Despatch—from the Government of India, Home Department (Education).
To—His Majesty's Secretary of State for India.
Dated—Simla, the 26th May 1910.
No.—17.

We have the honour to refer to the correspondence ending with our telegram, dated the 21st January 1910, regarding Sir Thomas Holland's suggestion that, in place of appointing a new recruit from England to the recently-sanctioned chair of geology at the Madras Presidency College, the post should be filled by an officer of the existing staff of the Geological Survey of India either permanently or by periodical deputation.

2. Sir Thomas Holland urges what appears to us to be strong reasons in favour of recruiting for the post from the Geological Survey Department, and, after consulting the head of that department and the Government of Madras, we are also disposed to agree with him in thinking that it would be preferable to limit the tenure of the appointment to three years. The two essential conditions of such an arrangement are—

(1) that the officer selected from time to time should not suffer any pecuniary loss either on his temporary transfer to the Education Department or on his subsequent reversion to his own department; and

(2) that the staff of the Geological Survey of India should be increased by one appointment.

We do not anticipate any difficulty in complying with the first condition; and, as the Geological Survey Department could ill afford to spare an officer who would not be replaced, we trust that your Lordship will be prepared to approve of the second condition. The selection of the officer for the Geological professorship would be made by the Government of Madras on the recommendation of the Director of the

Geological Survey. The Government of Madras would have the power of reverting the officer selected to his own department after reasonable notice, within the term of three years, if he proved to be unsuitable for the post, and, similarly, if the selected officer himself felt dissatisfied with his position, he would have the option of resigning the appointment after giving due notice of his intention.

3. It is proposed to appoint to the professorship Mr. Murray Stuart, an Assistant Superintendent in the Geological Survey in the grade of Rs. 350—30—500, at present drawing Rs. 410 per mensem, who has been strongly recommended by the head of his department. Under article 156 (b), Civil Service Regulations, he would be entitled to receive on his appointment the minimum of the sanctioned pay of the post, viz., Rs. 500 a month, and on his reversion to the Geological Survey after three years he would be treated as regards pay, increments and pension as if he had remained in that department. Should the arrangement described above meet with your Lordship's approval, we request you to take the necessary steps to recruit an officer to fill the resulting vacancy in the Geological Survey of India.

Despatch—from His Majesty's Secretary of State for India.

To—His Excellency the Right Honourable the Governor-General of India in Council.

Dated—India Office, London, the 5th August 1910.

No.—93, Public.

Having considered in Council the letter of your Excellency's Government in the Home Department, No. 17, dated 26th May 1910, I approve your proposals for filling the recently-sanctioned Professorship of Geology at the Madras Presidency College by the deputation of an officer of the Geological Survey of India, and I will take steps to recruit an officer to fill the vacancy in that service.

Endorsement No. 892, dated 29th August 1910.

Copy, with copy of the despatch to which it is a reply, forwarded to the Government of Madras for information.

(By Order.)

H. G. STOKES,

Dy. Secretary to the Government of India.

Order—No. 545, Educational, dated 14th September 1910.

The Director of Public Instruction will be informed that the Secretary of State has sanctioned the proposals of the Government of India to fill the recently-sanctioned Professorship of Geology at the Presidency College, Madras, by the deputation of an officer of the Geological Survey of India. The selection of the officer for the professorship will be made by this Government on the recommendation of the Director of the Geological Survey. The Government will have the power of reverting the officer selected to his own department, after reasonable notice, within the term of three years, if he proves to be unsuitable for the post, and similarly, if the selected officer himself feels dissatisfied with his position, he will have the option of resigning his appointment after giving due notice of his intention.

2. Mr. Murray Stuart, an Assistant Superintendent of the Geological Survey in the grade of Rs. 350—30—500, has been selected for the professorship. Under article 156 (b), Civil Service Regulations, he will be entitled to receive on his appointment the minimum pay of the post, viz., Rs. 500 a month.

(True Extract.)

L. M. WYNCH,
Secretary to Government.

To the Director of Public Instruction.
,, Accountant-General.

EDUCATIONAL DEPARTMENT.

NOTES CONNECTED WITH G.O., No. 545, EDUCATIONAL,
DATED 14TH SEPTEMBER 1910.

[SUBJECT.—*Appointment of a Professor of Geology for the Presidency College.*]

Previous papers.

G.O., No. 392,	Edl., dated	5th June	1906.
" " 500	" "	27th July	"
" " 148	" "	13th March	1909.

Demi-official—from H. G. STOKES, Esq., I.C.S., Deputy Secretary to the Government of India, Home Department.
To—L. M. WYNCH, Esq., C.I.E., I.C.S., Acting Secretary to the Government of Madras, Educational Department.
Dated—Calcutta, the 25th January 1910.
No.—27 (Education).

I am desired to refer to the correspondence ending with the Home Department endorsement No. 858, dated the 29th September 1909, and to forward for the Governor in Council's information a copy of a letter from Sir Thomas Holland, dated the 5th December 1909, in which he suggests that in place of appointing a new recruit from home to the recently-sanctioned chair of Geology at the Madras Presidency College the post should be filled by an officer of the existing staff of the Geological Survey of India, either permanently or on three years' deputation, at the close of which his place would be taken by another Geological Survey officer for a similar period, and so on.

2. Sir Thomas Holland urges what appears to the Government of India to be strong reasons in favour of recruiting for the post from the Geological Survey, and subject to the views of the Government of Madras, they are also disposed to agree with him in thinking that it would be preferable to limit the tenure of the appointment to three years. In order to secure the services of an officer of the Geological Survey, it would be necessary to give an assurance that the officers selected from time to time would not suffer any pecuniary loss on transfer to the Education Department. There would probably be no difficulty in complying with this condition, as after five years' service Assistant Superintendents of the Geological Survey receive the same scale of pay as members of the Indian Educational Service.

3. Before proceeding further, the Government of India would be glad to be favoured with the views of the Governor in Council on Sir Thomas Holland's suggestion and, if the Government of Madras are disposed to accept it, I am further to inquire whether the Geological Survey officer would be provided with free quarters under the Home Department Resolution Nos. 319-331, dated the 16th May 1906.

4. As the Secretary of State has telegraphed for the Government of India's views in the matter, I am to request that a very early reply may be sent to this letter.

ENCLOSURE.

Letter—from Sir THOMAS HOLLAND, K.C.I.E., D.Sc., F.R.S., Director of Special
Inquiries and Reports, Board of Education.

To—the Deputy Secretary to the Government of India, Home Department.

Dated—The University, Manchester, the 5th December 1909.

With reference to Mr. Jameson's letter of the 29th of November, I would suggest, before attempting to obtain a recruit at home, that the Government of India might more profitably consider the advisability of transferring an officer from the existing staff of the Geological Survey of India to the Education Department. It is highly desirable that the new Professor should have an intimate acquaintance with Indian Geology, and should be in a position to draw on the supplies of the Geological Survey for specimens and maps. In these respects an officer of the Geological Survey would be in a most advantageous position, while a raw recruit from home would be handicapped by ignorance of the country as well as the natural tendency of the survey to keep aloof from a stranger.

2. The terms of the appointment are not greatly different in the two services: the maximum pay is slightly lower in the Education Department, but some of the Geological Survey officers may prefer the advantages of settled quarters in a comparatively inexpensive place like Madras, less strenuous work, longer vacations and the privileges of a more independent position. Ordinarily, there would be little temptation for officers, interested in the field work of the Geological Survey, to join the Education Department; but they are not all equally devoted to camp life, and just now, there are so many officers at about the same age in the Geological Survey that some of them must feel the effects of slow promotion at a later stage. On the whole, therefore, I think there are two or three officers of the Geological Survey who would regard the transfer as an advantage, while there can hardly be any doubt about the advantage to the Education service in obtaining a more mature recruit. In a service as large as the Geological Survey, a failure or two among a majority of successes would not be seriously felt, but the appointment of a man to this isolated position incurs the risk of absolute failure for a long period, and it is impossible to be sure from the home record of a recruit that he will be successful in face of the unusual trials of Indian life.

3. It is possible, of course, that the Education authorities may expect the Director of the Geological Survey to be unwilling to spare his best officer for this work. I am sure, however, that the risk is not serious: the Director is not likely to send an officer who will not bring credit to his service, or to disappoint those in the department who may regard the transfer as an advantage; and there are certain officers in the Geological Survey at present who will never be at their best while rough field work is an essential part of their life, yet are admirably suited by disposition, efficiency and even experience for the work of teaching. If the Director of Public Instruction fears that my successor is more likely to regard the interests of the Geological Survey than those of the Presidency College, I shall be very glad to make the nominations for his selection.

4. In my opinion, it would be still better, instead of making a permanent transfer or selecting a recruit at home, to transfer an officer of the Geological Survey to the Madras Presidency College for a period of, say, three years, on the understanding that he would be replaced by another Geological Survey officer at the end of his deputation. The various sections of Geology would thus get more even treatment, and there would be less tendency for the Professor to get into slack or limited ways. For the sake of those students, also, who wish to take up Geology as a profession, it would be an advantage to have as Professor a man who is in touch with the mining community, and can secure posts for those graduates who are suitable for prospecting work. Whether an officer be transferred permanently or temporarily, there is no doubt that this advantage alone would be sufficient to give a Geological Survey officer a value beyond that which could be found in any recruit from Europe. The Professorship of Geology at the Presidency College in Calcutta has always been held by an officer of the Geological Survey, and in spite of the disadvantage of having only a part-time officer, the classes have been most distinctly successful; they have grown to such an extent that it is now impossible for the Professor to give the amount of attention to the students that they require. The Education authorities in Calcutta

think that they now deserve a whole-time Professor of Geology; but in my opinion it will be more profitable for them to increase the staff of subordinate Lecturers: they will find that as soon as the Professor is made independent of the Geological Survey, the popularity of the courses will disappear. While an officer of the survey can devote a part of his time to the college in his head-quarters station, this arrangement would not be possible in Madras, and I consequently suggest consideration of the following courses, the first more desirable than the second, and both immeasurably superior to the proposal to secure a recruit from home:—

- (a) Transfer an officer of the Geological Survey for three years.
- (b) Transfer an officer of the Geological Survey to the Education Department permanently.

EDUCATIONAL DEPARTMENT.

The demi-official from Mr. H. G. Stokes and its enclosure may be forwarded u.o. confidentially to the Director of Public Instruction for remarks on the suggestion therein made regarding the appointment of Professor of Geology of the Presidency College.

L. M. WYNCH—28-1-10.

K. RANGASWAMI AIYANGAR—28-1-10.

C. A. SOUTER—28-1-10.

To the Director of Public Instruction.

L. M. WYNCH—28-1-10.

OFFICE OF THE DIRECTOR OF PUBLIC INSTRUCTION.

I like the idea and appreciate Sir Thomas Holland's arguments.

I presume the head of the survey would not do more than nominate some one for the approval of this Government and that the latter would have the right to return him if unsatisfactory at any time. On this understanding the appointment might be nominally for three years renewable at the option of this Government.

This must not be a dumping ground for the least useful or desirable member of the survey and I do not know how effectively the Government will be able to guard against this.

A.G.B.

A. G. BOURNE—29-1-10.

To the Educational Department.

EDUCATIONAL DEPARTMENT.

(1) Please put up the letter to India asking the Secretary of State to appoint a Professor of Geology.

(2) Note the scales of pay in the two departments and also please note on the point referred to in paragraph 3 of Mr. Stokes' demi-official regarding the question of free quarters.

L. M. WYNCH—1-2-10.

1. Please see letter No. 148, Educational, dated 13th March 1909, and telegram to the Government of India in G.O., No. 366, Educational, dated 20th June 1909.

2. The scale of salary of the Assistant Superintendent in the Geological Department is Rs. 350—30—500 for the first five years and thereafter Rs. 500—50—1,000. There are also three posts of Superintendents on a salary of Rs. 1,000—80—1,400. In the Educational Department, the existing scale of pay of Indian Educational

Service officers is Rs. 500—50—1,000. There are also four personal allowances—two on Rs. 200—10—250 and two on Rs. 250—50—500. Moreover, officers who do not get one or other of the personal allowances after attaining fifteen years' service will be entitled to a special allowance of Rs. 100 per mensem. According to the revised scale recently proposed by the Government of India, the pay of officers of the Indian Educational Service will be Rs. 500—50—1,300 and there will also be a higher scale of Rs. 1,400— $\frac{200}{3}$ —1,800, to which officers who deserve advancement will be eligible to be promoted.

3. With regard to the question of free quarters for the new Professors to be appointed to the Presidency College, attention is solicited to the telegram from the Government of India, No. 531, dated 17th July 1909, in which they specially enquired whether the Professors to be recruited for the Presidency College were to be provided with free quarters. This Government, after consulting the Director of Public Instruction, replied that quarters were not provided—*vide* G.O., No. 366, Educational, dated 20th June 1909. Please see also Dr. Bourne's and Sir George Forbes's remarks on pages 2 and 3 of the notes with that Government Order.

With reference to the Resolution of the Government of India, Home Department, No. 319—331, dated 16th May 1906, the Director of Public Instruction was called upon to submit definite proposals for the provision of quarters for Educational officers in this Presidency. In his reply, which will be found on page 2 of G.O., No. 501, Educational, dated 27th July 1906, the Director of Public Instruction (Dr. Bourne) recommended, as regards the Presidency College, that a grant might be given to the Committee of the Victoria Hostel for erecting quarters for a Deputy Warden, * who, he considered, should be a Brahman member of the staff of the college. In his u.o. note, dated 19th June 1909, on page 2 of the Notes to G.O., No. 366, Educational, dated 20th June 1909, however, Dr. Bourne stated that when the Engineering College was moved, the house now occupied by the Principal of that college might be utilized for quarters for three or four of the bachelor Professors of the Presidency College. No formal proposals have yet been made on this subject, nor could such proposals be made before the Engineering College is moved.

* There is already provision for warden's quarters in the Victoria Hostel.

K. RANGASWAMI AIYANGAR—2-2-10.

Sir Thomas Holland's proposal seems a good one, because a member of the Geological Department must have experience of this country. The only danger is, as Dr. Bourne points out, that this may be a dumping ground for undesirables. This danger could be avoided if this Government were given power to transfer a Professor's services whenever they found him unsuitable.

2. No free quarters can be given at present.

C. A. SOUTER—2-2-10.

Submitted that Sir Thomas Holland's proposal, in which the Government of India are disposed to concur, may be accepted on the conditions named by the Director of Public Instruction, viz.—

(1) that the appointment of an officer of the Geological Survey of India to the Professorship of Geology in the Presidency College should be for a term of three years;

(2) that the selection of an officer should be made by this Government on the recommendation of the head of the Geological Survey Department;

(3) the Government should have the right to revert the officer so appointed within the term of three years if he is found to be unsuitable.

The Government of India may also be informed that free quarters cannot be given at any rate at present. This is so stated in paragraph 2 of India's letter to the Secretary of State on page 3 of G.O., No. 590, dated 30th October 1909.

L. M. WYNCH—3-2-10.

Yes. I agree. We should certainly have a voice in the appointment. We may require a man with special knowledge of petrology at one time or a man whose *forte* is mineralogy or stratigraphical geology at another.

I should think that the petrologist would always be glad to come down here where some of our districts, as Holland used to say, are regular museums.

We may agree with the condition that we must have a voice in finally sanctioning the appointment and have the power of sending the man back if found unsatisfactory.

M. H[AMMICK]—4-2-10.

Please draft.

L. M. WYNCH—5-2-10.

The draft demi-official below is for approval.

K. RANGASWAMI AIYANGAR—5-2-10.

C. A. SOUTER—5-2-10.

Issue.

L. M. WYNCH—7-2-10.

Demi-official—from L. M. WYNCH, Esq., C.I.E., I.C.S., Acting Secretary to the Government of Madras, Educational Department.

To—H. G. STOKES, Esq., I.C.S., Deputy Secretary to Government of India, Home Department.

Dated—Fort St. George, the 7th February 1910.
No.—179-2.

In reply to your demi-official No. 27 (Education), dated 25th January 1910, forwarding a copy of a letter from Sir Thomas Holland suggesting the appointment of an officer of the Geological Survey of India to the Professorship of Geology in the Madras Presidency College, I am directed to say that His Excellency the Governor in Council is prepared to accept the suggestion, subject to the following conditions, namely,—

- (1) that the appointment of an officer should be for a term of three years;
- (2) that the selection of the officer should be made by this Government on the recommendation of the head of the Geological Survey Department; and
- (3) that this Government should have the power of reverting the officer so appointed within the term of three years if he is found to be unsuitable or unsatisfactory.

2. With regard to the enquiry in paragraph 3 of your letter whether the Geological Survey officer will be provided with free quarters, I am to say that free quarters cannot be given at any rate for the present.

Demi-official—from H. G. STOKES, Esq., I.C.S., Deputy Secretary to the Government of India, Home Department.

To—L. M. WYNCH, Esq., C.I.E., I.C.S., Acting Secretary to the Government of Madras, Educational Department.

Dated—Calcutta, the 7th March 1910.
No.—67 (Education).

I am desired to refer to the correspondence ending with your demi-official letter No. 179-2, dated the 7th February 1910, and to say that, while the Government of India approve of the conditions on which the Governor in Council is prepared to appoint an officer of the Geological Survey of India to the Professorship of Geology at the Madras Presidency College, they think that the third condition might well be made reciprocal, that is to say, in the event of the officer appointed being dissatisfied with his position, he should have the option of resigning the appointment after giving due notice of his intention.

2. I am to enclose extract paragraph 1 of a demi-official letter, dated the 24th February 1910, from the Director, Geological Survey, in which he recommends Mr. Murray Stuart for the post in question, and to inquire whether the Governor in Council is willing to accept the Director's nomination. We should be glad of an early reply as the Secretary of State has still to be addressed on the subject.

ENCLOSURE.

Demi-official—T. H. D. LA TOUCHE, Esq., Director, Geological Survey.
To—A. C. McWATERS, Esq., I.C.S., Under Secretary to the Government of India, Department of Commerce and Industry.
Dated—Calcutta, the 24th February 1910.
No.—949.

I found your letter of the 17th instant awaiting me on my return from Assam yesterday. I have now received replies from all the men in the field, and have no hesitation in recommending that Mr. Murray Stuart, who, with Mr. Walker, is the only officer willing to go to Madras, should be given the appointment. Mr. Walker, though senior to Mr. Stuart, is at present employed on the revision of the geological map of the Raniganj coal-field, and he could not be spared until he has completed this work, which will occupy him at least until the end of the rains and perhaps during a part of next field season. Mr. Stuart, on the other hand, would be able to join the appointment soon after his return from Burma, as he could work up the results of his present season's work as well in Madras as here. He is one of the best of our junior officers and, although he has only two years' service, has already published some excellent papers in our "Records" and is doing very good work in Burma. Indeed I shall be sorry to lose his services in that quarter, as he has already done much to elucidate the somewhat complicated geology of the Prome and Henzada districts. He has also had some experience of teaching Geology under Professor W. S. Boulton at the South Wales University and is, I am convinced, well qualified for the post.

EDUCATIONAL DEPARTMENT.

The Government of India approve of the conditions on which the Madras Government are prepared to appoint an officer of the Geological Survey of India to the Professorship of Geology at the Presidency College. They, however, think that the third condition might well be made reciprocal, that is to say, that while the Madras Government should have the power of reverting the officer selected for the post of Professor of Geology within the term of three years if he is found to be unsuitable or unsatisfactory, the officer selected should have the option of resigning the appointment, after giving due notice of his intention, in the event of his being dissatisfied with his position.

2. The Government of India also forward an extract from a demi-official letter from the Director of Geological Survey in which that officer recommends Mr. Murray Stuart for the post of Professor of Geology at the Presidency College, and enquire whether the Governor in Council is willing to accept the Director's nomination. Mr. Murray Stuart is an officer of two years' standing and is now working in Burma. Mr. La Touche, Director of Geological Survey, states that Mr. Stuart is one of the best of his junior officers, that he has already published some excellent papers in the Geological Records and that he is doing very good work in Burma. It is also stated that Mr. Stuart has had some experience of teaching Geology under Professor W. S. Boulton at the South Wales University and Mr. La Touche is convinced that Mr. Stuart is "well qualified for the post" of Professor of Geology at the Presidency College, Madras.

3. Orders are solicited whether the modified condition suggested by the Government of India may be accepted and whether the nomination of Mr. Murray Stuart for the Professorship of Geology may be approved.

K. RANGASWAMI AIYANGAR—15-3-10.

A. GALLETTI—15-3-10

I submit that we may agree that the third condition as to termination of appointment may be made reciprocal and also that we may accept the nomination of Mr. Stuart.

L. M. WYNCH—15-3-10;

I see no objection to the arrangement proposed or to taking Mr. Stuart. His Excellency should see the papers before the letter goes in reply.

M. H[AMMICK]—17-3-10.

Please draft.

L. M. WYNCH—18-3-10.

The draft is for approval.

K. RANGASWAMI AIYANGAR—18-3-10.

A. GALLETTI—19-3-10.

The draft is submitted for approval.

L. M. WYNCH—19-3-10.

I accept the draft.

A. L[AWLEY]—20-3-10.

This ought to have gone to the Honourable Member first as it was marked for the Honourable Member and His Excellency. However as His Excellency has accepted the draft, and the Government of India asked for an early reply, the letter may now issue.

L. M. WYNCH—21-3-10.

Demi-official—from L. M. WYNCH, Esq., C.I.E., I.C.S., Acting Secretary to the Government of Madras, Educational Department.
To—H. G. STOKES, Esq., I.C.S., Deputy Secretary to the Government of India, Home Department.
Dated—Fort St. George, the 21st March 1910.
No.—470-1.

With reference to your demi-official No. 67 (Education) of the 7th instant on the subject of the appointment of an officer of the Geological Survey of India to the chair of Geology at the Presidency College, Madras, I am directed to state that the Governor in Council has no objection to the condition regarding the termination of the service of the officer appointed being made reciprocal. His Excellency the Governor in Council also accepts the nomination of Mr. Murray Stuart for the appointment at the Presidency College.

From the Government of India, Home Department (Education), dated 29th August 1910, No. 892.

Circulated in advance for information to—
