No. K 147

Station Madras, Dated the 15th July 1916 191

From (Name) M.E. Couchman Esq. I.C.S.

(Designation) Special Officer, Department of
Industries.

To The Secretary to the Government of Madras,

EDUCATIONAL. Department.

Sir,

In reply to G.O. No. 762 Edl Mis. of 12th instant
enclosing a letter from the District Judge of Tinnevely
regarding the utilization of waste paper, I have the honour
to enclose a copy of a report on the subject from Dr.
Marsden.

It will be seen that the subject is already being
investigated.

The results will be reported in due course.

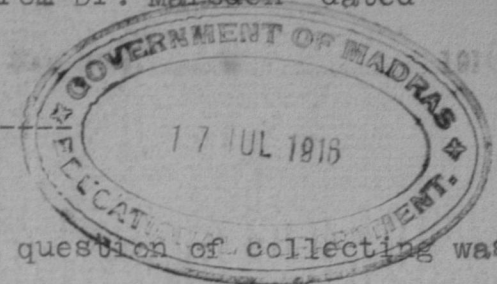

I have the honour to be,
Sir,

Your most obedient servant,

M. E. Couchman.

Special Officer,

Copy of letter from Dr. Marsden dated
14th July 1916.

Referring to the question of collecting waste paper for re-pulping, the position in England is very different to that here. In the big towns at home there would be but little difficulty in collecting and sorting large quantities and paper mills being scattered up and down the country the cost of carting to a mill would not be heavy. Here, the centres of collection will be few and except in the cases of Calcutta and Poona will be far away from the large paper-mills in India.

I had thought of using waste paper as a raw material at Punalur and have been in communication with sources of supply in Bangalore, Trichinopoly and Madras and only this morning was discussing the question with ~~the~~ Mr. Fisher of the Government Press.

The point we agreed upon was that the cost of packing and cartage would be high and the railway freight also would be a serious item; but when I return to Punalur I will make arrangements to have a proper works trial to get data on these points and will report to you thereon.

Sr,

With reference to G.O. No. 1000 of 12th July 1916 I have the honor to state that the question of the utilisation of waste paper has been under the consideration of Dr. Marsden for some time past. The difficulties connected with the re-bolling of old paper are not very great but the trouble is the freight. Waste paper is extremely bulky and costs a lot to handle. Dr. Marsden was considering an experiment with a consignment from the South Indian Railway as the rail charges on this will be less but if District Officers care to send in their old

paper to Punalur, I can offer them Rs.40 to Rs.50 a ton delivered provided the paper is properly sorted. As I cannot boil less than 4 to 5 tons at a time, smaller consignments are not of much value.

I have the honor to be,

Sir,

Your most obedient servant,
