4129. — Rectifying Crystal Detector. This detector operates best without either potentiometer or battery, and is exceedingly simple in operation. The crystal is held in a brass cup mounted on a detector stand; an exceedingly fine adjustment of pressure is easily obtained by means of the triple spring operated by the hard rubber knob. This detector is extremely sensitive, and messages can be received by it (on suitable aerial) up to distances of 800 miles ... Price **£1 15 0**

Our Balances and Weights have achieved World-wide Reputation: *vide* Opinions of the Leading Scientific Press.

FROM

THE HON'BLE MR. H. SHARP, C.I.E., I.C.S.,

Joint Secretary to the Government of India,

To

The Secretary to the Government of Madras,
Education Department.

Department of Education,
Education.

Delhi, the 12th March 1913.

SIR,

By the Department of Commerce and Industry Notification no. 5120-73, dated the 14th July 1909, the importation of apparatus for wireless telegraphy into British India has already been restricted and it is under contemplation to amend the Indian Telegraph Act so as to make the possession of such apparatus except under a license illegal. The Government of India are advised that licenses to import or possess apparatus for wireless telegraphy should not be granted to educational institutions and that those now in possession of any apparatus or parts thereof should be required to make them over to the Director General of Posts and Telegraphs. No definite information is available as to such institutions. I am directed to suggest that if *His Excellency* the Governor in Council has no objection, the necessary inquiries might be instituted to ascertain the fact of possession and to request that arrangements may then be made with the College authorities concerned for the delivery of the articles to the Director General of Posts and Telegraphs.

I have the honour to be,

SIR,

Your most obedient servant,

H. Sharp
Joint Secretary to the Government of India.

F.R.S., F.C.I.B.,

(Designation) Director of Public Instruction.

To the Secretary to the Government of Madras,
Educational ~~Local and Municipal~~ Department.

S i r,

With reference to your memorandum No. 990-1, dated 1st April 1913 referring for enquiry and report the letter from the Government of India No. 451-459 C.D., dated 12th March 1913, I have the honour to state that the Victoria College, Palghat, has a set of apparatus for experiments in wireless telegraphy and that the Principal, Government Arts College, Rajahmundry, reports that the science lecturer used to ~~make~~^{run} up some apparatus temporarily for purposes of demonstration. The replies received from the Principals of the above mentioned two institutions are enclosed for reference.

2. The authorities of the Noble College, Masulipatam, and the Venkatagiri Raja's High School, Nellore, are

From, The Principal, Victoria College
To, The Director of Public Instruction,
Sir,

In reply to your R.C.No. 2889/13, dated 10th June 1913,
I have the honour to state that we have in our Physical
Laboratory a set of apparatus for experiments in wireless
telegraphy (diagram enclosed, Becker's no. 4124). It
is only a small working model and if you consider that we
should not keep it I would request you to be good enough
to let me know to whom it should be handed over.
The college re-opened only yesterday, hence the delay in
replying to your communication.

I have the honour to be,

Sir,

Your most obedient Servant,

A. H. Davey

Principal.

From

O. J. COULDREY, Esq., M.A.,

The PRINCIPAL,

To

THE DIRECTOR OF PUBLIC INSTRUCTION.

MADRAS.

SIR,

With reference to your Proceedings
R.C. No 2889 of 1912, dated 1.5.1913, I have the honour
to report that no Wireless Telegraphy is permanently
set up in this College; but the Science Lecturer
reports that, for purposes of demonstration, he used to
rig up one temporarily in the Laboratory of the College
in its most rudimentary form.

I have the honour to be,
Sir,

Your most obedient servant,

Carvill Gopuram

Subject.

Wireless telegraphy apparatus.

Please see the Director of Public Instruction's letter on page 3 of the current file and Mr. Davey's letter on page 5.

2. Only one institution, namely, the Victoria College, Palghat, has a set of wireless telegraphy apparatus. As suggested by the Government of India, the Director of Public Instruction may be requested to arrange with the College authorities for the -- delivery of the apparatus to the Director-General of Post and Telegraphs.

As regards the practice of fitting up temporary apparatus at the Rajahmundry College for -- demonstration purposes, it is for consideration -- whether such practice should also be stopped. Attention is invited to G.O., No.285 Ed., dated 5th April 1913 in which, at the instance of the Government of India, questions on wireless telegraphy have been prohibited. ^(at Rajahmundry) Subject to approval instruction as to this has been included in the draft submitted below. If approved, the draft may be sent to the Local and Municipal Department for acceptance.
