Note by the Chief Engineer, Public Works Department, No. 1501-C,
dated 14th February 1913.

The Director of Public Instruction submits through the Educational Department for sanction estimates amounting to Rs. 15,500, the particulars of which are given below, and four plans for constructing a hostel for the students of the Zamorin's College, Calicut :—

	Rs.
(1) Hostel including kitchen, dining-room, store-room, bath-rooms and well	13,000
(2) Warden's quarters	1,950
(3) Latrine of seven seats	550
Total	15,500

II. The plans and estimates have been scrutinized in the Chief Engineer's office and the following alterations have been made :—

- (1) Providing a stronger abutment for counteracting the thrust of the arch in the front wall of the porch of the hostel.
- (2) Increasing the thickness of all the walls carrying the weight of the roof from 0' 9" to 1' 1½".
- (3) Altering, where necessary, the scantlings of roof timbers as figured in the plans and estimates.
- (4) Correcting an error involved in the totalling up of figures in the abstract estimate for the hostel.
- (5) Increasing the amounts provided for "contingencies and petty supervision".

III. By these alterations the total amount of the estimates has been increased from Rs. 15,500 to Rs. 16,000.

IV. It is recommended that the Mangalore tiles of roof should be fixed in mortar over flat tiles or matched boarding provided under rafters of students' rooms and that all wood work should be painted or woodoiled.

V. The well is very close to the building. It is recommended that it should be shifted to some distance.

VI. The Superintending Engineer should satisfy himself about the suitability of the foundations.

VII. With these remarks the estimates, as altered by the Chief Engineer aggregating Rs. 16,000 are recommended for sanction.

The floor space provided in the plan is not in accordance with the rule laid down in the notification dated 1st May 1912 published in the *Fort St. George Gazette*, dated 21st May 1912. There need not be the slightest fear of the health of the occupants suffering through foul air in this building. The notification might well have been qualified by some remark to the effect that, in a climate where no rooms are hermetically sealed, the two factors which should govern floor space are—

(1) elbow room, and

(2) ventilation or the speed with which air in a room would be charged.

(elbow room meaning space required for specific purposes, such as sleeping, chemical work, writing, etc.).

With these remarks, the case may, it is submitted, be returned to Educational.

EDUCATIONAL DEPARTMENT.

The existing provision in the Grant-in-Aid Code and Educational rules regarding floor space in schools was inserted in Article 51 (ii), page 10, of G.O. No. 370, Educational, dated 1st May 1912. Rule 33 (ii) of Madras Educational Rules. 1904. Please see G.O. No. 168, Educational, dated 10th March 1904, and G.O. No. 175, dated 12th March 1904. The question of altering the existing rule may be taken up separately. In the meanwhile the Public Works Department may be requested to state whether without reference to the rule regarding floor space the plans and estimates in the particular case dealt with in this file may be approved.

Before doing so it should be decided definitely whether the rule will not be insisted on. Apparently each of the rooms is to accommodate only one student. The floor space of each room is 69 square feet ($5'9'' \times 12'$) as against 80 square feet prescribed in rule 51 (ii). Page 10 of G.O. No. 370, Educational, dated 1st May 1912.
