The Principal, College of Engineering, who was consulted in connection with other similar exemption applications recently received, has stated that out of 62 lower subordinates who passed out last year, only 32 have secured appointments till now. He further says that between 60 & 70 will probably pass out next April, about 80 next year and that about the same number in the year after that. It, therefore, seems desirable not to grant permanent exemptions such as the one applied for in the present case. If they are granted, these exempted men may stand in the way of the passed lower subordinates' securing appointments. In the above circumstances, Home (Education) Dept. may be told that the exemption applied for in the present case may be refused.
