Leg U.O. No. 710-1 dated 19.3.17

To

The Home (Edn) Department with A. 18.

SK

Local and Municipal department.
(Legislative)

The Hon'ble Mr. K.R.V. Krishna Rao Pantulu.

Home (Education) department.

18. (a) What are the results of the experiments conducted on the Hydraulic Oil Mill for which a sum of about Rs.70,000 (seventy thousand) has been budgeted for in 1915-16 and 1916-17?

(b) If no experiments were hitherto conducted will Government be pleased to consider the desirability of transferring its location to some other convenient centre than Madras where experiments in crushing cotton and other oil seeds can be carried on?

It is submitted that though orders were placed in 1915 for the hydraulic oil mill plant, only a part of the machinery was received and it was erected at Washermanpet. No experiment in oil extraction was therefore undertaken with the plant. As there was no prospect of getting the balance of the plant till the termination of the war, the Government have recently approved the proposal of the officer in charge of the Department of Industries to sell the plant to a firm in Cawnpore.

2. It is submitted that Rs.70,000 referred to in clause (a) of the question is the amount of the revised estimate for "miscellaneous experiments" for the year 1915-16. The amount includes a portion of the expenditure incurred on the hydraulic oil mill. The total expenditure incurred on this mill is Rs.35,811-15-7.

3. The following draft answer is for approval:-

Draft answer.

"18. No experiments have been
"made with the hydraulic oil mill as
"only parts of the plant ordered from
"England have ~~been~~ been received.
"As there is no prospect of the
"balance of the plant being delivered
"in the near future, the Govern-
"ment have recently issued orders
"approving the sale of the parts

22 Q.—(a) What are the results of the experiments conducted on the hydraulic oil mill for which a sum of about Rs. 70,000 (seventy thousand) has been budgeted for in 1915-16 and 1916-17?

Transfer of the hydraulic oil mill at Madras to another place.

(b) If no experiments were hitherto conducted will Government be pleased to consider the desirability of transferring its location to some other convenient centre than Madras where experiments in crushing cotton and other oil-seeds can be carried on?

22 A.—No experiments have been made with the hydraulic oil mill as only parts of the plant ordered from England have been received. As there is no prospect of the balance of the plant being delivered in the near future, the Government have recently issued orders approving the sale of the parts already received.

The papers may be recorded.
A draft order is subd.
