GOVERNMENT OF MADRAS.

EDUCATIONAL DEPARTMENT.

READ—the following papers :—

I

Letter—from the Hon'ble Mr. T. T. LOGAN, B.A., Acting Director of Public Instruction.

To—the Secretary to Government, Educational Department.

Dated—Madras, the 17th April 1907.

No.—Ref. on Cur. No. 8383 of 1906.

I have the honour to request that you will be good enough to obtain the sanction of Government to a third grant under Rule 51, Chapter VIII of the Grant-in-Aid Code of Rs. 10,883 towards the cost of constructing a building for St. John's Girls' High school and St. John's Training school for Mistresses, Nazareth, Tinnevely district. The plan and estimates with the usual application for grant are herewith submitted.

2. From 1898-1899 the necessity for better and sufficient accommodation has been very much felt and the Manager's attempt to supply this long felt want fully deserves the aid sought for.

3. The lower storey of the building is intended for the High school while the upper storey is for the Training school.

4. The grant, if sanctioned, will be paid from the allotment for building grants in the current year's budget estimate out of which nothing has been spent up to date.

5. The very long delay in disposal of this application is much regretted.

II

Letter—from the Hon'ble Mr. A. G. BOURNE, D.Sc., F.R.S., Director of Public Instruction.

To—the Secretary to Government, Educational Department.

Dated—Madras, the 16th March 1908.

No.—Ref. on Cur. No. 8383 of 1906.

I have the honour to state that the Manager, St. John's Girls' High school, Nazareth, has written to ask when orders on his application for aid towards the cost of constructing a building for the school may be expected and what may be the probable amount of grant he can expect.

2. The application was submitted to Government with this office letter, Ref. on Cur. No. 8383 of 1906, dated 17th April 1907.

III

Memorandum No. 645-1, Educational, dated 31st March 1908.

With reference to his letter R.O.C. No. 8383, dated 17th April 1907, recommending a grant of Rs. 10,883 towards the cost of constructing a building for the St. John's Girls' High school and St. John's Training school for Mistresses, Nazareth, the Director of Public Instruction will be informed that the Government will be prepared to sanction a grant not exceeding Rs. 10,000 provided that the net cost of the building as actually verified does not fall short of Rs. 30,000.

2. The Government are however advised that the design submitted with the Director's letter read above is defective in the following respects among others :—

(1) No bricks can be worked into bond with such dimensions as 3' 3", 2' 9", 2' 0", 2' 6", 1' 9", 1' 3", etc.

(2) The construction of the lower verandah arching is peculiar.

(3) The truss (section on E.F.) is a king rod truss and the span is 26' 6", while queen post trusses would seem preferable.

(4) The foundations are on rock; it is presumed that this will require levelling up, but no mention is made of it in the estimate.

3. An alternative design recommended by the Chief Engineer is herewith forwarded to the Director of Public Instruction who is requested to ascertain and report whether the correspondent is prepared to adopt the same and, if he is, to obtain and submit to Government a revised estimate of the cost of the work in accordance with it.

(By Order.)

C. A. SOUTER,
Under Secretary to Government.

To the Director of Public Instruction
(with two plans and estimates).

IV

Letter—from the Hon'ble Mr. A. G. BOURNE, D.Sc., F.R.S., C.I.E., Director of Public Instruction.

To—the Secretary to Government, Educational Department.

Dated—Madras, the 6th March 1909.

No.—Ref. on Cur. No. 8383 of 1906.

With reference to paragraph 3 of Memorandum No. 645-1, Educational, dated 31st March 1908, I have the honour to submit the enclosed estimate amounting to Rs. 26,100 for the construction of a building for the St. John's Girls' High school, Nazareth, according to the design furnished with the above memorandum and to request that early orders may be passed on the manager's application for aid under article 51 of the Grant-in-Aid Code.

V

Circular Memorandum No. 2040-C., dated 27th April 1909.

Timber Scantlings.

In Circular Memorandum No. 234-C, dated 9th January 1908, it was concluded that the selection of scantlings might be determined by a consideration of a strength formula $W = \frac{e b d^2}{L}$ and a deflection formula $W = \frac{e b d^3}{L^2}$. The values of the moduli of rupture and elasticity for certain timbers as determined by different authorities were given in the table No. III accompanying that circular. From these and the subject matter of the circular it was concluded that in regard to certain timbers a value of $C = 210$ might be adopted for the strength formula implying a factor of safety of 7 and also for the deflection formula to be used for all but large beams and where a deflection of $1/30$ " per foot of span could be allowed.

Table No. I gave the safe distributed loads in tons on scantlings worked out on this basis and as stated in paragraph 8 of the circular and as shown in table No. III the figures of this table No. I might be taken as applicable to teak, Australian blackbutt, white or grey iron bark mahogany, tallow wood and Indian sál. The probability of its being applicable to many other Indian woods was surmised in paragraph 8, but as no reliable figures as to the moduli of rupture and elasticity of these woods were at hand no definite pronouncement could be made on the point.

2. Since then samples of local timbers have been sent by Superintending Engineer to the Principal of the Engineering College and Mr. James has recently submitted preliminary results of the tests made. The actual values of the moduli of rupture and elasticity as determined by these tests may be affected by the results of some further experiment Mr. James wishes to make with the machine, and for this reason it is not proposed at present to publish the figures, but as any modifications that may have to be made will affect all the tests equally the results may be accepted in regard to the comparative strength and elasticity of the various timbers tested.

3. The tests included 23 tests on specimens of locally-purchased teak and a comparison of these with the tests on the other timbers gives the following important result. The tests on the following timbers showed them to be stronger and stiffer than the teak specimens tested—

- (1) Six specimens of Ainee (*Artocarpus hirsuta*).
- (2) " of Iumbogam or Oorapoo (*Hopea parviflora*).
- (3) " of Karamarudu (*Terminalia tomentosa*).
- (4) " of Irul (*Xylia dolabriformis*).
- (5) " of Pillamarudu.
- (6) " of Jarrah from Millars Karri and Jarrah Company.

Of these No. 2 Iumbogam is a long way the best. There is not much to choose between Nos. 1, 3 and 6, but with regard to the latter (Jarrah) it is to be noted that another lot obtained from Messrs. Dymes & Co. is not nearly so good and with regard to strength is slightly below the teak results. Nos. 4 and 5 come last.

4. As it is important in view of the price of teak to introduce the use of other woods where suitable and to stop the extravagance of designing the scantlings of such timbers on the basis of allowing for 50 per cent. extra load which is equivalent to using a constant of 140 as has been usual, the Chief Engineer considers that the evidence as to the qualities of these timbers is now sufficient to justify the adoption of the following rule for technical section purposes until further orders.

5. With regard to strength and elasticity implying a deflection of 1/30" per foot of span except for large beams, table No. I of Circular No. 234-C., dated 9th January 1908, involving constant of 210 may be used for determining scantlings of the following timbers—

- (1) Teak (*Tectona grandis*).
- (2) Säl.
- (3) Iumbogam, Oorapoo (*Hopea parviflora*).
- (4) Ainee (*Artocarpus hirsuta*).
- (5) Karamarudu (*Terminalia tomentosa*).
- (6) Jarrah, Australian.
- (7) Blackbutt do.
- (8) Iron bark (white or grey), Australian.
- (9) Mahogany, Australian.
- (10) Tallow wood do.

Table No. II involving constant of 180 may be used for determining scantlings of large beams and of the following timbers in cases where deflection of 1/30" is suitable and for the timbers of the preceding class where it is desired to limit deflection to 1/40" per foot of span—

- (1) Irul (*Xylia dolabriformis*).
- (2) Pillamarudu (*Terminalia paniculata*).

6. Further additions and tables may follow.

7. The suitability of the timbers for different purposes is a matter for the technical sanctioning authority and for consideration by local officers having regard to price, etc. It is expected that if a local Executive Engineer has good reason to use a timber which is different to that specified in the design he has to execute, he will make his suggestion to his Superintending Engineer who in most cases can sanction it. If, for instance, a design specifies teak without any alternative and the local Executive Engineer finds that it will be more suitable to his work and possibly cheaper to use

Karamarudu, this would be a good reason for using it. It may at times be possible to get very favourable quotations for a certain kind of timber and impossible to get another. These are points for the consideration of the local Executive Engineer.

Iumbogam is a good and hard wood but it is difficult to work. Blackbutt is good for planking but sometimes unobtainable, etc.

F. J. WILSON,
Secretary to Government.

To Superintending Engineers.
" the Chief Engineer for Irrigation.
" the Sanitary Engineer to Government.

Copy to Presidents of District Boards for communication to District Board Engineers.

VI

Note by the Chief Engineer, Public Works Department, dated 24th July 1909.

The Director of Public Instruction submits an estimate, amounting to Rupees 26,100, for constructing a building for the St. John's High school for Girls and St. John's Training school for Mistresses at Nazareth in Tinnevely.

2. The estimate is based upon the design prepared by the Consulting Architect to Government and is submitted in supersession of a previous design submitted by the Director of Public Instruction which was estimated to cost Rs. 32,650.

3. Certain necessary alterations in details of design have been made in the Chief Engineer's office.

4. The rate provided in the estimate for terrace flooring, viz., Rs. 15-4-0 per hundred square feet, has been increased to Rs. 25-8-0 which is the schedule rate. It is considered that the former rate was entered by mistake.

5. The pressure on foundations works out to 1.6 tons per square foot. The nature of soil was stated in connection with the previous design to be 5½ feet of earth with rock below, and the foundations now provided are 5½ feet deep.

It is assumed that the foundations will be on rock throughout. If founded partly on rock, cracks will result from unequal settlement.

6. Teakwood is specified for roof timbers. In this connection, attention is invited to Chief Engineer's Memorandum No. 2040-C., dated 27th April 1909.

7. With these remarks, the estimate, as altered by the Chief Engineer, amounting to Rs. 27,730, is recommended for sanction.

F. J. WILSON,
Chief Engineer, P.W.D.

Order—No. 450, Educational, dated 3rd August 1909.

The Government are pleased to sanction a grant not exceeding one-third of the actual expenditure, nor exceeding Rs. 9,200 towards the cost of constructing a building for St. John's Girls' High school and St. John's Training school for Mistresses, Nazareth, Tinnevely district, subject to the following conditions:—

(1) that in carrying out the work the suggestions of the Chief Engineer in his note read above are adopted;

(2) that the work is completed before the 30th April 1910;

(3) that a certificate of the actual expenditure incurred on the work is submitted before the 31st May 1910;

(4) that all other conditions prescribed in the Grant-in-Aid Code have been duly complied with.

2. On the above conditions being fulfilled the grant will be paid as funds become available.

(True Extract.)

W. FRANCIS,
Ag. Secretary to Government.

To the Director of Public Instruction, with plans,
estimates and applications.
„ Accountant-General.
Editors' Table (order only).

EDUCATIONAL DEPARTMENT.

NOTES CONNECTED WITH G.O., No. 450, EDUCATIONAL, DATED 3RD AUGUST 1909.

[SUBJECT.—*Building grant towards the cost of constructing a building for the St. John's Girls' High school and St. John's Training school for Mistresses, Nazareth.*]

Previous papers.

G.O., No. 365, Educational, dated 17th June 1909.
„ „ 378 „ „ 29th „ „

From the Director of Public Instruction, dated 17th April 1907, No. 8383.

„ „ „ 16th March 1908 „

It is submitted that the plans and estimates may first be sent to the Public Works Department for the usual scrutiny.

P.R.—30-4-07.

T. KANAKASUNDARAM PILLAI—30-4-07.

C. A. SOUTER—30-4-07.

To the Public Works Department.

PUBLIC WORKS DEPARTMENT.

Submitted. Consulting Architect's design is certainly a great improvement on the original. It might go to Educational for approval; but I doubt if for so ornamental a building a cubic foot rate of Rs. 0-1-10 would be sufficient for rough estimating.

A. G. ROMILLY—22-2-08.

Subject to certain alterations in scantlings the design submitted might be passed but that made by the Consulting Architect seems a better one and he makes out it would cost about the same.

F. J. WILSON—27-2-08.

To the Educational Department.

EDUCATIONAL DEPARTMENT.

It is for consideration whether the Consulting Architect's design may be adopted. If so the Director of Public Instruction may be requested to obtain a revised estimate and submit it to Government.

P.R.—12-3-08.

According to the estimates submitted with the Director of Public Instruction's letter, the total cost of the building is estimated at Rs. 32,650 and the Director of Public Instruction recommends a grant of Rs. 10,883 or one-third of the estimated cost under article 51 of the Grant-in-Aid Code. It is submitted that a maximum grant of Rs. 10,880 may be sanctioned subject to the conditions that the actual expenditure on the work does not fall short of Rs. 32,650 and that the design suggested by the Consulting Architect is adopted. The Chief Engineer observes that the cost of this will be about the same as that of the proposed design.

K. RANGASWAMI AYYANGAR—13-3-08.

C. A. SOUTER—14-3-08.

I do not think that the Mission should be compelled to incur extra expenditure merely in order to secure an *artistic* design. The Consulting Architect's rough estimate which approximates to the cost of the original estimate is considered by Mr. Romilly to be too low, but the plan and estimate sent up is considered defective.

2. Please draft for approval, pointing out the defects, and asking whether the correspondent is prepared to accept the Consulting Architect's design. We may promise a maximum grant of Rs. 10,000 provided that the actual net cost of expenditure does not fall below Rs. 30,000.

H. D. TAYLOR—24-3-08.

The draft memorandum placed below is for approval.

K. RANGAWAMI AIYANGAR—27-3-08.

C. A. SOUTER—27-3-08.

H. D. TAYLOR—28-3-08.

Approved.

H. B[RADLEY]—31-3-08.

Issue.

H. D. TAYLOR—31-3-08.

[Memorandum No. 645-1, dated 31st March 1908.]

From the Director of Public Instruction, dated 6th March 1909, No. 3383.

The Director of Public Instruction now submits a revised estimate amounting to Rs. 26,100* in accordance with the design prepared by the Consulting Architect. It is submitted that the estimate may be forwarded to the Public Works Department u.o. for scrutiny with reference to the Chief Engineer's note, dated 27th February 1908, on page 1 *supra*.

P.R.—12-3-09.

K. RANGASWAMI AIYANGAR—12-3-09.

C. A. SOUTER—12-3-09.

To the Public Works Department.

PUBLIC WORKS DEPARTMENT.

The accompanying note embodying the Chief Engineer's remarks on the estimate may be forwarded to Educational, which department may, at the same time, be furnished with information as to how long it would take to complete the work, it being usual for Government in sanctioning a grant-in-aid for a school building to require that the work for which the grant is intended should be completed by a given date.

P.V.—26-7-09.

The work should take about eight months if materials are supplied without delay.

P. HAWKINS—9-7-09.

To the Educational Department.

EDUCATIONAL DEPARTMENT.

Is there money now?

W. FRANCIS—31-7-09.

It is submitted that there is a provision of Rs. 60,000 in the Civil Budget estimate for 1909-1910 on account of building grants for non-European schools. But no information is available in this office as to how much of the Rs. 60,000 has already been disbursed. This information

will be available only in the Director of Public Instruction's office. It is, however, submitted that the grant is not likely to be paid during the current year inasmuch as payment of the grant will have to be made only after the building has been finally completed. The Public Works Department states that it will take about 8 months to complete the work if materials are supplied without delay. In all probability, therefore, the work may not be completed before the 30th of April or May 1910. Further, one of the conditions on which the grant is promised is that it "will be paid only as funds become available." The question whether funds are available need not, it is submitted, be considered at present.

Note:—Allowance has also been made for the time which the Government Order will take to reach the school authorities through the Director of Public Instruction.

P.R.—2-8-09.

Paragraph 2 of draft order placed below.

2. The amount of the estimate as revised by the Chief Engineer is Rs. 27,730.

Paragraph 7 of Chief Engineer's note. Under article 51 (i) of the Grant-in-Aid Code, the maximum amount of grant admissible is only one-third of this, namely, Rs. 9,243 or Rs. 9,200 in round figures.

3. The draft order placed below is submitted for approval.

P.R.—2-8-09.

The grant which may now be sanctioned will be payable only in the next financial year and will be a charge on the budget allotment which may be made in the next year's budget. Sanction may be accorded to the grant in this case, subject to the usual condition that it will be paid as funds become available.

K. RANGASWAMI AIYANGAR—2-8-09.

For approval.

C. A. SOUTER—2-8-09.

Approved.

(Hon'ble Mr. Bradley has already passed the grant.)

W. FRANCIS—3-8-09.

INSTRUCTIONS FOR THE SECRETARIAT.

(a) If a paper is marked to be printed urgently, the Superintendent of the section concerned should sign the Press slip. The Superintendent should exercise a careful discretion in the matter.

(b) Each letter, memorandum, or order, or set of orders, in the file of correspondence should be headed in succession with the Roman numeral I, II, III, etc., the number being written in red ink or blue chalk above the item. The particular papers to be printed in the special issue-copies should be indicated by the Roman numeral (I, II, etc.) by which that item has been headed in the correspondence file. All matter, including marginal remarks or references, to be printed should be written in ink and matter which should not be printed should be encircled. Initials and signatures that are not quite legible should be re-written distinctly.

(b¹) For rules regarding printing of notes, see the rules in G.O., No. 1220, Public, dated 30th November 1900.

(c) The number of copies and the details of distribution should be filled in by the Superintendent or Referencer concerned.

(d) In the absence of special instructions to the Press to keep matter standing for a specified period, ordinary papers of 8 pages and under will be kept standing for one week, and larger papers for two weeks only. The type of notes and of all confidential papers is distributed immediately after striking.

(e) This slip, properly and completely filled in, should accompany every paper sent to Press; it will be returned by the Press when proofs are furnished; it should be sent to the Press when a call is made for revised proofs or when a corrected proof is sent for striking. When finally returned by Press it should be filed with the original order or letter.

INSTRUCTIONS FOR THE PRESS.

(a) If, in the opinion of the Superintendent of the Press, a paper has been marked urgent unnecessarily, he should send the Press slip to the Deputy Registrar with a remark to that effect.

(b) Unless a note to the contrary is made against the matter, pencil entries should not be printed. The Superintendent of the Press may bring to the notice of the Deputy Registrar any instance of incomplete or careless editing.

(c) Signature copies of letters to the Secretary of State or to the Government of India should be printed on hand-made paper.

(d) This slip should be returned by the Press to the Secretariat when proofs are furnished; it will be sent back to the Press when proofs are returned corrected and should be finally returned to the Secretariat when struck-off copies are supplied.

(e) The names of the Secretary and Members should be printed in full when they occur on the right hand side, but only the first time when they appear on the left side, the initials alone being printed later.

* Copies distributed on..... (Press Clerk.)

† Copies distributed on..... (Despatcher.)
