GOVERNMENT OF MADRAS.

EDUCATIONAL DEPARTMENT.

READ—the following papers :—

I

Letter—from C. B. COTTERELL, Esq., I.C.S., Private Secretary to His Excellency the Governor.

To—the Secretary to Government, Local and Municipal Department.

Dated—the 14th March 1913.

No.—1371-P.

I am desired to transfer to you for disposal by the Government the enclosed telegram, dated 13th March 1913, from Mr. V. Mullari Rao, Chairman of a public meeting held at Tanjore.

ENCLOSURE.

Telegram—from Mr. V. MULLARI RAO, President of a public meeting held at Tanjore.

To—His Excellency the Governor in Council.

Dated—the 13th March 1913.

The citizens of Tanjore in a meeting assembled on 12th resolved as follows: Pray that the final resolution of the Tanjore Municipal Council, dated 28th February, in regard to the town extension scheme be approved by the Government and that early steps may be directed to be taken to bring that resolution into force, care being taken to extend the benefit of the scheme to the poor as well. Memorial will follow.

II

Memorial—from Mr. V. MULLARI RAO, Chairman of the public meeting held at Tanjore.

To—the Secretary to Government, Local and Municipal Department.

Dated—the 18th March 1913.

In pursuance of a resolution unanimously passed at a public meeting of the citizens of Tanjore, whose full text has already been communicated to Government by wire, authorising me to submit a memorial to Government in regard to the own extension scheme of the Tanjore municipality, I beg leave to state the case or it as follows.

2. The frugal gifts that the municipality have been receiving from year to year from Government out of the Provincial sanitary grants have accumulated and been reserved to be devoted for building a new town on the south of the railway station than which a healthier spot suited so admirably for all the purposes of a town extension, could not be imagined. A proposal was accordingly made in consultation with the sanitary advisors of Government and it was eagerly expected it would be passed.

3. At this stage, the Salesian Fathers in Tanjore asked for a large bit of land for their industrial school from the site selected for the town extension, so picked out of the very centre of it that it virtually obstructed the scheme submitted by the municipality. Their request was acceded to by the Council who had departed from their original resolution. The Council, however, subsequently repented, reconsidered their altered attitude, and reaffirmed their original decision in favour of the town extension scheme and restored the matter to its *status quo ante*.

4. These proceedings of the Municipal Council will be laid before the Government in due course. In the meantime, however, the general public more directly interested in the matter have ventured to convey to Government their views in the hope that they would receive full consideration.

5. The extension of the town proposed is an absolute necessity demanded in the highest interests of the populations residing in the fort which may be described as a thick beehive of humanity. This is a fact capable of ocular verification, and indeed, all who have visited the municipality are agreed that no more congestion should be permitted in the fort without seriously imperilling public health.

6. It is unfortunate that any conflict should at all have arisen in the matter of locating the town extension of the municipality and the industrial school of the Salesian Fathers both appealing equally alike to the sympathy and support of the municipality, but a solution of the difficulty—the best possible reconciliation of the interests in conflict—has been reached by the Municipal Council who have on second thoughts, decided to offer to the Salesian Fathers any extent of land that they require on the south of their present building running in close contiguity with it rather than in the north of it on which they would still insist.

7. It goes without saying that the presence in the very heart of the new town, of an industrial school with hostels attached thereto, the students and boarders in them being Indian Christian boys, could scarcely offer any popular attractions for the growth of a Hindu colony around it which requires a soil and an atmosphere quite different from that created by the neighbourhood of Christian surroundings.

8. The resolution of the Municipal Council, if it is only acquiesced in by the Salesian Fathers, would secure to the municipality the extension proposed by it and to the Salesian Fathers their school, and where two such large schemes of public good have an assured chance of success, it is hardly seemly to refuse compromise which guarantees both.

9. The land that the municipality offers to the Salesian Fathers possesses advantages, both present and prospective, that to decline it from any sentimental aspect is not worthy of consideration.

10. They choose a site and they insist on having it which admits of no room for their future expansion except on the south of their existing building which is precisely what the municipality proposes to give them to satisfy their wants, both immediate and remote, an adequate provision for the further developments of their schemes of operations, such as demonstration farms for agriculture, dyeing factories in weaving, workshops and emporiums and all the rest of it.

11. Their objections regarding the so-called obscure location of their shops, the cost of transport of their raw materials and finished products between the

railway station and their place of business are all examined and answered by the sub-committee of the Municipal Council to whose report I invite the attention of Government.

12. From what was to be gathered from their own intentions in regard to their future programme, the school of the Salesian Fathers cannot be regarded as an enterprise of pure public philanthropy, it being apparent that there is in it a large admixture of commercial gain, the sale-proceeds of the articles turned out with the free labour of the students returning to them again as profits; and here the question arises of administrative policy and equity whether a commercial undertaking such as the scheme of the Salesian Fathers is in its naked origin should receive encouragement and precedence so as to supersede a proposal of the municipality to supply the populations entrusted to its care with good and healthy habitations and thus divert the stream from the fort which has become a serious menace to public health as has been frequently warned by the sanitary authorities of Government.

13. The scheme of the Municipal Council's proposals as sketched and matured by it does not contain an adequate provision for the poor; and the public meeting have recommended that their case may be taken into consideration.

III

Letter—from R. B. Wood, Esq., I.O.S., Collector of Tanjore.

To—the Secretary to Government, Educational Department.

Dated—the 15th March 1913.

No.—R.C. 17/Eng.

I have the honour to enclose copy of a letter from the Rev. Eugene Mederlet, the Superior and Manager of St. Francis Xavier's Orphanage and Industrial School, Tanjore, for the acquisition by Government under the Land Acquisition Act of certain land in Tanjore, adjoining the Roman Catholic Church and Industrial School, and to report as follows.

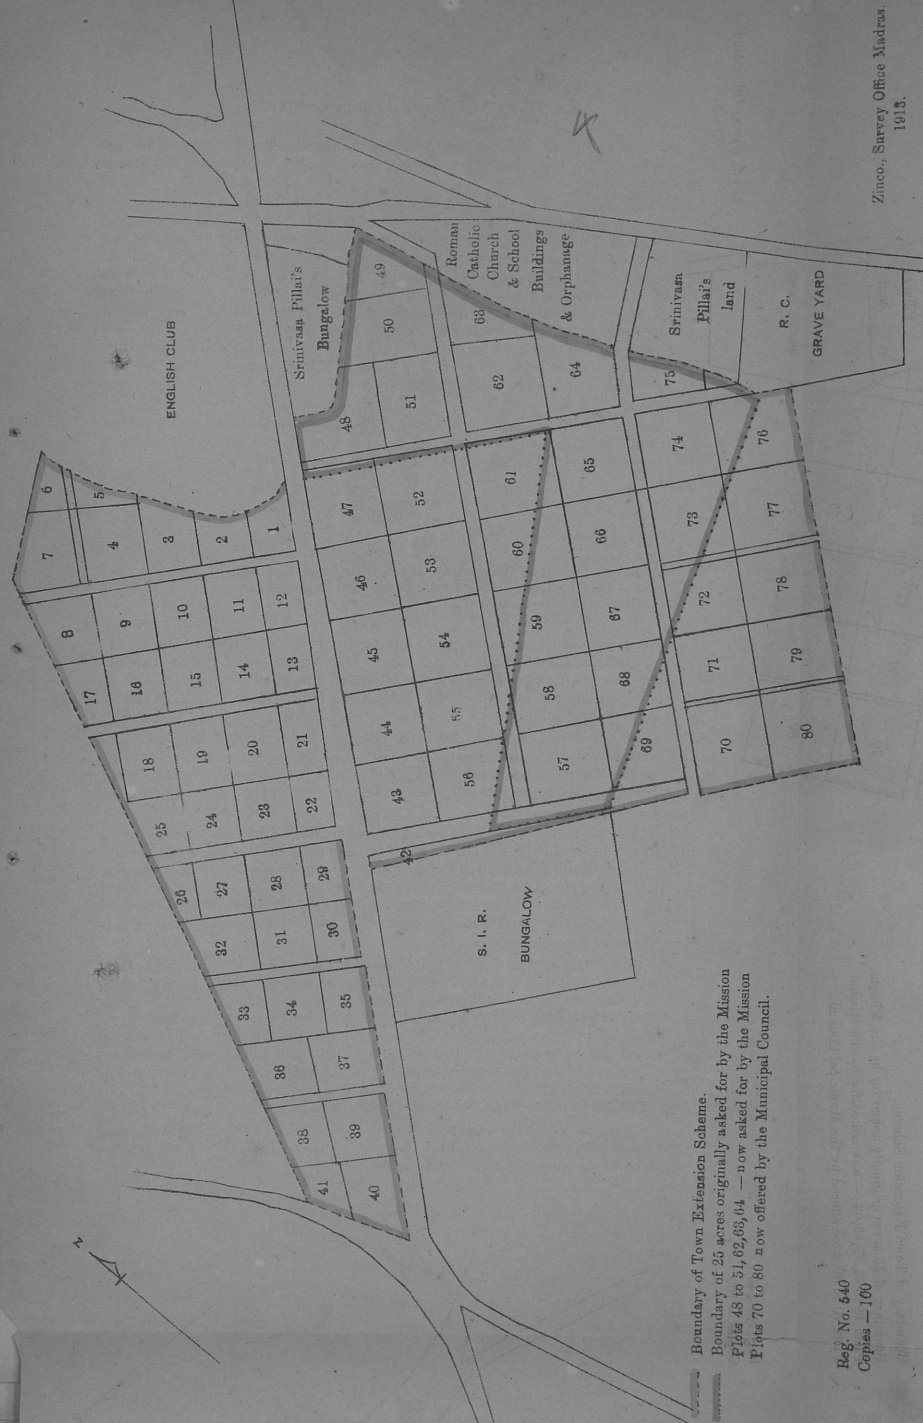

2. The above orphanage is under the Salesian Fathers, and they have in connection with it started an industrial school. The last inspection report upon it is enclosed with the Rev. Mederlet's application, and shows that the total number of pupils is 70, all of whom appear to be children in the orphanage and to be Christians.

3. The school is at present in rather an unfinished state, and the Salesian Fathers intend to rebuild the school, so as to accommodate 150 boys of all creeds. They wish also to build a hostel for the convenience of boys who are not mission boarders, and subsequently to raise their secondary school to the position of a high school. The mission possesses a sum of Rs. 11,000, which they expect to increase to Rs. 16,000 by next June, set apart for the development of the industrial school.

4. For this purpose, the mission first asked for 25 acres which, however, they found themselves unable to buy as most of the land is said to belong to the palace estate, now under a receiver: and hence their application to me to proceed under the Land Acquisition Act, as they are unable to get it by private purchase.

The purpose being educational, it is clearly for a public purpose as referred to in section 4 (1) of the Land Acquisition Act. Further, I understand that Government will give a grant towards the building of the school, and possibly towards the acquisition of the land. *It is only in the latter case that proceedings under the Land Acquisition Act can be taken [vide section 6 (1)], as the mission is not a company.*

5. On verifying the boundaries of the land required, I found that it formed part of the land proposed to be acquired by the Tanjore municipality for a town extension scheme as shown in the sketch below.

Boundary of Town Extension Scheme.
Boundary of 25 acres originally asked for by the Mission
Plots 48 to 51, 62, 63, 64 — now asked for by the Mission
Plots 70 to 80 now offered by the Municipal Council.

Reg. No. 540
Copies — 100

6. I therefore sent the mission's application to the Tanjore Municipal Council, to know what they thought of it. The Council in their resolution No. 55, dated 31st January 1913, resolved that they would not interfere with the application of the mission, as the industrial school would be of great benefit to Tanjore, and the extension scheme could be moved elsewhere.

7. This resolution was very hurriedly passed, without any proper notice to the councillors (in fact, the subject was not on the published agenda of the meeting), and I therefore returned the papers to the Council, pointing out that the extension scheme was as important to the town as the industrial school, and if they proposed to put the extension elsewhere, I should like to know where. The Council held a special meeting, at which they cancelled the resolution referred to above, and appointed a sub-committee to report on the subject. The sub-committee met the mission Fathers, and the latter abandoned their original request for 25 acres, and asked for the block of land comprising plots 48 to 51 and 62 to 64, about 8 acres in extent. The sub-committee recommended that this block should not be given but that plots 70 to 80 should be given up for the purpose of the mission. I enclose the copy of the sub-committee's report, and of the Council's resolution adopting this report. With reference to the sub-committee's report, I have to remark that the objections raised to the building of the industrial school on plots 48 to 51 and 62 to 64, appear, to apply almost equally to plots 70 to 80: and not to be valid. The reference to engines and problematical dye works is in the way of a red herring, for a small horse-power engine in an industrial school is very different from an engine in a factory with a crowd of operatives. If the industrial school is objectionable in plots 48 to 51 and 62 to 64, it must be equally objectionable in plots 70 to 80. If its foundation in the one site is fatal to the town extension scheme, it is equally fatal in the other site. I believe the truth to be that the members of the sub-committee want the plots for house sites to be as near the Vallam road as possible, and feel that the plots 70 to 80 are too far off in the country for private people to relish. An industrial school here would form a sort of protection to the next block of houses. On the other hand, I find it difficult to accept the contention of the mission that they could do nothing with plots 70 to 80, as they are too far from their present land and buildings, and the difficulties of supervision would be insuperable. The Council sub-committee is right in pointing out that if the land behind this block remains unoccupied, it will give them room for extensions in the future. It is probable, too, that this industrial school, based as it will be on their orphanage, though drawing support from other classes as well, will require an agricultural side. For it cannot be supposed that all the orphans will take kindly to industrial education, and those who do not could be taught agriculture with greater advantage. This was in fact the original intention of the mission when they asked for 25 acres.

8. The mission also makes a great point of having a fine entrance on the Vallam road. This is a point which does not appear very important. To conclude, I have little doubt that both the Council and the mission will accept the decision of Government in favour of either plot to go to the mission. Personally, I am rather in favour of their having plots 70 to 80, though the other plots would, from some points of view, be more convenient.

9. I am not at present enclosing a draft notification for any land, as I do not know if Government will give any grant towards the acquisition and as the two parties are unable to come to any agreement. The town extension scheme is at present under scrutiny with the Sanitary Commissioner, and if Government in the Educational Department proposes to make any grant, and approves of the acquisition on behalf of the mission of either site, it may be necessary for the Educational Department to consult him. On receiving the orders of Government, as to which plot the mission should be allowed to have and whether proceedings under the Land Acquisition Act should be taken, I will send up the draft notification.

10. I may add that I do not think that there is any doubt that the school will be well managed, and that it will be a most useful institution for Tanjore.

ENCLOSURES.

Letter—from the Superior and Manager of St. Francis Xavier's Orphanage and Industrial School, Tanjore.

To—the Collector of Tanjore.

Dated—the 30th March 1913.

I beg that you will be good enough to take up the land described hereunder and belonging to the palace estate, Tanjore, under the Land Acquisition Act on the grounds that—

(1) It cannot be acquired by private negotiation as the said estate is now under the management of the Sub-Court, Tanjore, *pendente lite* and as the Sub-Judge cannot sell the land.

(2) It is wanted for a public purpose, *i.e.*, for a purpose which will benefit the community, namely, for an industrial training school for orphans and poor boys of all classes, without distinction of caste and creed.

(3) A rough sketch is herewith enclosed showing the land required; it is marked A and B in the sketch and its area is about 22 acres.

(4) Mr. Tressler in his last inspection report, dated 17th September 1912, says that "the school building is a mere thatched shed, is unsatisfactory and the fittings are very poor. I understand that it is proposed to rebuild the place shortly."

Extract from the Proceedings of the Municipal Council of Tanjore, dated the 22nd February 1913.

PRESENT—16 Councillors.

Read Resolution No. 55, dated 31st January 1913, of the Council agreeing to the acquisition of a site for the industrial school in the place proposed for the town extension and to give up the town extension in the locality if the industrial school is to be established.

Proposed by M.R.Ry. T. Kodhandarama Ayyangar Avargal and seconded by M.R.Ry. T. K. Thasarat Sahib Avargal that the resolution No. 55, dated 31st January 1913, be cancelled.

M.R.Ry. S. Venkatasubbayar Avargal proposes an amendment that the resolution No. 55, dated 31st January 1913, may be cancelled subject to the condition that the Council will provide for both the industrial school and the town extension in the place selected for the extension.

The amendment was seconded by M.R.Ry. I. Kumaraswami Pillai Avargal and lost by a majority of 12 against 3.

The original proposition was put to vote and carried by a majority of 12 against 3.

2. Proposed by M.R.Ry. T. R. Maduramuttu Muppanar Avargal and seconded by M.R.Ry. K. S. Sivarama Pillai Avargal that a committee of the following members be appointed to meet the Salesian Fathers and propose what site may be allotted for the industrial school in the extension and to submit a report before the evening of the 24th February 1913:—

(1) Chairman.

(2) M.R.Ry. Rao Bahadur K. S. Srinivasa Pillai Avargal.

(3) " T. S. Sundaram Ayyar Avargal.

(4) " T. Kodhandarama Ayyangar Avargal.

(5) " Thasarat Sahib Avargal.

(6) " T. A. Ramachandra Chettiyar Avargal.

(7) " T. R. Maduramuttu Muppanar Avargal.

Resolution No. 58.—The proposition was put to vote and carried by a majority of 13 against 3.

Extract from the Proceedings of the Municipal Council of Tanjore, dated the 28th February 1913.

PRESENT—14 Councillors.

Read Report of the committee appointed at the special meeting held on 22nd February 1913 for selecting the place that can be allotted to the Salesian Fathers for the construction of an industrial school.

Resolution No. 94.—Proposed by M.R.Ry. Maduramuttu Muppanar Avargal and seconded by M.R.Ry. Kodhandarama Ayyangar Avargal that the sub-committee's report may be adopted.

Carried by a majority of 10 against 4, dissenting members being Messrs. Rao Sahib Abraham Pandithar, Muthukumara Muppanar, Kumaraswami Pillai and Rao Sahib Ramalinga Ayyar.

Report of the sub-committee appointed on 22nd February 1913 to consider what sites may be granted to the Salesian Mission for their industrial school out of the town-extension site.

With reference to the resolution of the Municipal Council dated the 22nd February 1913 the sub-committee met at 9 A.M. on 23rd February 1913 and made a thorough inspection of the town-extension site in company with the Salesian missionaries. The committee had also a long discussion with the said missionaries on the subject of the location of the industrial school but found that it was not possible to effect a compromise to which the missionaries would agree.

2. The present demand of the missionaries is for the grant of a block comprising plots Nos. 48 to 51 and 62 to 64 shown in the plan of the town-extension scheme attached to this report. This site is approximately 8 acres in extent and lies at the eastern end of the town-extension area. The committee, after a full and careful consideration of all the facts, is strongly of opinion that the request of the mission cannot be complied with for the following among other reasons:—

(i) On this site the mission proposes to locate (a) a big industrial school to teach weaving, carpentry, mechanical engineering and other industrial arts, (b) a hostel to lodge and accommodate a very large number of students, (c) a secondary school, (d) a play ground, etc. The hostel alone means provision for a large number of people for cooking, bed, latrine, etc. In addition to this material source of discomfort and annoyance to residents in the vicinity there is the establishment of industries which are objectionable near residential quarters. Further, the Salesian Fathers say that engines will soon be established in their workshop there and it is very likely that the further development of the industries will include dyeing and other offensive occupations. There is therefore every probability of an industrial school on this site proving a source of positive nuisance to the neighbouring residents under the town-extension scheme.

(ii) As the proposed industrial school is to be a first class one with liberal support from Government it is certain to develop in a centre like Tanjore. The Salesian missionaries seem to be aware of this as will be seen from their own previous application to the Council for the grant of 25 acres of land in the town-extension scheme. But further extension of the industrial school in this locality is not possible as will be quite apparent from the plan and this will certainly lead to difficulties.

(iii) The site is in the midst of residential quarters in the town-extension scheme which is intended for people of the wealthy and middle classes who wish to reside away from business quarters.

3. In view of the abovesaid objections to the grant of site required by the mission and having regard to the exigencies of the proposed industrial school, the committee offered to the mission, subject to the sanction of the Council, the block comprising plots Nos. 70 to 80 both included, which is approximately 12 acres in extent and is situated at the southern extremity of the town-extension area. The main reasons which induced the committee to make this choice are as follows:—

(a) Adjoining this site to the east the mission already owns land running right up to the Nanjikottai road with the exception of a trivial extent.

(b) A small street alone intervenes between this property and the present residence and industrial school of the mission Fathers and even this strip it is possible to assign to them so that the present mission property together with the site offered to them will form one contiguous, compact and spacious area.

(c) There is ample space towards the south for further development of the industries when required.

(d) As it is only on one side that this site adjoins the residential quarters of the town-extension scheme, the objections above set forth in the case of the block required by the missionaries do not exist to the same extent as regards this site.

4. The mission Fathers do not, however, care to accept the block offered by the committee and the reasons urged by them are as follows:—

(a) This site is not sufficiently prominent for purposes of advertisement as it does not abut on the present Vallam road.

(b) That the mission would incur additional cartage for the conveyance of their articles to and from the railway station owing to the longer distance of this site than that of the site asked for by them.

(c) That the mission will experience difficulty in supervision.

5. As regards the first objection, it has to be remembered that the block offered by the committee abuts a road 45 feet broad, proposed to be opened in the town-extension scheme, which will open into the Vallam route and become as important as the present Vallam road. The proximity of the town extension will also give the site sufficient publicity in addition to the fact that the existence of a big industrial school in a centre like Tanjore is itself an advertisement to the same in whatever quarter of the town it may be situated. As regards objections 2 and 3 the block selected by the mission and the block offered to them by the committee are so near each other that the objections raised are more imaginary than real.

6. In conclusion the committee cannot help observing that the town-extension scheme which has advanced very far is as important as the establishment of the industrial school and that the proposal made by the committee is a very fair one in the interests of both the schemes. The block offered by the committee possesses all the advantages that can be reasonably desired on behalf of the proposed industrial school and at the same time it will not materially interfere with the convenience of the residents in the town extension. On the other hand, the establishment of the industrial school on the site asked for by the missionaries will be a source of positive discomfort to the residents of the town extensions not to speak of the impossibility of its own further expansion. There can be no doubt that the grant of the latter site to the mission will make the town-extension scheme quite unworkable and useless. The committee, therefore, recommends that the block comprising plots Nos. 70 to 80 in the plan be granted to the Salesian mission for the proposed industrial school.

Letter—from Very Rev. E. MEDERLET, S.C., Superior and Manager, St. Francis Xavier's Orphanage and Industrial School, Tanjore.
To—the Collector of Tanjore.
Dated—the 18th March 1913.

With reference to your kind letter, dated the 13th instant, I beg to state that the land I want Government to acquire for the proposed industrial school, Government hostel and secondary school comprises plots 48, 49, 50, 51, 62, 63 and 64 as marked out in the extension scheme plan of Tanjore town.

Enclosed you will find a copy of the same in which I have shaded in blue colour the site which I require.

As you know, Mr. Wood, from my former application the land for which I am petitioning cannot be acquired by private negotiation. The purpose for which this land is required is of course a public one inasmuch as the various institutions which are to be erected on the same will be thrown open to the youth of Tanjore and neighbourhood irrespective of caste or creed.

Plots Nos. 48, 49, 50 and 51 have been pointed out as a suitable site for the proposed industrial school and Government hostel by Mr. Tressler, Director of Industries, who in his last "Inspection report" (September 1912) emphasized the necessity of a new institution to replace our present temporary sheds.

Plot No. 64 and, as far as my knowledge goes, parts of plots Nos. 62 and 63 also are the leasehold property of our Roman Catholic Mission. In plot No. 64 it had been established to construct a secondary school which in December last was approved of by the Director of Public Instruction who awarded the mission a grant for at least half of the actual expenditure of the same.

The space that may remain vacant after the construction of the three proposed buildings will be set apart for a recreation ground for the boys of the various institutes. This item, as all educators admit, is not only desirable but also absolutely necessary, as a moral, intellectual and industrial training, however sound it may be, is incomplete—in the majority of cases would even be useless—if the physical education be neglected or overlooked. To form a perfect character all the faculties must be uniformly developed.

The municipality of Tanjore has, as you noted, offered me plots Nos. 70 to 80 inclusively for my purpose, but for grave motives, the nature of which you may judge, I am unable to accept this site.

In the first place, I prefer the land on the Vallam road side comprising plots Nos. 48—64 to that proposed by the municipality (70—80 plots) as the former is in immediate contiguity of our mission property whereas the latter is disconnected from it by a large road and tract of land, the distance measuring some 200 feet if the nearest point be taken, 600 if the central position of the proposed site be taken. The great inconvenience to which the masters of the industrial school and their pupils would be put to owing to their having two distinct institutions is obvious to any one. The going through a hot sun many times a day for the European instructors is also a point to be considered not to speak of the great difficulty, if not indeed impossibility, of getting enough men to staff both institutions. Add to this the prominent position of the former site—always a factor where industrial training is concerned—and the seclusion of the other situated as it is in an out-of-the-way place close to a large grave-yard.

As a second reason I would bring forward the Director of Industries' choice of place who desires the new industrial school and hostel to be constructed on the Vallam road side and not on the other, his reason being the prominent position of the one and the out-of-the-way locality of the other. We Salesians quite agree with him on this point as an attractive position for institutes such as we propose constructing is an essential *sine qua non*. As Mr. Tressler is the Government representative as far as industrial education is concerned in this Presidency of Madras and as the Salesian Fathers have flourishing industrial schools all over the world, I think that our opinions where industrial questions arise such as their position, etc., should have some weight, especially as those of the opposite side have little or no experience in these matters.

Lastly, I may mention that on January 31st last the Municipal Council granted me not only the plot I now ask but much more besides as the Councillors then saw that institutions such

as the Salesian Fathers propose constructing and directing will do immense good to the populace of Tanjore. At a later meeting unfortunately they revoked that concession, offering another site which cannot be accepted. Even as my scheme stands there will be space for 73 bungalows which means no small extension for Tanjore. Will not the three buildings the Salesians propose constructing beautify and benefit the town of Tanjore as much as seven bungalows? Is not the former for the public and the latter for private good?

Hoping, dear Mr. Wood, that the Government through you will give me a favourable reply so that the good the Salesians have begun will continue.

IV

Memorandum No. 2116-1 M., dated 22nd April 1913.

The Government understand that the Tanjore Municipal Council's proposals relating to town extension are now under the scrutiny of the Sanitary Commissioner. He is requested to expedite his remarks on the scheme in order that Government may be in a position to dispose of an application received from the Salesian Mission for the assignment of plots Nos. 48 to 51 and 62 to 64 in the extension area.

L. DAVIDSON,
Ag. Secretary to Government.

To the Sanitary Commissioner.

(V)

Letter—from R. B. WOOD, Esq., I.C.S., Collector of Tanjore.
To—the Secretary to Government, Educational Department.
Dated—the 11th April 1913.
No.—R.C. 2/Petn. of 1913.

In continuation of my letter No. R.C. 17, dated 15th March 1913, regarding the acquisition of certain land for an industrial school proposed to be constructed by the Salesian Fathers of Tanjore, I have the honour to forward copy of a letter which they have sent me today, stating that if they have to take the site allocated to them by the municipality, viz., plots Nos. 70 to 80, they will definitely abandon the idea of having an industrial school at all.

ENCLOSURE.

Letter—from Very Rev. E. MEDERLET, S.C., Superior and Manager, St. Francis Xavier's Orphanage and Industrial School, Tanjore.
To—the Collector of Tanjore.
Dated—the 7th April 1913.

In my application of the 18th ultimo for the acquisition of a tract of land contiguous to my present property and which in the Tanjore town-extension scheme comprises plots Nos. 48, 49, 50, 51, 62, 63 and 64, I did not state that the Salesian Fathers regarded the possession of the same as absolutely essential for the construction of the proposed Government hostel and industrial school.

Now I, in the name of the Salesians, declare that the Salesians will give up the idea of erecting the aforesaid buildings if they fail to obtain a favourable reply to their petition from Government. To this determination, we Salesians have been necessarily driven, as the difficulties of management entailed by the erection of two large institutes in the out-of-the-way spot proposed by the Municipal Council of Tanjore (i.e. blocks Nos. 70—80)—the Salesians' present position regarding location and men being rightly considered—would be insuperable.

Moreover, the Director of Industries has told me that he will not approve of the hostel and industrial school being built on the land comprising blocks Nos. 70—80 as that site is very undesirable being as it is so far away from Tanjore town.

Hoping that this decision of the Salesians be duly communicated to Government.

VI

Letter—from the Hon'ble Sir ALFRED GIBBS BOURNE, D.Sc., F.R.S., K.C.I.E.,
Director of Public Instruction.
To—the Secretary to Government, Educational Department.
Dated—the 16th April 1913.
No.—Ref. on Cur. 8375/10.

In submitting herewith copy of letter No. 1630-I, dated 17th March 1913, of Mr. Tressler, Acting Superintendent of Industrial Education, regarding the acquisition of a site for St. Francis Xavier's Industrial school, Tanjore, I have the honour to state that I understand that Mr. Tressler has come to the conclusion that the best kind of industrial school would be one under private management but with some arrangement that would secure very complete control by the department. The proposal in this case is to acquire land and erect suitable buildings and then lend or lease them to this mission for so long as they are willing to carry out the policy of the department.

2. Any proposal to acquire land or buildings compulsorily on behalf of a private agency should be considered as out of the question; but I am strongly in favour of Mr. Tressler's proposal and therefore recommend the action proposed by him. As to the exact location of the school, the workshops may be out of sight, but it is the showroom that requires a frontage on a main line of traffic.

There are indications that very early action is desirable. The arrangement will, of course, make it possible to hand over the institution at some future date to the municipality, should this appear desirable.

ENCLOSURE.

Letter—from K. T. B. TRESSLER, Esq., Acting Superintendent of Industrial Education.
To—the Director of Public Instruction.
Dated—Madras, the 17th/18th March 1913.
No.—1630-I.

I have the honour to state that for sometime past I have been in correspondence with the management of the St. Francis Xavier's Industrial school, Tanjore, with regard to the development of their school into a first-class institute. The scheme I propose follows the lines indicated in memorandum submitted by me to Government (*vide* your letter Ref. on Cur. No. 8375/10, dated 26th March 1912), and is elsewhere described in detail. Until orders are passed on the memorandum I cannot put forward any definite proposals but it seems to me likely in any case that a school of the type suggested will soon come into being.

2. For an industrial school centrality of location is essential and after carefully examining the land available, I selected the site which is coloured red in the accompanying plan of Tanjore. This site adjoins the mission compound and is in close proximity to the station.

3. It appears now, however, that the Tanjore municipality have decided to carry out a town-extension scheme. So far I can gather, this scheme consists of acquiring the areas marked out in squares in the accompanying map and selling them again at a considerable profit to private individuals for building purposes. The area thus to be acquired includes the area I have marked down for my industrial school.

4. On hearing that these extensions were contemplated, the management of the present school addressed the Collector Mr. Wood on the matter and he suggested that they should put themselves into communication with the Tanjore municipality. In a resolution passed at the end of January, the municipality agreed to refrain from trying to acquire the land selected by me. This resolution was rescinded at the next meeting and on a subsequent meeting a compromise was suggested, the school being permitted to acquire the plots at the bottom of the map, that is, right away from the main road. This site would be quite useless for an industrial school as it is much too far from the main arteries of traffic.

5. I cannot quite understand why the municipality should have the decision regarding the disposal of land which does not belong to them, but apart from this question, I conclude that if an industrial school is to be established in Tanjore at all, it will be necessary to make immediate arrangements for a site therefor. My school scheme has not yet matured but the town extension scheme seems just as much, if not more, in the air than mine and if the municipality are taking steps to earmark the land, I think it eminently desirable that we should do the same. After all if the land is not required it can always be sold and since the municipality expect to make a

handsome profit by the sale of theirs, it follows that Government will not be a loser by acquiring the plots shown red even though they may not be subsequently required. I would accordingly request that Government be addressed with a view to steps being taken to acquire the land under reference or alternatively for the retention for a certain period of the right of first refusal thereof.

VII

Memorandum No. 1312-1, Educational, dated 13th June 1913.

The Collector is requested to report the probable amount of compensation which will have to be paid if the land required for the extension of St. Francis Xavier's Industrial school, Tanjore, viz., plots marked Nos. 48 to 51 and 62 to 64 in the town-extension scheme and measuring about 8 acres in extent, should be acquired under the Land Acquisition Act.

(By Order.)

C. S. ANANTARAMA AYYAR,
Under Secretary to Government.

To the Collector of Tanjore.

VIII

Letter—from R. B. Wood, Esq., I.C.S., Collector of Tanjore.
To—the Secretary to Government, Educational Department.
Dated—the 25th June 1913.
No.—R.C. 2/Petn.

With reference to Government Memorandum No. 1312-1, dated 13th June 1913, I have the honour to report that the probable cost of the land required for the extension of St. Francis Xavier's Industrial school is about Rs. 300 an acre.

Order—No. 740, Educational, dated 12th August 1913.

The Government consider that the land comprising plots numbered 48 to 51 and 62 to 64 in the Tanjore town-extension scheme and measuring about eight acres should be acquired for the location of an industrial school and held as Government property. The Collector is accordingly requested to take steps for the acquisition of the land under the Land Acquisition Act.

2. The Director of Public Instruction will in due course submit proposals for meeting the cost of the acquisition.

(True Extract.)

W. FRANCIS,
Ag. Secretary to Government.

To the Collector of Tanjore.
" Director of Public Instruction.

EDUCATIONAL DEPARTMENT.

NOTES CONNECTED WITH G.O. No. 740, EDUCATIONAL, DATED
12TH AUGUST 1913.

[SUBJECT.—Opening up of an Industrial School by the Salesian Mission, Tanjore.]

Demi-official—from K. T. B. TRESSLER, Esq., Director of Industries.
To—the Hon'ble Mr. L. DAVIDSON, C.I.E., I.C.S., Secretary to Government,
Educational Department.
Dated—the 4th February 1913.

Father Medult, the Superior of the Tanjore Salesian Mission (opposite the club), has come to see me and has asked me for a letter of introduction to you. He has some schemes on which he is at present discussing with me and which I believe he would like to bring to your notice.

Father Medulet showed me a plan for the acquisition of some 26 acres of land near the English Club at Tanjore, of which 17 belong to the palace estate and 9 to the adopted grandson of the deceased Rani: he wants also to take up for a hostel an adjoining strip of 6 acres belonging to the latter. The valuation is roughly $17 \times (\text{Rs. } 100) + (15 \times \text{Rs. } 400) = \text{Rs. } 7,700$. The mission has Rs. 16,000 available; it wants to take up the land and to build a new industrial school consisting of—

- | | |
|-----------------------|-----------------------|
| (1) carpenters' shop | } costing Rs. 25,000. |
| (2) weavers' shop | |
| (3) also a hostel ... | about Rs. 10,000. |

The staff will comprise four Fathers, of whom one is English (manager's assistant), one an engineer, one an expert carpenter and one the manager.

They will ask for recurring grants—and have ideas of mechanical engineering, printing and agriculture in future.

The Collector is about to send up the land acquisition papers: because there is some trouble about the transfer of the palace estate land.

Will this come to *Revenue*, the Board of Revenue or Local and Municipal? The land is in a town extension scheme which the Council is willing to modify.

L. DAVIDSON—5-2-13.

As the transfer of the palace estate land is involved in this case, it is understood that the papers may be sent up probably to the Political department in the first instance. If the acquisition is decided on and any Provincial grant given for the school, the notification will be published in Educational. No papers have so far been received either in Revenue or Local and Municipal.

V. SRINIVASA AYYANGAR—7-2-13.

Please let me know if and when any papers come to any department.

L. DAVIDSON—8-2-13.

It is understood that no papers on the subject have yet been received in the other departments referred to. It is submitted that a copy of Mr. Tressler's demi-official and of the foregoing notes may be sent to each of them with the request

that information may be furnished to this department if and when any communication is received by them.

V. SRINIVASA AYYANGAR—28-2-13.

C. S. ANANTARAM AYYAR—1-3-13.

To the Revenue,
" Political,
" Educational } Departments.

Demi-official—from the Rev. Father BEDE, S.J., Assistant Manager, St. Francis Xavier's Industrial School, Tanjore.

To—the Hon'ble Mr. L. DAVIDSON, C.I.E., I.C.S., Secretary to Government, Educational Department.

Dated—Mylapore, the 18th March 1913.

The Salesian Fathers at Tanjore, of whose community I am a member, have at present a vexed "land question" with the municipality of that town.

The municipality offer the Salesians an out-of-the way tract of land on which to construct a new up-to-date industrial school, Government hostel and secondary school in spite of the fact that the Collector R.B. Wood, Esq., Mr. Tressler, Director of Industries, and we Salesians have chosen another site adjacent to our priest property and the position of which gives us a reasonable hope of future success. If you, dear Mr. Davidson, could give me an appointment so that I may state the Salesians side of the question I should be very grateful.

Please let me see the papers about this at once. I must send an answer to-morrow.

L. DAVIDSON—18-3-13.

It is submitted that no papers have yet been received from the Municipal Council on the matter referred to in the Father's letter of the 18th March 1913. A telegram has however been received from the chairman of a public meeting held at Tanjore requesting Government to approve the town extension scheme passed by the council on 28th February 1913. It appears from the report of this resolution published in the *Hindu* of 3rd March 1913 that one of the Salesian Fathers was present at the council's meeting in question and was allowed to speak on the point in dispute. It is also observed therefrom that the mission now wants for their industrial school only 8 acres of land instead of the 26 acres originally contemplated—*vide* page 1 *supra*.

C. S. SWAMINATHA MUDALIYAR—19-3-13.

Please see also the notes and orders in the linked file.

P. T. THARYAN—19-3-13.

Demi-official—from the Hon'ble Mr. L. DAVIDSON, C.I.E., I.C.S., Secretary to Government, Local and Municipal Department.

To—the Revd. Father BEDE, S.J., Assistant Manager, St. Francis Xavier's Industrial School, Tanjore.

Dated—the 19th March 1913.

No.—1707-1 M.

In reply to your letter of the 18th instant I write to say that I shall be pleased to see you and hear the Salesian Fathers' side of the land dispute at Tanjore to-morrow afternoon at the Secretariat any time between 3 and 5 which may suit you. I may add, however, that the matter has not yet come formally before Government and that you or your friends in Tanjore might find it convenient to discuss the question with the Hon'ble Mr. Sivaswami Ayyar in Tanjore itself if he can spare the time during his coming tour which, I observe, includes a halt at Tanjore on the 24th instant.

LOCAL AND MUNICIPAL DEPARTMENT.

With advertence to my *demi-official* No. 1707-1 M., dated 19th March 1913, Father Bede of the Salesian mission came to see me this afternoon and gave me the annexed tracing from a plan prepared for the Collector showing the town extension site outside Tanjore and the piece of land now desired by the mission. The latter consists of seven blocks, viz., Nos. 48 to 51 and 62 to 64, of which 64 and parts of 62 and 63 are already held by the mission on a long lease with ten years yet to run. The block forms an irregular excrescence on the east of the town extension and its peculiar suitability for the purposes of the mission lies in two circumstances, namely,

- (i) its close contiguity to their present premises, and
- (ii) the desirability of having an industrial school and especially its sale department in a fairly central place adjoining a public thoroughfare.

The Father told me that Mr. Tressler, the Director of Industries, attaches special importance to the latter point and while willing to recommend a substantial Government grant-in-aid of the industrial school if suitably located would not be ready so to assist such an institution if situated in a relatively out-of-the-way spot. The land now offered in exchange by the municipality, which has changed its mind in circumstances yet to be explained, consists of blocks Nos. 70 to 80 which are further away from the present premises of the mission, cut off from them by a road and adjoining a graveyard besides being separated by a considerable distance from the main Vallam road. In the light of this statement of the case and with reference to the plan the objections raised in the memorial received today from the Chairman of a public meeting seem absolutely frivolous. I see it is signed by Malhari Rao. I should be interested to know if he was a Sub-Magistrate in the Tanjore district in 1905-06.

Please put this on record against the time when the matter comes up to Government. Father Bede has written a letter to Mr. Wood, the Collector, and he will probably send up a report within the next few weeks.

L. DAVIDSON—20-3-13.

The roads are 50 feet broad.

2. The blue enclosure is the land the mission wants—64 and parts of 62 to 63; it already holds on a lease for 22 years, of which 10 are yet to run.

3. The Council offers 70–80. Mr. Tressler, as Director of Industries, stipulates for Nos. 48–51.

L. DAVIDSON—3-13.

Demi-official—from R. B. Wood, Esq., I.C.S., Collector of Tanjore.

To—the Hon'ble Mr. L. DAVIDSON, C.I.E., I.C.S., Secretary to Government, Local and Municipal Department.

Dated—Vallam, the 30th March 1913.

You will remember the question of the Tanjore town extension, and the industrial school proposal by the Salesian Fathers. Father Medulet, the Superior of the Salesians here, has just come to tell me that if Government decides in favour of blocks 70 to 80, as offered by the Council, he will have to give up the idea of the industrial school, as the difficulties of management will be insuperable. This is a point on which he is perhaps the best judge. He has asked me for this letter, as he intends to go and see you, if you will see him, on the subject. I think that the industrial school is important enough to override the Council's decision. I may add that the Council, and the select committee itself, were at first in favour of giving him the site he wanted.

EDUCATIONAL DEPARTMENT.

Three points are involved in this case—

- (i) determination of the site,
- (ii) acquisition of the site so determined, and
- (iii) the payment of a grant-in-aid of the school. Of these, the question

Yes.

L. DAVIDSON.

A whether the particular site included in the town extension scheme may be given to the mission has to be decided first and that in the Local and Municipal Department.

2. The question of grant should be taken up next. But before it can be considered by Government the mission should submit an application for grant through the Superintendent of Industrial Education and the Director of Public Instruction. *Prima facie* there appears to be no objection to the grant; its amount and the conditions, if any, which may be imposed, will depend on the Director's recommendation. So that the submission of the application through the Director

It is useless bothering him about this before the site is settled.

L. DAVIDSON.

B Perhaps the Revd. Medulet may be informed of it at once by a demi-official.

3. The question of acquisition proper has to be dealt with only in the last instance—please compare paragraph 4 of the Collector's letter.

4. For orders whether the file may be transferred to Local and Municipal Department with reference to A and whether the course suggested at B above may be followed.

P. RAMUNNI NAYAR—2-4-13.

So far as Educational is concerned, the question at present is whether the request of the Salesian Fathers should be supported. As regards this there are—

(i) the statement of the Fathers that unless the land specified (plots Nos. 48 to 51 and 62 to 64) is given, the idea of the industrial school will have to be abandoned; and (ii) the statement in the Revd. Medulet's letter to the Collector that the Superintendent of Industrial Education desires that the new school and hostel should be constructed on the Vallam road site.

The Collector, who was first inclined to favour the mission's having the site offered by the Municipal Council (plots Nos. 70 to 80) now recommends that the Council's recommendation may be overruled.

It is therefore submitted that Educational need not object to the proposal to allot plots Nos. 48 to 51 and 62 to 64, if the Local and Municipal Department decide to accept it.

The files in Local and Municipal (i) regarding the construction of quarters for the District Board Engineer on a portion of the site proposed for town extension and (ii) regarding the protest against giving plots Nos. 48 to 51 and 62 to 64 to the Salesian Fathers, have been obtained and are linked with this.

C. RAMANUJACHARI—8-4-13.

Educational may support and ask Local and Municipal to settle the question of site at an early date.

L. DAVIDSON—8-4-13.

To the Local and Municipal Department.

LOCAL AND MUNICIPAL DEPARTMENT.

The Tanjore Municipal Council's proposals relating to town extension have not yet come up to Government. From paragraph 9 of the Collector's letter of the 15th March it is observed that this scheme is now under the scrutiny of the Sanitary Commissioner. The Council's application for an allotment from the sanitation grant for 1913-14 which was sent to him on 7th November 1912 and which included provision for this scheme has not also been received yet. It is submitted that he may now be asked to expedite his remarks on the scheme with special reference to the application of the Salesian Fathers for a grant of the plots 48 to 51 and 62 to 64 for an industrial school.

2. A draft memorandum is submitted for approval.

C. S. SWAMINATHA MUDALIYAR—18-4-13.

V. SRINIVASA AYYANGAR—18-4-13.

L. DAVIDSON—21-4-13.

[Memorandum No. 2116-1 M., dated 22nd April 1913.]

EDUCATIONAL DEPARTMENT.

From the Collector of Tanjore, dated 11th April 1913, No. 2/Petn.

From the Director of Public Instruction, dated 16th April 1913, No. 8375/10.

The papers read above relate to the acquisition of a site for the St. Francis Xavier's Industrial school, Tanjore. The main file on the subject is now with Local and Municipal having been forwarded to that department with Educational u.o. No. 1093-1, dated 8th April 1913. It is submitted that the current papers also may be forwarded to that department in continuation of the previous papers.

P. RAMUNNI NAYAR—21-4-13.

The Director now submits a fresh proposal that Government should acquire the land and construct the building and should then lend or lease them to the mission. This will require separate consideration; but the first point is which site should be made available for the school, irrespective of the question by whom it is acquired. The file may therefore be sent to Local and Municipal.

C. RAMANUJACHARI—21-4-13.

L. DAVIDSON—21-4-13.

To the Local and Municipal Department.

6

No. 740, EDUCATIONAL, 12TH AUGUST 1913.

LOCAL AND MUNICIPAL DEPARTMENT.

In Memorandum No. 2116-1 M., dated 22nd April 1913, the Sanitary Commissioner has been asked to expedite his remarks on the town-extension scheme on receipt of which the question of complying with the mission's request for the assignment to it of certain plots included in the said scheme will have to be considered. It is submitted that this file may lie over in this department until the Sanitary Commissioner's remarks have been received and considered.

C. S. SWAMINATHA MUDALIYAR—30-4-13.

K. A. GANAPATI AYYAR—30-4-13.

I am afraid it must lie over as proposed, but the case is one which demands early settlement and should be treated as urgent when ripe for final examination.

L. DAVIDSON—1-5-13.

As the Sanitary Commissioner's views on the advisability of excluding the sites required by the mission from the town-extension scheme are not yet definitely known, it is proposed in the linked file to make a u.o. reference to him on the point. If that suggestion is approved this file has to lie over till his further remarks are received and considered.

C. S. SWAMINATHA MUDALIYAR—24-5-13.

T. KRISHNASWAMI AYYAR—25-5-13.

I don't see that the Sanitary Commissioner's views are necessary. No sanitary questions are at present involved. (There is too much of this tendency to refer everything to some one else.) Educational should go on with the consideration of the Director of Public Instruction's last proposal and get something done.

W. FRANCIS—27-5-13.

To the Educational Department.

EDUCATIONAL DEPARTMENT.

Please see the Director's letter and Mr. Tressler's letter which is enclosed in it. The proposal therein contemplated is to open an industrial school at Tanjore on the lines indicated in Mr. Tressler's note on industrial schools forwarded to Government with the Director's letter, dated 26th March 1912. It is considered that the most desirable arrangement for the purpose is to afford facilities for private management to open such an institution under the control of Government. This principle was accepted in the case of the St. Aloysius Industrial school at Vizagapatam. Special concessions in the shape of grants for maintenance and for initial expenses as well as acquisition of land free of cost to the mission were afforded.

Also G.O. No. 55, Educational, dated 22nd January 1913.

Please see G.O. No. 2734, Revenue, dated 18th August 1910.

2. As regards the specific suggestion to acquire land and erect suitable buildings for the purpose of lending or leasing them to the mission, it is submitted that the portion relating to the acquisition of land seems unobjectionable, if not necessary for the following reasons:—

(a) land may eventually be required by Government in case it is decided to have the school under their control;

(b) the land forming part of the palace estate is stated to be not easily negotiable for private purchase—paragraph 4 of Collector's letter;

(c) the municipality cannot be expected to help the mission in the transaction; and

(d) the mission requires the land badly.

3. The question then remains whether the land after acquisition should be leased or assigned to the mission. Unless buildings are also constructed by Government and similarly leased to the mission, that body is not likely to consent to the lease of the land, as it will not give them sufficient guarantee to enable them to embark on any costly building operations thereon.

As regards the question of constructing a Government building on the site, the data before Government are insufficient to base any definite decision thereon. The policy enunciated by Mr. Tressler has not yet been approved by Government; the matter awaits the final decision of the Secretary of State on the department of industries. Mr. Tressler has not himself decided upon any definite scheme for the school. On such doubtful contingency, it seems unlikely that the Government will agree to construct a building of their own. The mission does not appear also to have applied for any such assistance. In paragraph 3 of his letter, dated 15th March

* The mission will also, in the ordinary course, obtain a grant from Government for the construction of the building.

1913, the Collector reported that the mission * had set apart Rs. 16,000 for the development of the industrial school.

It may perhaps be sufficient under the circumstances to acquire the land alone for the mission. In this connection please see paragraph 4 of the Collector's letter, dated 15th March 1913. The cost of the acquisition may be met by Government as in the case of the Vizagapatam school and after acquisition the land may be assigned to the mission subject to the condition that they utilize it for the purpose of the technical school and conduct the latter on the lines laid down by Government.

C. RAMANUJACHARI—11-6-13.

What is the 8 acres in plots 48—51 and 62—64 worth? If the papers don't show, ask Collector about how much would have to be paid if they were acquired under the Act.

W. FRANCIS—11-6-13

A draft memorandum is submitted for approval.

B. GOPALACHARI—12-6-13.

C. RAMANUJACHARI—12-6-13.

C. S. ANANTARAM AYYAR—12-6-13.

[Memorandum No. 1312-1, Educational, dated 13th June 1913.]

From the Collector of Tanjore, R.C. No. 2/Petn., dated 25th June 1913.

The probable cost of the land required is Rs. 300 an acre, or Rs. 2,400 for the 8 acres.

P. RAMUNNI NAYAR—3-7-13.

C. RAMANUJACHARI—3-7-13.

His Excellency the Governor—

Mr. Tressler, Superintendent of Industrial Education, proposes to develop the St. Francis Xavier's Industrial school at Tanjore, which is now run by the Salesian Fathers. For this purpose he wants to secure rights over, or a first refusal of, the plots 48—51 and 62—64 coloured red in the plan at the top of the file, which adjoin the existing mission compound and have a frontage on an important road.

2. The Municipal Council declares it wants these plots badly for a town-extension scheme, but it is clear from the plan that there is plenty of land round about for any extension scheme and that this is mere obstruction. Please see also

the Collector's report on page 11 of current file. The Council suggest that the Fathers should take plots 70—80 for their school, but the Fathers declare that if they are driven to this they will give up the school altogether.

3. Nothing is yet settled about our policy regarding industrial schools, though in the isolated case of St. Aloysius' school at Vizagapatam* land was acquired and a grant given. The whole question has been referred to the Secretary of State in a letter from the Revenue Department and Mr. Tressler's memorandum on future policy is to lie over until His Lordship's orders are received. Consequently, as Mr. Tressler admits, his scheme for helping to develop this present school is very much in the air and cannot be definitely approved or the reverse.

4. Ordinarily this would be reason for deferring the acquisition of plots 48—51 and 62—64 as a site for the school, which the Director of Public Instruction now presses; but it is submitted that to stop further acrimonious discussion between the Council and the Fathers and to allow the latter to push on with their plans and buildings for the school the land, which will cost only Rs. 2,400, may be acquired and handed over to the Fathers by Government on the usual terms† that it must be used for the school and handed back without compensation if it is ever diverted to other purposes. In the somewhat improbable event of Government's deciding not to assist this industrial school, land in such a situation could be resold without difficulty.

W. FRANCIS—4-7-13.

This pink land may now, I think, be acquired by Government, but to be held for the present by Government as Government property.

2. The Director of Public Instruction's view is that in such cases as this project for the establishment of an industrial school the land provided for the purpose should be provided, and permanently held, by the Government: it follows from this that the buildings also must be provided by Government. Land and buildings will accordingly in such cases be lent to the mission or other agency, which will be the managing body, in occupation of the premises and in receipt of a teaching grant, so long as the school is managed on lines approved by the department.

If and when the time comes, this proposal will be made for this school.

P[ENTLAND]—25-7-13.

Draft directing acquisition.

W. FRANCIS—26-7-13.

(Linked with C. No. 3650 M., and sent to the Hon'ble Mr. Sivaswami Ayyar. Returned from circulation on 6th August 1913.)

A draft order is submitted for approval.

B. GOPALACHARI—9-8-13.

C. RAMANUJACHARI—10-8-13.

Director of Industries,
Madras, Post Box, No.112,
dated 4th February 1913.

Dear Mr. Davidson,

Father Medulet, the superior of the Tanjore Silesian Mission (opposite the club) has come to see me and has asked me for a letter of introduction to you. He has some schemes on which he is at present discussing with me and which I believe he would like to bring to your notice.

Yours sincerely,

sd/- K.T.D.Tressler.

C.No.827 M, D.O. from K.T.B. Tressler, Director of Industries, dated 4th February 1913.

16
S U B J E C T.

Opening up of an industrial school by the Silesian Mission at Tanjore.

Father Medulet showed me a plan for the acquisition of some 26 acres of land near the English Club at Tanjore - of which 17 belong to the Palace Estate and 9 to the adopted grandson of the deceased Rani: he wants also to take up for a hostel an adjoining strip of 6 acres belonging to the latter. The valuation is roughly $\text{Rs. } (17 \times 100) + (15 \times \text{Rs. } 400) = \text{Rs. } 7,700$. The mission has Rs.16,000 available; it wants to take up the land and to build a new Industrial school consisting of

- | | | |
|----------------------|---|-------------------|
| (1) Carpenters' shop | } | Costing Rs.25,000 |
| (2) Weavers' shop | | |
| (3) also a hostel | | about Rs.10,000. |

The staff will comprise four fathers, of whom one is English (manager's assistant), one an engineer, one an expert carpenter and one the manager.

They will ask for recurring grants - and have ideas of mechanical engineering, printing and agriculture in future.

The Collector is about to send up the land acquisition papers: because there is some trouble about the transfer of the Palace Estate land.

Will

Will this come to Revenue, the Board of Revenue or Local and Municipal? The land is in a town extension scheme which the Council is willing to modify.

L.D.
5-2-13.

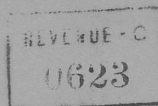

As the transfer of the Palace Estate land is involved in this case it is understood that the papers may be sent up probably to the Political Department in the first instance. If the acquisition is decided on and any Provincial grant given for the school, the notification will be published in Educational. No papers have so far been received either in Revenue ~~or~~ or Local and Municipal, ~~Government~~.

Sir,

As I am at present in Wellington, the V. for F. Wedderburn, Asst. Manager of B. Francis Xavier's Industrial School (Tanjore), wishes me to call upon you in connection with a land question, which arose between the Municipality of Tanjore and the Galician Fathers here some months ago.

Your predecessor, the Hon. E. Davidson I.C.B. who was well acquainted with all the pros and cons of this question gave our Fathers some hope that Government would settle the matter in the near future.

Last month Mr. H. B. Foster, Director of Industries wrote to V. for F. Wedderburn urging that he should send in to Government definite proposals for the new industrial institute which the Galician Fathers intend constructing at Tanjore. To this request he has not up till now been able to comply owing to the fact that the case referred to above which is intimately connected with the proposed industrial school has not yet been decided by Government.

If you dear Sir could kindly give me an appointment on or before June 1st I should be very grateful. Thanking you in anticipation for the same, I remain

Your most obedient servant

F. Sede. J.C.

D.O.

Director of Industries,
Madras, Post Box, No.112,
dated 4th February 1913.

2)

Dear Mr. Davidson,

Father Modulet, the superior of the Tanjore Silesian Mission (opposite the club) has come to see me and has asked me for a letter of introduction to you. He has some schemes on which he is at present discussing with me and which I believe he would like to bring to your notice.

Yours sincerely,

sd/- K.T.R.Tressler.

C.No.827 M, D.O. from K.T.B. Tressler, Director of Industries, dated 4th February 1913.

22

S U B J E C T.

Opening up of an industrial school by the
Silesian Mission at Tanjore.

Father Medulet showed me a plan for the acquisition of some 26 acres of land near the English Club at Tanjore - of which 17 belong to the Palace Estate and 9 to the adopted grandson of the deceased Rani: he wants also to take up for a hostel an adjoining strip of 6 acres belonging to the latter. The valuation is roughly $(17 \times 100) + (15 \times \text{Rs}400) = \text{Rs}.7,700$. The mission has Rs.16,000 available; it wants to take up the land and to build a new Industrial school consisting of

- | | | |
|----------------------|---|-------------------|
| (1) Carpenters' shop | } | Costing Rs.25,000 |
| (2) Weavers' shop | | |
| (3) also a hostel | | about Rs.10,000. |

The staff will comprise four fathers, of whom one is English (manager's assistant), one an engineer, one an expert carpenter and one the manager.

They will ask for recurring grants - and have ideas of mechanical engineering, printing and agriculture in future.

The Collector is about to send up the land acquisition papers: because there is some trouble about the transfer of the Palace Estate land.

22

Will this come to Revenue, the Board of Revenue or Local and Municipal? The land is in a town extension scheme which the Council is willing to modify.

L.D.
5-2-13.

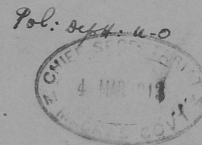

As the transfer of the Palace Estate land is involved in this case it is understood that the papers may be sent up probably to the Political Department in the first instance. If the acquisition is decided on and any Provincial grant given for the school, the notification will be published in Educational. No papers have so far been received either in Revenue or Local and Municipal.

V.S.
7-2-13.

Please let me know if and when any papers come to any department.

L.D.
8-2-13.

No. V.—For Technical, Industrial and Art Schools.

PUBLIC INSTRUCTION.

Educational Circle,

Tanjore District.

No. 13262

INSPECTION REPORT FOR 1912-1913.

Name of school	...	St. Francis Xavier's Industrial School, Tanjore
Subjects taught and highest standard in each.	...	Cabinet-making, Weaving & Drawing Int., Int + Ele.
By whom managed	...	Rev. Eng. Mederlet
Number and date of Proceedings recognizing the school under the Madras Educational Rules.	...	Dis. No. 922 of 1908 27-7-08
Section of the special school list in which the school is placed and serial No. in the list.	...	
Date of examination	...	14 th September 1912.
Number of hours spent in examination	...	5 1/2 hours.
Date of report	...	17 th September 1912.
Date of despatch	...	
Date of the last preceding examination	...	11 th April 11.
Date of last stock-taking	...	

Instructions for the preparation of the Report.

1. The name of the school, as recognized by the Department, should be entered in full on the title-page.

2. Except in the case of schools directly managed by Government or by a local Board, the names of responsible Managers should be given in full on the title-page.

3. Any explanation which the Manager or Headmaster of a school may desire to give regarding each table (tables *f*, *h*, *i*, *j*, *k*, excepted), should be given in the space allotted for the purpose.

4. The remarks of the inspecting officer should find place, as far as practicable, in the space allotted for the purpose. Whether the defects noticed in the last review have been remedied should be noted by the inspecting officer in the column for remarks belonging to the table or statement to which the defects refer. *Only such general remarks as cannot appropriately be entered in the form should appear in a covering letter.*

5. *Table (a).*—Managers should afford the inspecting officer facilities for verifying the accounts. If any important change has taken place in the receipts or expenditure of the institution since the close of the year, so as to alter materially its financial position, the facts should be noted. The inspecting officers should further note, in the case of institutions aided on the salary grant system, whether grants have been drawn correctly and regularly and whether the declaration appended by Managers to each bill is a correct statement of facts. The figures relating to each industry or subject should be given separately. When teachers are employed to give literary as well as technical, industrial or art instruction, only that portion of the salaries which should be debited to the technical, industrial or arts department should be shown in this report. General charges should be apportioned among the different departments on the principle followed in the annual returns furnished to the Director.

(2) Provision is made for entering particulars for five subjects. If a larger number of subjects be taught, additional columns have to be opened to give the figures appertaining to each of such additional subjects. Drawing should be treated as a separate subject of instruction.

6. *Table (b).*—The entries in this table should be carefully scrutinized by the inspecting officers with the several registers and accounts kept by the manager. With a view to facilitate the preparation of the table the manager, at the close of each year, must take stock of all raw materials, unfinished and manufactured articles and tools, plant and other appliances and determine the amount to be written off for wear and tear and other depreciation.

7. *Table (c).*—(1) The names and other particulars of acting as well as permanent incumbents should be shown in this table.

(2) Teachers must produce their certificates when required by the inspecting officer at the time of inspection.

(3) Under "Payments from Manager's Funds," in the case of members of religious societies, the rate of salary on which the grant is allowed *minus* the grant should be entered. In cases where no grant is allowed and no salaries are fixed, the salary of the teacher should be fixed according to the Manager's estimate of the value of the teacher's services.

(4) Gymnastic, drill and other special instructors should be included in this table, but not menial servants.

(5) The inspecting officers should insert in the remarks column any special statement they have to make on the work of the teachers.

8. *Table (d).*—(1) Explanation should be furnished in the appropriate column regarding fluctuations in attendance.

(2) Explanation should be furnished regarding pupils admitted without vaccination certificates.

9. *Table (e).*—(1) In column 8, only such pupils as cannot be shown under other, heads should be entered.

(2) In column 17 only pupils, whose parents' or guardians' occupation cannot after reasonable inquiry, be ascertained, should be entered.

10. *Table (f).*—(1) How far the rules of recognition are fulfilled should be noted in this statement. The word "Yes" should be entered against each head if the rule is completely fulfilled. If the rule is not fulfilled the defects noticed should be specified. No entries should be made by the Manager in this statement.

(2) In the case of schools which have been recognized recently or since the last inspection, the entries in the Manager's application for recognition should be verified as directed in Circular Memorandum No. 7838, dated 10th July 1891.

11. *Table (h).*—(1). The results of two consecutive examinations should be compared in this table.

(2) The names of teachers chiefly responsible for the results of the various public examinations should be shown in the column specially provided for the purpose.

(3) A history of the students should be kept in which the names of students who have left the school, their age on leaving, the number of years they have been learning a technical, industrial or art subject, the highest examination in that subject they have passed, the reason for leaving, and the employment and pay obtained should be entered. The students should on leaving be required to report their movements half-yearly for three years after they have left the school and the history should be kept corrected to date as far as practicable.

12. *Table (i).*—If, in the opinion of the inspecting officers, the progress made in any particular subject is not satisfactory, they should note the same in the column for remarks with their opinion on the explanation offered, if any.

13. It is desirable that the scrutiny of registers should, as far as possible, be conducted within the school premises, and the registers should not be taken away from the school except under circumstances in which their submission in original to the controlling officers is deemed necessary, or when there are important omissions or irregularities requiring very careful scrutiny.

14. This form is intended for the technical, industrial, or art section only. The literary section will be reported upon in the appropriate form.

15. The manager or head of school should place before the officer deputed to inspect the school copy of the report of the Inspector or the Assistant Inspector on the literary section of the institution.

N.B.—It is particularly requested that all entries in this form be made on ruled pen and ink lines.

					present by other of payments is back-pat. Subventions tend to prove that contrary. anyhow I am quite sure that no progress can be made until the separation of classes above alluded to is brought into force. I further consider that the admission of pupils is too promiscuous. just as it is perfectly futile to train a man for the bar unless he receives at least the glimmering of an aptitude therefor, so it is a quite useless to try and train boys as industrial workers who have not the basis for it. The present method of teaching science appears to me to indicate a similar lack of discernment. Do try and turn the type of boy I have seen in mass into artists—and this is what the Drawing master appears to be aiming at.

seems to me extravagant an ideal as to be hardly intelligible. I do not wish to be unduly severe, but this School which has the makings of a good School can only fulfil expectations of the public. I have attended to receive attention. They are what and for this reason I have particularly noted the shortcomings of the School in respect of them.

The Govt. consider that the land comprising plots numbered 48 to 51 and 62 to 64 in the ^{Tanjore} Town extension scheme and measuring about eight acres should be acquired for the location of an industrial school and held as Govt. property. The Collector is accordingly requested to take steps ~~at once~~ for the acquisition of the land under the land acquisition act.

INSTRUCTIONS FOR THE
SECRETARIAT.

(a) If a paper is marked to be printed urgently, the Superintendent of the section concerned should sign the Press slip. The Superintendent should exercise a careful discretion in the matter.

(b) Each letter, memorandum, or order, or set of orders, in the file of correspondence should be headed in succession with the Roman numeral I, II, III, etc., the number being written in red ink or blue chalk above the item. The particular papers to be printed in the special issue-copies should be indicated by the Roman numeral (I, II, etc.) by which that item has been headed in the correspondence file. All matter, including marginal remarks or references, to be printed should be written in ink and matter which should not be printed should be encircled. Initials and signatures that are not quite legible should be re-written distinctly.

(b¹) For rules regarding printing of notes, see the rules in G.O., No. 1220, Public dated 30th November 1900.

(c) The number of copies and the details of distribution should be filled in by the Superintendent or Referencer concerned.

(d) In the absence of special instructions to the Press to keep matter standing for a specified period, ordinary papers of 8 pages and under will be kept standing for *one week*, and larger papers for *two weeks only*. *The type of notes and of all confidential papers is distributed immediately after striking.*

(e) This slip, properly and completely filled in, should accompany every paper sent to Press; it will be returned by the Press when proofs are furnished; it should be sent to the Press when a call is made for revised proofs or when a corrected proof is sent for striking. When finally returned by Press it should be filed with the original order or letter.

(a) If, in the opinion of the Superintendent of the Press, a paper has been marked urgent unnecessarily, he should send the Press slip to the Registrar with a remark to that effect.

(b) Unless a note to the contrary is made against the matter, pencil entries should not be printed. The Superintendent of the Press may bring to the notice of the Registrar any instance of incomplete or careless editing.

(c) Signature copies of letters to the Secretary of State or to the Government of India should be printed on hand-made paper.

(d) This slip should be returned by the Press to the Secretariat when proofs are furnished; it will be sent back to the Press when proofs are returned corrected and should be finally returned to the Secretariat when struck-off copies are supplied.

(e) The names of the Secretary and Members should be printed in full when they occur on the right hand side, but only the first time when they appear on the left side, the initials alone being printed later.

TO PRESS, MADRAS,
GOVT.

A

B

C

Please send proof in triplicate. The papers have been carefully edited.

Proof returned corrected. Please strike off and send number of copies as indicated.

As the matter is clear manuscript and has been carefully edited, (b) proof need not be sent. Please print and supply number of copies as indicated.

Type may be released after usual interval.
