Ref on Cur No. 5339/12.

Station Madras, Dated the 7th October 1912.

From (Name) The Hon'ble Mr. A. G. Bourne, D.Sc., F.R.S., C.I.E.,
(Designation) Director of Public Instruction.

To the Secretary to the Government of Madras,
Educational Department.

S i r,

I have the honour to submit herewith the plans and estimates amounting to Rs. 26,600/- for providing a boarding house and also additional class rooms for St. Teresa's European School, Cannanore, and to recommend that under Article 57 of the Code of Regulations for European Schools, a grant not exceeding one-half of the estimated cost may be sanctioned. A copy of the Correspondent's letter No. 29, dated 14th September 1912 giving details as to the improvements proposed to be carried out, the annual statement for the year ending 31st March 1912 which gives the financial condition of the school and also a short history of the institution are, herewith, submitted.

I have the honour to be, Sir,
Your most obedient servant,

Naamee

No. 29.

Cannanore,
14th September 1912.

From

The Correspondent,
St. Teresa's European School,
Cannanore.

To

The Director of Public Instruction,
Madras.

Through

the Inspectress of Girls' Schools,
Southern Circle.

Sir,

With reference to your Proceedings No. 5339 A., dated 14th August 1912, on the Inspectress's letters R. C. No. 970 of 12., dated 29th June 1912, submitting plan and estimate amounting to Rs. 26,600/- for improvements and extension to the existing school building, to provide combined accommodation for (a) school Room (Lower floor) (b) Boarding House (upper floor). I have the honour to submit the following details with regard to the proposed work, - namely Part of the School building retained - Extension - Improvements.

1. It is proposed to utilize the existing school building as also the sound old materials dismantled as much as possible as shown in the plan (see reference) as follows:--

(a) Red and black lines denote existing building to be dismantled.

(b) Red shaded lines indicate existing building to be retained.

(c) Black lines. Proposed Improvements and Extension.

2. I am informed that the details with the

This seems to be a summary of the plans

3
4
the ground plan, section and elevation furnish every information necessary to carry out the work.

3. To make the ground plan still clearer, I attach a copy in duplicate of the upper floor.

4. I expect this explanation will convince you of the clearness of the plans.

5. With regard to a cheaper scheme being adopted, I have the honour to inform you that the present plan was prepared under the advice and consultation of experts. The only alternative suggested was to utilize the central wing (see black dotted lines ground plan) in the front or west face. This room measuring $22\frac{1}{2}'$ x $11\frac{1}{2}'$ being so narrow and disproportionate had to be abandoned and the side wings adopted.

6. The other alternative was to improve the present boarding house. This proposal was submitted by me in 1911 and for Rs.23,300/-. This did not provide additional accommodation to the class rooms.

7. The present accommodation of our class rooms is very inadequate to the requirements of the school. We have in consequence to resort to the verandah and the drill shed for space. Owing to the heavy monsoons these open spaces are damp, exposed and unhealthy, and cannot be utilized between the months of June and October. As a consequence the class rooms are over crowded during the rainy weather nearly five months.

8. The present proposal provides:

A. additional accommodation to the class rooms in the lower floor.

(b) accommodation for Boarding House in the upper floor.

9. This combined proposal minimises the cost, meets all requirements and is considered the cheaper scheme. I therefore resubmit the plans and estimates

Rubbish

Is it feasible to add an upper floor over an existing single shaped building?

estimates as per margin for your favourable consideration and approval.

9

NOTE BY THE CHIEF ENGINEER, PUBLIC WORKS DEPARTMENT.

DATED 9-8-1913.

The proposal in this case is (a) to add a second storey to a building with laterite walls and (b) to provide for ferro-concrete flooring.

2. As regards the addition of a second storey, the pressures work out to 4.83 tons per square foot, which is much in excess of the safe load for laterite. It is therefore thought that the additional accommodation required should be provided by an additional one-storied building.

3. As regards (b) Ferro-concrete work requires very careful supervision such as is not likely to be available in mufassal districts and for other reasons it is not desirable to have ferro-concrete work in a work of this sort.
