The Hon'ble Mr. A. Suryanarayana Rao Pantulu.

Home (Education) Department.

128. Will the Government be pleased to state whether any survey of the economical and commercial conditions for the manufacture of glassware as recommended by Resolution 11 of the Committee on Glass experiments was made, and what steps are taken by the Department of Industries for survey & the Alkaline earths in this Presidency and also for the preliminary survey of the bangle industry and what are the results achieved?

P. 635-14.5.17 (A)

Home (Edw) Dept.

The recommendations made by the committee which was appointed by the Govt to report on the glass experiment will be found on page 6 of Lys. No 635 Home (Edw), dated the 14th May 1917. No orders were passed on those recommendations. It was decided to leave it to Mr Innes to take such further action as might be feasible with reference to the recommendations. It does not appear that any general survey is being undertaken of the economical + commercial conditions for the manufacture of glassware ~~other than in the London district~~. As regard the bangle industry + alkaline earths Mr Innes in his report on the work of the Dept for 1916-17 stated that surveys relating to these were in progress. No ^{Special} report has however been received on the subject. It is submitted that Mr Innes

Please see ^{page 34} notes to
Lys No 635-8/14.5.17 (A)

In fact the Committee expressed the opinion that, in view of the difficulty of obtaining reports at present time, no experiments in the manufacture of glassware should at present be undertaken.

P.S of Lys. 1209

I think the following

Copy Mr. James no.

Mr. James no.

5/11/17

p. 6 of 8 p. 638. (4)
16-5-17

The Additional member has evidently not been consulted to read carefully Resolution II of the plan committee. The committee records its opinion that experiments were with other kinds of class were not be taken up without a preliminary careful survey of economic & commercial conditions, & then proceeded to add that in view of the difficulty of obtaining experts from home it was unable to recommend the

reception of any experiments
in this case I did not
consider it necessary to
make any further survey
of the prospects of a
plant factory dealing with
other forms of plant waste.
It is pretty certain of
course that this United
Presidency is not the
place to start any
class in distilling etc.

2. Mr. Narayanaiah has
found through various
distills in connection
with alkaline distilling
this bangle in distilling. But
I have not yet had his
report. Several samples
of alkaline distillate have
been analysed, but I
understand that the
results are not encouraging.
The percentage of alkali,
is usually small & that
of common salt high.
However the subject has

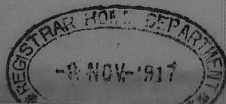

rather lost its importance
for Dr. Saurer says that
that it is hoped soon to
arrange for the importation
of crude sodium carbonate
from B. E. Africa & for
refinement in Beirut.
(This is confidential.)

3. It will be sufficient to point out the error in the last part of the question this way: that an examination has been made of it although earlier on of it though widely in various districts but that it results are not yet available.

14.5.17I do not
agre. in
para 14 of
un. upat
cs.Page 5 ank

that, though Resolution No 2 of the glass committee did not ^{specifically} recommend a survey of the economic and commercial conditions in the Presidency as affecting the ~~manufactures~~ ^{establishment} of glassware ^{industry}, yet it contemplated a preliminary survey of such conditions with a view to judge whether the manufacture of glassware other than soda water bottles can profitably be undertaken. It appears that no survey has till now been undertaken by the Dept of Industries. ~~It~~ Apparently the proposed survey can be carried out by an officer of the Dept without the aid of a ^{glass} expert, the times may, it is submitted, be asked (no) whether he proposes to ~~undertake~~ ^{initiate} any such survey in the near future.

14/5/17
Lofman

S.

I think it is clear from Mr Jones' answer that he does not propose to undertake a survey in the near future. The Jls need not go back to him.

Suggested that we may answer -

"The survey of contemplated" in Resolution 12 of the Committee has not yet been undertaken" - & then continue the answer as at A on p 6 above.

[Signature]

I think it is better to clear the situation. Mr Jones (us) with reference to page 7 supra

Mr (12) "117"

Mr. Jones (us)

I have ventured to make a marginal note. Para 14 of my report make it quite clear that what we have written

p. 6783. 535 (A) 11/5/17

initiated by No. II (which
by the way I drafted &
suggested) was to enter a
caveat against any experi-
ments with any form of
plan was being undertaken
without a caveat pre-
liminary enquiry into the
commercial prospects of
the industry concerned.
I should point this out; at
the same time there is no
objection to adding that to
except as regards bangles no
enquiry has been made
as a preliminary to
practical experiments with
flame wave.

The following draft answer is
submitted for approval. -

"Except as regards bangles no
enqy

enquiry has been made as a preliminary to further experiments with glassware. An examination has been made of these alkaline earths but the results of this examination and of the enquiry into the bangle industry are not yet available.

S.
This doesn't embody her.
I wish above. We may begin the reply—
"The Honble member is referred to the wording of Resolution II, which is designed not so much to indicate a programme as to express a caution against hasty procedure."
to then continue as above.

H.M.

The following is a list of the names of the members of the committee who attended the meeting on 15/11/17.

NOTES.

The final form of the question and answer stood as follows:—

146 Q.—Will the Government be pleased to state whether any survey of the economical and commercial conditions for the manufacture of glassware as recommended by Resolution 11 of the Committee on glass experiments was made, and what steps are taken by the Department of Industries for survey of the alkaline earths in this Presidency and also for the preliminary survey of the bangle industry and what are the results achieved?

Glassware and bangle industry in the Presidency.

146 A.—Except as regards bangles no inquiry has yet been made as a preliminary to further experiments with glassware. An examination has been made of alkaline earths, but the results of this examination and of the inquiry into the bangle industry are not yet available.

2. No further action is necessary. The note may now be
