Ref. on Current No. 10626 of 1920.

Station Madras, Dated the 10 March 1921.

From (Name) R. G. Grieve Esq., M. A.,

(Designation) Ag. Director of Public Instruction,
Madras.To The Secretary to the Government of Madras,
Home (Education) Department.

Sir,

The Principal, College of Engineering, reports that since the transfer of the college to Guindy it has been found essential to have one of the senior staff acting in the capacity of Resident Engineer to supervise the control of Power and Light to the college buildings, Hostels, Laboratories, Bungalows etc, and to maintain the successful operation of the sewage plant. All this supervision is entirely extra to the normal work of the college staff and necessitates the residence of a senior Officer on the premises. The Principal states that the Power House Superintendent is not sufficiently highly trained to carry out --

this supervision, in addition to attending to his own duties.

2. The Resident Engineer will have also to undertake the supervision of electrically driven pumps for the water supply from Saidapet and the proposed electric installation at the Teachers College, Saidapet, and the King Institute and the Government House, Guindy. Although these schemes have not yet materialised a great deal of work has to be done in ~~scheme~~ scheming out temporary wiring to main building, hostels, bungalows and — sewage plant and making temporary arrangements for pumping sewage which has to be done several times daily.

3. He accordingly recommends that one of the Professors may be appointed to do this work as Resident Engineer of the college who may be given a rent free bungalow. I have carefully considered ~~the~~ his request and I am of the opinion that there is a real need for the post. I request ~~therefor~~ accordingly that the post may be created with effect from the opening of the college at Guindy as Mr. Mathews, Professor of Electrical Engineering has been doing the work referred to in paras 1 and 2 above since — that time.

4. The proposed appointment of a Resident Engineer on the basis suggested above has had the support of the Board of Visitors of the college of — which the Chief Engineer is a member.

I have the honour to be,

Sir,

Your most obedient servant.

Subbaraman Chellu
for Director of Public Instruction.

Law (Ed. 2)

c. 10/23/A, from the D. P. D., 10.6.26, d/10.3.21

Subject.
Appt. of a Resident
Engineer in the premises
of the college of
Engg., Guindy

The Director seems to

have made out a case for the appt. of a Resident Engineer and for giving him a rent-free bungalow. On the latter point attention is directed to the G.O.D. letter disposed of in G.O. No. 1433 Ed. No. d/9th Nov. 1918. On that occasion India declined the grant of free quarters to the Electrical Engineer, among others, holding the view that such a concession would be authorized only in return for certain definite obligations in respect of the supervision of students out of class hours. It is for consideration whether the case as now reported may be represented to India & they be asked to admit another member of the Engineering college staff to the concession of occupying ~~rent~~ quarters rent-free. P.W. 8 and Finance may be consulted.

15.4.21

15.4.21

Letter No. 369 (P)
19.3.18
(9)

The former reference to the Govt. of India was solely based on the necessity for the staff concerned to live in the immediate for the present. as we have no

neighbourhood of the College. The present proposal to allow free quarters is intended more ~~than~~ as a sort of remuneration for certain services required of the members of the Staff which are regarded as being outside the scope of teaching work. Though the Pover House Superintendent may not be able to exercise general supervision over the whole work, he may be trusted to be in general charge of the work during the absence of the Officer who may be vested with the authority of general supervision. It does not therefore ^{seem} essential for the purpose of general supervision alone that residential quarters should be provided for the officer in the College compound. The Pover House Supt ought to be able to attend to any emergent calls.

As regards remuneration for general supervision, the question of the water supply of Saidapet & the electric plant of the Teacher's College, may be left out of consideration for the present, as we have no

information as to what additional work these will entail, in what stage they are & whether these addl duties if entrusted to an officer of the Engineering College will ~~interfere~~ interfere with his legitimate duties. The question may ~~there~~ be left over for consideration when if these works are in ripe condition to be handed over to an officer for maintenance. Excluding these the ~~main~~ general supervision of the Power House alone remains. It has not been considered till now that a separate officer or a special remuneration from existing officer should be provided for this alone. It has generally been thought that this work is within the legitimate functions of the Professor of Electrical Engineering. The Power House is ~~intended~~ has been located in the College premises ~~mainly~~ with the object of providing practical instruction for the students and as ~~such~~ ^{such} its supervision should be the legitimate duty of the Professor. It

has the assistance of the Bone House
Inspector and # of a Laboratory

Assist on the 200-40-400 p.m.

There seems therefore to be little case
for the appoint. of a separate Inspect.
for "general supervision" and to give
him free quarters for doing this
supervision work.

5. It is not considered that
the principle that a member of the
Teaching Staff of any College should
be responsible for the supervision of
the staff + machinery in connection
with water supply, electricity supply +
other engineering services of the College
except in so far as they are directly
concerned with ^{the} instruction of the Students
in his particular branch of teaching
should be accepted by any Educational
Authority or by any body of Teachers
themselves.

It is considered that
such work is outside the duties
for which they are employed and
that if such work is undertaken by
one of the Professors he should be
suitably remunerated.

5.

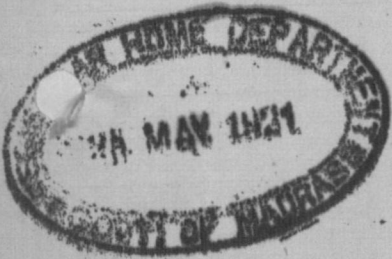

11-5-21

Yes. There is a great deal of
supervision required at College
of engineering industry of the
various plants and it will

23/5/21

I find that no case is made out for the appointment of a Resident Engineer with five quarters. The Power House Superintendent & the professor of Electricity are quite sufficient to supervise the installation. With supply schemes are still in a nebulous state and there afford to frame the suggestion of S. I consider this is the worst case in which Government should be forced to face quarters & Resident officer.

Government of Madras

U.O. Note No. 1073/A-2, Law (Education) Department

C.No. 1073/A, from the D.P.D., P.O. 10626/20, d/10.3.21

With reference to his letter read above, the

Director of Public Instruction may be informed that it is proposed to disallow his proposal for the appointment of a Resident Engineer with free quarters attached to the College of Engineering, Madras.

This information is given to enable the Director of Public Instruction, if he thinks fit, to lay his views personally before the Minister ^{in charge} or His Excellency the Governor.

191

No. 1121, dated 48 191

The Government consider that, in the existing state of the work, neither the appointment of a separate Resident Engineer nor the provision of a special remuneration for an existing officer of the College is needed for exercising general supervision over the ~~Power~~ ^{House} plant, which should be the legitimate ^{and} ~~function~~ of the Professor of Electrical Engineering. In carrying out the work he has the assistance of the Power House Superintendent and the Laboratory Assistant.

(The Government are accordingly unable to accept the proposal of the D.P.I. to grant free quarters to the Professor of Electrical Engineering for exercising the general supervision.
