GOVERNMENT OF MADRAS
EDUCATIONAL DEPARTMENT

READ—the following papers :—

I

G.O. No. 1029, Educational, dated the 1st September 1914.

ABSTRACT.—Deciding to award annually six scholarships of the monthly value of Rs. 30 each tenable by natives of the Madras Presidency at the Victoria Technical Institute, Bombay, for a period of four years to enable them to undergo technical training there.

II

Letter—from the Hon'ble Mr. J. H. STONE, M.A., F.R.H.S., C.I.E., Director of Public Instruction.

To—the Secretary to Government, Educational Department.

Dated—Madras, the 22nd February 1916.

No.—Ref. on Cur, 458.

I have the honour to refer to G.O. No. 1029, Educational, dated 1st September 1914, in which Government sanctioned as a temporary measure the award annually of six scholarships of the monthly value of Rs. 30 each to be tenable by scholars from this Presidency at the Victoria Jubilee Technical Institute, Bombay, to enable them to undergo training at the institute in certain technical branches of study including mechanical and electrical engineering.

The Principal, College of Engineering, Madras, reports that the Engineering College has recently been well equipped with up to date electrical and other apparatus and that with the reorganized staff of the college, efficient courses in the higher study of mechanical and electrical engineering can be carried on and suggests that a few scholarships may be instituted in the college for the study of these subjects. I have the honour to recommend his suggestion for the favourable consideration of Government and to state that, if the proposal is approved, the value of the scholarships may be fixed at Rs. 15 each per mensem and that, if necessary, a corresponding reduction in the number of the scholarships now sanctioned as tenable at the Technical Institute, Bombay, may be made, and that the latter may be limited to subjects other than mechanical and electrical engineering.

III

Endorsement No. 662-1, Educational, dated 15th March 1916.

Referred to the Director of Industries for very early remarks.

P. RAJAGOPALA ACHARIYAR,
Secretary to Government.

To the Director of Industries.

IV

Letter—from K. T. B. THRESSLER, Esq., Director of Industries.

To—the Secretary to Government, Educational Department.

Dated—Madras, the 20th March 1916.

No.—B. 46.

With reference to the Director of Public Instruction's letter herewith enclosed, I have the honour to observe that I have no knowledge of the precise character of the instruction given in the Engineering College, Madras. Judging by the character of the staff, however, I do not see why such instruction should be in any way inferior to that provided at Bombay and, on general grounds, I quite agree to the suggestion put forward by the Director of Public Instruction.

2. As the Principal of the Engineering College is not subordinate to me, I cannot cross-examine him on the character of the courses provided and, without such examination, I cannot offer any specific opinion on the Director of Public Instruction's proposal. It seems to me that my general approval is all that is wanted at present, but if Government wish me to go into the question more fully I request further orders.

V

Memorandum No. 662-2, Educational, dated 8th April 1916.

With reference to his letter R.O.C. No. 458, dated the 2nd February 1916, regarding the institution of a few special scholarships in the College of Engineering, Madras, for the study of mechanical and electrical engineering, the Director of Public Instruction is informed that the Government are disposed generally to allow the scheme suggested by him to be tried as an experimental measure. He is accordingly requested to submit definite proposals on the subject indicating clearly the number of scholarships which it is proposed to institute, the nature and duration of the course of studies which the scholarship-holders are to undergo, the qualifications required of the candidates and other matters.

P. RAJAGOPALA ACHARIYAR,
Secretary to Government.

To the Director of Public Instruction.

VI

Letter—from the Hon'ble Mr. J. H. STONE, M.A., F.R.H.S., C.I.E., Director of Public Instruction.

To—the Secretary to Government, Educational Department.

Dated—Madras, the 26th May 1916.

No.—R.C. 458.

With reference to Government Memorandum No. 662-2, Educational, dated 8th April 1916, on the subject of the institution of a few special scholarships in the College of Engineering, Madras, for the study of mechanical and electrical engineering, I have the honour to suggest that, in place of two of the six scholarships of Rs. 30 each per mensem sanctioned in G.O. No. 1029, Educational, dated 1st September 1914, three scholarships of Rs. 20 each per mensem may be awarded for the study of mechanical and electrical engineering in the College of Engineering, Madras.

As regards the nature and duration of the courses of study and the qualifications of the candidates I have the honour to submit herewith an extract from a letter from the Principal of the College, R.C. No. 1147, dated 16th May 1916, giving the information required and to recommend that his proposals may be approved.

A copy of the draft rules for the award of these scholarships which has been prepared on the lines of the notification sanctioned in G.O. No. 1340, Educational, dated 8th December 1915, is also enclosed.

ENCLOSURES.

(i)

Letter—from the Principal, College of Engineering, Madras.

To—the Director of Public Instruction.

Dated—the 16th May 1916.

No.—R.C. 1147.

2. In regard to the course to be taken I propose it should ordinarily be that of our mechanical engineer class, which is a combined course of mechanical and electrical engineering. A general elementary knowledge of the main branches of engineering is in the first place very essential to all students, and in my opinion an advanced course of study in electrical engineering cannot be pursued with advantage without a thorough grounding in mechanical engineering the basis for that matter of all engineering science, and in the present stage of the industrial development of this Presidency, the man who has passed through such a course is much more wanted than one who regards himself as a specialist in electrical engineering, if it is considered desirable, however, we can vary readily, in the case of a promising student, make arrangements to carry on his training in the higher branches of electrical engineering for an additional year, and I would suggest that some discretion should be allowed me in this connection, and also in the matter of permitting a scholarship-holder to enter straight away on the second or third year of the course of study if it is considered he is sufficiently well prepared to justify his being allowed to specialise in technical work without delay.

3. The scholarship-holders would take the college examinations in the usual way and be granted the diploma under the ordinary conditions (including that relating to the obligation of a year's practical training after the college course), but they may be considered ineligible for the guaranteed appointment, medals and prizes.

4. The general educational qualification for a mission should be that of our engineer class—the intermediate examination of the Madras University with group I as the optional branch—or, some higher examination, but I would not recommend any restriction in regard to age. There need be no fee for registration of application, but in other respects applicants should comply with the conditions governing admission laid down in the College rules.

(ii)

DRAFT RULES.

Government propose to award not more than three scholarships of the value of Rs. 20 each per mensem, tenable by natives of this Presidency at the College of Engineering, Madras, for a period of four years commencing on the second Monday in July 1916 for the study of mechanical engineering and electrical engineering. Candidates desirous of applying for these scholarships should submit their applications to the Principal so as to reach him not later than the 15th June 1916. Each application should be in the candidate's own handwriting and in the form appended. The selection will rest with the Principal.

2. Candidates should be either graduates in arts or have passed the intermediate examination of the Madras University with group I as the optional branch. They will be required to produce satisfactory evidence of good character and of physical fitness to undergo the course of study that will have to be followed. The application should show clearly age, nationality and general educational attainments.

3. The holders of the scholarships will not be bound by any engagement to serve Government on the completion of their course, nor will the Government be bound to employ them. Each holder will, however, be required to find two sureties to execute an agreement, providing for the refund to the Government of the amount of the scholarship, should he fail to obtain the diploma granted at the end of the course.

4. The scholarships will be disbursed by the Principal of the College of Engineering. In case the Principal is not satisfied with the progress or conduct of any scholarship-holder, the scholarship will be stopped.

5. Particulars of the course of study and a copy of the college rules may be obtained on application to the Principal.

APPENDIX.

Application for scholarship.

[To be in the candidate's handwriting.]

To

THE PRINCIPAL, COLLEGE OF ENGINEERING,
Madras.

SIR,

I request that I may be considered a candidate for a scholarship to enable me to pursue the course of study in mechanical and electrical engineering at the College of Engineering, Madras. The required particulars and a certificate that I am physically fit to undergo the course from a qualified practitioner are forwarded herewith.

I am,
Sir,

Yours

Order—No. 652, Educational, dated the 13th June 1916.

In G.O. No. 1029, Educational, dated the 1st September 1914, the Government sanctioned, as a temporary measure, the award annually of six scholarships of the monthly value of Rs. 30 each tenable by natives of this Presidency at the Victoria Jubilee Technical Institute, Bombay, for the study of certain technical subjects including mechanical and electrical engineering. In modification of this arrangement, the Government resolve to award, as an experimental measure, three scholarships of the value of Rs. 20 each per mensem tenable by natives of this Presidency at the Madras College of Engineering for a period of four years for the study of mechanical and electrical engineering, the scholarships tenable at the Bombay Institute being reduced by two. The course of study proposed by the Director of Public Instruction and the draft rules framed by him are approved.

2. The Director of Public Instruction will be requested to submit, in consultation with the Director of Industries, a re-appropriation statement providing for the transfer of the requisite funds from "26-B. Scientific and Miscellaneous Department—Miscellaneous—scholarships" to "22-H. Education—Scholarships in Colleges, Professional" to which head the new scholarships will be debited.

EDUCATIONAL DEPARTMENT.

NOTES CONNECTED WITH G.O. No. 652, EDUCATIONAL,
DATED THE 18TH JUNE 1916.

[SUBJECT.—*Scholarships in the Engineering College for the study of Electrical and Mechanical Engineering.*]

From the Director of Public Instruction, dated the 22nd February 1916, Ref. on Cur. No. 458.

The scholarships provided for graduates and intermediates for studying certain technical subjects including mechanical and electrical engineering in the Victoria Technical Institute at Bombay were not awarded last year as no qualified candidate was forthcoming. This year the scholarships have been advertised and the Director of Industries has been asked to select six young men out of the applicants. It seems desirable to await the result this year before any attempt is made to reduce the scholarships, so that the saving effected thereby may be utilized in instituting new scholarships in the local engineering college for the higher study of mechanical and electrical engineering. It is therefore submitted that the Director of Public Instruction's proposal may stand over until Mr. Tressler's proposals are received and disposed of.

V.S.—10-3-16.

Send the Director of Public Instruction's letter to the Director of Industries for very early remarks.

P. RAJAGOPALA ACHARIYAR—14-3-16.

A draft endorsement is submitted for approval.

The nominations of the Director of Industries for the scholarships at the Bombay

Please dislink.

P.R.—15-3-16.

* Since disposed of in G.O. 302-3, Educational, the 20th March 1916.

Institute have been received and are dealt with separately.* It is presumed that the reference in this case may nevertheless be made independently. If so, the draft may issue.

E.A.V.—14-3-16.

V.S.—14-3-16.

P.R. —15-3-16.

[Endorsement No. 662-1, Educational, dated the 15th March 1916.]

From the Director of Industries, dated the 20th March 1916, No. B. 46.

Please see the reply of the Director of Industries to the reference quoted above. While generally approving the proposal of the Director of Public Instruction to institute a few scholarships for the higher study of electrical and mechanical engineering in the Madras Engineering College and to make a corresponding reduction in the number of Government scholarships tenable in the Victoria Jubilee Technical Institute, Bombay, Mr. Tressler does not offer any specific opinion as to whether the engineering college courses will secure the same object held in view by the Bombay

institute scholarships. In the Madras Engineering College neither mechanical nor electrical engineering is taught as a separate course, but these subjects form part of the courses prescribed for mechanical engineer students of the engineer class during their third and fourth years' course. The men holding diplomas of this college must certainly be superior engineers with a specialized knowledge of mechanical engineering and will better supply the industrial needs of the country. There seems therefore to be no objection to transfer some of the Bombay scholarships to the local engineering college. The Government scholarships at present available in the engineer class are only three for each class and will not be solely available for mechanical engineer students (page 9 of G.O. No. 194, Educational, dated the 1st March 1913). If the Director of Public Instruction's present proposals are approved the new scholarships will be an inducement for a larger number of students who join the engineer class to take to mechanical engineering in preference to civil engineering study. It is observed that of the total number of candidates who gain the diploma in engineering year after year, mechanical engineers are comparatively fewer in number than civil engineers. Also the scholarships at the Victoria Technical Institute are not being fully availed of.

	Mechanical engineering	Civil engineering
1914	3	16
1913	1	15
1912	2	14

No scholarship was awarded in previous years and in the current year only two scholarships have been awarded. In these circumstances the Director of Public Instruction's proposal may be approved and the number of scholarships at the Bombay institute may be reduced from six to four and the saving utilized in instituting four scholarships of the value of Rs. 15 each in the engineering college for mechanical engineering.

2. The Director's proposal to exclude electrical and mechanical engineering from the list of subjects for which scholarships are available at the Bombay institute need not perhaps be now considered. For these seem to be more popular with the candidates who apply for the scholarships and there may perhaps be also more demand for these less qualified men at cheap rates for work in subordinate capacity.

E.A.V.—30-3-16.

V.S.—30-3-16.

Mr. Stone proposes to start a few scholarships (he does not say how many) in the Madras Engineering College, the funds for the purpose being taken from the six G.O. 1029, Educational, 1st September 1914. scholarships of Rs. 30 each sanctioned as a temporary measure for Madras students

proceeding to the Victoria Technical Institute at Bombay. I think that it would be a mistake to mix up the two things. The six scholarships to be held in the Bombay institute have been sanctioned as a tentative measure on the ground that the kind of education obtainable there could not be had at Madras. The experiment has so far

been not successful. In 1914-15 five scholarships were awarded, four of which had to be cancelled at the last moment as selected scholars declined to go to Bombay. The fifth scholar returned after undergoing training for a few months. For 1916 only two scholarships have been awarded out of the six available owing to want of qualified applicants.

The probabilities are that, about this time next year, we would be compelled to recognize that the Bombay experiment is a failure and to stop the grant of scholarships. But till then I would leave the Bombay scheme alone. I would not tack any scholarships in the Madras college to the Bombay experiment. If Mr. Stone thinks that more scholarships are needed in the Madras college, he should deal with the whole matter comprehensively and on its own merits. May he be semi-officially informed accordingly?

P. RAJAGOPALA ACHARIYAR—3-4-16.

The difference is merely a difference of method: the Bombay scheme does not seem likely to be successful: the other might be: I am rather disposed to think that the sooner the experiment is tried, as an experiment, on the lines suggested now by Mr. Stone, the better: a comprehensive scheme, such as you indicate, might then be framed. The Director of Public Instruction might be asked to submit definite proposals now, as an experiment.

P[ENTLAND]—4-4-16.

To the Educational Department.

EDUCATIONAL DEPARTMENT.

A draft memorandum to the Director of Public Instruction asking him to submit definite proposals is submitted for approval.

E.A.V.—7-4-16.

It may be sent to the Financial Department for acceptance.

C.R.—7-4-16.

I do not think that Financial can criticize with advantage now. Let the scheme come up first.

P. RAJAGOPALA ACHARIYAR—8-4-16.

[Memorandum No. 662-2, Educational, dated the 8th April 1916.]

From the Director of Public Instruction, dated the 26th May 1916.
R.C. No. 458/16.

The Director of Public Instruction now furnishes the particulars called for in Memorandum No. 662-2, Educational, dated the 8th April 1916.

2. It is proposed that, in place of two of the six scholarships of the monthly value of Rs. 30 each at present available for award in the Bombay institute, three of the value of Rs. 20 each may be awarded in the College of Engineering, Madras. It will be observed that the Director's original proposal was to fix the value of the new scholarships at Rs. 15 each per mensem and this tallied with the value of the

Government scholarships now tenable by engineer class students in the Engineering College at Madras. The necessity for the increased stipend has not been explained by the Director. In view, however, of the fact that the main object of the scheme is to officer special inducement for the study of electrical and mechanical engineering—especially as the Bombay scheme has not met with any success—the Director's present proposal may perhaps be approved. The special scholarship for European and Eurasian is of the value of Rs. 20.

3. Mr. James, the Principal of the Madras Engineering College, has indicated the nature and duration of the course which the stipendiaries are to undergo. These seem to be satisfactory and may be approved. It will be observed that the proposed minimum general educational qualification required of candidates, viz., a pass in the "intermediate" examination, is the same as is required in the case of candidates for admission to the engineer class or to the course in the Bombay technical institute and does not seem to be too much.

4. The draft rules for the award of the new scholarships do not seem open to objection and may be accepted. They follow the rules for Bombay scholarships.

5. A draft order is submitted. If approved, it may issue with the concurrence of Financial.

E.A.V.—31-5-16.

C.R.—31-5-16.

P.R.—3-6-16.

To the Financial Department.

FINANCIAL DEPARTMENT.

No objection in Financial, but it will be necessary to add a paragraph to the draft asking the Director of Public Instruction to submit, in consultation with Mr. Tressler, a re-appropriation statement to provide for the transfer of funds from "26-B. SCIENTIFIC AND MISCELLANEOUS DEPARTMENT—Miscellaneous—Scholarships"

* Cf. Page 3 of notes to G.O. 1029, Educational, 1st September 1914. (to which head the cost of scholarships tenable in Bombay is debitable*)
"22-H. Education—Scholarships—In Colleges—Professional" (to which head the new scholarships will be debited).

INSTRUCTIONS FOR THE SECRETARIAT.

(a) If a paper is marked to be printed urgently, the Superintendent of the section concerned should sign the Press slip. The Superintendent should exercise a careful discretion in the matter.

(b) Each letter, memorandum, or order, or set of orders, in the file of correspondence should be headed in succession with the Roman numeral I, II, III, etc., the number being written in red ink or blue chalk above the item. The particular papers to be printed in the special issue-copies should be indicated by the Roman numeral (I, II, etc.) by which that item has been headed in the correspondence file. All matter, including marginal remarks or references, to be printed should be written in ink and matter which should not be printed should be encircled. Initials and signatures that are not quite legible should be re-written distinctly.

(b) For rules regarding printing of notes, see rule 315 of the office Manual.

(c) The number of copies and the details of distribution should be filled in by the Superintendent or Reference concerned.

(d) In the absence of special instructions to the Press to keep matter standing for a specified period, ordinary papers of 8 pages and under will be kept standing for one week, and larger papers for two weeks only. The type of notes and of all confidential papers is distributed immediately after striking.

(e) This slip, properly and completely filled in, should accompany every paper sent to Press; it will be returned by the Press when proofs are furnished; it should be sent to the Press when a call is made for revised proofs or when a corrected proof is sent for striking. When finally returned by Press it should be filed with the original order or letter.

INSTRUCTIONS FOR THE PRESS.

(a) If, in the opinion of the Superintendent of the Press, a paper has been marked urgent unnecessarily, he should send the Press slip to the Registrar with a remark to that effect.

(b) Unless a note to the contrary is made against the matter, pencil entries should not be printed. The Superintendent of the Press may bring to the notice of the Registrar any instance of incomplete or careless editing.

(c) Signature copies of letters to the Secretary of State or to the Government of India should be printed on hand-made paper.

(d) This slip should be returned by the Press to the Secretariat when proofs are furnished; it will be sent back to the Press when proofs are returned corrected and should be finally returned to the Secretariat when struck-off copies are supplied.

(e) The names of the Secretary and Members should be printed in full when they occur on the right-hand side, only the first time when they appear on the left side, the initials alone being printed later.

* Copies distributed on (Press Clerk).

† Copies distributed on (Press Despatcher).
