To

The Director of Public Instruction,
Madras.

Sir,

I have the honour to state that under the first condition the Executive Engineer in his No. 2062/10, dated 10th September 1913 stated:--

I have the honour to inform you that the weight of Superstructure on unit length of main walls is 11436 Lbs or 5-1 tons. The weight on 1 Sq. ft of foundations is 1 ton, this is too much. You must increase the width of your foundations to 7.5 ft. This will reduce the weight to .66 tons per sq. ft. only just within the safe limit.

In accordance with the requirements of the Executive Engineer the concrete broken coral stone in surki mortar is increased by the sum of Rs. 259 and such a large foundation necessitated more labour in excavation as practically the whole of the loose sand had to be removed and I shall be very much obliged if a grant amounting to three-fourths of the sum of Rs. 375 may be sanctioned by the Government.

I have the honour etc.,

Correspondent, Caldwell High School,
Tuticorin.
