To—the Correspondent, Town High School, Guntūr.

Dated—the 10th June 1913.

**Note by the Chief Engineer, Public Works Department, No. 835/D.,
dated 1st October 1913.**

The Director of Public Instruction submits for sanction, through the Educational Department, two plans and estimates amounting to Rs. 13,493 for additions and improvements to the Town High School at Guntūr, Guntūr district.

2. The plans and estimates have been scrutinised in the Chief Engineer's Office and a fresh plan and estimate have been prepared embodying the following alterations:—

(a) The pressure on the existing ground floor verandah pillars being excessive for brickwork, they should be demolished and rebuilt as per blue print C.A. 217-1913.

(b) The small pier between the left end door and window of room No. 3 on the ground floor is weak and the windows marked M should be removed and the gap filled with brickworks.

(c) The pressure on the 4 feet piers between the doors and windows on the ground floor works out to 4.2 tons per square foot. The Superintending Engineer should satisfy himself that the masonry work is sound enough for this pressure.

(d) The position of the staircases has been removed outside the building as shown on C.A. 217/1913.

(e) The old teak bres summers 4" × 8" provided in the estimate for first floor verandah is weak and a rolled steel girder 7" × 4" × 16lb. is now substituted. Other minor alterations have been effected in the sections of the rolled steel girders and joists of the first floor as shown in C.A. 217/1913.

3. The pressure on the soil is about 1 ton per square foot and the Executive Engineer's letter No. 185, dated 10th June 1913, says that the soil under the foundations will safely carry an upper storey.

4. By the alterations made in the Chief Engineer's office the revised estimate, amounting to Rs. 14,700, is recommended for sanction.

C. A. SMITH,
Chief Engineer, P.W.D.
