From

S.Radhakrishnan

Sub Overseer P.W.D.

Bellary Division, III circle.

To

The Chief Engineer,

Public Works Department,

M A D R A S,

Through

The proper Channel.

Most Honoured Sir,

Adverting to the Chief Engineer's memorandum No 2721-C dated 30-4-18 to the Superintending Engineer III Circle, I most humbly beg to bring the following representations for your honour's kind perusal and favourable orders.

I entered this department in my early age of 17 as a work establishment maistry on the Agricultural College and Research Institute works at Coimbatore in July 1911 and since then without any break of period I have been serving this department having been entertained here as an acting Sub Overseer in this Division from October 1913.

During this period of nearly seven years in the department I have been employed on various branches of works, buildings, irrigation, breach closing, investigation, water supply, and office also-and throughout the whole period and in all the different kinds of works entrusted to me I have been discharging my duties to the entire satisfaction of my Superiors having had to work almost always under the direct orders of the Sub-Divisional Officers and for a short period under the direct orders of the Engineer-in-charge.

Sub Overseer in this Division (ie) for the

the entire satisfaction of my Superiors.

Appendix A shows some of the works completed by me while in the Agricultural College and Research Institute works Coimbatore (period 2 years and 3 months- July 1911 to October 1913) and in addition to those, various other works including maintenance of the several buildings in the Colony, all costing over 4 lakhs of Rupees were all done by me under my direct Supervision. For the new Forest College that was recently completed there, I aligned most of the Roads and prepared a good portion of the bricks having been in charge of the brick fields managing two ~~Bull~~ kilns under my supervision.

Almost all the detail plans for the entire fittings of the College and Research Institute were prepared by me which might even now be available in that Division and bear witness to the ~~enthusiasm~~ ^{enthusiasm} of my works there.

After my having come to this Division as an acting Sub - Overseer (period 4 years and 7 months- from October 1913 to date) the following are some of the important works executed by me.

1. Closing breaches in Bachigondanahalli tank Hadagalli Taluk: This tank which was taken ^{up} for restoration unsuccessfully for some years ~~passed~~, was finally and successfully closed by me under my direct supervision.

2. The Tungabhadra channels of Hospet for which no proper levels had been taken before and no repairs carried out properly were dealt with by me, proper levels taken, large estimates prepared, (about Rs 30,000) and executed, the results of which are seen from the ~~few~~ very few complaints the Revenue Department now have on the channels and easy distribution of water.

3. It is only in my short period of two months in Hadagalli section charge I completed the Police station Here-Hadagalli and started Ittigi Police works which were long pending.

4. The works at Alur, constructing a Stationary Sub-District office estimate Rs 13, was started

was completed during my period starting from foundations.

5. The detail investigation of the Kottur Tank supply channel which was very long pending was finally taken ^{up} by me and completed in a couple of months with all levels, detail plans, surveys, and proposals at an estimated cost of Rs 80,000/-

6. The infiltration gallery of the water supply scheme Anantapur estimate Rs 15,000/- was started by me with the first shovel of earth about middle of January 1916 and completed in 6 months with all special difficulties I had in managing two steam Engines and pumps apart from many others.

7. When taken to the drawing branch of the Division Office for about 6 months, I have cleared a number of long pending references which required special attention in addition to the routine works of the division given to me every now and then.

8. The most important work of finally measuring up the Police Recruits school buildings at Anantapur, recently finished at a cost of about two and a half lakhs of Rupees, was entrusted to me which I managed successfully and prepared the final bills for closing the works.

9. The investigation of the Malakapuram, Hagari anicut scheme otherwise called the Veprella supply channel project which was pending for years together in the Division was completed by me and preliminary report prepared and submitted at an anticipated cost of about Four lakhs of Rupees.

Added to these above I have done other miscellaneous works too many to be enumerated here and in every direction my works have been approved of.

I have encountered ^{ed} with various difficulties for the successful prosecution of works entrusted to me which have been represented to my Superiors repeatedly. I had to subject myself to frequent transfers from place to place entailing a heavy cost (T.A. permissible for a Sub-Over seer of P.W.D. drawing below Rs 50/- being quite inadequate even for ~~the~~ half the

4
works scattered throughout the Division having been entrusted to me. I have had frequent breakfalls^d in my health owing to the unhealthiness of these districts and I can assuredly bring to your kind notice that I have actually shed blood for the sake of successful goal on works.

All the above difficulties I underwent with the fullest idea of getting proper recognition and recompense for ^{my} hard and honest work in the shape of a permanent exemption from the Lower Sub-ordinate test of the College of Engineering which my Officers have been promising very often and which qualification I have been so unfortunate not to possess.

After repeated representations of my good works to the Superintending Engineer for two years by my immediate Superiors and Executive Engineer, he at last recommended me for permanent exemption and this has now been refused vide let sentence of the Chief Engineer's memo.

This is really throwing into ^{me}depair and confusion and I beg to bring to your honour's kind notice the liberal permission granted under sentences 2 and 3 of the Chief Engineer's memo may not apply to my case as I have been and wish to be only an executive Sub Overseer where-as the other two men have been draftsmen.

As there is no provision under Public Service Notification to qualify myself as an executive Sub Overseer of P.W.D. by passing technical examinations, I am with all humility preferring this appeal for your honour's kind consideration of my case specially.

As for my qualifications I am not entirely wanting in that in as much as I have received education up to the matriculation standard and passed the marginally noted ~~task~~ subjects in the technical examinations of the government of Madras and possess the qualifications for a permanent minor Irrigation Sub Overseer of the Revenue Department Vide Public Service Notification.

- Subjects passed* *Grade*
1. Surveying and levelling . Intermediate grade
 2. Building drawing and construction . do
 3. Building ~~making~~ . do
 4. ~~Building~~ . do

x noted below

Subjects passed

grade

- | | |
|---------------------------------------|---------------------|
| 5. Hydraulics and irrigation works | -Intermediate grade |
| 6. Practical plane and solid geometry | -Elementary grade |
| 7. Mensuration | do |
| 8. Bridge work | do |
| 9. Applied mechanics | do |

I was even actually offered some places in other departments with chances of being made permanent there with better prospects but my superiors in all these cases persuaded me to continue here alone with promises that they will get me even better chances in this department alone. After a long service here I wish greatly to be in the department where I have started and picked up some knowledge and experience to be in touch with the varieties of works and every day development of engineering sciences as far as possible.

Copies of few testimonials possessed by me are herewith submitted for your honour's kind perusal.

Under these circumstances I most obediently beg that my case for permanent exemption from the Lower Sub-ordinate test may be favourably considered and recommended to the Government.

I beg to remain,

Most Honoured Sir,

Your most obedient servant,

S. Radhakrishnan
24.5.18.

Sub Overseer. P.W.D.

APPENDIX A.

List of works completed by me in the A.C. and R.I. works
Coimbatore between July 1911 and October 1913 period two years
and three months.

1. Constructing quarters for the Government Mycologist.
2. do do Entomologist.
3. Constructing a dairy for a Farm.
4. Pot plant and culture house.
5. Engine and pump house.
6. An Insectory for Entomologist section.
7. Masonry Reservoir.
8. A veterinary Hospital and an operation shed.
9. Providing additional furniture and fittings to the A.C. and R.I.
10. Improvements to the mycologist laboratory and providing fittings
11. Rain water collection tanks for storage of rain water from the
main roof of the College and Institute.
12. Extensions and Hostals and dining blocks.
13. Improvements to the Entomologist laboratory and fittings to the same.
14. Construction and repair of two bull's skulls
15. Additional B and C. Type quarters.
16. Laying pipe lines and providing water fountains.
- xx and many other miscellaneous works in the Colony too many to make
mention of.

S. Ramesh Kumar
Incharge, P.W.D.
24.5.18.

Copies of Testimonials

1. This is to certify that S.Radhakrishnan has been working in this sub division for the last two years and three months and has acquitted himself satisfactorily in every way. He has been employed entirely on building works and in this branch is more than usually experienced for his ~~xxx~~ years. He is a good draftsman and prepares ~~and~~ estimates and bills with facility. His age is 21 and is now drawing Rs 35/p per month. He leaves on being appointed an acting sub Overseer in the department.

It appears that this man has been compared with two draughtsmen which I beg to suggest is not correct as this man is far superior to a Draughtsman. He is in fact an excellent executive Subordinate. I have already reported very highly of him so I need not repeat my recommendation but I beg to point out that as he is qualified by examination to be made permanent as a Minor Engineer Sub. Officer we cannot expect to retain him in D.P.W. unless he is given a permanent exemption from attending College. He is certainly worth retaining so I beg to request that the question of exemption may be re-considered.

of 30.4.18 and the notes with it. The S.E. III Circle now requests a reconsideration of the orders passed in the above memo, in regard to Mr S. Radhakrishna Ayyar, Sub-overseer, and requests that he may be permanently exempted from the lower subordinate test.

2. Attention is invited in this connection to memo no 1013C of 8.2.17 and the notes with it. Having regard to the remarks therein of Mr James Principal College of Engineering, permanent exemptions from the lower subordinate test have as a rule been refused since then. The reasons for not granting permanent exemptions are:-

(1) That such exemptions will be prejudicial to the prospects of passed men,

(2) That men recruited to the

9P

lower subordinate establishment in the P.W.D. should be fit to discharge both executive duties and draftsman duties.

3. In the present case the man has been serving in the P.W.D. as an acting sub-overseer since ^{October} 1913. He has also during this period done draftsman's duties. All his officers speak highly of his work. It is also a fact that it is difficult to secure passed lower subordinates for employment in the III circle. The man has also passed in ^{most of} ~~almost~~ all the subjects prescribed for the lower subordinate in the College of Engineering.

4. In the above circumstances the man's ^{permanent} exemption from the lower lower subordinate test may perhaps be recommended to Home (Ed) for sanction.

The subordinate appears to be considerably above the average
