Q. 126. Will the Government be pleased to provide special facilities to encourage the industry of oil pressing, the adaptation of oil-cake to new uses and the appointment of an oil expert to suggest suitable plant for small manufacturers as is done in the United Provinces?

Home (Education) Department. 4

Attention is solicited to the notes connected with G.O.No.960, Home (Education), dated the 12th September 1916, which set out the nature of the experiments conducted by the Department of Industries in oil-pressing. The Anderson oil-exPELLERS have been found to be unsuitable and only part of the hydraulic oil mill ordered from England has been received. The authorities of the Indian Institute of Science, Bangalore, propose to institute experiments in oil, fat, and allied industries and the Government have, subject to certain conditions, agreed to assist in the conduct of the experiments. From a demi-official communication received recently from Mr. Innes it appears that Messrs. Tata and Sons propose to establish a factory in this Presidency similar to the one proposed to be started in Bangalore. The following draft answer is submitted for approval:--

Answer.

"The question of developing the oil pressing industry in this Presidency is engaging the attention of the Government."
