 foregoing.

1. The first of these is the
 fact that the population of
 the world is increasing at
 an alarming rate. This is
 due to a number of factors,
 including improved medical
 care, increased food supply,
 and a general increase in
 living standards. The result
 is that the world is becoming
 more crowded, and this has
 led to a number of problems,
 including pollution, over-
 crowding, and a shortage of
 resources. These problems
 are all interconnected, and
 they all have the potential
 to cause serious damage to
 the environment and to
 the quality of life of the
 people of the world. It is
 therefore essential that we
 take action to address these
 problems, and to ensure that
 the world is a better place
 for all of us.
