Note by the Chief Engineer, P.W.D. 23.3.10

Read again:-

Note by the Chief Engineer, P.W.D. dated 15-10-09 on the estimate for extensions to the building occupied by the High School at Tirukatupalli in the Tanjore district.

On the representation of the Hon'ble Mr.P.S. Sivaswamy Aiyar, C.I.E, as to difficulties in carrying out the recommendations in the above note relative to the addition of rolled steel beams and relieving arches to the existing roof of the building to admit of an upper storey being placed over it, the Chief Engineer has further considered the matter. Although the 5" depth of joists is not sufficient to keep deflection within the limits usually considered desirable to obviate cracking of a floor, the joists are considered sufficiently strong so as not to fail by fracture, supposing the timber to be sound. In these circumstances the Chief Engineer does not consider it necessary to insist on the additional steel beams and relieving arches previously recommended, if those interested in the building wish to omit them.

Para 3 of

Please see the Chief Engineer's note, dated 15th October 1909, on page 2 of G.O. No. 576, Educational dated 22nd October 1909, and paragraph 1 (1) of the G.O. in which it was stated that in carrying out the work, the suggestions of the Chief Engineer should be adopted.

2. In his note on page 1 supra, the Chief Engineer states that the suggestions made in paragraph 3 of his note dated 15th October 1909, need not be insisted on, if those interested in the building wish to omit them. The original estimate of the building was Rs. 8,795, and this was raised by the Chief Engineer to Rs. 9,640, ^{in order} to provide for the improvements suggested by him, and in G.O. No.

F

576, Educational, dated 22nd October 1909,
grant (Rs. 210) equal to one-third of the
estimated expenditure sanctioned on the under-
standing that the reduction suggested by the
Chief Engineer was carried out. The Chief
Engineer did not report on the actual
cost of the building ^{would} be affected
by his suggestions in regard to rolled steel
beams and relieving arches were not carried
out. It is for consideration whether the
Chief Engineer may be asked to report on this
point and whether in the event of the omission
of the items above referred to providing a
reduction in the cost of the work, the grant
sanctioned in G.O. No. 576, Educational, dated
22nd October 1909, should also be correspond-
ingly reduced.

3. No application has been received from
the management of the school on the subject
mentioned in the Chief Engineer's note.
