveys were undertaken from Provincial funds during the year.

Section J.—IRRIGATION.

357. The following is a general summary of the results under the head of Irrigation :—

1892-93. Accounts.		Budget	1893-94. Revised.	Accounts.
	Major Works.			
1,510,7	Direct Receipts	1,323,7	1,333,6	1,349,7
722,3	Land Revenue due to Irrigation	815,6	792,0	746,9
2,233,0	TOTAL RECEIPTS	2,139,3	2,125,6	2,096,6
794,0	Working Expenses	776,1	771,7	789,0
1,138,4	Interest	1,168,3	1,165,8	1,165,5
1,932,4	TOTAL EXPENDITURE	1,944,4	1,937,5	1,954,5
300,6	Net Receipts (Major Works)	194,9	188,1	142,1
	Minor Works and Navigation.			
185,9	Receipts	198,4	194,0	199,8
1,008,1	Expenditure	915,7	918,8	908,0
—822,2	Net Expenditure (Minor Works)	—717,3	—724,8	—708,2
—521,6	Net Expenditure (Irrigation)	—522,4	—536,7	—566,1

358. The net result was on the whole worse than the Budget and the actuals of the previous year by 43,7 and 44,5 respectively. There was a decrease in the net expenditure on Minor works and Navigation of 9,1, and 114,0, the expenditure in the previous year having been abnormally high, owing to the execution of famine relief works in Rajputna, Upper Burma and Madras, and to raising, strengthening, and retiring several miles of the Irrawaddy embankments in Lower Burma in order to guard against threatened river encroachments. The improvements under Minor works were however more than neutralised by a decrease in the net revenue from the Major works. The unfavourable result shown by these works as compared with the previous year was produced mainly by a decline in the Direct Receipts chiefly owing to a heavy rainfall in the Punjab having reduced the demand for canal water, and also by the capital outlay of the year having enhanced the Interest charges. The anticipation of the Budget failed chiefly under Land Revenue due to Irrigation, under which a large increase had been expected from the introduction of a new settlement in the Tanjore district which was not however actually introduced until late in the year.

SECTION J.—IRRIGATION—RECEIPTS.

1892-93. Accounts.		Budget.	1893-94. Revised.	Accounts.
2,418,9	REVENUE	2,337,7	2,319,6	2,296,4

359. The actual receipts in 1893-94 have fallen short of those of the previous year by 122,5, due chiefly to heavy rainfall in the Punjab having diminished the necessity for artificial irrigation, and partly to large arrears having been realized in Bengal in 1892-93. In Madras the revenue increased owing to the introduction of the new settlement in the Tanjore district. There was also an improvement in the North-Western Provinces and Oudh owing to an extension of irrigation from the Eastern Jumna Canal. The decrease, as compared with the Budget Estimate, occurred in Madras, and was due to the late date on which orders were issued on the settlement scheme in the Tanjore district, in consequence of which the increase of revenue was not so large as was anticipated. In the Revised Estimate the revenue was over-estimated.

Section J.—IRRIGATION RECEIPTS—*continued.*

Direct Receipts—Imperial Works.

360. The *gross revenue* in 1893-94 was less than that of the previous year by 156,6 and the Budget Estimate by 24,2. The decrease occurred principally in the Punjab, and was due to heavy rainfall, the Sirhind Canal being the one most affected. The decrease of revenue from the Western Jumna Canal was chiefly due to a large amount of water and owners' rates on the canal remaining unrealized at the end of the year.

Direct Receipts—Provincial Works.

361. The *gross revenue* in 1893-94 fell short of that of the previous year by 4,4. The falling off is the net result of an increase of 17,1 in the North-Western Provinces and Oudh and of a decrease of 21,5 in Bengal. The improvement in the North-Western Provinces and Oudh was chiefly due to an extension of irrigation from the Eastern Jumna Canal. The decrease in Bengal was due to large arrears of water-rates having been recovered in the previous year.

362. The increase of 50,2, as compared with the Budget Estimate, was due to an under-estimate of revenue in Bengal and the North-Western Provinces and Oudh.

363. The increase over the Revised Estimate occurred chiefly in Bengal, and was due to better traffic on the Orissa Canals, to the recovery of outstanding balances on the Midnapore Canal, and to a larger recovery of current demands on the Sone and Midnapore Canals.

XXIX.—Major Works—Indirect Receipts.

Portion of Land Revenue due to Irrigation.

1892-93. Accounts.		Budget.	1893-94. Revised.	Accounts.
117,5	N.-W. Provinces and Oudh	117,5	117,5	117,5
13,7	Punjab	5,0	20,4	21,9
506,8	Madras	601,0	561,8	531,5
84,3	Bombay	92,1	92,3	76,0
722,3	TOTAL .	815,6	792,0	746,9

364. The actual revenue in 1893-94 exceeded that of the previous year by 24,6. The increase occurred chiefly in Madras, and partly in the Punjab. The increase in Madras was due to the *taluqs* in the Tanjore district having been brought under the new settlement and to an extension of irrigation from the Kistna Delta and the Sangam anicut systems. The increase in the Punjab was due to the credits afforded to the Bari Doab Canal on account of "Nahri Parta rate" having been larger than in the previous year. The decrease of 68,7, as compared with the Budget Estimate, is chiefly made up of an increase of 16,9 in the Punjab and of a decrease of 69,5 in Madras. The increase in the Punjab was due to the credits afforded to the Bari Doab Canal on account of "Nahri Parta rate," information regarding which had not been received when the Budget Estimate was framed. The decrease in Madras was due to the late date on which orders were issued on the new settlement scheme, in consequence of which the increase of revenue was not so large as anticipated. The decrease, as compared with the Revised Estimate, was chiefly due to an over-estimate of revenue in Madras and Bombay.

XXX.—Minor Works and Navigation.

1892-93. Accounts. A	1892-93. Accounts. B		Budget. A	Budget. B	1893-94. Revised. A	1893-94. Revised. B	Accounts. A	Accounts. B
4,6	...	India	5,8	...	5,3	...	6,2	...

185,9			198,4		194,0		199,8	
			A. Imperial.		B. Provincial and Local.			

365. The variations under this head are comparatively small, and are the net result of a large number of small increases and decreases.

Section J.—IRRIGATION—EXPENDITURE.

1892-93. Accounts.		Budget.	1893-94. Revised.	Accounts.
2,940,5	EXPENDITURE . . .	2,860,1	2,856,3	2,862,5

366. The total outlay in 1893-94 corresponds closely with the Budget and Revised Estimates, but is less by 78,0 than that of the previous year, in which the expenditure was larger than usual owing to famine relief works having been undertaken in Rajputana, Upper Burma, and Madras.

42.—Major Works—Working Expenses.

1892-93. Accounts.	Budget.	1893-94. Revised.	Accounts.
794,0	776,1	771,7	789,0

367. The particulars of these charges are given in the table on page 106, and the more important differences are explained here.

Imperial Works.

368. The expenditure in 1893-94 fell short of that of the previous year by 11,9. The decrease occurred chiefly in Madras and Bombay. In the former the expenditure during 1892-93 was large owing to a special payment of 3,7 to the Telegraph Department on account of the telegraph line along the Karnul Canal which has been dismantled. The decrease in Bombay was due to the charges for maintenance and up-keep of the Desert Begari and Mutha Canals having been smaller than in the previous year. The increase of 7,2 over the Revised Estimate was due to heavy charges for maintenance of certain works in the Punjab and Madras.

Provincial Works.

369. The rise in the expenditure during 1893-94, as compared with that of 1892-93, was chiefly due to the greater cost of maintenance of the Orissa and Midnapore Canals in Bengal. The increase over the Budget and Revised Estimates was largely due to the Revenue account in Bengal and the North-Western Provinces and Oudh having to bear an increased charge for establishment owing to lapses on capital expenditure, causing a proportionate reduction in the capital share of these charges.

42.—Major Works—Interest on Debt.

1892-93. Accounts.		Budget.	1893-94. Revised.	Accounts.
	Imperial.			
606,0	India	631,3	629,7	629,6
	Provincial.			
242,3	Bengal	244,8	244.3	244,1
290,1	N.-W. P. and Oudh	292,2	291,8	291,8
1,138,4	TOTAL .	1,168,3	1,165,8	1,165,5

370. The following statement shows how the interest charged during the year was calculated:—

	CAPITAL EXPENDITURE.		
Capital expenditure at end of 1892-93		...	28,760,8
„ „ during 1893-94:—			
35 Protective Works		56,4	
43 Minor Works and Navigation		18,1	
49 Capital expenditure not charged to Revenue		681,7	
			756,2
			29,517,0
	INTEREST.		
Interest on capital outlay at beginning of the year		...	1,150,4
Interest on half the capital spent during the year		...	15,1
			1,165,5

371. The increase during 1893-94 was the result of additional capital outlay on works classed as Major Irrigation Works.

1,008,1			915,7		918,8		908,0	

A. Imperial. B. Provincial and Local.

Imperial Works.

372. The decrease in the expenditure during 1893-94, as compared with that of 1892-93, was chiefly due to expenditure in the earlier year having been larger than usual owing to the construction of famine relief works in Rajputana and Upper Burma. The increased expenditure in Bombay was due to (1) the construction of settling tanks, filter beds, and other works connected with the Poona water-supply from the Mutha Canals, (2) improvements to a large number of tanks in the province, and (3) the construction of certain bunds in Sind to shut out floods. The increase of 6,3 over the Budget Estimate was due to improvements made to the Sind Canal in Bombay.

Provincial and Local Works.

373. The decrease in the expenditure during 1893-94, as compared with that of the previous year, occurred chiefly in Lower Burma, Punjab, and Madras. In Lower Burma the expenditure in 1892-93 was unusually large owing to the necessity for raising, strengthening, and retiring several miles of the Irrawaddy embankments threatened by river encroachments. The decrease in the Punjab was due to a smaller programme of works in 1893-94 than in the previous year. In Madras also the expenditure in 1892-93 was large owing to the construction of a number of famine relief works. The decrease, as compared with the Budget Estimate, was mainly due to an over-estimate of the requirements of certain works in Bengal and Madras.

Section K.—BUILDINGS AND ROADS—RECEIPTS.

1892-93. Accounts.		Budget.	1893-94. Revised.	Accounts.
653,2	RECEIPTS	623,9	654,0	674,4

374. The receipts in 1893-94 were better than those of the previous year by 21,2 and the Budget and Revised Estimates by 50,5 and 20,4, respectively. The increase is chiefly due to the recovery of the Government share of the profits of the Darjeeling-Himalayan Railway for the four years ending June 1893, to an improvement in the ferry receipts and tolls on roads in Madras and Bombay, and to the receipt of large contributions from Municipalities and private parties.

XXXI.—Military Works.

1892-93. Accounts.		Budget.	1893-94. Revised.	Accounts.

375. **The revenue during 1893-94 was, on the whole, very close to that of the previous year. The decrease in India and the increase in Upper and Lower Burma were due to the re-transfer of the Mandalay and Rangoon Military Works Divisions to the control of the Burma administration.** The increase of 3,2 over the Budget Estimate occurred chiefly in India, and was mainly due to improved receipts from rents of buildings, consequent on the revision of rents and construction of some new quarters at Fort Sandeman. The difference between the actuals and the Revised Estimate is unimportant.

A.—Public Works in charge of Departmental Officers. B.—Public Works in charge of Civil Officers.

376. The increase in the receipts by departmental officers under Imperial occurred in Upper and Lower Burma and the Punjab. The increase in Upper Burma was due partly to an improvement in the receipts from rentable quarters, and partly to the rents of certain Government buildings which were formerly credited in the Civil Department, having been adjusted in the Public Works Department. **The increases in Lower Burma and the Punjab were due to recoveries of arrears of rents of buildings.**

377. Under Provincial, the total revenue realized by departmental officers in 1893-94 was only 6 more than that of the previous year, but there were large differences between the realizations of the two years in Bengal, North-Western Provinces and Oudh and Bombay. The increase in Bengal was chiefly due to the recovery of the Government share of the profits of the Darjeeling-Himalayan Railway for the four years ending June 1893, and to a gross profit of 3,0 on the working of the Calcutta workshops. The decrease in the North-Western Provinces and Oudh was due to the receipts in 1892-93 having been large owing to the sale of the bridge-of-boats at Bahramghat. The increase in Bombay was principally due to an improvement in the receipts from tolls on roads. Compared with the Budget Estimate the increase occurred chiefly in Bengal, North-Western Provinces and Oudh, Punjab and Bombay. The increases in Bengal and Bombay were due to the causes explained above. In the North-Western Provinces and Oudh the improvement was due to increased receipts from the Rurki workshops and the Thomason College Printing Press and Book depôt. The revenue in the Punjab was under-estimated. The increase over the Revised Estimate occurred in Bengal, and was due partly to a gross profit of 3,0 on the working of the Calcutta workshops, which was not anticipated, and partly to an under-estimate of rents of buildings. The increase in the receipts by civil officers, as compared with those of 1892-93, was chiefly due to the recovery of contributions for water-works from the Municipalities of Madura, Tanjore, and Trichinopoly in Madras.

378. Under Local, the increase in the receipts by civil officers over those of the previous year and the Revised Estimate was mainly due to an improvement in the ferry receipts and tolls on roads in Madras and Bombay. The increase over the Budget Estimate was due partly to the above cause, and partly to the contributions received from private parties in aid of Public Works in Bombay having been larger than was anticipated.

379. The decrease of 35,7, as compared with 1892-93, occurred partly under "44—Military Works" and partly under "45—Civil Works." The decrease under "44—Military Works" was due to large expenditure in 1892-93 on mobilization works and on the Duncan Docks at Bombay. The decrease under "45—Civil Works" was due to large expenditure in Madras during 1892-93 on the construction of famine relief works. The lapse on the Budget and Revised Estimates was principally due to an over-estimate of the requirements of the year.

1,196,8	GRAND TOTAL .	1,199,7	1,191,0	1,180,6

380. The decrease of 16,2 in the expenditure during 1893-94, as compared with that of 1892-93, occurred chiefly in India. A large portion of the decrease in India was due to the re-transfer to the Burma Administration of the Mandalay and Rangoon Military Works Divisions. This accounts for the increased expenditure in Upper and Lower Burma. The balance of the decrease was attributed to a large expenditure in 1892-93 on mobilization works and on the Duncan Docks at Bombay. The increase in the Punjab was due to expenditure incurred on metalling and improving the Dera Ismail Khan-Tank-Murtza road and on repairs to the Dera Ghazi Khan-Peshin and the North-West Frontier roads. The decrease, as compared with the Budget and Revised Estimates, was due partly to the land required for Ordnance subordinates' quarters at Cossipore not having been acquired in time, and partly to the requirements for certain works in the Punjab having been over-estimated.

Imperial.

381. *Departmental Officers.*—The increase in the expenditure during 1893-94, as compared with that of the previous year, occurred chiefly in Upper Burma, Assam, Punjab, and Bombay. The increase in Upper Burma was due to the outlay in 1892-93 having been small owing to a transfer of grants from this head to "43—Minor Works and Navigation" for the construction of famine relief works. The increase in Assam was due to heavy expenditure on the Nichuguard-Manipur road. In the Punjab the increase was due to the construction of civil and military buildings at Kurram and the purchase of the Snowdon estate at Simla for a residence for His Excellency the Commander in-Chief. In Bombay the increase was due to the construction of works for the Salt Department. The decrease of 44,0 in India was due chiefly to the withdrawal of grants by the Government of India for works chargeable to special Revenues of Baluchistan, and partly to the outlay in Rajputana in the previous year having been large owing to the construction of famine relief works.

Section K.—BUILDINGS AND ROADS—EXPENDITURE—*concluded.*

45.—Civil Works—*concluded.*

Imperial—*concluded.*

382. The decrease in India, as compared with the Budget Estimate, was due chiefly to the withdrawal of grants mentioned above, and partly to the requirements of certain works having been over-estimated. The increase in Assam was due to the vigorous prosecution of works on the Nichuguard-Manipur road. The increase in the Punjab was due to the causes mentioned above. The decrease of 6,5, as compared with the Revised Estimate, is the net result of a number of small increases and decreases.

Provincial.

383. *Departmental Officers.*—The decrease of 31,0 in the expenditure in 1893-94, as compared with that of the previous year, is the net result of increased expenditure in Central Provinces, Lower Burma, Assam and Madras owing to more funds having been available for outlay on Public Works in 1893-94 and smaller outlay in Bengal, North-Western Provinces and Oudh, Punjab and Bombay. The decrease in Bengal was caused by the transfer of certain works to District Boards. In the North-Western Provinces and Oudh the outlay in 1892-93 was larger than usual owing to large contributions made to different Municipalities for water-supply works. The decrease in the Punjab was due to reductions of grants made during the year by the local Financial Department to meet Exchange Compensation Allowance. The decrease in Bombay was due to the outlay on the construction of roads not being so large as in the previous year. Compared with the Budget Estimate there was a decrease in every province. The decrease in Lower Burma was ascribed to transfers of grants to the Irrigation Budget to meet expenditure on some urgent works, to the non-arrival of English stores, and to smaller payments in England than were anticipated. The decrease in Assam and Punjab was due to reductions of grants made during the year. In Bengal the decrease was due to the cause explained above. In Madras the decrease is attributed to the surrender of the grant for the Women and Children's Hospital at Madras and to the transfer to the Civil Department of the grants for agency works in Vizagapatam and for workshops for the Engineering College. In Bombay the expenditure for the year was over-estimated. The decrease of 35,8 in the expenditure in 1893-94, as compared with the Revised Estimate, occurred chiefly in Lower Burma, the North-Western Provinces and Oudh and Bombay. The short outlay in Lower Burma was due to non-arrival of certain English stores and to smaller payments in England than were anticipated. In the North-Western Provinces and Oudh the decrease was chiefly due to a large reduction in the suspense balances, owing to a large quantity of stock having been utilized on stock manufacture in the Rurki workshops. In Bombay the expenditure on certain works was over-estimated.

384. *Civil Officers.*—The decrease in the expenditure under this head occurred chiefly in Bengal owing to smaller contributions to Municipalities and Excluded Local Funds, and to a smaller outlay on works of public improvement than was anticipated, and partly in Madras, owing to smaller grants having been given to Municipalities on account of drainage and water-supply projects.

Local.

385. *Departmental Officers.*—The increase of 18,9 over the actuals of 1892-93 occurred chiefly in Lower Burma, and was due to heavy outlay on new roads in the Amherst, Akyab, Henzada, and Pegu districts, and on markets in the Tharrawaddy and Pegu districts. The increase in Assam and the North-Western Provinces and Oudh was due to large expenditure having been found necessary on the construction and repair of roads. The decrease in the Punjab was due to a smaller grant having been allotted for expenditure in 1893-94. In Madras the expenditure in 1892-93 was large owing to the construction of famine relief works. As compared with the Budget Estimate the decrease of 11,8 in Assam was mainly due to the non-completion of certain works, owing to scarcity of labour and heavy rains and floods in February 1894. The increase of 14,7 in Bombay was due to the construction of certain works not foreseen when the Budget Estimate was prepared. The decrease, as compared with the Revised Estimate, occurred chiefly in Assam and Bombay. The decrease in Assam was due to the causes explained above. In Bombay the expenditure was over-estimated.

386. *Civil Officers.*—The decrease in the expenditure during 1893-94 occurred chiefly in Madras, where the expenditure in 1892-93 was large owing to the construction of famine relief works. In the Budget and Revised Estimates the requirements of the year for that province were over-estimated. The increase in the expenditure in Bengal was due to the transfer to District Boards of certain works which were formerly executed by the Public Works Department.

388. The receipts in this country exceeded the Budget Estimate by 56,3, but were less than the actuals of the preceding year by 21,8. The increase over the Budget Estimate is due chiefly to large sales of malt liquor and rum, arrear recoveries on account of Commissariat provisions and stores issued on payment, increased sales of clothing necessaries, and medical stores, and large contributions towards Indian Military Service Family Pensions.

389. The receipts in England exceeded the Estimate chiefly in the value of articles in possession of regiments on transfer from Indian to British service.

390. As regards the expenditure in India, the comparison of the actuals with the Budget Estimate, and the actuals of the previous year, is vitiated by the inclusion in the figures of the expenditure connected with expeditions and other special items. The following statement shows the special items separately :—

1892-93. Accounts.			1893-94. Budget.	1893-94. Accounts.
502,6	Extra charges for Upper Burma . . .		505,0	458,2
	SPECIAL ITEMS :—			
257,3	Expeditions . .	177,0	219,9	
86,7	Transport arrangements in Kashmir . .	30,0	(a)	
344,0			207,0	219,9
14,742,5	Other Charges . .		14,981,5	15,286,7
15,589,1	TOTAL .		15,693,5	15,964,8

(a) The expenditure has been compiled under Gilgit Agency, hence included under Expeditions.

Section L.—ARMY SERVICES—*continued.*

391. The special items do not call for any remarks except that special additional grants were sanctioned for them during the year, amounting in all to 71,5. The ordinary expenditure in India exceeded the Budget Estimate by 271,3. This increase is almost wholly accounted for by Exchange Compensation Allowance amounting to 264,6. There were, however, also increases under Regimental Pay, due to an excess over the established strength of the British army in India, under Commissariat owing to larger purchases of malt liquor at enhanced rates, and to increased railway charges for troops and stores, etc. These excesses were, however, nearly counterbalanced by savings due to reduced payments for compensation in lieu of clothing and to a small expenditure in Ordnance factories. Compared with the actuals of the previous year, there was an increase of 544,2 due partly to a fall in the rate of exchange for the payment of British troops and partly to Exchange Compensation Allowance.

392. The saving on the Budget Estimate of the sterling expenditure in England occurred partly in stores and partly in the charges for deferred pay. The expenditure in 1892-93 included a special payment of 212,4 to the War Office on account of the arrears of the Home charges of British Forces serving in India, and the charges for pay and pensions of non-effective and retired officers of the Indian service were specially high, owing to the change of the system of quarterly into monthly payments.

	ENGLAND—			
37,8	Effective Services	26,2	39,1	39,6
8,6	Non-effective Services	9,0	9,8	10,1
46,4	TOTAL ENGLAND	35,2	48,9	49,7
27,9	EXCHANGE	22,0	31,5	32,3
864,3	GRAND TOTAL	769,1	825,4	850,2

393. The decrease in the receipts under *Regimental Pay, etc.*, was due partly to small receipts of discharge purchase money in Bombay and Madras, and of hutting money in the latter circle in consequence of revised arrangements for the accommodation of Native soldiers; but chiefly to recoveries of over-payments of previous years having been adjusted by deduction from charges instead of by credit as receipts.

394. The details of the receipts under *Commissariat* are as follows:—

1892-93. Accounts.		1893-94. Budget.	1893-94. Revised.	1893-94. Accounts.
260,7	Sale of malt-liquor	259,0	277,5	291,7
82,9	Sale of provisions and stores	77,2	83,0	86,0
16,5	Sale of rum	15,1	15,5	17,9
9,9	Khedda receipts	12,0	10,0	11,2
4,6	Sale of transport cattle	5,3	4,3	3,0
4,3	Receipts in connection with grass cultivation	5,9	4,7	3,5
33,3	Other heads	33,7	33,3	30,4
412,2	TOTAL	408,2	428,3	443,7

395. The bulk of the receipts are obtained from the "Sale of malt liquor", and this was exceptionally large in the Eastern and Western Circles during the year, while there was a decline in the Madras and Bombay circles. The adjustment of some arrear receipts in Madras and unusually large supplies to other departments (chiefly Port Blair settlement and Public Works Department, Burma,) swelled the receipts from the "Sale of provisions and stores". The "Sale of rum", in the Bengal circles was also larger than was expected. There was, on the other hand, a decrease in the "Khedda Receipts" (owing to fewer

Section L.—ARMY SERVICES—RECEIPTS—*continued.*

XXXIII.—Army—*continued.*

elephants having been captured and sold), in the "Receipts from grass cultivation" and from the "Sale of transport cattle," and in the receipts under "Other heads" owing to recoveries of service payments of previous years having been adjusted by deduction from expenditure.

396. *Remount and Veterinary* receipts were specially high in 1892-93, owing to exceptionally large sales of remounts and to a special credit of 24,5 for value of horses taken to Egypt by the 7th Dragoon Guards and recovered from the War Office. In 1893-94 a credit had to be afforded to the latter on account of depreciation on the value of the horses, by deduction from the other receipts of the year, but the falling off from the Budget Estimate due to this was more than counterbalanced by increased receipts from more castings of remounts, and from larger sales of chargers to officers.

397. The Budget Estimate under *Clothing Establishments* was exceeded owing to larger sales of necessaries to officers and men and other public departments, and to credit having been taken for the value of Europe stores supplied to the Hong-Kong Regiment and to the Military Police Battalion, South Lushai Hills. There were also large supplies to the Hyderabad Contingent—the supply in the previous year having been very small.

398. Under *Medical Establishments, etc.*, the increase was due to the adjustment of medical stores issued in the previous year to dispensaries in Madras, to heavy demands by Cantonment hospitals and to large issues of Europe stores to Civil hospitals.

399. Under *Ordnance Establishments, Stores, etc.*, the falling off is due to the value of Europe stores returned by other Departments having been far in excess of those issued, but this was partly counterbalanced by a substantial increase in the recoveries from the Hyderabad Contingent, due to the supply of Martini-Henry carbines and magazine and other stores.

400. The receipts under *Sea Transport Charges* declined owing to the abolition of ration stoppages from soldiers on boardship, to recoveries for rum rations having been paid for in cash before disembarkation, and to recoveries of tablemoney from officers having been less than was expected.

401. Under *Miscellaneous Services* there were heavy recoveries in the previous year in connection with field operations. There were similar but smaller recoveries in 1893-94 also, though they were not anticipated when the Budget Estimate was framed. The excess due to these recoveries was, however, partly counterbalanced by a falling off in fines and confiscations of security deposits.

402. Smaller recoveries for medals supplied to the Burma Military Police led to a decrease in the receipts under *Rewards for Military Services* while those under *Widows' Pensions and Compassionate Allowances* were swelled by larger contributions to Indian Military Service Family Pension Funds due partly to the large number of admissions and marriages, and partly to subscriptions paid in sterling having realised more in Indian currency than was anticipated, owing to a fall in the rate of exchange.

403. The Budget Estimates of the receipts in England were exceeded both under Effective and Non-effective Services. The excess under *Effective Services* is due to an increase of 11,9 in the value of articles in possession of regiments on their transfer from the Indian to the British Establishments, and of 1,5 in the receipts on account of the Indian Troop Service. The excess under *Non-effective Services* is due to an under-estimate of the growth of Indian Military Service Family Pension Fund subscriptions.

Army and Garrison Staff.

404. The expenditure under Army and Garrison Staff is distributed as follows :—

1892-93. Accounts.		Budget.	1893-94. Revised.	Accounts.
52,4	Commander-in-Chief	53,0	49,0	46,4
46,6	Adjutant General	48,2	49,6	50,1
12,8	Artillery Branch	13,9	14,8	15,1
3,6	Cavalry Branch	3,5	3,8	4,1
23,0	Musketry Inspection	26,4	26,4	25,2
52,7	Quarter Master General	55,6	56,0	55,8
3,8	Gymnastic Instruction	3,9	4,2	4,3
3,1	Army Signalling	3,0	3,0	3,4
180,7	District Commands	183,1	188,3	190,0
58,9	Garrison and Station Staff	62,1	63,6	62,6
26,1	Hill Sanitaria	27,3	29,0	27,6
11,3	Miscellaneous Depôts	11,4	11,6	11,4
9,8	Staff of Local Forces	10,3	11,1	10,4
2	Bazaar Establishment	2	2	2
18,9	Station Conservancy	23,6	20,9	20,4
3	Staff Miscellaneous	3	3	3
504,2		525,8	531,8	527,3

405. The increase over the actuals of the previous year is more than accounted for by the charges on account of Exchange Compensation Allowance amounting to 27,3. Compared with the Budget Estimates there was an excess also in the charges under *District Commands* owing to heavy travelling and out-station allowances and large supplies of maps in Bombay by the Civil Department, under *Garrison and Station Staff* owing to heavy telegram charges in connection with the occupation of Upper Burma, and under *Miscellaneous Depôts* owing to arrear charges in connection with the experimental use of the Karachi route. The excesses due to these causes as well as to the grant of Exchange Compensation Allowance were, however, very nearly counterbalanced by savings notably under *Commander-in-Chief*, due partly to reduced tour expenses of the Commander-in-Chief in India, and partly to the appointment of Provisional Commanders-in-Chief in Bombay and Madras, during portions of the year; under *Adjutant General*, due to officiating arrangments in Madras and Bombay and small contingent expenditure in the former circle; under *Musketry Inspection*, due to officiating arrangements and lower rank of the Assistant Adjutants General for Musketry, and to smaller charges for musketry instruction classes; under *Quarter Master General*, due to savings in the establishment in connection with the experimental use of the Karachi route, to smaller travelling and out-station allowances in Bengal, and contingent expenses in Madras, and to officiating arrangements in the Intelligence Branch; under *District Commands* due to the absence of officers on furlough, and to an over-estimate of the contingent expenditure in Madras; under *Garrison and Station Staff*, due to officiating arrangements, lower rank of station staff officers, abolition of the Ruby Mines Command and reduction of the Bernardmyo station from 3rd to 4th class; under *Hill Sanitaria* owing to the abolition of the appointment of Station Staff Officer at Purandhar, to fewer pukhalies having been maintained in Madras, and to the pay of the Commandant Wellington Depôt for January and February 1894 having been adjusted in the following year; under *Miscellaneous Depôts* due to officers of lower rank having been in charge of Depôts in Madras; under *Staff of Local Forces* due to the absence on leave of the General Officer Commanding the Punjab Frontier Force, and under *Station Conservancy* due chiefly to smaller grants-in-aid to Cantonment Funds in Bengal.

Administrative Staff.

406. This head includes the charges for the Personal Staff of the Governor General, Governors, and Lieutenant-Governors, and for the Military Accounts Department. The excess over the actuals of the previous year is due chiefly to Exchange Compensation Allowance amounting to 5,2, and to the Superintendent of Pensions, Madras, having made numerous inspections involving larger outlay on travelling and out-station allowances; but compared with the Budget Estimate the increase due to these causes was counterbalanced by savings, due chiefly to the lower ranks of Aides-de-Camp, to absence of officers on furlough, to recoveries of advances of pay made by the India Office, and to changes in the personnel of the Military Account Department.

Section L.—ARMY SERVICES—EXPENDITURE—*continued.*

Regimental Pay.

407. Under this head the total charges exceed the Budget Estimate by 254,3, of which 171,7 is accounted for by Exchange Compensation Allowance. The figures relating to the European and Native armies are as follows :—

1892-93. Accounts.		Budget.	1893-94. Revised.	Accounts.
3,499,3	European Army	3,791,0	3,933,0	3,953,4
3,827,8	Native Army	3,844,3	3,901,2	3,936,2
7,327,1	TOTAL	7,635,3	7,834,2	7,88,96

408. The details of the principal sub-heads of the European army are given below :—

1892-93. Accounts.		Budget.	Revised.	1893-94. Exchange Compensation.	Accounts. Other charges.	TOTAL.
865,8	Artillery	971,9	992,8	21,8	972,8	994,6
366,2	Cavalry	375,4	386,7	9,1	379,1	388,2
6,1	Engineers	4,9	6,5	5	7,6	8,1
2,207,2	Infantry	2,367,2	2,473,3	50,3	2,445,8	2,496,1
6,9	Invalid and Veteran Establishment	6,7	6,5	2	6,4	6,6
20,6	Staff Corps, General List of Officers, Unattached and Unemployed Officers	23,4	24,2	1,8	26,7	28,5
3,6	Colonel's Allowances	8,8	5,6	1	—2,8	—2,7
22,9	Other Charges	32,7	37,4	5	33,5	34,0
3,499,3	TOTAL	3,791,0	3,933,0	84,3	3,869,1	3,953,4

409. The charges on account of Exchange Compensation Allowance have been shown separately. As regards the other charges, under *Cavalry* the estimated savings on account of the absence of officers in England were not fully realised, while a large number of unemployed engineer officers swelled the charges under *Engineers*. Under *Infantry*, the Budget was considerably exceeded owing to relief arrangements, to excess over established strength of troops in India (instead of a deficiency as anticipated), and to savings on account of absence of officers on furlough not having been realised to the extent estimated. There were more *Unemployed General Officers and Officers of the Staff Corps* and they were of higher ran than budgetted for, and the provision for bounty money proved insufficient owing to the allowance having been sanctioned during the year to certain regiments for extension of their service in India. There was, on the other hand, a saving under *Colonel's Allowances* owing to these allowances not having been drawn in India to the extent estimated, and to a transfer adjustment on account of officers lent to the Hyderabad Contingent, and there was a reduction in the strength of *Sub-marine Mining* non-commissioned officers. As compared with the actuals of the past year the increase is due partly to the rate of exchange for the payment of British troops in India having been fixed for the year at 1*s.* 2$\frac{3}{4}$*d.* against 1*s.* 4$\frac{3}{4}$*d.* in 1892-93, and partly to the transfer to this head of charges on account of *Sub-marine Mining* from Miscellaneous Services.

410. The details of the principal sub-heads under the Native Army are as follows :—

1892-93. Accounts.		Budget.	Revised.	1893-94. Exchange Compensation Allowance.	Accounts. Other Charges.	TOTAL.
48,9	Artillery	48,6	49,4	1,4	49,0	50,4
13,5	Body-Guard	13,6	13,7	¼	13,5	13,9
1,242,5	Cavalry	1,235,6	1,252,8	21,6	1,240,4	1,262,0
115,6	Sappers and Miners	119,8	120,2	3,2	117,5	120,7
2,232,9	Infantry	2,225,8	2,270,0	60,3	2,237,5	2,297,8
46,6	Annual grant-in-aid of half-mounting	57,0	57,5	...	53,8	53,8
38,4	Kit-money and Recruits	38,4	44,4	...	40,1	40,1
28,2	Hutting-money	46,9	27,4	...	22,2	22,2
42,7	Reserve Forces	31,0	39,2	...	50,6	50,6
18,5	Other Charges	27,6	26,6	5	24,2	24,7
3,827,8		3,844,3	3,901,2	87,4	3,848,8	3,936,2

Section L.—ARMY SERVICES—EXPENDITURE—*continued.*

Regimental Pay—*continued.*

411. Excluding the variations due to Exchange Compensation Allowance, the Budget Estimate was exceeded by the actuals under *Artillery*, *Cavalry* and *Infantry*, due to arrear charges, high regimental rank of officers in certain regiments, and to large advances drawn by certain Bombay Infantry regiments in March 1894, under *Kit money and Recruits*, in consequence of more enlistments in Baluch regiments and Burma battalions, and under *Reserve Forces* owing to large payments having been made to reservists in Bengal called out for annual training. On the other hand, there were savings on the Budget Estimates under *Annual Grant-in-aid of half-mounting* due to over-estimate, under *Hutting money* owing to a provision of 18,8 for lines at Mirpur not having been required, and to the charges for re-construction of Native Infantry lines at Benares having been less than estimated, and under *Other Charges* owing to small expenditure on account of "Batta" and "Incidental charges of a regimental nature." As compared with the actuals of the previous year the excess was due chiefly to the transfer of the charges for *Submarine Mining* and *Recruiting Depôts* to this head.

Commissariat Charges.

412. The details are classified as follows:—

1892-93. Accounts.		Budget.	1893-94. Revised.	Accounts.
499,9	Establishment	527,3	527,4	513,9
1,705,3	Supplies	1,585,9	1,626,8	1,629,4
1,016,8	Services	890,5	954,5	918,7
442,1	Transport Branch	379,4	355,7	340,8
3,664,1	TOTAL	3,383,1	3,464,4	3,402,8

The details of the expenditure under *Establishment* are given below:—

35,1	Supervising Staff	38,4	40,3	38,1
235,5	Executive Establishment	243,3	244,6	244,4
46,7	Ambulance Transport	45,9	45,8	46,2
170,3	Subordinate Establishment	186,9	183 7	173,8
9,3	Khedda Establishment	8,9	8,9	8,8
3,0	Other Heads	3,9	4,1	2,0
499,9		527,3	527,4	513,9

413. Charges on account of Exchange Compensation Allowance amounting to 11,6, as well as large expenditure under travelling and out-station allowances and extra establishments for rationing troops in Chin Hills chiefly account for the excess over the actuals of the previous year. As compared with the Budget Estimates, the excess, due to the above causes, was more than made up for by savings, under salaries due to absence of officers on furlough, by a deficiency in the number of ambulance elephants and cattle, by reduced charges under Regimental and Godown Establishments and Marching allowances by a large number of transport mules having been available for water duty and by the transfer of many cattle in connection with the Chilas-Abbottabad-Khagan road, the charges in connection with which have been compiled under Miscellaneous Services.

414. Under *Supplies* the details are as follows:—

1892-93. Accounts.		Budget.	1893-94. Revised.	Accounts.
745,9	Provisions for Europeans	723,0	723,4	731,7
223,4	Provisions for Natives	217,9	242,1	233,2
	Compensation to Natives—			
361,0	(*a*) for dearness of provisions	273,5	297,5	273,7
73,3	(*b*) for dearness of forage	69,0	48,5	32,0
27,3	Purchase of Reserve Stock	45,3	29,0	30,7
270,7	Malt Liquor purchased locally	240,6	272,5	317,1
3,4	Rum	12,4	11,5	9,3
2,2	Dairy Farms	2,8	1,8	1,6
1	Contingent Expenses	1,4	5	1
1,705,3		1,585,9	1,626,8	1,629,4

415. There is a total excess of 43,5 over the Budget Estimate due to large expenditure under "Provisions" and "Malt Liquor purchased locally," partly counterbalanced by savings in the other heads. Under "Provisions for Europeans," the increase is due to high rates of supplies in the Western Circle, Bengal and Madras, to excess strength of troops in Bengal and Madras, to arrear charges in connection with Upper Burma, and for tinned meat received from the Colonies in 1892 93, partly counterbalanced by a saving in Bombay, due to the withdrawal of a battalion of British Infantry from the Indian Establishments, to the closing of the Government Flour Mills, and to the abolition of the cattle farm at Alligaum. The increase under "Provisions for Natives" is almost wholly due to charges for provisioning the 28th Bombay Pioneers and Madras Sappers and Miners employed on road-making in Assam, and to additional Bombay troops having been quartered in the Quetta District. The increase was largest under "Malt Liquor purchased locally" due to high Rupee prices in consequence of low exchange and to large demands in Bengal and Bombay, partly counterbalanced by small purchases in Madras, owing to certain regiments making their own arrangements. The excesses under the above heads were largely met from savings in the other heads. There was less compensation paid for dearness of forage owing chiefly to the supply of grass from Government farms and by the Commissariat Department, and to the low prices of grain and grass in Bengal and Bombay. "Purchase of Reserve Stock" shows a saving chiefly due to charges for replenishment of compressed fodder having been compiled under *Services*—"Other heads." The decrease under "Rum" is due to small purchases in Madras and to issues from stock in Bombay, while that under "Dairy Farms" is accounted for by the abandonment of the Kamptee farm and by the more economical working of the Aden and Jubbulpur farms. Contingent charges were also estimated too high, the decrease compared with the previous year is due chiefly to small charges for compensation for dearness of provision and forage owing to lower prices for grain and grass.

Section L.—ARMY SERVICES—EXPENDITURE—*continued.*

Commissariat Charges—*continued.*

416. Under *Services* the following details are supplied:—

1892-93. Accounts.		Budget.	1893-94. Revised.	Accounts.
129,6	Hire of Transport	76,7	92,0	60,7
42,0	Sea and Inland Water Charges	34,1	34,1	32,0
418,5	Railway Charges	384,5	412,5	413,3
50,2	Grass Cultivation	62,3	58,1	62,0
261,9	Feed of Horses, Battery Mules, Yaboos, Bullocks, and Elephants	222,2	230,5	239,3
10,7	Regimental Equipment and Camp Contingencies	12,2	11,7	11,8
42,2	Implements, Godown Furniture, etc.	34,0	41,5	45,2
61,7	Other Heads	64,5	74,1	54,4
1,016,8		890,5	954,5	918,7

417. There was an excess of 28,2 over the total Budget Estimate, which occurred chiefly under "Railway Charges," "Feed of Horses, etc.," and "Implements, Godown Furniture, etc.," counterbalanced by savings in the other heads. The excess Under "Railway charges" is due to a larger number of Native soldiers having proceeded on furlough, to more frequent movement of British troops, and the despatch or larger quantities of stores by the rail route, which resulted in savings under "Sea and Inland Water Charges" and "Hire of Transport," Government transport having been only partly used. The excess under "Feed of Horses, etc.," is due to high contract rates for grain and forage in Madras and Darjeeling, to large purchases in consequence of a deficiency in the grass-cutters' establishment in Madras, to laying in of large stocks, and to the issue of kurby instead of rumna grass and paddy straw to horses at Secunderabad. Charges for "Implements, Godown Furniture, etc.," were under-estimated, while under "Other heads" the excess due to the transfer of charges for compressed fodder to this head from *Supplies*, has been more than met by savings from reduced purchases of warm clothing, less toll charges for landing and embarkation, smaller purchase of cattle for the Hissar Cattle Farm and from the feeding of the cattle there with the produce of the farm, a part of which was also leased out to private individuals on the hire system.

418. The Details of the charges in the *Transport Branch* are as follows:—

1892-93. Accounts.		Budget.	1893-94. Revised.	Accounts,
350,2	Depôt and Regimental	341,1	347,5	335,0
5,3	Ambulance Transport	8,3	8,2	5,8
86,6	Transport-Kashmir	30,0	...	...
442,1	TOTAL	379,4	355,7	340,8

419. The expenditure incurred by Captain Yeilding for Transport—Kashmir—has been compiled under Miscellaneous Services, though provided for under this head. The savings in "Depôt and Regimental" transport was due partly to the purchase of a smaller number of animals (an additional grant of 5,9 for purchase of mules to replace cast animals was not also utilised), and partly to less feeding charges owing to a large number of mules having been sent up for the Chilas-Abbottabad-Khagan road, (the charges for

Section L.—ARMY SERVICES—EXPENDITURE—*continued.*

Commissariat Charges—*continued.*

which have appeared under Miscellaneous Services,) and owing to a deficiency in the authorised complement of cattle. A smaller complement of ambulance elephants and fewer condemnations of transport gear account for the saving under Ambulance Transport.

Remounts and Veterinary.

420. The details are given below :—

1892-93. Accounts.		Budget.	1893-94. Revised.	Accounts.
3,1	Supervising Staff	3,2	3,3	3,1
23,7	Depôt Establishments	23,9	25,7	26,4
8,6	Veterinary Inspection	9,4	9,7	9,8
29,0	Station Veterinary Hospitals	33,9	32,6	32,0
4	Veterinary Schools	2	2	2
2,5	Remount Depôt, Garden Reach	2,5	2,1	2,2
133,9	Purchase of Remounts	141,3	160,1	146,8
40,1	Feed of Cattle and Remounts	35,9	33,5	35,4
35,1	Miscellaneous	32,0	30,8	41,4
276,4		282,3	298,0	297,6

421. The actuals exceeded the Budget Estimate in the aggregate by 15,3 of which 3,7 was due to Exchange Compensation Allowance, and the remainder occurred in *Depôt Establishments, Purchase of Remounts* and *Miscellaneous*. The increase in *Depôt Establishments* was due to the anticipated savings not having been realised, and to changes in the native establishments of the Remount Depôt, Garden Reach. The excess under *Purchase of Remounts* was due to the purchase of additional horses to replace those taken to Egypt by the 7th Dragoon Guards, and to enhanced rates for remounts, for which additional grants amounting to 20,8 were sanctioned during the year. The excess was to some extent counterbalanced by lower rates having been paid for young stock, which were also not bought to the extent provided for, and by the purchase of a smaller number of mules for Mountain Batteries and ponies for Mounted Infantry, Burma. The road expenses of the additional horses and extra charges for extensive transfers of remounts and young stock from depôts led to the excess under *Miscellaneous*. On the other hand, there was short expenditure under *Station Veterinary Hospitals*, due chiefly to a short complement of veterinary officers. Under *Feed of Cattle and Remounts* there was an excess partly on account of the additional horses and partly owing to contract rates in Madras for grain and fodder having been higher than anticipated, but the excess was nearly counterbalanced by savings in the feed of cattle and remounts, owing to an abundant supply of forage in Bengal.

Clothing Establishments.

422. The charges fall under the following sub-heads :—

1892-93. Accounts.		Budget.	1893-94. Revised.	Accounts.
8,7	Superintending Establishments	9,2	9,3	9,3
5,6	Manufacturing and Store Establishments	6,0	6,0	5,6
	Supplies and Services—			
137,4	Factories	112,2	124,8	115,9
20,1	Regimental	27,5	28,0	25,0
77,9	Compensation in lieu of clothing	110,5	97,2	86,8
249,7		265,4	265,3	242,6

423. The savings occurred chiefly under *Compensation in lieu of Clothing*, due to time-expired men and invalids not being allowed compensation, and to compensation for white clothing not being admissible to troops in India. There was also a small saving under *Regimental Supplies and Services*, due to many regiments having made their own arrangements for summer clothing for drafts arriving during the year, but this was more than made up by an excess under *Supplies and Services—Factories*, due to purchase of cotton cloth and serge from local mills, and to excess expenditure for supply of helmets to British troops for which no provision was made.

Section L.—ARMY SERVICES—EXPENDITURE—*continued.*

Barrack Establishments.

424. The following are the details under this head :—

1892-93. Accounts.		Budget.	1893-94. Revised.	Accounts.
3,4	Executive Establishments	3,5	3,4	3,6
69,3	Subordinate Establishments	64,2	65,9	64,0
9,9	Barrack Furniture	8,3	9,2	9,5
57,3	Barrack Bedding	58,6	58,0	52,9
40,2	Lighting Charges	37,2	37,1	37,4
61,5	Miscellaneous	52,4	55,0	63,2
241,6		224,2	228,6	230,6

425. The excess is due chiefly to heavy *Miscellaneous Charges* notably for purchase of coal to be stocked at Quetta and for firewood. There was an increase under *Barrack Furniture* in Madras, but there were larger savings due to smaller purchase and repair of *Barrack Bedding*.

Medical Establishments.

426. The charges are classified under the following heads :—

1892-93. Accounts.			Budget.		1893-94. Revised.		Accounts.	
	Medical Establishment—							
22,2	Head-Quarters and Circles		23,1		23,9		23,8	
398,4	Districts		396,2		415,9		426,1	
11,0	Nursing Service		12,7		12,0		11,1	
25,6	Army Hospital Charges		27,5		26,5		26,4	
18,2	Medical Store Depôts		18,9		19,0		18,9	
2,3	Followers' Hospitals		2,1		2,1		2,0	
12,4	Miscellaneous		27,2		21,7		14,2	
220,3	Medical Supplies	214,1		213,6		229,8		
	Deduct—							
31,6	Issues to other Departments	26,5		27,5		29,9		
188,7			187,6		186,1		199,9	
678,8			695,3		707,2		722,4	

427. There was an increase of 27,1 over the Budget Estimate and of 43,6 over the actuals of 1892-93, due principally to the grant of Exchange Compensation Allowance amounting to 26,6, to too large a deduction having been made for probable savings under *Medical Establishment—Districts* and to larger *Medical Supplies*, owing to larger admissions into hospitals, to laying in of stock and to larger supplies to other Departments. As compared with Budget Estimate, these excesses were considerably brought down partly by vacancies in the staff of the *Nursing Service* and of the *Army Hospital Corps*, but chiefly by savings under *Miscellaneous*, owing to the provision for new Cantonment General Hospitals not having been utilised in full, a grant of about 5,0 having been transferred to the Military Works Department, and to smaller grants-in-aid to Cantonment Hospitals.

Ordnance.

428. The charges are sub-divided below :—

1892-93. Accounts.		Budget.	1893-94. Revised.	Accounts.
	ESTABLISHMENTS—			
32,9	Supervising Staff	34,8	36,6	36,4
183,3	Arsenals and Depôts	183,9	185,4	187,3
187,6	Factories	204,2	200,5	194,8
15,8	Fort Armaments	10,5	11,3	11,4
	STORES—			
114,2	For Arsenals and Depôts	137,9	137,9	142,0
148,6	For Factories	237,3	151,4	166,6
14,1	Freight	9,0	11,5	13,3
72,7	Camp Equipage	61,1	61,0	51,7
26,2	Line Gear	19,0	20,5	21,7
37,1	Other Charges	34,9	35,6	35,9
	Deduct—			
42,3	Supplies to other Departments	30,5	32,8	31,0
790,2		902,1	818,9	830,1

Section L.—ARMY SERVICES—EXPENDITURE—*continued.*

Ordnance—*continued.*

429. Under *Establishments* the saving of 3,5 on the Budget Estimate occurred chiefly in the *Factory Establishments* as temporary artificers, and others were not entertained to the extent provided for owing to smaller manufactures and to the manufacture of ·303 ammunition having been delayed in consequence of the non-supply of cordite. The saving has been much reduced by the grant of Exchange Compensation Allowance, amounting to 11,4.

430. The principal savings, however, occurred under *Stores for Factories* (70,7) and *Camp Equipage* (9,4). Under the former head the savings were due to the substitution in the Foundry and Shell Factory, Cossipore, of copper scissel procured from the Mints for Wallaroo copper, to fewer hides having been purchased for the Harness and Saddle Factory for want of pits, to restricted supply of saltpetre grough and less manufacture of black powder, counterbalanced partly by increased expenditure in the Gun Carriage Factory, Bengal, owing to purchase of stores for the manufacture of platforms, etc., for the guns and howitzers of the North-Western Frontier Defences, and in the Madras Factory on account of the purchase of a large quantity of coal. Under the second head camp equipage was not purchased and repaired to the extent expected. These savings were partly counterbalanced by larger supplies of *Stores for Arsenals and Depôts*, chiefly in Bengal and Bombay, and partly by heavy *Freight* charges in consequence of large consignments of stores from England, and of increased shipments from port to port in India, and by larger purchases of local stores in Madras and Bombay for making up *Line Gear*.

Other Effective Charges.

431. Charges for *Administration of Martial Law* were lower owing to the lower regimental rank of officers and to officiating arrangements, partly counterbalanced by Exchange Compensation Allowance (1,4) and by larger charges on account of Military prisons.

432. *Education Charges* were higher by 2,9, owing to increased expenditure on books and Exchange Compensation Allowance (1,4).

433. The figures under *Miscellaneous Services* may be sub-divided as follows :—

1892-93. Accounts.		Budget.	1893-94. Revised.	Accounts.
16,1	Sub-marine mining	...	...	...
257,3	Expeditions and special charges	177,0		219,9
148,2	Other Items	117,8	...	105,3
421,6		294,8	382,0	325,2

The charges for "Sub-marine mining" have been adjusted with effect from 1893-94 under *Regimental Pay Allowances and Charges*. The following are the details of the special expenditure, for which 177,0 was provided in the Budget, and for which additional grants, amounting to 71,5, were sanctioned during the course of the year :—

	Budget.	Additional Grants.	1893-94. Accounts.
Arrear charges on account of the late—			
Chin-Lushai Expedition	...	...	4
Miranzai Expedition	...	...	1
Manipur Expedition	...	...	1,5
Isazai Field Force	...	...	1,5
Charges for—			
Kajuri Kach Force	80,0		22,0
Kurram Escort	74,0		30,2
Lushai			7,4
South Lushai	10,0	7,5	2,9
Chin Hills Operations	10,0		15,8
Kachin Operations		10,0	3,5
Abor Expedition			1,0
Gilgit Agency	3,0	48.2	130,7
Kengtung-Kengchung Expedition		1,8	2,9
Kelat		4,0	...
	177,0	71,5	219,9

434. Under "Other Items" there was an increase of about 5,0 on account of compensation for losses and for Moonshee allowance to officers and men on passing in native languages. On the other hand, there were

Section L.—ARMY SERVICES—EXPENDITURE—*continued.*

Other Effective Charges—*continued.*

considerably larger savings, duechiefly to smaller printing charges in Madras and Bombay, as army and other forms were obtained from the Contractor for Government Printing, the cost of which is borne by Civil, to no charges having been incurred for the purchase of land for camping grounds, Hooghly Defence, to reduced charges for telegrams and contingencies and to the grants for camps-of-exercise not having been fully utilised.

435. Under *Volunteer Corps* the excess over the Budget Estimate is chiefly due to the grant of Exchange Compensation Allowance (2,8), to the appointments of Instructor, Calcutta Naval Volunteers, and Paid Adjutant, Bengal State Railway Volunteer Rifle Corps, to the fall in the rate of exchange affecting the pay of Non-Commissioned Officers, to heavier travelling and out-station charges, and to larger amount of capitation allowances due to increased numerical strength. These were, to a small extent, counterbalanced by fewer camps-of-exercise having been held.

Non-effective Charges.

436. Under *Rewards for Military Services* the charges for Decorations and Medals were less than anticipated by 1,7.

437. *Military Pensions to Europeans* show a saving of 7,2, chiefly due to a transfer adjustment of the retired pay of officers lent to the Hyderabad Contingent, to casualties and transfers among pensioners, and to payments for wound pensions and gratuities. There is, however, an excess of 6,3 under *Military Pensions to Natives*, due to increased charges for pensions to Native officers and men of the Native army, as well as for native family pensions, and to larger compensation for dearness of provisions in Madras, owing to a rise in the price of rice, partly counterbalanced by reduced charges under gratuities. The Budget Estimate proved slightly too high under *Widows' Pensions and Compassionate Allowances*, due to casualties, re-marriages, and transfers of pensions to England.

Expenditure in England.

438. *Home charges of British Officers serving in India* show considerable savings owing to charges for deferred pay being less than anticipated, partly counterbalanced by a slight increase in furlough allowances. The actuals of the previous year included a payment of 212,4 to the War Office on account of arrears. The break down of the troopship *Crocodile*, and the conseqent employment of hired transports, caused an excess under *Indian Troop Service*. A smaller number of officers, than was estimated, had to be provided with *Passages otherwise than in Troopships*. The increase under *Miscellaneous* is chiefly in the expenses of the Native Guard-of-Honor attending the opening of the Imperial Institute. Under *Stores* there were decreases of 35,4 in Clothing, 8,3 in Medical, and 3,6 in Commissariat stores, partly counterbalanced by an increase of 4,2 in Ordnance Stores.

439. Under *Retired Pay, etc., of British Forces on account of Service in India* the increase was due chiefly to enhanced cost of commutation of soldiers' pensions.

Upper Burma Charges.

440. The details of the extra charges for Upper Burma during the year, which amounted to 458,2 against 502,6 in 1892-93, are given below. The Upper Burma charges include 7,8 on account of cold weather field operations and 76,2 on account of Chin-Lushai :—

Grants.	Upper Burma. Accounts. 1892-93.	1893-94.
Army and Garrison Staff	16,1	30,6
Administrative Staff	6,4	8,4
Regimental Pay, Allowances, and Charges	8,2	40,9
Commissariat Establishments, Supplies and Services	406,9	312,6
Remount and Veterinary Establishments, Supplies and Services	1,2	2,7
Clothing Establishments, Supplies and Services	3	1.0
Barrack Establishments, Supplies and Services	4,5	5,0
Administration of Martial Law	...	...
Medical Establishments, Supplies and Services	17,5	26,6
Ordnance Establishments, Stores and Camp Equipage	—8,9	—1,6
Ecclesiastical	6	8
Sea Transport Charges	8,5	7,1
Miscellaneous Services	36,9	20,0
Volunteer Corps	1	2,5
Rewards for Military Services	3,5	9
Military Pensions	8	7
Total	502,6	458,2

Section L.L.—SPECIAL DEFENCE WORKS—EXPENDITURE.

47.—Special Defence Works.

1892-93. Accounts.		Budget.	1893-94. Revised.	Accounts.
458,0	EXPENDITURE . . .	536,6	342,0	325,0

441. The expenditure during 1893-94 fell short of that of the previous year by 133,0. The decrease occurred chiefly in the expenditure in India, and was due to the approaching completion of various projects and to a smaller programme of works during 1893 94. The short outlay, as compared with the Budget Estimate, is attributed to the expenditure in England for armaments and stores having been over-estimated and to a reduced programme of works in India.

442. The distribution of expenditure is noted below :—

1892-93. Accounts.		Budget.	1893-94. Revised.	Accounts.
255,7	India	252,3	163,3	163,0
126,3	England	174,7	108,7	98,2

443. The figures shown under this head represent the surplus or deficit of each Provincial Government in respect of the revenues and charges assigned to it, including Incorporated Local Funds. The differences between the Estimates and Accounts under the various Revenue and Expenditure heads have been explained in detail in the foregoing pages, and the share of these pertaining to the Provincial and Local sections of the accounts for the several groups is given below separately for each province. The total Provincial share of the Revenues was on the whole, better than the Budget by 345,2, and the Local worse by 157,7. The expenditure was in both cases less by 68,9 and 183,5 respectively, consequently the Provincial and Local balances were better than expected by 345,2 + 68,9 or 414,1 and

Section M.—PROVINCIAL ADJUSTMENT—*continued.*

—157,7 + 183,5 or 25,8, respectively. The Budget anticipated that there would be deficits in the Provincial and Local accounts to the extent of 551,9 and 199,3 respectively, and as there were improvements of 414,1 and 25,8 over the Budget as just shown, the balances were diminished during the year by (551,9 —414,1) 137,8 and (199,3 —25,8) 173,5 respectively, or, taken together, the actual decrease in the balances in the course of the year amounted to 137,8 + 173,5 or 311,3 as shown above. With the exception of Madras, where there was a considerable decline in the Local section under Provincial Rates, the improvement was contributed by all the Provinces. The largest improvement occurred in Bombay, chiefly in the Principal Heads of Revenue, and in the expenses of the Civil Departments as well as in the charges under Buildings and Roads. Bengal also showed a considerable improvement under the Principal Heads of Revenue, Railways, and Buildings and Roads. The improvements in the other Provinces do not call for special notice.

1892-93. Accounts.		Budget.	1893-94. Revised.	Accounts.
3,986,3	EXPENDITURE	3,550,0	3,643,1	3,621,3

444. In 1892-93 the total capital expenditure on Railways and Irrigation Works shown under 48 and 49 was limited to 3,500,0, *plus* the actual expenditure during the year on the Bareilly-Rampur-Moradabad Railway and the Jherria Extension of the East Indian Railway, and the remainder of the total capital expenditure was shown partly under Famine Insurance, and partly under "37.—Construction of Railways." In 1893-94 the programme for capital expenditure was placed at 4,604,3, and the limits to the amount to be shown under this head were the same as in 1892-93. The following table shows the comparison of the whole of the capital expenditure with the Estimates of the year and the actuals of the previous year:—

1892-93. Accounts.		Budget.	1893-94. Revised.	Accounts.
984,5	34.—Construction of Protective Railways	1,054,3	1,079,7	1,060,9

4,640,9	TOTAL .	3,854,3	4,027,4	4,000,5

446. As regards the *Lines under Construction*, the grant for the Godhra-Rutlam Railway was exceeded owing to the works having been pushed forward with a view to the early completion of the line. The lapse in the grant for the Mu Valley Railway is due to the adoption of second-hand rails in one division of the line in lieu of new rails as originally provided for, to sickness during the working season, and to difficulty in procuring carts for carriage of material. On the Bareilly-Rampur-Moradabad Railway the programme of operations was expanded as additional funds were made available. The grant for the Mari-Attock Railway was exceeded in consequence of work done prior to 31st March 1893, but not paid for in 1892-93, having had to be paid for during the year. The payments on account of compensation for land were also larger than was originally provided for. The grant for the East Coast Railway was increased during the year and work was pushed on to a greater extent than was provided for in the Budget Estimate. More payments were made on account of the acquisition of land for the Assam-Bengal Railway than was anticipated at the time the Budget Estimate was prepared.

447. As regards the *Open Lines*, the large expenditure on the East Indian Railway is due to heavier outlay on engines and tenders, to an increase in stores balances for which additional funds were specially provided during the year, and to a special debit of 82,3 on account of the cost of providing an additional sleeper to each 30 feet rail incurred to the end of 1892-93. The excess over the grant for the Burma Railway is mainly due to the purchase of rails for relaying on the Sittang district. The cost of the rails remained at the debit of stores at the close of the year, as they arrived too late to admit of their being issued and charged to Revenue. The lapse in the grant for the Eastern Bengal Railway is due principally to a special credit for depreciation charges on steamers lent to the India General Steam Navigation Company, and to an under-estimate of the issues of stores to Revenue. The lapse in the grant for the Oudh and Rohilkhund Railway is due to the introduction of Pintsch's system of lighting, having been deferred. On the North-Western Railway large expenditure was incurred on the lining of the Khojak tunnel, and the credits from Revenue on account of permanent-way and workshop charges were less than was anticipated. On the South Indian Railway the outlay on Rolling Stock was less than was at first provided for, and the indents for English stores were not fully complied with. The lapse in the grant for the Guntakal-Mysore Frontier Railway is due to credits obtained from the South Indian Railway for permanent way and bridge materials.

448. On *Other Railways* the principal lapse is due to work on new pits at the Warora Colliery being held in abeyance, and to machinery not having arrived from England during the year. There is also a lapse on the grant for the Umaria Colliery due to a special writeback of the cost of coal in stock on the 31st March 1893, which was debited to stores by credit to Revenue in 1892-93. The lapse on *Stores* is due to the expenditure in England having been less than estimated.

5,8	England	8,8	14,0	13,1
3,5	Exchange	5,5	9,0	8,5

449. The increase in the expenditure during 1893-94, as compared with that of 1892-93, was due to a larger grant having been made available for expenditure in 1893-94 under this head. The decrease, as compared with the Budget and Revised Estimates, was due partly to the requirements of the canals in Bengal and the North-Western Provinces and Oudh having been over-estimated, and partly to the delay in the submission of the Estimate for the Jamrao Canal, in consequence of which work on the project could not be commenced during the year.

Temporary Loans Discharged	...	4,750,0	4,750,0
	...	6,000,0	6,000,0

450. Detailed explanation of the various entries under this head has already been given on page 38 when the interest charges were being considered.

Section P.—UNFUNDED DEBT.

	Budget.	1893-94. Revised.	Accounts.
Special Loans	−2	−3	−4
Treasury Notes and Service Funds, India	+43,9	+43,5	+46,5
Savings Bank Deposits	+838,5	+555,2	+513,9
TOTAL	+882,2	+598,4	+560,0

451. The first two heads do not call for any special remarks. The details of *Savings Bank Deposits* are as follows :—

	Budget.	Revised.	Accounts.
Presidency Savings Banks	+47,0	+4,5	−24,4
Post Office Savings Banks	+698,0	+492,0	+447,0
State Railway Provident Institutions	+46,5	+52,2	+66,7
Civil Engineer's Provident Fund	+26,9	+13,1	+28,8
Regimental Savings Banks	−7,0	+8,5	+29,8
Special accounts	+27,1	−15,1	−34,0
TOTAL	+838,5	+555,2	+513,9

452. There is a large falling off in the *Presidency* and *Post Office Savings Banks* in consequence of the notice of reduction of interest; in Bombay a part of the decrease is also attributed to depositors having taken part in the speculation in Silver Bullion which followed the closure of the Mints. The fluctuations under *Regimental Savings Banks* are dependent to a great extent on the transfers of British Regiments between India and England, and are not therefore susceptible of an accurate forecast. The net debit under *Special Accounts* was chiefly owing to the General Family Pension Fund having withdrawn 60,0 during the year for investment in Government securities. The other accounts do not call for special remarks.

TOTAL	...	...	—1,085,8	...	...	+4,576,1	...		+4,344,8

453. The net debit under *Provincial Balances* has been explained in paragraph 443. The decline in the net result under *Excluded Local Funds* occurred mainly in Bombay owing to the purchase of Government securities by some of the Port Funds, to the creation of New Dispensary Funds, and to the transfer of some Funds to District Boards and Personal Deposits. The head *Political and Railway Funds* now include the several Guaranteed Railway Funds only, the net credit under which was underestimated. The Budget under *Deposits of Sinking Funds* provided only for the receipts on account of the Victoria Dock, Bombay, the actuals for which amounted to 9,3 and a sum of 8 was also received on account of the loans to Prince Ferokshah in Bengal. The character and magnitude of the transactions recorded under *Judicial and Departmental Deposits* render an accurate forecast impossible. The large net credit is contributed chiefly by India in the Railway capital transactions of the Public Works Department and by North-Western Provinces in the Municipal Fund Deposits, by Madras chiefly in the Local Funds, Debt Deposits and Advances and by Bombay chiefly in the Personal Deposits.

454. The net figures entered against the head *Advances* may be divided as follows :—

	Budget.	Revised.	Account.
Coinage Accounts	+ 50,0	− 388,2	−439,1
Other Advances	—53,2	+ 14,2	—75,7
	— 3,2	—374,0	—514,8

The Budget under *Coinage Accounts* provided only for a reduction of 50,0 in the Small Coin Depôt balances, but the actuals show an increase of 30,8 in these balances. Under Mint Certificates, the issue of which was stopped early in the year, there was a net payment of 469,4, the amount of the certificates outstanding at the beginning of the year. Against these debits there was a credit of 44,1 on account of a reduction in the balances of Bullion at the Mints and of 17,0 under Copper Coinage Account chiefly on account of an increase in the profit on the coin in stock at the Calcutta Mint and the Small Coin Depôt s at the close of the year. The net credit under *Other Advances* is the final outcome of a number of transactions which do not require special notice here.

455. Under *Suspense Accounts* the credit of 123,0 is chiefly on account of a decrease in the balance in the hands of the Opium, Postal and Military Departments, and of the Railway Revenue Branch of the Public Works Department.

456. The gross credits and debits working up to the net figures under *Exchange on Remittance Accounts* are as follows :—

Budget, 1893-94. Sterling Amount.	Exchange. Cr.	Exchange. Dr.		Accounts, 1893-94. Sterling Amount.	Exchange. Cr.	Exchange. Dr.

	Provincial Loans and Advances . . .	332,0 —608,2	358,0 —553,8

459. The following are the details of the Imperial Section of the Accounts:—

1893-94. Budget. Amount advanced.	1893-94. Budget. Amount repaid.		1893-94. Accounts. Amount advanced.	1893-94. Accounts. Amount repaid.
22,3	8,5	Loans to Native States	19,8	8,6
85,0	682,8	„ Presidency Corporations and Port Trusts . .	46,6	1,109,0
...	1,4	„ Mofussil Municipalities	1,6	3,2
37,5	1,3	„ District and other Local Committees . .	37,5	1,4
2,8	10,0	„ Landholders and Notabilities . . .	6,2	1,1
2,0	10,0	Advances to Cultivators	23,6	33,6
149,6	714,0	TOTAL AS ABOVE .	135,3	1,156,9

460. The receipts and payments under *Loans to Native States* were on account of the Cooch Behar State. Under *Loans to Presidency Corporations and Port Trusts* there was a large increase in the repayments, the Bombay Municipality having repaid 436,8, being the whole of the balance due to Government on account of its new consolidated loan. There was a decrease in the amount of further advances, chiefly in those to the Madras Port Trust for harbour construction purposes. The variations under *Loans to Mofussil Municipalities* are nominal, due to an advance of 1,0 and a re-payment of 2,4 in Upper Burma having been provided for under Provincial Loans and Advances instead of under this head. Under *Landholders and Notabilities* the Budget provided for a payment of 2,8 on account of the balance of the loan of 10,0 sanctioned to the Lord Bishop of Rangoon for the construction of the Rangoon Cathedral, and for a repayment of the full amount of the loan; but actually 5,8 remained undrawn at the end of 1892-93, and instead of any repayments being made, a further advance of 4,0 was sanctioned which was also drawn against to the extent of 4; the amount shown as repaid represent petty repayments on account of the loans to Dewan of Khaja Saheb's Durga, to Syed Adam Shah, and to the Talukdars of Ajmere. Under *Advances to Cultivators* the accounts include the advances and repayments in Upper Burma, which were provided for in the Budget under Provincial Loans and Advances and which were also lower than anticipated.

461. The following are the particulars of the Provincial and Local Loans Account:—

1893-94. Budget. Amount advanced.	1893-94. Budget. Amount repaid.		1893-94. Accounts. Amount advanced.	1893-94. Accounts. Amount repaid.
232,6	38,7	Loans to Mofussil Municipalities	274,5	30,7
...	6,6	„ Port Funds	...	7,6
...	8,6	„ District Committees	5,9	8,3
27,2	25,9	„ Landholders, etc.	27,3	27,1
332,7	225,3	Advances to Cultivators	210,6	265,8
15,7	26,9	„ under Special Laws	35,5	18,5
608,2	332,0	TOTAL AS ABOVE .	553,8	358,0

Section R and RR.—IMPERIAL AND PROVINCIAL LOANS AND ADVANCES—*continued.*

462. Under *Loans to Mofussil Municipalities* the principal advances made during the year, most of which were for water-works, are—

Patna Municipality	15,8
Benares „	45,0
Cawnpore „	50,0
Lucknow „	78,0
Delhi „	11,2
Madura „	16,4
TOTAL	216,4

North-Western Provinces showed a large excess owing to the fact, that while the Budget provided for only 100,0 on account of the Lucknow and Cawnpore water-supply schemes, the actual expenditure on these accounts amounted to 128,0, and drainage schemes in Benares, Agra, Allahabad, and other towns were also undertaken. On the other hand, no loans were granted in Central Provinces, and there were savings in Bengal chiefly in the loan to the Shahabad Municipality not being granted, and in Punjab owing to smaller advances than estimated having been made to the Delhi Municipality.

463. The 5,9 entered against *District Committee* includes 5,0 on account of the Dinagepur District Board and 9 on account of the Manbhum Road Committee

464. Under *Advances to Cultivators* the advances fell far short of the estimate in consequence of a more favorable season. In Madras, where the decrease is largest, restrictions were also placed by the Government on the free grant of loans under the Land Improvement and the Agriculturists' Loans Acts. The repayments were better in most of the provinces, that in Madras being largest. It may be noticed that the Budget under this head includes the advances and repayments on account of Upper Burma.

465. Under *Advances under Special Laws,* there was an increase in the outgoings, chiefly on account of the Churrial and Howrah drainage works, while the recoveries on account of embankment advances were much lower than anticipated.

Section S.—CAPITAL OF RAILWAY COMPANIES.

	India, 1893-94. Budget.	India, 1893-94. Revised.	India, 1893-94. Accounts.	England, 1893-94. Budget.	England, 1893-94. Revised.	England, 1893-94. Accounts.	Total, 1893-94. Budget.	Total, 1893-94. Revised.	Total, 1893-94. Accounts.

Assam-Bengal	—540,0	—422,4	—394,8	—118,0	—67,6	—69,4	—658,0	—490,0	—464,2
Bengal Central	—9,2	—1,8	—3	—1,9	—1,7	—1,7	—11,1	—3,5	—2,0
Bengal-Nagpur	—120,3	—64,7	—52,5	—64,1	—41,0	—39,4	—184,4	—105,7	—91,9
Rohilkhand-Kumaon	—11,3	—14,4	—10,7	—16,0	—2,9	—2,6	—27,3	—17,3	—13,3
	—797,1	—526,2	—450,8	—368,2	—201,7	—191,4	—1,165,3	—727,9	—642,2
TOTAL	—376,4	—152,8	—56,6	—1,189,2	—680,8	—654,9	—1,565,6	—833,6	—711,5

466. As explained in former reports, these are all net sums. The Indian figures represent the difference between the advances taken by the Railway Companies and the credits given to them chiefly on account of stores used on revenue account. The English figures represent the difference between the capital deposited by the companies with the Secretary of State, and the withdrawals for expenditure on stores, establishment charges, etc. These figures are necessarily liable to great fluctuations.

467. The decline in the transactions of the Guaranteed Companies in India occurred almost wholly in the Bombay, Baroda and Central India Railway, and was due to an under-estimate of the withdrawals as well as an over-estimate of the credits to capital on account of stores transferred to Revenue. In the cases of Great Indian Peninsula and Madras Railways the transactions had been over-estimated on both sides of the account and the net results agree closely with the Budget. As regards the subsidised Railways, the requirements were more or less over-estimated in all the cases.

468. In England also the requirements of the Railway Companies for stores, etc., were over-estimated, the actuals having fallen short of the Estimates by about 700,0. On the other hand, it was expected that the Bombay, Baroda and Central India Railway would raise fresh capital to the extent of 100,0 during the year, but this was postponed to 1894-95. The receipts on account of capital of the Assam-Bengal Railway were also smaller by 91,3.

Section T.—REMITTANCES.

	Budget.	1893-94. Revised.	Accounts.
Money Order (net)	...	...	— 3,7
Other Local Remittances (net)	...	— 1,7	— 68,5
Other Departmental Accounts (net)	...	...	+ 1,3
Accounts between Civil and other Departments (net)—			
Post Office	...	...	...
Guaranteed Railways	...	...	...
Telegraph	...	...	— 1
Marine	...	...	+ 7
Military	...	...	...
Public Works	...	+ 380,0	— 40,1
Remittance Account between England and India (net)	— 9,0	— 65,3	— 27,8
TOTAL	— 9,0	+ 313,0	— 138,2

469. The figures entered in this group are the net result of very large transactions, but there is nothing special to record in respect of them, except that the net debit of 68,5 under other Local Remittances is chiefly due to the cashing in April 1893 of a supply bill for 100,0 issued in March 1893 as noticed in the last report. The Money Order transactions continued to show a rapid growth, as will be seen from the following figures:—

		Issued.	Paid.
1887-88	Money Order transactions	11,665,7	11,660,7
1888-89		12,781,4	12,758,2
1889-90		14,418,5	14,393,1
1890-91		16,484,7	16,485,6
1891-92		17,365,8	17,349,3
1892-93		18,117,7	18,098,9
1893-94		19,290,8	19,294,5

Section U.—SECRETARY OF STATE'S BILLS.

	Budget.	1893-94. Revised.	Accounts.
Drawings	18,700,0	9,400,0	9,530,3
Payments	18,522,1	9,857,5	9,960,2

470. The following are the amounts of bills and transfers drawn during the year by the Secretary of State:—

		£	Rx.	Rate in Pence.
April	1893	1,865,0	3,052,8	14·66
May	,,	1,397,1	2,273,3	14·75
June	,,	2,460,7	3,929,4	15·03
July	,,	51,7	78,0	15·91
August	,,	78,3	123,2	15·25
September	,,	6,7	10,4	15·46
October	,,	4,8	7,7	14·96
November	,,	609,4	959,1	15·25
December	,,	21,0	32,9	15·32
January	1894	54,7	91,0	14·43
February	,,	1,054,7	1,832,5	13·81
March	,,	1,926,2	3,333,4	13·87
		9,530,3	15,723,7	14·55

471. The payment account of the year is as follows:—

	£	Rx.
Bills of 1892-93 outstanding on 1st April 1893	487,2	798,7
Bills drawn in 1893-94 as entered above	9,530,3	15,723,7
TOTAL BILLS FOR PAYMENT	10,017,5	16,522,4
Bills paid in 1893-94	9,960,2	16,422,8
Bills outstanding on 1st April 1894	57,3	99,6

Section V.—CASH BALANCE.

	Budget.	1893-94. Revised.	Accounts.
BALANCE ON 1ST APRIL 1893—			
India	15,204,2	15,271,8	15,271,8
England	2,602,8	2,268,4	2,268,4
TOTAL	17,807,0	17,540,2	17,540,2
BALANCE ON 31ST MARCH 1894—			
India	12,643,1	26,251,8	25,565,6
England	1,972,5	960,0	1,300,6
TOTAL	14,615,6	27,211,8	26,866,2
Increase (+) or decrease (—) of balance on 31st March 1894	—3,191,4	+9.671,6	+9,326,0

472. The above difference is distributed between India and England in the following proportions :—

	Budget.	1893-94. Revised.	Accounts.
India	—2,561,1	+10,980,0	+10,293,8
England	—630,3	—1,308,4	—967,8
TOTAL	—3,191,4	+9,671,6	+9,326,0

473. Taking India and England together, the net transactions of the year were better than expected in the Budget by the sum of 12,517,4. The variations which brought about this result are as follows :—

	Better.	Worse.
Decrease in Imperial Deficit	48,1	...
Decrease in Provincial Deficit	439,9	...
Increase under Ordinary Debt incurred	6,777,5	...
Decrease in deposits of Savings Banks	...	324,6
Increase under Departmental and Judicial Deposits	340,6	...
Net excess payment under Advances	...	512,6
Net excess receipts under Loans and Advances by Imperial Government	457,2	...
Short withdrawals by Railway Companies	854,2	...
Larger outgoings under Remittances	...	129,2
Decrease in the balance of Secretary of State's Bills remaining unpaid at the end of the year	...	1,024,5
Increase in Exchange charged as Expenditure in excess of that involved in the Remittances from India	5,470,3	...
Minor variations	120,5	...
	14,508,3	1,990,9
NET BETTER	12,517,4	

A. F. COX,

* The columns headed "Exchange" show, under the several heads of Revenue and Expenditure which include transactions in England, the Exchange thereon, calculated in accordance with the average rate obtained, or estimated to be obtained, for Bills and Telegraphic Transfers sold during the year, namely, 1s. 2¼d., 1s. 2·6d. and 1s.2·5466429d. per rupee in the Budget, Revised and the Accounts respectively.

Abstract B.—*Details of Expenditure.*

[Rx.1 is recorded for every 10 Rupees in respect of transactions in *India*, including those of "Exchange."]
The figures in thick type are those which appear in the General Account.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the week ending at 8 a.m. on Saturday, March 2nd, 1895.

General Summary.—No change of importance in the prevailing weather conditions has occurred during the week. Fine clear dry weather has obtained generally over the whole of India, and temperature has continued unusually high in North-Western and Central India. In Burma numerous thunderstorms were reported on the 26th and 27th, which had the effect of lowering the temperature of that province considerably. Temperature decreased 5° during these two days on an average of all the Burma stations and was upwards of 2° below the normal on the 27th and 28th. Maximum or day temperatures were very largely in excess in the Punjab, West Rajputana, Sind and Baluchistan. The maximum temperatures registered, for instance, at Quetta, Murree, Jacobabad, Mooltan and Bickaneer were on several occasions between 12° and 16° higher than the normal temperature of the period.

As is usually the case when temperature is in excess in Northern India, unusually low temperatures have been recorded in Madras. In Southern India the air has been abnormally dry, and there have been no thunderstorms which usually occur at this season of the year.

Pressure has continued in general excess, the excess being most marked at the hill stations of Northern India. The barometer fell briskly in Baluchistan and Northern and Central India on Tuesday, and a very shallow depression was formed in Sind, in the area of large excess of temperature, which continued in the same position till the end of the week when it moved eastwards into Central Rajputana and partially filled up. It caused slightly unsettled weather and heavily clouded skies on Saturday in Rajputana, Central India, the Punjab and the western Districts of the North-Western Provinces, and a few very light showers were received, in no case exceeding a tenth of an inch, in Rajputana and Central India.

Daily Summary.—*Sunday.*—Pressure had risen briskly to rapidly in Upper India and was steady or had risen slightly elsewhere. It had changed irregularly in the Central Provinces and Deccan. Pressure continued in excess of the normal over the whole country, the excess being most marked at the Himalayan hill stations. Temperature had risen briskly in the Central Provinces and averaged 6° above the normal in the Punjab and 5½° in Sind and Rajputana. Light to moderate thundershowers had been received in the Deccan, Raichur reporting a fall of ·89 inch, Khamamet ·43 inch, and Hyderabad (Deccan) ·41 inch.

Monday.—The barometer had fallen slightly in Baluchistan and India and over the greater part of Burma, but the excess of pressure over the normal, especially at the hill stations, continued to be a noteworthy feature in the pressure conditions. Day temperatures were very largely above the normal in the South-West Punjab, West Rajputana, Sind and Baluchistan. At Quetta it was 16° above the normal of the day. Skies were clouding over

in Baluchistan and were overcast in Central and Upper Burma, but were clear in India except in some parts of the Peninsula, East and South Bengal, and the Central Provinces. Light local thundershowers were reported by a few stations, the heaviest fall of rain being half an inch at Colombo.

Tuesday.—The barometer had fallen briskly in Northern and Central India, the Deccan and Baluchistan, and had fallen irregularly in Burma. A very shallow depression lay over Sind, where pressure was in slight defect. Pressure was in slight to moderate excess in North-Eastern and Central India, and the Deccan, and normal in Central and Lower Burma. Temperature had fallen rapidly in Burma due to the occurrence of numerous thunderstorms. Very high day temperatures were again registered in Baluchistan, Sind and North Bombay. Skies had cleared in Baluchistan, but were more or less clouded in Sind, Rajputana and the Punjab. Numerous thundershowers were reported from Burma, but the amounts of rain registered were small. Thayetmyo received ·42 inch and Bhamo ·38 inch. Wellington reported a fall of ·51 inch.

Wednesday.—Pressure was steady in Baluchistan and Sind, but had fallen briskly in Bihar, Chota Nagpur and the Eastern districts of the Central and North-Western Provinces. It had decreased slightly over the remainder of India and had changed very irregularly in Burma. Pressure was nearly normal over the greater part of the Indian area, but was still in large excess at Quetta and the Northern India hill stations. Temperature had fallen rapidly in Burma, where it averaged 2° below the normal, and briskly in Rajputana. The majority of stations in Burma reported thundershowers, the heaviest falls of rain being ·66 inch at Lashio and ·56 inch at Fort Stedman.

Thursday.—The barometer had risen everywhere, the rise being brisk in the Gangetic plain, Central Provinces, Bengal, Upper Burma and the Malabar and Konkan coast districts. Pressure was again in considerable excess in North-Eastern India and Upper Burma. Temperature had increased in Northern and Central India, the increase being largest in the Punjab, Rajputana and Bengal. The highest maximum temperature registered was 99·2° at Cuddapah. Seoni reported a light fall of rain and Gnatong a fall of 3 inches of snow.

Friday.—Pressure had changed by only small amounts, and its distribution was practically unaltered. Temperature had increased briskly in the Punjab and Burma, and averaged 7½° above the normal in the Punjab and 5° in Sind and Rajputana. It was 2° below the normal in Madras. Day temperatures more than 12° above the normal were registered at Murree, Sirsa, Mooltan, Quetta, Jacobabad and Bickaneer. No rain was reported. Gnatong had received a light fall of snow.

Saturday.—The barometer had risen briskly to rapidly in Sind, West Rajputana and the South-West Punjab, and had fallen very slightly in Central Rajputana. The shallow depression which had been lying over Sind for the greater part of the week had moved eastwards into Central Rajputana and had partially filled up. Pressure was very uniform over the whole of Northern and Central India, over the greater part of which it was in considerable excess. The excess was greatest in the hill and submontane districts of Upper India. Cherat reported a severe gale of wind with an average velocity of 36 miles per hour, but at the neighbouring station of Murree the wind velocity averaged only 6 miles per hour. Temperature had decreased 6° at Quetta and 9° at

Cherat, and a feeble cool wave was reducing temperature slightly in Baluchistan and the North-Western Frontier districts in the rear of the slight disturbance which had moved eastwards into Rajputana. Skies were heavily clouded in Rajputana, Central India, the Punjab and the western districts of the North-Western Provinces. Very light showers were received during thunderstorms at stations in Rajputana and Central India.

Temperature.—The following table gives the variations from the normal temperature of the different provinces of India for each day of the week :—

Province.	February, 1895.					March, 1895.		Mean variation of week.
	24th.	25th.	26th.	27th.	28th.	1st.	2nd.	
	°	°	°	°	°	°	°	°
Burma	+2·8	+2·9	+0·5	−2·2	−2·3	−1·0	−0·7	0
Bengal and Assam	−0·2	−0·6	−1·0	−1·6	−0·5	−0·4	−0·9	−0·7
North-Western Provinces and Oudh	+1·2	+1·0	+0·6	+0·5	+0·8	+1·5	+3·5	+1·3
Punjab	+5·8	+5·2	+5·2	+4·4	+5·8	+7·5	+7·9	+6·0
Bombay	+0·7	+0·6	+0·3	+0·5	+0·1	+0·8	+0·8	+0·5
Central Provinces and Berar	−1·4	−1·1	−1·5	−0·1	+0·4	−0·3	+0·8	−0·5
Central India and Gujarat	+2·0	+2·6	+2·3	+1·6	+2·1	+2·6	+2·9	+2·3
Sind and Rajputana	+5·4	+4·2	+4·6	+2·8	+4·5	+5·2	+6·3	+4·7
Madras	−0·7	−0·9	−1·8	−1·4	−1·9	−2·1	−2·5	−1·3
	°	°	°	°	°	°	°	°
Mean for whole of India	+1·7	+1·5	+1·0	+0·5	+1·0	+1·5	+2·0	+1·3

The average mean temperature for the whole week was exactly normal in Burma and practically normal in Bengal, Bombay and the Central Provinces In Madras temperature was in defect throughout the week, the deficiency being greatest on the 1st and 2nd March, when it amounted to over 2°. In all other provinces temperature was unusually high, the excess over the normal temperature of the period being greatest in the Punjab, where on the 1st and 2nd it averaged between 7½° and 8°. For the whole week temperature was 6° above the normal in the Punjab, 4·7° in Sind and Rajputana, and 2·3° in Central India and Gujarat. The highest maximum temperatures registered during the week were 99·3° at Deesa on the 1st March and 99·2° at Cuddapah on the 28th February.

Rainfall.—Light but fairly general rain has been received in Burma during the week, due in the majority of cases to thunderstorms. Practically no rain has fallen in Bengal, the North-Western Provinces, Punjab, North Bombay, Rajputana and Central India. The heaviest average rainfalls were ·40 inch in Central Burma and ·35 in Hyderabad (South). Of the remaining 20 divisions, which received rain, only 4 received amounts exceeding a tenth of an inch. The rainfall of the week has hence been very small in amount and restricted to only 22 of the 52 rainfall divisions. It was in excess of the normal in Tenasserim, Lower and Central Burma, the Konkan, Bombay Deccan and parts of Madras.

The largest amount recorded at any one rain gauge station was 2·08 inches at Mettupalayam in the Coimbatore district.

Province.	Division.	Rainfall data for week ending 2nd March, 1895.			Rainfall data from 30th December 1894 to 2nd March, 1895.		
		Average actual rainfall of Division.	Average normal rainfall of Division.	Excess or defect in inches.	Average actual rainfall of season to date.	Average normal rainfall, from 30th December to 2nd March.	Excess or defect of (seasonal) rainfall expressed as a percentage.

W. A. BION,
Actg. Asst. Meteorological Reporter to the Government of India.

SIMLA, *the 7th March, 1895.*

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 9th March.*—No rain except scattered showers in the Nilgiris. Water-supply generally insufficient. Standing crops fair but withered or withering in parts of the Deccan, Carnatic and the Central and Southern districts. Harvest continues with fair outturn. Pasture and fodder getting scarce in parts. Prices easier in the Circars, risen in parts of the Central and Southern districts and steady elsewhere.

Bombay.—*For week ending 13th March.*—Rain fell in parts of Sind, Khandesh and Gujarat. Standing crops damaged by frost, blight, rust, insects and rain in parts of Sind. Reaping of late crops continues in parts of sixteen districts and preparations for next season's crops in parts of five. Cotton-picking in progress in parts of the Karnatic and Gujarat. Fodder-supply sufficient and agricultural stock in good condition. Prices normal except in parts of Ahmednagar and Sholapur.

Bengal.—*For week ending 11th March.*—No rain during the week except a slight fall at Gya. The prospects of the standing crops continue generally good, but in Eastern Bengal and in the Cuttack district rain is still required. Rain is also wanted for the cultivation of the hot-weather crops in Northern Bengal. In some districts the spring harvest has begun. The collection of opium is in progress, and the outturn is generally expected to be good. In Bihar the prospects of the young indigo are favourable. Cattle in good condition except in Rajshahi and Jessore. The price of common rice continues normal and almost stationary.

North-Western Provinces and Oudh.—*For week ending 13th March* —Showers fell in most districts accompanied in two by hail. The weather is now clear and seasonable. Harvesting of spring crops has commenced and collection of opium and sowing of sugarcane are in progress. Slight damage has been done to the wheat crop by rust in Jhansi. The linseed crop has also failed in this district and is poor in Allahabad. Prospects in the Oudh districts are fair and distinctly favourable elsewhere. Supplies sufficient, but fodder is scarce in a few districts. Prices fairly steady.

Punjab—*For week ending 13th March.*—Rain fell in most districts. Sowings of cotton, onions and sugarcane going on. Condition and prospects of spring crops generally reported good to average. The recent rain has improved the condition of standing crops in Dera Ismail Khan, but more is needed in Shahpur. Cattle are generally in good condition and fodder is sufficient throughout the Province. Prices rising in Dera Ismail Khan, below normal in Shahpur, continue normal in Umballa and low elsewhere.

Central Provinces.—*For week ending 13th March.*—Light showers have fallen in most districts and in parts of two the rain was accompanied with hail. Reaping and threshing of winter crops in progress. Prices generally steady except in Seoni where they are above normal.

Burma.—*For week ending 9th March.*—The threshing of the main paddy crop has practically been completed throughout the Province. Cultivation of dry-weather crops progressing favourably in Upper Burma and prospects are good, except in two districts where some damage has been done by caterpillars and rust. Prices have fallen slightly in Lower Burma, but are still above normal. In Upper Burma prices are steady and considerably below normal Fodder and water-supply sufficient.

Assam.—*For week ending 12th March.*—Weather seasonable. Ploughing for early rice commenced. Gathering of mustard almost over. Pressing of sugarcane continues. Condition of cattle fair. Fodder and water sufficient.

Mysore and Coorg.—*For week ending 13th March.*—MYSORE: Standing crops in good condition. Rice sown in parts of Bangalore and Tumkur districts. Prices slightly fallen in Bangalore and Mysore.

COORG: Slight rain fell during the week. Threshing of rice almost over. Fodder and water fairly sufficient. Prices of food-grains normal.

Berar and Hyderabad.—*For week ending 13th March.*—BERAR: Days warm and nights cool. Cutting of winter crops and threshing of *juar* (*Sorghum vulgare*) continues. Breaking up of land for next rain crop in progress. Fodder and water ample. Prices fluctuating in Wun district, otherwise steady.

HYDERABAD: No rain during the week. State of crops favourable. Water in tanks and wells sufficient for cultivation. Prices normal.

Central India.—*For week ending 13th March.*—Slight rain fell in all Agencies during the week. Standing crops in fairly good condition though damaged in places by rain, hail, blight, and insects. Condition of cattle fair except in parts of the Bhopal Agency. Pasturage good and sufficient except in four districts of Gwalior. Prices of food-grains rising in Bhopal and parts of Gwalior, above normal in three Agencies and one district of Gwalior, and normal elsewhere. The opium crop has been partly damaged by rain in Goona and is in indifferent condition in one district of Gwalior.

Rajputana.—*For week ending 13th March.*—Heavy rain during the week in Jeypore, moderate in Abu and Ajmere, and slight in the other States except Kotah, Jhallawar, and Bhurtpore, where none is reported to have fallen. Agricultural operations satisfactory. Harvesting commenced in parts. Standing crops, prospects, and agricultural stock generally in good condition and fodder sufficient. Prices risen in two States, below average in one, falling in one and steady elsewhere.

Kashmir.—*For week ending 12th March.*—KASHMIR VALLEY: Little rain fell during the week. Weather fine. Prospects of spring crops, which are still under snow, generally good. Prices falling.

JAMMU PROVINCE.—*For week ending 13th March.*—Rain wanted in some districts. Condition of standing crops generally good. Ploughing for tobacco crop and sowing of sugarcane commenced. Cattle in good condition. Fodder sufficient. Prices stationary.

Nepal.—*For week ending 9th March.*—No rain during the week. Weather slightly warm but pleasant. Indian corn being sown and prospects of wheat good.

Extract from the Proceedings of the Government of India, in the Department of Revenue and Agriculture (Forests): dated Calcutta, the 27th February 1895.

READ—

Circular No. 17 F., dated 5th September 1894, communicating orders on the Administration Report of the Imperial Forest School at Dehra Dun for the year 1892-93.

Read also—

Report of the Forest School for 1893-94.
Letter from the Inspector General of Forests, No. 116, dated 13th February 1895, submitting the above report.

RESOLUTION.

During the twelve months ending 30th June 1894, the School continued to be under the direction of Mr. J. S. Gamble, M.A. The appointment of Deputy Director was filled by Mr. A. Smythies, B.A., until the 1st April 1894, when he was relieved by Mr. J. Nisbet, Dr. œc. pub. No other alterations took place in the permanent teaching staff, which was assisted as usual by the Director of the Botanical Department in Northern India, by the Deputy Superintendent of the Indian Museum, and by Officers of the School Forest Circle, North-Western Provinces.

2. The total number of students who attended the School and who were present on the 31st March 1894 was 106. Of these 68 were in Government service or were afforded assistance by Government, 5 were the nominees of the Durbars of Native States, and 33 followed the courses as private students. During the last four years, the proportion of private students attending the School has steadily increased from 17 per cent. in 1890-91 to 31 per cent. in the year under consideration. This increase is satisfactory and will, it is hoped, continue. At the final examination held in March 1894, on the conclusion of the course of instruction, 39 students obtained the Ranger's certificate and 13 the certificate of the lower or Forester class.

3. The open examination for admission to the Rangers' class in the year under notice was held in the various provinces in March 1893. The total number of candidates was 116, of whom 44, or 38 per cent., successfully passed the test, and 35 were admitted. It is observed, however, that, during 1893-94, of three stipendiary students selected by Local Governments, one died from consumption, one was remanded on account of physical unfitness, and one because his knowledge of English was insufficient. Laxity in the admission tests, whether physical or educational, is to be deprecated; and greater care should be exercised in the selection of candidates, especially of those who are judged worthy of pecuniary assistance while following the School courses.

4. The Government of India are glad to observe that increased facilities for instruction have been secured by the erection of adequate school buildings and by the more efficient arrangement and equipment of the library and museum. The Government of India recognise the advisability of completing, as soon as possible, certain subsidiary buildings in connection with the School.

5. The School was satisfactorily administered during the year. The Inspector General of Forests has reported that the education secured and the thoroughly practical knowledge displayed by the officials who have obtained the certificate of Ranger in recent years, have been specially brought to his notice during his tours of inspection in various provinces.

ORDER.—Ordered that the above Resolution be published in the Supplement to the *Gazette of India*, and that copies be forwarded, for information, to the Governments of Madras and Bombay, the Local Governments and Administrations noted in the margin, the Department of Finance and Commerce, and the Comptroller and Auditor General; also to the Inspector General of Forests for information and for communication to the Director of the Forest School and the Superintendent of Forest Surveys.

Bengal.	Assam.
North-Western Provinces and Oudh.	Coorg.
Punjab.	Ajmere.
Central Provinces.	Andamans.
Burma.	Baluchistan.
	Hyderabad.

Ordered, further, that a copy, with copies of the Report, be forwarded to the Foreign Department, for communication to the Nizam's Government and to the Mysore, Jodhpur, Jeypore, and Travancore Durbars.

(True Extract.)

DENZIL IBBETSON,

Officiating Secretary to the Government of India.

SUPPLEMENT TO

The Gazette of India.

No. 12.] CALCUTTA, SATURDAY, MARCH 23 1895.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

FINANCIAL STATEMENT FOR 1895-96.

PART I.

GENERAL REVIEW.

PRELIMINARY.

1. The Financial Statement for 1895-96 is, according to the now established practice, presented in two parts, *viz.*, Part II which goes through the subject in regular order and in detail, and Part I, which presents the same facts in a more general shape, and may be taken as my review of them. I do not consider myself tied down in this review to any particular order of statement, but hope by its means to give a general idea of the subject, leaving those who wish for greater details to refer to the second part. I have to give an account of a period of exceptional activity and anxiety in matters financial, and I shall do so the more clearly if I draw attention rather to the salient features of the year's history than to the mere arithmetic of the estimates.

2. The tabular statements, A and B, of revenue and expenditure, are prepared in the usual form (*vide* Appendix); but in the difference columns in which the increase and decrease under each head of Revenue or Expenditure are stated, I have excluded that part of the difference which arises solely out of the change of the rate at which the English revenue or expenditure is brought to account. It would be useless to be perpetually explaining that out of a stated difference under some particular head of (say) Rx. 100,000, Rx. 90,000 is due to difference in the exchange column, and only Rx. 10,000 was the real difference of revenue or expenditure which requires to be noticed as such.

3. I wish to draw attention to the new form we have given to Statement E, the statement of Net Revenue and Expenditure. This form follows, but is not in such great detail as, a "Return of the Net Income and Expenditure of British India" prepared by the Right Hon'ble Mr. Fowler for the House of Commons in July last. The arrangement of the heads is a suggestive one, and for that reason we have, in a separate abstract—Form F—given the figures for the ten years preceding 1893-94, taking them for the most part from the Parliamentary Return referred to.

ACCOUNTS OF 1893-94.

4. The Revised Estimate for 1893-94, which I presented last year, worked out to a deficit of Rx. 1,792,800; the actual result, in making up the accounts, is a deficit of Rx. 1,546,998, being Rx. 245,802 better than the estimate. It must be borne in mind in comparing this with subsequent years, that the accounts of 1893-94 included a charge for Rx. 1,060,954 for Railway construction under the Famine Insurance Grant, and that without this charge the deficit would stand at Rx. 486,044 only.

5. Of this difference Rx. 89,182 is due to revenue received on Imperial account in India, which was Rx. 66,748,382, against an Estimate of Rx. 66,659,200. Rx. 105,358 was due to Imperial expenditure in India, which was Rx. 42,502,442, against an Estimate of Rx. 42,607,800. Rx. 51,262 arose on the English account, including Exchange.

6. There are no differences between Revised Estimate and final outturn, which are large enough to require separate statement. The Revised Estimate

was made up at the exchange of 14·6 pence; the actual exchange realized upon the drawings and passing into the accounts was 14·5466 pence.

RATE OF EXCHANGE.

7. Before taking up the figures of the Revised Estimates of 1894-95, and the Budget Estimates of 1895-96, I desire to make a few remarks upon the subject of the rate of exchange at which they are made up.

8. The Secretary of State in March last announced his intention of drawing for £17,000,000 sterling, and we made up our estimates in the then precarious state of the Exchange market at 14 pence, but the actual rate had already fallen a little below that. During the month of April the rate maintained itself, slightly falling, a little over $13\frac{1}{2}d.$, but in May it rapidly fell below $13d.$, being quoted on May 18th at $12\frac{17}{32}d.$ The effect of these low rates, or rather of the high rupee price of gold which accompanied them, was to bring into the market a quantity of gold for shipment to Europe, and a slight recovery took place in June, the Secretary of State's drawings during that month being all at about $13d.$ Again there was a falling off in July, followed by a sharp recovery, which lasted through August; the last drawing of August and the first one of September were at $13\frac{13}{16}d.$ and $13\frac{25}{32}d.$ respectively. The rate then rapidly fell, and from the latter part of September till the end of November it stood between $13\frac{3}{8}$ and $13\frac{1}{8}$.

9. We were many of us hoping to see a revival when the cold-weather export season set in, but the extraordinarily low prices of cotton and of wheat in the European markets stood grievously in the way of activity in the export trade, and rates continued to fall till the middle of January; the drawing of January 16th was mostly at the rate of $12\frac{1}{2}d.$ Since that date the rates have gradually recovered, and for two or three weeks now they have stood just under $13d.$

10. The following monthly figures are of interest in this connection:—

	Drawings of Secretary of State.			In Lakhs of Rupees.		
	Pounds sterling; 000 omitted.	Lakhs of rupees.	Average rate.	Net exports of gold.	Net imports of silver.	Net Council Bill and Treasure.
1894.						
January	98	16·4	14·408	1·4	166·0	181·0
February	1,023	178·0	13·786	18·1	124·4	284·3
March	1,915	331·2	13·870	32·0	98·6	397·8
April	1,368	241·0	13·625	19·5	43·8	265·3
May	2,251	416·1	12·979	52·1	30·5	394·5
June	1,490	274·6	13·024	120·3	29·2	183·5
July	1,086	201·6	12·927	56·6	91·3	236·3
August	1,665	300·5	13·301	52·5	69·2	317·2
September	894	159·0	13·492	31·0	73·6	201·6
October	1,381	248·6	13·329	—·6	19·9	269·1
November	962	174·5	13·232	24·4	28·9	179·0
December	1,203	223·2	12·937	42·5	52·8	233·5
1895.						
January	1,196	226·6	12·672	49·7	67·8	244·7
February	1,611	300·2	12·883	42·9	55·5	312·8

11. This export of gold is entirely a new feature. There was a slight export, *viz.*, $3\frac{1}{4}$ lakhs worth in January and February 1893, but the remaining ten months of 1893 showed a total import of $124\frac{1}{3}$ lakhs worth. The tide turned, it will be seen, exactly when the low exchange set in.

12. The drawings for the current year we estimate as follows:—

	£	₹
Actual up to March 2nd	15,178,900	27,79,10,000
Estimated additional	1,821,100	3,38,80,000
TOTAL	17,000,000	31,17,90,000

giving a rate about 13·09 pence for the whole year, or, say, $18\frac{1}{3}$ rupees. This rate, 13·09 pence, or $18\frac{1}{3}$ rupees to the pound, is that at which we make up the Revised Estimate for the current year; and avoiding all speculations as to the future, we adopt the same rate in our Budget Estimates for 1895-96.

REVISED ESTIMATES OF 1894-95.

13. The Budget Estimates of the year 1894-95, when presented last March, showed, at fourteen pence exchange, a probable deficit of Rx. 301,900; had they been made up at the exchange 13·09 pence, which is all that is likely to be realized, they would, taking into account only that part of the difference which is due to the expenditure in the English account, have shown a deficit of Rx. 2,165,800. I am pleased to be able to say that the circumstances of the year have been so favourable, that we have not only made up this huge deficit, but are likely to close the account with a surplus estimated at present at Rx. 990,500, a better result apart from exchange by Rx. 3,156,300.

14. The first item in this great improvement is the Opium account, which gives us, under three heads, the following results:—

	Rx.
(i) Better revenue in Bengal, mostly due to enhanced prices obtained at the Calcutta sales	796,800
(ii) Better revenue in Bombay, *i.e.*, larger exportations and higher pass fees	134,600
(iii) Short expenditure in Bengal, mostly due to short payments to cultivators, owing to failure of crop	610,000
Total improvement on above accounts	1,541,400

I do not congratulate myself upon the result shown under the third of these heads; I would much rather have paid the amount and had the opium. I shall presently deal with the question separately. Meantime I pass it over, with the remark, that though it brings about an improvement in the financial results of the year 1894-95, it is an improvement which has to be paid for in future years. It is, in some respects, not unlike the improvement which we might easily effect, for example, in our Military charges by the process of avoiding for a year the complete replenishment of our stores.

15. The other two items, however, aggregating Rx. 931,400, are a real improvement of revenue, except in as far as the high prices out of which they arise may encourage the consumers of Indian opium to have recourse to competing kinds. The price we estimated to realize in March last was only ₹1,070 per chest, but the prices obtained increased the moment the failure of the crop became known. In June to September we got about ₹1,307 on the average, and the price then rose gradually to ₹1,540 at February's sale. This price was, so far as we can make out, an unstable one, due to certain speculative

operations in the China Market. The speculation gave way, and the price collapsed to R1,327 at the sale of March.

16. The next leading cause of the improvement is in the unexpected productiveness of the new Customs duties, and the addition made to them, at the end of the year, of the Cotton duties. The total improvement under Customs Revenue is Rx. 930,100, while the expenditure account shows that we made ample provision for the increase required on account of establishment charges. It will be more convenient if I deal in a separate section with the subject of the Customs duties.

17. The third large contribution to the improvement in the results of 1894-95 is the account of Railway earnings—an improvement which may almost be called normal; for our Budget Estimates do not assume the progress that results from a fairly prosperous year, and accordingly if India enjoys what is on the whole a prosperous year, we may ordinarily expect the Railway returns to give us a considerable advance of revenue above what we have assumed in our Budget.

18. The items entering into this part of the estimates are as follow:—

	Budget.	Revised.	Better.	Worse.
	Rx.	Rx.	Rx.	Rx.
State Railways—Gross Receipts	16,939,900	18,134,400	1,194,500*	
State Railways—Working Expenses	8,401,800	8,813,000		411,200
NET IMPROVEMENT	8,538,100	9,321,400	783,300	

* Includes 100 for exchange.

Of this net improvement of Rx. 783,300, Rx. 25,700 belongs to the Provincial share (in which a considerable deficiency in Burma balances a considerable increase in Bengal), and Rx. 757,600 goes to improve the Imperial surplus.

19. We have unfortunately to set against this gain on State Railways a falling off, to the extent of Rx. 406,500, on the Guaranteed Railways, which occurs almost entirely in the Great Indian Peninsula Railway, and is practically due to the failure of crops in part of the Central Provinces.

20. Only one other head need be specially noticed as contributing to the improvement in the results of 1894-95, namely, the Excise Revenue. This revenue is in its nature a progressive one, and has brought in this year Rx. 195,500 in addition to the Budget Estimates. The greater part of this improvement, Rx. 150,200, accrues to the Imperial account.

21. Against these improvements we have to set only one considerable deterioration, if such a term can fairly be applied to it. It is in the expenditure on account of interest on debt paid in India, the comparison here being as follows:—

INDIA IMPERIAL.	Budget. Rx	Revised. Rx.
Interest	−615,500	−333,300
State Railway interest	3,264,500	3,286,500
Irrigation	653,900	654,000
TOTAL	3,302,900	3,607,200
INCREASE		304,300

Nearly the whole of this increase is due to the anticipation interest and brokerage paid in respect of the conversion of the 4 per cent. debt. The net amount paid on this account (including Rx. 20,400 which returns to us as Currency Department receipts) we reckon at about Rx. 301,000. The greater part of this is interest that would otherwise have fallen due to be paid in 1895-96.

22. It will be observed from the manner in which I have stated these figures that the rule by which we transfer a portion of our interest charges in India from the general head of interest on debt to be charged against State Railways and Irrigation Works, has brought about the anomalous result that the general head shows a *minus* figure. This is due to the fact that the amount of capital expenditure on these works is actually larger than the total amount of Public Debt outstanding in India, the expenditure in question having really been met, to a considerable extent, out of sterling loans, borne on our English Account. The *minus* entry is, therefore, the amount of the set-off against sterling interest on debt, which arises from our charging Railways with a larger amount of rupee interest than we actually pay. The result, taking the three heads together as I have above done, is quite correct, but it has obviously become an inconvenient way of stating facts, and we shall have to reconsider it.

23. The causes I have enumerated account for the following net improvement in the Revised Estimates—

	Better. Rx.	Worse. Rx.
Opium	1,541,400	
Customs Revenues	930,100	
State Railways	757,500	
Guaranteed Railways	...	406,500
Excise	150,200	
Interest		304,300
	3,379,200	710,800
NET	2,668,400	

out of Rx. 3,156,300 to be accounted for.

24. The Revenue heads generally, other than those I have mentioned, almost all show slight differences to the good. The leading exception is the Land Revenue, where the receipts are Rx. 194,900 less than estimated. This is due entirely to the necessity of suspending collections in some parts of the North-Western Provinces, the Central Provinces, and Bombay. There has been no distress in any of these places, except, perhaps, in a limited area in the Central Provinces, and it will be found that the revenue which is postponed this year re-appears in next year's estimates. The figures in fact somewhat exaggerate the facts, for as I have had more than one occasion to point out, the financial year closes on March 31st in the middle of the busiest collecting season. Five to six crores of Land Revenue come in in the month of March, and an equal amount in the three months April to June; the postponement of half a crore of collections from March to a slightly later date, though administratively a small matter, means a difference of a crore between the finance accounts of the two years.

25. The expenditure heads also have almost all been kept well within Budget limits. Under Civil Departments we charge in India Rx. 13,907,300 against the Budget Estimate of Rx. 14,079,200—a saving of Rx. 171,900. It is under this head that the principal portion of the exchange compensation charges in the Civil Department come; they were estimated at Rx. 365,800, but by the fall of the rate of exchange, the amount actually paid comes to Rx. 402,200. The saving, therefore, apart from exchange compensation, is Rx. 208,300. There have been savings under practically every head, excepting that of General Administration, where the expenditute is Rx. 1,581,000, against an estimate of Rx. 1,546,000.

About two-thirds of the total, and a rather smaller proportion of the total savings, under this head are provincial.

26. The Finance Minister, after enumerating the causes which have contributed to producing in the Revised Estimates a better result than the Budget Estimates, has usually to wind up by deploring a mournful set-off in the excess of Military Expenditure. I am glad to say that this year I am exempted from this fate. The figures of the estimates are—

	Budget.	Revised.	Better.
Net Expenditure in England .	£ 4,394,400	4,305,600	88,800
Net Expenditure in India .	Rx. 15,416,700	15,246,100	170,600

27. There are large savings in the Commissariat grant, amounting to Rx. 504,800, of which Rx. 375,000 are due to the prevalence throughout the year of low prices for articles of food. These and other savings have been enough, and more than enough, to meet the following excess charges:—

	Rx.
(1) Exchange compensation allowance . . .	52,800
(2) Enhancement of British soldiers' pay, due to fall of exchange	357,800
(3) Excess over established strength of the British Army	35,000
(4) The Waziri expedition and connected Delimitation charges	202,500
TOTAL .	648,100

28. There are of course numerous other differences, but these are the leading ones. We embarked last year on a policy of strict economy in this great head of expenditure. That policy has been steadily pursued throughout the year, with the hearty co-operation of the high military authorities, from the Commander-in-Chief downwards; and though there has been at least the usual progress in military efficiency, the Military Department are able to show that their expenditure, including all the special expenses arising during the year—and they are, as just shown, no small ones—has been kept well within Budget limits.

29. I may state that the Waziri Expedition is estimated to cost Rx. 285,000, but Rx. 90,000 come into the year 1895-96.

IMPORT DUTIES.

30. I have done with Revised Estimates, and before passing on to the Budget Estimates for 1895-96, this will be the most convenient place for a review, in its financial aspect, of the Customs legislation of 1894.

31. It will be remembered that the Government of India in March of last year, when finding itself face to face with a heavy anticipated deficit in its estimates, introduced in the Council a measure for the revival of the General Customs Duties which had been abolished in 1882. This measure came into force on March 10th, 1894, twenty-two days before the end of the financial year 1893-94; and I find that it added to the revenue of that year the following net amounts:—

	Rx.
Drugs, Medicines, etc.	3,495*
Articles of Food and Drink	18,871
Silver Bullion and Coin	3,697
Other Metals (including Manufactures)	36,105
Other Manufactures and Raw Materials . . .	30,987
TOTAL .	93,155

* A small amount of this comes under the old Tariff as Spirits.

besides a certain amount under Oils, due to the enhanced taxation of Petroleum and the like.

32. We estimated in last year's Financial Statement that these duties would add, after allowing Rx. 70,000 for Refunds, a net sum of Rx. 1,350,000 to our annual revenue, but we took only Rx. 1,200,000 into the estimates of the first year, 1894-95, of their operation. Our estimates were based on the figures of the import trade of 1892-93, which were unusually low; and our reduction of about ten per cent. for the first year's operations appears to have been quite unnecessary. The import trade has been fairly active during the current year, and the amount that the duties are now estimated to have actually produced is Rx. 1,733,000, which is classified as follows:—

	Annual amount estimated last year.	Estimated produce in 1894-95.
	Rx.	Rx.
Articles of Food and Drink . . .	278,000	296,000
Drugs, Medicines, etc.	70 000	94,000
Silver Bullion and Coin	100,000	355,000
Other Metals and Manufactures of Metals .	238,000	208,000
Manufactured Articles	446,000	504,000
Raw Materials and Unmanufactured Articles .	74,000	121,000
Oils, including additional duty on Petroleum .	214,000	155,000
TOTAL .	1,420,000	1,733,000

Add the duties under the old Tariff—

	Rx.	Rx.
Arms and Ammunition . .	35,000	
Duty on Petroleum . . .	155,000	
Liquors	621,000	
		811,000
TOTAL OF BOTH .		2,544,000
Deduct Refunds .		57,300
NET . .		2,486,700

These figures show that the greatest part of the increase occurs under the head of imports of silver. We had no means of judging to what extent silver would be imported after the Mints were closed and the due course of remittance resumed, and we made a very moderate estimate. As shown in paragraph 10 above, the imports have continued on a very high scale. The silver, so far as we can trace it, gets absorbed among the population generally, though a small amount has gone to Native Mints; and Delhi appears to be the principal centre of dispersal. The fact that the import of silver has been so largely counterbalanced by an export of gold would seem to indicate that gold hoards in this country are being exchanged for silver; but after all the import, though it amounts to seven crores of rupees in value, only comes to sixty or seventy grains for every inhabitant of India.

33. The continuance of the low state of exchange rendered it abundantly evident in November and December that we would still have a considerable deficit to face in 1895-96, and that the hopes, which had warranted our exempting cotton goods from the General Tariff of March, were destined to disappointment. With the sanction therefore of Her Majesty's Government, bills were introduced on 17th December for the amendment of the Tariff, mainly by including cotton yarns and piece-goods in it, and for the levying of a countervailing excise duty on certain classes of goods manufactured in this country. These duties came into

force on December 27th, and we estimate that they will add to our revenue in 1894-95.

	Rx.
Sea Customs	354,100
Excise Duties	12,500
TOTAL	366,600
Deduct Refunds	7,500
NET	359,100

34. The estimate of Customs Duties—Imports—for 1895-96 stands as follows:—

	Revised Estimate, 1894-95.	Budget Estimate, 1895-96.
	Rx.	Rx.
1. Arms, Ammunition, and Military Stores	35,000	33,000
2. Liquors—		
Spirits	560,000	543,000
Other sorts	61,000	59,000
3. Articles of Food and Drink	296,000	292,000
4. Chemicals, Drugs, Medicines, and Dyeing and Tanning Materials	94,000	91,000
5. Metals and Manufactures of Metals—		
(*a*) Silver Bullion and Coin	355,000	250,000
(*b*) Other Metals and Manufactures of Metals	208,000	206,000
6. Oils	310,000	369,000
7. Manufactured Articles	504,000	511,500
8. Raw Materials and Unmanufactured Articles	121,000	118,000
9. Cotton Goods—		
(*a*) Sea Customs	354,100	1,440,000
(*b*) Excise Duties	12,500	75,000
TOTAL IMPORT AND COTTON DUTIES	2,910,600	3,987,500
Deduct Refunds	64,800	118,100
NET	2,845,800	3,869,400

35. The effect of the Customs legislation is therefore to raise the standard of revenue from Rx. 786,500 (Rx. 811,000 *minus* Rx. 24,509 on account of refunds), the produce in 1894-95 of the old Tariff duties, to Rx. 2,845,800, the produce in the same year of the new Tariff, and to Rx. 3,869,400, the full estimate of a year's produce made in the Budget Estimates of 1895-96. The total increase comes to Rx. 3,082,900.

BUDGET ESTIMATES, 1895-96.

36. The Budget Estimates of 1895-96 have to be made up, as already stated, at the exchange of 13·09*d*., and, comparing our prospects in a general way with the Budget Estimates of 1894-95, the main differences foreseen before entering into details are these—

(1) We have to provide for the worse exchange on English expenditure, which on £15,850,000 comes to Rx. 1,887,000.

(2) We have to provide for exchange compensation on a higher scale; this year our payments were in the Budget Estimate based on an exchange rate of 14 pence, and were estimated, all departments

included, to cost Rx. 1,113,300, which, however, was probably, at that rate, an over-estimate. In 1895-96 the lower rate of exchange enhances the probable payments to Rx. 1,456,500, and of this excess, Rx. 236,800 is on Imperial Account.

(3) Another item due to the same cause is the enhanced rate of payment to British soldiers; for the British soldier being entitled to a sterling rate of pay, we have to estimate the charge on this account at Rx. 379,900 more than it was taken in last year's estimates.

The fall of exchange, therefore, under these three heads adds Rx. 2,503,700 to the charges of 1895-96, as compared with those included in our last year's estimates.

37. We have also this year to do without the temporary relief we obtained (1) by levying contributions of Rx. 405,000 from the Provincial Governments; (2) by reducing the scale of Military Works and of Civil Works to the lowest possible figure. During 1894-95 we have been practically carrying on without any new works, so far as the Imperial account was concerned, and we must this year provide about Rx. 150,000 under the former and Rx. 130,000 under the latter, which last year we cut out. These three items add Rx. 685,000 to the burdens of the coming year.

38. There is a further annual burden which we have, for reasons which I shall afterwards explain, been obliged to undertake, in raising from 5 rupees to 6 rupees the payment we make to cultivators, under the Opium Agencies, for crude opium delivered. This may be put down as adding in an ordinary year about Rx. 360,000 to our expenditure; to which we may add another Rx. 100,000 for the necessity of supplementing our operations by purchases in Malwa.

39. Against all these measures we have one item of saving. The operation of the debt conversion reduces our charges by Rx. 524,800, including about Rx. 102,800 on account of debt outstanding unconverted, and therefore either discharged or awaiting discharge, but at any rate not bearing interest. Our balances are large enough to enable us to repay this debt without, at present at least, raising new debt in its place.

40. We approach therefore our Budget Estimates with the following burdens added to those which in last year's estimates resulted in a deficit of Rx. 301,900.

	Rx.
Charges dependent on exchange	2,503,700
Cessation of special reductions of expenditure	685,000
Additional opium payments	460,000
TOTAL	3,648,700
Deduct saving in interest	524,800
NET	3,123,900

41. It was this prospect which, as I have already explained in dealing with the Revised Estimates, induced us to apply to the Legislature in December last for permission to add duties on cotton goods to our Import Tariff. Although aware that the Customs duties had been more productive than we estimated in March 1894, it was evident that we had still a very large margin between Expenditure and Revenue to fill up. I have just shown that these Cotton duties add Rx. 1,515,000 (or Rx. 1,455,000 if we allow for Refunds) to the resources which were available to us at the time of our last Budget Estimates, and to this we may add Rx. 427,900 by reason of the higher estimate we consider ourselves warranted in now making of the productiveness of the other Import Duties.

42. This general forecast of the estimates for 1895-96 stands thus:—

	Rx.	Rx.
Deficit of 1894-95	301,900	...
Further burdens—net	3,123,900	3,425,800
Less Cotton Duties and other improvements in Customs Revenue	...	1,882,900
Result, a deficiency of	...	1,542,900

The question is whether the general advance of our Railway and other Revenues avail to make up this deficiency, and whether our estimates of expenditure under heads other than those above referred to, show a diminution in the burden to be borne.

43. A reference to the detailed estimates will show that these causes have operated to cover the whole of this deficiency, and that we anticipate on the whole account, after meeting certain special charges, a surplus of Rx. 46,200. This surplus, like that of the Revised Estimates, is the surplus *before* the consideration of the Famine Assurance Grant for Railway construction, and of course is too small to permit of our making any such grant out of Revenue.

44. Taking first of all the Railway earnings, the following figures show that we can anticipate for 1895-96 a better return by Rx. 816,300 than the Budget of 1894-95 contained:—

	Accounts, 1893-94.	Revised, 1894-95.	Budget. 1895-96.
	Rx.	Rx.	Rx.
State Railways—			
Gross earnings .	16,879,107	18,134,400	18,001,900
Working expenses .	8,263,975	8,813,000	8,697,000
Net . . .	8,615,132	9,321,400	9,304,900
Guaranteed Railways—			
Net earnings . .	3,383,812	3,039,000	3,495,000
TOTAL .	11,998,944	12,360,400	12,799,900

45. Under Land Revenue we estimate for Rx. 666,000 more than in the Budget of 1894-95. The greater part of this is, as I have already explained (paragraph 24), Revenue postponed from 1894-95. The estimate in fact covers more than one year's Land Revenue, though as progress in settlement is fairly active all over India, it is quite possible that a year or two will suffice to enhance the standard to an equality with the figure now taken.

46. Under Opium we estimate for Rx. 467,000 more than we took twelve months ago; the estimate of last year was admittedly a very low one, based on low prices and somewhat scanty sales. We have still the scanty sales, but we consider ourselves justified in taking R1,300 as the probable price.

47. Stamps and Excise give us what may be called normal increases, aggregating Rx. 303,100; and the other heads on the Revenue side mostly promise better results than last year, except that there is a serious falling-off in the irrigation estimates of the North-West Provinces.

48. The items I have mentioned make up an improvement of Rx. 1,849,900 on the Imperial Account:—

	Rx.	Imperial share. Rx.
Railways	816,300	787,700
Land Revenue	666,000	403,100
Opium	467,000	467,000
Stamps and Excise	303,100	192,100
		1,849,900

I need not enter upon the discussion of smaller differences. I have noted all the important ones, except, perhaps, an enhanced expenditure under Minor

Works—Irrigation, due mostly to enhanced grants for certain works in the Bombay Presidency. The amount of improvement which I have just stated would, when compared with the initial deficiency of Rx. 1,542,900, give a surplus of Rx. 307,000; and the surplus we declare, namely, Rx. 46,200, may be represented as this amount of Rx. 307,000, increased by numerous smaller differences to Rx. 376,200, and then diminished by two special charges, amounting to Rx. 330,000 which I have to mention under the head of Army.

49. In the Army figures the comparison with last year's Budget Estimates is as follows:—

		Budget, 1894-95.	Budget, 1895-96.	Increase.
Net Expenditure in England .	£	4,394,400	4,393,900	—500
Net Expenditure in India .	Rx.	15,416,700	16,286,000	869,300

Of this increase of Rx. 869,300, I have already taken into account the portion due to Exchange, namely, Exchange Compensation, Rx. 144,200, and the increase in British soldiers' pay, Rx. 379,900: total, Rx. 524,100, so that the real increase in the Military Estimates in India, apart from Exchange, is only Rx. 345,200, namely, the two charges I have mentioned, and a further amount of Rx. 15,200.

50. As usual, a large number of items contribute to this last difference. Waziristan and the Boundary Demarcation require a special provision of Rx. 107,400, and the construction of a trans-frontier post requires Rx. 32,500; certain new regulations as to good conduct pay and as to lance ranks in the British Army made a demand on us for Rx. 44,400; the new distribution of the Army into four commands requires an addition of Rx. 11,300, besides the Rx. 10,000 provided last year; a new and very necessary arrangement for hutting native troops requires an annual grant of Rx. 13,000 for some years, beginning with the present year; and the fall of Exchange adds Rx. 13,000 to the provision necessary for purchase of Colonial horses for remounts. Against these we can put some savings, of which the principal ones are expected less expenditure on Commissariat supplies, Rx. 164,000, and in Ordnance supplies, Rx. 18,500; the abatement of a special mobilization charge of Rx. 38,200, and of some other special charges that appeared in the Estimates of 1894-95.

51. Of the two special charges, the first is an amount of Rx. 150,000, which we desire to set aside in order to provide for the preparations we have thought it necessary to make for military operations that may be forced upon us in consequence of difficulties in Chitral. This is not to be understood as an estimate of the probable cost of these operations if they are undertaken. But we must be in a position to cross the frontier, and we consider it necessary to provide Rx. 150,000 in our ordinary Estimates for this purpose.

52. The remaining amount, Rx. 180,000, arises out of an announcement which I have a very great pleasure in being charged with the duty of making. The pay proper of the Native sepoy has been seven rupees a month since 1796, but in addition to this he enjoys other allowances, some of which are common to the whole force, like compensation for dearness of provisions, and some are special concessions, which apply only to portions of the forces. These last were mostly given under conditions which are no longer applicable, and they create in some cases undesirable inequalities of treatment.

The necessity for an increase in the general scale of sepoy's allowances has for some time past become increasingly evident to all engaged in the administration of India; and when some months ago the present Commander-in-Chief urged that the measure could no longer be postponed, the Government unanimously accepted the conclusion. Some details still remain to be settled, and I cannot do more at present than indicate in general terms that it is intended that from

July 1st next no soldier of the dismounted branches of the Native Army shall get less than nine rupees a month.

This increase of allowances for the force of about 110,000 men is estimated to cost Rx. 260,000 a year, but we have to provide in 1895-96 for less than a full year's charge, that is, for Rx. 180,000 only.

QUESTIONS RELATING TO BENGAL OPIUM.

53. In discussing the estimates, I have referred more than once to the subject of the Opium Revenue, stating that I would deal with the subject in a special section. During the year the Government had occasion to review the position and prospects of the Opium Revenue of Bengal. Some years ago the Government established as a sort of standard to be aimed at the number of 57,000 chests as the proper number to be sold in a year, and their policy was to maintain, in their production, a sufficient reserve of chests to enable them to bring forward this number for sale with fair regularity.

54. We had up till 1887-88, inclusive, several good years of production, the average of the last five years being 64,500 chests; and in the sales of 1889, fixed on the basis of the production of that year, we adhered to our standard of 57,000 chests, and were able also to add 12,500 chests to the reserve, which on January 1st, 1890, stood at 49,705 chests.

55. But after that year we entered upon a cycle of bad years. We may take it that the measure of production in an average year is ·20 maund per acre; we produced ·22 during the five years ending 1887-88, but for the next five we came down to an average of ·17. Moreover, we not only produced less per acre, but the cultivators were discouraged by a series of bad years, and the average cultivation fell from 553,000 acres in the first quinquennial period to 473,000 during the second. Each year we hoped for an improvement, and each year, though we greatly reduced the sales, we were drawing upon our reserve to make up a fair tale of sales, believing it impossible, by the law of averages, that the next season should fail to restore in some degree our position. When I made the financial statement last year, we believed we were on the eve of harvesting a very good crop; but such is the precarious nature of the opium crop, that within a month we found that the poppies were deficient in juice, and we presently realized that the crop to be garnered was the worst on record. The ratio of productiveness diminished to ·13, and the produce of provision opium, after reducing to a minimum the necessary manufacture of excise opium, was only 33,328 chests. We were obliged very greatly to limit the sales for 1895, and the reserve is absolutely exhausted. The amount to be sold in 1895 is only 37,260 chests.

56. We have gained very greatly in the enhanced price we have obtained in this restricted market, but probably the disturbed state of affairs in China has given freer entrance to our opium and served to aid the enhancement in price.

57. We, however, have long ceased to have a monopoly of opium supply in China, and we have to steer between the two opposing policies of risking our position in the market by restricting the quantity supplied, and risking the prices we obtain by sending too much into the market. We have no doubt that at our present rate of sale the risk we are running is the first of these two risks, and we consider ourselves under an obligation, in our own interests, to restore the standard of production with a view of increasing the amount sold, as well as of setting aside a reserve, which will enable us to maintain a pretty equal supply.

58. We considered under these circumstances it was wise to increase from R5 to R6 the rate paid to the cultivator for crude opium, and so far as we can judge, this increase has produced the desired effect—in the Benares Agency at least—of preventing a serious falling-off in the area under cultivation. We have

also made arrangements for the purchase of crude opium in Malwa, which we can manufacture into excise opium, so as to set free as much as possible of the produce of the Agencies for manufacture for export. The future sales we do not definitely settle till June, but it is desirable on the present occasion to say that unless we can manufacture more than 52,000 chests out of our Agency produce, we shall not increase the sales of 1896 beyond 42,000 chests.

CONVERSION OF THE RUPEE DEBT.

59. My predecessor, Sir David Barbour, in raising a Rupee Loan in 1893 at 3½ per cent. interest laid a foundation for a general reduction to that rate in the interest borne by our securities. That loan was raised at an average rate of R96-3-2½, but the price quickly rose, and at the date of the last financial statement it stood above par; by June it had risen to 2½ per cent. premium. This price, and our very large cash balance, in which we had some 8 to 10 crores (*i.e.* millions of Rx.) to spare, convinced us, and also created an impression among the public, that the opportunity had come to attempt a reduction of the general rate of 4 per cent. at which our securities stood.

60. The amount of debt to be dealt with was over 95 crores (millions of Rx.), of which 27·3, 24·5, and 35·5 were held respectively under the loans of 1842-43, 1854-55, and 1st May 1865, the balance being divided over five smaller loans. About 25 crores of this amount, chiefly of the 1854-55 Loan, was held in England.

61. It is unnecessary to explain the precise considerations which determined the details of our programme. The main considerations were the necessity of having the operation complete by the month of November, and of so arranging it that our spare cash balance of 8 to 10 crores was, at every stage, a sufficient backing for each immediate operation. As a matter of fact, except under the first notification, when we risked, in the event of complete failure, a possible obligation of having to discharge 19 or 20 crores, we at no time stood any chance of having to meet, in the form of discharge of debt, more than could easily be met out of our unusually ample cash balances; and, of course, this circumstance, sufficiently well known, was a strong inducement to the holders of the debt to come in for conversion. Indeed, as the price of the 3½ per cent. loans never stood at a lower figure than R103 during the whole operation, they had everything to gain, and nothing to lose, by accepting our terms of conversion, rather than taking discharge.

It fell just below R103 in the first week of August, but in that week no conversion operation was in progress.

62. Our first notification issued on 30th June, and announced the discharge of the 4 per cent. loan of 1842-43, with option of accepting reduction of rate of interest to 3½ per cent., the reduced rate having effect from August 1st, 1895, and being guaranteed till August 1st, 1904. The outstanding amount of this loan was about 19 crores in the hands of the public, and a little over 8 in the currency investment. We offered the same terms of conversion to holders of other loans at the same time, and hinted that if they did not accept, they might have to accept less favourable terms in future.

63. We allowed the usual period of a month for acceptance of our terms, and when we came to make up accounts (the completion of which always took a little time, as we received notes for conversion at every treasury in India), we found that the compulsory conversion (that of the 1842-43 Loan) had been almost universally accepted, and that about 14 crores of other loans had also been tendered.

64. Our next step was to advertise, on August 13th, a portion of the 1865 Loan, offering conversion on terms one-quarter per cent. worse than the original ones; but at the same time we re-opened, for a fortnight, both in respect of this,

and of other loans, the terms of voluntary transfer offered under the first notification. A few days afterwards we similarly notified two petty loans that stood upon our books. This was really the critical part of the operation—the portion of it which settled the question whether or not we would be able to carry it through. The plethoric condition of the London money market, which declared itself, especially in the month of August, combined with the success we had obtained in the first operation to bring in tenders for optional conversion at a rapid rate. And when at the end of the fortnight, for which the original terms were open, we collected our information, we found that we could account for about 66 crores as converted, namely, about 38 compulsorily and 28 optionally.

These figures will precisely not agree with the figures given in Part II. I am dealing here with the information we possessed at the time, and not with the totals as afterwards collected and made up.

65. The outstandings were now, at the outside, 14 crores of the 1854-55 Loan (in which the English holding had been reduced by optional conversions to a little over 6½ crores), 9 crores of the 1865 Loan, and 6 crores distributed under other loans.

66. We notified the 1854-55 Loan at once (September 1st), bringing forward still farther, namely, to 31st December 1894, the date from which the reduction of interest was to have effect, and we offered optional conversion to other outstanding holders on the same reduced terms (3rd September). When the first fortnight of this notification was over, the total outstanding balance was reduced to 10¼ crores, of which, however, we were pretty confident that returns not yet received would account for one or two crores.

67. A final notification on 20th September applied still further reduced terms of compulsory conversion, or discharge, to the remaining outstandings.

68. We knew that we had only 4 or 5 crores remaining unconverted, and with the aid of the Public Debt Offices we set to work to re-examine the returns, for it will still be a little time before the operation will have completely passed into the accounts. The result as known on the 9th March 1895 was as follows:—

[The figures are Rx., omitting ooo.]	Balance on 30th June 1894.	Converted into 3½ per cent. guaranteed.	Balance unconverted.
1. Loan of 1832-33 . .	617	554	63
2. Loan of 1835-36 . .	1,560	966	594
3. Loan of 1842-43 . .	27,316	25,980	1,336
4. Loan of 1854-55 . .	24,448	23,118	1,330
5. Transfer Loan of 1st May 1865	35,536	34,113	1,423
6. Reduced Loan of 16th January 1879 . . .	5,617	5,232	385
7. Mysore Family Loan .	50	50	...
8. East India Railway Commuted Stock . .	5	5	...
TOTAL .	95,149	90,018	5,131

69. We took the opportunity offered by the conversion of simplifying our loan accounts by abolishing the first two and the last two of the above list; that is, the terms of conversion offered in these two cases included transfer into one or the other accounts. The result is that, in lieu of the above eight heads, we have now on our books only four accounts, the four guaranteed 3½ per cent. loans, as they are now called, all held under precisely the same conditions, and differing only in respect of the half-yearly dates on which interest is payable.

70. These and the two previously existing 3½ per cent. loans, which aggregate a little over 3½ crores, and the conditions of which differ from the above only in

respect that they are not guaranteed against discharge before August 1st, 1904, summarize, with one small exception, the whole of our rupee public debt.

71. The option of conversion into 3½ per cent. guaranteed debt having closed on October 3rd, we proceeded, by a notification on October 8th, to offer the holders of the above-stated unconverted balance of Rx. 5,131,000 the option of taking, on certain terms involving surrender of accrued interest, unguaranteed paper of 3½ per cent. if they preferred it to taking discharge. These terms of conversion are still open, and up to the 9th March the balance in question was thus accounted for—

[The figures are Rx., omitting ooo.]	Unconverted balance as above.	Converted into 3½ per cent. unguaranteed loans.	Discharged under original notifications.	Still outstanding on 9th March.
Loan of 1832-33 . .	63	2	8	53
Loan of 1835-36 .	594	82	5	145+362*
Loan of 1842-43 . .	1,336	786	153	397
Loan of 1854-55 . .	1,330	434	574	322
Loan of 1865 . .	1,423	533	170	720
Loan of 1879 . .	385	171	64	150
TOTAL .	5,131	2,008	974	1,787+362

* The Rx. 362,000 separately shown appertain to the Husseinabad endowment referred to in Act XV of 1878 and held by the Government in trust. Either most of it, or the whole of it, will be converted after the completion of an examination of the original transactions out of which it arose.

72. According to present appearances our new 3½ per cent. securities bear as high a value in the market as the 4 per cent. did a year ago; and what is quite as important, the reduction of interest has not had any effect in quickening the flow of securities from the English to the Indian market, about Rx. 909,300 having been transferred in eleven months of this year, against Rx. 1,247,000 last year.

73. The annual saving in interest which will accrue from the conversion is about 46 lakhs of rupees; but, as about 4 lakhs of that amount arises in respect of securities held in the currency investment, the net saving on the Revenue Account is about 42 lakhs (Rx. 420,000). But there will be a further temporary saving, by the discharge of the 97 lakhs above-mentioned which will not require immediate replenishment, and also by the cessation of current interest on the 215, or rather 179 lakhs (see the note in the last column).

74. I would not be doing justice if I passed from this subject without a word of acknowledgment to the Bank of Bengal for the extremely efficient manner in which it coped with the immense mass of work which the conversion operations threw upon it. Each stage of the work was necessarily sprung upon the Bank without any warning, but the Directors, and their Secretary, Mr. Cruickshank, were able, by rapid organization of their forces, to meet the whole of the demands upon them without a single hitch of any kind. The acknowledgments of the Government have been conveyed both to them and to the other two Presidency Banks.

CAPITAL OUTLAY.

75. I have already stated—and it will be no matter of surprise—that we are not yet in a position to re-introduce the Famine Insurance grant. We charge against this head in 1895-96 a small amount, namely, Rx. 50,000 for Irrigation Works and Rx. 5,000 for Famine Expenditure; and we take from it also, though we charge under Railways, Rx. 366,800 in respect of the deficiency of interest on the Bengal-Nagpur and Indian Midland Railways, giving a total of Rx. 421,800. But we have no surplus to devote to the construction of Protective Railways, and the Famine Insurance grant must for the present remain in partial abeyance.

76. Although we did not provide for any Famine Insurance grant for Railway Construction in the Budget Estimates of 1894-95, I explained at the time that we

were nevertheless really providing for the obligations imposed upon us in that respect. This is even more abundantly evident now that our revised estimates have resulted in a handsome surplus, for the following figures will show that this surplus, though it has not as a matter of account been transferred to and granted from Famine Insurance, has, as a matter of fact, been largely spent upon the East Coast Railway, which is the principal remaining item in the Protective Railway programme:—

	Budget.	Revised.
	Rx.	Rx.
Surplus on the Revenue Account	...	+990,500
Railway Construction on Capital Account	3,450,000	4,610,000*
Irrigation	550,000	590,000
TOTAL CAPITAL OUTLAY	4,000,000	5,200,000

* Includes Rx. 768,000 spent upon East Coast Railway.

The amount allotted to Railway Construction was considerably enhanced during the year, and we have thus, as a matter of fact, utilized our surplus by spending it upon Railway Construction, though we have not for that purpose passed it through the Famine Insurance Account.

77. The Budget for 1895-96 provides for construction, on Capital Account, of Rx. 3,700,000, Railways, and Rx. 700,000, Irrigation: total Rx. 4,400,000. These figures include Rx. 500,000 on account of the East Coast Railway, which there are further projects for connecting with Calcutta, though they are not far enough advanced to find a place in our estimates. Besides the State outlay just mentioned, there will be expenditure on the Assam-Bengal line to the extent of £500,000 against debentures raised under the contract with the Company.

DEBT AND REMITTANCE.

78. The Secretary of State's account for the two years 1893-94 and 1894-95 may be taken as showing to what extent it has been necessary for him to increase the debt of India, in consequence of the failure of remittance in 1893-94. The figures of the two years are as follow:—

	Accounts, 1893-94.	Revised Estimate, 1894-95.	TOTAL.
	£	£	£
Net Receipts—			
Council Bills	9,539,235	17,000,000	26,530,235
Permanent Debt—			
Principal transactions	1,386,000	6,000,000	7,386,000
Others	48,785	—4,300	44,485
Temporary Debt	6,000,000	—4,000,000	2,000,000
Deposits, Advances, etc.	934	3,400	4,334
Opening Balance	2,268,388	1,300,564	2,268,388
TOTAL	19,234,342	20,299,664	38,233,442
Net Outgoings—			
Expenditure	15,633,361	15,594,500	31,227,861
Capital expenditure	725,084	823,200	1,548,284
Transactions on account of Railway Companies	654,903	530,700	1,185,603
Remittance Account with India	920,430	905,100	1,825,530
Closing Balance	1,300,564	2,446,164	2,446,164
TOTAL	19,234,342	20,299,664	38,233,442

79. The latest figures show that the remittances of the current year may fall somewhat short of our estimated figure of £17,000,000, but we may, I think, after the remittance of an amount approaching £17,000,000 sterling during the current year, say that the disturbance due to the failure of remittance in 1893-94 has ceased to have effect; and we see now that its effect has been the increase of sterling debt by—

	£
India 3 per cent. Stock	6,000,000
3½ per cent. debentures	1,386,000
Temporary Loans	2,000,000
TOTAL	9,386,000

Against this we may take—

Capital outlay charged in India and in England—			
	Rx.		
1893-94	3,621,252		
1894-95 (Revised)	5,200,000		
Permanent debt paid off in India—net—			
1893-94	890,574		
1894-95 (Revised)	1,200,200		
Increase of cash balance in India, March 31, 1893, to March 31, 1895	7,407,732		
TOTAL	...	18,319,758	
Deduct—Loan of 1893	...	3,499,100	
NET		14,820,658	

80. So far as at present anticipated there will be no borrowing, either in sterling or in rupees, in 1895-96, although the temporary loan of £2,000,000 which falls due in May will have to be renewed.

81. The transactions of 1894-95 lead us to hope that we have now resumed the even tenor of remittance, and the Secretary of State estimates to draw £17,000,000 of Council Bills during 1895-96.

82. These announcements as to borrowing and as to Council Bills are made, as usual, with the most absolute reservation to the Secretary of State and the Government of India of power to change their programme in any way they think advisable.

CONCLUSION.

83. I have now given an account—I hope it is a clear one—of the financial crisis through which we have been passing during the last two years. I am far from saying that that crisis is yet past: we are now in smoother waters, and our prospects, so far as financial equilibrium is concerned, are distinctly more hopeful than they were twelve months ago. But many causes for anxiety still remain, and we may again be in difficulties before many months are over. Not that I foresee any special difficulties, but merely that, so long as a difference of a tenth of a penny in exchange means a difference of a quarter of a crore in our estimates, we would be foolish to build, upon the favourable outturn of the estimates which I have to-day presented to the Council, any sanguine expectations of brighter days in the immediate future. I stated last year—and I repeat it now—that we cannot call our financial position safe until we can reckon upon sufficient surplus to warrant our renewing the Famine Insurance Grant. We believe that under present circumstances it is better to go without that grant than to increase taxation for the purpose of providing the surplus, which is necessary before we can renew it. And, meantime, although we are as yet far from a complete restoration of our fortunes, I think we may claim to have made a fair amount of progress towards their restoration.

PART II.

DETAILS OF ACCOUNTS AND ESTIMATES.

Section I.—Accounts of 1893-94.

84. The Revised Estimates for the year 1893-94 worked out to a deficit of Rx. 1,792,800, but the Accounts show a slightly diminished deficit of Rx. 1,546,998.

85. Explanations under the several heads of the variations of the Account figures from those of the Budget and Revised Estimates are given in the Appropriation Report published in the *Gazette of India* of the 16th instant. A general comparison of the Revised Estimates with the Accounts of the year is contained in the following statement:—

		Revised Estimate.	Accounts.	Accounts, better.	Accounts, worse.
REVENUE.					
India	Rx.	90,121,000	90,246,041	125,041	...
England	£	187,700	193,454	5,754	...
Exchange	Rx.	120,800	125,719	4,919	...
TOTAL	Rx.	90,429,500	90,565,214	135,714	...
EXPENDITURE.					
India—					
Imperial, Provincial, and Local	Rx.	66,548,400	66,311,392	237,008	...
Adjustment for Provincial and Local Surplus or Deficit	Rx.	—478,800	—311,291	...	167,509
NET	Rx.	66,069,600	66,000,101	69,499	...
England	£	15,909,600	15,826,815	82,785	...
Exchange	Rx.	10,243,100	10,285,296	...	42,196
TOTAL	Rx.	92,222,300	92,112,212	110,088	...
Deficit	Rx.	1,792,800	1,546,998	245,802	...

86. The total Revenue in India was higher than the figure taken in the Revised by Rx. 125,041, while the total Expenditure was less by Rx. 237,008, giving a total improvement of Rx. 362,049. This was distributed as follows between Imperial and Provincial:—The actual Revenue exceeded the Revised Estimate by Rx. 89,182 under Imperial and by Rx. 35,859 under Provincial and Local; while Imperial Expenditure fell off by Rx. 105,358, and Provincial and Local Expenditure by Rx. 131,650. There was thus an improvement in the Imperial Section of the Accounts of Rx. 194,540, and in the Provincial and Local Section of Rx. 167,509.

87. In England there was a reduction in Expenditure, including Exchange, of Rx. 40,589, and an improvement in Revenue of Rx. 10,673, which together give an improvement of Rx. 51,262. And adding to this the improvement of Rx. 194,540 in the Imperial Section we arrive at the amount of Rx. 245,802 by which the deficit in the Accounts fell short of the estimate of March last.

88. The largest part of the increase in Revenue occurred in the Railway Revenue Account, under State Railways, Rx. 103,727, the traffic on the North-

Western and Bengal-Nagpur Railways at the end of the year having improved beyond what was expected. Miscellaneous Revenue was also under-estimated by Rx. 31,336, and Army Receipts by Rx. 23,243. Under Principal Heads of Revenue there was on the whole only a slight over-estimate of Rx. 20,600, but the variations under some heads were considerable. Salt Revenue showed the largest deficiency, coming short of the Revised Estimate by Rx. 117,324. Opium also was over-estimated by Rx. 66,829 and Stamps by Rx. 41,649. On the other hand, Land Revenue and Forests brought in Rx. 97,309 and Rx. 45,922 more than was anticipated.

89. The expenditure was generally slightly less than in the Revised Estimate, the largest difference occurring in the expenditure on Civil Works, where the over-estimate amounted to Rx. 117,322. Provincial and especially local officers are apt to provide large margins under this head, which we admit only because the estimate does not affect the Imperial Account. The expenditure on Civil Departments was slightly under-estimated by Rx. 80,106, chiefly under Police; also for the most part a non-Imperial head.

90. In England the differences in expenditure were in most cases small; the only considerable difference was in the Army Expenditure, which fell short of the Revised by £85,108, owing, as usual, to the progress in the supply of stores being slower than was anticipated.

The expenditure in England was brought to account at an exchange of 14·5466 pence, the rate taken in the Revised Estimate having been 14·6 pence.

91. The Expenditure not charged to Revenue amounted to Rx. 3,621,252, being slightly less than was taken in the Revised Estimate.

Section II.—Revised Estimate of 1894-95.

92. The following statement contains a general comparison of the figures of the Budget and Revised Estimates of 1894-95, the former having been made up on the basis of a rate of exchange of 14*d.*, and the latter of 13·09*d.*, to the rupee (or more exactly Rx 18⅓ to the pound):—

		Budget.	Revised.	Revised, better.	Revised, worse.
REVENUE.					
India	Rx.	91,728,000	94,783,800	3,055,800	...
England	£	173,200	202,000	28,800	...
Exchange	Rx.	123,700	168,300	44,600	...
TOTAL	Rx.	92,024,900	95,154,100	3,129,200	...
EXPENDITURE.					
India—					
Imperial, Provincial, and Local	Rx.	66,373,500	65,857,600	515,900	...
Adjustment for Provincial and Local Surplus and Deficit	Rx.	—1,184,400	—654,200	...	530,200
NET	Rx.	65,189,100	65,203,400	...	14,300
England	£	15,830,300	15,796,500	33,800	...
Exchange	Rx.	11,307,400	13,163,700	...	1,856,300
TOTAL	Rx.	92,326,800	94,163,600	...	1,836,800
SURPLUS (+)	Rx.	...	+990,500	...	...
DEFICIT (—)	Rx.	—301,900	...	1,292,400	...

93. The Revenue in India has increased by a very considerable amount, and there has also been a slight improvement in the Revenue in England. The total Expenditure in India is below the Estimate, the Imperial Expenditure, including that in England, sharing in the improvement, though to a smaller extent. But the fall in the rate of exchange from 14*d*. to 13·09*d*.—a fall of slightly less than one penny—absorbs nearly two crores of the increased revenue. The net result is nevertheless a considerable improvement, the deficit of Rx. 301,900 being converted into a surplus of Rx. 990,500.

94. The total improvement of the Revenue in India amounts to Rx. 3,055,800, of which the Imperial share is no less than Rx. 2,895,300, the small balance of Rx. 160,500 arising out of the Provincial and Local portion of the Accounts. The bulk of the improvement is under Opium, Customs and Railways, which are either wholly or mainly Imperial heads of account.

95. The heads under which a considerable improvement is anticipated are—

	Imperial.	Provincial and Local.	TOTAL.
	Rx.	Rx.	Rx.
Opium	928,400	...	928,400
Stamps	17,100	41,500	58,600
Excise	150,200	45,300	195,500
Customs	922,900	7,200	930,100
Assessed Taxes	30,100	22,300	52,400
Miscellaneous	31,500	30,400	61,900
Railway Revenue Account	799,900	3,900	803,800
Army	120,000	...	120,000
TOTAL	3,000,100	150,600	3,150,700

96. The large improvement in Opium occurs mainly in the sales of Bengal Opium, which account for Rx. 795,300 of the Rx. 928,400 shown above, but in Bombay the duty on Malwa Opium has also improved by the considerable amount of Rx. 134,900.

In Bengal it proved necessary in consequence of another bad season and small crop to reduce the number of chests sold during the last six months of the year from 3,525 to 3,105 a month, thus reducing the total number of chests sold in the year from 42,300 to 39,780. But so great has been the rise in price, partly owing, no doubt, to the restriction in the amount sold, that the outcome has been the largely improved receipts noted above. For the Budget it was not considered safe, having regard to the prices ruling in March last, to take a higher average rate than ₹1,070 a chest, but the actual average rate for the year has been ₹1,337$\frac{11}{16}$, while the highest average touched in any month was ₹1,540 in February.

October was the first month in which the diminished number of chests was offered for sale, but the reduction was announced on June 19th, 1894, and the price rose steadily till February. After the February sale a sudden reaction set in, and the price realized in March was more than ₹200 a chest below that realized in February.

The prices of Malwa Opium have risen, as well as those of Bengal Opium, though not to the same extent. The rise was considered sufficient to justify the imposition of an increased duty on Malwa Opium, and the duty was accordingly raised from ₹600 to ₹650 a chest by a notification issued on 11th December 1894. The higher duty does not appear to have materially checked exports, and it will bring in during the current year about Rx. 27,900 out of the total improvement of Rx. 134,600 in Bombay.

97. The improvement of Rx. 58,600 in the Revenue from Stamps is mainly the outcome of increases of Rx. 65,000 and Rx. 30,000 in Bengal and Madras, and of decreases of Rx. 30,000 and Rx. 16,000 in the North-Western Provinces and Oudh and the Punjab.

98. In Excise Revenue there has been a general improvement everywhere except in the Central Provinces, where, however, the falling off is very slight, and in Assam where it is expected that the Budget Estimate will just be realized. The largest improvement has been in Madras (Rx. 60,000), Bengal (Rx. 45,000), Lower Burma (Rx. 33,000), and Bombay (Rx. 28,000).

99. Under Customs Rx. 63,200 of the total increase of Rx. 930,100 is due to improvements in Export Duties (Rx. 41,400) and Miscellaneous Revenue (Rx. 21,800). The remainder (Rx. 866,900) arises from the duties on Imports. A considerable portion of it accrues from the Cotton Duties which were imposed on December 27th last, and are expected to produce this year the following (gross and net) amounts:—

	Rx.
Import Duties	354,100
Excise Duties	12,500
Gross Revenue	366,600
Less Refunds	7,500
NET REVENUE	359,100

The balance of Rx. 500,300 is due almost entirely to the new duties imposed in March last having proved more productive than was then expected. The Budget and Revised Estimates for Import Duties (other than Cotton Duties) are classified in the table below under certain general heads:—

	Budget Estimate, 1894-95.	Revised Estimate, 1894-95.	Increase.	Decrease.
IMPORT DUTIES.	Rx.	Rx.	Rx.	Rx.
Articles on which the duties remained unaltered.				
1. Liquors	612,000	621,000	9,000	...
2. Arms and Ammunition	31,250	35,000	3,750	...
3. Other articles	450	*	...	450
TOTAL	643,700	656,000	12,300	...
Articles on which new or enhanced duties were imposed.				
4. Articles of food and drink	246,000	296,000	50,000	...
5. Chemicals, Drugs, Medicines, etc.	62,500	94,000	31,500	...
6. Silver Bullion and Coin	100,000	355,000	255,000	...
7. Other Metals and Manufactures of Metals	210,500	208,000	...	2,500
8. Oils	392,000	310,000	* ...	82,000
9. Manufactured articles	393,000	504,000	111,000	...
10. Raw materials and unmanufactured articles	66,000	121,000	55,000	...
TOTAL	1,470,000	1,888,000	418,000	...
Deduct—Refunds and Drawbacks	70,000	†	70,000	...
GRAND TOTAL	2,043,700	2,544,000	500,300	...

* Included under (5).
† Shown as expenditure in Revised.

The only article in the case of which the duty is expected to fall seriously short of the estimate of March last is Petroleum; allowance was made for a considerably decreased import in consequence of the enhancement of the duty, but the reduction has proved insufficient, as there has been an enhancement of price due to other causes than increased duty. Metals, other than silver, will give about the amount anticipated, but in the case of all the other articles the Revised Estimate now framed is considerably in excess of the Budget. The largest increase is in the duty on silver, for which it was not in March last considered safe to take a larger amount in the absence of information as to the effect which the duty might have in checking the importation of this metal. The gross and net imports of silver for the first eleven months of the year are—

	Value of Gross Imports.	Value of Net Imports.
	Rx.	Rx.
1894.		
April	605,485	437,559
May	414,159	305,052
June	495,885	291,643
July	1,094,258	913,014
August	897,994	691,588
September	777,617	735,707
October	414,023	198,715
November	360,561	288,762
December	567,203	528,171
1895.		
January	735,645	677,614
February	592,003	554,753
TOTAL ELEVEN MONTHS	6,954,833	5,622,578

100. Assessed Taxes show an improvement everywhere but in the Central Provinces, where the falling off is almost inappreciable. The largest increases are Rx. 20,000 in Bengal and Rx. 19,500 in Madras.

101. Under Miscellaneous Revenue the principal items making up the improvement of Rx. 61,900 are (1) the Refund of the Opium Commission Charges incurred in 1893-94 which will be brought to account in India—Rx. 9,400, (2) increased gain by exchange on transactions in the Local Currency of Hyderabad (Halis) Rx. 6,000, the value of the Halis having fallen considerably since the mints were closed, (3) an improved Revenue of Rx. 10,000 in Bengal from fees for survey of Tea Lands and from Partition Fees, (4) a special repayment of Rx. 7,600 by the Bombay Port Trust on account of a portion of its debt to Government which does not bear interest, and (5) an improvement of about Rx. 3,000 in the Revenues of Berbera and Zaila.

102. The Railway Revenue has continued to develop in a most satisfactory way. The improvement shown above is made up as follows:—

	Rx.
State Railways Gross Receipts	1,194,400
Guaranteed Railways Net Traffic Receipts	—406,500
Subsidized Railways	15,900
TOTAL	803,800

The only untoward feature is the large falling-off in the net receipts of Guaranteed Railways, chiefly on the Great Indian Peninsula Railway (Rx. 480,000), against which there is some set-off in improved receipts on the Bombay Baroda and Central India Railway (Rx. 82,500). On State Railways the improvement has been general, the only important exceptions being the Mysore Railway (—Rx. 20,000) and the Burma Railway (—Rx. 90,000), the last of which has remained at the low level of 1893-94, and has not recovered the ground lost in that year, as it was expected to do when the Budget was framed. The improvement has been very large on some lines, such, for instance, as the following:—

	Rx.
East Indian	190,000
Rajputana-Malwa (including Godhra-Rutlam)	222,500
Eastern Bengal	210,000
Oudh and Rohilkhand	195,000
North-Western	300,000

while the Indian Midland, Southern Mahratta, East Coast and Bengal and North West and Tirhoot Railways also show a material excess over the Estimates.

Of course in the case of Railways there is always some set-off against increased Revenue in the shape of enhanced working expenses, and this year this enhancement has amounted to Rx. 411,200. But even taking the net Traffic Receipts for State Railways the improvement mounts up to the very large figure of Rx. 783,200.

103. The increase in Army Receipts has arisen chiefly under Commissariat Receipts (Rx. 18,600), due to larger sales of malt liquor in consequence of the increased strength of British Troops, and under Ordnance Receipts (Rx. 82,300), due to larger sales of stores.

104. The only head of Revenue under which a noticeable falling off is expected is Land Revenue (Rx. 194,900). This is due mainly to suspensions in the North-Western Provinces, where the Revenue is expected to fall short by Rx. 196,500 of the figure taken in the Budget Estimates; the arrears will, it is expected, be collected next year, the Budget Estimate for which is correspondingly raised. There are also decreases of Rx. 58,300 in the Central Provinces, of Rx. 74,800 in Bombay, and of Rx. 52,800 in the Punjab, owing largely to similar postponements of collection, which have led to Revenue due in 1894-95 being reserved for collection in 1895-96. In Bombay there have also been some remissions of Revenue owing to floods in the Sind Districts. These reductions have been partially counterbalanced by improved collections in other provinces, principally Madras (Rx. 101,400) and Upper Burma (Rx. 55,000).

105. The increase in the sterling Revenue occurs under the head of Army Receipts, which are expected to give £66,600 against £33,400 in the Budget, the greater portion (£28,900) of the excess accruing under the head of Indian Troop Service and being due to the sale of three troopships for which no provision was made in the Estimates. Against this improvement there is a diminished receipt of £6,500 under Interest, the Secretary of State's balances not having been invested to the same extent as usual, owing to the low rate of interest prevailing during the greater part of the year.

106. The total falling off of Rx. 515,900 in the Expenditure in India as compared with the Budget is made up of a reduction of Rx. 146,200 in the Imperial Expenditure, and of Rx. 369,700 in the Provincial and Local Expenditure; it is the net outcome of several increases and decreases, some of which are of considerable proportions.

107. The more important increases and decreases are stated below:—

	Imperial.	Provincial and Local.	Total.
	Rx.	Rx.	Rx.
Increases.			
Refunds and Drawbacks	44,000	2,100	46,100
Interest	282,200	—3,400	278,800
State Railways Working Expenses	433,000	—21,800	411,200
Total	759,200	—23,100	736,100
Decreases.			
Land Revenue	12,800	67,500	80,300
Opium	610,100	...	610,100
Forest	28,800	21,600	50,400
Telegraph	44,000	...	44,000
Law and Justice—Jails	100	45,000	45,100
Police	30,300	32,700	63,000
Education	1,600	48,100	49,700
Civil Works	15,100	129,900	145,000
Army	50,600	..	50,600
Total	793,400	344,800	1,138,200
Net Decrease	...	...	402,100

108. **Exchange Compensation has not materially affected many of the heads of the estimates.** The rate of exchange adopted for the Budget Estimate was 14*d.*, which gives a maximum percentage for the calculation of Exchange Compensation Allowance of R14-4-7 per cent. The actual market rate applied has been for the four quarters $14\frac{3}{8}d.$, $13\frac{5}{16}d.$, $13\frac{5}{32}d.$, and $13\frac{1}{4}d.$, which give an average rate for the whole year of just over $13\frac{1}{2}d.$—the exact average is $13\frac{67}{128}d.$—with an average percentage for calculation of Exchange Compensation Allowance of R16-10-2. The percentage has thus been raised by R2-5-7. The total increase, however, over an estimate of Rx. 1,113,300 is only Rx. 122,600, which falls far short of being proportionate to this increased rate of percentage. The reason for this is that the basis for an accurate estimate—namely, a knowledge of past actuals—was wanting in March last; and there seems also to have been some tendency to over-estimate the charge.

Such details as are necessary for exhibiting the difference between the Budget and the Revised Estimate are given in the following table:—

	Budget Estimate, 1894-95.			Revised Estimate, 1894-95.			Increase + Decrease — on Total.
	Imperial.	Provincial.	Total.	Imperial.	Provincial.	Total.	
	Rx.	Rx.	Rx.	Rx.	Rx.	Rx.	Rx.
Civil Heads (including Marine and Post Office)	143,000	349,800	492,800	149,600	378,300	527,900	+ 35,100
Army	465,800	...	465,800	518,600	...	518,600	+ 52,800
State Railways Working Expenses	47,900	2,900	50,800	87,600	2,500	90,100	+ 39,300
Other Public Works heads (including Telegraph)	56,200	47,700	103,900	56,400	42,900	99,300	— 4,600
Total	712,900	400,400	1,113,300	812,200	423,700	1,235,900	+ 122,600

The only item which needs special notice is the increase under State Railways Working Expenses; the disproportionate increase in that case from Rx. 50,800 to Rx. 90,100 is due to the fact that provision was not made in the Budget for the payment of the allowance to Company's servants, the various Companies having adopted the principle only after the Budget was passed.

109. Of the increased charge under Refunds and Drawbacks, Rx. 38,200 occurs in Bombay, and is due mainly to refunds, etc., of Customs Duties. The increase is due partly to the refunds and drawbacks arising out of the new Cotton Duties imposed in December 1894, but partly also to the similar charges arising out of the new Customs Tariff of March 1894. For these refunds, provision was made in the Budget by deduction from the anticipated Revenue.

110. The increase under Interest is a consequence of the measures for the conversion of the Rupee Debt which were taken in the course of the year and have been briefly described above in Part I. Some further particulars are given in a separate section of this statement (see Section VI below).

The result of these measures has been to raise the charge for interest in the current year by Rx. 301,000 chiefly owing to the payment of an extra $\frac{1}{4}$ per cent. of interest up to 1st August 1895 under the terms first offered, as contained in the Notifications of 30th June and 13th August, and to the payment of the commission which was allowed to principals or agents actually tendering notes for conversion.

The expenditure under the head General Administration has also been slightly increased by these operations, owing to payments made to the Bank of England and to the Presidency Banks for the extra work involved in the conversion.

A saving of Rx. 524,800, however, in next year's estimates underthe head Interest results from the conversion operations (see paragraph 158), and this saving will be repeated in the Estimate of future years.

111. **The increased charges for the working expenses of State Railways are the necessary result of the improved Revenue; and have already been mentioned in connection with that improvement. (See paragraph 102.)**

112. The decrease under Land Revenue charges occurs chiefly in Bombay (Rx. 34,600) and the North-Western Provinces (Rx. 30,500), but there have been savings in all Provinces except Lower Burma, Bengal and the Punjab, where the charges have exceeded the Budget by Rx. 18,300, Rx. 10,300 and Rx. 3,300 respectively. In Bombay the principal savings are due to new establishments, for which provision was made, not having been entertained, and to savings in boundary marks expenditure, partly owing to large arrear recoveries, which are brought to account by deduction from expenditure. In the North-Western Provinces the saving is to a considerable extent nominal, being chiefly due to the transfer of certain charges from this head to Law and Justice. In Lower Burma the major part of the increased charge arises from increased commission paid on account of enhanced Land Revenue collections.

113. **The saving under Opium is due to the bad crop, to which reference has already been made (see paragraph 96).** When the Budget was framed, the expectation was entertained that there would be a very good crop; but the actual crop was the worst that has ever been secured. The result has been the large saving shown above.

114. Under Forests savings are expected everywhere, except in the Punjab, where there is a slight increase of Rx. 3,000. The largest savings occur in Madras (Rx. 14,500), Bombay (Rx. 10,700), and Lower Burma (Rx. 8,500).

115. The decrease of Rx. 44,000 in the expenditure in the Telegraph Department is attributed to (1) recoveries on account of the Kashmir, Mundra, Hurdwar and Gohna lines of telegraph, which have been treated as reduction of Capital

Expenditure, (2) the cost of establishment charged to, and the value of stores recovered from other Departments being larger than was anticipated, (3) an over-estimate of the cost of labour employed on workshops, and (4) savings in the establishment charges.

116. Under Jails there have been large savings in Bengal (Rx. 19,400) and the Punjab (Rx. 19,000), and smaller savings in most of the other Provinces. In Bengal the saving occurs under jail manufactures, and in the Punjab it is chiefly due to savings on rations owing to the low price of food grains and a smaller number of prisoners.

117. The savings in Police Expenditure have been general, except in Bengal and the North-Western Provinces, where a small excess over the Budget is expected, owing, in both cases, to increased exchange compensation allowance, and in the latter case also to an under-estimate of the ordinary charges of the District Police Force. The largest savings occur in Upper Burma (Rx. 27,500), where, first, a revision of the pay of Assistant Superintendents of Police, for which provision was made, was not carried into effect, and, further, both the District and the Special Police were under full sanctioned strength, and some reductions in the Special Police were effected, which more than counterbalanced heavy extra charges for Escorts and Rations. The savings in other Provinces are in no case large.

118. In the expenditure on Education there have been savings in every Province, the largest occurring in Bombay (Rx. 11,600) and Madras (Rx. 12,300); the saving in Bombay is to a large extent nominal, a sum of Rx. 9,900 for Building Grants having been transferred to other heads of account. In Madras there have been various petty savings, the largest being due to the estimate for Government Schools Special having been framed to include extra expenditure which has not been incurred.

119. Under Civil Works there are lapses in almost all the Provinces, but by far the largest saving, Rx. 101,700, occurs in Madras, chiefly under Local, and is apparently due to the expenditure having been estimated at a higher figure than the Local Authorities could arrange effectively to spend during the year.

120. Under the head of Army the expenditure in India shows a small saving on the whole. There have, however, been considerable increases under some of its sub-heads. The fall in the rate of exchange has raised the total charge for exchange compensation allowance by Rx. 52,800 (see paragraph 108), and the same cause has operated to raise the charge for British soldiers' pay. The rate taken for the latter in the Budget was $15\frac{1}{4}d.$, but it was revised in the course of the year, $14\frac{1}{4}d.$ being taken for the first quarter and $13\frac{1}{4}d.$ for each of the last three quarters, thus giving an average for the year of $13\frac{1}{2}d.$ The extra cost thus involved is Rx. 357,800. The Waziri Expedition is also estimated to cost Rx. 195,000 within the year, besides Rx. 90,000 which come into 1895-96; and some extra expense (about Rx. 35,000) has resulted from the excess over authorized establishment of the effective strength of British Cavalry and Infantry. All this extra expenditure has, however, been counterbalanced by savings in other directions, the largest being under Commissariat Supplies, owing to the generally prevailing low prices of food supplies, which have reduced both the direct charges for provisions for men and food for animals, and the indirect charges for the same which are given in the shape of compensation for dearness of Provisions and Forage. The total saving under the Commissariat Grant, due chiefly to the cause mentioned, is expected to be Rx. 504,800.

121. In sterling expenditure the saving of £33,800 is the net outcome of several increases and decreases, none being of any magnitude except

decreases of £70,700 under Interest, of £38,000 under Telegraphs, and of £55,600 under Army, and an increase of £39,700 under Special Defence Works. Under Interest the decrease was mainly due to the issue of £6,000,000 India 3 per cent. stock on which interest is payable for three quarters only within the year instead of £6,300,000 India Bills, in respect of which a whole year's interest was estimated, and to a reduction of the interest due on Temporary Loans from the Bank of England. These savings were lessened by the discount on the issue of the stock just mentioned. Under Telegraphs smaller indents for stores have been sent home, it having been found possible to diminish the time occupied in complying with indents and consequently to reduce the stocks held in India. Under Army the principal saving is in the non-effective charges, especially under Military pensions (£40,000), the charge for which has not increased so much as was expected. Under Special Defence Works the increase is partly due to payments which were provided for in 1893-94 having been actually made in 1894-95.

122. The decrease in sterling payments would have involved a decrease of Rx. 24,200 in the charge for exchange had the rate remained unchanged. The fall in the average rate of the Secretary of State's drawings from $14d.$ as estimated to $13{\cdot}09d.$ as realized is accordingly accountable for an increase of Rx. 1,880,500 in the Exchange.

Section III.—Budget Estimate of 1895-96.

123. The following Statement compares the Revenue and Expenditure in India and in England in the Budget Estimates of 1895-96 with that in those of 1894-95:—

		1894-95.	1895-96.	1895-96, better.	1895-96, worse.
REVENUE.					
India	Rx.	91,728,000	96,610,800	4,882,800	...
England	£	173,200	171,000	...	2,200
Exchange	Rx.	123,700	142,500	18,800	...
TOTAL	Rx.	92,024,900	96,924,300	4,899,400	...
EXPENDITURE.					
India —					
Imperial, Provincial, and Local	Rx.	66,373,500	68,332,000	...	1,958,500
Adjustment of Provincial and Local Surplus or Deficit	Rx.	—1,184,400	—623,300	...	561,100
NET	Rx.	65,189,100	67,708,700	...	2,519,600
England	£	15,830,300	15,910,600	...	80,300
Exchange	Rx.	11,307,400	13,258,800	...	1,951,400
TOTAL	Rx.	92,326,800	96,878,100	...	4,551,300
Surplus (+), Deficit(—)	Rx.	—301,900	+46,200	348,100	...

124. The general features of the Budget of 1895-96 compared with that of 1894-95 are a very large increase of Customs Duties, owing partly to the new duties on cotton yarn and goods imposed in December and partly to increased productiveness of the duties imposed in March last; a considerable increase in Land Revenue, due partly to suspensions carried forward from the current year and partly to increased assessments on revision of settlements; the usual progres-

sive improvement in the other Principal Heads of Revenue and in Railway Revenue; a large saving under Interest owing to the conversion of the Rupee Debt from 4 per cent. to $3\frac{1}{2}$ per cent.; a considerably increased charge under Army, due partly to the lower rate of exchange at which British soldiers' pay and exchange compensation allowance are estimated, and partly to the provision made for an increase to the Native Sepoys' pay, and for special warlike preparations in connection with the disturbances in Chitral; and a further largely increased charge under Exchange, caused by the fall in the value of the rupee from 14*d.* to 13·09*d.*

The net result is a small improvement, the deficit of Rx. 301,900 being converted into a surplus of Rx. 46,200.

125. The Revenue in India in 1895-96 is expected to exceed that taken in the Budget Estimate of 1894-95 by Rx. 4,882,800. Of this the sum of Rx. 1,515,000 is secured by new taxation.

126. The increase in Imperial Revenue is Rx. 3,999,100 and in Provincial and Local Rx. 883,700. The contributions from Provincial Governments amounting to Rx. 405,000, which were taken in the estimates of 1894-95 by reduction of the Provincial share of Land Revenue, disturbed the ordinary distribution of the Revenues as between Imperial and Provincial in that year; and as no contributions are taken in 1895-96 the comparison between the two years is to this extent affected. The Government of India's share in the increased Land Revenue of 1895-96 is almost exactly equivalent to the contributions taken last year from Local Governments, so that on the estimates as framed, though the total revenue under this head gives the substantial improvement of Rx. 666,000, the Imperial share shows a trifling reduction of Rx. 1,900 and the Provincial improvement amounts to Rx. 667,900. But for the disturbance of the ordinary distribution last year, the increase of Rx. 4,882,800 would have been distributed as Rx. 4,404,100 Imperial, and Rx. 478,700 Provincial and Local, and the Provincial share of the increased Land Revenue would have been Rx. 262,900. Under other heads than Land Revenue the Provincial and Local share of the increased Revenue amounts only to Rx. 215,800.

127. The only decreases of Revenue of any importance which are expected in 1895-96 are the following :—

	Imperial. Rx.	Provincial. Rx.	TOTAL. Rx.
Interest	47,200	—3,400	43,800
Gain by Exchange	61,600	...	61,600
Irrigation—Major Works Direct Receipts	—44,400	85,700	41,300
TOTAL	64,400	82,300	146,700

128. The falling off under Interest is due mainly to the reduction in the interest on the Paper Currency Reserve Investment from 4 to $3\frac{1}{2}$ per cent. which reduces the interest credited on that account from Rx. 326,400 to Rx. 285,600.

129. The factors which influence the amount taken to the head of Gain by Exchange have been explained in previous Financial Statements, and it is unnecessary to repeat them. The head is liable to extreme fluctuations; and it is only necessary to state here that the total fall of Rx. 61,600 is the outcome (1) of a falling off of Rx. 100,200 in Railway transactions, chiefly owing to the absence in 1895-96 of any gain on transactions with the Assam-Bengal Railway, and (2) of an improvement of Rx. 38,600 in other transactions, due to the much smaller difference between the official rate of exchange and the rate for Council drawings taken in the Budget Estimate for 1895-96.

130. Under Major Irrigation Works the falling off is the net result of a reduction of Rx. 87,900 in the North-Western Provinces, and of increases of Rx. 39,500 and Rx. 7,100 in the Punjab and Bombay. The falling off in the North-Western Provinces is attributed to the heavy and prolonged rainfall in Northern India during the cold weather season, which has considerably lessened the resort to irrigation. The estimate, however, which is that of the local officers, and which affects Provincial mainly, seems to err on the side of caution.

131. The principal increases of Revenue in India are the following :—

	Imperial. Rx.	Provincial. Rx.	TOTAL. Rx.
Land Revenue	—1,900	667,900	666,000
Opium	467,000	...	467,000
Salt	60,900	4,200	65,100
Stamps	26,500	59,900	86,400
Excise	165,600	51,100	216,700
Provincial Rates	—600	129,300	128,700
Customs	1,933,300	8,500	1,941,800
Assesed Taxes	30,000	28,300	58,300
Post Office	92,500	...	92,500
State and Guaranteed Railways	1,135,900	—24,500	1,111,400
Land Revenue due to Irrigation	61,200	...	61,200
TOTAL	3,970,400	924,700	4,895,100

132. Under Land Revenue there is an increase everywhere, except in Lower Burma (Rx. 14,000). The largest increases are in the North-Western Provinces Rx. 211,000, Madras Rx. 195,600, Central Provinces Rx. 99,000, and Bombay Rx. 111,500. In the North-Western Provinces Rx. 175,000, in the Central Provinces Rx. 54,200, and in Bombay a considerable amount are due to suspensions or postponements in the current year of revenue, which is expected to be realized in 1895-96. The rest of the increase in these Provinces is due to revisions of settlement. The same cause accounts for the greater part of the increase in Madras; but some of the improvement is also due to enhancement of water tax in the Godavari and Kistna Districts.

133. Under Opium the increase occurs chiefly in Bengal (Rx. 324,900), but there is also an increase of Rx. 124,600 in Bombay. The increase in Bengal is due to the higher level of prices now prevailing, which justifies us in taking a rate of Rs. 1,300 per chest, against Rs. 1,070 taken last year. The price of Bengal Opium is liable to great fluctuations, which render this head of Revenue one of the most difficult to estimate with even an approach to accuracy. But in view of the fact that the average price for the current year is ₹1,337$\frac{11}{16}$; that the price realised at the monthly sales has not been below ₹1,300 since June last; that the current market price is quoted at over ₹1,300; and that the estimate of the number of chests to be sold is based upon the present low scale, the estimate of ₹1,300 seems safe. The considerable increase in price, as compared with that taken in the Budget of 1894-95, much more than counterbalances the reduction in the number of chests sold from 42,300 to 37,260. In Bombay the increase is almost entirely due to the rate of duty having been raised from ₹600 to ₹650.

As explained below (paragraph 167) the opium expenditure has increased even more than the Revenue, and the net Opium Revenue in India is Rx. 33,000 below the Estimate for 1894-95.

134. The Salt Revenue fell off seriously in 1893-94; it was, however, anticipated that the fall would be only temporary, and the Budget of 1894-95 provided for a normal amount. This estimate has been fully realized, and the Revised Estimate now provides for an increase of Rx. 16,500 over the Budget of that

year. The Budget Estimate for 1895-96 provides for a further increase of Rx. 48,600, which is made up of increases in India, Burma, and Madras, and decreases in Bombay and Bengal, where the improvement during the current year has been largest and may not be maintained next year.

135. In the case of Stamps the usual progressive increase has been realized during 1894-95, the Revised providing for an excess of Rx. 58,600 over the Budget Estimate of the year. The Budget of 1895-96 provides for a further increase of Rx. 27,800, the only considerable increase being one of Rx. 18,000 in the North-Western Provinces and Oudh, where there has been a large falling off of Rx. 30,000 from the Budget of 1894-95, some portion of which, it is expected, will be recovered in 1895-96; the Budget figure for that Province is even now Rx. 12,000 below that for 1894-95.

136. As explained above (paragraph 98), the Excise Revenue in 1894-95 is expected to exceed the Budget by Rx. 195,500. The Budget, therefore, for 1895-96, which exceeds that of 1894-95 by Rx. 216,700, really provides only for the very moderate increase of Rx. 21,200 over the Revised Estimate of the preceding year.

137. The increase of Rx. 128,700 under Provincial Rates is made up principally of increases of Rx. 86,000 in Madras, and Rx. 20,700 in the North-Western Provinces and Oudh. The improvement in Madras is due partly to the village cess collections being made for the whole year, and not for nine months only as in 1894-95 (see paragraph 99 of Financial Statement for 1894-95), and partly to the causes which have led to increased Land Revenue in that Presidency. In the North-Western Provinces and Oudh the increase is largely due to suspensions carried forward from the current year, as in the case of Land Revenue (paragraph 132).

138. Of the total increase of Rx. 1,941,800 under Customs, the sum of Rx. 1,515,000 is due to the new duties on Cotton imposed in December 1894. The remainder of the increase is mainly due to the greater productiveness of the new duties imposed in March 1894. The distribution of the duties between the various detailed heads is shown in the table in paragraph 172.

139. Under Assessed Taxes the improvement in the Revised Estimate (see paragraph 100) is repeated in the Budget of 1895-96 with a very small further advance of Rx. 5,900.

140. Of the increase under Post Office, an improvement of Rx. 31,200 has already been secured in the Revised Estimate of 1894-95. The balance of Rx. 61,300 represents the normal annual progress, the rate of which is increasing year by year. There is of course increased expenditure to accompany the increased Revenue, but the net Revenue under this head is making steady progress (see paragraph 180).

141. The Estimate of Railway Revenue provides for an increase of Rx. 49,500 under Guaranteed Railways, and of Rx. 1,061,900 under State Railways. For State Railways the improvement in 1894-95 has been so marked, especially in the case of a few Railways (see paragraph 102), that it is not considered safe to estimate the Revenue for 1895-96 at the high figure provided in the Revised; the estimate for 1895-96 accordingly allows for ordinary progress on most lines, but for a reduction on the lines where the increase during the current year has been unusually large; but on the whole it falls short of the Revised by only Rx. 132,500. As regards the Guaranteed Railways, the Estimate anticipates that the whole of the falling-off during the current year will be rather more than recouped in 1895-96.

142. The Land Revenue due to Irrigation is expected to rise in Madras by Rx. 29,700, in the Punjab by Rx. 20,400, and in Bombay by Rx. 11,100, for reasons

which are explained in detail below (see paragraph 192). In the North-Western Provinces it remains stationary.

143. In the Sterling Revenue in England there are no large increases or decreases, and the total difference between the estimates is only £2,200, the main cause of which is a decrease of £5,000 under Interest, owing to the low rate now prevailing in London.

144. The principal increases of expenditure in India in 1895-96 are—

	Imperial.	Provincial and Local.	TOTAL.
	Rx.	Rx.	Rx.
Refunds	91,800	1,300	93,100

Army	901,300	...	901,300
TOTAL	2,400,600	163,300	2,563,900

145. For Exchange Compensation the total amount taken in the Budget of 1895-96 is Rx. 1,456,500, calculated at the percentage of ₹19-3-8, the equivalent of a market rate of 13*d*., as against Rx. 1,113,300, calculated at the percentage of ₹14-4-7, the equivalent of 14*d*. to the rupee, in the Budget of 1894-95. The increase of Rx. 343,200, which is spread over all the Budget heads, is not, however, proportionate to the increase in the percentage, because, as explained above (see paragraph 108) the expenditure on this account was overestimated in 1894-95. Compared with the Revised Estimate of 1894-95, the increase is Rx. 220,600. Some details of the charge on this account are given in the following table and are compared with the corresponding figures for 1894-95:—

HEADS OF ACCOUNT.	Budget Estimate, 1894-95.	Revised Estimate, 1894-95.	Budget Estimate, 1895-96.	Increase of Budget, 1895-96, over Budget, 1894-95.
	Rx.	Rx.	Rx.	Rx.

Other heads	180,400	194,600	243,200	62,800
TOTAL CIVIL DEPARTMENTS	492,800	527,900	637,200	144,400
Army	465,800	518,600	610,000	144,200
State Railways—Working Expenses	50,800	90,100	87,800	37,000
Other Public Works	103,900	99,300	121,500	17,600
GRAND TOTAL	1,113,300	1,235,900	1,456,500	343,200

The only head, under which more than proportionate increase occurs, is State Railways, the reason for which has already been explained in paragraph 108. But under all the heads indicated in the table, the increased charge due to the fall in the rate of exchange is considerable.

146. The increase in the case of Refunds occurs in Bombay (Rx. 81,300) and Bengal (Rx. 7,900). That in Bombay is due entirely to the provision made for refunds and drawbacks in connection with the Customs Duties, the provision for Customs refunds having been raised from Rx. 7,400 to Rx. 89,800. Out of this increase of Rx. 82,400 it is expected that Drawbacks on Cotton Duties, Customs and Excise, will amount to Rx. 50,000; the remainder is due to provision for the Customs refunds on other goods having been taken in the Budget for 1894-95 by deduction from the Revenue (see paragraph 109). The increase in Bengal also is due to the provision for Customs Duties, namely, Rx. 5,000 for Cotton Duties and Rx. 3,400 for other Customs Duties.

147. The increase under Opium is due to provision having been made for extra charges of Rx. 400,000 for the enhanced price of R6 instead of R5 a seer paid to the cultivators, and of Rx. 100,000 for the purchase of Malwa Opium for the manufacture of Excise Opium. A succession of six bad seasons, the last being the worst, has necessitated the action taken in both these cases, it being absolutely necessary to raise the price in order to prevent a wholesale reduction in the area cultivated with poppy, while the total absorption of the Opium Reserve rendered it advisable to purchase Malwa Opium for excise purposes, and thus set free a larger amount of the Bengal crop for building up again a suitable reserve.

148. Under Law and Justice the principal increase occurs in the North-Western Provinces and Oudh (Rx. 33,100), the greater part of which is nominal, being due to a transfer of certain charges from Land Revenue to this head. The only other variations of any magnitude are in Lower Burma (Rx. 16,600) and Bengal (Rx. 15,600). In Lower Burma provision is made for a second Additional Sessions Judge and his Establishment (about Rx. 5,800), and for the remuneration of copyists (Rx. 1,400) previously paid out of fees which were not brought to account. In Bengal the difference is mainly due to the increase in Exchange Compensation Allowance.

149. In Police expenditure there is almost everywhere an increase; the largest occurring in the North-Western Provinces and Oudh (Rx. 19,800), Madras (Rx. 20,600), and Bengal (Rx. 17,500). In the North-Western Provinces and Oudh provision is made for general re-organization of the District Police, and in Madras for a similar re-organization of the Railway Police. In Bengal extra expense is anticipated for Station Charge Allowances, for Police Clothing and for the new Military Police at Gnatong. In all these Provinces the increase is also swelled by the enhanced charge for Exchange Compensation Allowance. In Upper Burma a satisfactory reduction of Rx. 16,900 under this head is distributed between District and Special Police; reductions in the Police Force are being effected and the estimates provide for a reduction of two companies in the Military Police and for a smaller number of Mounted Police.

150. Under State Railways the increase in working expenses is a necessary concomitant of the increased revenue (see paragraph 111); while the larger interest charges, transferred from the head of Ordinary Debt, are the result of the increased capital expenditure.

151. The increase under Major Irrigation Works in made up of Rx. 44,000 for working expenses and Rx. 28,900 for Interest. Of the increase in working expenses Rx. 33,000 occurs in the Punjab, where it is more than covered by the improvement in receipts (see paragraph 130). The excess in Interest is due to the cause mentioned in the preceeding paragraph, namely, the increased Capital Expenditure which necessitates the transfer of a larger amount of interest from the head of Ordinary Debt.

152. The increase under Minor Irrigation Works occurs chiefly in Bombay (Rx. 36,900), Madras (Rx. 44,300), and the Punjab (Rx. 13,800), and there is, on the other hand, a reduction in Lower Burma (Rx. 28,300). The increase in Bombay is chiefly due to the provision made for special repairs to flood damages in Sind.

153. Under Military Works the expenditure was cut down as a measure of economy to help the Government towards securing equilibrium between Revenue and Expenditure. It has not been found possible to maintain the expenditure at this low rate for another year. Of the total amount of Rx. 1,166,300 provided under this head in England and India, only Rx. 297,600 are available for new works.

154. Of the increase under Civil Works, Rx. 127,600 is Imperial. The small balance of Rx. 33,200 is the net outcome of increases and decreases in the Provincial and Local Expenditure in various provinces.

The Imperial Expenditure under this head was cut down last year with the object mentioned in the preceding paragraph, and in this case also a larger expenditure is absolutely necessary, unless efficiency is to be sacrificed, maintenance and repair grants having been reduced in some cases in the current year in order to keep within the Budget Grant. Even with the increase now estimated the Imperial Expenditure does not come up to the standard of 1893-94.

The Provincial expenditure was also materially curtailed in 1894-95, partly to enable the Local Governments to make the contributions which were required to produce some approach to equilibrium in the Imperial Finances. In some cases the Local Governments have been able to provide for a slightly increased rate of expenditure in 1895-96, but others, whose arrangements were too far advanced to allow of their reducing their expenditure this year, are obliged to do so next year, so that the net result is a very small increase, as shown above. The increases and decreases are nowhere large, except in Lower Burma, where the Provincial and Local expenditure is reduced by Rx. 59,300.

155. Under Army the increase of Rx. 901,300 is largely due to the fall in Exchange which affects Exchange Compensation Allowance and the British soldiers' pay. The following table compares the actuals for 1893-94 and the Estimates for 1894-95 and 1895-96, distinguishing the above charges:—

	Accounts, 1893-94.	1894-95.		1895-96, Budget.	Excess of Budget for 1895-96 over Budget for 1894-95.
		Budget.	Revised.		
	Rx.	Rx.	Rx.	Rx.	Rx.
Exchange compensation allowance .	264,620	465,800	518,600	610,000	144,200
Additional payment to British soldiers on account of exchange (approximate)	852,200	776,500	1,134,300	1,156,400	379,900
Balance of expenditure in India .	14,848,016	14,926,900	14,465,700	15,304,100	377,200
TOTAL EXPENDITURE IN INDIA .	15,964,836	16,169,200	16,118,600	17,070,500	901,300

It will be seen that eliminating the items which increase directly with the fall in exchange the increase provided in the Budget for 1895-96 is only Rx. 377,200. Of this difference the sum of Rx. 180,000 is due to the proposed increase in the

pay of the Native sepoy and Rx. 150,000 to the provision for warlike preparations in connection with the disturbances in Chitral, thus leaving only a small balance of increase of Rx. 47,200 to be explained. This small increase is, however, the net outcome of several increases and decreases.

The principal increases and decreases, excluding those already mentioned, are as follows:—

INCREASES.	Rx.
Re-organisation of Army Commands and Staff in India (Rx. 10,000 was provided on this account in 1894-95)	11,300
No deduction made in 1895-96 for short strength of the British Army, which is now over strength	17,900
Revision of establishment of lance ranks in the British Army	13,400
Increased provision for good conduct pay to British troops and smaller deduction for probable savings	31,000
Increase in the number of reservists in the Native Army	13,000
Increased payments for remounts due to the price being fixed at £45 each converted at the prevailing market rate of exchange	13,000
Increased strength of volunteer corps	10,400
Increased cost of hutting Native Troops	18,500
Increased provision for special Expeditions, namely,—	
Waziri Expedition	90,000
Other Expedition charges (Rx. 69,000 *minus* Rx. 40,000 provided in 1894-95)	29,000
TOTAL	247,500

DECREASES.	
Fall in the price of articles of food	164,000
Absence of special provision made in 1894-95 for replacing the mobilisation stores destroyed by fire at Peshawar	38,200
Smaller provision for clothing materials	12,000
Smaller provision for Ordnance stores	18,500
TOTAL	232,700

156. The only heads under which there are important decreases of expenditure in India in the Budget of 1895-96 are the following:—

	Rx.
Assignments and Compensations	37,300
Interest on ordinary debt	783,200
Special Defences	43,500

157. Under Assignments and Compensations the decreases occur in the Central Provinces (Rx. 21,800), and in Bombay (Rx. 15,900). In the former special compensation to zemindars for resumption of abkari rights had to be provided in the Budget of 1894-95; this is not a recurring charge and disappears from the estimates of 1895-96. In Bombay the decrease occurs in the charges brought to account as Alienated Land Revenue, which were over-estimated in 1894-95.

158. Of the amount against Interest a saving of Rx. 565,600 is, as shown below, due to the conversion proceedings, against which, however, must be taken as a set-off the diminished receipt of Rx. 40,800 on account of the interest on the Currency Reserve (see paragraph 128):—

Saving due to Conversion Proceedings.

	Rx.
Saving of ½ per cent. on estimated amount of conversions into guaranteed and unguaranteed loans	462,800
Saving of 4 per cent. on amounts discharged or outstanding unpaid	102,800
TOTAL	565,600

A further reduction of Rx. 217,600 under this head is due to transfers to Interest on debt chargeable against Railways and Irrigation (see paragraphs 150 and 151).

159. Under Special Defence Works the expenditure is decreasing for the reasons explained in last year's Financial Statement (see paragraph 126 of that statement).

160. The expenditure in England is expected to exceed that of 1894-95 by £80,300. The only changes of any importance are savings of £24,600 under Interest, and of £19,700 under Telegraphs, and increases of £27,800 under Marine, of £29,000 under Political, and of £33,000 under Pensions. The first saving is the net outcome of decreases of £197,500 in the interest on India Bills, and of £10,000 in the interest on Temporary Loans from the Bank of England, and of an increase of £182,900, being one year's interest on £6,000,000 India 3 per cent. Stock issued to the public, and on £96,000 created pursuant to the Maharaja Dhuleep Sing's Estate Act. This Act authorized the creation of £72,000 of India 4 per cent. Stock as a provision for the Maharaja's younger children on his decease; such stock having, however, ceased to exist and the intention having been to make provision for a certain yearly income for the children, £96,000 of 3 per cent. stock has, with the consent of the trustees, been substituted for the stock specified in the Act, and has now been created and issued. The saving under Telegraphs is due, as in the case of the Revised Estimate of 1894-95, to lower indents for Stores. The increased charge under Marine is due to an increased contribution towards the expenses of Her Majesty's ships employed in the Indian Seas, the decision of the Arbitrator being that India must pay a share of the cost incurred by the Admiralty in the defence of Indian waters; and that under Political to the provision made for a possible visit of His Highness the Amir of Afghanistan to England. The pensionary charge continues to increase year by year, but the increase this year is somewhat larger than usual. Under Army Expenditure in England the total variation is very small, and there are no items which require special mention here.

161. Of the increase of Rx. 1,951,400 in the exchange on expenditure in England, Rx. 57,400 are due to the increased charges in England and the balance of Rx. 1,894,000 is due to the fall in the rate from 14*d.* to 13·09*d.* the rupee.

Section IV.—Examination of the Estimates under the more important heads of Revenue and Expenditure.

LAND REVENUE.

	Accounts, 1891-92.	Accounts, 1892-93.	Accounts, 1893-94.	1894-95. Budget.	1894-95. Revised.	1895-96, Budget.

Shown under I.—Land Revenue	23,965,774	24,905,328	25,589,609	25,703,600	25,508,700	26,369,600
EXPENDITURE—						
District Administration	2,209,498	2,245,258	1,836,660	2,367,500	1,836,400	1,876,300
Other charges	1,625,628	1,691,087	2,184,953	1,819,300	2,269,800	2,312,800
TOTAL	3,835,126	3,936,345	4,021,613	4,186,800	4,106,200	4,189,100

162. The distribution of the Land Revenue among the several Provinces is shown in the above table. Almost all the Provinces exhibit the usual progressive increase under this head. The only points requiring notice are that postponements of revenue in the Central Provinces, in the North-Western Provinces, in the Punjab, and in Bombay, have reduced the Revised Estimate for 1894-95, and raised the Budget Estimate for 1895-96 to an abnormal amount; that the increase in Madras is due partly to new settlements in Tanjore, Godavari, Trichinopoly and Malabar, and partly to the extension of irrigation, and to the enhanced water rate leviable in Godavari and Kistna; that the high figure in the Revised for both Upper and Lower Burma is due to the collection in the current year of specially large arrears, which will not recur in 1895-96; and that in the latter province a temporary check is stated to have been given to the normal increase in cultivation by a combination during the past two years among the purchasers, and the consequent low range of prices offered to the cultivators.

As far as the expenditure heads are concerned, a comparison with past years before 1893-94 and with the Budget of 1894-95 is affected by the transfer of a

share of certain District Establishments in the North-Western Provinces from this head to Law and Justice, and by a transfer of the charges for Kanungo Establishment from the sub-head District Administration to the sub-head Land Records and Agriculture, which is included under Other Charges.

OPIUM.

Bombay—						
Chests passed for export	30,654⅛	27,845½	26,675⅛	27,751	29,535⅛	27,538⅛
Rate of Duty R	600	600	600	600	600 & 650	650

163. The Budget Estimate of receipts in 1894-95 from Bengal Opium was based on the assumption that 42,300 chests would be sold at an average of R1,070 a chest. The crop was, however, so poor that there being no reserve, it became necessary to reduce the number of chests sold for the last six months of the year to 3,105 chests a month, thus making the total sales for the year 39,780. So great, however, has been the rise in price that it has much more than made

up for the fall in the number of chests sold. The course of prices is indicated by the following table of the average rates realized at each monthly sale :—

	₹		₹
April . . .	1,089	October . .	1,361
May . . .	1,199	November . .	1,370
June . . .	1,204	December . .	1,480
July . . .	1,301	January . .	1,523
August . .	1,403	February . .	1,540
September . .	1,321	March . . .	1,327

The average price realized for the whole year has been ₹1,337-11, or an excess of ₹267-11 a chest over the price taken as the basis of the estimate.

The fall at the March sale was very marked. It remains to be seen whether it was due to a cessation of the specially high prices in January and February caused by speculation in China, or to a specially low price in March, caused by speculations on the coming crop. Probably it had to do with both these causes. But whatever may have been the cause, it is not safe to take for the Budget of 1895-96 a higher rate than ₹1,300 a chest.

164. The quantity of Bengal Opium to be sold during 1895-96 is taken for the purposes of the estimate at 37,260, being the amount settled for the year 1895 by the notification in June last. The quantity to be sold in the last three months of the year will not, however, be settled till June next.

Though the number of chests is reduced by 5,040, the higher rate gives an increase of Rx. 317,700 in the Budget for 1895-96.

165. **The exports of Malwa Opium have fluctuated considerably from month to month ; but on the whole the export is expected in 1894-95 to exceed the standard of the last two years and to approximate to that of 1891-92.** The price of Malwa Opium both in India and in China rose so considerably during the year (though not to the same extent as that of Bengal Opium) that it was considered advisable in December to raise the rate of duty per chest from ₹600 to ₹650. This rise in the rate of duty has brought in Rx. 27,900 during the current year. For next year it is not considered safe to repeat the comparatively high results of 1894-95, but with the higher rate of duty the estimate very nearly comes up to the Revised Estimate of the current year.

166. The decrease in the Budget Estimate for 1894-95 on account of the sale of Excise Opium was, as explained in the last Financial Statement, due to the special measures adopted for restricting the use of Opium in Burma. The fall in that province has been slightly beyond what was estimated, and this accounts for the slight decrease in the Revised Estimate. The increase in the Budget Estimate is due to the raising of the price at which Bengal Opium is issued for excise purposes from ₹7-4 to ₹8-8 with effect from July 1st 1895, in consequence of the rise in the price paid to the cultivator.

167. The expenditure on an average crop was provided for in the estimate for 1894-95. The crop was far below the average and the expenditure in India has been below the estimate by the very large sum of Rx. 610,100. The saving would have been even larger had not some expenditure (Rx. 130,000) been incurred in **the purchase of Malwa Opium in order to set free a larger amount of the crop for the preparation of provision opium. The series of bad crops, extending over six successive years, not only absorbed the whole of the reserve of opium, but also threatened to render the cultivation unpopular, and so to result in a large reduction** in the area cultivated with poppy. It was accordingly decided, before the last sowings commenced, to raise the price paid to the cultivator from ₹5 to ₹6 a seer. This accounts for the large increase in the estimate of expenditure for 1895-96, which, however, only provides as before for a normal crop, together with Rx. 100,000 for the purchase of Malwa Opium to take, as far as possible, the place of the Bengal Opium issued to the Excise Department.

SALT.

(*a*) Chiefly excise on local manufacture. (*b*) Chiefly duty on imported salt.

168. The falling off in Revenue which occured in 1893-94 was expected to be only temporary and this has proved to be the case, the Revised Estimate providing for a total revenue in excess of that of 1891-92 and very little short of that of 1892-93. The Budget for 1895-96 provides for a further slight increase.

As regards expenditure the principal saving in the Revised occurs in Madras under the head of Salt purchase and freight. The large increase in the Budget of 1895-96 also occurs mainly in that Presidency, and is stated to be required in view of the necessity for affording full scope for the expansion of departmental operations which have hitherto not been fully developed.

STAMPS.

	Accounts, 1891-92.	Accounts, 1892-93.	Accounts, 1893-94.	1894-95. Budget.	1894-95. Revised.	1895-96, Budget.
REVENUE.						
Court Fees and Plain Paper . .	2,887,774	2,995,369	3,063,463	3,079,100	3,154,000	3,184,000
Commercial and other Stamps .	1,297,281	1,374,200	1,358,399	1,405,200	1,387,200	1,385,600
Other Revenue	77,101	78,971	77,489	77,500	79,200	78,600
TOTAL . Rx.	4,262,156	4,448,540	4,509,351	4,561,800	4,620,400	4,648,200
Charges—						
India . . . . . Rx.	89,531	91,170	92,424	95,000	93,300	95,200
England (Stores) . . . £	34,105	31,277	38,875	49,000	47,000	55,600
Exchange . . . . Rx.	14,811	18,817	25,263	35,000	39,200	46,300
TOTAL . Rx.	138,447	141,264	156,562	179,000	179,500	197,100

169. Stamp Revenue shows considerable progress on the whole, the largest contributions to the increase in the Revised being made by Bengal (Rx. 65,000) and Madras (Rx. 30,000). There has, however, been a falling off in the North-Western Provinces (Rx. 30,000), Punjab (Rx. 16,000) and Central Provinces

(Rx. 8,000). The Budget generally provides for a repetition of the Revised, the small increase being due to the expectation that some portion of the ground lost in the current year in the three Provinces just named will be recovered next year.

EXCISE.

Revenue.	Accounts, 1891-92.	Accounts, 1892-93.	Accounts, 1893-94.	1894-95. Budget.	1894-95. Revised.	1895-96, Budget.
	Rx.	Rx.	Rx.	Rx.	Rx.	Rx.
Bengal	1,113,397	1,159,458	1,214,817	1,210,000	1,255,000	1,270,000
North-Western Provinces	524,303	549,877	572,202	570,000	580,000	580,000
Madras	1,213,964	1,211,146	1,287,466	1,290,000	1,350,000	1,370,000
Bombay	1,025,462	1,025,696	1,071,765	1,070,000	1,098,000	1,098,000
Other Provinces	1,240,138	1,296,266	1,242,323	1,177,600	1,230,100	1,216,300
Total	5,117,264	5,242,443	5,388,573	5,317,600	5,513,100	5,534,300
Charges	190,097	193,013	193,375	205,200	197,100	210,100

170. Excise Revenue has made considerable progress during 1894-95, and the progress has occurred everywhere except in the Central Provinces. The largest excesses over the Budget of 1894-95 have occured in Madras (Rx. 60,000), Bengal (Rx. 45,000), Lower Burma (Rx. 33,000) and Bombay (Rx. 28,000). In Lower Burma the Budget provided for a considerable falling off, owing to the restrictive measures already alluded to in connection with Opium, but the reduction has proved less than was anticipated. The Budget of 1895-96 provides for a slight improvement over the Revised of 1894-95, chiefly in Madras and Bengal.

PROVINCIAL RATES.

* Taken as expenditure except in the Budget Estimate of 1894-95.

172. The above table gives full details of the heads under which the Customs Revenue has been collected. The variations between the realizations and the estimate in 1894-95 have been explained above (paragraph 99).

As regards the Estimate for 1895-96, it will be seen that it generally follows the Revised, the only important differences being that—

(1) A full year's collection of Cotton Duties is taken.

(2) The duty on silver is estimated on an import of 5 crores, it not being considered safe to assume the continuance of the high scale of import prevailing in the current year.

(3) Some improvement is taken against Oils, on the expectation that Petroleum imports will show some recovery from the check which resulted from the imposition of additional duties in March last.

(4) Export duties are estimated at a fair average amount.

ASSESSED TAXES.

	Accounts, 1891-92.	Accounts, 1892-93.	Accounts, 1893-94.	1894-95. Budget.	1894-95. Revised.	1895-96, Budget.
	Rx.	Rx.	Rx.	Rx.	Rx.	Rx.
Deduction by Government from Salaries, Pensions, and Interest payments	412,228	416,786	435 138	441,500	459,200	448,800
Other Collections	1,240,595	1,269.355	1,304,033	1,299,400	1,334,100	1,350,400
Total	1,652,823	1,686,141	1,739,171	1,740,900	1,793 300	1,799,200
Charges	29,577	30,171	31,060	32,700	30,700	31,800

173. The revenue from Assessed Taxes makes slow but steady progress. The principal advance this year has occurred in Madras (Rx. 19,500) and Bengal (Rx. 20,000), but there has been no retrogression anywhere except in the Central Provinces, and there it is very slight.

FOREST.

	Accounts 1891-92.	Accounts, 1892-93.	Accounts, 1893-94.	1894-95, Budget.	1894-95, Revised.	1895-96, Budget.
	Rx.	Rx.	Rx.	Rx.	Rx.	Rx.
Revenue	1,490,582	1,591,332	1,723 022	1,646,000	1,648,000	1,642,200
Expenditure	843,926	865,225	906,407	984,400	934,100	995,100
NET	646,656	726,107	816,615	661,600	713,900	647,100

174. The increase in Revenue in the Revised as compared with the Budget is the net outcome of several increases and decreases in the various Provinces, but the principal decrease occurs in the Central Provinces, where it was due to an over-estimate of the revenue. It was originally estimated that the revenue in those Provinces would show a large improvement of Rx. 26,600, but this anticipation has not been realized, and the Revised is now taken at about the same figure as the Actuals of 1893-94. The Budget for 1895-96 in the Central Provinces allows for an improvement of Rx. 11,300 over the Revised. The other Provinces either show an improvement or make no material change in the Revised for 1894-95 and in the Budget for 1895-96.

175. The expenditure shows a tendency to increase, but there are generally savings on the estimates, and it is not unlikely that the net produce of both years will be better than indicated by the above figures.

It must be observed, however, that the Government of India have recently laid down a policy of leniency in the supply of forest produce for domestic use, and in the matter of grazing in forest lands. In giving effect to this policy, a certain amount of revenue will be relinquished, and part of it, probably, during 1895-96. It is, however, impossible to estimate the amount beforehand, and it is believed that the decrease will be to some extent covered by corresponding reductions in preventive establishment.

INTEREST.

176. The reduction of the Receipts in India in the Revised is mainly the outcome of a reduction of Rx. 40,000 on account of the postponement till November 1896 of the payment of the instalment of interest on the Kidderpore Dock Loan, which fell due in November 1894, and of an increase of Rx. 20,400 in the profits on the note circulation, due to the payments made on conversion of the currency investment.

The conversion operations also account for the decrease in the Budget of 1895-96. The reduction by one-half per cent. of the interest payable on the currency investment reduces the profits of the note circulation by Rx. 40,800.

177. The reduction in the Receipts in England has already been explained (see paragraphs 105 and 143).

178. The alterations in the charge for Interest on Debt, both in India and in England, have also been fully explained elsewhere (see paragraphs 110, 121 158 and 160, and Section VI.)

179. The Budget of 1894-95 provided for a diminution in the charge for interest on Savings Bank Balances owing to the reduction in the rate of interest from $3\frac{3}{4}$ to $3\frac{1}{3}$ per cent. It seems probable that the actuals will approximate pretty closely to the Budget. Provision is made for a small increase in 1895-96 as the balances continue to advance every year.

POST OFFICE, TELEGRAPH, AND MINT.

	Accounts, 1891-92.	Accounts 1892-93.	Accounts, 1893-94.	1894-95. Budget.	1894-95. Revised.	1895-96, Budget.

NET	+112,937	+198,328	+136,275	—400	—19,900	+3,900

180. The Post Office net revenue continues to increase; the Budget for 1894-95 provided for a net charge, but it is now expected that there will be a small net revenue, which is raised a little in the Budget for 1895-96.

181. The Telegraph net revenue, excluding Capital Expenditure, shows an improvement of Rx. 27,200 in 1894-95; this is mainly due to the message traffic having exceeded expectation and to a reduction of the Establishment charges. The Budget for 1895-96 provides for an increase in the Receipts and for a return to the higher scale of Charges provided in 1894-95. The net Revenue is thus somewhat larger than that estimated in 1894-95, though it falls below the Revised Estimate. The Capital Expenditure has been reduced in the current year, owing to the measures taken to secure financial equilibrium by enforcing economy in optional expenditure. This expenditure is raised in the Budget to allow of a larger development of the telegraph lines which has been checked in the current year.

182. The Mints being now closed to the coinage of silver for the public, the only revenue of importance in the current year is the gain on copper coinage. The decreased revenue expected in the Revised is due to a smaller amount of copper coin having passed into circulation than was anticipated. The Budget for next year is based on a smaller issue of copper coins than that on which the Budget for the current year was based, though a small improvement over the Revised is taken, and it also provides for the revenue (Rx. 11,300) which will accrue from the projected coinage at Bombay of a British dollar for use in Eastern Trade. The arrangements for this coinage are now complete, the dies are expected to arrive shortly, and on their receipt the Mint is prepared to commence operations as soon as silver is tendered for coinage.

(a) Includes Upper Burma charges.

183. The tendency of the expenditure under these heads is to increase with the growing demands for improved administration. The growth of expenditure is not, however, great or rapid under any individual head. The only points requiring notice are that the falling rate of exchange has enhanced the charge for exchange compensation allowance under all the heads; that absolutley necessary police re-organization has increased the charges under Police in several provinces; and that under General Administration the expenditure, both in India and in England, is swelled this year by the inclusion of the amounts paid to the Presidency Banks and the Bank of England for the work done in connection with the conversion of the Rupee Debt (see paragraph 110).

MISCELLANEOUS CIVIL CHARGES.

	Accounts, 1891-92.	Accounts, 1892-93.	Accounts, 1893-94.	1894-95. Budget.	1894-95. Revised.	1895-96, Budget.

Stationery and Printing	602,885	647,973	683,181	679,800	696,300	697,500
Miscellaneous	285,307	233,075	273,831	247,100	273,400	245,500
TOTAL Rx.	5,046,622	5,537,840	5,646,877	5,754,000	6,097,700	6,103,700

184. The main increase under the heads in this group occurs in the charge for exchange on Furlough Allowances and Pensions, which, if paid in England are fixed either in sterling or in rupees convertible into sterling at a fixed rate. Independently of exchange, however, the tendency of the charges under this group is to rise slightly, pensions and furlough allowances with the increasing establishments, and stationery and printing with the increasing amount and complexity of public business. The first head is an exception, since Territorial and Political Pensions gradually diminish as the older pensioners die out. Under Miscellaneous the increase is in the English charges and Exchange, principally owing to a larger supply of stores for Miscellaneous Departments.

FAMINE RELIEF AND INSURANCE.

	Accounts, 1891-92.	Accounts, 1892-93.	Accounts, 1893-94.	1894-95. Budget.	1894-95. Revised.	1895-96. Budget.
	Rx.	Rx.	Rx.	Rx.	Rx.	Rx.

Net Charge on account of the Bengal-Nagpur and the Indian Midland Railways shown in the Railway Revenue Account	231,681	383,897	371,768	368,800	392,400	366,800
TOTAL EXPENDITURE CHARGEABLE TO THE FAMINE GRANT	1,500,000	1,500,000	1,489,569	423,800	443,900	421,800

185. The direct expenditure on Famine Relief has occurred mainly in the Central Provinces (Rx. 5,600) and Bengal (Rx. 3,000), and in the latter province alone is provision made for such expenditure in the Budget.

186. As explained in last year's Financial Statement, financial exigencies necessitated in 1894-95 the cessation of the expenditure on Railways and the curtailment of the expenditure on Irrigation Works from the Famine Grant. The position remains unchanged, and in the Budget of 1895-96 it is possible to provide under this head only for the small expenditure on direct Famine Relief and for the renewal of the small grant of Rx. 50,000 for Protective Irrigation Works.

187. The improvement of the State Railway revenue in the current year and the falling off in the Guaranteed Railway Receipts have already been mentioned (see paragraph 102). The basis of the Budget Estimate for 1895-96 has also been explained (see paragraph 141). The Railway Revenue on the whole shows steady and almost continuous progress from year to year; the estimates are made on the usual cautious basis, and though it is not safe to estimate in the case of each individual Railway for a recurrence of the high receipts of this year, it is not unlikely, unless the reasons are unfavourable, that the results for 1895-96 will be considerably in excess of the Budget now framed.

IRRIGATION.

IRRIGATION.	Accounts, 1891-92.	Accounts, 1892-93.	Accounts, 1893-94.	1894-95. Budget.	1894-95. Revised.	1895-96, Budget.

Expenditure	1,073,896	1,008,142	908,052	946,700	974,000	1,014,900
STATISTICS OF MAJOR WORKS.						
Capital Outlay to March 31st	28,320,703	28,923,097	29,679,280	30,308,898	30,330,480	31,106,480

188. Under Major Works Direct Receipts the Revised shows a falling off of Rx. 35,300, which is due to a reduction of Rx. 35,200 in the Punjab, mainly the result of the rainfall on lands traversed by the Sirhind Canal having reduced the demand for canal water. In Bengal there is a small reduction of Rx. 4,000, the collections on the Midnapur and Orissa Canals having fallen off. In the North-Western Provinces, on the other hand, there is a small increase of Rx. 3,700, the Budget Estimate having been over-cautious. The falling off in the Budget for 1895-96 has already been explained in paragraph 130.

189. The increase in the Revised in Working Expenses occurs mainly in the Punjab (Rx. 27,000) on the Western Jamna, Bari Doab and Chenab Canals, and in Bombay (Rx. 18,200) on the Desert Canal, Eastern Nara Works, and Mahaswad Tank. The excess expenditure was for urgent works and was specially sanctioned by the Government of India.

190. Under Minor Works Receipts the falling off in the Revised occurs mainly in Imperial, and is due to a falling off in Baluchistan and the Punjab. The Budget for next year in the Punjab, however, provides for an even higher revenue than the Budget of the current year, owing mainly to the extension and development of irrigation from the Shahpur Canals.

The expenditure on these Minor Works has been increased in the Revised, mainly owing to special sanctions of Rx. 26,900 for repairs to embankments damaged by floods in Sind, and of Rx. 6,700 for certain urgent works in connection with the Muzaffargarh embankment and for the completion of the new Sahiwal Canal in the Punjab.

191. The Irrigation revenue is expected in 1895-96 to exceed the Revised Estimate of 1894-95 by Rx. 48,700. This amount is distributed between

Imperial on the one hand and Provincial and Local on the other in the table below:—

	Imperial.	Provincial and Local.	TOTAL.
	Rx.	Rx.	Rx.
Direct Receipts— Major Works	81,100	—87,100	—6,000
Minor Works	4,300	100	4,400
Share of Land Revenue— Major Works	50,300	...	50,300
TOTAL	135,700	—87,000	48,700

192. The principal increase in the Budget of 1895-96, as compared with the Revised Estimate of 1894-95, under the share of Land Revenue due to irrigation occurs in Madras (Rx. 20,600), and is due chiefly to an enhancement of water-rates in the Godavari and Kistna deltas, the recent revision of settlement in the Cauvery delta and the probable extension of irrigation from the Kistna delta and the Sangam anicut systems and the Rashkulya project. There are also increases of Rx. 9,800 in the Punjab chiefly in anticipation of increased credits to the Chenab Canal, and of Rx. 19,900 in Bombay, due partly to the anticipation of a return to normal Revenue and partly to the growth of irrigation on the Eastern Nara project.

193. The financial results obtained during 1892-93 and 1893-94 from Irrigation Works for which capital and revenue accounts are kept are given below:—

	1892-93.	1893-94.
MAJOR WORKS.		
Capital Outlay— Direct and Indirect — During the year	Rx. 614,290	Rx. 780,660
Direct and Indirect — To end of year	30,250,620	31,031,280
Revenue Account— Gross Revenue	2,268,054	2,130,271
Maintenance and Working	880,694	875,620
Net Revenue	1,387,360	1,254,651
Interest	1,138,382	1,165,554
Net Profit	248,978	89,097
Percentage of net Revenue of the year on the Capital Outlay to end of the year	4·59	4·04
MINOR WORKS.		
Capital Outlay— Direct and Indirect — During the year	99,452	85,512
Direct and Indirect — To end of year	4,736,103	4,821,615
MINOR WORKS.		
Revenue Account— Gross Revenue	481,567	560,806
Maintenance and Working	252,643	228,781
Net Revenue	228,924	332,025
Percentage of net Revenue of the year on the Capital Outlay to end of the year	4·83	6·89

The figures in this Table are taken from the administrative accounts. On Minor Works interest on the Capital Outlay is not charged, as the Capital Expenditure is incurred from Revenue.

Expenditure	1,651,761	1,714,593	1,677,144	1,795,200	1,691,700	1,777,400
Receipts	255,204	266,147	276,546	260,400	273,500	268,500

194. The principal variations under this head occur in the Imperial expenditure, which was, owing to financial exigencies, largely reduced last year both under Military and Civil Works. Larger grants have been made for 1895-96 as explained in paragraphs 153 and 154, but the Imperial expenditure is still considerably below the level of 1893-94. The estimates for the two years 1894-95 and 1895-96 for Provincial and Local Expenditure vary but slightly on the whole, though in the various Provinces considerable differences occur.

195. Full details of the proposed appropriation of the outlay provided for in the Provincial Civil Works Estimates are not available at present, but the distribution of the expenditure in the past two years and in the Budget Estimate of the current year is given below :—

196. The general course of the Army Expenditure in India in 1894-95 and 1895-96 has been dealt with in paragraphs 120 and 155 of this statement, and it is necessary here only to make a few remarks in explanation of the detailed variations under the sub-heads entered in the preceding table.

197. Under Regimental Pay and Allowances the Revised shows in the Indian Expenditure an increase of Rx. 434,300. This is chiefly accounted for by the increased charge of Rx. 357,800 for exchange on the British soldiers' pay (see paragraph 120); the British Cavalry and Infantry have also been in excess of strength, which accounts for about Rx. 35,000 more of the increased charge, and a large proportion of the extra charge of Rx. 52,800 for exchange compensation allowance falls under this sub-head.

The Budget Estimate exceeds the Revised under this grant by Rx. 305,700, of which Rx. 180,000 is due to the provision for increasing the Native sepoy's pay, while Rx. 22,100 for British soldiers' pay and Rx. 54,300 for exchange compensation allowance are due to the further drop in exchange.

198. Under Commissariat Charges in India the Revised shows the large saving of Rx. 504,800. There have been some small savings under Establishments, but the bulk of the saving under this head is due to the prevailing low price of food-grains and other supplies which have affected both the cost of rations for men and food for animals and the payments of compensation in respect of dearness of such rations and food. The Budget for 1895-96 shows an increase of Rx. 312,700 over the Revised, as it is not considered safe to assume that the present low prices will continue throughout the year. There is a saving, however, of Rx. 192,100 as compared with the Budget of 1894-95, which is chiefly due to the present estimate being based upon lower prices than that of 1894-95.

199. Under Ordnance there is a considerable saving in the Revised of Rx. 75,700; the amounts required for local purchase of stores appear to have been over-estimated, partly owing to the favourable rates prevailing during the year. There is also a saving of Rx. 16,500 in the cost of manufacturing establishments, which is in part due to the introduction of a new system of paying them, whereby their pay for February will be disbursed in April instead of March. The Budget provides for a repetition generally of last year's estimates. The Receipts under this head have risen owing to specially large issues of Stores.

200. Under "Other Heads" the only charge meriting notice is that for the Waziri Expedition and Demarcation Commission, which amounts to Rx. 202,500 in 1894-95 and Rx. 107,400 in 1895-96. The Budget for 1895-96 also provides for Rx. 150,000 for special warlike preparations in connection with the disturbances in Chitral.

201. In the Sterling Expenditure the main differences between the Budget and Revised for 1894-95 have been explained above (paragraph 121).

SPECIAL DEFENCE WORKS.

202. The following table shows the expenditure on "Special Defence Works":—

	Rx.
To end of 1886-87	150,409
1886-87	325,620
1887-88	456,017
1888-89	789,595
1889-90	689,481
1890-91	491,837
1891-92	604,848
1892-93	458,060
1893-94	324,974
1894-95, Budget Estimate Rx. 152,300; Revised Estimate	184,600
1895-96, Budget Estimate	154 700
	4,630,147

203. The expenditure in 1894-95 is expected, apart from exchange, to amount to about the figure estimated in the Budget for that year. The Budget for 1895-96 differs but little from that for the current year.

204. The total expenditure on Special Defence Works being estimated at Rx. 5,030,000, there will remain for expenditure in future years Rx. 399,853 on the assumption that the amounts provided in the Estimates of 1894-95 and 1895-96 are spent.

Section V.—Capital Expenditure on Public Works not charged against Revenue.

205. Financial necessities having required the temporary suspension of the Famine Grant, the amount provided for Capital Expenditure on Railways and Irrigation Works in the Budget of 1894-95 was restricted to Rx. 4,000,000, made up of the ordinary grant of Rx. 3,500,000 and the special grant of Rx. 500,000 sanctioned by the Secretary of State to enable Companies to undertake new lines of railway and extensions. In the course of the year, however, the Government of India came to the conclusion that they could profitably apply to Railway Construction some portion of the excess balances which had accumulated in their treasuries in consequence of the failure of the Secretary of State's drawings in the previous year, and while fully alive to the necessity of doing nothing which would defeat the measures taken in connection with the currency, they thought that a moderate additional amount might be expended from the balances without endangering the success of their currency policy They accordingly drew up a programme which provided for the expenditure during 1894-95, and the two succeeding years of a total sum of Rx. 14,000,000 to be expended from State funds on construction of railways and canals, to be increased by any amount that might be available from the Famine Grant during the two later years. This total sum of 14 crores was distributed between the three years in the following manner:—

	Rx.
1894-95	5,200,000
1895-96	4,400,000
1896-97	4,400,000
	14,000,000

and the amounts in the two later years were to be increased by any amount available from the Famine Grant up to Rx. 1,000,000 a year.

206. The Revised Estimate for 1894-95 accordingly provides for an expenditure of Rx. 5,200,000, distributed as follows:—

	Rx.
Railways	4,610,000
Irrigation Works	590,000
	5,200,000

and, the Famine grant being still held in abeyance the Budget Estimate for 1895-96 provides for an expenditure of Rx. 4,400,000 which is distributed as follows:—

	Rx.
Railways	3,700,000
Irrigation Works	700,000
TOTAL	4,400,000

48.—STATE RAILWAYS—CONSTRUCTION.

207. The Budget grant for 1893-94 amounted to Rx. 3,854,300 as under—

	Rx.
Normal amount provided under "Not charged to Revenue"	3,500,000
Deduct—Provision for Irrigation Works	750,000
Leaving for Railways	2,750,000
Add—for Bareilly-Rampur-Moradabad Railway	50,000
Total provided under 48	2,800,000
Provided under 34	1,054,300
	3,854,300

208. The Revised Estimate provided for a total expenditure of Rx. 4,027,400 as under—

	Rx.
48—State Railways—Construction	2,947,700
34—Construction of Protective Railways	1,079,700
TOTAL	4,027,400

against which the actual expenditure incurred amounted to Rx. 4,000,522, thus falling short of the Revised Estimate by Rx. 26,878 and exceeding the Budget provision by Rx. 146,222. Of moneys placed at his disposal up to 30th November 1893 (date of despatch of indents from India), the Secretary of State was unable to spend £223,229, which, with exchange and charges upon it, amounted to Rx. 371,981.

209. The amounts provided for Railway Construction in the estimates are, as explained above, Revised Estimate, 1894-95, Rx. 4,610,000, and Budget Estimate, 1895-96, Rx. 3,700,000, the distribution of which is as follows:—

	Revised, 1894-95. Rx.	Budget, 1895-96. Rx.

49.—IRRIGATION—CONSTRUCTION.

210. The figures of Accounts and Estimates for Capital Expenditure on Irrigation Works not charged to Revenue are—

Accounts, 1891-92.	Accounts, 1892-93.	Accounts, 1893-94.	1894-95, Budget.	1894-95, Revised.	1895-96, Budget.
Rx.	Rx.	Rx.	Rx.	Rx.	Rx.
729,664	531,091	681,684	550,000	590,000	700,000

The difference of Rx. 40,000 between the Budget and Revised has been transferred from the extra grant made for railways in the course of the year. The Budget grant provides for increased allotments, chiefly for Bombay.

Section VI.—Conversion of Four per cent. Rupee Debt.

211. The 4 per cent. Rupee Debt of the Government of India, dischargeable at three months' notice, was at the beginning of 1894-95 distributed over eight different loans, all of which were held on practically the same terms, the only difference being in the half-yearly dates for payment of interest. The outstanding

balances of these loans on the 30th June 1894, distributed between England and India, are shown in the following statement:—

	India.	England.	Total.
	Rx.	Rx.	Rx.
1. Loan of 1832-33	513,600	103,600	617,200
2. Loan of 1835-36	1,360,300	199,400	1,559,700
3. Loan of 1842-43	24,401,600	2,914,800	27,316,400
4. Loan of 1854-55	7,942,300	*16,506,000	24,448,300
5. Transfer Loan of 1st May 1865	32,015,900	3,519,800	35,535,700
6. Reduced Loan of 16th January 1879	3,840,100	1,776,700	5,616,800
7. Mysore Family Loan	50,000	...	50,000
8. East Indian Railway Commuted Stock	5,400	...	5,400
TOTAL	70,129,200	25,020,300	95,149,500

* Includes Rx. 1,598,900 Coupon loan held on the Indian Register.

Of the amount held in India of the loan of 1842-43, stock to the value of Rx. 8,159,500 formed the investment of the Paper Currency Reserve and was thus under the control of Government. The outstanding balance of that loan in the hands of the public in India and England was thus Rx. 19,156,900.

212. On the date mentioned above three Notifications issued with the object of initiating measures for the conversion of these loans from 4 per cent. to 3½ per cent. debt. The first Notification (No. 3257) gave formal notice of the discharge of the loan of 1842-43 on November 1st, 1894; but it also conveyed to holders the offer of an option, to be exercised on or before the 28th July, of transferring their holdings to a new 3½ per cent. loan bearing the same title and subject to the same conditions as the existing loan, save only that it would be guaranteed against discharge before 1st August 1904. If this offer was accepted, the reduction of interest was to take effect only from the 1st August 1895, but the transfer was to be effected at once, the difference of interest up to that date being paid in anticipation. To facilitate the conversion proceedings new notes were not at once issued, but the old notes were to be enfaced with a memorandum of the reduction of interest to 3½ per cent. and of the guarantee against discharge before August 1st, 1904. The second Notification (No. 3258) offered the same option, though not under notice of discharge, to the holders of notes in the loans of 1854-55 and 1st May 1865 and in the Reduced loan of 1879; while a third Notification (No. 3259) prohibited transfers from one 4 per cent. loan to another, but offered the same choice of conversion to holders of notes in the loans of 1832-33 and 1835-36 subject to the condition that the notes were transferred to the 3½ per cent. loan of 1st May 1865.

213. The Notifications were published simultaneously in England, and notes tendered for conversion were received by the Bank of England and disposed of there. In India notes were accepted for conversion at all Public Debt Offices and Treasuries, and there was, therefore, some inevitable delay in ascertaining, even approximately, the amounts tendered for conversion.

214. The result of this first stage of the operations was that of the 1842-43 loan, Rx. 23,421,200 in India and Rx. 2,558,700 in England, total Rx. 25,979,900 were converted, while the optional conversions of the other loans were ascertained on the 10th August to have amounted to about 1,400 lakhs. It is not possible

to give the exact amount of these latter loans converted under the Notifications of June 30th, because, as will be seen later, the offer in their case was renewed on precisely the same terms, and it has not been practicable to maintain separate accounts of the amounts coming in under the earlier and under the later offer.

215. The information in the possession of Government in the beginning of August, both in respect of the compulsory and optional conversions, thus seemed to justify further proceedings. And accordingly as the second step in the conversion two Notifications were issued on the 13th August. The first (No. 4092) notified for discharge on 1st December 1894 the Calcutta portion of the loan of 1st May 1865; but offered the same terms of conversion as before, save that the reduction in the rate of interest took effect from 1st February 1895 instead of 1st August, the terms now offered being thus ¼ per cent. worse than those originally put forward. This offer, however, remained practically inoperative till after the 27th August, for simultaneously a second Notification (No. 4093) was issued renewing absolutely as regards all loans except that of 1842-43 the offer made on June 30th. These Notifications were immediately followed on 18th August by a Notification (No. 4165) notifying for discharge on 1st December the two small loans numbered 7 and 8 in the list in paragraph 211. They were offered the same terms as the holders of the Calcutta portion of the loan of 1st May 1865, on condition of transferring their holdings to that loan.

216. The amounts converted on the terms offered on June 30th under both the original offer and the offers mentioned in the preceding paragraph are as follows:—

	India.	England.	TOTAL.
	Rx.	Rx.	Rx.
Loan of 1832-33	114,400	60,100	174,500
,, 1835-36	455,100	106,300	561,400
,, 1842-43	23,421,200	2,558,700	25,979,900
,, 1854-55	4,192,300	7,869,400	12,061,700
,, 1865	27,329,900	2,206,800	29,536,700
,, 1879	1,825,800	905,200	2,731,000
Mysore Loan and East Indian Railway Stock	55,200	...	55,200
TOTAL	57,393,900	13,706,500	71,100,400

217. The second offer still remained open for the Calcutta portion of the 1865 loan till 15th September, and under it Rx. 593,600 more were tendered. But, in the meantime, the satisfactory result, as far as the optional conversions of the other loans were concerned, led us to take the third step in the conversion, which was to notify on 1st September (No. 4426) for discharge on 31st December the unconverted balance of the 4 per cent. loan of 1854-55 with an option of conversion as before. The terms, however, were still less favourable, the reduction of interest taking effect from December 31st, 1894, if the notes were tendered on or before the 17th September, and from June 30th, if they were tendered after that date but on or before 3rd October. It was immediately followed on the 3rd September by two Notifications (Nos. 4460 and 4461), which offered to the holders of the unconverted portions of the other 4 per cent. loans up to September 17th conversion on the same terms as were admissible up to the same date to holders of notes of the loan of 1854-55. The paper of the two small loans of 1832-33 and 1835-36 was, as before, convertible only by transfer to the 3½ per cent. loan of 1865.

218. These Notifications brought in almost the whole balance of the 1854-55 loan and very considerable amounts of the other loans, the figures being as follows:—

	India. Rx.	England. Rx.	Total. Rx.
1832-33	332,000	14,800	346,800
1835-36	344,500	14,400	358,900
1854-55—			
Before 17th September	3,901,400	7,027,700	11,056,500
After 17th September	127,400		
1865	2,575,500	477,700	3,053,200
1879	1,640,600	301,700	1,942,300
TOTAL	8,921,400	7,836,300	16,757,700

219. The final step in the conversion proceedings was taken by the issue on 20th September of two Notifications (Nos. 4770 and 4771) notifying for discharge on December 31st all balances of the 4 per cent. loans which had not already been made liable to discharge by any of the previous Notifications, and offering conversion till 3rd October on the terms which were still open to holders of the 1854-55 loan, the two small loans being treated specially as before.

220. Under these Notifications the following amounts came in:—

	India. Rx.	England. Rx.	Total. Rx.
1832-33	15,400	17,800	33,200
1835-36	33,000	12,200	45,200
1865	445,400	483,600	929,000
1879	160,000	398,800	558,800
TOTAL	653,800	912,400	1,566,200

221. The original balances, the total amount converted into the guaranteed 3½ per cent. loans and the unconverted balance outstanding for each loan in India and in England after the operations already mentioned were completed, are shown below:—

	Original balance as in para. 211.	Amount Converted.			Total Outstanding Balance.
		India.	England.	Total.	
	Rx.	Rx.	Rx.	Rx.	Rx.
Loan of 1832-33	617,200	461,800	92,700	554,500	62,700
Ditto 1835-36	1,559,700	832,600	132,900	965,500	594,200
Ditto 1842-43	27,316,400	23,421,200	2,558,700	25,979,900	1,336,500
Ditto 1854-55	24,448,300	8,221,100	14,897,100	23,118,200	1,330,100
Ditto 1865	35,535,700	30,944,400	3,168,100	34,112,500	1,423,200
Ditto 1879	5,616,800	3,626,400	1,605,700	5,232,100	384,700
Mysore Railway Loan and East Indian Railway Stock	55,400	55,200	.....	55,200	200
TOTAL	95,149,500	67,562,700	22,455,200	90,017,900	5,131,600

The figures for the loan of 1835-36 include Rx. 362,000 held on account of the Hussainabad Endowment, which will probably yet be converted under the terms originally offered. In the case of some small amounts the actual conversion has been delayed owing to defects which may yet be cured; but the balances shown above, less Rx. 362,000 of the Hussainabad Endowment, may be taken as approximately the balances which have not been converted and will not be converted into guaranteed 3½ per cent. loans.

222. On the 3rd October all these balances were absolutely liable to discharge on some fixed date, either the 1st November, the 1st December or the 31st December 1894. As an alternative to discharge, and as a supplement to the conversion proceedings, the Government finally on October 8th offered transfer into the unguaranteed loan of 1893-94 on terms differing slightly for each loan, but involving in every case the surrender of accrued interest, and up to 9th March 1895 Rx. 2,007,800 have been converted into 3½ per cent. unguaranteed paper and Rx. 974,300 have been discharged:—

	Converted into unguaranteed paper. Rx.	Discharged. Rx.
1832-33	1,700	7,800
1835-36	82,000	5,500
1842-43	786,200	153,200
1854-55	433,800	573,800
1865	533,300	169,800
1879	170,800	64,200
TOTAL	2,007,800	974,300

223. The balance remaining unaccounted for under each loan is as follows:—

	Rx.
1832-33	53,200
1835-36	144,700
1842-43	397,100
1854-55	322,500
1865	720,100
1879	149,700
TOTAL	1,787,300

It is probable that this balance will come in very slowly, either for discharge or conversion into unguaranteed 3½ per cents.

Section VII.—Provincial Finance.

224. The general features of Provincial and Local Finance are indicated in the Table D appended as usual to the Financial Statement.

225. The accounts for 1893-94 closed with Provincial and Local Balances of Rx. 3,695,263, against a Revised Estimate of Rx. 3,527,754, thus showing, as indicated in paragraph 86, a net improvement of Rx. 167,509. The chief difference occurred in Madras, where the Local Balance turned out to be Rx. 73,511 better than estimated, the over-estimate for local Civil Works (see paragraph 89) having occurred largely in that Province.

226. In 1894-95 there has been a considerable improvement in Provincial and Local expenditure taken as a whole. It was estimated in the Budget that the Provincial and Local deficit, that is, the excess of expenditure which has to be charged against accumulated balances, would amount to Rx. 1,184,400; but as indicated above (see paragraphs 94 and 106) the Revised shows an improvement of Rx. 160,500 in Revenue and of Rx. 369,700 in Expenditure in this branch, and it is now anticipated that the deficit will be reduced to Rx. 654,200. The expenditure from Provincial and Local balances will thus be reduced by Rx. 530,200.

The improvement occurs everywhere except in the North-Western Provinces and Oudh, where the Provincial deficit is increased from Rx. 86,600 to Rx. 149,600, and the Central Provinces, where it is increased from Rx. 57,100 to Rx. 83,700, being mainly due in both cases to suspensions of Land Revenue (see paragraph 104), and in Lower Burma where the deficit is increased from

Rx. 258,200 to Rx. 283,200. The principal improvements occur in Bengal, Madras and Bombay, and are as follows:—

Bengal.—Provincial deficit of Rx. 77,000 converted into surplus of Rx. 74,90[illegible].

Madras.—Provincial deficit of Rx. 64,500 converted into Provincial surplus of Rx. 56,400.

Local deficit reduced from Rx. 256,600 to Rx. 73,900.

Bombay.—Provincial deficit reduced from Rx. 185,100 to Rx. 98,300.

In Bengal the improvement is mainly due to the Provincial share in the increased receipts of the Eastern Bengal Railway (see paragraph 102), which gives the Local Government Rx. 430,000, against Rx. 335,000 in the Budget. In Madras the Provincial Revenue and Expenditure show a general improvement, the largest being that of Rx. 37,600 under Land Revenue receipts, while there is also a lapse of Rx. 19,400 in the grant for Civil Works; the local deficit has been reduced, chiefly owing to a similar lapse of Rx. 81,600 (see paragraph 119), and Provincial rates also give an improved revenue of Rx. 50,400. In Bombay the expenditure generally shows savings under Civil Departments and Direct Demands upon revenue, the largest savings being under Land Revenue (Rx. 24,900), and Assignments and Compensations (Rx. 27,400).

227. In 1895-96 the Local Governments intend to spend from balances Rx. 623,000, against Rx. 1,184,400 entered in the Budget of 1894-95. Every Local Government, except that of the Central Provinces, proposes to spend a larger or smaller amount from balances, and everywhere, except in Bengal and Madras, the closing balance of 1895-96 is reduced to a figure not exceeding the prescribed minimum; in the Central Provinces the reduction of the balance below the prescribed minimum has been temporarily allowed for special reasons. The decrease, as compared with the previous year, is due partly to the contributions levied last year having reduced the balances at the disposal of Local Governments; this is especially the case in Lower Burma, where the difference between the two years is greatest, the Provincial Deficit in that Province being estimated at Rx. 14,000, against Rx. 258,200 in the Budget of 1894-95.

Section VIII.—Ways and Means.

HOME TREASURY.

228. The following are the usual details of the Home Treasury transactions:—

RECEIPTS.	Budget, 1894-95.	Revised, 1894-95.	Budget, 1895-96.
	£	£	£
Council Bills	17,000,000	17,000,000	17,000,000
Permanent Debt incurred	...	6,000,000	...
Temporary Debt incurred, net	2,300,000	...	...
Capital Receipts from Railway Companies	1,915,000	371,300	3,311,500
Deposits and Advances, net	−800	3,400	−1,300
Add—Opening Balance	959,988	1,300,564	2,446,164
TOTAL	22,174,188	24,675,264	22,756,364

OUTGOINGS.	Budget, 1894-95.	Revised, 1894-95.	Budget, 1895-96.
	£	£	£
Excess of Expenditure over Revenue	15,657,100	15,594,500	15,739,600
Expenditure not charged to Revenue	865,000	823,200	849,600
Permanent Debt discharged—			
India 4 per cent. Stock	...	4,300	...
Temporary Debt discharged, net	...	4,000,000	...
Issues to Railway Companies on Capital Account	2,826,400	902,000	3,733,700
On account of Remittances from India, net	1,114 200	905,100	757,000
Add—Closing Balance	1,711,488	2,446,164	1,676,464
TOTAL	22,174,188	24,675,264	22,756,364

229. In the Budget Estimate of 1894-95 the net disbursement at the Home Treasury was taken at £18,548,500, which was to be met by the sale of Council Bills on India to the amount of £17,000,000 and by temporary loans in England. The amount of drawings remains at the same figure as that shown in the Budget, but there was an improvement in the cash balances on 1st April 1894 of £340,576 as compared with the Budget Estimate, and the net disbursements in the year are now expected to be £17,854,400. The total increase in the closing cash balances of the year due to the above-mentioned variations should be £1,034,676 but the loans proposed in the Budget Estimate having been reduced by £300,000, the closing balance in the Revised is better than the Budget by £734,676 only. *1894-95 General Summary.*

230. It was stated in paragraph 186 of the last Financial Statement that the gross amount of temporary loans to be raised in England in 1894-95 by means of India Bills was £8,300,000, of which £6,000,000 were required for the discharge of the outstanding balance of similar loans raised in 1893-94, making the net loan £2,300,000. Owing to an improvement in the cash balances on 1st April 1894 of £340,576 the Secretary of State was able to reduce the net amount of the proposed loans by £300,000, but at the same time £6,000,000 out of the outstanding temporary loans were funded, and the entries in the Revised Estimates are as follows:— *1894-95 Sterling Loans.*

INCURRED.

	£
Permanent Debt—	
India 3 per cent. Stock issued	6,000,000
Temporary Debt—	
Temporary Loans on security of India Bills	2,000,000
Ditto ditto East India Bonds	1,000,000
TOTAL INCURRED	9,000,000

DISCHARGED.

Temporary Debt—	
Temporary Loans on security of India Bills	6,000,000
Ditto ditto East India Bonds	1,000,000
TOTAL DISCHARGED	7,000,000
NET INCURRED	2,000,000

1894-95. India Bills.

231. The Temporary Loan of £2,000,000 on the security of India Bills was raised early in May 1894, and has a currency of twelve months. It was issued at an average rate of interest of £1 18*s.* 6*d.* per cent. per annum.

1894-95. Permanent Debt.

232. The original intention was to borrow the whole of the requirements of the year only on loan for short periods, but the heavy fall in exchange since the publication of the Financial Statement made it inadvisable to adhere to the original intention, and on the 22nd May 1894 an advertisement was issued, inviting tenders for a loan of £6,000,000 India 3 per cent. Stock, which was subscribed on the 29th of that month at an average rate of £99 18*s.* 3*d.*

233. The Temporary Loans on security of East India Bonds were taken from the Bank of England for short periods and repaid in the course of the year.

1894-95. Capital transactions with Railway Companies.

234. The capital transactions with the Railway Companies vary with the changes in the programmes of the Companies. The Estimates for 1894-95 as now prepared show a reduction in the net issues of £380,700. The following statement gives the details of the transactions:—

	Budget.	Revised.
	£	£
RECEIPTS.		
Subscribed capital—		
(*a*) State Lines	1,815,000	67,400
(*b*) Guaranteed Lines	100,000	300,000
Miscellaneous	...	3,900
TOTAL	1,915,000	371,300
ISSUES.		
For discharge of debentures—		
State Railways	1,755,000	...
For Stores, Establishment Charges, etc.—		
State Railways	455,600	393,600
Guaranteed Lines	615,800	508,400
TOTAL	2,826,400	902,000

It was the original intention to replace Bengal-Nagpur and Southern Mahratta Railway debentures to the extent of £1,755,000 by fresh capital, but instead of this the debentures have been renewed. On the other hand, the receipts on account of Capital from the Assam-Bengal and the Bombay, Baroda and Central India Railways are now expected to be £7,400 and £200,000 respectively more than the Budget Estimate.

As generally happens, the Estimate of the demands of the Companies for Stores, Establishment Charges, etc., proved too high.

1894-95. Deposits and Advances.

235. In the Budget Estimate it was anticipated that there would be a net payment under the head of Deposits and Advances on account of Defence Works at Aden, but owing to the recovery from the Imperial Government of arrears of the share of the expenditure on these works, the result is now expected to be a net receipt in the year.

1894-95. Remittances to India.

236. The net reduction of £209,100 in the remittances to India is made up of an increase in the receipts of £42,000 and a decrease in the payments in England of £167,100. The more important items of increase in the receipts are (1) £20,600 on account of the sale-proceeds of securities, etc., received in respect of a portion of the legacy bequeathed by Miss Sarah Bruce towards the foundation and endowment of an Orphanage in or near Calcutta; and (2) £13,900 on account of larger repayments by Her Majesty's Treasury and other Public Departments in respect of advances or services in India. As regards the payments, the

Budget provision generally proved too high for (1) payments on account of Indian Money Orders; (2) Family Remittances for payment by the War Office; (3) advances to Railway Companies for purchase of stores; and (4) cost of stores for Provincial Railways.

1895-96. Home Treasury, Ways and Means.

237. The net disbursements at the Home Treasury in 1895-96, excluding Loans and Council Bills, are estimated at £17,769,700, against £18,548,500 entered in the Budget Estimate of 1894-95. This reduction is due to arrangements having been made for the raising by the Assam-Bengal Railway Company of fresh capital in England to the extent of £500,000 and to an expected falling-off in the demand for stores chargeable to Native States, Provincial and Local Funds, and to Railway Companies, and in the Money Order and Family Remittances.

It has been explained above that the cash balances in the Home Treasury on 31st March 1895 are now expected to be £734,676 more than the amount estimated in the Budget for 1894-95. If this excess is utilised in 1895-96 to meet a part of the net estimated disbursement of £17,769,700, it will be necessary to raise only about £17,000,000 by means of Bills on India. Accordingly it is the present intention of the Secretary of State to draw in 1895-96 £17,000,000 by Bills on India.

According to the programme now announced, no additions to the sterling debt will be made in the course of 1895-96, but it is intended to raise a temporary loan of £2,000,000 on the security of India Bills to repay the same amount of Bills raised this year which falls due on the 12th of May 1895.

It should be understood that in stating the present intentions of the Secretary of State no sort of pledge is given that he will adhere to the programme.

INDIA.

Ways and Means in India.

238. The following is a summary of the Estimate of Ways and Means in India:—

	1894-95.		1895-96.
	Budget.	Revised.	Budget.
	Rx.	Rx.	Rx.
RECEIPTS.			
1. Excess of Revenue in India over the Expenditure charged against it	26,538,900	29,580,400	28,902,100
2. Rupee Debt incurred	...	...	...
3. Increase of the Unfunded Debt, mostly Savings Bank Deposits, net	490,500	360,000	522,300
4. Other items, net	885,100	612,100	754,300
5. *For Remittance to Secretary of State, net*	1,107,000	902,800	754,500
Add—Opening Balance	26,251,756	25,565,588	22,679,488
TOTAL	55,273,256	57,020,888	53,612,688
OUTGOINGS.			
6. Excess Expenditure charged to Provincial Balances	1,184,400	654,200	623,300
7. Expenditure not charged to Revenue	2,517,100	3,690,800	2,842,400
8. Rupee debt discharged	151,000	1,200,200	890,100
9. Loans to Municipalities, etc., net	491,100	150,100	513,400
10. *Issues on Capital Account to Railway Companies, net*	102,500	197,100	196,800
11. Council Bills—*Sterling Amount*	17,000,000	15,532,300	17,706,800
12. Do. Exchange	12,142,900	12,916,700	14,777,200
Add—Closing Balance	21,684,256	22,679,488	16,062,688
TOTAL	55,273,256	57,020,888	53,612,688

The headings in italics are connected with, and explained by, the corresponding figures of the Secretary of State's account in England. The others refer to purely Indian transactions.

I

1894-95. General Summary.

239. For the Budget Estimate of 1894-95, the probable opening cash balance in India was taken at Rx. 26,251,756, but owing partly to larger payments of Council Bills in 1893-94 than were anticipated, and partly to certain heavy withdrawals of deposits, the actual balances in the Indian Treasuries amounted to Rx. 25,565,588, or Rx. 686,168 less than the estimate. The important operations of the year 1894-95 which affect the cash balances, but for which no provision was made in the Budget, have been (1) the notification for discharge, with option of conversion into $3\frac{1}{2}$ per cents. of all the 4 per cent. public loans, and (2) an increased grant for Capital Expenditure on Railways and Productive Irrigation Works. It is now expected that Rx. 1,000,000 out of the 4 per cent. loans will be paid off in 1894-95, and that the Capital Outlay in India will exceed the Budget provision by Rx. 1,173,700. Against these additional disbursements, aggregating Rx. 2,173,700, the net Revenues show an improvement of Rx. 3,571,700, and all the other transactions produce a net increase in the cash balances of Rx. 283,400. The cash balances on 31st March 1895 are now estimated at Rx. 22,679,488, against Rx. 21,684,256 taken in the Budget, giving an increase of Rx. 995,232.

Discharge of Rupee Debt.

240. Provision was made in the Budget Estimate for paying off in 1894-95 Rx. 150,000 out of the outstanding balance of the $4\frac{1}{2}$ per cent. loans notified for discharge on the 14th October 1893. It is now estimated that the actual payments this year will be about Rx. 200,000.

The operations for the conversion or discharge of the 4 per cent. public loans undertaken in the current year have already been fully explained. The amount of 4 per cent. paper tendered for discharge up to the 9th March 1895 was Rx. 974,300 out of Rx. 2,761,600 remaining unconverted on that date. The balances, as already stated, are coming in slowly either for conversion or discharge, and the total payments in discharge of the 4 per cent. loans are estimated at Rx. 1,000,000 in the current year and Rx. 750,000 in 1895-96.

Discharge of Gwalior Loan.

241. The loan of $3\frac{1}{2}$ crores taken from the Gwalior Durbar in 1887 is repayable, by annual instalments of twelve lakhs, after the Maharajah is invested with full powers of administration, the first instalment being due twelve months after the installation. The installation having taken place in December 1894, provision is made in the estimates of 1895-96 for the payment of the first instalment of Rx. 120,000. This amount is included in Rx. 890,100 shown as Rupee Debt Discharged in the table in paragraph 238.

Main Features. 1895-96.

242. I have already explained in Part I of this statement that the special resource operations of 1893-94 increased the sterling debt of the Government of India, and against this increase in the sterling liabilities there has been an accumulation of cash balances in India, which is being drawn against for capital expenditure of Government and discharge of rupee debt. There was therefore no public loan in India in 1894-95, and according to the present estimates no rupee loan will be required in 1895-96. The estimate of 1895-96 provides for the payment in India of Council Bills to the extent of £17,706,800, for though drawings are provided for in both 1894-95 and 1895-96 at the rate of £17,000,000, it is expected that owing to the large bill drawings, and the small amount of telegraphic transfers in demand at present, the balance of unpaid bills outstanding at the end of 1894-95 will be larger than usual, and thus the actual payments will not fall equally in the two years.

Public Loan.

243. Although, as above stated, it is not the present intention of the Government of India to raise any loan in 1895-96, full liberty is reserved, as usual, to alter the programme as now announced to any extent that may be considered desirable.

Savings Banks.

244. The following table gives the details of the transactions of Savings Banks during the last few years and the estimated transaction for 1894-95 and 1895-96:—

Year.	Net additions to deposits cash.	Interest.	Total addition.
	Rx.	Rx.	Rx.
1887-88	656,300	224,000	880,300
1888-89	685,200	261 800	947,000
1889-90	—362,900	272,200	—90,700
1890-91	250,700	279,700	530,400
1891-92	517,900	306,200	824,100
1892-93	548,900	339,400	888,300
1893 94	179,900	368,000	547,900
1894-95 Budget	111,400	325,800	437,200
1894-95 Revised	—44,400	326,000	281,600
1895-96 Budget	102,800	336,700	439,500

For the first time since 1889-90 the Post Office Savings Bank transactions appear likely to result in a net withdrawal of deposits, the credit of interest being disregarded. It was anticipated in the last Financial Statement that the reduction from $3\frac{3}{4}$ per cent. to $3\frac{1}{2}$ per cent. in the Savings Bank rate of interest, which took effect from 1st April 1894, would put a check upon deposits, and the net amount deposited in the Post Office Savings Banks was accordingly taken at the low figure of Rx. 100,000. The effect of the low rate in this direction has, however, been greater than was estimated, and a net withdrawal of Rx. 50,000 is now expected. If the withdrawals indicate, as they not improbably do, the diversion of practically permanent investment from Savings Banks to Government paper, the effect of the reduction of interest is a good one. The Presidency Savings Banks deposits also show a falling-off this year, but this is largely counterbalanced by an improvement in the receipts on account of the Provident institutions, the transactions of which are also included in the Savings Bank Accounts.

During the course of 1894 the Government of India considered, with reference to the reduction of the rate of interest on Savings Bank deposits, the rates that should be allowed on their various other interest-bearing obligations, and it was decided to reduce the rate to $3\frac{1}{2}$ per cent. in all cases in which the balances are held at call like ordinary Savings Bank deposits, and in which the interest is not given as a privileged rate to benefit a particular class of Government servants.

Loans to Municipalities and Agriculturists, &c.

245. The net issues on account of loans in 1894-95 are now expected to be Rx. 150,100 against Rx. 491,100 entered in the Budget Estimate. The improvement of Rx. 341,000 is due chiefly to large lapses from grants placed at the disposal of the Provincial Governments. The Madras Harbour Trust Board also repaid to Government a sum of Rx. 50,000 which was not entered in the Budget. The very ample cash balances in our treasuries have, I am glad to say, again enabled the Government to provide in full the demands of Local Governments for Agricultural, Municipal, and other local loans in 1895-96 as far as they can be foreseen at present, and the total estimate of net issues in 1895-96 on account of loans by Government is now placed at Rx. 513,400.

246. The year 1895-96 is estimated to close with a cash balance of Rx. 16,062,688, the result of the year's transactions producing a net reduction in the balances of Rx. 6,616,800.

Section IX.—Summary.

247. The principal features of this Statement are—

(1) The Accounts of 1893-94 have closed with a deficit of Rx. 1,546,998.

(2) The Revised Estimates of 1894-95 show a surplus of Rx. 990,500, against a deficit of Rx. 301,900 entered in the Budget. Excluding Exchange, there has been a large net improvement in the Revenue of Rx. 3,104,100, of which the most important improvements occur under Opium, Customs Duties and Railway Revenue; Army also shows a considerable net improvement notwithstanding payment of British soldiers' pay at a lower rate of exchange and special Waziristan charges. Exchange, which is taken at 13·09*d.* (or 18⅓ Rs. to the £) against 14*d.* in the Budget, absorbs Rx. 1,811,700 of the increase, thus reducing the net improvement to Rx. 1,292,400.

(3) The conversion of the Rupee Debt from 4 to 3½ per cent. has resulted in an excess net charge of Rx. 280,600 under interest, but it effects a net saving of Rx. 524,800 in future years. The debt converted now amounts to Rx. 92,025,700, including Rx. 2,007,800 converted into 3½ per cent. loan of 1893-94. It is expected that Rx. 1,000,000 will be paid off during 1894-95. The balance of the 4 per cent. debt outstanding at close of 1894-95 will thus be Rx. 2,123,800, including Rx. 362,000 of Husseinabad endowment, which will probably be wholly or partly converted. It is estimated that Rx. 750,000 more will be paid off in 1895-96.

(4) The Budget Estimate for 1895-96 shows a surplus of Rx. 46,200.

(5) The burdens of Government have been increased by—

(*a*) Charges dependent on the fall in Exchange, amounting to Rx. 2,503,700.

(*b*) Cessation of Contributions from Local Governments, amounting to Rx. 405,000.

(*c*) Increased grants for Imperial Public Works which add to the charges Rx. 280,000.

(*d*) Additional Opium payments of Rx. 460,000 due to rise in price paid to cultivator from R5 to R6, and to purchase of Opium in Malwa.

(*e*) Increased Army charges, other than those due to Exchange, amounting to Rx. 345,200, the principal items being Rx. 180,000 for an increase to the pay of Native sepoys, to take effect from 1st July, and Rx. 150,000 for military preparations in connection with the disturbances in Chitral.

(6) Against these burdens we have—

(*a*) Saving of Interest, Rx. 524,800.

(*b*) Improvement in Customs Duties, Rx. 1,882,900.

(*c*) A general net improvement under other heads, especially Railway Revenue, Land Revenue, and Opium.

(7) The rate of exchange is taken at 13·09 as in the Revised, which adds nearly Rx. 1,900,000 to the direct expenditure under exchange. Exchange Compensation Allowance is estimated to cost Rx. 1,456,500.

(8) The Famine Grant for Railway Construction is still held in abeyance.

(9) The Capital Expenditure on Railways and Irrigation Works not charged to Revenue was raised during the course of the year, and is now estimated for 1894-95 at Rx. 5,200,000, against the Budget Estimate of Rx. 4,000,000. The similar charge in 1895-96 is taken at Rx. 4,400,000.

(10) It is expected that the Secretary of State will in 1895-96 sell Council Bills to the amount of £17,000,000, and will renew the Temporary Loan of £2,000,000 which falls due in May. No other borrowing is contemplated. These announcements are accompanied by the usual reservation of entire liberty to the Secretary of State to vary the amounts to be obtained by bills or raised by loans as he may find occasion.

(11) It is estimated that the closing balance in the Treasuries in India on 31st March 1896 will without any borrowing stand at Rx. 16,062,688, and it is accordingly not intended to issue any public loan in India in 1895-96. Full liberty is, however, reserved to the Government of India to vary this intention in any way and to any extent which may be found expedient.

(12) The prospect of financial equilibrium is regarded as more hopeful than twelve months ago, and it is stated that while the crisis is not yet past, and the financial position cannot be looked upon as safe till the Famine Grant has been renewed, yet the Government of India may claim to have made a full year's progress towards the restoration of their fortunes.

J. WESTLAND.

CALCUTTA;
March 21, 1895.

APPENDIX.

ACCOUNTS AND ESTIMATES.

Accounts	1893-94.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the week ending at 8 a.m. on Saturday, March 9th, 1895.

General Summary.—The high pressure conditions in Northern India, which have been a marked feature in the weather for some time past, continued during the first part of the week, and was associated with unusually high temperature, especially in North-Western India. The barometer fell rapidly in the Punjab and Upper Sind on Monday morning, and a very shallow depression was shown in the West Punjab which however filled up during the next 24 hours. Pressure gave way generally over the whole country on Thursday, the fall being large in the sub-montane districts of Northern India, and was followed by another large fall on Friday in Baluchistan, Upper Sind and Central Rajputana. A well marked depression and disturbance of the hot weather type was formed over Baluchistan, Upper Sind and the South-West Punjab, in which pressure was nearly two-tenths of an inch below the normal. Weather was still more disturbed in North-Western India on Saturday, and numerous duststorms and thunderstorms were reported from stations in the Punjab, Rajputana, Kathiawar and Central India. The falls of rain registered were however not large, the most important being ·76 inch at Rajkot and ·64 inch at Mount Abu.

Conditions have been abnormal in Southern India, where unusually clear and dry weather has obtained, while at the same time temperature has been considerably below the normal, especially at the hill stations. At Wellington on Wednesday the minimum or night temperature was 9° in defect.

Daily Summary.—*Sunday.*—Pressure had increased slightly in Baluchistan, the Punjab and Upper Sind, and decreased slightly elsewhere. Pressure was in moderate to considerable excess in Northern and Central India, and normal or in slight excess in the Peninsula. Temperature had decreased in North-Western and Central India, the fall in the Punjab averaging nearly 6° and in Sind and Rajputana 4½°. In Madras temperature was more than 3° in defect of the normal. Local duststorms and thunderstorms had occurred in Rajputana, the Punjab and Upper India hill districts. Simla received ·23 inch and Jeypore ·2 inch.

Monday.—Pressure had fallen rapidly in the Punjab and Upper Sind and briskly in Baluchistan and Northern India. A very shallow depression was shown lying over the West Punjab, and pressure was very uniform, differing but slightly from the normal, except in the depression area and in Central Rajputana. Temperature had risen briskly in the Punjab and Central India, but was nearly 4° below the normal in Madras. The highest temperature registered was 98°·6 at Rangoon. Showers of rain had fallen at Malegaon, Sibsagar and Mussooree, and snow at Gnatong. The heaviest fall was ·39 inch at Sibsagar.

Tuesday.—Pressure had increased slightly to briskly everywhere except in Baluchistan and South Madras, and the depression in the West Punjab had filled up. Pressure was highest in Central Rajputana where it was nearly a tenth

of an inch above the normal. Temperature had fallen nearly 2° in Madras and had risen 2° in Central India. Surat and Thayetmyo registered maximum temperatures exceeding 98°. Indore reported a fall of rain amounting to ·5 inch and Sibsagar ·3 inch.

Wednesday.—The pressure changes everywhere were small in amount. Pressure was in moderate to considerable excess in Rajputana, Central India and the Upper India hill districts. Temperature had increased generally, except in Madras, where it had fallen very slightly, and was 7° above the normal in the Punjab, 5° in Sind and Rajputana and 3° in Central India. The excess was most marked in the day temperatures. Thayetmyo had recorded a maximum temperature of 99°·1 and Poona 99°. Gnatong reported a light fall of snow.

Thursday.—The barometer had fallen rapidly in the sub-montane districts of Northern India, slightly in Southern India, and briskly elsewhere. Pressure was lowest in North Bihar and North Bengal, and was in considerable defect in that area, but continued in considerable excess at the Upper India hill stations as compared with the neighbouring plains stations. Moderate to strong westerly winds were blowing in the Gangetic Plain and North and Central Bengal, and winds had shifted again to north-west in South-West Bengal and Orissa. Temperature had increased slightly in Gujarat, Central India and Bombay, and high maximum temperatures were registered in Gujarat and Kathiawar, the highest being Surat 104°·2, Deesa 101°·4, Ahmedabad 100°·3 and Rajkot 99°·9. Colombo had received ·6 inch of rain.

Friday.—Pressure had decreased by large amounts in Baluchistan, Upper Sind and Central Rajputana, and briskly over the remainder of North-Western and Central India. A well marked depression lay over Baluchistan, Upper Sind and the South-West Punjab, in which pressure was nearly ·200″ in defect. Temperature had increased nearly 2° in the Central Provinces, Central India, Gujarat, Rajputana and Sind, and 1½° in Madras. The highest temperatures registered were 103°·2 at Surat, 102°·4 at Deesa, 102°·3 at Ahmedabad and 100°·4 at Rajkot. Duststorms and thunder storms were reported by stations in Sind, Gujarat and Rajputana, and the depression in Sind was causing unsettled weather in North-Western and Central India.

Saturday.—The barometer had risen briskly to rapidly in North-Western and Central India, but had fallen briskly in Baluch istan, and a deepish depression, probably the continuation of the one in Sind the day before, was shown covering Baluchistan and Sind. The changes of pressure elsewhere were small in amount. Numerous duststorms and thunderstorms were reported, chiefly by stations in the Punjab, Rajputana, Kathiawar and Central India, and temperature had in consequence fallen very rapidly in Sind, Rajputana, Central India, Gujarat and Kathiawar. The fall of temperature was greatest at Deesa, where it amounted to nearly 19°.

Temperature.—Unusually high temperature has prevailed during the greater part of the week in Northern and Central India and the Central Provinces, and unusually low temperature in Madras. The excess was greatest in the Punjab, where, with the exception of the first and second days of the week, temperature ranged between 5° and 7° above the normal. At the close of the week a series of duststorms and thunderstorms caused a very rapid fall of temperature in Central India, Gujarat, Sind and Rajputana. The fall averaged 8½° in Sind and Rajputana.

The following table gives the variation of the mean temperature from the normal in the different provinces of India for each day of the week:—

Province.	March, 1895. 3rd.	4th.	5th.	6th.	7th.	8th.	9th.	Mean variation of week.
	°	°	°	°	°	°	°	°
Burma	—0·4	+0·7	+0·1	+0·1	—0·2	—1·1	—0·7	—0·2
Bengal and Assam	—0·1	+1·2	+1·2	+1·8	+0·9	+1·4	+2·0	+1·2
North-Western Provinces and Oudh	+1·6	+2·3	+1·7	+2·4	+2·9	+2·4	+3·5	+2·4
Punjab	+2·3	+4·6	+6·0	+7·0	+6·8	+7·2	+5·2	+5·6
Bombay	+0·3	+0·7	+1·1	+1·5	+2·7	+2·6	+1·1	+1·4
Central Provinces and Berar	—0·2	+0·9	+0·4	+1·4	+1·0	+2·5	+2·0	+1·1
Central India and Gujarat	+1·1	+3·3	+1·1	+2·8	+3·8	+5·2	—2·4	+2·1
Sind and Rajputana	+1·8	+2·2	+2·9	+4·8	+4·8	+6·4	—2·2	+3·0
Madras	—3·1	—3·6	—1·9	—2·4	—1·9	—0·6	+0·4	—1·9
	°	°	°	°	°	°	°	°
Mean for whole of India	+0·4	+1·4	+1·4	+2·2	+2·3	+2·9	+1·0	+1·6

The mean temperature of the week was practically normal in Burma and 2° in defect in Madras. In all other provinces it was in excess, the excess averaging 5°·6 in the Punjab, 3° in Sind and Rajputana, and upwards of 2° in the North-Western Provinces, Gujarat and Central India.

The mean temperature for the whole of India was above the normal throughout the week. For the whole week it averaged 1°·6 in excess.

Rainfall.—Light but fairly general rain fell at the close of the week in the West and North-West Punjab. Rain was received in 19 of the 52 rainfall divisions during the week, but the amounts registered were in all cases small and of but little importance. The heaviest average rainfall was only ·36 inch in West Rajputana, and in nine divisions it did not exceed a tenth of an inch. The rainfall of the week was in excess of the normal by small amounts in Tenasserim, Khandesh, Central India, Rajputana and the western and central districts of the Central Provinces.

A new rainfall period commences with this week.

W. A. BION,
Acting Asst. Meteorological Reporter to the Government of India.

SIMLA, *14th March, 1895.*

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 16th March.*—No rain except scattered showers at four stations. The past drought is much felt in the Southern districts. Water-supply generally short. Cultivation season drawing to a close. Standing crops fair, but withered or withering in parts, except in the Circars. Harvest continues with generally fair outturn. Pasture generally scarce, but fodder sufficient. Prices rising in seven districts, but are stationary or easier elsewhere.

Bombay.—*For week ending 20th March.*—Rain fell in parts of Sind and four districts of the Presidency Proper. Standing crops damaged by frost, blight, hailstones or rain, in parts of Sind. Poppy diseased in parts of Baroda territory. Reaping of late crops continues in parts of seventeen districts, and preparations for next season's crops in parts of five. Cotton-picking in progress in parts of Gujarat and the Karnatac. Fodder-supply sufficient and agricultural stock in good condition. Prices normal except in parts of Ahmednagar and Sholapur.

Bengal.—*For week ending 18th March.*—There was rain in several districts during the week, but it was insignificant in amount except in Murshidabad, Dacca, Chittagong, and the Bettiah sub-division of Champaran. More rain is required for the standing crops in Eastern Bengal and for the cultivation of the hot-weather crops there and in Northern Bengal. In Orissa rain is required to mature the spring rice. The spring harvest is in progress and promises generally to yield a good outturn. The collection of opium is going on satisfactorily, but in Gaya the weather is said to be not very favourable. The young indigo is generally doing well. Cattle in good condition except in the north-west of Dacca and Khulna. The price of common rice continues normal and almost stationary.

North-Western Provinces and Oudh.—*For week ending 20th March.*—Weather generally cloudy. Slight showers of rain in Benares, Allahabad, Banda, Farukhabad, and Moradabad. Hail fell in Banda and one tahsil of Jhansi doing slight damage. Violent hail-storms also prevailed in three tahsils of Farukhabad and Lalitpur sub-division, causing somewhat serious damage in the latter. The spring harvest is in progress, the outturn being below normal in Fyzabad and Partabgarh. Crops are good elsewhere. Poppy yield small in some districts. Supplies sufficient, but fodder is scarce in Sitapur, one tahsil of Rae Bareilly, and two tahsils of Cawnpore. Prices falling in Benares and Sitapur, low in Fyzabad, Banda, and Moradabad, risen slightly in Allahabad, and normal elsewhere.

Punjab.—*For week ending 20th March.*—Rain has fallen in all districts except Hissar, Umballa, and Sialkot. Reaping of rapeseed has commenced in Lahore and sowings of cotton and tobacco are in progress. Land is being prepared for other autumn crops. Spring crops are ripening and their condition and prospects are said to be good to average. The recent rain has improved the condition of standing crops in some districts. Crops have been much damaged by hail in one and slightly in two tahsils of Sialkot, and they have similarly suffered in one tahsil of Dera Ismail Khan. Field rats have also been destructive in one tahsil of Lahore. Cattle are generally in good condition, and pasturage and fodder sufficient throughout the Province. Prices falling in Shahpur and Dera Ismail Khan, below normal in Sialkot, continue normal in Umballa, and low elsewhere.

Central Provinces.—*For week ending 20th March.*—Light sowers of rain have fallen in most districts accompanied in three by hail. Reaping and threshing of winter crops in progress. Prices above normal in Seoni, falling in two districts, and continue normal elsewhere. Fodder-supply sufficient and agricultural stock in good condition.

Burma.—*For week ending 16th March.*—Slight rain fell in the northern part of the Province and some also in Arakan. Harvesting of main paddy crop completed everywhere in Upper Burma. Sowing and transplanting of dry-weather paddy and cultivation of miscellaneous food-crops progressing favourably, while early wet-weather paddy operations have commenced in two districts. Prospects generally good. Paddy market fairly steady with slight fall in five districts of Lower Burma. Prices above normal in Lower Burma and below normal in Upper Burma. Fodder and water-supply sufficient.

Assam.—*For week ending 19th March.*—Weather seasonable. Ploughing for early rice progressing. Pressing of sugarcane continues. Condition of cattle fair, and fodder and water sufficient.

Mysore and Coorg.—*For week ending 20th March.*—MYSORE: Standing crops in good condition. Prospects of season good. Prices normal.

COORG: Threshing of rice almost over. Fodder and water for cattle fairly sufficient. Prices of food-grains normal.

Berar and Hyderabad.—*For week ending 20th March.*—BERAR: Weather warm and cloudy. Cutting of winter crops completed in two districts. Land is being prepared for ensuing rain crop. Fodder and water sufficient. Prices risen in two districts, fallen in one, and stationary elsewhere.

HYDERABAD: No rain during the week. State of crops favourable. Water in wells and tanks sufficient for cultivation. Prices normal.

Central India.—*For week ending 20th March.*—Slight rain fell in four Agencies during the week. Agricultural operations completed in Bhopal and are in progress in other Agencies. Condition of standing crops indifferent in Isagarh but fairly good elsewhere. Condition of cattle fair except in Bhopal, Narsingarh, and Isagarh. Pasturage good and sufficient except in five districts of Gwalior. Prices of food-grains high in Bundelkhand, Goona, and Isagarh; rising in Chanderi and Dhar; stationary in Bhopal and Western Malwa; and normal elsewhere. Condition of opium indifferent in Isagarh, partially injured by rain in Bhopawar and Goona, and fairly good elsewhere.

Rajputana.—*For week ending 20th March.*—Fairly heavy rain fell in Dholepore, Ulwar, and Bickaneer, and slight in Jhallawar, Haraoti, and Kerowli. Agricultural operations satisfactory. Harvesting commenced in parts. Standing crops, prospects, and agricultural stock generally good. Fodder sufficient but failing in Dholepore. Prices falling in two States, below average in one, and steady elsewhere.

Kashmir.—*For week ending 18th March.*—KASHMIR VALLEY: Rain fell all over Kashmir during the week. The spring crops are reported to be in good condition. Prices below normal.

JAMMU PROVINCE.—***For week ending 20th March.***—Slight rain fell during the week. Cattle in good condition and fodder sufficient. Prices stationary.

Nepal.—*For week ending 16th March.*—No rain. Weather fine.

CALCUTTA, *the 22nd March, 1895.*

H. P. BURT,
Offg. Under Secretary.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

GEOLOGY and MINERALS.

REMARKS ON THE ANNUAL REPORT OF THE GEOLOGICAL SURVEY OF INDIA AND GEOLOGICAL MUSEUM FOR 1894.

Extract from the Proceedings of the Government of India, Department of Revenue and Agriculture, No. $\frac{5}{35}$ (Geology and Minerals), dated Calcutta, the 19th March 1895.

READ—

Letter No. 193, dated the 26th February 1893, from the Director, Geological Survey of India, submitting the annual report of the Geological Survey of India and Geological Museum, Calcutta, for the year 1894.

RESOLUTION.

1. The work upon which the officers of the Department were engaged during the year under review is shown in the following table :—

Name of officer.	Locality where employed.	Character of work.	Whether main object scientific or practical.
Dr. King . . .	Calcutta . .	Administrative.	
„ . . .	Madras . .	To arrange for the mineral survey of Madras.	Practical.
„ . . .	Mysore . .	To inspect gold mines . . .	Ditto.
Mr. Griesbach . .	Baluchistan . .	Geological survey . .	Scientific.
„ . .	Calcutta . .	Administrative.	
Mr. Oldham . . .	Rewah . .	Geological survey . . .	Scientific.
Dr. Noetling . . .	Warora . .	Investigation into causes of accidents at the collieries.	Practical.
„ . . .	Yenangyaung . .	Inspection of oil region . .	Scientific.
„ . . .	Calcutta . .	Description of the older palæozüc strata of the Salt Range and of the cretaceous and jurassic fossils obtained from Baluchistan.	Ditto.
Mr. La Touche . .	Sukkur . . .	Oil-boring	Practical.
Mr. Bose . . .	Rewah . . .	Geological survey . .	Scientific.
„ . . .	Chhattisgarh, Central Provinces.	Ditto	Ditto.
Mr. Middlemiss . .	Salem . . .	Investigation of the mineral resources and petrology of Salem with special reference to the occurrence of corundum.	Practical.
Dr. Warth . . .	Pondicherry . .	Study of the cretaceous rocks of Pondicherry.	Scientific.
Mr. Holland . .	Himalayas . .	Examination of the Gohna Lake .	Practical.
„ . . .	Calcutta . .	In Charge of Museum and Lecturer to Geological students at the Presidency College.	Scientific and educational.
Mr. Datta . . .	Narsinghpur, Chindwara and Bhandara Districts, Central Provinces.	Geological survey . . .	Scientific.
„ . . .	Rewah . . .	Ditto	Ditto.
Mr. Smith . . .	Baluchistan . .	Ditto	Ditto.
„ . . .	Ditto . . .	Coal exploration . . .	Practical.

The work of the Department may be divided into two branches—the scientific and the practical—and though a clear distinction cannot in all cases be drawn, the following indicates roughly the character of the results achieved during the year.

2. The most extensive of the scientific investigations of the year were those carried on in Baluchistan, the Central Provinces and Rewah. In Baluchistan Mr. Griesbach continued the work which he had begun during the previous field season, with the result that a geological survey of about 3,400 square miles of the country has been completed; and Mr. Smith, who was also employed in this Province, succeeded in geologically mapping some 2,000 square miles in the direction of the Marri hills. In Rewah, where the geological survey was continued by Mr. Bose, and is now being conducted by Mr. Oldham and Mr. Datta, a considerable area has been surveyed. In the Central Provinces the beginning of the year was utilised in the examination by Mr. Datta of a portion of the Nagpur, Chindwara and Bhandara districts, while later on in the year the surveys commenced by Dr. King in Chhattisgarh were taken up and continued by Mr. Bose. At head-quarters Mr. Holland was again employed in the museum, and the Government of India are glad to find that in spite of interruptions considerable progress has been made in this section of the Department. The literary work of the Department has at the same time been adequately advanced: the geology of the Salt Range having been further examined in the Records by Dr. Noetling, and several publications of a valuable character being almost ready for issue.

3. Practical work was carried on by officers of the Department in four widely separated parts of the country. At Yenangyaung in Burma the oil-bearing strata have been carefully examined by Dr. Noetling, who has in hand a report on the subject. At Sukkur, in Sindh, the borings for oil have been steadily continued under the superintendence of Mr. LaTouche, and though there has so far been no discovery of oil, there are indications which show that oil may be found at a depth lower than that already reached. In the Salem district of Madras Mr. Middlemiss was employed on a detailed investigation of the mineral resources of that district with special reference to the occurrence of corundum, and his observations in regard to the latter are said to show that corundum is not an original constituent of the rocks in which it occurs, but is the result of a mineral change of the matrix rock. Lastly, Mr. Holland studied the features of the remarkable landslip which occurred at Gohna in the Kumaun hills, and the results of the overflow of the lake have fulfilled very closely the anticipations expressed by him.

Work of an economic character has also been accomplished by officers engaged on scientific enquiries. Reports have, for instance, been received on certain economic features in Rewah from Messrs. Datta and Bose; the Quetta coal tract has been examined by Mr. Smith, and the Warora collieries have been inspected by Dr. Noetling.

The first step was taken in pursuance of the policy laid down in Resolution, No. 3—74, dated 8th March 1893, by the appointment in November 1894 of a specialist, Mr. Anderson, who has since been posted to Chota Nagpur for the examination of the supposed metalliferous belt of rocks in that region. Moreover steps have been taken during the year with a view to the preparation of working-plans for the development of the mineral resources of India.

Circular No. 7, dated the 7th July 1894.

Finally, a new feature of considerable importance in the economic development of the country may be noticed in the enquiries prosecuted during the year by Mr. Grundy, the Inspector of Mines, who, though not a member of the Geological Survey Department, is placed under the orders of the Director of that Department. His first report was received in July of last year and has been separately dealt with.

4. The Directorship of the Department was taken over in July last by Mr. C. L. Griesbach, C.I.E., from Dr. William King, who has retired after a service of 37 years, of which seven were spent in the post of Director. In Dr. King the Government has lost a valuable and experienced servant, and the recent development of the economic side of the geological investigations undertaken by Government in this country has been largely due to his appreciation of the objects which the Government have had in view and to his hearty co-operation in carrying out those objects in practice.

ORDER.—Ordered that a copy of the foregoing Resolution be forwarded to the Director, Geological Survey of India, and to Local Governments and Administrations, and that it be published in the Supplement to the *Gazette of India*.

(True Extract.)

DENZIL IBBETSON,

Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

RAILWAY STATISTICS.

RESULTS OF THE WORKING OF CONTINUOUS AUTOMATIC BRAKES IN USE ON RAILWAYS IN INDIA DURING THE SIX MONTHS ENDED THE 30th JUNE 1894.

No. 55 R. Stat., dated Simla, the 6th March 1895.

ORDER—By the Government of India, Public Works Department.

Read again—

Public Works Department letter No. 62 R. Stat., dated the 19th October 1891.
Public Works Department letter No. 354 R. Stat., dated the 4th September 1894.
Public Works Department order No. 371 R. Stat., dated the 26th September 1894.

Read also—

Endorsement No. 044 Stat., dated the 18th February 1895, from the Director General of Railways, forwarding tables Nos. I and II showing the railways on which continuous automatic brakes were in use, the number and proportion of rolling-stock fitted with the brakes, the progress made in fitting stock since the previous half-year, and the results of working the brakes during the six months ended the 30th June 1894.

ORDER.—Ordered, that tables Nos. I and II be forwarded, for information, to the Local Governments and Administrations, and to the officers noted in the margin.

The Governments of Madras, Bombay, Bengal, the North-Western Provinces and Oudh and the Punjab.
The Chief Commissioners of the Central Provinces, Burma and Assam.
The Resident at Hyderabad.
The Resident in Mysore.
The Agents to the Governor General for Central India, Rajputana and Baluchistan.
The Director General of Railways.
The Consulting Engineers to the Government of India for Railways, Calcutta, Lucknow and Assam.

Ordered also, that copies be forwarded for the information of Her Majesty's Government.

Further, that this order with the tables be published in the Supplement to the *Gazette of India*.

H. P. BURT,
Offg. Under Secretary.

Documents accompanying.

Tables Nos. I and II showing the railways on which continuous automatic brakes were in use, the number and proportion of rolling-stock fitted with the brakes, the progress made in fitting stock since the previous half-year, and the results of working the brakes during the six months ended the 30th June 1894.

Table No. I.

Statement showing, for the half-year ended the 30th June 1894, the railways on which continuous automatic brakes were in use, the mileage run by trains fitted with the brakes, the number and proportion of rolling-stock fitted, and the progress made in fitting stock since the previous half-year.

Railways (including branch lines worked).	Period.	Locomotives.		Vehicles.			Number of miles run by trains fitted.	Total number of instances in which the brakes failed to act or caused delay in the working of trains.	Proportion per cent.		Number of failures as compared with mileage run by trains fitted.
		Fitted.	Net fitted.	Braked.	Piped.	Not fitted.			Of vehicles piped or fitted on total.	Of mileage run by trains fitted on total train mileage

(a) Excludes 4 locomotives made over to the Mushkaf Bolán railway.
(b) Excludes stock belonging to the late salt branch and the Ferozepore tramway.
(c) Excludes 47 vehicles made over to the Mushkaf-Bolán railway.
(d) Brakes not yet brought into use.

Table No. II.

Statement showing, for the six months ending 30th June 1894, all cases in which the continuous automatic brakes failed to act when required to be brought into action, or caused delay in the working of trains.

1	2	3	4	5
Railway.	Name or description of brakes which failed or caused delay in the instances specified in column 4.	Date of failure.	Instances under the three following heads separately, of— (i) Failure or partial failure to act when required in case of an accident to a train, or a collision between trains being imminent. (ii) Failure or partial failure to act under ordinary circumstances to stop a train when required. (iii) Delay in the working of trains in consequence of defects in, or improper action of, the brakes, distinguishing whether they arose from neglect or inexperience of servants, or failure of machinery or material.	Number of miles run by trains fitted with each description of continuous automatic brake.
Standard gauge.				
State lines worked by company.				
East Indian	Vacuum Automatic.	30th January 1894	(iii) Failure of material.—No. 2 down chord mail detained four minutes between Sháhdara and Gháziabad in releasing brakes. The engine is said to have struck some obstruction on the road, causing the breakage of ball of drip valve.	
		31st January 1894	(iii) Neglect of servants.—No. 1 up mail lost five minutes at Hooghly and 10 minutes between Ondál and Raneegunge in consequence of insufficient vacuum, owing to the disc of the driver's handle, which had not been properly fitted, drawing air.	
		3rd February 1894	(iii) Neglect of servants.—No. 1 up chord mail detained four minutes at Ásansol and 11 minutes between Ásansol and Sítárampur in raising vacuum. The brake apparatus on engine was defective and vacuum had to be disconnected at Sítárampur.	
		25th March 1894	(iii) Failure of material.—No. 9 up loop mail came to a stand at mile 189¼ owing to vacuum having been destroyed in consequence of the front vacuum hose pipe breaking through the engine having run over a cow.	529,243.
		2nd April 1894	(iii) Neglect of servants.—No 1 up chord mail lost 90 minutes between Howrah and Ásansol in consequence of leakage of engine train pipes and ejector disc.	
		18th May 1894	(iii) Neglect of servants.—No. 9 up loop mail worked from Rampore Haut to Jamálpur without vacuum brake, owing to the vacuum having failed in consequence of the disc drawing air.	
		30th May 1894	(iii) Failure of machinery.—Vacuum on No. 1 up chord mail failed at Serámpore owing to the little ejector having got out of order. The train was detained 10 minutes at Hooghly in disconnecting.	
State lines worked by the State.				
North Western (state)	Vacuum Automatic.	20th January 1894	(iii) Failure of material.—Piston on No. 61 up goods drawing air badly and the vacuum big ejector stuffing box cracked at Lála Músa. No detention.	
		21st January 1894	(iii) Neglect of servants.—No. 6 down mail delayed 4 minutes at Ludhiána in creating vacuum, owing to the porter having failed to replace the vacuum hose pipe on the stopper after detaching pipes.	
		25th January 1894	(iii) Failure of material.—No. 66 down goods detained 3 hours at Ráwalpindi owing to the piston rubber rolling ring on engine No. 252 having broken. Another engine was in consequence lit up to work the train.	See page 2.
		17th March 1894	(iii) Failure of material.—The fork end of brake shaft on engine No. 263 of a down empty ballast train broken in the Ráwalpindi yard. No detention.	
		21st March 1894	(iii) Failure of material.—The brake shaft on engine No. 264 on a down special goods train broken between Ráwalpindi and Golra. No detention.

SUPPLEMENT TO

The Gazette of India.

No. 13.] CALCUTTA, SATURDAY, MARCH 30 1895.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

HOME DEPARTMENT.

COMPULSORY SEGREGATION IN ASYLUMS OF LEPERS FOUND VAGRANT IN MUNICIPALITIES AND PROHIBITION OF THE CARRYING ON OF CERTAIN TRADES OR CALLINGS BY LEPERS IN MUNICIPALITIES.

No. $\frac{2 \text{ Medical}}{138-149}$.

Extract from the Proceedings of the Government of India, in the Home Department (Medical),—under date Calcutta, the 23rd March 1895.

READ—

Home Department Resolution No. $\frac{8 \text{ Medical}}{624-633}$, dated the 26th September 1888.

Home Department Resolution No. $\frac{5 \text{ Medical}}{351-361}$, dated the 15th June 1889, and the draft Bill to provide for the isolation of lepers and the amelioration of their condition published with it.

The replies of Local Governments and Administrations to the above Resolution.

The Report (1893) of the Leprosy Commission in India appointed at the instance of the National Leprosy Fund in 1890.

The Memorandum on that Report, as prepared by a Special Committee appointed for the purpose by the National Leprosy Fund, and endorsed or annotated by members of the Executive Committee of the Fund.

Home Department Circular letter No. $\frac{11 \text{ Medical}}{561-570}$, dated the 15th September 1893, forwarding, for the opinion of Local Governments and Administrations, the above-mentioned Report and Memorandum, together with a Memorandum by the Surgeon-General with the Government of India.

The replies of Local Governments and Administrations to that Circular letter.

Home Department letter No. 48 Medical, dated the 7th February 1895, to the Government of Bengal, conveying the approval of the Governor General in Council to the introduction in the local Legislative Council of a draft Bill to provide for the segregation of pauper lepers and the regulation of the exercise by lepers of certain trades or callings.

RESOLUTION.

THE question whether it would not be possible for the State to take a more direct part in the prevention or treatment of leprosy in India has been for some years under the consideration of the Government of India. In the Resolution, dated the 26th September 1888, the Governor General in Council observed that so far as had been ascertained at the census of 1881 there were 131,618 lepers in British India, that these figures did not in all probability afford a true measure of the disease, and that about 1 per cent. only of the lepers actually known to exist came under organised relief in Institutions maintained by charity or assisted by Government. It was stated that the great majority of lepers preferred to be the objects of local charity and appeared to disapprove of the small amount of restraint to which they were liable in institutions maintained for their treatment. The Governor General in Council was of opinion that the absolute segregation of the sexes and the confinement for life of all affected by leprosy, which His Excellency in Council was then assured was the only effectual measure for stamping out the disease, would not only be repugnant to public opinion but would be impracticable in India. After a careful consideration of the subject the Governor General in Council came to the conclusion that, for the time at all events, the State could not attempt more than the encouragement of the grant of medical and charitable relief to lepers in voluntary hospitals and Leper Asylums. His Excellency in Council expressed the opinion that in such institutions the necessity of strictly segregating the sexes should invariably be kept in view and desired that this condition should be enforced in the case of every institution for the relief of lepers receiving aid from public funds, and that every effort should be made to induce the supporters of institutions of the kind maintained by voluntary contributions to adopt a similar rule.

2. Subsequently, upon a further examination of the question, the Governor General in Council considered that some additional measures might be taken with the object of promoting the establishment of asylums or retreats for lepers and giving legislative sanction to the retention of lepers in such retreats. His Excellency in Council accordingly directed the preparation of a Bill providing for the detention of lepers at their own request in accordance with the voluntary system adopted in regard to Habitual Drunkards by the Statute 42 and 43 Vict., Cap. 19, and authorising Magistrates to arrest and commit to retreats persons proved to be lepers who might be found asking for alms or wandering about without any employment or visible means of subsistence. The Bill contained a provision requiring the segregation of the sexes at retreats and protecting a leper from being sent against his will to a retreat where attendance at any religious observance or at any instruction in religious subjects was obligatory upon the inmates. In inviting the views of the local authorities upon the provisions of the Bill on the 15th June 1889, the Government of India requested the Local Governments and Administrations to state whether, in the opinion of persons qualified to judge, leprosy was on the increase or not.

3. The replies showed that very great uncertainty existed as to the cause and character of the disease of leprosy, and the opinions of those consulted differed very much upon these points. The opinion was expressed by many of the highest medical authorities consulted that the disease is not contagious except by inoculation, and that the part played by inoculation in determining its spread is very small. It then became a matter for the consideration of the Government of India whether it would not be desirable to introduce the Bill in an amended form, on the one hand limiting its application to persons suffering from the disease in an advanced and specially dangerous stage, and on the other hand extending the power of arrest and compulsory detention so as to cover all such dangerous lepers who might after warning persist in coming out and mixing with the public. The conclusion at which the Government of India then arrived was

that there was no safe basis even for an enactment of this restricted description. At the time the English National Leprosy Fund, formed under the presidency of His Royal Highness the Prince of Wales for the purpose of perpetuating the memory of Father Damien who died of leprosy contracted during his work among the lepers of Hawaii, contemplated the appointment of a Leprosy Commission to visit India, and the Government of India, after communicating their views to Her Majesty's Secretary of State for India, decided to await the recommendations of the Commission.

4. The Commission, which consisted of five gentlemen of the medical profession, three * selected in England by the National Leprosy Fund in conjunction with the Councils of the Royal College of Physicians and the Royal College of Surgeons, London, and two †—officers of the Indian Medical Service—deputed by the Government of India, commenced its investigations in the winter of 1890-91. The Commissioners unanimously reported their opinion that:—(1) leprosy is a disease *sui generis;* it is not a form of syphilis or tuberculosis, but has striking ætiological analogies with the latter; (2) leprosy is not diffused by hereditary transmission, and for this reason, as well as because of the large extent of sterility among lepers, the disease has a natural tendency to die out; (3) though in a scientific classification of diseases leprosy must be regarded as contagious and also inoculable, yet the extent to which it is propagated by these means is exceedingly small; (4) leprosy is not directly originated by the use of any particular article of food, nor by any climatic or telluric conditions, nor by insanitary surroundings; neither does it peculiarly affect any race or caste; (5) leprosy is indirectly influenced by insanitary surroundings, such as poverty, bad food, or deficient drainage or ventilation, for these by causing a predisposition increase the susceptibility of the individual to the disease; and (6) leprosy in the great majority of cases originates *de novo*, that is, from a sequence or concurrence of causes and conditions, dealt with in the report, which are related to each other in ways at present imperfectly known.

* Beaven N. Rake, Esq., M.D., L.R.C.P., M.R.C.S.
Geo. A. Buckmaster, Esq., M.D.
A. A. Kanthack, Esq., M.D., M.R.C.P., F.R.C.S
† Surgeon-Major A. Barclay, M.B.
Surgeon-Major S. J. Thomson, D.P.H.

5. The Commissioners observed that "the presence of a leper in a healthy community is a source of danger no greater than the presence of an individual suffering from tuberculosis. Both diseases are contagious in an equal and minimal degree. The amount of ulceration which exists in both diseases is to some extent a measure of the danger of contagion." They held that their conclusions as to the nature of the disease did not justify any recommendation for absolute segregation, and for the same reasons they found it impossible to advise compulsory partial isolation. They advocated the adoption of a voluntary isolation as extensive as local circumstances would allow, and suggested that, if marriages among lepers were permitted, this plan might be more easily carried out. They stated that they would in no case suggest an Imperial Act, especially directed against lepers as such, for the reason that they considered lepers to be far less dangerous to a community than insane or syphilitic people.

6. The Commissioners made the following recommendations for the regulation of leprosy and lepers in India, which they considered could be effected by means of Municipal bye-laws:—(*a*) that the sale of articles of food and drink by lepers should be prohibited and that they should be prevented from practising prostitution, and from following such occupations, as those of barber and washerman, which concern the food, drink, and clothing of the people generally, quite apart from the dread of a possible infection; (*b*) that the best policy in dealing with the concentration of lepers in towns and cities is to discourage it, and that to this end the Municipal authorities should be empowered to pass bye-laws preventing vagrants suffering from leprosy from begging in or frequenting places of public resort or using public conveyances; (*c*) that asylums should be built near towns where they do not already exist, and that the authorities should have the power of ordering lepers infringing the Municipal regulations either to return to their homes or to enter an asylum; and (*d*) that competent medical authority should always be consulted before action is taken under such bye-laws.

7. The report of the Commission was considered by a Special Committee consisting of two members * nominated by the Executive Committee of the National Leprosy Fund, two members † nominated by the Royal College of Physicians, and two members ‡ nominated by the Royal College of Surgeons. It was also considered at the same time by the members § of the Executive Committee of the National Leprosy Fund. As the result of this consideration a memorandum was prepared by the members of these two Committees accepting the conclusions of the Commissioners except:—(3) that the extent to which leprosy is propagated by contagion and inoculation is exceedingly small; and (6) that leprosy in the majority of cases originates *de novo*, that is, from a sequence or concurrence of causes and conditions, dealt with in the report, and which are related to each other in ways, at present imperfectly known. These Committees declared themselves unable to accept the view that segregation in any case of leprosy in India is either impracticable or undesirable, and stated that they would be sorry if the Government of India were encouraged by the report of the Commissioners to refrain from taking the necessary steps in the direction of such segregation of lepers as might be found possible. They stated that their opinions on segregation were in accord with those of Dr. Vandyke Carter, *viz.*, that it should be effected—

Sir Somers Vine, F.R.G.S. F.S.S. (*Honorary Secretary*).

(i) by erecting plain asylums at certain centres, each of which would be a refuge common to several districts, and a place of detention, under due management and supervision;

(ii) by founding Leper Colonies, or village communities, mainly of the affected, who, while allowed more liberty of movement, should yet be prevented from mingling with the peasantry around;

(iii) by requiring the strict isolation in suitable separate lodgment of leprous subjects retained in their homes at express wish of friends; and

(iv) by giving legislative authority to take up the vagrant sick, to remove the sorely diseased who are insufficiently guarded at home, and at times to enforce continued isolation of the infected until medical sanction of liberty be granted.

While reserving these opinions the Committees gave a general approval to the recommendations of the Commissioners enumerated above in paragraph 6, though they did not concur in the opinion that Municipalities would be necessarily or universally the best means of effecting the object of providing for the regulation of lepers and leprosy in India. They wished to go much further than the Commissioners in controlling the action of lepers, and urged that the Government of India should take the necessary steps in the direction of such segregation of lepers as might be found possible. The late Sir Andrew Clark, Sir W. Guyer Hunter, Sir James Paget, Sir Joseph Fayrer and Dr. Jonathan Hutchinson dissented from the opinion expressed in the body of the report of the Special Committee on the subject of the contagion of leprosy, believing that the evidence of the spread of leprosy by contagion is not sufficient to justify the compulsory segregation of lepers, and that there is no adequate reason for prohibiting the marriage of the leprous. Sir Dyce Duckworth also expressed a somewhat similar opinion.

The Surgeon General with the Government of India has also stated his concurrence with the finding of the Commissioners upon the issue whether leprosy is contagious or not, and this view has found favour generally among the authorities in this country. The Governor General in Council, while regarding with every respect the opinion of the eminent gentlemen upon the Special Committee and the Executive Committee of the National Leprosy Fund who dissented from the finding of the Leprosy Commissioners regarding the contagious character of the disease, is constrained to accept the conclusion of the Commissioners upon this matter, fortified as it is by the views of the distinguished medical authorities just cited, and by the general opinion of those in India who are qualified to pass judgment on it. His Excellency in Council accordingly feels assured that the extent to which the disease is propagated in India by contagion is small, and, holding this opinion, is unable to approve of the compulsory segregation, either absolute or partial, of lepers except under the special circumstances which are detailed *infra* in paragraph 10.

8. The Local Governments and Administrations were requested to offer their opinions for giving practical effect to the recommendations of the Commissioners. There is complete unanimity of opinion in favour of the first recommendation that lepers should be prohibited from engaging in certain trades. This recommendation cannot indeed be directly justified on the conclusion of the Commissioners regarding the question of the contagiousness of leprosy, but it appears to the Government of India that, as the Lieutenant-Governor of the Punjab observes, "it is amply justified on the grounds that there is a certain danger in allowing lepers with running sores to engage in those trades, and the people of this country, and indeed, it may be said, of any other country, would be struck with dismay if they discovered that the articles they used or consumed had been handled by such lepers." There is, in fact, the Government of India are advised, danger of septic poisoning from any such running sore or ulcer.

The question arises whether the prohibition in respect of the trades in question should be confined to Municipalities or made of general application. The majority of the Local Governments and Administrations would, for the present at least, proscribe lepers from engaging in trades only in Municipal areas, upon the broad grounds that the enforcement of the prohibition would be impracticable in agricultural villages, and that the members of village communities, who are fully cognizant of the most trifling details connected with the every day life of their fellow residents in a village, are well able to protect themselves. The object is to protect the public from dealing unwittingly with leper tradesmen, and the Governor General in Council thinks that this can be adequately secured if the prohibition is confined to Municipalities and to the larger fairs and religious and other gatherings which are held outside the limits of towns. His Excellency in Council has, therefore, decided that, for the present at all events, the prohibition should not apply except to lepers in and near Municipalities and at the larger fairs and similar gatherings. As the Government of India abstain strictly from regulating prostitution, no bye-law or Act dealing with the prohibition against lepers following certain trades or callings should extend to that of prostitution by leper women.

In the opinion of the Governor General in Council the question of amending the Municipal Acts in the Provinces where they are at present deficient in this respect should now be taken into consideration. In connection with this point it appears to His Excellency in Council that section 55 of Act XV of 1883 in the North-Western Provinces and Oudh cannot, as urged by the Lieutenant-Governor of the North-Western Provinces and Chief Commissioner of Oudh, be held to refer to this matter, and that section 85 of Act XVIII of 1889 in the Central Provinces, which the Chief Commissioner of the Central Provinces considers would enable Municipal Commissioners to prohibit, as a public nuisance, lepers from publicly exposing their sores or from engaging in trade, does not provide for it with sufficient precision.

9. The second recommendation of the Commissioners was directed against the prevalent custom of mendicant lepers to leave their homes and crowd into the large centres of population. The Commissioners held that vagrant and indigent lepers scattered about the country are not a source of serious danger, and their proposal that Municipal authorities should be empowered by bye-laws to prevent vagrants afflicted with leprosy from begging

in or frequenting places of public resort or using public conveyances in towns and cities was dictated by the expectation that the effect of such bye-laws in large towns would be an emigration into the surrounding country, and a furtherance of the scheme for establishing experimental leper colonies or farms in rural districts. With the exception of the Government of Madras and the Chief Commissioner of Assam, the Local Governments and Administrations are generally in favour of sending to, and retaining in, asylums vagrant pauper lepers who congregate in towns. It has been forcibly urged to the Government of India that this question, as well as that of prohibiting lepers from engaging in certain trades, has an administrative as well as a medical aspect, and that action such as the Commissioners proposed is justified by the loathsomeness of the disease, by the circumstance that those suffering from it very commonly obtrude their sores upon the public with a view to forcing people to give them money, and by the fact that people in India are commonly struck with horror at the approach of a leper, and are apt to yield to his importunity in order to induce him to move on. In deference to the sentiments of the community generally, the Government of India agree that steps should be taken to prevent mendicant lepers from obtruding their deformities on the public gaze in towns and cities. The experience gained in Bombay, since the establishment of the Leper Asylum at Matoonga, shows that regulations having this object may, if intelligently and energetically carried out, be expected to be productive of great benefit to the leper community as well as to the general public.

The Commissioners recommended that the authorities in towns should be empowered to order a leper infringing the regulations either to return to his home or to enter an asylum. This recommendation is generally accepted except by the Government of Madras which would limit the power of enforcing obedience to the bye-laws to the actual expulsion of lepers from towns and cities, and by the Chief Commissioner of Assam on the ground that he is not prepared to recommend compulsory detention in asylums. The view which approves itself to the Government of India and to the majority of the Local Governments and Administrations is that vagrant lepers in Municipalities should be dealt with in much the same way as vagrant lunatics are dealt with under the provisions of Act XXXVI of 1858, *viz.*, that such persons should be brought before a Medical officer and a Magistrate and sent to an asylum by an order of the latter if found to be suffering from the disease and without relatives who can properly care for and treat them. The Governor General in Council considers that, for the present at all events, it will be sufficient to take power to deal with vagrant lepers in this manner in Municipalities and their immediate neighbourhood.

10. The Commissioners recommended that Leper Asylums should be built near towns where they do not already exist, and the memorandum of the Surgeon-General with the Government of India, circulated with Home Department letter of the 15th September 1893, contained detailed suggestions for the establishment and location of additional asylums throughout the country. The Surgeon-General was of opinion that requirements would be met if on an average one asylum was provided to each revenue division. A suggestion of the Commissioners, intended to be ancillary in the rural districts to the establishment of asylums in the immediate neighbourhood of towns, was that leper farms in rural tracts where lepers with their wives and families could cultivate the soil might be productive of practical good. They considered that comparatively few children would be born, and proposed that they should, if possible, be removed to orphanages from which they would be discharged as soon as they could support themselves.

This part of the subject appears to the Government of India to need further consideration by the Local Governments and Administrations. The Governor General in Council considers that in each division or some convenient area an asylum, or an asylum and a farm, should be maintained so as to accommodate the lepers who may be found vagrant in the Municipalities in the division or area, and His Excellency in Council is of opinion that the additional expense which may be necessary for the purpose should be met jointly by the Municipalities and District and Local Boards of the division or area.

The Government of India will be glad if the Local Governments and Administrations will take the matter into their consideration at an early date, in order to determine to what extent additional accommodation will be required, how the cost of providing and maintaining such accommodation should be divided among the local bodies, and whether any amendment of the law relating to Municipalities and District and Local Boards is necessary for the establishment of such asylums and farms outside the limits of Municipalities and for the proposed division of the cost. The Government of India are inclined to think that it may not be necessary to legislate, as was proposed in clause 4 of the Bill circulated in 1889, for the voluntary admission of lepers in asylums, but they would have no objection to the adoption of such a provision in any Province in which the Local Government or Administration thinks it would be useful.

11. The fourth recommendation of the Commissioners was that competent medical authority should always be consulted before action in regard to lepers is taken. With this view the Government of India entirely agree. But the Commissioners did not suggest a definition of the terms "leper" and "leprosy" which could be adopted for the purpose of the provisions to be made in the different laws and bye-laws. In the opinion of the Government of India the terms should for this purpose be defined, as in the Bill at present before the Legislative Council of the Lieutenant-Governor of Bengal, which is alluded to in the preamble of this Resolution, so as only to include cases in which ulceration has actually commenced. The Governor General in Council considers that the public interests do not require that action should be taken against persons attacked with the disease who have not reached that stage. In any case in which it is proposed to enforce the bye-laws against a person who appears to be affected with ulcerous sores, a preliminary to such action will be that he should be examined by a competent medical authority.

12. The enquiry mentioned in paragraph 2 of this Resolution which was instituted into the question whether the disease of leprosy is on the increase or not in this country was taken up by the Leprosy Commissioners. At the time when the report was issued the returns for the census of 1891 had not been fully revised, but they were sufficiently complete to enable the Commissioners to make an elaborate examination of the statistics given in the last three censuses taken in India regarding the distribution of lepers in the country. The conclusions at which they arrived was that the alarm about the increase of leprosy in British India is altogether groundless, that the figures available, though unfortunately consisting of only three sets, pointed strongly to a decrease in the number of these unfortunate people, and in any case to the disease not being on the increase, that the number of lepers had been greatly overstated, 110,000 being perhaps nearest the truth, and that leprosy could therefore not be regarded in the light of a general danger. The final statistics of the Census Commissioner for India showed the number of persons described as lepers at the Census of 1891 to be 126,351, of whom 31,069 were females. Mr. Baines thought it possible that a good deal of the decrease in the numbers of lepers returned in 1891, from tracts in which they were formerly remarkably high, might be nominal, and due to greater accuracy of diagnosis, and the Governor General in Council is inclined to agree with him that it is impossible to say for certain whether the disease of leprosy in this country is on the whole stationary or not. His Excellency in Council, however, sees no reason to dissent from the general conclusion of the Commissioners that leprosy does not prevail in India to such an extent as to constitute a general or universal danger, and that the means by which we must look forward to secure its diminution are improved sanitation and better dietetic conditions.

13. The legislation which is required to carry out the decisions of the Government of India in paragraphs 8, 9 and 10 of this Resolution will be effected in Local Legislative Councils in the Provinces where they exist and for other Provinces by the Governor General in Council. The Bill cited in the preamble has already been introduced in the Council of the Lieutenant-Governor of Bengal, and the Governments of Madras, Bombay and the North-Western Provinces and Oudh should now proceed to legislate, either by means of a separate Bill or by such amendment of the Municipal law as is necessary to bring it into

accord with the principles which have been accepted by the Government of India. The Governor General in Council will be glad to receive in due course, from the Lieutenant-Governor of the Punjab and the Local Administrations, proposals for effecting the changes in the law which will be required in the Provinces administered by them.

14. The Governor General in Council cannot conclude this Resolution without placing on record his appreciation of the able and exhaustive manner in which the Leprosy Commissioners conducted their enquiry. Two of them, the Governor General in Council regrets, passed away before His Excellency in Council had had an opportunity of publicly acknowledging their labours. Surgeon-Major Barclay died at Simla of typhoid fever while the Commissioners were still engaged in their investigations, and Dr. Beaven Rake at Trinidad in August 1894. Finally, the Government of India desire to express on behalf of the Empire their thanks to the Committee of the National Leprosy Fund for devoting a portion of the subscriptions raised in memory of the late Father Damien to the investigation of the disease of leprosy throughout India.

ORDER.—Ordered, that this Resolution be published in the *Gazette of India*, and that a copy be forwarded to all Local Governments and Administrations and to the Foreign Department for information.

DEPARTMENT OF REVENUE AND AGRICULTURE.

LAND SURVEYS.

RE-ORGANIZATION OF THE SURVEY OF INDIA DEPARTMENT AND ITS DIVISION INTO "IMPERIAL," "PROVINCIAL," AND "SUBORDINATE" SERVICES.

Extract from the Proceedings of the Government of India, Department of Revenue and Agriculture, No. $\frac{6}{64}$ (Land Surveys), dated 27th March 1895.

READ—

Despatch No. 104, dated 30th September 1891, from Her Majesty's Secretary of State for India.

" " 169, dated 6th June 1893, to Her Majesty's Secretary of State for India.

" " 188, dated 21st September 1893, from Her Majesty's Secretary of State for India.

RESOLUTION.

In order to carry out the general principles laid down by the Public Service Commission of 1886-87, and to provide a clearer basis for a scheme of leave and pension rules, the Government of India have determined to re-organize the Survey of India Department, by dividing it into three distinct services, to be known respectively as (i) the Imperial Service, (ii) the Provincial Service, and (iii) the Subordinate Service.

2. The essential distinction between the Imperial and Provincial Services is, that the latter will be recruited exclusively in India, while the former will consist of officers who have either been transferred from the Army or have been recruited directly from England. The appointments to the Imperial Service being made by selection only, it is unnecessary to fix any definite rate of annual recruitment. As regards the recruitment for the Provincial Service, to which appointments will be made by examination in India, separate instructions will be conveyed to the Surveyor General hereafter. Meanwhile the following orders are issued regarding the re-organization of the Department.

3. Ten appointments in the existing Senior Division will be transferred to the Provincial Service, and the remainder of that Division, together with the administrative appointments at the head of the Department, will constitute the Imperial Service. The grades of the Senior Division will then be reconstituted as follows:—

APPOINTMENTS.	PRESENT.		FUTURE.			
			RETAINED IN IMPERIAL.		TRANSFERRED TO PROVINCIAL.	
	Number.	Pay per mensem.	Number.	Pay per mensem.	Number.	Pay per mensem.
		₹		₹		₹
Superintendent, 1st grade	3	1,600	3	1,600	...	...
Ditto, 2nd "	7	1,300	6	1,300	...	...
Deputy Superintendent, 1st grade	9	1,000	7	1,000	2	800
Ditto ditto, 2nd "	9	850	7	850	3	650
Assistant Superintendent, 1st grade	10	600	7	600	1	500
					1	450
Ditto ditto, 2nd "	10	500	8	500	3	400
TOTAL	48	866	38	888	10	570

The transfers will be made gradually in the following manner. Three vacancies now existing in the 2nd grade of Assistant Superintendents will be transferred at once to the Provincial Service, and filled up by selections from the Junior Division. The initial appointments thus transferred will in their future treatment shew how promotion in the Provincial Service will be made, and may thus be regarded as pilot appointments. The *appointments* will continue for the present to be shown in the Imperial list in their proper places and with their proper numbers, the words "Transferred to the Provincial Service" being entered in italics, instead of the name of the officer, which will be shown on the separate Provincial list.

As the pilot appointments rise in due course of promotion in the Imperial list, corresponding appointments will be transferred to, and promotions made in, the Provincial list so long as there are appointments to be transferred to that list.

Owing to the fact that only two appointments are being transferred from the first grade of Assistant Superintendents, whereas three appointments are transferred from the second grade of Deputy Superintendents, a difficulty will arise after the first two pilot appointments have reached the 2nd grade of Deputy Superintendents. Accordingly, a third Assistant Superintendentship of the 1st grade will be temporarily transferred to the Provincial Service. As soon as the italicised entry of this appointment in the Imperial list reaches the 2nd grade of Deputy Superintendents, and the corresponding promotion has been made in the Provincial Service, the third appointment will be retransferred to the Imperial list, thus reducing both lists to their normal dimensions.

When the transfer of appointments from the Imperial to the Provincial cadre is complete, the Provincial Service will be fully constituted; promotions in it will be wholly independent of the Imperial list; and the skeleton entries representing the pilot appointments will no longer be shown on the latter.

4. When the transfer is completed as above, an Imperial officer in the first grade of Assistant Superintendents will at once be promoted to the 2nd grade of Deputy Superintendents, and an extra officer will be added to the 2nd grade of Assistant Superintendents; on the occurrence of the first vacancy in the rank of 2nd grade Superintendent no promotion will be made into that grade, and the regrading of the Imperial Service will then be complete.

5. The line between the Provincial and Subordinate Services will be drawn immediately below the existing Junior Division, and the Provincial Service will consist of the existing Junior Division together with the appointments transferred from the Senior Division. The cadre when complete will therefore be as follows:—

Appointments.	Present.		Transferred from Senior Division.		Future.	
	Number	Pay per mensem.	Number.	Pay per mensem.	Number.	Pay per mensem.
		R		R		R
Extra Deputy Superintendent, 1st grade	...	...	2	800	2	800
" " " 2nd "	...	...	3	650	3	650
Extra Assistant Superintendent, 1st grade	3	550	...	...	3	550
" " " 2nd "	5	500	1	500	6	500
" " " 3rd "	7	450	1	450	8	450
" " " 4th "	10	400	3	400	13	400
" " " 5th "	15	350	...	...	15	350
" " " 6th "	20	300	...	...	20	300
Sub-Assistant Superintendent, 1st grade	22	200—10—250	...	...	22	200—10—250
" " 2nd "	24	160—8—200	...	...	24	160—8—200
" " 3rd "	26	120—8—160	...	...	26	120—8—160
Total	132	272	10	570	142	293

Promotion in this consolidated list will mainly depend on the qualifications of officers and the practical efficiency shown by them in the discharge of their duties; and though the position attained by seniority on the list will be taken into consideration, promotion cannot be claimed on grounds of seniority alone. The same rule will apply in the case of promotions to new appointments transferred from the Senior Division.

6. The Subordinate Service will remain as regards appointments, grades, pay, and recruitment in every respect on the same footing as at present.

7. The effect of the re-organization above prescribed will, when these new arrangements are complete, be as follows:—

	Present.			Future.	
	No. of appointments.	Monthly cost.		No. of appointments.	Monthly cost.
		R			R
Administrative . .	2	5,200	Imperial Service . .	40	38,950
Senior Division . .	48	41,550	Provincial Service . .	142	41,676
Junior " . .	132	35,977			
Total .	182	82,727	Total .	182	80,626

8. The Surveyor General is authorized to bring the re-organization into force at once. The existing members of the Department who have been recruited in India and are now serving in the Senior Division will retain their places in that Division. Their salary and promotion will be regulated by the conditions under which they have hitherto served in the Department, without reference to the fact that they were not recruited in England.

Order.—Ordered that a copy of the foregoing Resolution be published in the *Gazette of India* and a copy forwarded to the Surveyor General of India for information and guidance: also that a copy be forwarded to the Finance Department for information and the issue of such further orders as may be necessary.

DENZIL IBBETSON,

Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

FINANCE AND COMMERCE DEPARTMENT.

ACCOUNTS AND FINANCE.

Stores.

No. 1426 S. R., dated Calcutta, the 25th March 1895.

RESOLUTION—By the Government of India, Finance and Commerce Department.

READ again the following papers on the subject of supply of Indian-manufactured stores :—

(1) Resolution by the Government of India in the Finance and Commerce Department, No. 185, dated 10th January 1883, consolidating the then existing rules regarding the procedure to be employed in obtaining for the public service supplies of stores of other than Indian origin or manufacture.

(2) Resolution by the Government of India in the Finance and Commerce Department, No. 2650, dated 25th June 1891.

(3) Resolution by the Government of India in the Public Works Department, No. 226 M., dated 14th June 1892.

In the first of the Resolutions cited above, the rules on the subject of the supply of articles of European manufacture required for the public service in India and the preparation of annual returns of expenditure on stores and their transmission to Her Majesty's Secretary of State for India were published in a consolidated form and applied to stores required for Imperial and Provincial services and Incorporated Local Funds, but not to those required for Excluded Local Funds. In these rules it was laid down that all articles required for the public service which cannot be manufactured in India are, as an almost invariable rule, to be obtained on indent through the Secretary of State.

2. In the Resolution No. 2650, dated 25th June 1891, cited above, the Government of India, after due consideration of the representations made from time to time by the leading engineering and other firms in India with reference to the prohibitions against obtaining stores in India, relaxed the rules as a tentative measure. With a view to the encouragement of local industries and the development of technical education, and in the hope of effecting ecomony in the public administration both by actual saving in the cost of articles purchased locally and by avoiding the delays that are sometimes inevitable when the articles have to be procured by indent on England, they authorized, in certain cases, the local purchase of the less important manufactured articles of iron and steel made up in India from imported materials and ordinarily required for Public Works other than Railways. This relaxation of the then existing rules referred only to articles the certain want of which could not be anticipated, and the delay in the supply of which might involve loss. The following conditions were pointed out as necessary ones :—

(*a*) that the articles locally supplied were not imported into India in a finished or partly finished state ;

(*b*) that the price was not in excess of that at which similar articles could be obtained on indent through the Secretary of State ; and

(*c*) that the quality was not inferior to that of English supplies.

In the same Resolution it was mentioned that only firms of recognised standing and whose shops were fitted with the necessary plant would be considered eligible to tender for the supply of the class of articles which it was decided to obtain locally, and Local Governments were requested to furnish lists of those firms within their jurisdiction which they considered should be entitled to the privilege of tendering, together with lists of the principal machines in the shops of each firm and the means possessed for testing both the raw material and the finished product. The Resolution also proceeded to lay down certain checks which were considered essential to insure that the articles were manufactured in India from the raw material, that the relative prices of English and Indian

supplies were properly compared and ascertained, and that the raw material employed and, when necessary, the finished product were properly tested.

These orders were duly approved and confirmed by Her Majesty's Secretary of State for India.

3. In Resolution No. 226 M., dated the 14th June 1892, the conditions as regards the tests to be applied to the raw material and, when necessary, to the finished product which were previously mentioned were re-stated. Attention was at the same time drawn to the reasons already stated, which induced Government to relax, as a tentative measure, the rules previously in force, and to this Resolution was appended a list of the firms recommended by the various Local Governments as eligible to tender for the local supply of the class of articles previously mentioned, and specifications showing the conditions as regards test and manufacture that are prescribed by the Director General of Stores, India Office, in the case of iron and steel work procured from England for use in India.

4. The manufacture in India of articles of the kind alluded to has, it is believed, extended since the date of the orders above quoted, and it is understood that several of the principal engineering firms in India now possess the apparatus necessary for the proper testing both of the raw material and of the finished product. It is possible that indenting officers are not aware of the full extent to which the orders permit them to supply themselves from Indian sources, or the extent to which the capacities of Indian engineering firms have been developed ; and the Governor General in Council, continuing to realize the advantages, *cæteris paribus*, of obtaining supplies in India, desires again to draw the attention of Local Governments and Administrations to the subject. It is understood that the engineering firms in question are willing to give all necessary information to indenting departments and to Local Governments as to the classes of articles which they are prepared to supply under existing rules and under due guarantee as regards the application of sufficient tests as to quality of material and workmanship ; and the Government of India are desirous that the fullest use should be made, subject to the prescribed precautions, of the liberty which the Resolutions give to procure supplies in India.

5. The Local Governments are requested also to bring to the notice of the Government of India the names of any other firms which they consider to be qualified, both from their position as engineering firms of recognised standing and also from their possessing the necessary testing plant, to be entitled to tender for the supply of articles procurable locally under the existing rules. Such recommendations of the Local Governments will be duly considered by the Government of India with a view to the names of the firms in question being added to the list appended to Public Works Department Resolution No. 226 M., dated 16th June 1892.

Moreover, should Local Governments and Administrations find that the progress of manufacture in India has now rendered it possible to add new articles to the list appended to the Resolution by Government of India in Finance and Commerce Department, No. 2650, dated 25th June 1891, they are requested to favour the Government of India with an expression of their opinions on the subject with a view to the necessary additions being made to the list.

The Governments of Madras, Bombay, Bengal, the North-Western Provinces and Oudh, and the Punjab.
The Chief Commissioners of the Central Provinces, Burma, Assam, Mysore, and Coorg.
The Resident at Hyderabad.
The Agents to the Governor General in Central India, Rajputana, and Baluchistan.

ORDER.—Ordered, that this Resolution be communicated to the Local Governments and Administrations noted on the margin, for information and guidance.

Ordered also, that a copy be forwarded to the Military and Public Works Departments, and that it be published in the Supplement to the *Gazette of India*.

STEPHEN JACOB,

Offg. Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the week ending at 8 a. m. on Saturday, March 16th, 1895.

General Summary.—During the week under review pressure has been unsteady and the diurnal changes of the barometer have frequently been considerable—more particularly over Northern India. During the earlier part of the week the barometer, relatively to other parts of India, was high in the North-West, but on the 13th pressure gave way rapidly in Baluchistan, and a deepish depression appeared over the West and Central Punjab. This abnormal distribution lasted till the close of the week. As an accompaniment of this abnormal condition of pressure moderate rainfall occurred in the North Punjab and Kashmir and this rainfall subsequently extended to North-East India also. Snow storms were reported from Srinagar and Astor in Kashmir and from Gnatong. Over Southern and Central India fine and generally clear weather has prevailed with gentle winds in most places.

Temperature changes have been somewhat irregular during the week. The week opened with a general slight deficiency, except in the Peninsula, but by the 12th this deficiency was changed into an excess, except in Bengal and the North-Western Provinces. This general excess lasted until the 14th, when a depression of temperature commenced in the Punjab and extended quickly over a large part of India by the 16th. The excessive temperatures which prevailed during the middle of the week, and which were a continuation of the high temperatures which have prevailed for some time past in North Western and Central India, was apparently due to the very abnormal pressure conditions reported in North-Western India, and hence the unsettled weather was merely an exaggerated form of hot-weather disturbance. The rainfall which accompanied the disturbance produced a temporary reduction of temperature, but by the close of the week this effect was rapidly disappearing.

Daily Summary.—*Sunday.*—Pressure had changed irregularly and was below the normal average over the whole of India, the abnormal deficiency exceeding 0·10 inch in parts of North-West and of North-East India. Conditions were unsettled. Temperature had fallen briskly over a large part of North-West and Central India and the mean was between 1° and 3° below the normal in these districts. There was, however, some excess in Bengal and Madras. The maximum day temperature recorded during the preceding 24 hours was 100°2 at Cuddapah.

Numerous duststorms and thundershowers were reported from North-West and Central India, the amounts received in several cases being considerable.

Monday.—Pressure changes were again irregular, but in the north-west the barometer had risen and the slight depression of the barometer previously existing there had disappeared. The barometer was relatively high over the western desert, and part of Central India, relatively low in South-West India and in Assam, but the pressure differences were everywhere small, though in those two areas the barometer read considerably below the normal. The winds were light and irregular. Temperature had fallen over North-West and Central India, and was more or less in defect over the whole of that region. This defect was mainly due to a very large reduction in the day temperatures. Thunderstorms had continued in the Punjab and had extended to the central parts of India. The amounts of hail and rain received were, however, less than on the previous day and were generally small.

Tuesday.—Pressure was about normal in North-West India, but in considerable defect in North-East India and Burma. The area of disturbed conditions and of thunderstorms had been transferred eastward to Assam and North and East Bengal. Showers of rain continued to be received in Kashmir. A recovery of temperature had commenced in North-West and Central India, while on the contrary a brisk fall had occurred in the North-Western Provinces and Bengal. The mean temperature of Northern and Central India was below the normal, the greatest defect being in the North-Western Provinces. Hence the area of greatest deficiency of temperature was advancing eastward. The highest day temperatures were again registered in Central Madras. Bellary reported a reading of 101°. The rainfall was moderate in Assam, light in Bengal. Snow was reported from Gnatong.

Wednesday.—Pressure had decreased briskly in part of North-West India, but elsewhere the changes were small. Readings were relatively low in North-West and North-East India. The rise of temperature noticed in the North-West on the preceding day had continued. The mean temperature very generally exceeded the normal—more especially in the North-West. Light showers were reported from a few places in North-West and North-East India.

Thursday.—Pressure had given way with exceptional rapidity over the whole country, and in the west of the Punjab the fall amounted to as much as 0·22 inch. Conditions were hence unsettled in North-West India and the pressure distribution abnormal. Temperature had continued to rise and was in excess of the normal practically everywhere—more particularly in the north-west. The hottest district was again the central parts of Madras, where the following day temperatures were recorded:—Raichur 106°·5, Cuddapah 103°·2, and Bellary 102°·6. Rain had recommenced in North-West India, where moderate amounts had been received. Snow was falling in the Kashmir Valley.

Friday.—The abnormal distribution of pressure which prevailed on Thursday continued. A deepish depression overlay the west and centre of the Punjab and the barometer throughout the whole country read below the normal average. Unusually strong winds had prevailed in the north-west and thunderstorms had given rain to the North and West Punjab and the Upper India hill districts. Snow was again reported from Kashmir. With the occurrence of rain temperature had fallen in the extreme north-west, but the mean temperature of the previous 24 hours had, except in the case of the Punjab, Sind and Rajputana, been as generally excessive as on the previous day.

Saturday.—The barometer had risen rapidly in the north-west and the depression had almost filled up. Pressure was lowest in North Bengal. Conditions had improved in North-West India and except in the hills the showers had ceased. In Assam showers had, however, commenced. The mean temperature was in excess in Burma, Bengal and the central parts of the country, but in defect elsewhere. Central Madras and the Deccan reported the highest day temperatures.

Temperature.—The following table gives the variations from the normal temperature of the different Provinces of India for each day of the week :—

Province.	March 1895.							Mean variation of week.
	10th.	11th.	12th.	13th.	14th.	15th.	16th.	
	°	°	°	°	°	°	°	°
Burma	−1·1	+0·1	+0·8	−0·4	+0·1	+0·5	+1·3	+0·2
Bengal and Assnm . .	+1·9	+0·8	−1·4	−1·0	−0·3	+1·2	+3·3	+0·6
North-Western Provinces and Oudh	+0·2	−2·6	−3·8	−2·3	+1·0	+3·4	+2·8	−0·2
Punjab	−0.6	−5·5	−2·1	+1·5	+3·1	+1·1	−2·0	−0·6
Bombay	+1·2	+0·3	+1·0	+2·1	+2·1	+2·3	+1·0	+1·4
Central Provinces and Berar	−1·1	−3·0	−2·9	−2·6	−1·3	+0·9	+2·9	−1·0
Central India and Gujarat .	−2·9	−2·8	−2·6	−1·5	+1·2	+1·7	−1·1	−1·1
Sind and Rajputana . .	−1·9	−4·7	−3·4	−1·2	+2·5	+1·0	−3·5	−1·6
Madras	+0·6	+0·4	+0·7	+0·7	+0·9	+1·4	+0·7	+0·7
Mean for whole of India	−0·4	−1·9	−1·5	−0·5	+1·0	+1·5	+0·6	−0·2

During the first four days of the week the variation showed a general deficiency of temperature, but from the 14th onward the mean temperature of the whole country was in excess of the normal. The variations thus balanced each other, and the general variation for the whole country for the week was only—0°·2. The largest temperature changes were experienced in the Punjab where on the 11th there was an abnormal deficiency of 5°·5 and on the 14th an excess of 3°·1.

Central Madras and the Deccan have been the hottest part of the country, and here the day temperatures have varied between 100° and 106°.

Rainfall.—In Burma and the Indian Peninsula there has been practically no rain during the week under review, and in the central parts of India and in parts of Bengal there has been very little; but elsewhere the rainfall has been general, and in the extreme north-west and extreme north-east moderately heavy. Thus the average rainfall for the week in the Assam Valley amounted to 1·06 inch, in the Surma Valley to 0·91 inch; in the north-west of the Punjab to 0·69 inch, and in the hill districts of the Punjab to 0·51 inch. Compared with the normal, however, the region where the rainfall was most generally in excess, was the North-Western Provinces, where every division except the submontane (*b*) had more rain than usual. In addition to the North-West Provinces, slightly heavier rain than usual was received in Assam (Brahamaputra), the Punjab (North-West and West), Khandeish, the Central Provinces (West and Central), Sind, and Central India.

For the period, March 3rd to 16th, the most marked features in the distribution of rainfall are the total absence of showers in Madras, and the large excess of rain in the central parts of the country and in parts of Upper India.

At Peshawar the total rainfall of the week was as much as 6·00 inches.

Province.	Division.	Rainfall data for week ending 16th March, 1895.			Rainfall data from 3rd March to 16th March, 1895.		
		Average actual rainfall of Division.	Average normal rainfall of Division.	Excess or defect in inches.	Average actual rainfall of season to date.	Average normal rainfall, 3rd March to 16th March.	Excess or defect of (seasonal) rainfall expressed as a per-centage.

W. L. DALLAS,
Asst. Meteorological Reporter to the Government of India.

SIMLA, *the 21st March, 1895.*

DENZIL IBBETSON,
Offg. Secretary to the Government of India.

C

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 23rd March.*—No rain except scattered showers at some stations in the Circars and Malabar. The past drought continues to be much felt in the Southern districts. Water-supply generally short. Standing crops fair but withered or withering in parts, except in the Circars. Harvest continues with generally fair outturn. Pasture scarce, but fodder generally sufficient. Prices of some dry grains rising in four districts but generally stationary elsewhere. No apprehension of distress anywhere.

Bombay.—*For week ending 27th March.*—Slight rain in parts of Karachi, Sholapur, Bijapur, and Dharwar. Standing crops damaged by frost in parts of Shikarpur. Reaping of late crops continues in parts of fourteen districts and preparations for next season's crops in parts of eight. Cotton-picking in progress in parts of Gujarat and the Karnatac. Fodder-supply sufficient, and agricultural stock in good condition. Prices normal except in parts of Ahmednagar and Sholapur.

Bengal.—*For week ending 25th March.*—There was rain over all the districts of Central Bengal during the week, and in Dacca, Dinajpur, Gaya and Purnea; elsewhere there was little or none. The rain has been beneficial to the spring sowings of rice which are doing well. But in Northern Bengal more rain is required for the jute sowings, and in Chittagong the standing crops are said to be withering from drought. The spring harvest is in progress, and the yield is generally reported good. The collection of opium is approaching completion, and a fair outturn is expected. Cattle in good condition except in parts of Rangpur and Dacca. In Hazaribagh the fodder-supply is said to be scanty. The price of common rice continues generally steady and normal.

North-Western Provinces and Oudh.—*For week ending 27th March.*—Weather generally seasonable. Showers have fallen in places, in some accompanied by hail. Reports received of damage to crops in part of Cawnpore district and of severe damage to poppy in Farakhabad. Harvesting of the spring crops and collection of opium in progress. Prospects favourable although outturn will be smaller. Sugarcane-pressing and sowing going on. Supplies sufficient but fodder said to be scarce in parts of Rae Bareli and Cawnpore and in Sitapur. Prices fairly steady and slightly below normal in several districts.

Punjab.—*For week ending 27th March.*—Rain fell at Lahore only. Extra spring crop is being sown in Sialkot and Lahore and land prepared for autumn crops. Spring crops are ripening and their condition is good to average. Recent rain has improved the standing crops. Field rats have damaged the crops in part of the Lahore district. Cattle are generally in good condition. Fodder sufficient in all districts. Prices normal at Umballa, below normal at Sialkot, falling at Shahpur, and low elsewhere.
