GOVERNMENT OF MADRAS.

EDUCATIONAL DEPARTMENT.

READ—the following papers :—

I

Letter—from the Hon'ble Sir ALFRED BOURNE, K.C.I.E., D.Sc., F.R.S., Director of Public Instruction.

To—the Secretary to Government, Educational Department.

Dated—Madras, the 7th January 1913.

No.—Ref. Cur. 2935/12.

I have the honour to submit the enclosed plans with estimates amounting to Rs. 14,650 for the construction of warden's and servants' quarters in connection with the American College, Madura, and to recommend that a half grant of Rs. 7,325 may be sanctioned.

2. It is evidently advantageous to have the servants living in sanitary houses on the spot and under the control of their masters rather than in Paracheries from which they might introduce infection into the hostel and college premises.

3. The nature of the soil and subsoil with their depths has already been reported in connection with another application for aid towards the cost of providing additional hostel accommodation for the college (*vide* this office Ref. on Cur. No. 6139-A11, dated 30th August 1912).

II

Note by the Chief Engineer, Public Works Department, No. 3030-C, dated 2nd April 1913.

The Director of Public Instruction submits through the Educational Department detailed estimates amounting to Rs. 14,650 and four plans in connection with a grant-in-aid towards the cost of constructing the warden's and servants' quarters attached to the American College, Madura.

The plans and estimates submitted are—

	RS.
(1) Warden's quarters	11,300
(2) Servants' quarters, stables and coach-house	3,350
Total	14,650

II. The plans and estimates have been scrutinized in the Chief Engineer's office and the following alterations have been made :—

(1) Providing a king post truss roof instead of a couple roof over rooms of first floor of warden's quarters.

(2) Providing two girders side by side 12" × 5" at 32 lbs. each to support the walls at sides of stair chamber instead of a single girder 10" × 6" at 42 lbs.

(3) Increasing the section of the girder supporting the main wall of bath rooms, on the first floor from 10" × 6" at 42 lbs. to 14" × 6" at 57 lbs.

(4) Altering the sizes of other girders and floor and roof timbers as figured in the plans and in the detailed schedule of quantities prepared in the Chief Engineer's office.

III. By these alterations, the total amount of the estimates has been increased from Rs. 14,650 to Rs. 14,800.

IV. It is advisable to avoid carrying masonry walls on girders where possible. The walls of stair chamber in upper storey might therefore as an alternative be just as well supported by masonry walls below, pierced by arches between piers. As the walls of the upper storey carry a roof they should in this case be 1' 1½" thick; and the corresponding walls on the ground floor 1' 6" thick. The steps need not undergo any re-arrangement. The flaps dated 24th March 1913 and 28th March 1913 show the details of this proposal.

V. In plan No. 1 it is stated that the slope of the roof is 3 to 1 for rooms over first floor and 1½ to 1 for verandahs and rooms in other places.

For a Mangalore tiled roof the slope should be about 30 degrees.

VI. The rates for some of the items in the estimate seem to be low.

VII. The Superintending Engineer should satisfy himself as to the suitability of the foundations.

VIII. With these remarks the estimates as altered by the Chief Engineer amounting to Rs. 14,800 may be approved.

C. A. SMITH,
Chief Engineer, Public Works Department.
