OFFICE OF THE SECRETARY,

Town High School Association Ltd.

Kumbakonam 2nd May, 1913.

No. 239

From

THE SECRETARY,

Town High School Association Ltd.,

KUMBakonam.

To

THE DIRECTOR OF PUBLIC

INSTRUCTION,

MADRAS :

Sir,

I have the honor to submit the following for your favourable consideration.

1. In Proceedings Dis. No. 5225/12 dated 30-7-12, the plan and estimates submitted by the Town High School Association were approved with certain modifications. The construction is now fairly progressing.

2. It will be found from the plan that the annexe is a long Hall of uniform breadth 146 feet by 24 feet.

3. The Inspector of Schools VI Circle in his inspection report of 1910-1911 observes as follows:--

"Proposals and plans of an extension have been drawn up and submitted. It is proposed to convert the Eastern verandah of the front block into a set of class rooms. The new set of rooms is to be 150 feet x 25 feet. This if approved of should be used for Laboratory and Library purposes. A more or less permanent screen should be put <sup>up</sup> between the library and laboratory. The Library should be 50' x 25'. The science part should have three rooms (i) 40' x 25' (ii) 15' x 25' (iii) 45' x 25' to be used respectively as 1. Practical room 2. Store room and 3. Demonstration room.

I have the honour to be  
Sir,  
Your most obedient servant,

Between these there may be screens. Room (3) should have a portion set apart as a "Preparation room" with a screen. Between it and the rest of the room there can be a couple of B. B's in a frame and a screen for lantern projection."

4. In view to comply with the said recommendations and make proper provision for using the northern portion of the new hall as an efficient, up-to-date, and well-equipped laboratory, store-room, and demonstration room, the Head master in consultation with Mr. T.K. Hanumantha Row the Science Lecturer of the Government College and Mr. C.A. Mahadeva Sastrigal B.A., B.C.E., retired Engineer - both members of the Town High School Association, proposed certain alterations of a minor nature in the size of the windows, placing of doorways etc, so as to allow placing of work benches along side the walls and to allow of sufficient light.

5. The Association has approved of all the suggestions made, to make the whole compartment a well-equipped special science class etc.

6 The suggestions made are the following:---

(a) In the northern wall which is one foot 10 $\frac{1}{2}$  inches thick, a recess 7 feet wide 9 feet high and 6 inches deep to be made, to receive a fume cup-board and to construct a chimney for fume escape, on the same pattern as provided in the College science laboratory. (New)

(b) In the present plan two doorways are provided on the eastern side in the first 40 feet from the northern end. To facilitate placing work benches etc, along side the wall it is proposed to put up two windows in place of the doorways. There will be 6 windows in all two as in the plan on the western side and four including the newly suggested ones on the eastern side in the first 40 feet. It is proposed to reduce the height of these windows--

from 6 feet to  $4\frac{1}{2}$  feet, in order that the windows may be just above <sup>the</sup> work tables--so that as now proposed the said 6 windows will begin from  $1\frac{1}{2}$  feet higher than the rest of the windows, but maintain the same level on the top.

(c) To enable access of light for the science laboratory in particular, glass windows are provided for 12 -- windows from the north, on both sides.

(d) To economise space inside it is proposed to have the plank doors for all the windows open outside. It will be found that the Calicut tiled sun shade for each doorway and window recommended in the modifications contained in Dis. No. 5225/12 affords sufficient protection from sun and rain.

(e) It is proposed to have a vertical connecting bar in the middle for all <sup>the</sup> window frames to give them greater -- strength and tight closing of the doors.  $\left[ 4\frac{1}{2} \text{ ft. } \cdot 4\frac{1}{2} \times 3\frac{1}{2} \text{ inches} \right]$   
length. thickness.

(f) In the northern most room 3 rows of pegs on the eastern and western side walls are provided.

7. It will be found that most of the alterations are quite necessary as recommended by the Inspector of Schools and that they do not in any way change the general design, or involve any structural deviation from the original plan.

8. To get work done during the holidays and in order to enable the Association to have the use of the new hall as soon as possible and to make it completely ready and - equipped so as to be formally opened on the School Jubilee day 13th April, 1914, the Association fully trusting that these slight modifications will have your approval <sup>and</sup> ~~and~~ sanction has asked the contractor to proceed with the work embodying the said few modifications.

9. I shall send up the estimate for the alterations - now suggested, as soon as it is ready. I think the difference will indeed be very little.

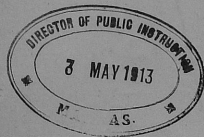

10. In the circumstances, I request you will be pleased to sanction the suggestions introduced, agreeably to the recommendations of the Inspector of Schools, and direct early communication of the same to me.

I have the honour to be,

Sir,

Your most obedient servant,

JK J. J. J. J. J.  
Secretary.  
2<sup>nd</sup> May 1913.

228  
I think this will have  
to go to fort thro' sec  
to C.E. The part will  
not be altered. C.E.  
may want the plan  
to compare.

perhaps Complete Army  
may be altered
