Station MADRAS, Dated the 31st OCTOBER 1916

From (Name) Hon'ble Mr. M.H. Stone., M.A., F.R.H.S., C.I.E.,

(Designation) Director of Public Instruction,

To The Secretary to the Government of Madras,

Home Department.
(Education)

Sir,

Placed into

I have the honour to submit herewith the plans bearing Nos. 191(a) to (f) with estimates amounting to Rs.82,849/- for the construction of a boarding house in connection with the St. Ann's Girls' High School, Mangalore, and to state that the proposed building is intended to accommodate 68 boarders. Although a chapel is included in the scheme, no grant is claimed on that account. As the scale of accommodation proposed to be provided was in excess of that laid down in the Grant-in-Aid Code and as the scheme appeared to be an expensive one, I informed the correspondent that only a grant of Rs.32,000 could fairly be recommended for the proposed scheme in view of the requirements and that the management might either meet the extra cost themselves. The Correspondent

pendent states that the management are prepared to bear the extra cost rather than to modify the scheme. In these circumstances, I recommend that a grant of Rs.32,000/- may be sanctioned for the proposed scheme to be paid when funds become available. The grant will be met from the allotment under "Hostels".

I have the honour to be,

Sir,

Your most obedient servant.

R. A. Ariene.

for Director of Public Instruction.

S.A.R.

741 & d 31-1-17 E. W. NOTE

flag H, I, J, K, L and M

X vide flag A

The Director of Public Instruction submits 6 plans bearing Nos. 191 (f) and detailed estimates amounting to Rs. 91,992 for a grant-in-aid to the cost of constructing a Boarding (with subsidiary buildings) for St. Girls' High School at Mangalore, South Canara District.

The particulars of the plans and estimates are as follows :-

	Rs
(1) Main building (including Chapel - cost Rs. 9,143) D.P.I. Nos. 191(b) and 191(f)	74,500
(2) Out houses:- Kitchen, Store etc. D.P.I. No. 191(c)	6,610
(3) Latrines and bath rooms D.P.I. No. 191(d)	3,053
(4) Compound wall with gates etc. D.P.I. No. 191(e)	5,861
(5) Well and "aerometer" D.P.I. No. 191(e)	1,466
(6) Site Plan D.P.I. No. 191(a)	
Total Rs.	91,992

II. The plans and estimates have been examined in the Chief Engineer's office and it is observed that they contain various defects, a few of which are pointed out in the following remarks :-

MAIN BUILDING

(1) The accommodation provided is in excess of that laid down in the grant-in-aid code. The arrangement of beds is not shown on the Drawing. The width of the Dormitories could be reduced from

0" to 16'-0".

provision of doors and windows

dash walls is unnecessary.

may be painted ^{but} ~~out~~ though no grant is asked for it, The chapel is not ^{correctly} ~~properly~~ design-

a chancel, sanctuary etc. are not

There should be no openings at

and proposed to be occupied by the

ary. The portions of the chapel

refectory between X X and Y Y

ld be dark.

The provision of common bath

us (with partitions in the middle

corways) for the dispensary infir-

ry, servants and ayahs is not desira-

re.

The steps leading to front

verandahs are unnecessarily long.

(6) The access to the end dormitories

in First Floor, each accommodating 4

boarders, is through the lavatories,

which is considered objectionable.

(7) Many of the girders and trusses

carrying floors and roofs are placed

directly over door and window openings—

an unsatisfactory arrangement.

(8) The sizes of some of the girders

should be altered as shown in red chalk

on the Drawings.

(9) It is not definitely mentioned

whether the timbers proposed to be used

for floors and roofs would be those

applicable to Appendix I or Appendix II

of Circular Memo. No. 110

Corrections made in this office in red chalk are applicable to the latter class and may be adopted.

(10) The pitch of roofs as shown on drawings is 30° or less. It is desirable that it should be increased to about 34°

i.e. 4/3 on the West Coast.

(11) (a) According to Circular Memo. No. 4588-C dated 9-6-13 the permissible limit pressure on the laterite used on the West Coast is 2½ tons per sq. ft. The following are a few of the instances where this limit has exceeded :-

Piers marked in red on D.P.I. No. 191	Pressure in tons per sq. ft.	
	First Floor	Ground floor
(b)		
A	2.98	7.10
B	..	3.89
D	..	3.51
E	3.55	6.51
G	..	5.14

(b) The pressure on the brick column marked F is 9.40 tons against the permissible pressure of 4 tons per sq. ft.

OUT HOUSES

(12) The purpose for which the First floor rooms are intended to be used is not known. King post trusses should be used instead of couples for carrying the roof, the span being 20'.

the rise should be 1/3 of the span

(13) The passages and verandahs, are, it is considered, extravagant. The rooms are without sufficient ~~light~~ light and ventilation, $\frac{1}{2}$ " cement rendering over hard beaten ^{mud} is provided for flooring; a layer of concrete is recommended.

SITE PLAN

(14) The latrines and bath rooms and the Kitchen are within about 16 feet from the main building. For purposes of sanitation the distances between one another should be at least 30 feet.

(15) The rates in the estimate have not been supported by detailed data. The cost of Rolled steel girders at Rs.25 per cwt. i.e. Rs.500 per ton is high.

(16) With these remarks, the plans and estimates are returned for revision.

Sir,

Page 7 ante

Page 10-12 infra

With reference to memorandum No. 3942/16-1, dated 6th February 1917 in connection with the construction of a boarding house with subsidiary buildings for St. Ann's Girls' High School, Mangalore, I have the honour to submit for favour of orders a copy of letter No. 7 of 1917 dated 17th March 1917 of the Correspondent stating that some of the suggestions made by the Chief Engineer cannot be adopted. The revised plans referred to in her letter are also sent herewith. In connection with II (1) of the

Chief

...No. 7362/16 dated 31st October 1916 wherein a grant
of Rs. 32,000 only was recommended because the scale of accommodation
was in excess of that laid down in the Grant-in-Aid Code.

I have the honour to be,

Sir,

Your most obedient servant,

N. A. Anur

for Director of Public Instruction.

5.4.17.

Copy of letter No. 7 of 1917 dated 17th March 1917 from
the Correspondent, St. Ann's Girls' High School, Mangalore.

In accordance with the Chief Engineer's note No. 741-C
dated the 31st January 1917, I have the honour to re-submit the
plans for the proposed boarding house and subsidiary buildings
at Bendore, after revision where possible. I shall thank you for
early approval of the plans and for permission to proceed with
the estimate.

The original drawing of plan No. 1 and 2 have now been
sent; tracings and duplicate blue copies will be made after the
plan No. 1 and 2 have been finally approved of.

In the Chief Engineer's note there are a few points
which I must respectfully beg to differ from. I shall esteem it
a favour if you will note my reasons and allow my reasonable
wishes.

(1) Practically it cannot be shown that a room 62' x 20'
can accommodate 41 boarders as the Grant-in-Aid ^{Code} contemplates.

Each bed-stead requires at least 8½' x 5' or 42½ sq. ft.
As the doors and windows open inside the room 9½' x 5' or 47½ sq. ft.
is required for one. Then there is another consideration: We have
in the plan shown accommodation for 68 boarders only, while we
actually have 81 boarders. But by the time the boarding house
will have been completed we may expect their number will not be
far below a hundred. The most weighty consideration however in
favour of rather generous accommodation, is, the fact that until
a High School building will have been provided, the Boarding
House will have to make class room for teaching as well as for
Hostel purposes.

The width of dormitories viz 20 feet, I am very anxious
to retain; reducing this would be a great disappointment to me as
it would not only seriously affect the smaller rooms and verandhas
but would deprive the dormitories of that air of comfort and

secured by plentiful ventilation and light. The

50348 ①
22.4.13
80 1532
10.11.13 ② F
-2-
The Tellicherry and Calicut Buildings sanctioned by Government and just completed, are all 20 feet in breadth. The least width in our existing dormitories is 19'3" and provision made for each boarder is 49 superficial Sq.feet.

(The arrangement of beds is shown separately)

2. In view of the expectation of an increase of boarders we had provided for closed walls with windows in the eastern verandahs. These verandahs could when necessary, provide sleeping and dressing room accommodation for boarders. For this purpose I request that the eastern verandahs may remain closed as now shown in the plan.

It will be noticed that all the eastern walls of the dormitories are arched. This arrangement provides more ventilation and light in the room without increase of cost for extra windows.

(3) The details of Chapel asked for have now been put in, as well as windows between XX and YY

(4) The bathrooms attached to the dispensary and infirmary are meant exclusively for sick boarders. The doors leading to them have been differently arranged.

(5) The steps leading to front verandah have been shortened.

(6) I fail to see any objection to the boarders of end dormitories going through the lavatory as they have to use it in common with the other boarders in the larger dormitories.

(7) and (8) This has been altered as requested.

(9) The corrections in sizes of roof scantlings made by the Chief Engineer have been adopted. My reason for having slightly bigger sections was on account of the extra load of hollow sloping hourdies (11½ lbs) per sq.ft which have been proposed and estimated for.

(10) My designer tells me that a roof with these proposed sloping hourdies and Mangalore (Mission) tiles will be water tight even if with almost no slope at all. It would have been better to retain the slope of 30, as it would admit more light and ventilation into the dormitories; however your suggestion has been adopted.

(11) a & b. The corrections called for have been made.

OUTHOUSES

(12) Loft No.1 will be used as rice store.

Loft No.2 will be used as provision store.

Loft No.3 will be used as fuel store.

King post trusses have been introduced instead of gables.

LATRINE & BATHROOMS

(13) The verandahs are deemed absolutely necessary to prevent the children drenched during the long heavy monsoon. This space is also needed for drying children's clothes during the rains.

Any number of skylights and ventilators will be fitted in the roof where required and the cost met from contingencies.

A layer of concrete 3" thick will be substituted for hard beaten mud under cement plastering.

SITE PLAN.

(14) The outhouses latrines and bathrooms will be placed about 30 feet from the main building.

(15) Private contractors and designers are averse to publishing their data and I can hardly demand this from them. This is also not mentioned in Circular 116 C; but should data for any special item be absolutely necessary, I shall endeavour to get it.

The cost of rolled steel girders at present is Rs.15/- per Cwt. (subject unsold) Madras or Bombay. Railway and Steamer freights have been raised, therefore it was thought expedient to allow Rs.10/- for conveyance and charges to site. The obtaining of any is uncertain. I would suggest that this rate may be retained should there be a saving effected, Government will have the advantage as well as we.

for Director of Public Instruction.

137
10
With reference to the defects pointed out in the E.W.Note No.741-C dated 31-1-1917 in connection with the plans and estimates for constructing a boarding house (with subsidiary buildings) for St.Ann's Girls High School at Mangalore, South Kanara District, the Director of Public Instruction submits revised drawings for approval.

137 C.F.
flagged 'J'
II. The revised drawings have been examined in the Chief-Engineer's office and it is observed that the defects referred to above are not completely rectified. A fresh drawing No.A dated 12-10-17 fulfilling the necessities of structural stability and containing alterations in the ~~partition~~ positions of Matron's room, Infirmary and small dormitories over them so as to preclude the necessity of making lavatories as passages, has been prepared in the Chief Engineer's office and recommended to be adopted.

III. It is reported by the correspondent that, for light and ventilation, a number of ventilators will be provided in latrines and bath rooms. The Drawing D.P.I.No.191(d) does not shew any such ventilators.

IV. The height from the floor to the bottom of tie beams in out-houses is only 5'-6" according to D.P.I.No.191(c). This height should be increased to, at least

V. With these remarks, the drawings are returned for further revision.

Department.

Sir,

With reference to your Memorandum No. 3942 B-2
dated 29th November 1917 in connection with the construc-
tion of a boarding house with subsidiary buildings for
the St. Ann's Girls' High School, Mangalore, I have the
honour to submit herewith the revised plans and estimates
in duplicate received from the Correspondent with a
copy of her letter No. 19 of 18 dated 4th June 1918.

2. The Correspondent has been asked to submit one more copy of each of the plans which will be sent on receipt.

I have the Honour to be,

Sir,

Your most obedient servant,

N. A. Arivu

for Director of Public Instruction

Copy to the Correspondent for compliance

Y. V. /21/6

Letter 19 of 1918 dated 4th June 1918 from the Correspondent, St. Ann's High School, Mangalore.

With reference to my letter No.2 of 1918 dated 15th January 1918 and No.6 of 1918 dated 21st February 1918 and your office Reminder dated 25th April 1918, I have the honour to forward plans and estimates of our Bendore Boarding House, revised in accordance with the Chief Engineer's note No.7332 C dated 22nd November 1917 and his plan furnished together with Proceedings Ref. on C. No.7362 of 17 dated 8th December 1917.

2. By the substitution of a timber flooring instead of hourdies and cement; and wooden beams for R.S. beams except in the Central Hall, I had expected the estimate to be considerably reduced, but I very much regret to find that owing to the considerable increase of thickness of all the walls on the ground floor and consequent increase of depth and breadth of the foundations, and general increase of price of materials specially of imported ones like Iron, Cement and Zinc - the estimate of the whole scheme has risen from Rs.82,849 to Rs.94,349/-.

3. I earnestly request the Director will be so good as to recommend this urgently needed building for Government sanction so that during this building season the foundations of it may be laid.

To The Secretary to the Government of Madras,
HOME (EDUCATION) Department.

Sir,

In continuation of my letter No.7362/16 dated 22nd June 1918, I have the honour to submit herewith one more copy of each of the plans relating to the construction of a boarding house with subsidiary buildings for St. Ann's High School, Mangalore.

Home (Ed) Dept

The PWD No. in continuation
No. 1316B-1 dt 27.6.18

A. 9.7.18

Ed. I. 3/7

I have the honour to be,
Sir,
Your most obedient servant,

N. A. Arivu

For Director of Public Instruction.

The Director of Public Instruction - submits 6 drawings and detailed estimates amounting to Rs. 1,06,025 for a grant-in-aid towards the cost of constructing a Boarding house for the St. Ann's Girl's High School at Mangalore, South Kanara District.

The particulars of the drawings and estimates are as follows.--

	Rs.
(1) Drawing No. I and II : Main Building based on Drawing A dated 12-10-17 prepared in the Chief Engineer's Office ...	75,974
do. Chapel ...	11,676
(2) Drawing No. III : Out-houses	6,556
(3) do. No. IV : Latrine and Bath rooms with covered - passage ...	3,500
(4) do. No. VI : Compound wall, gate and road culvert &c.	5,851
(5) do. do. well including tank, pump, pipe &c.	2,468
(6) do. No. V. Site plan	-----
Total	1,06,025

II. The drawings and estimates have been scrutinized in the Chief Engineer's Office and it is observed that provision is made for wooden beams to support the 1st floor in all rooms except that in the central hall for which rolled steel girders are provided. As the latter are now costly and difficult to be had it is preferable to use wooden beams of suitable sizes, necessary alterations have accordingly been made in the drawings estimates. The sizes of timbers support

other floors and also roofs have been altered where necessary. As the pressures on the piers supporting the floor beams and roof trusses of out-houses (Drawing III) exceed the permissible limit for laterite, their sizes have been increased from 1'-6" x 1'-6" and 1'-0" x 1'-0" to 2'-0" x 2'-0" and 1'-3" x 1'-3" in the ground ~~xxxx~~ and 1st floor respectively.

By these alterations the total amount of the estimates is reduced from Rs. 1,06,025 to Rs. 99,210 as shown in the following summary:-

	Rs.
(a) Main building	66,974
(chapel)	13,956
(b) Out-houses	6,391
(c) Latrine and bath rooms with covered passage	3,570
(d) Compound wall, gate, Road culvert &c.	5,851
(e) Well including tank, pump pipe &c.	2,468

Total	99,210

III. The height from the floor to the bottom of the beams of trusses in out-houses (Drawing III) is only 5'-6". This height should be increased to at least 8'-0" as recommended in paragraph IV of the note by the Chief Engineer No. 7332-C dated 22-11-17.

IV. As designed, the latrines and bath rooms (Drawing IV) would not have sufficient light and ventilation. It is remarked on this drawing that "any number

(F)

of skylights and ventilators will be fitted where required," but no provision is made for them in the estimate. The cost of this building amounting to Rs. 3,570 according to the alterations made in the Chief Engineer's office includes Rs. 150/- for this purpose.

V. The Superintending Engineer should satisfy himself that proper light and ventilation are provided for bath rooms and latrines and that the foundations of all buildings are suited to the soil at site.

VI. With these remarks the drawings and estimates, as altered in the Chief Engineer's Office, the latter aggregating Rs. 85,254 excluding the cost of chapel, towards which no grant has been applied for, are recommended for approval.

Copy of letter No. 29 of 1918 dated 21st October 1918 from the
Correspondent, St. Ann's Girls' High School, Mangalore, to the Director
of Public Instruction.

With reference to proceedings R.C. 7362/16 dated 18-10-18, I have
the honour to report that the boarding house will not be absolutely
confined to the pupils of the High school, e.g. any lay teachers
employed in the High School will also board and lodge in the same
house. The management, that is house-keeping in all its details will
be in charge of two sisters unconnected with school work, and one of
the teaching sisters will superintend the management and stand
responsible for the moral conduct of the boarders.

I dare to hope that the present communication is a presage of
sanction soon to follow.

Have you satisfied yourself that the boarding house will be confined to the pupils of the high school & the management will be vested in a teacher or teachers of the school? With reference to H.E. orders in similar cases, the above conditions are requisite for a Govt Grant

Apparently Go. No. 1802 Home (Edu)
8.8.18

The D.P. has requested to furnish the information required by the Secretary above. A draft memo is submitted for approval.

The D.P. has specifically stated that the boarding house is in connection with the 8th Amis girls high school. It was therefore presumed that the house will be confined to the pupils of the school & will be looked after by the staff thereof. Any how we may make sure of the point.
Issue Memo.
