Ms SERIES.

G.O., No. 1068

DATED 20 Nov 1913.

DESPATCHED

[Despatch Abstract.]

Same, to Sir. Recording letter from the post
of India forwarding the application of
for a place in the Indian Civil Service with
Madras Presidency.

Recd. Received in today's tappal.
 2/8 Submitted for perusal.
 M.
 9.11.13. No. 2110.
 Government of India,
 DEPARTMENT OF EDUCATION.
 (Education)
 To—The Hon'ble Mr. H. Sharp, C.I.E.,
 Joint Secretary to the Government of India,
 Simla, the 4 October 1913.
 I beg most respectfully to offer myself for employment as a Professor of
 Chemistry or as a Research Chemist in the Educational Department of India.
 From birth at Allahabad in 1884, and was educated at the local High School
 and the Muz Central College, where I took the B.A. and B.Sc. degrees in
 1902. The Hon'ble Mr. H. Sharp, C.I.E., examination for
 the 1st B.Sc. in Physics in 1905. During the period of six years that I was at
 college I held Government Joint Secretary to the Government of India,
 to 1906, and was also awarded the Elton Scholarship for the year 1903-06.
 To In Autumn 1906, I proceeded to Germany where I joined the Royal Techni-
 cal High School at Berlin. In October 1907, I was awarded the Ph.D. degree and passed the
 examination in 1908. Though a student of the University of Berlin, I was
 the Technological Institute of the Royal Technical University of Berlin.
 year 1905-06 and 1906-07, at the instance of the Superintending Pro-
 fessor of Education, the results of which were afterwards embodied in a Master's
 degree of the University of Berlin. I passed the examination for
 the degree of Doctor of Philosophy in 1908.
 I am directed to forward a copy of the marginally
 noted papers with a
 view to bringing the
 name of Dr. S.M. Sane

to the notice of the Government of Madras.

He recently officiated as Professor of Chemistry in the Government College, Lahore.

2. I am to request that should the Governor in Council, desire to secure Dr. Sane's services for temporary vacancy in the Indian Educational Service in the Madras Presidency he should be addressed direct in the matter.

I have the honour to be,

Sir,

Your most obedient servant,

Joint Secretary to the Govt. of India.

Dated Daragunj, Allahabad, the 6th October 1913.

From—DR. SHRIRANG MORESHWAR SANE,

To—The HON'BLE SIR HARCOURT BUTLER, K.C.S.I., C.I.E., etc., Simla.

I beg most respectfully to offer myself for employment as a Professor of Chemistry or as a Research Chemist in the Educational Department of India

I was born at Allahabad in 1883, and was educated at the local High school and the Muir Central College where I took the B. A., and B. Sc degrees in 1904. I joined the D. Sc. class the same year and passed the examination for the 1st D. Sc. in Physics in 1905. During the period of six years that I was at college I held Government scholarship from 1900 to 1902 and again from 1904 to 1906, and was also rewarded the Elliot Scholarship for the year 1905-06.

In Autumn 1906, I proceeded to Germany where I joined the Royal Technical High school, Berlin (Chalottenburg), taking chemistry as my principal subject. In October 1907, I joined the University of Berlin, and passed the "Verbands examen" in 1908. Though a student of the university, I continued to work at the Technological Institute of the Royal Technical High School and during the year 1908-09 and 1909-10 undertook, at the instance of the Superintending Professor, an investigation, the results of which were afterwards embodied in a Dissertation which I submitted to the University of Berlin. I passed the examination for the degree of Doctor of Philosophy in July 1910, with the predicate "cum laude."

In October of the same year, I joined, as a volunteer, the colour works of Meister Lucius and Brüning at Höchst on Main, and remained there until July of the following year. In October 1911, I was appointed Research Assistant in Professor Witts' Technological Institute at the Royal Technical High school, Berlin, and I worked in that capacity until August 1912. I herewith attach three testimonials which speak of my six years' work in Germany.

Since my return to India last year, I have acted for few months as Professor of Chemistry at the Government College, Lahore.

I may also mention here that my father served in the Education Department, United Provinces, for more than thirty years, prior to his retirement in 1891. I am also related to Mr. B. G. Tilak; he is my father-in-law.

Should my application be taken into consideration and I am entrusted with a responsible post, I beg to assure you, Sir, that Government will find in me a most conscientious and loyal worker.

(Translation.)

I hereby certify that Dr. Shrirang Moreshwar Sane of Allahabad, India, worked in my Institute for seven consecutive terms, from autumn 1906 until summer 1910. When he arrived here, he had already attended a university in his own country, and had also studied some chemistry there. He, however, at his own wish, commenced his studies afresh and during the first few terms acquired considerable skill in analytical work after passing his "Verbands examen" in 1908, he did some preparative work and then undertook an independent investigation, the results of which were embodied in the Dissertation, "Untersuchungen über Nitrophenole," which he submitted to the Philosophical Faculty of the University of Berlin. He passed his examination for the degree with the predicate "cum laude."

During these several years that I have known Dr. Sane, I have come to the conviction that he has made the best use of his time here. He has trained himself to a well-informed, earnest, and conscientious young chemist, who surely is in a position to grasp chemical problems and solve them in a careful manner. The systematic and clean way in which Dr. Sane carries out all chemical work, is a guarantee for the reliability of the achieved results.

I should like to express a hope that Dr. Sane may be able to utilise in his own country the knowledge which he has acquired here in solving some of the numerous problems which are awaiting their solution there. The best wishes of his teachers here accompany him in his task of profitably utilising our methods of research in his own country.

(Sd.) OTTO N. WITT, PH.D.
*Director of the Techno-chemical Institute
of the Royal Technical
University at Berlin.*

CHARLOTTENBURG;

22nd October 1910.

(Translation.)

Charlottenburg, 15th July 1912.

SCHILLER STREET, 14-13.

Dr. Shrirang M. Sane of Allahabad worked at his Dissertation under my supervision, and after passing his examination proceeded to the colour works of vorm, Meister Lucius and Brüning Höchst on Main, where he thoroughly acquainted himself with dyeing from a practical as well as a theoretical standpoint. After his return in October 1911, I appointed him my private assistant.

Dr. Sane helped me excellently in my scientific and technical work, and assisted me in my laboratory instruction most ably. In addition to his extraordinary theoretical knowledge, he possesses a rare experimental skill and can also teach students excellently.

Dr. Sane was one of my best pupils, and I also count him among the best assistants that I ever had.

I regret that he leaves me, wish him well for the future, and am convinced that as an independent teacher and investigator he will achieve good results.

(Sd.) FRITZ ULLMANN.

Colour works, vorm.

15th July 1911.

Certificate.

Dr. Shrirang Sane worked as a volunteer in our experimental Dyeing and Clico-printing Departments from 1st November 1910 until 30th June 1911. During this period he was occupied with the dyeing and printing of cotton and wool, and he also acquainted himself with the preparation of colour-lakes and the dyeing of paper and leather. Dr. Sane is an able and skilful worker, and he always understood how to make the best use of his time here, and to work to our satisfaction.

Farbwerk vorm, Meister Lucius and Brüning,

(Signed) DR. H. VON MEISTER.

Office of the Principal, Government
College, Lahore:

Dated 23rd September 1913.

Dr. S. M. Sane officiated as Professor of Chemistry in the Government College, Lahore, for more than three months in 1912-13, in succession to Professor B. M. Jones, M.A., of the Indian Education Service, who was suddenly obliged to retire.

The permanent post was soon afterwards filled up from England by the appointment of Professor B. N. Wilsdon, M.A., of the Indian Education Service and Dr. Sane's stay was therefore short. The college owes him its best thanks for having consented to take the professorship for so short a time, and for having thus enabled the usual work to go on smoothly and without interruption. During his short stay his sympathetic and helpful attitude were much appreciated by the students, who regretted his loss when he left.

GOVERNMENT COLLEGE,
LAHORE.
