No. B.17

Station MADRAS, Dated the 5th July 1915

From (Name) K. T. B. TRESLER, ESQ.,

(Designation) DIRECTOR OF INDUSTRIES.

To The Secretary to the Government of Madras,
EDUCATIONAL Department.

Sir,

page 1 of 2. 54688 (E) 24/5/15
I have the honour to state that in my No. E.45/3-5-'15 I indicated that there would probably be savings amounting to Rs. 36,500 in my Educational Budget and enquired in what manner these savings were to be utilised.

2. I received orders that the sum thus saved might be devoted to the establishment of a school at Cocanada. In page 1 of 2. 10223 (E) 3.7.15 my No. E. 44 28-6-15 I pointed out that recent developments have necessitated a reconsideration of the details of this proposal and state that it will probably be impossible to incur any expenditure on this scheme during the current year.

82

2
3. In the circumstances I request that my proposals for the Vizag School may be considered. Government is aware that this scheme has been under consideration since 1908 and the authorities of the School that is to be developed are getting restive. Since, in the present stage of Industrial development we must largely depend on private bodies for the fulfilment of our educational programme I am anxious to meet the views of School authorities as much as possible and in this case I wish to push matters for the further purely selfish reason that this school commands the services of one of the best Mechanical Engineers in Southern India.

4. As explained in my Code, my scheme of Industrial Education is to have two independent sections: what I have termed the "School" and "Factory" Sections. The arrangements with regard to the two must vary according to individual conditions. At Vizag I propose that the School shall control both sections and draw a grant from Government for so doing. But as regards buildings I propose that the school shall provide accommodation for the school section and ^{for} Technical Instruction and all that Government will do is to provide and equip the "Factory" section on an adjoining site (to be acquired)

5. Bearing in mind the fact that the scheme of Industrial Education proposed is an artificial one, necessitated at present by local conditions but bound ultimately to be superseded, my proposals are framed with the object of spending capital in such a way that, if within the period allowed for ownership to lapse to the School Viz., 40 years Government wish to cancel the arrangement, the buildings etc., erected by them will be realisable asset.

6. It is practically certain that in the near future the importance of Vizag as a commercial centre will be much enhanced by the construction of a new line to it from the Central Provinces. At present there is no Workshop of any kind there and a factory in this place is therefore an asset of very real value.

3
The factory I propose to build is close to the harbour and will be the sole property of Government. Hence if at any time we wish to cancel the arrangement with the School we will again secure possession of a property that will probably be worth a good deal more than when we built it.

7. For these reasons: as I think the construction of the factory will be a safe investment in any case: as the Waltair proposal has been hanging fire for 7 years and as the Superintendent is willing to carry out the building at scheduled rates in minimum time I propose that the building of the Vizag Factory be undertaken out of savings so as to avoid a lapse.

The estimated cost is:-

Land	Rs. 2,100
Buildings	50,000
Equipment	38,000

As regards equipment, I doubt if any machinery can be obtained during the war, but there will be a good deal of shafting etc., required and this may be purchased locally. I can borrow some machinery from Bro. Emile the Superintendent to begin with and by spending such money as is available this year I can anyhow make a start.

I accordingly request administrative sanction for the following:-

i) Land	Rs. 2,100
ii) Construction of Workshop	50,000
iii) Equipment	38,000

Expenditure on ii and iii to be limited this year to Rs.34,000 available from savings this year after the purchase of land and the balance met from next year's funds.

I have the honour to be,
Sir,
Your most obedient servant,

Amr
17.
Director of Industries.

MEMORANDUM: 2365-1 201
5.8.15

The Government do not consider that it will be advisable to proceed further with the development of the St. Aloysius' Industrial School, Vizagapatam, before the question of the establishment of the Mechanical Engineering School at Cocanada is definitely settled. The further communication in respect of the latter promised by the Director of Industries in paragraph 5 of his letter No.E.44, dated the 28th ^{June} January 1915, should be expedited and such other materials as would facilitate an early settlement of the question should be submitted.

To the Director of Industries.

EDUCATIONAL DEPARTMENT.

C.No.2365 Edl., from the Director of Industries, Madras, No.B.17,
dated the 5th July 1915.

Subject.

St. Aloysius' Industrial School, Vizagapatam.

(17)

In G.O. No.185, Educational, dated the 19th
February 1915, the Government directed that a mechanical
engineering school should be located at Cocanada and that
that the Mission industrial school at Vizagapatam
should be developed with State aid. In his letters
Nos.E 45 and E 44, dated the 3rd May 1915, the Director
of Industries stated that there would be a saving of
Rs.36,500 in the current year's provision for grants in
aid of industrial schools and that this sum should be
utilised on the development of the Vizagapatam school.
As the Government had already given an undertaking in
the Legislative Council that the Cocanada school would
soon come into existence and as matters regarding the
Vizagapatam school were not sufficiently advanced, the
Government decided that the savings anticipated by

the

pages 1 to 4 of G.O. No. 546
22-5-15

Has C in industries
file

the Director should be spent in starting the school at Cocanada and that the Vizagapatam school must wait until further funds became available.

2. Subsequently in his letter, dated the 28th June 1915, the Director reported that some private agencies were likely to start industrial schools at Cocanada which might render unnecessary Government's action in that direction and that it would be advisable to wait and see how matters developed before spending any money on that scheme in the current year. He also promised to report further on the matter; and the further communication is being awaited.

He now urges that the funds available this year may be spent in constructing a workshop for the Vizagapatam school. It is submitted that, though the early establishment of the Cocanada school would be very desirable, in view of the uncertainty referred to above, it may be better that steps are taken sufficiently early to utilize the budget provision on other objects and thus

Go. M. 54625 (E)
22.5.15
+ note to it.
Has C in duties file

pages 1+2 of Go. M. 723 (E)
3.7.15

cf.

avoid a lapse. In this sense the proposal of the Director to spend the amount in connection with the Vizagapatam school may be accepted.

3. Coming now to the merits of the proposal it is submitted that, as observed by the Director, the proposal regarding the Vizagapatam school has been under the consideration of the Government for some years. A scheme for the development of the school was formulated in G.Os.No.2734 Revenue, dated the 18th August 1910, and No.99 Educational, dated the 14th February 1911. But for some reason or other the scheme has not so far been given effect to. The specific items of aid promised and the conditions imposed were as follows:--

- (i) that the Government should acquire a piece of land adjoining the school at a cost of Rs.2,167-2-9;
- (ii) that the Government should make a grant of Rs.6,000 for the construction of a workshop and of Rs.3,000 for additional machinery;
- (iii) that an annual grant of Rs.100 for every student in the school, subject to a maximum of Rs.4,000, should be made;
- (iv) that the management should allow the Government to nominate twenty pupils of any caste or creed;

Please see the letter from the
Correspondent of the School
on page 2 & 3 of G.O. No. 72824
9.8.12

NOTES.

Page 9

(v) that the management ~~under the management~~ should entertain two assistants, one for the fitting shop and one for the carpentry shop to look after the apprentices;

(vi) that the accounts of the workshop should be kept entirely separate from those of the school proper;

(vii) that the disposal of the buildings and site referred to in (i) and (ii) should rest with the mission, subject to the condition, that in the event of their ceasing to be used for the purpose of industrial education the cost of erecting the buildings and acquiring the site should be refunded to the Government; and

(viii) that, in case the school should cease to exist, a refund of the original Government contribution towards machinery minus 10 per cent. per annum should be made.

4. According to the present proposal of Mr. Tressler, the mission will provide the buildings necessary for school and technical instruction, while the Government are to construct and equip the factory. The cost of the proposal is estimated as follows:--

(i) Land	Rs. 2,100	✓
(ii) Workshop	50,000	✓
(iii) Equipment	38,000	✓
Total	Rs. 90,100	✓

para 4, page 2 of cf.

para 7, page 8 of cf.

10

**Disputed
by 628*

*Para 3 of office note
on page 2 of n.f.
in the linked file.*

*88,000 (total cost)
36,000 (amount available
this year)
54,000*

As regards item (1), it is submitted that the linked file deals with the question of acquiring land for the workshop of the school. The cost of acquisition (Rs.2,100) is to be recouped from the sale proceeds of the land already acquired for the school.

As regards the other two items, buildings and equipment (50,000-38,000 or 88,000), the rough estimate may, it is submitted, be accepted for the present, detailed estimates being called for later on.

A sum of Rs.54,000 will have to be provided in the next year's budget for the balance required for the work. No undertaking can apparently be given now and in the present state of finances whether this is possible. Unless it were so, there will be no use in undertaking the scheme. The original scheme was much less expensive to the Government. A revival of it would have been more easily acceptable. Mr.Tressler may be asked to state whether this will not be possible now and shortly.

5. If the proposal is to be approved, it has

NOTES.

Page 16

to be determined what conditions should be imposed. It is not stated whether all or any of the original conditions quoted above have now to be given up, and whether the present proposals are in complete replacement of the former. If so, the question has to be decided under what condition the building ^{of school} should be handed over to the mission. Mr. Tressler has not reported specifically on the point. In his current letter there are references to the forty years' lease (which is the period prescribed for mortgages of buildings erected out of grants in aid.), and to the payment of grants to the school for controlling the school and factory sections. From this it may be assumed that though the entire cost of the building and equipment will be borne by the Government, the mission will bind itself in respect of them only to the extent to which ^{an} ~~the~~ ordinary management does in cases of building grants under the Grant-in-Aid Code, which usually do ~~not~~ not exceed one-half of the estimate, and that the school will receive only such teaching grants as is admissible under the code, and not the special rates originally

page 304 supra.

Art. 55 of the Grant-in-Aid Code.

para 4. page 2 of cf.

Art. 54 of the Grant-in-Aid Code.

NOTES.

Page 12

fixed.

6. It is submitted that the policy has been already accepted by the Government of acquiring lands and constructing buildings thereon for industrial schools at the cost of the Government and then lending them to private agencies for conducting the school in accordance with the instructions of the Department. It has been decided to apply that principle in the case of the industrial school at Tanjore. As the buildings in the present case are to be constructed by the Government, it would be better to adopt the same policy here also. The Director's proposal to hand over the building to the school on their executing a bond not to divert ^{it} on pain of resumption, to purposes other than those of industrial education within the next forty years does not seem to be an adequate condition. After that period the buildings will become the sole property of the mission. If an absolute lease is not considered necessary, conditions similar to those in clauses (vii) and (viii) ^(in para 3 above) may perhaps

*Re the Governor's note

by. cited (2)

para 5, page 2 of cf.

page 4 supra

NOTES.

Page 13

be imposed in respect of the new buildings and equipment. Mr. Tressler may be consulted on this point *also*.

7. Another point to be considered is ^{(whether,} the implied proposal in paragraph 7 of Mr. Tressler's letter to have the building constructed by the mission, should be accepted. If the entire cost is to be borne by the Government and if the building is to remain their property, it may perhaps be better to follow the usual course of entrusting the work to the Public Works Department.

8. As a first step, the file may, it is submitted, be sent to Mr. Tressler, u.o., with reference to paragraphs 4 and 6 supra.

SA
B-7-156 R
18-7-15

The matter immediately in issue is the saving from lapse of a grant of Rs. 36,500 which Mr. Tressler was instructed to spend at Cocanada and finds himself unable to spend there at present.

2. To compass this, he proposes to commit Government to an entirely new scheme for the

page 3 of 4.

pages 4-5-7

22-5-15 (L)

page 3 of cf.

page 2 of 3 of G. N. 72825

x
This was in 1910. It
was proposed ^{in 1910} to increase
the number to 40.

90,100
36,500
53,600

construction of a "factory" at Vizagapatam, the
cost of which is roughly estimated at Rs.90,100.

3. The scheme purports to be a development of
one sanctioned in 1912 for the improvement of the
St. Aloysius' Industrial School at that place at
an initial cost of Rs.11,000, but, while no reason
for abandoning that scheme is shown, no connection
of the new one with it is obvious. The school
already has workshops of a sort and all that
Government proposed to add to it was a carpenter's
shop. The new proposal is to construct a large
factory adjacent to the harbour which will or may
be a valuable asset to Government if and when the
Vizagapatam-Raipur railway comes through.

4. The scheme doesn't seem to have been thought
out and appears to be altogether too elaborate for
an institution with only 15 industrial pupils on
its books, nor can Government, for the sake of
saving the lapse of a grant of Rs.36,500 this year,
commit themselves to a further expenditure of
Rs.53,600 in the next.

5. Submitted that Mr. Tressler may be told

NOTES.

Page 10

15

that his present proposals for utilizing the balance of his grant do not commend themselves to Government; may be asked why the scheme sanctioned in 1912 has not been proceeded with and may be requested, if he finds it unsuitable, to submit detailed proposals for a scheme to replace it which will cover all the matters dealt with in the former scheme.

22.7.15

H. E.

On the information here, I am not at present prepared to abandon the Canadian engineering school: to which the Government is publicly committed. It will be sufficient in the first place to decide that point. Please obtain all ~~the~~ necessary materials for judgment.

1.8.15

Draft at once

2.8.15

A draft memo to ~~the~~ the Director of Industries asking him to expedite this communication promised by him in para 5 of his letter no E. 44 of 28.6.15 and to submit

in fo 723-12

5.8.15

My dear Moir,

Sp 5/16

The Government have decided to open a Mechanical Engineering School at Cocanada in connection with the local fund workshop at the place. Copies of G.O.No.185, Educational, dated the 19th February 1915, and G.O.No.546 Edl., dated the 22nd May 1915, regarding the proposal are enclosed for reference.

however
Mr Tressler has in his letter No.E.44, dated 28th June 1915, (Copy enclosed), *however* reported that other agencies are likely to come forward to open industrial schools in the station rendering unnecessary *any action by* the Government *move* in the matter. As you are no doubt aware of what is likely to happen in these directions, especially in connection with the legacy of the late Mulladi

Satyalingam

2.

Satyalingam Nayakar, I am to ask to

let the Government know at your earliest

convenience ~~and~~ what is the intention

of the Rajah of Pittapur and of the

trustees of the above legacy and whether

there is any likelihood of their

establishing any institution in the near

future which will adequately take the

place of the Mechanical Engineering

School which the Government contemplated

opening. I am to add that the Government

are anxious to come to an early settle-

ment of the matter so that the money

Yours sincerely,

reserved for the purpose
may be spent elsewhere
if Comrade does not require it.

NOTES.

Page 28

(Extract from notes on the file re acc'd a site for the St. Mary's Ind. School, Vizag. see in this.)

Will the Director of Industries please note so far as he can how matters stand in the question of the construction of an industrial school by private agency at Cocanada? What is wanted is any information that will be useful as material for a decision whether to proceed with the scheme for a Government school which has already been formulated.

C. G. T.
20-9-16.

Director of Industries P.O.

There are two proposals now on foot for the construction of an industrial school in Cocanada by private enterprise: one is the Raja of Pittapuram's scheme, the other that put forward by the executors of a late citizen of Cocanada, who left 8 lakhs for various public purposes.

The Raja and the executors have had some informal meetings to see if their schemes cannot be amalgamated and one of the executors has come to see me in the matter. There are various difficulties regarding the terms of the will which have to be settled and I propose to go to Cocanada.

NOTES.

Page 21/48

as soon as I can to discuss the matter with the executors and the Collector.

If a satisfactory arrangement can be arrived at, there seems no point in Government building a school of its own. From my experience of the way in which questions of this kind are handled by private individuals, however, I do not anticipate that any final decision can be arrived at for the next three months at least. The parties interested will wish to consider all my conditions in the greatest detail and all this takes time.

Before a final decision is arrived at, no steps would appear desirable and by the time such a decision can be expected it will be much too late to spend any money during the current year. Indeed, if a settlement were effected now, it would be extremely difficult to bring the scheme to the expenditure stage within the year.

K.T.B. Tressler.

Educational Department.

The above note was placed before His Excellency the Governor to-day. In view of Government's

22

x Ray R.

The file regarding this has
been sent to the file for acceptance

commitments in the matter of a mechanical school at Cocanada, he does not wish that scheme to be abandoned unless very strong reasons are shown.

The acquisition of the land at Vizagapatam was ordered to be proceeded with, because it was reported to be increasing in value and likely to be useful in any case, but all further action in connection with that scheme is to lie over for the present.

If it is impossible to employ any of the money allotted to the Cocanada scheme at Cocanada within the current year, proposals may be made for utilizing it elsewhere, but they must be without prejudice to the ultimate carrying out of that scheme, if it is so decided.

(By order)

Dated 18th September 15.

D.O.R.Dis.No./56/D.E. of 15.

My dear Todhunter,

In reply to your D.O.No. 2305 -Ed1, dated 5th -
August 15, I write to say that, on enquiry, I am given to
understand as follows:-

The Industrial school which the Rajmah of Pittapur
proposes to start is of a very Elementary kind and cannot
form a substitute for the school which the Government -
intend opening at Cocanada. The trustees of the late -
Malladi. Satyalingam Nayakar's charities also do not -
propose to start any school on a large scale. They have
not yet secured a site. These possibilities therefore -
need no longer be considered and the existing proposals
held the field.

Yours sincerely,

Est. Department.

Please see Mr. Nois's letter on page 18 and the notes on pages 15 to 17 supra. The schools contemplated by private agencies at bo-canada are said to be industrial schools of an ~~intermediate~~ elementary grade. The school that the Govt. have decided to establish at the place is intended to provide instruction in mechanical engineering of an elementary grade for the benefit of intelligent artisans. ~~Presumably the industrial schools proposed to be established by private agencies will make provision for teaching mechanical engineering subjects.~~ From Mr. Nois's letter, it would seem that these schools may not adequately take the place of the Govt. mechanical engineering school. ^(It happens that) Furthermore the private agencies are not likely to come to an early settlement in the matter. In these circumstances, the Govt. scheme may perhaps be prosecuted with & Mr. Dresser may be asked to submit definite proposals as early as possible. A draft d.s.

TELEGRAPHIC ADDRESS:
"CHROMIUM," MADRAS.
POST BOX NO. 454.

CNo 354780
MADRAS, 1940-41

14th October 1915

My dear Todhunter,

With regard to the Cocanada School I have written to Moir to ask him when he can see me in the matter as I consider it necessary to discuss things with him. He tells me that he will only be back in head quarters at the end of the month, when I shall go up and try and settle things.

2 I have however to point out that neither plans nor estimates for the Cocanada School are ready and that there are a large number of small details to be settled before work is begun. Moreover the plans have to go through many hands and I regard it as impossible to spend any money on this scheme during the current year.

3 I understand that the Madras Trade School is to be sanctioned, and if so, I could probably spend Rs. 15,000/- on this before the end of the financial year.

4 I give you this information so as to dispose of any hope of spending the amount surrendered by me by me before March.

Yours sincerely,

C.G. Todhunter Esq.,
Secretary to Government,
Madras, Ceylon.

[Signature]
14/10/15

Refer to this in the I.O. which has much in transfer even surrendered

16.10.15

(U) Under fo. no 185. D. of 19.2.15, the value of buildings tools & plant of the Local Fund workshop at Cocanada to be taken over for the purposes of the school (about Rs 33,460) has to be paid to the St. Board when the workshop is transferred. It has now been practically

Hr 16-18 ante

Para: 6 on page 6 of
Notes in the duties file

decided that the school should be re-established at Cocanada. The purchase of the workshop should also therefore be taken as settled. If so, it is for consideration whether the amount that is available now (Rs 24.072) ~~can~~ from the Industrial budget may not be utilized as a part payment of the amount payable to the St. Board. It may not be possible to provide any large funds for this & other purposes in the next year's budget. H.E. is anxious that the scheme should be started as soon as possible in view of the promises that have been already made. It is only the details ~~of~~ relating to establishment, working of the school that have to be decided upon.

If, however, it is considered unnecessary to spend any amount at present on the Cocanada School, the sum referred to above may be surrendered as suggested in file. I. above.

mi

With reference to his letter No B17, dated the 5th July 1915, the attention of the Director of Industries is drawn to G.O. No 66 Est., dated the 21st January 1916, in which the Govt. expressed their inability to accept his proposal to divert the funds set apart for the establishment of the mechanical engineering school at Bocanada in the current year for other purposes.

As no funds are thus available for the development of the St. Mary's Industrial School, at Vizagapatam, this scheme should be deferred for the present.
