718
Copy of a letter No.16748, dated the 30th August 1918, from Messrs Martin and Co., Engineers and Contractors, Calcutta, to the Hon'ble Mr. C.E.Low, C.I.E., I.C.S., Secretary to the Government of India, Commerce and Industry Department, Calcutta.

We have the honour to bring to your notice that we have recently formed a company, viz: Robert Hudson (India) Ltd. principally for the manufacture in India of light railway equipment, such as is used on collieries, quarries, Public Works, &c.

2. We have been in communication with the parent Company, Robert Hudson Ltd., Leeds, England as to whether they would be willing to accept Indians in their works with a view to their acquiring practical training in their factory and subsequently being employed in the local works of the Indian Company. We are pleased to state that they have agreed to accept two young Indians annually, the idea being that these students would pass through the Drawing Offices and through the practical side of the works for say a period of two years before returning to India for employment in the local works.

3. As there is some difficulty in getting young Indians enjoying Government scholarships admission into factories and workshops for acquiring practical training before they return to India we beg to place before Government the facilities which Messrs. Robert Hudson, Ltd. are prepared to afford. In addition the students will have prospects of being employed by us and will find it to their own interests to acquire such practical experience as may present itself with a view to suitable employment in India. We shall be glad if the information given above is communicated to the India Office so that students ~~in~~ already in England may know of the opportunity afforded them. Any such candidates may be referred to our London Office, Messrs. T.A. Martin & Co., Vestry House, Lawrence Pountney Hill, E.C. for any additional information that they may require.

Copy of a letter No. 15748, dated the 30th August 1918, from the Secretary to the Government of India, Commerce and Industry Department, Calcutta.

We have the honour to inform you that we have received your letter of the 25th inst. regarding the facilities for practical training in the manufacture of light railway equipment, such as is used on collieries, quarries, Public Works, &c.

We have been in communication with the parent Company, Robert Hudson Ltd., London, England, as to whether they would be willing to accept Indians in their works with a view to their acquiring practical training in their factory and subsequently being employed in the local works of the Indian Company. We are pleased to state that they have agreed to accept two young Indians annually, the idea being that these students would pass through the training Officers and through the practical side of the works for a period of two years before returning to India for employment in the local works.

As there is some difficulty in getting young Indians enjoying Government scholarships admitted into factories and workshops for acquiring practical training before their return to India we have been endeavouring to find facilities which Messrs. Robert Hudson Ltd. are prepared to afford. In addition the students will have prospects of being employed by us and will find it to their own interest to acquire such practical experience as may present itself with a view to suitable employment in India. We shall be glad if the information given above is communicated to the India Office so that students already in England may know of the opportunity afforded them. Any such candidates may be referred to our London Office, Messrs. T.A. Martin & Co., Vestry House, Lawrence Pountney Hill, E.C.4. for any additional information that they may require.
