EDUCATIONAL

DEPARTMENT.

Registered 124 1916.

Subject.

Requesting that, in the circumstances stated, the new building for the Municipal High School, Anantapur, which is nearing completion may be made available for the new ced3d Districts' college which is to open in July next and that the Munro's Kutcherry in the station may be adapted for the Municipal High School

ENCLOSURES.

R.C. No. 3322/14

Station Madras, Dated the 10th April 1916

From (Name) The Hon'ble Mr. J. H. Stone, M.A., F.R.H.S.
C.I.E.,
(Designation) Director of Public Instruction,
MADRAS.

To The Secretary to the Government of Madras,
EDUCATIONAL Department.

Sir,

With reference to Memorandum of the Public Works Department No. 659 Works/A/16-1, dated 11th March 1916 asking the Superintending Engineer, III Circle, to submit detailed plans and estimates for adapting the Munro's Kutcherry at Anantapur for use as a college, I have the honour to state that M. R. Ry. M. C. S. Anantapadmanabha Rao Avl., Science Lecturer, Teachers' College, who was deputed to arrange for the fittings for the Science Laboratory

tory, has suggested a modification in the original proposal for accommodating the college. In the interests of both the Government College and the Municipal High School in the locality he proposes that the former be located in the building that is being constructed for the latter at the cost of Government and that the High School be moved into the Munro's Kutcherry. The proposal, as will be seen from the enclosed extracts from his letter is a good one and I solicit the approval of Government thereto. It is practically to postpone handing over to the Municipality the new building sanctioned for its school in G. O. No. 300 Educational dated 17th May 1909. Should Government approve the modified proposal, I request that orders may be issued to get ready for occupation by the 15th June next the new building which is said to be nearing completion and to adapt the Munro's Kutcherry for the High School. On receipt of the orders of Government I shall obtain and submit plans and estimates for the gas and water fittings required in the new building.

I have the honour to be,

Sir,

Your most obedient Servant,

G. V. Subramanian

for Director of Public Instruction.

Y. V.

3
Letter dated 29th March 1916 from M. R. Ry.

M. C. S. Anantapadmanabha Rao Avl., Science Lecturer, Teachers' College, Saidapet, to the Principal, Teachers' College, Saidapet.

X X X X X

I beg to submit for favourable consideration and early orders some suggestions regarding the location of the college which would give it a better start amid healthier surroundings and would eventually lead to a considerable saving in the initial outlay on laboratory accommodation.

MUNRO'S CUTCHERRY AND SCIENCE ACCOMMODATION.

2. A set of new rooms have to be erected

(i) one for gas producers, oil and fuel stores;

(ii) one for gas engine & dynamo;

(iii) one for battery;

(iv) one for the workshop;

and a foundation should be laid for erecting a gas holder and tank. The rooms will have to be about 12' x 10' each and all the rooms together would cost about Rs.3,500/-.

3. An iron water tank will have to be provided at a height of about 25 feet. The present building having no suitable site for it on its roof, a suitable independent support will have to be erected for the tank.

4. A gas holder and tank with the necessary gas plant will cost about Rs.10,000/- and the pipes, cocks, and other fittings for gas and water distribution would cost about Rs.1,500/-.

5. Working benches will have to be provided, and in addition, galleries, lecture rooms, almyrahs, cupboards for

storing apparatus and chemicals, fume cupboards, &c., which will cost about Rs.6,000/-.

6. The laboratory rooms are 22 to 25 ft. in breadth and have no verandahs on the eastern and western sides; a verandah on the western side will be required to keep off the sun after noon from the apparatus, fittings and students, and to give a common protected passage to the various science rooms: The rooms have a row of granite pillars running in the middle of the block (see plan A, block B). These pillars cannot be removed and thus present considerable difficulties in fitting up the room with a suitable gallery, working benches, &c. The lecturer cannot have a full view of the whole class in the lecture room nor in the practical class. The rooms may be fitted up however with the necessary lecture tables, working benches, &c. with the above defects.

SHIFTING OF THE COLLEGE TO A PERMANENT BUILDING.

M/

7. Munro's Cutcherry is not suitable as a permanent habitation of the Arts College on account of its very close proximity to dwelling houses, to temples, public street and markets, and absence of free space for games, &c in its compound. A change to a permanent abode in the Town Extension of Anantapur is contemplated. (See G.O. No.1252, Educational, of 9-11-14). In view of this shifting, the amount spent on (1) additions referred to in paras 2 & 3, and (2) on fittings referred to in paras 3, 4 & 5 would entail an eventual loss of about Rs.7,000/- Fittings made to suit rooms with numerous pillars could not be fitted into a new

(S)

3. building constructed on up-to-date plans, not to mention breakages caused in dismantling, shifting and refitting benches, galleries, &c. Besides, cupboards, tables, &c. made to suit these rooms would not neatly fit into the window spaces &c. of other rooms. The gas plant and battery, gas and water fittings could not be shifted without an additional expenditure of about 25% of their initial cost. The new rooms referred to in para 2 would, of course, be of more use for the college.

THE NEW HIGH SCHOOL BUILDING PROPOSED FOR THE COLLEGE

8. If a building could be had which could be fitted permanently for the college at the very start, there would be no eventual loss to the Department and the trouble and expense taken in fitting ^{it} up would not be in vain. A decent building (see plan B) in the Town Extension and near other public buildings, Taluq Cutcherry, Railway Station, Police School, (see rough plan C) is nearing completion and is intended for the Municipal High School. The roof alone for the big hall has to be put up, and the plastering and flooring for the whole building has to be done, for which materials seem to be ready on the spot. I learn that it might be made ready for occupation in 2 or 3 months and it could be occupied in July next. The building has a very fine view and a big compound. A number of bungalows could be secured, so the Taluq Board President of Anantapur, Rao Bahadur Pulamati Adimurthi Rao Garu informs me, for hostels and lodgings for lecturers and students in the neighbourhood. The building could accommodate the college classes for Groups I & III (a tentative distribution of classes in the building is shown in plan B in red pencil).

There is sufficient space for future expansion and the immediate construction of out-houses needed for gas, battery, &c. in the compound, which is spacious enough for games &c. There are vast dry lands available near the site which could be acquired for hostels, &c.

9. The building could not have been suggested for the college earlier since it was started only in 1914 and could not be expected to be ready in July 1915 when the college was intended to be opened, nor was it more than one floor high in October 1915 and owing to war conditions and the cutting off of P.W.D. grants, the completion of the building could not have been decisively foretold. Otherwise I feel confident that the location of the proposed college in the New High School building would have been proposed.

10. If this building is fitted up for a college in July next, even if it is decided not to continue the college after a trial of two years, it may be handed over with all its fittings to the High School.

MUNRO'S CUTCERRY AND THE HIGH SCHOOL.

11. The High School is, at present in urgent need of accommodation for which the new building referred to in para 8 is being constructed. Instead of this new building, it may be given the Cutcherry with the structural alterations and additions of verandahs and windows, &c., already proposed to fit it for the College. It needs no elaborate arrangement for the laboratory. The pillared rooms which are unsuitable

for a laboratory could be conveniently used for lower classes Forms I to III, or the Primary Department. The High School laboratory may be located in the northern side of the main building. Space can be found for all the classes from I to VI and the ~~xxx~~ small rooms now occupied on the southern side of the Square by Forms I to III and classes 2, 3 & 4 may be left for the exclusive use of the Primary Department. The Town Hall which is now rented for the school may be given up.

12. A plan of Munro's Cutcherry (see plan D), is sent herewith, with the location of various classes marked therein. The Cutcherry has a verandha in various corners and if they are all joined together, the building will give access to each room independently, leaving the central hall, the library and reading room undisturbed. This is shown in the above plan.

THE TRAINING SCHOOL

13. If the above proposal is adopted, the building now partly occupied by the High School, and partly by the Training School will be left solely for the Training School, as has been, I learn, decided by the Director of Public Instruction.

SUMMARY.

14. The College could be started in a building of its own with plenty of accommodation for hostel, staff and playgrounds, and in the Town Extension of Anantapur. The High School will have increased accommodation in the old town in a historical building, (near the houses of boys), and will

have the Primary Department in its neighbourhood. The rent paid for the occupation of the Town Hall will be saved. The Training School will have the space already decided for it. There will be a considerable saving effected by avoiding the need for shifting the physical and chemical laboratories from an old building to a new one, with its fittings, and apparatus and the necessary buildings.

15.

x

x

x

16. The period of three months that lies before us may be found sufficient if early steps are taken to request the Public Works Department to complete the buildings and hand it over to us by July. The gas and water fittings will take some time, but the college work can get on without them for some months, if the apparatus is ready.

—ORDER.

No. 100/10 dated 19-4 191

The Karantapur Rmbl. Council will be informed that it has been suggested by Govt. that, in the interests of the new Govt. College and the Rmbl. High School in Karantapur, the former may be located in the building that is being constructed for the latter at the cost of Govt. with reference to G.O. 300 Est. & 12.5 and that the High School may be moved into the N. Kutcherry, this building being adapted for the High School.

The Council are requested
to report if they agree.

Submitted that the views of the Anantapur municipal Council ^{on the proposal} be obtained in the first instance.

A draft reference is submitted below for approval.

18/4
19.4.16.

15.4.16

Financial Dept.

The draft order may, it is submitted, be accepted in Financial.

2. The cost of adapting the Munro's Kutcherry for ^{the} use of the Municipal High School is not known. As Govt. have promised in G.O. No. 300 Ed. 2 of 5.09 to construct a building for the school at the cost of Govt., the charges for the improvements to the Munro's Kutcherry should be borne by Govt.. There appears to be no provision in the budget for this work, and it is presumed that the cost will be small and ~~will~~ will be met by the P.W.D. by reappropriation.

There is no objection to the location of the college in the new high school building which is nearing completion, but as regards the proposal that Munro Kutcherry should be adapted for the High School financial must, I think, stipulate that this will be

done only if the P.W.D. can find the money. If it can, then the High School must continue in its existing quarters. The urgent part of the scheme is the College.

20.5.16

Educational Deptt.

Please see P.W. Memo. No. 658-W, dated the 11th March 1916, in which the Superintending Engineer was requested to apply for the funds required for adapting the Munro Cutcherry at Anantapur for the purposes of the College. Presumably the P.W.D. contemplates to find the requisite funds from their own

budget. The only change that is now proposed is the adaptation of the building for the high school, instead of for the College. It is unlikely that any ~~increase~~ ^{increase} in cost would be involved by the change. There seems therefore to be no objection to the P.W.D. funding the funds for the altered proposal also from their own budget. The work was foreseen long ago and this Department have been urging for the insertion of provision for the purpose. As Financial have definitely expressed their inability to allot any additional funds, P.W.D. may be asked to provide them; and the file may be forwarded to

(9)
the adaptation of the munn's Cutchery for ~~purposes~~ of the High School in case the College is to be located in the new ^{School} buildings ~~from the High School~~ Educational point out that funds on account of the altered proposal should be found by this Dept. When P.W.D. first undertook to find the money, the proposal put forth was to effect a temporary reappropriation of the requisite amount from the grant for the new Eng. College. As Financial have objected to temporary reappropriations in recent cases under 45 Prov. Civil Works, that course is not ~~now~~ possible feasible. The question of allotting funds for the above work from the lump sum grant of 4 lakhs was put forward by Financial for consideration but from the orders since received, fixing the distribution of the amount it is observed that this work has been left out. It is not known whether it is being considered separately. Financial may be requested to note on this point.

Rs 29,000 has been
provided for the
apart for the ~~unaided~~
for College - Equip.
Mun. - Ala.

The cost of adapting the Catcherry for purposes of the College is estimated at Rs 28500. It is not known what it will cost to adapt it for purposes of the High School. If Financial cannot find funds now the question ~~of~~ will have to be left over for consideration until the receipt of the plans & estimates for the proposal.

2/ It may, however, be pointed out to Financial that the existing provision of Rs 21,500 in the current year's budget for the municipal High School, ~~is~~ in effect, to be spent for purposes of the college which is to be housed in the new buildings. It seems therefore proper that funds should be allotted for the school.

3/ The D. B. I. wants the school buildings to be completed & got ready for occupation by the 15th June next. The S.E. may perhaps be instructed by letter to do the needful. A draft telegram is submitted. After its issue the case may be sent to

(The telegram should issue at once).
P. W. D. cannot find the money for the conversion of Chinnai Cutchery, and if financial cannot do so the work will have to be deferred.

From
29.5.16

Financial my

Education should see first. As I noted on p. 4 the most part of the scheme is the college. The removal of the school to the Chinnai Katchery does not appear to be a matter of imperative necessity, ~~was also~~ or any great urgency. I was careful to verify this point before stating previously. Will Education kindly favour Financial with its remarks.

The draft order may issue after approval by His Excellency the Governor. A slight alteration rendered necessary by the notes on previous pages has been shown in pencil in paragraph 2 of the draft.

2. Some further point has to be made clear in this case. The present position seems to be this:-

The college for its permanent location should apparently have a separate new building on a new site, and the Munro outcherry is not obviously to be used by the college even as a temporary measure. For immediate use the new high school building is to be utilized, and the next shifting of the college from this building should be only to the new college building to be constructed hereafter. For the Municipal high school the existing arrangements should continue until the Munro outcherry is adapted for its use. To the latter the high school will move and will remain there until the special building already constructed for it is vacated by the college. If this be the next steps to be taken are

- (a) to adapt the Munro outcherry for the high school, and
- (b) to initiate proposals for constructing a new building for the college.

has been 7/1/14
 1252/14
 9/11/14

11. 24 24

It is the latter that will eventually aid in the permanent adjustment of the situation. But as this will take some time for fruition, the adaptation of the outcherry for the high school is a necessity, especially in the circumstances stated by the D.P.I. in his note on page 9 supra. The Director may be asked to take immediate steps for preparing the plans and estimates for this purpose. The Financial and Public Works Departments may be requested to be good enough to try to allot funds for the purpose in the course of this year, as it is desirable that the outcherry should be made ready for occupation by the high school at the beginning of the next school year.

So After the issue of the order, the file may perhaps be sent to the D.P.I. to ascertain definitely whether the scheme is above.

GOVERNMENT HOUSE,
OOTACAMUND.

8th June 1916

Dear Mr Rajagopalachari.

In connection with this file there seems to be one point which requires elucidation before His Excellency passes orders on it. At the foot of page 8 of the notes Financial asked Education for its remarks. The D.P.I. was then consulted, but apparently Financial did not see the file again and the draft order apparently commits Government to moving the High School into the Munro outcherry for the adaptation of which to the purpose money - so the P.W.D. and Financial say - is not available. The concurrence of Financial in the proposed draft order would appear to be necessary. Presumably Financial would require some addition to the draft which would indicate that the order does not contemplate any expenditure on the outcherry until Financial can find the funds. Would you kindly consider this and let me know?

Yours sincerely,

K. J. E.

The Hon'ble
Diwan Bahadur P. Rajagopalachariar A.L.C.I.E..

Ed. D. Path.

The proposal to ~~move~~ ^{break up} the College in the new high school buildings, with which alone the draft is mainly concerned, has been accepted by Financial.

- please see note on page 3 ¹⁰ supra.
As regards the other portion in the draft, viz: the removal of the high school to the Munro Cutchery, there are two aspects of the question - one the general approval to the proposal and the second the immediate provision of funds for adapting the building for the purpose. The first is more or less an administrative matter and financial have not raised any objection to the proposal from that point of view. There seems therefore to be no objection to a general approval being accorded by the Administrative Department as in the draft.

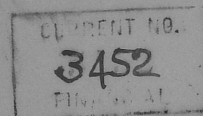

In regard to the other matter, viz: the immediate provision of funds for adaptation, both Mr. P. O. D. have expressed their inability to find the funds at present; and the D. P. O., who was consulted, does not press for the immediate execution of the work. So the question can progress ~~business~~ in the usual course, plans & estimate, being got ready in the first instance. Para. 2 of Ed. note

page 9 above

M

on pages 10 & 11 above deals with this point. As pointed out on page 11, Financial and P.W.D. will be consulted again in regard to provision of funds after the amount required for adaptation is definitely known. All this is intended to take place after the order has issued, as it relates to a separate question though cognate to the main issue. No expenditure on the muns catchery is obviously possible until plans & estimates are got ready: and for this a separate direction was proposed to be issued to the D.P.D. Nor has the D.P.D. ^{in his official letter} propose to incur any outlay on the work without undergoing the usual formalities. Thus by the general approval to the proposal as in the draft order, no authority to incur any expenditure is conveyed. It was to make this point clear that the last three lines of the original draft were purposely omitted.

Collec 1406-5
9.6.16

Ca 9.6.16
J. S. S. S.
9.6.16

The draft could, I submit, certainly be made clearer by bringing out the intentions of the Education Department which I take it to be that

the D.P. 1 is to succeed in plans and estimates to adapt the Cutcherry for the High School, and that it is to be made clear that there is no prospect of funds being immediately available. There is no objection in financial to the D.P. 1 being issued and discussed accordingly.

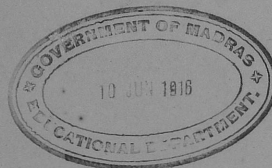

J.B. -
9.6.15

On this understanding financial need not demand, but it is certainly preferable if the words "and to move the high school into the 'Naras Cutcherry' were replaced by something like this:-

"Separate orders will issue with regard to the subsidiary proposal to adapt the Naras Cutcherry for the temporary accommodation of the high school."
