(M)

I have the honour to state that in G.O.No.49/Ed

Mis., dated 12th October 1916, the Government was pleased to
sanction a grant of Rs. 2200/- for the extension of the Muni-
cipal High School building. Before the work could be started
it was brought to my notice that the estimate prepared by the
late Overseer contained several mistakes whereupon, in the
absence of any professional gentleman on the Council and in

view

view of the importance of the building, I referred the estimate to the Executive Engineer, Salem Division, for advice in the matter. The Executive Engineer in his letter No. 186 M dated 10-2-17 ---
G.5.
issued the necessary instructions to me for recasting the estimate for the proposed building. The estimate was accordingly revised by the present Overseer and the cost of the extensions as per revised estimate came up to Rs. 4500/-. This was placed before the Council at its meeting held on 26 -11- 17 and approved. The revision of -- the estimate as per suggestions of the Executive Engineer and the -- rise in the market-price of all the building materials necessitated an increase in the estimate originally prepared.

2. In the circumstances stated above, I am obliged to approach the Government with a request to raise the Grant from Rs. 2200/- to -- the figure of the revised estimate viz Rs. 4500/-. The object in view of providing additional accommodation to the High School which has been repeatedly insisted on by the inspecting authorities and the Director of Public Instruction in his latest Proceedings Dis.No. 784 dated --- 2 - 2- 18 cannot be achieved without the additional amount required. -- The work is now in progress.

3. I therefore request that the Government will be kindly -- pleased to sanction an additional Grant of Rs. 2300/- required to complete the work. The accommodation of the school, at present, it is -- needless for me to say, is quite insurcient and unsuitable and with the additional building now under construction, it is hoped that the present difficulties will in a way be got over and the school will be placed in a condition which can fairly meet its present urgent needs.

4. A copy of the Executive Engineer's letter, the revised -- sketch and estimate, the Council's resolution, an extract from the -- inspection notes of the High school for 1917-18 and the Proceedings of the Director of Public Instruction dated 2-2-18 are herewith submitted.

I have the honour to be,

Sir,

Your most obedient servant,

Chairman.

Copy of letter from M.R.Ry. M. Gnanaprakasam Pillai Avl., Sub-Divisional Officer, Tiruppattur No. 172-M/dated 20-1-17, to the --- Chairman, Municipal Council, Tiruppattur, through the Executive -- Engineer/8, Salem Division.

Ref:- Your No. 397-Mis., of 16 dated 26 -10-18.

With reference to your No. quoted above, I have the honour to issue the following instructions for recasting of the estimate -- and plan for the proposed extension of the Municipal High School, -- and you will please get it done by the Municipal Overseer.

In the proposed extension, there are four rooms each --- measuring 21' x 16'. For such a length and breadth, the roofing -- with the ridge piece and rafters may not answer satisfactorily, as the ridge piece has no support in the middle. It is better to provide couples with 2 collar pieces for the whole roof, omitting the ridge piece altogether, and the rise also increased to 1/3 of the span.

FOUNDATION. The concrete foundation has taken to 3' below ground level where gravel met with, but as it is not very hard, it may be taken 1' deeper.

Basement. The floor of the building is 1½' above ground level, which is enough.

Superstructure. The masonry in superstructure has been -- proposed to be built with brick in clay and also the arches over -- doors, windows and other openings, as well. This if done, will cause white ants to get in easily and damage the roof timbers, doors and -- window frames etc. in the long run. So, it is better to construct -- the walls with lime mortar instead of clay, or if this is costly, -- brick in mortar for one foot over top of wall and one foot all round doors, windows, and openings will do.

Doors. May be allowed as provided for in the estimate.

Windows. The dimensions of the windows are too small for a school building and as there is only one window on each side of the building, bigger windows may be provided, so as to admit --

4 2/-
sufficient light and ventilation for holding classes.

Wood work. These may be of Pillamarudu wood and made up of couples with 2 collar pieces, one just above the wall plates and the other 2½' or 3' above that and the arrangement of the roof as provided for is very defective.

Roofing. This may be of flat and pan tiles over teak reepers and -- chunam borders etc., as provided for.

Doors and windows are to be painted with chocolate paint.

All the other roof timbers are to be wood oiled.

Flooring may be allowed as provided for (i-e.) Cuddapah slabs for -- the main building and concrete for the passage.

As for the rates for the various items of works, I think the Municipality can arrange to get the present schedule of rates prevailing in the --- local ~~and~~ fund department.

So I think that the Municipal authorities may revise the plan and -- estimate as per alterations suggested by me regarding the various items ---- separately.

No. 186 M of 10 -2 - 17.

X

X

(1) Insufficient, unsuitable, and in every way unsatisfactory. Last year's remarks have to be repeated in toto; -- nothing has been done since. It is said that the Municipal -- Council has some funds earmarked for extension of this school. But the delay in utilizing these for providing at least the --- most urgent of the needs - namely 4 class rooms, a retiring --- room for teachers and a reading room for the boys- is inexplicable. The proper solution of the problem of accommodation for this school is of course the provision of a new up-to-date pukka building. For the present one is totally unfit and recognized to be so. But this may take a long time, and the needs just -- pointed out are of imperative urgency admitting of no delay, - if children who attend the school are to be saved from the -- effects of lack of reasonably fresh air and lack of reasonably - good light. The First form and the third ~~form~~ class, for --- example, are accommodated in vilely ventilated and vilely --- lighted rooms.

In G.O. 49 Educ 8/12.1.16, the Govt. sanctioned a grant of Rs. 2,200 to the Tirupattur Municipal Council for the extension of the High School buildings. The Govt. agreed to bear the full cost in view of the impecunious condition of the municipality.

2 In his letter dated 6-4-17 (pages 1-2 of G.O. 834 M & 11.5.17) the Chairman remarked :-

"The grant of Rs. 2,200 already sanctioned by Govt. in G.O. 49 Edl & 12.1.16 is not quite sufficient for the proposed extensions and with the amount of Rs. 4687-6-1 at its deposit under Savings from Provl. grants, the Council expects to bring into existence a building decent and sufficient to answer the immediate purposes of the school. The Council is unable to meet the expenditure from its normal resources as already reported by me."

Govt. however declined to accept the proposed diversion of the unspent balance of the Sanitary grant for carrying out the improvements to the High School.

vide G.O. 834 M & 11.5.17.

3 In his current letter dated 5.3.18, the Chairman states that the estimate of Rs. 2,200 for which a grant was given in G.O. 49 Edl & 12.1.16 has since undergone

for sanitary purposes.

No. 1-2 of

revision and that the cost now comes to Rs. 4,500 after taking into account the rise in the price of building materials. Some (Edwar) and L. & M. propose that an additional grant of (Rs. 4,500 - 2,200 or Rs. 2,300 should now be given by Govt.

4 It may be noted that the proposed improvements at an estimated cost of Rs. 4,500 are intended to cover meet only the present urgent needs. The Council will probably come up later on with the request that the cost of future improvements should also be borne entirely by Pool-funds.

5 In the circumstances, it is for order's whether L. & M. may be requested to state whether the present financial position of the municipality is such that it cannot afford to find the sum of Rs. 2,300 referred to above.

6th / suppose it is. However 2958 L. & M. see. This might also be considered grant from which the account can be met.

revenue and Sept
The present financial position of the Trüppfalter mun. Council is far from being sound, the municipality having had an average annual deficit of Rs 428 in its normal revenues during the triennium ending 1916-17 - vide p. 6 of notes to G.O. No. 1358 M, dt 10-8-1917. The Council's budget for the current year as revised by Govt. closes with a balance of only Rs 730 under general funds or 1.7 per cent of the estimated ordinary receipts - (Para 6 of G.O. No 390 M, dt 8th March 1918). The Council cannot therefore provide the amount of Rs 2300 now required from its own funds.

2. With reference to the remark of the Assistant Secretary at A on the previous page, it is subd. that the Council had with it on 1st January 1918 an unspent Provincial grant of Rs 16,692, of which Rs 2200 related to educational building grants and Rs 14,492 to sanitary grants. The former is the Sanitation in from 4 21 712-1-1916 for utilized on the proposed extensions to of the high school building for which an additional grant of Rs 2300 is now applied
