The rate of progress depends upon the provision of funds. If more funds are made available, more schools will be opened. ~~It~~ Though the proposition as such has not yet been laid down that there should be one school for each or it may eventually happen that there will be even more than one in a D.P. The need for a school is determined purely with ref. to the demand in the locality.

U.O. Reply No.

We already have a programme for gradual adoption. Schools can be opened only as funds become available and as more women become educated and trained. I do not consider, however, that the resolution as it stands should be accepted since there is no necessity for the establishment of Government schools in centres where there are already good aided schools in existence.
