GOVERNMENT OF MADRAS.

EDUCATIONAL DEPARTMENT.

READ—the following paper :—

Letter—from the Hon'ble Mr. T. T. LOGAN, B.A., Acting Director of Public Instruction.

To—the Secretary to Government, Educational Department.

Dated—Madras, the 2nd August 1907.

No.—Cur. 5593.

I have the honour to submit a copy of my Proceedings, Dis. No. 4729, dated 29th July 1907, reviewing the report on the working of the Madras Medical College for 1906-1907.

ENCLOSURE.

Proceedings of the Director of Public Instruction, dated 29th July 1907, Dis. No. 4729.

Read—the following papers :—

Letter—from Lieut.-Col. W. B. BROWNING, C.I.E., I.M.S., Principal, Medical College.

To—the Director of Public Instruction.

Dated—the 31st May 1907.

No.—91.

I have the honour to submit the annual report on the working of the Medical College during session 1906-1907.

ENCLOSURE.

ANNUAL REPORT OF THE MADRAS MEDICAL COLLEGE, SESSION 1906-1907.

The seventy-second session of the college began on the 2nd July 1906 and ended on the 30th March 1907.

2. Changes among the Staff.—Major F. J. Crawford, M.D., I.M.S., officiated as Principal from 11th May to 22nd December 1906 during the absence of Lieutenant-Colonel W. B. Browning, C.I.E., I.M.S., on furlough. Captain H. Kirkpatrick, M.B., I.M.S., officiated as Professor of Anatomy and Captain W. H. Tucker, I.M.S., as Professor of Pathology. Major G. G. Giffard, I.M.S., was appointed Professor of Midwifery and Major P. C. Gabbett, I.M.S., Professor of Surgery.

Among the Assistant Professorial staff, the following changes occurred :—

Captain F. A. Wynne, I.S.M.D., after seven years' excellent service in the college, retired on pension and was succeeded by Lieutenant G. R. Allan, I.S.M.D.

Senior-grade Hospital Assistant N. Ramasawmy Naidu, who was connected with the college for twelve years, retired on a well-earned pension.

Civil Assistant Surgeon C. B. Rama Rao went to England on furlough, Civil Assistant Surgeon Muhammad Azizullah Sahib being appointed to act for him.

3. Strength of the College.—There were 327 students on the rolls during the year as against 359 in the previous year—a decrease of 32. This number included 39 Sanitary Inspector students who joined in July and 13 Hospital Assistants who were sent for post-collegiate training under G.O., No. 80, Public, dated 3rd February 1905. Nineteen casualties occurred in all departments of the college, thus leaving 308 students who completed their curricula.

The following statement shows the number of new entries in each department of the college during the past quinquennium :—

Department.	1902-1903.	1903-1904.	1904-1905.	1905-1906.	1906-1907.	Increase or decrease as compared with previous year.
College { M.B.	32	33	48	37	42	+ 5
{ L.M.S.	2	9	18	18	18	..
Apothecary	50	21	14	13	11	- 2
Chemist and Druggist	2	..	3	6	..	- 6
Sanitary Inspectors' Class	99	45	51	54	39	- 15
Hospital Assistants undergoing post-collegiate training.	..	..	..	15	13	- 2

The 327 students were distributed as follows :—

Department.	Designation of students.	Number.
College	M.B. & C.M. (females 4)	103
	L.M. & S. (females 3)	69
	Casual (females 2)	34
		206
Apothecary	Military pupils	35
	Colonial apprentices	8
	Female students	22
	Private pupils	1
		66
Chemist and Druggist Department		3
Sanitary Inspectors' Class		39
Hospital Assistants undergoing post-collegiate training		13
		—
Total		327

4. College Department.—As shown in paragraph 3, there were 206 students attending college in this department against 201 in the preceding year, or an increase of 5.

The following statement shows the distribution of these students according to the year of study :—

	First year.	Second year.	Third year.	Fourth year.	Fifth year.	Total.
M.B. & C.M.	(a) 42	(a) 18	23	(a) 11	(a) 9	103
L.M. & S.	(a) 18	(a) and (b) 23	(a) 16	12	..	69
Casual	9	(a) 21	2	(a) 2	..	34
Total	69	62	41	25	9	206

(a) Includes one female.

(b) Includes fourteen from first M.B. class of last year.

The results of the University examination for 1907 are shown in Appendix D.

The percentage of passes for all examinations was 65.6 as compared with 58.5 in the previous year.

The results in the final M.B. & C.M. and L.M. & S. examinations are much better this year than in the previous two years.

1904-1905	39.5
1905-1906	46
1906-1907	60

The figures represent the percentage of passes.

The following table shows the percentage of failures in each subject for the final examinations for the past five years, from which it will be seen that excepting the year under review, the subject causing most failures was Surgery.

The chief cause for rejection this year was Midwifery.

Subjects.	1903.	1904.	1905.	1906.	1907.
Medicine	50	25	17	77	61
Surgery	66	50	95	81	38
Midwifery	16	75	17	44	66
Ophthalmology	16	..	3	7	11

5. Apothecary Department.—There were 66 students in this department against 80 in the previous year, or a decrease of 14, chiefly owing to the smaller number of military pupils recruited.

The following statement gives the distribution of these students according to their year of study :—

Section of Apothecary department.	Year of study.				Total.
	First.	Second.	Third.	Fourth.	
Military pupils	6	7	8	14	35
Colonial apprentices	1	1	5	1	8
Female students	5	2	6	9	22
Private pupils	..	..	..	1	1
Total	12	10	19	25	66

Of the twenty-five fourth-year students thirteen military, one colonial, six female and one private students were allowed to appear for the final examination and of these, thirteen passed. The private pupil shown above was originally a Military Assistant Surgeon student and was allowed to complete his course at his own expense. He subsequently joined the Assistant Surgeon Department. It has to be noted that under the new regulations the final examination of the Military Assistant Surgeon students should have been conducted from the Director-General's office, but as a special case and under instructions from the Director-General it was again conducted this year by the Board of Examiners.

6. Chemist and Druggist Department.—There were three students in this department, two in the first and one in the second year of study. Although the number of entries has been greater than in previous years since the lowering of the educational standard, the prospects of this department of the college do not appear to be very good. The final year of extension granted under G.O., No. 568, Educational, dated 20th November 1903, having expired, the question as to the continuance of this department came before the College Council who recommended a still further extension. The matter is still under reference.

7. Dental Surgery.—Thirty lectures have been delivered during the session and practical dentistry such as is to be seen in the Out-patient Department of the General Hospital has been available, each student getting about 12 days' tuition.

I have felt for some time that the original intention under which the Professor of Dental Surgery was appointed has been lost sight of and that a properly equipped Dental Laboratory and an increase in the staff is needed.

The original intention under which a Professor of Dental Surgery was appointed was to teach Dental Surgery to students who would ultimately become subordinate Medical officers of Government and who could thus be of use in the mufassal. Our upper subordinate service is now recruited entirely from students possessing University qualifications and these students do not attend the course of lectures on Dental Surgery. I am of opinion that unless the present lectures are supplemented by a more practical training, much of the time now devoted to Dental lectures could be better spent on other subjects.

The provisions of paragraph 1 of G.O., No. 509, Educational, dated 30th August 1888, have never been fully carried out either as regards teaching nor has the University established a qualification. I am not sure this latter is immediately required. A College diploma with a two years' training would possibly suffice for present needs and would form the nucleus of a proper Dental school.

We are badly in need of qualified dentists all over the Presidency. I also feel sure that the Military authorities would welcome any scheme which would give Military Assistant Surgeons a practical training, and there is a distinct wish being evinced by people to become dentists. I have been addressed several times on the subject as also has Mr. Badcock.

8. Hospital Assistants. Post-collegiate training of —. Under G.O., No. 80, Public, dated 3rd February 1905, 13 Hospital Assistants of over ten years' service were admitted into the college to undergo a course of post-collegiate training for six months. The subjects of instruction comprised Visceral Anatomy, Medical Jurisprudence and Post-mortems, Medicine, Aseptic Surgery, and Midwifery, and included attendance at the General, Ophthalmic and Maternity Hospitals.

9. Sanitary Inspectors' Class.—This class consisted of 39 students, 35 of whom appeared for the Government Technical examinations held in January 1907 and 19 passed in Hygiene, and 21 in Physiology.

10. Female Students.—Thirty-one female students attended during the session against 29 last year. The following table gives the details according to their year of study :—

Department.	Year of study.					Total.
	First.	Second.	Third.	Fourth.	Fifth.	
M.B. & C.M.	1	2	..	1	1	5
L.M. & S.	1	1	1	1	..	4
Apothecary	5	2	6	9	..	22
Total	7	5	7	11	1	31

Eight students of the College department proceeded to their University examinations in April and seven passed. Six Apothecary department students appeared for the final examination and five passed. As regards race 22 were Europeans or Eurasians, six were Native Christians and three were non-Brahman Hindus. Eighteen of the total number held scholarships, and 13 were private students not stipended.

11. Physical Training.—This was carried on as usual throughout the session and the college annual sports were held in February.

12. Library and Museum.—There are now 4,895 books in the library, 96 having been added during the year. The number of specimens in the Museum is 2,217 against 2,094 last year.

13. The necessity of providing a hostel with a resident Principal in connection with the college was referred to in my report last year. An intimation was received from the Director in his review thereon that the matter was under consideration. As no further communication has been received, I allude to the subject again in the present report.

14. The service books and the inventory of valuable stock have been verified up to the 31st March 1907.

W. B. BROWNING, C.I.E., Lieut.-Col., I.M.S.,
Principal, Medical College.

MADRAS,
22nd May 1907.

The figures above given are subject to the final adjustments that may hereafter be communicated by the Accountant-General.

Letter—from Surgeon-General W. R. BROWNE, M.D., V.H.S., C.I.E., I.M.S., Surgeon-General with the Government of Madras.

To—the Director of Public Instruction.

Dated—Ootacamund, the 26th June 1907.

No.—45-M./T.-125.

The report of the working of the College for the year calls for but little comment.

2. The total number of students attending the College showed a slight falling off but the chief decrease occurred in what may be called an extraneous class—that of the Sanitary Inspectors—where the huge figure of 99 new entrants of five years ago has gradually sunk to this year's 39. The entries for the M.B. and L.M. & S. sections continue to be steadily satisfactory while the next important section of the College—the Apothecary Department—must fluctuate in numbers according to the demands of the Military Department for Assistant Surgeons and this year only six Military pupils entered the College.

3. Taking the totals of the results of the seven University Examinations, an extremely satisfactory percentage of 65.6 per cent. of the 169 students sent up is recorded, and of the other examinations alluded to, a sufficiently good result is recorded.

4. New needs necessitating expenditure spring up in all educational institutions that are or attempt to be progressive in character and I must just allude to three of these—

(a) So long a time has elapsed since the need of reconstruction of the Physiological and Hygienic laboratories has been brought prominently to notice that this can hardly be called a new want of the College, but the passing years have only accentuated the necessity of attempting to make the College laboratories at all on a par with the elaborately built and fitted working laboratories of all the important centres of Medical education in Europe and America where little is thought of spending as many pounds as we do rupees in making efficient provision for laboratory work and instruction.

(b) The second need will also mean the expenditure of a considerable sum of money, that is, the provision of a hostel with a Resident Principal; and though I am glad to think that the students of the Madras Medical College have hitherto been conspicuous by the general good discipline that has pervaded their ranks yet the advantages of a hostel are so well recognised that I must record my concurrence in the desirability of the recommendation made by the Principal.

(c) The third want will not, it is hoped, necessitate a large outlay of money. I mean the improvements suggested in paragraph 7 of his report by the Principal for the teaching of Dental Surgery. I would suggest that the Professor of Dental Surgery be asked to submit a detailed report of what is required to enable modern dentistry to be practically taught at the Hospital and College and thus prevent the destruction of teeth (*i.e.*, extraction) that so often for want of teaching and of the means of preserving them takes the place of the latter.

5. Lastly I desire to record the favourable opinion I have formed of the work of the Principal and staff of the College throughout the year under report.

Proceedings, Dis. No. 4729 of 1907.

Recorded.

2. The results of the University and other examinations were very satisfactory.

3. The necessity for the establishment of a hostel in connection with the College with free residences for some of the members of the staff has been already brought to the notice of Government.

4. The Principal's attention is invited to the enquiry suggested in paragraph 4 (c) of the Surgeon-General's endorsement No. 45-M./T.-125, dated 26th June last. The financial aspect of the question needs also to be considered.

(A true Extract.)

T. T. LOGAN,
Ag. Director of Public Instruction.

From the Director of Public Instruction, dated 2nd August 1907, No. 5593.

Three points are noticed in the report—

(1) The construction of Physiological and Hygiene laboratories—paragraph 4 (a) of the Surgeon-General's remarks on page 9.

(2) The provision of a hostel, with a resident Principal—paragraph 13 of the Principal's report, page 5, and paragraph 4 (b) of the Surgeon-General's remarks on page 9.

(3) Improvements for the teaching of Dental Surgery—paragraph 7 of the Principal's report, page 4, and paragraph 4 (c) of the Surgeon-General's remarks on page 9.

(1) *Physiological and Hygiene Laboratories.*—The proposal to construct these laboratories at an estimated cost of Rs. 1,70,130 was approved in G.O., No. 236, Educational, dated 24th April 1907, to be carried out as and when funds are available. But the plans and estimates have not yet been sanctioned in the Public Works Department. The Public Works Department may perhaps be asked u.o. to state at what stage the matter is at present.

I was under the impression that these had been sanctioned some months ago.

H. D. TAYLOR.

C. A. SOUTER.

(2) *Hostel for students and residence for the Principal.*—In paragraph 2 of his Proceedings reviewing the report of the Medical College for the year 1905-1906, the Director of Public Instruction (Dr. Bourne) observed that the establishment of a hostel in connection with the College was under consideration. In paragraph 3 of his Proceedings, Dis. No. 4729 of 1907, the Director of Public Instruction says that the necessity for the establishment of a hostel with free residences for some of the members of the staff has been already brought to the notice of Government,

Why free?

G. S. F[ORBES].

referring apparently to Dr. Bourne's observation on the report* of the College for 1905-1906. It is submitted that the Director of Public Instruction may be asked to submit a special report on the subject giving the details of the scheme, the probable initial outlay and the annual cost of maintenance.

C. A. SOUTER. B |
 * On page 8 of G.O., No. 570, Educational, dated 27th August 1906.
 asked to submit a special report on the subject giving the details of the scheme, the probable initial outlay and the annual cost of maintenance.
 (3) *Improvements for the teaching of Dental Surgery.*—As regards this, the Surgeon-General suggests that the Professor of Dental Surgery should be asked to submit a detailed report of what is wanted to enable modern dentistry to be taught practically at the hospital and in the College and the Director of Public Instruction has drawn the attention of the Principal to this suggestion. In these circumstances C.A.S. | the receipt of detailed proposals on the subject may be awaited.

2. The report seems to call for no further remarks.

T.K.—20-8-07.

K. RANGASWAMI AIYANGAR—20-8-07.

C. A. SOUTER—21-8-07.

The file may be forwarded to the Public Works Department *u.o.* for remarks with reference to point A.

With reference to point B, do not Medical College students attend the Victoria Students' hostel? How many of them at present find accommodation there? The Director of Public Instruction noted in his letter of 26th June 1906 recorded on page 2 of G.O., No. 500, Educational, dated 27th July 1906, that a hostel should be provided for the Medical College.

H. D. TAYLOR—21-8-07.

To the Public Works Department.

PUBLIC WORKS DEPARTMENT.

The plans and estimates for the proposed Physiological and Hygiene laboratories for the Madras Medical College are in the linked file awaiting orders on the technical note put up.

P.V.—27-8-07.

For execution as funds become available.

H. D. TAYLOR.

A | Orders have been passed on the technical notes and the estimates will now be sanctioned.

F. J. WILSON—29-8-07.

To the Educational Department.

EDUCATIONAL DEPARTMENT.

No information is available as to whether any of the students of the Medical College now reside in the Victoria Students' hostel. May the Director of Public Instruction be asked for the information please?

K. RANGASWAMI AIYANGAR—2-9-07.

As to a hostel for the College and a residence for the Principal, the Director of

H.D.T. | Public Instruction may be asked to submit separate proposals. In his Proceedings, No. 5122 of 1906, recorded in G.O., Nos. 570-571, Educational, dated 27th August 1906, Dr. Bourne said the matter was under consideration. The subject may be treated separately and need not delay the disposal of this current.

C. A. SOUTER—3-9-07.

Please draft.

Reference may be made to Public Works Department orders at A if the number of the Government Order is available.

H. D. TAYLOR—3-9-07.

A draft is placed below for approval. The number of the Public Works Department order sanctioning the estimate is not yet available.

T.K.—4-9-07.

The report is usually placed on the Editors' Table.

K. RANGASWAMI AIYANGAR—4-9-07.

C. A. SOUTER—4-9-07.

Paragraph 2 should be accepted in Financial.

H. D. TAYLOR—5-9-07.

To the Financial Department.

FINANCIAL DEPARTMENT.

Paragraph 2 of the draft may be accepted.

[The item is already in the Claims Register—please see also K.W. 236, Educational, dated 24th April 1907.]

V.G.K.—6-9-07.

As regards funds for the Physiological and Hygienic laboratories, Local and Municipal, it is understood, apprehend a lapse in the provision of 6½ lakhs for water-supply and drainage schemes in Municipalities, and if Public Works Department have not got funds for the laboratories, the plans and estimates for which have been sanctioned, portion of the 6½ lakhs might be diverted for the purpose.

C. M. SCHMIDT—9-9-07.

The question of providing funds need not be considered before the Educational Government Order goes out. That commits us to nothing definite. The provision of funds must be arranged when the Public Works Department tell us what they can provide and Local and Municipal whether there will be any lapse.

H. BRADLEY—10-9-07.

Yes. We can probably find funds either in this year or next.

G. S[TOKES]—10-9-07.

Accepted.

H. BRADLEY—12-9-07.

To the Educational Department.

EDUCATIONAL DEPARTMENT.

For approval.

The question of lapse out of the 6½ lakhs allotment in civil budget estimate, 45. Civil Works for 1907-1908 will be taken up separately. This mainly depends on sanction to plans and estimates to various schemes in Public Works Department, and on the amount which that department can expend on the various schemes in the current year. It should be possible to form some estimate by the close of this month.

H. D. TAYLOR—14-9-07.

I do not see why we should give any of the staff belonging to the Indian Medical Service or the Principal free quarters? But in any case I see the Director of Public Instruction has the matter under consideration: so there is no need of paragraph 3 which might suggest that Government had approved. Otherwise draft may issue.

G. S. F[ORBES]—15-9-07.

Issue.

H. D. TAYLOR—17-9-07.

Medical College, Madras.—Reviewing the report on the working of the — for the session 1906-1907.

No. 4729 of 1907.

PROCEEDINGS OF THE DIRECTOR OF PUBLIC INSTRUCTION, DATED 29TH JULY 1907.

Medical College Report.

Read the following letter from Lieut.-Col. W. B. BROWNING, C.I.E., I.M.S., Principal, Medical College, to the Director of Public Instruction, dated 31st May 1907, No. 91:—

I have the honour to submit the annual report on the working of the Medical College during session 1906-1907.

ENCLOSURE.

ANNUAL REPORT OF THE MADRAS MEDICAL COLLEGE, SESSION 1906-1907.

The seventy-second session of the college began on the 2nd July 1906 and ended on the 30th March 1907.

2. Changes among the Staff.—Major F. J. Crawford, M.D., I.M.S., officiated as Principal from 11th May to 22nd December 1906 during the absence of Lieutenant-Colonel W. B. Browning, C.I.E., I.M.S., on furlough. Captain H. Kirkpatrick, M.B., I.M.S., officiated as Professor of Anatomy and Captain W. H. Tucker, I.M.S., as Professor of Pathology. Major G. G. Giffard, I.M.S., was appointed Professor of Midwifery and Major P. C. Gabbett, I.M.S., Professor of Surgery.

Among the Assistant Professorial staff, the following changes occurred:—

Captain F. A. Wynne, I.S.M.D., after seven years' excellent service in the college, retired on pension and was succeeded by Lieutenant G. R. Allan, I.S.M.D.

Senior-grade Hospital Assistant N. Ramasawmy Naidu, who was connected with the college for twelve years, retired on a well-earned pension.

Civil Assistant Surgeon C. B. Rama Rao went to England on furlough, Civil Assistant Surgeon Muhammad Azizullah Sahib being appointed to act for him.

3. Strength of the College.—There were 327 students on the rolls during the year as against 359 in the previous year—a decrease of 32. This number included 39 Sanitary Inspector students who joined in July and 13 Hospital Assistants who were sent for post-collegiate training under G.O., No. 80, Public, dated 3rd February 1905. Nineteen casualties occurred in all departments of the college, thus leaving 308 students who completed their curricula.

The following statement shows the number of new entries in each department of the college during the past quinquennium:—

Department.	1902-1903.	1903-1904.	1904-1905.	1905-1906.	1906-1907.	Increase or decrease as compared with previous year.
College { M.B.	32	33	48	37	42	+ 5
{ L.M.S.	2	9	18	18	18	..
Apothecary	50	21	14	13	11	- 2
Chemist and Druggist	2	..	3	6	..	- 6
Sanitary Inspectors' Class	99	46	51	54	39	- 15
Hospital Assistants undergoing post-collegiate training.	..	..	..	15	13	- 2

The 327 students were distributed as follows:—

Department.	Designation of students.	Number.
College	M.B. & C.M. (females 4)	103
	L.M. & S. (females 3)	69
	Casual (females 2)	34
		206
Apothecary	Military pupils	35
	Colonial apprentices	8
	Female students	22
	Private pupils	1
		66
Chemist and Druggist Department		3
Sanitary Inspectors' Class		39
Hospital Assistants undergoing post-collegiate training		13
Total		327

4. College Department.—As shown in paragraph 3, there were 206 students attending college in this department against 201 in the preceding year, or an increase of 5.

The following statement shows the distribution of these students according to the year of study:—

	First year.	Second year.	Third year.	Fourth year.	Fifth year.	Total.
M.B. & C.M.	(a) 42	(a) 18	23	(a) 11	(a) 9	103
L.M. & S.	(a) 18	(a) and (b) 23	(a) 16	12	..	69
Casual	9	(a) 21	2	(a) 2	..	34
Total	69	62	41	25	9	206

(a) Includes one female.

(b) Includes fourteen from first M.B. class of last year.

The results of the University examination for 1907 are shown in Appendix D.

The percentage of passes for all examinations was 65.6 as compared with 58.5 in the previous year.

The results in the final M.B. & C.M. and L.M. & S. examinations are much better this year than in the previous two years.

1904-1905	39.5
1905-1906	46
1906-1907	60

The figures represent the percentage of passes.

The following table shows the percentage of failures in each subject for the final examinations for the past five years, from which it will be seen that excepting the year under review, the subject causing most failures was Surgery.

The chief cause for rejection this year was Midwifery.

Subjects.	1903.	1904.	1905.	1906.	1907.
Medicine	50	25	17	77	61
Surgery	66	50	95	81	38
Midwifery	16	75	17	44	66
Ophthalmology	16	..	3	7	11

5. **Apothecary Department.**—There were 66 students in this department against 80 in the previous year, or a decrease of 14, chiefly owing to the smaller number of military pupils recruited.

The following statement gives the distribution of these students according to their year of study :—

Section of Apothecary department.	Year of study.				Total.
	First.	Second.	Third.	Fourth.	
Military pupils	6	7	8	14	35
Colonial apprentices	1	1	5	1	8
Female students	5	2	6	9	22
Private pupils				1	1
Total	12	10	19	25	66

Of the twenty-five fourth-year students thirteen military, one colonial, six female and one private students were allowed to appear for the final examination and of these, thirteen passed. The private pupil shown above was originally a Military Assistant Surgeon student and was allowed to complete his course at his own expense. He subsequently joined the Assistant Surgeon Department. It has to be noted that under the new regulations the final examination of the Military Assistant Surgeon students should have been conducted from the Director-General's office, but as a special case and under instructions from the Director-General it was again conducted this year by the Board of Examiners.

6. **Chemist and Druggist Department.**—There were three students in this department, two in the first and one in the second year of study. Although the number of entries has been greater than in previous years since the lowering of the educational standard, the prospects of this department of the college do not appear to be very good. The final year of extension granted under G.O., No. 568, Educational, dated 20th November 1903, having expired, the question as to the continuance of this department came before the College Council who recommended a still further extension. The matter is still under reference.

7. **Dental Surgery.**—Thirty lectures have been delivered during the session and practical dentistry such as is to be seen in the Out-patient Department of the General Hospital has been available, each student getting about 12 days' tuition.

I have felt for some time that the original intention under which the Professor of Dental Surgery was appointed has been lost sight of and that a properly equipped Dental Laboratory and an increase in the staff is needed.

The original intention under which a Professor of Dental Surgery was appointed was to teach Dental Surgery to students who would ultimately become subordinate Medical officers of Government and who could thus be of use in the mufassal. Our upper subordinate service is now recruited entirely from students possessing University qualifications and these students do not attend the course of lectures on Dental Surgery. I am of opinion that unless the present lectures are supplemented by a more practical training, much of the time now devoted to Dental lectures could be better spent on other subjects.

The provisions of paragraph 1 of G.O., No. 509, Educational, dated 30th August 1888, have never been fully carried out either as regards teaching nor has the University established a qualification. I am not sure this latter is immediately required. A College diploma with a two years' training would possibly suffice for present needs and would form the nucleus of a proper Dental school.

We are badly in need of qualified dentists all over the Presidency. I also feel sure that the Military authorities would welcome any scheme which would give Military Assistant Surgeons a practical training, and there is a distinct wish being evinced by people to become dentists. I have been addressed several times on the subject as also has Mr. Badcock.

8. **Hospital Assistants. Post-collegiate training of —.** Under G.O., No. 80, Public, dated 3rd February 1905, 18 Hospital Assistants of over ten years' service were admitted into the college to undergo a course of post-collegiate training for six months. The subjects of instruction comprised Visceral Anatomy, Medical Jurisprudence and Post-mortems, Medicine, Aseptic Surgery, and Midwifery, and included attendance at the General, Ophthalmic and Maternity Hospitals.

9. **Sanitary Inspectors' Class.**—This class consisted of 39 students, 35 of whom appeared for the Government Technical examinations held in January 1907 and 19 passed in Hygiene, and 21 in Physiology.

10. **Female Students.**—Thirty-one female students attended during the session against 29 last year. The following table gives the details according to their year of study :—

Department.	Year of study.					Total.
	First.	Second.	Third.	Fourth.	Fifth.	
M.B. & C.M.	1	2	..	1	1	5
L.M. & S.	1	1	1	1	..	4
Apothecary	5	2	6	9	..	22
Total	7	5	7	11	1	31

Eight students of the College department proceeded to their University examinations in April and seven passed. Six Apothecary department students appeared for the final examination and five passed. As regards race 22 were Europeans or Eurasians, six were Native Christians and three were non-Brahman Hindus. Eighteen of the total number held scholarships, and 13 were private students not stipended.

11. **Physical Training.**—This was carried on as usual throughout the session and the college annual sports were held in February.

12. **Library and Museum.**—There are now 4,895 books in the library, 96 having been added during the year. The number of specimens in the Museum is 2,217 against 2,094 last year.

13. The necessity of providing a hostel with a resident Principal in connection with the college was referred to in my report last year. An intimation was received from the Director in his review thereon that the matter was under consideration. As no further communication has been received, I allude to the subject again in the present report.

14. The service books and the inventory of valuable stock have been verified up to the 31st March 1907.

W. B. BROWNING, C.I.E., Lieut.-Col., I.M.S.,
Principal, Medical College.

MADRAS,
22nd May 1907.

Total	1,92,387	14	2

The figures above given are subject to the final adjustments that may hereafter be communicated by the Accountant-General.

Read the following letter from Surgeon-General W. R. BROWNE, M.D., V.H.S., C.I.E., I.M.S., Surgeon-General with the Government of Madras, to the Director of Public Instruction, dated Ootacamund, 26th June 1907, No. 45-M-T.-125:—

The report of the working of the College for the year calls for but little comment.

2. The total number of students attending the College showed a slight falling off but the chief decrease occurred in what may be called an extraneous class—that of the Sanitary Inspectors—where the huge figure of 99 new entrants of five years ago has gradually sunk to this year's 39. The entries for the M.B. and L.M. & S. sections continue to be steadily satisfactory while the next important section of the College—the Apothecary Department—must fluctuate in numbers according to the demands of the Military Department for Assistant Surgeons and this year only six Military pupils entered the College.

3. Taking the totals of the results of the seven University Examinations, an extremely satisfactory percentage of 65.6 per cent. of the 169 students sent up is recorded, and of the other examinations alluded to, a sufficiently good result is recorded.

4. New needs necessitating expenditure spring up in all educational institutions that are or attempt to be progressive in character and I must just allude to three of these—

(a) So long a time has elapsed since the need of reconstruction of the Physiological and Hygienic laboratories has been brought prominently to notice that this can hardly be called a new want of the College, but the passing years have only accentuated the necessity of attempting to make the College laboratories at all on a par with the elaborately built and fitted working laboratories of all the important centres of Medical education in Europe and America where little is thought of spending as many pounds as we do rupees in making efficient provision for laboratory work and instruction.

(b) The second need will also mean the expenditure of a considerable sum of money, that is, the provision of a hostel with a Resident Principal; and though I am glad to think that the students of the Madras Medical College have hitherto been conspicuous by the general good discipline that has pervaded their ranks yet the advantages of a hostel are so well recognised that I must record my concurrence in the desirability of the recommendation made by the Principal.

(c) The third want will not, it is hoped, necessitate a large outlay of money. I mean the improvements suggested in paragraph 7 of his report by the Principal for the teaching of Dental Surgery. I would suggest that the Professor of Dental Surgery be asked to submit a detailed report of what is required to enable modern dentistry to be practically taught at the Hospital and College and thus prevent the destruction of teeth (i.e., extraction) that so often for want of teaching and of the means of preserving them takes the place of the latter.

5. Lastly I desire to record the favourable opinion I have formed of the work of the Principal and staff of the College throughout the year under report.

Proceedings, Dis. No. 4729 of 1907.

Recorded.

2. The results of the University and other Examinations were very satisfactory.

3. The necessity for the establishment of a hostel in connection with the College with free residences for some of the members of the staff has been already brought to the notice of Government.

4. The Principal's attention is invited to the enquiry suggested in paragraph 4 (c) of the Surgeon-General's endorsement No. 45-M/T.-125, dated 26th June last. The financial aspect of the question needs also to be considered.

EDUCATIONAL DEPARTMENT.

NOTES.

16

C. No.1869, from the Director of Public Instruction, No.5593, d/2--3-1907.

Subject.

Report on the working of the Medical College for 1906-1907.

Three points are noticed in the report:-

(1) The construction of Physiological and Hygiene laboratories - para.4(a) of the Surgeon General's remarks on page 9 of ~~the report~~ ^{current file}.

(2) The provision of a hostel with a resident Principal - para.13 of the ^{Principal's} report - page 5 ^{of cf.} and para.4(b) of the Surgeon General's remarks on page 9 ^{of cf.}.

(3) Improvements for the teaching of Dental Surgery - para.7 of the ^{Principal's} report - page 4 - and para.4(c) of the Surgeon General's remarks on page 9 ^{of cf.}.

2. Physiological and Hygiene laboratories.

The proposal ^{to} for the construction ~~of~~ these laboratories at an estimated cost of Rs.1,70,130 ~~was~~ ^{to} approved in G.O. No.236, Educational, dated 24th April 1907, to be carried out as and when funds are available. But the plans and estimates have not yet been sanctioned in the P.W.D. The P.W.D. may perhaps be asked u.o. to state at what stage the matter is at present.

3. Hostel for students and residence for the Principal. -- In para.2 of his Proceedings reviewing the report of the Medical College for the year 1905-06, the D.P.I. (Dr. Bourne) observed that the establishment

establishment of a hostel in connection with the College was under consideration. In paragraph 3 of his Proceedings, Dis. No.4729 of 1907, the D.P.I. says that the necessity for the establishment of a hostel with free residences for some of the members of the staff has been already brought to the notice of Government, referring apparently to Dr. Bourne's observation on the report of the College for 1905-06. It is submitted that the D.P.I. may be asked to submit a special report on the subject giving the details of the scheme, the probable initial outlay and the annual cost of maintenance.

(3) Improvements for the teaching of Dental Surgery.---As regards this, the Surgeon-General suggests that the Professor of Dental Surgery should be asked to submit a detailed report of what is wanted to enable modern dentistry to be practically taught at the hospital and in the College and the D.P.I. has drawn the attention of the Principal to this suggestion. In these circumstances the receipt of detailed proposals on the subject may be awaited.

3. The report seems to call for no further remarks.

Lec.

As to a Hostel for the College & a residence for the Principal the D.P.D. may be asked to submit separate proposals. In his prop. No 5122 of 1906 recorded in G.O. Nos. 570-1 2d of 27.8.06 Mr. Bourne said the matter was under consideration. The subject may be treated separately & need not delay the disposal of this current.

for approval

The question of lapse out of the 6 1/2 lakh
allotment in C.B.S. 45 least works for 1907-8
will be taken up separately. This mainly
depends on sanction to plans & estimates
to various schemes in P.W.D., and to
the amount which the Dept can expend on
the various schemes in the current year.
It should be possible to form some estimate
by the close of this month.
