For a brief history of the experiments in oil pressing undertaken by the Department of Industries attention is solicited to the note on pages 64 to 68 of G.O. No. 380 Est., dated the 5th April 1916. The Dept. purchased two small Anderson oil expellers and also ^{intended for} one large hydraulic mill. Only a part of the latter was received and the balance of the plant has not been received till now. As regards the Anderson expellers the results of the experiments showed that they are not fit for the oil seeds of this Presidency. ~~Reason~~

2. Recently this Govt. agreed to cooperate in the scheme formulated by the authorities of the Indian Institute of Science, Bangalore, to establish in the Institute a central experimental ^(dept.) for dealing with problems connected with oil fat & allied industries. ~~Proposed to be established~~ It was proposed to lend the large oil mill to the Institute & also make

G.O. No. 260
12.9.16 (J)

(The papers are in a file now in Finance)

a non-recurring grant of Rs. 50,000
a recurring grant of Rs. 10,000
for six years. But the Director
of the Institute has ^{since} recently
written to say that the other
Local Govts have not yet
replied as to whether they
would be willing to cooperate
in the scheme. He has
therefore proposed to make
experiments on a small scale
& has asked for the loan
of one of the Anderson oil
expellers & for a grant for one
year of a sum of Rs. 15,000. These
are under consideration.

3. In the meanwhile, on the
advice of Mr. Innes the Govt.
have recently sanctioned
the sale ^(of the hydrophobic oil mill) ~~to~~ to one Mr. D. Sonje
of the United Provinces as there
was no prospect of getting the
balance of the plant during
the continuance of the war.

4. The Asst. member suggests
that a sum of two lakhs
should be provided for starting
factory work for oil extraction

*The file is in file.

and the Dept. had not the
necessary staff to work
the plant

from groundnut. In the first place it is not possible to obtain the requisite machinery for oil extraction till the war ends. Secondly, unless allied industries for the utilization of oil are also started it may not be of much use to establish a factory for oil extraction. In the present shortage of tonnage it may not be practicable to export groundnut oil from this country even supposing that the necessary bins or casks were available for packing the oil. Mr. James may perhaps be requested to offer his remarks.

(Papers marked K esp. Sir F. Nicholson's letter are worth perusal.)

It is obvious that Government cannot accept this resolution.

and there is a demand for it in European countries. Messrs. Tata of Bombay intend establishing a large oil factory in this Province and if the scheme matures there will be no need for export embarking on a similar enterprise.

7.3.17

Edl no 1052-1

2. In the first place, we have already made an attempt to obtain a large oil extraction plant from home with the result that after half the order was completed the balance of the plant was held up, and in spite of the assistance of the India Office, all our efforts to secure the completion of the order failed. The incomplete plant installed was quite useless and as there was no hope of getting the rest of the plant till after the war, Government decided to accept an offer from a North India firm to take over the incomplete plant at cost price and the balance of the order. The plant was first offered to a Madras firm which refused it. In accepting the offer Government were influenced by a number of considerations, for one thing the plant was naturally deteriorating and in the second place they have every reason to suppose that a prominent Indian firm is likely to take up the extraction of oil from oil seeds and all connected industries on a very large scale in Madras in the near future. This being so, it will probably be unnecessary for Government to enter the field, and for this reason alone apart from the difficulty of obtaining machinery and the danger of repeating our former experience, the Resolution cannot be accepted. Additional reasons for arriving at the same conclusion are indicated in the office note, viz, the difficulty of tins and casks, the shortage of tonnage and the uncertainty of being able to export. It is also

doubtful whether it is worth Government while to take up mere extraction.

3. If the position is explained to the Additional Member, he will probably withdraw his resolution.

4. I should be very grateful if I could be given a copy of ^{W/23} Sir F.A. Nicholson's D.O. letter of 22-11-15.
