S.S. No. 126 may be omitted, as the information is available in the ladder appended to volume I of the report.

S.S. No. 129 may be recast in a consolidated form which can include the various subsidiary statistics spread about the body of the return which relates to school accommodation (vide consolidated Table L).

Two more new tables may be added to the supplemental statistics—one showing the number and percentage of trained teachers and also the number of pupils per teacher and the number of pupils per trained teacher according to districts and the other showing the proportion of pupils in non-European Secondary schools for boys who come from outside the towns in which the secondary schools are situated (vide Tables M and N).

(IV) *Volume II, Part II-A, Subsidiary Schools for non-Europeans.*—As these tables will give the department information of a useful nature, it is suggested that they remain unaltered except that columns 9 (b) and 9 (c) be each split into three columns as shown below:—

- | | | |
|-------|---|---|
| 9 (b) | { | (1) Collegiate grade. |
| | | (2) Secondary grade. |
| | | (3) Elementary grade. |
| 9 (c) | { | (1) Graduates. |
| | | (2) Holders of F.A., Intermediate, Matriculation and Secondary School Leaving Certificates. |
| | | (3) Holders of Elementary School Leaving Certificates. |

(V) *Volume II, Part II-B, Subsidiary tables for Europeans.*—These tables too may remain unaltered, as they contain information of a useful nature except that columns 9 (b) and 9 (c) be each split up into three columns as shown below:—

- | | | |
|-------|---|---|
| 9 (b) | { | 1. High. |
| | | 2. Middle. |
| | | 3. Primary. |
| 9 (c) | { | 1. Graduates. |
| | | 2. Holders of Matriculation, Secondary School Leaving and High School certificates. |
| | | 3. Holders of Elementary, Primary and Middle School certificates. |

2. As regards the particulars contained in the supplemental statement No. 13, it is doubtful whether it is necessary to retain this statement, since very few pupils are now unprotected from small-pox. When the systematical medical inspection of pupils in schools is taken up, this will form merely one column of a general table giving the results of medical inspection. I request the orders of Government as to the retention or otherwise of this statement.

3. By retaining the Subsidiary Tables, several of the supplemental statistics can be got rid of since the information contained therein is also contained in the Subsidiary Tables.

4. The whole of appendices and supplemental statistics will be rearranged and renumbered after Government have passed orders on this communication.

II

Memorandum No. 25-2, Educational, dated 9th June 1916.

In connection with proposals for reducing the statistics submitted with the annual report on public instruction, the Director of Public Instruction has suggested the omission of Appendix D in Part I of Volume II containing information regarding technical or art schools and classes, as the particulars necessary are available in

subsidiary table No. 6 (b) in Part II and supplemental statistics No. 65 in Part I. Information regarding the number of students in each school undergoing training in various subjects, which now appear in Appendix D, will not, however, be available in future in the report. The Director of Industries is requested to state whether he has any objection to the proposed omission of the appendix. His attention is drawn to the letter from the Government of India, No. 288, Education, dated the 28th March 1916, communicated with G.O. No. 453, Educational, dated the 26th April 1916, in which that Government directed the inclusion in the public instruction reports of statistics relating to industrial schools also.

III

Letter—from K. T. B. TRESSLER, Esq., Director of Industries.

To—the Secretary to Government, Educational Department.

Dated—Madras, the 17th June 1916.

No.—B. 44.

With reference to Government Memorandum No. 25-2, Educational, dated 9th June 1916, I have the honour to state that Appendix D (Part I, Volume II, of the Public Instruction Report) which is proposed to be omitted gives the names of the different subjects taught in each individual school and the number of pupils under instruction in each subject. This, in my opinion, is the information that, in the case of technical and industrial schools, the public would look for in a report. The Subsidiary Table 6 (b), Part II, gives information in regard to the number of pupils in different standards only and the Supplemental Statistics No. 65 in Part I gives the number of students in the whole Presidency studying different subjects. Neither of these can, in my opinion, be regarded as a substitute for the information given in Appendix D. I therefore consider it undesirable to omit it though there are many other tables that might be omitted with advantage.

2. I have already taken steps to furnish the Director of Public Instruction with the information he requires regarding industrial schools.

Order—No. 718, Educational, dated the 30th June 1916.

The Government approve generally the proposals of the Director of Public Instruction to curtail the number of statements attached to volume II of the annual report on public instruction in the manner suggested in his letter read above. They, however, consider that Appendix D of Volume II, Part I, of the report and the supplemental statement No. 13 referred to in paragraph 2 of the Director's letter should be retained.

2. The Syndicate of the University of Madras will be requested to furnish the Government regularly in future with six copies of its annual reports.

NOTES CONNECTED WITH G.O. No. 718, EDUCATIONAL, DATED 30TH JUNE 1916.

[SUBJECT.—Reduction of statistics attached to the public instruction report.]

Extract from notes to G.O. Nos. 1468-69, Educational, dated the 29th December 1915.

Another question that suggests itself is whether there is any real necessity for the enormous mass of figures sent up. Last year's report in all involved over 200 pages of statistics to about sixty pages of print. I feel sure that these could be rearranged and reduced without losing any material information. If desired, I will discuss the matter with Mr. Stone and Mr. Sharp when the latter comes down.

C. G. TODHUNTER—21-12-15.

As to reducing the statistics—an object with which all must sympathize—I advise discussion first with the Director of Public Instruction. It can then be seen whether and how far Mr. Sharp can usefully be consulted.

P[RENTLAND]—24-12-15.

The following draft demi-official to the Director of Public Instruction is submitted for approval with reference to the Secretary's oral orders.

S.A.—5-1-16.

V.S.—5-1-16.

Demi-official—from the Hon'ble Mr. C. G. TODHUNTER, I.C.S., Acting Secretary to Government, Educational Department.

To—the Hon'ble Mr. J. H. STONE, M.A., F.R.H.S., C.I.E., Director of Public Instruction.

Dated—the 5th January 1916.

No.—25-1, Educational.

The Government feel some doubts as to the real necessity for the enormous mass of figures sent up with the annual reports on public instruction. They are of opinion that it may be possible to rearrange and reduce the statistics without losing any material information. I am desired to ask you to look into this point and to forward your recommendations at an early date. After these are received, Sharp, who is expected here shortly, may be consulted, if necessary.

No reply to the demi-official above has yet been received from the Director of Public Instruction. The following demi-official reminder is submitted for approval.

Dated—the 8th May 1916.

Will you please refer to Mr. Todhunter's demi-official No. 25-1, dated 5th January last, on the subject of the reduction of statistics submitted with annual educational reports and state when the recommendations called for therein may be expected.

Despatch—from the Hon'ble Mr. J. H. STONE, M.A., F.R.H.S., C.I.E., Director of Public Instruction.

No.—P-12.

[*Reference*—Your demi-official No. 25-2, Educational, dated 8th May 1916.]

My letter on the subject is practically ready for despatch and would reach you in a few days.

From the Director of Public Instruction, No. 4178, dated the 25th May 1916.

The reduction of statistics proposed by the Special Officer (Mr. Littlehales) and recommended by the Director seems generally acceptable. The only remarks that seem called for are noted below :—

(a) The main object of the proposed reduction of the number of statements is to avoid repetition of the same information. No doubt on close examination it is found that this object has been achieved in the proposals now submitted; and no portion of material information has thereby been omitted. It is, however, submitted that convenience of reference has now been sacrificed to some extent. At present under the arrangement of the tables all material information regarding each head of education, such as collegiate, secondary, elementary, etc., is gathered under respective heads; and this facilitates a review or an examination of a specific point in respect of any particular kind of education. Further the present arrangement renders a comparison of the educational statistics of various districts easy. Occasions in which the statements proposed for omission are used by Government for the purposes above referred to are, however, comparatively fewer, they being resorted to when the annual report is reviewed and when it is necessary to compare the literacy of a district in a particular branch with that of the Presidency or other districts. In those cases, it may, in future, be necessary to prepare some special statements; and it may not be difficult to do so. In these circumstances the proposals to curtail the mass of statements may be accepted generally.

(b) *Appendix D*.—It is proposed to omit this on the ground that the information is available in subsidiary table No. 6 (b) and supplemental statistics No. 65. If the proposal is approved, information regarding the number of students in each school undergoing training in various subjects will not be available. Most of these schools are under the control of the Director of Industries; and it has been decided by the Government of India that statistics relating to Industrial schools should also be included in the public instruction report—G.O. No. 453, Educational, dated 26th April 1916. Before accepting the proposal of the Director of Public Instruction in this regard, it may be necessary to consult the Director of Industries to whom the file may be forwarded u.o.

(c) Supplemental statements Nos. 37, 38 and 39 are proposed to be omitted on the ground that the information is available in the Syndicate's reports. These reports are not received by the Government; and it is further desirable to make the report on public instruction as self-contained as possible. The above statistics may therefore be retained.

(d) In paragraph 2 of his letter the Director of Public Instruction enquires whether supplemental statement No. 13, containing information as to the pupils unprotected from small-pox, should be retained. It is at the same time pointed out by him that a statement will have to be added giving the results of medical inspection of pupils in schools, when this scheme is systematically adopted, in which this information will have to be incorporated. Under such circumstances it seems hardly necessary now to omit it. The existing statement (No. 13) may therefore be retained and expanded in future when necessary.

S.A.—7-6-16.

C.R.—7-6-16.

Let an official memorandum go to the Director of Industries as at A. After issue of that official memorandum this file may go u.o. to the Director of Public Instruction for remarks with reference to B and C above.

P. RAJAGOPALA ACHARIYAR—8-6-16.

Yes.

P.R.—9-6-16.

A draft official memorandum to the Director of Industries is submitted for approval.

2. After its issue, the file will be forwarded u.o. to the Director of Public Instruction.

[Memorandum No. 25-2, Educational, dated the 9th June 1916.]

To the Director of Public Instruction.

OFFICE OF THE DIRECTOR OF PUBLIC INSTRUCTION.

B.—I am greatly surprised to see that Government do not get the Syndicate's reports. I suppose they have only to be asked for. If there is any technical difficulty, it could be met by His Excellency the Chancellor calling for the necessary number of copies and having them distributed. I should think 37, 38, 39 of supplementary statistics might be replaced by a note to the effect that detailed information about University matters will be found in the Syndicate's annual reports and the University Calendar. I should think hardly anybody ever look at them in the public instruction reports.

2. C.—It does not seem to me to matter much whether No. 13 is kept in or not. It doesn't take up much space.

3. I suppose Government would not like me to reduce the first volume of the public instruction report to a page or two pointing out the really significant things that have happened in the year? It would then be in one volume—a great convenience—though the statistical portion would not be ready for Government at the date on which the report itself has to be submitted.

J. H. STONE—13-6-16.

To the Educational Department.

EDUCATIONAL DEPARTMENT.

Submitted that the receipt of the Director of Industries' reply to memorandum No. 25-2, Educational, dated the 9th June 1916, may be awaited.

2. With reference to paragraph 3 of the Director's note, it is submitted that the reports on public instruction are submitted in accordance with paragraph 19 of the Educational Despatch of 1854 which requires that they should be uniform for all Presidencies. The reports of all other Governments and the quinquennial reviews thereof of the Government of India are in two separate volumes. Further, in the case of annual reports the Government of India laid down in 1911 that the report itself should be in the form of "a general summary of the salient features of the year, on the lines of the general summary to be found in the majority of recent reports"—paragraph 3 of India's letter on page 2 of G.O. No. 475, Educational, dated 15th July 1911. This has been communicated to the Director of Public Instruction; and his recent reports follow those lines. To further curtail the report into one or two pages so as to bring the whole report in one volume would require the sanction of the Government of India which may not be granted. It does not therefore seem necessary that the proposal should be further considered.

C.R. — 19-6-16.

P. RAJAGOPALA ACHARIYAR—22-6-16.

The Director of Industries' reply to memorandum No. 25-2, Educational, dated the 9th June 1916, has since been received. In the circumstances stated therein the Director of Public Instruction may be asked to retain appendix D, volume II, part I, of the report.
