## I

G.O., Mis. No. 273, Educational, dated 8th May 1907.

Read—the following papers:—

G.O., No. 175, Educational, dated 12th March 1904.

„ „ 583 „ „ 20th September „

Letter—from the Hon'ble Mr. T. T. LOGAN, B.A., Acting Director of Public Instruction.

To—the Secretary to Government, Educational Department.

Dated—the 23rd April 1907.

No.—Ref. on Cur. No. 5237 of 1902.

With reference to G.O., No. 583, Educational, dated 20th September 1904, sanctioning under certain conditions a grant of Rs. 10,000 in aid of the building constructed for St. Ebba's Girls' School at the Sullivan's gardens, I have the honour to state that the Manager has reported that, although it has been found by the Committee impossible to fulfil all the conditions required in the order quoted above, the ventilation in the dormitory has been greatly improved. I recommend that another inspection by the Sanitary Commissioner may be ordered in order to determine whether the whole or at any rate a portion of the grant may now be sanctioned in view of the very large expenditure incurred by the management on the building and of the efforts made by them to meet so far as seemed to them possible the requirements of Government.

2. The Manager reports that a latrine on a European model is not provided for the school servants; and begs that this may not be insisted on.

3. A copy of the Manager's letter of the 17th November 1906 and the plans and estimates received with the above quoted Government Order are submitted for reference. There has been some delay in dealing with the matter owing to correspondence relating to the return of the plans required for reference.

## ENCLOSURES.

Letter—from G. H. SMITH, Esq., Secretary, Madras Diocesan Committee and S.P.G. Sullivan's gardens, Madras.

To—the Director of Public Instruction.

Dated—the 17th November 1906.

No.—780.

With reference to your proceedings No. 5237 of 1902, dated 3rd May 1906, I have been directed by my Committee to point out that the ventilation in the dormitory of St. Ebba's school has been greatly improved and to inquire whether under the circumstances another inspection by the Sanitary Officer can be arranged for with a view to the sanction of the application for a building grant.

The Committee supposes that the Educational authorities will not insist upon a latrine on a European model being provided for the school servants; such a requirement being nowhere laid down in the Educational rules.

## Note by the Chief Engineer.

The estimates for improvements to St. Ebba's Girls' school, Madras, are returned duly scrutinized with the following remarks:—

- (1) *Servants' latrine.*—The roofing over the sweepers' passage is not necessary.
- (2) *Pupils' latrine.*—The roofing over the sweepers' passage is not necessary.

The section of the rafters should be increased from 2" x 4" to 2" x 5".

Type design No. 93 of the Sanitary Board for a latrine is recommended for adoption by the Committee, if, as is presumed, the latrine is for native girls.

Order—Mis. No. 273, Educational, dated 8th May 1907.

The Director's letter with its enclosures will be forwarded to the Sanitary Commissioner with the request that he will be good enough to inspect the buildings of St. Ebba's girls' school and report as to the sufficiency of the ventilation of the dormitories attached to the school and the general sanitary condition of the premises.

(True Extract.)

H. D. TAYLOR,

*Aq. Secretary to Government.*

To the Sanitary Commissioner with copies of G.Os., No. 175, Educational, dated 12th March 1904, and No. 583, Educational, dated 20th September 1904.

## II

Letter—from Lieut.-Col. H. THOMSON, I.M.S., Sanitary Commissioner for Madras.

To—the Secretary to Government, Educational Department.

Dated—the 11th July 1907.

No.—1982-S.

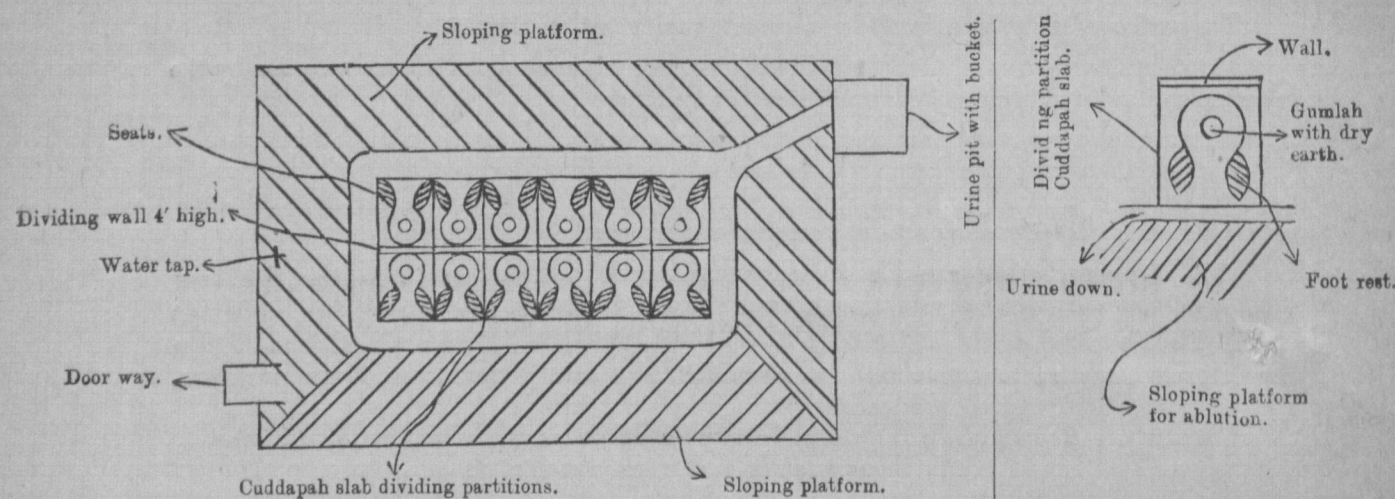

With reference to G.O., Mis. No. 273, Educational, dated 8th May 1907, I have the honour to inform you that I inspected St. Ebba's Girls' school on the forenoon of the 10th July 1907. The large dormitory was occupied by 34 persons on the previous night. The maximum floor space will accommodate 35. The ventilation in this room should be improved by the introduction of five fixed ventilators under the eaves on the wall adjoining the verandah. There are five doors in this wall but these are doubtless shut at night and consequently prevent free perfilation. In the small dormitory 26 persons occupied it on the previous night. The ventilation of this room is decidedly defective. The west wall but for the verandah door is without opening. North wall is blank but for the door leading to the staircase, both these doors are closed at night, the east wall has four windows and four ventilators, the south wall has one window. Perfilation in this room is very limited and I agree with Colonel King in fixing ten persons as a maximum number for sleeping accommodation in this room. It will be difficult to improve ventilation in this room as the west wall is the dividing wall between the two dormitories. I would advise two ventilators being opened under the eaves of the south wall and one over the verandah door and two in the north wall.

2. The overcrowding of these rooms should be avoided. This can only be done by providing increased accommodation. The Secretary who accompanied me in my inspection said that it was proposed to build a large dormitory on the roof of the building. I think this proposal should be given effect to at once as there is no doubt more accommodation is required. The two bath-rooms are very primitive. They should be provided with fixed wash hand basins and two water taps should be provided in each of the bath-rooms; each cubicle in the bath-room should have a wooden or zinc tub; no vessels are provided and the cubicles are seemingly seldom used. The drain from the bath-room is led through the compound wall to empty into an adjoining field.

3. There is no accommodation provided for the treatment of the sick. This is necessary and should be provided in a building apart from the school. There is ample space within the school compound for a site.

4. The boarders' and servants' latrines are designed on a very bad pattern. The inside arrangement requires remodelling. This could be done at a very little expense. Seats should be provided with separating partitions to admit of a certain amount of privacy. The accompanying sketch will illustrate what is intended and should be given effect to at once.

Latrine for 12 seats—a shallow tarred gumlah containing dry earth to be placed in each seat. The store of dry earth should be kept under shelter; the washing platforms to slope so that the spill water will collect in the urine drain; the urine drain to empty in a bucket in the urine pit outside the latrine; an air-tight iron receptacle should be kept near the latrine for the collection of night-soil pending removal by the Municipal totty; a water tap should be placed in the latrine; the servants' latrine should also be modelled after this plan.

**Order—No. 512, Educational, dated 7th August 1907.**

A copy of the Sanitary Commissioner's letter will be communicated to the Madras Diocesan Committee of the S.P.G.

2. No grant will be paid until effect has been given to the Sanitary Commissioner's suggestions and until adequate provision has been made to secure compliance with the orders of Government in regard to overcrowding in the dormitories.

3. Before the payment of the grant in whole or in part is sanctioned, accounts of the actual disbursements of the Committee on the improvements for which the aid is intended must be submitted to the Director of Public Instruction.

(True Extract.)

H. D. TAYLOR,  
Ag. Secretary to Government.

To the Director of Public Instruction.

EDUCATIONAL DEPARTMENT.

NOTES CONNECTED WITH G.O., No. 512, EDUCATIONAL,  
DATED 7TH AUGUST 1907.

[SUBJECT.—*Report of the Sanitary Commissioner on his inspection of the buildings of St. Ebba's Girls' school, Royapettah.*]

*From the Director of Public Instruction, dated 23rd April 1907, No. 5237.*

In G.O., No. 583, Educational, dated 20th September 1904, a total grant of Rs. 10,000 in aid of the building constructed for St. Ebba's Girls' school was sanctioned on the following conditions:—

- (1) that certain improvements to the buildings were carried;
- (2) that a separate detached building was provided for a sick room;
- (3) that the number of inmates in the dormitories was limited to fifty; and
- (4) that the necessary deed was executed.

2. The Director of Public Instruction now reports that the Diocesan Committee of the Society for the Propagation of Gospel has found it impossible to fulfil all the conditions required, but that the ventilation of the dormitories has been greatly improved. The Director recommends that another inspection of the buildings by the Sanitary Commissioner may be ordered in order to determine whether the whole or at any rate a portion of the grant sanctioned may now be paid.

3. A draft order requesting the Sanitary Commissioner to inspect the buildings and report upon their sanitary conditions and the ventilation of the dormitories is placed below for approval.

*To the Educational Department.*

## EDUCATIONAL DEPARTMENT.

In G.O., No. 273, Educational, dated 8th May 1907, the Sanitary Commissioner was requested to inspect the buildings occupied by St. Ebba's Girls' school at the Sullivan's Gardens, Royapettah, and to report as to the sufficiency of the ventilation of the dormitories attached to the school and the general sanitary condition of the premises in order to determine whether the whole or any portion of the grant of Rs. 10,000 promised in G.O., No. 583, Educational, dated 20th September 1904, might be sanctioned. The Sanitary Commissioner (Lieut.-Col. Thomson) inspected the buildings on the 10th instant and his remarks will be found in his letter No. 1982-S., dated 11th July 1907. These remarks will be dealt with later on.

G.O., No. 583, Educational, dated 20th September 1904. 2. The grant of Rs. 10,000 promised by Government was payable on the following conditions:—

- (1) that certain improvements to the buildings should be carried out;
- (2) that a separate detached building should be provided for a sick room;
- (3) that the number of inmates in the dormitories should be limited to fifty; and
- (4) that the necessary deed should be executed.

3. As regards the first condition, viz., that certain improvements to the buildings should be carried out so as to provide proper accommodation and ventilation, the manager of the school reports that, although it has been found by the Committee impossible to fulfil all the conditions required by Government, the ventilation in the dormitory has been greatly improved.

4. The Sanitary Commissioner (Lieut.-Col. Thomson), however, now reports that the ventilation of the large dormitory should be improved by the introduction of five fixed ventilators under the eaves on the wall adjoining the verandah. The ventilation of the small dormitory is, he says, decidedly defective; and points out that, on the night previous to the date of his inspection, the larger dormitory, the maximum floor space of which could accommodate 35 persons, was occupied by 34 persons and the smaller one by 26 against 10 persons which is the maximum number that can sleep in it. (Y) Paragraph 8 of Col. King's letter on page 7 of G.O., No. 175, dated 12th March 1904. Lieut.-Col. Thomson thinks that arrangements should at once be made to build a large dormitory on the roof of the building which alone will help to avoid the overcrowding of the existing dormitories.

5. With regard to the second condition, namely, the provision of a separate detached building for the sick room, the Sanitary Commissioner reports—

“There is no accommodation provided for the treatment of the sick. This is necessary and should be provided in a building apart from the school. There is ample space within the school compound for a site.”

6. As to the third condition, viz., that the number of inmates in the two dormitories should be limited to fifty, it is observed from the Sanitary Commissioner's report that, on the night previous to the date of his inspection, the total number of persons that slept in the two dormitories together was 60—34 in the large and 26 in the small dormitory.

7. The Sanitary Commissioner further points out that boarders' and servants' latrines are designed on a very bad pattern. The inside arrangement requires remodelling, which, if made according to the sketch furnished by him, can be done at a very little expense.

8. The Committee of the St. Ebba's school, however, assume that the Educational authorities will not insist upon a latrine on a European model being provided for the school servants, such a requirement being nowhere laid down in the Educational rules. But the same argument will not apply to the boarders' latrine.

9. The Director of Public Instruction requests orders as to whether the whole or at any rate a portion of the grant of Paragraph 1 of his letter—page 1 of G.O., Rs. 10,000 may now be sanctioned in view of the very large expenditure incurred by the management on the buildings and of the efforts made by them to meet as far as seemed to them possible the requirements of Government.

P.R.—29-7-07.

It is not stated what expenditure was actually incurred by the Committee in improving the accommodation and the ventilation of the dormitories. Nor does it appear that any appreciable improvement has been effected in these directions. One of the main conditions, namely, that the number of inmates in the dormitories should be limited to fifty, has not been satisfied, as the Sanitary Commissioner found on inspection that on the previous night 60 persons were sleeping in the two dormitories. Unless, therefore, the Sanitary Commissioner's present recommendations have been substantially complied with, it does not appear that any grants can be sanctioned.

K. RANGASWAMI AIYANGAR—30-7-07.

C. A. SOUTER—31-7-07.

The worst feature of the report is the overcrowding in the smaller dormitory, 26 persons being allowed to occupy it whereas the space is available for 10 only. It is well within the power of the Committee to remedy this defect.

2. A copy of the Sanitary Commissioner's letter may be communicated to the Committee through the Director of Public Instruction with intimation that no grant can be paid until effect has been given to the Sanitary Commissioner's suggestions and until the orders of Government in regard to overcrowding are complied with.

H. D. TAYLOR—1-8-07.

Yes: and before either the grant in whole or in part is given, accounts of the actual disbursements of the Committee on the improvements for which the aid is intended must be submitted.

G. S. F[ORBES]—2-8-07.

Draft please.

H. D. TAYLOR—3-8-07.

A draft is placed below for approval.

From (Name) Lieut.-Colonel H. Thomson, I.M.S.,

(Designation) Sanitary Commissioner for Madras.

To the Secretary to the Government of Madras,  
Local and Municipal Department

Sir,

With reference to G.O., No. 273 Mis., dated 8th May 1907, I have the honour to inform you that I inspected St. Ebb's Girls' School on the forenoon of the 10th July 1907. The large dormitory was occupied by 34 persons on the previous night. The maximum floor space will accommodate 35. The ventilation in this room should be improved by the introduction of five fixed ventilators under the eaves on the wall adjoining the verandah. There are five doors in this wall but these are doubtless shut at night and consequently prevent free perflation. In the small dormitory 26 persons occupied it on the previous night. The ventilation of this room is decidedly defective. The West wall but for the verandah door is without opening. North wall is blank but for the door leading to the staircase

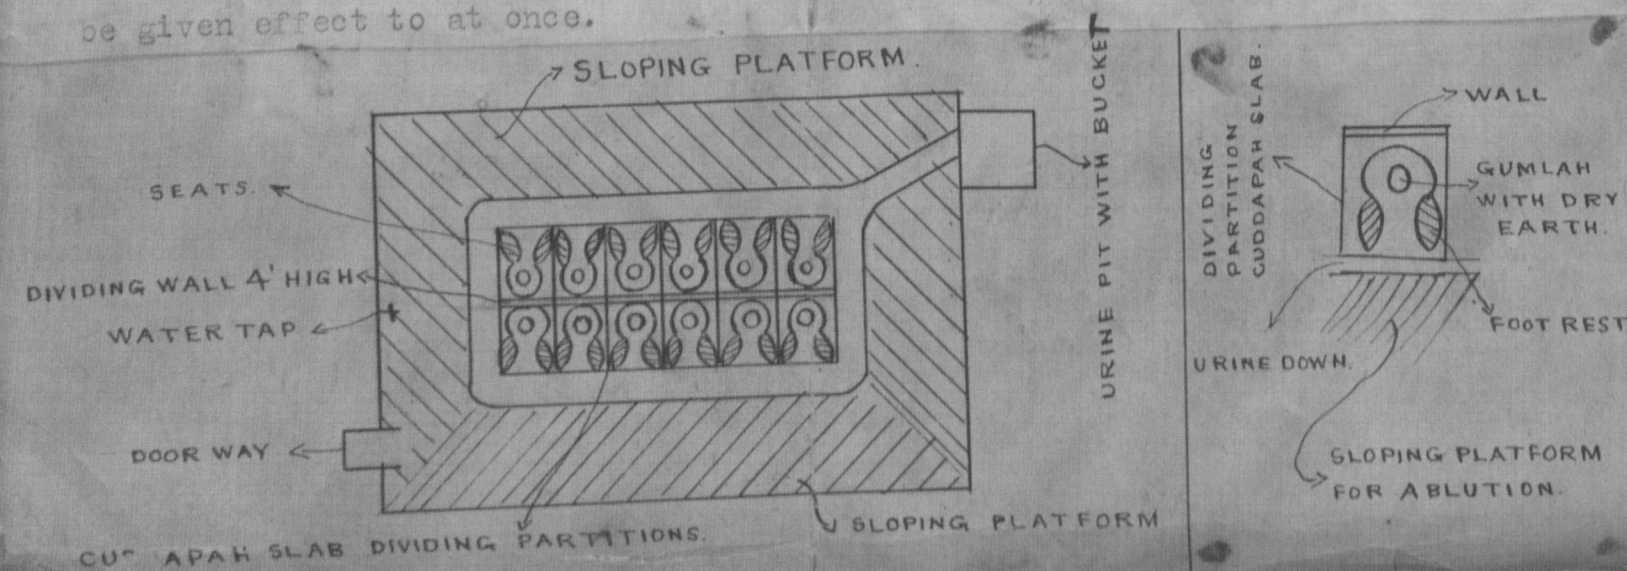

staircase, both these doors are closed at night - the East wall has 4 windows and 4 ventilators, the South wall has one window. Perflation in this room is very limited and I agree with Col. King in fixing 10 persons as a maximum number for sleeping accommodation in this room. It will be difficult to improve ventilation in this room as the West wall is the dividing wall between the two dormitories. I would advise two ventilators being opened under the eaves of the South wall and one over the verandah door and two in the North wall.

The overcrowding of these rooms should be avoided. This can only be done by providing increased accommodation. The Secretary who accompanied me in my inspection said that it was proposed to build a large dormitory on the roof of the building. I think this proposal should be given effect to at once as there is no doubt more accommodation is required. The two bath rooms are very primitive. They should be provided with fixed wash hand basins and two water taps should be provided in each of the bath rooms; each cubicle in the bath room should have a wooden or zinc tub; no vessels are provided and the cubicles are seemingly seldom used. The drain from the bath room is led through the compound wall to empty into an adjoining field.

There is no accommodation provided for the treatment of the sick. This is necessary and should be provided in a building apart from the school. There is ample space within the school compound for a site.

The boarders' and servants' latrines are designed on a very bad pattern. The inside arrangement requires re-modelling. This could be done at a very little expense. Seats should be provided with separating partitions to admit of a certain amount of privacy. The accompanying sketch will illustrate what is intended and should be given effect to at once.

33 9 1 38

Latrine for 12 seats - a shallow tarred gumlah containing dry earth to be placed in each seat. The store of dry earth should be kept under shelter - the washing platforms to slope so that the spill water will collect in the urine drain - the urine drain to empty in a bucket in the urine pit outside the latrine - an air tight iron receptacle should be kept near the latrine for the collection of nightsoil pending removal by the Municipal totty - a water tap should be placed in the latrine - the servants' latrine should also be modelled after this plan.

I have the honour to be,

Sir,

Your most obedient servant,

*N. P. Thomson*

Lieut.-Col., I.M.S.,

Sanitary Commissioner for Madras.

U. In G.O. No. 273, Educational, dated 8th May 1907, the Sanitary Commissioner was requested to inspect the buildings occupied by St. Ebba's Girls' School at the Sullivan's Gardens, Royapettah, and to report as to the sufficiency of the ventilation of the dormitories attached to the school and the general

5 12 9 28

general sanitary condition of the premises in order to determine whether the whole or any portion of the grant of Rs.10,000 promised in G.O. No.583, Edl., dated 20th September 1904, might be <sup>Sanctioned</sup> ~~granted~~. The Sanitary Commissioner, <sup>(Lt Col. Thomson)</sup> inspected the buildings on the 10th instant and his remarks will be found on pages 1 to 3 of current file. These remarks will be dealt with later on.

2. The grant of Rs.10,000 promised by Government was payable on the following conditions:--

- (1) That certain improvements to the buildings should be carried out;
- (2) that a separate detached building should be provided for a sick room;
- (3) that the number of inmates in the dormitories should be limited to fifty; and
- (4) that the necessary deed should be executed.

3. As regards the first condition, viz., that certain improvements to the buildings should be carried out so as to provide proper accommodation and ventilation, the Manager of the School reports that although it has been found by the Committee impossible to fulfil all the conditions required by Government the ventilation in the dormitory has been greatly improved.

4. The Sanitary Commissioner (Lieut.-Col. Thomson), however, now reports that the ventilation of the large dormitory should be improved by the introduction of five fixed ventilators under the eaves on the wall adjoining the verandah. The ventilation of the small dormitory is, he says, decidedly defective; and points out that on the night previous to the date of his inspection, the

larger dormitory, the maximum floor space of which could accommodate 35 persons, was occupied by 34 persons and the smaller one by 26 against 10 persons which is the maximum number that can sleep in ~~it~~. ~~smaller dormitory~~ Lieut-Col. Thomson thinks that arrangements should at once be made to build a large dormitory on the roof of the building which alone will help to avoid the overcrowding of the existing dormitories.

5. With regard to the second condition, namely, the provision of a separate detached building for the sick room, the Sanitary Commissioner reports:--

"There is no accommodation provided for the treatment of the sick. This is necessary and should be provided in a building apart from the school. There is ample space within the school compound for a site".

6. As to the third condition, viz., that the number of inmates in the two dormitories should be limited to fifty, it is observed from the Sanitary Commissioner's report that on the night previous to the date of his inspection, the total number of persons that slept in the two dormitories together was 60, 34 in the large and 26 in the small dormitory.

7. The Sanitary Commissioner further points out that boarders' and servants' latrines are designed on a very bad pattern. The inside arrangement requires remodelling, which, if made according to the sketch furnished by him, can be done at a very little expense.

8. The Committee of the St. Ebba's School, however, assume, that the educational authorities will

Para: of his letter -  
Page 1 of 4 No. 273 U.  
8.5.07

not insist upon a latrine on a European model being provided for the school servants, such a requirement being nowhere laid down in the Educational Rules. But the same argument will not apply to the boarders' latrine.

9. The D.P.I. requests orders as to whether the whole or at any rate a portion of the grant of Rs.10,000 may now be sanctioned in view of the very large expenditure incurred by the management on the buildings and of the efforts made by them to meet - as far as seemed to them possible - the requirements of Government.

P.R.  
29-7-07.

It is not stated what expenditure was actually incurred by the Committee in improving the accommodation and the ventilation of the dormitories. Nor does it appear that any appreciable improvement has been effected in these directions. One of the main conditions, namely, that the number of inmates in the dormitories should be limited to fifty has not been satisfied, as the Sanitary Commissioner found on inspection that on the previous night 60 persons were sleeping in the two dormitories. Unless therefore, the Sanitary Commissioner's present recommendations have been substantially complied with, it does not appear that any grants can be sanctioned.

The worst feature of the report is the overcrowding  
in the smaller dormitory, 26 persons being  
allowed to occupy it whereas the space is  
available for 10 only. It is well within the  
power of the Committee to remedy this  
defect.

A copy of the S.C.'s letter has been  
communicated to the Committee through  
the D.P.O. with intimation that no grant  
can be paid until effect has been given  
to the S.C.'s suggestions and until  
the rooms of food are used to  
overcrowding are complied with
