HIS EXCELLENCY THE GOVERNOR'S TOUR, 1915.

Extract from an address to be presented to His Excellency the Governor by the inhabitants of Madanapalli sub-division.

"7. The majority of our people are agriculturists, but our seasons have become precarious; consequently the condition of our agricultural population is growing worse daily. If rural schools are started where the children are given instruction in carpentry, weaving, smithy work and such other industries, it will enable the agriculturists to eke out their livelihood in bad years. We request that the Government will be pleased to give the subject their favourable consideration."

Collector's remarks.

There are no technical or industrial schools in the district under the control of local boards. There is no surplus population in Madanapalli taluk to attend these schools and the necessity for them has never before been suggested.

Secretariat note.

EDUCATIONAL DEPARTMENT.

When His Excellency the Governor was on tour in the Anantapur district last year, it was suggested that industrial schools might be started at certain places in the district, and His Excellency then expressed the opinion that it would be necessary for some time to concentrate industrial teaching in large centres for the sake of efficiency. It is not feasible for the Government to establish rural industrial schools as suggested in the address. If private bodies come forward to open such schools, the question of aiding them will be duly considered by the Director of Industries.

P. RAJAGOPALA ACHARIYAR—25-6-15.

Please see paragraph 4, pages 2 and 3 of G.O. 894, Educational, 28th July 1914.

Ed. Department.

Three copies of a note on para 7 of the address to be presented to H.E. the Governor by the inhabitants of Madanapalli sub. division are submitted below. The file may be sent to the P. & G. us.

Returned with the following extract from

His Excellency's reply:-

"Industrial education is, as you know, still in an early stage of development, and I must adhere to the opinion which I expressed last year that for some time to come it would be necessary to concentrate industrial teaching in large centres. I fear that it is not therefore feasible at the present stage to establish rural industrial schools as suggested in your address. If however private bodies come forward to open such institutions, the question of aiding them will be duly considered."
