GOVERNMENT OF MADRAS.

EDUCATIONAL DEPARTMENT.

READ—the following papers :—

I

Letter—from the Hon'ble Mr. A. G. BOURNE, D.Sc., F.R.S., C.I.B., Director of Public Instruction, Madras.
To—the Secretary to Government, Educational Department.
Dated—the 2nd August 1909.
No.—Ref. on Cur. No. 4526.

I have the honour to submit the enclosed application for aid towards the cost of extensions to the building occupied by the High School, Tirukkattupalli, and to recommend that under Rule 51 of the Grant-in-Aid Code a grant of Rs. 2,931, which is a third of the proposed expenditure, viz., Rs. 8,795, may be sanctioned to be paid when funds become available.

2. The proposed work consists of the construction of (1) an upper storey containing three rooms and (2) a laboratory room on the ground floor.

3. One of the two blocks of the existing building was constructed recently, and the Government were pleased to sanction, in their Order No. 136, Educational, dated 24th February 1908, a grant of Rs. 3,000 towards its cost. But the accommodation is still insufficient. Hence the proposal for extension.

4. The necessary plans and estimates are submitted.

II

Note by the Chief Engineer, Public Works Department, dated 15th October 1909.

The Director of Public Instruction submits for sanction an estimate, amounting to Rs. 8,795, for constructing extensions to the building occupied by the High School at Tirukkattupalli in Tanjore district, consisting of a laboratory on the ground floor and an upper storey of three rooms.

2. The design proposed for the verandah in front of the laboratory is unsound.

The roof of the laboratory in the design submitted is quite flat. A slope is necessary to drain off rain water. A revised design C.A. 178/1909 has therefore been prepared in the Chief Engineer's office, the cost of which is estimated at Rupees 2,280 or Rs. 120 less than the original design which with necessary structural corrections would have cost Rs. 2,400. This revised design is recommended for adoption.

3. The plan and estimate for adding an upper storey have been altered in the Chief Engineer's office in respect of the following items :—

The existing roof is not strong enough to serve as a floor. Rolled steel beams 10" x 5" x 30 lbs. have therefore been provided in the Chief Engineer's office to be inserted between the teak beams.

Some of these beams necessarily come over arches. The Superintending Engineer should satisfy himself that the existing relieving arches are strong enough or in the alternative suitable relieving arches should be provided to carry these beams. Certain other necessary modifications have been embodied in the plan C.A. 178/1909 and estimates.

The condition of the existing building on which it is proposed to construct an upper storey is not reported. The Superintending Engineer should therefore satisfy himself before the upper storey is built, that the condition of the building is such that an upper storey can safely be constructed upon it. The pressure on the soil, which is described as "ordinary loose clay" below the laboratory works out to 2.08 tons per square foot. The Superintending Engineer should satisfy himself that the soil will carry this load.

4. With these remarks, the estimate, as altered by the Chief Engineer, amounting to Rs. 9,640, is recommended for sanction.

C. A. SMITH,
Ag. Chief Engineer, Public Works Dept.

Order—No. 576, Educational, dated 22nd October 1909.
