FROM

J. J. O'REILLY, Esq.,

EXECUTIVE ENGINEER,

South Presidency Division,

TO

THE Chief Engineer, P. W. D.

THRO'

The Superintending Engineer,

V Circle, Madras.

SIR,

I have the honour to forward herewith a letter received from the Correspondent, Wesleyan Mission -- Girls' School, Royapettah together with a copy of a Memo drawn up by Messrs *Lewis* who prepared the plans and estimates for the proposed addition to the School, together with a tracing of the proposed alterations, for such orders as you consider necessary.

I have the honour to be,

Sir,

Your most obedient servant,

Forwards
Executive Engineer.

Copy of Communication.

No. nil.

Dated 27th March 1913.

From Correspondent, Wesleyan Mission Girls' High School.
Royapettah.

To The Executive Engineer, Presidency Division.

you
I have the honour to forward herewith a memo drawn
up by Mr. J. M. Lewis, Architect, who prepared the plans
and estimates for the proposed addition to the Wesleyan
Mission Girls' High School, Royapettah. Your permission
is asked to three small changes in the details of the --
work. I shall be glad if you can give me your reply to
these requests at an early date.

P. S. The work will be carried out under Mr. Lewis's
personal supervision.

PROPOSED upper room for the Wesleyan Mission Boarding --
School, Royapettah,

1. The greatest distance apart of the steel girders to carry the new floor is 10 Ft., ^{the} next girder is 8 ft. apart, average = 9 feet - the span = 20 ft, weight to be borne plus live load = 170 Lbs. per Sq. Ft.

9' x 20' x 170 Lbs. = 13.66 Tons.

2/11/14
29 APR 1914
The girders I provided were 15" x 5" x 42 Lbs. Messrs --
Dorman Long Tables give 14 tons as the safe load for this section, over a 20 ft span.

These ^{girders} are altered to 14" x 6" x 57 Lbs. per foot to carry 19 tons over a span of 20 ft. This section is not available and will have to be specially imported. --girders 14" 6" x 46 lbs. to carry 15 tons are available. Permission is requested to use them.

2. To relieve ^{the} weight over the ^{arches} ~~articles~~, framed partitions with brick nogging with a truss above, was designed. It is now directed that a steel girder of 12" x 5" section ~~and~~ ^x 32-lbs. be placed under the bearings of trusses to carry the -- weight of the roof. As the verandah roof is now continuous without a break permission is requested to have lighter frames with lamnite sheeting, instead of brick nogging.

3. All the teak beams supporting the terrace roofs of the -- surrounding rooms are to be removed and replaced by 12" x 5" x 32 Lbs per foot steel girders, this being the case, permission is requested to rest the verandah pillar on the terrace according to the plan first submitted if necessary the girders coming under the verandah posts can be made 12"x5"x39 Lbs. per ft

NOTES.

CP 2808 AR From the S. S. D. Aick N^o
495W-30 4.13

DE

In G.O. No. 121 of 12.2.13, the Govt in the Educational Deptt sanctioned a grant for providing additional accommodation for the Wesleyan Mission Girls' Boarding School, Royapetah, subject to the condition among others that in carrying out the work the suggestions in the Chief Engineer's note read in the G.O. were adopted.

2 The Correspondent of the School now asks permission to make the following three changes in details:—

- (a) To use for supporting the terrace floor of the main hall Rolled Steel joists $14" \times 6" \times 46$ lbs instead of $14" \times 6" \times 57$ lbs recommended by the Chief Engr.
- (b) To have lighter frames with lath and wire sheeting instead of brick nogging.
- (c) To rest the verandah pillar on the terrace according to the plan originally submitted, the girders under the verandah posts being if necessary

The Chief Engineer ^{appears} to the changes (a) + (b). As regards (c) the C.E. considers there must be, directly under the verandah post, either a ~~the~~ girder or a cross piece transmitting the load of the verandah posts to the ^{two} girders. In the original plan the verandah post ~~was~~ was not directly over a girder or a cross piece. The rolled steel joists 12" x 6" x 32 lbs, are strong enough.
