Station M a d r a s, Dated the 13th February 1915

From (Name) The Hon. Mr. J.H. Stone, M.A., C.I.E., F.R.H.S.,

(Designation) Director of Public Instruction.

To The Secretary to the Government of Madras,

EDUCATIONAL Department.

(Through

Sir, the Accountant - General).

I have the honour to request that you will be so good as to obtain the sanction of Government for an expenditure of Rs. 100/- per mensem in connection with the arrangements made for giving extra tuition in the subjects of Group II of the Intermediate Course to the students of the Madras College for Women who are at present attending the Presidency College for instruction in those subjects.

2. Of the 34 students on the rolls of the college, 11 have taken for their optionals Physics, Chemistry and Natural Science

and owing to the extreme difficulty for girls of the Intermediate Science Course and the great importance, particularly in view of the desirability of the entry of Medical Scholarship holders on their medical course not being delayed, of the students of the college being given all possible help in preparing for the examination special coaching is absolutely necessary. I was already considering means for improving the Science teaching in the college when the medical aspect of the matter was brought to my notice by the Hon'ble Mr. Cardew and to avoid further delay permission was granted by me to the Principal to arrange with the advice of the Professors of the Presidency College for the necessary coaching. She accordingly engaged the services of M.R.Ry. M.C.S. Anantapadmanabha Rao, M.A., L.T., Lecturer in Science, Teachers' College, Saidapet, and M.R.Ry. G. Sambamurti, B.A., L.T., Assistant Professor of Chemistry, Presidency College, to give special coaching to the students in question in Physics and Chemistry. It is reported that the Special Lecturers entered on their duties on the 4th instant and the 20th ultimo respectively and that each of them is to devote two hours a week for the of the term, i.e., until the end of March next. It is posed to pay each Lecturer a monthly remuneration of and this rate I consider to be reasonable having reposition they hold in the Department, the inconvenience which they will be put and the temporary naturement. I request the sanction of Government the above two Lecturers accordingly. not interfere with their legitimate

3. The extra expenditure will

Mr. P. R. Acharivar,

I enclose herewith a note from Miss D. L. Hey with reference to my suggestion that in the hope of increasing the number of women candidates entering the Medical College with a view to obtaining a degree in Medicine some steps might be taken to assist by extra tuition women students in Group II who are studying in the Madras College for Women ^{for the Intermediate}. I wrote a note the other day in the Public Department on the subject of the question of medical education for women and I ordered an extract from it to be sent to you. When it is received, will you kindly attach Miss De Lahey's letter to the file so that His Excellency the Governor, when the file goes to him, may see exactly what Miss De Lahey has written.

A. G. Cardew.

Hon'ble Diwan Bahadur
P. Rajagopala Acharivar Avarcal,
Secretary to the Government of Madras,
Educational Department.

can't ask the lecturer to give us a
detailed explanation? 11/9/44

So perhaps something could be
done in the way of extra tuition
to help them through the examinations.

I hear it is settled that we
are to stay here for another year
or two, so that means the
continuation of the girls' study at
the Presidency College.

Yours sincerely

Dorothy deLattre.

Radnor College for W

Wylfere-

Dec. 17. 1944.

Dear Mr. Cardew

I have been talking to the
girls who are taking Science.

They do not seem to think that
there is better material than
themselves to draw upon, even
with increased scholarships,

2 perhaps more might be attracted. They say girls are afraid of the hard work and the long course of study.

As to the point of extra tuition, however, they say a great deal could be done, apart from the laboratory work, which might be of considerable help.

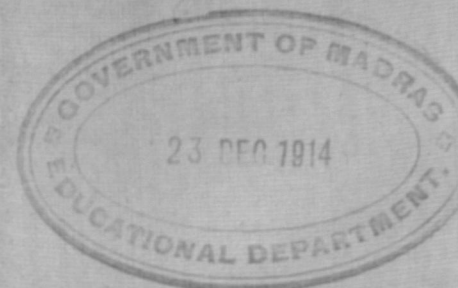

They say they find themselves at a great disadvantage to the boys

because the boys have all studied chemistry before entering college for two or even five years.

Consequently a good deal of elementary knowledge is taken for granted in their work.

Knowledge which these girls do not possess. They feel this lack of sound work training

very acutely they say, and we don't understand and we

NOTES.

Page 3

Extract from the note of the Hon'ble Mr. A. G. Cardew, C.S.I., in G.O.No. 1354, Public

The question of providing a larger number of women who have taken the M.B., & B.S. Degree is so important that it is necessary to pursue it further.

2. The Principal of the Medical College stated in paragraph 9 of his report for 1913-14 in G.O.No.1354, Public dated 18th October 1914 that during the last ten years ~~the M.B. & B.S. Degree, and only five more have taken the~~ only five women have taken the L.M. & S. Degree. It is obvious that this is miserably inadequate to meet the needs of the Presidency and that something ought to be done to improve the position.

3. The first stage towards becoming an M.B.C.M. (M.B., B.S.) is to pass the Intermediate Examination of the University and women who intend to join the Medical College generally appear for the Intermediate Examination in Group II, that is, Physics and Chemistry. I understand that at present there are 11 students studying at the Madras College for Women for the Intermediate Examination and for that purpose they attend the Physics and Chemistry lectures at the Presidency College. I am told that their general education is so defective that only about two are certain to pass in the Intermediate Examination. I am also told that partly owing to the fact that the classes in the Presidency College are large and partly owing to the fact that female students are naturally rather shy and diffident, they do not get enough individual attention at the Presidency College and this partly accounts for the poor prospects of success in the Intermediate Examination. It must be at least a year and possibly two before the College for women will be in a position to provide its own instruction in Physics and Chemistry and the only remedy that can at once be supplied is, as far as I can ascertain, the provision of some special

coaching

13/288

10

A

coaching at the Women's College which would supplement the lectures in Chemistry and Physics and help forward the weaker candidates amongst the women students at the College. I have asked Mr. Stone something about this and he seems to think it as a feasible idea. I should like an extract from this note to this point sent to the Educational Department with the request that the possibility of providing special coaching at the Women's College for students preparing for the Intermediate Examination of the University in Group II may be considered as early as practicable.

4. Apart from this question of the Intermediate Examination, there is a further question of whether some steps could not be taken to attract a larger number of women to take up the medical profession and to pass the M.B., B.S., and L.M.S., Degrees for that purpose. From conversations I have had with Miss DeLaHay I am much afraid that the general education of women in this country is so backward that it is doubtful whether candidates of sufficient education exist in any large numbers. At the same time I think that something might be done by advertisement to make the opening for women doctors better and more widely known. With this object, I want to have a Press Communique drawn up setting forth exactly the periods of study involved, the scholarships available for students undergoing those periods of study and the prospects open to those who pass. Information regarding the scholarships has already been collected in the notes which were prepared in September last and which are placed below. The information about periods of study can easily be added and the information regarding the rates of pay available to women who obtain the M.B., & B.S., or L.M. & S. Degree is apparently to be found in G.O.No. 1128, dated 26th October 1911. I shall be much obliged if a Press Communique drawing attention to these facts can be drawn up.

The point for consideration in this Department ^{is} the suggestion at "A" on page 4 ^{viz,} ~~ante~~ ^{regarding} the provision of special coaching at the Women's College for students preparing for the Intermediate Examination of the University in Group II. As regards this suggestion, Miss Dela Hey, in her D.O. of 17th December last, says that something could be done in the way of extra tuition to help the girl students through the Intermediate Examination in Group II (Physics and Chemistry). The D.P.I. also "seems to think it as a feasible idea." Before the file is submitted to His Excellency, the D.P.I. may it is submitted, be requested u.o. to submit definite proposals in this regard.

The proposals promised by the D.P.O. for the provision of special coaching at the Women's College, Madras, for students preparing for the Intermediate examination in Group II have now been received. These consist in ~~the~~ ^{the services} ~~grant~~ of two special lecturers to give ~~special or instruction~~ extra tuition in Physics and Chemistry and in the payment ~~of~~ to them of a monthly remuneration of Rs 50 each for working for two hours a week. The re-appropriation statement which has been submitted by the Director for meeting the additional expenditure in the current year may be passed on to Financial for sanction, and for the next year that dept may, as advised by the Accountant General, be requested to enter the necessary provision in the budget.

2. A draft order is submitted for approval. It may be sent ^{to} ~~to~~ ^{to} ~~to~~ for acceptance.
