R. C. No. 9032/17

Station Madras, Dated the 5 December 1918.

From (Name) The Hon'ble Mr. H. S. Duncan, M. A.,

(Designation) Ag. Director of Public Instruction
MADRAS.

To The Secretary to the Government of Madras,

HOME (EDUCATION) Department.

Sir,

I have the honour to submit herewith the plans bearing Nos. 233 A to D with estimates amounting to Rs. 61,300 for the construction of a building for the C. R. C. High School, Perambur, Madras, and to recommend that a grant not exceeding one-half of the total cost may be sanctioned, to be paid when funds become available.

I have the honour to be,

Sir,

Your most obedient Servant,

Naarive

for Director of Public Instruction

Y. V. /4/12

2849 July 3 E. W. N. O. T. E. 3
181 8-13-19

The Director of Public Instruction in his R.O.No.9032/17 dated 5-12-1918 submits four plans (Nos.233 A to D) and an estimate amounting to Rs.61,300/- for constructing a building for C.R.C.High School,Perambur, and recommends a grant-in-aid of half the cost of the building.

II. The plans and estimate have been examined in the Chief Engineer's office and the following defects are observed and necessary alterations noted in the plans.

(1) Plan 233-B, the beam 9" x 12" under the 1st floor in the staircase is only 5'-2" and 4'-5" above the 13th step and 14th step respectively, and in order to provide sufficient headway, this beam is removed beyond the trimming joists 4" x 9" as well as the portion of the 1st floor to the North of the trimmer.

(2) The windows Nos.4 and 5 on the 1st floor will then be inaccessible and may be converted into fixed glazed windows.

(3) The window No.5 on the ground floor will be a fixed window as it will not be possible to open in account of the staircase.

(4) The pediment and its entablature shown in section(Vide plan 233-B No.2) appear to be top heavy and likely to tumble down. The 9" overhanging portion of the entablature should be supported by

by ~~either~~ lintels beams supported

on the pillars as shown by red lines

or by cut stone cantilever projecting

from the wall and the pediment construct.

ed as per section shown in flap enclosed.

(5) Arrangements should be made to get

rid off the rain water flowing down the

roof by suitable drains behind the pedi-

ments (vide flap enclosed)

(6) On the East and south side Eleva-

tions for gutters and downpipes to take

off the rain water from the walls, appear

to be necessary.

III. With these remarks, the plans

and estimate amounting to Rs. 61,500/-

are recommended for sanction.
