however, it must be evident that there is a great field for a competent man, not only with regard to the location of water supplies but also the investigation of the various natural resources of the Presidency. Financial considerations may make it impossible at the present time to appoint a highly paid specialist but some sort of idea as to what can be done in the field of economic geology appears to me of the utmost value, and if we can obtain information on this matter cheaply and without committing ourselves to a definite policy, I think the experiment is well worth attempting.

3. I have recently received an application from a young man in the Geological Survey who is very anxious to be given a trial in the Department and seems to possess adequate qualifications. He tells me that he could get a lien on the permanent appointment for 6 months and I consider that a fair remuneration to begin with will be Rs.80 a month. If after 6 months he proves unsatisfactory or Government do not wish to go on with the experiment, he can always be reverted to his permanent appointment but during those 6 months I ought to be able to form a good idea of what sort of information can be obtained by geological investigation and on the strength of my report Government will be in a position to judge whether this work is worth continuing with. I accordingly request that as an experimental measure sanction may be accorded for the appointment of a Geological Assistant on Rs.80 a month for a period of 6 months. The expenditure may be met from the lump provision for "Miscellaneous Experiments" under "26Bm Scientific & Deptt" in the next year's budget.

I have the honor to be,

Sir,

Your most obedient servant,

Director of Industries.

OFFICE NOTE.

SUBJECT, Appointment of an economic geologist in the Dept^t of Industries.

From the D.I. N. A. 28, dated the 8.3.16

Register No. 947.

para 2, page 4.

The Director of Industries requires an economic geologist for work connected with the investigation of underground water supplies and of the various natural resources of the Presidency.

- © In G.O. N. 1189 Est., dated the 22nd October 1914, the Govt sanctioned ~~the~~ the employment of two surveyors on Rs 80 per mensem in the Dept^t for investigating the underground water resources. Mr Dresser ~~has~~ has recently applied for sanction to the retention of the services of these two surveyors till the 31st March 1917. He now ~~proposes~~ proposes the employment of an economic geologist ^(on Rs 80 pems) in addition

addition to the surveyors. The Revenue Dept^t which controls the pumping & boring operations may, it is submitted, be requested to offer their remarks on the proposals.

2. As regards the ^(other item open to) ~~the~~ investigation of the various natural resources of the Presidency, it is for consideration whether Mr. Trevelyan should now undertake the work & if so, whether a man on R. & S. will be competent to do much in this direction. The remarks of the Revenue Dept^t may first be obtained.

consulting mining engineers to Govt. When their application was referred to the Director of Industries, he recommended that the services of Mr. J.E. Hooper, the technical partner of the firm, might be secured for investigation of borings made from a geological point of view. The Govt. considered that there was no need for employing the services of the firm - vide Sir John Atkinson's note at page 5 of the notes to E.D. No. 1430 Resd. 16.5.1914. In his letter No. 117 E.D. 8-6-1914 the Director of Industries pointed out that he had records of over 2000 borings which would be invaluable as a basis for the thorough investigation of the underground water resources of the Presidency and the location of supplies if they were arranged and correlated. For this purpose he recommended the appointment of two surveyors and one tracer for a period of 6 months. This establishment was sanctioned in E.D. No. 1189 E.D. 22.10.14. The retention of this establishment up to 31.3.1916 has been sanctioned and Mr. Dwyer has applied for its retention up to 31.3.1917. The proposal was approved in this Deptt. and the file has been sent to the Finl. Deptt. He now requests the

appointment of an economic geologist on Rs. 80 p.m. for the location of underground water supplies and for the investigation of the various natural resources of the Presidency.

2. The transfer of the pumping and boring operations from the Dept. of Industries to the Dept. of Agriculture has been approved in R. No. 523 Resd. 7.3.1916 and the Director of Agri. has been asked in O.M. No. 858C/16-10.28.3.16 to report from what date he would wish to take over these operations. As the work will soon be taken over by the Director of Agri. the appointment of a geologist for the purpose of studying underground water supplies need not ~~now~~ be considered. The Director of Agri. may be left to formulate proposals for the appointment of one if he considers it necessary after he takes over charge of the Pumping and Boring Dept.

The Director of Industries may be informed that the proposed appointment of a Geological test is unnecessary for the present.

I agree with the office.
I doubt if, even were Mr. Prenter in charge of the

Pumping - Boring Dept, he
could be said to have made
at a case.

I think that any proposal
for such fresh recruitment as was
proposed should be left
to the Boring Dept.
