Station M A D R A S , Dated the 12 DECEMBER 1914

From (Name) The Hon Mr J.H. Stone, M.A., F.R.H.S., C.I.E.,
(Designation) Director of Public Instruction.

To The Secretary to the Government of Madras,
EDUCATIONAL Department.

Sir,

①

103 infra

A grant of Rs. 3,200/- was sanctioned in G.O.No. 1074 Edl dated 21st November 1913 towards the cost of construction of a drill hall in the London Mission Girls' High School, Vepery, Madras. The Correspondent now requests permission to make some deviation in connection with the balustrade and to substitute country bricks in place of pressed bricks for the floor of the lower storey. The necessity for these deviations is explained in the Correspondent's letter, dated 28th October 1914 (Copy enclosed). I have the honour to recommend that

Letter from the Principal and Correspondent, London
Mission Girls' High School, Vepery, Madras, dated 28th
October 1914.

I beg to lay the following before you. In connection with
the building which is being erected on to the end of our
present large school-room and for which the Government has
kindly promised a grant of half the cost the plans as returned
from Government included a brick balustrade to the Upper Hall.

(1) It has always been our intention to make that Hall
as open as possible above and below so that air should cir-
culate freely into the open space and into the Hall to which
the new building is attached. It was always intended to fill
in the space between the arches with wire in teak frames
similar to the verandahs of the Ophthalmic Hospital. This
would provide for the safety of the students who would be
liable to ~~turn~~^{run} at or sit upon a balustrade and might easily
overbalance and fall 15 feet. The contractor wishes to adhere
to the Government plan simply because it has been passed by
Government while I ask leave for the original scheme to be
carried out.

(2) The floor of the lower storey in the Government
estimate was to be of pressed bricks while the upper was to be
of country bricks. With the present difficulty of getting
Basel Mission bricks and their rise in price I propose to put
country bricks in both places and ask for leave to do so.

(True Copy)

For Director of Public Instruction.

[As regards the deviations ^{no 113} proposed (page 3 CF) the Chief Engineer considers that there is no necessity for the wire netting which in the case of the Ophthalmic hospital, is intended to keep out crows, & that a tank scantling may be put across the opening at about 15 or 18" above the parapet.

In regard to ^{other} deviation he considers the Square Country bricks may be used for
