XVII. -- E D U C A T I O N

(a) That this Congress records its deliberate conviction that to foster the development of high education in India, it is necessary that (1) administrative and educational service should be filled mainly by qualified Indians, the existing distinction between the Indian and Provincial Services being done away with, and that (2) a substantial majority of the members of the Senates of the Universities, now existing or to be established, should be elected by the graduates of the Universities and by the professors and teachers of institutions affiliated thereto, and that such Senates should have full control over their own executive and educational policy.

(b) That this Congress is strongly of opinion that Government should assign larger sums of money to secondary and higher education than is done at present and that the rules relating to the maximum number of admissions into a class, fees and grants-in-aid should be modified, and that in the matter of grants-in-aid the present differences between European and Indian students should be abolished and facilities afforded to all deserving pupils irrespective of race, caste or creed, for receiving the benefits of higher education.
