GOVERNMENT OF MADRAS.

EDUCATIONAL DEPARTMENT.

READ—the following papers :—

I

Letter—from the Hon'ble Mr. J. H. STONE, M.A., F.R.H.S., Acting Director of Public Instruction, Madras.
To—the Secretary to Government, Educational Department.
Dated—the 20th October 1911.
No.—Ref. on Cur. 5210.

I have the honour to submit the enclosed applications with the necessary plans and estimates for aid towards the cost of (1) a site which has been already purchased (Rs. 5,000) and (2) constructing a building (Rs. 2,423) to be used as a laboratory in connection with the B.G.M. High School, Mangalore, and to recommend that a third grant of Rs. 2,474 be sanctioned under rule 51 of the Grant-in-Aid Code.

2. A laboratory is necessary as all that the school possesses at present is a make-shift accommodated in the teachers' room.

3. The purchase of the site was found necessary not only for the construction of a laboratory but also to render the condition of the school premises sanitary by the removal of certain malodorous latrines situated upon it.

4. The mission was forced to purchase the site in anticipation of the aid now sought for as it was apprehended that the result of delay might be the loss of the opportunity of securing the site at all.

5. The grant towards the site may be paid after the sale-deed has been examined by me and after it has been duly certified by the Revenue authorities that the price paid for it is reasonable.

6. The nature of the soil and sub-soil is shown in the site plan as "hard." The management is being asked to furnish detailed particulars on the point, and they will be submitted after receipt.

II

Letter—from the Manager, B.G.M. High School, Mangalore.
To—the Director of Public Instruction, Madras.
Dated—Mangalore, the 20th October 1911.
No.—66.

With reference to your letter Cur. No. 5210/11, dated 20th October 1911, I have the honour to inform you that the nature of the soil of the site on which the proposed laboratory is to be constructed is hard clay mixed with stones. It has been used for erecting buildings for more than a century. This soil gradually turns into hard sub-soil consisting of laterite from a depth of 2 feet downwards.

Ref. on Cur. No. 5210/11, dated 6th November 1911.

Submitted to Government with reference to paragraph 5 of this office letter Ref. on Cur. No. 5210/11, dated 20th October 1911.
