Ref. on Cur. No. 1508/15,

Station Madras, Dated the 27th February 1915

From (Name) The Hon. Mr. J.H. Stone, M.A., F.R.H.S., C.I.
(Designation) Director of Public Instruction.

To The Secretary to the Government of Madras,
Educational Department.

Sir,

I have the honour to request that you will be so good as to obtain the sanction of Government, under section 14 (a) of the Reformatory Act of 1897, for the discharge from the Reformatory School, Chingleput, of Arokiaswami, pupil No. 80.

2. It will be noticed from the enclosed copy of the extract from the "Hospital case book" that the pupil in question who was admitted into the school on the 16th December 1912, under instructions from the District Magistrate of the Nilgiris, has been suffering from Tubercular Phthisis and that his further detention is reported to be a source of great danger to the health of the other Juveniles in the school.

The Superintendent of the school urges therefore ^{the} desirability of discharging Arokiaswami immediately and I beg to support his recommendation.

3. I solicit the favour of very early orders on this communication.

I have the honour to be,

S i r,

Your most obedient servant,

Arokiaswami

for Director of Public Instruction.

Date of discharge from Hospital.

Month and
date.

Particulars of the state of patient on
admission, treatment, diet and results of
post-mortem examination (if any)

February
22nd.

History:- Pupil No. 80 was admitted to the Reformatory School on 16-12-1912 to be detained for 5 years. He was examined on the 7th January by Captain D.S.O'Keffe, I.M.S., who certified that his health was good. The boy comes from the Nilgiris and before admission to the school he gives a history that he was getting fever with head-ache and swelling of his extremities. He does not give a history of cough. Neither does he give out that any of his near relations had Phthisis. It is only after admission to the school that he had cough. He was admitted to Hospital on 29-3-1913 for fever and cough and discharged on 7-4-1913. On a second occasion he was admitted to Hospital on 30-7-1913. As the Sub-Assistant Surgeon of the Reformatory was sent away on festival duty at Red Hills at that time, the pupil No. 80 was sent to the Municipal Hospital on 14-8-1913 in a very bad condition. Under treatment he improved and was discharged from the Municipal Hospital on 6-10-1913. Ever since that time the boy was allowed to sleep in the open air and his trade was also changed from the tailor to the gardener. He was attending breathing exercise class and was getting Cod Liver Oil and tonics and also milk diet now and then. With all this he has not improved and he has been losing weight. When he was discharged from the Municipal Hospital on 6-10-1913 he weighed 62½ lbs., and he was keeping up this weight till August 1914 after which time he has been

losing. At the end of January 1915 he weighs only 51 lbs. thereby losing nearly $11\frac{1}{4}$ lbs. He was admitted to Hospital on 10-2-1915 for Dysentery. When examined it was found that the whole of his right lung has been affected. The cough was worrying him much and he was spitting out greying thick phlegm mixed with blood. He is much emaciated and has got an anxious look. He has lost his appetite. There is no doubt that he has tuberculosis of his lung. The boy is very dangerous for the school as he may infect others. With his physical condition thus deteriorated he cannot learn any trade. As such it is advisable that the boy should be got rid of from this school as early as possible. The Superintendent, Reformatory School, will be pleased to see that the boy No. 80 named Arokiaswami is discharged from the school at an early date
