Sir,

I have the honour to state that Government were --
pleased to make a total grant of Rs. 34,600 to this Council --
in their Orders, Educational Nos. 608 dated 9th July 1912, --
165 dated 20th February 1913, 771 dated 19th August 1913 and
26 dated 8th January 1915 respectively for the construction --
of three elementary school buildings as well as for their --
equipment. Of the said amount of subsidy, the allotment --
sanctioned for the construction of the girls' school building
was Rs. 13,500, that for the hindu boys' elementary school --
Fort Rs. 9700 and that for a similar boys' elementary school --
in Peta Rs. 8500. A site for the construction of the school
building

building for the hindu boys' elementary school, Peta, was acquired at a cost of Rs.345 and a sum of Rs.17 was spent towards the cost of digging trial pits in the said site. The amount that should be available out of the allotment sanctioned for the construction of this school building after deducting the cost for acquiring site &c is Rs.8138. But on account of the revision of the estimates for the construction of the girls' and boys' school buildings in Fort by the Superintending Engineer III Circle, to whom the plans and estimates had to be submitted for scrutiny and approval, the cost of constructing the two buildings came to Rs.22,280 exclusive of the value of sites acquired which came to Rs.3552. The fact of the estimates having undergone revision at the hands of the Superintending Engineer III Circle was mentioned in my letters to Government submitting the administration report of the Municipality for the past three years. The additional amount required to complete the construction of the two buildings as per plans and estimates approved by the Superintending Engineer was therefore met out of the allotment sanctioned for the construction of the elementary school building in Peta. The amount now available out of the allotment sanctioned towards the construction of this school building is therefore Rs.5484. The plan and estimate for the construction of this school building which were submitted to the Superintending Engineer III Circle for professional scrutiny and approval and referred to in paragraph 11 of my letter to Government R.C.No.54/G of 1917 dated 24th May 1917 submitting the administration report of the Municipality for the official year 1916-17 have since been received duly approved by him. The estimated cost of constructing the school building would come to Rs.9800. Against this sum, the amount available out of the subsidy sanctioned for the purpose is only Rs.5484 and the balance that is required to complete the construction of the building is Rs.4316. A sum of Rs.2250 is, however, available out of the recurring subsidies sanctioned to the Council in previous years for the entertainment of additional teaching establishments in elementary schools and this amount will be utilised towards the cost of constructing the school building. I may be permitted to mention here that Government were pleased to advise

the Council to utilise this savings on any non-recurring object of expenditure in paragraph 2 of their Order No.1770 M.Mis, dated 10th October 1916. The balance that would then be required is Rs.2066 and I request that Government may be pleased to sanction a Provincial subsidy of Rs.2000 for completing the construction of the building.

2. The subject was placed before the Council at its meeting held on the 18th instant and the Council resolved to address Government requesting to make an allotment for the purpose. A copy of its resolution on the subject is herewith submitted.
